	b)	What are the differences between the inverting and non-inverting terminals? What do you mean by the term "virtual ground"?	CO1	7 Marks
		(OR)		
2	a)	What are the characteristics of an ideal Op-Amp? Discuss in detail.	CO1	7 Marks
	b)	Discuss the AC characteristics of an Op-Amp.	CO1	7 Marks

UNIT-II

3	a)	Prove that an Op-Amp can be used to find the log of a given analog signal.	CO3	7 Marks
	b)	Analyze instrumentation amplifier circuit using op amp and discuss its applications.	CO2	7 Marks
		(OR)		
4	a)	Evaluate the time period of a free running astable multivibrator used as square wave generator using Op-Amp.	CO2	7 Marks
	b)	How does negative feedback affect the performance of an inverting amplifier?	CO2	7 Marks

UNIT-III

5	a)	Design a second order Butterworth high pass filter having lower cutoff frequency of 1KHz.	CO3	7 Marks
	b)	Differentiate between band pass and band reject filters.	CO1	7 Marks
		(OR)		
6	a)	Design a second order high pass filter with low cut off frequency 2KHz.	CO3	7 Marks
	b)	Explain the following filters. i) Notch filter. ii) Band pass filter.	CO1	7 Marks

UNIT-IV

7	a)	The monostable multivibrator in the below figure, is to be used as Divide-By-3. The frequency of input trigger is 12KHZ. If the value of C is 0.05μF, what should be the value of R_A ?	CO4	7 Marks

	b)	Realize the Schmitt trigger using a 555 timer IC.	CO5	7 Marks
		(OR)		

8	a)	For a free running oscillator using IC555, for R_A=6.8 KΩ, R_B=3.3 KΩ and C=0.5 μF, calculate: i) t_{high}. ii) t_{low}. iii) duty cycle. iv) oscillation frequency.	CO4	7 Marks
	b)	How a 555 timer can be used to realize square waveform generator of frequency 3 kHz and duty cycle 50%?	CO5	7 Marks

UNIT-V

9	a)	Draw the schematic of a DAC. Draw and explain the working principle of a weighted-resistor DAC.	CO1	7 Marks
	b)	Give the standard specifications of ADC with the normal values.	CO1	7 Marks
		(OR)		
10	a)	Compare R-2R and weight resistor types of DAC.	CO1	7 Marks
	b)	Explain the operation of a multiplying DAC and mention its applications.	CO1	7 Marks

II B.Tech II Semester (SVEC-16) Supplementary Examinations March – 2021

PROBABILITY AND STOCHASTIC PROCESS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain about joint and conditional probability.	CO1	6 Marks
	b)	Three regular dice are thrown. Assign probabilities to the following events: the sum of the points appearing on the three dice is. i) 4. ii) 9. iii) 15.	CO3	8 Marks
		(OR)		
2	a)	How do you explain statistically independent events using Baye's rule?	CO1	6 Marks
	b)	In a manufacturing process where glass products are produced, defects or bubbles occur, occasionally rendering the piece undesirable for marketing. It is known that, on average, 1 in every 1000 of these items produced has one or more bubbles. What is the probability that a random sample of 8000 will yield: i) Fewer than 7 items possessing bubbles. ii) None will possess a bubble. iii) Exactly 15 items possessing bubbles.	CO3	8 Marks

UNIT-II

3	a)	State and prove the properties of probability density function.	CO1	6 Marks
	b)	A continuous random variable X has a PDF $f_X(x)=3x^2$, $0 \le x \le 1$, Find 'a' and 'b' such that: i) $P\{X \le a\} = P\{x > a\}$. ii) $P\{x > b\} = 0.05$.	CO2	8 Marks
		(OR)		
4	a)	Define and explain the following distribution and densities with an application. i) Exponential. ii) Uniform.	CO1	6 Marks
	b)	In an experiment, a trial consists of four successive tosses of a coin. If we define a random variable as the number of heads appearing in a trial, determine the CDF, $F_X(x)$.	CO2	8 Marks

UNIT-III

5	a)	State and prove the joint density function properties.	CO1	6 Marks
	b)	If statistically independent random variables X and Y having respective densities $f_X(x) = 5\,u(x)\,e^{-5x}$, $f_Y(y) = 2\,u(y)\,e^{-2y}$ then derive the density function of W = X+Y.	CO2	8 Marks
		(OR)		
6	a)	Identify the value of moment μ_{22}, if statistically independent random variables X and Y have moments $m_{10} = 2$, $m_{20} = 14$, $m_{02} = 12$ and $m_{11} = -6$.	CO3	8 Marks
	b)	Explain about the monotonic transformation for a continuous random variable.	CO2	6 Marks

UNIT-IV

7	a)	A stationary random process X(t) with zero mean and autocorrelation $R_{xx}(\tau) = [e^{-2\|\tau\|}]$ is applied to a system of function $H(\omega) = \frac{1}{2 + j\omega}$ develop the PSD of output.	CO2	8 Marks
	b)	Derive the expression for mean and mean squared value of system response.	CO2	6 Marks

(OR)

8	a)	Define the terms: i) Random process. ii) Stationary random process. iii) Wide sense stationary random process. iv) Ergodic random process.	CO1	6 Marks
	b)	Consider a linear system as shown in figure:  $X(t)$ → $\frac{1}{6 + j\omega}$ → $Y(t)$ $X(t)$ is the input and Y(**t**) is the output of the system. The autocorrelation of $X(t)$ is $R_{xx}(\tau) = 5\delta(\tau)$ determine the PSD and autocorrelation.	CO2	8 Marks

UNIT-V

9	a)	Derive an expression for average noise figure of cascaded networks.	CO4	6 Marks
	b)	Calculate the r.m.s noise voltage generated in the bandwidth of 15 KHz, by a resistor of 2KΩ operating at 20^0C. Find the available noise power over this bandwidth. Find the noise PSD.	CO3	8 Marks

(OR)

10	a)	Two thermal resistors R_1 and R_2 at temperatures T_1 and T_2 are connected in series. Find the noise temperature of the combination. Find the noise temperature when $R_1 = R_2$.	CO4	7 Marks
	b)	Obtain an expression to find noise band width of the system.	CO4	7 Marks

PULSE AND DIGITAL CIRCUITS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	In an RC low pass circuit R=2 kΩ and C=1 μF. A square with half period of 5 μSec. is applied as input to this circuit. Determine the output waveform.	CO2	7 Marks
	b)	What is the function of an attenuator and explain any one application of it.	CO4	7 Marks
		(OR)		
2	a)	The limited ramp shown in figure is applied to an RC differentiator. Draw the output waveforms for the cases (i) T = 0.2 RC (ii) T = RC (iii) T = 5RC.	CO4	8 Marks
	b)	Why does a resistive attenuator need to be compensated? Explain different methods of compensation.	CO5	6 Marks

UNIT-II

3	a)	Determine V_0 for the network shown in figure for the given waveform. Assume ideal Diodes.	CO4	8 Marks

	b)	Draw the basic circuit diagram of negative peak clamper circuit and explain its operation.	CO1	6 Marks
		(OR)		
4	a)	Design a Clipper circuit for a sinusoidal input of 50V(P-P) which produces an output with double sided clipper with VR_1 = +7V and VR_2 = -10V and assume diodes are ideal.	CO3	8 Marks
	b)	Draw the basic circuit diagram of positive peak clamper circuit and explain its operation.	CO2	6 Marks

UNIT-III

5	a)	Design a transistor switch with the following data: V_{CC} = 12 V, V_{BB} = 6 V; Ic(sat) = 10mA; h_{FE}(min) = 40. Assume the junction voltages as V_{CE}(sat) = 0.3 V and V_{BE}(sat) = 0.7 V.	CO3	7 Marks
	b)	With the help of a neat circuit diagram and waveforms explain the working of Collector-coupled astable multivibrator.	CO2	7 Marks
		(OR)		
6	a)	Draw the neat circuit diagram of a collector – coupled monostable multivibrator and explain its operation with the help of waveforms.	CO1	8 Marks
	b)	Draw and explain about the response of Schmitt circuit for the following. i) for loop gain ≤1 ii) loop gain >1.	CO3	6 Marks

UNIT-IV

7	a)	Explain the basic principles of Miller and bootstrap time – base generators.	CO1	7 Marks
	b)	Write important applications of time-base circuits. With reference to time base circuits define the following terms: i) Fly back time. ii) Transmission error.	CO2	7 Marks

(OR)

8	a)	The specifications of UJT are given as $\eta = 0.6$ $V_v = 2V$, $R_{BB} = 5\ K\Omega$, $I_v = 1.5$ mA, $I_p = 8\ \mu A$ and $V_{BB} = 18$ V. Calculate the component values of the UJT Sweep circuit to generate an output sweep frequency of 10 KHz with sweep amplitude of 12 V.	CO4	8 Marks
	b)	What is meant by triggered sweep? What are the merits and demerits of triggered sweep circuits.	CO2	6 Marks

UNIT-V

9	a)	Draw and explain the operation of Bidirectional sampling gate.	CO1	7 Marks
	b)	Draw and explain the operation of ECL NOR/OR circuit.	CO1	7 Marks

(OR)

10	a)	Draw and explain Six-diode Bidirectional sampling gate.	CO1	7 Marks
	b)	Draw and explain CMOS Inverter.	CO1	7 Marks

CODE No.:16BT40501 SVEC-16

COMPUTER GRAPHICS
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is Cathode Ray Tube? Explain its usage.	CO1	7 Marks
	b)	Explain the working of Direct View Storage Tube.	CO1	7 Marks
		(OR)		
2	a)	Generate a Line between (12, 10) and (20, 18) using DDA algorithm.	CO3	7 Marks
	b)	Derive the equations for Ellipse generation.	CO3	7 Marks

UNIT-II

3	a)	Derive a transformation matrix for the Reflection with respect to a line passing through origin.	CO2	7 Marks
	b)	Explain the Scan Line polygon fill algorithm.	CO3	7 Marks
		(OR)		
4	a)	Illustrate the Associative property of 2D Transformations.	CO2	7 Marks
	b)	What is Homogenous coordinate? Explain.	CO1	7 Marks

UNIT-III

5	a)	Discuss the Sutherland-Hodgeman Polygon clipping algorithm with example.	CO2	10 Marks
	b)	Explain the B-Spline curves.	CO1	4 Marks
		(OR)		
6	a)	Explain the 2-D Viewing pipeline.	CO1	7 Marks
	b)	Explain the Bezier curves and surfaces.	CO5	7 Marks

UNIT-IV

7	a)	Explain basic 3-D Geometric Transformations.	CO2	7 Marks
	b)	Derive a composite matrix for 3-D Rotation with respect to an axis parallel to Y-axis.	CO2	7 Marks
		(OR)		
8	a)	Classify and explain the Parallel and perspective projections.	CO4	10 Marks
	b)	Explain the 3-D Viewing pipeline.	CO1	4 Marks

UNIT-V

9	a)	Explain the Depth sorting method.	CO5	7 Marks
	b)	Explain Area-subdivision and Octree methods.	CO5	7 Marks
		(OR)		
10	a)	Classify visible-surface detection algorithms.	CO5	4 Marks
	b)	List and explain the steps involved in Gouraud shading.	CO5	10 Marks

DATABASE MANAGEMENT SYSTEMS

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the drawbacks of conventional file processing system.	CO1	6 Marks
	b)	List and explain various database languages with examples.	CO1	8 Marks
		(OR)		
2		Explain the following: i) Entity set ii) Relationship set iii) Weak-entity set.	CO2	14 Marks

UNIT-II

3	a)	Discuss in detail about Entity set, Relationship set and different types of relationships.	CO2	8 Marks
	b)	List and explain about structural constraints of ER model.	CO2	6 Marks
		(OR)		
4	a)	What is relational algebra? How it is different from other relational languages? List out and explain different relational algebraic operations with example.	CO1	8 Marks
	b)	Differentiate TRC and DRC.	CO2	6 Marks

UNIT-III

5	a)	By considering an example describe various data update operations in SQL.	CO1	7 Marks
	b)	Write and explain the structure of SQL SELECT statement with suitable example.	CO1	7 Marks
		(OR)		
6	a)	Explain the need of normalization.	CO2	6 Marks
	b)	Describe 4NF and 5NF with suitable examples.	CO2	8 Marks

UNIT-IV

7	a)	Describe the properties of a transaction.	CO4	6 Marks
	b)	Define Serializability. What is the difference between conflict equivalence and view equivalence?	CO4	8 Marks
		(OR)		
8	a)	Explain about different types of failures occurred in the system.	CO1	7 Marks
	b)	Explain the concept of locking mechanism. State and explain two-phase locking protocol.	CO2	7 Marks

UNIT-V

9	a)	Describe various methods of defining indexes on multiple keys.	CO1	6 Marks
	b)	What is an index structure? Explain how to use hash table as an index structure for a database.	CO2	8 Marks
		(OR)		
10		Write short notes on: i) Hash based indexing; ii) B-trees.	CO2	14 Marks

LINEAR AND DIGITAL ICS
[Electrical and Electronics Engineering; Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Using relevant expressions characterize all the **dc** and **ac** characteristics of an ideal OP-AMP.	CO5	14 Marks
		(OR)		
2	a)	Identify the limitations of an op-amp differential amplifier and derive the output voltage of an op-amp based differential amplifier.	CO5	7 Marks
	b)	Sketch the circuit diagram and explain the operation of an inverting amplifier.	CO1	7 Marks

UNIT-II

3	a)	Design a Integrator to integrate an I/P signal that varies in frequency from 1KHz to 10 KHz and plot the O/P wave forms if the I/P is a sine wave of1Vpeak at 1 KHz.	CO4	7 Marks
	b)	In a second-order high pass Butterworth filter C2 = C3 = 0.047μf, R2=R3= 3.3KΩ, R1 = 27 KΩ and RF=15.8 KW. Determine the low cutoff frequency fL of the filter	CO4	7 Marks
		(OR)		
4	a)	Determine the order of the Butterworth low-pass filter so that at w=1w3dB, the magnitude response is down by at least 20 dB.	CO3	7 Marks
	b)	Design a second order low pass filter for a cutoff frequency of 2KHz.	CO3	7 Marks

UNIT-III

5	a)	A 12-bit D to A converter has a full-scale range of 15 volts. Its maximum differential linearity error is ± 1/2 LSB. i) What is the percentage resolution? ii) What are the minimum and maximum possible values of the increment in its output voltage?	CO4	9 Marks
	b)	Distinguish between astable, monostable multivibrators.	CO2	5 Marks
		(OR)		
6	a)	Describe in detail the operation of a dual slope Analog to digital converter.	CO1	7 Marks
	b)	A PLL has a free running frequency of 500 KHz, the bandwidth of the LPF=10KHz. Will the PLL lock in if fi = 60 KHz? What is the frequency of the VCO outputs?	CO4	7 Marks

UNIT-IV

7	a)	Explain the following terms with reference to CMOS logic. i) Logic Levels. ii) DC Noise margin. iii) Power supply rails. iv) Propagation delay.	CO1	7 Marks
	b)	Asses the behavior of CMOS Inverter for LOW and HIGH outputs and sketch its equivalent resistive model.	CO6	7 Marks
		(OR)		
8	a)	Design CMOS transistor circuit for 2-input NOR gate. With the help of function table explain the circuit.	CO3	7 Marks
	b)	Design a CMOS transistor circuit that has the functional behaviour. f (X) = (A + B). (B + C).	CO4	7 Marks

UNIT-V

9	a)	Use appropriate structure to develop 8:1 Multiplexer using 2:1 multiplexer.	CO5	7 Marks
	b)	Write a verilog program for an edge triggered RS flip-flop.	CO4	7 Marks
		(OR)		
10	a)	Design a 4-bit binary synchronous counter using 74 x 74.	CO3	7 Marks
	b)	Design a module-10 counter using two 74 x 163 binary counters.	CO4	7 Marks

CODE No.: 16BT41041 SVEC-16

COMPUTER ARCHITECTURE AND ORGANIZATION

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

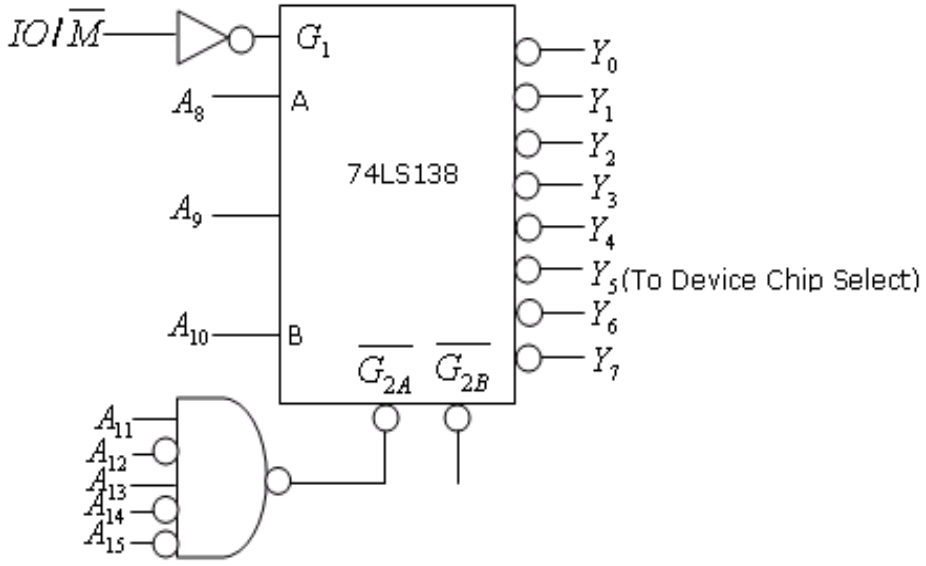
1	a)	On what parameters the computers are classified? Explain the types of computers with their applications.	CO1	7 Marks
	b)	Briefly explain about the functional units of a computer.	CO1	7 Marks
		(OR)		
2	a)	Explain the construction and working of one cell of DRAM and ROM.	CO1	7 Marks
	b)	Compare SRAM and DRAM.	CO2	7 Marks

UNIT-II

3	a)	Draw the timing diagram for the instruction ADI 35H. Analyze the sequence of operations involved in the execution of the said instruction.	CO2	10 Marks
	b)	The content of the Accumulator of 8085 processor is 56H. Write the steps to mask the lower nibble of Accumulator using suitable i) Arithmetic. ii) Logical instructions.	CO5	4 Marks
		(OR)		
4	a)	If the 8085 microprocessor adds the bytes 87H and 79H, specify the contents of the accumulator and the status of all the flags.	CO2	8 Marks
	b)	Discuss the following instructions of 8085 microprocessor. i) RIM. ii) SIM.	CO1	6 Marks

UNIT-III

5	a)	Differentiate vectored and non-vectored interrupts. Explain the interrupt handling mechanism of 8085.	CO1	8 Marks
	b)	For the interface shown below, show the address map of the device connected to Y5.	CO4	6 Marks



(OR)

6	a)	Explain the addressing modes of 8085 with at least two examples for each.	CO1	7 Marks
	b)	Write an assembly language program using 8085 instructions to cumulatively add eight bytes of data stored in eight consecutive memory locations.	CO5	7 Marks

UNIT-IV

7	a)	Construct a 4-bit bus with Three-sate buffers.	CO3	7 Marks
	b)	Design a one stage logic circuit to implement different logic functions.	CO3	7 Marks
		(OR)		
8	a)	Draw flow chart of instruction cycle.	CO5	7 Marks
	b)	Show how a micro operation is mapped to a micro instruction address.	CO1	7 Marks

UNIT-V

9	a)	Select the hardware required for performing signed magnitude addition and subtraction.	CO5	7 Marks
	b)	Differentiate between hardwired control and microprogrammed control. Is it possible to have a hardwired control associated with a control memory?	CO2	7 Marks
		(OR)		
10	a)	Develop an efficient algorithm perform binary multiplication using Booth algorithm.	CO5	7 Marks
	b)	"Pipelining increases speed of execution". Justify.	CO6	7 Marks

CODE No.: 16BT41201 SVEC-16

DESIGN AND ANALYSIS OF ALGORITHMS
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Prove that $2n^2 2^n + n \log n = \theta (n^2 2^n)$ is correct.	CO5	7 Marks
	b)	Solve the following recurrence relation: T(n) = 1, if n=1 or T(n) = T(n-1) + n(n-1), if n ≥ 2	CO4	7 Marks

(OR)

2	a)	Define pseudocode. Explain its significance with example.	CO1	7 Marks

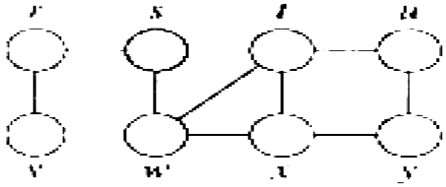
	b)	Evaluate the time complexity of the below pseudocode:
		Algorithm Sample
		{
		temp=1
		repeat {
		for i=1 to n
		{
		temp = temp + 1;
		n = n/2;
		}
		} until n <= 1 ;
		}
			CO4	7 Marks

UNIT-II

3	a)	Explain disjoint set operations with an example.	CO1	7 Marks
	b)	Outline UNION and FIND algorithms and calculate their time complexities.	CO3	7 Marks

(OR)

4	a)	Outline an algorithm of DFS and calculate its time complexity	CO2	7 Marks
	b)	Apply DFS algorithm for the following graph:	CO3	7 Marks

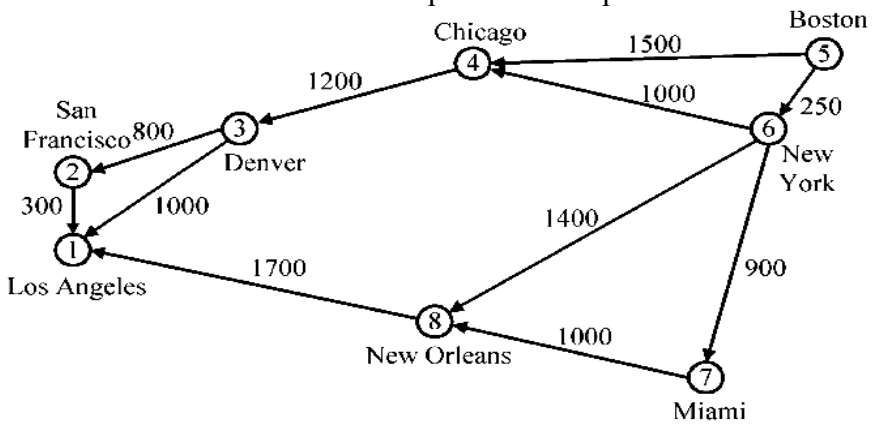


UNIT-III

5	a)	Outline the merge sort algorithm and calculate time complexity	CO4	7 Marks
	b)	Apply merge sort algorithm on the following elements 35, 57, 23, 2, 56, 68,10, 20, 65, 45	CO3	7 Marks

(OR)

6	a)	Distinguish divide and conquer and greedy algorithms. Illustrate with an example.	CO2	7 Marks
	b)	Consider the digraph given in the following figure. Estimate shortest paths from vertex 5 to other vertices. Explain each step in detail.	CO5	7 Marks



UNIT-IV

7	a)	What is the principle of dynamic programming? Explain with an example.	CO1	7 Marks
	b)	Explain briefly about any application of dynamic programming.	CO1	7 Marks
		(OR)		
8	a)	Let w = { 7, 4, 10, 23, 35, 20, 32} and m = 55. Find all possible subsets of w that sum to m. Draw the portion of the state space trees that is generated.	CO4	7 Marks
	b)	What is graph coloring? Outline an algorithm which finds m-coloring of a graph.	CO1, CO3	7 Marks

UNIT-V

9		Elaborate FIFO branch and bound solution with an example.	CO1	14 Marks
		(OR)		
10		Apply the branch-and-bound technique in solving the Traveling Salesman Problem. Explain with an example.	CO5	14 Marks

JAVA PROGRAMMING

[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Java is platform independent. Justify.	CO4	6 Marks
	b)	What are the different operators available in java?	CO1	8 Marks
		(OR)		
2	a)	Explain method overloading with example.	CO2	8 Marks
	b)	Write a program to perform the following functions using classes, objects and constructors wherever necessary. i) Read 5 subjects marks of 5 students. ii) Calculate the total and print the result on the screen.	CO5	6 Marks

UNIT-II

3	a)	Discuss about super keyword usage in inheritance with suitable programs.	CO2	8 Marks
	b)	What is abstract class? How it implemented in java?	CO2	6 Marks
		(OR)		
4	a)	What is interface? Explain its significance.	CO3	7 Marks
	b)	How multiple inheritance is implemented in java?	CO3	7 Marks

UNIT-III

5	a)	Explain with example, how we set priority to threads.	CO1	7 Marks
	b)	How to handle multiple catch blocks for a nested try block? Explain with an example.	CO5	7 Marks
		(OR)		
6	a)	Write a java program to implement producer consumer problem.	CO5	8 Marks
	b)	Explain various thread states and properties.	CO1	6 Marks

UNIT-IV

7	a)	Briefly explain about applet life cycle.	CO1	7 Marks
	b)	Illustrate about AWT class Hierarchy.	CO3	7 Marks
		(OR)		
8	a)	How to pass the parameters to an Applet? Explain with example.	CO1	6 Marks
	b)	Discuss about Java Collection Frame work.	CO2	8 Marks

UNIT-V

9	a)	Explain in detail about servlet Life cycle.	CO2	6 Marks
	b)	Discuss about Delegation event model with example.	CO5	8 Marks
		(OR)		
10	a)	Illustrate about servlet API.	CO3	7 Marks
	b)	Elucidate about MVC Architecture.	CO3	7 Marks

SOFTWARE ENGINEERING

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1		Explain the Nature of Software by defining the software and its application domains.	CO4	14 Marks
		(OR)		
2	a)	Identify the attributes of good software. Explain the key challenges facing in Software Engineering.	CO3	7 Marks
	b)	List out all the phases in the Unified Process Model.	CO1	7 Marks
		UNIT-II		
3	a)	List out the Process Activities of Requirements Elicitation and analysis with a neat sketch.	CO1	8 Marks
	b)	Explain six non–functional requirements which should be mentioned in the SRS documents	CO4	6 Marks
		(OR)		
4	a)	Discuss about: i) Elicitation. ii) Validation. iii) Management. iv) Documents.	CO5	8 Marks
	b)	Explain different types of checks should be carried out on the requirements in the requirements document.	CO4	6 Marks
		UNIT-III		
5		Compare the design steps involved in the transform mapping and transaction mapping.	CO4	14 Marks
		(OR)		
6	a)	Distinguish between a non-generative and a generative pattern.	CO2	7 Marks
	b)	How do architectural patterns differ from component patterns?	CO1	7 Marks
		UNIT-IV		
7		What is black box testing? Explain the different types of black box testing strategies with suitable examples.	CO1	14 Marks
		(OR)		
8	a)	Explain Software Testing strategies –The Big Picture in Software Testing.	CO1	6 Marks
	b)	List the Test-case design methods for object-oriented software.	CO1	4 Marks
	c)	Analyze two types of test strategies for object oriented software.	CO2	4 Marks
		UNIT-V		
9	a)	Explain in detail about Reactive and Proactive risk strategies.	CO1	4 Marks
	b)	What are the strategies develop to mitigate the risks in RMMM.	CO1	4 Marks
	c)	Contrast between Code Reconstructing and Data Reconstructing in Reengineering.	CO2	6 Marks
		(OR)		
10	a)	List out the targeted quality factors in software quality factors.	CO1	4 Marks
	b)	Discuss the ten guidelines for conducting formal technical Reviews.	CO5, CO6	10 Marks

II B.Tech II Semester (SVEC-16) Supplementary Examinations March – 2021

THEORY OF COMPUTATION

[Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define Finite Automaton and give its mathematical representation.	CO1	3 Marks
	b)	Design equivalent NFA for the following NFA with ε-transition, where q1 is an initial and also final state respectively,	CO3	7 Marks

	A	b	ε
- *q1	Φ	Φ	q2
q2	q3	q4	Φ
q3	Φ	q2	Φ
q4	Φ	Φ	q1

	c)	Differentiate between NFA and DFA.	CO2	4 Marks

(OR)

2	a)	Design an NFA for the set of all strings such that the third symbol from the right end is '1' over Σ= {0, 1}.	CO3	4 Marks
	b)	The following are two finite automata M1 ($Q1$, {0,1}, q0, δ1, {$q0$, $q1$}) and M2 ($Q2$, {0,1}, $p0$, $\delta2$, {$p2$}) corresponding to regular languages L1 and L2 with the transition functions given below. For machine M1, $\delta1(q0,0)=q1$, $\delta1(q0,1)=q0$, $\delta1(q1,0)=q2$, $\delta1(q1,1)=q0$, $\delta1(q2,0)=q2$, $\delta1(q2,1)=q2$, where $q0$ is an initial and a final state and $q2$ is a final state respectively. For machine ***M2***, $\delta2(p0,0)=p1$, $\delta2(p0,1)=p0$, $\delta2(p1,0)=p1$, $\delta2(p1,1)=p2$, $\delta2(p2,0)=p1$, $\delta2(p2,1)=p0$. Here $p0$ is an initial state and $p2$ is a final state. Draw transition diagram and transition table for L1 and L2.	CO2, CO3, CO5	10 Marks

UNIT-II

3	a)	Derive Regular-Expression for the following FA using R_{jj}^{K} notation.	CO3	10 Marks

	b)	Design NFA with Є- transitions for the following regular expressions, i) $b(a + b)^*a$. ii) (0 + 1) * (11 + 00).	CO3	4 Marks

(OR)

4	a)	Summarize the properties of regular expressions.	CO1	4 Marks
	b)	Is L = {Set of strings of equal number of *a's* and *b's*} Regular? Justify.	CO2	4 Marks
	c)	$L1$ and $L2$ are two regular sets. Justify the following. i) $L1$ Ω $L2$ is Regular. ii) $L1.L2$ is Regular. iii) $L1UL2$ is Regular.	CO2, CO5	6 Marks

UNIT-III

5	a)	Is the following CFG is ambiguous? $E \rightarrow E + E/E * E/(E)/id$. Justify your answer with valid example. Find equivalent unambiguous grammar.	CO4	7 Marks
	b)	When do you say that a CFG is Unambiguous? Is the following CFG is ambiguous or not? Justify your answer with an example. S $\rightarrow$ if E then S, $S \rightarrow$ if E then S else S, $E \rightarrow$ Other. Find an equivalent unambiguous CFG.	CO4, CO5	7 Marks

(OR)

6	a)	Define Useless symbol, Unit production and Null Production. Give examples.	CO1, CO5	7 Marks
	b)	Find an equivalent Reduced grammar from the following CFG. i) $S \rightarrow ABa/Bc$. ii) $A \rightarrow ac/Bcc$. iii) $B \rightarrow bcc$. iv) $C \rightarrow a$.	CO2, CO4	7 Marks

UNIT-IV

7	a)	What is the difference between PDA with empty stack and Final state?	CO2	5 Marks
	b)	Design PDA with Final state for the following language $L = \{a^m b^n / m>n\}$.	CO3	6 Marks
	c)	Define Instantaneous Description (ID) of PDA.	CO1	3 Marks

(OR)

8	a)	Is the following Language is NPDA or DPDA? Justify your answer $L = \{a^i b^j c^k / I > j$ or $j < k\}$.	CO2	7 Marks
	b)	Design PDA for the following language, $L = \{a^n b^m / m >= n$ & $m - n$ is even$\}$. Define all the elements of PDA.	CO1, CO3	7 Marks

UNIT-V

9	a)	Examine the formal definition of a TM to answer the following questions and explain with your reasoning. i) Can a TM ever write the blank symbol B on its tape? ii) Can the tape alphabet Γ be the same as input alphabet Σ? iii) Can a TM's head ever be in the same location in two successive steps? iv) Can a TM Contain just a single state?	CO5	8 Marks
	b)	Design TM for $L = \{a^n b^{2n} / n >= 1\}$.	CO3	6 Marks

(OR)

10	a)	Define Turing Machine and Construct a TM accepting the language, $L = \{a^n b^{m+n} c^m / m, n >= 1\}$.	CO1	7 Marks
	b)	Design a TM to compute m-n, where m and n are positive integers and $m > n$.	CO3	7 Marks

BANKING AND INSURANCE

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

	UNIT-I				
1.	Explain the role of banks in transferring money from surplus to deficit.	12 Marks	L3	CO2	PO5 PO12
	(OR)				
2.	Elaborate the role of RBI in controlling the economic conditions of the Country.	12 Marks	L3	CO1	PO3 PO11
	UNIT-II				
3.	Explain the types of accounts and loans offered by banks.	12 Marks	L3	CO1	PO3
	(OR)				
4.	Explain the procedure of opening and closing an account**.**	12 Marks	L3	CO2	PO5 PO12
	UNIT-III				
5.	Elaborate on the various types of e-payment systems.	12 Marks	L3	CO1	PO3 PO11
	(OR)				
6.	Differentiate between B2C and B2B.	12 Marks	L3	CO2	PO3 PO5 PO12
	UNIT-IV				
7.	Elaborate the role of Insurance in minimizing risk.	12 Marks	L3	CO2	PO3 PO5 PO12
	(OR)				
8.	Explain the elements of Insurance.	12 Marks	L3	CO2	PO3 PO12
	UNIT-V				
9.	Outline the fundamental principles of insurance.	12 Marks	L3	CO1	PO3 PO11
	(OR)				
10.	According to insurance agreement, enlist the rights and responsibilities of insured.	12 Marks	L3	CO2	PO3 PO5 PO12

CODE No.: 19BT4HS02 SVEC-19

BUSINESS COMMUNICATION AND CAREER SKILLS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the role of social media networks in business communication.	6 Marks	L4	CO1	PO1
	b)	Elaborate on the communication role of a manager.	6 Marks	L3	CO1	PO1
		(OR)				
2.		What are communication barriers in an organization and how do you overcome them?	12 Marks	L5	CO2	PO6
		UNIT-II				
3.	a)	How do you improve cross cultural communication in a global firm?	6 Marks	L3	CO2	PO6
	b)	Illustrate the use of communication in a business crisis.	6 Marks	L3	CO3	PO3
		(OR)				
4.		How do you use communication to be a responsible corporate citizen?	12 Marks	L3	CO1	PO6
		UNIT-III				
5.	a)	Advocate the need for effective business correspondence.	6 Marks	L3	CO3	PO5
	b)	List out the Common components of business letters.	6 Marks	L2	CO3	PO5
		(OR)				
6.		Discuss the important five stages of writing business messages.	12 Marks	L4	CO3	PO9
		UNIT-IV				
7.	a)	How do you create a video resume?	6 Marks	L2	CO3	PO10
	b)	Explain the need for follow-up letters after sending a resume.	6 Marks	L2	CO3	PO10
		(OR)				
8.		Discuss the need and process for online recruitment to tap global talent.	12 Marks	L3	CO1	PO5
		UNIT-V				
9.	a)	Suggest important preparation tips for conducting interviews.	6 Marks	L3	CO4	PO5
	b)	How do you plan to use different types of questions in interview process?	6 Marks	L6	CO4	PO1
		(OR)				
10.		How do you use different styles of interviewing in selecting executive cadres?	12 Marks	L4	CO4	PO6

COST ACCOUNTING AND FINANCIAL MANAGEMENT

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the meaning of Cost and Cost Accounting.	6 Marks	L1	CO1	PO1
	b)	Discuss the Objectives of Cost Accounting.	6 Marks	L3	CO2	PO5
		(OR)				
2.	a)	Explain the meaning of Management Accounting and how it is different from Cost Accounting.	6 Marks	L1	CO1	PO2 PO3
	b)	Discuss the Material and Labour element of Cost Control.	6 Marks	L3	CO2	PO3

UNIT-II

3.	a)	Explain the importance of Costing.	6 Marks	L1	CO1	PO2
	b)	Illustrate the preparation of Cost sheet.	6 Marks	L3	CO2	PO3
		(OR)				
4.	a)	Analyse different types of costs.	6 Marks	L1	CO1	PO1
	b)	Explain how you estimate tender price.	6 Marks	L3	CO2	PO3

UNIT-III

5.	a)	Define Standard Costing with a suitable example.	6 Marks	L1	CO1	PO2
	b)	From the following information, calculate Material Cost variance **Standards** Materials for 70kg of Finished goods 100kgs Price 1/- per kg **Actuals** Output 2,10,000 kgs Material Used 2,80,000 kgs Cost of Materials 2,52,000/-	6 Marks	L3	CO2	PO2
		(OR)				
6.	a)	Explain about Material variances. How do you calculate?	6 Marks	L1	CO1	PO3
	b)	From the following information, calculate Direct Labour cost variance: Standard wage rate per hour : Rs. 5 Standard time set : 1000 hours Actual wage rate per hour : Rs. 6 Actual time taken : 980 hours	6 Marks	L3	CO2	PO5

UNIT-IV

7.	a)	Explain the meaning of financial Management and its importance	6 Marks	L1	CO1	PO4
	b)	Discuss different types of Ratios in analyzing the financial statements.	6 Marks	L3	CO2	PO2

(OR)

8.	a)	Explain Capital Budgeting decision of Financial Management.	6 Marks	L1	CO1	PO4
	b)		6 Marks	L3	CO2	PO2

Liabilities	Rs	Assets	Rs
Share capital	2,00,000	Land & Building	1,40,000
Profit & Loss a/c	30,000	Plant & Machinery	3,50,000
General reserve	40,000	Stock	2,00,000
12% Debentures	4,20,000	Debtors	1,00,000
Creditors	1,00,000	Bills Receivable	10,000
Bills Payable	50,000	Cash at Bank	40,000
TOTAL	**8,40,000**		**8,40,000**

Calculate:

i. Current Ratio.
ii. Quick Asset Ratio.
iii. Debt to Equity Ratio.

UNIT-V

9.	a)	Explain the meaning and importance of Investment.	6 Marks	L1	CO1	PO4
	b)	Discuss the objectives of Investments.	6 Marks	L3	CO2	PO4

(OR)

10	a)	Explain the concept of Risk and Return.	6 Marks	L1	CO1	PO2
.	b)	Discuss the Capital Budgeting Techniques.	6 Marks	L3	CO2	PO2 PO6

PERSONALITY DEVELOPMENT

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		Classify different types of personalities briefly.	12 Marks	L2	CO3	PO1
		(OR)				
2.	a)	"Self-awareness is the key in personality development." Justify the given statement.	6 Marks	L5	CO1	PO1
	b)	Explain the key leadership traits that originate from one's personality.	6 Marks	L2	CO1	PO9
		UNIT-II				
3.	a)	Discuss the various dimensions of self-image.	6 Marks	L2	CO2	PO9
	b)	Illustrate the strategies for building self-confidence.	6 Marks	L3	CO1	PO9
		(OR)				
4.	a)	Explain the role of feedback in self-development.	6 Marks	L2	CO1	PO10
	b)	Differentiate Mentoring and Counseling.	6 Marks	L4	CO3	PO10
		UNIT-III				
5.	a)	Discuss the significance of attitude in understanding the personality of an individual.	6 Marks	L2	CO2	PO2
	b)	Distinguish between attitude and behavior.	6 Marks	L4	CO2	PO2
		(OR)				
6.		"Is it really possible to change negative attitude of a person?" Support your answer.	12 Marks	L5	CO2	PO2
		UNIT-IV				
7.		Illustrate different leadership styles.	12 Marks	L3	CO3	PO11
		(OR)				
8.	a)	"Open communications in organizations build trust." Comment.	6 Marks	L4	CO1	PO10
	b)	Identify different ways through which a manager communicates performance expectations to employees.	6 Marks	L2	CO1	PO10
		UNIT-V				
9.		Explain the significance of time management in real life using suitable examples.	12 Marks	L2	CO4	PO5
		(OR)				
10.	a)	Differentiate Ethics and Self-Righteousness.	6 Marks	L4	CO2	PO8
	b)	"Being practical is the need of the hour." Defend the Statement.	6 Marks	L5	CO4	PO8

PROFESSIONAL ETHICS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the scope and aims of Engineering Ethics.	6 Marks	L1	CO1	PO1
	b)	Explain the moral problems in engineering.	6 Marks	L2	CO3	PO8
		(OR)				
2.		Explain what moral autonomy is and bring out the difference between moral autonomy and moral absolutism.	12 Marks	L2	CO3	PO8
		UNIT-II				
3.	a)	Explain the term 'professional accountability' with examples.	6 Marks	L4	CO1	PO1
	b)	Discuss the following: i) Integrity, Self Respect. ii) Customs and religions.	6 Marks	L4	CO1	PO1
		(OR)				
4.		Explain briefly the terms 'profession' and 'professional' with suitable examples.	12 Marks	L2	CO1	PO2
		UNIT-III				
5.	a)	Define 'conscientiousness' with suitable case illustrations	6 Marks	L2	CO1	PO1
	b)	Write short notes on the following : i) Engineers as responsible experimenters. ii) Moral autonomy and accountability.	6 Marks	L2	CO2	PO2
		(OR)				
6.		Discuss the necessary Industrial standards and code of ethics to be followed at workplace by engineers.	12 Marks	L2	CO1	PO1
		UNIT-IV				
7.	a)	What is meant by 'discrimination' and give an example?	6 Marks	L2	CO1	PO1
	b)	Differentiate between Collective Bargain and Conflict of Interest.	6 Marks	L2	CO1	PO1
		(OR)				
8.		Discuss the following: i) Professionalism. ii) Moral Status. iii) Professional Rights and Responsibilities.	12 Marks	L4	CO2	PO2
		UNIT-V				
9.		Explain the role of ethics in MNC's and their rights.	12 Marks	L2	CO3	PO8
		(OR)				
10.		Explain the following in detail with illustrations. i) Necessity of Moral leadership. ii) Intellectual Property Rights.	12 Marks	L2	CO1	PO1

SIGNALS AND SYSTEMS

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Determine the value of power and energy of the following signals. i) $e^{-2t}\mathbf{u}(t)$ ii) $\cos(\pi/4)n$	6 Marks	L1	CO1	PO3
	b)	Find the convolution of signals x(n) = [……,1,1,1,1,0,0,…..] and h(n) = a^n for $0 \le n \le 6$ and zero elsewhere.	6 Marks	L1	CO1	PO2
		(OR)				
2.	a)	Which of the following signals are periodic? Find the fundamental period, if periodic. i) $3\cos(4t+\pi/3)$ ii) $\cos(\pi/8)n^2$	6 Marks	L1	CO1	PO2
	b)	Find the response of an LTI system with input $x(n) = a^n u(n)$ and impulse response h(n) = u(n).	6 Marks	L1	CO1	PO2

UNIT-II

3.	a)	Describe the Fourier series representation of continuous time periodic signals as a linear combination of harmonically related complex exponentials.	6 Marks	L2	CO2	PO1
	b)	Bring out the properties of Discrete Time Fourier transform with proof.	6 Marks	L2	CO2	PO3
		(OR)				
4.	a)	Determine the Fourier series coefficients for the periodic signals x(t) = cos(4πt) and y(t) = sin(4πt).	8 Marks	L2	CO2	PO5
	b)	Prove time reversal and time shifting properties of Fourier Transform.	4 Marks	L2	CO2	PO1

UNIT-III

5.	a)	Calculate the cross correlation between unit impulse and unit step functions.	6 Marks	L3	CO3	PO2
	b)	Describe the properties of auto correlation function.	6 Marks	L3	CO3	PO1
		(OR)				
6.	a)	Show that the power spectral density of the auto correlation function defined by $R_{xx}(\tau) = 1 - \lvert\tau\rvert$ for $-1 \le \tau \le 1$ $= 0$ Elsewhere Is a $[\text{sinc}(f)]^2$	8 Marks	L3	CO3	PO4
	b)	State Parseval's theorem.	4 Marks	L3	CO3	PO1

UNIT-IV

7.	a)	Give the relationship between Laplace Transform and Fourier Transform.	4 Marks	L4	CO4	PO1
	b)	Find the Laplace Transform of the following signals and plot the ROC. i) Impulse. ii) Unit Step. iii) $A\text{Sin}(\omega t)u(t)$	8 Marks	L4	CO4	PO2
		(OR)				

8.	a)	Find the Laplace Transform of $x(t) = e^{-at}u(t)$ and sketch its ROC.	4 Marks	L4	CO4	PO3
	b)	Find the Inverse Laplace Transform of the following: i) $X(S) = (s+2)/s^2+7s+12$ ii) $X(S) = (s-3)/(s^2+4s+13)$	8 Marks	L4	CO4	PO5
		UNIT-V				
9.	a)	Illustrate the proof of sampling theorem for low pass signals.	4 Marks	L5	CO5	PO2
	b)	Determine Nyquist sampling rate and Nyquist sampling interval for the following signals. i) $x(t) = 2\text{sinc}(100\pi t)$ ii) $x(t) = \text{sinc}(80\pi t) \times \text{sinc}(120\pi t)$	8 Marks	L5	CO5	PO5
		(OR)				
10.	a)	Explain the Impulse and Flat to sampling methods.	6 Marks	L5	CO5	PO1
	b)	What is Aliasing Effect and how it can be nullified.	6 Marks	L5	CO5	PO2

SOFTWARE ENGINEERING

[Computer Science and Engineering, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Discuss manager's myths about software development and their effect on the practitioners as well as on overall outcome.	6 Marks	L2	CO1	PO1
	b)	List out the best practices of agile process and principles.	6 Marks	L1	CO1	PO2
		(OR)				
2.	a)	Elaborate the work flow of spiral model with a neat diagram.	6 Marks	L2	CO1	PO2
	b)	Identify the steps in scrum process flow in agile software development.	6 Marks	L3	CO1	PO2
		UNIT-II				
3.	a)	Illustrate about functional requirements and non-functional requirements.	6 Marks	L2	CO2	PO1
	b)	Interpret about requirements management process in an organization to deliver a software product.	6 Marks	L3	CO2	PO3
		(OR)				
4.	a)	Elaborate the concept of scenario-based modeling.	6 Marks	L2	CO2	PO3
	b)	Model a swimlane diagram for access camera surveillance through the internet in safe home security system.	6 Marks	L3	CO2	PO3
		UNIT-III				
5.	a)	Model a use case diagram for library management system to identify various types of actors, use cases and their relationships between them.	6 Marks	L3	CO3	PO2
	b)	Analyze the difference between process and project metrics in software engineering process.	6 Marks	L1	CO3	PO1
		(OR)				
6.	a)	Model a sequence and collaboration diagrams for withdrawing an amount from ATM.	6 Marks	L3	CO3	PO2
	b)	Illustrate about measures of software quality in an organization.	6 Marks	L1	CO3	PO1
		UNIT-IV				
7.	a)	Discuss about unit testing and integration testing.	6 Marks	L2	CO4	PO2
	b)	Differentiate between black box testing and white box testing.	6 Marks	L3	CO4	PO2
		(OR)				
8.	a)	Describe the concept of art of debugging with a neat diagram.	6 Marks	L2	CO4	PO2
	b)	Interpret about test cases and class hierarchy of object-oriented methods with an example.	6 Marks	L3	CO4	PO2
		UNIT-V				
9.	a)	Discuss about risk mitigation monitoring and management.	6 Marks	L3	CO5	PO5
	b)	Compare and contrast between McCall's quality factor and ISO 9126 quality factor in Software Quality Factors.	6 Marks	L3	CO5	PO1
		(OR)				
10.	a)	Identify the steps for implementing business process reengineering model.	6 Marks	L2	CO5	PO2
	b)	Illustrate about reverse engineering process to understand internal design structure of complex systems.	6 Marks	L2	CO5	PO2

OPERATING SYSTEMS
[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain Inter Process Communication.	6 Marks	L2	CO1	PO1
	b)	Explain operating system structure with neat block diagram.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	What is Scheduling? Explain Multiprocessor Scheduling.	6 Marks	L2	CO1	PO2
	b)	Discuss about Layered approach.	6 Marks	L2	CO1	PO3
		UNIT-II				
3.	a)	Explain Synchronization Hardware.	6 Marks	L2	CO2	PO2
	b)	Discuss about System Model.	6 Marks	L2	CO2	PO2
		(OR)				
4.		Explain:	12 Marks	L2	CO3	PO3
		i) Deadlock.			CO2	PO2
		ii) Semaphores.			CO3	PO1
		iii) Deadlock avoidance.			CO2	PO5
		iv) Monitors.				
		UNIT-III				
5.	a)	Explain the mass storage structure.	6 Marks	L2	CO4	PO5
	b)	Discuss about contiguous allocations.	6 Marks	L2	CO4	PO3
		(OR)				
6.	a)	Explain Demand Paging.	6 Marks	L2	CO4	PO2
	b)	Discuss about Trashing.	6 Marks	L2	CO4	PO3
		UNIT-IV				
7.	a)	Explain File Access Methods.	6 Marks	L2	CO5	PO1
	b)	Discuss about I/O hardware.	6 Marks	L2	CO6	PO4
		(OR)				
8.		Explain:	12 Marks	L2	CO5	PO1
		i) Directory Implementation.			CO5	PO2
		ii) File system implementation.			CO6	PO4
		iii) I/O interface.				
		UNIT-V				
9.	a)	Discuss about Domain of protection.	6 Marks	L2	CO5	PO2
	b)	Explain user authentication.	6 Marks	L2	CO6	PO2
		(OR)				
10.	a)	Explain Access Control.	6 Marks	L2	CO5	PO2
	b)	Discuss about Firewalling to Protect Systems and Networks.	6 Marks	L2	CO6	PO1

II B.Tech II Semester (SVEC-19) Regular Examinations August – 2021

ENGINEERING HYDROLOGY

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	List and discuss types of precipitation briefly.	6 Marks	L2	CO1	PO1
	b)	Differentiate between recording and non-recording rain gauge and explain weighing bucket with a neat sketch.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Explain mass curve and hyetograph with figure.	6 Marks	L2	CO1	PO4
	b)	There are four rain gauge stations existing in the catchment of a river. The average annual rainfall values of these stations are 810, 630, 410 and 550 mm respectively. For a 10% error in the estimation of the mean rainfall, calculate the optimum number of stations in the catchment.	6 Marks	L4	CO1	PO5

UNIT-II

3.	a)	Define infiltration and discuss different factors affecting infiltration process.	6 Marks	L2	CO2	PO2
	b)	Discuss the following terms briefly. i) Hyetograph and ii) Double mass curve.	6 Marks	L2	CO2	PO2
		(OR)				
4.	a)	A storm produced rainfall intensities of 7, 18, 25, 12, 10, and 3 mm/r in successive one-hour intervals over a basin of 800 sqkm. The resulting runoff is observed to be 2640 hectare-m. Determine the Φ index of the basin.	6 Marks	L4	CO2	PO5
	b)	Discuss area velocity method to calculate discharge of stream.	6 Marks	L2	CO2	PO4

UNIT-III

5.	a)	A 30cm well fully penetrates in an unconfined aquifer of 25m saturated depth. When a discharge of 2100 lpm was being pumped for a long time, observation wells at a radial distance 30m and 90m indicated drawdown of 5m and 4m respectively. Estimate the coefficient of permeability and transmissibility of the aquifer.	6 Marks	L4	CO3	PO2
	b)	Discuss briefly about ground water and different forms of saturated formations in sub-surface of the earth.	6 Marks	L2	CO3	PO4
		(OR)				
6.	a)	Derive an expression for discharge from a well fully penetrating a confined aquifer under steady state flow.	6 Marks	L4	CO3	PO5
	b)	List the different types of aquifers and explain them briefly.	6 Marks	L2	CO3	PO2

UNIT-IV

7.	a)	Draw and explain a single peaked hydrograph with its components.	6 Marks	L2	CO4	PO4
	b)	Given the ordinates of a 4-h unit hydrograph as below. Derive the ordinates of a 12-h unit hydrograph for the same catchment using method of superposition.	6 Marks	L6	CO4	PO7

Time (h)	0	4	8	12	16	20	24	28	32	36	40	44
Ordinate of 4h UH	0	20	80	130	150	130	90	52	27	15	5	0

(OR)

8.	a)	Describe the most commonly used two methods for routing of floods through reservoir and differentiate channel routing and reservoir routing.	6 Marks	L4	CO5	PO2
	b)	Discuss rational methods for estimation of peak discharge for a watershed.	6 Marks	L2	CO5	PO4

UNIT-V

9.	a)	Discuss about reservoir sedimentation and different measure to control sedimentation.	6 Marks	L2	CO6	PO2
	b)	Distinguish universal soil loss equation and modified universal soil loss equation for the estimation of soil erosion.	6 Marks	L2	CO6	PO4

(OR)

10.	a)	Discuss erosion and reservoir sedimentation problems in India.	6 Marks	L2	CO6	PO4
	b)	Discuss trap efficiency and mention various factors affecting trap efficiency in reservoir.	6 Marks	L2	CO6	PO7

CODE No.: 19BT40102 SVEC-19

ENVIRONMENTAL ENGINEERING

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Draw a typical reservoir intake and describe various parts.	6 Marks	L1	CO1	PO1
	b)	Compute the population using arithmetic, geometric and incremental increase methods for the decades 2031 and 2041, if a town had the population 1,20,000; 2,10,000; 2,70,000; 3,20,000; and 4,10,000 at the end of 1981, 1991, 2001, 2011 and 2021 respectively as per the census records.	6 Marks	L3	CO1	PO1 PO2 PO3 PO4 PO5
		(OR)				
2.	a)	Describe biological characteristics of surface and subsurface water sources.	6 Marks	L2	CO1	PO1 PO2
	b)	What are points should be kept in mind while selecting a site for intake structure?	6 Marks	L2	CO1	PO1 PO2 PO7
		UNIT-II				
3.	a)	Prove that the settling of particles is independent of depth of sedimentation tank.	6 Marks	L4	CO2	PO1 PO2
	b)	Design a rectangular sedimentation tank for a town of population 40,000 and compute surface overflow rate. Assume the average water supply per head per day as 135 litres and detention time as 2 hrs with liquid depth in the tank as 2m. Take L/B ratio as 4:1.	6 Marks	L3	CO2	PO1 PO2 PO3 PO4 PO6 PO8 PO10
		(OR)				
4.	a)	Briefly explain the coagulation process in water treatment. List out types of coagulants used in water treatment plant.	6 Marks	L3	CO2	PO1 PO2 PO3 PO4 PO6 PO8 PO10
	b)	Design rapid sand filter for treating 1.0 MLD water. Assume filtration rate as 2500 L/m^2/hr.	6 Marks	L4	CO2	PO1 PO2 PO4 PO6 PO10
		UNIT-III				
5.	a)	Enlist the objectives of sewerage works and types of sewerage systems.	6 Marks	L1	CO3	PO1
	b)	Give various empirical formulae for the determining storm water flow in sewers. Explain their applicability or suitability.	6 Marks	L2	CO3	PO1 PO2
		(OR)				

6.	a)	List out the different types of sewerage systems. Describe the merits and demerits of the sewerage system preferred in India.	6 Marks	L2	CO3	PO1 PO2 PO5 PO6
	b)	A 300mm diameter sewer is to flow at 0.3 depth on a grade ensuring a degree of self cleansing equivalent to that obtained at full depth at a velocity of 0.9 m/sec. Find the required grade and associated velocity and rate of discharge at this depth. Assume Manning's rugosity coefficient n = 0.013. The variation of **n** with depth may be neglected.	6 Marks	L3	CO3	PO1 PO2 PO4 PO5 PO6 PO8
		UNIT-IV				
7.	a)	Explain design criteria of construction operation of UASB process.	6 Marks	L2	CO4	PO1 PO2 PO5 PO10
	b)	Design a suitable rectangular sedimentation tank (provided with mechanical cleaning equipment) for treating the sewage from a city, provided with an assured public water supply system, with a maximum daily demand of 12 million litres per day. Assume suitable values of detention period and velocity of flow in the tank. Make any other assumptions, wherever needed.	6 Marks	L2	CO4	PO1 PO2 PO5 PO10 PO12
		(OR)				
8.	a)	Explain sludge digestion and its stages in digestion process. Also explain factors affecting sludge digestion.	6 Marks	L2	CO4	PO1 PO2
	b)	Develop a relation between a diameter, if circular section of a sewer and a side of the rectangular sewer section having width as twice its depth, the tree sides being wetted. Two sewers are to be hydraulically equivalent.	6 Marks	L3	CO4	PO1 PO2 PO3 PO5 PO6 PO8 PO10
		UNIT-V				
9.	a)	Design a septic tank for a hostel housing 150 persons. Also design the soil absorption system for the disposal of the septic tank effluent, assuming the percolation rate as 20 minutes per cm.	6 Marks	L3	CO5	PO1 PO2 PO3 PO5 PO6 PO10
	b)	Describe about the two-pipe sanitary plumbing systems normally provided in the buildings compare the merits and demerits of this system.	6 Marks	L4	CO5	PO1 PO2 PO10
		(OR)				
10.	a)	What is the purpose of sludge digestion in sewage treatment? Describe various stages of sludge digestion in an anaerobic digester and the characteristic and final method of disposal of the digested sludge.	6 Marks	L2	CO5	PO1 PO2 PO5 PO6 PO8
	b)	What are different methods for solid waste collection and disposal? Explain clearly.	6 Marks	L6	CO5	PO1 PO2 PO4 PO5 PO6 PO8

HYDRAULIC ENGINEERING

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe boundary layer concept.	6 Marks	L1	CO1	PO1
	b)	A plate of 600mm length and 400mm wide is immersed in a fluid of specific gravity 0.9 and kinematic viscosity of 10^{-4} m^2/s. The fluid is moving with a velocity of 6 m/s. Determine the boundary layer thickness.	6 Marks	L4	CO1	PO1 PO2
		(OR)				
2.	a)	Explain boundary conditions for the velocity profiles.	6 Marks	L2	CO1	PO1
	b)	Derive equation for momentum thickness.	6 Marks	L3	CO1	PO1 PO2
		UNIT-II				
3.	a)	Describe specific energy with diagram.	6 Marks	L1	CO2	PO1
	b)	Water flow in a wide rectangular channel of concrete (n = 0.014) laid at a slope of 1 in 900. Determine the depth of flow and the unit discharge for the flow to take place in critical condition.	6 Marks	L4	CO2	PO1 PO2
		(OR)				
4.	a)	Explain critical, sub-critical and super-critical flow.	6 Marks	L2	CO2	PO1
	b)	Classify water profiles with description.	6 Marks	L3	CO2	PO1 PO2
		UNIT-III				
5.	a)	Describe the force exerted by a jet on stationary inclined plate.	6 Marks	L1	CO3	PO1
	b)	A jet of water of diameter 10cm strikes a flat plate normally with a velocity of 15 m/s. The plate is moving with a velocity of 6 m/s in the direction of the jet and away from the jet. Find the work done by the jet on the plate per second.	6 Marks	L4	CO3	PO1 PO2
		(OR)				
6.	a)	Explain the force exerted by a jet of water on series of vanes.	6 Marks	L2	CO3	PO1
	b)	A jet of water of diameter 75mm moving with a velocity of 25 m/s strikes a fixed plate in such a way that the angle between the jet and plate is 60^o. Find the force exerted by the jet on the plate in the direction normal to the plate.	6 Marks	L3	CO3	PO1 PO2
		UNIT-IV				
7.	a)	Describe turbine and its classification.	6 Marks	L1	CO4	PO1
	b)	An inward flow reaction turbine has external and internal diameter as 1m and 0.5m respectively. The velocity of flow through the runner is constant and is equal to 1.5 m/s. Determine the discharge through the runner, and width of the turbine at outlet if the width of the turbine at inlet = 200mm.	6 Marks	L4	CO4	PO1 PO2
		(OR)				
8.	a)	Explain axial flow reaction turbine with diagram.	6 Marks	L2	CO4	PO1
	b)	A turbine develops 7225 kW power under a head of 25m at 135 r.p.m. Calculate the specific speed of the turbine.	6 Marks	L3	CO4	PO1 PO2

UNIT-V

9.	a)	Describe priming and cavitation in pump.	6 Marks	L1	CO5	PO1
	b)	The diameter of a centrifugal pump, which is discharging 0.03 m^3/s of water against a total head of 20m is 0.40m. The pump is running at 1500 r.p.m. Find the head, discharge for a geometrically similar pump of diameter 0.25m when it is running at 3000 r.p.m.	6 Marks	L4	CO5	PO1 PO2 PO3
		(OR)				
10.	a)	Explain multistage centrifugal pump and negative slip in reciprocating pump.	6 Marks	L2	CO5	PO1
	b)	Derive expression for specific speed of centrifugal pump.	6 Marks	L3	CO5	PO1 PO2

SOIL MECHANICS

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	A fine grained soil has 60% (by weight) clay content. The soil behaves as semi-solid when the water content is between 15% and 28%. The soil behaves fluid-like when the water content is more than 40%. What is the Activity of Soil?	6 Marks	L1	CO1	PO1 PO2
	b)	If the water content of a fully saturated soil mass is 100%, what will be the relation between void ratio and specific gravity of soil?	6 Marks	L2	CO1	PO1 PO2
		(OR)				
2.	a)	In its natural condition, a soil sample has a mass of 1.980 kg and a volume of 0.001 m^3. After being completely dried in an oven, the mass of the sample is 1.800 kg. Specific gravity is 2.7, Unit weight of water is 10 kN/m^3. What is the degree of saturation?	6 Marks	L3	CO1	PO1 PO2 PO8
	b)	The laboratory test results of a soil sample are given below: Percentage finer than 4.75 mm = 60, percentage finer than 0.075 mm = 30, liquid limit=35%, Plastic limit = 27%, Classify the soil as per IS1478:1970.	6 Marks	L4	CO1	PO1 PO2

UNIT-II

3.	a)	A soil has a discharge velocity of 3×10^{-7} m/s and void ratio of 0.5. What is the seepage velocity?	6 Marks	L1	CO2	PO1
	b)	If during a permeability test on a soil sample with a falling head permeameter equal time intervals are noted for a drop of head from L_1 and L_2 and against L_2 and L_3. What will be the relation between L_1, L_2, and L_3?	6 Marks	L4	CO2	PO1 PO2
		(OR)				
4.	a)	The flow net for an earth dam with 30m water depth consists of 25 potential drops and 5 flow channels. If the discharge per meter length of dam is 0.00018m^3/sec, then what is the coefficient of permeability of dam material?	6 Marks	L2	CO2	PO1 PO2 PO8
	b)	A soil deposit has three layers having same thickness each but the permeability of the layers is in the ratio of 1:2:4 from top to bottom. What is the ratio of average permeability in the horizontal direction to that in the vertical direction?	6 Marks	L3	CO2	PO1 PO2

UNIT-III

5.	a)	A vertical concentrated force of 40 kN is acting at a point on the ground surface. Determine the vertical stress intensities due to this load at a depth of 2.5m below GL on the line of action of load and at a depth of 1.5m below GL and a radial distance of 3m.	6 Marks	L2	CO3	PO1 PO2 PO4
	b)	A rectangular footing with dimensions of 2mx3m has to carry a uniformly distributed load of 100 kN/m^2. Plot the distribution of vertical stress intensity due to this load on a horizontal plane at a depth of 2m below the base of the footing by 2:1 dispersion	6 Marks	L2	CO3	PO1 PO2 PO4

(OR)

6.	a)	What is Newmark's Chart? How is it helpful in computing the vertical stress at any depth due to a loaded area?	6 Marks	L1	CO3	PO1
	b)	Determine the vertical stress intensity at a point 3m below the ground level and 2.5m away from the line of action of a vertical point load of 150 kN acting on the ground surface by Boussinesq's method.	6 Marks	L4	CO3	PO1 PO2

UNIT-IV

7.	a)	A 10m thick sand layer is underlain by an 8m thick clay layer. The groundwater is found to be at 3m below the surface at the present time. Old well log data shows that the groundwater was as low as 6m below the surface in the past. What is the Over Consolidation Ratio (OCR) at the midpoint of the clay layer? The density of sand is 18 kN/m^3 and the density of clay is 17 kN/m^3.	6 Marks	L3	CO3	PO1 PO2 PO10
	b)	A laboratory compaction test on soil having specific gravity equal to 2.67 gave a maximum dry unit weight of 17.8 kN/m^3 and a water content of 15%. Determine the degree of saturation, air content and percentage air voids at the maximum dry unit weight. What would be theoretical maximum dry unit weight corresponding to zero air voids at the optimum water content?	6 Marks	L4	CO3	PO1 PO2 PO4 PO6

(OR)

8.	a)	There is a bed of compressible clay of 4m thickness with pervious sand on top and impervious rock at the bottom. In a consolidation test in the laboratory on an undisturbed specimen of clay from this deposit, 90% settlement was reached in 4 hours. The specimen was 20mm thick. Estimate the time in years for the building founded over this deposit to reach 90% of its final settlement.	6 Marks	L4	CO3	PO1 PO2 PO5 PO6
	b)	The maximum dry density of a sample by light compaction test is 1.80 g/cc at an optimum water content of 14.5 %. Find the air voids and the degree of saturation. G=2.67.	6 Marks	L2	CO3	PO1 PO2

UNIT-V

9.	a)	In a triaxial shear test conducted on a soil sample having a cohesion of 12 kN/m^2 and angle of shearing resistance of 36°, the cell pressure was 200 kN/m^2. Determine the value of the deviator stress at failure	6 Marks	L3	CO4	PO1 PO2
	b)	Two drained triaxial tests are performed on the material. In the first test the all-round pressure is 200 kN/m^2 and failure occurs at an added axial stress of 600 kN/m^2. In the second test all-round pressure is 350 kN/m^2 and failure occurs at an added axial stress of 1050 kN/m^2. What values of **c'** and **ø'** correspond to these results?	6 Marks	L3	CO4	PO1 PO2 PO4

(OR)

10.	a)	Differentiate the Consolidated Drained and Consolidated Undrained Triaxial test, with respect to field conditions.	6 Marks	L1	CO4	PO1 PO2
	b)	Calculate the potential shear strength on a horizontal plane at a depth of 3m below the surface in a formation of cohesionless soil when the water table is at a depth of 3.5m. The degree of saturation may be taken as 0.5 on the average. Void ratio = 0.50; grain specific gravity = 2.70; angle of internal friction = 30°. What will be the modified value of shear strength if the water table reaches the ground surface?	6 Marks	L4	CO4	PO1 PO2 PO4 PO5

STRUCTURAL ANALYSIS

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Determine the ratio of deflections Y1:Y2 of a simply supported beam carrying a concentrated load W at mid-span deflects by 'Y1' under the load. If the same beam carries the load W such that it is distributed uniformly over entire length and undergoes a deflection Y2 at the mid span.	4 Marks	L3	CO1	PO1 PO2 PO4 PO5 PO10
	b)	A Cantilever beam of 3m span is 150mm wide and 250mm deep. It carries an UDL of 20 kN/m over its whole span and 25 kN at the free end. Calculate the maximum slope and deflection. Take $E = 2 \times 10^5$ N/mm^2. Use Moment-area method.	8 Marks	L4	CO1	PO1 PO2 PO4 PO5 PO10

(OR)

2.	a)	Determine the mid span deflection of simply supported beam with concentrated load 'W' at mid span by Double Integration method.	4 Marks	L3	CO1	PO1 PO2 PO4 PO5 PO10
	b)	A beam of uniform section 10m long is simply supported at its ends. It carries Point loads of 100 kN and 60 kN at a distance of 2m and 5m respectively from the left end. Calculate: i) The deflection under each load. ii) The maximum deflection. Using Macaulay's method. $E = 200 \times 10^6$ N/m^2 and $I = 118 \times 10^{-4}$ m^4	8 Marks	L4	CO1	PO1 PO2 PO4 PO5 PO10

UNIT-II

3.	a)	Using strain energy method, determine the deflection of the free end of a cantilever of length 'L' subjected to an UDL.	4 Marks	L4	CO2	PO1 PO2 PO4 PO5 PO10
	b)	Find the horizontal deflection at joint C of the pin-jointed frame as shown in Fig. 1. AE is constant for all members.	8 Marks	L4	CO2	PO1 PO2 PO4 PO5 PO10

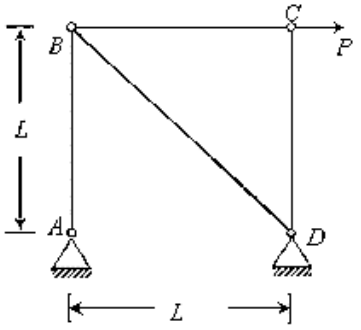

Fig. 1

(OR)

4.	Draw shear force and bending moment diagrams for the fixed beam shown in Fig. 2. Take w = 20 kN/m and L = 10 m.	12 Marks	L4	CO2	PO1 PO2 PO4 PO5 PO10

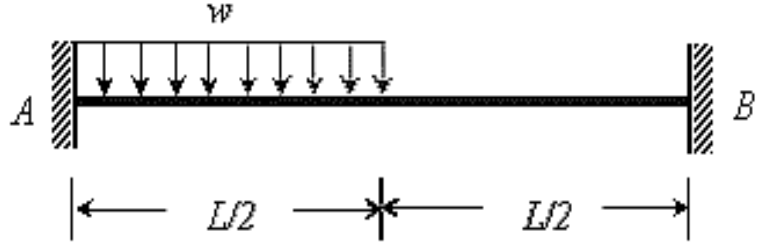

Fig. 2

UNIT-III

5.	Analyze the continuous beam as shown in the Fig. 3 by three moment equation theorem. E is constant. Draw the BMD.	12 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO10

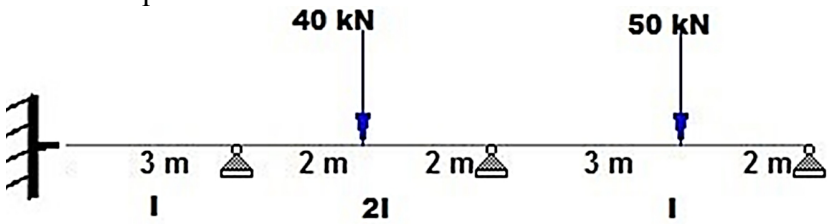

Fig. 3

(OR)

6.	Analyze the continuous beam shown in Fig. 4 by slope deflection method and draw the bending moment diagram.	12 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO10

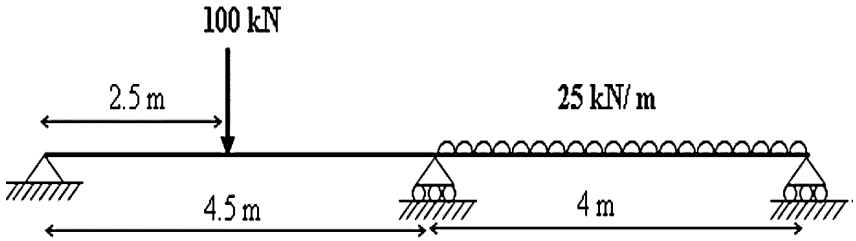

Fig. 4

UNIT-IV

7.	Analyze the continuous beam as shown in Fig. 5 by moment distribution method. Draw the bending moment diagram.	12 Marks	L4	CO4	PO1 PO2 PO4 PO5 PO10

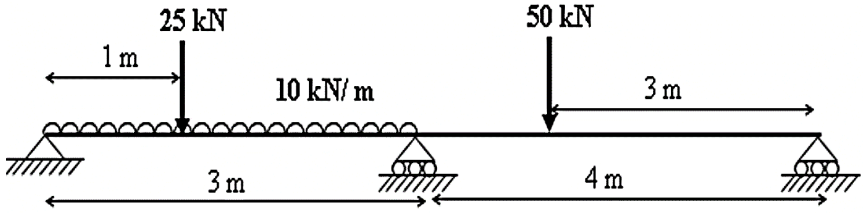

Fig. 5

(OR)

8.	Analyse the continuous beam shown in Fig. 6 by Kani's method. Draw BMD.	12 Marks	L4	CO4	PO1 PO2 PO4 PO5 PO10

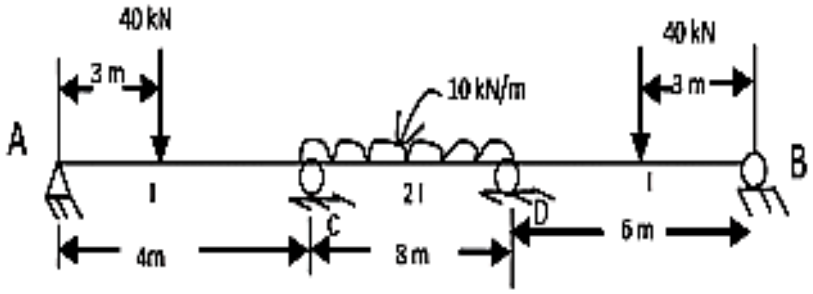

Fig. 6

UNIT-V

9.		A system of four loads 80kN, 160kN, 160kN and 120kN crosses a simply supported beam of span 25m with the 120kN load leading. The loads are equally spaced at 1m. Determine the values of the maximum bending moment and shear force at a section 10m from left support and absolute maximum shear force and bending moment in the beam uniform ILD. Use Influence Lines method.	12 Marks	L4	CO5	PO1 PO2 PO4 PO5 PO10

(OR)

10.	a)	Determine the shape factor for the T-section shown in Fig. 7.	4 Marks	L4	CO5	PO1 PO2

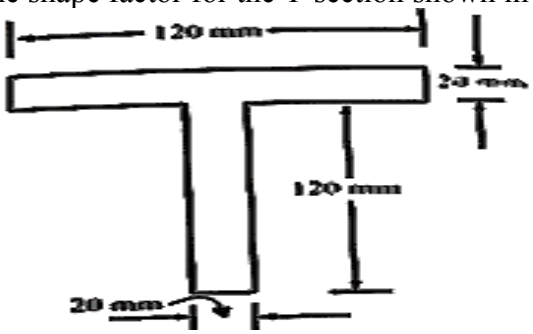

Fig. 7

	b)	Calculate the plastic moment capacity required for the continuous beam with working loads shown in Fig. 8.	8 Marks	L4	CO5	PO1 PO2 PO4 PO5 PO6 PO10

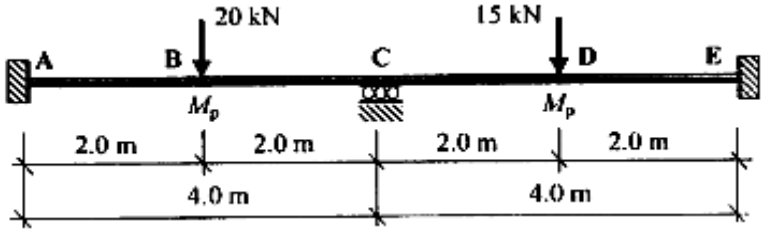

Fig. 8

DISASTER MITIGATION AND MANAGEMENT

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Write an account on the impact of disasters on life and environment.	6 Marks	L2	CO1	PO1 PO2 PO6 PO7
	b)	Explain how the public awareness is helpful in risk reduction.	6 Marks	L2	CO1	PO1 PO2 PO7
		(OR)				
2.	a)	Explain about Hazard Assessment.	6 Marks	L2	CO1	PO1 PO2 PO6 PO7
	b)	Explain about basic principles and elements of disaster mitigation.	6 Marks	L2	CO1	PO1 PO2 PO7

UNIT-II

3.	a)	Give adverse effects of tsunami. Also discuss the tsunami mitigation measures.	6 Marks	L2	CO2	PO1 PO2 PO4
	b)	Distinguish between active control and passive control systems. Draw the block diagram of both the systems.	6 Marks	L4	CO2	PO1 PO2 PO5 PO10
		(OR)				
4.	a)	Discuss the consequences of natural disasters in Urban areas in view of earth quakes.	6 Marks	L2	CO2	PO1 PO2
	b)	Consider a worst affected Earthquake hazard and what was government role in its remedial measures?	6 Marks	L5	CO2	PO1 PO2 PO3 PO6

UNIT-III

5.	a)	Explain the necessary steps to be taken to avoid dangerous epidemics after a flood disaster.	6 Marks	L4	CO3	PO1 PO2 PO4 PO6
	b)	Write a short note on the drought control measures adopted across the globe.	6 Marks	L2	CO3	PO1 PO2 PO4 PO7

(OR)

6.	a)	Discuss the consequences of natural disasters in Urban areas in view of i) cyclones ii) floods.	6 Marks	L2	CO3	PO1 PO2 PO7
	b)	Explain the disaster flood with the help of a case study.	6 Marks	L4	CO3	PO1 PO2 PO4

UNIT-IV

7.	a)	Explain briefly different causes for landslides.	6 Marks	L4	CO4	PO1 PO2
	b)	Discuss the types of landslides.	6 Marks	L2	CO4	PO1 PO2
		(OR)				
8.	a)	Discuss the consequences of the natural disaster landslide.	6 Marks	L2	CO4	PO1
	b)	Discuss the various methods of preventing landslides.	6 Marks	L4	CO4	PO1 PO2 PO4

UNIT-V

9.	a)	Explain cost-benefit analysis with respect to various disaster management programs.	6 Marks	L4	CO5	PO1 PO2 PO11
	b)	Discuss about a few emerging trends in disaster management.	6 Marks	L2	CO5	PO1 PO2 PO5 PO12
		(OR)				
10.	a)	Discuss the role of knowledge based expert system in disaster Management.	6 Marks	L3	CO5	PO1 PO2 PO10 PO11
	b)	Discuss the various functions of disaster mitigation organization.	6 Marks	L4	CO5	PO1 PO2 PO5 PO11

SUSTAINABLE ENGINEERING

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What are the essential components of sustainability?	6 Marks	L1	CO1	PO1 PO2
	b)	Illustrate the three-pillar model of sustainability.	6 Marks	L3	CO1	PO4 PO6
		(OR)				
2.	a)	Explain in detail about Multilateral environmental agreements.	6 Marks	L1	CO1	PO1 PO4
	b)	Explain in detail about Montreal and Kyoto protocols.	6 Marks	L1	CO1	PO1 PO6
		UNIT-II				
3.	a)	Give the list of important activities that can reduce carbon footprint.	6 Marks	L3	CO2	PO5 PO6
	b)	What is environmental management system and list out the functions of EMS?	6 Marks	L2	CO2	PO1 PO7
		(OR)				
4.	a)	How does economic input output-life cycle analysis help to achieve sustainability? Explain.	6 Marks	L1	CO2	PO1 PO2
	b)	What are the steps involved in the environmental health risk assessment? Describe.	6 Marks	L4	CO2	PO6 PO7
		UNIT-III				
5.	a)	Compare and contrast conventional and nonconventional energy with reference to sustainability.	6 Marks	L3	CO3	PO1
	b)	Categorize the various energy sources in the increasing order of their carbon footprint.	6 Marks	L4	CO3	PO1
		(OR)				
6.	a)	Compare the feasibility of different sources of renewable energy with current scenario.	6 Marks	L5	CO3	PO1
	b)	Is there a best energy source that will have the minimum environmental impact? Justify your answer.	6 Marks	L6	CO3	PO1
		UNIT-IV				
7.	a)	Enumerate the basic features of a sustainable habitat.	6 Marks	L5	CO4	PO1
	b)	How to develop sustainable urbanization?	6 Marks	L4	CO4	PO1
		(OR)				
8.	a)	With a suitable industrial example, explain what you understood on industrial symbiosis.	6 Marks	L3	CO4	PO1
	b)	How did industrialization change the way of human life in context to a developing country like India?	6 Marks	L4	CO4	PO1

UNIT-V

9.	a)	What are the prospects of using Biofuel as a renewable energy source?	6 Marks	L5	CO5	PO1
	b)	Explain the concept of smart city with an example.	6 Marks	L4	CO5	PO1 PO2 PO4 PO6
		(OR)				
10.	a)	Give any three examples of air pollutants and their effect on human health and explain control techniques.	6 Marks	L5	CO5	PO2 PO4 PO5
	b)	What are the main causes of urbanization? Discuss.	6 Marks	L3	CO5	PO5 PO6 PO8

CODE No.: 19BT40201 SVEC-19

DIGITAL ELECTRONICS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Determine the minimum sum of products and minimum product of sums for **f = b'c'd'+bcd+acd'+ab'bc'd**.	6 Marks	L3	CO1	PO2
	b)	Simplify the following function using K-map **F(A,B,C,D)=∑(0,1,2,3,4,6,9,10)+d(7,11,12,13,15)**	6 Marks	L3	CO1	PO5
		(OR)				
2.	a)	Simplify the expression $BD+BCD^1+A^1B^1C^1D^1$ and implement them with two level NAND gate circuit.	6 Marks	L3	CO1	PO5
	b)	Explain the properties of EX-OR and EX-NOR gates.	6 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Design half subtractor and Realize full subtractor using half subtractors.	6 Marks	L1	CO2	PO1
	b)	Implement the following logic function using 8 x 1 and 4 x 1 multiplexer **f(A,B,C,D)=∑m(1,3,4,6,7,9,10,11,14).**	6 Marks	L2	CO2	PO5
		(OR)				
4.	a)	Draw and explain the block diagram of a 4-bit binary adder/subtractor circuit.	6 Marks	L2	CO2	PO5
	b)	Construct 5 to 32 decoder using one 2 to 4 and four 3 to 8 decoders.	6 Marks	L2	CO2	PO4
		UNIT-III				
5.	a)	Explain the operation of Master Slave JK flip-flop with suitable diagrams.	8 Marks	L1	CO3	PO1
	b)	Design 4-bit twisted ring counter. Also draw its state diagram and sequence table.	4 Marks	L3	CO3	PO3
		(OR)				
6.	a)	Design a synchronous sequential counter using JK flip-flop and avoid lock out condition, for **4→6→7→3→1→4**…	6 Marks	L3	CO3	PO3
	b)	Design Mod-9 counter using D flip-flop	6 Marks	L2	CO3	PO5
		UNIT-IV				
7.	a)	Distinguish between Moore and Mealy model with necessary block diagram.	4 Marks	L1	CO4	PO1
	b)	Realize a logic function using **F (A,B,C)= Σ_m(2,4,5,6)** using Hazard Free logic gate network.	8 Marks	L2	CO4	CO4
		(OR)				

8.	a)	Minimize the sequential machine represented in the state table shown below using merger table.	8 Marks	L2	CO4	PO5

Table

Present State	Next State , Z	
	X=0	X=1
A	B,1	H,1
B	F,1	D,1
C	D,0	E,1
D	C,0	E,1
E	D,1	C,1
F	C,1	C,1
G	C,1	D,1
H	C,0	A,1

	b)	Explain finite state machines.	4 Marks	L1	CO4	PO1

UNIT-V

9.	a)	What are programmable logic devices? Explain them in brief.	6 Marks	L1	CO5	PO1
	b)	Draw the logic diagram for implementation of 16 x 8 ROM and explain its architecture.	6 Marks	L2	CO5	PO1

(OR)

10.	a)	Design using PAL the following Boolean functions. W(A,B,C,D)=(2,12,13) X(A,B,C,D)=(7,8,9,10,11,12,13,14,15) Y(A,B,C,D)=(0,2,3,4,5,6,7,8,10,11,15)	6 Marks	L2	CO5	PO1
	b)	Briefly explain the binary multiplication and division algorithm.	6 Marks	L2	CO5	PO1

ELECTRICAL MACHINES-II

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Describe the construction of a 3-phase cage-type induction motor with neat sketches.	6 Marks	L1	CO1	PO1
	b)	A 3-phase, 50Hz, 4 pole slip ring induction motor gives a reading of 120V across slip rings on open circuit, when at rest and supplied with normal supply voltage. The rotor impedance per phase is 0.3 + j1.5Ω. Find the rotor current and torque when machine is running at 5 % slip.	6 Marks	L3	CO1	PO4
		(OR)				
2.	a)	Explain Torque-Slip characteristics of Induction motor.	8 Marks	L1	CO1	PO1
	b)	If an 8-pole induction motor running from a supply of 50HZ has an **emf** in the rotor of frequency 1.5HZ, compute the slip and speed of the motor.	4 Marks	L2	CO1	PO5

UNIT-II

3.	a)	Explain, why the speed of 3-phase induction motor cannot be equal to synchronous speed.	4 Marks	L1	CO1	PO1
	b)	A 3-phase, 4-pole, 50Hz, induction motor has a star connected wound rotor. The rotor **emf** is 50V between the slip rings at standstill. The rotor resistance and standstill reactance are 0.4Ω and 2.0Ω respectively. Calculate: i) Rotor current per phase at starting when slip rings are short circuited. ii) Rotor current per phase at starting if 50Ω per phase resistance is connected between slip rings. iii) Rotor **emf** when the motor us running at full load at 1440 r.p.m. iv) Rotor current at full load and Rotor power factor at full load	8 Marks	L3	CO1	PO4
		(OR)				
4.	a)	Explain the principle of induction generator operation	6 Marks	L1	CO1	PO1
	b)	Discuss in detail about Crawling and Cogging.	6 Marks	L2	CO1	PO7

UNIT-III

5.	a)	Why is a rotating field system used in preference to a stationary field?	6 Marks	L2	CO2	PO1
	b)	A star connected 3-phase 4-pole 50Hz alternator has a single layer winding in 24 stator slots. There are 50 turns in each coil and the flux per pole is 0.05 Wb. Find the open circuit voltage.	6 Marks	L3	CO2	PO4
		(OR)				

6.	a)	Explain the principle of operation of a synchronous generator.	6 Marks	L1	CO2	PO1
	b)	A 220V, 50Hz, 6-pole star-connected alternator with ohmic resistance of 0.06Ω per phase are the following data for open circuit and full load ZPF characteristics:	6 Marks	L3	CO2	PO4

Field Current(A)	0.2	0.4	0.6	0.8	1.00	1.2	1.4	1.8	2.2	2.6	3.0	3.4
Open circuit Voltage (Volts)	29.0	58.0	87.0	116	146	172	194	232	261.5	284	300	310
ZPF voltage (Volts)	-	-	-	-	-	0	29	88	140	177	208	230

Find the percentage voltage regulation at full load current of 40Amps at power factor of 0.8 lagging.

UNIT-IV

7.	a)	Derive an expression for synchronizing torque when a 3-phase alternator is connected to infinite bus-bar.	6 Marks	L2	CO3	PO1
	b)	Two alternators A and B operate in parallel and supply a load of 10MW at 0.8pf lagging.				
		i) By adjusting steam supply of A, its power output is adjusted to 6,000KW and by changing its excitation, its P.F is adjusted to 0.92 lag. Find the Power Factor of alternator B.	6 Marks	L3	CO3	PO7
		ii) If steam supply of both machines is left unchanged, but excitation of B is reduced so that it's P.F becomes 0.92 lead. Find new P.F of A.				
		(OR)				
8.	a)	Discuss and state the conditions necessary for paralleling alternators.	6 Marks	L2	CO3	PO7
	b)	What are the various methods of synchronizing alternators?	6 Marks	L1	CO3	PO1

UNIT-V

9.	a)	Derive the expression for the maximum torque developed per phase of a synchronous motor.	6 Marks	L2	CO4	PO1
	b)	A 75KW, 400V, 4-pole, 3-phase, 50Hz, star connected synchronous motor has a resistance and synchronous reactance of 0.04Ω and 0.4Ω respectively. Compute for full load 0.8pf lead the open circuit **emf** per phase and gross mechanical power developed. Assume an efficiency of 92.5%.	6 Marks	L3	CO4	PO7
		(OR)				
10.	a)	What is hunting and discuss briefly various causes for hunting.	6 Marks	L2	CO4	PO7
	b)	Discuss in detail about Synchronous condenser.	6 Marks	L2	CO4	PO5

ELECTRICAL MEASUREMENTS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	List and describe the different static characteristics of measuring instruments.	6 Marks	L1	CO1	PO1
	b)	Explain the importance of damping mechanism in an instrument and how are they classified.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Explain the construction details of attraction type moving iron instrument. Derive the Torque equation for moving iron instrument, and show that the scale is non-uniform.	6 Marks	L5	CO1	PO3
	b)	The Ayrton universal shunt has a total resistance of 6000 Ω and galvanometer has a resistance of 2000 Ω. Determine the multiplying power of shunt for 1000 Ω, 2000 Ω and 3000 Ω tapping.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Explain with a neat circuit of single phase Dynamometer type Wattmeter and derive the equation for deflection torque.	6 Marks	L2	CO2	PO1
	b)	Draw the possible methods of connections of the pressure coil of a wattmeter and compare the errors.	6 Marks	L2	CO2	PO4
		(OR)				
4.	a)	A 230V, 50Hz single phase energy meter has a constant of 200 revolutions per kWh. While supplying a non-inductive load of 4.4A at normal voltage, the meter takes 3 minutes for 10 revolutions. Calculate the percentage error of the instrument.	6 Marks	L3	CO2	PO2
	b)	Draw the connection diagram of a 3-phase energy meter and explain its working. How do you correct it, if it is found to be moving fast and justify your answer?	6 Marks	L4	CO2	PO6

UNIT-III

5.	a)	A current transformer with turn's ratio 1:201 is rated as 1000/5A, 25VA. The core loss and magnetizing components of primary are 3A and 7A under rated conditions. Find the ratio and phase angle errors for full burden at 0.88 p.f leading.	6 Marks	L3	CO3	PO2
	b)	Illustrate the ratio and phase angle errors in potential transformer and explain how to overcome.	6 Marks	L4	CO3	PO1
		(OR)				
6.	a)	Draw the circuit diagram of Crompton's potentiometer and explain its working. Describe the steps used when measuring an unknown resistance.	6 Marks	L1	CO3	PO5
	b)	A Potentiometer consisting of a resistance dial having 15 steps of 10Ω each and a series connected slide wire of 10 Ω which is divided into 100 divisions. If the working current of the potentiometer is 15mA and each division of the slide wire can read accurately up to 1/5 of its span. Calculate the resolution of the potentiometer in volts.	6 Marks	L3	CO3	PO2

UNIT-IV

7.	a)	Explain kelvin's double bridge for measurement of low resistance with neat circuit diagram and list out the assumptions made.	6 Marks	L2	CO4	PO3
	b)	The four arms of a Wheatstone bridge are as follows AB=5Ω; BC=500Ω; CD=1000Ω; DA=100Ω. The galvanometer has a resistance of 100 Ω, a sensitivity of 5mm/μA and it is connected across AC. A source of 5V DC is connected across BD. Calculate the current through the galvanometer and its deflection, if the resistance of arm DA is changed from 100Ω to 102Ω.	6 Marks	L3	CO4	PO4
		(OR)				
8.	a)	Show how the Wien's bridge can be used for the measurement of frequency in audio range. Derive the equation for frequency **f**.	6 Marks	L2	CO4	PO1
	b)	The four arms of an A.C. bridge network are as follows: Arm AB: an unknown capacitance; Arm BC: a standard capacitor C3 of 1000pF; Arm CD: a non-inductive resistor R4 of 100 Ω in parallel with a capacitor C4 of 0.01μF; Arm DA: a non – inductive resistor R2 of 1000 Ω. The A.C. supply is connected across terminals B, D and the supply frequency is 50Hz. If the bridge is balanced with the above values, determine the components of the unknown impedance, while deriving the balanced conditions.	6 Marks	L3	CO4	PO4

UNIT-V

9.	a)	Explain how frequency can be measured using Lissajous patterns in CRO and give any two examples.	6 Marks	L2	CO5	PO5
	b)	Explain in detail about the following characteristics of Digital meters: i) Resolution ii) Sensitivity iii) Accuracy, and compare with respect to analog meters.	6 Marks	L1	CO5	PO1
		(OR)				
10.	a)	List the different types of DVM. Explain working principle of ramp type Digital Voltmeter with diagram.	6 Marks	L2	CO5	PO1
	b)	Describe the working of Digital frequency meter with a neat diagram.	6 Marks	L2	CO5	PO1

TRANSMISSION AND DISTRIBUTION

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What is method of images? Derive an expression for the capacitance per unit length of a 3-phase transposed line. What is the effect of earth on the capacitance of the line?	6 Marks	L2	CO1	PO1
	b)	A 3-phase, 50Hz, 66kV overhead transmission line has its conductors arranged at the corners of an equilateral triangle of 3m sides and the diameter of each conductor is 1.5cm. Determine the capacitance per phase, if the length of line is 100 km, and also calculate the charging current.	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Derive the expression for capacitance of single core cable with conductor diameter d and inner sheath diameter D.	6 Marks	L2	CO1	PO1
	b)	An 11kV, 50Hz, single phase cable 2.5km long, has a diameter of 20mm and internal sheath radius of 15mm. If the dielectric has a relative permittivity of 2.4, determine i) capacitance ii) charging current iii) total charging kVAR.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Explain the equivalent Π method of solution for the performance of medium transmission lines. Draw a phasor diagram with the receiving end voltage as reference. Comment how this analysis help full in real time power systems.	6 Marks	L4	CO2	PO4
	b)	An overhead 3-phase transmission line delivers 5000 kW at 22kV at 0.8 p.f lagging, the resistance and reactance of each conductor is 4Ω and 6Ω respectively. Determine i) sending end voltage, ii) percentage regulation, iii) Transmission efficiency.	6 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Derive the expressions for reflected voltage and current waves, when the transmission line is terminated by the capacitive load.	6 Marks	L2	CO2	PO1
	b)	A cable with surge impedance of 100Ω is terminated in two parallel connected open wires having surge impedances of 600Ω, and 1000Ω respectively. If a steep fronted voltage wave of 2 kV travels along the cable, find the voltage and current in the cable and the open-wire lines immediately after the travelling wave has reached the transition point. Assume voltage wave to be infinite length.	6 Marks	L5	CO2	PO3

UNIT-III

5.	a)	Derive the expressions for sag and tension when the supports are at unequal heights. Comment how it is useful in power system.	6 Marks	L2	CO3	PO1
	b)	A transmission line has a span of 150m between level supports. The line conductor has a cross-sectional area of 1.25cm^2 and it weighs 120kg per 100m. If the breaking stress of copper conductor is 4220 kg per cm^2. Calculate the maximum sag for a safety factor of 4. Assume maximum wind pressure of 90 kg per m^2.	6 Marks	L3	CO3	PO7

(OR)

6.	a)	Define string efficiency. Why is it necessary to have high string efficiency? How can it be achieved?	6 Marks	L4	CO3	PO4
	b)	The three bus-bar conductors in an outdoor sub-station are supplied by units of post insulators. Each unit consists of a stack of 3-pin insulators fixed one on the top of the other. The voltage across the lowest insulator is 8·45 kV and that across the next is 7·25 kV. Find the bus-bar voltage of the station.	6 Marks	L3	CO3	PO3

UNIT-IV

7.	a)	Explain the different types of loads and it's characteristics with realistic examples.	6 Marks	L1	CO4	PO1
	b)	A two conductor main AB, 500m in length is fed from both ends at 250 volts. Loads of 50A, 60A, 40A and 30A are tapped at distance of 100m, 250m, 350m and 400m from end A respectively. If the X-section of conductor be 1cm^2 and specific resistance of the material of the conductor is 1·7μΩcm, determine the minimum consumer voltage.	6 Marks	L3	CO4	PO2

(OR)

8.	a)	Discuss for solving AC distribution problems when power factors referred to receiving end voltage.	6 Marks	L2	CO4	PO3
	b)	A single phase distributor AB has a total impedance of (0·1 + j 0·2)Ω. At the far end B, a current of 80A at 0·8 p.f. lagging and at mid-point C a current of 100A at 0·6 p.f. lagging are tapped. If the voltage of the far end is maintained at 200V, determine: i) Supply end voltage V_A ; ii) Phase angle between V_A and V_B .The load power factors are with respect to the voltage at the far end.	6 Marks	L3	CO4	PO2

UNIT-V

9.	a)	Explain the various factors to be considered to decide the ideal location of substation.	6 Marks	L1	CO5	PO1
	b)	Show that if the voltage drops are limited, six feeders can carry only 1.25 times as much load as the four feeders.	6 Marks	L3	CO5	PO2

(OR)

10.	a)	Explain different bus bar arrangements with a neat sketch.	6 Marks	L1	CO5	PO1
	b)	Discuss in detail the present design practice of secondary distribution system.	6 Marks	L6	CO5	PO3

❀ ❀ ❀

DYNAMICS OF MACHINERY

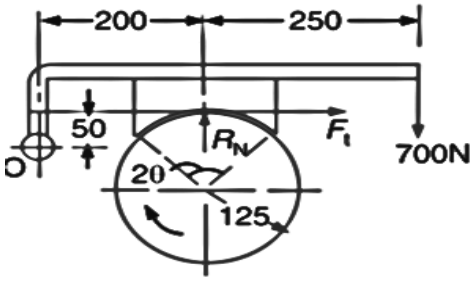
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		A centrifugal clutch is to transmit 15 kW at 900 r.p.m. The shoes are four in number. The speed at which the engagement begins is 3/4th of the running speed. The inside radius of the pulley rim is 150mm and the centre of gravity of the shoe lies at 120mm from the centre of the spider. The shoes are lined with Ferrodo for which the coefficient of friction may be taken as 0.25. Determine: i) Mass of the shoes, and ii) Size of the shoes, if angle subtended by the shoes at the centre of the spider is 60^{o} and the pressure exerted on the shoes is 0.1 N/mm^2.	12 Marks	L5	CO1	PO2 PO3 PO4
		(OR)				
2.	a)	Define brake and classify them according to the means used for transforming the energy and according to the direction of acting force.	4 Marks	L1	CO1	PO1
	b)	A single block brake is shown in figure below. The diameter of the drum is 250mm and the angle of contact is 90°. If the operating force of 700N is applied at the end of a lever and the coefficient of friction between the drum and the lining is 0.35, determine the torque that may be transmitted by the block brake.	8 Marks	L5	CO1	PO2 PO3 PO4



All dimensions in mm.

UNIT-II

3.	a)	Define processional Angular Motion and Gyroscopic couple.	4 Marks	L1	CO2	PO1
	b)	Explain the effect of Gyroscopic Couple on a Naval Ship when ship steers towards left/right and rotor rotates in counter clockwise /clockwise direction and direction of viewing is from rear end or stern.	8 Marks	L4	CO2	PO2 PO3 PO4
		(OR)				
4.	a)	Differentiate coefficient of fluctuation of speed and coefficient fluctuation of energy. Explain why fluctuations of speed and energy occurs in a engine.	4 Marks	L2	CO3	PO1
	b)	A punching press is driven by a constant torque electric motor. The press is provided with a flywheel that rotates at maximum speed of 225 r.p.m. The radius of gyration of the flywheel is 0.5m. The press punches 720 holes per hour; each punching operation takes 2 second and requires 15 kN-m of energy. Find the power of the motor and the minimum mass of the flywheel if speed of the same is not to fall below 200 r. p. m.	8 Marks	L5	CO3	PO2 PO3 PO4

UNIT-III

5.	a)	Explain the need of Governors and classify them.	4 Marks	L1	CO4	PO1
	b)	In an Engine Governor of the Porter type, the upper and lower arms are 200mm and 250mm respectively and pivoted on the axis of rotation. The mass of the central load is 15 kg, the mass of each ball is 2 kg and friction of the sleeve together with the resistance of the operating gear is equal to a load of 25N at the sleeve. If the limiting inclinations of the upper arms to the vertical are 30° and 40°, find, taking friction into account, range of speed of the governor.	8 Marks	L5	CO4	PO2 PO3 PO4

(OR)

6.		Define and explain the terms: i) Sensitiveness of a Governor. ii) Stability of a Governor. iii) Isochronous of a Governor. iv) Hunting.	12 Marks	L2	CO4	PO1 PO2

UNIT-IV

7.		A shaft carries four masses in parallel planes A, B, C and D in this order along its length. The masses at B and C are 18 kg and 12.5 kg respectively, and each has an eccentricity of 60 mm. The masses at A and D have an eccentricity of 80 mm. The angle between the masses at B and C is 100° and that between the masses at B and A is 190°, both being measured in the same direction. The axial distance between the planes A and B is 100 mm and that between B and C is 200 mm. If the shaft is in complete dynamic balance, determine : i) the magnitude of the masses at A and D ; ii) the distance between planes A and D ; and iii) the angular position of the mass at D.	12 Marks	L5	CO5	PO2 PO3 PO4

(OR)

8.		Obtain expressions for primary and secondary unbalanced forces in V- engines and explain how to balance them in detail.	12 Marks	L4	CO5	PO2

UNIT-V

9.	a)	Define Longitudinal, Transverse and Torsinal vibrations.	3 Marks	L1	CO6	PO1
	b)	A shaft 1.5 m long supported in flexible bearings at the ends carries two wheels each of 50 kg mass. One wheel is situated at the centre of the shaft and the other at a distance of 375 mm from the centre towards left. The shaft is hollow of external diameter 75 mm and internal diameter 40 mm. The density of the shaft material is 7700 kg/m^3 and its modulus of elasticity is 200 GN/m^2. Find the lowest whirling speed of the shaft, taking into account the mass of the shaft.	9 Marks	L5	CO6	PO2 PO3 PO4

(OR)

10.		The mass of an electric motor is 120 kg and it runs at 1500 r.p.m. The armature mass is 35 kg and its C.G. lies 0.5 mm from the axis of rotation. The motor is mounted on five springs of negligible damping so that the force transmitted is one-eleventh of the impressed force. Assume that the mass of the motor is equally distributed among the five springs. Determine : i) Stiffness of each spring. ii) Dynamic force transmitted to the base at the operating speed. iii) Natural frequency of the system.	12 Marks	L5	CO6	PO2 PO3 PO4

ENGINEERING METROLOGY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Determine limit dimensions for a clearance fit between mating parts of diameter 40mm, providing a minimum clearance of 0.10mm with a tolerance on the hole equal to 0.025mm and on shaft 0.05mm using both systems.	6 Marks	L3	CO1	PO1
	b)	Explain the significance of the following terms with suitable examples: Accuracy, precision, calibration, interchange ability and selective assembly.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Explain the different types of fits used in engineering practice with neat sketches.	6 Marks	L2	CO1	PO2
	b)	Describe different types of errors in measurement and their causes.	6 Marks	L4	CO1	PO2

UNIT-II

3.	a)	Explain the working principle advantages, disadvantages of optical comparators.	6 Marks	L2	CO2	PO1
	b)	Explain the principle of working of a sine bar for angular measurement with the help of a diagram. List the advantages and limitations of sine bar.	6 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Explain the construction and working of Sigma mechanical comparator with a neat sketch.	6 Marks	L3	CO2	PO1
	b)	State and explain the Taylor's principle of gauge design with neat sketch of Plug gauge and Snap gauges.	6 Marks	L2	CO2	PO1

UNIT-III

5.	a)	Explicate the uses of interferometer in measuring flatness of surfaces.	6 Marks	L2	CO3	PO3
	b)	Explain the principle and construction of an auto collimator with the help of a neat sketch.	6 Marks	L3	CO3	PO1
		(OR)				
6.	a)	State and explain the methods of measuring primary texture of a surface.	6 Marks	L2	CO3	PO2
	b)	Define flatness. Give examples of instruments used for measurement of flatness.	6 Marks	L2	CO3	PO1

UNIT-IV

7.	a)	With the help of neat sketch, explain Three-wire method for measuring of effective diameter.	6 Marks	L2	CO4	PO1
	b)	Describe the procedure of measurement of tooth thickness using constant chord method with neat sketch.	6 Marks	L3	CO4	PO2
		(OR)				

8.	a)	Explain any two methods of measuring Gear Pitch.	6 Marks	L2	CO4	PO5
	b)	Describe with a neat sketch the measurement of pitch of internal and external screw threads using a pitch measuring machine.	6 Marks	L3	CO4	PO1

UNIT-V

9.	a)	Explain the construction and working of optical pyrometer.	6 Marks	L2	CO5	PO1
	b)	Write a brief note on Gauge factor with respect to stain gauges.	6 Marks	L3	CO5	PO2

(OR)

10.	a)	Write a note on: i) Thermocouple material. ii) Advantages and disadvantages of Thermocouples.	6 Marks	L2	CO5	PO1
	b)	Explain the working principle of an electrical resistance thermometer.	6 Marks	L2	CO5	PO1

FLUID MECHANICS AND HYDRAULIC MACHINERY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Define Surface tension. Prove that the relationship between surface tension and pressure inside a droplet of liquid in excess of outside pressure is given by $p = 4\sigma / d$.	6 Marks	L2	CO1	PO1 PO2
	b)	Determine the intensity of shear of an oil having viscosity = 1 poise. The oil is used for lubricating the clearance between a shaft of diameter 10cm and its journal bearing. The clearance is 1.5mm and the shaft rotates at 150 r.p.m.	6 Marks	L3	CO1	PO1 PO2 PO3
		(OR)				
2.	a)	What are the gage pressure and absolute pressure at a point 3m below the free surface of a liquid having a density of 1.53×10^3 kg/m^3, if the atmospheric pressure is equivalent to 750mm of mercury? The specific gravity of mercury is 13.6 and density of water = 1000 kg/m^3.	6 Marks	L3	CO1	PO1 PO2 PO3
	b)	What do you mean by single column manometers? How are they used for the measurement of pressure?	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Explain the importance of the following: i) Stream lines . ii) Streak lines. iii) Path lines.	6 Marks	L2	CO2	PO1
	b)	A 30cm diameter pipe, conveying water, branches into two pipes of diameters 20cm and 15cm respectively. If the average velocity in the 30cm diameter pipe is 2.5 m/s, find the discharge in this pipe. Also determine the velocity in 15cm pipe, if the average velocity in 20cm pipe is 2 m/s.	6 Marks	L3	CO2	PO1 PO2 PO3
		(OR)				
4.	a)	Name the different forces present in a fluid flow. For the Euler's equation of motion, which forces are considered and also derive the equation.	6 Marks	L2	CO2	PO1 PO2
	b)	A horizontal venturimeter with inlet and throat diameters 30cm and 15cm respectively is used to measure the flow of water. The reading of the differential manometer connected to the inlet and the throat is 20cm of mercury. Determine the rate of flow. Take $C_d = 0.98$.	6 Marks	L3	CO2	PO1 PO2 PO3
		UNIT-III				
5.	a)	Define the displacement thickness of a boundary layer and derive an expression for it.	6 Marks	L2	CO3	PO1 PO2
	b)	What do you mean by boundary layer separation? List the methods of preventing this separation.	6 Marks	L2	CO3	PO1
		(OR)				

6.	a)	Find head lost due to friction in a pipe of diameter 300mm and length 50m, through which water is flowing at a velocity of 3 m/s using: i) Darcy formula. ii) Chezy's formula, where C = 60.	6 Marks	L3	CO3	PO1 PO2 PO3
	b)	Define and explain the terms: i) Hydraulic gradient line. ii) Total energy line.	6 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Obtain an expression for the force exerted by a jet of water on a moving vertical plate in the direction of the jet.	6 Marks	L2	CO4	PO1 PO2
	b)	Water is flowing through a pipe at the end of which a nozzle is fitted. The diameter of the nozzle is 100mm and the head of water at the center nozzle is 100m. Find the force exerted by the jet of water on a fixed vertical plate. The coefficient of velocity is given as 0.95.	6 Marks	L3	CO4	PO1 PO2 PO3
		(OR)				
8.		Obtain an expression for the work done per second by water on the runner of a Pelton wheel. Hence derive an expression for maximum efficiency of the Pelton wheel giving the relationship between the jet speed and bucket speed.	12 Marks	L3	CO4	PO1 PO2 PO3
		UNIT-V				
9.	a)	Obtain an expression for the work done by impeller of a centrifugal pump on water per second per unit weight of water.	6 Marks	L2	CO5	PO1
	b)	Find the number of pumps required to take water from a deep well under a total head of 89m. All the pumps are identical and are running at 800 rpm. The specific speed of each pump is given as 25 while the rated capacity of each pump is 0.16 m^3/s.	6 Marks	L3	CO5	PO1 PO2 PO3
		(OR)				
10.	a)	Obtain expressions for discharge and work done to drive a double acting reciprocating pump.	6 Marks	L2	CO5	PO1
	b)	A single acting reciprocating pump running at 30 r.p.m delivers 0.012 m^3/s of water. The diameter of the piston is 25cm and the stroke length is 50cm. Determine: i) theoretical discharge. ii) coefficient of discharge. iii) slip and % of slip.	6 Marks	L3	CO5	PO1 PO2 PO3

CODE No.: 19BT40304 SVEC-19

METAL CUTTING AND MACHINE TOOLS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the purpose and basic elements of machining.	6 Marks	L2	CO1	PO1
	b)	Draw the neat sketch of single point cutting tool and show the different parts and angles on it.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Describe the conversion of tool angles using graphical method.	6 Marks	L2	CO1	PO1
	b)	Explain the concept of rake and clearance angles with neat sketch.	6 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Explain briefly about ductile and brittle materials.	6 Marks	L2	CO2	PO1 PO7
	b)	What are the different types of chip breakers and explain it?	6 Marks	L2	CO2	PO1 PO7
		(OR)				
4.		Derive the expression for the various cutting forces using Merchant's circle diagram.	12 Marks	L3	CO2	PO1 PO2 PO3 PO7

UNIT-III

5.	a)	What is the principle of operation and specifications of lathe?	6 Marks	L2	CO3	PO1 PO2 PO3
	b)	Write different operations performed on lathe machine.	6 Marks	L1	CO3	PO1 PO2
		(OR)				
6.		Write the classification of Automatic lathes with neat sketch.	12 Marks	L1	CO3	PO1 PO2 PO7

UNIT-IV

7.	a)	List the specifications and different operations in slotting machine.	6 Marks	L1	CO4	PO1 PO2 PO3 PO7
	b)	Write the principle of operation of planning machine.	6 Marks	L1	CO4	PO1 PO2
		(OR)				
8.		Explain the differences between drilling and boring machines.	12 Marks	L2	CO4	PO1 PO7

UNIT-V

9.	a)	Write the comparison of grinding, lapping and honing.	6 Marks	L1	CO5	PO1 PO2 PO7
	b)	Discuss on the specification and selection of grinding wheel.	6 Marks	L2	CO5	PO1 PO2 PO3
		(OR)				
10.		Write differences between horizontal and vertical milling machines with neat sketch.	12 Marks	L2	CO6	PO1 PO7

CODE No.: 19BT40305 SVEC-19

Roll No. | | | | | | | | | | |

II B.Tech II Semester (SVEC-19) Regular Examinations August – 2021

THERMAL ENGINEERING-I

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Give the differences between four stroke and two stroke engines.	6 Marks	L2	CO1	PO1
	b)	Draw and explain VTD for four stroke petrol engine and PTD for two stroke Diesel engines.	6 Marks	L2	CO1	PO1 PO2
		(OR)				
2.	a)	Briefly explain the stages of combustion in S.I Engine and explain the various factors that Influence the flame speed.	6 Marks	L2	CO1	PO1 PO2
	b)	Explain the phenomenon of knock in C.I Engines and compare it with S.I Engine knock.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Define Brake power, indicated power, Friction power, Mean effective pressure and Specific fuel consumption.	6 Marks	L2	CO1	PO1
	b)	The following data and results refer to a test on a single-cylinder, two stroke cycle engines. Indicated mean effective pressure = 50 KPa, Cylinder diameter = 21 cm, Piston Stroke = 28 cm, Engine speed = 360 r.p.m, Brake Torque = 628 Nm, Fuel Consumption = 8.16 Kg/h, Calorific value of fuel = 42700 kJ/kg. calculate: i) Mechanical Efficiency. ii) The indicated thermal efficiency. iii) Brake thermal efficiency. iv) Brake specific fuel consumption.	6 Marks	L3	CO1	PO1 PO2 PO3
		(OR)				
4.	a)	List out the methods of obtaining Friction Power and explain any one of them in detail.	4 Marks	L3	CO1	PO1 PO2 PO3
	b)	A single cylinder, four stroke diesel engine works on the following data. Cylinder bore = 15cm, Stroke = 25cm, Speed = 250 r.p.m, Area of Indicator diagram = 6cm², Length of the indicator diagram = 9cm, Spring Constant = 7.5 bar/cm, Brake Specific Fuel Consumption = 0.24 kg/KWh, C.V of fuel = 42000 kJ/kg, Diameter of brake wheel = 70cm, Rope diameter = 3.5cm, Brake load = 40 Kg. Calculate: i) Brake power. ii) Indicated mean. iii) Effective pressure. iv) Mechanical efficiency. v) Indicated thermal efficiency	8 Marks	L2	CO1	PO1

UNIT-III

5.	a)	What are the different methods used to improve efficiency of a gas turbine plant? Explain any one method with a neat sketch.	6 Marks	L3	CO2	PO1 PO2 PO3
	b)	In a gas turbine power plant, operating on Joule cycle, air is compressed from 1 bar and 15^0C through a pressure ratio of 6. It is then heated to 727^0C in the combustion chamber and expanded back to a pressure of 1 bar. Calculate the net work done, cycle efficiency and work ratio. Assume isentropic efficiencies of turbine and compressor are 90 and 85% respectively.	6 Marks	L3	CO2	PO1 PO2 PO3
		(OR)				
6.	a)	Explain the working of Ram jet engine with a neat sketch. Define following terms as applied to jet propulsion specific thrust, specific impulse, thrust power and propulsive power.	6 Marks	L4	CO2	PO1
	b)	Explain briefly with a sketch the working principle of a rocket.	6 Marks	L2	CO2	PO1

UNIT-IV

7.	a)	Explain the effects of clearance volume in reciprocating air compressor and derive an expression for volumetric efficiency in terms of clearance ratio and pressure ratio.	6 Marks	L3	CO3	PO1 PO2
	b)	2 kg/s of air enter the L.P cylinder of a two stage, reciprocating air compressor. The overall pressure ratio is 9. The air at inlet to compressor is at 100 kPa and 35^0C. The index of compression in each cylinder is 1.3. Find the Inter Cooler pressure for perfect inter cooling. Also find the minimum power required for compression and percentage saving over single stage compression.	6 Marks	L3	CO3	PO1 PO2 PO3
		(OR)				
8.	a)	Explain the working principle of roots blower with a neat sketch.	6 Marks	L3	CO3	PO1
	b)	Describe the principle of operation, construction and working of centrifugal compressor.	6 Marks	L2	CO3	PO1

UNIT-V

9.	a)	Draw the schematic for an ideal Rankine cycle. Draw p-v, T-s and h-s diagrams for this cycle.	6 Marks	L3	CO4	PO1 PO2 PO3
	b)	Steam at 20 bar, 360^0C is expanded in a turbine to 0.08 bar. It then enters a condenser where it is condensed to saturated liquid water. The feed pump supplies saturated water back to the boiler. Calculate the network per kg of steam and cycle efficiency for ideal Rankine cycle.	6 Marks	L2	CO4	PO1
		(OR)				
10.	a)	What are methods which can lead to increase in thermal efficiency of Rankine cycle?	6 Marks	L4	CO4	PO1 PO2
	b)	The steam is the working fluid in an ideal Rankine cycle with superheat and reheat. The steam enters the first stage turbine at 8 MPa, 480^0C and expands to 0.7 MPa. It is then reheated to 440^0C before entering the second stage turbine. Where it expands to the condenser pressure of 0.008 MPa. The net output of the cycle is 100 MW. Determine: i) thermal efficiency of the cycle. ii) mass flow rate of steam in kg/h.	6 Marks	L3	CO4	PO1 PO2 PO3

CODE No.: 19BT40307 SVEC-19

II B.Tech II Semester (SVEC-19) Regular Examinations August – 2021

MANAGEMENT SCIENCE

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	Give details about functions of management with a suitable example.	12 Marks	L2	CO1	PO1
	(OR)				
2.	Write short notes on conceptual, technical skills of a manager and role of a manager.	12 Marks	L2	CO1	PO1 PO2

UNIT-II

3.	Give an illustrative explanation of different training and development methods adopted in Human Resource Management.	12 Marks	L2	CO2	PO1 PO2
	(OR)				
4.	Compare and contrast between job analysis and job evaluation.	12 Marks	L2	CO2	PO1 PO2

UNIT-III

5.	Facilities location and layout explain with neat diagrams.	12 Marks	L2	CO3	PO1
	(OR)				
6.	Balance the line for the following:	12 Marks	L2	CO3	PO1 PO2

Task	Operation Time (in Mins)	Predecessors	Task	Operation Time (in Mins)	Predecessors
1	5	Nil	5	9	4
2	5.2	1	6	4	3
3	7.5	2	7	9	Nil
4	6.5	2	8	9	5, 6, 7

The Line operates for 8 hours per days and an output of 200 units per day is desired. Draw the Precedence diagram and calculate:

i) No. of late jobs
ii) Cycle Time
iii) Theoretical Number of Work Stations required
iv) Balance Efficiency

UNIT-IV

7.	Elucidate in detail, the concept, evolution and scope of marketing strategy formulation and different components of a marketing plan.	12 Marks	L2	CO4	PO1 PO2
	(OR)				
8.	Explain channels of marketing with the help of marketing communication.	12 Marks	L2	CO4	PO1 PO2

UNIT-V

9. Draw the network for the activities whose three time estimates are given in the table. From the three time estimates obtain the expected times of all the activities and find criticalpath, project duration, slack for all events, probability of completing the projectin 20 days. — 12 Marks — L4 — CO5 — PO1 PO2 PO3 PO4 PO11

Activity	Optimistic time (days)	Most likely time (days)	Pessimistic time (days)
1 – 2	1	2	3
1 – 3	5	6	7
1 – 4	3	5	7
2 – 5	5	7	9
3 – 5	2	4	6
5 – 6	4	5	6
4 – 7	4	6	8
6 – 7	2	3	4

(OR)

10. A company is designing a new product for welding 2 different alloys. The company has limited time and resources to complete the project. — 12 Marks — L4 — CO5 — PO1 PO2 P03 PO4 PO11

Activity	Immediate predecessor	Time (days)		Cost (Rs)	
		Normal	Crash	Normal	Crash
A	-	4	3	400	125
B	A	5	4	800	200
C	A	4	2	520	150
D	B	3	2	600	225
E	C	3	2	255	100
F	B,E	4	2	600	175

i) Draw the project network.
ii) Find the critical path.
iii) Find the project completion time and the corresponding cost.
iv) What is the total cost, if the project deadline is 13 days?
v) Assume the project deadline to be 10 days. The company has to bear Rs.170 for each day of delay. Find the optimal number of days to crash the project.

ANALOG COMMUNICATIONS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Define standard form of Amplitude Modulation (AM) and explain the time and frequency domain expression of AM wave.	6 Marks	L2	CO1	PO2
	b)	The output power of an AM Transmitter is 1KW when sinusoidal signal modulated to depth of 100%. Calculate the power in each side band when the modulation depth is reduced to 50%.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Discuss about frequency domain description of VSB modulation with neat diagram.	6 Marks	L2	CO1	PO1
	b)	Explain coherent detection of SSB waves with the help of block diagram.	6 Marks	L3	CO1	PO2
		UNIT-II				
3.	a)	An FM radio link has a frequency deviation of 40KHz, the modulating signal frequency is 4 KHz. Calculate bandwidth needed for the link. What will be the bandwidth, if the frequency deviation is reduced to 20 KHz.	6 Marks	L1	CO1	PO2
	b)	Explain the FM demodulation using first order PLL.	6 Marks	L2	CO1	PO4
		(OR)				
4.	a)	Show that frequency modulation can be derived using phase modulation.	6 Marks	L4	CO1	PO2
	b)	Explain how zero crossing detector can be used as an FM demodulator.	6 Marks	L2	CO1	PO4
		UNIT-III				
5.	a)	Discuss in detail about threshold effect in FM system.	6 Marks	L4	CO2	PO2
	b)	An FM receiver receives an FM Signal $v(t) = 10 \cos (2\pi 10^8 t+6) \sin (2\pi 10^6 t)$. Calculate Figure of Merit of this receiver.	6 Marks	L4	CO2	PO2
		(OR)				
6.	a)	Derive the expression for signal to noise ratio at the output of envelope detector of a normal AM System.	6 Marks	L4	CO2	PO2
	b)	A message signal band limited to 10 KHz is transmitted through channel after modulation, power loss in the channel is 40dB and double sided noise power spectral density is given by 10^{-10} Watt/Hz. Find the transmitted power required to get output SNR of 50dB. If modulation schemes used is i) AM with μ=1; ii) FM with β=4.	6 Marks	L1	CO2	PO1
		UNIT-IV				
7.	a)	Draw the block diagram of low level and high level AM transmitter and explain its working.	6 Marks	L1	CO3	PO1
	b)	Draw the block diagram of super heterodyne receiver and explain the function of each block.	6 Marks	L1	CO3	PO3
		(OR)				

8.	a)	Explain about simple AGC and delayed AGC.	6 Marks	L4	CO3	PO2
	b)	A super heterodyne receiver the intermediate frequency is 15MHz and the local oscillator frequency is 3.5GHz. If the frequency of the received signal is greater than the local oscillator frequency, then what is image frequency?	6 Marks	L1	CO3	PO1

UNIT-V

9.	a)	Explain the Time division multiplexing.	6 Marks	L1	CO4	PO1
	b)	Explain the PWM modulation and its generation with neat sketches.	6 Marks	L3	CO4	PO2

(OR)

10.	a)	Explain the generation and demodulation of PPM with the help of block diagram.	6 Marks	L1	CO4	PO1
	b)	Compare the PAM, PWM and PPM.	6 Marks	L2	CO4	PO1

ELECTRONIC CIRCUIT ANALYSIS AND DESIGN

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Derive an expression for lower cut-off frequency of the BJT amplifier due to the effect of input coupling capacitor.	6 Marks	L4	CO1	PO1
	b)	"To achieve larger input impedances and current amplification factor Darlington pair is used". Discuss on the above statement by giving suitable expressions with your analytical skills on multistage amplifiers.	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Develop an expression for voltage gain, input and output impedances of common source MOSFET amplifier.	6 Marks	L4	CO1	PO3
	b)	Describe the small signal model of MOSFET at low-frequency.	6 Marks	L2	CO1	PO1

UNIT-II

3.	a)	The hybrid-π parameters of the transistor used in the circuit shown are given at room temperature: $\mathbf{g_m}$ = 50mA/V, $\mathbf{r_{bb'}}$ = 100Ω, $r_{b'e}$ = 1KΩ, $\mathbf{r_{b'c}}$ = 4MΩ , $\mathbf{r_{ce}}$= 80KΩ, C_c = 3pF , C_e = 100pF. Using Miller's theorem and approximate analysis, compute the upper 3-dB frequency of the current gain $A_I = I_L/I_i$. 	6 Marks	L3	CO2	PO2
	b)	Derive the expression for voltage gain of an emitter follower circuit at high frequencies.	6 Marks	L4	CO2	PO2
		(OR)				
4.	a)	Derive the expression for Hybrid-π conductance of common emitter transistor.	6 Marks	L4	CO2	PO2
	b)	Derive the expression for CE Short Circuit Current Gain A_i as a function of frequency. Draw the frequency Response Curve.	6 Marks	L4	CO2	PO2

UNIT-III

5.	a)	Elucidate the concept of negative feedback with neat block diagram and give the outlines of each block.	6 Marks	L2	CO3	PO1
	b)	The open loop gain of an amplifier is A = 5 x 10^4. If the open loop gain decreases by 10%, the closed loop gain must not be change by more than 0.1%. Determine the required value of the feedback transfer function (β) and the closed loop gain (A_f).	6 Marks	L3	CO3	PO2

(OR)

6.	a)	Derive the expressions for input and output impedance of current-series feedback amplifier.	6 Marks	L4	CO3	PO2
	b)	A voltage-series feedback amplifier employs a basic amplifier with input and output resistances each of 2kΩ and gain A = 1000 V/V. The feedback factor β = 0.1 V/V. Find the gain A_f, the input resistance R_{if}, and the output resistance R_{of} of the closed loop amplifier.	6 Marks	L3	CO3	PO2

UNIT-IV

7.	a)	Derive the expression for frequency of oscillation of Wien bridge oscillator using BJT.	6 Marks	L3	CO3	PO2
	b)	Derive the expression for frequency of oscillations of Hartley oscillator.	6 Marks	L3	CO3	PO2

(OR)

8.	a)	State and explain Barkhausen criterion to be satisfied to get the sustained oscillations.	6 Marks	L2	CO3	PO1
	b)	Derive the expression for frequency of oscillations and gain condition for RC phase shift oscillator using BJT.	6 Marks	L4	CO3	PO2

UNIT-V

9.	a)	A power transistor operating in class A transformer coupled amplifier is to deliver a maximum of 5W to a 4Ω load (i.e. R_L = 4Ω). The quiescent point is adjusted for symmetrical clipping, and the collector supply voltage is V_{CC} = 20V. Assume ideal characteristics with V_{min} = 0. Determine: i) Transformer turns ratio. ii) Peak collector current. iii) Quiescent operating point. iv) Collector-circuit efficiency.	6 Marks	L3	CO4	PO2
	b)	Explain the origin of crossover distortion. Describe the method to minimize this distortion.	6 Marks	L2	CO4	PO1

(OR)

10.	a)	Derive an expression for bandwidth of a single stage tuned amplifier.	6 Marks	L3	CO4	PO2
	b)	Write short notes on: i) Class S Power amplifier. ii) Heat sinks.	6 Marks	L1	CO4	PO1

All questions carry equal marks

		UNIT-I				
1.	a)	Illustrate the operation of instrumentation amplifier with neat sketches.	6 Marks	L2	CO1	PO1
	b)	List out and explain the applications of PLL.	6 Marks	L1	CO1	PO2
		(OR)				
2.	a)	Draw the functional block diagram of timer in Astable mode and derive expression for free running frequency.	6 Marks	L2	CO1	PO2
	b)	List out and explain the applications of monostable multivibrator.	6 Marks	L1	CO1	PO2
		UNIT-II				
3.	a)	Explain the operation of R-2R DAC.	6 Marks	L2	CO2	PO3
	b)	Explain about second order HPF with neat sketches and derive the expression for F_L.	6 Marks	L2	CO2	PO3
		(OR)				
4.	a)	Explain the operation of Dual Slope ADC.	6 Marks	L2	CO2	PO3
	b)	Design a second order LPF with a cutoff frequency of 10KHz.	6 Marks	L4	CO2	PO3
		UNIT-III				
5.	a)	Write the basics in HDL programming using structural and data flow modeling.	6 Marks	L2	CO3	PO5
	b)	Write a process based HDL program for the prime-number detector of 4-bit input and explain the flow using logic circuit.	6 Marks	L3	CO3	PO5
		(OR)				
6.	a)	Explain about dataflow design elements of VHDL.	6 Marks	L2	CO3	PO5
	b)	Write a VHDL code for basic gates in dataflow model.	6 Marks	L3	CO3	PO5
		UNIT-IV				
7.	a)	Write a VHDL program for 4x1 Multiplexer and 1x4 Demultiplexer.	6 Marks	L3	CO4	PO5
	b)	Explain about parity generator and checker.	6 Marks	L2	CO4	PO5
		(OR)				
8.	a)	Write a HDL code for Barrel Shifter using 74x151 multiplexer.	6 Marks	L3	CO4	PO5
	b)	Write a HDL code 74x181 Arithmetic and Logic Unit.	6 Marks	L3	CO4	PO5
		UNIT-V				
9.	a)	Explain how a JK- flip-flop can be constructed using a T- flip-flop.	6 Marks	L2	CO5	PO1
	b)	Write a HDL code for JK flip-flop.	6 Marks	L3	CO5	PO5
		(OR)				
10.	a)	Draw the circuit of MOD 8 Down ripple counter with D-flip-flops and explain its operation.	6 Marks	L2	CO5	PO1
	b)	Write a HDL code for 74x194 universal shift register.	6 Marks	L3	CO5	PO5

PROBABILITY AND STOCHASTIC PROCESSES

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	A pack contains 4 white and 2 green pencils, another contains 3 white and 5 green pencils. If one pencil is drawn from each pack, find the probability that: i) Both are white. ii) One is white, and another is green	6 Marks	L2	CO1	PO4
	b)	Explain about joint and conditional probability.	6 Marks	L1	CO1	PO2
		(OR)				
2.	a)	An urn contains 10 white and 3 black balls while another urn contains 3 white and 5 black balls. Two are drawn from the first urn and put into the second urn and then a ball is drawn from latter. What is the probability that it is a white ball?	6 Marks	L2	CO1	PO4
	b)	State and prove the Baye's theorem.	6 Marks	L1	CO1	PO2

UNIT-II

3.	a)	Let X be a Continuous random variable with density function $f(x) = (x/9)+ K \quad 0 \le x \le 6$ $= 0 \quad$ otherwise Find the value of K and also find $P\{2 \le X \le 5\}$.	6 Marks	L3	CO2	PO4
	b)	Let X and Y be the random variables defined as $X=\cos\theta$ and $Y=\sin\theta$, where θ is a uniform random variable over $(0, 2\pi)$ i) Are X and Y Uncorrelated? ii) Are X and Y Independent?	6 Marks	L2	CO2	PO4
		(OR)				
4.	a)	Prove that $P(x_1 < X \le x_2) = F_x(x_2) - F_x(x_1)$.	6 Marks	L2	CO2	PO1
	b)	If X is a normal variate with mean 30 and standard deviation 5. Estimate the probabilities when. i) $26 \le X \le 40$. ii) $X \ge 45$.	6 Marks	L2	CO2	PO2

UNIT-III

5.	a)	Explain the Gaussian Random Variable and Exponential Random variable with corresponding neat sketches.	6 Marks	L1	CO2	PO2
	b)	The ranks of 16 students in Mathematics and Statistics are as follows. (1,1) (2,10) (3,3) (4,4) (5,5) (6,7) (7,2) (8,6) (9,8) (10,11) (11,15) (12,9) (13,14) (14,12) (15,16) (16,13). Calculate the rank correlation coefficient for proficiencies of this group in Mathematics and Statistics.	6 Marks	L3	CO2	PO2
		(OR)				
6.	a)	If the joint PDF of two dimensional random variable (x, y) is given by: $F_{XY}(X,Y) = 2; \quad$ for $0 < x < 1, \quad 0 < y < x$ $= 0; \quad$ otherwise Find the marginal density function of X and Y.	6 Marks	L2	CO2	PO4

	b)	Discuss the properties of conditional distribution function.	6 Marks	L3	CO2	PO2

UNIT-IV

7.	a)	Find the cross-correlation function corresponding to the cross power spectrum $S_{XY}(\omega)= 6/[(9+ \omega^2)(3+j\ \omega)]^2$.	6 Marks	L3	CO3	PO4
	b)	Write short notes on cross power density spectrum.	6 Marks	L3	CO3	PO2
		(OR)				
8.	a)	A random process has the power density spectrum $S_{YY}(\omega)= 6\ \omega^2/[1+ \omega^4]$. Find the average power in the process.	6 Marks	L3	CO3	PO4
	b)	Find the auto correlation function of the random process whose psd is $16/[\ \omega^2+4]$.	6 Marks	L3	CO3	PO4

UNIT-V

9.	a)	An amplifier has a bandwidth of 500KHz, and an input resistance of 150. When a 0.5×10^{-6}v input signal level is applied to the amplifier input under matched condition, the output SNR=0dB. Determine the noise figure of the amplifier.	6 Marks	L2	CO4	PO4
	b)	Discuss the following external noises with examples. i) Atmospheric noise. ii) Extra-terrestrial noise. iii) Manmade noise.	6 Marks	L1	CO4	PO2
		(OR)				
10.	a)	An antenna having a noise temperature of 40K is connected to an amplifier having a gain of 250dB and an equivalent noise bandwidth of 3.5MHz. The equivalent noise temperature of the amplifier is 270K. Find the available noise power.	6 Marks	L2	CO4	PO4
	b)	Write a short note on Linear Transformations of Gaussian Random Variables.	6 Marks	L1	CO4	PO2

CODE No.: 19BT40441 SVEC-19

ANALOG ELECTRONICS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Draw the circuit diagram of two stage R-C coupled transistor amplifier and explain the working of it.	6 Marks	L2	CO1	PO1
	b)	Explain different types of distortions in amplifiers.	6 Marks	L1	CO1	PO2
		(OR)				
2.	a)	Explain how the frequency response will get affected by R-C coupling in multistage amplifier.	6 Marks	L3	CO1	PO2
	b)	Explain how the bootstrapping method will increase the input impedance of Darlington amplifier.	6 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Show that in voltage series and in voltage shunt feedback amplifiers the gain will be reduced by a factor of $(1+\beta A)$.	6 Marks	L2	CO2	PO2
	b)	Calculate the gain, input and output impedances of a voltage-series feedback amplifier having A= -300, R_i= 1.5kΩ, R_o= 50 kΩ and β= -1/15.	6 Marks	L3	CO2	PO5
		(OR)				
4.	a)	What are the advantages and disadvantages of the introduction of negative feedback in amplifiers? Explain.	6 Marks	L2	CO2	PO2
	b)	Show that in a current series feedback amplifier the input and output impedances are increased by a factor of $(1+\beta A)$ with feedback.	6 Marks	L4	CO2	PO3
		UNIT-III				
5.	a)	Explain the principle of operation of Wein bridge oscillator.	6 Marks	L2	CO2	PO2
	b)	Compare RC phase shift oscillator and Wein bridge oscillator.	6 Marks	L4	CO2	PO5
		(OR)				
6.	a)	Draw and explain the operation of colpitt's oscillator	6 Marks	L1	CO2	PO1
	b)	In a transistorized Hartely oscillator the two inductances are 2 mH, and 20 μH while the frequency has to be changed from 950 kHz to 2050 kHz. Calculate the range over which the capacitor is to be varied.	6 Marks	L3	CO2	PO4
		UNIT-IV				
7.	a)	Show that the transformer coupled class A amplifier has maximum efficiency of 50%.	6 Marks	L2	CO3	PO2
	b)	Design a class B power amplifier to deliver 25W to a load resistor R_L = 8Ω, using transformer coupling, V_m=V_{CC} =25V. Assume necessary data.	6 Marks	L3	CO3	PO4
		(OR)				
8.	a)	Explain the principle of operation of class C power amplifier with neat sketches.	6 Marks	L2	CO3	PO2
	b)	Determine the maximum power dissipation allowed for a 100 W silicon transistor (rated at 25°C) for a derating factor of 0.6 W/°C at a case temperature of 150° C.	6 Marks	L4	CO3	PO4

UNIT-V

9.	a)	Describe how 555 Timer IC can be used to generate a square wave.	6 Marks	L2	CO4	PO2
	b)	Design a second order low pass filter with upper frequency cut off of 12 kHz.	6 Marks	L3	CO4	PO3
		(OR)				
10.	a)	Explain the working of 555 Timer IC in monostable multi vibrator mode and give its applications.	6 Marks	L2	CO4	PO1
	b)	Draw the circuit diagram and explain the operation of op-amp based second order low-pass and high-pass filters.	6 Marks	L3	CO4	PO2

COMPUTER NETWORKS

[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe various types of Networks.	6 Marks	L2	CO1	PO1
	b)	Compare OSI and TCP/IP Reference Models.	6 Marks	L4	CO1	PO2
		(OR)				
2.	a)	Demonstrate wireless LANs in detail.	6 Marks	L3	CO1	PO1
	b)	Explain any two guided transmission media.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Sixteen-bit messages are transmitted using a Hamming code. How many check bits are needed to ensure that the receiver can detect and correct single bit errors? Show the bit pattern transmitted for the message 1101001100110101. Assume that even parity is used in the Hamming code.	6 Marks	L4	CO3	PO2
	b)	Describe Bridges, Routers and Gateways.	6 Marks	L2	CO5	PO1
		(OR)				
4.	a)	Consider the delay of pure ALOHA versus slotted ALOHA at low load. Which one is less? Explain.	6 Marks	L2	CO1	PO1
	b)	Discuss A protocol using selective repeat with figures.	6 Marks	L2	CO3	PO1
		UNIT-III				
5.	a)	Explain Network Layer design issues.	6 Marks	L2	CO3	PO2
	b)	Demonstrate hierarchical routing with figures.	6 Marks	L3	CO2	PO4
		(OR)				
6.	a)	Explain Bellman-Ford routing algorithm with figure and analyze Count-to-Infinity Problem.	6 Marks	L2	CO2	PO2
	b)	Describe congestion prevention policies in detail.	6 Marks	L2	CO5	PO3
		UNIT-IV				
7.	a)	Explain Real-time Transport Control Protocol.	6 Marks	L2	CO3	PO1
	b)	Demonstrate TCP Segment header with figure.	6 Marks	L3	CO3	PO1
		(OR)				
8.	a)	Analyze TCP Congestion control in detail.	6 Marks	L4	CO3	PO3
	b)	Describe UDP Segment header.	6 Marks	L2	CO3	PO1
		UNIT-V				
9.	a)	Can a computer have two DNS names that fall in different top-level domains? If so, give a plausible example. If not, explain why not.	6 Marks	L4	CO4	PO2
	b)	Describe HTTP and FTP.	6 Marks	L2	CO4	PO6
		(OR)				
10.	a)	Analyze Name servers.	6 Marks	L4	CO4	PO2
	b)	Describe various Message Formats.	6 Marks	L2	CO4	PO1

CODE No.: 19BT40502 SVEC-19

DATABASE MANAGEMENT SYSTEMS

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Define a data model. Describe various data models	6 Marks	L1	CO1	PO1
	b)	Discuss about database languages with suitable example.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Explain the following: i) Entity Type. ii) Relationship Type. iii) Weak-entity set.	6 Marks	L3	CO1	PO1
	b)	Construct ER model for Student database of University with a neat diagram	6 Marks	L3	CO1	PO2
		UNIT-II				
3.	a)	What are the properties of a relation?	4 Marks	L1	CO2	PO1
	b)	Describe different types of constraints used in relational model.	8 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Compare relational algebra and relational calculus.	6 Marks	L2	CO2	PO1
	b)	List and explain about any four operations of relational algebra.	6 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Write a structure of SQL and also explain various data types.	6 Marks	L3	CO3	PO2
	b)	Mention and explain about group functions that are used in SQL.	6 Marks	L2	CO2	PO2
		(OR)				
6.	a)	Differentiate procedural and non-procedural languages.	6 Marks	L1	CO3	PO1
	b)	Write a PL/SQL programme to reverse the given number.	6 Marks	L2	CO3	PO4
		UNIT-IV				
7.	a)	Why the Functional Dependencies are needed? Explain its concept.	6 Marks	L1	CO4	PO1
	b)	Describe about different normal forms used to normalize the relations.	6 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Draw and explain Transaction state transition diagram.	6 Marks	L3	CO4	PO2
	b)	What is serializability? Explain its concept,	6 Marks	L1	CO4	PO2
		UNIT-V				
9.	a)	Describe Two-Phase Locking protocol and explain about various types of Two-Phase Locking.	6 Marks	L2	CO5	PO1
	b)	Explain about Multi-version concurrency control mechanism.	6 Marks	L3	CO5	PO2
		(OR)				
10.	a)	State and explain various file organization methods. Give suitable examples to each of them.	6 Marks	L2	CO5	PO1
	b)	Distinguish between extendible and linear hashing.	6 Marks	L1	CO5	PO1

DESIGN AND ANALYSIS OF ALGORTIHMS

[Computer Science and Engineering, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

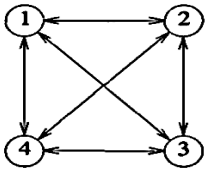
1.	a)	Discuss various types of asymptotic time complexity notations.	6 Marks	L1	CO1	PO1
	b)	Write a recursive function to find the sum of n natural numbers. Show its time complexity using step count method	6 Marks	L3	CO3	PO3
		(OR)				
2.	a)	Solve the following recurrence relation and find its asymptotic bound on T. $T(n) = 2T(n/2) + n$, if $n > 1$ $= 1$ otherwise	6 Marks	L4	CO1	PO2
	b)	Define amortized analysis illustrate aggregate analysis with example.	6 Marks	L3	CO1	PO1

UNIT-II

3.	a)	Consider the set of elements {23, 18, 53, 38, 49, 16, 58, 42}. Sort these elements using merge sort algorithm. Analyze its time complexity and represent in the form of recurrence relation.	6 Marks	L4	CO2	PO2
	b)	Illustrate simpleFind() and collapsingFind() algorithms with suitable examples.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Describe the general method of Divide and Conquer in detail.	6 Marks	L1	CO2	PO1
	b)	Describe Strassen's matrix multiplication algorithm.	6 Marks	L2	CO2	PO1

UNIT-III

5.	a)	Compute the length of optimal tour of traveling sales person for the following digraph with its edge lengths.	6 Marks	L4	CO3	PO3

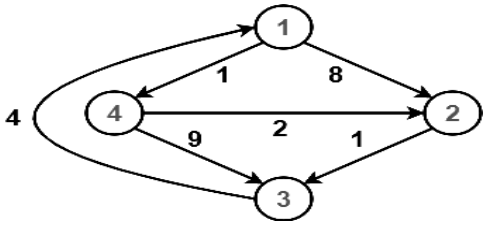


(a)

0	10	15	20
5	0	9	10
6	13	0	12
8	8	9	0

(b)

	b)	Find all pairs shortest paths for the following graph using Floyd-War shall algorithm.	6 Marks	L4	CO3	PO2



(OR)

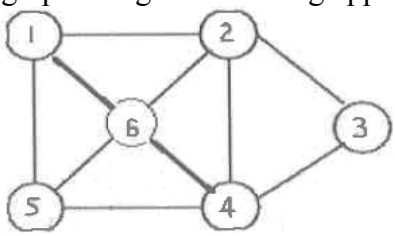
6.	a)	Give the general method of dynamic programming and discuss its applications.	6 Marks	L1	CO2	PO1
	b)	Construct an Optimal Binary Search Tree for (do, if, int, while), p(1:4) =(3,3,1,1) and q(0:4)=(2,3,1,1,1).	6 Marks	L3	CO2	PO2

UNIT-IV

7.	a)	State Huffmann coding. Illustrate it with suitable example.	6 Marks	L3	CO2	PO2
	b)	Compute all possible subsets of w[1:7] = { 15, 7, 20, 5, 18, 10, 12} and m = 35 by applying sum of subsets approach.	6 Marks	L3	CO2	PO2

(OR)

8.	a)	State Job sequencing with deadlines problem. Outline the steps of algorithm to solve it.	6 Marks	L3	CO2	PO2
	b)	What is Hamiltonian Cycle? Draw the portion of state space tree for the following graph using backtracking approach?	6 Marks	L3	CO2	PO2



UNIT-V

9.		Obtain the portion of the State Space tree that will be generated by Least Cost Branch and Bound for the following cost matrix of Travelling sales person instance.	12 Marks	L2	CO3	PO2

∞	7	3	12	8
3	∞	6	14	9
5	8	∞	6	18
9	3	5	∞	11
18	14	9	8	∞

(OR)

10.	a)	Compare and contrast deterministic and non-deterministic algorithms.	6 Marks	L3	CO4	PO2
	b)	State Cook's theorem. Discuss the importance of this theorem.	6 Marks	L2	CO4	PO1

CYBER LAWS AND SECURITY

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What is E-Governance? Mention the objectives of e-governance.	6 Marks	L1	CO1	PO1
	b)	What are the legal issues of cyberspace?	6 Marks	L1	CO1	PO1
		(OR)				
2.		Define Jurisdiction. List the three pre-requisites of Jurisdiction.	12 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	State the different models of E-Commerce.	6 Marks	L1	CO2	PO2
	b)	What is Indian Contract Act, 1872? How it is different with IT Act, 2000.	6 Marks	L4	CO2	PO1
		(OR)				
4.	a)	Explain B2C E-contracts.	6 Marks	L2	CO2	PO1
	b)	Discuss Online customer protection in India (B2B, B2C).	6 Marks	L2	CO2	PO6
		UNIT-III				
5.		Write a short notes on: i) Cryptography. ii) UNCITRAL.	12 Marks	L2	CO2	PO1
		(OR)				
6.	a)	Briefly explain E-Money and RBI's guidelines on mobile banking and payments	6 Marks	L3	CO2	PO1
	b)	What is the role of certifying authority in PKI, The Indian Information Technology Act and Electronic signatures?	6 Marks	L2	CO2	PO2
		UNIT-IV				
7.	a)	Define intellectual property rights. Explain the objectives and importance of intellectual property law.	6 Marks	L2	CO3	PO1
	b)	Briefly explain the copyright issues on the Internet.	6 Marks	L2	CO3	PO1
		(OR)				
8.	a)	Explain copyright protection for computer software.	6 Marks	L2	CO3	PO6
	b)	Discuss Digital Rights Management.	6 Marks	L2	CO3	PO6
		UNIT-V				
9.	a)	Compare India legislations with USA in Cyber crimes.	6 Marks	L4	CO4	PO8
	b)	What is Cyber Stalking? How this is different with Cyber Terrorism.	6 Marks	L4	CO4	PO8
		(OR)				
10.	a)	What is cyber crime? Explain its categories.	6 Marks	L2	CO4	PO8
	b)	What are the challenges to right of privacy in India?	6 Marks	L2	CO4	PO8

INDUSTRIAL INSTRUMENTATION
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Discuss Hot-wire gas bridge type.	4 Marks	L2	CO1	PO1
	b)	Compare Searle's rotating cylinder, Cone and Plate viscometer.	8 Marks	L3	CO1	PO1
		(OR)				
2.	a)	Define Density, Viscosity and Humidity.	6 Marks	L2	CO1	PO1
	b)	Write short notes on Psychrometer and hygrometer.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Explain Force balance and Vibrating Cylinder.	6 Mark	L2	CO2	PO1
	b)	With necessary diagram discuss Low Pressure measurement.	6 Mark	L2	CO2	PO2
		(OR)				
4.	a)	Describe McLeod and Knudsen Gage.	6 Marks	L2	CO2	PO1
	b)	List the advantage and disadvantage of electrical types measurements.	6 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	Elaborate Float–and– tape and Float–and–shaft method.	7 Marks	L3	CO3	PO1
	b)	Distinguish Inductive and Capacitance type.	5 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Illustrate the working principle of Air-Purge type with necessary diagram.	8 Marks	L3	CO3	PO2
	b)	Deliberate principle of the Bubbler type with advantage and disadvantage.	4 Marks	L1	CO3	PO3
		UNIT-IV				
7.	a)	Explain the Turbo magnetic flow meter with diagram.	7 Mark	L3	CO4	PO1
	b)	Describe with neat sketch Gyroscopic flow mete.	5 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Illustrate the working of Electromagnetic flow meter.	8 Marks	L3	CO4	PO2
	b)	Discuss the advantages and disadvantages of rotameter.	4 Marks	L1	CO4	PO1
		UNIT-V				
9.	a)	Write short notes on Chopper and low drift amplifier.	4 Marks	L1	CO5	PO1
	b)	Describe working principle of charge and electrometer amplifier.	8 Marks	L3	CO5	PO1
		(OR)				
10.	a)	Elaborate Proximity Sensors with block diagram and list the applications.	8 Marks	L3	CO5	PO1
	b)	Design V to I converter with necessary circuit.	4 Marks	L1	CO5	PO1

THEORY OF COMPUTATION
[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Design a DFA for the set of all strings with exactly 3 consecutive zeros. Σ={0,1}.	6 Marks	L4	CO1	PO2
	b)	Design NFA to accept the set of all strings over {a,b} that ends with 'aba' and find its equivalent DFA to accept the same set.	6 Marks	L3	CO1	PO2

(OR)

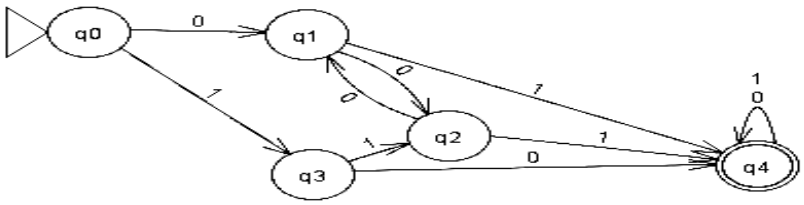
2.	a)	Construct NFA for the following NFA with **ε**-moves, where q_1 is an initial and the final state.	6 Marks	L3	CO1	PO2

	a	b	ε
- *q_1	Φ	Φ	{q_2}
q_2	{q_3}	{q_4}	Φ
q_3	Φ	{q_2}	Φ
q_4	Φ	Φ	{q_1}

	b)	Prove that a language L is accepted by some **ε**–NFA if and only if L is accepted by some DFA.	6 Marks	L4	CO2	PO3

UNIT-II

3.	a)	Write Regular-Expression for the following languages. i) Set of Strings of a's and b's that ends with 'ab' or 'bb' ii) Set of strings of a's and b's that begins with 'ab' and contains the substring 'ba'. iii) For the language over Σ={0,1} where the set of strings in which every 0 is immediately followed by at least two 1's.	6 Marks	L3	CO2	PO1
	b)	Minimize the following DFA.	6 Marks	L4	CO2	PO2



(OR)

4.	a)	Derive Regular-Expression for the following Finite Automaton.	6 Marks	L4	CO2	PO3

	b)	Write Regular-Expression for the following Languages. i) L = {Set of strings of 0's and 1's ends with '01'}. ii) L = {Set of strings of a's and b's begins with 'ab' or 'ba'}.	6 Marks	L3	CO2	PO1

iii) L = {Set of strings 0's and 1's containing substring '000'}.

UNIT-III

5.	a)	Construct Parse tree and also show Left most derivation and Rightmost derivation for the strings 'ababbba' and 'bbbbba' from the following grammar. $S \rightarrow aS/bS/a/b/\epsilon$	6 Marks	L4	CO3	PO3
	b)	Generate a CFG for the language $\mathbf{L=\{o^i1^j0^k/j>i+k\}}$.	6 Marks	L4	CO4	PO3
		(OR)				
6.	a)	Convert the following CFG in Greiback Normal Form (GNF). $S \rightarrow AA/a$ $A \rightarrow SS/b$	6 Marks	L4	CO3	PO5
	b)	Find an equivalent grammar in to CNF for the following CFG. $S \rightarrow ABCD$, $A \rightarrow Aa/b$, $B \rightarrow Bb/b$, $C \rightarrow Cc/c$, $D \rightarrow Dd/d$	6 Marks	L4	CO3	PO5

UNIT-IV

7.	a)	Consider a PDA $\mathbf{M=(\{s,p,q\},\{a, c\},\{a, z_0\}, \delta, s, z_0, p)}$ which accepts language $\mathbf{L=\{a^ncb^n/n >= 1\}}$ by final state, where δ is defined as follows: $\mathbf{\delta (s, a, z_0) = (s, az_0)}$ $\mathbf{\delta (s, a, a) = (s,aa)}$ $\mathbf{\delta (s, c, a) = (q, a)}$ $\mathbf{\delta (q, a, a) = (q, \varepsilon)}$ $\mathbf{\delta (q, \varepsilon, z_0) = (p,z_0)}$ Construct an equivalent PDA M^1 which accepts L in empty stack	6 Marks	L4	CO4	PO3
	b)	Design PDA for language L={w| w contains equal number of a's and b's }.	6 Marks	L4	CO4	PO2
		(OR)				
8.	a)	For the PDA M =($\{q_0,q_1\},\{0,1\},\{0,1,z_0\},\delta,q_0,Z_0,\Phi$) where δ is given by $\delta(q_0,\varepsilon,Z_0)=\{(q_1,\varepsilon)\}$, $\delta(q_0,0,Z_0)=\{(q_0,0Z_0)\}$, $\delta(q_0,0,0)=\{(q_0,00)\}$, $\delta(q_0,1,0)=\{(q_0,10)\}$, $\delta(q_0,1,1)=\{(q_0,11)\}$, $\delta(q_0,0,1)=\{(q_1,\varepsilon)\}$, $\delta(q_1,0,1)=\{(q_1,\varepsilon)\}$, $\delta(q_1,0,0)=\{(q_1,\varepsilon)\}$, $\delta(q_1,\varepsilon,Z_0)=\{(q_1,\varepsilon)\}$ Obtain the CFG generating the language accepted by M. This PDA accepts L={1n0m+n/m, n ≥ 0.	6 Marks	L3	CO3	PO3
	b)	Construct PDA equivalent to the following grammar. S→aAA, A→aS/bS/a.	6 Marks	L4	CO4	PO2

UNIT-V

9.	a)	Define Turing Machine. Explain Modifications of Turing Machine.	6 Marks	L3	CO5	PO3
	b)	Design Turing machine for language L = $\{WW^R \mid W$ is in $(0+1)^*\}$.	6 Marks	L3	CO5	PO3
		(OR)				
10.	a)	Design a TM to perform addition of two unary numbers.	6 Marks	L4	CO5	PO3
	b)	Explain Language acceptability by Turing machine with an example.	6 Marks	L2	CO2	PO1

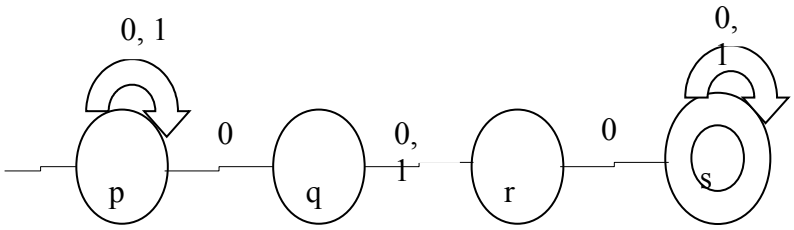
THEORY OF COMPUTATION
[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Design a DFA to accept the language where L = {w / w has both an even number of 0's and even number of 1's}.	6 Marks	L3	CO2	PO2
	b)	Construct DFA for the given following NFA.	6 Marks	L4	CO1	PO2



(OR)

2.	a)	State and prove equivalence of NFA with ε – transitions and NFA.	6 Marks	L4	CO2	PO3
	b)	Compare and contrast Moore machine and Mealy machine.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Discuss in detail the closure properties of regular sets.	6 Marks	L4	CO2	PO2
	b)	Construct a finite automata equivalent to (0+1)*(00+11)(0+1)*.	6 Marks	L2	CO3	PO1

(OR)

4.	a)	Minimize the following automata.	6 Marks	L4	CO2	PO2

	b)	Discuss in detail Applications of regular expressions.	6 Marks	L3	CO2	PO1

UNIT-III

5.		What is an ambiguous grammar? Check the grammar G having productions S → aB / bA, A → a / aS / bAA, B → b / bS / aBB is ambiguous or not?	12 Marks	L4	CO3	PO5

(OR)

6.	a)	Remove the useless symbols of the following CFG having productions. S→aB/ aCD/ aE, B→bC, C→aB/ b, D→aE, E→bCD	6 Marks	L4	CO3	PO3
	b)	Convert the following grammar G having productions E → E + T / T, T → T * F / F, F → (E) / id, into equivalent CNF grammar.	6 Marks	L4	CO3	PO3

UNIT-IV

7.	a)	Design a PDA for the language L= {anb2n/n≥1}.	6 Marks	L4	CO4	PO2
	b)	Construct PDA for the language having equal number of a's and b's.	6 Marks	L4	CO4	PO2
		(OR)				
8.	a)	Convert the grammar S→ 0AA A→ 0S/1S/0 to a PDA that accepts the same language by empty stack.	6 Marks	L3	CO4	PO2
	b)	Convert the following CFG to a PDA S →aAA, A → aS/bS/a	6 Marks	L2	CO4	PO1

UNIT-V

9.	a)	Design a Turing machine to compute factorial of a give number.	6 Marks	L3	CO5	PO3
	b)	Briefly explain various types of Turing machine.	6 Marks	L2	CO5	PO1
		(OR)				
10	a)	Discuss in detail Techniques for Turing machine construction.	6 Marks	L4	CO5	PO3
.	b)	Explain about Universal Turing machine.	6 Marks	L2	CO2	PO1

ENVIRONMENTAL POLLUTION AND CONTROL

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define air pollution. Describe classification of air pollutants with suitable examples.	6 Marks	L2	CO1	PO1 PO2
	b)	What are the effects of various pollutants on human health and materials?	6 Marks	L2	CO1	PO1 PO4 PO7
		(OR)				
2.	a)	Distinguish between lapse rate and inversion. Give a detailed analysis on plume behavior under various atmospheric conditions.	6 Marks	L3	CO1	PO1 PO2
	b)	Define Sound pressure, Sound power and Sound intensity. Explain the impacts of noise pollution.	6 Marks	L2	CO1	PO1 PO6

UNIT-II

3.	a)	Draw and explain the principle and working of a bag house filter. What are the applications of filters?	6 Marks	L3	CO2	PO1 PO2 PO5
	b)	Discuss any two methods for the control of gaseous pollutants.	6 Marks	L2	CO2	PO2 PO7
		(OR)				
4.	a)	Explain working of a venturi scrubber with suitable diagram.	6 Marks	L3	CO2	PO1 PO5
	b)	Suggest various measures you adopt for the control of noise pollution.	6 Marks	L4	CO2	PO1 PO2 PO3 PO7

UNIT-III

5.	a)	Draw a flow-sheet for the treatment of turbid surface water with organics. Explain functions of each unit in the flow sheet.	6 Marks	L3	CO3	PO2 PO3
	b)	Distinguish between surface water quality and ground water quality.	3 Marks	L4	CO3	PO1 PO4
	c)	Write the Permissible limits of the following parameters for Drinking water supplies: i) Fluorides ii) Turbidity iii) Chlorides iv) Hardness v) Nitrates vi) Ph.	3 Marks	L1	CO3	PO7 PO8
		(OR)				
6.	a)	Examine the importance of Aeration, Softening and Disinfection processes in water treatment.	6 Marks	L4	CO3	PO2 PO4 PO6 PO7
	b)	Describe primary and secondary treatment of wastewater.	6 Marks	L2	CO3	PO2 PO4 PO6

						PO7

UNIT-IV

7.	a)	Define soil pollution. Discuss the sources of soil pollution.	6 Marks	L2	CO4	PO1 PO4
	b)	Write short notes on the following: i) Diseases caused by soil pollution. ii) Minimization of soil pollution.	6 Marks	L2	CO4	PO1 PO2 PO6 PO7
		(OR)				
8.	a)	Explain various control measures of soil pollution.	6 Marks	L4	CO4	PO1 PO2 PO4 PO7
	b)	Outline any one case study on soil pollution.	6 Marks	L4	CO4	PO1 PO2 PO4 PO6

UNIT-V

9.	a)	Write a note on composition of municipal solid waste. What are the effects of solid waste on health and environment?	6 Marks	L2	CO5	PO1 PO2 PO6
	b)	Explain a transfer station with a neat sketch. When do you suggest transfer station?	6 Marks	L2	CO5	PO1 PO11
		(OR)				
10.	a)	Explain incineration, composting and open dumping methods of solid waste disposal.	6 Marks	L4	CO5	PO1 PO2 PO6 PO7 PO11
	b)	Write a detailed note on energy recovery from solid waste.	6 Marks	L3	CO5	PO1 PO2 PO7 PO12

RURAL TECHNOLOGY

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Explain the role of rural business hubs in improving rural infrastructure.	12 Marks	L3	CO1	PO2 PO4 PO5
		(OR)				
2.		Explain the role of CAPART and NIF in rural development.	12 Marks	L4	CO1	PO2 PO4 PO5

UNIT-II

3.	a)	Define Energy. Explain the structure and working of a biogas plant. State the uses of biogas for rural development.	6 Marks	L3	CO2	PO1 PO4 PO5
	b)	State the disadvantages of incineration of biomass. Explain the significance of composting technology for effective utilization of organic wastes.	6 Marks	L2	CO2	PO1 PO4 PO5
		(OR)				
4.		Write a short note on: i) Recycling and management. ii) Wastes conservation.	12 Marks	L4	CO2	PO1 PO4 PO5 PO6

UNIT-III

5.	a)	Enlist and explain any 4 initiatives of the governments for promoting cottage industries helpful in rural economic growth.	6 Marks	L2	CO3	PO2 PO5 PO6
	b)	Write short notes on: i) Agro-based industries ii) Building and Construction technologies	6 Marks	L3	CO3	PO2 PO5 PO6 PO7
		(OR)				
6.		Discuss foods and agro based technologies which will give employment and profits to community.	12 Marks	L2	CO3	PO1 PO3 PO6 PO7

UNIT-IV

7.	a)	Justify fresh water and more particularly ground water as a precious resource with respect to its availability for human activities.	6 Marks	L2	CO4	PO1 PO2 PO4 PO5
	b)	Discuss the need for prevention of contamination of fresh water resource in rural environment. Suggest measures to ensure supply of safe drinking water in villages.	6 Marks	L3	CO4	PO1 PO2 PO4 PO5
		(OR)				

8.	a)	Write short notes on the provision of the following in rural areas. i) Drinking water. ii) Environment generating technologies.	6 Marks	L2	CO4	PO1 PO2 PO5 PO6
	b)	Discuss any two rain water harvesting technologies employed in India with suitable illustrations.	6 Marks	L2	CO4	PO1 PO2 PO5 PO7

UNIT-V

9.		Write a detailed note on: i) Saansad Adarsh Gram Yojana(SAGY). ii) Need and Necessity of technology in rural areas.	12 Marks	L6	CO5	PO4 PO5 PO6 PO7

(OR)

10.	a)	Write a detailed note on private sector participation in development of employment in rural sector.	6 Marks	L2	CO5	PO2 PO5 PO6 PO7
	b)	Write a detailed note in impact of information technology in rural development.	6 Marks	L2	CO5	PO2 PO5 PO6 PO7

CONTROL SYSTEMS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Develop and explain the Force-Voltage and Force-Current analogy expressions.	6 Marks	L1	CO1	PO1
	b)	Draw the signal flow graph and determine $\frac{C(S)}{R(S)}$ using Mason's gain formula for the following fig. 	6 Marks	L2	CO1	PO2

(OR)

2.	a)	Develop the expression for transfer function of Armature controlled DC servo motor. Draw the block diagram.	6 Marks	L2	CO1	PO2
	b)	Obtain Mathematical model of the mechanical system shown in fig. 	6 Marks	L2	CO1	PO2

UNIT-II

3.	a)	Derive expressions for Rise time, Peak time, Delay time and Maximum overshoot of second order under damped system with step input.	6 Marks	L1	CO2	PO1
	b)	The open loop transfer function of a unity feed back system is given by $G(S)=\frac{K}{S(TS+1)}$ where K and T are positive Constants. By what factor should be amplifier gain be reduced so that the peak over shoot of unit step response of the system is reduced from 75% to 25%.	6 Marks	L3	CO2	PO3

(OR)

4.	a)	Explain briefly about the effect of adding Proportional and Integral controllers to a control system.	6 Marks	L1	CO2	PO2
	b)	For a unity feedback system the open loop transfer function is $G(s)=\frac{10(s+2)}{s^2(s+1)}$ i) Find the positional ,velocity and acceleration error constants . ii) Steady state error when the input is $R(s)=\frac{3}{s}-\frac{2}{s^2}+\frac{1}{s^2}$.	6 Marks	L3	CO2	PO3

UNIT-III

5.		Draw the bode plot of $G(s)H(s)=\frac{250}{s(2.5+s)(10+s)}$. Find Gain Margin and Phase Margin.	12 Marks	L3	CO3	PO4
		(OR)				
6.		Explain about the advantages of root locus and determine the limiting value of gain 'K' for stability to the open loop transfer function $\frac{K}{s(1+0.1s)(1+0.2s)}$.	12 Marks	L3	CO3	PO4

UNIT-IV

7.		Consider a unity feedback system with open loop transfer function, $G(S)=\frac{20}{S(S+2)(S+4)}$. Design a PD controller so that the closed loop has a damping ratio of 0.8 and natural frequency of oscillation as 2 rad/sec.	12 Marks	L4	CO4	PO4
		(OR)				
8.		Consider a unity feedback system with open loop transfer function, $G(S)=\frac{K}{S(S+4)(S+7)}$. Design a lead compensator to satisfy the condition of Maximum peak overshoot Mp=12.63%.	12 Marks	L4	CO4	PO4

UNIT-V

9.	a)	Obtain the state model of the system whose transfer function is given by $\frac{y(s)}{u(s)}=\frac{10}{(s^2+4s^2+2s+1)}$.	6 Marks	L2	CO5	PO5
	b)	Compute the state transition matrix of a system represented by $\begin{bmatrix}\dot{x}_1\\ \dot{x}_2\end{bmatrix}=\begin{bmatrix}-3 & 1\\ -2 & 0\end{bmatrix}\begin{bmatrix}x_1\\ x_2\end{bmatrix}+\begin{bmatrix}0\\ 1\end{bmatrix}u,$	6 Marks	L3	CO5	PO5
		(OR)				
10.		Define controllability and observability. Find controllability and observability of the given System. $\begin{bmatrix}\dot{x}_1\\ \dot{x}_2\\ \dot{x}_3\end{bmatrix}=\begin{bmatrix}2 & -2 & 3\\ 1 & 1 & 1\\ 1 & 3 & -1\end{bmatrix}\begin{bmatrix}x_1\\ x_2\\ x_3\end{bmatrix}+\begin{bmatrix}11\\ 1\\ -14\end{bmatrix}[u];$ $Y=\begin{bmatrix}-3 & 5 & -2\end{bmatrix}\begin{bmatrix}x_1\\ x_2\\ x_3\end{bmatrix}.$	12 Marks	L2	CO5	PO5

GREEN TECHNOLOGIES

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Define green engineering.	2 Marks	L1	CO1	PO1
	b)	Explain the significance of green engineering practices.	4 Marks	L2	CO1	PO1
	c)	Memorize any six principles of green engineering.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Explain the energy saving concepts in Green Communications.	6 Marks	L2	CO1	PO7
	b)	Discuss about extended energy model in ICT equipment.	6 Marks	L2	CO1	PO6
		UNIT-II				
3.	a)	Enumerate the adverse effects of conventional energy sources on the environment.	6 Marks	L2	CO2	PO1
	b)	Justify how the solar energy can be utilized as an alternative energy with its relative advantages and disadvantages.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	"Our first and foremost goal is to reduce our carbon footprint and keep our planet clean." Justify suitable methods to fortify the statement.	6 Marks	L2	CO2	PO7
	b)	Explain the process of bio-mass energy conversion and enumerate some applications to meet the societal needs.	6 Marks	L2	CO2	PO6
		UNIT-III				
5.	a)	Analyze how a seven step approach is applicable for enterprises to develop and implement Green IT strategy.	6 Marks	L4	CO3	PO6
	b)	Green initiatives may lead to additional cost for addressing sustainable issues. Justify.	6 Marks	L4	CO3	PO6
		(OR)				
6.	a)	What is a Smart Home? How does it help in protecting the environment?	6 Marks	L2	CO3	PO7
	b)	Develop a Green IT strategy for a Retail store.	6 Marks	L3	CO3	PO6
		UNIT-IV				
7.	a)	Explain the factors affecting sustainable development.	6 Marks	L2	CO4	PO7
	b)	Explain the planning criteria for daylight, ventilation and storm water drainage.	6 Marks	L2	CO4	PO6
		(OR)				
8.	a)	Define the term LEED. Explain in detail LEED-India rating system.	6 Marks	L2	CO4	PO8
	b)	What are the criteria for a building to be rated as one star, two star, three star, four star and five star as per GRIHA?	6 Marks	L2	CO4	PO5

UNIT-V

9.	a)	Define green manufacturing. Explain the impact of traditional manufacturing towards environment.	6 Marks	L1	CO5	PO7
	b)	Summarize the barriers of green manufacturing.	6 Marks	L2	CO5	PO2
		(OR)				
10.	a)	Discuss in detail about the strategies of green manufacturing.	6 Marks	L2	CO5	PO1
	b)	Illustrate the advantages and limitations of green manufacturing.	6 Marks	L3	CO5	PO2

ETHICAL HACKING

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What is meant by Certified Ethical Hacker (CEH)? Discuss what domains tested by CEH.	6 Marks	L1	CO1	PO1
	b)	Define Pen Test? Explain different Penetration-Testing methodologies.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	What is a Buffer Overflow attack? Discuss different Buffer Overflow vulnerabilities.	6 Marks	L1	CO1	PO6
	b)	Define worm. Explain different Common computer worms with suitable examples.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Explain any two methods social engineers use to gain access to information.	6 Marks	L3	CO2	PO1
	b)	What is a Foot prining? How to gather information through foot printing in DNS.	6 Marks	L4	CO3	PO8
		(OR)				
4.	a)	Discuss in detail different Information gathering tools.	6 Marks	L1	CO1	PO1
	b)	Define ping sweep. How to conduct ping sweep in hacking field explain with suitable examples.	6 Marks	L3	CO3	PO6
		UNIT-III				
5.	a)	What is Steganography? Discuss different Steganography technologies.	6 Marks	L2	CO2	PO1
	b)	Explain different Denial of Service (DOS) attacks.	6 Marks	L2	CO2	PO1
		(OR)				
6.	a)	Discuss in-detail different Password cracking Techniques.	6 Marks	L1	CO2	PO6
	b)	Explain different Escalating Privileges.	6 Marks	L2	CO1	PO2
		UNIT-IV				
7.	a)	Explain different vulnerabilities identified by the security tester in the OWASP.	6 Marks	L2	CO1	PO8
	b)	Explain how to hack the web server using OWASP developed the Web Goat project to think and figure out how to launch attacks in the web applications.	6 Marks	L4	CO3	PO6
		(OR)				
8.	a)	Explain the use of war driving and how it works.	6 Marks	L3	CO3	PO1
	b)	Write short notes on wireless hackers tools : i) NetStumbler. ii) Kismet.	6 Marks	L3	CO3	PO2

UNIT-V

9.	a)	What is Symmetric algorithm? Discuss different types of Symmetric algorithms and also specify disadvantages.	6 Marks	L2	CO1	PO1
	b)	Distinguish between Symmetric and Asymmetric cryptography algorithms.	6 Marks	L4	CO3	PO8
		(OR)				
10.	a)	Explain Cisco Router Configuration access modes. What Commands are used to showing configuration details?	6 Marks	L3	CO3	PO6
	b)	Describe and discuss the Cisco Router Components.	6 Marks	L1	CO2	PO2

AI IN HEALTHCARE

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Elaborate on the usage of Artificial Intelligence in Healthcare.	6 Marks	L1	CO1	PO1
	b)	Write different applications of Artificial Neural Networks in Healthcare by giving your own examples.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Write some future technologies of AI and how it can be used in healthcare industry.	6 Marks	L1	CO1	PO3
	b)	Give a brief explanation about the risks involved in using AI technologies in healthcare industry and how we can mitigate them.	6 Marks	L1	CO1	PO2

UNIT-II

3.	a)	Write the applications of AI in Dentistry, Orthopedics and Ophthalmology in an elaborative manner.	6 Marks	L3	CO2	PO3
	b)	Give an application of AI in dermatology by considering an example on your own.	6 Marks	L2	CO2	PO3
		(OR)				
4.	a)	Describe briefly about the applications of AI in Psychiatry and Cardiology.	6 Marks	L2	CO2	PO2
	b)	Compare and Contrast usages of AI in Surgery and Anesthesiology.	6 Marks	L3	CO2	PO3

UNIT-III

5.	a)	Write different features of IBM Watson in healthcare in your words by giving examples.	6 Marks	L2	CO3	PO2
	b)	Give the role of Google and Deep Mind applications of Artificial Intelligence in health care.	6 Marks	L3	CO3	PO4
		(OR)				
6.	a)	How Baidu and Facebook technologies can be used in dealing with diseases in Healthcare.	6 Marks	L2	CO3	PO5
	b)	Give a brief note on how major corporations like Microsoft use AI technology to different healthcare applications.	6 Marks	L1	CO3	PO3

UNIT-IV

7.	a)	How virtual assistants are used in healthcare applications as future technologies of AI?	6 Marks	L2	CO4	PO5
	b)	Write a short note on medication adherence and how Artificial Intelligence technologies can be used in accessible diagnostic tests.	6 Marks	L2	CO4	PO3

(OR)

8.	a)	What do you mean by Incentivized wellness and give a brief explanation about AI technology can be used to increase productivity?	6 Marks	L2	CO4	PO4
	b)	Differentiate between Innovation and Deliberation with your examples. Explain it with reference to AI applications.	6 Marks	L2	CO4	PO3

UNIT-V

9.	a)	Consider a case study on usage of Neural Networks as an AI application to check whether a patient is disease prone or not by considering the choice of disease on your own.	6 Marks	L2	CO5	PO2
	b)	Give a brief explanation about of how AI can be used Imaging of Diabetic foot Concerns and prioritization of referrals for improving in Morbidity and Mortality.	6 Marks	L2	CO5	PO4

(OR)

10.	a)	Discuss thoroughly AI based application on Type-2 Diabetes self management.	6 Marks	L2	CO5	PO2
	b)	Describe about a case study on delivering a scalable and engaging digital therapy with your own words.	6 Marks	L3	CO5	PO3

BANKING AND INSURANCE

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

	UNIT-I				
1.	Enumerate and elucidate various functions of banking.	12 Marks	L3	CO1	PO3
	(OR)				
2.	"Is printing of higher denomination currency unfavorable indicator of the economic position" Examine.	12 Marks	L3	CO2	PO5 PO3
	UNIT-II				
3.	Give a brief note on types of accounts.	12 Marks	L3	CO1	PO3
	(OR)				
4.	"Retaining the existing customers is far better than attracting new customers for a bank" Critically analyze the factors influencing banker-customer relationship.	12 Marks	L3	CO2	PO5 PO12
	UNIT-III				
5.	Explain various e-payment systems in detail.	12 Marks	L3	CO1	PO3 PO12
	(OR)				
6.	Describe briefly the role of tenders in B2G model.	12 Marks	L3	CO1	PO3
	UNIT-IV				
7.	Compare Risk *Vs* Uncertainty.	12 Marks	L3	CO2	PO5 PO12
	(OR)				
8.	"Insurance can be used as an Investment avenue". Comment.	12 Marks	L3	CO2	PO5 PO12
	UNIT-V				
9.	How does life insurance differ from general insurance?	12 Marks	L3	CO1	PO3
	(OR)				
10.	Evaluate the role of private insurance players in Indian Insurance markets.	12 Marks	L3	CO2	PO3 PO5

PROFESSIONAL ETHICS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the scope and aims of Engineering Ethics.	6 Marks	L2	CO1	PO1
	b)	Explain the senses of Engineering Ethics.	6 Marks	L2	CO3	PO8
		(OR)				
2.		Where and how do Moral problems arise in engineering?	12 Marks	L2	CO3	PO8
		UNIT-II				
3.	a)	Discuss briefly the differences between a professional and an amateur.	6 Marks	L4	CO2	PO2
	b)	Explain the term 'professional accountability' with examples.	6 Marks	L4	CO1	PO1
		(OR)				
4.		Explain briefly the terms 'profession' and 'professional' with suitable examples.	12 Marks	L2	CO1	PO1
		UNIT-III				
5.	a)	Explain the meaning of Accountability in the engineering context.	6 Marks	L2	CO2	PO2
	b)	Define 'conscientiousness'.	6 Marks	L2	CO1	PO1
		(OR)				
6.		Compare and contrast engineering experiments with standard experiments.	12 Marks	L4	CO2	PO2
		UNIT-IV				
7.	a)	Define 'loyalty' and 'confidentiality'.	6 Marks	L2	CO1	PO1
	b)	What is meant by 'discrimination' and give an example?	6 Marks	L2	CO1	PO1
		(OR)				
8.		Explain the conditions that have to be met before a professional can be justified in blowing the whistle.	12 Marks	L4	CO2	PO2
		UNIT-V				
9.	a)	Explain the role of engineers as managers.	6 Marks	L2	CO1	PO1
	b)	Explain the meaning of environmental ethics.	6 Marks	L2	CO3	PO8
		(OR)				
10.		What is meant by 'morally creative leaders' and participation in professional societies?	12 Marks	L2	CO3	PO8

SOFTWARE ENGINEERING

[Computer Science and Engineering, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Sketch and explain Evolutionary Process model.	6 Marks	L1	CO1	PO1
	b)	Explain about Agile Unified Process (AUP).	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Describe a process framework in your own words. When we say that framework activities are applicable to all projects, does this mean that the same work tasks are applied for all projects, regardless of size and complexity? Explain.	6 Marks	L3	CO1	PO3
	b)	Explain Incremental Model with a neat sketch.	6 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Examine how mathematical notations can be used to express a functional requirement in it and explain with examples.	6 Marks	L2	CO2	PO5
	b)	What is the Use Case technique of requirement elicitation? Describe its components.	6 Marks	L1	CO2	PO1
		(OR)				
4.		Explain in detail about four activities involved in Requirements Engineering process.	12 Marks	L1	CO2	PO1
		UNIT-III				
5.	a)	Design use case diagram for ATM application.	6 Marks	L3	CO3	PO3
	b)	Construct and explain the exceptional messages in sequence diagram.	6 Marks	L1	CO3	PO1
		(OR)				
6.	a)	Explain in detail about Process Metrics.	6 Marks	L1	CO3	PO1
	b)	Design a sequence diagram that models the data processing involved when a customer withdraws cash from the bank ATM machine.	6 Marks	L3	CO3	PO3
		UNIT-IV				
7.		Discuss at least three examples in which black-box testing might give the impression that "everything's OK," while white-box tests might uncover an error. Give at least three examples in which white-box testing might give the impression that "everything's OK," while black-box tests might uncover an error.	12 Marks	L2	CO4	PO2
		(OR)				
8.		The concept of "antibugging" is an extremely effective way to provide built-in debugging assistance when an error is uncovered: i) Develop a set of guidelines for antibugging. ii) Discuss advantages of using the technique iii) Discuss disadvantages.	12 Marks	L2	CO4	PO2

UNIT-V

9.	a)	Explain the measures of Availability and Reliability.	6 Marks	L1	CO5	PO1
	b)	Discuss the steps involved in Business process engineering model with a neat sketch.	6 Marks	L1	CO5	PO1

(OR)

10.	a)	Define SQA. List and explain SQA activities.	6 Marks	L1	CO5	PO1
	b)	Design a risk information sheet by refine "Delivery deadline will be tightened" risk.	6 Marks	L3	CO5	PO3

OPERATING SYSTEMS

[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain about services of operating systems.	6 Marks	L2	CO1	PO1
	b)	Discuss about hybrid operating systems.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Describe inter process communication with neat diagram.	6 Marks	L2	CO1	PO1
	b)	Consider the following set of processes that arrive at time 0 with the length of the CPU burst time given in milliseconds.	6 Marks	L3	CO1	PO4

Process	Burst Time
P1	24
P2	3
P3	3

Draw the Gnatt chart using FCFS and Round Robin Scheduling Algorithm. Calculate the average waiting time in both cases.

Note: Take time quantum = 4ms.

Analyze which of the algorithm results in minimum average waiting time.

UNIT-II

3.	a)	Define Race Condition. With pseudo code, present the Peterson's solution for critical section problem.	6 Marks	L4	CO2	PO3
	b)	Using monitors, explain solution for Producer-Consumer classical synchronization problem.	6 Marks	L3	CO2	PO5
		(OR)				
4.	a)	Describe the methods for handling for deadlocks.	6 Marks	L2	CO3	PO1
	b)	Suppose there are four processes in execution with 12 instances of resources R in a system. The maximum need of each process and current allocation are given below:	6 Marks	L3	CO3	PO3

Process	Max need	Allocation
P1	8	3
P2	9	4
P3	5	2
P4	3	1

Find out the safe sequence.

UNIT-III

5.	a)	Compare the segmented paging scheme with the hashed page table scheme for handling large address spaces. Under what circumstances is one scheme preferable to the other.	6 Marks	L4	CO4	PO2
	b)	Discuss about memory protection in segmentation with paging.	6 Marks	L2	CO4	PO1
		(OR)				
6.	a)	Describe optimal page replacement algorithm with neat diagram.	6 Marks	L2	CO4	PO2

	b)	Discuss the hardware support required for demand paging.	6 Marks	L3	CO4	PO1
		UNIT-IV				
7.	a)	Compare file allocation methods in operating systems.	6 Marks	L4	CO5	PO2
	b)	What are the advantages and disadvantages of contiguous allocation and linked allocation?	6 Marks	L2	CO5	PO1
		(OR)				
8.	a)	Explain characteristics of I/O devices.	6 Marks	L2	CO6	PO1
	b)	Describe the services provided by kernel I/O subsystem.	6 Marks	L4	CO6	PO1
		UNIT-V				
9.	a)	Describe the several methods of implementing access matrix.	6 Marks	L2	CO6	PO1
	b)	Analyze the schemes that are used to implement revocation for capabilities.	6 Marks	L4	CO6	PO4
		(OR)				
10.	a)	Explain the various questions that arise in revocation of access rights.	6 Marks	L2	CO6	PO2
	b)	Write a short note on user authentication.	6 Marks	L2	CO6	PO2

HYDRAULIC ENGINEERING

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What boundary condition must be satisfied by the velocity distribution in laminar boundary layer over a plate with a neat sketch and mention any two practical applications?	6 Marks	L2	CO1	PO1 PO10
	b)	The velocity distribution in the boundary layer is given by: $u/U = (y/\delta)^{1/7}$, where u is the velocity at a distance y from the plate and u = U at y = δ, δ being boundary layer thickness. Find: i) The displacement thickness. ii) The momentum thickness. iii) The energy thickness. iv) The value of δ*/q.	6 Marks	L4	CO1	PO1 PO2 PO4 PO10
		(OR)				
2.	a)	Derive an expression for Von Karman momentum integral equation with a neat sketch.	6 Marks	L4	CO1	PO1 PO2 PO4 PO10
	b)	On a flat plate of 2 m (length) x 1 m (width), experiments were conducted in a wind tunnel with a wind speed of 50 km/h. The plate is kept at such an angle that the coefficients of drag and lift ate 0.18 and 0.9 respectively. Determine: i) Drag force. ii) Lift force. iii) Resultant force. iv) Power exerted by the air stream on the plate. Take density of air = 1.15 kg/m^3	6 Marks	L4	CO1	PO1 PO2 PO4 PO5 PO10

UNIT-II

3.	a)	Calculate the specific energy of 12 m^3/s of water flowing with a velocity of 1.5 m/s in a rectangular channel 7.5 m wide. Find the depth of water in the channel when the specific energy would be minimum. Identify the value of critical velocity as well as minimum specific energy.	6 Marks	L6	CO2	PO1 PO2 PO3 PO4 PO6 PO7 PO10
	b)	A triangular gutter, whose sides include an angle of 60°, conveys water at a uniform depth of 250 mm. If the discharge is 0.04m^3/s, determine the gradient of the trough. Use the Chezy's formula assuming that C = 52.	6 Marks	L6	CO2	PO1 PO2 PO3 PO4 PO5 PO6 PO7

						PO10
		(OR)				
4.	a)	A 8 m wide channel conveys 15 m^3/s of water at a depth of 1.2m. Calculate: i) Specific energy of the flowing water. ii) Critical depth, critical velocity and minimum specific energy. iii) Froude number and state whether flow is subcritical or supercritical.	6 Marks	L6	CO2	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO10
	b)	A trapezoidal channel with side slopes 1 to 1 has to be designed to carry 10 m^3/s at a velocity of 2 m/s so that the amount of lining of concrete for bed and sides is minimum. Calculate the area of lining required for one meter length of the channel.	6 Marks	L6	CO2	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO10
		UNIT-III				
5.	a)	A jet of water having a velocity of 40 m/s strikes a curves vane which is moving with a velocity of 20 m/s. The jet makes an angle of 30° with the direction of motion of vane at inlet and leaves at an angle of 90° to the direction of motion of vane at outlet. i) Draw the velocity triangles at inlet and outlet. ii) Identify the vane angles at inlet and outlet so that the water enters and leaves the vane without shock.	6 Marks	L4	CO3	PO1 PO2 PO4 PO6 PO10
	b)	A 75 mm diameter jet having a velocity of 30 m/s strikes a flat plate, the normal of which is inclined at 45° to the axis of the jet. Find the normal pressure on the plate, i) When the plate is stationary. ii) When the plate is moving with a velocity of 15 m/s in the direction of jet, away from the jet. Also determine the power and efficiency of the jet when the plate is moving.	6 Marks	L4	CO3	PO1 PO2 PO4 PO6 PO10
		(OR)				
6.	a)	A jet of water having a velocity of 35 m/s impinges on a series of vanes moving with a velocity of 20 m/s. The jet makes an angle of 30° to the direction of motion of vanes when entering and leaves at an angle of 120°. Draw the triangles of velocities at inlet and outlet and find: i) The angles of vanes tips so that water enters and leaves without shock. ii) The work done per N of water entering the vanes. iii) The efficiency.	6 Marks	L4	CO3	PO1 PO2 PO4 PO6 PO10
	b)	State Impulse Momentum Principle. Derive an expression for impact of jet of liquid on a fixed vertical plate. Find the force exerted by a 4 cm diameter water jet directed against a flat plate held normal to the jet, if the jet is discharging 60 litres of water per second.	6 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO10

UNIT-IV

7.	a)	A Pelton wheel is required to develop 8825 kW when working under the head of 300m. The speed of the Pelton wheel is 540 rpm. The coefficient of velocity for the jet is 0.987, speed ratio is 0.46. Assuming the jet ratio as 10 and overall efficiency as 84%. Estimate: i) Number of jets. ii) Diameter of the wheel. iii) Quantity of water required.	6 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO10
	b)	i) Sketch Francis turbine and explain the parts of the turbine. ii) A Kaplan turbine develops 22000 kW at an average head of 35 m. Assuming a speed ratio of 2, flow ratio of 0.6, diameter of the boss equal to 0·35 times the diameter of the runner and an overall efficiency of 88 per cent, calculate the diameter, speed and specific speed of the turbine.	6 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO10

(OR)

8.	a)	i) Draw and explain the characteristics curve of turbines with a neat sketch. ii) Explain the various efficiencies of hydraulic turbines.	6 Marks	L2	CO4	PO1 PO10
	b)	A reaction turbine works at 450 r.p.m. under a head of 120 m. Its diameter at inlet is 1.2 m and the flow area is 0.4 m². The angles made by absolute and relative velocities at inlet are 20° and 60° respectively with the tangential velocity. Determine: i) The volume flow rate. ii) The power developed. iii) The hydraulic efficiency.	6 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO10

UNIT-V

9.	a)	The impeller of a centrifugal pump has an external diameter of 450 mm and internal diameter of 200 mm and it runs at 1440 r.p.m. Assuming a constant radial flow through the impeller at 2.5 m/s and that the vanes at exit are set back at an angle 25°, determine: i) Inlet vane angle. ii) The angle, absolute velocity of water at exit makes with the tangent. iii) The work done per N of water.	6 Marks	L6	CO5	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO10
	b)	A centrifugal pump running at 800 r.p.m. is working against a total head of 20.2 m. The external diameter of the impeller is 480 mm and outlet width 60 mm. If the vanes angle at outlet is 40° and manometric efficiency is 70 percent, determine: i) Flow velocity at outlet. ii) Absolute velocity of water leaving the vane. iii) Angle made by the absolute velocity at outlet with the direction of motion at outlet. iv) Rate of flow through the pump.	6 Marks	L6	CO5	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO10

(OR)

10.	a)	Draw the sketch of reciprocating pump and mention its components. Distinguish the working of single-acting and double-acting reciprocating pump, in detail.	6 Marks	L4	CO5	PO1 PO2 PO10
	b)	A single-acting reciprocating pump having a bore of 150 mm and a stroke of 300 mm is raising water to height of 20 m above the sump level. The pump has an actual discharge of 0.0052 m^3/s. The efficiency of the pump is 70%. If the speed of pump is 60 r.p.m, determine: i) Theoretical discharge. ii) Theoretical power. iii) Actual power. iv) Percentage slip.	6 Marks	L4	CO5	PO1 PO2 PO3 PO4 PO5 PO10

II B.Tech II Semester (SVEC-19) Supplementary Examinations, January - 2022

SOIL MECHANICS

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What is clay mineralogy? Explain the different types of clay minerals with neat sketches.	6 Marks	L2	CO1	PO1 PO10
	b)	List various latest methods to determine field density. Derive the relation between γ_b, γ_w, G, S_r and e for bulk unit weight of soil in terms of void ratio.	6 Marks	L4	CO1	PO1 PO2 PO12
		(OR)				
2.	a)	A proposed embankment fill requires 5000 m^3 of compacted soil. The void ratio of compacted fill is specified as 0.70. Four borrow area soils are available as described in the following table.	6 Marks	L4	CO1	PO1 PO2 PO4 PO6 PO7 PO10 PO11

Borrow area	Void ratio	Cost of transportation Rs./m^3	Cost of excavation Rs./m^3
A	0.85	450	25
B	1.20	300	25
C	0.95	350	25
D	0.75	500	25

Make the necessary calculations to select the borrow area from which the soil should be brought to minimize the cost. Let specific gravity of all four soils equal to 2.70.

	b)	i) Explain the procedure for determination of liquid limit test as per IS 2720. ii) The liquid limit, plastic limit and natural moisture content of soil are given as 50%, 35% and 25%. What will be the values of plasticity index, liquidity index, and consistency index?	6 Marks	L4	CO1	PO1 PO2 PO8

UNIT-II

3.	a)	Explain the procedure of constant head permeability test with a neat sketch.	6 Marks	L2	CO2	PO1 PO5 PO8 PO10
	b)	Explain the Darcy's law and its validity for flow of water through soil. Determine the discharge velocity if the coefficient of permeability is $1x10^{-3}$ cm/sec and the head loss for 3 m length of soil is 2.5 m.	6 Marks	L4	CO2	PO1 PO2
		(OR)				
4.	a)	What is meant by effective stress? In a three layered soil deposit of equal thickness of 2 m each. The density of soil for top two layers is γ_d=16 KN/m^3 and for the last layer of soil is γ_{sat}=18.5 KN/m^3. Calculate the effective stress at the bottom surface of the last layer if the water table is located at a depth of 4 m from the ground level.	6 Marks	L4	CO2	PO1 PO2 PO4 PO10

	b)	What is quicksand condition? Derive the equation for critical hydraulic gradient. What is factor of safety against piping failure?	6 Marks	L4	CO2	PO1 PO2 PO6

UNIT-III

5.	a)	What is meant by contact pressure? Draw the contact pressure distribution diagrams for both flexible and rigid footings.	4 Marks	L2	CO3	PO1 PO10
	b)	Distinguish between light weight compaction and heavy weight compaction. What are the factors affecting compactions of soils?	8 Marks	L4	CO3	PO1 PO2 PO8

(OR)

6.	a)	Write short notes on an isobar diagram. A line load of 150 kN/m is acting on the ground surface along the y-axis. Determine the vertical stress at a point P which is at a depth of 5 m and at a horizontal distance of 2.5 m below the line load.	6 Marks	L4	CO3	PO1 PO2 PO10
	b)	The following results were obtained from a IS light weight compaction test on sample of soil. Plot compaction curve. Hence obtain the values of OMC and MDD. Also calculate void ratio, degree of saturation and theoretical maximum dry density for all water contents. Take G=2.65.	6 Marks	L4	CO3	PO1 PO2 PO4 PO10

Water content (%)	0.12	0.14	0.18	0.21	0.24
Mass of wet soil (kg)	1.65	1.95	1.93	1.90	1.86

UNIT-IV

7.	a)	With neat sketch, explain the spring analogy model for understanding the primary consolidation of soils.	6 Marks	L2	CO4	PO1 PO5 PO10
	b)	A soil stratum is 10 m thick with pervious stratum at top and bottom. The properties of soil are given as K= 10^{-7} cm/s, a_v= 0.0003 cm²/gm, e= 1.5. Determine the time required for 50% of consolidation.	6 Marks	L4	CO4	PO1 PO2 PO4

(OR)

8.	a)	What are the graphical methods for determination of coefficient of consolidation? Explain any one.	6 Marks	L4	CO4	PO1 PO5 PO10
	b)	A square footing 1.5 m x 1.5 m is founded in a normally consolidated clayey soil at a depth of 2 m from the ground surface. The column load acting on the footing is 600 kN. The properties of the soil are γ=17 kN/m³, γ_{sat}=19 kN/m³, C_C=0.4, e=0.8, c=35 kN/m² and ϕ =20°. The hard rock stratum is at the depth of 6 m from the ground surface which is entirely overlain by clay. Determine the primary consolidation settlement by considering that water table is located at the depth of 1.5 m from the base of the footing.	6 Marks	L4	CO4	PO1 PO2 PO4 PO6 PO10

UNIT-V

9.	a)	What are the factors affecting the shear strength of cohesive soils?	6 Marks	L1	CO5	PO1
	b)	A torque of 42 Nm was applied to shear natural saturated clay in an in-situ vane shear test. The diameter and length of the vane are 50 mm and 100 mm. Determine the undrained shear strength of the clay. The torque required to shear the same soil in remolded condition is 35 Nm. What will be the sensitivity of the soil?	6 Marks	L4	CO5	PO1 PO2 PO5

(OR)

10.	a)	What are the different drainage conditions of shear tests? Write about Skempton's pore pressure coefficients.	6 Marks	L2	CO5	PO1
	b)	A direct shear test was performed on a 6 cm × 6 cm sample of dry sand. The normal load was 360 N. The failure occurred at a shear load of 180 N. Plot the Mohr strength envelope and determine ø. Also determine the principal stresses at failure.	6 Marks	L4	CO5	PO1 PO2 PO10

CODE No.: 19BT40105 SVEC-19

STRUCTURAL ANALYSIS

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Derive the expression for slope and deflection of a cantilever beam of length 'l' subjected to a concentrated load 'W' at the free end.	6 Marks	L4	CO1	PO1 PO2 PO10
	b)	A girder of uniform cross section and constant depth is freely supported over a span of 3 metres. If the point load at the mid-span is 20 kN and moment of inertia is $15.614 \times 10^{-6} m^4$. Calculate the central deflection and the slopes at the ends of the beam. Take E = 200 GN/m^2.	6 Marks	L4	CO1	PO1 PO2 PO4 PO10
		(OR)				
2.		A steel girder of uniform section, 10 m long is simply supported at its ends. It carries concentrated loads 50 kN and 30 kN at two points 2 m and 3 m from the two ends respectively. Calculate the deflection of the girder at the points under the two loads and the maximum deflection. Take E = 200 GN/m^2.	12 Marks	L4	CO1	PO1 PO2 PO4 PO10
		UNIT-II				
3.		A simply supported beam of span 12 m shown in Fig.1 is loaded with 40 kN loads at C, D and E. Determine the vertical deflection at D. Take EI= 20000 kNm^2.	12 Marks	L4	CO1	PO1 PO2 PO4 PO10

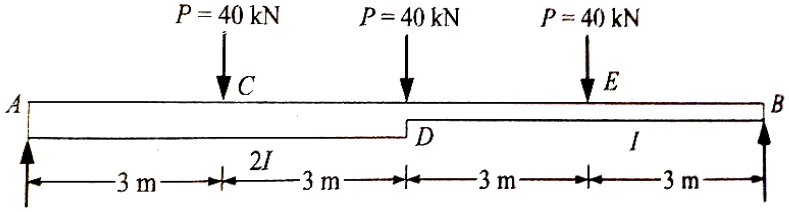

Fig.1

(OR)

4.	A fixed beam of 5 m span carries a point load of 150 kN at 3 m from the left end. If the right end sinks by 10.5 mm, find the fixing moments as well as reactions at the supports. Take E = 2×10^8 kN/m^2 and I = 10000 cm^4.	12 Marks	L4	CO2	PO1 PO2 PO4 PO10
	UNIT-III				
5.	A continuous beam ABCD having three equal spans of length 'l' each. It carries a uniformly distributed load w/unit length over its entire length. It is freely supported on all supports, which are at the same level. Draw the B.M. and S.F. diagrams for this beam.	12 Marks	L4	CO3	PO1 PO2 PO4 PO10
	(OR)				

6.		Analyse the continuous beam ABCD shown in Fig.2 by slope deflection method and draw the bending moment diagram.	12 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO10

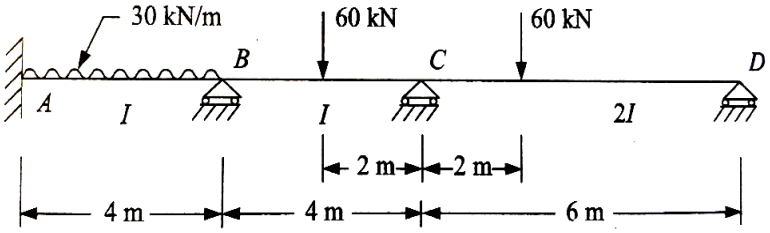

Fig.2

UNIT-IV

7.		Analyse the continuous beam shown in Fig.3 using moment distribution method.	12 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO10

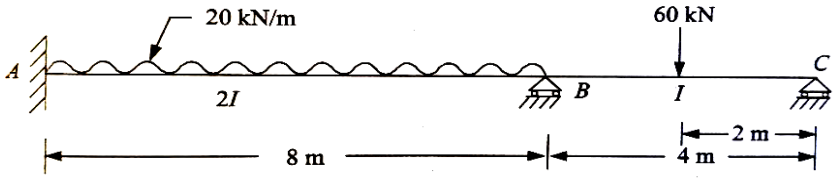

Fig.3

(OR)

8.		Analyse the continuous beam shown in Fig.4 by Kani's method. Flexural rigidity is constant throughout.	12 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO10

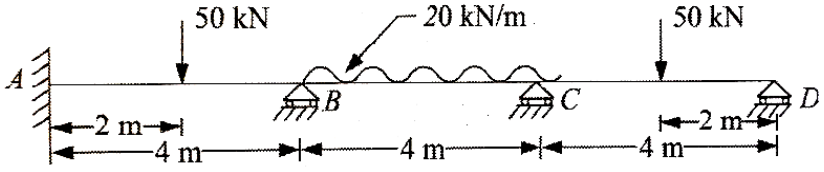

Fig.4

UNIT-V

9.		A train of 5-wheel loads 60 kN, 80 kN, 200 kN, 130 kN and 120 kN spaced 2.5 m between the consecutive loads crosses a beam of span 22.5 m with 120 kN load leading. Calculate the maximum positive and negative shear force values at the centre of the span and the absolute maximum bending moment anywhere in the span. Use Influence Lines method.	12 Marks	L4	CO4	PO1 PO2 PO4 PO10

(OR)

10.	a)	Define plastic hinge and plastic moment capacity.	4 Marks	L4	CO5	PO1 PO2
	b)	Determine the shape factor for the rectangular and circular section.	8 Marks	L4	CO5	PO1 PO2 PO6 PO10

DIGITAL ELECTRONICS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Express the following expression in standard sum of products form. **F(A,B,C,D) =(AB) 'D+ABC'D'+A'BD+ABCD'**.	4 Marks	L1	CO1	PO1
	b)	Simplify the following expressions using K-Map. i) **F=A'B'C'D+AB'C'D +A'B'CD +ABCD'+AB'CD'+A'B'C'D.** ii) **F(A,B,C,D) = Σm(5,6,7,12,13) + Σd(4,9,14,15).**	8 Marks	L3	CO1	PO5
		(OR)				
2.	a)	Design the following Boolean function using NAND Gates. $F = \bar{W}\bar{X}Z + WXZ + \bar{X}\bar{Y}Z + WXY\bar{Z}$.	6 Marks	L2	CO1	PO3
	b)	Minimize the following Boolean expressions using Karnaugh map method. **F(W,X,Y,Z)=Σm(1,3,4,5,6,11,12,13,15)** . **F(A,B,C,D) = Σm(4,5,7,12,13,14)+ Σd(1,9,11,15).**	6 Marks	L3	CO1	PO5
		UNIT-II				
3.	a)	Design a four bit decimal adder circuit for digital processing.	8 Marks	L2	CO2	PO3
	b)	Construct a 4 x 16 decoder using 3 x 8 decoders for data processing application.	4 Marks	L3	CO2	PO5
		(OR)				
4.	a)	Design and construct a 3 x 3 bit binary multiplier circuit.	6 Marks	L2	CO2	PO3
	b)	Construct a 5-to-32 decoder using one 2-to-4 and four 3-to-8 decoders.	6 Marks	L3	CO2	PO4
		UNIT-III				
5.	a)	Illustrate how JK flip-flop can be converted to SR flip-flop.	6 Marks	L2	CO3	PO1
	b)	Apply D-flip-flop to design a counter with the following repeated binary sequence: 0, 1, 2, 4, 6.	6 Marks	L3	CO3	PO4
		(OR)				
6.		Design a modulo-12 synchronous counter using T flip-flops.	12 Marks	L3	CO3	PO3
		UNIT-IV				
7.	a)	Distinguish Mealy and Moore circuits.	4 Marks	L2	CO4	PO1
	b)	A sequential circuit has two JK flip-flops A and B and one input 'X'. The circuit is described by the following flip-flop input equations: $J_A = x \quad K_A = B'$ $J_B = x \quad K_B = A$ Derive the state equations A(t+1) and B(t+1) by substituting the input equations for the *J* and *K* Variables and also draw the state diagram of the circuit. Design a logic diagram for the following sequence 101 using D-flip-flops.	8 Marks	L4	CO4	PO4
		(OR)				

8.		Minimize sequential machine represented by the state table shown below using merger table	12 Marks	L2	CO4	PO5

Table

Present State	Next State , Z	
	X=0	X=1
A	B,1	H,1
B	F,1	D,1
C	D,0	E,1
D	C,0	E,1
E	D,1	C,1
F	C,1	C,1
G	C,1	D,1
H	C,0	A,1

UNIT-V

9.		Analyze the following Boolean functions using PAL with AND-OR structure F_1 (A,B,C,D)=∑m(2,12,13) F_2 (A,B,C,D)=∑m(7,8,9,10,11,12,13,14,15) F_3 (A,B,C,D)=∑m(0,2,3,4,5,6,7,8,10,11,15) F_4 (A,B,C,D)=∑m(1,2,8,12,13)	12 Marks	L4	CO5	PO2

(OR)

10.	a)	Briefly explain the binary multiplication and division algorithm.	6 Marks	L2	CO5	PO1
	b)	Perform the arithmetic operations using 2's complement method. i) (+52) + (-13). ii) (24) + (14).	6 Marks	L2	CO5	PO2

ELECTRICAL MACHINES-II

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	How the rotating magnetic field in a three phase induction motor does makes the motor a self-starting?	6 Marks	L2	CO1	PO1
	b)	A 3-phase, 400 V, 50 Hz induction motor takes a power input of 35 kW at its full load speed of 980 r.p.m. The total stator losses are 1 kW and the friction and wind age losses together are 1.5 kW. Calculate: i) slip. ii) Rotor Ohmic losses. iii) shaft power.	6 Marks	L3	CO1	PO4
		(OR)				
2.	a)	Obtain the relation between rotor input, rotor copper losses and rotor output in terms of slip(s).	6 Marks	L2	CO1	PO1
	b)	What are the advantages and disadvantages of wound rotor type induction motor?	6 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Suggest a suitable induction machine for the following applications. i) Agriculture pump sets. ii) Wind mills. Justify your suggestion.	6 Marks	L2	CO1	PO6
	b)	An 8-pole, 50 Hz, 3-ϕ slip ring induction motor has effective resistance of 0.08Ω/phase. The speed corresponding to maximum torque is 650 r.p.m. What is the value of resistance to be inserted in rotor circuit to obtain maximum torque at starting?	6 Marks	L3	CO1	PO4
		(OR)				
4.	a)	Estimate the starting torque as a percentage of full-load torque for a 3-phase Induction motor for the following methods of starting: i) Direct on line. ii) Star-Delta. iii) Autotransformer which limits the starting current to twice the full load current. The full load slip is 0.03 and the short-circuit current is six times the full-load current.	9 Marks	L3	CO1	PO2
	b)	Suggest a suitable speed control method/technique for controlling the speed of induction motor used for: i) high speed, low torque. ii) low speed, high torque applications.	3 Marks	L3	CO1	PO5

UNIT-III

5.	a)	Explain the principle of operation of a synchronous generator. Also, enumerate the advantages of rotating field system.	7 Marks	L2	CO2	PO1
	b)	A 4-pole, 50 Hz star connected alternator has 6 slots per pole per phase and a two layer winding with 4 conductors per slot. If the coil span is 150^0, find the no–load terminal emf if the flux per pole is 300 mWb.	5 Marks	L3	CO2	PO2

(OR)

6.	a)	Define voltage regulation and explain its significance.	4 Marks	L1	CO2	PO1
	b)	How does the voltage regulation of salient alternator can be found by two reaction theory?	8 Marks	L2	CO2	PO1

UNIT-IV

7.	a)	What is meant by synchronization? Explain the way of synchronizing an alternator to the infinite bus bars.	6 Marks	L2	CO3	PO1
	b)	The EMFs of two alternators are $3000\angle 20^0$ V and $2900\angle 20^0$ V. Their synchronous impedances are (2+j20) Ω/phase and (2.5+j30) Ω/phase. The load impedance is (10+j4) Ω/phase. Find the circulating current.	6 Marks	L3	CO3	PO2

(OR)

8.	a)	Explain the conditions that must be fulfilled for parallel operation of two synchronous generators.	5 Marks	L1	CO3	PO1
	b)	A 12 kVA, 440V, 50 Hz, star connected synchronous generator supplies rated load at 0.8 power factor lagging. The armature resistance and synchronous reactance are 0.3Ω and 8Ω respectively. Determine the torque angle and the voltage regulation.	7 Marks	L3	CO3	PO2

UNIT-V

9.	a)	Draw and explain the phasor diagrams of synchronous motor for unity, leading and lagging power factor conditions.	6 Marks	L2	CO4	PO1
	b)	A three-phase, 11 kV, star-connected synchronous motor is taking 60 A current at 0.8 p.f. lead. Its impedance is Z=1+j30Ω/phase. Calculate i) power input. ii) back emf. iii) mechanical power developed.	6 Marks	L3	CO4	PO2

(OR)

10.	a)	Discuss the factors affecting the sustainable operation of synchronous motor.	6 Marks	L2	CO4	PO7
	b)	Discuss any two methods/techniques for starting of synchronous motors.	6 Marks	L1	CO4	PO5

ELECTRICAL MEASUREMENTS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Two quantities x_1 and x_2 have limiting errors of $\pm\delta x_1$ and $\pm\delta x_2$ respectively. Derive the expression for relative limiting error in X when, i) $X= x_1+x_2$ ii) $X= x_1- x_2$ iii) $X= x_1*x_2$ iv) $X= x_1/x_2$	6 Marks	L2	CO1	PO2
	b)	A basic d'Arsonval movement with a full scale reading of 50 μA and an internal resistance of 1800 Ω is available. It is to be converted into a 0-1 V, 0-10 V, 0-50 V and 0-150 V. Design multi range voltmeter using individual multipliers for each range. Calculate the value of individual multipliers.	6 Marks	L3	CO1	PO3
		(OR)				
2.	a)	List the static characteristics of measuring instruments and describe in detail the desirable characteristics of instruments with suitable examples.	6 Marks	L2	CO1	PO1
	b)	Explain in detail about the various appropriate supporting techniques used in moving system of the measuring instruments to avoid the frictional errors.	6 Marks	L2	CO1	PO5

UNIT-II

3.	a)	Explain in detail the construction and working of three phase Electrodynamometer type power factor meter with a neat sketch.	6 Marks	L3	CO2	PO1
	b)	Enumerate the sources of errors in single phase induction type energy meters and suggest the suitable compensations techniques used to minimize the errors.	6 Marks	L3	CO2	PO1
		(OR)				
4.	a)	A 230 V, single phase watt-hour has a constant load of 4 A passing through it for 6 hours at unity power factor. If the meter disc makes 2208 revolutions during this period. What is the meter constant in revolutions per kWh? Calculate the power factor of the load if the number of revolutions made by the meter is 1472 when operating at 230 V and 5A for 4 hours.	6 Marks	L2	CO2	PO4
	b)	Derive the torque equation for an EDM type wattmeter. Comment upon the shape of scale if spring control is used.	6 Marks	L3	CO2	PO1

UNIT-III

5.	a)	Define the term standardization. With neat sketch, describe the construction and working of Crompton potentiometer in detail.	6 Marks	L2	CO3	PO8
	b)	Calibrate the PMMC ammeter, voltmeter and also measurement of unknown resistance used in laboratories and industrial applications using DC potentiometers.	6 Marks	L4	CO3	PO6
		(OR)				

6.	a)	Describe the construction and working of a polar type potentiometer.	6 Marks	L2	CO3	PO1
	b)	With a neat illustration, discuss the standardization procedure using the transfer instrument and the phase shift transformer.	6 Marks	L2	CO3	PO8

UNIT-IV

7.	a)	Explain the working of Wheatstone bridge used for measurement of medium resistances also derive conditions for balance, with its limitations.	6 Marks	L3	CO4	PO1
	b)	A kelvin bridge is balanced with the following constants: Outer ratio arms : 100Ω and 1000Ω Inner ratio arms : 99.92Ω and 1000.6Ω Resistance of link is 0.1Ω and standard resistance is 0.00377Ω Calculate the value of unknown resistance.	6 Marks	L3	CO4	PO2

(OR)

8.	a)	An Owen's bridge is used to measure the properties of a sample of sheet steel at 2 kHz. At balance, arm AB is test specimen; arm BC is R3=100Ω; arm CD is C4 = 0.1μF and arm DA is R2 = 834Ω in series with capacitance of 0.124 μF. Determine the effective impedance of the specimen under test conditions.	6 Marks	L3	CO4	PO2
	b)	List the various AC bridges used for the measurement of unknown inductance and capacitance of industrial specimens and select the suitable bridge which is used for the determination of relative permittivity of a given specimen of insulating material and describe it.	6 Marks	L3	CO4	PO6

UNIT-V

9.	a)	A sinusoidal input is applied to the vertical input of an oscilloscope starting at t=0. The following Lissajous patterns are obtained when a sinusoidal input is applied to the horizontal terminals. Find the phase shift between vertical and horizontal inputs.  (a) (b) (c) (d) (e)	6 Marks	L2	CO5	PO2
	b)	Describe in detail the working of digital tachometer with neat block diagram and describe how it is superior compared to analog type in laboratory and industrial applications.	6 Marks	L3	CO5	PO5

(OR)

10.	a)	Write short notes on the crucial developments in the design of digital measuring instruments meet the requirements of industry and society.	6 Marks	L2	CO5	PO6
	b)	Describe in detail about digital storage oscilloscope and also list its applications.	6 Marks	L2	CO5	PO1

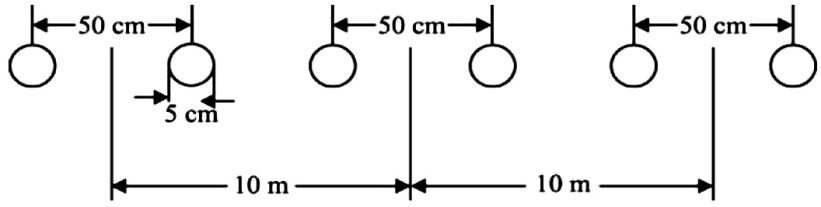
TRANSMISSION AND DISTRIBUTION
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Derive the expression for flux linkages due to internal flux and external flux.	6 Marks	L2	CO1	PO1
	b)	The conductor configuration shown in figure consists of a transposed three-phase transmission line employing two bundle conductors per phase. The diameter of each conductor is 5 cm and the spacing between them is 50 cm, in each bundle. Calculate the inductance and reactance per phase of the line which is 200 km long.	6 Marks	L3	CO1	PO2



(OR)

2.	a)	List out the various properties of dielectric compounds to be used for insulation of cables and explain the capacitance grading of cables.	6 Marks	L1	CO1	PO1
	b)	A single-core cable working on 66 kV on 3-phase system has a conductor diameter of 2 Cm and a sheath of inside diameter 5.3 Cm. If two intersheaths are used, find the best positions, maximum stress and the voltage on the intersheaths.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Discuss the classification of overhead transmission lines based on the length of overhead transmission lines. Define A, B, C and D constants of a transmission line.	6 Marks	L2	CO2	PO1
	b)	A 1−ϕ, overhead transmission line delivers 1100 kW at 33 kV at 0.8 pf lagging. The total resistance and inductive reactance of the line are 10 Ω and 15 Ω respectively. Determine: i) Sending end voltage. ii) Sending end power. iii) Transmission efficiency.	6 Marks	L3	CO2	PO2

(OR)

4.	a)	Explain why a short length of cable is connected between the dead end tower and the terminal apparatus in a station.	6 Marks	L2	CO2	PO1
	b)	An overhead line with surge impedance 400 Ω bifurcates into two lines of surge impedance 400 Ω and 40 Ω respectively. If a surge of 20 kV is incident on the overhead line, determine the magnitudes of voltage and current which enter the bifurcated lines.	6 Marks	L3	CO2	PO2

UNIT-III

5.	a)	Define string efficiency and enumerate various methods to improve string efficiency.	6 Marks	L2	CO3	PO7
	b)	Determine the voltage across each disc of suspension insulators as a percentage of the line voltage to earth. The self and capacitance to ground of each disc is C and $0.2C$ respectively. The capacitance between the link pin and the guard ring is $0.1C$. If the capacitance to the line of the lower link pin were increased to $0.3C$ by means of a guard ring, determine the redistribution of voltage. Also, determine the string efficiency in each case.	6 Marks	L4	CO3	PO4
		(OR)				
6.	a)	An overhead line has a span of 260 m, the weight of the line conductor is 0·68 kg per metre run. Calculate the maximum sag in the line to sustain on the transmission lines to sustain the maximum 1550 kg tension in the line.	6 Marks	L3	CO3	PO7
	b)	A 3-phase line has conductors 2 cm in diameter spaced equilaterally 1 m apart. If the dielectric strength of air is 30 kV (max) per cm, find the disruptive critical voltage for the line. Take air density factor = 0·952 and irregularity factor m_0 = 0·9.	6 Marks	L2	CO3	PO2

UNIT-IV

7.	a)	Discuss briefly the design considerations in distribution system.	6 Marks	L2	CO4	PO1
	b)	A two-wire DC distributor cable 1000 metres long is loaded with 0·5 A/metre. Resistance of each conductor is 0·05 Ω/km. Calculate the maximum voltage drop if the distributor is fed from both ends with equal voltages of 220 V. What is the minimum voltage and where it occurs?	6 Marks	L3	CO4	PO2
		(OR)				
8.	a)	What are the advantages of a doubly fed distributor over singly fed distributor?	6 Marks	L2	CO4	PO1
	b)	A single phase a.c. distributor AB 300 metres long is fed from end A and is loaded as under: i) 100 A at 0·707 p.f. lagging 200 m from point A ii) 200 A at 0·8 p.f. lagging 300 m from point A The load resistance and reactance of the distributor is 0·2 Ω and 0·1 Ω per km. Calculate the total voltage drop in the distributor. The load power factors refer to the voltage at the far end.	6 Marks	L3	CO4	PO2

UNIT-V

9.	a)	How do you analyze a substation service area with 'n' primary feeders?	6 Marks	L3	CO5	PO4
	b)	Explain the procedure to select the location of substation.	6 Marks	L2	CO5	PO1
		(OR)				
10.	a)	Explain the factors affecting the loading of a primary feeder.	6 Marks	L2	CO5	PO1
	b)	Discuss in detail the present design practice of secondary distribution system.	6 Marks	L2	CO5	PO3

DYNAMICS OF MACHINERY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		In a four-link mechanism shown in Fig.1, torque T_3 and T_4 have magnitudes of 30N.m and 20 N.m respectively. The link lengths are AD = 800 mm, AB = 300 mm, BC = 700 mm and CD = 400 mm. For the static equilibrium of the mechanism, determine the required input torque T_2	12 Marks	L3	CO1	PO1 PO2 PO3

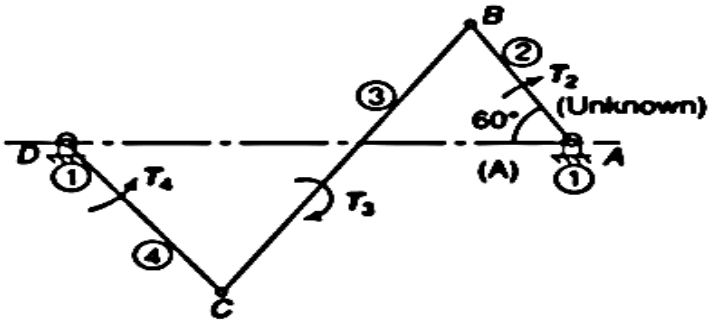

Fig. 1.

(OR)

2.	a)	List various types of brakes and what is the self locking of brake.	4 Marks	L1	CO1	PO1
	b)	A band and block brake, having 14 blocks each of which subtends an angle of 15° at the centre, is applied to a drum of 1 m effective diameter. The drum and flywheel mounted on the same shaft has a mass of 2000 kg and a combined radius of gyration of 500 mm. The two ends of the band are attached to pins on opposite sides of the brake lever at distances of 30 mm and 120 mm from the fulcrum. If a force of 200 N is applied at a distance of 750 mm from the fulcrum, find: i) maximum braking torque, ii) angular retardation of the drum, and iii) time taken by the system to come to rest from the rated speed of 360 r.p.m. The coefficient of friction between blocks and drum may be taken as 0.25.	8 Marks	L2	CO1	PO1 PO2

UNIT-II

3.		The turbine rotor of a ship has a mass of 3500 kg. It has a radius of gyration of 0.45 m and a speed of 3000 r.p.m. clockwise when looking from stern. Determine the gyroscopic couple and its effect upon the ship: i) when the ship is steering to the left on a curve of 100 m radius at a speed of 36 km/h. ii) when the ship is pitching in a simple harmonic motion, the bow falling with its maximum velocity. The period of pitching is 40 seconds and the total angular displacement between the two extreme positions of pitching is 12º.	12 Marks	L3	CO2	PO1 PO2 PO3 PO4

(OR)

4.	a)	What is the function of a flywheel? How does it differ from that of a governor?	4 Marks	L1	CO3	PO1 PO2
	b)	A punching press is required to punch 40 mm diameter holes in a plate of 15 mm thickness at the rate of 30 holes per minute. It requires 6 N-m of energy per mm^2 of sheared area. If the punching takes $1/10^{th}$ of a second and the r.p.m. of the flywheel varies from 160 to 140, determine the mass of the flywheel having radius of gyration of 1 metre.	8 Marks	L3	CO3	PO1 PO2 PO3

UNIT-III

5.		Explain the term height of the governor. Derive an expression for the height in the case of a Watt governor. What are the limitations of a Watt governor?	12 Marks	L3	CO4	PO1 PO2 PO3 PO4

(OR)

6.		In a spring loaded governor of the Hartnell type, the mass of each ball is 1kg, length of vertical arm of the bell crank lever is 100 mm and that of the horizontal arm is 50 mm. The distance of fulcrum of each bell crank lever is 80 mm from the axis of rotation of the governor. The extreme radii of rotation of the balls are 75 mm and 112.5 mm. The maximum equilibrium speed is 5% greater than the minimum equilibrium speed which is 360 r.p.m. Find, neglecting obliquity of arms, initial compression of the spring and equilibrium speed corresponding to the radius of rotation of 100 mm.	12 Marks	L2	CO4	PO1 PO2 PO3 PO4

UNIT-IV

7.	a)	Discuss how a single revolving mass is balanced by two masses revolving in different planes.	4 Marks	L1	CO5	PO1
	b)	A shaft carries four masses A, B, C and D of magnitude 200 kg, 300 kg, 400 kg and 200 kg respectively and revolving at radii 80 mm, 70 mm, 60 mm and 80 mm in planes measured from A at 300 mm, 400 mm and 700 mm. The angles between the cranks measured anticlockwise are A to B 45°, B to C 70° and C to D 120°. The balancing masses are to be placed in planes X and Y. The distance between the planes A and X is 100 mm, between X and Y is 400 mm and between Y and D is 200 mm. If the balancing masses revolve at a radius of 100 mm, find their magnitudes and angular positions.	8 Marks	L3	CO5	PO1 PO2 PO3 PO6

(OR)

8.	a)	Explain the terms Variation of Tractive Force, Swaying Couple, Hammer Blow.	4 Marks	L2	CO5	PO1 PO2
	b)	A twin cylinder V-engine has the cylinders set at an angle of 45°, with both pistons connected to the single crank. The crank radius is 62.5 mm and the connecting rods are 275 mm long. The reciprocating mass per line is 1.5 kg and the total rotating mass is equivalent to 2 kg at the crank radius. A balance mass fitted opposite to the crank, is equivalent to 2.25 kg at a radius of 87.5 mm. Determine for an engine speed of 1800 r.p.m. ; the maximum and minimum values of the primary and secondary forces due to the inertia of reciprocating and rotating masses.	8 Marks	L3	CO5	PO1 PO2 PO3 PO6

UNIT-V

9.	a)	Explain the terms 'under damping, critical damping' and 'over damping'	4 Marks	L2	CO6	PO1
	b)	The measurements on a mechanical vibrating system show that it has a mass of 8 kg and that the springs can be combined to give an equivalent spring of stiffness 5.4 N/mm. If the vibrating system have a dashpot attached which exerts a force of 40 N when the mass has a velocity of 1 m/s, find : i) critical damping coefficient, ii) damping factor, iii) logarithmic decrement, and iv) ratio of two consecutive amplitudes.	8 Marks	L2	CO6	PO1 PO2 PO3 PO5 PO6
		(OR)				
10.	a)	Explain about Magnification Factor or Dynamic Magnifier.	4 Marks	L2	CO6	PO1 PO2
	b)	A mass of 10 kg is suspended from one end of a helical spring, the other end being fixed. The stiffness of the spring is 10 N/mm. The viscous damping causes the amplitude to decrease to one-tenth of the initial value in four complete oscillations. If a periodic force of 150 cos 50 t N is applied at the mass in the vertical direction, find the amplitude of the forced vibrations. What is its value of resonance?	8 Marks	L2	CO6	PO1 PO2 PO3 PO5 PO6

ENGINEERING METROLOGY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What do you mean by unilateral and bilateral tolerances? Explain with neat diagrams.	6 Marks	L 2	CO1	PO1 PO2
	b)	Distinguish between Hole basis system and Shaft basis system.	6 Marks	L 2	CO1	PO1 PO2
		(OR)				
2.		A hole and mating shaft are to have a nominal assembly size of 55 mm. The assembly is to have a maximum clearance of 0.34 mm and a minimum clearance of 0.25 mm. The Hole tolerance is 1.5 times the shaft tolerance. Determine the limits for both hole and shaft by using Hole basis system.	12 Marks	L 3	CO1	PO1 PO2 PO3

UNIT-II

3.	a)	Explain the working principle of Sine Bar with neat sketch. Also discuss its advantages and limitation.	6 Marks	L 2	CO2	PO1 PO2
	b)	What is the working principle of LVDT?	6 Marks	L 1	CO2	PO1 PO2
		(OR)				
4.		Describe about mechanical comparator. Write the advantages and disadvantages of the mechanical comparator.	12 Marks	L 2	CO2	PO1

UNIT-III

5.		In the measurement of surface roughness, heights of 20 successive peaks and valleys from the datum were measured to be 35, 25, 40, 22, 35, 18, 42, 25, 35, 22, 36, 18, 42, 22, 32, 21, 37, 18, 35, 20 microns. Determine the CLA and RMS values of surface roughness over a sampling length of 20 mm.	12 Marks	L 3	CO3	PO1 PO2 PO3
		(OR)				
6.	a)	Name the various numerical methods of assessment of surface finish. Explain them in detail with an example.	6 Marks	L 2	CO3	PO1
	b)	Describe the working principle of an auto collimator.	6 Marks	L 2	CO3	PO1

UNIT-IV

7.	a)	Explain how effective diameter of screw thread is measured using three wire method. Include the sketches.	6 Marks	L 3	CO4	PO1 PO2 PO3
	b)	What is the "best size" wire? Derive an expression for the same in terms of the pitch and angle of the thread.	6 Marks	L 3	CO4	PO1 PO2 PO3
		(OR)				
8.		What are the different methods of measuring gear tooth thickness? Explain the chordal thickness method. Sketch and describe how chordal thickness is measured using gear tooth vernier.	12 Marks	L 2	CO4	PO1 PO2

UNIT-V

9.	a)	Explain working principle of electrical strain gauge with neat sketch.	6 Marks	L2	CO5	PO1 PO2
	b)	Define Strain Rosette. How it is used for strain measurement?	6 Marks	L 2	CO5	PO1 PO2
		(OR)				
10.	a)	Explain working principle of thermocouples.	6 Marks	L 2	CO5	PO1
	b)	Explain basic methods of pressure Measurement.	6 Marks	L 2	CO5	PO1 PO2

FLUID MECHANICS AND HYDRAULIC MACHINERY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Differentiate between: i) absolute and gauge pressure. ii) simple and differential manometers. iii) piezometer and pressure gauges.	12 Marks	L2	CO1	PO1
		(OR)				
2.		At the right limb of a simple differential manometer containing the mercury is open to the atmosphere while the left limb is connected to a pipe in which a fluid of specific gravity 0.9 is flowing. The centre of the pipe is 12cm below the level of mercury in the right limb. Find the pressure of fluid in the pipe if the difference of mercury level in the two limbs is 20 cm.	12 Marks	L3	CO1	PO1 PO2

UNIT-II

3.		A pitot-static tube placed in the centre of a 300 mm pipe line has one orifice pointing upstream and other perpendicular it. The mean velocity in the pipe is 0.8 of the central velocity. Find the discharge through the pipe if the pressure difference between two orifices is 60 mm of water. Take the co-efficient of pitot tube as 0.98.	12 Marks	L3	CO2	PO1 PO2
		(OR)				
4.	a)	Compare the following fluid flows: i) Steady and un-steady flow. ii) Uniform and non-uniform flow. iii) Compressible and incompressible flow. iv) Rotational and irrotational flow Laminar and turbulent flow.	6 Marks	L2	CO2	PO1
	b)	A 30 cm diameter pipe, conveying water, branches into two pipes of diameters 20cm and 15cm respectively. If the average velocity in the pipe 30cm diameter is 2.5m/sec, find the discharge in these pipe. Also determine the velocity in 15cm pipe, if the average velocity in 20cm diameter pipe is 2m/sec.	6 Marks	L3	CO2	PO1 PO2

UNIT-III

5.	a)	Explain the characteristics of laminar transition and turbulent boundary layers.	6 Marks	L2	CO3	PO1
	b)	Define the following terms: i) Laminar boundary layer. ii) Turbulent boundary layer. iii) Laminar sublayer. iv) Boundary layer thickness.	6 Marks	L1	CO3	PO1
		(OR)				

6.	a)	Draw a neat sketch of the Reynolds experiment and explain how the laminar flow can be demonstrated.	6 Marks	L2	CO3	PO1
	b)	The rate of flow of water through a horizontal pipe is 0.25 m^3/sec. The diameter of the pipe which is 20 cm is suddenly enlarged to 40 cm. The pressure intensity in the smaller pipe is 11.772 N/cm^2. Determine: i) Loss of head due to sudden enlargement. ii) Pressure intensity in larger pipe. iii) Power loss due to enlargement.	6 Marks	L3	CO3	PO1 PO2 PO3
		UNIT-IV				
7.		Derive an expression for the force exerted by a jet of water on a moving flat plate in the direction of flow.	12 Marks	L3	CO4	PO1 PO2
		(OR)				
8.		A pelton wheel develops 8000 kW under a net head of 130 m at a speed of 200 r.p.m. Assuming the co-efficient of velocity for the nozzle 0.98, hydraulic efficiency 87%, speed ratio 0.46 and jet diameter to wheel diameter ratio 1/9, determine: i) the discharge required, ii) the diameter of the wheel, iii) the diameter and number of jets required, and iv) the specific speed. Mechanical efficiency is 75%.	12 Marks	L3	CO4	PO1 PO2 PO3
		UNIT-V				
9.	a)	Define cavitation, what are the effects of cavitation. Give the necessary precautions against cavitation.	6 Marks	L2	CO5	PO1
	b)	Distinguish pumps in series and parallel.	6 Marks	L2	CO5	PO1
		(OR)				
10.		Explain construction and working principle of a double acting reciprocating pump with a neat diagram.	12 Marks	L2	CO5	PO1

METAL CUTTING AND MACHINE TOOLS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss the principle and requirement of machining	6 Marks	L2	CO1	PO1
	b)	Explain the concept of Generatrix and Directrix	6 Marks	L2	CO1	PO1 PO2
		(OR)				
2.		Analyze the nomenclature and geometry of single point cutting tool.	12 Marks	L2	CO1	PO1 PO2

UNIT-II

3.	a)	Write short notes on chip formation in ductile and brittle materials.	6 Marks	L1	CO2	PO1 PO7
	b)	Define chips and recall the types of chips.	6 Marks	L1	CO2	PO1 PO7
		(OR)				
4.		Derive the expression for the various cutting forces using Merchant's circle diagram.	12 Marks	L3	CO2	PO1 PO2 PO3 PO7

UNIT-III

5.	a)	Differentiate work and tool holding devices.	6 Marks	L2	CO3	PO1 PO2 PO3
	b)	Write short notes on specifications and types of lathes.	6 Marks	L1	CO3	PO1 PO2
		(OR)				
6.		Draw and explain the various operations performed on Lathe with neat diagrams.	12 Marks	L2	CO3	PO1 PO2 PO7

UNIT-IV

7.	a)	Compare slotting and planning machines	6 Marks	L2	CO4	PO1 PO2 PO3 PO7
	b)	List the specifications and different operations done in drilling machine.	6 Marks	L1	CO4	PO1 PO7
		(OR)				
8.		What is boring? Explain the working principle of jig boring machine with neat diagram.	12 Marks	L2	CO4	PO1 PO2 PO7

UNIT-V

9.	a)	Write a brief note on cylindrical grinding machine and surface grinding machine.	6 Marks	L1	CO5	PO1 PO2 PO7
	b)	Discuss on the specification and selection of grinding wheel.	6 Marks	L1	CO5	PO1 PO2 PO3
		(OR)				
10.		Define milling and explain the principle of operation, classification and specifications of milling machine.	12 Marks	L2	CO6	PO1 PO7

THERMAL ENGINEERING-I

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What are the differences between Two stroke engine and Four stroke Engine?	6 Marks	L3	CO1	PO1
	b)	Explain the working principle of four stroke CI engine and draw its valve timing diagram.	6 Marks	L2	CO1	PO1 PO2
		(OR)				
2.	a)	Explain the phenomenon of knocking in CI. engine and SI engine	6 Marks	L2	CO1	PO1 PO2
	b)	Define combustion and discuss the factors affecting delay period in C.I engine.	6 Marks	L2	CO1	PO1 PO2

UNIT-II

3.	a)	A gasoline engine working on four- stroke develops a brake power of 20.9 kW. A Morse test was conducted on this engine and the brake power (kW) obtained when each cylinder was made in operative by short circuiting the spark plug are 14.9, 14.3, 14.8 and 14.5 respectively. The test was conducted at constant speed. Find the indicated power, mechanical efficiency and brake mean effective pressure when all the cylinders are firing. The bore of the engine is 75mm and the stroke is 90 mm. The engine is running at 3000 r.p.m.	7 Marks	L3	CO1	PO1 PO2 PO3
	b)	Explain the brake power measurement of IC engine by using rope brake dynamometer.	5 Marks	L2	CO1	PO1 PO2
		(OR)				
4.	a)	List out the methods available for finding frictional power of an engine and explain Williams' line method.	5 Marks	L3	CO1	PO1 PO2
	b)	A two cylinder four stroke engine runs at 240 r.p.m developing a torque of 5 KN-m. The bore and stroke of cylinder are 30 cm and 60 cm respectively. Engine runs with gaseous fuel having calorific value of 16.8 MJ/m^3. The gas and air mixture is supplied in proportion of 1:7 by volume. The volumetric efficiency is 0.85. Determine: i) The brake power. ii) The mean piston speed in m/s. iii) The brake mean effective pressure. iv) The brake thermal efficiency.	7 Marks	L3	CO1	PO1 PO2 PO3

UNIT-III

5.	a)	Compare the relative advantages and disadvantages of gas turbines and IC engines.	5 Marks	L4	CO2	PO1 PO2
	b)	Find the required air-fuel ratio in a gas turbine whose turbine and compressor efficiencies are 85% and 80%, respectively. Maximum cycle temperature is 875°C. The working fluid can be taken as air (C_p = 1.0 kJ/kg K, γ = 1.4) which enters the compressor at 1 bar and 27°C. The pressure ratio is 4. The fuel used has calorific value of 42000 kJ/kg. There is a loss of 10% of calorific value in the combustion chamber.	7 Marks	L3	CO2	PO1 PO2 PO3

(OR)

6.	a)	Discuss the principle of operation of Pulse Jet engine with a neat sketch.	6 Marks	L2	CO2	PO1 PO2
	b)	Discuss the working of turbo prop engine with a neat sketch.	6 Marks	L2	CO2	PO1

UNIT-IV

7.	a)	What is the function of a compressor and explain Rotary type air compressors?	5 Marks	L2	CO3	PO1
	b)	A single stage single acting air compressor delivers 14 m^3 of free air from 1 bar to 7 bar. The speed of the compressor is 300 r.p.m. Assuming the compression and expansion is $pV^{1.35}$ = constant and clearance is 5% of the swept volume, find the diameter and stroke of the compressor. Take stroke length is 1.5 times the bore diameter.	7 Marks	L3	CO3	PO1 PO2 PO3

(OR)

8.	a)	Derive an expression for minimum work required for two stage reciprocating air compressor with perfect inter-cooling and neglect clearance volume.	6 Marks	L3	CO3	PO1 PO2
	b)	Describe the working principle of two stage reciprocating air compressor with a neat sketch.	6 Marks	L2	CO3	PO1

UNIT-V

9.	a)	Explain the modified Rankine cycle with P-V and T-S diagrams.	5 Marks	L2	CO4	PO1 PO2
	b)	A basic steam power plant works on ideal Rankine cycle between 35 bar and 0.04 bar. The initial condition of steam being 0.85 dry and flow rate 15 kg/s determine: i) Work required for pumping. ii) Work done by the turbine and. iii) Cycle efficiency.	7 Marks	L3	CO4	PO1 PO2 PO3

(OR)

10.	a)	Discuss about the concept of cogeneration.	5 Marks	L2	CO4	PO1
	b)	A simple Rankine cycle works between pressure 30 bar and 0.45 bar, the initial conditions of steam being dry saturated. Calculate the cycle efficiency, work ratio and specific steam consumption rate.	7 Marks	L3	CO4	PO1 PO2 PO3

MANAGEMENT SCIENCE

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		Explain the importance of managerial functions in detail with a suitable example	12 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Compare and contrast between conceptual and technical skills of a manager.	6 Marks	L2	CO1	PO1 PO2
	b)	Differentiate between Process and customer orientation.	6 Marks	L2	CO1	PO1 PO2
		UNIT-II				
3.		Give an illustrative explanation of different training and development methods adopted in human resource management.	12 Marks	L2	CO2	PO1 PO2
		(OR)				
4.		Compare and contrast between job analysis and job evaluation.	12 Marks	L2	CO2	PO1 PO2
		UNIT-III				
5.		What is the concept of SCM? Explain the basic framework of SCM.	12 Marks	L2	CO3	PO1
		(OR)				
6.		Define Statistics process control. What are the principles and methods of measurement of SPC?	12 Marks	L2	CO3	PO1 PO2
		UNIT-IV				
7.		Explain in detail, the concept of marketing strategy formulation and different components of a marketing plan.	12 Marks	L2	CO4	PO1 PO2
		(OR)				
8.		Explain the concept of designing and managing of marketing channels. Throw some light on Integrated marketing communications.	12 Marks	L2	CO4	PO1 PO2

UNIT-V

9. Civil engineering firm has to bid for the construction of a building. The activities and time estimates are: — 12 Marks — L4 — CO5 — PO1 PO2 PO3 PO4 PO11

Activity	Duration (in days)		
	Optimistic	Most likely	Pessimistic
1-2	14	17	25
2-3	14	18	21
2-4	13	15	18
2-8	16	19	28
3-4	0	0	0
3-5	15	18	27
4-6	13	17	21
5-7	0	0	0
5-9	14	18	20
6-7,6-8	0	0	0
7-9	16	20	41
8-9	14	16	22

The policy of the firm with respect to submitting bids is to bid the minimum amount that will provide a 95% probability of at best breaking even. The fixed cost for the project is Rs. 800000 and the variable cost is Rs. 9000 everyday spent working on the project. What amount should the firm bid under this policy? (You may perform the calculations on duration etc. up to two decimal places).

(OR)

10. A company is designing a new product for welding 2 different alloys. The company has limited time and resources to complete the project. — 12 Marks — L4 — CO5 — PO1 PO2 P03 PO4 PO11

Activity	Immediate predecessor	Time (days)		Cost (Rs)	
		Normal	Crash	Normal	Crash
A	-	4	3	400	125
B	A	5	4	800	200
C	A	4	2	520	150
D	B	3	2	600	225
E	C	3	2	255	100
F	B,E	4	2	600	175

i) Draw the project network.
ii) Find the critical path.
iii) Find the project completion time and the corresponding cost.
iv) What is the total cost, if the project deadline is 13 days?
v) Assume the project deadline to be 10 days. The company has to bear Rs.170 for each day of delay. Find the optimal number of days to crash the project.

ANALOG COMMUNICATIONS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Derive the time domain expression of VSB modulated wave s(t) containing a vestige of upper side band.	6 Marks	L2	CO1	PO2
	b)	Find the percentage of power saved in SSB when compared with AM system.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Explain briefly the need for modulation. Define standard form of amplitude modulation and explain the time and frequency domain expression of AM wave2.	6 Marks	L2	CO1	PO1
	b)	Briefly explain the Quadrature Null Effect in DSB-SC coherent detection. Suggest an appropriate method to offset this problem.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	What is Carson's rule? Show that it applies both to narrow band and wide band FM.	6 Marks	L1	CO1	PO2
	b)	Calculate for An angle-modulated signal has the form $u(t)=100\cos[2\pi f_c t+4\sin 2\pi f_m t]$ where f_c=10MHz and f_m=1000Hz. i) Assuming that this is an FM signal, determine the modulation index and the transmitted signal bandwidth. ii) Assuming that this is an PM signal, determine the modulation index and the transmitted signal bandwidth.	6 Marks	L2	CO1	PO4
		(OR)				
4.	a)	Explain the principle of Armstrong method to generate FM modulated wave.	6 Marks	L4	CO1	PO2
	b)	Design Armstrong FM generator for the generation of WBFM signal with Δf = 75 kHz and f_c = 100 MHz, using the narrow band carrier as 100 kHz and second carrier as 9.5 MHz. Find the suitable multiplying factors. Assume the message signal is defined in the range, 100Hz-15KHz.	6 Marks	L2	CO1	PO4

UNIT-III

5.	a)	How is FM superior to AM with reference to noise?	6 Marks	L4	CO2	PO2
	b)	An amplifier with 10dB nose figure and 4dB power gain is cascaded. With a second amplifier has a 10dB power gain and 10dB noise figure. What is the overall noise figure and power gain?	6 Marks	L4	CO2	PO2
		(OR)				
6.	a)	Derive the expression for SNR and figure of merit of coherent reception of DSB modulated wave.	6 Marks	L4	CO2	PO2
	b)	If each stage has a gain of 10dB and noise figure of 10dB, determine the overall noise figure of a two stage cascaded amplifier.	6 Marks	L4	CO2	PO2

UNIT-IV

7.	a)	Explain the limitations of TRF receivers.	6 Marks	L1	CO3	PO1
	b)	What can be done to improve the overall limiting performance of an FM receiver? Explain the operation of the double limiter and also AGC in addition to a limiter.	6 Marks	L1	CO3	PO3
		(OR)				
8.	a)	What do you mean by Automatic Gain Control (AGC)? What are merits of delayed AGC over simple AGC?	6 Marks	L4	CO3	PO2
	b)	The antenna current of transmitter is 11.5 Amp when it is modulated to a depth 45% by audio sine wave. Determine unmodulated (carrier) current.	6 Marks	L1	CO3	PO1

UNIT-V

9.	a)	Discuss about the spectra of PWM and PDM signals.	6 Marks	L1	CO4	PO1
	b)	For a pulse amplitude modulated transmission of voice signal having maximum frequency equal to f_m=3kHz, calculate the transmission bandwidth. It is given that the sampling frequency f_s=8 kHz and the pulse duration t=0.1T_s	6 Marks	L3	CO4	PO2
		(OR)				
10.	a)	Explain the concept of multiplexing in communication.	6 Marks	L1	CO4	PO1
	b)	Differentiate between FDM and TDM. Explain which of the two is superior and why.	6 Marks	L2	CO4	PO1

ELECTRONIC CIRCUIT ANALYSIS AND DESIGN

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Develop expressions for Current gain, Voltage gain, input Resistance and Output Resistance of Darlington amplifier.	8 Marks	L4	CO1	PO3
	b)	Illustrate the working of a CASCODE amplifier with the help of a neat diagram.	4 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Construct the bandwidth of a multistage amplifier, assuming that each stage has same upper and lower cut off frequencies.	6 Marks	L4	CO1	PO6
	b)	Design Two stage RC coupled amplifier to meet the following specifications A_v = 400, S=3, V_{cc}=12V, I_c=1mA, f_L =50Hz and R_s =500Ω. Assume data wherever necessary.	6 Marks	L6	CO1	PO4
		UNIT-II				
3.	a)	Explain the parameters of hybrid – π model with neat equivalent circuits.	6 Marks	L2	CO2	PO1
	b)	A transistor amplifier in CE configuration is operated at High frequency with the following specifications I_c= 5m A, V_{ce}=10V, h_{fe}=100, h_{ie}=600Ω , A_i=10 at 10Mhz C_c=3PF. Discover f_β, f_T , C_e, $r_{b'e}$ and $r_{bb'}$.	6 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Prove that: i) $h_{fe} = g_m * r_{b'e}$ ii) $h_{ie} = r_{bb} + r_{b'e}$	6 Marks	L2	CO2	PO2
	b)	Consider a CE stage with a resistive load RL. Using Miller's theorem, analyze the mid band input capacitance.	6 Marks	L4	CO2	PO2
		UNIT-III				
5.		Construct a current series feedback amplifier using BJT and calculate its voltage gain, input resistance and output resistance	12 Marks	L4	CO3	PO2
		(OR)				
6.	a)	Write a short note on the following: i) Sampler and its types. ii) Mixer and its types.	6 Marks	L2	CO2	PO1
	b)	Prove that the gain with feedback decreases by a factor of (1+A β) with a neat sketch.	6 Marks	L3	CO3	PO2
		UNIT-IV				
7.	a)	Derive the Expressions for frequency of oscillation of crystal oscillator and explain its working.	4 Marks	L3	CO3	PO2
	b)	A crystal has L=0.4H, C=0.085pf, and C_M= 1pf with R=5KΩ, Determine: i) Series resonant frequency. ii) Parallel Resonant Frequency. iii) By what percent does the parallel resonant frequency exceed the series resonant frequency? iv) Q factor of the crystal.	8 Marks	L3	CO3	PO2

(OR)

8.	a)	The frequency sensitive arms of the wein bridge oscillator uses $C_1=C_2=0.001\mu F$ and $R_1=10k\Omega$ while R_2 is kept variable. The frequency is to be varied from 10kHz to 50 kHz by varying R_2. Determine the minimum and maximum valves of R_2.	8 Marks	L3	CO3	PO2
	b)	Write a short note on frequency stability of oscillator.	4 Marks	L2	CO3	PO1

UNIT-V

9.	a)	Explain in detail about the operation of class-C power amplifier.	8 Marks	L2	CO5	PO1
	b)	Write the applications of Tuned amplifiers.	4 Marks	L2	CO5	PO2

(OR)

10.		Explain the working of single tuned amplifier with suitable circuits and derive the expression for A/A_{res}.	12 Marks	L2	CO5	PO1

LINEAR AND DIGITAL IC APPLICATIONS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Design a Monostable multivibrator using 555 timer to produce a pulse width of 100 m sec.	6 Marks	L3	CO1	PO3
	b)	Explain the basic principle of operation of RC Phase shift oscillator using op-amp. Derive the condition for frequency of oscillations.	6 Marks	L1	CO1	PO8
		(OR)				
2.	a)	Sketch the functional block diagram of NE 565 PLL and make circuit connections to track the input signal and explain its working principle.	6 Marks	L1	CO1	PO6
	b)	A PLL has a free running frequency of 500 KHz, the bandwidth of the LPF=10KHz. Will the PLL lock-in if f_i =60 KHz? What is the frequency of the VCO output.	6 Marks	L4	CO1	PO3
		UNIT-II				
3.	a)	Design a second order Butterworth HPF and plot the frequency response?	6 Marks	L3	CO2	PO3
	b)	In a second-order high pass Butterworth filter C2 = C3 =0.047μf, R2 =R3 = 3.3KΩ, R1 = 27 KΩ and RF=15.8 KΩ. Determine the low cutoff frequency fL of the filter	6 Marks	L4	CO2	PO4
		(OR)				
4.	a)	Examine the operation of a successive approximation type Analog to Digital converter.	6 Marks	L1	CO3	PO2
	b)	Compare different A/D converters for their merits and demerits.	6 Marks	L1	CO3	PO1
		UNIT-III				
5.	a)	List the capabilities of Verilog HDL.	6 Marks	L1	CO4	PO1
	b)	Explain Behavioral design elements of Verilog HDL.	6 Marks	L1	CO4	PO1
		(OR)				
6.	a)	List and explain operators used in verilog HDL.	6 Marks	L1	CO4	PO1
	b)	Assess the structural design elements of Verilog HDL with a suitable example.	6 Marks	L2	CO4	PO2
		UNIT-IV				
7.	a)	Sketch the symbol, logic diagram & write Verilog HDL source code of 74x138 IC.	6 Marks	L2	CO5	PO6
	b)	Explain the concept of dual priority encoder and write its Verilog HDL code.	6 Marks	L2	CO5	PO1
		(OR)				
8.	a)	Analyze a Barrel Shifter using 74x151 multiplexer and write its Verilog HDL code.	6 Marks	L2	CO5	PO2
	b)	Explain the concept of 74x280 9-Bit Parity Generator with an example.	6 Marks	L1	CO5	PO1

UNIT-V

9.	a)	Describe about 74LS109 JK flip-flop and write Verilog HDL program with pre-set and clear.	6 Marks	L2	CO5	PO3
	b)	Design an Excess-3 decimal counter using 74x163 ICs.	6 Marks	L3	CO5	PO3
		(OR)				
10.	a)	Design and implement counter using Verilog HDL which counts up to 9 and down counts again from 9 to 0.	6 Marks	L3	CO5	PO3
	b)	Analyze a 4-bit Ring Counter and explain its operation. Write a Verilog HDL code for the above design.	6 Marks	L3	CO5	PO2

II B.Tech II Semester (SVEC19) Supplementary Examinations January – 2022

PROBABILITY AND STOCHASTIC PROCESSES

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Committee of 5 persons is to be selected randomly from a group of 5 men and 10 women. i) Find the probability that the committee consists of 2 men and **3** women. ii) Find the probability that the committee consists of all women.	6 Marks	L2	CO1	PO4
	b)	Discuss about Bernoulli's Trails with relevant examples.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Consider the experiment of tossing a fair coin repeatedly and counting the number of tosses required until the first head appears. i) Find the probability that the first head appears on an even-numbered toss. ii) Find the probability that the first head appears on an odd-numbered toss.	6 Marks	L2	CO1	PO4
	b)	In a box there are 100 resistances having resistance and tolerance as represented in the table shown below. If a resistor is chosen with the same likelihood of being chosen for the three events, A as "draw a 47 Ω resistor", B as "draw a resistor with 5% tolerance", C as "draw a 100 Ω resistor"; i) find P(A/B) and P(C/B) ii) find P(AUB)	6 Marks	L2	CO1	PO4

Resistance(Ω)	Tolerance		
	5%	10%	Total
22	10	14	24
47	28	16	44
100	24	8	32
Total	62	38	100

UNIT-II

3.	a)	Define cumulative probability distribution function and state the properties of the cumulative probability distribution function.	6 Marks	L2	CO2	PO1
	b)	Binary data are transmitted over a noisy communication channel in block of 16 binary digits. The probability that a received digit is in error as a result of channel noise is 0.01. Assume that the errors occurring in various digit positions within a block are independent. i) Find the mean and the variance of the number of errors per block. ii) Find the probability that the number of errors per block is greater than or equal to 4.	6 Marks	L2	CO2	PO4
		(OR)				

4.	a)	State and prove the properties of the probability density function.	6 Marks	L2	CO2	PO1
	b)	Differentiate between moments about the origin and central moments with appropriate mathematical expressions.	6 Marks	L2	CO2	PO1

UNIT-III

5.	a)	The joint PDF of (X, Y) is $f_{xy}(x,y)=4xy$, $0<x,y<1$ and $f_{xy}(x,y)=0$, otherwise. Find E(XY).	6 Marks	L3	CO2	PO2
	b)	Gaussian Random Variables X and Y have first and second order moments $m_{10} = -1.1, m_{20} = 1.16 m_{01} = 1.5, m_{20} = 2.89, R_{xy} = -1.724$ i) Find the C_{xy}, ρ . ii) Write expression for Jointly Gaussian Density function.	6Marks	L3	CO2	PO2

(OR)

6.	a)	Find the density of W=X+Y where the densities of X and Y are assumed to be $f_{(x)}(x) = \frac{1}{a}[U(X) - U(X-a)]$. $f_{(Y)}(y) = \frac{1}{b}[U(Y) - U(Y-b)]$ *where* $0 < a < b$.	6 Marks	L3	CO2	PO2
	b)	Two Gaussian Random Variables X_1 and X_2 have zero means and variances 4 and 9. Their Covariance is equal to 3. If X_1 and X_2 are linearly transformed to new variables Y_1 and Y_2 according to: $Y_1 = X_1 - 2X_2$ $Y_2 = 3X_1 - 4X_2$ Find: i) Mean. ii) Variances. iii) Covariance of Y_1 and Y_2 .	6 Marks	L3	CO2	PO2

UNIT-IV

7.		A random process is defined by x(t) =A where A is a continuous random variable uniformly distributed on (0,1) and t represents time. Find: i) E [x (t)]. ii) Is the process stationary?	12 Marks	L2	CO3	PO2

(OR)

8.	a)	A random process had the power density spectrum $S_{XX}(\omega)=6\omega^2/(1+\omega^2)$. Find the average power in the process.	6 Marks	L2	CO3	PO2
	b)	Let Y(n)=X(n)+W(n), where X(n) = A (for all n) and A is a Random variable with zero mean and variance σ_A^2, and W(n) is a discrete-time white noise with average power σ^2. It is also assumed that X(n) and W(n) are independent. i) Show that Y(n) is WSS. ii) Find the probability density of W (n).	6 Marks	L2	CO3	PO2

UNIT-V

9.	a)	List different types of noise.	6 Marks	L3	CO4	PO1
	b)	An amplifier with gain=30dB and Bandwidth=25kHz is found to have T=120K. Noise Figure =2. Find T_e and output noise power.	6 Marks	L2	CO4	PO4

(OR)

10.	a)	For a non-ideal amplifier having following parameters, Input Signal Power=2×10^{-10}W, Input Noise Power=2×10^{-18}W, Power gain=60dB, Internal Noise =6×10^{-12} W Determine: i) Input S/N Ratio(dB). ii) Output S/N Ratio(dB). iii) Noise Factor.	6 Marks	L2	CO4	PO4
	b)	Derive the expression for thermal noise voltage.	6 Marks	L3	CO4	PO1

ANALOG ELECTRONICS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Analyze a Darlington amplifier to increase input impedance using Bootstrapping Method.	6 Marks	L2	CO1	PO2
	b)	With the help of circuit diagram explain RC coupling scheme used in multi stage amplifiers.	6 Marks	L2	CO1	PO6
		(OR)				
2.	a)	Analyze the effects of coupling and bypass capacitors on frequency response also plots its frequency response.	8 Marks	L1	CO1	PO1
	b)	Explain the multistage frequency effects.	4 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Apply voltage series feedback to the Emitter follower to increase input impedance and to decrease output impedance.	6 Marks	L2	CO2	PO2
	b)	Discuss in detail about current series feedback amplifier with CE.	6 Marks	L1	CO2	PO1
		(OR)				
4.	a)	Discuss in detail about the benefits of negative feedback in amplifiers.	6 Marks	L3	CO2	PO2
	b)	Select a Trans-conductance amplifier and prove its input and output impedances are very large compared to CE amplifier.	6 Marks	L2	CO2	PO5
		UNIT-III				
5.	a)	Explain principle and operation of the Wien Bridge Oscillator and derive expression for frequency of oscillation.	8 Marks	L1	CO2	PO1
	b)	What will happen if barkhausen criterion did not fulfilled by an oscillator circuit.	4 Marks	L1	CO2	PO1
		(OR)				
6.	a)	A Crystal oscillator has the following parameters. L = 0.33H, C**1** = 0.065pF, C**h** = 1.0pF and R = 5.5KΩ. Find the series resonant frequency and Q - factor of the crystal.	6 Marks	L3	CO2	PO4
	b)	Select a RC phase shift Oscillator using FET and derive the expression for the frequency of oscillations.	6 Marks	L2	CO2	PO5
		UNIT-IV				
7.	a)	What are the advantages and disadvantages of a transformer coupled Class - A power amplifier.	6 Marks	L1	CO3	PO1
	b)	Discuss in detail about Class AB power amplifier.	6 Marks	L3	CO3	PO5
		(OR)				
8.	a)	Explain crossover distortion in class-B power amplifier.	6 Marks	L2	CO3	PO2
	b)	In class A power amplifier R_l=5Ω, V_{cEsat}=1v, V_{CEmax}=40v, $P_{c(max)}$=20w, transformer coupling n=2. Find the efficiency.	6 Marks	L1	CO3	PO4
		UNIT-V				
9.	a)	Analyze the bandpass filter and derive an equation for its gain.	6 Marks	L1	CO4	PO2
	b)	For the all pass filter the values of R and C are 7.95KΩ and 0.02μF respectively. If the input frequency is 1.5KHz, calculate the phase shift.	6 Marks	L2	CO4	PO3

(OR)

10.	a)	Design astable multivibrator using 555 timer and explain the operation with relevant waveforms.	6 Marks	L4	CO4	PO3
	b)	Design one shot multivibrator with a pulse width of 100ms using 555 timer.	6 Marks	L4	CO4	PO3

COMPUTER NETWORKS

[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Identify the key issues for network support layers.	6 Marks	L2	CO1	PO1
	b)	Explain service primitives in connection-oriented service.	6 Marks	L3	CO1	PO1
		(OR)				
2.	a)	What networks are used in the computer labs in your organization? Describe network type topology and switching methods used there.	6 Marks	L3	CO1	PO1
	b)	Elucidate the social issues of networks applications.	6 Marks	L2	CO5	PO8
		UNIT-II				
3.	a)	If the 7-bit Hamming code word received by a receiver is 1011011. Assuming the even parity state whether the received code word is correct or wrong. If wrong locate the bit having error.	6 Marks	L4	CO3	PO4
	b)	Discuss the design issues of data link layer.	6 Marks	L2	CO1	PO1
		(OR)				
4.	a)	Explain the flow control mechanism with an example.	6 Marks	L3	CO3	PO1
	b)	Write short notes about repeaters, routers and gateways.	6 Marks	L2	CO1	PO1
		UNIT-III				
5.	a)	Apply shortest-path-routing algorithm to find a shortest path between source and destination with suitable example.	6 Marks	L4	CO2	PO4
	b)	Compare distance vector and link state routing protocols.	6 Marks	L4	CO2	PO2
		(OR)				
6.	a)	Explain hierarchical routing with an example.	6 Marks	L3	CO2	PO1
	b)	Apply CIDR aggregation on the following IP addresses: 150.97.28.0/24 150.97.29.0/24 150.97.30.0/24	6 Marks	L4	CO2	PO4
		UNIT-IV				
7.	a)	Compare the TCP header and the UDP header. List the fields in the TCP header that are not part of the UDP header. Give the reason for each missing field.	6 Marks	L4	CO3	PO2
	b)	With a neat diagram, explain Remote Procedure Call.	6 Marks	L2	CO3	PO1
		(OR)				
8.	a)	Explain RTP Header format.	6 Marks	L2	CO1	PO1
	b)	The following is a dump of a TCP header in hexadecimal format **$(0532017\ 00000001\ 00000000\ 500207FF\ 00000000)_{16}$** i) What is the source port number? ii) What is the destination port number? iii) What the sequence number? iv) What is the acknowledgement number?	6 Marks	L4	CO3	PO4

UNIT-V

9.	a)	Explain Hyper Text Transfer Protocol request and response messages in detail.	6 Marks	L2	CO4	PO6
	b)	What are the duties of File Transfer Protocol?	6 Marks	L3	CO4	PO6
		(OR)				
10.	a)	Determine which of the following are FQDN and which is are PQDN. i) mil. ii) edu. iii) xxx.yyy.net iv) zzz.yyy.xxx.edu	6 Marks	L3	CO4	PO6
	b)	Explain World Wide Web architecture.	6 Marks	L2	CO1	PO1

DATABASE MANAGEMENT SYSTEMS

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss in detail on the role of Database Administrator.	6 Marks	L2	CO1	PO1
	b)	Explain the difference between logical and physical data independence.	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Why would you choose a database system instead of simply storing data in operating system files? When would it make sense not to use a database system?	6 Marks	L1	CO1	PO2
	b)	What are the responsibilities of a DBA?	6 Marks	L1	CO1	PO1

UNIT-II

3.		Define the following terms: i) Relation schema ii) Relational database schema iii) Relation cardinality iv) Relation degree.	12 Marks	L1	CO2	PO1
		(OR)				
4.	a)	Discuss in detail about Relational Model. Does the relational model, as seen by an SQL query writer, provide physical and logical data independence? Explain.	6 Marks	L2	CO2	PO2
	b)	Discuss in detail about the Operators in Relational Algebra.	6 Marks	L2	CO2	PO1

UNIT-III

5.		The questions are based on the following relational schema: emp (eid: integer, ename: string, age: integer, salary: real) works (eid: integer, did: integer, pcttime: integer) dept (did: integer, dname: string, budget: real, managerid: integer). Answer the following: i) Write an SQL statement to give every employee a 10 percent raise. ii) Define the Dept relation in SQL so that every department is guaranteed to have a manager. iii) Write an SQL statement to add John Doe as an employee with eid = 101, age = 32 and salary = 15, 000	12 Marks	L1	CO3	PO4

(OR)

6.		The following relations keep track of airline flight information: flights (flno: integer, from: string, to: string, distance: integer, departs: time, arrives: time, price: real) aircraft (aid: integer, aname: string, cruising range: integer) certified (eid: integer, aid: integer) employees (eid: integer, ename: string, salary: integer) Answer the following in form of SQL query: i) Find the names of aircraft such that all pilots certified to operate them have salaries more than $80,000. ii) For each pilot who is certified for more than three aircraft, find the eid and the maximum cruising range of the aircraft for which she or he is certified. iii) Find the names of pilots whose salary is less than the price of the cheapest route from Los Angeles to Honolulu. iv) For all aircraft with cruising range over 1000 miles, find the name of the aircraft and the average salary of all pilots certified for this aircraft.	12 Marks	L1	CO3	PO4
		UNIT-IV				
7.		Define Normalization. Explain the different forms of Normalization in detail with appropriate examples.	12 Marks	L2	CO4	PO1
		(OR)				
8.	a)	What is a transaction? In what ways is it different from an ordinary program?	6 Marks	L2	CO5	PO2
	b)	Explain the terms in detail: i) Recoverability. ii) Serializability.	6 Marks	L1	CO4	PO1
		UNIT-V				
9.	a)	Explain in detail about Lock based protocols.	6 Marks	L1	CO5	PO1
	b)	Discuss in detail about validation-based protocols.	6 Marks	L3	CO5	PO1
		(OR)				
10.		Explain in detail about the following: i) Hash-based Indexing ii) Tree-based Indexing	12 Marks	L2	CO5	PO1

DESIGN AND ANALYSIS OF ALGORTIHMS

[Computer Science and Engineering,
Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Demonstrate various types on complexities and Asymptotic notations with examples.	6 Marks	L2	CO1	PO1
	b)	Solve the recurrence relation using Recursion tree method and Identify the complexity. $T(n)= T(1)$ if $n = 1$ $aT(n/b) + f(n)$ if $n > 1$, where $a=3$, $b=4$, and $f(n)=cn^2$	6 Marks	L4	CO1	PO2
		(OR)				
2.	a)	Define amortized analysis illustrate aggregate analysis with example.	6 Marks	L3	CO1	PO1
	b)	Apply Master's theorem on the following recurrence relation and find its complexity. $T(n)=8T(n/2) +1000n^2$	6 Marks	L4	CO1	PO2

UNIT-II

3.	a)	Illustrate SimpleUnion() and WeightedUnion() algorithms with an example.	4 Marks	L2	CO2	PO2
	b)	Consider the array of ten elements: a[1:7] = (36, 25, 40, 2, 7, 80, 15). Sort these elements using Merge sort algorithm. Analyze its time and space complexity and represent in the form of recurrence relation.	8 Marks	L4	CO2	PO2
		(OR)				
4.	a)	Analyze and compare the complexities of recursive and iterative versions of binary search algorithm.	6 Marks	L4	CO2	PO2
	b)	Outline an algorithm to find MaxMin on a given set of elements.	6 Marks	L4	CO2	PO1

UNIT-III

5.	a)	Differentiate characteristics of greedy method and dynamic programming.	6 Marks	L2	CO2	PO1
	b)	Analyze the working of Matrix Chain Multiplication algorithm and compute its complexity.	6 Marks	L3	CO2	PO2
		(OR)				
6.	a)	Compute the cost of shortest path for the following digraph using All Paths algorithm.	6 Marks	L4	CO2	PO2

	b)	Apply 0/1 knapsack method for the case in which n = 3, W1 =2, W2 =3; W3 = 4, p1 = 1, p2= 2, p3= 5, and m = 6, compute the maximum profit.	6 Marks	L4	CO3	PO3

UNIT-IV

7.	a)	Outline Huffmann coding algorithm and demonstrate with suitable example.	6 Marks	L3	CO2	PO2
	b)	Use algorithm ShortestPaths to obtain in nondecreasing order the lengths of the shortest paths from vertex1 to all remaining vertices by taking suitable digraph.	6 Marks	L3	CO2	PO2
		(OR)				
8.	a)	Demonstrate n-Queens problem by placing n-queens in such a manner on an n x n chessboard that no queens attack each other by being in the same row, column or diagonal, by taking suitable example.	6 Marks	L3	CO2	PO3
	b)	Write about Hamiltonian Cycle. Draw the portion of state space tree for the following graph using backtracking approach? 	6 Marks	L3	CO2	PO2

UNIT-V

9.	a)	Draw the portion of the state space tree generated by LCBB for the following knapsack instances. n = 5, (P1, P2, P3, P4, P5) = (w1, w2, w3, w4, w5) = (4, 4, 5, 8,9) and m = 15.	6 Marks	L3	CO3	PO1
	b)	Present an algorithm schema LCBB for a LC branch and bound search for a least cost answer node.	6 Marks	L2	CO3	PO1
		(OR)				
10.	a)	Explain the classes of NP-hard and NP-complete.	6 Marks	L2	CO4	PO1
	b)	Show that Hamiltonian path problem is NP-complete.	6 Marks	L2	CO4	PO1

CODE No.: 19BT41501 SVEC-19

THEORY OF COMPUTATION

[Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

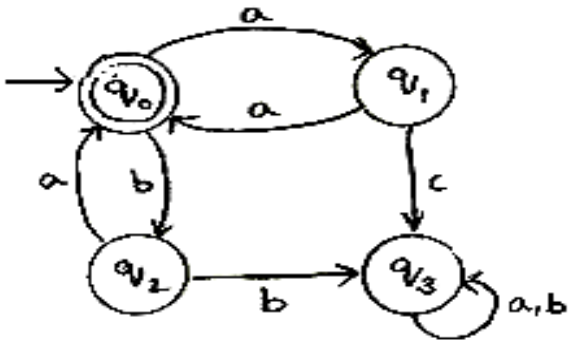
UNIT-I

1.	a)	Write short notes on applications of automata theory.	4 Marks	L2	CO1	PO1
	b)	Design a Deterministic Finite Automation accepting the language given over the alphabet {0, 1}. L = {the set of all strings such that every block of five consecutive contain at least two 0's}.	8 Marks	L4	CO1	PO3
		(OR)				
2.	a)	Differentiate NFA and DFA with respect to transition and acceptance.	7 Marks	L2	CO1	PO1
	b)	Draw DFA which accepts even number of a's and even number of b's over the alphabet {a, b}.	5 Marks	L3	CO1	PO3

UNIT-II

3.	a)	Minimize the Finite automation given below and show both the given and the reduced one are equivalent.	7 Marks	L4	CO2	PO5

	b)	Briefly explain Closure properties of regular languages.	5 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Define regular expression and prove every regular expression can be represented by an NFA with epsilon transitions.	6 Marks	L2	CO3	PO1
	b)	Construct the regular expression accepted by following finite automaton:	6 Marks	L4	CO3	PO3



UNIT-III

5.	a)	Obtain CFG for balanced set of parenthesis.	5 Marks	L3	CO4	PO4
	b)	Simplify the grammar G. S→AB A→a B→b B→C E→c|^	7 Marks	L3	CO4	PO4

(OR)

6.		Convert the following grammar to Greibach normal form. S→ABA→BS|b B→SB|a	12 Marks	L3	CO4	PO2

UNIT-IV

7.	a)	Explain Chomsky hierarchy of languages with a neat diagram.	6 Marks	L2	CO2	PO1
	b)	Show that the language $L_1=\{0^n1^m \mid n=m \text{ and } n\geq 1\}$ is deterministic context free language.	6 Marks	L4	CO6	PO2

(OR)

8.	a)	Design a PDA for accepting a language {anb2n | n≥1}.	6Marks	L4	CO6	PO4
	b)	Construct PDA for the given CFG, and test whether 0104 is acceptable by this PDA. S → 0BB B → 0S | 1S | 0	6 Marks	L4	CO6	PO3

UNIT-V

9.	a)	Define Turing machine and explain its model.	7 Marks	L2	CO5	PO1
	b)	Design Turing machine for the language L={w€{a,b,c}*|w contains equal number of a's, b's and c's}.	5 Marks	L4	CO5	PO3

(OR)

10.		Design Turing machine for the following:				
		i) That computes ones complement of a binary number.	6 Marks	L4	CO5	PO3
		ii) That shifts the input string, over the alphabet(0,1) by one position right by inserting '#' as the first character.	6 Marks	L4	CO5	PO3

THEORY OF COMPUTATION

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) Convert the following Moore machine into Melay machine. 6 Marks L3 CO1 PO4

Present State	Next State		Output
	a = 0	a = 1	
→ a	d	b	1
B	a	d	0
C	c	c	0
D	b	a	1

b) Write a short notes on central concepts of automata theory. 6 Marks L2 CO1 PO1

(OR)

2. a) Convert the following NFA to a DFA. 7 Marks L3 CO1 PO4

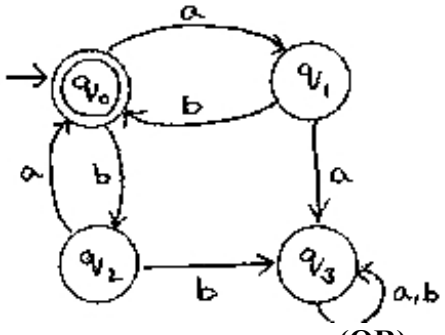
δ	a	b
p	{ p }	{ p,q }
q	{ r }	{ r }
r	{ ϕ }	{ ϕ }

b) Discuss on the relation between DFA and minimal DFA. 5Marks L2 CO1 PO1

UNIT-II

3. a) Construct FA equivalence to the following regular expression r = 01[((10)*+111)*+0]*1. 6 Marks L4 CO2 PO3

b) Construct the regular expression accepted by following finite automaton. 6 Marks L4 CO2 PO3



(OR)

4. a) Construct a DFA for the regular expression 10 + (0+11) 0*1 and optimize the states. 6 Marks L4 CO2 PO4

b) Show that the set $\{a^{i2}\}$ is not regular. 6 Marks L3 CO2 PO5

UNIT-III

5.	a)	Construct equivalent grammar in Chomsky Normal Form for the grammar. G=({S,A,B},{a,b}, {SàaAbB, AàaA|a, BàbB|b } ,S	6 Marks	L4	CO3	PO3
	b)	Construct a CFG for a language L = {wcwR | where w € (a, b)*}.	6 Marks	L4	CO3	PO2
		(OR)				
6.	a)	Given the grammar G as S→0B|1A, A→0|0S|1AA, B→1|1S|0BB Give the leftmost and rightmost derivations and parse tree to derive the string 00110101.	6 Marks	L3	CO3	PO
	b)	Construct a CFG for the language L = anb2n where n≥1.	6 Marks	L2	CO3	PO1

UNIT-IV

7.	a)	Design a PDA to accept the following CFG: S →AA/a A →SA/b.	6 Marks	L4	CO4	PO3
	b)	Explain properties of Context Free Languages.	6 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Explain in detail about the model of Linear Bounded Automata.	6 Marks	L2	CO4	PO1
	b)	Compare and contrast NFA and PDA.	6 Marks	L2	CO4	PO1

UNIT-V

9.	a)	Design a Turing Machine to recognize the language L={ $1^n2^n3^n$| n≥1}.	8 Marks	L4	CO5	PO3
	b)	Briefly explain Universal Turing Machine.	4 Marks	L2	CO5	PO1
		(OR)				
10.	a)	Design a Turing Machine which can multiply two positive integers.	6 Marks	L4	CO5	PO3
	b)	Write short notes on undecidability problem with an example.	6 Marks	L2	CO5	PO2

CONTROL SYSTEMS

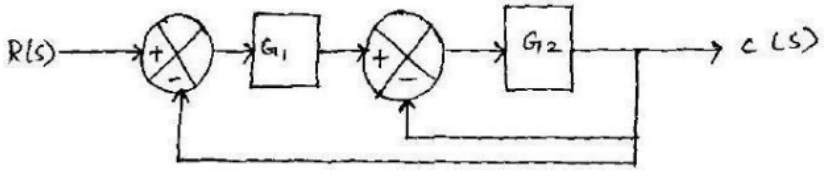
[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

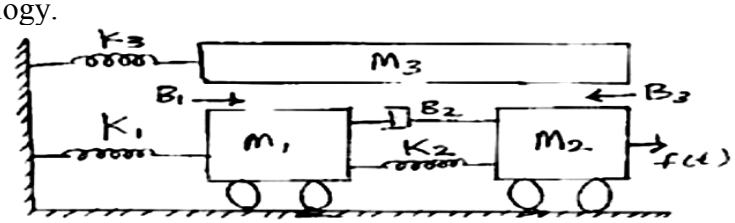
UNIT-I

1.	a)	Derive an expression for the transfer function of a Field controlled DC motor.	6 Marks	L3	CO1	PO1
	b)	Find the transfer function for the given system using block diagram reduction techniques.	6 Marks	L3	CO1	PO5



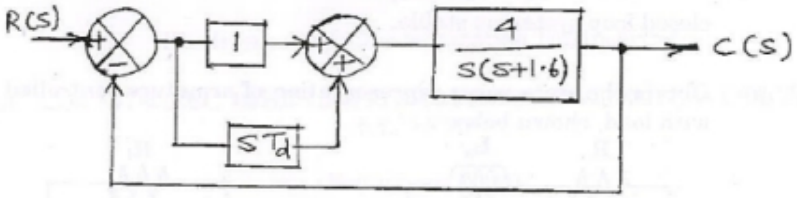
(OR)

2.		For the mechanical system shown in figure, obtain the differential equation governing the system and find force-current analogy.	12 Marks	L3	CO1	PO2



UNIT-II

3.	a)	Derive the expression for the time response of a 2nd order under damped system with unit step as input.	6 Marks	L2	CO2	PO1
	b)	Figure shows PD controller used for controlling an industrial plant. Determine the value of T_d so that system will be critically damped. Calculate the settling time.	6 Marks	L4	CO2	PO2



(OR)

4.	a)	What is a derivative controller and justify how does it improves the dynamics of a control system?	4 Marks	L2	CO2	PO7
	b)	The open-loop transfer function of unity feedback system is $G(S) = \frac{4}{S(S+1)}$. Determine the nature of the closed-loop system for a unit-step input. Also determine rise time, peak time and peak overshoot.	8 Marks	L3	CO2	PO2

UNIT-III

5.	a)	Draw polar plot for the given open loop transfer function $G(S) = \frac{1}{S(1+S)(1+2S)}$ and determine the gain and phase margin.	6 Marks	L3	CO3	PO2
	b)	Analyze the given system $G(S) = \frac{20}{S(1+3S)(1+4S)}$ using Bode plot and obtain its stability margins.	6 Marks	L4	CO3	PO4

(OR)

6.	a)	Investigate the stability for a closed loop control system whose characteristic equation $S^6 + S^5 + 5S^4 + 3S^3 + 2S^2 + 4S + 8$.	4 Marks	L3	CO3	PO4
	b)	Draw the Nyquist plot for the system whose open loop transfer function is, $G(S) = \frac{K}{S(2+S)(10+S)}$. Determine the range of k for which closed loop system is stable.	8 Marks	L3	CO3	PO4

UNIT-IV

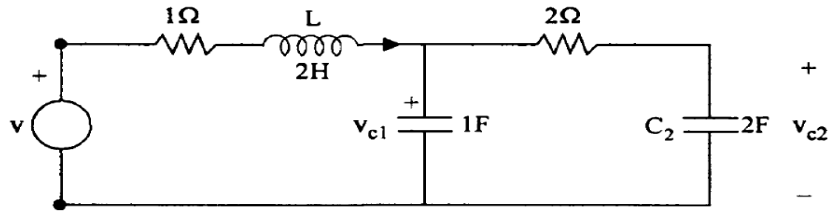
7.		Design a suitable lag compensator so that phase margin is sustained at 40 degree and steady state error for unit ramp input is less than or equal to 0.2 for a given unity feedback open loop system $G(S) = \frac{K}{S(1+2S)}$.	12 Marks	L4	CO4	PO3

(OR)

8.		Design a lead compensator for the unity feedback system given $G(S) = \frac{K}{S(S+1)}$ to meet the following specification i) Velocity error constant=50. ii) Phase margin=20 degree.	12 Marks	L4	CO4	PO3

UNIT-V

9.		Obtain the state space representation of the electrical system shown in figure:	12 Marks	L3	CO5	PO2



Take $X_1 = I_l$; $X_2 = V_{c1}$; $X_3 = V_{c2}$; $V = U$ *and* $y = V_{c2}$.

(OR)

10.		Obtain the state model of the given mechanical system.	12 Marks	L3	CO5	PO2

GREEN TECHNOLOGIES

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What do you mean by Green Communication? Explain the need for green communications.	6 Marks	L1	CO1	PO1
	b)	Discuss about the energy efficiency metrics of Green Communications.	6 Marks	L2	CO1	PO7
		(OR)				
2.	a)	Identify the need for Green Communications for practical real time societal applications.	7 Marks	L2	CO1	PO6
	b)	Examine the performance tradeoffs of green wireless networks.	5 Marks	L4	CO1	PO2
		UNIT-II				
3.	a)	What is the importance of green energy and mention the adverse effects of conventional energy sources on environment?	6 Marks	L2	CO2	PO7
	b)	Explain the importance of solar energy along with its potential advantages.	6 Marks	L2	CO2	PO6
		(OR)				
4.	a)	Explain in detail about diversification and localization of energy systems.	6 Marks	L2	CO2	PO1
	b)	With neat sketch, elaborate the operation of solar Power plant and justify how the power plant will ensure the environmental sustainability.	6 Marks	L2	CO2	PO7
		UNIT-III				
5.	a)	Bring out the importance of green engineering.	6 Marks	L2	CO3	PO1
	b)	Explain the use of RFID for environmental sustainability.	6 Marks	L2	CO3	PO6
		(OR)				
6.	a)	List out the various steps involved in creating Green IT strategy.	6 Marks	L1	CO3	PO1
	b)	Briefly explain about Balancing the Costs and Benefits of Going Green.	6 Marks	L4	CO3	PO7
		UNIT-IV				
7.	a)	Define green building. Explain why green buildings are necessary.	6 Marks	L2	CO4	PO1
	b)	What is the need of conserving energy and water in buildings?	6 Marks	L2	CO4	PO6
		(OR)				
8.	a)	What is the purpose of green rating system and explain its objectives?	6 Marks	L2	CO4	PO8
	b)	Differentiate LEED and IGBC rating systems.	6 Marks	L4	CO4	PO2
		UNIT-V				
9.	a)	Explain the impact of traditional manufacturing in environmental ecology.	6 Marks	L1	CO5	PO7
	b)	Summarize the motivation and barriers of green manufacturing.	6 Marks	L2	CO5	PO2
		(OR)				
10.	a)	Discuss in detail about the green manufacturing strategies.	6 Marks	L2	CO5	PO1
	b)	Illustrate the concept of green manufacturing through clean energy supply.	6 Marks	L3	CO5	PO2

ETHICAL HACKING

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	How can worms and viruses be introduced into a company's corporate database?	6 Marks	L3	CO1	PO1
	b)	Describe methods of protecting against malware attacks.	6 Marks	L2	CO2	PO6
		(OR)				
2.	a)	Enumerate the steps to perform Buffer overflow attack.	6 Marks	L2	CO1	PO2
	b)	Are keyloggers different from keykatchers? Justify.	6 Marks	L4	CO1	PO2
		UNIT-II				
3.	a)	Elaborate the concept of foot printing in ethical hacking.	6 Marks	L3	CO2	PO6
	b)	State the art of "Dumpster diving".	6 Marks	L1	CO2	PO6
		(OR)				
4.	a)	Define the types of port scans.	6 Marks	L2	CO2	PO6
	b)	Specify the features of Nmap tool.	6 Marks	L1	CO2	PO6
		UNIT-III				
5.	a)	Explain in detail about different types of DoS attacks.	6 Marks	L2	CO2	PO6
	b)	Discuss briefly about various password cracking techniques.	6 Marks	L3	CO1	PO2
		(OR)				
6.	a)	Explain various DNS spoofing techniques.	6 Marks	L2	CO2	PO6
	b)	Enumerate the steps in performing session hijacking.	6 Marks	L3	CO3	PO8
		UNIT-IV				
7.	a)	With a neat sketch, Discuss the components of web applications.	6 Marks	L3	CO2	PO6
	b)	Outline application vulnerabilities with corresponding countermeasures.	6 Marks	L3	CO2	PO6
		(OR)				
8.	a)	Write a short note on IEEE 802.11 standard.	6 Marks	L1	CO3	PO8
	b)	What are the components of wireless networks? Explain.	6 Marks	L2	CO1	PO1
		UNIT-V				
9.	a)	Write the concept of Man in the middle attack with an example.	6 Marks	L2	CO1	PO1
	b)	Describe Dictionary attack with an example.	6 Marks	L4	CO2	PO6
		(OR)				
10.	a)	Write a short note on Asymmetric algorithms.	6 Marks	L2	CO5	PO6
	b)	Specify the role of honeypots in DoS attacks.	6 Marks	L3	CO1	PO1

BANKING AND INSURANCE

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

	UNIT-I				
1.	"Banking is one of the core components of Indian Financial System". Elaborate the significance of the statement, in detail.	12 Marks	L3	CO2	PO5 PO12
	(OR)				
2.	List out various functions of Reserve Bank of India and elaborate them in detail.	12 Marks	L3	CO1	PO3 PO11
	UNIT-II				
3.	Explain various types of deposit products offered by banks, in detail, with examples.	12 Marks	L3	CO1	PO3
	(OR)				
4.	Discuss, in detail, principles of lending in Banks, with examples.	12 Marks	L3	CO2	PO5 PO12
	UNIT-III				
5.	Explain the significance of Electronic Payment System in Banking Industry.	12 Marks	L3	CO1	PO3 PO11
	(OR)				
6.	Discuss various types of Business Models with examples.	12 Marks	L3	CO2	PO3 PO5 PO12
	UNIT-IV				
7.	"Insurance is an important component of risk management", Explain the significance of the statement in detail.	12 Marks	L3	CO2	PO3 PO5 PO12
	(OR)				
8.	Explain, in detail, various elements of insurance with examples.	12 Marks	L3	CO2	PO3 PO12
	UNIT-V				
9.	Elucidate various functions of insurance, in detail.	12 Marks	L3	CO1	PO3 PO11
	(OR)				
10.	Explain the role, significance and contribution of LIC and GIC to the Indian Insurance Industry.	12 Marks	L3	CO2	PO3 PO5 PO12

BUSINESS COMMUNICATION AND CAREER SKILLS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain communication skills that are needed to be a successful manager.	6 Marks	L2	CO1	PO1
	b)	Define and explain types of gestures and postures.	6 Marks	L2	CO1	PO1
		(OR)				
2.		"Communication is the life blood of business." Explain why communication is so important to organizations.	12 Marks	L2	CO2	PO5
		UNIT-II				
3.	a)	Enumerate the skills that make crisis communication effective.	6 Marks	L4	CO2	PO2
	b)	Explain the significant features of cross-cultural communication.	6 Marks	L2	CO1	PO2
		(OR)				
4.		Define corporate communication. Explain why cross-cultural communication has become significant in present times.	12 Marks	L1	CO1	PO1
		UNIT-III				
5.	a)	Define business communication. List out the barriers of business communication.	6 Marks	L2	CO1	PO5
	b)	Describe the features of an effective business letter. Talk about its advantages.	6 Marks	L3	CO3	PO5
		(OR)				
6.		Assume yourself to be the purchase manager of ABC systems, 24, Vijay Marg, Patna. Write a complaint letter to Mr. Chauhan, the Marketing Executive reporting that 4 of the 7 consignments have been received in a damaged condition. Ask for the replacement of the damaged along with compensation for the postal charges incurred.	12 Marks	L3	CO3	PO1
		UNIT-IV				
7.	a)	Explain the steps for effective business presentation.	6 Marks	L2	CO4	PO10
	b)	"Electronic résumés are the need of the hour". Discuss its relevance.	6 Marks	L2	CO3	PO10
		(OR)				
8.		Send your resume with covering letter to Soft Solutions, Bangalore for team lead position.	12 Marks	L3	CO3	PO2
		UNIT-V				
9.	a)	Frame 10 questions put by a product-based company while interviewing. Write the questions in order as per the interview.	6 Marks	L2	CO4	PO5
	b)	'Your dress defines what you are even before you start speaking'. What is so important about Grooming in an interview?	6 Marks	L2	CO1	PO1
		(OR)				
10.		"The uncreative mind can spot wrong answers, but it takes a very creative mind to spot wrong questions." Illustrate different kinds of interviews and styles of interviewing.	12 Marks	L2	CO2	PO2

PROFESSIONAL ETHICS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain Kohlberg's stages of moral development.	6 Marks	L2	CO1	PO1
	b)	Explain the skills needed to handle problems about moral issues in engineering ethics.	6 Marks	L2	CO3	PO8
		(OR)				
2.		What are moral dilemmas and what steps are necessary in confronting dilemmas.	12 Marks	L2	CO3	PO8
		UNIT-II				
3.	a)	Define virtues. List the types of virtues with suitable example for each.	6 Marks	L4	CO2	PO2
	b)	What is spirituality? How is spirituality promoted in workplace? What are spiritual traits to be developed for excellence in corporate activities?	6 Marks	L4	CO1	PO1
		(OR)				
4.		Briefly explain the professional ideals and virtues with examples.	12 Marks	L2	CO1	PO1
		UNIT-III				
5.	a)	Define 'conscientiousness'.	6 Marks	L2	CO2	PO2
	b)	What is the role of Engineers as responsible experimenters?	6 Marks	L2	CO1	PO1
		(OR)				
6.		Explain code of ethics and its roles, limitations and industrial standards.	12 Marks	L4	CO2	PO2
		UNIT-IV				
7.	a)	Discuss Collegiality and loyalty.	6 Marks	L2	CO1	PO1
	b)	Explain Whistle blowing.	6 Marks	L2	CO1	PO1
		(OR)				
8.		Explain professional rights and responsibilities with examples.	12 Marks	L4	CO2	PO2
		UNIT-V				
9.	a)	Explain Environmental ethics.	6 Marks	L2	CO1	PO1
	b)	What is the role of Engineers as consultants?	6 Marks	L2	CO3	PO8
		(OR)				
10		Describe Intellectual property rights.	12 Marks	L2	CO3	PO8

HYDRAULIC ENGINEERING

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define boundary layer. Differentiate between laminar and turbulent boundary layer.	6 Marks	L2	CO1	PO1 PO2
	b)	Explain boundary layer separation with neat sketch. What are the conditions on which separation takes place?	6 Marks	L4	CO1	PO1 PO2 PO10
		(OR)				
2.	a)	Explain the Mechanics of boundary layer transition.	6 Marks	L2	CO1	PO1 PO2 PO10
	b)	Air flows over a flat plate 1m long at a velocity of 6m/s. Determine: i) The boundary layer thickness at the end of the plate. ii) Shear stress at the middle of the plate. iii) Total drag per unit length on the sides of the plate. Take ρ=1.226 kg/m^3 and υ=0.15x10^{-4} m^2/s (0.15 stokes) for air.	6 Marks	L4	CO1	PO1 PO2 PO4 PO10

UNIT-II

3.	a)	Derive the expression for depth of hydraulic jump and obtain the loss of energy due to jump stating all assumptions.	6 Marks	L4	CO2	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO10
	b)	A trapezoidal channel has side slopes of 3 horizontal to 4 vertical and slope of its bed is 1 in 2000. Determine the optimum dimensions of the channel, if it is to carry water at 0.5m^3/s. Take C=80.	6 Marks	L6	CO2	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO10
		(OR)				
4.	a)	Explain specific energy and specific energy curve. Obtain the condition for maximum discharge for a given value of specific energy.	8Marks	L4	C02	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO10

	b)	Compare and contrast rapidly varied flow and gradually varied flow.	4Marks	L4	CO2	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO10
		UNIT-III				
5.	a)	Prove that the force exerted by a jet of water on a fixed semi-circular plate in the direction of the jet when the jet strikes at the center of the semi-circular plate is two times the force exerted by the jet on an fixed vertical plate.	6 Marks	L5	CO3	PO1 PO2 PO4 PO6 PO10
	b)	A jet of water of diameter 50mm strikes a fixed plate in such a way that the angle between the plate and the jet is 30^0. The force exerted in the direction of the jet is 1471.5N. Determine the rate of flow of water.	6 Marks	L6	CO3	PO1 PO2 PO4 PO6 PO10
		(OR)				
6.	a)	Derive the expression for the force and work done on a moving Curved plate when the jet strikes the plate at centre.	6 Marks	L4	CO3	PO1 PO2 PO4 PO6 PO10
	b)	A jet of water 120 mm in diameter and moving with a velocity of 25 m/s strikes normally on a flat plate. Determine the force exerted on the plate and the work done when the plate is stationary, the plate is moving with a velocity of 8 m/s in the direction of the jet, and the plate is moving with a velocity of 8 m/s towards the jet.	6 Marks	L6	CO3	PO1 PO2 PO4 PO6 PO10
		UNIT-IV				
7.	a)	A Francis turbine has a wheel diameter of 1.2 m at the entrance and 0.6m at the exit. The blade angle at the entrance is 90^0 and the guide vane angle is 15^0. The water at the exit leaves the blades without any tangential velocity. The available head is 30m and the radial component of flow velocity is constant. What would be the speed of wheel in rpm and blade angle at exit? Neglect friction.	6 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO10
	b)	Define specific speed of a turbine. Derive the expression for the specific speed of turbine.	6 Marks	L4	CO4	PO1 PO2 PO3 PO10
		(OR)				
8.	a)	Discuss in detail the different components of hydroelectric power plants.	6 Marks	L2	CO4	PO1 PO2 PO10
	b)	Define: i) Firm and secondary power. ii) Load factor, utilization factor and capacity factor.	6 Marks	L4	CO4	PO1 PO2 PO3

UNIT-V

9.	a)	Define centrifugal pump and explain various components of a Centrifugal pump with a neat sketch.	6 Marks	L4	CO5	PO1 PO2 PO3 PO4 PO10
	b)	Discuss the operating characteristic of centrifugal pump with neat sketches.	6 Marks	L4	CO5	PO1 PO2 PO4 PO6 PO10
		(OR)				
10.	a)	A centrifugal pump delivers water against a net head of 10m at a speed of 100 r.p.m. The vanes are curved backward and make an angle of 30 degrees. The impeller outside diameter is 30cm and has a width of 5cm at the outlet. Determine the discharge if manometric efficiency is 95%.	8 Marks	L6	CO5	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO10
	b)	Explain: i) Cavitation. ii) Loses in pumps.	4 Marks	L4	CO5	PO1 PO2 PO3 PO4 PO5 PO10

II B.Tech II Semester (SVEC-19) Supplementary Examinations July – 2022

SOIL MECHANICS

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What are residual and transported soils? List the types of soils formed along with their transporting agents.	6 Marks	L2	CO1	PO1 PO2
	b)	A soil has Liquid Limit of 25% and Flow Index of 12.5%. If the Plastic Limit is 15%, determine the Plasticity Index and toughness index. If for the above soil, the natural moisture content is 20%; find the liquidity index and Consistency Index.	6 Marks	L3	CO1	PO1 PO2 PO4
		(OR)				
2.	a)	Explain the IS classification of fine-grained soils.	6 Marks	L1	CO1	PO1
	b)	In order to find the relative density of sandy soil, a mould of Volume 1000ml was used. When the sand was dynamically compacted in the mould, its mass was 2.10kg whereas when the sand was poured loosely, its mass was 1.635kg. If the in-situ dry density of the soil was 1.5Mg/m^3. Calculate the relative density of the soil. Take G=2.70 and assume the sand is saturated.	6 Marks	L3	CO1	PO1 PO2 PO4

UNIT-II

3.	a)	Explain the factors effecting permeability of soils.	6 Marks	L2	CO2	PO1
	b)	A permeameter of diameter 82.5mm contains a column of fine sand 460mm long. When the water flows through it under a constant head at a rate of 191 ml/min, the loss of the head between two pints 250mm apart is 380mm, calculate the coefficient of permeability. If falling head test is made on the same sample using a stand pipe of dia. 30mm, in what time will the water level in the stand pipe fall from 1560mm to 1066mm above outflow level.	6 Marks	L3	CO2	PO1 PO2 PO4
		(OR)				
4.	a)	What is a flow net? Explain the characteristics and uses of flow nets.	6 Marks	L2	CO2	PO1 PO10
	b)	A 10m thick bed of sand is underlain by a layer of clay of 6m thickness. The water table which was originally at the ground surface is lowered by drainage to a depth of 4m, whereupon the degree of saturation above the lowered water table reduces to 20%. Determine the increase in magnitude of vertical effective pressure at the middle of the clay layer due to lowering of water table. The saturated unit weights of sand and clay are respectively 20.6kN/m^3 and 17.6kN/m^3. Dry density of sand is 16.7 kN/m^3. Take G_s for sand as 2.70.	6 Marks	L3	CO2	PO1 PO2 PO4 PO10

UNIT-III

5.	a)	Calculate the average vertical stress at a depth of 4m below a footing with dimensions 2m by 1m, exerting a uniform pressure of 750 kN/m^2 on the soil. Assume 2:1 stress distribution.	6 Marks	L3	CO3	PO1 PO2 PO4
	b)	An elevated structure with a total weight of 10000kN is supported on a tower with 4 legs. The legs rest on piers located at the corners of a square 6m a side. What is the vertical stress increment due to this loading at a point 7m beneath the center of the structure?	6 Marks	L3	CO3	PO1 PO2 PO4

(OR)

6.	a)	A laboratory compaction test conducted on a sample of soil gave the following results.	6 Marks	L3	CO3	PO1 PO2 PO4 PO10

Bulk density (g/cc)	Moisture content (%)
2.06	12.8
2.13	14.2
2.15	15.6
2.16	16.8
2.14	17.8

Find the maximum dry density and optimum moisture content.

	b)	Explain the effect of compaction on soil properties.	6 Marks	L2	CO3	PO1

UNIT-IV

7.	a)	Explain spring analogy for primary consolidation.	6 Marks	L2	CO4	PO1
	b)	In a consolidation test on a soil, the void ratio of the sample decreased from 1.25 to 1.10 when the pressure increased from 200KN/m² to 400KN/m². Calculate the coefficient of consolidation, if the coefficient of permeability is 8×10^{-8} cm/sec.	6 Marks	L3	CO4	PO1 PO2 PO4

(OR)

8.	a)	Define Initial, primary and secondary consolidation.	6 Marks	L2	CO4	PO1
	b)	Determine the settlement of a footing resting on a saturated soil with properties as given below. The thickness of the compressible soil is 3m. The increase in pressure at the center of the layer is 50kPa and the pre-consolidation pressure is 50kPa. If the coefficient of consolidation is 1.8×10^{-7} m²/s, determine the time in days for 90% consolidation. Assume one-way drainage. Void ratio of the soil = 0.70 Specific gravity of the soil = 2.60 Compression index = 0.15	6 Marks	L3	CO4	PO1 PO2 PO4

UNIT-V

9.	a)	Derive the expression for Mohr-Coulomb failure criterion to determine the shear parameters from principal stresses.	6 Marks	L2	CO5	PO1 PO2
	b)	A direct shear test was conducted on a specimen of dry sand with a normal stress of 200 kN/m². Failure occurred at a shear stress of 175 kN/m². The size of the specimen tested was 75mm x 75mm x 30mm (height). Determine the angle of friction. For a normal stress of 150 kN/m², what shear force would be required to cause failure in the specimen?	6 Marks	L3	CO5	PO1 PO2 PO4 PO10

(OR)

10.	a)	Explain briefly about the types of shear tests based on drainage conditions.	6 Marks	L3	CO5	PO1 PO2
	b)	Two identical specimens of a soil were tested in a tri axial apparatus. First specimen failed at a deviator stress of 770 kN/m² under a cell pressure of 200 kN/m² while the second specimen failed at a deviator stress of 1370 kN/m² under a cell pressure of 400 kN/m². Determine the shear parameters.	6 Marks	L3	CO5	PO1 PO2 PO4 PO10

STRUCTURAL ANALYSIS

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Derive the relation between curvature, slope and deflection.	4 Marks	L4	CO1	PO1 PO2 PO4 PO5 PO10
	b)	A cantilever beam ABC, fixed at A, B at middle of the beam and cantilever at C. AB = 2m and BC = 2m. The Moment of Inertia for AB = 2I and BC = I. The point load 20kN is acting at points B and C. Determine the slope at point "C" of the beam. Use Conjugate Beam Method**.**	8 Marks	L4	CO1	PO1 PO2 PO4 PO5 PO10
		(OR)				
2.	a)	A cantilever beam of length l carries an UDL of W kN/m throughout the beam. Determine the slope and deflection by moment area method.	4 Marks	L4	CO1	PO1 PO2 PO4 PO5 PO10
	b)	Determine the Slope and deflection at the free end of a cantilever of length 4m carries a uniformly distributed load of 20 kN/m length over the entire length if the moment of $I=7.95 \times 10^7 mm^4$ and $E = 2 \times 105$ N/mm². Use Double Integration method**.**	8 Marks	L4	CO1	PO1 PO2 PO4 PO5 PO10

UNIT-II

3.	a)	Determine the deflection at the free end of the cantilever of length 3m subjected to a UDL of 5kN/m throughout the length by using Strain Energy Method**.**	4 Marks	L4	CO2	PO1 PO2 PO4 PO5 PO10
	b)	A fixed beam AB of span 12m carries a point load 30kN and 40kN at distances 4m and 8m from the left end respectively. Determine the Fixed end moments and reactions at the supports. Draw the SF and BM diagrams of the given beam.	8 Marks	L4	CO2	PO1 PO2 PO4 PO5 PO10
		(OR)				
4.	a)	Using strain energy method, determine the deflection at the free end of the cantilever beam of length L subjected to a UDL load throughout the beam.	4 Marks	L4	CO2	PO1 PO2 PO4 PO5 PO10
	b)	A fixed beam 8m span carries a point load of 20 kN acting at 4m of length starting from left end and a concentrated load of 20kN at a distance of 7m from the left end. Determine the Fixed end moments and draw the SF and BM diagrams.	8 Marks	L4	CO2	PO1 PO2 PO4 PO5

						PO10
		UNIT-III				
5.	a)	Draw the sign conventions considered in Slope deflection method.	4 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO10
	b)	A continuous beam ABC, is carrying a uniformly distributed load of 4 kN/m on AB in addition to a concentrated load of 12kN is acting on BC. AB – 6m and BC – 2m. Draw bending moment diagram by using slope deflection method.	8 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO10
		(OR)				
6.	a)	Write the Clapeyron's theorem of three moments equation and explain each parameter.	4 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO10
	b)	Analyze the continuous beam ABC of Span 9m. AB – 6m and BC – 3m, An UDL of 10kN/m is acting on throughout the span. Determine the support moments by using by Clapeyron's Theorem of three moment equation method. Take EI=Constant.	8 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO10
		UNIT-IV				
7.	a)	Explain about relative stiffness with example.	4 Marks	L4	CO4	PO1 PO2 PO4 PO5 PO10
	b)	A continuous beam ABC, fixed at A and Hinges at B and C., is carrying a uniformly distributed load of 5kN/m on AB in addition to a concentrated load of 10kN is acting on BC. AB – 6m and BC – 2m. Draw bending moment diagram by using moment distribution method.	8 Marks	L4	CO4	PO1 PO2 PO4 PO5 PO10
		(OR)				
8.	a)	Explain about Rotation Factors in Kani's method with example.	4 Marks	L4	CO4	PO1 PO2 PO4 PO5 PO10
	b)	A continuous beam ABC, Fixed at A and Roller at B and C., is carrying a uniformly distributed load of 8kN/m on AB in addition to a concentrated load of 10kN is acting on BC. AB – 4m and BC – 4 m. Determine the moments by Kani's method and draw BMD.	8 Marks	L4	CO4	PO1 PO2 PO4 PO5 PO10
		UNIT-V				
9.	a)	What is the use of influence line diagram and State Muller Breslau's principle?	4 Marks	L4	CO5	PO1 PO2 PO4 PO5 PO10

	b)	A simply supported beam has a span of 16 m is subjected to a UDL (dead load) of 5kN/m and a UDL (live load) of 8kN/m (longer than the span) traveling from left to right. Draw the ILD for shear force and bending moment at a section 4m from the left end. Use these diagrams to determine the maximum shear force and bending moment at this section.	8 Marks	L4	CO5	PO1 PO2 PO4 PO5 PO10
		(OR)				
10.	a)	Explain what is Load factor and Factor of safety in Plastic Analysis.	4 Marks	L4	CO5	PO1 PO2 PO4 PO5 PO10
	b)	Calculate the plastic moment capacity required for the continuous beam with working loads and consider a minimum load factor $\lambda = 1.7$.	8 Marks	L4	CO5	PO1 PO2 PO4 PO5 PO10

SUSTAINABLE ENGINEERING

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	How the economical issues and legal issues do affects the sustainable development.	6 Marks	L4	CO1	PO1 PO2 PO6 PO7
	b)	What would happen without Montreal Protocol? Explain in detail.	6 Marks	L3	CO1	PO1 PO4 PO6 PO7 PO8
		(OR)				
2.	a)	If the city Vizag need to be disaster resilient, which factors do we consider for that?	6 Marks	L5	CO1	PO1 PO2 PO4 PO7
	b)	How do you implement the six principles of sustainability in detail?	6 Marks	L3	CO1	PO1 PO6 PO7 PO8

UNIT-II

3.	a)	How do you analyze a life cycle? Describe the steps involved in it with any example.	6 Marks	L4	CO2	PO1 PO2 PO5 PO10
	b)	Explain the social and economic indicators for sustainability measurement.	6 Marks	L2	CO2	PO1 PO4 PO6
		(OR)				
4.	a)	Draw the flow chat and explain in brief the environmental health risk assessment model.	6 Marks	L4	CO2	PO1 PO2 PO6 PO11
	b)	Distinguish the advantages and disadvantages of Streamlined life-cycle assessment.	6 Marks	L4	CO2	PO1 PO6 PO10

UNIT-III

5.	a)	What is Green building and mention its importance in sustainable urban planning?	6 Marks	L2	CO3	PO1 PO4 PO6 PO7
	b)	Interpret the advantages and challenges of waste management in	6 Marks	L3	CO3	PO1

		detail with an example.				PO2 PO7
		(OR)				
6.	a)	Explain any 5 construction planning impacting sustainable building.	6 Marks	L2	CO3	PO1 PO4 PO6 PO7
	b)	Distinguish the advantages and disadvantages of any two sustainable energies in terms of economical and environmental point of view.	6 Marks	L4	CO3	PO1 PO2 PO6 PO7
		UNIT-IV				
7.	a)	Compare the unique aspects of IGBC and GRIHA rating system is different than each other.	6 Marks	L4	CO4	PO1 PO2 PO3 PO5 PO7
	b)	Which areas to assess for a building or a project consider for rating?	6 Marks	L3	CO4	PO1 PO2 PO3 PO5 PO7
		(OR)				
8.	a)	Evaluate any one Materials engineering project as an example by sustainability tools.	6 Marks	L5	CO4	PO1 PO2 PO3 PO7
	b)	Discuss the social and environmental sustainability in detail.	6 Marks	L2	CO4	PO1 PO2 PO7
		UNIT-V				
9.	a)	Describe the United Nations sustainable development goals.	6 Marks	L2	CO5	PO1 PO2 PO3 PO7 PO8 PO10
	b)	Distinguish between industrial ecology and industrial symbiosis.	6 Marks	L4	CO5	PO1 PO2 PO7
		(OR)				
10.	a)	What are the key elements for creating an industrial as energy efficient?	6 Marks	L2	CO5	PO1 PO2 PO4 PO6 PO7
	b)	How are urbanization and industrialization related? And explain them in detail.	6 Marks	L4	CO5	PO1 PO2 PO7 PO8

DIGITAL ELECTRONICS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

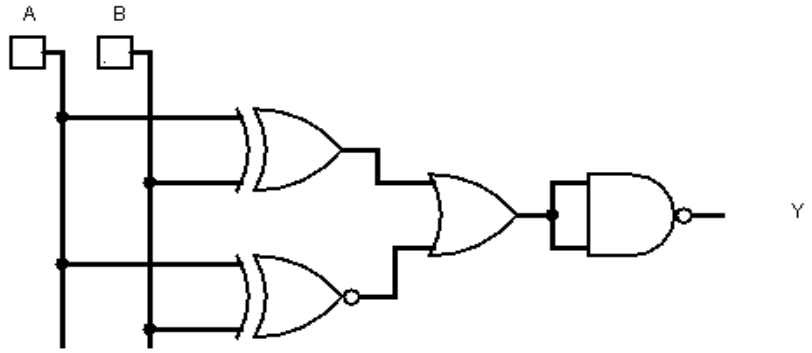
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Illustrate the procedure to convert a decimal number to an equivalent number in any number system with examples.	12 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Implement EX-OR using minimum number of NAND gates.	6 Marks	L2	CO1	PO1
	b)	Reduce the expression. $F = \sum m(0,1,4,5,6,7,9,11,15) + d(10,14)$ *using K - map*	6 Marks	L3	CO1	PO1

UNIT-II

3.	a)	Explain the operation of de-multiplexer by taking 1:2 in to the account.	6 Marks	L4	CO3	PO2
	b)	Describe the operation of the following combinational logic circuit with truth table.	6 Marks	L4	CO3	PO2



(OR)

4.	a)	Design a 4x1 Multiplexer and draw its functional table.	6 Marks	L2	CO1	PO1
	b)	Design a combinational circuit with four inputs and four outputs. The output generates the 2's complement of the input binary number.	6 Marks	L4	CO3	PO4

UNIT-III

5.	a)	With the help of block diagram, explain the working of a JK flip flop.	6 Marks	L4	CO3	PO2
	b)	Clearly explain the working of a 4-bit binary-up counter with T flip-flop. Draw the logic diagram and give its excitation table.	6 Marks	L2	CO5	PO8
		(OR)				
6.		Illustrate the operation of Mod-6 synchronous counter.	12 Marks	L4	CO2	PO2

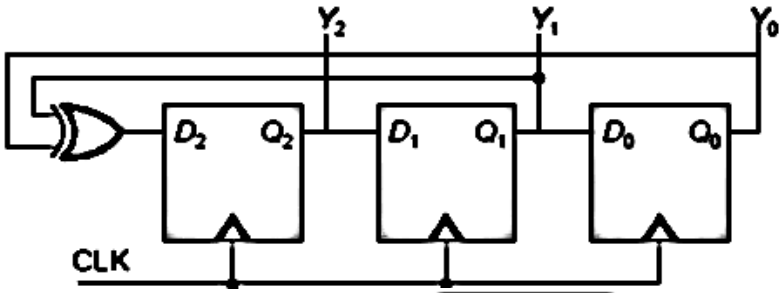
UNIT-IV

7. Minimize the sequential machine represented in the state table shown below using merger table. — 12 Marks — L4 — CO3 — PO2

Present State	Next State , Z	
	X=0	X=1
A	B,1	H,1
B	F,1	D,1
C	D,0	E,1
D	C,0	E,1
E	D,1	C,1
F	C,1	C,1
G	C,1	D,1
H	C,0	A,1

(OR)

8. A three bit pseudo random number generator is shown. Initially the value of output $Y = Y_2Y_1Y_0$ is set to 111. The value of output Y after three clock cycles is. — 12 Marks — L4 — CO3 — PO4



UNIT-V

9. What is the difference between PLA and PAL? Implement half substractor using PLA and PAL model. — 12 Marks — L3 — CO4 — PO6

(OR)

10. Analyze the following Boolean functions using PAL with AND-OR structure. — 12 Marks — L3 — CO4 — PO6

F1 (A,B,C,D)=∑m(2, 12, 13)
F2 (A,B,C,D)=∑m(7, 8, 9, 10, 11, 12, 13, 14, 15)
F3 (A,B,C,D)=∑m(0, 2, 3, 4, 5, 6, 7, 8, 10, 11, 15)
F4 (A,B,C,D)=∑m(1, 2, 8, 12, 13)

ELECTRICAL MACHINES-II

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain how a synchronously rotating magnetic field with constant magnitude is produced in a 3-phase induction motor when a balanced 3-phase supply is applied to its balanced 3-phase stator winding.	8 Marks	L2	CO1	PO1
	b)	Write a note on losses in induction motor.	4 Marks	L1	CO1	PO1
		(OR)				
2.	a)	The power input to the rotor of a 440V, 50Hz, 3-phase, 6-pole induction motor is 50kW. The rotor **emf** makes 120 cycles per minute. Friction and windage losses are 2kW. Calculate i) Rotor copper losses ii) Mechanical power developed iii) Output power iv) Output torque.	8 Marks	L3	CO1	PO2
	b)	Compare deep bar induction motor with a double cage induction motor.	4 Marks	L4	CO1	PO1

UNIT-II

3.	a)	Why starter is required to start 3-phase induction motors? Explain primary resistance starter.	6 Marks	L1	CO1	PO3
	b)	Explain the autotransformer starter used for three phase induction motors. Derive the expression for starting torque.	6 Marks	L2	CO1	PO5
		(OR)				
4.	a)	With neat diagram, explain Scherbius scheme for speed control of induction motor.	6 Marks	L2	CO1	PO7
	b)	A cascade set consists of two motors A and B with 4 poles and 6 poles respectively. The motor is connected to a 50Hz supply. Find i) the speed of the set ii) the electric power transferred to motor B when the input to motor A is 25kW. Neglect losses.	6 Marks	L3	CO1	PO4

UNIT-III

5.	a)	What are the methods used to reduce harmonics in three phase alternators? Explain.	4 Marks	L1	CO2	PO3
	b)	A 3-phase, 16-pole alternator has a star-connected winding with 144 slots and 12 conductors per slot. The flux per pole is 0.03wb, sinusoidally distributed and the speed is 375 r.p.m. Find the frequency, phase and line **emf**. Assume full pitched coil.	8 Marks	L3	CO2	PO2
		(OR)				
6.	a)	Define armature reaction. Discuss the nature of armature reaction of an alternator for zero **pf** lagging, zero **pf** leading and unity **pf** load.	8 Marks	L1	CO2	PO1
	b)	A 4-pole alternator has an armature with 25 slots and 8 conductors per slot and rotates at 1500 r.p.m and flux per pole is 0.05wb. Calculate the **emf** generated if winding factor is 0.96 and all conductors are in series.	4 Marks	L3	CO2	PO4

UNIT-IV

7.	a)	Explain synchronisation of alternators with necessary conditions. Give any one method in detail.	8 Marks	L2	CO3	PO6
	b)	What is synchronizing power? Explain its significance with parallel operation of alternators.	4 Marks	L1	CO3	PO1

(OR)

8.	a)	Discuss the effect of change in the input power on the two alternators running in parallel.	6 Marks	L2	CO3	PO2
	b)	What is the necessity of parallel operation of alternators? Derive the expression for load sharing between two alternators.	6 Marks	L1	CO3	PO7

UNIT-V

9.		Explain the various starting methods of synchronous motor with necessary diagrams.	12 Marks	L3	CO4	PO5

(OR)

10.	a)	What is hunting? Explain how it can be minimized in the synchronous motor.	6 Marks	L1	CO4	PO3
	b)	Explain briefly how a synchronous motor can be operated as a synchronous condenser.	6 Marks	L2	CO4	PO1

ELECTRICAL MEASUREMENTS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	With neat sketch, describe in detail the construction and working of a Moving Iron (MI) type instrument by incorporating the spring control and eddy current damping systems for AC and DC quantities measurements. Also, list its merits and demerits.	6 Marks	L2	CO1	PO1
	b)	Give the basic principle of working of an electrostatic voltmeter. Explain how would you increase: i) The operating forces. ii) Voltage range of the voltmeter.	6 Marks	L4	CO1	PO3
		(OR)				
2.	a)	Describe the feature incorporated in an electro dynamometer wattmeter to make it a low power factor type of wattmeter.	6 Marks	L2	CO1	PO1
	b)	Explain the procedure to measure power using instrument transformers with the help of phasor diagrams and correction factors.	6 Marks	L3	CO1	PO2
		UNIT-II				
3.	a)	Explain the errors caused because of connections in Electrodynamometer (EDM) type wattmeter and suggest suitable measures to minimize the errors.	6 Marks	L2	CO2	PO1
	b)	Explain the working of a 3 phase dynamometer wattmeter. Draw a neat sketch of the wattmeter and also its connections.	6 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Explain the theory and shape of scale of electrodynamometer wattmeters.	6 Marks	L3	CO2	PO1
	b)	Derive the expression for deflecting torque in single phase induction type meters. Show that the deflection is maximum, when the phase angle between two fluxes is 900 and when the disc is purely non-inductive.	6 Marks	L3	CO2	PO6
		UNIT-III				
5.	a)	Explain the theory and shape of scale of electrodynamometer wattmeters.	6 Marks	L2	CO3	PO1
	b)	A dynamometer type of wattmeter is rated 10 A and 100 V with a full scale reading of 1000 W. The inductance of the voltage circuit is 5 mH and its resistance is 3000 Ω. If the voltage drop across the current coil of the wattmeter is negligible, what is the error in the wattmeter at the rated VA rating with zero power factor? Assume frequency is 50 Hz.	6 Marks	L4	CO3	PO4
		(OR)				

6.	a)	Describe in detail suitable standardization method used for the standardization of AC voltmeter using AC potentiometers.	6 Marks	L3	CO3	PO5
	b)	Explain the working of Coordinate type ac Potentiometer with neat sketch.	6 Marks	L3	CO3	PO2

UNIT-IV

7.	a)	Mention the different methods used for measurement of high resistance and explain in detail the Loss of charge method.	6 Marks	L2	CO4	PO1
	b)	Describe how relative permittivity of a specimen of insulating material can be determined using a schering bridge.	6 Marks	L3	CO4	PO4
		(OR)				
8.	a)	Describe the working of hay's bridge for measurement of inductance. Derive the equations for balance condition.	6 Marks	L3	CO4	PO5
	b)	Write short notes on the following with neat sketches: i) Flux meter. ii) Core loss measurement by Bridges.	6 Marks	L3	CO4	PO2

UNIT-V

9.	a)	What are the methods available for determination of B.H. Curve? Explain them neatly.	6 Marks	L2	CO5	PO1
	b)	Explain lissajous pattern with two equal voltages of same frequency and phase shift of ϕ (not equal to 00 or 900).	6 Marks	L4	CO5	PO2
		(OR)				
10.	a)	Explain the basic circuitry of cathode ray oscilloscope.	6 Marks	L2	CO5	PO6
	b)	Explain about ballistic tests for the determination of magnetic flux density, magnetizing force, magnetic potentiometer, B-H curve and Hysteresis loop.	6 Marks	L2	CO5	PO1

TRANSMISSION AND DISTRIBUTION

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	A 3-phase double circuit line is shown below. Radius of each conductor is 1cm. Determine the capacitance and charging current per km assuming the line is transposed and operating voltage is 220 KV, 50 Hz 	6 Marks	L3	CO1	PO1
	b)	A single core cable has a core diameter of 8 mm and a diameter under the sheath of 2cm. The relative permittivity of the dielectric is 4. Calculate for 1 km length of the cable i) the capacitance ii) its equivalent insulation resistance iii) the charging current when the cable is connected to 10 kV, 1-phase 50 Hz supply system.	6 Marks	L3	CO1	PO1
		(OR)				
2.	a)	A 200 km, 3-phase transmission line has its conductors placed at the corners of an equilateral triangle of 2.5 m side. The radius of each conductor is 2 cm. Calculate: i) Line to neutral capacitance of the line ii) Charging current per phase if the line is maintained at 66 kV, 50Hz.	6 Marks	L4	CO1	PO2
	b)	Derive the expression for voltage regulation of medium transmission line if the line is represented by nominal-π.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Derive the expression wave equation of a traveling wave.	6 Marks	L2	CO2	PO6
	b)	Express A, B, C and D constants for medium transmission line if the line is represented by nominal-T.	6 Marks	L3	CO2	PO1
		(OR)				
4.	a)	A 220kV short 3-phase transmission line has series line impedance per phase of (20+j50)Ω. Then line delivers a load of 50 MW at 0.7 pf lag. Determine the regulation of the line and the A, B, C, D parameter of the line.	8 Marks	L3	CO2	PO1
	b)	Define and write the expressions for Voltage Regulation and Efficiency of a transmission line.	4 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	An overhead transmission line at a river crossing is supported from two towers at a height of 30m and 70m above water level. The horizontal distance between the towers is 250m. If the required clearance between the conductor and the water midway between the towers is 45m and the weight of the conductor is 0.8 kg/m. Analyze the tension in the conductor.	8 Marks	L4	CO3	PO2

	b)	List out the factors that affect sag in the transmission line.	4 Marks	L2	CO3	PO6

(OR)

6.	a)	Briefly describe the methods of reducing corona effect.	5 Marks	L2	CO3	PO12
	b)	A string of 5 insulators is connected across three phase, 100kV line. If the self capacitance of each unit is equal to 5 times pin to earth capacitance. Calculate the potential difference across each unit and string efficiency.	7 Marks	L3	CO3	PO1

UNIT-IV

7.	a)	A 2-wire DC distributor *AB* is fed at A and supplies six concentrated loads each of 50A at *C, D, E, F, G* and *H* as shown in figure below. What must be the resistance of each section so that maximum voltage drop for any consumer does not exceed 7 volts? Also calculate the power loss with this resistance. Assume $AC = CD = DE = EF = FG = GH = HB$ 	6 Marks	L3	CO4	PO1
	b)	A 2 wire DC Distributor AB, 1000m long has a total resistance of 0.1 Ω. The ends A & B are fed at 240V. The distributor is uniformly loaded at 0.5 A/m length and has concentrated loads of 120A, 60A, 100A and 40A at distances of 200, 400, 700 and 900m respectively from end A. Calculate: i) the point of minimum potential ii) value of minimum potential iii) current fed at both ends. iv) what would be the resistance of distributor if the maximum permissible drop is restricted to 15 V.	6 Marks	L4	CO4	PO2

(OR)

8.	a)	A 2-wire DC distributor AB 900m long is fed at 400V and loads of 50A, 100A and 150A are tapped off from C, D and E which are at a distance of 200m, 500m and 800m from point A respectively. The distributor is also loaded uniformly at the rate of 0.5A/m. If the resistance of the distributor per meter (go & return) is 1×10^{-4} Ω, calculate i) voltages at points B & D and ii) Power loss in the distributor.	6 Marks	L4	CO4	PO2
	b)	A single phase distributor AB has a total impedance of (0.1+j0.2)Ω. At the far end B, a current of 80A at 0.8 p.f. lagging and at mid-point C a current of 100A at 0.6 p.f. lagging are tapped. If the voltage of the far end is maintained at 200V, determine: i) Supply end voltage V_A ii) Phase angle between V_A and V_B	6 Marks	L3	CO4	PO1

UNIT-V

9.	a)	Explain various distribution planning models.	6 Marks	L2	CO5	PO1
	b)	List out various bus bar schemes and explain any four schemes with circuit diagram, advantages and disadvantages.	6 Marks	L2	CO5	PO1

(OR)

10.	a)	Draw the 132kV/33kV substation layout.	6 Marks	L3	CO5	PO12
	b)	Discuss about the classification of different types of substations. State the advantages and disadvantages of each substation.	6 Marks	L2	CO5	PO1

❀ ❀ ❀

DYNAMICS OF MACHINERY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain about Prony and Rope brake dynamometers in brief.	6 Marks	L2	CO1	PO1
	b)	Compare Single Band brake and Differential band brake.	6 Marks	L2	CO1	PO1 PO2
		(OR)				
2.		An effective diameter of the cone clutch is 75 mm. The semi-angle of the cone is 18°. Find the torque required to produce slipping of the clutch if an axial force applied is 200 N. This clutch is employed to connect an electric motor running uniformly at 100 r.p.m with a flywheel which is initially stationary. The flywheel has a mass of 13.5 kg and its radius of gyration is 150 mm. Calculate the time required for the flywheel to attain full speed, and also the energy lost in the slipping of the clutch. Take coefficient of friction as 0.3.	12 Marks	L3	CO1	PO1 PO2 PO3

UNIT-II

3.	a)	Derive the expression for Gyroscopic Couple.	4 Marks	L2	CO2	PO1
	b)	An aeroplane makes a complete half circle of 90 metres radius, towards left, when flying at 270km per hour. The rotary engine and the propeller of the plane has a mass of 450kg with a radius of gyration of 360mm. The engine runs at 2700 r.p.m. clockwise, when viewed from the rear. Find the gyroscopic couple on the aircraft and state its effect on it.	8 Marks	L3	CO2	PO1 PO2 PO3 PO4
		(OR)				
4.	a)	Explain what do you understand by gyroscopic stabilization	4 Marks	L2	CO3	PO1
	b)	A ship is propelled by a rotor of mass 2000kg rotates at a speed of 2400 r.p.m. The radius of gyration of rotor is 0.4m and spins clockwise direction when viewed from stern. Find the gyroscopic couple and its effect when: i) The ship takes left turn at a radius of 350m with a speed of 35kmph ii) The ship pitches with the bow rising at an angular velocity of 1rad/s iii) The ship rolls at an angular velocity of 0.15rad/s.	8 Marks	L3	CO3	PO1 PO2 PO3 PO4

UNIT-III

5.	a)	Derive the expression for the height of Proell governor	6 Marks	L2	CO4	PO1
	b)	In an engine governor of the Porter type, the upper and lower arms are 200mm and 250mm respectively and pivoted on the axis of rotation. The mass of the central load is 15kg, the mass of each ball is 2kg and friction of the sleeve together with the resistance of the operating gear is equal to a load of 25N at the sleeve. If the limiting inclinations of the upper arms to the vertical are 30° and 40°, find, taking friction into account, range of speed of the governor.	6 Marks	L3	CO4	PO1 PO2 PO3 PO4 PO5 PO6
		(OR)				

6.	a)	Discuss the merits and demerits of spring controlled and gravity controlled governors.	4 Marks	L2	CO4	PO1 PO2 PO3 PO4 PO5 PO6
	b)	Porter governor has equal arms each 250mm long and pivoted on the axis of rotation. Each ball has a mass of 5Kg and the mass of the central load on the sleeve is 25kg. The radius of rotation of the ball is 150mm when the governor begins to lift and 200mm when the governor is at maximum speed. Find the maximum and minimum speeds and range of speed of the governor.	8 Marks	L3	CO4	PO1 PO2 PO3 PO4 PO5 PO6
		UNIT-IV				
7.		Three masses of 8kg, 12kg and 15kg attached at radial distances of 80mm, 100mm and60mm respectively to a disc on a shaft are in complete balance. Determine the angular positions of the masses of 12kg and 15kg relative to 8kg mass.	12 Marks	L3	CO5	PO1 PO2 PO3 PO6
		(OR)				
8.		Four masses m_1, m_2, m_3 and m_4 are 200 kg, 300 kg, 240 kg and 260 kg respectively. The corresponding radii of rotation are 0.2m, 0.15m, 0.25m and 0.3m respectively and the angles between successive masses are 45°, 75° and 135°. Find the position and magnitude of the balance mass required, if its radius of rotation is 0.2m.	12 Marks	L3	CO5	PO1 PO2 PO3
		UNIT-V				
9.	a)	A vibrating system consisting of a weight of 22.27N and a spring of stiffness 15.2N/cm, is viscously damped such that the ratio of two consecutive amplitudes is 1.0 to 0.98. Determine: i) Frequency of damped oscillations. ii) Logarithmic decrement. iii) Damping factor. iv) Damping coefficient.	6 Marks	L3	CO6	PO1
	b)	A shaft 50mm diameter and 3 metres long is simply supported at the ends and carries three loads of 1000N, 1500N and 750N at 1m, 2m and 2.5m from the left support. The Young's modulus for shaft material is 200GN/m^2. Find the frequency of transverse vibration.	6 Marks	L3	CO6	PO1 PO2 PO3 PO4 PO5
		(OR)				
10.		A coil of spring stiffness 60N/mm supports vertically a load of 3kN at the free end. The motion is resisted by the oil dashpot. It is found that the amplitude at the beginning of the fourth cycle is 0.6 times the amplitude of the previous vibration. Find the ratio of the frequencies of damped and un damped vibrations.	12 Marks	L3	CO6	PO1 PO2 PO3 PO4 PO5 PO6

ENGINEERING METROLOGY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Distinguish between Material standard and wavelength standard.	6 Marks	L2	CO1	PO1
	b)	Explain the method of Calibration of the slip gauges.	6 Marks	L3	CO1	PO1
		(OR)				
2.	a)	Explain hole basis and shaft basis system.	6 Marks	L2	CO1	PO1
	b)	Determine the tolerance on the hole and the shaft for a precision limiting fit designated by 50 H7 g6. 50 mm lies between the range of 30-50mm Standard tolerance unit (i)= $0.45\ 3\sqrt{D} + 0.001D$ microns, Fundamental deviation of g shaft = -2.5 d 0.34 . Evaluate the maximum and minimum dimensions of shaft and hole and clearances.	6 Marks	L3	CO1	PO3

UNIT-II

3.	a)	Sketch and explain the Taylors principle of limit gauging.	6 Marks	L2	CO2	PO1
	b)	Explain Sigma comparator with neat sketch.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Explain the principle, working and use of spirit level.	6 Marks	L3	CO2	PO1
	b)	What is the working principle of a bevel protractor? What are the precautions to be taken while using it?	6 Marks	L2	CO2	PO1

UNIT-III

5.	a)	Explain the measurement methodology involved in the use of optical flats.	6 Marks	L3	CO3	PO1
	b)	Classify straight edges with illustrations.	6 Marks	L2	CO3	PO2
		(OR)				
6.	a)	With the help of a neat sketch, explain the Taylor–Hobson talysurf.	6 Marks	L2	CO3	PO1
	b)	Write the principle and working of Auto collimator with a neat sketch.	6 Marks	L3	CO3	PO1

UNIT-IV

7.	a)	Using 2 wire measure the effective diameter of a screw thread with neat sketch.	6 Marks	L3	CO4	PO2
	b)	With the help of a sketch, explain the construction and working of a bench micrometer.	6 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Demonstrate the method used for checking pitch of the gear.	6 Marks	L3	CO4	PO1
	b)	Explain the method to find the tooth thickness of the gear.	6 Marks	L2	CO4	PO1

UNIT-V

9.	a)	What are rosette gauges? Explain briefly.	6 Marks	L2	CO5	PO1
	b)	Explain the method of usage of resistance strain gauge for bending strains.	6 Marks	L2	CO5	PO1
		(OR)				
10.	a)	Explain Seebeck, Thomson and Peltier effects.	6 Marks	L2	CO5	PO1
	b)	Explain digital thermometers with a neat sketch.	6 Marks	L2	CO5	PO1

FLUID MECHANICS AND HYDRAULIC MACHINERY

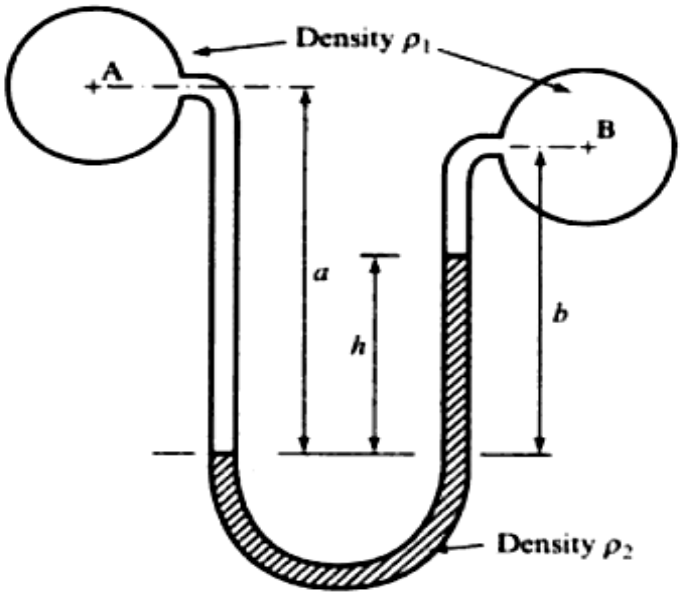
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain about different types of fluids with the help of shear stress and velocity gradient diagram.	6 Marks	L1	CO1	PO1
	b)	One Litre of crude oil weighs 9.6 N. Calculate its specific weight, density and specific gravity.	6 Marks	L3	CO1	PO1 PO2
		(OR)				
2.		A U-tube manometer measures pressure difference between two points A and B in a liquid of density ρ_1. The U-tube contains mercury of density ρ_2. Calculate the difference of pressure, if the liquid at A and B is water and $\rho_2 = 13.6\ \rho_1$ (Use: a = 2 m, b = 1.5 m and h = 0.5 m).	12 Marks	L3	CO1	PO1 PO2



UNIT-II

3.		Derive an expression for continuity equation for three-dimensional incompressible flow in Cartesian coordinates.	12 Marks	L2	CO2	PO1 PO2
		(OR)				
4.		The water is flowing in a pipe of diameter 30cm. The pipe is inclined and a Venturimeter is inserted in the pipe. The diameter of the Venturi at the throat is 15cm. The difference of pressure between inlet and throat of the Venturimeter is measured by a liquid of sp. gr. 0.8 in an inverted U-tube manometer which gives a reading of 40cm. The loss of head between the inlet and throat is 0.3 times the kinetic head of the pipe. Find the discharge of water flowing through the pipe.	12 Marks	L3	CO2	PO1 PO2

UNIT-III

5.		Water flows through a pipe of diameter 300mm with a velocity of 5m/s. If the coefficient of friction is given by $f = 0.015 + 0.08/(Re^{0.3})$ where Re is the Reynolds number, estimate the head lost due to friction for a length of 10m. Take kinematic viscosity of water as 0.01 stoke.	12 Marks	L3	CO3	PO1 PO2
		(OR)				
6.	a)	Explain the terms, hydraulic gradient line and total energy line.	6 Marks	L2	CO3	PO1 PO2
	b)	Determine the rate of flow of water through a pipe of diameter 30cm and length 60m, when one end of the pipe is connected to a tank and the other end is open to the atmosphere. The pipe is horizontal and the height of water in the tank is 5m above the centre of the pipe. Consider minor losses and take f = 0.009.	6 Marks	L3	CO3	PO1 PO2

UNIT-IV

7.		A 50mm diameter jet having a velocity 25 m/s strikes a flat plate, the normal of which is inclined at an angle 30º to the axis of the jet. Calculate the normal force exerted on the plate i) when plate is stationary and ii) when plate is moving with a velocity 10 m/s in the direction of the jet. Also, find the work done and efficiency of the jet when plate is moving.	12 Marks	L3	CO4	PO1 PO2
		(OR)				
8.		Discuss the following terms in detail with their equations as they are applied to hydro-electric power plant based on impulse/reaction turbine: i) gross head, ii) net head, iii) overall efficiency, iv) volumetric efficiency, v) hydraulic efficiency and vi) mechanical efficiency.	12 Marks	L2	CO4	PO1

UNIT-V

9.		Explain the principle and working of a centrifugal pump with neat sketch.	12 Marks	L2	CO5	PO1 PO2
		(OR)				
10.		A double acting reciprocating pump, running at 50 r.p.m. is discharging 900 litres of water per minute. The pump has stroke of 400 mm. The diameter of piston is 250 mm. The delivery and suction head are 25 m and 4 m respectively. Find the slip of the pump and power required to drive the pump.	12 Marks	L3	CO5	PO1 PO2

METAL CUTTING AND MACHINE TOOLS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Define machining and write the principle of machining.	6 Marks	L1	CO1	PO1
	b)	Define cutting parameters with appropriate units.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Differentiate among ASA, ORS and NRS systems.	6 Marks	L2	CO1	PO1
	b)	What are the essential requirements of tool materials?	6 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Differentiate between Orthogonal and Oblique cutting.	6 Marks	L2	CO2	PO1
	b)	Explain the velocity polygon in machining.	6 Marks	L3	CO2	PO1
		(OR)				
4.		In orthogonal cutting of a material the feed force is 80kgf and cutting force is 150kgf. Given the chip thickness ratio as 0.3 and rake angle as 8^0. Calculate: i) Compressive and shear force on shear plane. ii) Coefficient of friction of the chip on the tool face.	12Marks	L4	CO2	PO2
		UNIT-III				
5.	a)	Classify the lathes.	6 Marks	L1	CO3	PO1
	b)	Explain taper turning by tail stock set over method with a neat diagram.	6 Marks	L1	CO3	PO1
		(OR)				
6.	a)	Explain any four tool holding devices.	6 Marks	L1	CO3	PO1
	b)	Describe a single spindle bar automatic lathe in detail.	6 Marks	L1	CO3	PO1
		UNIT-IV				
7.	a)	How slotting machine is specified and write the main parts of a slotting machine?	6 Marks	L1	CO4	PO1
	b)	Compare shaper and planer.	6 Marks	L2	CO4	PO1
		(OR)				
8.	a)	What are the specifications of Drilling machine?	6 Marks	L1	CO4	PO1
	b)	Explain jig boring machine.	6 Marks	L1	CO4	PO1
		UNIT-V				
9.	a)	Write a short note on rotary table type surface grinder.	6 Marks	L1	CO5	PO1
	b)	Explain truing and dressing of grinding wheels.	6 Marks	L1	CO5	PO1
		(OR)				
10.	a)	Classify milling machines.	6 Marks	L1	CO6	PO1
	b)	Write a short note on the following milling operations. i) End milling. ii) Profile milling. iii) Gang milling.	6 Marks	L2	CO6	PO1

THERMAL ENGINEERING-I

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What is the difference between air standard cycle approximation, fuel-air cycle approximation and real cycle performance?	6 Marks	L1	CO1	PO1
	b)	What type engine is used for the two wheeler (Bajaj Pulsur)? Explain its working in detail.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Describe the different phases of combustion phenomenon in SI engines with suitable sketches.	6 Marks	L1	CO1	PO1
	b)	CI engines will accept the lean mixtures. Justify the statement.	6 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Find the engine dimensions of a 2-cylinder, 2-stroke I.C. engine from the following data: Engine speed= 4000 r.p.m, Volume efficiency = 0.77, Mechanical efficiency = 0.75, Fuel consumption = 10 Lit/hr S = 0.73, Air fuel ratio = 18:1, Page 3 of 3 Piston speed = 100 m/s, Indicated mean effective pressure = 5 bar. Find also brake power. Take R of gas mixture as 281 J/Kg k at S.T.P.	6 Marks	L3	CO1	PO1 PO2 PO3
	b)	Explain procedure to conduct Morse Test in your laboratory.	6 Marks	L1	CO1	PO1
		(OR)				
4.	a)	State the advantages and disadvantages of Methanol as alternative fuel for IC engine.	6 Marks	L1	CO1	PO1
	b)	A four stroke gas engine has a cylinder diameter of 25cm and stroke 45cm. The effective diameter of the brake is 1.6m. The observations made in a test of the engine were as follows: Duration of test = 40 min; Total number of revolutions = 8080; Total number of explosions = 3230; Net load on the brake = 90 kg; Mean effective pressure = 5.8 bar; Volume of gas used = 7.5m^3; Pressure of gas indicated in meter = 136mm; Water of gauge Atmospheric temperature = 170C; Page 3 of 3; Calorific value of gas = 19 MJ/m^3 at NTP Rise in temperature of jacket cooling water = 450C; Cooling water supplied = 180 kg. Draw up a heat balance sheet and estimate the indicated thermal efficiency and brake thermal efficiency. Assume atmospheric pressure as 760mm of Hg.	6 Marks	L3	CO1	PO1 PO2 PO3
		UNIT-III				
5.	a)	In a constant pressure open cycle gas turbine air enters at 1 bar and 20^{0}C and leaves the compressor at 5 bar. Using the following data: temperature of the gases entering the turbine = 680^{0}C, pressure loss in the combustion chamber = 0.1 bar, $\eta_{compressor}$ = 85%, $\eta_{turbine}$ = 80%, $\eta_{combustion}$ = 85%, γ =1.4, C_p=1.024kJ/kg K for air and gas. Find: i) The quality of air circulation if the plant develops 1065kW. ii) Heat supplied per kg of circulation. iii) Thermal efficiency of the cycle. Mass of fuel may be neglected.	6 Marks	L3	CO2	PO1 PO2 PO3
	b)	Discuss the differences between open cycle and closed cycle gas	6 Marks	L1	CO2	PO1

turbines.

(OR)

6.	a)	Explain the principle of operation of a turbojet engine and state its advantages and disadvantages.	6 Marks	L1	CO2	PO1
	b)	What are the types of rocket engines?	6 Marks	L1	CO2	PO1

UNIT-IV

7.	a)	In an axial flow compressor, the overall stagnation pressure ratio achieved is 4 with overall stagnation isentropic efficiency 85%. The inlet stagnation pressure and temperature are 1 bar and 300K. The mean blade speed is 180m/s. The degree of reaction is 0.5 at the mean radius with relative air angles of 120 and 320 at the rotor inlet and outlet respectively. The work done factor is 0.9. Calculate: i) Stagnation polytropic efficiency. ii) Number of stages. iii) Inlet temperature and pressure. iv) Blade height in the first stage if the hub-tip ratio is 0.42, mass flow rate 19.5 kg/s.	6 Marks	L3	CO3	PO1 PO2 PO3
	b)	Compare the centrifugal and axial flow compressors.	6 Marks	L2	CO3	PO1

(OR)

8.	a)	Explain in detail about saving of work in reciprocating compressors.	6 Marks	L1	CO3	PO1
	b)	A centrifugal compressor receives air at the rate of 1400m 3/min at 100 kPa and 350 C and delivers at 350 kPa. It has an isentropic efficiency of 82%. Mechanical losses amount to 2.5% of the shaft power. Determine the power required and exit air temperature.	6 Marks	L3	CO3	PO1 PO2 PO3

UNIT-V

9.	a)	Thermodynamically analyze Rankine cycle.	6 Marks	L1	CO4	PO1
	b)	Analyze the effect of operating conditions on Rankine cycle efficiency.	6 Marks	L1	CO4	PO1

(OR)

10.	a)	Explain the concept of mean temperature of heat addition in Rankine cycle.	6 Marks	L1	CO4	PO1
	b)	How the efficiency and work done of the rankine cycle changes with Regeneration.	6 Marks	L1	CO4	PO1

ANALOG COMMUNICATIONS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Obtain a relationship between carrier and side band powers in an SSBSC wave and explain how power distribution takes place in SSB SC system.	6 Marks	L2	CO1	PO2
	b)	The peak amplitude of an amplitude modulated signal varies from 2V to 10V. Determine the modulation index, carrier power and sideband power.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Derive an expression for AM wave and sketch its frequency spectrum.	6 Marks	L2	CO1	PO1
	b)	A carrier signal $c(t)= 10\cos[2\pi 10^6 t]$ is modulated by a message signal having spectral components 5KHz, 10KHz and 20KHz. The corresponding modulation indexes (μ) are 0.4, 0.5 and 0.6 respectively. Sketch the spectrum and determine bandwidth and power of the signal.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Define angle modulation and illustrate the frequency spectrum of narrow band FM with neat diagram.	6 Marks	L1	CO1	PO2
	b)	An FM signal is represented in time domain as $s(t)=10\cos[2\pi 10^6 t+5\sin 8\pi 10^3 t]$. Determine the modulation index, power and band width.	6 Marks	L2	CO1	PO2
		(OR)				
4.	a)	Illustrate the working principal of PLL demodulator with neat diagram.	6 Marks	L2	CO1	PO2
	b)	A 100 MHz carrier is frequency modulated by a sinusoidal signal of amplitude of 20V and frequency of 100KHz. The frequency sensitivity of the modulator is 25KHz. Determine the modulation index and bandwidth of the signal.	6 Marks	L2	CO1	PO2

UNIT-III

5.	a)	Interpret the figure of merit (FOM) of AM, DSBSC, SSC and VSB.	6 Marks	L2	CO2	PO2
	b)	Derive the expression of S/N for coherent AM receiver.	6 Marks	L3	CO2	PO2
		(OR)				
6.	a)	Define white noise and explain its effect when it passes through a band pass filter.	6 Marks	L3	CO2	PO2
	b)	Derive the value of FOM of SSB receiver.	6 Marks	L3	CO2	PO1

UNIT-IV

7.	a)	Draw the block diagram of Super heterodyne receiver and Explain the function of each block in detail.	6 Marks	L2	CO3	PO2
	b)	A Super heterodyne receiver having no RF amplifier and tuned to 1000KHz. The intermediate frequency is 455KHz. The Q value of the tuned circuit is 100. Determine the image frequency and image rejection ratio.	6 Marks	L2	CO3	PO2
		(OR)				
8.	a)	List out the different Classification of Transmitters and explain any one type in detail.	6 Marks	L1	CO3	PO1
	b)	Explain automatic gain control (AGC). What are merits of delayed AGC over simple AGC?	6 Marks	L2	CO3	PO2

UNIT-V

9.	a)	Interpret how a Pulse Position Modulation (PPM) signal can be generated from Pulse Width Modulation (PWM) signal along with circuit diagram.	6 Marks	L3	CO4	PO2
	b)	Illustrate the working principle of Time Division Multiplexing with neat diagram.	6 Marks	L2	CO4	PO2
		(OR)				
10.	a)	Describe the synchronization procedure for PAM, PWM and PPM signals in detail.	6 Marks	L2	CO4	PO2
	b)	Illustrate the generation of PPM signals, with a neat circuit diagram and wave forms.	6 Marks	L2	CO4	PO2

ELECTRONIC CIRCUIT ANALYSIS AND DESIGN

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the need for cascading.	4 Marks	L2	CO1	PO1
	b)	Design RC coupled amplifier and explain the frequency response of it.	8 Marks	L3	CO4	PO1
		(OR)				
2.	a)	Develop the expressions for input impedance, output impedance and voltage gain of common drain MOSFET amplifier.	8 Marks	L4	CO1	PO3
	b)	Explain about different coupling schemes used in amplifiers.	4 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Determine high-frequency parameters in terms of low-frequency parameters.	6 Marks	L2	CO2	PO1
	b)	At I_C=1mA and V_{CE}=10V, a certain transistor data shows Cc=$C_{b'c}$=3pF, h_{fe}=200 and ω_T=500M rad/sec. Calculate g_m, $r_{b'e}$, C_e=$C_{b'e}$ and ω_β.	6 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Derive an expression for gain bandwidth product for voltage and current of a single stage common emitter amplifier. (Use approximate analysis).	6 Marks	L3	CO2	PO3
	b)	A single stage CE amplifier has upper 3dB frequency of voltage gain, f_H=4MHz with a load resistance R_L=600Ω. If the transistor parameters are g_m=50mA/V, h_{fe}=100, $r_{bb'}$=100Ω, C_c=3pF and f_T=300MHz, calculate the value of source resistance which will result in the required value of f_H and the midband gain with above value of R_s.	6 Marks	L4	CO2	PO2
		UNIT-III				
5.	a)	Discuss the characteristics and advantages of negative feedback amplifier.	6 Marks	L4	CO3	PO1
	b)	With a neat block diagram, explain current series feedback amplifier.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	With necessary diagram, explain different feedback configurations.	8 Marks	L2	CO3	PO1
	b)	An amplifier has gain A=1000 and bandwidth of 200kHz. Calculate the gain and bandwidth with feedback if feedback factor β=20%.	4 Marks	L3	CO3	PO2
		UNIT-IV				
7.	a)	Classify oscillators based on different considerations.	4 Marks	L2	CO4	PO1
	b)	Explain the working principle of Wien Bridge Oscillator and derive the expression for frequency of oscillation.	8 Marks	L3	CO3	PO2

(OR)

8.	a)	Draw the circuit diagram and derive the expression for the frequency of oscillation and condition for sustained oscillations of Colpitts oscillator.	6 Marks	L3	CO3	PO2
	b)	In a Hartley oscillator, L_1=20μH, L_2=2mH and C is variable. Find the range of C if frequency is to be varied from 1MHz to 2.5MHz. Neglect mutual inductance.	6 Marks	L4	CO3	PO2

UNIT-V

9.	a)	Discuss the classification of power amplifiers.	6 Marks	L2	CO3	PO1
	b)	Derive the expression for efficiency of class C power amplifier.	6 Marks	L3	CO4	PO2

(OR)

10.	a)	With neat sketches, explain transformer coupled power amplifier.	8 Marks	L3	CO4	PO1
	b)	Compare push pull and complementary symmetry Class B amplifier.	4 Marks	L2	CO4	PO2

LINEAR AND DIGITAL IC APPLICATIONS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Draw the IC 741 op-amp pin diagram and explain the function of each pin in detail.	6 Marks	L2	CO1	PO1
	b)	Draw the circuit diagram of a practical log amplifier and obtain an expression for its output voltage.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Design monostable multivibrator using 555 timer to produce a pulse width of 200 m sec.	6 Marks	L3	CO1	PO4
	b)	Design a symmetrical square wave generator with 3KHz frequency and 5V peak value using 555 timer IC. Assume necessary data.	6 Marks	L3	CO1	PO3
		UNIT-II				
3.	a)	Explain in detail with a neat circuit diagram the operation of 3-bit parallel ADC.	6 Marks	L2	CO3	PO2
	b)	List out the merits and demerits of Dual slope and flash type A-D converters.	6 Marks	L4	CO3	PO1
		(OR)				
4.	a)	Draw a circuit for first order high pass filter and also derive an expression for lower cut off frequency.	6 Marks	L2	CO2	PO2
	b)	Design a second order butter worth low pass filter having an upper cut off frequency of 4 KHz.	6 Marks	L3	CO2	PO4
		UNIT-III				
5.	a)	Write a Gate level hierarchical program for 4 bit full adder.	6 Marks	L4	CO4	PO2
	b)	Describe the following terms in the language of Verilog. i) Service primitives. ii) Subroutines.	6 Marks	L2	CO4	PO1
		(OR)				
6.	a)	Write a data flow description for 2 to 4 line encoder.	6 Marks	L4	CO4	PO2
	b)	List out the differences between VHDL and Verilog.	6 Marks	L4	CO4	PO1
		UNIT-IV				
7.	a)	Draw and explain the block diagram of n-bit parallel binary adder/subtractor.	6 Marks	L2	CO5	PO1
	b)	Explain about Comparator and design a 8-bit comparator using 74 x 85. Write Verilog program.	6 Marks	L3	CO5	PO2
		(OR)				
8.	a)	Implement the 16 input to 4 output priority encoder using 74 x 148.	6 Marks	L3	CO5	PO3
	b)	Design 16 x 1 multiplexer using 4 x 1 multiplexer.	6 Marks	L3	CO5	PO3
		UNIT-V				
9.	a)	Design a synchronous counter using 74XX ICs and explain its working with neat timing waveforms.	6 Marks	L3	CO5	PO3
	b)	Design and Implement universal shift register using 74 x 194 IC.	6 Marks	L3	CO5	PO3
		(OR)				
10.	a)	Design and Implement up/down counter using 74 x 169 IC.	6 Marks	L3	CO5	PO3
	b)	Design and Implement Excess 3 decimal Counter using 74 x 163 IC.	6 Marks	L3	CO5	PO3

PROBABILITY AND STOCHASTIC PROCESSES

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define the terms outcome, event, sample space, mutually exclusive events. Consider the experiment of rolling of two fair dice simultaneously and represent its sample space. Also give examples of terms mentioned above related to this experiment	6 Marks	L2	CO1	PO1
	b)	A box of 30 diodes is known to contain 5 defective ones. If two diodes are slaved at random without replacement, what is the probability that at least one of these diodes is defective?	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Discuss about Total Probability and Baye's theorem with detailed explanation	6 Marks	L2	CO1	PO1
	b)	Letter is known to have come either from LONDON or CLIFTON. On the post card only two consecutive letters as 'ON' are legible what is the chance that it came from LONDON.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Sketch the Distribution and density function and also mention the applications of Uniform Distribution.	6 Marks	L3	CO2	PO1
	b)	Find a constant b>0 so that the function.	6 Marks	L2	CO2	PO2

$$f_X(x) = \frac{1}{10} e^{3x,} \quad 0 \le x \le b$$

$$= 0, \quad elsewhere$$

is a valid PDF.

(OR)

4.	a)	Explain the Rayleigh distribution and density functions.	6 Marks	L2	CO2	PO1
	b)	A random variable has pdf.	6 Marks	L3	CO2	PO2

$$f_X(x) = \frac{5}{4}\left(1 - x^4\right) \quad 0 \le x \le 1$$

$$= 0, \quad elsewhere$$

Find E [4x+2] and E[x^2]

UNIT-III

5.	a)	Distinguish between the Joint probability and conditional probability. Give an example each.	6 Marks	L2	CO2	PO1
	b)	Two Random Variables X and Y have a joint probability density function.	6 Marks	L3	CO2	PO2

$$f_{XY}(x,y) = \begin{cases} \frac{5}{16} x^2 y & 0 < y < x < 2 \\ 0 & elsewhere \end{cases}$$

i) Find the Marginal density function of X and Y.
ii) Are X and Y statistically independent

(OR)

6.	a)	Given the transformation y = cos x where x be a uniformly distributed random variable in the interval $(-\pi, \pi)$. Find $f_y(y)$ and E[y].	6 Marks	L3	CO2	PO2
	b)	Two statistically independent random variables X and Y have mean values E[X] = 2 and E[Y] = 4. They have second moments $E[X^2] = 8$ and $E[Y^2] = 25$. Find Variance of W = 3X-Y.	6 Marks	L3	CO2	PO2

UNIT-IV

7.	a)	Define and explain stationarity of a random process X(t) and its types.	6 Marks	L2	CO3	PO1
	b)	Consider a random process X(t)=Cos(wt+ θ) where 'w' is real constant and θ is a uniform variable in $(0, \pi/2)$. Show that X(t) is not a WSS process. Also find the average power in the process.	6 Marks	L2	CO3	PO2

(OR)

8.	a)	Define power density spectrum and explain its properties.	6 Marks	L2	CO3	PO1
	b)	Given a cross power spectrum given by $S_{XX}(\omega) = \frac{8}{(a + j\omega)^3}$ *where* $a > 0$ is a constant. Find the cross correlation function	6 Marks	L3	CO3	PO2

UNIT-V

9.	a)	Give the Noise classification. Explain any three types of noises.	6 Marks	L2	CO4	PO1
	b)	For an amplifier operating at a temperature of 20^0 centigrade with a bandwidth of 10 kHz, determine the thermal noise in dB. If the load resistance is 220Ω, calculate the r.m.s voltage	6 Marks	L2	CO4	PO2

(OR)

10.	a)	Explain the terms: Noise Factor, Noise Figure and Equivalent Noise Temperature.	6 Marks	L2	CO4	PO1
	b)	If white noise with power density 6×10^{-3}W/Hz is applied to the input, find the noise power in the system's output.	6 Marks	L3	CO4	PO2

ANALOG ELECTRONICS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss briefly Cascode amplifier.	6 Marks	L1	CO1	PO6
	b)	Derive the expression for voltage gain of a two-stage RC coupled CE amplifier at mid frequency range.	6 Marks	L2	CO1	PO4
		(OR)				
2.	a)	Explain the different coupling schemes used in amplifiers.	6 Marks	L1	CO1	PO6
	b)	Discuss different parameters in Hybrid-Pi (π)-Common Emitter model.	6 Marks	L2	CO1	PO2

UNIT-II

3.	a)	What is the concept of negative feedback and draw the schematic diagrams of four basic negative feedback configurations?	6 Marks	L2	CO2	PO3
	b)	An amplifier has a midband gain of 125 and a bandwidth of 250KHz. If 4% negative feedback is introduced, find the new bandwidth and gain.	6 Marks	L3	CO2	PO1
		(OR)				
4.	a)	What are the advantages and disadvantages of the introduction of negative feedback in amplifiers? Explain.	6 Marks	L2	CO2	PO4
	b)	A voltage series negative feedback amplifier has a voltage gain without feedback of A=500, input resistance R_i = 3 kΩ, output resistance R_o = 20 kΩ and feedback ratio β = 0.01. Calculate the voltage gain Af, input resistance Rif and output resistance Rof of the amplifier with feedback.	6 Marks	L3	CO2	PO1

UNIT-III

5.	a)	What are the factors that affect the frequency stability of an oscillator? How frequency stability can be improved in oscillators?	6 Marks	L2	CO2	PO5
	b)	Draw the circuit diagram of Colpitt's Oscillator and explain its principle of operation.	6 Marks	L2	CO2	PO3
		(OR)				
6.	a)	Explain the principle of operation of the wein bridge oscillator.	6 Marks	L2	CO2	PO4
	b)	In a Colpitts oscillator, if C_1=0.2μF, C_2=0.02μF. If the frequency of oscillator is 10kHz, find the value of the inductor. Also find the required gain for oscillations.	6 Marks	L3	CO2	PO2

UNIT-IV

7.	a)	What is harmonics distortion in power amplifier? Discuss the operation of a class B power amplifier and derive its maximum power conversion efficiency.	6 Marks	L2	CO3	PO2
	b)	The loudspeaker of 8Ω is connected to the secondary of the output transformer of a class A amplifier circuit. The quiescent collector current is 140mA the turns ratio of the transformer is 3:1. The collector supply voltage is 10V. If a.c power delivered to the loudspeaker is 0.48W, assuming ideal transformer, calculate i) A.C power delivered across primary ii) RMS value of load voltage iii) RMS value of primary voltage iv) RMS value of	6 Marks	L3	CO3	PO1

load current v) RMS value of primary current vi) efficiency.

(OR)

8.	a)	What is a power amplifier and are classify them based on class of operation and also compare them.	6 Marks	L1	CO3	PO4
	b)	A class B, push-pull amplifier drives a load of 16Ω, connected to the secondary of the ideal transformer. The supply voltage is 25V. If turns ratio is 200**:**50, Calculate maximum power output, DC power input and efficiency.	6 Marks	L3	CO3	PO3

UNIT-V

9.	a)	With the help of internal circuit diagram, of IC555 explain the operation of a monostable multivibator.	6 Marks	L1	CO4	PO6
	b)	Design a second-order low-pass filter to give a high cut off frequency 1 kHz, a pass band gain of 4.	6 Marks	L3	CO4	PO1

(OR)

10.	a)	Explain the operation of 2nd order high-pass filter along with circuit diagram.	6 Marks	L2	CO4	PO2
	b)	Design an astable multivibrator using 555 timer to generate an output signal with frequency 5kHz and 50% duty cycle.	6 Marks	L3	CO4	PO3

COMPUTER NETWORKS

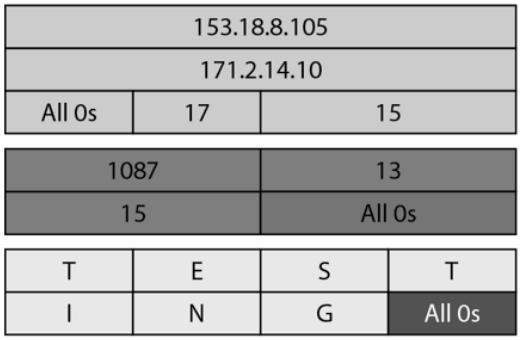
[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		OSI is a layered architecture. List out network support layers and user support layers among the 7 layers in OSI model and explain each layers functionality in detail.	12 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Explain in detail the hardware and network peripherals used in computer networks.	6 Marks	L2	CO1	PO1
	b)	What is the significance of twisting in twisted pair cable? What are the different categories of a twisted pair cables and their features?	6 Marks	L3	CO1	PO1
		UNIT-II				
3.	a)	Explain the selective repeat Sliding Window Protocol with an example.	6 Marks	L4	CO3	PO2
	b)	Compare one dimensional and two-dimensional parity checking with examples.	6 Marks	L4	CO1	PO2
		(OR)				
4.	a)	Define error correction and explain the techniques used to correct the errors.	6 Marks	L2	CO1	PO1
	b)	Write the Procedures to translate the IPV4 to IPV6 with reference to header structure.	6 Marks	L4	CO3	PO4
		UNIT-III				
5.	a)	Take a simple graph and analyze the behavior of Distance Vector Routing algorithm. How it suffers with count to infinity problem, how it can be avoided.	6 Marks	L4	CO3	PO2
	b)	Explain the concept of hierarchical routing.	6 Marks	L2	CO5	PO8
		(OR)				
6.	a)	Explain and Infer the Working Principle and Packet format of IPv4.	6 Marks	L4	CO2	PO2
	b)	With neat sketch, explain how Leaky bucket and Token bucket algorithms improve the Quality Of Service.	6 Marks	L3	CO1	PO1
		UNIT-IV				
7.	a)	At Transport layer we use three-way handshaking procedure for connection establishment and connection release. Why 2-way handshaking is not used.	6 Marks	L4	CO3	PO2
	b)	Explain the concept of slow start mechanism to control congestion in TCP.	6 Marks	L3	CO3	PO1
		(OR)				

8.		Calculate the checksum for UDP.	12 Marks	L4	CO3	PO4



UNIT-V

9.		Find the class of each IP address. Give suitable explanation. i) 227.12.14.87 ii) 193.14.56.22 iii) 14.23.120.8 iv) 252.5.15.111 v) 134.11.78.56 vi) 172.18.58.1 vii) 00000000111100001111111100110011 viii) 10000000111100001111111100110011	12 Marks	L3	CO4	PO6

(OR)

10.	a)	Explain the concept of DNS.	6 Marks	L3	CO4	PO6
	b)	Describe the usage of FTP protocol in client-server model and explain FTP data structures.	6 Marks	L2	CO4	PO6

THEORY OF COMPUTATION

[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the following: i) NFA. ii) Extended transition function. iii) Language of NFA.	6 Marks	L2	CO1	PO2
	b)	Prove that a language L is accepted by some DFA if and only if L is accepted by some NFA.	6 Marks	L4	CO2	PO3
		(OR)				
2.	a)	Design a DFA which does not accept set of all strings containing three consecutive zeros.	6 Marks	L3	CO1	PO2
	b)	Consider the following Є-NFA.	6 Marks	L3	CO2	PO2

δ	Є	a	b
→p	{r}	{q}	{p, r}
q	Φ	{p}	Φ
*r	{p, q}	{r}	{p}

i) Compute the □-closure of each state.
ii) Give the set of all strings of length 3 or less accepted by the automaton.
iii) Convert the automaton to a DFA.

UNIT-II

3.	a)	Write regular expressions for the following languages. i) All strings over {0, 1} that do not contain 1101. ii) All strings over {0, 1} that contain 1011. iii) All strings over {a, b} that contain at least 2 a's.	6 Marks	L3	CO2	PO1
	b)	Prove that the set {0n1m / n ≤ m} is not regular language.	6 Marks	L4	CO2	PO2
		(OR)				
4.	a)	Prove that the following regular expressions are equivalent. $L_1 = 1*(011)*(1*(011)*)*$, $L_2 = (1+011)*$	6 Marks	L4	CO2	PO2
	b)	Construct the minimum state equivalent DFA to the DFA given by the following transition table.	6 Marks	L4	CO2	PO2

δ	0	1
→q_1	q_2	q_3
q_2	q_3	q_5
*q_3	q_4	q_3
q_4	q_3	q_5
*q_5	q_2	q_5

UNIT-III

5.		Convert the following CFG into GNF. S→ AB/BC A→ aB/bA/a B→ bB/cC/b C→ c	12 Marks	L4	CO3	PO5

(OR)

6.		Construct the string 0110001 from the grammar S→ AB A→ 0A/1B/0 B→ 1A/0B/1 by using: i) Leftmost derivation. ii) Rightmost derivation.	12 Marks	L4	CO3	PO3

UNIT-IV

7.	a)	Construct a PDA that accepts the language L = $\{a^{2n}b^{n} / n > 0\}$.	6 Marks	L4	CO4	PO2
	b)	Construct a PDA that accepts L = (a, b)* with equal number of a's and b's by the empty stack and final state.	6 Marks	L4	CO4	PO2

(OR)

8.	a)	Construct a PDA that accepts the language generated by the grammar S→asbb/a.	6 Marks	L4	CO4	PO2
	b)	Explain the following PDA acceptance methods. i) From empty stack to final state. ii) From final state to empty stack.	6 Marks	L2	CO4	PO2

UNIT-V

9.	a)	Design a Turing machine for the language L = $\{ a^{n}b^{2n} / n \geq 1\}$.	8 Marks	L3	CO5	PO3
	b)	Explain the representation of Turing machine	4 Marks	L2	CO5	PO3

(OR)

10.	a)	Design a Turing machine for L = $\{0^{n}1^{m}0^{n}1^{m} / n, m \geq 1\}$	8 Marks	L3	CO5	PO3
	b)	Explain briefly undesirability problems about TM.	4 Marks	L2	CO5	PO3

CONTROL SYSTEMS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Derive an expression for the transfer function of an armature controlled DC motor.	6 Marks	L3	CO1	PO1
	b)	Determine the transfer function $\frac{C(s)}{R(s)}$ of the following block diagram using reduction techniques.	6 Marks	L3	CO1	PO5

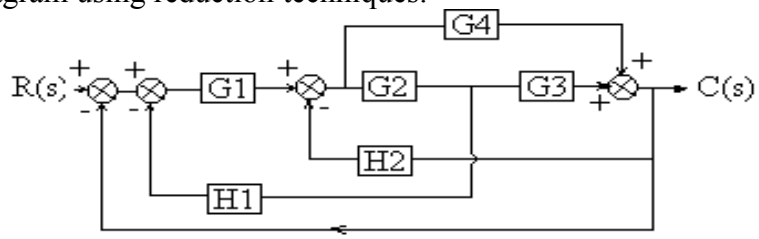

Fig.(1)

(OR)

2.		Determine the transfer function $\frac{X_1(s)}{F(s)}$ for the mechanical system shown in figure and also draw the electrical equivalent network using Force-Current analogy.	12 Marks	L3	CO1	PO2

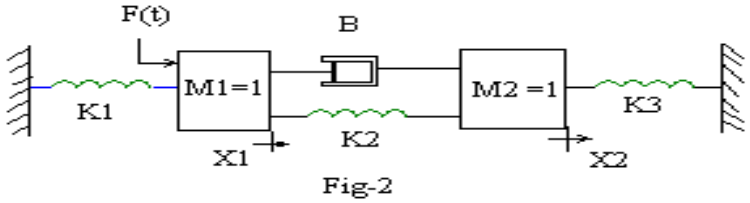

Fig-2

UNIT-II

3.	a)	For the system shown in figure, find the value of "a" such that the damping ratio is 0.5. Determine the rise time, peak time, % of Peak over shoot and settling time in the unit step response	6 Marks	L2	CO2	PO1

	b)	For a system with $G(S)H(S) = \frac{K}{S^2(S+2)(S+3)}$, find the value of K to limit steady state error to 10 when input to system is $1+10t+20t^2$	6 Marks	L4	CO2	PO2

(OR)

4.	a)	What is a PID controller and justify how does it improves the dynamic performance of a control system?	4 Marks	L2	CO2	PO7
	b)	The open-loop transfer function of unity feedback system is $G(S) = \frac{100}{S(S+5)}$. Determine the nature of the closed-loop system for a unit-step input. Also determine rise time, peak time and peak overshoot.	8 Marks	L3	CO2	PO2

UNIT-III

5.	a)	Determine the stability of the system represented by the following characteristic equation using RH criterion. $S^6 + S^5 - 2S^4 - 3S^3 - 7S^2 - 4S - 4 = 0$. If it is unstable find the number of roots of the characteristic equation in the RHS plane	6 Marks	L3	CO3	PO4
	b)	Sketch the root locus for unity feedback system whose open loop transfer function is given below. $$G(s) = \frac{K}{s(s+3)(s+10)}$$	6 Marks	L4	CO3	PO4

(OR)

6.		Find the Gain Margin, Phase Margin and hence closed loop system stability using Bode plot for the given OLTF $G(s)H(s) = \frac{20(1+5s)}{s(1+0.5s)(1+0.05s)(1+50s)}$.	12 Marks	L3	CO3	PO4

UNIT-IV

7.	a)	What is compensation? What are the different types of compensators?	6 Marks	L3	CO4	PO3
	b)	What is lead compensator? Obtain the transfer function of lead compensator and draw the pole-zero plot.	6 Marks	L3	CO4	PO3

(OR)

8.		Design a lead-lag controller for the unity feedback system given $G(S) = \frac{5}{S(S+20)}$ to have a settling time of 0.04s and overshoot of 5% for a step input, and a steady state error of 0.001 for unit ramp input.	12 Marks	L4	CO4	PO3

UNIT-V

9.	a)	Obtain the state space representation of the electrical system shown in figure:	6 Marks	L3	CO5	PO2

	b)	Find the state space representation for the given transfer function $\frac{Y(s)}{U(s)} = \frac{6}{s^3 + 9s^2 + 26s + 24}$	6 Marks	L3	CO5	PO2

(OR)

10.	a)	Find the transfer function for a system represented by state model. $\dot{X} = \begin{bmatrix} -5 & 0 \\ -3 & -1 \end{bmatrix} X(t) + \begin{bmatrix} 1 \\ 1 \end{bmatrix} u(t) \;\&\; y(t) = \begin{bmatrix} 1 & 2 \end{bmatrix} x(t)$	6 Marks	L4	CO5	PO2
	b)	Check the controllability for the system described as. $\dot{X} = X(t)\begin{bmatrix} 0 & 1 & 0 \\ 0 & 0 & 1 \\ 0 & -2 & -3 \end{bmatrix} X(t) + \begin{bmatrix} 0 \\ 0 \\ 1 \end{bmatrix} u(t) \quad and \quad y(t) = \begin{bmatrix} 3 & 4 & 1 \end{bmatrix} x(t)$	6 Marks	L3	CO5	PO2

STRUCTURAL ANALYSIS - II
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

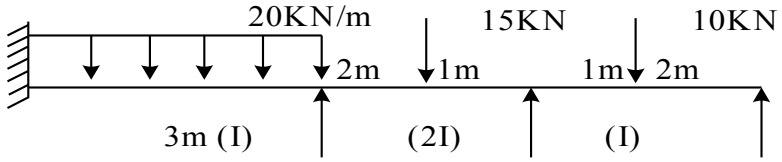
1 Two point load of 150kN and 250kN spaced 3m apart cross a girder of span 15m from left toright with 150kN load leading. Find the values of maximum positive and negative shear force and bending moment at a section D, 6m from left hand support. Also find the absolute maximum bending moment due to given load system. 14 Marks

(OR)

2 Draw the ILD for shear force and bending moment for a section at 5m from the left hand support of a simply supported beam, 20m long in which a UDL rolling load of length 6m and intensity 12 kN/m traverses. Also find the absolute maximum bending moment due to given load system. 14 Marks

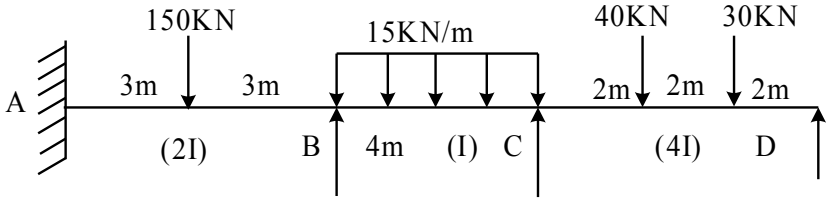
UNIT-II

3 Analyse following continuous beam by slope deflection method and sketch the BMD. 14 Marks



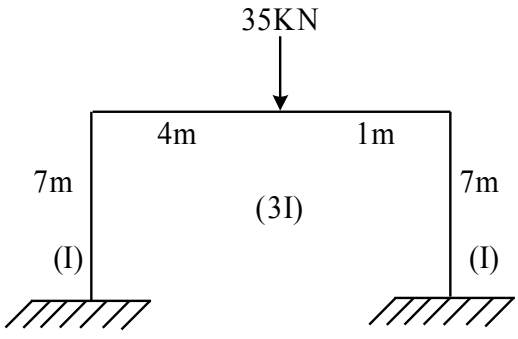
(OR)

4 Analyse the continuous beam shown in figure using moment distribution method of analysis and Sketch the SFD and BMD. Given AB=CD=6m and BC=4m. 14 Marks



UNIT-III

5 Analyse the Portal frame shown in figure by Kani'smethod and sketch the BMD. 14 Marks



(OR)

6 a) Derive the strain energy in linear elastic systems for flexural loading. 7 Marks

b) Calculate the slope at ends of a simply supported beam carrying a UDL **w** per unit length over the whole span. 7 Marks

UNIT-IV

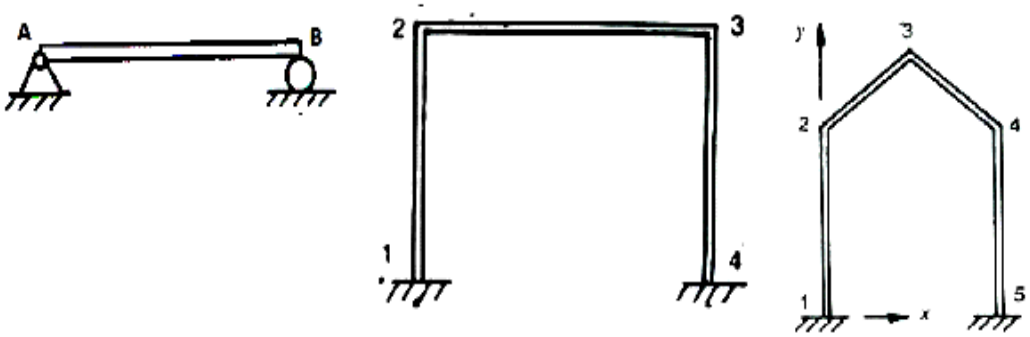
7 What is a Tube structure in tall buildings? Explain the various types of Tube structures in detail using sketches. 14 Marks

(OR)

8 Explain the analysis of a building frame subjected to horizontal forces using Portal method with the help of an example. 14 Marks

UNIT-V

9 Explain static and kinematic redundancy with examples. Determine static and kinematic redundancy for the following structures. 14 Marks



(OR)

10 Analyze the rigid frame shown in figure by direct stiffness matrix method. 14 Marks

SOIL MECHANICS
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe the classification of Coarse grained Soils.	6 Marks
	b)	Obtain the relationship between for the water content, void ratio, specific gravity and degree of saturation.	8 Marks

(OR)

2		A sample of clay taken from a natural stratum was found to be partially saturated and when tested in the laboratory gave the following results. Specific gravity of soil particles is 2.6, wet weight of sample is 250g, dry weight of sample is 210g and volume of sample is 150cm^3. Compute the degree of saturation, water content, porosity and void ratio using phase diagram.	14 Marks

UNIT-II

3	a)	What are the properties of the flow nets?	6 Marks
	b)	A falling head permeability test was carried out on a 12.7cm long sample of silty clay. The diameter of the sample and the stand pipe were10cm and 1.0cm respectively. The water level in the stand pipe was observed to fall from 85cm to 55cm in 17minutes. Determine the co-efficient of permeability of the soil and height of water level in the stand pipe after another 17minutes.	8 Marks

(OR)

4		In a deposit of silt, the water table which was at originally at a depth of 1m below ground level was lowered to 3m below ground level. The silt above water table was capillary-saturated. The saturated unit weight of silt was 20kN/m^3. What is the change in effective pressure at a depth of 0.0m, 1.0m and 3.0m?	14 Marks

UNIT-III

5	a)	Distinguish between Boussinesq's and Westergaard's theory of stress distribution in soils.	6 Marks
	b)	An annular ring footing of external and internal radii of 4m and 2m respectively transmits a pressure of 150kN/m^2. Calculate the vertical stress at a depth of 1.0m and 2.0m below the centre.	8 Marks

(OR)

6	a)	Discuss the effect of compaction on properties of soil	6 Marks
	b)	A soil in the borrow pit is at a dry density of 17kN/m^3 with moisture content of 10%. The soil is excavated from this pit and compacted in an embankment to a dry density of 18 kN/m^3 with a moisture content of 15%. Compute the quantity of soil to be excavated from the borrow pit and the amount of water to be added for 100m^3 of compacted soil in the embankment.	8 Marks

UNIT-IV

7	a)	Differentiate between compaction and consolidation.	6 Marks
	b)	What is pre-consolidation pressure and describe the determination of pre-consolidation pressure.	8 Marks

(OR)

8 A Normally consolidated clay layer 2m thick is sandwiched between two sand layers. The average overburden stress at the middle of clay layer can be taken as 60kN/m^2. Due to construction of a structure there is an increase in effective vertical stress of 40 kN/m^2 at the middle of clay layer. The liquid limit of clay layer is 60% and the initial void ratio is 0.7. Estimate the consolidation settlement. 14 Marks

UNIT-V

9 a) Explain the critical void ratio and pore pressure coefficients, in detail. 6 Marks

b) A cylindrical specimen of saturated soil fails under an axial stress 150 kN/m^2 in an unconfined compression test. The failure plane makes an angle of 52^0 with the horizontal. Calculate the cohesion and angle of internal friction of the soil. 8 Marks

(OR)

10 a) Write the merits and demerits of tri-axial shear test over the direct shear test. 6 Marks

b) The following results were obtained from undrained shear box tests on samples of silty clay: 8 Marks

Normal pressure (kN/m^2)	210	315	420
Shear stress (kN/m^2)	115	142	171

Determine the cohesion and angle of shearing resistance.

CONTROL SYSTEMS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

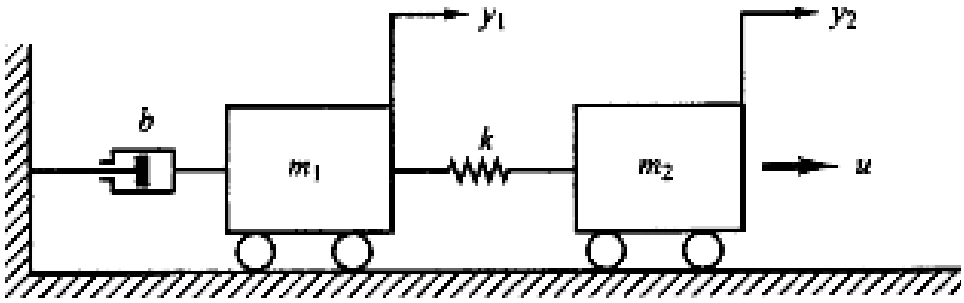
UNIT-I

1 a) What is control system? Explain the components of control system with the help of block diagram. 6 Marks

b) What is block diagram? Explain all the rules used for block diagram reduction method. 8 Marks

(OR)

2 a) Write the differential equations governing the mechanical system shown below. Draw the force Voltage and force current electrical analogous circuits and verify it by using mesh and nodal analysis for the figure shown below and determine its transfer function. 10 Marks



b) Write short notes on synchro transmitter. 4 Marks

UNIT-II

3 a) Obtain the time response for First order system with respect to input test signals 8 Marks

b) Explain about generalized error constants in control systems. 6 Marks

(OR)

4 a) Derive the mathematical expression for delay time, rise time and settling time for the second order system. 7 Marks

b) The overall transfer function of a unity feedback control system is given by $\frac{C(S)}{R(S)} = \frac{10}{S^2 + 6S + 10}$. 7 Marks

Determine the time domain specifications for the given system.

UNIT-III

5 a) Determine the range of values of K for stability of a unity feedback system whose open loop transfer function is $G(s) = \frac{K}{s(s+1)(s+4)}$. 7 Marks

b) Discuss the applications of R-H criterion. 7 Marks

(OR)

6 Draw the complete root locus of the system with $G(s)H(s) = \frac{K(s+0.5)(s+2)}{s(s+1)(s-1)}$, determine the range of K for which system is stable. 14 Marks

UNIT-IV

7 The open loop transfer function of a unity feedback system is given by G(S) = 1/ S(1+S) (1+2S). Sketch the Polar plot and determine the gain margin and phase margin. 14 Marks

(OR)

8 Sketch the Bode plot and hence find Gain cross over frequency, Phase cross over frequency, gain margin and phase margin for the given system, **G(S) = 0.75(1+0.2S)/ S(1+0.5S) (1+0.1S)** 14 Marks

UNIT-V

9 a) Construct state model for the fallowing differential equation **$3y_4+5y_3+6y_2+7y_1+4y_0 = 3u_0$**. 7 Marks

b) Obtain the state variable representation for Armature controlled DC motor. 7 Marks

(OR)

10 a) Derive an expression for the solution of Homogeneous state equations. 7 Marks

b) Determine the State Controllability and Observability of the system using Kalman's test. 7 Marks

$$A = \begin{bmatrix} 0 & 2 & 0 \\ 1 & 2 & 0 \\ -1 & 0 & 1 \end{bmatrix} B = \begin{bmatrix} 0 \\ 1 \\ 1 \end{bmatrix} C = \begin{bmatrix} 1 & 0 & 1 \end{bmatrix}$$

DYNAMICS OF MACHINERY
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) The lengths of crank and connecting rod of a horizontal reciprocating engine are 200mm and 800mm respectively. The crank is rotating at 480 r.p.m. Using Klein's constructions, find the acceleration of the piston. 7 Marks

b) The lengths of crank and connecting rod of a horizontal reciprocating engine are 100mm and 500mm respectively. The crank is rotating at 400 r.p.m. When the crank has turned 30^0 from the inner dead centre, find analytically: 7 Marks

i) Acceleration of the piston. ii) Velocity of the piston.

(OR)

2 a) Explain the procedure to determine the velocity and acceleration of a four-bar mechanism by Klein's construction. 7 Marks

b) What are the Forces on the reciprocating parts of an engine neglecting and considering weight of the connecting rod using Analytical method? 7 Marks

UNIT-II

3 a) Explain the effect of Gyroscopic couple on a Naval ship during pitching. 7 Marks

b) Explain the effect of Gyroscopic couple on Aero plane. 7 Marks

(OR)

4 a) List out the few machines in which flywheel are used. 7 Marks

b) What is the function of a flywheel? How does it differ from that of a governor? 7 Marks
The torque delivered by a two-stroke engine is represented by $t = (1000 + 300 \sin 2\phi - 500 \cos 2\phi)$ N.m, where ϕ is the angle turned by the crank from the inner-dead centre. The engine speed is 250 r.p.m. The mass of the flywheel is 400 kg and radius of gyration is 400 mm. Determine:
(i) The power developed. (ii) The total percentage fluctuation of speed.

UNIT-III

5 With a neat sketch, describe the principle and working of an internal expanding shoe brake. Derive expression for the braking torque 14 Marks

(OR)

6 A multi-plate clutch has three pairs of contact surfaces. The outer and inner radii of the contact surfaces are 150mm and 80mm respectively. The maximum axial spring force is limited to 3 KN and the co-efficient of friction is 0.3. Assuming uniform wear, find the power transmitted by the clutch at 1500 r.p.m. 14 Marks

UNIT-IV

7 a) What is meant by effort and power of a governor? Find the expressions for the same in a porter governor. 7 Marks

b) The following data relate to a Hartnell governor M = 1.5 kg; a = 100 mm; b= 40 mm; r_1 = 70 mm; r_2 =110 mm; N_1 =260 r.p.m; and N_2= 275 r.p.m. The axis of rotation is 80mm form the fulcrum. Calculate the rate of the spring and the equilibrium speed, when the radius of the balls is 80mm. 7 Marks

(OR)

8	a)	Why is balancing necessary for rotors of high speed engines?	7 Marks
	b)	A circular disc mounted on a shaft carries three attached masses 4 kg, 3kg and 2.5 kg at radial distances 75mm, 85mm and 50mm and at the angular positions of 450, 1350 and 2400 respectively. The angular positions are measured counter-clockwise from the reference line along x-axis. Determine the amount of the counter mass at a radial distance of 75mm required for the static balance.	7 Marks

UNIT-V

9	a)	Explain with sketches the different cases of damped vibrations.	7 Marks
	b)	A cantilever shaft 50mm diameter and 300mm long has a disc of mass 100kg at its free end. The Young's modulus for the shaft material is 200GN/m^2. Determine the frequency of longitudinal and transverse vibration of the shaft.	7 Marks

(OR)

10	a)	What do you understand by 'torsionally equivalent shaft'?	7 Marks
	b)	Describe in detail the method of finding the frequency of torsional vibration of a two rotor system.	7 Marks

CODE No.:14BT50305 SVEC-14

DESIGN OF MACHINE ELEMENTS-I
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What are the factors to be considered for the selection of materials for the design of machine elements? Discuss.	7 Marks
	b)	What are preferred numbers? How will you find the numbers belonging to R10 series?	7 Marks
		(OR)	
2	a)	Explain the importance of manufacturing considerations in the design process.	7 Marks
	b)	Define "mechanical properties of an engineering material". State any six mechanical properties and applications of it.	7 Marks

UNIT-II

3	a)	Define stress concentration and also give the sources of stress concentration.	7 Marks
	b)	A rotating bar made of steel 40C8 is subjected to a completely reversed bending stress. The corrected endurance limit of the bar is 315 N/mm² .Calculate the fatigue strength of the bar for a life of 90,000 cycles.	7 Marks
		(OR)	
4		A transmission shaft carries a pulley between two bearings. The bending moment at the pulley varies from 100 N-m to 400 N-m, as the torsional moment in the shaft varies from 50 N-m to 110 N-m. The shaft is made of steel (S_{ut} =540 N/mm², S_{yt}=400 N/mm²). The corrected endurance limit of the shaft is 200 N/mm² .Determine the diameter of the shaft using a factor of safety of 2.	14 Marks

UNIT-III

5	a)	What is meant by the efficiency of the riveted joint?	4 Marks
	b)	Determine the efficiency of a double riveted, chain lap joint used to join 6mm thick plates with 20mm diameter rivets and 60mm pitch. The permissible stresses are 100 MPa in tension, 120 MPa in crushing and 75 MPa in shear.	10 Marks
		(OR)	
6	a)	Discuss various ways in which a riveted joint may fail.	6 Marks
	b)	Two plates of 10mm thick are joined by means of a single riveted, double strap butt joint. The rivet diameter is 20mm and pitch of the rivets is 60mm. The permissible stresses are: σ_t =80 MPa, σ_c = 120 MPa, τ = 60 MPa. Calculate the efficiency of the joint.	8 Marks

UNIT-IV

7	a)	How are the keys classified? Draw neat sketches of different types of keys and state their applications.	7 Marks
	b)	A solid circular shaft is subjected to a bending moment of 3000 N-m and a torque of 10 000 N-m. The shaft is made of 45C8 steel having ultimate tensile stress of 700 MPa and a ultimate shear stress of 500 MPa. Assuming a factor of safety as 6, determine the diameter of the shaft.	7 Marks

(OR)

8	a)	How do you classify shaft couplings?	4 Marks
	b)	Design a muff coupling for a shaft transmitting 30kW at 300 r.p.m. The material adopted for shaft is plain carbon steel (SAE 1040) and muff coupling is grey cast iron (FG 200).The key is also made of plain carbon steel. Design torque on the shaft may be taken as 1.15 times the average torque.	10 Marks

UNIT-V

9	a)	What are the applications of a cotter joints?	4 Marks
	b)	Describe the design procedure of a Knuckle joint.	10 Marks

(OR)

10		Design a knuckle joint to transmit 150 kN. The design stresses may be taken as 75 MPa in tension, 60 MPa in shear and 150 MPa in compression.	14 Marks

ANTENNAS AND PROPAGATION

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Briefly explain the following terms related to antenna: 14 Marks
(i) Antenna apertures. (ii) Radiation resistance.
(iii) Patterns. (iv) Beam width.

(OR)

2 a) Explain about the current distributions of half wave dipole. 6 Marks
b) The maximum radiation intensity of 96% efficiency antenna is 180mW/unit solid angle. Find the directivity and gain (dB), when the: 8 Marks
(i) input power is 125.66 mW. (ii) radiated power is 125.66mW.

UNIT-II

3 a) For a 10-element binomial array with spacing of $\lambda/2$ between the elements. Determine the half power beam width and maximum directivity (dB). 8 Marks
b) Briefly explain the concept of scanning arrays. 6 Marks

(OR)

4 a) Explain binomial array. 8 Marks
b) Distinguish between binomial and uniform linear arrays. 6 Marks

UNIT-III

5 a) What is Yagi-Uda antenna? Explain its construction and properties with special reference to the directivity, bandwidth and impedance. 8 Marks
b) Explain folded diploes and their characteristics. 6 Marks

(OR)

6 a) Discuss the design considerations for monofilar helical antenna in axial mode. 7 Marks
b) With neat diagram, explain the geometry of parabolic reflector. 7 Marks

UNIT-IV

7 Explain the techniques used for measuring the directivity in detail. 14 Marks

(OR)

8 Explain the concept of Zoning and specify the tolerances of zoned and un-zoned nonmetallic dielectric lens antennas. 14 Marks

UNIT-V

9 a) Derive expression for the field strength, due to space wave propagation at a point away from the transmitter. 7 Marks
b) Explain salient features of Sommer field's theory. 7 Marks

(OR)

10 a) Explain the terms wave tilt, virtual height, MUF, Skip distance and critical frequency. 7 Marks
b) Derive an expression for the refractive index of the ionosphere in terms of 'N' and frequency. 7 Marks

PULSE AND DIGITAL CIRCUITS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the operation of parallel RLC circuit and its response to a step input.	7 Marks
	b)	Explain the operation of high-pass RC circuit with different time constants compared to input pulse width. Draw the input and output waveforms.	7 Marks
		(OR)	
2	a)	Explain ringing circuit, and attenuator.	7 Marks
	b)	Explain the application of an attenuator as CRO probe.	7 Marks

UNIT-II

3	a)	Explain the following terms pertaining to transistor switching times. i) Rise time. ii) Delay time. iii) Storage time.	9 Marks
	b)	Explain synchronized clamping.	5 Marks
		(OR)	
4	a)	Explain positive and negative clippers with neat circuit diagrams and waveforms.	7 Marks
	b)	Explain the effects of diode characteristics on clamping voltage.	7 Marks

UNIT-III

5		Draw and explain the circuit of Collector-Coupled Monostable Multivibrator with necessary waveforms and also derive the expression for pulse width.	14 Marks
		(OR)	
6	a)	Discuss in detail about Transistor switching times with relevant diagrams.	6 Marks
	b)	Design a Collector-Coupled Astable multivibrator with frequency 1KHz, h_{FE}= 50, $1c(sat)$ = 5mA, $V_{CE(sat)}$= 0.2, V_{cc}=12. Assume $R_1 = R_2$, $C_1=C_2$.	8 Marks

UNIT-IV

7	a)	Define the following: i) Sweep-speed error. ii) Displacement error. iii) Transmission error.	6 Marks
	b)	Explain the principle and working of a transistor Bootstrap time-base generator.	8 Marks
		(OR)	
8	a)	Briefly explain the concept of pulse synchronization of relaxation devices.	6 Marks
	b)	With the help of circuit diagram and waveforms, explain frequency division by an Astable multivibrator.	8 Marks

UNIT-V

9	a)	With neat diagram, analyze the working of bidirectional sampling gate using two transistors.	6 Marks
	b)	Discuss the applications of Sampling gates.	8 Marks
		(OR)	
10	a)	Draw and explain the circuit of Two-input TTL NAND gate.	6 Marks
	b)	Implement OR and AND gates using diodes and transistors.	8 Marks

LINEAR AND DIGITAL IC APPLICATIONS

[Electrical and Electronics Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Distinguish between practical and ideal op-amp. Draw its equivalent circuit.	7 Marks
	b)	With the help of suitable examples, explain how the Slew Rate affects the frequency response of an op-amp.	7 Marks
		(OR)	
2	a)	Define the following terms: i) Input bias current. ii) Input offset voltage.	4 Marks
	b)	Explain the frequency compensation technique in an op-amp.	10 Marks

UNIT-II

3	a)	Draw the circuit of a typical instrumentation amplifier. Why do we use two-stage op-amp circuit as an instrumentation amplifier? Explain.	8 Marks
	b)	With neat sketches, explain the frequency response of different filters.	6 Marks
		(OR)	
4	a)	Draw the circuit of voltage to current converter and explain its operation.	7 Marks
	b)	Design a differentiator to differentiate an input signal that varies in frequency from 10 Hz to about 1 KHz.	7 Marks

UNIT-III

5	a)	Explain the block diagram of PLL.	7 Marks
	b)	Design a symmetrical square wave generator with a frequency of 5KHz. Draw the circuit and respective waveform.	7 Marks
		(OR)	
6	a)	Define capture-range, lock-range and pull-in time of PLL.	6 Marks
	b)	Design a monostable multivibrator using 555 timer to produce a pulse width of 100ms.	8 Marks

UNIT-IV

7	a)	What do you mean by 5V tolerant inputs?	3 Marks
	b)	Define DC noise margin with reference to TTL gate.	3 Marks
	c)	Draw and explain the circuit diagram of 2-input ECL NOR/OR gate.	8 Marks
		(OR)	
8	a)	Explain the following terms with reference to CMOS logic: i) Logic levels. ii) Power supply rails.	6 Marks
	b)	Briefly explain about CMOS/TTL interfacing.	8 Marks

UNIT-V

9	a)	Explain about Verilog as HDL.	7 Marks
	b)	Write a Verilog code for half-adder using CMOS switches.	7 Marks
		(OR)	
10	a)	Design 8**:**1 Multiplexer using 2**:**1 multiplexer.	7 Marks
	b)	Write a Verilog program for a Mod 10 counter.	7 Marks

SOFTWARE ENGINEERING
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the changing nature of the software.	7 Marks
	b)	Sketch and explain about a software process framework.	7 Marks
		(OR)	
2	a)	Describe scrum process model with neat diagram.	7 Marks
	b)	Explain the prototyping process model with a neat diagram.	7 Marks

UNIT-II

3	a)	What are the difficulties in Elicitation?	4 Marks
	b)	Design Interaction model for word processor.	10 Marks
		(OR)	
4	a)	Explain the requirements management principles and procedures.	7 Marks
	b)	What is System Modeling? List out and briefly explain various models.	7 Marks

UNIT-III

5	a)	Explain Re-engineering process model with a neat sketch.	7 Marks
	b)	Define software Architecture. Why is architecture important? Explain.	7 Marks
		(OR)	
6	a)	Explain in-detail about Architectural Patterns.	7 Marks
	b)	Write the steps involved in interface design.	7 Marks

UNIT-IV

7	a)	Define debugging. Explain the process of debugging.	9 Marks
	b)	Write short notes on White box testing technique.	5 Marks
		(OR)	
8	a)	What are the various testing strategies for conventional software?	9 Marks
	b)	Differentiate between verification and validation.	5 Marks

UNIT-V

9	a)	Compare and contrast reactive and proactive risk strategies.	7 Marks
	b)	Briefly write about software Reliability.	7 Marks
		(OR)	
10	a)	Write short notes on RMMM.	7 Marks
	b)	Define Quality and write about quality concepts.	7 Marks

PROFESSIONAL ETHICS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Briefly explain the general types of enquiries involved in engineering inspection.	6 Marks
	b)	What is meant by professional conscience and right of conscientious refusal?	8 Marks
		(OR)	
2	a)	Why is it important to study the subject of professional ethics?	6 Marks
	b)	How did Gilligum view the three levels of moral development initiated by Kholbuerg?	8 Marks

UNIT-II

3	a)	Mention the different types of ethical theories. What are its uses?	8 Marks
	b)	Explain in detail about role of law of Engineering.	6 Marks
		(OR)	
4	a)	Write short notes on theories of right action.	6 Marks
	b)	Explain in detail the qualities of professional practitioners.	8 Marks

UNIT-III

5	a)	What are the issues involved in maintenance?	6 Marks
	b)	Explain the concept of interest with examples from consulting Engineers.	8 Marks
		(OR)	
6	a)	What is the importance of industrial standard?	6 Marks
	b)	How do the different ways and means of the "code of ethics" help the Engineers?	8 Marks

UNIT-IV

7	a)	List the rights conferred on citizen in the constitution.	6 Marks
	b)	Explain the concept of whistle blowing and the conditions expected for whistle blowing.	8 Marks
		(OR)	
8	a)	Explain the respect for authority in detail.	6 Marks
	b)	List the advantages and limitations of collective bargaining.	8 Marks

UNIT-V

9	a)	"Engineers shine better as managers". Discuss.	6 Marks
	b)	What is known as technology transfer? Why is it so critical in defence / aerospace industries?	8 Marks
		(OR)	
10	a)	"Engineers in weapon development" - Discuss	8 Marks
	b)	Describe the ethics related to multinational corporations.	6 Marks

SOIL MECHANICS
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe different types of soil structure.	5 Marks
	b)	A partially saturated soil sample has a volume of $6 \times 10^{-5} m^3$ and weighs 1N. The sample is dried in the oven and its dry weight is found to be 0.78N. The specific gravity of solid particles is 2.65. Determine degree of saturation.	9 Marks

(OR)

2	a)	Differentiate between the submerged unit weight and saturated unit weight.	5 Marks
	b)	Describe I.S classification of soils.	9 Marks

UNIT-II

3	a)	What are the properties of the flow nets?	6 Marks
	b)	A falling head permeability test was carried out on a 12.7cm long sample of silty clay. The diameter of the sample and the stand pipe were10cm and 1.0cm respectively. The water level in the stand pipe was observed to fall from 85cm to 55cm in 17minutes. Determine the co-efficient of permeability of the soil and height of water level in the stand pipe after another 17minutes.	8 Marks

(OR)

4		In a deposit of silt, the water table which was at originally at a depth of 1m below ground level was lowered to 3m below ground level. The silt above water table was capillary-saturated. The saturated unit weight of silt was $20kN/m^3$. What is the change in effective pressure at a depth of 0.0m, 1.0m and 3.0m?	14 Marks

UNIT-III

5	a)	State the assumptions of Boussinesq's theory of stress distribution in soils.	4 Marks
	b)	Derive an expression for a vertical stress below the centre of circular area supporting a uniformly distributed load at the surface. Use bousinesq's theory.	10 Marks

(OR)

6	a)	What is compaction curve and describe zero-air void curve with a sketch.	6 Marks
	b)	Explain how field control of compaction soil is achieved. Describe at least one example in each case.	8 Marks

UNIT-IV

7		Explain briefly Terzaghi's theory of one dimensional consolidation and derive its equation.	14 Marks

(OR)

8	a)	Define: i) Preconsolidation pressure. ii) Compression index. iii) Degree of saturation. iv) Coefficient of consolidation.	6 Marks
	b)	The liquid limit of a normally consolidated clay sample is 58%. At a stress of $100kN/m^2$, the void ratio is 1.05. Calculate the void ratio if the stress is increased to $200kN/m^2$. If the clay year thickness is 5m, what is the total settlement?	8 Marks

UNIT-V

9	a)	Explain the critical void ratio and pore pressure coefficients in detail.	6 Marks
	b)	A cylindrical specimen of saturated soil fails under an axial stress 150kN/m^2 in an unconfined compression test. The failure plane makes an angle of 52^0 with the horizontal. Calculate the cohesion and angle of internal friction of the soil.	8 Marks

(OR)

10	a)	State the advantages and limitations of direct shear test.	8 Marks
	b)	Describe pore pressure parameters. State its importance in shear strength of soils.	6 Marks

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

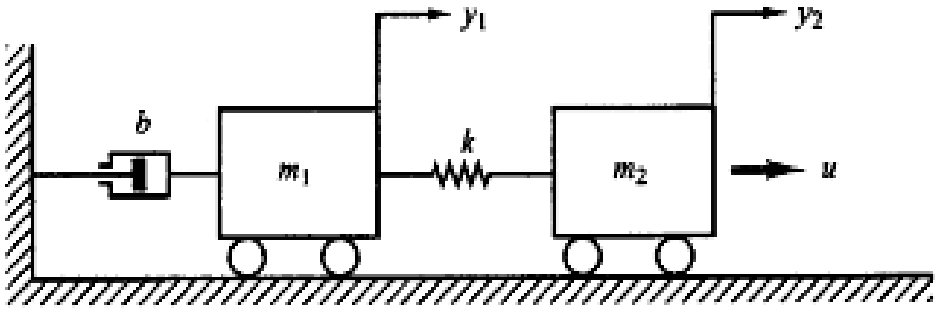
UNIT-I

1 a) What is control system? Explain the components of control system with the help of block diagram. 6 Marks

b) What is block diagram? Explain all the rules used for block diagram reduction method. 8 Marks

(OR)

2 a) Write the differential equations governing the mechanical system shown below. Draw the force Voltage and force current electrical analogous circuits and verify it by using mesh and nodal analysis for the figure shown below and determine its transfer function. 10 Marks



b) Write short notes on synchro transmitter. 4 Marks

UNIT-II

3 a) Find K_p, K_v and K_a for the open-loop transfer function of a unity feedback system given by $G(s) = \frac{10}{s(0.1s + 1)}$ 4 Marks

b) Derive the expressions for time domain specifications t_r, t_p, max peak overshoot for under damped second order system with unit step input. 10 Marks

(OR)

4 a) Obtain the time response for First order system with respect to input test signals 8 Marks

b) Explain about generalized error constants in control systems. 6 Marks

UNIT-III

5 A unity feedback system has an open loop transfer function 14 Marks

$$G(s)H(s) = \frac{K}{s(s+3)(s^2+2s+2)}$$

Sketch the root locus as 'K' varies from 0 to ∞.

(OR)

6 a) Sketch the root locus plot of a unity feedback system with an open loop transfer function $G(s) = \frac{K}{s(s+2)(s+4)}$. 8 Marks

b) Discuss the effect of addition of poles and zeros to the open loop transfer function. 6 Marks

UNIT-IV

7 a) The open loop transfer function of a unity feedback control system is given below $G(s) = \frac{50}{S(S+5)}$. Draw the Nyquist plot and comment on the stability of the closed loop system. 8 Marks

b) A second order system has overshoot of 50% and period of oscillation 0.2s in step response. Determine resonant peak, resonant frequency and bandwidth. 6 Marks

(OR)

8 a) Derive expressions for Resonant peak magnitude and resonant frequency. 8 Marks

b) Derive the transfer functions for Lead and Lag compensation networks. 6 Marks

UNIT-V

9 a) Construct state model for the fallowing differential equation $\mathbf{3y_4+5y_3+6y_2+7y_1+4y_0 = 3u_0}$. 7 Marks

b) Obtain the state variable representation for Armature controlled DC motor. 7 Marks

(OR)

10 a) State and explain controllability and observability. 6 Marks

b) The transfer function of a control system is given by $\frac{Y(s)}{U(s)} = \frac{S+2}{S^3+9S^2+26S+24}$. 8 Marks

Check for controllability and observability.

TRANSMISSION OF ELECTRIC POWER

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive an expression for the inductance of a double circuit, 3-Φ line whose conductors are situated at the corners of a regular hexagon.	7 Marks
	b)	A 25000 KVA, 13.8 KV generator has sub transient reactance of 0.2 p.u. and is connected to a transmission line through a transformer rated 30000 KVA, 13.8 Δ - 230 Y KV with reactance as 0.008 p.u. If the base to be used in calculations is 100 MVA, 220 KV for the transmission line, what p.u. values should be used for the transformer and generator reactance?	7 Marks

(OR)

2	a)	Derive an expression for p.u. impedance of a given base MVA and base KV in terms of new base MVA and new base KV.	5 Marks
	b)	The conductors of a 3-Φ line are placed at the corners of an equilateral triangle. The conductor spacing is 3m and each copper conductor has a diameter of 12.5mm. Calculate resistance, series and shunt reactance per meter per phase of the line. The frequency is 50Hz.	9 Marks

UNIT-II

3	a)	A 60Hz, 250km line has an impedance of (33+j104)Ω and admittance of 10^{-3}Ω. The receiving end load is 50MW at 208KV with 0.8pf lag. Find the sending end voltage, current, power and power factor using ABCD constants for a nominal π model.	7 Marks
	b)	A 3-phase, 50Hz transmission line is 250km long. The load is 125MW operating at 220KV upf. Evaluate the incident and reflected voltages at receiving end. R = 0.172 Ω/km, L=2.1mH/km and C=0.01μF/km.	7 Marks

(OR)

4	a)	Derive the ABCD constants for a medium transmission line which can be analyzed using nominal π method.	8 Marks
	b)	Using a nominal π model find the sending end voltage and regulation of a 250km three phase line delivering 50MVA at 0.85p.f lag, 132KV, 50Hz. The conductors are spaced 3m apart equilaterally. The conductor diameter is 1.6cm and resistance is 0.11Ω/km.	6 Marks

UNIT-III

5	a)	Show that a traveling wave moves with a velocity of light on the overhead line.	7 Marks
	b)	A 3-Φ transmission line has conductors 1.5 cm in diameter spaced 1m apart in equilateral formation. The resistance and leakage are negligible. Find the natural impedance of the line.	7 Marks

(OR)

6	a)	Write short notes on Beweley's lattice diagram.	6 Marks
	b)	A surge of 200KV traveling on a line of natural impedance 500Ω arrives at a junction with two lines of impedances 700Ω and 300Ω respectively. Find the surge voltages and currents transmitted into each branch line. Also find the reflected surge voltage and current.	8 Marks

UNIT-IV

7	a)	Discuss the phenomenon of corona and corona loss and indicate the circumstances under which they are likely to occur.	7 Marks
	b)	Calculate the disruptive critical voltage for a 3-Φ overhead line which has three smooth round conductors of 12.7mm diameter arranged in a 3m delta. The barometric pressure is 750mm of mercury and the air temperature is -1^0C. The breakdown strength of air is 21KV rms/cm.	7 Marks

(OR)

8	a)	What are the types of insulators?	4 Marks
	b)	A string of 5 suspension insulators is connected across 100KV line. Calculate the distribution of voltage on the insulator discs if the capacitance of each disc to earth is 0.1 of the capacitance of the insulator. Calculate also the string efficiency.	10 Marks

UNIT-V

9		The towers of height 30mt and 90mt respectively support a transmission line conductor at water crossing. The horizontal distance between the towers is 500m. If the tension in conductor is 1600kg, find minimum clearance of conductor and water, clearance mid-way between supports. Weight of conductor is 1.5kg/m. Bases of the towers can be considered to be at water level.	14 Marks

(OR)

10	a)	Explain about different types of grading of cables.	9 Marks
	b)	Determine the insulation resistance of a single core cable of inside diameter 0.03m, outside diameter 0.075m and length 2km. The resistivity of insulating material being 6×10^{12} Ω-m.	5 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Anantapur)

III B.Tech I Semester (SVEC14) Supplementary Examinations February - 2021

DYNAMICS OF MACHINERY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 The crank and connecting rod of a steam engine are 0.3m and 1.5m in length. The crank rotates at 180 r.p.m. clockwise. Determine the velocity and acceleration of piston when the crank is at 40^0 from the inner dead centre position. Also determine the position of the crank for zero acceleration of the piston. 14 Marks

(OR)

2 A petrol engine with a speed of 3000 r.p.m. has a stroke of 8.75cm. The weight of the connecting rod is 1.75kgf. The length of connecting rod from centre to centre is 17.5cm. The centre of gravity from big end centre is 5.75cm. The radius of gyration about an axis through the center of gravity and perpendicular to the connecting rod is 7.5cm. Find the inertia force of the connecting rod and its direction with the centre line of the connecting rod when the crank makes an angle of 40^0 with I.D.C. Also find inertia torque on the crank shaft. 14 Marks

UNIT-II

3 a) Explain the effect of Gyroscopic couple on a Naval ship during pitching. 7 Marks
b) Explain the effect of Gyroscopic couple on a Aero plane. 7 Marks

(OR)

4 a) List out the few machines in which flywheel are used. 7 Marks
b) What is the function of a flywheel? How does it differ from that of a governor? 7 Marks
The torque delivered by a two-stroke engine is represented by t= (1000 + 300 Sin 2ø-500 Cos 2ø) N.m where ø is the angle turned by the crank from the inner-dead centre. The engine speed is 250 r.p.m. The mass of the flywheel is 400 kg and radius of gyration is 400mm. Determine (i) The power developed (ii) The total percentage fluctuation of speed

UNIT-III

5 1. A cone clutch with one cone angle 20^o is to transmit 7.5kw at 750 r.p.m. The normal intensity of pressure between the contact faces is not to exceed 0.12N/mm^2. The coefficient of friction is 0.2. If face width is 1/5th of mean diameter, find; 14 Marks
   i) The main dimensions of the clutch.
   ii) Axial force required while running.

(OR)

6 A multi-plate clutch has three pairs of contact surfaces. The outer and inner radii of the contact surfaces are 150mm and 80 mm respectively. The maximum axial spring force is limited to 3KN and the co-efficient of friction is 0.3. Assuming uniform wear find the power transmitted by the clutch at 1500 r.p.m. 14 Marks

UNIT-IV

7 The following particulars refer to the Hartnell type of governor. 14 Marks
Weight of each ball = 20 N
Length of bell crank lever arms vertical = 10cm
Length of bell crank lever arms horizontal = 5cm
Distance of fulcrum of each bell crank lever from the axis of rotation= 9cm
Maximum and minimum radii of governor balls are 12cm and 8cm.
The min equilibrium speed is to be 300 r.p.m
The max equilibrium speed is 5% greater than min.
Find the stiffness of the spring and the equilibrium speed when the radius of rotation of the balls is 10cm.

(OR)

8 In a porter governor the upper and lower arms are each 200mm long and are each inclined at 30^0 to the vertical when the sleeve is in its lowest position. The points if suspensions are each 36mm from the axis of the spindle. The mass if each rotating ball is 3kg and the central load on the sleeve is 20kg. If the lift of sleeve is 36mm, find the range of speed of the governor. 14 Marks

UNIT-V

9 A cylinder of mass M and radius R rolls without slipping on a cylindrical surface of radius R. Find the natural frequency for small oscillations about the lowest position. 14 Marks

(OR)

10 a) Explain whirling speed of shaft. 6 Marks
b) Derive the expression for critical speed of shaft with a single disc considering damping. 8 Marks

III B.Tech I Semester (SVEC14) Supplementary Examinations February – 2021

DESIGN OF MACHINE ELEMENTS-I
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the importance of manufacturing considerations in the design process.	7 Marks
	b)	Define "mechanical properties of an engineering material". State any six mechanical properties and applications of it.	7 Marks
		(OR)	
2	a)	What are the steps to be followed while designing a machine element?	7 Marks
	b)	Define the following properties of a material: i) Ductility. ii) Toughness. iii) Hardness. iv) Creep.	7 Marks

UNIT-II

3	a)	What is meant by endurance strength of a material? How do the size and Surface condition of a component and type of load and effect such strength?	4 Marks
	b)	A circular bar of 500mm length is supported freely at its two ends. It is acted upon by a central concentrated cyclic load having a minimum value of 20kN and maximum value of 50kN. Determine the dia of bar by taking a factor of safety of 1.5, size effect of 0.85, surface finish factor of 0.9. The material properties of bar are given by ultimate strength of 650MPa, yield strength of 500MPa and endurance strength of 350MPa.	10 Marks
		(OR)	
4	a)	Formulate Soderberg's equation and state its application to different types of loading.	6 Marks
	b)	A 50mm diameter shaft is made from carbon steel having ultimate tensile strength of 630MPa. It is subjected to a torque which fluctuates between 2000N-m to 800N-m. Using Soderberg method, calculate the factor of safety. Assume suitable values for any other data needed.	8 Marks

UNIT-III

5	a)	Discuss the bolt of uniform strength in detail.	7 Marks
	b)	A steam engine cylinder has an effective diameter of 350mm and the maximum steam pressure acting on the cylinder cover is 1.25N/mm^2. Calculate the number and size of studs required to fix the cylinder cover, assuming the permissible stress in the studs as 33MPa.	7 Marks
		(OR)	
6	a)	Discuss various ways in which a riveted joint may fail.	6 Marks
	b)	Two plates of 10mm thick are joined by means of a single riveted, double strap butt joint. The rivet diameter is 20mm and pitch of the rivets is 60mm. The permissible stresses are: σ_t = 80MPa, σ_c = 120MPa, τ = 60MPa. Calculate the efficiency of the joint.	8 Marks

UNIT-IV

7	a)	Prove that a square key is equally strong is shear and compression	6 Marks
	b)	A standard splined connection 8 x 36 x 40 is used for a gear and shaft assembly rotating at 700 r.p.m. The length of the gear hub is 50mm the normal pressure on the spines is limited to 6.5N/mm^2. Calculate the power that can be transmitted form gear to shaft.	8 Marks

(OR)

8	a)	How do you classify shaft couplings?	4 Marks
	b)	Design a muff coupling for a shaft transmitting 30kW at 300 r.p.m. The material adopted for shaft is plain carbon steel (SAE 1040) and muff coupling is grey cast iron (FG 200). The key is also made of plain carbon steel. Design torque on the shaft may be taken as 1.15 times the average torque.	10 Marks

UNIT-V

9	a)	What are the applications of a cotter joints?	4 Marks
	b)	Describe the design procedure of a Knuckle joint.	10 Marks

(OR)

10	a)	Distinguish between cotter joint and knuckle joint.	4 Marks
	b)	Discuss the design procedure of spigot and socket cotter joint.	10 Marks

ANTENNAS AND PROPAGATION

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Obtain the relations between the potentials and their sources.	7 Marks
	b)	Derive the expression for the power radiated by an alternating current element and hence its radiation resistance.	7 Marks
		(OR)	
2	a)	Derive the expression for radiation resistance of alternating current element.	9 Marks
	b)	Design an antenna with $R_r = 73\Omega$ and $R_L = 2\Omega$.	5 Marks

UNIT-II

3	a)	Derive an expression for a broadside array.	7 Marks
	b)	Calculate the beam width of main lobe of a broadside array.	7 Marks
		(OR)	
4	a)	Explain binomial array.	8 Marks
	b)	Distinguish between binomial and uniform linear arrays.	6 Marks

UNIT-III

5	a)	Explain the construction of horn antenna and its principle of working.	7 Marks
	b)	With neat diagrams, describe the principle of working of 3-element Yagi antenna, listing out its length and spacing requirements.	7 Marks
		(OR)	
6	a)	Explain the geometrical configuration of different reflector types in detail.	7 Marks
	b)	State the features, advantages and limitations of microstrip antenna.	7 Marks

UNIT-IV

7		Describe how gain of an antenna under test can be measured using absolute gain method.	14 Marks
		(OR)	
8	a)	Explain the 3 antenna method of measurement of the gain of a horn antenna with necessary relations.	8 Marks
	b)	Analyze sources of errors in antenna measurements.	6 Marks

UNIT-V

9	a)	Derive expression for the field strength, due to space wave propagation at a point away from the transmitter.	7 Marks
	b)	Explain salient features of Sommerfeld's theory.	7 Marks
		(OR)	
10	a)	Explain the terms wave tilt, virtual height, MUF, Skip distance and critical frequency.	7 Marks
	b)	Derive an expression for the refractive index of the ionosphere in terms of 'N'	7 Marks

and frequency.

DIGITAL IC APPLICATIONS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Explain various TTL logic familiars.	14 Marks
		(OR)	
2	a)	What kinds of transistors are used in CMOS gates and draw the 2 input XOR gate using CMOS logic?	7 Marks
	b)	Explain the electrical characteristics of BJT inverter.	7 Marks

UNIT-II

3	a)	Explain clearly about the ASIC design flow.	7 Marks
	b)	Explain the operators used in Verilog HDL.	7 Marks
		(OR)	
4	a)	What are the language constructions used in Verilog HDL.	7 Marks
	b)	Write a Verilog program for four bit bidirectional shift register.	7 Marks

UNIT-III

5	a)	Explain the standard 3 x 8 decoder and implement One bit full adder using decoder.	7 Marks
	b)	Design a 4 x 1 multiplexer using tristate buffers.	7 Marks
		(OR)	
6	a)	Design a 16-bit comparator using 74 x 85 ICs.	8 Marks
	b)	Implement a full adder with two 4 x 1 multiplexers.	6 Marks

UNIT-IV

7	a)	Design a conversion circuit to convert T flip-flop to JK flip-flop.	7 Marks
	b)	Draw and explain the operation of positive edge triggered D flip-flop.	7 Marks
		(OR)	
8	a)	Design a conversion circuit to convert SR flip-flop to JK flip-flop.	7 Marks
	b)	Design a 4-bit, 4-state ring counter using 74 x 194.	7 Marks

UNIT-V

9	a)	Explain the internal structure of 64K x 1 DRAM. With the help of timing waveforms, discuss DRAM access.	8 Marks
	b)	Realize the logic function performed by 74 x 381 with ROM.	6 Marks
		(OR)	
10		Discuss how PROM, EPROM and EEPROM technologies differ from each other.	14 Marks

PULSE AND DIGITAL CIRCUITS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Obtain the response of RC high-pass circuit for square input for different time constants with neat sketches.	8 Marks
	b)	Justify how a Low-pass RC circuit acts as an Integrator.	6 Marks
		(OR)	
2	a)	Explain ringing circuit and attenuator.	7 Marks
	b)	Explain the application of an attenuator as CRO probe.	7 Marks

UNIT-II

3	a)	Define clipper. Explain the clipping using zero diodes.	7 Marks
	b)	Draw a transistor clipper and explain its operation.	7 Marks
		(OR)	
4	a)	State and prove Clamping circuit theorem.	7 Marks
	b)	What is the difference between the output from a clipping circuit and a clamping circuit? Explain with neat sketches.	7 Marks

UNIT-III

5	a)	Give the design procedure for emitter coupled monostable multivibrator.	7 Marks
	b)	Design an astable multivibrator to produce an output with 100 msec ON period and 50 msec OFF period for V_{CC} = 18V, h_{FE} = 60, $I_{C\,(sat)}$ = 100 μA.	7 Marks
		(OR)	
6	a)	Explain the working of collector coupled astable multivibrator with circuit diagram and wave forms.	7 Marks
	b)	Explain the use of a monostable relaxation circuit as a frequency divider with the help of neat diagram and wave forms.	7 Marks

UNIT-IV

7		Write notes on the following:	
		i) Differentiate voltage and current time based generators.	7 Marks
		ii) Monostable blocking oscillators.	7 Marks
		(OR)	
8	a)	Draw transistor Bootstrap time base generator and explain its operation.	7 Marks
	b)	Which type of time base generator is used in electromagnetic and electrostatic deflection systems? Explain.	7 Marks

UNIT-V

9	a)	What is Pedestal? How can pedestal be reduced in a sampling gate circuit?	7 Marks
	b)	Draw the circuit of an emitter-coupled bidirectional sampling gate and explain.	7 Marks
		(OR)	

10	a)	Sketch and explain the working of CMOS inverter	7 Marks
	b)	Realize OR gate using diodes and transistors.	7 Marks

THEORY OF COMPUTATION

[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 70**

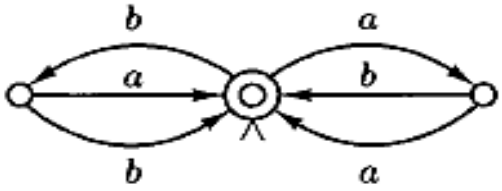
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	Let L be a set accepted by a NFA and then prove that there exists DFA that accepts L.	14 Marks
	(OR)	
2	Design a NFA accepts the following strings over the alphabets {0**.**1} The set of all string that beings with 01 and ends with 11. Check for the validity of 01111 and 0110 strings.	14 Marks

UNIT-II

3	Let L be any subset of 0*. Prove that L* is regular.	14 Marks
	(OR)	
4	Construct regular expression equivalent to the following DFA.	14 Marks



UNIT-III

5	Find a CFG equivalent with no useless symbols equivalent to S → AB | CA A → a B → BC | AB C → aB | b	14 Marks
	(OR)	
6	Construct a PDA equivalent to the following grammar. S → aAA A → aS |bS |a	14 Marks

UNIT-IV

7	Compare Two-way infinite tape TM and multiple tracks TM.	14 Marks
	(OR)	
8	Construct a TM to perform copy operation.	14 Marks

UNIT-V

9	Show that it is undecidable whether a TM halts on all inputs.	14 Marks
	(OR)	
10	Prove that the union of two recursive languages is recursive and the union of two recursively enumerable languages is recursively enumerable.	14 Marks

UNIX INTERNALS

[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Comment on "UNIX system has become more popular now-a-days".	7 Marks
	b)	Give brief description about the UNIX file subsystem.	7 Marks
		(OR)	
2	a)	Explain about process execution levels and memory management.	7 Marks
	b)	Describe about the processing of environment.	7 Marks

UNIT-II

3	a)	Explain the use of grep family in text processing.	7 Marks
	b)	Define a Shell and explain the responsibilities of Shell.	7 Marks
		(OR)	
4	a)	Explain briefly about the control structures in shell programming	8 Marks
	b)	List the backup utilities and explain briefly with examples.	6 Marks

UNIT-III

5	a)	Explain briefly File and Directory maintenance with an example.	10 Marks
	b)	Define a file descriptor and explain it briefly with a simple program.	4 Marks
		(OR)	
6	a)	Explain the procedure to create a new file descriptor by using open system call.	7 Marks
	b)	Discuss in detail about the fopen( ) and fread( ) system calls.	7 Marks

UNIT-IV

7	a)	Explain briefly about the signal functions. i) Kill. ii) Raise. iii) Alarm. iv) Pause.	7 Marks
	b)	Explain the use of read and write Locks in files with an example program.	7 Marks
		(OR)	
8	a)	Explain about the Interrupted system calls.	7 Marks
	b)	Discuss about Mandatory locking.	7 Marks

UNIT-V

9		Write short notes for the following: i) Parent and child processes. ii) Semaphores. iii) Socket communications. iv) Process pipes.	14 Marks
		(OR)	
10		Write the significance for the following: (i) msgget. (ii) msgsnd. (iii) msgctl. (iv) shmget. (v) shmat. (vi) pipe call.	14 Marks

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

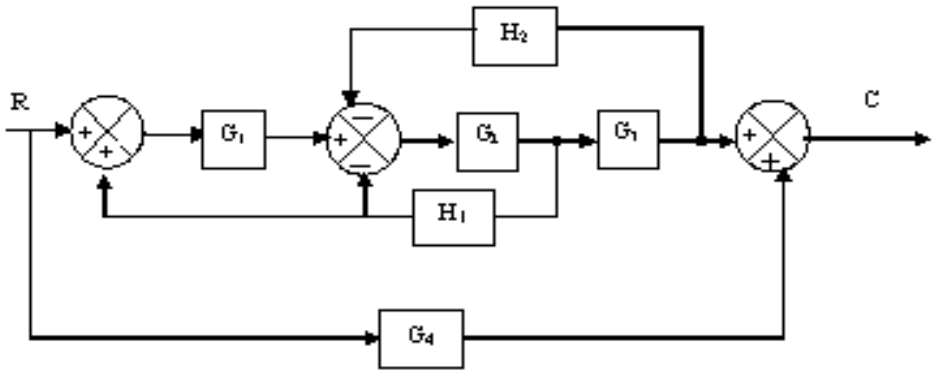
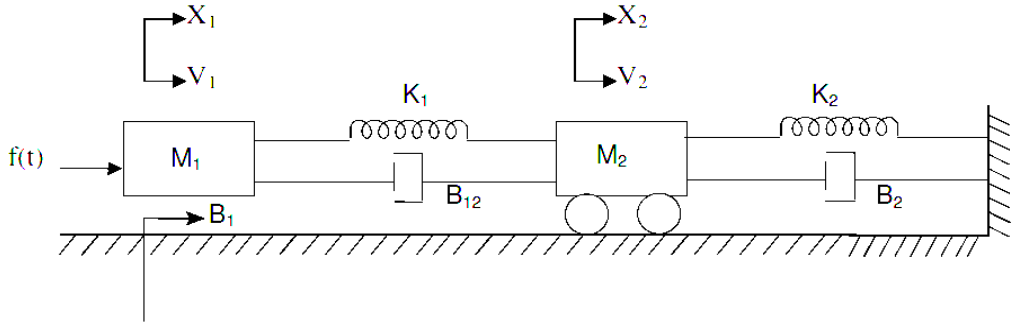
1 a) Explain the open loop and closed loop control system with an example. 7 Marks

b) Find the transfer function C/R using block diagram reduction method. 7 Marks



(OR)

2 Write the differential equations governing the mechanical system shown below. Draw the force-voltage and force-current electrical analogous circuits and verify by writing mesh and node equations. 14 Marks



UNIT-II

3 a) Obtain the time response for First order system with respect to input test signals 8 Marks

b) Explain about generalized error constants in control systems. 6 Marks

(OR)

4 a) Explain the generalized error coefficients for step input ramp and parabolic inputs. 7 Marks

b) A unity feedback system has $G(s) = \frac{1}{S(1+2S)}$. The input to the system is described by $r(t) = 2 + 4t + 6t^2 + 2t^3$. Determine the generalized error coefficients and express the steady state error as a function of time. 7 Marks

UNIT-III

5 a) The open loop transfer function of a feedback control system is given by $G(s)H(s) = \frac{K}{s(s+4)(s^2+2s+2)}$, using Routh Criterion determine the range of K for which the system is stable. 7 Marks

b) Discuss the effect of adding the Poles and Zeros to given system on the root loci. 7 Marks

(OR)

6 A unity feedback system has an open loop transfer function 14 Marks

$$G(s)\,H(s) = \frac{K}{s(s+3)(s^2+2s+2)}$$

Sketch the root locus as 'K' varies from 0 to ∞.

UNIT-IV

7 a) Derive expressions for Resonant peak magnitude and resonant frequency. 8 Marks

b) Derive the transfer functions for Lead and Lag compensation networks. 6 Marks

(OR)

8 Sketch the magnitude and phase bode plots for the system $G(s) = \frac{10}{s(1+0.5s)(1+0.05s)}$, determine all frequency domain specifications and comment on stability. 14 Marks

UNIT-V

9 a) Derive an expression for the solution of Homogeneous state equations. 7 Marks

b) Determine the State Controllability and Observability of the system using Kalman's test. 7 Marks

$$A = \begin{bmatrix} 0 & 2 & 0 \\ 1 & 2 & 0 \\ -1 & 0 & 1 \end{bmatrix} \qquad B = \begin{bmatrix} 0 \\ 1 \\ 1 \end{bmatrix} \qquad C = \begin{bmatrix} 1 & 0 & 1 \end{bmatrix}.$$

(OR)

10 a) Obtain state variable representation of a field controlled DC motor. 6 Marks

b) Find the state transition matrix for a given system matrix. $A = \begin{bmatrix} 0 & 1 \\ -2 & -3 \end{bmatrix}$. 8 Marks

SYNCHRONOUS MACHINES

[Electrical And Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Enumerate various methods used for minimizing harmonics in turbo-alternators.	7 Marks
	b)	What are the harmonics? Explain how the harmonics can be suppresses in an alternator.	7 Marks

(OR)

2	a)	Name the factors responsible for making terminal voltage of an alternator less than the induced voltage. Explain them briefly.	7 Marks
	b)	Mention the differences between salient pole and non salient pole synchronous machine.	7 Marks

UNIT-II

3	a)	Compare synchronous impedance and ampere-turns methods of predetermining voltage regulation of alternator.	7 Marks
	b)	Define synchronous impedance of an alternator and explain how it can be determined experimentally.	7 Marks

(OR)

4	a)	Describe the slip test method for measurement of Xd and Xq of synchronous machine.	7 Marks
	b)	Explain the Ampere-Turn method to find the voltage regulation of an alternator.	7 Marks

UNIT-III

5	a)	What is an infinite bus? Mention three conditions to be satisfied prior to synchronizing an alternator to an infinite bus.	8 Marks
	b)	An alternator is connected to an infinite bus and is running at no load. Explain briefly how to increase its real and reactive power outputs.	6 Marks

(OR)

6		Explain the effect of change in excitation and change in mechanical power input on load sharing of alternators operating in parallel.	14 Marks

UNIT-IV

7		Draw the phasor diagram of a synchronous motor. Explain the effect : (i) change of excitation if load is constant. (ii) change of load if excitation is constant.	14 Marks

(OR)

8	a)	What is meant by constant power circle for synchronous motor? How is it derived?	6 Marks
	b)	Explain the different methods of starting 3-phase synchronous motors.	8 Marks

UNIT-V

9	a)	Explain the operation of a single phase induction motor using split phase technique.	8 Marks
	b)	Explain working of AC series motor with necessary diagrams and mention its applications.	6 Marks

(OR)

10	a)	Explain the principle of operation of universal motor.	7 Marks
	b)	Explain why DC servomotors are preferred over AC servomotors for high power applications.	7 Marks

DYNAMICS OF MACHINERY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) The lengths of crank and connecting rod of a horizontal reciprocating engine are 200mm and 800mm respectively. The crank is rotating at 480 r.p.m. Using Klein's constructions find the acceleration of the piston. 7 Marks

b) The lengths of crank and connecting rod of a horizontal reciprocating engine are 100mm and 500mm respectively. The crank is rotating at 400 r.p.m. When the crank has turned 30^0 from the inner dead centre, find analytically i) acceleration of the piston. ii) velocity of the piston. 7 Marks

(OR)

2 a) Explain the procedure to determine the velocity and acceleration of a four-bar mechanism by Klein's construction. 7 Marks

b) What are the Forces on the reciprocating parts of an engine neglecting and considering weight of the connecting rod using Analytical method? 7 Marks

UNIT-II

3 A single cylinder, single acting, four stroke cycle gas engine develops 20kw at 250 r.p.m. The work done by the gases during the expansion stroke is 3 times the work done on the gases during the compression stroke. The work done on the suction and exhaust strokes may be neglected. If the flywheel has a mass of 1.5 tonnes and has a radius of gyration of 0.6m, find the cyclic fluctuation of energy and the coefficient of fluctuation of speed. 14 Marks

(OR)

4 A four wheeled trolley car of total mass 2000kg running on rails of 1.6m gauge, rounds a curve of 30m radius at 54km/h. The track is banked at 8^o. The wheels have an external diameter of 0.7m and each pair whith axle has a mass of 200kg. The radius of gyration for each pair is 0.3m. The height of centre of gravity of the car above the wheel base is 1m. Determine, allowing for centrifugal force and gyroscopic couple actions, the pressure on each rail. 14 Marks

UNIT-III

5 a) Describe with a neat sketch the working of a single plate clutch. 6 Marks

b) Differentiate between: 8 Marks

i) Brakes and dynamometer.
ii) Absorption dynamometer and transmission dynamometer

(OR)

6 Summarize with the help of a neat sketch the principles of operation of an internal expanding shoe. Derive the expression for the braking torque. 14 Marks

UNIT-IV

7 Explain the term height of the governor. Derive an expression for the height in the case of a Watt governor. What are the limitations of a Watt governor? 14 Marks

(OR)

8		A single cylinder horizontal engine runs at 120 r.p.m. The length of stroke is 400mm. The mass of the revolving parts assumed concentrated at the crank pin is 100kg and mass of the reciprocating parts is 150kg. Determine the magnitude of the balancing mass required to be placed opposite to the crank at a radius of 150mm which is equivalent to all the revolving and 2/3rd of the reciprocating masses. If the crank turns 30º from the inner dead centre, find the magnitude of the unbalanced force due to the balancing mass.	14 Marks

UNIT-V

9	a)	What do you understand by 'torsionally equivalent shaft'?	7 Marks
	b)	Describe in detail the method of finding the frequency of torsional vibration of a two rotor system.	7 Marks

(OR)

10		Illustrate the effect of inertia of the shaft in longitudinal and transverse vibrations.	14 Marks

CODE No.:14BT50303 SVEC-14

Roll No. | | | | | | | | | | |

THERMAL ENGINEERING - II
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw the diagram of spring loaded safety valve and give its working principle.	8 Marks
	b)	Differentiate between water tube and fire tube boilers.	6 Marks
		(OR)	
2	a)	What is a boiler? Explain the classification of boilers.	7 Marks
	b)	What is the necessity for safety valves in a boiler?	7 Marks

UNIT-II

3	a)	Why Rankine cycle is preferred for larger power generation?	7 Marks
	b)	Saturated steam at 18 bar abs. enters the turbine of a steam power plant and expands to a condenser pressure of 0.8 bar. Determine the Rankine efficiency.	7 Marks
		(OR)	
4		Describe the different operations of rankine cycle. Derive also the expression for its efficiency with neat sketch, p-V, T-s and h-s diagrams of rankine cycle.	14 Marks

UNIT-III

5		Define nozzle efficiency. Explain the effect of friction on the performance of the nozzle with the help of h-s diagram.	14 Marks
		(OR)	
6	a)	Explain the functions of nozzles used with steam turbines.	7 Marks
	b)	Steam at a pressure of 10 bar and 210^0C is supplied to a convergent divergent nozzle with a throat area of 1,500m^2. The exit is below critical pressure. Find the coefficient of discharge, if the flow is 7,200 kg of steam per hour.	7 Marks

UNIT-IV

7		Explain single-stage impulse turbine with the help of a neat sketch. Also explain the pressure and velocity variations along the axial direction.	14 Marks
		(OR)	
8		In a reaction turbine blade tips are inclined at 300 and 200 to the direction of motion. The fixed blades and the moving blades are of the same shape but reversed in direction. At a certain point in the turbine the drum diameter is 0.9 m and the blade height 100 mm. the steam at this point is at 3.4 bar and is 90 % dry. If the turbine runs at 300 R.P.M, find the power developed in the ring of blades.	14 Marks

UNIT-V

9		Explain with a sketch the working of a constant pressure open cycle gas turbine. In what way the actual cycle differs from the theoretical cycle?	14 Marks
		(OR)	
10	a)	Explain briefly with a sketch the working principle of a rocket.	7 Marks
	b)	With the aid of the schematic diagram and thermodynamic cycle, explain the working of a turbo jet engine.	7 Marks

DESIGN OF MACHINE ELEMENTS-I

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) What are preferred numbers? Mention their advantages. 7 Marks

b) State the mechanical properties of metals and explain briefly. 7 Marks

(OR)

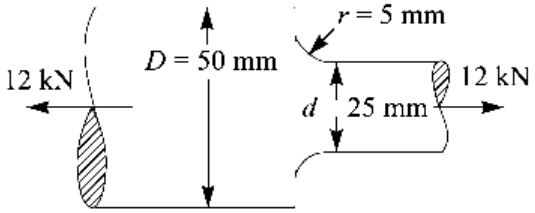
2 a) Explain the basic modes of failure of mechanical components with examples. 7 Marks

b) Describe the process of selection of engineering materials. 7 Marks

UNIT-II

3 a) How to reduce the stress concentration in threaded members? 6 Marks

b) Find the maximum stress induced in the following case taking stress concentration into account: A stepped shaft as shown in figure and carrying a tensile load of 12 kN. 8 Marks



(OR)

4 a) Write short note on the following. 7 Marks

i) Notch sensitivity. ii) Endurance limit. iii) Goodman's line.

b) Illustrate how the stress concentration in a component can be reduced. 7 Marks

UNIT-III

5 a) Discuss the bolt of uniform strength in detail. 7 Marks

b) A steam engine cylinder has an effective diameter of 350 mm and the maximum steam pressure acting on the cylinder cover is 1.25N/mm^2. Calculate the number and size of studs required to fix the cylinder cover, assuming the permissible stress in the studs as 33 MPa. 7 Marks

(OR)

6 a) Discuss various ways in which a riveted joint may fail. 6 Marks

b) Two plates of 10 mm thick are joined by means of a single riveted, double strap butt joint. The rivet diameter is 20 mm and pitch of the rivets is 60 mm. The permissible stresses are: σ_t =80 MPa, σ_c = 120 MPa, τ = 60 MPa. Calculate the efficiency of the joint. 8 Marks

UNIT-IV

7 a) How are the keys classified? Draw neat sketches of different types of keys and state their applications. 7 Marks

b) A solid circular shaft is subjected to a bending moment of 3000 N-m and a torque of 10 000 N-m. The shaft is made of 45 C 8 steel having ultimate tensile stress of 700 MPa and a ultimate shear stress of 500 MPa. Assuming a factor of safety as 6, determine the diameter of the shaft. 7 Marks

(OR)

8 a) How do you classify couplings? Explain the function of each in detail. 7 Marks

b) Design the rectangular key for a shaft of 50 mm diameter. The shearing and crushing stresses for the key material are 42 MPa and 70 MPa. 7 Marks

UNIT-V

9 Design a sleeve and cotter joint to resist a tensile load of 60 kN. All parts of the joint are made of the same material with the following allowable stresses : σt=60 MPa ; τ = 70 MPa ; and σc = 125 MPa. 14 Marks

(OR)

10 a) Describe the purpose of gib in cotter joint. What are the applications of cotter joints? 4 Marks

b) Design a knuckle joint to transmit 140 kN, with permissible stresses in tension; shear and compression are 75 Mpa; 60 Mpa and 150 Mpa respectively. 10 Marks

ANTENNAS AND PROPAGATION
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Explain the following terms related to antenna: (i) Beam efficiency. (ii) Directivity. (iii). Polarization. (iv) Radiated power.	14 Marks
		(OR)	
2	a)	Discuss about the far fields of center-fed antennas with respect to different lengths?	8 Marks
	b)	Differentiate Omni-directional and Isotropic directional radiation patterns of an antenna.	6 Marks

UNIT-II

3	a)	In a linear array of 4 isotropic elements spaced $\lambda/2$ apart and with equal currents fed in phase, plot the radiation pattern in polar coordinates.	7 Marks
	b)	Derive the Fourier Transform method of synthesis of array.	7 Marks
		(OR)	
4	a)	Derive the expression for the array factor of a linear broadside array of '*n*' elements.	7 Marks
	b)	Derive the expressions of null-null beam width of a uniform linear array.	7 Marks

UNIT-III

5	a)	Sketch and explain the constructional features of a helical antenna.	7 Marks
	b)	Discuss the characteristics, merits and demerits of a folded dipole.	7 Marks
		(OR)	
6	a)	Discuss the design considerations for monofilar helical antenna in axial mode.	7 Marks
	b)	With neat diagram, explain the geometry of parabolic reflector.	7 Marks

UNIT-IV

7	a)	Differentiate different gain measurement techniques of an antenna.	7 Marks
	b)	Analyze source of errors regarding antenna measurements.	7 Marks
		(OR)	
8	a)	Describe a method of measurement of radiation pattern with neat measurement setup.	7 Marks
	b)	What is polarization and describe polarization measurement by power measurement approach?	7 Marks

UNIT-V

9	a)	Explain the structural details of the ionosphere.	8 Marks
	b)	List the effects of D-layer in the sky wave propagation.	6 Marks
		(OR)	
10	a)	Derive the fundamental equation for free space propagation.	8 Marks
	b)	Explain the relation between MUF and skip distance in detail.	6 Marks

DIGITAL COMMUNICATIONS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw the block diagram of a PCM system and explain each block in detail.	8 Marks
	b)	Compare and contrast PCM and DM systems.	6 Marks
		(OR)	
2	a)	Explain the Differential Pulse Code Modulation (DPCM) scheme with neat block diagram.	8 Marks
	b)	Compare the uniform quantization and non uniform quantization.	6 Marks

UNIT-II

3	a)	Derive the expression for output signal power for PCM system.	7 Marks
	b)	Explain the effect of thermal noise in PCM.	7 Marks
		(OR)	
4	a)	Derive an expression for quantization noise and output signal power in DM.	10 Marks
	b)	A voice frequency signal band limited to 3 KHz is transmitted with the use of DM system. The pulse repletion frequency is 30,000 pulses/sec and step size is 40mV. Determine the maximum permissible speech signal amplitude to avoid a slope overload.	4 Marks

UNIT-III

5		Draw the block diagram of Base Band binary data transmission system and explain the role of each block.	14 Marks
		(OR)	
6	a)	Explain the generation, detection, signal space diagram of ASK system.	7 Marks
	b)	Define QAM and draw its constellation diagram for M=8.	7 Marks

UNIT-IV

7	a)	Show that $H(X,Y) = H(X) + H(Y/X) = H(Y) + H(X/Y)$.	8 Marks
	b)	Define the channel capacity in terms of average signal power and noise power.	6 Marks
		(OR)	
8	a)	Describe, how error free communication achieved over noisy channel	8 Marks
	b)	Discuss the practical communication systems in light of Shannon's equation.	6 Marks

UNIT-V

9	a)	Explain Linear Block Codes and Hamming Codes.	7 Marks
	b)	Explain the handling of burst errors in communications.	7 Marks
		(OR)	
10	a)	Explain the decoding of convolutional codes using exhaustive search method.	8 Marks
	b)	Discuss the comparison of coded and uncoded systems.	6 Marks

LINEAR IC APPLICATIONS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Explain how large open circuit voltage gain of an op-amp can be obtained by using cascading of differential amplifier stages. 14 Marks

(OR)

2 Explain ac analysis of differential amplifier. 14 Marks

UNIT-II

3 a) Draw the circuit of an AC amplifier using op-amp and explain its operation, 7 Marks
b) Using an op-amp, draw the circuit diagram to generate a triangular wave and explain its operation. 7 Marks

(OR)

4 a) Explain how op-amp can be used as a differentiator using necessary expressions. 7 Marks
b) With a near sketch, explain how op-amp can be used as an antilog amplifier. 7 Marks

UNIT-III

5 Discuss the functional block diagram of a 723 voltage regulator and explain one of its applications. 14 Marks

(OR)

6 Explain the advantages of active filters. Explain different configurations of active filters. Discuss their merits and demerits. 14 Marks

UNIT-IV

7 a) Explain about the phase detector and its working in a PLL. 7 Marks
b) Write a short note on monolithic PLL IC 566. 7 Marks

(OR)

8 Explain the following: 14 Marks
i) frequency multiplication. ii) linear ramp generator.

UNIT-V

9 a) Compare R - 2R and weight resistor types of DACs. 7 Marks
b) Define the following terms as related to DAC: 7 Marks
i) Linearity. ii) Resolution.

(OR)

10 a) Explain the difference between Analog to Digital converter and Digital to Analog converters through underlying equations. 7 Marks
b) If an 8 bit ADC outputs all ones when its input is 5.1 V. Find its resolution and its digital output when input is changed to 1.28 V. 7 Marks

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the block diagram and transfer characteristic of an op-amp.	7 Marks
	b)	Derive the expression for output voltage and gain of a practical inverting amplifier.	7 Marks

(OR)

2	a)	With suitable expressions, explain the frequency response of an op-amp.	7 Marks
	b)	With double supply, draw the circuit and explain the operation of inverting amplifier.	7 Marks

UNIT-II

3	a)	Draw the circuit of a typical instrumentation amplifier. Why do we use two-stage op-amp circuit as an instrumentation amplifier? Explain.	8 Marks
	b)	With neat sketches, explain the frequency response of different filters.	6 Marks

(OR)

4	a)	Explain the basic differentiator and how the problems in basic circuit are overcome in a practical circuit.	7 Marks
	b)	Design a second order high pass filter for a lower cut off frequency of 10KHz.	7 Marks

UNIT-III

5	a)	Explain the block diagram of PLL.	7 Marks
	b)	Design a symmetrical square wave generator with a frequency of 5KHz. Draw the circuit and respective waveform.	7 Marks

(OR)

6	a)	Explain the operation of successive approximation type A/D converter.	7 Marks
	b)	Derive the expression for capture range of phase locked loop.	7 Marks

UNIT-IV

7	a)	Explain steady state electrical behavior of CMOS and also explain CMOS-to-TTL interface.	7 Marks
	b)	Compare different logic families and list out their advantages and disadvantages.	7 Marks

(OR)

8	a)	Explain the following terms with reference to CMOS logic: i) Logic levels. ii) Power supply rails.	6 Marks
	b)	Briefly explain about CMOS/TTL interfacing.	8 Marks

UNIT-V

9	a)	Discuss in brief about Verilog operators.	7 Marks
	b)	Write a Verilog program for full-adder in behavioral model.	7 Marks

(OR)

10	a)	Explain the behavioral modeling in Verilog.	7 Marks
	b)	Design a conversion circuit to convert a JK flip-flop from RS flip-flop.	7 Marks

SOIL MECHANICS
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe the Classification of Coarse grained Soils.	6 Marks
	b)	Obtain the relationship between for the water content, void ratio, specific gravity and degree of saturation.	8 Marks

(OR)

2		A sample of clay taken from a natural stratum was found to be partially saturated and when tested in the laboratory gave the following results. Specific gravity of soil particles is 2.6, wet weight of sample is 250g, dry weight of sample is 210g and volume of sample is 150cm^3. Compute the degree of saturation, water content, porosity and void ratio using phase diagram.	14 Marks

UNIT-II

3		In a deposit of silt, the water table which was at originally at a depth of 1m below ground level was lowered to 3m below ground level. The silt above water table was capillary-saturated. The saturated unit weight of silt was 20kN/m^3. What is the change in effective pressure at a depth of 0.0m, 1.0m and 3.0m?	14 Marks

(OR)

4	a)	Explain effective stress, total stress and neutral stress. What is capillary effect on effective stress of soil?	6 Marks
	b)	A sand deposit of 9 m thick overlies a bed of soft clay. The water table is 3 m below the ground level. If the sand above the ground water table has a degree of saturation of 60 %, plot the diagram showing the variation of the total stress, pore water pressure and the effective stress. Take G = 2.70, void ratio as 0.7.	8 Marks

UNIT-III

5	a)	State the assumptions of Boussinesq's theory of stress distribution in soils.	4 Marks
	b)	Derive an expression for a vertical stress below the centre of circular area supporting a uniformly distributed load at the surface. Use bousinesq's theory.	10 Marks

(OR)

6	a)	What is compaction curve and describe zero-air void curve with a sketch.	6 Marks
	b)	Explain how field control of compaction soil is achieved. Describe at least one example in each case.	8 Marks

UNIT-IV

7		Explain briefly Terzaghi's theory of one dimensional consolidation and derive its equation.	14 Marks

(OR)

8	a)	Differentiate between Normally consolidated soil and Over consolidated soil.	5 Marks
	b)	Explain square root time fitting method to determine coefficient of consolidation.	9 Marks

UNIT-V

9	a)	Explain the basic differences between a box shear test and a triaxial shear test.	6 Marks
	b)	A vane 10.8cm long, 7.2cm in diameter was pressed into a soft clay at the bottom of bore hole, Torque was applied and the vane at the failure was 45Nm. Find the shear strength of clay on a horizontal plane.	8 Marks

(OR)

10 The following are the results were obtained during consolidated undrained shear strength test. Determine Effective Shear strength parameters. 14 Marks

Sample No	Cell Pressure (kN/m^2)	Deviator stress (kN/m^2)	Pore Pressure (kN/m^2)
1	100	150	50
2	200	190	75
3	300	240	135

DYNAMICS OF MACHINERY
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 The crank and connecting rod of a steam engine are 0.3m and 1.5m in length. The crank rotates at 180 r.p.m clockwise. Determine the velocity and acceleration of piston when the crank is at 40º from from the inner dead centre position. Also determine the position of the crank for zero acceleration of the piston. 14 Marks

(OR)

2 1. long. The mass of the piston is 1.1kg. The speed is 2000 r.p.m on the expansion stroke with a crank 20º from top dead centre, the gas pressure is 700KN/m². Determine. 14 Marks

i) Net force on the piston. ii) Result load on the gudgeon pin.
iii) Thrust on the cylinder.

Speed above which, other things remaining same, the gudgeon pin load would be reversed in direction.

UNIT-II

3 a) Write expression for gyroscopic couple. 7 Marks

b) Each paddle wheel of a steamer has a mass of 1600 kg and a radius of gyration of 1.2m. The steamer turns to port in a circle of 160m radius at 24Km/hr. The speed of the paddle is 90 r.p.m. Find the magnitude and effect of the gyroscopic couple acting on the steamer. 7 Marks

(OR)

4 a) Explain the effect of Gyroscopic couple on a Naval ship during pitching. 7 Marks

b) Explain the effect of Gyroscopic couple on a Aero plane. 7 Marks

UNIT-III

5 Explain the theory of following brakes. 14 Marks
a) Block brake. b) Band brake. c) Band and block brake.

(OR)

6 a) Describe with a neat sketch the working of a single plate friction clutch. 7 Marks

b) Establish a formula for the maximum torque transmitted by a single plate clutch of external and internal radii r_1 and r_2, if the limiting coefficient of friction is **μ** and the axial spring load is **W**. Assume that the pressure intensity on the contact faces is uniform. 7 Marks

UNIT-IV

7 Explain the term height of the governor. Derive an expression for the height in the case of a Watt governor. What are the limitations of a Watt governor? 14 Marks

(OR)

8 a) How governors are classified? 7 Marks

b) Why rotating masses are to be dynamically balanced? 7 Marks

UNIT-V

9	a)	List out the causes and effects of vibrations.	7 Marks
	b)	Summarize with neat sketches the longitudinal, transverse vibrations.	7 Marks

(OR)

10		Illustrate the effect of inertia of the shaft in longitudinal and transverse vibrations.	14 Marks

CODE No.:14BT50303 SVEC-14

Roll No. | | | | | | | | | | |

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Anantapur)

III B.Tech I Semester (SVEC14) Supplementary Examinations June – 2022

THERMAL ENGINEERING - II
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the working of Lamont with a neat sketch.	7 Marks
	b)	List out the boiler accessories and explain any one of them with a neat sketch.	7 Marks
		(OR)	
2	a)	What is a boiler? Explain the classification of boilers.	7 Marks
	b)	What is the necessity for safety valves in a boiler?	7 Marks

UNIT-II

3	a)	Draw T-s and h-s diagrams of reheat Rankine cycle with the help of circuit diagram and derive its efficiency.	7 Marks
	b)	Calculate the height of chimney required to produce a draught equivalent to 1.7 cm of water if the flue gas temperature is 270^0C and ambient temperature is 22^0C and minimum amount of air per kg of fuel is 17 kg.	7 Marks
		(OR)	
4	a)	Comment the efficiency of the Modified Rankine cycle with respect to rankine cycle. Also obtain the expression for efficiency of Modified Rankine cycle.	7 Marks
	b)	Explain induced draught and forced draught.	7 Marks

UNIT-III

5		Define nozzle efficiency. Explain the effect of friction on the performance of the nozzle with the help of h-s diagram.	14 Marks
		(OR)	
6		In a propulsion nozzle, gases expand from 400 kPa and 700 K to a back pressure of 99 kPa at the rate of 20 kg/s, coefficient of discharge is 0.98 and nozzle efficiency is 95%. Find the throat and exit areas of the nozzle. For gases, $\gamma = 1.3$ and Cp = 1.10 kJ/kg. Assume that the inlet velocity is negligible.	14 Marks

UNIT-IV

7		The following data refer to a particular stage of a Parson's reaction turbine: Speed of the turbine = 1,500 R.P.M. mean diameter of the rotor =1 m; stage efficiency: 80%; Blade outlet angle = 20^0, Speed ratio = 0.7. Determine the available isentropic enthalpy drop in the stage.	14 Marks
		(OR)	
8		Show that for maximum diagram efficiency of a reaction turbine the blade-steam speed ratio is equal to cos α, where α is the angle of absolute velocity at inlet. State the assumption made. Hence derive an expression for maximum efficiency.	14 Marks

UNIT-V

9		Explain with a sketch the working of a constant pressure open cycle gas turbine. In what way the actual cycle differs from the theoretical cycle?	14 Marks
		(OR)	
10		Explain using a neat sketch, the principle of operation of turbo jet engine.	14 Marks

CODE No.:14BT50305 SVEC-14

Roll No. | | | | | | | | | | |

SREE VIDYANIKETHAN ENGINEERING COLLEGE

DESIGN OF MACHINE ELEMENTS-I

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Describe the general considerations in design. 7 Marks

b) Explain the mechanical properties of engineering materials. 7 Marks

(OR)

2 a) Explain the basic modes of failure of mechanical components with examples. 7 Marks

b) Describe the process of selection of engineering materials. 7 Marks

UNIT-II

3 a) Explain Maximum principal shear stress theory under static load condition. 7 Marks

b) Explain Maximum principal strain energy theory under static load condition. 7 Marks

(OR)

4 a) Formulate Soderberg's equation and state its application to different types of loading. 6 Marks

b) A 50mm diameter shaft is made from carbon steel having ultimate tensile strength of 630 MPa. It is subjected to a torque which fluctuates between 2000 N-m to 800 N-m. Using Soderberg method, calculate the factor of safety. Assume suitable values for any other data needed. 8 Marks

UNIT-III

5 A bracket is fixed to the steel column by means of four identical bolts (Fig.1), two at A and two at B. The maximum load that comes on the bracket is 5 kN acting vertically at a distance of 250 mm from the face of the column. The bolts are made of plain carbon steel 30C8 and the factor of safety is 5. Determine the major diameter of the bolts on the basis of maximum principal stress. 14 Marks

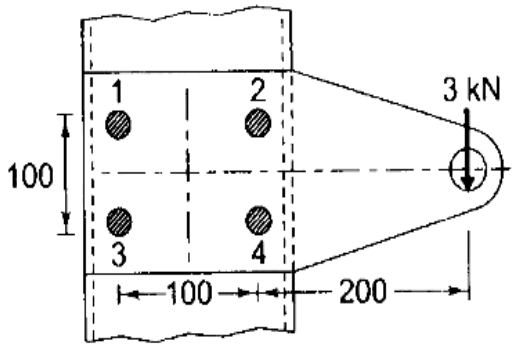

Fig.1

(OR)

6 a) Discuss various ways in which a riveted joint may fail. 6 Marks

b) Two plates of 10 mm thick are joined by means of a single riveted, double strap butt joint. The rivet diameter is 20 mm and pitch of the rivets is 60 mm. The permissible stresses are: σ_t =80 MPa, σ_c = 120 MPa, τ = 60 MPa. Calculate the efficiency of the joint. 8 Marks

UNIT-IV

7 A shaft is supported on two bearings 750 mm apart and transmits 15 kW at 560 r.p.m. A spur pinion of 150 mm diameter is located at 125 mm to the right of the left hand bearing and delivers power horizontally to the right. A spur gear of 500 mm diameter is located at 150 mm to the left of the right hand bearing and receives power from below. Determine the shaft diameter, assuming permissible shear stress for the shaft material as 45 Mpa. 14 Marks

(OR)

8 a) How do you classify shaft couplings? 4 Marks

b) Design a muff coupling for a shaft transmitting 30 kW at 300 r.p.m. The material adopted for shaft is plain carbon steel (SAE 1040) and muff coupling is grey cast iron (FG 200).The key is also made of plain carbon steel . Design torque on the shaft may be taken as 1.15 times the average torque. 10 Marks

UNIT-V

9 a) Distinguish between cotter joint and knuckle joint. 4 Marks

b) Discuss the design procedure of spigot and socket cotter joint. 10 Marks

(OR)

10 Design a knuckle joint to transmit 150 kN. The design stresses may be taken as 75 MPa in tension, 60 MPa in shear and 150 MPa in compression. 14 Marks

CODE No.:14BT50405 SVEC-14

PULSE AND DIGITAL CIRCUITS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define unit-step function, ramp function and impulse function. Show that a pulse is combination of unit-step functions.	5 Marks
	b)	What is meant by linear wave shaping?	3 Marks
	c)	Why a capacitor in a high-pass RC circuit is named as blocking capacitor?	6 Marks
		(OR)	
2	a)	What is meant by piece wise-linear approximation? Draw VI characteristics of junction diode on the basis of above approximation.	8 Marks
	b)	Discuss the breakdown voltage considerations and saturation parameters of transistor.	6 Marks

UNIT-II

3	a)	Define clipper. Explain the clipping using zero diodes.	7 Marks
	b)	Draw a transistor clipper and explain its operation.	7 Marks
		(OR)	
4	a)	Explain the effect of diode characteristics on clamping voltage.	6 Marks
	b)	Analyze the operation of a two level slicer with the aid of transfer characteristics.	8 Marks

UNIT-III

5		Draw and explain the circuit of Collector-Coupled Monostable Multivibrator with necessary waveforms and also derive the expression for pulse width.	14 Marks
		(OR)	
6	a)	Discuss in detail about Transistor switching times with relevant diagrams.	6 Marks
	b)	Design a Collector-Coupled Astable multivibrator with frequency 1KHz, h_{FE} = 50, 1 $_{C(sat)}$= 5mA, $V_{CE(sat)}$= 0.2, V_{cc}=12. Assume $R_1 = R_2$, $C_1=C_2$.	8 Marks

UNIT-IV

7	a)	Describe the generation of sweep signal from an exponential sweep circuit.	6 Marks
	b)	Explain the principle and working of a transistor Miller time-base generator.	8 Marks
		(OR)	
8	a)	Briefly explain the synchronization of sweep circuit with symmetrical signals.	8 Marks
	b)	Explain frequency division in a sweep circuit.	6 Marks

UNIT-V

9	a)	With neat diagram, analyze the working of bidirectional sampling gate using two transistors.	6 Marks
	b)	Discuss the applications of Sampling gates.	8 Marks
		(OR)	
10	a)	Draw and explain the circuit of Two-input TTL NAND gate.	6 Marks
	b)	Implement OR and AND gates using diodes and transistors.	8 Marks

Roll No. | | | | | | | | | | |

LINEAR AND DIGITAL IC APPLICATIONS

[Electrical and Electronics Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is the need of frequency compensation for an op-amp? Explain Dominant-Pole frequency compensation technique.	7 Marks
	b)	Explain the function of various blocks in block diagram of an op-amp.	7 Marks
		(OR)	
2	a)	Give the design procedure of a compensating network for an op-amp which uses ±10V supply voltages. Assume necessary data.	7 Marks
	b)	Explain ac analysis of differential amplifier.	7 Marks

UNIT-II

3	a)	Explain Current to Voltage converter.	7 Marks
	b)	Design an integrator to integrate a square wave of +/- 5V with a frequency of 3KHz. Draw the input and output waveforms.	7 Marks
		(OR)	
4	a)	Derive the transfer function and magnitude for a low pass first order filter.	7 Marks
	b)	Design a Schmitt trigger for an upper threshold voltage of 4V and lower threshold voltage of -2V for saturated voltages of +/- 14V.	7 Marks

UNIT-III

5	a)	Draw and explain the block diagram of IC566 VCO.	7 Marks
	b)	With a neat sketch, explain the functional diagram of 555 timer in monostable mode.	7 Marks
		(OR)	
6	a)	LSB of a 9-bit DAC is represented by 19.6 mV. If an input of 9 zero bits is represented by 0 volts, i) find the output of the DAC for an input 101101101 and 011011011. ii) what is the Full Scale Reading (FSR) of this DAC?	6 Marks
	b)	Explain any two applications of PLL.	8 Marks

UNIT-IV

7	a)	Explain steady state electrical behavior of CMOS and also explain CMOS-to-TTL interface.	7 Marks
	b)	Compare different logic families and list out their advantages and disadvantages.	7 Marks
		(OR)	
8	a)	What are the parameters that are used to define electrical characteristics of CMOS circuits? Write typical values for a CMOS NOR gate.	7 Marks
	b)	Draw the circuit for CMOS NAND gate, its functional table and symbol and explain its working neatly.	7 Marks

UNIT-V

9	a)	Explain the various language elements in Verilog.	8 Marks
	b)	Write a Verilog program for an active high 3 to 8 decoder.	6 Marks
		(OR)	
10	a)	Explain the structural modeling in Verilog.	8 Marks
	b)	Write a Verilog program for 4:1 multiplexer.	6 Marks

MANAGERIAL ECONOMICS AND PRINCIPLES OF ACCOUNTANCY

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	Define Managerial Economics. Explain its nature and scope.		CO1	14 Marks
	(OR)			
2	Explain other things remain the same the quantity demanded increases with every fall in price and vice-versa.		CO1	14 Marks

UNIT-II

3	Define Cost. Explain different types of Costs.		CO3	14 Marks
	(OR)			
4	Determine,	i) BEP ii) Sales required to earn a profit of Rs.40,000 iii) BEP, when fixed cost increases by Rs.10,000 iv) BEP when variable cost increases by Rs.20/unit. Selling Price /unit Rs.200 Variable Cost/unit Rs.50 Fixed Cost Rs.1,00,000	CO2, CO5	14 Marks

UNIT-III

5	Explain Monopoly competition features. Explain price and output determination both in Short run and Long run.		CO3	14 Marks
	(OR)			
6	Define Market. Explain the different types of Market.		CO3	14 Marks

UNIT-IV

7	From the following transactions pass necessary journal entries in the books of Raghava. 2018 Jan. 1 Raghava commenced a business with Rs. 15,00,000. Jan. 6 Bought goods from Harika for cash Rs. 1,04,500. Jan. 17 Bought goods by Suri Rs. 1,48,000 Jan. 21 Commission paid Rs. 3,600. Jan 28 Cash deposited in Bank Rs.10,000 Jan. 31 Salaries paid through cheque Rs. 20,000.		CO2, CO3, CO6	14 Marks
	(OR)			
8	Discuss briefly various sources of capital for a business.		CO1	14 Marks

UNIT-V

9 From the following particulars prepare trading and profit and loss account and balance sheet as on 31.3.2019 of Mr.Rakesh. CO4, CO5, CO6 — 14 Marks

Particulars	Amount
Cash in hand	5,000
Capital	3,00,000
Rent	2,000
Wages	25,600
Office Expenses	15,900
Rates and Taxes	50,900
Salaries	1,12,600
Octroi	5,000
Carriage Inwards	4,400
Carriage outwards	1,400
Purchases	3,72,000
Purchases Returns	2,800
Sales Returns	3,500
Sales	6,64,700
Drawings	8,700
Plant and Machinery	2,70,000
Furniture	15,000
Stock	47,500
Sundry Debtors	80,000
Sundry Creditors	50,000
Discount Received	2,000

Adjustments:

1. Closing Stock Rs.56,000/
2. Depreciate Plant and Machinery by 10% and Furniture by 5%.

(OR)

10 Explain the advantages and disadvantages of computerized accounting. CO1, CO2 — 14 Marks

MANAGEMENT SCIENCE

[Computer Science and Engineering, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Henry Fayol's 14 principles of management first published in 1916. Are they useful today as they were then? Why or why not? When are they most and least useful?	CO2	14 Marks

(OR)

2		If you learned that a company had a matrix structure, would you be more or less interested in working there? Explain your answer. How would you prepare yourself to work effectively in a matrix organization?	CO3	14 Marks

UNIT-II

3	a)	Enumerate the factors influencing the plant layout.	CO1	7 Marks
	b)	Explain various channels of distribution.	CO1	7 Marks

(OR)

4	a)	The xyz company purchases a component used in manufacturing automobile generators directly from the supplier. The company's generator production which is operated at a constant rate will need 1,000 components per month throughout the year. If ordering costs are Rs 2,500 per order, unit cost is Rs 3.00 per component and annual inventory holding costs are charged at 20%, answer the following inventory policy questions : i) What is the EOQ for this component? ii) What is the length of cycle time in months? iii) What are the total inventory holding and ordering costs associated with your recommended EOQ?	CO4	7 Marks
	b)	Discuss the key aspects and elements of purchase and stores management.	CO1	7 Marks

UNIT-III

5	a)	The challenge and the role of HRM department being what it is, it is strange its status is not recognized and respected. Place yourself in the role of a HR manager. How would you reverse the trend?	CO1	7 Marks
	b)	Explain any two theories of Motivation.	CO1	7 Marks

(OR)

6		Define the term Job evaluation. Outline the methods of Job evaluation.	CO1	14 Marks

UNIT-IV

7 The activities of a project and their time estimates are given below: CO6 14 Marks

Activity	(Estimated duration of activity (in weeks)		
	Optimistic Time (t_0)	Most likely time(t_m)	Pessimistic time(t_p)
1-2	2	5	8
1-4	4	19	28
1-5	5	11	17
2-3	3	9	27
2-6	3	6	15
3-6	2	5	14
4-6	3	6	15
5-7	1	4	7
5-8	2	5	14
6-8	6	12	30
7-8	2	5	8

i) Draw the PERT network diagram.
ii) Determine the mean time and standard deviation of each activity.
iii) Determine the critical path and the standard deviation for the critical path.
iv) Calculate the slack for the events.
v) Calculate the total float, free float and independent float for each activity.

(OR)

8 Discuss the role and importance of women as an entrepreneur. CO5 14 Marks

UNIT-V

9 Discuss the need for maintenance management. Illustrate various maintenance strategies and explain the techniques of managing work environment. CO5 14 Marks

(OR)

10 a) Differentiate between Total Quality Management (TQM) and Six Sigma concepts. CO6 7 Marks

b) Describe the steps involved in Material requirement planning. CO1 7 Marks

CODE No.: 16BT5HS02 SVEC-16

COSTING AND FINANCING MANAGEMENT FOR CIVIL ENGINEERS

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	Write down the procedure involved in cost estimating.	CO2	14 Marks

(OR)

2	Write down the importance of preliminary estimates and detailed estimates.	CO4	14 Marks

UNIT-II

3	The following was the expenditure on a contract for Rs.8,00,000 commenced in January 2018: Materials Rs. 1,50,000. Wages Rs. 1,64,000. Plant Rs. 22,000. Business Charges Rs. 9,400. Cash received on account to December, 2018 amounted to 2,80,000 being 85% of work certified. The value of materials in hand as on 31-12-2018 was Rs.15,000. Prepare the Contract Account for 2018 showing the profit to be credited to the year's Profit and Loss Account. Plant is to be depreciated at 10%.	CO4	14 Marks

(OR)

4	Define Contract Costing. List out the costs not attributable to contract account.	CO1	14 Marks

UNIT-III

5	Write down the objectives and principles of Good Budgetary Control.	CO3	14 Marks

(OR)

6	Define Budget. Write down the characteristics of Budget.	CO4	14 Marks

UNIT-IV

7	Write a short note on Non-discounted Cash Flow techniques.	CO2	14 Marks

(OR)

8	"Capital budgeting decisions are irreversible". Justify?	CO4	14 Marks

UNIT-V

9	Discuss in brief about Cash Conversions cycle.	CO1	14 Marks

(OR)

10	Write a short note on Trade Credit and its benefits.	CO4	14 Marks

❀ ❀ ❀

PYTHON PROGRAMMING
[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Write notes on Python Standard Library.	CO1	7 Marks
	b)	Write a Python program that allows the user to enter two integer values and displays the results when each of the following arithmetic operators is applied. For example, if the user enters the values 7 and 5, the output would be, 7 + 5 = 12 7 - 5 = 2 7 * 5 = 35 7 / 5 = 1.40 7 // 5 = 1 7%5 = 2 7 ** 5 = 16,807 All floating-point results should be displayed with two decimal places of accuracy. In addition, all values should be displayed with commas where appropriate.	CO1	7 Marks

(OR)

2	a)	Algorithms and computers are a "perfect match". Justify.	CO2	6 Marks
	b)	List and describe the capabilities an Integrated Development Environment (IDE) should provide.	CO1	8 Marks

UNIT-II

3	a)	Illustrate selection and iterative control statements with suitable examples.	CO1	8 Marks
	b)	Write a program that sums a series of (positive) integers entered by the user, excluding all numbers that are greater than 100.	CO1	6 Marks

(OR)

4	a)	Write a Python program that prompts the user to enter types of fruit and how many pounds of fruit there are for each type. The program should then display the information in the form fruit, weight listed in alphabetical order, one fruit type per line as shown below, Apple, 6 lbs. Banana, 11 lbs. etc.	CO3, CO4, CO5	7 Marks
	b)	Give a program segment that creates an initially empty dictionary named password_lookup, prompt-ing one-by-one for usernames and passwords (until a username of 'z' is read) entering each into the dictionary.	CO3, CO5	7 Marks

UNIT-III

5		Briefly describe the following types of function arguments: i) Actual Arguments ***vs.*** Formal Parameters. ii) Mutable ***vs.*** Immutable Arguments. iii) Keyword Arguments ***vs*** Default Arguments	CO2	14 Marks

(OR)

6	a)	Elaborate on Merge Sort Recursive algorithm.	CO1	7 Marks
	b)	Explain the fundamental operations on text files.	CO4. CO5	7 Marks

UNIT-IV

7	a)	What is meant by inheritance? Describe the use of inheritance in Python by considering appropriate examples.	CO3	10 Marks
	b)	Describe what it means for a member of a class to be private.	CO3	4 Marks

(OR)

8	a)	Give a set of instructions for controlling the turtle to draw a line from the top-left corner of the screen to the bottom-right corner, and from the top-right corner to the bottom-left corner, thereby making a big X on the screen. There should be no other lines drawn on the screen.	CO5	7 Marks
	b)	Give a set of instructions that moves the turtle with an actual turtle shape from the bottom of the screen toward the top, changing its fill color when it crosses the x axis of the grid coordinates.	CO5	7 Marks

UNIT-V

9	a)	Briefly discuss tkinter Extensions.	CO5	8 Marks
	b)	Justify how tkinter's accessibility, portability and availability have made it the most widely used Python GUI solution.	CO5	6 Marks

(OR)

10		Write short notes on the following callback handlers. i) Lambda Callback Handlers. ii) Callable Class Object.	CO5	14 Marks

PULSE AND DIGITAL CIRCUITS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Describe the operation of RC High Pass Circuit when it is excited by Ramp input with aid of neat sketches.	CO1	7 Marks
	b)	Apply appropriate technique on a simple RC Circuit to convert a square wave to periodical ramp signal.	CO5	7 Marks
		(OR)		
2.	a)	Obtain the response of RC High Pass Circuit for a square wave input for different Time Constants and evaluate % Tilt.	CO1	8 Marks
	b)	Justify how a Low-pass RC circuit acts as an Integrator.	CO2	6 Marks

UNIT-II

3.	a)	What is synchronized clamping?	CO2	7 Marks
	b)	State and prove clamping circuit theorem.	CO1	7 Marks
		(OR)		
4.	a)	In a clamping circuit, for symmetrical square wave Asses the parameters of ratio of area in forward direction to area in reverse direction in terms of forward resistance R_f to reverse resistance R_r .	CO6	8 Marks
	b)	Explain the operation of a biased negative clamper with neat sketch.	CO1	6 Marks

UNIT-III

5.	a)	Design a collector-coupled monostable multivibrator with a gate width of 5ms using n-p-n silicon transistors.	CO3	8 Marks
	b)	With the help of neat diagrams, discuss the different methods of triggering a binary.	CO1	6 Marks
		(OR)		
6.	a)	Sketch and explain the operation of a Fixed-bias Bi-stable Multivibrator with relevant waveforms.	CO1	7 Marks
	b)	Apply appropriate multi-vibrating technique to convert voltage into frequency using two transistors.	CO5	7 Marks

UNIT-IV

7.	a)	Draw and explain the circuit diagram of transistor Miller time-base generator.	CO1	8 Marks
	b)	Compare the voltage and current time base generators with some examples.	CO3	6 Marks
		(OR)		
8.	a)	Explain the basic principles of Bootstrap Time-base generator.	CO1	6 Marks
	b)	Explain the principle and working of a Transistor Current Time-Base generator.	CO1	8 Marks

UNIT-V

9.	a)	Implement NOR gate using CMOS logic.	CO1	7 Marks
	b)	Explain the operation of TTL logic family.	CO1	7 Marks
		(OR)		
10.	a)	Draw and explain the operation of Bidirectional sampling gate.	CO1	7 Marks
	b)	Draw and explain the operation of ECL NOR/OR circuit.	CO1	7 Marks

DATABASE MANAGEMENT SYSTEMS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Compare conventional file processing with traditional database system.	CO1	8 Marks
	b)	Explain about different users of database system.	CO2	6 Marks
		(OR)		
2		Discuss in detail about the concepts of E-R model. Draw E-R diagram for Hospital Management system.	CO2	14 Marks

UNIT-II

3	a)	Describe integrity constraints used in relational database system.	CO4	8 Marks
	b)	What is a view? How views are implemented?	CO1	6 Marks
		(OR)		
4	a)	List and explain various operations of Relational Algebra with suitable examples.	CO2	10 Marks
	b)	Differentiate DRC and TRC.	CO3	4 Marks

UNIT-III

5	a)	Write the basic structure of SQL. Explain about Group functions used in it with examples.	CO1	8 Marks
	b)	List and explain the common data types available in SQL.	CO1	6 Marks
		(OR)		
6	a)	What is Closure set of Functional Dependency? Explain its concept.	CO2	6 Marks
	b)	Differentiate 2NF and 3NF with suitable examples.	CO1	8 Marks

UNIT-IV

7	a)	What is a transaction? Explain its operations.	CO1	7 Marks
	b)	Explain the concept of serializability test.	CO4	7 Marks
		(OR)		
8	a)	Explain the concept of locking mechanism. State and explain two-phase locking protocol.	CO2	7 Marks
	b)	Discuss about various deadlock handling methods.	CO1	7 Marks

UNIT-V

9		Write short notes on: i) Hash based indexing. ii) B-trees.	CO4	14 Marks
		(OR)		
10	a)	Explain in detail about indexed sequential access method.	CO2	7 Marks
	b)	Explain B-tree index files.	CO6	7 Marks

THEORY OF COMPUTATION

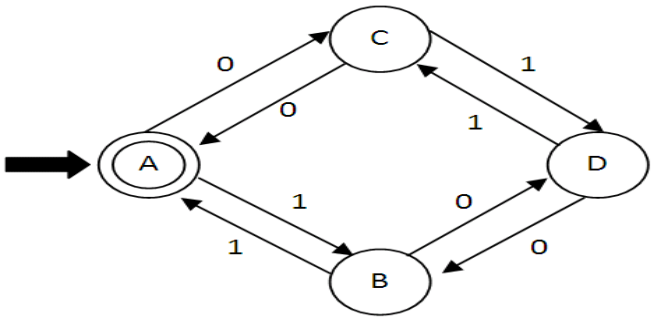
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is a Finite State Machine (FSM)? Give the Mathematical representation of FSM. Explain each component.	CO1	7 Marks
	b)	Discuss the words W in the language L accepted by the automaton in the figure.	CO2	7 Marks



(OR)

2	a)	What is NFA? Obtain the equivalent DFA for following finite automata with **ε** transitions.	CO2	7 Marks

	0	1
a	a, b	a-
b	-	c
c	C	c

	b)	Construct a FA accepting all strings over {a, b} ending in aba or aaba.	CO3	7 Marks

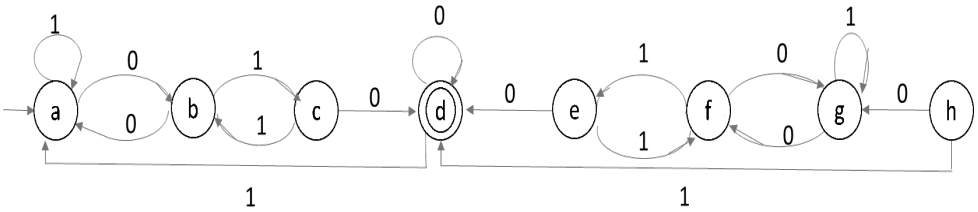
UNIT-II

3	a)	Show that the following language is not regular L = { a^P| P is Prime }.	CO5	7 Marks
	b)	How can we say that 2 DFA's are equivalent? Explain with help of an example.	CO1	7 Marks

(OR)

4	a)	Construct regular expression corresponding to the finite state diagram.	CO3	7 Marks

	b)	Minimize the following finite automata.	CO3	7 Marks



UNIT-III

5	a)	Explain the applications of CFG's.	CO1	7 Marks
	b)	Find the Parse tree for the expression **abbcde**, considering the productions $S \rightarrow aACBe$, $A \rightarrow Ab$, $A \rightarrow b$, $B \rightarrow d$.	CO4	7 Marks

(OR)

6	a)	State and prove pumping Lemma for Context Free Languages.	CO5	7 Marks
	b)	Convert the following grammar in to GNF. $S \rightarrow XA \mid BB$, $B \rightarrow b \mid SB$, $X \rightarrow b$.	CO3	7 Marks

UNIT-IV

7	a)	Discuss Chomsky hierarchy of Languages.	CO1	5 Marks
	b)	Design a NPDA that accepts the language $L = \{ a^n b^n : n \geq 0 \} \cup \{ a \}$.	CO3	9 Marks

(OR)

8	a)	Discuss about the model of linear bounded automaton.	CO1	6 Marks
	b)	Obtain a PDA to accept a string of balanced parentheses. The parentheses to be considered are (,), [,], { and }.	CO3	8 Marks

UNIT-V

9	a)	Construct a turning machine that computes 1's complement of a binary number.	CO4	7 Marks
	b)	State and explain the un-decidability of post correspondence problem.	CO1	7 Marks

(OR)

10	a)	List about multiple Turing Machines.	CO1	7 Marks
	b)	Distinguish between PCP and MPCP. What are the concepts used in UTM's?	CO1	7 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

IRRIGATION ENGINEERING

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain in detail about various factors affecting Duty.	CO1	7 Marks
	b)	Describe with neat sketches about different methods of applying water to the field.	CO2	7 Marks
		(OR)		
2	a)	Define Duty and Delta and derive the relationship between them.	CO2	7 Marks
	b)	Explain sprinkler irrigation with neat sketch and also mention its advantages over conventional methods.	CO1	7 Marks

UNIT-II

3	a)	Sketch the layout of a diversion head work and also explain the functions of various components.	CO1	7 Marks
	b)	Explain Khosla's theory of seepage below a weir with neat diagram.	CO2	7 Marks
		(OR)		
4	a)	Classify different types of diversion head works and also give examples for them.	CO1	7 Marks
	b)	Write step by step design procedure of impervious floor below the weir and also discuss about Exit gradient.	CO4	7 Marks

UNIT-III

5	a)	Distinguish between elementary and practical profile of gravity dam.	CO2	7 Marks
	b)	Discuss different types of spillways with neat sketches.	CO1	7 Marks
		(OR)		
6	a)	Discuss various seepage control measures to be adopted in Earth dam.	CO1	7 Marks
	b)	Check the stability of gravity dam of trapezoidal shape having the top width 5m and bottom width 35m and height of the dam 50m with vertical u/s face. The free board is 5m. Consider Hydro static pressure due to u/s water only, Uplift pressure and Earth quake forces. Consider both Horizontal and vertical earthquake acceleration coefficient as 0.1.	CO6	7 Marks

UNIT-IV

7	a)	Classify canal falls and explain the suitability of location of falls.	CO1	7 Marks
	b)	Discuss about various canal regulation works.	CO2	7 Marks
		(OR)		
8	a)	Describe the classification of canals.	CO2	7 Marks
	b)	Design an irrigation channel to carry a discharge of $45m^3$/sec. Assume N=0.0225, critical velocity ratio (m) =1 and the channel has a bed slope of 0.16m/km.	CO3	7 Marks

UNIT-V

9	a)	Explain various types of Aqueducts with neat sketches and mention criteria for their suitability.	CO1	7 Marks
	b)	Explain the design principles of siphon aqueduct.	CO3	7 Marks
		(OR)		
10	a)	Explain various types of cross-drainage works with neat sketches.	CO2	7 Marks
	b)	Discuss the necessity of river training works.	CO1	7 Marks

REINFOCED CEMENT CONCRETE STRUCTURES

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the differences between working stress method and limit state method	CO1	5 Marks
	b)	Explain the stress block parameters with neat sketches.	CO1	5 Marks
	c)	Define partial safety factors of load and material. Write the expressions to determine the design load and design strength of the material from their respective characteristic values employing the corresponding partial safety factors.	CO1	4 Marks
		(OR)		
2	a)	A rectangular reinforced concrete section having a breadth of 350mm is reinforced with 2 bars of 28mm and two bars of 25mm diameters at an effective depth of 700mm adopting M-20 grade concrete and Fe-415 HYSD bars. Determine the ultimate moment of resistance of the section.	CO3	7 Marks
	b)	Determine the area of the tensile reinforcement required in flanged beam having the flowing sectional dimensions to support the factored moment 275kN-m. Width of the Flange (b_f) - 750mm, width of the rib (b_w) – 300mm, thickness of the flange (D_f) - 120mm, effective depth (d)-600mm. Use M-20 grade concrete and Fe-415 HYSD bars.	CO3	7 Marks

UNIT-II

3	a)	Explain the shear reinforcement, main steel and hanger bars with neat sketch.	CO1	5 Marks
	b)	What is characteristic strength of materials and how to calculate design strength?	CO1	5 Marks
	c)	Explain limit state of collapse and limit state of serviceability.	CO1	4 Marks
		(OR)		
4		Design an L-beam for an office room floor to suit the following data: Clear span – 6m, Center to center of supports – 6.3m, The L – beam is monolithic with R.C, Columns, Spacing of beams – 2.75m c/c, Loading (office floor) - 4kN/m^2, Thickness of slab – 100mm, Width of columns -300 mm, use M-20 grade of concrete and Fe-415 HYSD bars.	CO3	14 Marks

UNIT-III

5	a)	What are the limitations for longitudinal reinforcement and transverse reinforcement in slabs as per IS code.	CO1	5 Marks
	b)	Represent IS code recommendations of torsion steel in slabs.	CO1	5 Marks
	c)	When and where is torsion reinforcement provided in slab?	CO1	4 Marks
		(OR)		
6		Design a two-way slab for a room of size 4m by 5m with dimensions and simply supported edges on all the sides with corners prevented from lifting to support a live load of 4 kN/m^2. Adopt M-20 grade concrete and Fe-415 grade HYSD bears.	CO3	14 Marks

UNIT-IV

7	a)	Define pedestal, short column and long column.	CO1	5 Marks
	b)	How will you calculate the slenderness ratio of a column?	CO1	5 Marks
	b)	Discuss about braced and un-braced columns.	CO5	4 Marks

(OR)

8		Design the reinforcement in a rectangular column of size 300mm x 500mm to support a design ultimate load of 500 KN, together with a factored moment of 200 KN-m. Adopt M-20 grade concrete and Fe-415 grade HYSD bears. Sketch the details of reinforcement. Use SP-16 chart.	CO3	14 Marks

UNIT-V

9	a)	What are the two essential requirements in design of foundation	CO1	5 Marks
	b)	Explain types of stair cases with neat sketches.	CO1	5 Marks
	c)	What is punching shear? Explain punching in footings.	CO7	4 Marks

(OR)

10		Design an isolated square sloped footing for a square column of size 450mm x 450mm. for an axial factored load of 1600 KN. Use M-20 concrete and Fe-415 steel. The S.B.C of soil is 200 kN/m^2.	CO3	14 Marks

III B.Tech I Semester (SVEC-16) Regular/Supplementary Examinations February - 2021

SOIL MECHANICS

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	If the water content of a fully saturated soil mass is 100%, what will be the relation between void ratio and specific gravity of soil?	CO3	6 Marks
	b)	The water content of saturated soil and the specific gravity of soil solids were found to be 30% and 2.70 respectively. Assuming that the unit weight of water to be 10 kN/m^3, what are the saturated unit weight and void ratio?	CO2	8 Marks
		(OR)		
2	a)	What will be the Relative density of soil, if soil is having maximum dry density of 2, minimum dry density of 1.2 and normal dry density of 1.6?	CO2	5 Marks
	b)	Sieve analysis on a dry soil sample of mass 1000 g showed that 980 g and 270 g of soil pass through 4.75 mm and 0.075 mm sieve respectively. The liquid limit and plastic limit of soil fraction passing through 425 micron sieve are 40% and 18% respectively. Classify the soil as per IS1478:1970.	CO8	9 Marks

UNIT-II

3	a)	A soil has a discharge velocity of 3 x 10^{-7} m/s and void ratio of 0.5. What is the seepage velocity?	CO2	6 Marks
	b)	If flow net of a cofferdam foundation had 6 numbers of flow channels and 12 numbers of equi-potential drops with a head of water lost during seepage being 6m through the foundation having k = 4 x 10^{-5} m/minute, then what will be the seepage loss (in m^3/day) per meter length of dam?	CO2	8 Marks
		(OR)		
4	a)	Illustrate the method of determination of coefficient of permeability of cohesion less soils.	CO4	6 Marks
	b)	If during a permeability test on a soil sample with a falling head permeameter equal time intervals are noted for a drop of head from L_1 and L_2 and against L_2 and L_3, what will be the relation between L_1, L_2 and L_3?	CO2	8 Marks

UNIT-III

5	a)	What is Newmark's Chart? How is it helpful in computing the vertical stress at any depth due to a loaded area?	CO1	7 Marks
	b)	Determine the vertical stress intensity at a point 3m below the ground level and 2.5m away from the line of action of a vertical point load of 150kN acting on the ground surface by Boussinesq's method.	CO2	7 Marks
		(OR)		
6	a)	What are the factors affecting the compaction of soils and explain them?	CO1	6 Marks
	b)	A natural soil deposit has a bulk unit weight of 20kN/m^3 and water content of 5%. Estimate the amount of water (in litres) required to be added to 1m^3 of soil to raise the water content to 20%. Assume the void ratio to remain constant. Take specific gravity of soil solids as 2.7.	CO3	8 Marks

UNIT-IV

7	a)	In a consolidation test the following results have been obtained. When the load was changed from 50kN/m^2 to 100kN/m^2, the void ratio changed from 0.70 to 0.65. Determine the coefficient of volume decrease and the compression index.	CO3	6 Marks
	b)	Find the settlement due to consolidation in a 3m x 3m column foundation with a load of 270kN. The foundation is placed 1m below the ground surface and the clay layer is 9m thick. There is a sand layer underneath the clay layer. The density of the clay layer is 18kN/m^3, the compression index C_c of the clay layer is 0.32, the recompression index C_r is 0.035, the pre-consolidation pressure (P_c) is 92kN/m^2 and the initial void ratio e_0 of clay is 0.80. Assume that the pressure is distributed at a 2:1 ratio and the clay is normally consolidated.	CO7	8 Marks

(OR)

8	a)	What are the various assumptions and limitations of Terzaghi's one dimensional consolidation theory?	CO1	6 Marks
	b)	There is a bed of compressible clay of 4m thickness with pervious sand on top and impervious rock at the bottom. In a consolidation test in the laboratory on an undisturbed specimen of clay from this deposit 90% settlement was reached in 4 hours. The specimen was 20mm thick. Estimate the time in years for the building founded over this deposit to reach 90% of its final settlement.	CO2	8 Marks

UNIT-V

9	a)	Classify triaxial tests from the point of view of drainage characteristics. Briefly describe the essential features of each.	CO3	6 Marks
	b)	Two undrained triaxial tests were conducted on soil specimens and they gave the following results. Confining pressure (kg/m^2) : 150 300 Failure load (kg/m^2) : 500 800 Determine the value of apparent cohesion and friction of the soil.	CO2	8 Marks

(OR)

10	a)	Discuss the advantages of triaxial tests over direct shear test.	CO2	6 Marks
	b)	The principal stresses at a point in a material are 100kN/m^2 and 50kN/m^2. Determine the Normal, Shear and Resultant Stress on a plane inclined at 35^0 to the major principal plane. Also find the maximum value of Obliquity for this plane.	CO2	8 Marks

STRUCTURAL ANALYSIS – II

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive the expression for maximum bending moment and shear force for a simply supported beam with a UDL moving from left to right.	CO1	6 Marks
	b)	For a simply supported beam AB of 4m with an overhang of 2m, plot the influence lines for reactions at A, shear force at D 2m away from left support A and bending moment at D. Using the influence line diagrams, determine the value of the above stress functions due to an UDL of 20kN/m covering the entire span.	CO2	8 Marks

(OR)

2	a)	An UDL of 50 kN/m of 6m length crosses a girder of span 40m left to right with the help of influence lines. Determine the values of shear force, bending moment at 12 m from the left support when the head of the load is 6m from the left support.	CO2	6 Marks
	b)	An UDL of 40kN/m and length of 3m traverse across the simply supported length of 18m.Compute the maximum bending moment at 4m from the left support and absolute bending moment using influence lines.	CO2	8 Marks

UNIT-II

3		Analyze the two–span continuous beam shown in Figure 1 by slope deflection method and draw the bending moment and shear force diagrams.	CO6	14 Marks

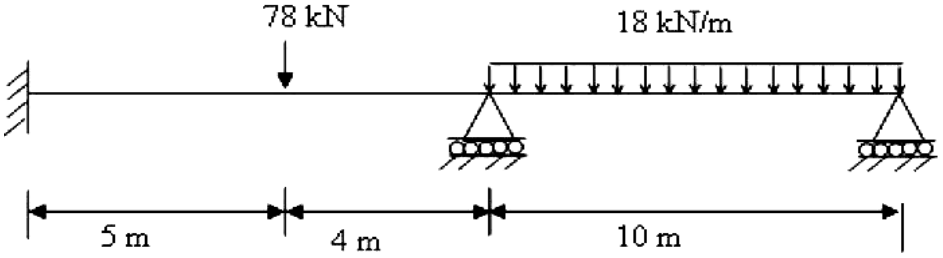

Figure 1

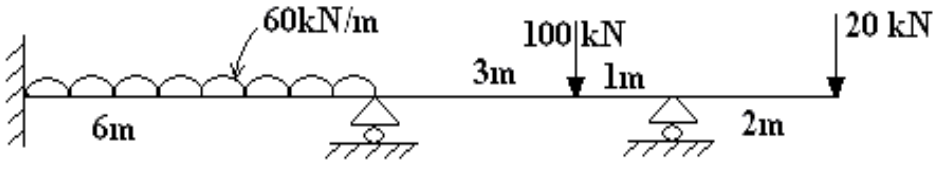
(OR)

4		Analyze the continuous beam shown in Figure 2 by using moment distribution method and draw the bending moment diagram.	CO6	14 Marks



EI is constant

Figure 2

UNIT-III

5	a)	Derive the expression for strain energy due to axial load.	CO1	7 Marks
	b)	Determine the deflection of the free end of a cantilever of length 'L' subjected to a concentrated load 'P' at the end using strain energy method.	CO2	7 Marks

(OR)

6		Analyze the continuous beam shown in Figure 3 by Kani's method.	CO4	14 Marks

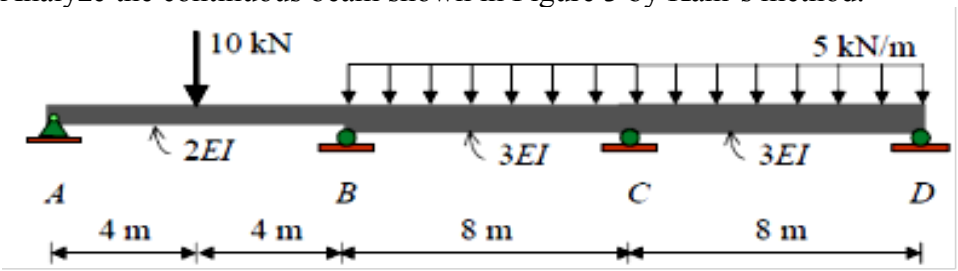


Figure 3

UNIT-IV

7		Explain the following: i) How many unknown reactive forces for a hinge, roller and fixed support with an example? ii) Give examples for statically determinate and statically indeterminate beams. iii) How many methods are available to analyze the statically indeterminate structures with an example?	CO5	14 Marks

(OR)

8		Analyze the truss shown in Figure 4 below by Castigliano's theorem. Area of cross section of members in mm^2 is shown in Figure 4. E is constant throughout.	CO4	14 Marks

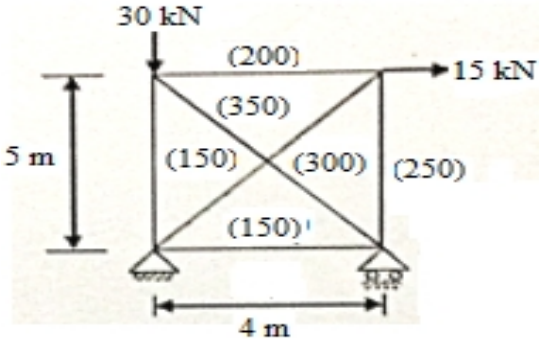

Figure 4

UNIT-V

9	a)	Define plastic hinge and shape factor.	CO1	7 Marks
	b)	Determine the collapse load of a continuous beam shown in Figure 5.	CO3	7 Marks

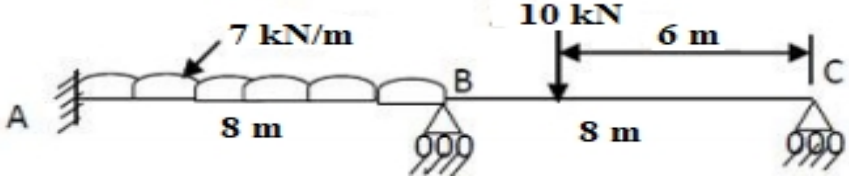

Figure 5

(OR)

10		Calculate the plastic moment capacity required for the continuous beam with working loads shown in Figure 6.	CO3	14 Marks

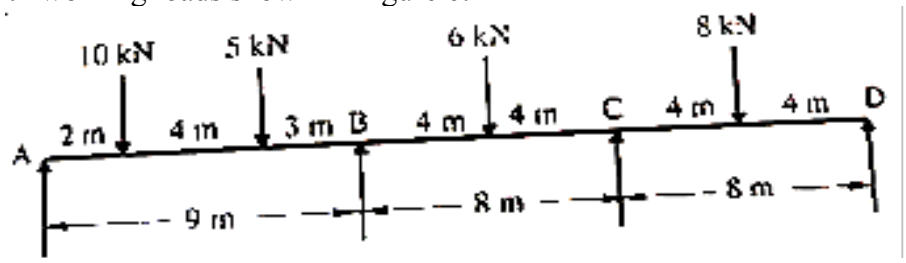

Figure 6

WASTE WATER TECHNOLOGY
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Describe the systems of sewerage. CO1 7 Marks

b) The drainage area of one sector of a town is 20 hectares, population 50,000 and rate of water supply 200lpcd. The classification of the surface of this area is as follows. CO3 7 Marks

Percentage of total surface area	Type of Surface area	Coefficient of runoff
20	Hard pavement	0.85
20	Roof surface	0.80
15	Un paved street	0.20
30	Garden and lawn	0.20
Balance	Wooden area	0.15

If the time of concentration for the area is 15minutes, find the maximum quantity of sewage from sector.

(OR)

2 a) Design a sewer to serve a population of 1 lakhs. The daily per capita water supply allowance being 150 liters of which 80% finds its way into the sewer. The slope available for the sewer to be laid is 1 in 700 and the sewer should be designed to carry 2.5 times the dry weather flow when running full. CO3 7 Marks

b) Write short notes on the following. CO1 7 Marks

i) Drop man holes. ii) Lamp holes. iii) Flushing tanks.

UNIT-II

3 a) What is BOD? Derive an expression for the first stage BOD. CO2 7 Marks

b) What do you understand by population equivalent? How do you determine it? CO2 4 Marks

c) A 2% solution of a sewage sample is incubated for 5 days at 20°C. The depletion of oxygen was found to be 4 p.p.m. Determine the BOD of the sewage. CO2 3 Marks

(OR)

4 a) Draw and describe the conventional treatment process flow diagram of municipal wastewater treatment plant. CO7 7 Marks

b) Design a grit chamber for a maximum wastewater flow of 10 MLD, to remove particles up to 0.2 mm diameter having specific gravity 2.65. The kinematic viscosity of water is 1.141×10^{-6} m^2/s at 15°C. CO3 7 Marks

UNIT-III

5	a)	What are the factors affecting biological treatment systems?	CO5	4 Marks
	b)	Write the organic loading parameters of activated sludge process.	CO5	3 Marks
	c)	Design the activated sludge units for the following data: i) Population served = 50,000 ii) Average sewage flow = 180 lpcd iii) BOD of raw sewage = 200 mg/l iv) Raw sewage suspended solids = 300 mg/l v) BOD removal in primary treatment = 35% vi) Overall BOD reduction desired = 80%	CO3	7 Marks

(OR)

6	a)	Explain the functioning of oxidation of pond with a neat sketch.	CO4	7 Marks
	b)	The effluent from a primary settling tank is applied to a standard rate filter at the rate of 3 MLD, having a BOD of 175 mg/l. Determine the depth and volume of filter. Adopting surface loading of 2000 l/m^2/day and an organic loading of 150 g/m^3/day. Also determine the efficiency of such filter unit.	CO3	7 Marks

UNIT-IV

7	a)	Explain anaerobic sludge digestion process and the factors influencing it.	CO1	7 Marks
	b)	What is sludge condition and dewatering? Explain the methods of sludge dewatering.	CO1	7 Marks

(OR)

8	a)	What is nitrification and denitrification? Explain the biological process of denitrification in the removal of organic nitrogen from wastewater.	CO2	7 Marks
	b)	What is Rotating Biological Contactor? Explain the working principle of Rotating Biological Contactor.	CO2	7 Marks

UNIT-V

9	a)	Explain the self purification of streams with the help of oxygen sag curve. Also enlist various factors affecting self purification.	CO1	7 Marks
	b)	Derive streeter-phelps equation.	CO2	7 Marks

(OR)

10	a)	What is sewage farming? What are its advantages over the method of disposal of sewage by dilution?	CO1	7 Marks
	b)	Explain the septic tank effluent disposal methods.	CO4	7 Marks

CODE No.: 16BT50201 SVEC-16

CONTROL SYSTEMS

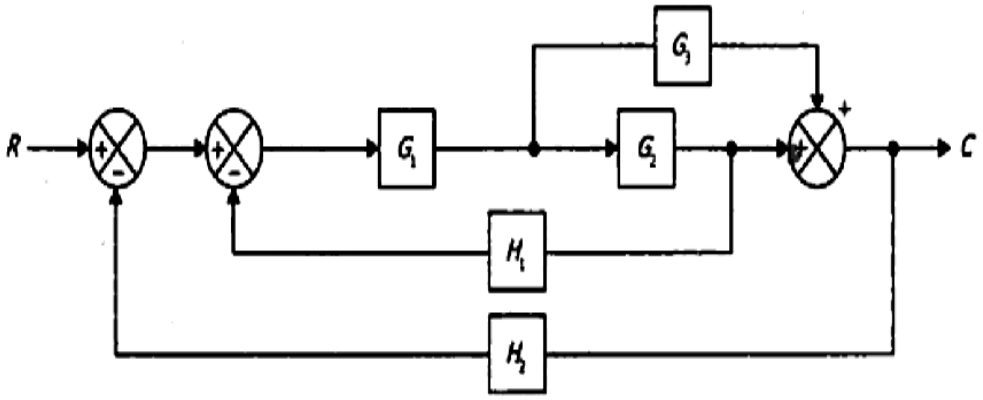
[Electrical and Electronics Engineering, Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1	a)	Describe Masson's gain formulae. List out the advantages and disadvantages of signal flow graph.	CO1	6 Marks
	b)	Determine the transfer function of the system using block diagram reduction rules.	CO4	8 Marks



(OR)

2	a)	Briefly describe the effect of feedback on parameters like gain, sensitivity and stability.	CO1	7 Marks
	b)	Derive the transfer function of armature controlled DC motor and draw the block diagram.	CO4	7 Marks

UNIT-II

3	a)	Derive the expression for time response of second order under damped system for unit step input and also draw the response curve.	CO2	6 Marks
	b)	The open loop transfer function of a unity feedback system is $G(s) = \frac{10}{s(s+4)}$. Determine the nature of response of the closed loop system for a unit step input. Also determine the rise time, peak time, peak overshoot and settling time.	CO4	8 Marks

(OR)

4	a)	Sketch the complete root locus for a system with an open loop transfer function $G(s)H(s) = \frac{K}{S^2+2S+2}$.	CO4	10 Marks
	b)	Briefly explain the difficulties in Routh-Hurwitz criterion and how to overcome.	CO1	4 Marks

UNIT-III

5	a)	Derive the expressions for Resonant peak ,Resonant frequency and Bandwidth in frequency domain analysis	CO1	6 Marks
	b)	Sketch the Nyquist plot and determine the stability of the closed loop system, whose open loop transfer function is given by $G(s)H(s) = \frac{K}{S(S^2+2S+6)}$.	CO5	8 Marks

(OR)

6		Draw the Bode plot for the transfer function $G(s) = \frac{16(1+0.5S)}{S^2(1+0.125S)(1+0.1S)}$. From graph determine: i) Gain cross over frequency. ii) Phase cross over frequency. iii) Gain Margin and Phase Margin. iv) Stability of the system.	CO5	14 Marks

UNIT-IV

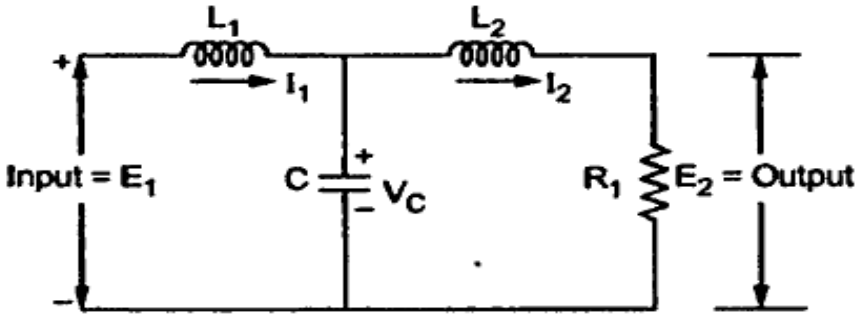
7	a)	What is compensator? Explain the design procedure for a lead compensator.	CO1	7 Marks
	b)	Derive the transfer function of PI controller and also explain how it affects steady state error in second order under damped system when subjected to unit ramp input.	CO6	7 Marks

(OR)

8		The open loop transfer function of a unity feedback system is $G(s) = \frac{K}{s^2(1+0.2s)}$. Design suitable compensator to meet the following specifications. i) Acceleration error constant K_a=10 ii) Phase Margin =30^0.	CO3	14 Marks

UNIT-V

9	a)	Differentiate the state variable approach with transfer function approach for modeling of control systems.	CO2	7 Marks
	b)	Obtain the state model of a given electrical system.	CO2	7 Marks



(OR)

10	a)	What is state transition matrix? Give the properties of state transition matrix.	CO1	7 Marks
	b)	Determine the complete controllability and complete observability of the system with $\dot{X} = AX + BU, Y = CX$. Where $A = \begin{bmatrix} 0 & 1 \\ -1 & -3 \end{bmatrix}, B = \begin{bmatrix} 1 \\ 2 \end{bmatrix}, C = \begin{bmatrix} 1 & 1 \end{bmatrix}$	CO4	7 Marks

POWER ELECTRONICS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw and explain switching or dynamic characteristics of a thyristor during its turn-on and turn-off processes.	CO1	7 Marks
	b)	Explain the different turn-on methods of SCR.	CO1	7 Marks
		(OR)		
2	a)	A thyristor is made up of a number of SCRs connected in series and parallel. The string has voltage and current ratings of 12KV and 5KA respectively. The voltage and current ratings of available SCRs are 1900Vand 1200A respectively. For a string efficiency of 95%, calculate the number of series and parallel connected SCRs.	CO1, CO4	7 Marks
	b)	Explain what are the methods used to protect an SCR from di/dt and over current.	CO1	7 Marks

UNIT-II

3	a)	Explain the operation of single phase fully controlled bridge type rectifier with R- load and derive for average output voltage.	CO2, CO4	7 Marks
	b)	Explain effects of freewheeling diode.	CO2	7 Marks
		(OR)		
4	a)	What is the effect of source inductance on the performance of 1-Φ fully controlled converter? Discuss with neat sketches.	CO2	7 Marks
	b)	Explain the operation of three phase half controlled bridge converter with RL- load with neat sketches.	CO2	7 Marks

UNIT-III

5	a)	Explain the different modes of operation of 3-Φ dual converter.	CO2	7 Marks
	b)	With neat sketch, explain single phase AC voltage controller for R-load. Derive RMS load voltage and current.	CO2	7 Marks
		(OR)		
6	a)	Explain the working of a single phase bridge type cyclo-converter for RL- load of frequency $f_0 = \frac{1}{4} f_s$ with continuous conduction mode.	CO2	10 Marks
	b)	What are the applications of cyclo-converters?	CO2, CO5	4 Marks

UNIT-IV

7	a)	Explain about step-down chopper and derive the output voltage equation.	CO2	7 Marks
	b)	A step up chopper has input voltage of 220V and output voltage of 660V. If the non-conducting time of thyristor is 100μs, compute the pulse width of the output voltage.	CO2, CO4	7 Marks

(OR)

8	a)	Discuss the differences between natural and forced commutation techniques.	CO3	6 Marks
	b)	Describe Morgan Chopper with associated waveforms.	CO2	8 Marks

UNIT-V

9	a)	Explain the operation of single phase half bridge inverter with aid of relevant waveforms	CO2, CO3	7 Marks
	b)	Explain the operation of basic series inverter.	CO2, CO3	7 Marks

(OR)

10		Explain the principle of operation of three phase inverter with 120^0 conduction mode with necessary wave forms and circuit.	CO3	14 Marks

SYNCHRONOUS MACHINES

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1	a)	Derive the EMF equation of an alternator. Discuss the effects of pitch factor and distributed factor on generated voltage.	CO1	6 Marks
	b)	A 3-phase, star connected alternator has the following data: Voltage required to be generated on open circuit is 4000V at 50Hz, speed=500 r.p.m, stator slots/pole/phase=3, conductors/slot = 12. Find: i) The number of poles. ii) Useful flux per pole.	CO4	8 Marks

(OR)

2	a)	Explain the constructional details of salient pole synchronous machine with a neat sketch.	CO1	7 Marks
	b)	A 3-phase, 16 pole alternator has the following data: Number of slots=192, conductors/slot=8, coil span=160 electrical degrees, speed=375 r.p.m, flux/pole = 55mwb. Calculate the phase and line voltages.	CO4	7 Marks

UNIT-II

3	a)	What is voltage regulation? Discuss the synchronous impedance method of calculating the voltage regulation of alternator.	CO2	6 Marks
	b)	A 30KVA, 440V, 50Hz, 3-phase, star connected synchronous generator gave the following data:	CO4	8 Marks

Field current (A):	2	4	6	7	8	10	12	14
O.C.Voltage(V):	155	287	395	440	475	530	570	592
S.C.Current(A)	11	22	34	40	46	57	69	80

Resistance between terminals is 0.3Ω. Find regulation at full load 0.8 p.f lagging, 0.8 p.f leading by EMF method, take Z_s corresponds to short circuit current of 80A.

(OR)

4	a)	Explain the two-reaction theory of salient pole alternator with necessary phasor diagrams.	CO1	7 Marks
	b)	A 100KVA, 3000V, 50Hz, 3-phase, star connected alternator has effective armature resistance of 0.2Ω. The field current of 40A produces short circuit current of 200A and an open circuit voltage 1040V (line voltage). Calculate the full load voltage regulation at 0.8 p.f lagging and leading cases. Draw the phasor diagram.	CO4	7 Marks

UNIT-III

5	a)	What is the necessity of parallel operation of alternators? Give the conditions to be satisfied.	CO1	6 Marks
	b)	What is synchronization? Explain the synchronizing of alternator using three dark lamp method with a neat diagram.	CO5	8 Marks

(OR)

6	a)	Define short circuit ratio? Briefly explain its significance in synchronous machine.	CO2	7 Marks
	b)	Explain the operation of synchronous generator with a constant load and variable excitation.	CO2	7 Marks

UNIT-IV

7	a)	Explain the working of a synchronous induction motor with a neat sketch.	CO1	7 Marks
	b)	What is damper winding? Explain the function of it and where it is located.	CO2	7 Marks
		(OR)		
8	a)	What is synchronous condenser? Explain the operation of synchronous motor as a synchronous condenser.	CO1	6 Marks
	b)	Calculate the R.M.S value of the induced voltage per phase of a 10-pole, 3-phase, 50-Hz alternator with 2 slots per pole per phase and 4 conductors per slot in two layers, the coil span is 150 electrical degrees. The flux per pole has a fundamental component of 0.12 wb and a 20% third harmonic component.	CO4	8 Marks

UNIT-V

9	a)	Using double revolving field theory, explain the torque-slip characteristics of a single phase induction motor and prove that it can not produce any starting torque.	CO2	7 Marks
	b)	Explain how universal motor can be operated from DC as well as AC supplies.	CO2	7 Marks
		(OR)		
10	a)	Explain the construction and operation of AC series motor. Compare the performance with universal motor.	CO2	7 Marks
	b)	Describe the construction and principle of operation of a reluctance motor.	CO1	7 Marks

TRANSMISSION AND DISTRIBUTION

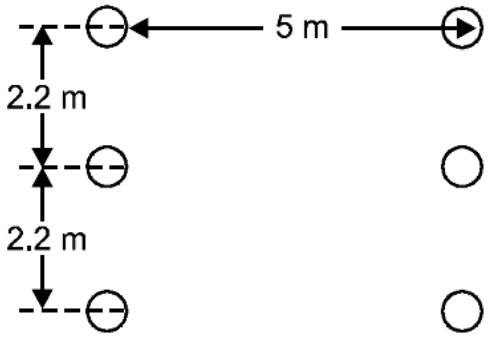
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	A single phase has two parallel conductors 2 meters apart. The diameter of each conductor is 1.2cm. Calculate the loop inductance per km of the line.	CO4	6 Marks
	b)	A 3-phase double circuit line is shown below. Radius of each conductor is 1cm. Determine the capacitance and charging current per km assuming the line is transposed and operating voltage is 220kV, 50Hz.	CO4	8 Marks



(OR)

2	a)	A 33kV, 50Hz, 3-phase underground cable, 4 km long uses three single core cables. Each of the conductor has a diameter of 2.5cm and the radial thickness of insulation is 0.5cm. Determine: i) Capacitance of the cable/phase ii) Charging current/phase iii) Total charging kVAR. The relative permittivity of insulation is 3.	CO4	10 Marks
	b)	Explain about Capacitance Grading.	CO2	4 Marks

UNIT-II

3	a)	Explain the classification of lines based on their length of transmission.	CO2	4 Marks
	b)	A single-phase 50Hz generator supplies an inductive load of 5,000kw at a power factor of 0.707 lagging by means of an overhead transmission line 20km long. The line resistance and inductance are 0.0195Ω and 0.63mH per km. The voltage at the receiving-end is required to be kept constant at 10 KV. Determine: i) the sending-end voltage and voltage regulation of the line. ii) the transmission efficiency.	CO3	10 Marks

(OR)

4	a)	Derive the expression for voltage regulation of medium transmission line if the line is represented by nominal-Π.	CO1	6 Marks
	b)	A 50Hz, 3-phase transmission line is 100km long. It has a total series impedance of 35+j140 ohms and a shunt admittance of $j930 \times 10^{-6}$ S. It delivers 40MW at 220kV, with 90% power factor lagging. Find the losses, efficiency and voltage regulation by nominal-T method.	CO3	8 Marks

UNIT-III

5	a)	A three phase 220kV, 50Hz transmission line consists of 1.2cm radius conductor spaced 2 meters apart in equilateral triangular formation. Find the disruptive critical voltage between the lines if the temperature is 20°C and atmospheric pressure is 72.2cm. Take m_o=0.96. Dielectric strength of air = 21.1kV (rms)/cm.	CO4	7 Marks
	b)	An overhead line has the following data: Span length 160m on level supports, conductor diameter 0.95 cm, weight per unit length of the conductor 0.68kg/m, ultimate stress 4250kg/cm^2, wind pressure 40kg/cm^2 of projected area, factor of safety 5. Find the sag of the conductor	CO4	7 Marks

(OR)

6	a)	A string of 3 insulators is connected across three phase, 66kV line. If the self capacitance of each unit is equal to 6 times pin to earth capacitance. Calculate the potential difference across each unit and string efficiency.	CO4	8 Marks
	b)	Briefly describe the methods of reducing corona effect.	CO2	6 Marks

UNIT-IV

7	a)	A 2-wire DC distributor is loaded as shown in figure below. The voltage at the feeding end is 230V. The distance between sections are given in meters. Determine the cross sectional area of the conductor for a minimum consumer voltage of 220V. Assume the resistance of conductor used for a distributor is 1/60Ω for one meter length and 1sq.mm conductor cross section.	CO5	9 Marks

	b)	Discuss the methods to improve the distributor voltage of an AC distributed system.	CO2	5 Marks

(OR)

8	a)	A DC ring main ABCDA is fed at point A from a 230V supply and the loop resistances of various sections are: AB is 0.04Ω; BC is 0.35Ω; CD is 0.5Ω and DA is 0.05Ω. The main supplies 100 A at B, 150 A at C and 200 A at D. Determine the voltages at each load point. If the points A and C are interconnected through a link of 0.05Ω, determine the voltages at the load points.	CO5	7 Marks
	b)	A single phase distributor AB has a total impedance of (0.1+j0.2)Ω. At the far end B, a current of 80A at 0.8 p.f. lagging and at mid-point C a current of 100A at 0.6p.f. lagging are tapped. If the voltage of the far end is maintained at 200V, determine: (i) Supply end voltage V_A. (ii) Phase angle between V_A and V_B.	CO5	7 Marks

UNIT-V

9	a)	Describe the various factors that are considered in selecting optimal location of substations.	CO1	7 Marks
	b)	Explain the main and transfer bus bar system with circuit diagram.	CO3	7 Marks

(OR)

10	a)	Explain the single bus bar system with sectionalisation and what are its merits and demerits.	CO3	8 Marks
	b)	Explain various distribution planning models.	CO1	6 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

III B.Tech I Semester (SVEC-16) Regular/Supplementary Examinations February - 2021

DESIGN OF MACHINE ELEMENTS- II
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1		A journal bearing with a diameter of 200mm and length 150mm carries a load of 20kN, when the journal speed is 150 r.p.m. The diametral clearance ratio is 0.0015. If possible, the bearing is to operate at 35°C ambient temperature without external cooling with a maximum oil temperature of 90°C. If external cooling is required, it is to be as little as possible to minimize the required oil flow rate and heat exchanger size. i) What type of oil do you recommend? ii) Will the bearing operate without external cooling? iii) If the bearing operates without external cooling, determine the operating oil temperature? iv) If the bearing operates with external cooling, determine the amount of oil in kg/min required to carry away the excess heat generated over heat dissipated, when the oil temperature rises from 85°C to 90°C, when passing through the bearing.	CO2	14 Marks

(OR)

2	a)	Discuss about hydrodynamic and hydrostatic lubrication.	CO1	7 Marks
	b)	Design a journal bearing for a centrifugal pump running at 1440 r.p.m. The diameter of the journal is 100mm and load on each bearing is 20kN. The factor *ZN/p* may be taken as 28 for centrifugal pump bearings. The bearing is running at 75°C temperature and the atmosphere temperature is 30°C. The energy dissipation coefficient is 875 W/m^2/°C. Take diametral clearance as 0.1 mm.	CO3	7 Marks

UNIT-II

3		A ball bearing subjected to a radial load of 4000 N is expected to have a satisfactory life of 12000 hours at 720 r.p.m. with a reliability of 95%. Calculate the dynamic load carrying capacity of the bearing, so that it can be selected from manufacturer's catalogue based on 90% reliability. If there are four such bearings each with a reliability of 95% in a system, what is the reliability of the complete system?	CO6	14 Marks

(OR)

4	a)	The ball bearings are to be selected for an application in which the radial load is 2000 N during 90%of the time and 8000 N during the remaining 10%. The shaft is to rotate at 150 r.p.m. Determine the minimum value of the basic dynamic load rating for 5000 hours of operation with not more than 10% failures.	CO6	7 Marks
	b)	Explain in detail about the causes and remedies of rolling contact bearings.	CO1	7 Marks

UNIT-III

5 A 15 kW and 1200 r.p.m. motor drives a compressor at 300 r.p.m. through a pair of spur gears having 20° stub teeth. The centre to centre distance between the shafts is 400mm. The motor pinion is made of forged steel having an allowable static stress as 210MPa, while the gear is made of cast steel having allowable static stress as 140MPa. Assuming that the drive operates 8 to 10 hours per day under light shock conditions, find from the standpoint of strength, CO6 14 Marks

i) Module. ii) Face width.

iii) Number of teeth and pitch circle diameter of each gear.

Check the gears thus designed from the consideration of wear. The surface endurance limit may be taken as 700MPa.

(OR)

6 Design a pair of helical gears for transmitting 22kW. The speed of the driver gear is 1800 r.p.m. and that of driven gear is 600 r.p.m. The helix angle is 30° and profile is corresponding to 20° full depth system. The driver gear has 24 teeth. Both the gears are made of cast steel with allowable static stress as 50MPa. Assume the face width parallel to axis as 4 times the circular pitch and the overhang for each gear as 150mm. The allowable shear stress for the shaft material may be taken as 50MPa. CO3 14 Marks

UNIT-IV

7 A vertical spring loaded valve is required for a compressed air receiver. The valve is to start opening at a pressure of 1 N/mm² gauge and must be fully open with a lift of 4mm at a pressure of 1.2 N/mm² gauge. The diameter of the port is 25mm. assume the allowable shear stress in steel as 480MPa and shear modulus as 80 kN/mm². Design a suitable close coiled round section helical spring having squared ground ends. Also specify initial compression and free length of the spring. CO3 14 Marks

(OR)

8 A composite spring has two closed coil helical springs. The outer spring is 15mm larger than the inner spring. The outer spring has 10 coils of mean diameter 40mm and wire diameter 5mm. The inner spring has 8 coils of mean diameter 30mm and wire diameter 4mm. When the spring is subjected to an axial load of 400 N, find CO4 14 Marks

i) compression of each spring.

ii) load shared by each spring.

iii) shear stress induced in each spring.

The modulus of rigidity may be taken as 84 kN/mm².

UNIT-V

9 Design a cast iron piston for a 4-stroke I.C Engine with the following specifications: CO3 14 Marks

Cylinder bore = 100 mm,
Stroke length = 120 mm,
Maximum gas pressure = 4 N/mm²,
Indicated mean effective pressure=0.7 N/mm²,
Mechanical efficiency = 80%,
Fuel consumption=0.15 kg per BHP hour,
Higher calorific value of the fuel=42 x 10^3 KJ/Kg,
Speed = 2000 r.p.m.

Assume any another relevant data required.

(OR)

10	An open belt connects two flat pulleys. The pulley diameters are 300mm and 450mm and the corresponding angles of lap are 160° and 210°. The smaller pulley runs at 200 r.p.m. The coefficient of friction between the belt and pulley is 0.25. It is found that the belt is on the point of slipping when 3kW is transmitted. To increase the power transmitted two alternatives are suggested, namely i) increasing the initial tension by 10%. ii) increasing the coefficient of friction by 10% by the application of a suitable dressing to the belt. Which of these two methods would be more effective? Find the percentage increase in power possible in each case.	CO5	14 Marks

INDUSTRIAL ENGINEERING AND MANAGEMENT
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain various principles of Management.	CO1	7 Marks
	b)	Discuss the Scientific Management Approach of Frank B. Gilbreth.	CO1	7 Marks
		(OR)		
2		Explain in detail about Engineering System and its objectives.	CO1	14 Marks

UNIT-II

3		Explain in detail the objectives and importance of Plant Maintenance.	CO2	14 Marks
		(OR)		
4		Discuss Reliability and explain M.T.T.R, M.T.B.F, Availability, Failure Rate, Probability of Failures and Reliability Improvement Factor.	CO2	14 Marks

UNIT-III

5	a)	Discuss the scope and purpose of Work Study.	CO3	4 Marks
	b)	Describe the procedure for Time Study and its uses in industries.	CO3	10 Marks
		(OR)		
6	a)	Explain work sampling procedure.	CO4	4 Marks
	b)	Calculate the limit of error for 95% confidence, when we estimate the activity use 20% of the time and we have 125 samples.	CO4	10 Marks

UNIT-IV

7	a)	Explain the objectives of Inventory Management.	CO5	7 Marks
	b)	Discuss the flow of Materials in Inventory Management.	CO5	7 Marks
		(OR)		
8		A company makes and sells a seasonal product. Based on a sales forecast of 2000, 3000, 6000 and 5000 per quarter, calculate a level production plan, quarterly ending inventory and average quarterly inventory. If inventory carrying costs are 10 per unit, what is the annual cost of carrying inventory? Opening and ending inventories are zero.	CO5	14 Marks

UNIT-V

9	a)	Construct an operating characteristic curve for N=1000, n=89 and C=2.	CO5	7 Marks
	b)	Discuss about multiple sampling and sequential sampling plans.	CO5	7 Marks
		(OR)		
10		Briefly explain the 7 tools of Quality Control.	CO5	14 Marks

METROLOGY AND MEASUREMENTS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1	a)	Explain the following terms. i) Accuracy. ii) Precision. iii) Calibration. iv) Reproducibility.	CO1	8 Marks
	b)	Describe wavelength standard with its advantages.	CO1	6 Marks
		(OR)		
2	a)	Differentiate between 'Hole basis System' and 'Shaft basis System' of fits.	CO1	6 Marks
	b)	Determine the tolerances on the hole and shaft for a precision running fit designated by 50H7g6. 50mm lies between the range 30-50mm. $i = 0.45\ D^{1/3} + 0.001D$ Fundamental deviation of '**g**' shaft = $-2.5\ D^{0.34}$. State the following. i) Actual maximum and minimum sizes of both hole and shaft. ii) Maximum and minimum clearances.	CO3	8 Marks

UNIT-II

3	a)	Sketch and explain the use of Limit gauges in mass production.	CO5	8 Marks
	b)	State and explain the Taylor's principle of Gauge Design.	CO1	6 Marks
		(OR)		
4	a)	Explain the principle of LVDT with neat sketch.	CO4	7 Marks
	b)	Explain the use of sine bar for measuring angle of a taper plug gauge with the help of a neat sketch.	CO2	7 Marks

UNIT-III

5	a)	Describe the Straight edge method for checking straightness of a surface.	CO2	7 Marks
	b)	What are interferometers? What are their advantages over optical flats?	CO1	7 Marks
		(OR)		
6	a)	Define the following in connection with surface texture assessment. i) Roughness. ii) Waviness. iii) Lay. iv) Sampling length. v) Primary texture. vi) Secondary texture.	CO1	6 Marks
	b)	Describe the principle and operation of Talysurf surface roughness instrument.	CO5	8 Marks

UNIT-IV

7	a)	Enumerate the effect of flank angle error on the effective diameter of a screw thread.	CO2	6 Marks
	b)	Describe the procedure for measuring the effective diameter of screw thread by using two wire method with neat sketch.	CO5	8 Marks
		(OR)		
8	a)	Describe in brief the various elements of the spur gear which are checked for accuracy of the gear.	CO1	6 Marks
	b)	Explain the method used for finding the pressure angle of the gear.	CO3	8 Marks

UNIT-V

9	a)	Explain the usage of strain gauge for measuring torque.	CO4	7 Marks
	b)	Describe the importance of strain gauge Rosettes.	CO2	7 Marks
		(OR)		
10	a)	Explain the following. i) Digital Thermometers. ii) Radiation method for measuring temperature.	CO4	8 Marks
	b)	Discuss the calibration method for pressure measuring instrument.	CO3	6 Marks

REFIRGERATION AND AIR CONDITIONING

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is meant by refrigeration? State the important applications of refrigeration.	CO1	6 Marks
	b)	The capacity of refrigerator is 150 TR when working between the temperature limits of -10^{0}C and 30^{0}C. Determine the mass of ice produced per day from water at 40^{0}C. Also find the power required to drive the unit. Assume that the cycle operates on reversed Carnot cycle. Take the specific heat of ice as 2.1 kJ/kgK and latent heat of ice as 33 kJ/kg.	CO3	8 Marks

(OR)

2	a)	Explain the working of simple evaporative air cooling system with the help of neat sketch.	CO1	6 Marks
	b)	In a refrigerator working on a Bell Coleman cycle, the air drawn into the compressor from the cold chamber at a pressure of 1 bar and 12^{0}C. After isentropic compression to 4.5 bar, the air is cooled at constant pressure to a temperature of 20^{0}C. The air is then expanded to 1 bar with polytropic expansion index is 1.25 and passed to the cold chamber. Determine: i) Work done per kg of air flow. ii) Refrigerating effect per kg of air flow. iii) Theoretical COP.	CO3	8 Marks

UNIT-II

3	a)	Explain the working of Vapour compression refrigeration system with the help of T-s and P-h diagrams.	CO1	6 Marks
	b)	A vapour compression refrigeration system is operating in between the pressure limits of 60 bar and 25 bar. The working fluid is dry and saturated at end of compression and there is no under cooling before expansion valve. Determine the COP and Capacity of the refrigerator for the fluid flow rate of 5 kg/hr. Data:	CO3	8 Marks

Pressure (bar)	Sat Temp (K)	Enthalpy(kJ/kg)		Entropy (kJ/kgK)	
		Liquid	Vapour	Liquid	Vapour
60	295	151.96	293.29	0.554	1.0332
25	261	56.32	322.58	0.226	1.2464

(OR)

4	a)	Briefly classify the refrigerants and discuss the salient features of four most commonly used refrigerants.	CO1	6 Marks
	b)	A R-12 refrigerator working between the temperatures limits of -10^{0}C and 30^{0}C. The compressor employed is of 20cm x 15cm twin cylinder single acting compressor having a volumetric efficiency of 85%. The compressor runs at 500 r.p.m. The refrigerant is sub cooled and enters at 22^{0}C in the expansion valve. The vapour is superheated and enters the compressor at -2^{0}C. Work out the following: (i) Show the process on T-s and p-h diagrams. (ii) The amount of refrigerant circulated per minute. (iii) The ton of refrigeration and the COP of the system.	CO4	8 Marks

UNIT-III

5	a)	Make a comparison between VCR and VAR systems.	CO1	6 Marks
	b)	Explain the working of Practical Vapour Absorption Refrigeration system with the help of a neat sketch.	CO3	8 Marks

(OR)

6	a)	What is the basic principle of Steam jet refrigeration system? Define: (i) Nozzle efficiency. ii) Entrainment efficiency. iii) Compression efficiency as applied to Steam jet refrigeration system.	CO3	8 Marks
	b)	What is the basic principle in Thermo electric refrigeration system and discuss it's relative advantages and disadvantages.	CO3	6 Marks

UNIT-IV

7	a)	Define the following psychrometric terms. i) DBT. ii) DPT. iii) Absolute humidity. iv) Degree of Saturation. v) Relative humidity. vi) Enthalpy of moist air.	CO5	6 Marks
	b)	A sample of air has DBT and WBT of 35^0C and 25^0C respectively as recorded by a sling psychrometer. The barometric pressure is 1.0132 bar. Make calculations for: i) the vapour pressure. ii) the relative humidity. iii) the specific humidity. iv) the degree of saturation. v) the vapour density of air. vi) the dew point temperature. vii) the enthalpy of the mixture.	CO5	8 Marks

(OR)

8	a)	Explain the following psychrometric processes. i) Sensible cooking. ii) Sensible heating. iii) Cooling and dehumidification. iv) Heating and humidification.	CO5	8 Marks
	b)	$90m^3$ of air per minute at 20^0C and 75% RH is heated until its temperature becomes 30^0C. Calculate: i) RH of the heated air. (ii) heat added to air per minute.	CO5	6 Marks

UNIT-V

9	a)	Explain the working of summer air conditioning system for hot and humid air with the help of neat sketch and showing important calculation that can be made.	CO6	6 Marks
	b)	A restaurant with a capacity of 100 persons is to be air conditioned with the following conditions: Outside conditions: 30^0C DBT and 70% RH, Desires inside conditions: 23^0C DBT and 55% RH, Quantity of air supplied: $0.5m^3$/min/person. The desired conditions are achieved by cooling, dehumidifying and then heating. Determine: i) Capacity of the cooling coil in tonnes of refrigeration. ii) Capacity of heating coil. iii) Amount of water removed by dehumidifier. iv) By-pass factor of the heating coil of its surface temperature is 35^0C.	CO6	8 Marks

(OR)

10	a)	Briefly discuss the factors affecting human comfort and discuss the concept of effective temperature.	CO6	4 Marks
	b)	The following data refer to summer air conditioning of a building: Outside design conditions: 43^0C DBT, 27^0C WBT; Inside design conditions: 25^0C DBT, 50% RH; Room sensible heat gain: 84,000 kJ/h; Room latent heat gain: 21,000 kJ/h; Bypass factor of the cooling coil used is 0.2; The return air from the room is mixed with the outside air before entry to cooling coil in the ratio of 4:1 by mass. Determine: i) Apparatus dew point of the cooling coil. ii) Entry and exit conditions of air for cooling coil. iii) Fresh air mass flow rate. iv) Refrigeration load on the cooling coil.	CO6	10 Marks

NOTE: ***Refrigerants and Refrigerant properties data book must be supplied in the examination hall***

All questions carry equal marks

UNIT-I

1	a)	Compare the Rankine efficiency of a high pressure plant operating from 80 bar and 400^{0}C with a low pressure plant operating from 40 bar and 400^{0}C, if the condenser pressure in both the cases is 0.07 bar.	CO1	7 Marks
	b)	Consider a steam power plant operating on the simple ideal Rankine cycle. Dry saturated steam enters the turbine at 15Mpa and leaves at 100kPa pressure. The exhaust steam enters the condenser and leaves it as saturated liquid. Draw the cycle on T-s and h-s diagrams and also determine the work produced by the turbine, work consumed by the pump and the thermal efficiency of the plant.	CO1	7 Marks

(OR)

2	a)	Describe the functioning the Benson boiler with the help of a diagram.	CO1	7 Marks
	b)	Explain the function of following mountings. i) Fusible plug. ii) Feed check valve. iii) Safety valve.	CO2	7 Marks

UNIT-II

3	a)	Define the following terms. i) Factor of evaporation. ii) Chimney efficiency. iii) Boiler draught	CO1	7 Marks
	b)	Discuss the classification of boiler draught.	CO3	7 Marks

(OR)

4	a)	A Lancashire boiler generates 2500 kg of dry steam/hr at a pressure of 11 bae. The grate area is 3.6m^2 and 75 kg of coal is burnt/m^2 of grate are/hr. The calorific value of the coal is 33,200 kj/kg and temperature of feed wated is 17.5^{0}C. Determine: i) Actual Evaporation/kg of coal. ii) Equivalent evaporation from and at 100^{0}C. iii) Efficiency of the boiler	CO1	7 Marks
	b)	Discuss briefly about preparation of heat balance sheet applied to boilers.	CO4	7 Marks

UNIT-III

5	a)	The inlet conditions of steam to a C-D nozzle is 20bar and 260^{0}C. The exit pressure is 4 bar. Assuming frictionless flow up to the throat and nozzle efficiency of 85%, determine: i) the flow rate for a throat area of 32.2cm^2 ii) the exit area	CO1	7 Marks
	b)	Classify the nozzles. What is theoretical pressure ratio for dry saturated steam and super heated steam?	CO2	7 Marks

(OR)

6	a)	Steam enters the blade row of an impulse turbine with a velocity of 600 m/s at angle of 25^0 to the plane of rotation of the blades. The mean blade speed is 255 m/s. The blade angle on the exit side is 30^0. The blade friction coefficient is 10%. Determine: i) Work done per kg of steam. ii) Diagram efficiency. iii) Axial thrust per kg of steam.	CO1	7 Marks
	b)	What is the classification of steam turbines?	CO5	7 Marks

UNIT-IV

7	a)	In a reaction stage of a steam turbine, the nozzle angle is 20^0 and the absolute velocity of steam at inlet to the moving blades is 240m/s. The blade velocity is 210m/s. If the blades are designed for 50% reaction, determine: i) The blade angle at inlet and exit. ii) The enthalpy drop per unit mass of steam in the moving blades and in the complete stage . iii) The diagram power for a steam flow of 1kg/s. iv) The diagram efficiency.	CO2	7 Marks
	b)	What is degree of reaction? Discuss the working of parson's reaction turbine.	CO1	7 Marks
		(OR)		
8	a)	Differentiate surface and jet condensers.	CO1	7 Marks
	b)	Explain the working of a Counter flow jet condenser with neat diagram.	CO2	7 Marks

UNIT-V

9	a)	In a gas turbine plant working on brayton cycle, the air at inlet is 27°c, 0.1MPa.The pressure ratio is 6.25 and the maximum temperature is 800°C. The turbine and compressor efficiencies are each 80%. Find the compressor work, turbine work, heat supplied, cycle efficiency and turbine exhaust temperature. Mass of air may be considered as 1Kg. Draw T-S diagram.	CO1	7 Marks
	b)	An ideal air standard Brayton cycle operates with air. At the compressor inlet, the air is at 500K and at the turbine outlet the gas is at 1400K. The pressure ratio of the cycle is. Determine: i) Net work done. ii) Thermal efficiency.	CO2	7 Marks
		(OR)		
10	a)	Distinguish between rocket propulsion and turbojet propulsion Engines.	CO2	7 Marks
	b)	Discuss the working principle of turbojet Engine with neat diagram.	CO2	7 Marks

HUMAN RESOURCE MANAGEMENT
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Define Human Resource Management (HRM). Explain the functions of HRM.	CO1	14 Marks
		(OR)		
2	a)	Elucidate the factors that effecting Human Resource Planning (HRP).	CO3	7 Marks
	b)	Explain the barriers to HRP.	CO3	7 Marks

UNIT-II

3	a)	Briefly explain the methods of collecting data for job analysis.	CO1	7 Marks
	b)	What barriers are implicated for effective selection?	CO2	7 Marks
		(OR)		
4		Write a detailed note on the modern practices of Recruitment.	CO2	14 Marks

UNIT-III

5	a)	Describe the nature and process of Training.	CO3	7 Marks
	b)	List out the Impediments to effective Training.	CO3	7 Marks
		(OR)		
6		How is the compensation plan of an employee derived? What are the factors that play a vital role in determining pay?	CO2	14 Marks

UNIT-IV

7	a)	List out the approaches to Industrial relations.	CO4	7 Marks
	b)	Write a short note on: i) Industrial Disputes Act. ii) Employee Compensation Act. iii) Indian Factories act.	CO1	7 Marks
		(OR)		
8		Define Trade Unions. Explain Trade Unions movement in India.	CO1	14 Marks

UNIT-V

9	a)	Define the term Ethics. What are the sources of business ethics?	CO6	7 Marks
	b)	As a HR Manager, how do you manage ethical issues in HRM?	CO6	7 Marks
		(OR)		
10	a)	Outline the ISO safety standards.	CO5	7 Marks
	b)	Describe ethical dilemmas.	CO6	7 Marks

MECHATRONICS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define Mechatronics. What are the objectives of Mechatronics?	CO1	5 Marks
	b)	Explain various elements of Mechatronics systems with an example.	CO1	9 Marks
		(OR)		
2	a)	Define the role of Automation. Explain how a Mechatronics system fits into it.	CO1	5 Marks
	b)	Compare Traditional Design approach with Mechatronics Design approach.	CO1	5 Marks
	c)	Differentiate Closed and Open loop feedback system.	CO1	4 Marks

UNIT-II

3		Write about:		
		i) Hall effect sensor.	CO2	5 Marks
		ii) Proximity Sensor.	CO2	5 Marks
		iii) Any light sensor used in Camera.	CO2	4 Marks
		(OR)		
4	a)	Explain various elements of Hydraulic system with neat sketches.	CO2	10 Marks
	b)	Write the working principle of Stepper motor.	CO2	4 Marks

UNIT-III

5	a)	What is signal conditioning? What is the necessity of signal conditioning and list the functions?	CO3	8 Marks
	b)	Write about: i) Noise filter. ii) Voltage to frequency converter.	CO3	6 Marks
		(OR)		
6	a)	Write the differences between Analogue and Digital signals.	CO3	4 Marks
	b)	Write about Digital to Analogue converter.	CO3	10 Marks

UNIT-IV

7	a)	What are various process controllers and write controller principles.	CO4	6 Marks
	b)	Explain PID controller by Oscillation method.	CO4	8 Marks
		(OR)		
8	a)	Write about PI controller.	CO4	6 Marks
	b)	Explain Adaptive controller.	CO4	8 Marks

UNIT-V

9		Explain Washing machine mechanism with Mechatronics system.	CO5	14 Marks
		(OR)		
10		Write about automatic car park barrier system.	CO5	14 Marks

CODE No.: 16BT50401 SVEC-16

DIGITAL COMMUNICTIONS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Sketch the electrical representation of binary data 101000111 using different formats.	CO1	7 Marks
	b)	Discuss the advantages of DM over PCM.	CO2	7 Marks
		(OR)		
2	a)	What is the necessity of non-uniform quantization and explain companding.	CO1	7 Marks
	b)	If mp = 20V and 256 quantizing levels are employed, what is the voltage between levels when there is no compression? For $\mu = 255$, what is the smallest and what is the largest effective separation between levels.	CO2	7 Marks

UNIT-II

3	a)	Analyze the effect of thermal noise in PCM.	CO2	7 Marks
	b)	Derive the expression for Signal to Quantization noise ratio in Delta modulation.	CO2	7 Marks
		(OR)		
4		Justify that the output SNR in a PCM system is superior to that of a DM system.	CO3	14 Marks

UNIT-III

5	a)	Compare probability of error of different modulation techniques.	CO2	7 Marks
	b)	Implement a digital system for generation and reception of BFSK.	CO6	7 Marks
		(OR)		
6	a)	Explain the generation and reception of DPSK signal with example.	CO6	7 Marks
	b)	Explain the principle of QPSK system. Compare binary PSK and QPSK schemes.	CO2	7 Marks

UNIT-IV

7	a)	Define the following terms: i) Channel Capacity. ii) Rate of information.	CO1	4 Marks
	b)	Consider five symbols given by the probabilities 1/2, 1/4, 1/8, 1/16, 1/16. (i) Calculate Entropy (ii) Use Huffman algorithm to develop an efficient code and calculate the average number of bits/symbol. Compare with Entropy.	CO5	10 Marks
		(OR)		
8	a)	Differentiate the terms: i) Data and Information. ii) Define entropy.	CO5	8 Marks
	b)	Find the Channel capacity of Binary symmetric channel.	CO5	6 Marks

UNIT-V

9	a)	Compare linear block codes and cyclic codes with an example.	CO4	6 Marks
	b)	What is the use of syndrome? Draw the (n-k) syndrome calculation circuit for (n, k) cyclic code and explain its operation.	CO3	8 Marks

(OR)

10	a)	The generation matrix for a (6,3) clock code is given below. Construct all code vectors of this code. $G = \begin{bmatrix} 1 & 0 & 0 & 1 & 1 & 0 \\ 0 & 1 & 0 & 0 & 1 & 1 \\ 0 & 0 & 1 & 1 & 0 & 1 \end{bmatrix}$.	CO3	8 Marks
	b)	What are cyclic codes? List their advantages and disadvantages.	CO4	6 Marks

MICROPROCESSORS AND MICROCONTROLLERS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is an Assembler directive and explain any three Assembler directives.	CO2	7 Marks
	b)	Develop an Assembly Language program to move a string from one memory location to another memory location using string instructions.	CO4	7 Marks
		(OR)		
2	a)	Discuss the fields of flag register in detail.	CO1	7 Marks
	b)	Compose an Assembly Language program to arrange given bytes in ascending order residing in memory at an offset of 6000H from segment base.	CO4	7 Marks

UNIT-II

3	a)	Describe in detail bus activities of 8086 microprocessor during memory read operation in minimum mode.	CO1	8 Marks
	b)	Explain interrupt vector table of 8086 microprocessor.	CO1	6 Marks
		(OR)		
4		Explain pin-diagram of 8086 microprocessor.	CO1	14 Marks

UNIT-III

5		Explain the internal architecture of 8255 PPI.	CO1	14 Marks
		(OR)		
6	a)	Illustrate the purpose of DMA controller in microprocessor based system designs and point out the need for DMA control in a microprocessor based system.	CO1	7 Marks
	b)	Write an Assembly Language program to initialize 8251 and receive 100 bytes of data.	CO3	7 Marks

UNIT-IV

7	a)	Differentiate microcontroller and microprocessor.	CO1	4 Marks
	b)	Explain the pin diagram of 8051 microcontroller.	CO1	10 Marks
		(OR)		
8	a)	Describe in detail addressing modes of 8051 with suitable examples.	CO1	7 Marks
	b)	Develop an Assembly Language program to move 16 bytes of data from ROM starting at location 9000H to RAM starting at 9000H.	CO4	7 Marks

UNIT-V

9	a)	Calculate the value to be loaded in to the timer registers if we want to have a time delay of 4ms show the program for timer 1 to create a pulse width of 4ms on pin P2.2. Assume X TAL=11.0592MHz.	CO4	7 Marks
	b)	Illustrate the serial communication in 8051 with its special function registers.	CO2	7 Marks
		(OR)		

10	a)	Design instructions to: i) Disable the serial interrupt, timer 1 interrupt and external hardware interrupts. ii) Enable timer 0 interrupt then. iii) Enable all interrupts with a single instruction.	CO3	7 Marks
	b)	Draw and explain the bit for mats of IE and IP registers in 8051.	CO1	7 Marks

III B.Tech I Semester (SVEC-16) Regular/Supplementary Examinations February - 2021

VLSI DESIGN

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1	a)	Identify where the diffusion and deposition process are used in NMOS/CMOS fabrication process.	CO1	7 Marks
	b)	Compare the relative merits of three different forms of pull-up for an inverter circuit. What is the best choice for realization in: i) NMOS technology. ii) CMOS technology.	CO2	7 Marks

(OR)

2	a)	Why CMOS inverter is called as ratioless logic? Explain in detail.	CO2	7 Marks
	b)	Consider an NMOS transistor in a 0.6μm process with *W/L* = 4/2 λ (i.e., 1.2/0.6 μm). In this process, the gate oxide thickness is 100 ºA and the mobility of electrons is 350cm^2/V·s. The threshold voltage is 0.7V. Plot *Ids* ***vs.*** *Vds* for *Vgs* = 0, 1, 2, 3, 4 and 5V. ε_{si} = 3.9 x 8.85 x 10^{-14} F/cm.	CO1	7 Marks

UNIT-II

3	a)	A particular layer of MOS circuit has a resistivity p = 1Ω cm. A section of this layer is 55 μm long and 5 μm wide and has a thickness of 1 μm. Calculate the resistance from one end of this section to the other (along the length). Use the concept of sheet resistance *Rs*. What is the value of *Rs*?	CO4	7 Marks
	b)	Explain how delay estimation can be performed for a standard MOS delay unit.	CO3	7 Marks

(OR)

4	a)	Represent the stick diagram of inverter for ratioed and ratioless logic. Illustrate with examples.	CO4	7 Marks
	b)	Construct NMOS inverter layout with the help of λ-based rules. Clearly mention the design rules used in the layout.	CO1	7 Marks

UNIT-III

5	a)	Discuss the use of pass transistor logic for functional unit design. Identify the limitations of pass transistor logic.	CO5	7 Marks
	b)	Estimate CMOS inverter delay using rise-time and fall-time estimation.	CO5	7 Marks

(OR)

6	a)	Explain the construction of transmission gate based adder in detail.	CO4	7 Marks
	b)	Draw the static CMOS logic circuit for the following expression. i) Y= (ABCD)′. ii) Y= [D(A+BC)]′.	CO4	7 Marks

UNIT-IV

7	a)	Differentiate the channeled gate array and channeless gate array.	CO1	7 Marks
	b)	Explain the FPGA design flow and bring out the differences with ASIC design flow.	CO5	7 Marks

(OR)

8	a)	Discuss in detail, different architectures of programmable interconnects in FPGA.	CO1	7 Marks
	b)	Discuss any two types of programming technology used in FPGA design.	CO1	7 Marks

UNIT-V

9	a)	Discuss various fault models used for testing process.	CO6	7 Marks
	b)	Differentiate the process of test vector generation for combinational and sequential circuits.	CO6	7 Marks

(OR)

10	a)	Discuss the use of power management techniques for low power designs.	CO3	7 Marks
	b)	Discuss various approaches available in design for testability.	CO1	7 Marks

MICROPROCESSORS & INTERFACING

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe the functional block diagram of 8086 microprocessor.	CO1	10 Marks
	b)	What are the advantages of pipelining in 8086?	CO1	4 Marks
		(OR)		
2		Describe the process of 20-bit physical address calculation in 8086. Explain the concept with the help of an example.	CO1	14 Marks

UNIT-II

3		Explain the functionality of 8086 in both minimum and maximum modes with sketches.	CO5	14 Marks
		(OR)		
4	a)	Explain the sequence of events that occur when 8086 encounters an interrupt.	CO1	4 Marks
	b)	Explain the following Assembler Directives of 8086 Microprocessor. i) ASSUME. ii) LABEL. iii) START. iv) GLOBAL. v) EQU.	CO2	10 Marks

UNIT-III

5	a)	Explain the CWR of I/O modes of operation of 8255 with neat sketches.	CO1	8 Marks
	b)	Draw and explain the Handshake mode of 8086 in detail with sketches.	CO1	6 Marks
		(OR)		
6		Describe the different registers of 8289 PIC with neat sketches.	CO2	14 Marks

UNIT-IV

7	a)	Describe the internal architecture of 8257 DMA.	CO2	9 Marks
	b)	What is Cycle Stealing Mode of transfer in 8257?	CO2	5 Marks
		(OR)		
8	a)	How is the TC Stop bit used in 8257?	CO2	5 Marks
	b)	What do you understand by Auto Load Bit (7) in 8257?	CO2	5 Marks
	c)	What is the functionality of AEN pin available in 8257?	CO2	4 Marks

UNIT-V

9	a)	Explain the alternate functions of any two pins of port3 in an 8051 microcontroller.	CO5	7 Marks
	b)	Mention the priority order of interrupts in an 8051 microcontroller.	CO3	7 Marks
		(OR)		
10	a)	Explain any two bit addressable registers in 8051 microcontroller with formats.	CO3	7 Marks
	b)	Explain the steps that happen when an interrupt occurs in an 8051 microcontroller specifying one example.	CO5	7 Marks

COMPUTER NETWORKS

[Electronics and Communication Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Differentiate OSI reference model with the TCP/IP reference model.	CO1	10 Marks
	b)	What are the two reasons for using layered protocols? Mention its advantages and disadvantages.	CO2	4 Marks
		(OR)		
2	a)	Explain in detail about Guided Transmission Media.	CO2	7 Marks
	b)	Explain the significance of switching. What are different switching techniques used in computer networks? Discuss.	CO6	7 Marks

UNIT-II

3	a)	Differentiate Fast and Giga Ethernet Technologies.	CO2	7 Marks
	b)	Calculate the efficiency of Slotted ALOHA with derivation.	CO4	7 Marks
		(OR)		
4	a)	Explain the methods used for error correction and error detection.	CO2	10 Marks
	b)	What is meant by virtual LAN's? Explain in detail about CSMA protocols.	CO2	4 Marks

UNIT-III

5	a)	Explain the Link State Routing algorithm. Mention the limitations of the same.	CO3	7 Marks
	b)	What is meant by Anycast Routing? Draw IPv4 header and briefly explain it.	CO3	7 Marks
		(OR)		
6	a)	Describe different design issues of Network Layer.	CO3	7 Marks
	b)	Explain the shortest path algorithm with suitable illustrations.	CO4	7 Marks

UNIT-IV

7	a)	Briefly explain about the UDP segment header.	CO1	7 Marks
	b)	Discuss Timer Management in Transport Layer.	CO2	7 Marks
		(OR)		
8	a)	The maximum payload of a TCP segment is 65,495 bytes. Why was such strange number chosen?	CO4	7 Marks
	b)	How UDP is different from TCP? Discuss.	CO2	7 Marks

UNIT-V

9	a)	With neat sketch, explain about the Domain Name System (DNS).	CO1	7 Marks
	b)	List and elaborate different Message Formats.	CO6	7 Marks
		(OR)		
10	a)	What is meant by cookie? Mention possible attacks in Application Layer.	CO2	7 Marks
	b)	Write short notes on the following: i) E-mail. ii) HTTP.	CO1	7 Marks

LINUX PROGRAMMING

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	List File and Directory maintenance commands.	CO1	9 Marks
	b)	Describe Zombie processes.	CO1	5 Marks
		(OR)		
2	a)	Write a shell script that counts number of lines in an input file using for loop.	CO3	7 Marks
	b)	Write a shell program to find whether a given number is prime or not using command line arguments.	CO5	7 Marks
		UNIT-II		
3	a)	Differentiate between PIPEs and FIFOs.	CO2	7 Marks
	b)	Write a shell script that accepts one or more filenames as arguments and converts all of them to uppercase, provided they exist in the current directory.	CO6	7 Marks
		(OR)		
4	a)	Discuss the necessity of shell programming.	CO1	7 Marks
	b)	Explain the contents of thread structures and their uses.	CO1	7 Marks
		UNIT-III		
5	a)	What is Socket? Explain Socket System calls for connectionless protocols.	CO1	7 Marks
	b)	Discuss Socket attributes.	CO1	7 Marks
		(OR)		
6	a)	Perform client and server program Socket programming for exchanging of data using system calls.	CO4	7 Marks
	b)	Discuss about system calls and device drivers.	CO1	7 Marks
		UNIT-IV		
7	a)	Write a C program to display Environment Variables.	CO3	7 Marks
	b)	Illustrate the working principles of parent process and child process using fork command.	CO5	7 Marks
		(OR)		
8	a)	Analyze shell scripts.	CO2	7 Marks
	b)	Implement the IPC form PIPE.	CO4	7 Marks
		UNIT-V		
9	a)	Discuss File system structure in Linux.	CO1	7 Marks
	b)	Analyze system calls.	CO2	7 Marks
		(OR)		
10	a)	Write a shell program to print a multiplication table of a number given from command line.	CO6	7 Marks
	b)	Describe process scheduling.	CO1	7 Marks

COMPUTER VISION
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Describe different sources and their effects for the lambertian with specular model area.	CO1	9 Marks
	b)	Analyze different shadow removal using color with an example.	CO2	5 Marks
		(OR)		
2	a)	Explain about color matching.	CO1	4 Marks
	b)	In the CMY space, the three primary colors are cyan, magenta and yellow. CMY mixing is subtractive, recall we showed that mixing cyan and magenta by over printing resulted in blue. What color is obtained by mixing cyan and yellow?	CO6	10 Marks
		UNIT-II		
3	a)	Discuss synthesizing texture. How they are used for generating different filling holes in images?	CO2	7 Marks
	b)	Investigate about local texture representation using filters of an image.	CO1	7 Marks
		(OR)		
4	a)	Write a note on human stereopsis with an example.	CO2	9 Marks
	b)	List the advantages and disadvantages of epipolar constraint.	CO2	5 Marks
		UNIT-III		
5	a)	Develop Shot Boundary detection algorithm interframe differences.	CO3	7 Marks
	b)	Analyze the important applications of interactive segmentation.	CO3	7 Marks
		(OR)		
6	a)	Explain division clustering with a graph by normalized cuts concept.	CO1	7 Marks
	b)	Give in detail mean shift to find local modes for any sample data.	CO3	7 Marks
		UNIT-IV		
7	a)	Explain classification of receiver operating curves concept in detail.	CO1	7 Marks
	b)	Differentiate between error and loss.	CO3	7 Marks
		(OR)		
8		Discuss the detection objects in images for the sliding window method.	CO3	14 Marks
		UNIT-V		
9	a)	Demonstrate geometric and semantic questions for the concept of object recognition.	CO1	9 Marks
	b)	Describe the purpose of basic technology on semantic object recognition.	CO2	5 Marks
		(OR)		
10		Analyze approximate nearest neighbors and hashing concepts with their examples.	CO1	14 Marks

DATA COMMUNICATIONS

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1	a)	Explain the different transmission models in data communications. Briefly explain about network components.	CO1	6 Marks
	b)	Draw the TCP/IP protocol suite and explain the functionality of the layers.	CO1	8 Marks
		(OR)		
2	a)	Explain the different types of noise that interfere with data communication signals.	CO1	7 Marks
	b)	What are the different types of Network models? Compare analog and digital modulation.	CO2	7 Marks

UNIT-II

3		What is companding? Explain analog and digital companding in detail.	CO1	14 Marks
		(OR)		
4	a)	Compare analog and digital transmission.	CO2	4 Marks
	b)	What is superframe and extended superframe TDM format? Explain briefly.	CO3	10 Marks

UNIT-III

5	a)	What are the three modes of terrestrial propagation of Electromagnetic waves? Explain in detail.	CO1	7 Marks
	b)	Draw functional block diagram of a standard telephone set and explain the components.	CO1	7 Marks
		(OR)		
6	a)	What is satellite multiple accessing arrangement? List and describe in detail the three forms of satellite multiple accessing arrangements with neat diagrams.	CO3	7 Marks
	b)	Explain the working of electronic telephone and subscriber loop.	CO1	7 Marks

UNIT-IV

7	a)	List various data communications character codes and explain.	CO1	10 Marks
	b)	Compare soft handoff and hard handoff.	CO3	4 Marks
		(OR)		
8	a)	With a diagram, explain first generation analog cellular telephone.	CO1	8 Marks
	b)	Describe Universal Product Code (UPC).	CO1	6 Marks

UNIT-V

9		Give a brief note on the seven components that make up a two-point data communication circuit.	CO1	14 Marks
		(OR)		
10	a)	Describe basic functions of DSU and CSU.	CO1	8 Marks
	b)	Compare Cable modems and standard Voice-band modems.	CO1	6 Marks

CODE No.: 16BT51001 SVEC-16

SREE VIDYANIKETHAN ENGINEERING COLLEGE

BIOMEDICAL INSTRUMENTATION
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1	a)	Outline a biomedical instrumentation system and explain about each component.	CO1	7 Marks
	b)	Illustrate the process of propagation of electrical pulses along the axon and neuro muscular junction with relevant diagrams.	CO1	7 Marks
		(OR)		
2		Discuss the biochemical transducers in detail.	CO5	14 Marks

UNIT-II

3	a)	Explain the anatomy and conducting system of heart with neat sketch.	CO1	7 Marks
	b)	Summarize the specifications of an ECG recorder.	CO1	7 Marks
		(OR)		
4	a)	With a neat sketch, discuss various heart sounds generated during a normal cardiac cycle.	CO1	7 Marks
	b)	Describe the process of blood pressure measurement using sphygmomanometer with neat and labeled diagram.	CO5	7 Marks

UNIT-III

5	a)	What is respiration? Describe the mechanism of respiration.	CO1	7 Marks
	b)	Discuss the 10-20 electrode placement system for EEG.	CO4	7 Marks
		(OR)		
6	a)	Illustrate the principle of working of ventilators.	CO5	7 Marks
	b)	Write short note on EEG in diagnostics.	CO2	7 Marks

UNIT-IV

7		Outline the process of Hemodialysis with diagrams. How does this technique play a useful role in medical field? Give a few examples and state the limitations of this technique.	CO5	14 Marks
		(OR)		
8		What is pacemaker? Illustrate the operation of ventricular inhibited pacemaker.	CO5	14 Marks

UNIT-V

9		Explain the principle of MRI and compare its method of visualization with CT method.	CO5	14 Marks
		(OR)		
10		Write short note on:		
		i) Echo Cardiography.	CO1	7 Marks
		ii) Ultrasonic imaging.	CO1	7 Marks

CODE No.: 16BT51002 SVEC-16

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

III B.Tech I Semester (SVEC-16) Regular/Supplementary Examinations February - 2021

INDUSTRIAL INSTRUMENTATION - II

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe the principle of buoyancy type density measuring instrument.	CO1	7 Marks
	b)	Explain the principle of rotating concentric cylinder viscometer with a neat diagram.	CO1	7 Marks
		(OR)		
2	a)	Discuss the principle and working of hygrometer method of humidity measurement in detail.	CO1	7 Marks
	b)	Explain the principle of Saybolt's viscometer with a neat diagram.	CO1	7 Marks

UNIT-II

3	a)	Explain the principle and working of Bubbler type liquid level measuring system.	CO4	7 Marks
	b)	Discuss the design aspects of flat and shaft type level measuring device.	CO4	7 Marks
		(OR)		
4	a)	Explain the scheme of capacitance type level gauging in detail.	CO2	7 Marks
	b)	Discuss the process of ultrasonic level gauging in both liquid and vapor phases.	CO2	7 Marks

UNIT-III

5	a)	Describe the principle and working of venture flow meter.	CO1	7 Marks
	b)	Calculate the flow rate in kg/hr of saturated steam flowing in a 20cm line at a pressure of 34 kg/cm^2 and producing a head of 20cm of mercury across a venture neck with $\beta = 0.5$ and across an orifice with $\beta = 0.5$.	CO1	7 Marks
		(OR)		
6	a)	What are the different types of ultrasonic flow meters? Describe ultrasonic flow measurement system with a neat schematic diagram.	CO5	7 Marks
	b)	Discuss about various sensors that are used in Vortex flow meters and along with their method of detection.	CO5	7 Marks

UNIT-IV

7	a)	Describe the principle of Wheatstone bridge conditioning circuit used with thermistors.	CO3	7 Marks
	b)	Write a detailed note on thermistors.	CO3	7 Marks
		(OR)		
8	a)	Discuss the principle of low drift amplifiers.	CO3	7 Marks
	b)	Describe the principle of electrometer amplifier.	CO3	7 Marks

UNIT-V

9	a)	Describe the working of Hall – Effect proximity switch in the Head-on and Slide-by modes.	CO6	7 Marks
	b)	Discuss about the working of Mechanical Limit switch provided with a fixed lever actuator with a neat diagram.	CO6	7 Marks
		(OR)		
10	a)	What are the essentials of purging, pressurization and ventilation? Discuss about a typical purge assembly.	CO6	7 Marks
	b)	Discuss various approaches of safety in case of Explosion hazards.	CO6	7 Marks

PRINCIPLES OF COMMUNICATIONS

[Electrical and Electronics Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1	a)	With neat sketches, explain how DSB-SC waves are generated using Balanced modulator and Ring modulator	CO3	10 Marks
	b)	A DSB-SC signal is generated using the carries $\cos(\omega_c t + \theta)$ and modulating signal $x(t)$. Find the envelope of the DSB-SC signal.	CO2	4 Marks
		(OR)		
2	a)	Write a detailed note on block diagram of electrical communication system.	CO1	10 Marks
	b)	Define modulation and explain when modulation is required.	CO5	4 Marks

UNIT-II

3	a)	Explain the generation of FM waves using indirect FM method.	CO3	10 Marks
	b)	A 10MHz carrier is frequency modulated by a sinusoidal signal of 500Hz, the maximum frequency deviation being 50KHz. Using the Carson's rule find the required bandwidth.	CO2	4 Marks
		(OR)		
4	a)	Compare Frequency Modulation and Phase Modulation.	CO5	7 Marks
	b)	With a neat sketch, explain the demodulation of FM waves.	CO1	7 Marks

UNIT-III

5	a)	Explain the methods of getting the pulse amplitude modulated waveform.	CO3	7 Marks
	b)	Write a brief note on digital communication system and its advantages.	CO1	7 Marks
		(OR)		
6	a)	Compare PAM, PWM and PPM.	CO5	7 Marks
	b)	Explain the PAM signal recovery through holding circuit method.	CO3	7 Marks

UNIT-IV

7	a)	Compare the three basic forms of digital pulse modulation.	CO5	10 Marks
	b)	A sinusoidal signal is transmitted using PCM. The output signal to quantizing noise ratio is required to be 55.8 dB. Find the minimum number of representation levels L required to achieve this performance.	CO4	4 Marks
		(OR)		
8	a)	Write a brief note on companding.	CO1	4 Marks
	b)	With a neat sketch, explain the PCM system.	CO3	10 Marks

UNIT-V

9	a)	A continuous signal is band limited to 5KHz. The signal is quantized in 8 levels of a PCM system with probabilities 0.25, 0.2, 0.2, 0.1, 0.1, 0.5, 0.5 and 0.5. Calculate Entropy and the rate of information.	CO4	4 Marks
	b)	Explain how Block codes are used for error control.	CO6	10 Marks
		(OR)		
10	a)	Explain Huffman coding with an example.	CO6	7 Marks
	b)	Write a brief note on methods of error correction.	CO6	7 Marks

COMPUTER ORGANISATION AND ARCHITECTURE

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1	a)	Draw the flowchart for adding or subtracting two floating point binary numbers.	CO5	10 Marks
	b)	Explain the different types of computers.	CO1	4 Marks
		(OR)		
2	a)	Explain the multiplication of positive numbers using array multiplier with a neat sketch.	CO1	10 Marks
	b)	Draw the flow chart for division algorithm.	CO5	4 Marks

UNIT-II

3	a)	Design 4-bit adder/subtractor and explain its function.	CO3	7 Marks
	b)	What is register transfer language? Explain the basic symbols used in register transfer.	CO1	7 Marks
		(OR)		
4	a)	Draw the block diagram of arithmetic logic shift unit and explain its operations.	CO1	7 Marks
	b)	List and explain the steps involved in the execution of a complete instruction.	CO1	7 Marks

UNIT-III

5	a)	With a neat diagram, explain the pin diagram of 8085.	CO1	7 Marks
	b)	Discuss about arithmetic and logical instructions in detail.	CO1	7 Marks
		(OR)		
6	a)	Draw and give analysis of the timing diagram for a memory read operation of 8085 microprocessor.	CO2	7 Marks
	b)	Discuss about the following of 8085 in detail: i) LHLD. ii) STAX. iii) OUT.	CO1	7 Marks

UNIT-IV

7	a)	What is an addressing mode? Explain various addressing modes of 8085 with suitable examples.	CO1	7 Marks
	b)	Write a program to arrange first 10 numbers from memory address 3000H in an ascending order.	CO4	7 Marks
		(OR)		
8	a)	What is an Interrupt? Explain about maskable interrupts of 8085.	CO1	7 Marks
	b)	Write a program to exchange the data at 5000M and 6000M memory location in reverse order.	CO4	7 Marks

UNIT-V

9	a)	Give the organization of typical hardwired control unit and explain the functions performed by the various blocks.	CO3	10 Marks
	b)	Highlight the solutions of instruction hazards.	CO1	4 Marks
		(OR)		
10	a)	Explain in detail about instruction execution characteristics.	CO1	7 Marks
	b)	Illustrate the various mapping techniques of Cache memory.	CO2	7 Marks

SENSOR AND SIGNAL CONDITIONING
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Explain the construction and working of the: i) Resistive temperature detectors. ii) Light dependent resistor.	CO1	8 Marks
	b)	Discuss working principle of Hot-wire resistive transducer.	CO2	6 Marks
		(OR)		
2	a)	Explain the various classifications of transducers and list out the factor for selection of transducer.	CO1	8 Marks
	b)	Explain the working principle of resistive hygrometer.	CO2	6 Marks
		UNIT-II		
3	a)	Explain the frequency response of capacitive sensors.	CO1	6 Marks
	b)	Explain the principle of working construction and characteristic of Linear variable differential transformers.	CO3	8 Marks
		(OR)		
4	a)	Analyze the principle of electromagnetic sensors.	CO2	6 Marks
	b)	Explain the principle of working and construction and characteristic of Linear rotary differential capacitance sensor.	CO3	8 Marks
		UNIT-III		
5	a)	What are the properties of Piezolectric materials and mention its application?	CO5	7 Marks
	b)	Explain the operation and construction of photo-voltaic cell and what are the uses.	CO1	7 Marks
		(OR)		
6	a)	Describe the construction and operation of thermocouples.	CO4	8 Marks
	b)	Explain the magneto strictive transducers working principle.	CO3	6 Marks
		UNIT-IV		
7	a)	Distinguish between the shaft and optical encoders.	CO2	6 Marks
	b)	Explain the about the smart sensors.	CO1	8 Marks
		(OR)		
8	a)	Write a note on fiber-optic sensors.	CO1	6 Marks
	b)	Explain the Ultrasonic-based sensors.	CO6	8 Marks
		UNIT-V		
9	a)	Explain the principle of operation of chopper amplifiers.	CO5	7 Marks
	b)	Discuss about the noise present in charge amplifiers.	CO1	7 Marks
		(OR)		
10		Draw circuit diagram of instrumentation amplifier and explain its function. Also derive its gain equation.	CO3	14 Marks

III B.Tech I Semester (SVEC-16) Regular/Supplementary Examinations February – 2021

COMPUTER GRAPHICS AND MULTIMEDIA

[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Discuss in detail about the midpoint circle algorithm with the help of an example	CO3	8 Marks
	b)	What is meant by raster scanning? Discuss in detail about raster method for transformation.	CO1	6 Marks
		(OR)		
2	a)	Distinguish between seed filling and scan line filling algorithm.	CO1	8 Marks
	b)	Explain Bresenham's line drawing algorithm.	CO3	6 Marks

UNIT-II

3	a)	Explain the geometric transformation of the scaling rotation and translation.	CO4	8 Marks
	b)	Derive the transformation matrix for reflection about **y = mx + b**.	CO4	6 Marks
		(OR)		
4	a)	Express window-to-viewport mapping in the form of a composite transformation matrix	CO4	8 Marks
	b)	Write about polygon clipping with an example.	CO4	6 Marks

UNIT-III

5	a)	In how many ways splines could be represented? Show illustrations.	CO1	8 Marks
	b)	Demonstrate Bezier Curves with an example.	CO2	6 Marks
		(OR)		
6	a)	Explain the area division and Octree methods.	CO2	8 Marks
	b)	Derive the matrix form for the following basic geometric transformations in 3-D graphics: i) Rotation. ii) Mirror reflection.	CO3	6 Marks

UNIT-IV

7	a)	Differentiate between multimedia and hypermedia.	CO5	8 Marks
	b)	State the advantage of RIFF format.	CO1	6 Marks
		(OR)		
8	a)	Describe the different color spaces / models in detail.	CO1	8 Marks
	b)	Explain about various Graphics and Image Data Types.	CO2	6 Marks

UNIT-V

9	a)	Explain the significance of SNR and SQNR in a multimedia system.	CO2	8 Marks
	b)	Explain the video compression method in detail.	CO2	6 Marks
		(OR)		
10	a)	Compare lossless and lossy compression.	CO6	8 Marks
	b)	Differentiate between directory based and arithmetic coding.	CO5	6 Marks

OBJECT ORIENTED ANALYSIS AND DESIGN

[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1	a)	Explain the software development life cycle of object-oriented approach.	CO1	7 Marks
	b)	Explain the different among Bidirectional, Unidirectional and Reflexive Association.	CO1	7 Marks
		(OR)		
2	a)	Difference between class notation and object notation in UML.	CO1	7 Marks
	b)	What is the Object Modeling Techniques (OMT)?	CO1	7 Marks

UNIT-II

3	a)	What do you mean by class diagram? Where it is used and also discuss the steps to draw the class diagram with any one example.	CO2	7 Marks
	b)	Analyze and explain how to control the visibility of elements present in package.	CO2	7 Marks
		(OR)		
4	a)	Explain in detail the different activities involve in the design of view layer classes with an example of report generation system that shows the performance of student in various courses in his class.	CO1	7 Marks
	b)	Construct and explain the class diagram for library management system.	CO2	7 Marks

UNIT-III

5		Draw the use case model for the following system and explain. A computerized banking network includes both human cashiers and Automatic Teller Machines (ATM) to be shared by a consortium of banks. Each bank provides its own computer to maintain its own accounts and process transactions against them. Cashier stations are owned by individual banks and communicate directly with the bank computers. Human cashiers enter account and transaction data ATM accepts a cash card, interacts with the user, communicates with the central computer to carry out the transaction, dispenses the cash and prints receipts. The system requires appropriate record keeping and security provisions. The system must handle concurrent accesses to the same account correctly.	CO3	14 Marks
		(OR)		
6	a)	Illustrate with an example, the relationship between sequence diagram and use cases.	CO3	7 Marks
	b)	Explain what a domain model is and what function it fulfills.	CO3	7 Marks

UNIT-IV

7		Discuss the following concepts of activity diagrams with suitable examples. i) Transition. ii) Branching. iii) fork and join. iv) swim lanes.	CO4	14 Marks
		(OR)		

8		Write short notes on: i) Tagged values. ii) Concurrent substate. iii) Active objective. iv) Adornments. v) Events and signals.	CO4	14 Marks

UNIT-V

9	a)	Explain about the forward and reverse engineering.	CO5	7 Marks
	b)	Explain about the modeling executable files, libraries and tables and files and documents.	CO5	7 Marks

(OR)

10		Consider the application is assumed to be a web based application which is deployed in a clustered environment using server 1, server 2 and server 3. The user is connecting to the application using internet. The control is flowing from the caching server to the clustered environment. Draw the deployment diagram of order management system.	CO5	14 Marks

CODE No.: 16BT51203 SVEC-16

WEB TECHNOLOGIES
[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Differentiate XHTML and HTML5.	CO1, CO2	7 Marks
	b)	Discuss Form Elements.	CO1	7 Marks
		(OR)		
2	a)	Explain drag and drop features, offline web applications and web communication features.	CO1, CO2	7 Marks
	b)	Discuss the tags: i) font. ii) pre. iii) meta. iv) video.	CO1	7 Marks
		UNIT-II		
3	a)	Compare the features of CSS2 with CSS3.	CO1, CO2	7 Marks
	b)	What is CSS box model? Discuss with suitable example	CO1, CO2	7 Marks
		(OR)		
4	a)	What is the need of scripting? Write a script to check whether the given number is palindrome number or not.	CO4	7 Marks
	b)	What is recursive function? Write a recursive function to find the factorial of a given number.	CO4	7 Marks
		UNIT-III		
5	a)	What are the JQuery Selectors? Explain with suitable example.	CO5	7 Marks
	b)	Discuss the JQuery Events with example.	CO5	7 Marks
		(OR)		
6	a)	What are the advantages of Bootstrap?	CO5	7 Marks
	b)	Explain responsive images in Bootstrapping.	CO5	7 Marks
		UNIT-IV		
7	a)	Compare client side scripting and server side scripting.	CO3	7 Marks
	b)	Write a PHP Script to find the maximum of given n numbers.	CO1, CO4	7 Marks
		(OR)		
8	a)	Discuss PHP control structures.	CO1	7 Marks
	b)	Write a PHP function to compute m powered n (m^n).	CO1, CO4	7 Marks
		UNIT-V		
9	a)	Discuss cookie and session management in PHP.	CO3	7 Marks
	b)	Develop a PHP application which read employee information details from the HTML form and store this information in a database.	CO2, CO3	7 Marks
		(OR)		
10	a)	Discuss MySQL database transactions.	CO1, CO6	7 Marks
	b)	Design a simple PHP application which uses prepare statement.	CO1, CO6	7 Marks

OBJECT ORIENTED PROGRAMMING

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1	a)	Describe various features of object oriented programming that are supported by Java language.	CO1	5 Marks
	b)	List out various types of constructors in Java language. Explain each of them with an example	CO1	9 Marks
		(OR)		
2	a)	Illustrate with an example, how methods are overloading in Java.	CO3	9 Marks
	b)	What is recursion? Write a program to find out the factorial of a given number using recursion.	CO1	5 Marks

UNIT-II

3	a)	Discuss about super keyword with an example.	CO3	8 Marks
	b)	What is meant by a package? Write the syntax for creating a package.	CO2	6 Marks
		(OR)		
4	a)	Create an interface with the methods void set( ) and void compute( ). Create a class with the variables length and breadth which implements this interface to find the area of rectangle.	CO3, CO6	9 Marks
	b)	What are the differences between abstract class and an interface?	CO3	5 Marks

UNIT-III

5	a)	Briefly explain the keywords try, catch and finally with their syntax.	CO1	6 Marks
	b)	Distinguish between throw and throws keyword with examples.	CO1, CO2	8 Marks
		(OR)		
6	a)	Discuss about the life cycle of a thread with a neat diagram.	CO1	7 Marks
	b)	Describe the mechanism employed in inter thread communication in Java.	CO1, CO2	7 Marks

UNIT-IV

7	a)	Discuss about Linked List class with an example.	CO2	6 Marks
	b)	Explain Applet Life Cycle and its methods with a neat sketch.	CO4	8 Marks
		(OR)		
8	a)	Create an Applet that reads username and password by passing parameters from HTML documents.	CO4	7 Marks
	b)	Create an applet that looks like a Login page using AWT Controls and print the information in the same Applet when the user submits the button.	CO4	7 Marks

UNIT-V

9	a)	Discuss about various event classes.	CO4	5 Marks
	b)	Illustrate with an example, how mouse events are handled in an Applet.	CO4	9 Marks
		(OR)		
10	a)	Describe the life cycle of a Servlet and the methods used in it	CO5	9 Marks
	b)	Discuss about how Cookies are handled inside a Servlet	CO5, CO6	5 Marks

COMPILER DESIGN

[Information Technology, Computer Science and System Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

		UNIT-I		
1	a)	How to classify the phases of a compiler? Briefly describe the phases with an illustration.	CO1	8 Marks
	b)	What is interpretation? What are the different kinds of interpreters? Explain.	CO1	6 Marks
		(OR)		
2	a)	What is the need and role of Lexical Analyzer? Describe the simple for the design of Lexical Analyzer.	CO1	7 Marks
	b)	Explain input buffering strategy used in Lexical analysis phase.	CO1	7 Marks
		UNIT-II		
3	a)	Give the rules for constructing FIRST( ) and FOLLOW( ) terms.	CO3	4 Marks
	b)	Check whether the following grammar is LL(1) grammar or not? S → iCtS S → iCtSeS S → a C → b	CO3	10 Marks
		(OR)		
4	a)	Construct the SLR parsing table for the ambiguous grammar E → E+E | E*E | (E) | id	CO3	10 Marks
	b)	How to eliminate Left recursion from the grammar?	CO3	4 Marks
		UNIT-III		
5	a)	Define Syntax directed definition. What are S attributed and L attributed definitions?	CO4	7 Marks
	b)	Define syntax trees. How to construct a syntax tree? Describe.	CO4	7 Marks
		(OR)		
6	a)	Write a note on the specification of a simple type checker using example.	CO4	6 Marks
	b)	What is a type expression? Explain the equivalence of type expressions with an appropriate example.	CO4	8 Marks
		UNIT-IV		
7	a)	Write the Syntax Directed Translation for flow control statements.	CO4	7 Marks
	b)	What are the different kinds of storage allocation strategies? Explain.	CO6	7 Marks
		(OR)		
8	a)	What are the different kinds of data structures used for symbol table? Explain.	CO6	8 Marks
	b)	Explain the usage of Simple Stack Allocation Scheme.	CO6	6 Marks
		UNIT-V		
9	a)	Define Basic Block and Flow Graph.	CO2	6 Marks
	b)	Write a note on Data Flow analysis.	CO2	8 Marks
		(OR)		
10	a)	Write the simple code generation algorithm and explain with an example.	CO1	7 Marks
	b)	Write a brief note on peephole optimization.	CO2	7 Marks

SYSTEMS SOFTWARE

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the architecture of UNIX operating system with a neat diagram.	CO1	7 Marks
	b)	Explain the following commands with all the options: i) wc. ii) rm. iii) ls. v) mv. vii) cat.	CO1	7 Marks
		(OR)		
2	a)	Discuss various features of UNIX operating system.	CO2	7 Marks
	b)	Explain the commands used for mailing system in UNIX.	CO1	7 Marks

UNIT-II

3		Give overview of the UNIX file subsystem.	CO2	14 Marks
		(OR)		
4	a)	Implement 'cp' command in UNIX using system calls.	CO3	7 Marks
	b)	Explain 'DUP' system call and show the entries in data structures after execution of DUP with a neat diagram.	CO4	7 Marks

UNIT-III

5		Explain the process state model for UNIX and state transitions.	CO4	14 Marks
		(OR)		
6	a)	When kernel saves the context of a process? Write an algorithm for handling interrupts.	CO3	7 Marks
	b)	List the entries of a region table and describe the kernel operations to manipulate process address space.	CO3	7 Marks

UNIT-IV

7	a)	Write an algorithm for FORK system call.	CO4	7 Marks
	b)	Explain process termination in UNIX.	CO4	7 Marks
		(OR)		
8	a)	Explain use of Exec system with an example 'C' program.	CO4	7 Marks
	b)	Write a 'C' program to change the size of process.	CO4	7 Marks

UNIT-V

9	a)	What are the features of Transmission Control Protocol/Internet Protocol? Explain.	CO2	7 Marks
	b)	Discuss about MAC and IP addresses that can be used by TCP/IP.	CO2	7 Marks
		(OR)		
10	a)	Briefly explain Domain Name System (DNS).	CO2	7 Marks
	b)	Write short note on partitions in UNIX and explain how to create file system in UNIX.	CO3	7 Marks

III B.Tech I Semester (SVEC-16) Regular/Supplementary Examinations February - 2021

MODELING AND SIMULATION

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	List and explain the advantages and disadvantages of simulation.	CO1	8 Marks
	b)	Write a short note on list processing.	CO1	6 Marks
		(OR)		
2	a)	Explain queuing simulation in a spread sheet.	CO2	8 Marks
	b)	Illustrate simulation environments.	CO6	6 Marks
		UNIT-II		
3	a)	A bus arrives every 20 minutes at a specific stop beginning at 6.40 A.M. and continuing until 8.40 A.M. A certain passenger does not know the schedule, but arrives randomly (uniform distributed) between 7.00 A.M and 7.30 A.M. every morning. What is the probability that the passenger waits more than 5 minutes for a bus?	CO2	7 Marks
	b)	With suitable example, explain about exponential distribution.	CO4	7 Marks
		(OR)		
4	a)	Explain Poisson Process along with its properties.	CO4	9 Marks
	b)	Write about empirical distributions.	CO4	5 Marks
		UNIT-III		
5	a)	Explain queue behavior and queue discipline and list queuing notation for parallel server systems.	CO3	8 Marks
	b)	List the steady state parameters of M/G/1.	CO4	6 Marks
		(OR)		
6	a)	Name and explain some of the useful statistical models for queuing system.	CO6	8 Marks
	b)	What is network of queue? Mention the general assumption for a stable system with infinite calling population.	CO2	6 Marks
		UNIT-IV		
7	a)	What are pseudo random numbers? What are the problems that occur while generating pseudo random numbers? Also list the important considerations during generation of random numbers.	CO4	8 Marks
	b)	Explain acceptance – rejection technique for Poisson distribution.	CO3	6 Marks
		(OR)		
8	a)	Generate 5 Poisson variates with mean $\alpha = 0.25$. Random numbers are: 0.073, 0.693, 0.945, 0.739, 0.014 and 0.342.	CO4	7 Marks
	b)	Explain with an example, importance of data distribution using histogram.	CO6	7 Marks
		UNIT-V		
9	a)	What is Time Series input model? Explain AR(1) and EAR(1) model.	CO4	7 Marks
	b)	Explain verification of simulation model with a neat diagram.	CO5	7 Marks
		(OR)		
10	a)	What do you understand by 'Goodness of Fit Test'? Write the procedure for the same.	CO3	7 Marks
	b)	Differentiate between terminating and steady state simulation with respect to output analysis with an example.	CO6	7 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

III B.Tech I Semester (SVEC-16) Regular/Supplementary Examinations February - 2021

DIGITAL SIGNAL PROCESSING

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define a signal. Classify them with an example.	CO4	7 Marks
	b)	State and prove linearity, time shifting and symmetry properties of DFS.	CO2	7 Marks
		(OR)		
2	a)	Define stability of a system. Explain about BIBO stability criterion of a discrete system with an example.	CO2	7 Marks
	b)	Check the following systems for time variance causality, linearity and stability. i) $y(n) = x(n)+x(n-1)$. ii) $y(n) = n\,x(n)$.	CO4	7 Marks

UNIT-II

3	a)	Find the circular convolution of the sequences {1,-1,1,1} and {1,2,3,4,5}.	CO2	7 Marks
	b)	With a neat derivation explain the procedure to compute IDFT using Radix - 2 FFT.	CO1	7 Marks
		(OR)		
4	a)	Contrast the transforms DTFT, DFS and DFT.	CO1	7 Marks
	b)	An 8 point sequence is given by x(n) {1,2,3,4,4,3,2,1}. Compute 8 point DFT of x(n) by Radix - 2 DIF FFT	CO2	7 Marks

UNIT-III

5	a)	Convert analog filter into digital filter whose system unction is $H_a(s)=3/(s+3)(s+9)$ using impulse invariant method for T=1sec.	CO5	7 Marks
	b)	Derive an expression for order of the chebyshev analog proto type filter.	CO2	7 Marks
		(OR)		
6	a)	Design a digital low pass Butterworth digital IIR filter which is required to meet the following specifications by using bilinear transformation.. Pass band attenuation $\leq$ 2 dB, Pass band edge frequency = 4KHz. Stop band attenuation $\geq$ 40 dB, stop band edge frequency = 8KHz. Sampling rate = 24 KHz.	CO5	10 Marks
	b)	Obtain the direct form I and II form realization for the system $y(n) = -0.1y(n-1)+0.2y(n-2)+3x(n)+3.6x(n-1)+0.6x(n-2)$	CO2	4 Marks

UNIT-IV

7	a)	Explain designing of FIR filter using frequency sampling technique.	CO2	7 Marks
	b)	Realize the following FIR system described by equation using the direct form and linear phase structure. $H(z) = \frac{1}{4} + \frac{1}{2}z^{-1} + \frac{3}{4}z^{-2} + \frac{1}{2}z^{-3} + \frac{1}{4}z^{-4}$	CO3	7 Marks

(OR)

8	a)	Discus about characteristics of symmetric and anti-symmetric FIR filters.	CO3	7 Marks
	b)	Design a Linear phase band pass FIR filter with a cutoff frequencies in the range 0.4 π to 0.6π rad/sample by taking 7 samples of hamming window. Take N=11.	CO3	7 Marks

UNIT-V

9	a)	Discuss in detail bout pipelining of instruction execution in DSP processors.	CO1	7 Marks
	b)	What is meant by bit reversal address mode? Write the applications for which addressing are proffered.	CO1	7 Marks

(OR)

10	a)	Explain special addressing modes in Programmable DSPs.	CO1	7 Marks
	b)	What is the function of MAC unit used in DSP? Explain any two methods used to avoid over flow and underflow.	CO1	7 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

III B.Tech I Semester (SVEC-16) Regular/Supplementary Examinations February - 2021

IMAGE PROCESSING

[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1	a)	How is Digital Image formed? Write the digital image representation.	CO1	7 Marks
	b)	Differentiate between spatial and gray-level resolution.	CO2	7 Marks
		(OR)		
2	a)	What is an image transform? Discuss in detail about Walsh transform and Haar transform.	CO2	8 Marks
	b)	Determine the kernel coefficients of Hadamard transforms for $N = 8$.	CO4	6 Marks

UNIT-II

3	a)	Develop homomorphic filtering approach for image enhancement and derive necessary equations.	CO3	8 Marks
	b)	What is meant by Histogram of an image? Explain about Histogram specification method.	CO2	6 Marks
		(OR)		
4	a)	Develop the first order and second order derivatives in an image for edge Detection.	CO3	8 Marks
	b)	Explain the concept of Gray-level slicing and bit-plane slicing.	CO2	6 Marks

UNIT-III

5	a)	Explain the following order-statistics filters. i) max and min filters. ii) median filter. iii) alpha-trimmed mean filter.	CO2	8 Marks
	b)	Explain about linear position invariant degradation.	CO1	6 Marks
		(OR)		
6	a)	Derive expression for Wiener filter for image restoration using minimum mean square approach.	CO4	8 Marks
	b)	Discuss about unconstrained, constrained restorations.	CO1	6 Marks

UNIT-IV

7	a)	What is the image compression system model? Draw the block diagram and explain functions of its components.	CO1	8 Marks
	b)	With a neat block diagram, explain the lossy predictive coding technique.	CO2	6 Marks
		(OR)		
8	a)	Draw the block diagram of transform based image compression system and explain about each block.	CO1	8 Marks
	b)	Explain the symbol based coding technique for image compression.	CO2	6 Marks

UNIT-V

9	a)	What is the importance of YIQ color model? Explain.	CO1	6 Marks
	b)	Discuss the procedure for conversion from HSI to RGB color model.	CO1	8 Marks
		(OR)		
10	a)	Discuss about local and global Thresholding techniques for image segmentation.	CO1	8 Marks
	b)	Distinguish between region based segmentation and edge based segmentation.	CO2	6 Marks

WIRELESS NETWORKS
[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	With a neat sketch, explain medium access mechanism in GSM and DECT systems.	CO1	8 Marks
	b)	Differentiate PCS and Cellular systems.	CO1	6 Marks
		(OR)		
2	a)	Describe in detail about IP Telephony.	CO1	10 Marks
	b)	What is near-far problem? Explain with an example.	CO1	4 Marks
		UNIT-II		
3	a)	Suppose there are 7 frequency channels namely A, B, C, D, E, F, G available. Draw the hexagonal cellular architecture with a cluster size of N = 7.	CO4	4 Marks
	b)	How are secret-key and public-key algorithms different?	CO2	10 Marks
		(OR)		
4	a)	With a neat sketch, explain the handoff management process in wireless networks.	CO2	7 Marks
	b)	Describe the challenge response scheme in cellular networks.	CO2	7 Marks
		UNIT-III		
5	a)	Write in detail about the wireless solutions for home networking.	CO5	7 Marks
	b)	Give the physical specification summary of the DSSS, FHSS used by the IEEE 802.11.	CO3	7 Marks
		(OR)		
6	a)	Discuss about the IEEE 802.11 MAC management sub layer.	CO1	10 Marks
	b)	Explain the implementation of the CCK for IEEE 802.11b.	CO3	4 Marks
		UNIT-IV		
7	a)	With a neat sketch, explain the reference architecture of GSM system.	CO5	10 Marks
	b)	Write the procedure for registering a MS with the network.	CO5	4 Marks
		(OR)		
8	a)	Discuss in detail about the forward traffic channels of IS-95 system.	CO5	7 Marks
	b)	Analyze the packet transfer on uplink and downlink channels in GPRS network.	CO5	7 Marks
		UNIT-V		
9	a)	Describe the protocol entities in an ATM environment for wireless mobility.	CO6	7 Marks
	b)	Write about the requirements and architecture of HIPERLAN-1.	CO1	7 Marks
		(OR)		
10	a)	Explain the layers in protocol stack of Bluetooth.	CO5	7 Marks
	b)	How physical layer is implemented in HIPERLAN-2 transmission system?	CO1	7 Marks

MANAGERIAL ECONOMICS AND PRINCIPLES OF ACCOUNTANCY
[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Define "Managerial Economics". Explain its nature and scope. CO1 14 Marks

(OR)

2 What is demand forecasting? How is demand forecasting key for success of an enterprise? CO3, CO4 14 Marks

UNIT-II

3 Elucidate law of diminishing marginal returns. CO1 14 Marks

(OR)

4 Differentiate between: CO1, CO2 14 Marks
i) Opportunity Costs ***Vs*** Outlay Costs.
ii) Seperable Costs ***Vs*** Joint Costs.

UNIT-III

5 Define "Market". Explain features of perfect markets. CO1 14 Marks

(OR)

6 Distinguish between Price Discrimination and Product Differentiation. CO2 14 Marks

UNIT-IV

7 Elucidate various accounting concepts and conventions. CO1 14 Marks

(OR)

8 Journalize the following transactions in the books of Mr. Madhusudan. CO2, CO5, CO6 14 Marks

		Rs.
01.07.2019	Cash brought into business	60,000
	Sold goods to Ashok	8,000
03.07.2019	Bought stock from Siva	3,000
04.07.2019	Purchased Computer by cheque	20,000
06.07.2019	Withdrawn cash for domestic use	1,000
08.07.2019	Furniture purchased	4,000
11.07.2019	Returned goods to Siva	800
14.07.2019	Ashok returned goods	500
21.07.2019	Deposited cash in bank	20,000
28.07.2019	Paid rent	4,500
29.07.2019	Cash withdrawn from bank for office use	7,000
31.07.2019	Paid wages and salaries	4,800 and 12,000 respectively

UNIT-V

9 From the following balances of accounts in the books of M/s Kavitha, Prepare Trading, Profit and loss account for the year ending March 31st, 2018 and also Prepare balance sheet as on that date taking into account the following. CO4, CO5, CO6 — 14 Marks

Particulars	Amount (Rs.)	Particulars	Amount (Rs.)
Capital	450,000	Salaries	75,000
Sales	1,000,000	Commission (Dr)	15,000
Purchases	400,000	Interest (Dr)	10,000
Sales Returns	10,000	Gas, Water and Power	30,000
Purchases returns	15,000	Loan form HARS	50,000
creditors	200,000	Bills Receivable	120,000
Debtors	300,000	Bills Payable	25,000
Opening Stock	90,000	Electricity	16,000
Machinery	600,000	Wages	14,000
Furniture	100,000	Commission (Cr)	40,000

Adjustments:

i) Prepaid salaries Rs.2,000.
ii) Commission yet to be received Rs.4,000.
iii) Closing stock Rs.2,00,000/-
iv) Charge depreciation @ 10% on Machinery @ 15 % on Furniture.

(OR)

10 Compare and contrast between "Manual Accounting ***Vs*** Computerized Accounting". CO1, CO2 — 14 Marks

COSTING AND FINANCE MANAGEMENT FOR CIVIL ENGINEERS

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Examine the cost prediction with your own examples. CO1 14 Marks

(OR)

2 Differentiate between preliminary estimation and detailed estimation. CO2, CO4 14 Marks

UNIT-II

3 Explain the contract costing and its significance. CO1 14 Marks

(OR)

4 The following was the expenditure on a contract for Rs.6,00,000 commenced in January, 2020: CO1, CO4 14 Marks

Materials	Rs.1,20,000;
Wages	Rs.1,64,400;
Plant	Rs.20,000;
Business Charges	Rs.8,600.

Cash received on account to 31st December, 2020 amounted to Rs.2,40,000 being 80 per cent of work certified; the value of materials in hand as on 31-12-2020 was Rs.10,000. Prepare the Contract Account for 2020 showing the profit to be credited to the year's Profit and Loss Account. Plant is to be depreciated at 10%.

UNIT-III

5 What is budgetary control? State the main objectives of budgetary control, while explaining the main steps in budgetary control. CO1 14 Marks

(OR)

6 What is Cash Budget? Enumerate its advantages and describe its preparation. CO1 14 Marks

UNIT-IV

7 "Capital budgeting decisions are irreversible". Justify CO2, CO3 14 Marks

(OR)

8 A firm has many projects. It wants to earn at least 6% per annum on this project with the following cash flows. Do you recommend under NPV Criteria? CO3, CO4 14 Marks

Year end	0	1	2	3	4	5	6
Cash inflow	--	---	30,000	40,000	40,000	40,000	50,000
Cash outflow	1,00,000	20,000	--	--	--	--	--

UNIT-V

9 Define working capital. Explain its concepts. CO1 14 Marks

(OR)

10 How does trade credit play a major role in determining working capital? CO2, CO3 14 Marks

CODE No.:16BT40406 SVEC16 (RA)

Roll No. | | | | | | | | | | |

III B.Tech I Semester (SVEC16) Supplementary Examinations August – 2021

PULSE AND DIGITAL CIRCUITS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain in detail about attenuators.	CO1	7 Marks
	b)	Describe how a Compensated Attenuator improves the unsatisfactory response of a simple Attenuator.	CO2	7 Marks
		(OR)		
2.	a)	Derive an expression for the percentage tilt of the output of a high-pass RC circuit with large time constant excited by a symmetrical square wave with zero average value.	CO1	10 Marks
	b)	How a High Pass RC circuit acts as a Differentiator?	CO2	4 Marks

UNIT-II

3.	a)	What is synchronized clamping?	CO2	7 Marks
	b)	State and prove clamping circuit theorem.	CO1	7 Marks
		(OR)		
4.	a)	What are the limitations of diode as a shunt element in clipping circuits?	CO3	7 Marks
	b)	Explain the operation of a comparator circuit.	CO2	7 Marks

UNIT-III

5.	a)	Identify and Apply appropriate multi-vibrating technique to convert any signal to square signal, using two transistors.	CO5	7 Marks
	b)	Determine the frequency of oscillations and duty cycle for an Astable multi-vibrator with R_1=15kΩ, R_2=10kΩ, C_1= 0.01μF and C_2= 0.015μF.	CO4	7 Marks
		(OR)		
6.	a)	Draw the neat circuit diagram of a collector - coupled monostable multivibrator and explain its operation with the help of waveforms.	CO1	8 Marks
	b)	Draw and explain about the response of Schmitt circuit for: i) loop gain ≤1. ii) loop gain >1.	CO3	6 Marks

UNIT-IV

7.	a)	How to generate sweep voltage using Bootstrap principle?	CO3	7 Marks
	b)	Explain in detail about the operation of current sweep circuit.	CO5	7 Marks
		(OR)		
8.	a)	Define the terms slope error, displacement error and transmission error. How are they related for an exponential sweep circuit? Define the relation between them.	CO1	8 Marks
	b)	With the help of a neat circuit diagram, explain the working of a transistor current time- base generator.	CO2	6 Marks

UNIT-V

9.	a)	Explain the basic operating principle of sampling gates.	CO1	7 Marks
	b)	Implement NOR gate using CMOS logic.	CO2	7 Marks
		(OR)		
10.	a)	In a four diode sampling gate, obtain larger value of $(V_c)_{min}$ that improves linearity in addition to safety.	CO6	6 Marks
	b)	Implement NAND gate using CMOS logic.	CO2	8 Marks

THEORY OF COMPUTATION
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

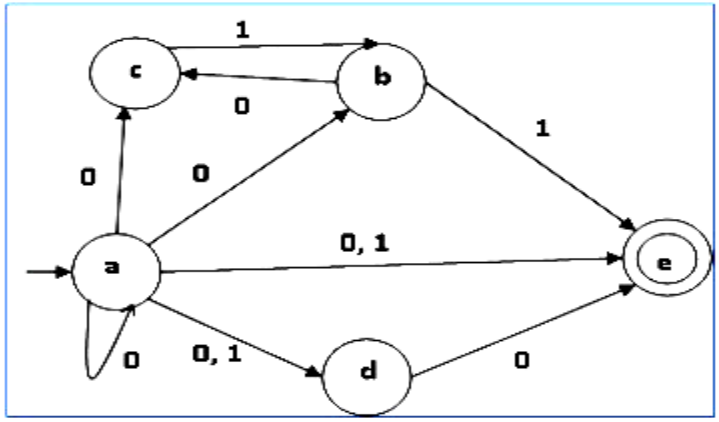
UNIT-I

1 Convert the following Moore machine into Melay machine CO1 14 Marks

Present State	Next Sate		Output
	0	1	
→ q0	q10	q20	0
q10	q10	q21	0
q11	q10	q21	1
q20	q11	q20	0
q21	q11	q20	1

(OR)

2 a) Convert the following NFA to a DFA CO1 10 Marks

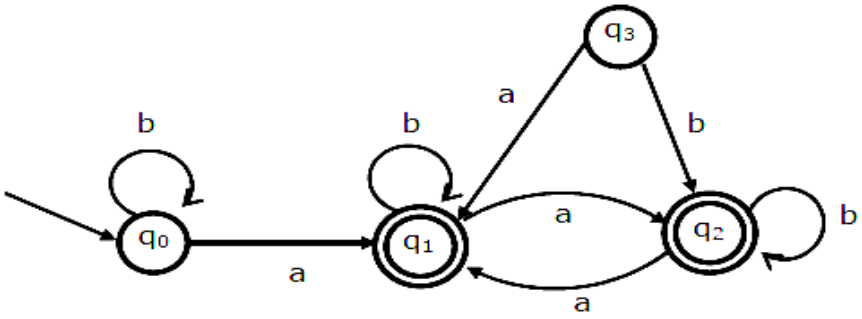


b) Differentiate NFA and DFA. CO2 4 Marks

UNIT-II

3 a) Construct FA equivalence to the following regular expression. CO3 7 Marks
$r = 01[((10)^*+111)^*+0]^*1$.

b) Construct the regular expression accepted by following finite automaton. CO3 7 Marks



(OR)

4 a) Construct a DFA for the regular expression 10 + (0+11) 0*1 and optimize the states. CO3 8 Marks

b) Show that the set $\{a^{i2}\}$ is not regular. State and explain the theorem used. CO3 6 Marks

UNIT-III

5		Construct equivalent grammar in Chomsky Normal Form for the grammar $G=(\{S,A,B\},\{a,b\}, \{S\rightarrow aAbB, A\rightarrow aA\|a, B\rightarrow bB\|b\}, S\}$.	CO3	14 Marks

(OR)

6	a)	Construct parse trees, left most and right most derivations to the input string $w=a*(a+b00)$ for the following grammar. $E\rightarrow I\|E+E\| E*E\| (E)$ $I\rightarrow$a| b| Ia| Ib| I0| I1	CO1	7 Marks
	b)	Explain the following terms. i) CFG. ii) Ambiguous grammar. iii) Sentential form. iv) Parse tree.	CO1	7 Marks

UNIT-IV

7	a)	Define PDA. Give an example for a language accepted by PDA by empty stack.	CO1	10 Marks
	b)	Explain properties of Context Free Languages.	CO1	4 Marks

(OR)

8	a)	Explain in detail about the model of Linear Bounded Automata.	CO1	8 Marks
	b)	Construct a PDA that recognizes the language $\{aibjck\| I, j, k>=i=j$ or $i=k\}$.	CO3	6 Marks

UNIT-V

9		Design a Turing Machine to recognize the language $L=\{1^n2^n3^n\| n \geq 1\}$.	CO4	14 Marks

(OR)

10		Design a Turing Machine which can multiply two positive integers.	CO1	14 Marks

IRRIGATION ENGINEERING
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What do you understand by the term irrigation? Discuss the necessity of irrigation in a tropical country like India.	CO1	7 Marks
	b)	Compute the depth and frequency of irrigation required for a certain crop with data given below. Root zone depth = 100cm, wilting point = 12%, field capacity = 22%, consumptive use = 25mm/day, apparent specific gravity of soil=1.5, efficiency of irrigation = 50%. Assume 50% depletion on available moisture before application of water at field capacity.	CO3	7 Marks
		(OR)		
2	a)	List out objectives of irrigation. Discuss the advantages and ill effects of irrigation.	CO1	7 Marks
	b)	A water course has a culturable command area of 1000 hectares. The intensity of irrigation for crop A is 40% and for crop B is 45%, both the crops being rabi crops. Crop A has a kor depth of 150mm and kor period 3 weeks and crop B has a kor depth of 100mm and kor period 2 weeks. Calculate the discharge of the water course.	CO4	7 Marks

UNIT-II

3	a)	Sketch the layout of a typical diversion head works and briefly discuss the functions of the various components of diversion head works.	CO2	7 Marks
	b)	Define diversion head work and mention the functions of diversion head work.	CO2	7 Marks
		(OR)		
4	a)	Define silt excluder and explain the working and design considerations with a neat sketch.	CO3	7 Marks
	b)	Explain the importance of exit gradient and how do you check the exit gradient.	CO2	7 Marks

UNIT-III

5	a)	Define gravity dam and discuss the components of gravity dam with a neat sketch.	CO1	7 Marks
	b)	Classify dams and discuss each in detail.	CO2	7 Marks
		(OR)		
6	a)	Briefly describe an ogee spillway and its components with a neat sketch and discuss its necessity.	CO2	7 Marks
	b)	What is an ogee spillway and how it is designed?	CO3	7 Marks

UNIT-IV

7	a)	What is a canal fall and why is it required to provide in a canal?	CO1	7 Marks
	b)	Classify falls and explain the suitability of location of falls.	CO2	7 Marks
		(OR)		

8	a)	Discuss the requirements of a good outlet.	CO2	7 Marks
	b)	Distinguish between:	CO1	7 Marks
		i) modular. ii) semi modular.		
		iii) non-modular outlets with a neat sketch.		

UNIT-V

9	a)	What are the features to be considered while designing of cross drainage works?	CO3	7 Marks
	b)	Explain the method of fixing the waterway of drain in an aqueduct.	CO5	7 Marks
		(OR)		
10	a)	Classify river training works and discuss any one in detail.	CO2	7 Marks
	b)	Discuss the relative merits and demerits of river training by embankments.	CO1	7 Marks

All questions carry equal marks

UNIT-I

1	Design a reinforced beam of rectangular section using the following data: Effective span = 5m, Width of the span = 250mm, Overall depth= 500mm, Service load (D.L+ L.L) = 40 KN/m^2, Effective cover = 50mm Materials: use M20 concrete and Fe415 steel bars.	CO3	14 Marks
	(OR)		
2	Identify the depth of neutral axis and ultimate moment of resistance of T beam section for the following data. Flange width = 800mm, Flange thickness = 150mm, Web width = 300mm. Effective depth = 420mm. Area of tension reinforcement = 14701 mm^2. Assume = M 25 grade concrete and Fe 415 grade steel.	CO2	14 Marks

UNIT-II

3	An RCC beam 300mm wide and 500mm deep is reinforced with 4 bars of 16mm dia of grade Fe415 on tension side. If design shear force is 80 kN, design the shear reinforcement consisting only of vertical stirrups. The grade of concrete used is M20.	CO3	14 Marks
	(OR)		
4	Design a cantilever beam of uniform depth for a span of 2.9m, if the superimposed load is 22 kN/m and it is monolithic with R.C column of 300mm width and 400mm deep. Use M20 grade concrete and Fe415 steel.	CO3	14 Marks

UNIT-III

5	A simply supported slab has a clear span of 2.1m and is supported on walls 400mm thick along edges. If the live load on the slab 4 kN/m^2, and the floor finish weighs 0.6 kN/m^2. Design the slab using M20 grade concrete and Fe 415 HYSD bars.	CO3	14 Marks
	(OR)		
6	Design a simply supported RCC slab for an office floor having clear dimensions of 4m x 10m with 230mm walls all around. Adopt M 20 grade concrete and Fe 415 grade HYSD bars.	CO3	14 Marks

UNIT-IV

7	Determine the ultimate load carrying capacity of rectangular column section 400 x 600mm reinforced with 10nos. of 25mm dia. Use M25 concrete and Fe415 steel.	CO3	14 Marks
	(OR)		
8	A short rectangular column having an effective length of 3m carries a factored axial compressive load of 2000 kN. Architectural requirements dictate the column size as 600 x 450mm. Design the column using M20 concrete and Fe 415 steel.	CO3	14 Marks

UNIT-V

9	a)	Write down the different types of footings and their suitability.	CO1	7 Marks
	b)	Enumerate the procedure for the design of combined rectangular footing for two columns only	CO1	7 Marks

(OR)

10		Design a combined footing for the two columns at a multi-storey building. The columns of size 400mm x 400mm transmit a working load of 300KN each and they are spaced at 5m centers. The safe bearing capacity of soil at site is 200KN/m^2. Adopt M20 grade concrete and Fe415 grade steel. Sketch the details of reinforcements in the combined footing.	CO3	14 Marks

SOIL MECHANICS
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive the relation between unit weight (γ), degree of saturation (S), void ratio (e) and unit weight of water (γ_w).	CO2	6 Marks
	b)	The mass of a moist sample collected from the field is 645 g, and its oven dry mass is 405.76 g. If G = 2.68 and the void ratio of the soil in the field is 0.83, determine: i) moist density in the field. ii) dry density in the field. iii) amount of water to be added per m^3 of soil in the field for saturation. iv) saturated density.	CO2	8 Marks

(OR)

2	a)	Define and explain: Liquid limit; Plastic limit; Shrinkage limit; and Plasticity index. Briefly describe the procedure to determine the liquid limit of a soil by Casagrande's method.	CO4	6 Marks
	b)	A soil has a liquid limit of 45%, plastic limit of 20% and flow index of 50%. Determine its toughness index. If the natural water content is 25%, comment on the state of its consistency. Also, classify the soil as per IS Classification if the fraction passing through 75 micron sieve is 60%.	CO7	8 Marks

UNIT-II

3	a)	What is flow net? Explain the properties and uses of flow net.	CO1	6 Marks
	b)	For a homogeneous earth dam 52m high and 2m free board, a flow net was constructed and following results were obtained. No. of potential drops = 25 No. of flow channels = 4 The dam has a horizontal filter of 40m length at its downstream end. Calculate the discharge per metre length of the dam if the coefficient of permeability of the dam material is 3×10^{-3} cm/sec.	CO2	8 Marks

(OR)

4	a)	Illustrate the method of determination of coefficient of permeability for cohesive soils.	CO4	6 Marks
	b)	In a falling head permeability test on a soil of length L1, the head of water in the stand pipe takes 5 seconds to fall from 900 to 135mm above the tail water level. When another soil of length 60mm is placed on the first soil, the time taken for the head to fall between the same limits is 150 seconds. The permeameter has a cross sectional area of $4560mm^2$ and stand pipe area of $130mm^2$. Calculate the permeability of second soil.	CO2	8 Marks

UNIT-III

5	a)	What are the assumptions and limitations made in Boussinesq's theory?	CO1	6 Marks
	b)	A circular ring footing for an overhead water tank carries a load of 1000kN whose outer diameter is 3m and inner diameter is 1.5m. Determine the induced stress at a depth of 3m from surface below the centre of the loaded area.	CO2	8 Marks

(OR)

6 a) What are the field methods for compacting soils? Discuss the suitability of different methods with respect to the soil type. CO1 6 Marks

b) A proposed embankment fill requires 5000m^3 of compacted soil. The void ratio of compacted fill is specified as 0.70. Four borrow area soils are available as described in the following table. CO3 8 Marks

Borrow area	Void ratio	Cost of transportation Rs./m^3
A	0.85	450
B	1.20	300
C	0.95	350
D	0.75	500

Make the necessary calculations to select the borrow area from which the soil should be brought to minimize the cost. Let specific gravity of all four soils equal to 2.70.

UNIT-IV

7 a) Describe a method to determine the pre-consolidation pressure of soil with a neat sketch and explain its significance. CO8 7 Marks

b) A layer of clay 8m thickness is located between two sand layers. The coefficient of consolidation of the clay is $5x10^{-2}$ nm^2/sec. The fill material was placed over a very large area above the top sand layers. After 3 years, what percentage of the additional pressure due to the fill material will be carried by the soil grains at the middle of the clay layer? CO2 7 Marks

(OR)

8 a) Distinguish between normally consolidated and over consolidated soil. CO2 5 Marks

b) A clay soil, tested in a consolidometer showed a decrease in void ratio from 1.20 to 1.10 when the pressure was increased from 25 kN/m^2 to 50 kN/m^2. Calculate the coefficient of compressibility and the coefficient of volume compressibility. If the coefficient of consolidation determined in the test for the given stress increment was 10m^2 / year, calculate the coefficient of permeability in cm/s. If the sample tested at the site was taken from a clay layer 3.0m in thickness, determine the consolidation settlement resulting from the given stress increment. CO2 9 Marks

UNIT-V

9 a) Discuss the relative advantages and disadvantages of the direct shear test over the triaxial compression test. How are triaxial tests classified based on drainage conditions? CO2 6 Marks

b) The results for triaxial tests conducted on three samples of a soil are given below. Obtain the shear strength parameters of the soil. CO2 8 Marks

Cell pressure (kN/m^2)	100	200	450
Deviator stress (kN/m^2)	375	575	973

(OR)

10 A consolidated undrained triaxial test was conducted on saturated clay. When the confining pressure was 200 kN/m^2, the sample failed at a deviator stress of 500kN/m^2. The pore water pressure was 150kN/m^2. The failure plane occurred at an angle of 60^o to the horizontal. CO2 14 Marks

i) Determine the normal and shear stresses on the failure plane at failure. Also calculate the maximum shear stress.

ii) If the same specimen were tested in a drained test with a confining pressure of 200 kN/m^2, what would have been the deviator stress at failure? Take c = 44 kN/m^2.

STRUCTURAL ANALYSIS-II
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 As system of 5 loads 80kN, 160kN, 160kN, 60kN and 40kN crosses a beam of 15m span with the 80kN load leading. The distance between the loads are 2.4m, 3m, 2.4m and 1.8m respectively. Find the maximum bending moment at the center of the span. Also find the absolute maximum bending moment of the beam. CO2 14 Marks

(OR)

2 a) Write a short note on Equivalent Uniformly Distributed Load. CO1 4 Marks

b) A uniformly distributed load of 50 kN/m of 6m length crosses a girder of span 40m from left to right. With the help of influence lines, determine the values of shear force and bending moment at a point 12m from the left support, when the head of the load is 16m from the left support. CO2 10 Marks

UNIT-II

3 Analyse the continuous beam ABCD shown in Fig.1 by slope deflection method and draw the bending moment diagram. CO6 14 Marks

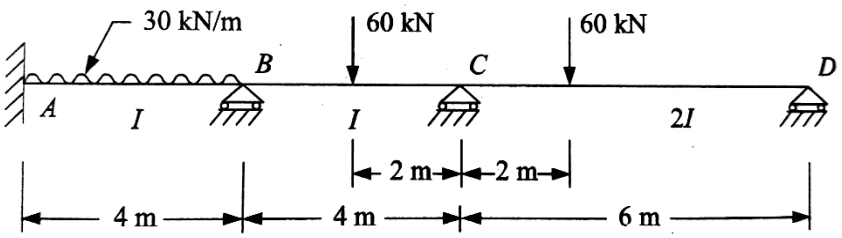

Fig.1

(OR)

4 Analyse the continuous beam shown in Fig.2 by moment distribution method, if support B sinks by 12mm. Given that E = 200 kN/mm^2 and I = 20 x 10^6 mm^4. CO4 14 Marks

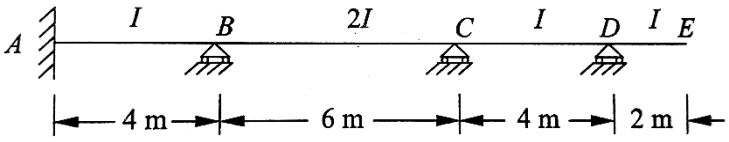

Fig.2

UNIT-III

5 Analyse the continuous beam shown in Fig.3 by Kani's method. CO4 14 Marks

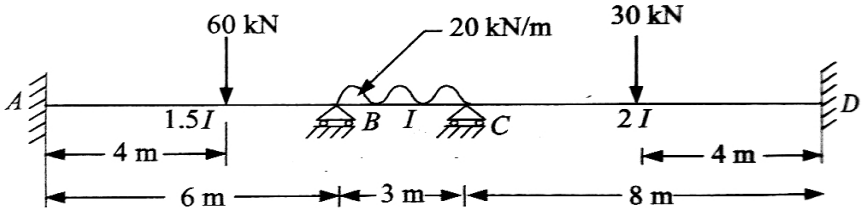

Fig.3

(OR)

6 Find the vertical deflection of joint B in the truss loaded as shown in Fig.4. The cross-sectional area of the members in mm^2 are shown in brackets. Take E = 200kN/mm^2. CO2 14 Marks

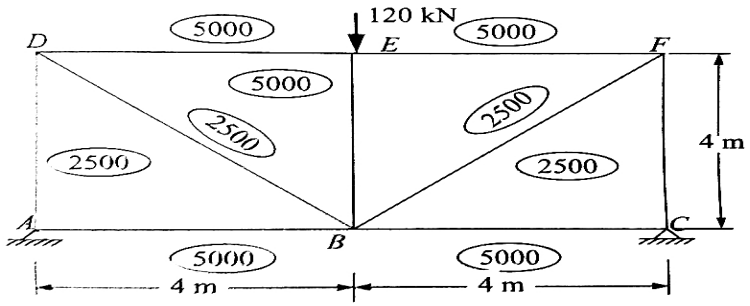

Fig.4

UNIT-IV

7 Find the stresses in all the members of the given frame as shown Fig.5, in which the cross sectional areas of vertical members are 3000mm^2 each and those of all other members are 2200mm^2. E=2x10^5 N/mm^2. CO4 14 Marks

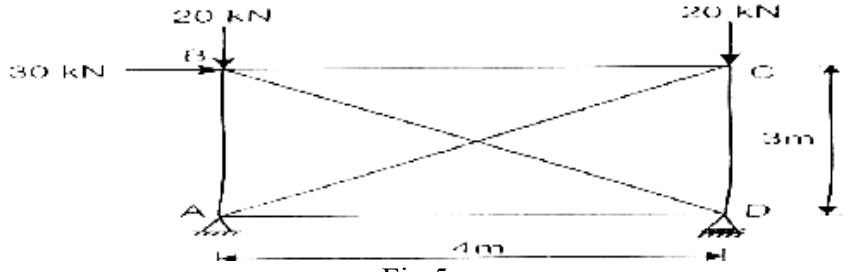

Fig.5

(OR)

8 Determine the forces in the members of the truss shown in Fig.6; AE is constant for all the Members. The member BC is 3.6m. CO4 14 Marks

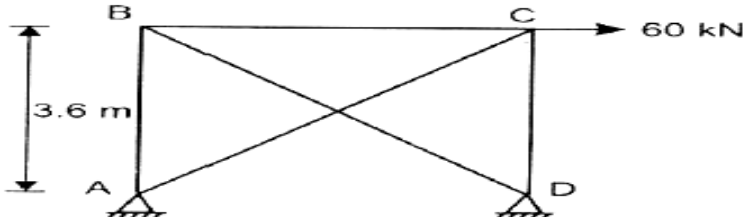

Fig.6

UNIT-V

9 a) Write the assumptions for evaluating fully plastic moment. And also derive fully plastic moment M_P and shape factor S in general. CO1 8 Marks

b) A T-section consists of a flange 150x10mm and a web of 140x10mm. The section modulus of the T-section is 54600mm^3. This section is used as a simply supported beam of 4m span and carries a UDL of 25kN/m on the whole span. Determine the shape factor of the beam and also calculate the collapse load for the beam. Assume yield stress as 250 Mpa. CO3 6 Marks

(OR)

10 Calculate the plastic moment capacity required for the continuous beam with working loads shown in Fig.7. CO3 14 Marks

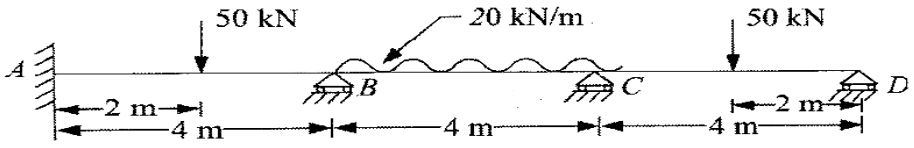

Fig.7

WASTE WATER TECHNOLOGY
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain briefly effects of improper disposal of sewage	CO6	7 Marks
	b)	Calculate the combined flow discharge of sewage for the given data. Area to be served is 150 hectares. Population is 50,000. Time of entry and time of flow is 5 and 20 minutes respectively. Rate of water supply is 135 LPCD. Impermeability factor, C = 0.45. Assume 80% of water supplied turns into sewer and peak factor as 1.5.	CO3	7 Marks
		(OR)		
2	a)	Discuss briefly the necessity of replacing the conservancy system by the water carriage system.	CO1	7 Marks
	b)	What are the systems of plumbing? With help of a neat sketch, discuss various systems of plumbing used for drainage.	CO9	7 Marks

UNIT-II

3	a)	Design a primary sedimentation tank for a proposed sewage treatment plant of 120 MLD capacity.	CO3	7 Marks
	b)	Explain the Conventional treatment process of municipal wastewater treatment plant with flow diagram.	CO7	7 Marks
		(OR)		
4	a)	Design a screen channel for a peak sewage flow of 45MLD by using following data i) Size of bars is 15 x 50mm ii) Clear spacing between bars is 30mm. iii) Angle of inclination of screen with horizontal is 45º. iv) Dia of incoming sewer is 0.65m.	CO3	7 Marks
	b)	List out chemical characteristics of sewage and explain any three how importance in maintaining the standards for disposal.	CO8	7 Marks

UNIT-III

5	a)	Write the procedure for design of standard trickling filter.	CO1	7 Marks
	b)	Differentiate attached growth process and suspended growth process.	CO2	7 Marks
		(OR)		
6	a)	Describe in detail about an oxidation pond and oxidation ditch.	CO1	9 Marks
	b)	Design a standard trickling filter plant to treat 6 million liters of sewage per day having 5 day BOD of 160 mg/l. Assume suitable data where ever required.	CO3	5 Marks

UNIT-IV

7	a)	What is sludge conditioning and dewatering? Explain any one of the methods of sludge dewatering.	CO1	7 Marks
	b)	Sludge disposal to an onsite create lot of problems to the community. What are steps you suggest for the disposal and what is the mechanism involved in the process of removal of pathogenic bacteria from sludge.	CO5	7 Marks

(OR)

8	a)	Mention the various physical chemical processes used for the removal of nitrogen from sewage. Describe briefly each method.	CO1	5 Marks
	b)	Explain the process of removal of phosphorous and refractory organic materials.	CO2	9 Marks

UNIT-V

9	a)	Classify the various methods of sewage disposal.	CO1	7 Marks
	b)	Draw a typical oxygen sag curve and explain its meaning and state its importance in benefits of maintaining the DO in the river water for society.	CO9	7 Marks

(OR)

10	a)	Discuss various methods of disposal of septic tank effluent with neat sketches and recommendations in the design.	CO4	7 Marks
	b)	Design a septic tank with dispersion trench for 175 users. The rate of water supply is 70 LPCD. Assume suitable criteria as applicable. Draw a neat sketch of the unit.	CO3	7 Marks

CONTROL SYSTEMS

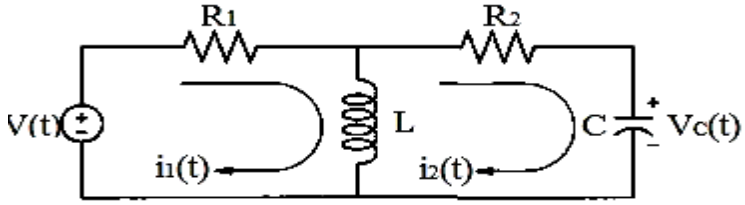
[Electrical and Electronics Engineering, Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Discuss the rules implemented for the reduction of a given block diagram	CO1	7 Marks
	b)	Compare open loop and closed loop control system performance.	CO2	7 Marks
		(OR)		
2	a)	State Mason's gain formula for deriving transfer function of a system.	CO1	6 Marks
	b)	Determine the transfer function, $\frac{I_2(s)}{V(s)}$ for the electrical system shown in figure below.	CO2	8 Marks



UNIT-II

3	a)	Derive the expression for the time response of an under damped second order system when subjected to unit step input.	CO2	7 Marks
	b)	A unity feedback system is characterized by the open-loop transfer function $G(s) = \frac{1}{s(0.3s+1)(0.1s+1)}$. Determine the steady-state errors for unit-step, unit-ramp and unit-acceleration inputs.	CO4	7 Marks
		(OR)		
4	a)	Sketch the root locus plot for a unity feedback system with an open loop transfer function $G(s) = \frac{K}{s(s+2)(s+4)}$.	CO5	7 Marks
	b)	Explain the Routh-Hurwitz criteria with an example.	CO2	7 Marks

UNIT-III

5		Sketch the Bode plot showing the gain magnitude in dB and phase angle in degrees as a function of log frequency for the transfer function $G(s)H(s) = \frac{2000}{s(s+2)(s+100)}$. Determine the gain crossover frequency, phase crossover frequency, gain margin and phase margin. Also, determine the gain and the corresponding phase margin for a gain crossover frequency of 50 rad/sec.	CO5	14 Marks
		(OR)		
6		Sketch the Nyquist plot and there from determine the stability of the closed-loop system whose open-loop transfer function is given by $G(s)H(s) = \frac{K(s+4)}{s^2(s+1)}$.	CO5	14 Marks

UNIT-IV

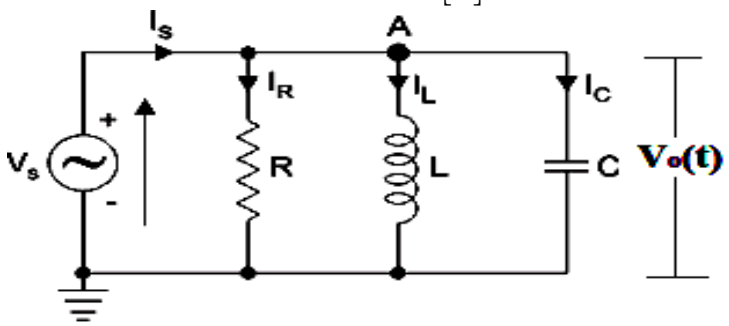
7	a)	Explain the effect of PI controller on time response characteristics of a second order system.	CO6	7 Marks
	b)	Briefly explain the types of compensators in design aspects of a control system in frequency response analysis.	CO1	7 Marks

(OR)

8		Consider the unity feedback system whose open loop transfer function is $G(s) = \frac{K}{S(S+1)(0.1S+1)}$. Design phase-lead compensator to meet the following specifications i) Velocity error constant, $K_v = 10\ S^{-1}$, ii) Phase Margin = 35^0.	CO3	14 Marks

UNIT-V

9		Obtain the state model for the electrical system shown in figure below. Also, find the solution for the state equation with R=5Ω, L=10mH and C=2μF. Assume initial state vector $X(0) = \begin{bmatrix} 0 \\ 1 \end{bmatrix}$.	CO4	14 Marks



(OR)

10	a)	Explain the Kalman's test for determining controllability and observability of a system.	CO1	7 Marks
	b)	Explain the concept of conversion of state model in to transfer function of a control system and vice versa.	CO1	7 Marks

POWER ELECTRONICS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Develop a schematic diagram for connecting and disconnecting a DC voltage source to a Resistive load, using IGBT as a power switch. With the help of a neat sketch, explain its switching characteristics.	CO5	10 Marks
	b)	With the help of a neat sketch, explain switching characteristics of a power MOSFET.	CO1	4 Marks
		(OR)		
2	a)	Design a firing circuit for triggering an SCR subjected to 1-phase, 50Hz AC Voltage and can control its conduction over a period of 5ms, configured for multipurpose automatic illumination control applications.	CO6	10 Marks
	b)	Twenty SCRs each of 500V, 500A are used in Five columns and Four rows in a circuit of 2kV and 1.8 kA. Calculate Voltage and Current de-rating factors.	CO4	4 Marks

UNIT-II

3	a)	Define extinction angle. List and explain the factors affecting extinction angle.	CO1	4 Marks
	b)	With the help of neat circuit diagram and necessary waveforms, analyze the operation of single phase fully controlled bridge rectifier with RL Load for firing angle delays $\alpha=30^o$ and 120^o by incorporating the variation of extinction angle.	CO2	10 Marks
		(OR)		
4	a)	List the advantages of freewheeling diode and explain how power factor can be improved by connecting it in anti- parallel across the RL-Load fed by a fully controlled rectifier.	CO1	6 Marks
	b)	Discuss the effect of source inductance on the performance of a three-phase fully controlled rectifier with RL load and sketch relevant waveforms.	CO1	8 Marks

UNIT-III

5	a)	Discuss the operational differences between circulating and non-circulating current modes of a single phase dual converter with R-load.	CO1	7 Marks
	b)	Derive the expressions for RMS values of output voltage and load current of a single phase AC voltage controller (employing SCRs) feeding R-load.	CO4	7 Marks
		(OR)		
6		Design a single phase, 230V, 50Hz bridge type cycloconverter scheme with RL-load to produce an output frequency of 250 Hz. Identify the method of commutation employed and sequence of firing pulses to be produced. With the help of a neat circuit diagram and relevant waveforms, explain its operation.	CO3	14 Marks

UNIT-IV

7	a)	Explain the principle of complimentary commutation technique with the help of neat circuit diagram and relevant waveforms.	CO1	7 Marks
	b)	Compare natural and forced commutation techniques and recommend suitable commutation type preferred for turning off a thyristor if used in a chopper circuit.	CO1, CO5	7 Marks
		(OR)		
8	a)	Explain the working of a step-down chopper with R-load and derive an expression for average value of output voltage.	CO1	7 Marks
	b)	Discuss current limit control strategy for a DC chopper.	CO1	7 Marks

UNIT-V

9		Explain the operation of a basic parallel inverter and draw relevant waveforms.	CO1, CO2	14 Marks
		(OR)		
10	a)	Compare sinusoidal pulse width modulation technique over multiple pulse width modulation technique and discuss.	CO1	8 Marks
	b)	A single phase half bridge inverter has a resistive load of 10Ω and input voltage of 100V. Determine: i) RMS output voltage at fundamental frequency. ii) average and peak currents of each thyristor. iii) the peak reverse blocking voltage of each thyristor.	CO4	6 Marks

SYNCHRONOUS MACHINES
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Discuss the importance of distributed armature winding in an alternator.	CO1	6 Marks
	b)	How the winding factors affect the waveform of generated **emf** of alternator? What steps are taken to eliminate third and fifth harmonic components of generated **emf**?	CO2	8 Marks
		(OR)		
2		Explain the following characteristics of an alternator: i) Open Circuit Characteristics. ii) Short Circuit Characteristics. iii) Zero Power Factor Characteristics.	CO1	14 Marks

UNIT-II

3	a)	Explain the two reaction theory of salient pole machine. Draw the phasor diagram and obtain regulation of an alternator using this theory.	CO1	8 Marks
	b)	A 70 MVA, 13.8 kV, 3-phase star connected salient pole alternator having X_d = 1.83Ω and X_q = 1.2Ω delivers at 0.8 p.f lagging. Neglecting the armature resistance, calculate: i) The excitation voltage (E_f). ii) The voltage regulation.	CO4	6 Marks
		(OR)		
4	a)	Describe the slip test method for measurement of X_d and X_q of synchronous machine.	CO1	6 Marks
	b)	An alternator has a direct-axis synchronous reactance of 0.8 per unit and quadrature-axis synchronous reactance of 0.5 per unit. Determine the per unit open-circuit voltage for full-load at a power factor of 0.8. Neglect saturation.	CO4	8 Marks

UNIT-III

5	a)	Discuss the load sharing between two alternators which are connected in parallel.	CO1	6 Marks
	b)	A shopping complex consists of a lighting load of 3000 kW and a motor load of 5000 kW at a pf of 0.72. Two alternators are connected in parallel to feed this load. One machine is loaded up to 5000kW at 0.8 pf lagging. Suggest the specifications required for other machine to share the remaining load.	CO3	8 Marks
		(OR)		
6	a)	Obtain an expression fort the natural frequency of undamped oscillation of the rotor of synchronous motor.	CO1	6 Marks
	b)	Show that the short circuit ratio of a synchronous generator is the reciprocal of per-unit value of synchronous reactance adjusted to saturation at rated voltage.	CO2	8 Marks

UNIT-IV

7	a)	Derive an expression for power developed in a 3-phase synchronous motor.	CO2	8 Marks
	b)	A 20kW, 400V, 3-phase, star-connected synchronous motor has per phase impedance of (0.15+j0.9) Ω. Determine the induced **emf**, torque angle and mechanical power developed for full load at 0.8 pf lagging. Assume 92% efficiency of the motor. Draw the phasor diagram.	CO4	6 Marks

(OR)

8	a)	Mention the role of a synchronous condenser in power transmission lines.	CO5	6 Marks
	b)	A 400V, 3-phase installation takes a current of 36A at 0.8 pf lagging. A synchronous motor improves the overall p.f. to 0.92 lagging. Simultaneously the synchronous motor drives a 15 HP load at an efficiency of 85%. Determine i) the power factor of the synchronous motor. ii) the leading kVAr supplied by the motor. iii) the kVA rating of the motor.	CO4	8 Marks

UNIT-V

9	a)	Explain why a single-phase single winding induction motor produces no starting torque.	CO1	6 Marks
	b)	What design features are incorporated in a split-phase motor to make it self-starting?	CO3	8 Marks

(OR)

10		Write a short notes on: i) Resistance split-phase motors. ii) Capacitor split phase motors. iii) Capacitor start and run split phase motors.	CO1	14 Marks

TRANSMISSION AND DISTRIBUTION
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive the expression for flux linkages due to internal flux and external flux for a single wire current carrying conductor.	CO2	6 Marks
	b)	Derive an expression for the inductance of a 3 phase overhead line.	CO2	8 Marks
		(OR)		
2	a)	List out the various properties of dielectric compounds to be used for insulation of cables. And explain the inter-sheath grading of cables.	CO6	7 Marks
	b)	A single core 11kV, 50Hz, 5km long cable has a core diameter of 1.5cm and diameter of under sheath 3.0cm. The relative permittivity of the insulating material is 2.5. The power factor on open circuit is 0.04. Determine: i) The capacitance of the cable. ii) Charging conductor. iii) Maximum dielectric stress. iv) Minimum dielectric stress.	CO4	7 Marks

UNIT-II

3	a)	Discuss the classification of overhead transmission lines. Define A, B, C and D constants of a transmission line.	CO3	7 Marks
	b)	Derive the reflection and refraction coefficients of a line terminated with resistance.	CO2	7 Marks
		(OR)		
4	a)	Define regulation of a short 3-phase transmission system and develop an expression for approximate voltage regulation.	CO1	7 Marks
	b)	A balanced 3-phase load of 30MW is supplied at 132kV, 50Hz and 0.85 p.f lagging by means of a transmission line. The series impedance of a single conductor is (20 + j52) ohms and the total phase-neutral admittance is 315×10^{-6} mho. Using nominal-T method, determine: i) The A, B, C and D constants of the line. ii) Sending end voltage. iii) Regulation of the line.	CO4	7 Marks

UNIT-III

5	a)	A transmission line has a span of 275m between level supports. The conductor has an effective diameter of 1·96 cm and weighs 0·865 kg/m. Its ultimate strength is 8060 kg. If the conductor has ice coating of radial thickness 1·27cm and is subjected to a wind pressure of 3·9 gm/ cm^2 of projected area, calculate sag for a safety factor of 2. Weight of 1 c.c. of ice is 0·91 gm.	CO4	7 Marks
	b)	A 3-phase, 220kV, 50Hz transmission line consists of 1·5 cm radius conductor spaced 2 metres apart in equilateral triangular formation. If the temperature is 40ºC and atmospheric pressure is 76cm, calculate the corona loss per km of the line. Take mo = 0·85.	CO3	7 Marks

(OR)

6	a)	Each line of a 3-phase system is suspended by a string of 3 identical insulators of self-capacitance C farad. The shunt capacitance of connecting metal work of each insulator is 0·2 C to earth and 0·1 C to line. Calculate the string efficiency of the system if a guard ring increases the capacitance to the line of metal work of the lowest insulator to 0·3 C	CO2	10 Marks
	b)	Explain briefly various line supports used for overhead transmission system.	CO1	4 Marks

UNIT-IV

7	a)	Explain load modeling and its characteristics.	CO1	7 Marks
	b)	A two-wire DC distributor cable 1000metres long is loaded with 0·5 A/metre. Resistance of each conductor is 0·05 Ω/km. Calculate the maximum voltage drop if the distributor is fed from both ends with equal voltages of 220 V. What is the minimum voltage and where it occurs?	CO4	7 Marks

(OR)

8	a)	Explain various factors that influence voltage levels in design and operation of the distribution system.	CO3	7 Marks
	b)	Discuss the difference between radial and loop types of primary distribution feeders.	CO5	7 Marks

UNIT-V

9	a)	How do you analyze a substation service area with ‘n’ primary feeders?	CO2	8 Marks
	b)	List the procedure to select the location of substation.	CO7	6 Marks

(OR)

10	a)	Give the comparison of outdoor and indoor sub-stations.	CO5	7 Marks
	b)	What are the advantages of GIS over conventional air substations? Give the limitations of GIS.	CO6	7 Marks

DESIGN OF MACHINE ELEMENTS-II
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		A journal bearing is proposed for a steam engine. The load on the journal is 2 kN, diameter 45mm, length 60mm, speed 1500 r.p.m., diametral clearance 0.001 mm, ambient temperature 15.5°C. Oil SAE 10 is used and the film temperature is 60°C. Determine the heat generated and heat dissipated. Take absolute viscosity of SAE10 at 60°C = 0.014 kg/m-s.	CO3	14 Marks
		(OR)		
2		A 70mm long journal bearing supports a load of 2700N on a 40mm diameter shaft. The bearing has a radial clearance of 0.05mm and the viscosity of the oil is 0.021 kg/m-s at the operating temperature. If the bearing is capable of dissipating 80J/s, determine the maximum safe speed.	CO2	14 Marks

UNIT-II

3		The ball bearings are to be selected for an application in which the radial load is 2000N during 90% of the time and 8000N during the remaining 10%. The shaft is to rotate at 150 r.p.m. Determine the minimum value of the basic dynamic load rating for 5000 hours of operation with not more than 10% failures.	CO4	14 Marks
		(OR)		
4		A ball bearing subjected to a radial load of 5 kN is expected to have a life of 8000 hours at 1450 r.p.m. with a reliability of 99%. Calculate the dynamic load capacity of the bearing so that it can be selected from the manufacturer's catalogue based on a reliability of 90%.	CO4	14 Marks

UNIT-III

5	a)	Explain briefly about Lewis equation for tangential tooth load (capacity) for both spur and helical gears.	CO1	7 Marks
	b)	Explain about double helical and herring bone gears with neat sketch.	CO1	7 Marks
		(OR)		
6		Design a pair of spur gears to transmit 25kW at 1200 r.p.m to a parallel shaft to be rotated at 600 r.p.m. The center distance between shafts is 175mm.	CO3	14 Marks

UNIT-IV

7	a)	Write the classification of springs	CO1	4 Marks
	b)	Design a helical compression spring to sustain an axial load of 3kN. The deflection is 60mm. spring index is '6'. The shear stress is not to exceed 300MPa. Rigidity modulus for spring material is 81GPa.	CO3	10 Marks
		(OR)		
8		Design a helical spring to support a tensile load of 6 kN and to have a stiffness of 100N/mm. the spring index is 6. The spring is made of steel having allowable stress of 300MPa. Take G=80GPa.	CO3	14 Marks

UNIT-V

9	An open-belt drive connects two pulleys 120cm and 50cm diameters, on parallel shafts 4m apart. The maximum tension in the belt is 1855.3 N. The co-efficient of friction is 0.3. The driver pulley of diameter 120cm runs at 200 r.p.m. Calculate: i) The power transmitted. ii) Torque on each of the two shafts.	CO6	14 Marks
	(OR)		
10	Design a cast iron piston for a single acting four stroke engine for the following data: Cylinder bore = 100 mm; Stroke = 125 mm; Maximum gas pressure = 5 N/mm^2; Indicated mean effective pressure = 0.75 N/mm^2; Mechanical efficiency = 80%; Fuel consumption = 0.15 kgper brake power per hour; Higher calorific value of fuel = 42 x 103 kJ/kg; Speed = 2000 r.p.m. Any other data required for the design may be assumed.	CO5	14 Marks

INDUSTRIAL ENGINEERING AND MANAGEMENT
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Explain the contributions of F.W. Taylor's to management.	CO1	14 Marks
		(OR)		
2		What is SWOT analysis? Illustrate it with business example.	CO2	14 Marks

UNIT-II

3		Discuss in detail various factors affecting plant location.	CO2	14 Marks
		(OR)		
4	a)	Discuss bath tub curve in conjunction with reliability.	CO2	7 Marks
	b)	Discuss the following hazard models with neat sketches. i) Constant hazard model. ii) Linearly increasing model.	CO1	7 Marks

UNIT-III

5		Define Work study. List and explain the steps involved in method study.	CO1	14 Marks
		(OR)		
6		Explain in detail the work sampling procedure.	CO1	14 Marks

UNIT-IV

7		The demand for an item in a company is 18000 units per year, and the company can produce the item at a rate of 3000 per month. The cost of one setup is Rs.500 and the holding cost of one unit is Rs.0.15 per month. The cost of shortage is Rs 20 per year. Determine the optimum manufacturing quantity and the number of shortages. Also determine the manufacturing time and time between setups	CO3	14 Marks
		(OR)		
8		Find the optimal quantity for a product where the annual demand for a product is 500 units. The cost of storage per unit per year is 10% of the unit cost and the ordering cost per order is Rs.180. The unit costs are given below.	CO4	14 Marks

Quantity	Purchasing Cost
$0 \leq Q1 < 500$	Rs.25 per unit
$500 \leq Q2 < 1500$	Rs.24.80 per unit
$1500 \leq Q3 < 3000$	Rs.24.60 per unit
$3000 \leq Q4$	Rs. 24.40

UNIT-V

9		What is the significance of control chart in industry? List the basic steps involved for drawing variable control charts.	CO5	14 Marks
		(OR)		
10	a)	Define TQM. Illustrate with examples the significance of TQM in organizational growth.	CO1	7 Marks
	b)	Discuss the significance of duties of plant safety inspector in the industries.	CO6	7 Marks

METROLOGY AND MEASUREMENTS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Define error. Explain types of errors in measuring system. CO1 6 Marks

b) A slip gauge set with 87 pieces, as under is available. CO2 8 Marks

Range (mm)	Steps (mm)	No. of blocks
1.001 to 1.009	0.001	9
1.01 to 1.49	0.01	49
0.5 to 9.5	0.5	19
10 to 90	10	9
100	-	1

Build up the following dimensions with minimum number of slip gauges.
i) 29.578 mm. ii) 46.635 mm.

(OR)

2 a) With neat sketches, differentiate between hole basis system and shaft basis system. CO1 7 Marks

b) Determine the dimensions and tolerances of shaft and hole having size of $30H_7h_8$ fit. Also, determine the allowance and maximum clearance. CO3 7 Marks

UNIT-II

3 a) List various types of limit gauges and explain any three gauges. CO1 7 Marks

b) Describe mechanical comparator with a neat sketch and explain clearly the method of magnification adopted to it. CO5 7 Marks

(OR)

4 a) Why is sine bar not suitable for measuring angles above 45^0? CO2 6 Marks

b) Explicate the working principle of: CO1 8 Marks
i) Optical comparator.
ii) Pneumatic comparator.

UNIT-III

5 a) Illustrate with suitable sketches the measurement of straightness using autocollimator. CO1 8 Marks

b) Explain flatness measurement using straight edges. CO1 6 Marks

(OR)

6 a) Describe various methods of measuring surface texture giving their relative advantages. CO5 8 Marks

b) Mention various BIS symbols for indication of surface finish. CO1 6 Marks

UNIT-IV

7 Name the important elements of thread which are required to be measured in order to determine the accuracy of screw threads. Describe in brief how the errors in these elements affect the working of the threaded elements. CO1 14 Marks

(OR)

8 a) Demonstrate the method used for checking pitch of the gear. CO5 6 Marks

b) Describe a gear tooth vernier caliper and show how this is used for checking gears. CO4 8 Marks

UNIT-V

9	a)	Explain the following: i) Electrical strain gauge. ii) Stain gauge rosettes.	CO1	8 Marks
	b)	Differentiate between compressive strains and tensile strains.	CO1	6 Marks
		(OR)		
10	a)	Write short notes on Electrical resistance sensors and Junction semiconductor sensors.	CO1	7 Marks
	b)	Explain the method used for pressure measurement.	CO5	7 Marks

REFRIGERATION AND AIR CONDITIONING
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	The COP of an air refrigeration cycle is very low, but still a refrigeration system is most common in the Air craft, discuss the statement.	CO1	6 Marks
	b)	A Bell-Coleman refrigeration cycle works between 1 bar and 6 bar. The adiabatic efficiency of compression is 90% and expansion is 95%. Find the COP of the system and its tonnage when the air flow rate is 2 kg/sec. The ambient temperature is 25^0C and refrigerator temperature is -5^0C.	CO3	8 Marks
		(OR)		
2	a)	Derive an expression for the COP of Bell-Coleman cycle.	CO1	6 Marks
	b)	The capacity of a refrigerator is 200 TR when working between - 8^0 C and 26^0 C. Determine the mass of ice produced per day from water at 26^0C. Also find the power required to drive the unit. Assume that the cycle operates on reversed carnot cycle and latent heat of ice is 335 kJ/kg	CO2	8 Marks

UNIT-II

3	a)	How does the increase in condenser temperature affect COP? Also explain the influence of evaporator temperature on COP. Which of the two temperatures have more influence on COP?	CO1	6 Marks
	b)	A vapour compression machine is used to maintain a temperature of -23^0 C in a refrigerated space. The ambient temperature is 37^0 C. The compressor takes in dry saturated vapour of F-12. A minimum 10^0C temperature difference is required at the evaporator as well as at condenser. There is no sub cooling of the liquid. If the refrigerant flow rate is 1 kg/min, find: i) Tonnage of refrigeration. ii) Power requirement. iii) Ratio of COP of this cycle to COP of carnot cycle.	CO4	8 Marks
		(OR)		
4	a)	What are essential properties of a good refrigerant?	CO1	4 Marks
	b)	A four cylinder, single acting R-12 compressor 30cm x 40cm runs at 960 r.p.m. The compressor clearance factor is 0.03 and the law of compression $PV^{1.1}$=C. the operating pressures for the vapour compression refrigeration system are: 8.47 bar (35^0C) and 1.004 bar (-30^0C). The refrigerant temperatures are: entering the compressor -20^0C, leaving the compressor 50^0C; entering the condenser 45^0C, leaving the condenser 25^0C, entering the expansion valve 30^0C and leaving the evaporator dry saturated. Assuming that heat removed in the compressor is 25 kJ/sec. calculate: i) The refrigerating capacity. ii) The compressor power. iii) C.O.P. iv) Mass of condensing cooling water assuming the rise in temperature to be 10^0C. v) Also tabulate energy balance for 1 kg of refrigerant.	CO4	10 Marks

UNIT-III

5	a)	Discuss the advantages of vapour absorption refrigeration system over vapour compression refrigeration system.	CO1	7 Marks
	b)	In a vapour absorption refrigeration system, heating, cooling and refrigeration takes place at the temperatures of 100^0C, 20^0C and -5^0C respectively. Find the maximum C.O.P of the system.	CO3	7 Marks

(OR)

6	a)	What is thermo electric refrigeration system? List out the merits and demerits of thermo-electric refrigeration system over other refrigeration system. What are the fields of its applications?	CO2	6 Marks
	b)	Determine the COP of a vapour absorption refrigeration system when the temperature of generator is 120^0C, the temperature of the condenser is 30^0C and the temperature of the evaporator is -20^0C. What would be its C.O.P, if it were a Carnot?	CO2	8 Marks

UNIT-IV

7		The following data apply to an air conditioning system: Room sensible heat =41868kJ/hr ; room latent heat=41868 kJ/hr; inside design condition= 25^0C, 50% RH, outside design condition=35^0C, DBT, 27.8 WBT. Return air from the room is mixed with the outside air before entering the cooling coil in the ratio of 4:1. Return air from the room is mixed with the cooling air, i.e. after the cooling coil in the ratio of 1:4. Cooling coil by pass factor is 0.1. The air may be reheated if necessary before supplying to the conditioned space. Assume ADP as 10^0C and determine, i) Supply air conditions into the room. ii) Refrigeration load due to the reheat. iii) Total refrigeration capacity. iv) The quantity of fresh air supplied.	CO5	14 Marks

(OR)

8	a)	Explain in brief, an adiabatic saturation process. Represent the same on a psychrometric chart.	CO5	6 Marks
	b)	Ten grams of moisture per kg of dry air is removed from atmospheric air when it is passed through an air conditioning system and its temperature becomes 20^0C. The atmospheric conditions are 40^0C DBT and 60% RH. Find the following for the conditioned air. i) Relative humidity. ii) Wet-bulb temperature. iii) Dew point temperature. iv) Enthalpy change for the air. Assume standard atmospheric pressure.	CO6	8 Marks

UNIT-V

9	a)	Explain in detail, the filters used in air conditioning systems.	CO1	7 Marks
	b)	Explain the use of heat pump for heating and cooling cycle with a neat diagram.	CO1	7 Marks

(OR)

10	a)	Define human comfort and explain the factors which affect human comfort.	CO1	7 Marks
	b)	Discuss various types of duct systems and their applications.	CO1	7 Marks

THERMAL ENGINEERING-II
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Differentiate between water tube and fire tube boilers.	CO1	7 Marks
	b)	Discuss the working of Babcock and Wilcox boiler with a neat sketch.	CO1	7 Marks
		(OR)		
2	a)	Describe Locomotive boiler with a neat sketch.	CO1	7 Marks
	b)	In a Rankine cycle the steam at inlet to the turbine is saturated at a pressure of 20 bar and exhaust pressure is 0.04 bar. Determine: i) Pump work. ii) Turbine Power. iii) Rankine efficiency. Assume the flow rate of steam as 10 kg/sec.	CO2	7 Marks

UNIT-II

3	a)	Write a short note on equivalent evaporation, factor of evaporation and boiler efficiency.	CO1	7 Marks
	b)	A Lancashire boiler generates 2500 kg of dry steam / hr at a pressure of 11 bar. The grate area is 3.6 m^2 and 75 kg of coal is burnt / m^2 of grate area /hr. The calorific value of the coal is 33,200 kJ/kg and temperature of feed water is 17.5^{0}C. Determine: i) Actual evaporation / kg of coal. ii) Equivalent evaporation from and at 100^{0}C. iii) Efficiency of the boiler.	CO3	7 Marks
		(OR)		
4	a)	Explain induced draught and forced draught.	CO1	7 Marks
	b)	How much air used per kg of coal burnt in a boiler having chimney of 32.3m height to create a draught of 19mm of water column when the temperature of flue gases in the chimney is 370^{0}C and the temperature of boiler house is 30^{0}C?	CO4	7 Marks

UNIT-III

5	a)	Explain the types of steam nozzles.	CO1	5 Marks
	b)	Dry saturated steam at a pressure of 5 bar enters in a nozzle and is discharged at a pressure of 1.5 bar. Find the final velocity of steam, when the initial velocity of the steam is neglected. If 10% of heat drop is lost in friction, find the % reduction In the final velocity.	CO2	9 Marks
		(OR)		
6	a)	Give the classification of steam turbines.	CO1	5 Marks
	b)	The velocity of steam leaving the nozzles of impulse turbine is 1200 m/s and the nozzle angle is 20°. The blade velocity is 375 m/s and the blade velocity coefficient is 0.75. Assuming no loss due to shock at inlet, calculate for a mass flow of 0.5 kg/s and symmetrical blading. i) Blade inlet angle. ii) Driving force on the wheel. iii) Axial thrust on the wheel. iv) Power developed by Turbine.	CO5	9 Marks

UNIT-IV

7	a)	What are various sources of air leakage in to steam condenser? How does it affect the performance of condensing plant?	CO2	7 Marks
	b)	Describe with neat sketch the working of surface condenser.	CO1	7 Marks

(OR)

8	a)	What is 50% Reaction Turbine? What are the characteristics of 50% Reaction Turbine?	CO1	5 Marks
	b)	Reaction Turbine runs at 3000 r.p.m and its steam consumption is 15400kg/hr. the pressure of steam at a certain pair is 1.9 bar its dryness 0.93 and power developed by air is 3.5 kW. The discharging blade tip angle is 200 for both fixed and moving blades and the axial velocity of flow is 0.72 of the blade velocity. Find the drum diameter and blade height. Take the tip leakage steam as 8%, but neglect blade thickness.	CO2	9 Marks

UNIT-V

9	a)	Distinguish between rocket propulsion and turbojet propulsion Engines.	CO1	7 Marks
	b)	The air enters the compressor of an open cycle constant pressure gas turbine at a pressure of 1 bar and temperature of 20^0C. The pressure of air after compression is 4bar. The isentropic efficiency of compressor and turbine are 80% and 85% respectively. The air fuel ratio used is 90:1. If flow rate of air is 3 kg/s, find i) power developed ii) thermal efficiency of the cycle . Assume C_P=1 kJ/kgK, γ =1.41 and Calorific Value fuel = 41800kJ/Kg.	CO2	7 Marks

(OR)

10	a)	In a constant pressure open cycle gas turbine air enters at 1 bar and 20^0C and leaves the compressor at 5 bar. Using the following data: temperature of the gases entering the turbine = 680^0C, pressure loss in the combustion chamber = 0.1 bar, $\eta_{compressor}$ = 85%, $\eta_{turbine}$ = 80%, $\eta_{combustion}$ = 85%, γ =1.4, C_p=1.024kJ/kg K for air and gas. Find: i) The quality of air circulation if the plant develops 1065kW. ii) Heat supplied per kg of circulation. iii) Thermal efficiency of the cycle. Mass of fuel may be neglected.	CO2	7 Marks
	b)	Explain the effect of regeneration, inter cooling, and reheating on the performance of Gas turbine plant.	CO2	7 Marks

MECHATRONICS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Define the term feedback and explain the differences between open and closed loop control systems.	CO1	14 Marks
		(OR)		
2	a)	Define Mechatronics. Mention the key elements of Mechatronic systems.	CO1	6 Marks
	b)	Mention the advantages and disadvantages involved in a mechatronic systems.	CO1	8 Marks

UNIT-II

3	a)	Explain the static characteristics of a sensor. A potentiometer which is used to measure the rotational position of a shaft has 850 turns of wire. The input range is from -160° to +160°. The output range is from 0 V to 12 V. Determine the span, sensitivity and average resolution.	CO1	6 Marks
	b)	Explain the working principle and operation of an optical encoder.	CO2	8 Marks
		(OR)		
4	a)	State the factors to be considered for selecting a sensor.	CO2	4 Marks
	b)	What is a pneumatic system? Explain the elements of a pneumatic system.	CO2	10 Marks

UNIT-III

5	a)	What is noise in signals? Explain low pass and band pass filtering circuit.	CO3	8 Marks
	b)	Explain voltage frequency converters with their use in signal conditioning.	CO1	6 Marks
		(OR)		
6	a)	Why is operation amplifiers used in signal conditioning? Explain differential amplifier with neat sketch.	CO3	8 Marks
	b)	Derive an expression for finding the unknown resistance in Wheat stone bridge circuit.	CO3	6 Marks

UNIT-IV

7		Describe and compare the characteristics of Proportional (P) control and Proportional plus integrated (PI) control.	CO4	14 Marks
		(OR)		
8	a)	Explain PID controller tuning using process reaction curve method.	CO4	8 Marks
	b)	A PI controller has an input voltage range of 0.4 – 2 V and the output voltage range 0.10 V, R_2= 160 kΩ, R_1=8 kΩ and C= 10 μF. Determine the values of gain K_p, K_i and proportional band of integration gain in %/(%s).	CO4	6 Marks

UNIT-V

9	a)	Explain the mechatronics design approach.	CO5	8 Marks
	b)	Elaborate the method of automatic car parking system.	CO5	6 Marks
		(OR)		
10	a)	Describe the mechatronics application in an automobile engine management system.	CO5	10 Marks
	b)	Justify the importance of ethics as a design constraint.	CO6	4 Marks

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Sketch the electrical representation of binary data 01101001 using different formats.	CO1	4 Marks
	b)	Compare Delta Modulation (DM) and Pulse Code Modulation (PCM) Systems.	CO2	10 Marks
		(OR)		
2	a)	What is Companding and explain different types of Companding techniques?	CO1	9 Marks
	b)	Examine the need for non uniform quantization in PCM System.	CO2	5 Marks
		UNIT-II		
3	a)	Derive an expression for Quantization noise in a PCM System.	CO2	7 Marks
	b)	Compare the performance of PCM coded transmission systems using BPSK and FSK modulation.	CO2	7 Marks
		(OR)		
4		Justify that the Output SNR in a PCM system is superior to that of a DM System.	CO3	14 Marks
		UNIT-III		
5	a)	Compare different types of digital modulation schemes.	CO2	6 Marks
	b)	Implement a Digital system for generation and reception of BFSK.	CO6	8 Marks
		(OR)		
6	a)	Implement an Optimum filter and derive the Probability of error of an Optimum Filter.	CO6	10 Marks
	b)	Identify the advantages of Differential Phase Shift Keying (DPSK) over Phase Shift Keying (PSK).	CO2	4 Marks
		UNIT-IV		
7	a)	A discrete message source is generating the message sequence [X] = [A, B, C, D, E, F, G, H] with probabilities [P]=[0.50, 0.15, 0.15, 0.08, 0.08, 0.02, 0.01, 0.01]. Find the Codewords using Huffman coding.	CO5	10 Marks
	b)	Define the following terms. i) Channel Capacity. ii) Rate of information.	CO1	2+2 Marks
		(OR)		
8	a)	A discrete memory less source emits messages from the set of size M=4 at the rate of r = 2000 symbols/sec. The symbol probabilities are 1/2, 1/4, 1/8, 1/8. Estimate i) the information contained in each message. ii) average information per symbol. iii) information rate.	CO5	8 Marks
	b)	i) Differentiate the terms Data and Information ii) Define entropy.	CO1	3+3 Marks

UNIT-V

9	a)	Assess error detection and error correction capabilities of linear block codes.	CO4	6 Marks
	b)	Design an encoder for generating (7,4) systematic cyclic code generated by $\mathbf{g(x)=1+x+X^3}$.	CO3	8 Marks

(OR)

10	a)	The generator matrix for a (6, 3) block code is given below. Construct all code vectors of this code. $G = \begin{matrix} 1 & 0 & 0 & 1 & 1 & 0 \\ 0 & 1 & 0 & 0 & 1 & 1 \\ 0 & 0 & 1 & 1 & 0 & 1 \end{matrix}$.	CO3	6 Marks
	b)	State and explain with examples about the Convolution Coding.	CO4	8 Marks

III B.Tech I Semester (SVEC-16) Supplementary Examinations August - 2021

MICROPROCESSORS AND MICROCONTROLLERS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Illustrate role of Assembler Directives in ALP using a model program.	CO2	7 Marks
	b)	Contrast Procedures to MACROs with suitable examples.	CO2	7 Marks
		(OR)		
2	a)	Illustrate Intel 8086 memory organization as even and odd banks and point out how both byte and word access were supported.	CO5	7 Marks
	b)	Interpret the following Assembler directives. i) ENDS. ii) EVEN. iii) DUP. iv) Assume.	CO2	7 Marks

UNIT-II

3	a)	Describe Intel 8086 Pin Diagram.	CO1	7 Marks
	b)	Write 8086 assembly language program to SORT an array of 10 bytes in descending order.	CO4	7 Marks
		(OR)		
4	a)	Design the Timing Diagram of Read and write cycle in maximum mode configuration.	CO3	8 Marks
	b)	Distinguish NMI and INTR.	CO2	6 Marks

UNIT-III

5	a)	Interpret about control words of 8255. i) Mode Set Control Word. ii) BSR Mode.	CO1	7 Marks
	b)	Differentiate between automatic rotation and automatic EOI mode.	CO2	7 Marks
		(OR)		
6	a)	Draw and explain ICW and OCW formats.	CO1	10 Marks
	b)	Compare pole command mode and EOI mode.	CO2	4 Marks

UNIT-IV

7	a)	Design a flowchart and develop an ALP to perform arithmetic operations on two unsigned bytes from: i) Internal RAM. ii) External RAM.	CO3	7 Marks
	b)	Write an ALP to store 10 bytes of data stored in RAM locations starting from 45H to transfer serially. At the end of data transfer the value of R0 is displayed on Port 1.	CO4	7 Marks
		(OR)		
8	a)	Compose a program for bit manipulation operations in 8051.	CO4	7 Marks
	b)	Design a flowchart and write an ALP to transfer a block of 8 bytes from External RAM at 4500H to External RAM at 5400H.	CO3	7 Marks

UNIT-V

9	a)	Show the setup and develop an ALP to interface keyboard with 8051 microcontroller.	CO5	7 Marks
	b)	Model the setup and develop an ALP to interface LCD with 8051 microcontroller. Specify the applications of it.	CO6	7 Marks

(OR)

10	a)	Show the setup to interface seven segment displays with 8051 and write a program for generating a sequence in seven segments depending on your own assumption.	CO5	7 Marks
	b)	Apply 8051 interfacing concept to interface 4 digits of 7 segment LED display to Intel 8051. Mention the applications of it.	CO6	7 Marks

VLSI DESIGN

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Why CMOS inverter is called a low power device? Explain.	CO3	6 Marks
	b)	Assess the Metallization and Encapsulation methods related to IC fabrication process.	CO2	8 Marks
		(OR)		
2	a)	Derive an equation for Transconductance of an n channel enhancement MOS- FET operating in active region.	CO2	6 Marks
	b)	A PMOS transistor is operated in triode region with the following parameters. VGS = -4.5V, Vtp = -1V, VDS = -2.2V, (W/L) = 95, μnCox = 95μA/V 2. Find its drain current and drain source resistance.	CO3	8 Marks

UNIT-II

3	a)	Sketch the stick diagram for NAND gate and give its procedural steps.	CO4	8 Marks
	b)	Discuss the limitations of scaling of MOS circuits.	CO1	6 Marks
		(OR)		
4	a)	Design a layout diagram for N-MOS inverter.	CO4	7 Marks
	b)	Illustrate the lambda-based design rules.	CO1	7 Marks

UNIT-III

5	a)	Explain the construction of transmission gate based adder in detail.	CO1	7 Marks
	b)	Assess the operation of Manchester carry chain adder and find the worst case delay of carry chain.	CO4	7 Marks
		(OR)		
6	a)	Outline the features of 4-by-4 barrel shifter using complementary transmission gates. Sketch its circuit diagram and explain its shifting operation.	CO4	8 Marks
	b)	Write short note on: i) Carry skip adder. ii) Carry select adder.	CO1	6 Marks

UNIT-IV

7	a)	Outline the different programmable blocks used in the general architecture of FPGA.	CO6	7 Marks
	b)	Differentiate the channeled gate array and channel less gate array.	CO2	7 Marks
		(OR)		
8	a)	Differentiate the array-based programmable wiring and switch box based programmable wiring.	CO2	7 Marks
	b)	Sketch and explain the typical standard-cell structure showing low-power cell.	CO6	7 Marks

UNIT-V

9	a)	Mention how many test vectors are required to exhaustively test a combinational circuit with n-inputs and a sequential circuit with n-inputs and m-storage devices respectively.	CO5	7 Marks
	b)	Write short notes on Design strategies for test.	CO1	7 Marks
		(OR)		
10	a)	Write short notes on CMOS testing.	CO1	7 Marks
	b)	Examine Power minimization techniques in design and sleep mode.	CO5	7 Marks

MICROPROCESSORS AND INTERFACING
[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Explain the initialization sequence of 8259A.	CO3	7 Marks
	b)	Write about the command words of 8259A.	CO2	7 Marks
		(OR)		
2	a)	Explain about Internal architecture of 8279 Keyboard/Display interface.	CO2	10 Marks
	b)	What is the purpose of priority resolver in 8259A?	CO2	4 Marks
		UNIT-II		
3	a)	What is the importance of cascade buffer/comparator? Explain briefly.	CO2	7 Marks
	b)	Draw and Explain ICW and OCW?	CO2	7 Marks
		(OR)		
4	a)	What is pole command mode and EOI mode?	CO2	7 Marks
	b)	Differentiate cascade mode and buffered mode.	CO1	7 Marks
		UNIT-III		
5	a)	Draw and explain the internal architecture of 8259.	CO1	10 Marks
	b)	Explain importance of ISR and IRR?	CO2	4 Marks
		(OR)		
6	a)	Discuss in detail DMA.	CO3	7 Marks
	b)	What is 8251? How can it be programmed to operate in serial communication mode?	CO5	7 Marks
		UNIT-IV		
7	a)	Show the setup to and write an ALP to interface a hexadecimal key pad to Intel 8086. Specify the applications of it.	CO6	7 Marks
	b)	Briefly describe the importance of modem control in 8251.	CO2	7 Marks
		(OR)		
8	a)	Draw the Pinouts of 8251A and discuss them in detail.	CO2	10 Marks
	b)	What is the function of mode set register available in 8257?	CO1	4 Marks
		UNIT-V		
9	a)	Draw and explain the internal architecture of 8257.	CO1	10 Marks
	b)	Draw the formats of ICW3 in master and slave mode.	CO1	4 Marks
		(OR)		
10	a)	Draw and explain mode instruction control word format in Asynchronous and synchronous mode.	CO3	10 Marks
	b)	Explain briefly automatic rotation and automatic EOI mode.	CO1	4 Marks

COMPUTER NETWORKS

[Electronics and Communication Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Write short notes on the following guided and unguided transmission medium. i) Twisted-Pairs. ii) Coaxial Cable. iii) Fiber Optics. iv) Radio Transmission.	CO1	14 Marks
		(OR)		
2	a)	Sketch the electromagnetic spectrum for Wireless Transmission.	CO1	7 Marks
	b)	Distinguish between Radio Wave Transmission and Microwave Transmission.	CO2	7 Marks

UNIT-II

3	a)	Sketch the Ethernet frame format.	CO1	7 Marks
	b)	List and explain the fields of Ethernet frame.	CO1	7 Marks
		(OR)		
4	a)	Write the properties of Data Link - Layer Switching. Compare Switch and Router.	CO2	7 Marks
	b)	Illustrate Collision-Free Protocols with examples.	CO1	7 Marks

UNIT-III

5		Illustrate the following congestion control algorithms with an example: i) Leaky bucket Algorithm. ii) Random Early Detection.	CO2	14 Marks
		(OR)		
6	a)	Distinguish between ARP and RARP Protocols.	CO2	7 Marks
	b)	Explain Various Internet Control Message Protocol Message Types.	CO1	7 Marks

UNIT-IV

7		A TCP connection is established over a 1.2 Gb/s link with a round-trip time of 3.3ms. To transmit a file of size 2 MB, we start sending it, using 1 KB packets. i) How long does the transmission take if an Additive Increase, Multiplicative Decrease Control with a window size of w_g = 500 KB is used? ii) Repeat part (i), using Slow-Start Control.	CO4	14 Marks
		(OR)		
8	a)	Draw the TCP segment header format and explain the use of each field in detail	CO1	7 Marks
	b)	Summarize congestion control mechanisms in TCP.	CO2	7 Marks

UNIT-V

9	a)	List and explain the built-in HTTP request methods.	CO1	7 Marks
	b)	How is Hypertext Transfer Protocol related to World Wide Web?	CO2	7 Marks
		(OR)		
10	a)	Explain in detail about messages headers in Hypertext Transfer Protocol.	CO1	7 Marks
	b)	Illustrate Hypertext Transfer Protocol caching.	CO2	7 Marks

LINUX PROGRAMMING
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Explain in detail about gethostname and uname function.	CO1	7 Marks
	b)	Write a linux program which extracts some user information from password database.	CO3	7 Marks
		(OR)		
2	a)	Design a linux program which extracts host information using getuid function	CO4	10 Marks
	b)	Compare internal and external commands.	CO2	4 Marks
		UNIT-II		
3	a)	Define shell and its responsibilities.	CO1	4 Marks
	b)	Write shell script on prime number and Fibonacci series by using control structures.	CO3	10 Marks
		(OR)		
4	a)	Write a shell script that takes a login name and reports when that person logs in.	CO3	7 Marks
	b)	Write a shell script that receives any number of file names as arguments checks if every argument supplied is a file or a directory and reports accordingly. Whenever the argument is a file, the number of lines on it is also reported.	CO6	7 Marks
		UNIT-III		
5	a)	Analyze the working of formatted Input and Output.	CO2	7 Marks
	b)	Illustrate briefly with example file and directory maintenance.	CO5	7 Marks
		(OR)		
6	a)	Define a file descriptor and explain it briefly with a simple program.	CO1	6 Marks
	b)	What is file permission? What are different ways of setting file permission? Explain.	CO1	8 Marks
		UNIT-IV		
7	a)	Analyze the need for zombie process with example.	CO2	6 Marks
	b)	Write a filter program that reads from its standard input and writes to its standard output converting into uppercase by using shell redirection.	CO4	8 Marks
		(OR)		
8	a)	Write a program that illustrates the working of signal.	CO4	7 Marks
	b)	Discuss the following commands with example: i) kill. ii) killall.	CO1	7 Marks
		UNIT-V		
9	a)	Illustrate how unrelated process can communicate using named pipes.	CO5	7 Marks
	b)	Explain O-RDONLY and O-WRONLY command.	CO1	7 Marks
		(OR)		
10	a)	Discuss the Client/Server application creation using FIFO.	CO1	10 Marks
	b)	Illustrate the sequence after a call to pipe and fork.	CO1	4 Marks

COMPUTER VISION
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Give a brief overview of the anatomical structure of the Eye.	CO2	9 Marks
	b)	Give a brief explanation about Surface reflection.	CO2	5 Marks
		(OR)		
2	a)	Why do artificial light sources tend to produce colored light?	CO2	8 Marks
	b)	Explain about Color of surfaces.	CO1	6 Marks
		UNIT-II		
3	a)	Write about Image De-noising in detail.	CO3	10 Marks
	b)	Develop an algorithm for Texture representation using Vector quantization.	CO4	4 Marks
		(OR)		
4	a)	Develop Essential matrix and Fundamental matrix for Binocular camera geometry and the epipolar constraint.	CO4	7 Marks
	b)	Show that a circle appears as an ellipse in an orthographic view, that the minor axis of this ellipse is the tilt direction, and that the aspect ratio is the cosine of the slant angle.	CO1	7 Marks
		UNIT-III		
5	a)	Discuss about Human vision: Grouping and Gestalt with examples.	CO2	10 Marks
	b)	List out the important applications of Segmentation by Clustering.	CO1	4 Marks
		(OR)		
6	a)	Illustrate Agglomerative clustering with a graph and Develop an algorithm.	CO4	7 Marks
	b)	Explain Divisive clustering with a graph and Develop an algorithm.	CO1, CO4	7 Marks
		UNIT-IV		
7	a)	Explain Receiver Operating Curves (ROC) in detail.	CO2	10 Marks
	b)	Define the following. i) Error-rate. ii) Cross-validation.	CO1	4 Marks
		(OR)		
8	a)	Explain Detecting humans using Sliding window method.	CO1	7 Marks
	b)	Explain Detecting boundaries using Sliding window method.	CO1	7 Marks
		UNIT-V		
9	a)	Explain in detail about how to improve Current Image Features.	CO1	8 Marks
	b)	Describe the kinds of Image features.	CO1	6 Marks
		(OR)		
10	a)	Explain approximate Nearest neighbors by local sensitive hashing.	CO1	8 Marks
	b)	Describe about Ranking documents.	CO1	6 Marks

BIOMEDICAL INSTRUMENTATION
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Sketch the structure of living cell and explain its components.	CO1	7 Marks
	b)	List the problems encountered in measuring a living system.	CO4	7 Marks
		(OR)		
2		Identify the suitable electrode for measurement of cardiac signals and explain each in detail.	CO5	14 Marks

UNIT-II

3		Discuss different lead configurations used in ECG with relevant sketches.	CO2	14 Marks
		(OR)		
4		Describe the various methods available for measurement of Blood Pressure and explain any one.	CO2	14 Marks

UNIT-III

5	a)	Explain the standard norms of electrode configuration for measurement of EEG with neat diagram.	CO6	7 Marks
	b)	Describe the analysis of brain waves.	CO3	7 Marks
		(OR)		
6		Explain the principle, working of spirometer with suitable schematic diagram.	CO1	14 Marks

UNIT-IV

7		Illustrate circuit diagram of fixed rate pace makers and explain its working.	CO1	14 Marks
		(OR)		
8		Define diathermy and also explain microwave diathermy with a neat sketch.	CO1	14 Marks

UNIT-V

9		Distinguish ultrasonic imaging systems (A, B and M mode) with suitable diagrams.	CO5	14 Marks
		(OR)		
10		Identify the suitable instrument to analyze EGG and also explain principle and working of required instrument with neat sketch.	CO5	14 Marks

PRINCIPLES OF COMMUNICATIONS

[Electrical and Electronics Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw the block diagram of communication system and explain each block.	CO1	7 Marks
	b)	Determine the percentage saving when the carrier wave and one of the sidebands are suppressed in an AM wave modulated to a depth of: i) 100% and ii) 50%.	CO2	7 Marks
		(OR)		
2	a)	Discuss about SSB-SC signal generation using phase shift method with suitable diagrams.	CO5	8 Marks
	b)	Differentiate: i) Line communication and radio communication. ii) Analog and digital signals.	CO2	6 Marks

UNIT-II

3	a)	Derive the mathematical expression for FM wave and its modulation index.	CO1	7 Marks
	b)	Derive the expression for narrow band FM.	CO1	7 Marks
		(OR)		
4		Define frequency modulation. Derive the expression for single tone FM wave and specify the bandwidth requirements.	CO4	14 Marks

UNIT-III

5		With a neat block diagram, explain a Digital Communication system and its advantages.	CO1	14 Marks
		(OR)		
6	a)	Draw and explain PAM modulator.	CO2	7 Marks
	b)	Explain the PAM signal recovery through holding circuit method.	CO5	7 Marks

UNIT-IV

7	a)	With suitable block diagram, explain the principle of operation of a PCM system	CO1	8 Marks
	b)	Explain different types of digital modulation techniques.	CO3	6 Marks
		(OR)		
8	a)	Explain the need for quantization and its effects in digital transmission.	CO5	8 Marks
	b)	Briefly explain ASK, FSK and PSK with relevant waveforms.	CO1	6 Marks

UNIT-V

9	a)	Define information, entropy and rate of information.	CO1	6 Marks
	b)	A discrete source emits one of five symbols once every milli seconds with probabilities 1/2, 1/4, 1/8, 1/16 and 1/16 respectively. Determine and information rate.	CO4	8 Marks
		(OR)		
10	a)	What is the importance of error detection and correction codes for error control?	CO6	4 Marks
	b)	State and explain convolutional codes with suitable examples.	CO1	10 Marks

COMPUTER ORGANIZATION AND ARCHITECTURE
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	With an example, show how user program and OS routine share the processor time effectively.	CO2	7 Marks
	b)	List the different types of buses present in a computer. Sketch the interconnections of the functional units of a computer to a single bus structure.	CO1	7 Marks
		(OR)		
2	a)	Select suitable algorithm for adding and subtracting numbers in signed 2's complement representation.	CO5	7 Marks
	b)	Pipelining increases speed of execution. Justify.	CO6	7 Marks

UNIT-II

3	a)	Design a 4 bit combinational circuit shifter.	CO3	7 Marks
	b)	Draw the flow chart to decode an instruction cycle.	CO5	7 Marks
		(OR)		
4	a)	Show how computer registers are connected to a common bus using multiplexers.	CO5	7 Marks
	b)	List and briefly explain the registers of a basic computer.	CO1	7 Marks

UNIT-III

5	a)	Describe the control and status signals of8085.	CO1	7 Marks
	b)	Discuss about the logical instructions of 8085 and their real time applications.	CO3	7 Marks
		(OR)		
6	a)	Draw the pin diagram of 8085 and justify the need to multiplex address and data pins.	CO1	7 Marks
	b)	Differentiate between JMP and CALL instructions.	CO2	7 Marks

UNIT-IV

7	a)	Draw and explain the 8085 interrupts and vector locations.	CO1	7 Marks
	b)	Interface two 2KB of EPROM to the 8085 processor by selecting suitable addresses.	CO4	7 Marks
		(OR)		
8	a)	Explain the addressing modes of 8085 with example.	CO1	7 Marks
	b)	Explain how a RAM chip (1K x 8) can be interfaced to 8085 microprocessor with the help of a diagram.	CO2	7 Marks

UNIT-V

9	a)	Design the organization of a 1K x 1 Memory with a neat sketch.	CO3	7 Marks
	b)	Analyze the working of static RAM cell.	CO2	7 Marks
		(OR)		
10	a)	Cache memory increases the speed of operation. Justify.	CO6	7 Marks
	b)	Discuss Out-of-order execution of a program.	CO1	7 Marks

SENSORS AND SIGNAL CONDITIONING
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Explain the loading effect on the accuracy of a resistance potentiometer transducer when used for measurement of displacement.	CO1	7 Marks
	b)	Apply the conceptual knowledge for the measurement of Relative humidity present in surrounding environment.	CO6	7 Marks
		(OR)		
2		Explain with the aid of a circuit diagram the principle of operation of a strain measurement system with temperature compensation technique.	CO5	14 Marks
		UNIT-II		
3		How angular displacement is measured using capacitive transducer?	CO1	14 Marks
		(OR)		
4		How is the rotational displacement measured by using capacitive transducer?	CO1	14 Marks
		UNIT-III		
5	a)	Compare a total radiation pyrometer with an optical pyrometer in terms of operation and construction details.	CO1	7 Marks
	b)	Provide a feasible solution for the conversion of mechanical energy into electrical energy.	CO4	7 Marks
		(OR)		
6		Explain the principle of working and construction details of a photo-voltaic cell. Explain why it is very useful for space applications.	CO1	14 Marks
		UNIT-IV		
7		Define digital sensor and explain the operation of position encoder with neat sketch.	CO1	14 Marks
		(OR)		
8		Analyze in detail the fiber –optic sensors and explain its applications.	CO2	14 Marks
		UNIT-V		
9		Sketch the block diagram of signal conditioning circuit and explain each block in detail	CO3	14 Marks
		(OR)		
10		Choose an appropriate technique to measure Reactance and also explain the operation in detail.	CO5	14 Marks

OBJECT ORIENTED ANALYSIS AND DESIGN
[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Write the importance of modeling.	CO1	4 Marks
	b)	List and explain principles of modeling.	CO1	10 Marks
		(OR)		
2	a)	Categorize the basic building blocks of UML with examples.	CO1	7 Marks
	b)	Describe structural and behavioral diagrams of UML in detail.	CO1	7 Marks

UNIT-II

3	a)	Distinguish class diagram and object diagram.	CO2	7 Marks
	b)	Analyze and explain how to control the visibility of elements present in package.	CO2	7 Marks
		(OR)		
4	a)	Categorize the owned elements in packages.	CO1	7 Marks
	b)	Compare and contrast various adornments in dependency relationship.	CO2	7 Marks

UNIT-III

5	a)	Design and apply modeling techniques of use case diagram for ATM application.	CO3	7 Marks
	b)	Design a model for home automation system with class diagram.	CO3	7 Marks
		(OR)		
6	a)	Design and apply modeling techniques of sequence diagram for School monitoring system.	CO3	7 Marks
	b)	Design a model for communication setup in mobile with sequence diagram.	CO3	7 Marks

UNIT-IV

7		Discuss in detail about State machines along with simple state, nested states, concurrent states, different events and action within each state for Point of Sale system.	CO4	14 Marks
		(OR)		
8		Describe the communication problems between thread states and thread lifecycle in state chart diagram.	CO4	14 Marks

UNIT-V

9	a)	Design a model for online shopping through component diagram.	CO5	7 Marks
	b)	Design a model for client server communication through deployment diagram.	CO5	7 Marks
		(OR)		
10	a)	Design and apply modeling techniques of component diagram for home automation system.	CO5	7 Marks
	b)	Design and apply modeling techniques of deployment diagram for library information system.	CO5	7 Marks

[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Name different types of lists supported by HTML. Distinguish between HTML and HTML5.	CO1, CO2	7 Marks
	b)	Explain the following HTML tags with suitable example. i) <pre>. ii) <canvas>. iii) <img>. iv) .	CO1	7 Marks
		(OR)		
2	a)	Explain the frames and table tags of HTML with suitable example.	CO1	7 Marks
	b)	Explain the following HTML tags with suitable example. i) <font>. ii) <meta>. iii) <p>. iv) <video>.	CO1	7 Marks
		UNIT-II		
3	a)	Classify CSS selectors and explain.	CO2	7 Marks
	b)	Design a web page that display credit card type and then validate the entered card number according to the card type.	CO6	7 Marks
		(OR)		
4	a)	Explain the following pre-defined objects of JavaScript. i) Window. ii) Document.	CO1	7 Marks
	b)	Develop a web page to convert Indian rupees to Foreign currency. Read the Indian rupees through input dialog and select foreign currency to which Indian rupees are converted using drop down menu.	CO6	7 Marks
		UNIT-III		
5		Develop a mobile optimized website for displaying the images using responsive classes.	CO5	14 Marks
		(OR)		
6		Develop Contact Us Web Page using the grid system in bootstrap.	CO5	14 Marks
		UNIT-IV		
7	a)	Build a PHP Page that reads User Name and Favorite Color from the html form and then display user name in green color and sets user favorite color as a background color to the web page	CO4	8 Marks
	b)	Demonstrate the implementation of Object Cloning in PHP.	CO1	6 Marks
		(OR)		
8	a)	Develop a PHP code to implement multi-level inheritance.	CO3	8 Marks
	b)	Demonstrate OOP principles with suitable example using PHP	CO1	6 Marks
		UNIT-V		
9	a)	Define a prepared statement. Explain in detail with the suitable program.	CO3	7 Marks
	b)	Create a web page to perform form data validation in PHP.	CO4	7 Marks
		(OR)		
10	a)	List the different authentication methodologies used in PHP.	CO1	7 Marks
	b)	Design a web page to store the contact us form data in the database using PHP. (Note: contact us page contains the following fields Name, Email, subject, message and submit button).	CO3	7 Marks

COMPILER DESIGN

[Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the different phases of a compiler, showing the output of each phase using the example of the following statement: position : = initial + rate x 60	CO1	8 Marks
	b)	Compare compiler and interpreter with suitable diagrams.	CO1	6 Marks
		(OR)		
2	a)	What is the role of the lexical analyzer? Explain Compiler construction tools.	CO5	7 Marks

	b)	Identify the token and lexemes in the following function:
		intgcd (int m, int n)
		{
		if n == 0 then return (m);
		else return (gcd (n, m mod n));
		}
			CO1	7 Marks

UNIT-II

3	a)	Construct the predictive parsing table for the following grammar. ***S →iEtSS/ a, S→iEtSSeS/ e, E→b***	CO3	6 Marks
	b)	Explain about Left Recursion.	CO1	8 Marks
		(OR)		
4	a)	Explain the basic operations of Shift Reduce Parser and perform Shift Reduce Parsing of the input string "id_1 - id_2 * id_3" by conserving the grammar E→E- E E→E*E E→id	CO3	7 Marks
	b)	Explain a method how ambiguous grammar's can be parsed with an example.	CO1	7 Marks

UNIT-III

5	a)	Write a note on the specification of a simple type checker using example.	CO4	7 Marks
	b)	What is a type expression? Explain the equivalence of type expressions with an appropriate example.	CO1	7 Marks
		(OR)		
6	a)	Write notes on type conversion.	CO1	7 Marks
	b)	Describe about type expressions.	CO1	7 Marks

UNIT-IV

7		Explain the usage of different storage allocation strategies.	CO6	14 Marks
		(OR)		
8	a)	Explain about Runtime storage administration.	CO6	7 Marks
	b)	Write about different data structures suitable for Symbol Table.	CO1	7 Marks

UNIT-V

9	a)	Describe about principal sources of optimization.	CO1	7 Marks
	b)	Explain the different issues in the design of a code generator.	CO1	7 Marks
		(OR)		
10		Generate and Analyze the code for the following C statements: i) $x = f(a) + f(a) + f(a)$. ii) $x = f(a)/g(b,c)$. iii) $x = f(f(a))$.	CO2	14 Marks

III B.Tech I Semester (SVEC-16) Supplementary Examinations August - 2021

MODELING AND SIMULATION
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Name several entities, attributes, activities, events and state variables for the following systems. CO1 9 Marks
   i) A cafeteria.
   ii) A grocery store.
   iii) A hospital emergency room.

   b) What are the events and activities associated with the use of your check book? CO1 5 Marks

(OR)

2 Consider the following continuously operating job shop. Inter-arrival times of jobs are distributed as follows: CO2 14 Marks

Time Between Arrivals (Hours)	Probability
0	0.23
1	0.37
2	0.28
3	0.12

Processing times for jobs are normally distributed, with mean 50 minutes and standard deviation 8 minutes. Construct a simulation table and perform a simulation for 10 new customers. Assume that, when the simulation begins, there is one job being processed (scheduled to be completed in 25 minutes) and there is one job with a 50-minute processing time in the queue.

i) What was the average time in the queue for the 10 new jobs?
ii) What was the average processing time of the 10 new jobs?
iii) What was the maximum time in the system for the 10 new jobs?

UNIT-II

3 a) List and explain terminology and concepts of statistical models in simulation. CO1 9 Marks

   b) A production process manufactures alternators for outboard engines used in recreational boating. On the average, 1% of the alternators will not perform up to the required standards when tested at the engine assembly plant. When a large shipment of alternators is received at the plant, 100 are tested, and, if more than two are nonconforming, the shipment is returned to the alternator manufacturer. What is the probability of returning a shipment? CO3 5 Marks

(OR)

4	a)	Describe useful statistical models and its situations that arise to conduct simulation.	CO1	9 Marks
	b)	An industrial chemical that will retard the spread of fire in paint has been developed. The local sales representative has estimated, from past experience that 48% of the sales calls will result in an order. i) What is the probability that the first order will come on the fourth sales call of the day? ii) If eight sales calls are made in a day, what is the probability of receiving exactly six orders? iii) If four sales calls are made before lunch, what is the probability that one or fewer results in an order?	CO4	5 Marks

UNIT-III

5		Explain the characteristics of queueing systems.	CO1	14 Marks

(OR)

6	a)	Describe the long-run measures of performance of queueing systems.	CO1	7 Marks
	b)	With an example, explain the queueing notation.	CO1	7 Marks

UNIT-IV

7		With example, explain combined linear congruential generators for generating random numbers.	CO4	14 Marks

(OR)

8	a)	Describe important considerations of generating random numbers.	CO1	10 Marks
	b)	Generate random numbers on the interval [0, 1] with 2-digit accuracy.	CO4	4 Marks

UNIT-V

9		Synthesize a suitable method for collecting data from stale data and time varying data.	CO5	14 Marks

(OR)

10	a)	Explain the methods for selecting families of input distributions when data available is independent and identically distributed.	CO1	11 Marks
	b)	Design probability density functions of the Erlang distribution where $\theta = 2$ and $k = 1, 2, 4$, and 8.	CO6	3 Marks

CODE No.: 16BT60402 SVEC-16

Roll No. | | | | | | | | | | |

DIGITAL SIGNAL PROCESSING
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Given the sequence $x(n) = (6 - n)[u(n) - u(n - 6)]$, make a sketch of: i) $y(n) = x(4 - n)$. ii) $y(n) = x(n^2 - 2n + 1)$.	CO4	8 Marks
	b)	State and prove any two properties of DTFT.	CO2	6 Marks
		(OR)		
2	a)	State and prove the necessary and sufficient condition for causality of an LTI discrete time system.	CO2	7 Marks
	b)	The system is represented by the difference equation: $y(n) = x(n+1) + 3x(n) + 5x(n - 1)$ Is the system causal, stable, and time invariant? Justify your answer.	CO4	7 Marks

UNIT-II

3	a)	Determine the circular convolution of the sequences. $X_1(n) = \{1, 1, -1, -1\}$ and $X_2(n) = \{1, 0, -1, 0, -1\}$	CO2	8 Marks
	b)	Sketch the radix 2 DIF FFT structure when N=16.	CO1	6 Marks
		(OR)		
4	a)	Draw the radix 2 DIT FFT structure when N=16.	CO1	7 Marks
	b)	State and prove the circular time shifting property of DFT.	CO2	7 Marks

UNIT-III

5	a)	Convert the analog filter into digital filter whose system function is $H(s) = \frac{(s + 0.2)}{(s + 0.2)^2 + 9}$ using impulse invariant method.	CO5	7 Marks
	b)	Derive an expression for order of the chebhyshev analog prototype filter.	CO2	7 Marks
		(OR)		
6	a)	Using bilinear transformation design a digital bandpass butter worth filter with the following specifications. sampling frequency=8KHz. αp=2dBin passband 800Hz≤f≤1000Hz. αs=20dB in stopband $0 \le f \le 400$Hz and $200\text{Hz} \le f \le \infty$.	CO5	10 Marks
	b)	Discuss transpose form of second order IIR system realizations.	CO2	4 Marks

UNIT-IV

7	a)	Distinguish the window functions used in the design of FIR filters.	CO2	7 Marks
	b)	Design a linear phase FIR Lowpass filter using rectangular window with cut off frequency Wc=0.2π rad/sample and $N = 7$.	CO3	7 Marks
		(OR)		
8	a)	Design Low pass FIR filter for the desired frequency response $H_d(w) = \begin{cases} e^{-j2w} & -\pi/4 \le \omega \le \pi/4 \\ 0 & \pi/4 \le \omega \le \pi \end{cases}$ using Rectangular window when N=5.	CO3	7 Marks
	b)	Design a linear phase FIR bandstop filter to reject frequencies in the range 0.35π to 0.48π rad/sample by taking 75 samples of rectangular window.	CO3	7 Marks

UNIT-V

9	a)	Write the silent features of TMS320C6X family of digital signal processor.	CO1	7 Marks
	b)	Explain various types of general purpose register in TMS320C6X.	CO1	7 Marks
		(OR)		
10	a)	Elaborate any three special purpose addressing mode in DSP processors.	CO1	7 Marks
	b)	Discuss in detailed about pipelining of instruction execution in DSP processor.	CO1	7 Marks

CODE No.: 16BT60404 SVEC-16

IMAGE PROCESSING
[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Write the Applications of Image Transforms.	CO6	6 Marks
	b)	Write the Properties of 2-D DFT. i) Scaling. ii) Shifting. iii) Rotation. iv) Convolution.	CO1	8 Marks
		(OR)		
2	a)	Explain about image sampling and quantization and write its applications in communication.	CO6	7 Marks
	b)	Apply Walsh Transform for the given image F = [0 1 3 6] and write the transformed image.	CO5	7 Marks

UNIT-II

3	a)	Compare different enhancement techniques in frequency domain.	CO2	7 Marks
	b)	Distinguish between image smoothening and sharpening and perform the correspondence between filtering in the spatial and frequency domains.	CO2	7 Marks
		(OR)		
4	a)	State and explain any two smoothing linear filter.	CO1	7 Marks
	b)	Distinguish between spatial domain and frequency domain techniques of image enhancement.	CO2	7 Marks

UNIT-III

5	a)	Explain about constrained least squares restoration process for image restoration.	CO1	7 Marks
	b)	Write the algorithm used in adaptive filters whose behavior changes based on stastical characteristics.	CO3	7 Marks
		(OR)		
6	a)	Distinguish between Inverse filtering, wiener filtering and Constrained least squares filtering.	CO3	7 Marks
	b)	Develop algorithm for adaptive median filter for restoration of an image.	CO3	7 Marks

UNIT-IV

7	a)	Calculate the code interval for the source with symbols S1, S2, S3, S4, S5 using arithmetic coding.	CO4	7 Marks
	b)	Explain dictionary based compression technique.	CO1	7 Marks
		(OR)		
8	a)	What is meant by lossy compression? Discuss about transform coding.	CO1	7 Marks
	b)	Write a short notes on: i) Inter pixel redundancy. ii) Psychovisual Redundancy.	CO1	7 Marks

UNIT-V

9	a)	Apply various techniques in Color transformations in image processing.	CO5	7 Marks
	b)	Explain the concept of motion in segmentation. What is its use?	CO1	7 Marks
		(OR)		
10	a)	Define an edge in a digital image. What are the derivative operators useful in image segmentation and explain their role in segmentation?	CO1	7 Marks
	b)	What are the techniques used in image processing to describe point, line and edge detection?	CO5	7 Marks

WIRELESS NETWORKS
[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Write about wireless data services.	CO1	7 Marks
	b)	Demonstrate the functionalities of 2G Digital Cellular Standards.	CO2	7 Marks
		(OR)		
2	a)	Differentiate Voice-Oriented and Data-Oriented Access.	CO2	10 Marks
	b)	Solve interference issues using Wireless LAN Standards.	CO4	4 Marks
		UNIT-II		
3	a)	Compare Ad-Hoc and Infrastructure topology.	CO2	10 Marks
	b)	Why band splitting is not used in 2G cellular networks.	CO1	4 Marks
		(OR)		
4	a)	Evaluate five different cell types in the cellular hierarchy and compare them in terms of coverage and antenna site.	CO5	7 Marks
	b)	How to improve the capacity of a cellular network.	CO1	7 Marks
		UNIT-III		
5	a)	Draw and explain the Reference Architecture of IEEE 802.11.	CO1	7 Marks
	b)	Illustrate the concept of Carrier sensing.	CO2	7 Marks
		(OR)		
6	a)	Categorize various Physical specification of DSSS	CO2	8 Marks
	b)	What is the PCF in 802.11, what services does it provide, and how is it implemented?	CO1	6 Marks
		UNIT-IV		
7	a)	With suitable diagram explain the subsystems of GSM Architecture.	CO1	10 Marks
	b)	Apply the framing structure in GSM in mobile Applications.	CO5	4 Marks
		(OR)		
8	a)	Analyze the reasons to perform handoff.	CO2	8 Marks
	b)	Choose the services of GSM suitable for current data networks.	CO6	6 Marks
		UNIT-V		
9	a)	With neat sketch explain the basic architecture of a WATM network.	CO1	8 Marks
	b)	Design solutions for Privacy in SWAN and WATM systems	CO3	6 Marks
		(OR)		
10		Considering that the encoded voice in Bluetooth is at 64Kbps in each direction. Find the following: i) Use packet format for the HV1 channels to show that these packets are sent every six slots. ii) Use packet format for the HV2 channel to find how often these packets are sent.	CO4	14 Marks

MANAGERIAL ECONOMICS AND PRINCIPLES OF ACCOUNTANCY
[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1	Define Demand and explain factors that determining demand with examples.	CO1	14 Marks
	(OR)		
2	What is meant by Demand Forecasting? Why it is important for the managers of the business firm?	CO2	14 Marks

UNIT-II

3	Distinguish between Average Cost and Marginal Cost in detail with diagrammatic representation.	CO1, CO2	14 Marks
	(OR)		
4	From the following particulars, find: a) Contribution. b) P/V ratio. i) Variable cost per unit Rs.40 ii) Selling Price per unit Rs.80 iii) Fixed expenses Rs.2,00,000 iv) Output Rs.10,000	CO2	14 Marks

UNIT-III

5	Explain the Objectives and types of pricing with suitable examples.	CO1	14 Marks
	(OR)		
6	Explain the Price and Output determination in short run and long run under Perfect competition.	CO1	14 Marks

UNIT-IV

7	What is Account. Explain its types and principles.	CO1	14 Marks
	(OR)		
8	Define Capital. Explain its types and sources with examples.	CO1	14 Marks

UNIT-V

9	Discuss the items in Profit and Loss account Proforma detailly.	CO1	14 Marks
	(OR)		

10 From the following, prepare a Trading account, Profit and Loss Account and Balance Sheet. CO4, CO5, CO6 14 Marks

Account statement as on 31st December, 2018.

Particulars	Rs.	Particulars	Rs.
Opening Stock	1,53,100	Capital	25,00,000
Purchase	8,24,000	Drawings	4,80,000
Sales	25,60,000	Sundry Debtors	5,70,000
Returns (Dr.)	40,000	Sundry Creditors	1,40,000
Returns (Cr.)	24,000	Depreciation	42,000
Factory Rent	1,80,000	Charity	5,000
Custom Duty	1,15,000	Cash Balance	44,600
Coal, Gas and Power	60,000	Bank Balance	40,000
Wages & Salary	3,66,000	Bank Charges	1,800
Discount (Dr.)	75,000	Establishment Expenses	36,000
Commission (Cr.)	12,000	Plant	4,20,000
Bad-Debts	58,500	Leasehold Building	15,00,000
Bad-Debts Recovered	20,000	Goodwill	2,00,000
Apprentice Premium	48,000	Patents	1,00,000
Productive Expenses	26,000	Trade Marks	50,000
Unproductive Expenses	50,000	Loan Cr.	2,50,000
Carriage	87,000	Interest on Loan	30,000

The value of Closing Stock on 31st December, 2018 was Rs.2,54,000.

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is Data Abstraction? Explain about different views of data.	CO4	7 Marks
	b)	Discuss about Database users and Administrators.	CO1	7 Marks
		(OR)		
2	a)	Write about logical database design (ER to Relational) with suitable examples.	CO1	7 Marks
	b)	Draw ER diagram for Ternary Relationship set with suitable example.	CO1	7 Marks

UNIT-II

3	a)	Explain in detail about expressive power of algebra and calculus.	CO4	7 Marks
	b)	Discuss about outer joins with examples.	CO2	7 Marks
		(OR)		
4	a)	Write about triggers and active databases.	CO3	7 Marks
	b)	How to list and update row in a table? Explain with syntax and examples.	CO2	7 Marks

UNIT-III

5	a)	What is meant by multivalued dependency? Explain with example.	CO2	7 Marks
	b)	Prove that any relation schema with two attributes is BCNF.	CO2	7 Marks
		(OR)		
6	a)	If R= {A, B, C, G, H, I} and FD's are F= {A◊B, B◊HI, CG◊H}, why R is not in 4NF?	CO2	7 Marks
	b)	What is meant by attribute closure? Explain.	CO3	7 Marks

UNIT-IV

7	a)	Explain transaction management with relevant concept.	CO5	7 Marks
	b)	Explain briefly normal forms with relevant example.	CO2	7 Marks
		(OR)		
8	a)	Explain ACID properties of transaction management.	CO5	7 Marks
	b)	Explain concurrency control with lock based protocols.	CO4	7 Marks

UNIT-V

9	a)	Discuss about file organizations and indexing.	CO1	7 Marks
	b)	Explain about Index structures.	CO5	7 Marks
		(OR)		
10	a)	Explain about linear hashing.	CO6	7 Marks
	b)	Explain about Delete and Duplicated in Tree Structured Indexing.	CO5	7 Marks

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Construct a Non-deterministic finite automaton accepting {ab, ba} and use it to find a DFA accepting the same set.	CO3	7 Marks
	b)	State and prove the equivalence of NFA with ε-transitions and NFA without ε-transitions.	CO1	7 Marks

(OR)

2	a)	Construct DFA for the given NFA where q_0 is the initial state and q_3 is a final state	CO3	7 Marks

	a	b	C
q_0	q_1	Φ	Φ
q_1	q_0	q_3	q_2
q_2	Φ	Φ	q_1
q_3	Φ	q_1	Φ

	b)	Design an NFA for the set of all strings over alphabet {0,1,2,3,4,5,6,7,8,9} such that the final digit has never appeared before.	CO4	7 Marks

UNIT-II

3	a)	Prove that (1+00*1) + (1+00*1) (0+10*1)*(1+10*1) = 0*1(0+10*1)*.	CO1	7 Marks
	b)	Construct a minimum state automaton equivalent to the FA given below. Here Q_0 is an initial state and Q_7 is a final state	CO5	7 Marks

State	0	1
Q_0	Q_1	Q_5
Q_1	Q_6	Q_2
Q_2	Q_0	Q_2
Q_3	Q_2	Q_6
Q_4	Q_7	Q_5
Q_5	Q_2	Q_6
Q_6	Q_6	Q_4
Q_7	Q_6	Q_2

(OR)

4	a)	Let r = 1 (1 + 0)*, s= 11*0 and t = 1 * 0 be three regular expressions. Find the relationship between L(r), L(s) and L(t).	CO2	7 Marks
	b)	Construct regular expression for the following languages: i) the set of all strings with exactly 3 consecutive zeros, Σ={0,1}. ii) the set of all strings over {a,b} ending in 'aba'. iii) the set of all strings of {0,1,2} such that any number of 0's followed by any number of 1's followed by any number of 2's	CO2	7 Marks

UNIT-III

5	a)	Construct a CFG for the language L= { $a^n b^n$/ n ≥ 1} and construct a derivation tree for it. Is the grammar ambiguous?	CO3	7 Marks
	b)	Convert the following grammar to equivalent grammar to CNF S→bA/aB, A→bAA/ aS/a, B→aBB/bS/b.	CO5	7 Marks

(OR)

6	a)	Draw Parse tree and also show Left most derivation and Rightmost Derivation for the string (id + id * id) + (id * id * id) + id * id from the following CFG E →E + E / E * E / (E) / id	CO1	7 Marks
	b)	Design a grammar generating the language L={WCW^R / w ε { a,b}$^+$.	CO3	7 Marks

UNIT-IV

7	a)	Construct PDA for the Language L = {$a^m b^2 c^m$/ m ≥ 1}.	CO3	7 Marks
	b)	Construct an equivalent PDA for the following CFG S→bAA/a, A→aSA/b.	CO5	7 Marks

(OR)

8	a)	Construct Non deterministic PDA for Language L = {ww^r/w Є (a, b)*}	CO3	7 Marks
	b)	Give the CFG generating the language accepted by the following PDA. $\delta(q_0, 1, z_0)=\{(q_0, XZ_0)\}$, $\delta(q_0, 1, X)=\{(q_0, XX)\}$, $\delta(q_0, 0, X)=\{(q_1, X)\}\delta(q_0, \varepsilon, z_0)=\{(q_0, \varepsilon)\}$, $\delta(q_1, 1, X)=\{(q_1, \varepsilon)\}\delta(q_1, 0, z_0)=\{(q_0, Z_0)\}$.	CO5	7 Marks

UNIT-V

9	a)	Write the applications of TM and Construct a TM accepting the language L={$a^n b^n$/n ≥ 0}.	CO1	7 Marks
	b)	Design a TM over Σ={a,b} to accept the language L={wCw/wε {a,b}$^+$ }.	CO3	7 Marks

(OR)

10	a)	Define Turing Machine and Construct a TM accepting the language L={$a^n b^{m+n} c^m$/m, n ≥1}.	CO4	7 Marks
	b)	Write the mathematical model of a TM and what are the various programming techniques for constructing a Turing Machine.	CO1	7 Marks

IRRIGATION ENGINEERING
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define Irrigation. List the advantages, disadvantages and purpose of irrigation.	CO1	7 Marks
	b)	Explain duty, delta and base period. Derive their relationship.	CO2	7 Marks
		(OR)		
2	a)	Describe with the help of sketch various forms of soil water. Which of this soil moisture is mainly vaiable for utilization by the plant?	CO1	7 Marks
	b)	An irrigation canal has gross commanded area of 70,000 hectares out of which 80% is culturable irrigable. The intensity of irrigation for Kharif season is 30% and for Rabi season 60%. Find the discharge required at the head of the canal if the duty at its head is 800 hectares/cumecs for Kharif season and 1700 hectares cumec for Rabi season.	CO3	7 Marks

UNIT-II

3	a)	Discuss the brief note on Khosla's theory of design of weirs on permeable foundation.	CO3	7 Marks
	b)	Define Barrage. How does a barrage differ from a weir and dam?	CO1	7 Marks
		(OR)		
4	a)	Discuss briefly the deign consideration of weir on permeable foundation.	CO3	7 Marks
	b)	List the limitation of Bligh's creep theory.	CO4	7 Marks

UNIT-III

5	a)	Classify various types of dams. Distinguish clearly between rigid and non-rigid dams.	CO2	7 Marks
	b)	Explain gravity dam. Disuses the various forces acting on gravity dam with figure.	CO3	7 Marks
		(OR)		
6	a)	Explain the criteria of the safe design of earthen dam.	CO4	7 Marks
	b)	A masonry dam 6m high is 1.5m wide at top and 4.5m wide at the bottom, with vertical water face. Determine the normal stresses at the toe and heel for reservoir empty. Take ρ=2.4 and c=1.	CO3	7 Marks

UNIT-IV

7	a)	Define canal and explain the different types of canal.	CO2	7 Marks
	b)	Explain lined and unlined canal and list the different materials used for lining of the canal.	CO1	7 Marks
		(OR)		
8	a)	Define canal outlet. Explain different types of canal outlets with figure.	CO2	7 Marks

	b)	Explain the procedure of designing a channel with Kennedy's theory.	CO3	7 Marks

UNIT-V

9	a)	Classify river training works and discuss any one of the in details.	CO4	7 Marks
	b)	Explain the terms meandering type, aggrading type and degrading type.	CO2	7 Marks

(OR)

10	a)	List the causes for failure of cross drainage work.	CO4	7 Marks
	b)	Design waterway and head loss through a syphon aqueduct if the following data at the crossing of a canal and a drainage are given: i) discharge of canal is 40 cumecs, ii) bed width of canal is 30 m, iii) full supply depth of canal is 1.6 m, iv) bed level of canal is 206.4 m, v) side slope of canal is 3/2H:1 V, vi) high flood discharge of drainage is 450 cumecs, vii) high flood level of drainage is 207.0 m, viii) bed level of drainage is 204.5 m, ix) general ground level is 206.5 m.	CO4	7 Marks

REINFOCED CEMENT CONCRETE STRUCTURES
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What are the advantages of limit state method over working stress and ultimate load methods?	CO1	5 Marks
	b)	What are the assumptions in working stress method?	CO1	5 Marks
	c)	Explain mode of failures of sections.	CO1	4 Marks
		(OR)		
2	a)	Determine the ultimate flexural strength of the T-beam having the following section parameters. Width of the flange – 800 mm, depth of the flange-150 mm, width of the rib-300 mm, effective depth- 420 mm, area of the steel-1250mm^2 use M-20 grade of concrete and Fe-415 HYSD bar.	CO3	7 Marks
	b)	A reinforced concrete beam having breadth 230 mm and factored moment 100 kN-m. Use M25 concrete and Fe 500 steel. Calculate the area of steel in the section and cross section of beam.	CO3	7 Marks

UNIT-II

3	a)	How will you calculate the effective width of T and L-beam? Define each parameter.	CO1	5 Marks
	b)	What is shear reinforcement? Write the provisions to calculate shear reinforcement.	CO1	5 Marks
	c)	Explain the objectives of design. Also explain the advantages of RCC.	CO1	4 Marks
		(OR)		
4		A T-beam slab floor of reinforced concrete has a slab of 150 mm thick spanning between the T–beam which is spaced 3 m apart. The beam has a clear span of 10 m and the end bearings are 450 mm thick walls. The live load on the floor is 4kN/m^2. M-20 grade of concrete and Fe-415 HYSD bars. Design one the intermediate T-beams	CO3	14 Marks

UNIT-III

5	a)	Enumerate the code provisions for minimum reinforcement to be provided as primary and secondary reinforcement in R.C. slab.	CO5	5 Marks
	b)	Differentiate one-way slab and two-way slab.	CO1	5 Marks
	c)	With a neat sketch, write the values of moment and shear coefficients of continuous slab.	CO1	4 Marks
		(OR)		
6		Design a simply supported R.C.C slab for an office floor having clear dimensions of 4 m by 10 m with 230 mm wall around. Adopt M-20 grade concrete and Fe-425 grade HYSD bears.	CO3	14 Marks

UNIT-IV

7	a)	Classify the columns based on loadings and slenderness ratios.	CO1	5 Marks
	b)	What is meant by unsupported length of a column?	CO1	5 Marks
	c)	What is meant by Effective length of a column?	CO5	4 Marks
		(OR)		

8		Design the reinforcement in a rectangular column of size 300 x 450 mm to support a design ultimate load of 400 kN, together with a factored moment of 200 KN-m. Adopt M-20 grade concrete and Fe-415 grade HYSD bears. Sketch the details of reinforcement. Use SP-16 chart.	CO3	14 Marks

UNIT-V

9	a)	What are the types of stair case according to spanning? Explain with neat sketches.	CO1	5 Marks
	b)	What are the critical sections of determining the bending moment in isolated footing?	CO1	5 Marks
	c)	How would you determine the minimum depth of foundation?	CO7	4 Marks

(OR)

10		Design an isolated square sloped footing for a square column of size 450 mm x 450 mm. for an axial factored load of 1600 KN. Use M20 concrete and Fe415 steel. The S.B.C of soil is 200 kN/m^2.	CO3	14 Marks

SOIL MECHANICS
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

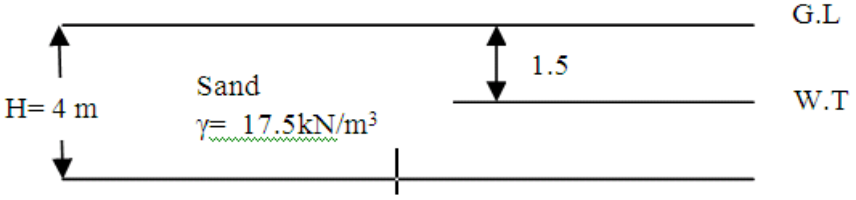
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive the relation $\gamma d = \frac{(G + Se)\gamma_w}{1+e}$. Where γ_d = dry unit weight, G = specific gravity of solids, γ_w = unit weight of water.	CO2	7 Marks
	b)	A sample of clay having mass of 675 g coated with paraffin wax. The combined mass of clay and the wax was found to be 682 g. The volume was found by immersion in water as 345 ml. The sample was having water content of 15% and specific gravity of 2.67. Calculate the bulk density of soil, its void ratio and degree of saturation. Take specific gravity of wax as 0.89.	CO2	7 Marks
		(OR)		
2	a)	Define the following terms. i) Plasticity index. ii) Consistency Index. iii) Toughness Index. iv) Activity of soil.	CO2	6 Marks
	b)	An earthen embankment of 1,00,000 m^3 volume is to be constructed with a soil having void ratio of 0.75 after compaction. There are three borrowing pits marked A, B and C having soils with void ratio of 0.90, 1.50 and 1.80 respectively. The cost of excavation and transporting the soil for borrow pits are Rs. 0.25, Rs. 0.23 and Rs. 0.21 per m^3 respectively. Which borrow pit is the most economical. (Take G = 2.65).	CO4	8 Marks

UNIT-II

3	a)	Explain the following factors that affect the permeability of soil. i) Void ratio. ii) Particle size. ii) Properties of fluid. iii) Clay structure.	CO2	6 Marks
	b)	Calculate the coefficient of permeability of a sand sample having height and diameter of 10cm and 8cm respectively. A discharge of 900 ml was collected in 15 minutes under an effective head of 70cm. If the weight of the oven dried sample was 800g, then calculate the seepage velocity. Take G= 2.70.	CO2	8 Marks
		(OR)		
4	a)	Define quick sand condition. Derive the formula for critical hydraulic gradient.	CO2	7 Marks
	b)	Draw total stress, effective stress and pore water pressure diagrams for the following case. If the water is lowered by 0.5 m, what is the change in effective stress at 4 m from ground level?	CO2	7 Marks



UNIT-III

5	a)	Explain in brief about the effect of compaction on soil properties.	CO2	7 Marks
	b)	Derive an expression for vertical stresses under a circular load using Boussinesq's theory.	CO2	7 Marks

(OR)

6	a)	Discuss about the following approximate methods with neat sketch. i) Equivalent point method. ii) Two-to-one load distributed method.	CO2	6 Marks
	b)	Determine the vertical stress increase at a depth of 1.5m beneath the centre of square footing of width 3m and with load intensity of 200 kN/m^2.	CO3	8 Marks

UNIT-IV

7	a)	Discuss about the spring analogy for primary consolidation with a neat sketch.	CO2	7 Marks
	b)	What are the assumptions of Terzaghi's theory of one-dimensional consolidation?	CO2	7 Marks

(OR)

8	a)	Explain about the laboratory consolidation test with a neat sketch.	CO4	7 Marks
	b)	A new building was constructed on 3m thick soft clay. The over burden pressure over centre of the soft clay is 280 kN/m^2. Compute the settlement if there is increase in pressure due to construction is 115 kN/m^2. The water content and compression index of the given soil are found to be 50% and 0.50 respectively. Take G = 2.67.	CO3	7 Marks

UNIT-V

9	a)	Derive an equation for finding out shear strength of soft clays using vane shear test.	CO4	6 Marks
	b)	Explain in brief about unconfined compression test with a neat sketch. What are its merits and demerits?	CO4	8 Marks

(OR)

10	a)	What are the advantages and disadvantages of a triaxial test?	CO4	6 Marks
	b)	Direct shear tests on specimens of fine sand gave the following data	CO3	8 Marks

Normal stress(kN/m^2)	100	175
Shear stress at failure(kN/m^2)	17.7	19.8

Find the shear strength of soil at a depth of 5 m from G. L., if the void ratio = 0.7, specific gravity G = 2.67 and GWL is at a depth of 2 m from ground surface.

Note: Provide normal graph sheet.

STRUCTURAL ANALYSIS–II
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	i) What are the conditions for influence line diagram of shear and bending in a simply supported beam? ii) Define the Influence Line Diagram (ILD). Mention the types of loads that are analysed using ILD.	CO1	6 Marks
	b)	Draw the Influence Line Diagrams for Bending Moment and Shear Force at a section 4m from the left support of a simply supported beam of span 10m. If a moving UDL of intensity 18 kN/m and length 8m crosses the beam, what will be the absolute maximum values of S.F and B.M at the section.	CO2	8 Marks

(OR)

2	a)	Two-point loads of 100kN and 200kN spaced 3m apart cross a girder of span 15m from left to right with the 100kN load leading. Draw the ILD for S.F and B.M at 5m from left support. Find: i) Maximum absolute +ve S.F at C. ii) Maximum absolute +ve S.F at C. Maximum absolute B.M at C	CO2	6 Marks
	b)	A system of four loads 80kN, 160kN, 160kN, 120kN crosses a simply supported beam of span 25m with the 120kN load leading. The loads are equally spaced at 1m. Determine the values of the maximum bending moment and shear force at a section 10m from left support and absolute maximum shear force and bending moment in the beam uniform ILD.	CO2	8 Marks

UNIT-II

3		Analyse the two–span continuous beam shown in Figure 1 by slope deflection method and draw the bending moment and shear force diagrams.	CO6	14 Marks

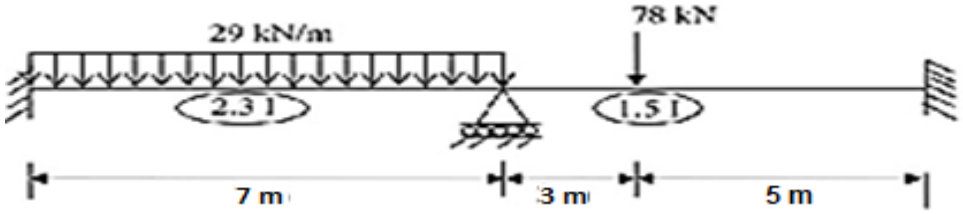

Figure 1

(OR)

4		Analyse the continuous beam shown in Figure 2 by using moment distribution method and draw the bending moment diagram.	CO6	14 Marks

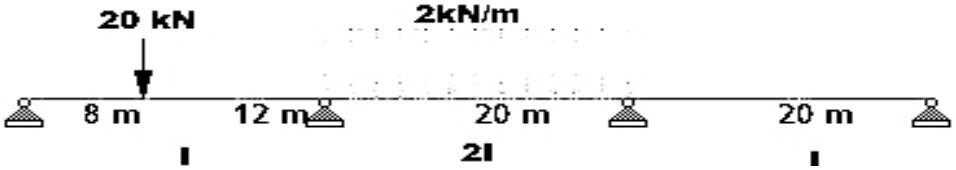

Figure 2

UNIT-III

5 Analyse the continuous beam shown in Figure 3 by Kani's method. CO4 14 Marks

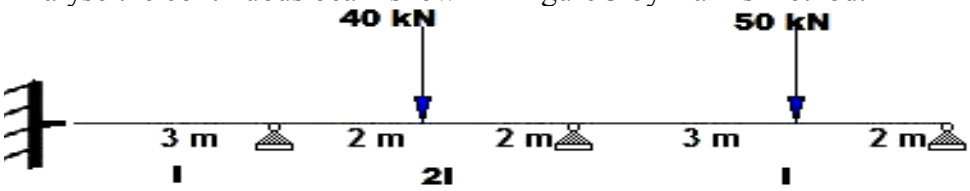

Figure 3

(OR)

6 a) Derive the expression for strain energy due to bending moment. CO1 7 Marks

b) Determine the deflection of the free end of a cantilever of length 'L' subjected to a uniformly distributed load '*w*" on entire span using strain energy method. CO2 7 Marks

UNIT-IV

7 Explain with an example the following: CO5 14 Marks

i) Determinate and indeterminate structures.
ii) Static indeterminacy.
iii) Kinematic indeterminacy.

(OR)

8 Analyze the truss shown in Figure 4 below by Castigliano's theorem. Area of cross section of members in mm^2 is shown in Figure 4. E is constant throughout. CO4 14 Marks

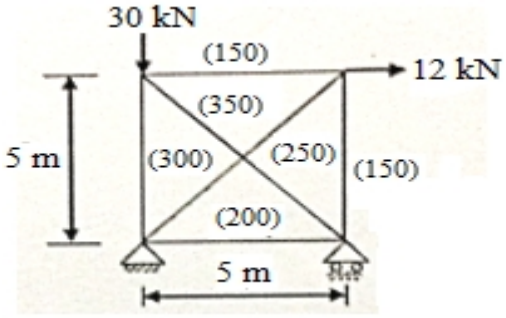

Figure 4

UNIT-V

9 a) Define plastic hinge, plastic moment capacity and shape factor. CO1 7 Marks

b) Determine the collapse load of a propped cantilever beam shown in Figure-5. CO3 7 Marks

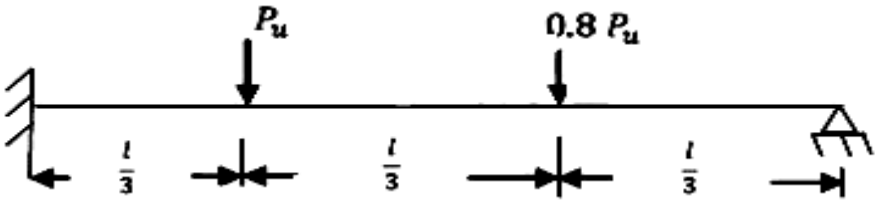

Figure 5

(OR)

10 Calculate the plastic moment capacity required for the continuous beam with working loads shown in Figure 6. CO3 14 Marks

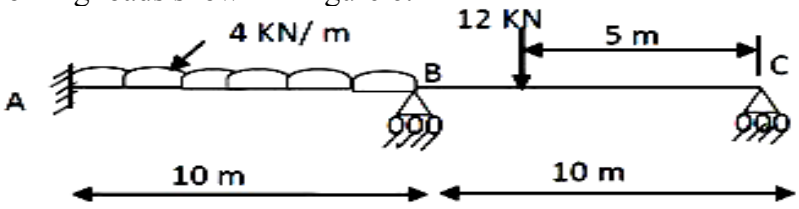

Figure 6

WASTEWATER TECHNOLOGY
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	State the merits and demerits of: i) Separate System of Sewerage. ii) Combined System of Sewage.	CO1	7 Marks
	b)	Describe the conservancy and water carriage system of sanitation. In new developing town which method you will prefer and why?	CO1	7 Marks
		(OR)		
2	a)	Explain briefly effects of improper disposal of sewage. How the dissolved oxygen level is maintained in the stream?	CO1	7 Marks
	b)	Calculate the combined flow discharge of sewage for the given data. Area to be served is 150 hectares. Population is 50000. Time of entry and time of flow is 5 and 20 minutes respectively; rate of water supply is 135 LPCD. Impermeability factor, C = 0.45. Assume 80% of water supplied turns into sewer and peak factor as 1.5.	CO1	7 Marks

UNIT-II

3	a)	Design a primary sedimentation tank for a proposed sewage treatment plant of 120 MLD capacity.	CO2	7 Marks
	b)	Explain the conventional treatment process of municipal wastewater treatment plant with flow diagram.	CO2	7 Marks
		(OR)		
4	a)	What do you understand by self-purification property of streams? Explain the factors affecting this property.	CO2	7 Marks
	b)	Explain the importance of study of reoxygenation and deoxygenation in the problem of stream sanitation.	CO2	7 Marks

UNIT-III

5	a)	Write the procedure for design of standard trickling filter.	CO3	7 Marks
	b)	Differentiate attached growth process and suspended growth process.	CO3	7 Marks
		(OR)		
6	a)	Describe in detail about an oxidation pond.	CO3	7 Marks
	b)	Design activated sludge plant to treat 5 millions liters of sewage per day having 5 days of BOD of 140mg/l. Assume suitable data where ever required.	CO3	7 Marks

UNIT-IV

7	a)	What is sludge conditioning and dewatering? Explain any one of the methods of sludge dewatering.	CO4	7 Marks
	b)	Sludge disposal to an onsite create lot of problems to the community. What are the steps you suggest for the disposal and what is the mechanism involved in the process of removal of pathogenic bacteria from sludge.	CO4	7 Marks
		(OR)		
8	a)	Explain the process of removal of phosphorous and refractory organic materials.	CO4	7 Marks
	b)	Explain briefly the nitrogen removal by biological nitrification and denitrification.	CO4	7 Marks

UNIT-V

9	a)	Classify the various methods of sewage disposal.	CO5	7 Marks
	b)	Draw a typical oxygen sag curve and explain its meaning and state its importance in benefit of maintaining the DO in the river water for society.	CO5	7 Marks

(OR)

10	a)	Discuss various methods of disposal of septic tank effluent with neat sketches.	CO5	7 Marks
	b)	Design a septic tank with dispersion trench for 175 users. The rate of water supply is 70 LPCD. Assume suitable criteria as applicable. Draw a neat sketch of the unit.	CO5	7 Marks

CONTROL SYSTEMS

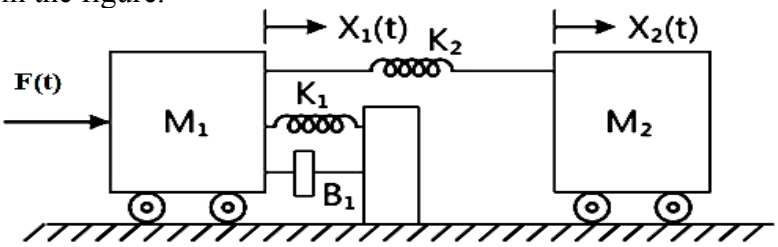
[Electrical and Electronics Engineering, Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

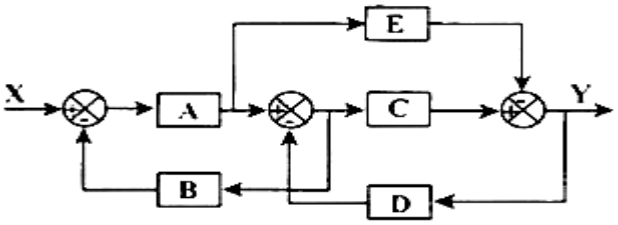
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Determine the Transfer function $\frac{X2(s)}{F(s)}$ for the Mechanical system as shown in the figure. CO4 6 Marks

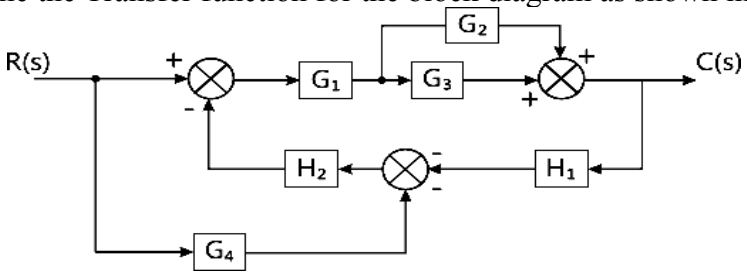


b) Obtain the overall Gain for the block diagram in the figure below using Mason's gain formula. CO4 8 Marks



(OR)

2 a) Determine the Transfer function for the block diagram as shown in figure. CO4 10 Marks

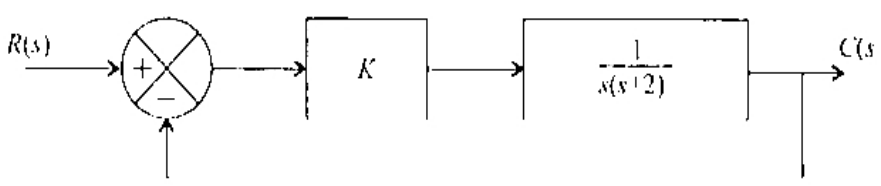


b) Mention any three disadvantages of block diagram reduction technique. CO1 4 Marks

UNIT-II

3 a) For the block diagram shown in figure, calculate the value of K under the following cases. CO2 8 Marks

i) Peak overshoot of 50%.
ii) Steady state error of 0.6 due to ramp input.



b) Calculate the range of gain K for the system to be stable whose characteristic equation is $S^4 + S^3 + 3S^2 + K(S+4) = 0$. CO2 6 Marks

(OR)

4	a)	Sketch the Root locus for the system having open loop transfer function $G(s) = \frac{K}{s(s+4)(s+6)}$.	CO2	10 Marks
	b)	Explain the effects of adding a pole on the Root loci.	CO2	4 Marks

UNIT-III

5	a)	Determine the stability of the system having open loop transfer function $G(s) = \frac{10}{s(s+10)(s+0.1)}$ using Bode plot.	CO2	10 Marks
	b)	Mention the necessary conditions for stability with respect to Bode plot.	CO2	4 Marks

(OR)

6	a)	Sketch the polar plot for the transfer function $G(s) = \frac{4}{(S-4)}$.	CO2	4 Marks
	b)	Analyze the closed loop system stability with Nyquist plot having open loop system transfer function $G(s) = \frac{4}{S(S-4)}$.	CO2	10 Marks

UNIT-IV

7	a)	Explain the importance of controllers in improving the performance of system with an example.	CO1	7 Marks
	b)	Analyze the characteristics of Lead-Lag compensator with magnitude plots.	CO2	7 Marks

(OR)

8	a)	Obtain the state space model for the Transfer function $\frac{Y(s)}{U(s)} = \frac{s+4}{s^3+6s^2+3s+4}$.	CO2	7 Marks
	b)	Elaborate the importance of Diagonalization in state space analysis. Diagonalizable the matrix. A= $\begin{bmatrix} 0 & 1 \\ 0 & -2 \end{bmatrix}$.	CO2	7 Marks

UNIT-V

9	a)	Calculate the Transfer function for the state model $\dot{X} = \begin{bmatrix} 0 & 1 \\ -6 & -2 \end{bmatrix} X + \begin{bmatrix} 1 \\ -2 \end{bmatrix} U \text{ and } Y = 0]X$	CO2	7 Marks
	b)	Compute the State Transition Matrix (STM) for A= $\begin{bmatrix} 1 & 1 \\ -6 & -2 \end{bmatrix}$ and mention the important properties of STM.	CO2	7 Marks

(OR)

10	a)	Obtain the Z.I.R for the state space model $\dot{X} = \begin{bmatrix} -1 & 0 \\ 0 & -4 \end{bmatrix} X + \begin{bmatrix} 1 \\ 2 \end{bmatrix} U \text{ and } Y = [2 \quad 3]X$ having $X(0) = \begin{bmatrix} 0 \\ 0.5 \end{bmatrix}$.	CO2	7 Marks
	b)	Obtain the Z.S.R for the state space model $\dot{X} = \begin{bmatrix} -1 & 0 \\ 0 & -4 \end{bmatrix} X + \begin{bmatrix} 1 \\ 2 \end{bmatrix} U \text{ and } Y = [2 \quad 3]X$ excited with unit impulse.	CO2	7 Marks

POWER ELECTRONICS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw the symbol and characteristics of following switches. i) BJT. ii) Power MOSFET. iii) Power Diodes.	CO1	6 Marks
	b)	Derive and explain the two transistor analogy of SCR with neat diagram.	CO2	8 Marks
		(OR)		
2	a)	Explain the turn-on methods of SCR in detail.	CO1	8 Marks
	b)	What is snubber circuit? How a snubber circuit is designed?	CO3	6 Marks

UNIT-II

3		With neat waveforms, explain the configuration and operation of single phase half bridge rectifier with RL load. Derive the equations average voltage and average current.	CO2	14 Marks
		(OR)		
4		Analyze the operation of three phase six-pulse converter with R load with delay angle $\alpha = 60^0$ and plot the necessary waveforms. Determine the average load voltage and current.	CO5	14 Marks

UNIT-III

5	a)	Write short notes on the following single phase converters. i) Circulating current mode operation. ii) Non-Circulating current mode operation. iii) AC-AC voltage regulator. iv) AC-AC cyclo-converter.	CO1	12 Marks
	b)	Write the applications of AC-AC converters.	CO5	2 Marks
		(OR)		
6	a)	Derive the RMS voltage and current expressions for the single phase AC voltage controller.	CO6	7 Marks
	b)	What is the importance power factor? Explain the power factor improvement techniques.	CO4	7 Marks

UNIT-IV

7	a)	Explain the following forced commutation circuits with neat sketch. i) Class – A. ii) Class – D. iii) Class – E.	CO1	9 Marks
	b)	Explain the operation of DC morgan's chopper.	CO1	5 Marks
		(OR)		
8	a)	Explain with neat block diagrams. i) Frequency modulation control. ii) Peak current limit control.	CO4	6 Marks
	b)	A step-down chopper is operating at a frequency of 2kHz supplies a load of 10Ω and an inductance of 3mH from a 48V battery. Assume a freewheeling diode is connected across the load and 50% duty ratio. Calculate load voltage and load current.	CO4	8 Marks

UNIT-V

9	a)	Explain the basic operation of parallel inverter.	CO1	6 Marks
	b)	Write the comparisons between voltage source inverter and current source inverter.	CO1	8 Marks

(OR)

10		Explain the operation of three phase bridge inverter with 120^0 conduction mode with neat sketches. Write the difference between 120^0 and 180^0 conduction modes.	CO4	14 Marks

SYNCHRONOUS MACHINES
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What are the advantages of stationary armature over the rotating armature?	CO1	4 Marks
	b)	What is meant by Distributed winding and Concentrated Winding? Derive the expression for Distribution factor (K_d) , Coil span factor (K_p) and induced **emf** in alternator.	CO4	10 Marks
		(OR)		
2	a)	Why harmonics are produced in generated **emf** and how they are suppressed?	CO1	6 Marks
	b)	A 4 pole, 50 HZ, 3-phase star connected alternator has a single layer winding with 21\slots per pole and 2 conductors per slot. The coil span is equal to 155^0 (Electrical). The fundamental flux is 0.6 Wb. The air gap flux contain a third harmonic of 20 % and fifth harmonic of 10 %. Find the: i) RMS value of induced **emf** per phase. ii) RMS value of induced **emf** when the winding is connected in Δ.	CO4	8 Marks

UNIT-II

3	a)	Explain the potier triangle method of finding Voltage regulation of given Synchronous Generator.	CO1	7 Marks
	b)	A salient pole synchronous generator has the following per unit parameters: X_d = 1.60, X_q= 1.00, R_a= 0.03. If this generator is delivering rated KVA at rated voltage and at 0.8 pf leading, compute the power angle and the excitation EMF. Draw the phasor diagram.	CO4	7 Marks
		(OR)		
4		A 30KVA, 440V, 50Hz, 3-phase star connected alternator has the following test data	CO4	14 Marks

Field Current(A)	2	4	6	7	8	10	12	14
Terminal Voltage (V)	155	287	395	440	475	530	570	592
Short Circuit Current(A)	11	12	34	40	46	57	69	80

Resistance between any two terminals is 0.3Ω. Find the regulation at full load, 0.8 power factor lag and lead by synchronous impedance method and MMF method.

UNIT-III

5	a)	What is short circuit ratio and its significance? Show that SCR is reciprocal of Synchronous impedence in PU.	CO1	7 Marks
	b)	Why it is necessary to run alternators in parallel? Explain clearly the terms: i) Synchronous current. ii) Synchronous Power. iii) Synchronous Torque.	CO1	7 Marks
		(OR)		

6	a)	Explain the method of synchronization of 3-phase alternator by Lamp method.	CO1	7 Marks
	b)	A 750 KVA, 11 KV,4 pole, 3-Φ star connected alternator has % resistance and reactance of 1 and 15Ω respectively. Calculate the synchronizing power per mechanical degree of displacement at: i) no-load. ii) at full load 0.8 pf lag. The terminal voltage in each case is 11 KV.	CO4	7 Marks

UNIT-IV

7	a)	Explain the principle of operation of 3-phase Synchronous motor.	CO1	7 Marks
	b)	A 2000V, 3-phase star connected Synchronous motor has an effective resistance and synchronous reactance of 0.2Ω and 2.2Ω per phase respectively. The input is 800KW at normal voltage and the induced line emf is 2400V. Calculate the line current and power factor.	CO4	7 Marks

(OR)

8	a)	Prove that locus of extremity of current phasor is a circle for a particular excitation and for change in load on shaft.	CO2	7 Marks
	b)	An Industrial plant has a load of 800KW at a power factor of 0.8 lagging. It is desired to propose a synchronous motor of sufficient capacity to deliver a load of 200KW and also to correct the overall power factor 0.92. Assuming that the synchronous motor has an efficiency of 90%, determine its KVA input rating and the power factor at which it will operate.	CO4	7 Marks

UNIT-V

9	a)	Explain about the design modification required by the DC series motor to operate with AC supply.	CO2	7 Marks
	b)	Explain about the construction and principle of operation of reluctance motor with a neat sketch.	CO1	7 Marks

(OR)

10	a)	Explain why a single phase induction motor is not self-starting using 2 revolving field theory.	CO1	7 Marks
	b)	Explain with neat diagrams of shaded pole induction motor and also its applications.	CO1	7 Marks

CODE No.: 16BT50241 SVEC-16

RENEWABLE ENERGY
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	What are the advantages and limitations of renewable energy resources?	CO1	7 Marks
	b)	What are the reasons for variation in solar radiation reaching the earth than received at outside of the atmosphere?	CO1	7 Marks
		(OR)		
2	a)	Describe in detail in detail about ocean energy sources and their availability and also list its applications.	CO2	7 Marks
	b)	Write a short note on Wind Energy.	CO1	7 Marks
		UNIT-II		
3	a)	What are the main components of a flat-plate solar collector, explain the function of each with the help of a diagram.	CO2	7 Marks
	b)	Classify methods of solar energy storage. Describe thermal energy storage system.	CO1	7 Marks
		(OR)		
4	a)	Describe the layout and working of a continuous solar cooling system.	CO2	7 Marks
	b)	Describe a non-convective solar pond for energy collection and storage.	CO1	7 Marks
		UNIT-III		
5	a)	How wind energy conversion systems are classified? Discuss in brief.	CO1	7 Marks
	b)	What are the environmental aspects of wind energy conversion systems?	CO5	7 Marks
		(OR)		
6	a)	Describe Binary cycle system for liquid dominated system.	CO1	7 Marks
	b)	Classify geothermal sources and explain about each in brief.	CO1	7 Marks
		UNIT-IV		
7	a)	What is the basic principle of Ocean Thermal Energy Conversion? Explain.	CO1	7 Marks
	b)	What are the various methods used to generate power from tides? Explain about any one method in detail.	CO1	7 Marks
		(OR)		
8	a)	Write a short note on small head hydro power plants.	CO1	7 Marks
	b)	What are the advantages and limitations of wave energy conversion?	CO2	7 Marks
		UNIT-V		
9	a)	What is meant by anaerobic digestion? What are the factors that affect bio digestion?	CO3	7 Marks
	b)	What is meant by aerobic digestion? Explain its significance in nature.	CO1	7 Marks
		(OR)		
10	a)	Explain the constructional details and working of a biogas plant.	CO1	10 Marks
	b)	Give a list of the materials used for biogas generation.	CO4	4 Marks

DESIGN OF MACHINE ELEMENTS-II
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What are the commonly used materials for sliding contact bearings? Also, list the important characteristics of good bearing material.	CO1	4 Marks
	b)	The following data is given for a 360° hydrodynamic bearing: Radial load =3.2 kN; Journal speed =1490 r.p.m; Journal diameter = 50mm; Bearing length = 50mm; Radial clearance = 0.05mm and viscosity of the lubricant = 25 cP. Assuming that heat generated in the bearing is carried by the total oil flow in the bearing, calculate: i) coefficient of friction. ii) power lost in friction. iii) minimum oil film thickness. iv) flow requirement in litres/min. v) temperature rise.	CO2	10 Marks

(OR)

2	a)	Differentiate between the following: i) Hydrostatic and hydrodynamic lubrication. ii) Thin film and thick film lubrication. iii) Bearing modulus and bearing characteristic number.	CO1	6 Marks
	b)	The radial load in a 360° hydrodynamic bearing is 10 kN and journal speed is 1440 r.p.m. The unit bearing pressure 1000 kPa and the bearing has L/D ratio of 1. The viscosity of lubricant is 30 cP and radial clearance of 0.025 mm. Calculate: i) the dimensions of bearing. ii) total flow of oil.	CO3	8 Marks

UNIT-II

3	a)	How do you express the life of a bearing? Explain the various factors that influence the life of a roller bearing	CO1	6 Marks
	b)	Determine the dynamic load carrying capacity of a deep-groove ball bearing, with the least bore size, and which is required to resist a radial load of 4 kN and an axial load of 3 kN. The shaft rotates at 1400 r.p.m. The bearing is required to be in operation for 12000 hours, with 90% reliability.	CO6	8 Marks

(OR)

4	a)	Write short notes on different types of antifriction bearings.	CO1	6 Marks
	b)	A single row deep groove ball bearing has a dynamic load capacity of 40500 N and operates on the following work cycle: i) radial load of 5000 N at 500 rpm for 25% of time. ii) radial load of 10000 N at 700 rpm for 50% of time. iii) radial load of 7000 N at 400 rpm for the remaining 25% of the time. Calculate the expected life of the bearing in hours.	CO3	8 Marks

UNIT-III

5	a)	Derive an expression for beam strength of a spur gear tooth (Lewis equation) using standard notations. State the assumptions under which this equation is valid.	CO1	6 Marks
	b)	It is desired to transmit 11 kW from a motor shaft rotating at 1440 r.p.m to a low speed shaft with a speed reduction of 3:1. Single stage spur gear drive is employed for this purpose. The gear teeth are 20° full depth involute. Pinion has 25 teeth. Starting torque is 50% higher than running torque. Both the pinion and gear are made of heat treated steel with a maximum allowable stress of 210 MPa. Design the suitable spur gear drive from the point of view of dynamic and wear strength.	CO3	8 Marks

(OR)

6		A pair of helical gears with 30° helix angle is used to transmit 15 kW at 10000 r.p.m of the pinion. The velocity ratio is 4:1. Both the gears are to be made of hardened steel of static strength 100 N/mm². The gears are 20° stub and pinion is having 20 teeth. The face width may be taken as 14 times the module. Find the module and face width from the standpoint of strength and check the gears for wear.	CO4	14 Marks

UNIT-IV

7	a)	Explain the following terms of the spring: i) Free length. ii) Solid length. iii) Active and inactive coils.	CO1	6 Marks
	b)	A helical spring is made from a wire of 6 mm diameter and has outside diameter of 75 mm. If the permissible shear stress is 350 N/mm² and modulus of rigidity 84 kN/mm², find the axial load which the spring can carry and the deflection per active turn in case of: i) Neglecting the effect of curvature. ii) Considering the effect of curvature.	CO2	8 Marks

(OR)

8	a)	What is nipping in a leaf spring? Discuss its role. List the materials commonly used for the manufacture of leaf springs.	CO1	5 Marks
	b)	A truck spring has 12 number of leaves, two of which are full length leaves. The spring supports are 1.05 m apart and the central band is 85 mm wide. The central load is to be 5.4 kN with a permissible stress of 280 MPa. Determine the thickness and width of the steel spring leaves. The ratio of the total depth to the width of the spring is 3. Also determine the deflection of the spring.	CO3	9 Marks

UNIT-V

9		Design a cast iron piston for a single acting four stroke engine for the following data : Cylinder bore = 100 mm; Stroke = 125 mm; Maximum gas pressure = 5 N/mm²; Indicated mean effective pressure = 0.75 N/mm²; Mechanical efficiency = 80%; Fuel consumption = 0.15 kg per brake power per hour; Higher calorific value of fuel = 42 x 10^3 kJ/kg; Speed=2000 r.p.m; Any other data required for the design may be assumed.	CO5	14 Marks

(OR)

10	a)	Derive the expression for the ratio of driving tensions for flat belt drive.	CO1	7 Marks
	b)	Design a rubber belt to drive a dynamo generating 20 kW at 2250 r.p.m and fitted with a pulley 200mm diameter. Assume dynamo efficiency to be 85%. Take Allowable stress for belt = 2.1 MPa; Density of rubber = 1000 kg/m³; Angle of contact for dynamo pulley = 165° and coefficient of friction between belt and pulley = 0.3	CO3	7 Marks

INDUSTRIAL ENGINEERING AND MANAGEMENT
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1		Explain about functions of management.	CO1	14 Marks
		(OR)		
2		What is Corporate Social Responsibility (CSR)? Explain it briefly.	CO2	14 Marks

UNIT-II

3		Describe the different types of plant layout.	CO2	14 Marks
		(OR)		
4		Discuss the parallel and series-parallel device configurations in detail.	CO2	14 Marks

UNIT-III

5		Define productivity. Explain about the objectives of work study.	CO3	14 Marks
		(OR)		
6		Explain about different steps involved in work sampling.	CO1	14 Marks

UNIT-IV

7		The demand for an item is 12,000 units per year and shortage are allowed. If the unit cost is Rs.15 and the holding cost is Rs.20 per year per unit, determine the optimum total yearly cost. The cost of placing one order is Rs.6,000 and the cost of one shortage is Rs.100 per year.	CO3	14 Marks
		(OR)		
8		Discuss about different functions and types of inventory.	CO4	14 Marks

UNIT-V

9		Define Quality Control. Describe the control charts for attributes in detail.	CO5	14 Marks
		(OR)		
10	a)	What is Total Quality Control? Explain it briefly.	CO5	7 Marks
	b)	Define Industrial Safety. Explain about Industrial Disputes Act in detail.	CO6	7 Marks

METROLOGY AND MEASUREMENTS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) What are the various possible sources of errors in measurements? What do you understand by systematic errors and random errors? How the random errors are analyzed? CO1 6 Marks

b) The slip gauge set M 38 consists of the following: CO2 8 Marks

Range	Steps	Pieces
1.005	----	1
1.01-1.09	0.01	9
1.1-1.9	0.1	9
1.0-9.0	1.0	9
10.0-100.0	10.0	10

Choose the suitable slip gauges to give the following dimensions:

i) 29.975 mm. ii) 16.07 mm. iii) 101.005 mm.

(OR)

2 a) Explain with neat sketch, the basic hole system and unilateral tolerance. Discuss their suitability in comparison to other systems. CO1 6 Marks

b) In a hole and shaft combination of 25 mm nominal size, CO3 8 Marks

H7 hole limit are + 0.021 mm, + 0.000 mm

e8 shaft limits are - 0.040 mm, - 0.073 mm

State the values of

i) maximum and minimum clearance obtainable.
ii) allowance.
iii) tolerance on the hole and the shaft.
iv) type of fit.

UNIT-II

3 a) What is limit gauging? Sketch different limit gauges used in industry. CO1 6 Marks

b) Describe various salient features of a comparator and how are they achieved in the Sigma Comparator? Explain your answer with sketches. CO5 8 Marks

(OR)

4 a) Select the sizes of angle gauges needed to build the following angles: 22^{0}, $11^{0}20^{I}$, $29^{0}\,54^{I}$, $31^{0}\,49^{I}24^{II}$. CO3 4 Marks

b) Discuss with suitable sketches, the method for testing straightness using spirit level. CO5 4 Marks

c) State the requirements for accuracy in the construction of sine bar. Why the use of a sine bar is not recommended for angles larger than 45^{0} with the reference plane? CO2 6 Marks

UNIT-III

5	a)	Explain with a neat sketch the principle and construction of an auto collimator.	CO1	8 Marks
	b)	What is the difficulty in using the optical flat alone? How do you overcome this difficulty in an interferometer?	CO4	6 Marks

(OR)

6	a)	Describe various methods of numerical assessment of surface finish.	CO1	6 Marks
	b)	The heights of peaks and valleys of 20 successive points on a surface are 35, 25, 40, 22, 37, 19, 41, 21, 42, 18, 42, 24, 44, 25, 40, 18, 40, 18, 39, and 21 microns respectively, measured over a length 20mm. Determine CLA and RMS values of roughness surface.	CO3	8 Marks

UNIT-IV

7	a)	With a neat sketch, explain how the simple effective diameter of a screw thread may be checked using the two wire method.	CO1	6 Marks
	b)	What is 'best size of wire' for effective diameter measurement? Derive a relationship for the best size wire in terms of its effective diameter.	CO3	4 Marks
	c)	Describe a gear tooth Vernier and indicate how the tooth thickness is checked with this instrument.	CO4	4 Marks

(OR)

8	a)	What are the various types of pitch errors on thread components and what is the difference between them? State the causes of each of them. How these errors effect the effective diameter of screw thread?	CO2	8 Marks
	b)	How will you proceed to check the thread angle of a screw thread? Also explain the purpose of profile thread gauge.	CO5	6 Marks

UNIT-V

9	a)	Define gauge factor. Also explain the usage of resistance strain gauge for bending.	CO1	6 Marks
	b)	Explain the following. i) Explain various methods applied for measurement of stresses and strains. ii) Explain various methods applied for measurement of torque.	CO5	8 Marks

(OR)

10	a)	Explain the following. i) Thermo couples. ii) Electrical resistance sensors.	CO1	6 Marks
	b)	What are the methods to be followed for standards and calibration of measurement of pressure in the industry?	CO1	4 Marks
	c)	Describe a method to be applied for measuring pressure with a suitable sketch.	CO1	4 Marks

REFRIGERATION AND AIR-CONDITIONING
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define the following terms. i) COP of Refrigerator. ii) COP of Heat Engine. iii) COP of Heat Pump.	CO1	7 Marks
	b)	Derive an expression for COP of Bell Coleman air refrigeration cycle.	CO1	7 Marks
		(OR)		
2	a)	Discuss the working principle of bootstrap air cooling system.	CO1	7 Marks
	b)	A reversed carnot cycle delivers 60 x 10^3kJ/min to a conditioned space when used as heat pump. If the space is maintained at 25°C when the ambient temperature is 10°C, Determine: i) Amount of heat drawn from the surrounding and power required to run the heat pump. ii) If the required heat is supplied by electric heaters, determine the power consumed.	CO2	7 Marks

UNIT-II

3	a)	Discuss the effect of super heating and sub cooling on performance of VCR.	CO3	7 Marks
	b)	An ammonia refrigerator works between 2.077 bar and 12.37 bar, the vapor being dry at the end of the isentropic compression. There is no under cooling of liquid ammonia, and the liquid is expanded through a throttle valve after leaving the condenser. Calculate power per ton of Refrigeration and COP. Assume c_p for vapor as 0.52 kJ / kg° K.	CO3	7 Marks

Pressure, Bar	Saturation temperature, °C	Enthalpy, kJ/kg		Entropy, kJ/kg K	
		Liquid	Vapour	Liquid	Vapour
2.077	-18	117.3	1440.4	0.6884	5.8739
12.37	32	352.2	1487.1	1.52	5.24

(OR)

4	a)	Which refrigerants require centrifugal compressors? Where these refrigerants are in practice? Give five examples.	CO2	7 Marks
	b)	What are the advantages and disadvantages of using air as refrigerant compared to F_{-12} and NH_3.	CO3	7 Marks

UNIT-III

5	a)	Discuss the advantages of vapour absorption refrigeration system over vapour compression refrigeration system.	CO3	7 Marks
	b)	In a vapour absorption refrigeration system, heating, cooling and refrigeration takes place at the temperatures of 100°C, 20°C and -5°C respectively. Find the maximum C.O.P of the system.	CO4	7 Marks
		(OR)		
6	a)	Discuss the working principle of steam jet refrigeration system	CO3	7 Marks
	b)	What is the principle and operation of thermo electric refrigerator?	CO3	7 Marks

UNIT-IV

7	a)	Define the following psychometric properties. i) Relative humidity. ii) Specific humidity. iii) Dew point Temperature.	CO5	7 Marks
	b)	Describe the winter air conditioning system with neat sketch.	CO6	7 Marks
		(OR)		
8	a)	Define the following terms. i) Room sensible heat factor. ii) Grand sensible heat factor. iii) Effective room sensible heat factor.	CO3	7 Marks
	b)	What are the different factors which must be considered evaluating cooling load? What are the different means by which this load can be reduced?	CO4	7 Marks

UNIT-V

9	a)	Define the human comfort and explain the factors which affect human comfort.	CO6	7 Marks
	b)	Define the term Effective Temperature and explain its importance in air-conditioning system. Describe the factors which affect Effective Temperature.	CO6	7 Marks
		(OR)		
10	a)	Explain in detail, the filters used in air conditioning system.	CO3	7 Marks
	b)	Explain the use of heat pump for heating and cooling cycle with a neat diagram.	CO6	7 Marks

THERMAL ENGINEERING-II
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	A simple ideal Rankine cycle with water as working fluid operates between the pressure limits of 17.5 Mpa in the Boiler and 30 kPa in the condenser. What is the minimum temperature required at the turbine inlet such that the quality of the steam leaving the turbine is not below 80%. When operated at this temperature, determine the cycle efficiency of the cycle?	CO1	7 Marks
	b)	A Rankine cycle operates between pressures of 80 bar and 0.1 bar. The maximum temperature of the cycle is 600^0C. If the steam turbine and pump efficiencies are 90% and 80 % respectively, sketch the cycle on T-s diagram and calculate the net work and efficiency of the cycle.	CO1	7 Marks

(OR)

2	a)	Differentiate between Water tube and Fire tube boilers with proper examples.	CO1	7 Marks
	b)	Briefly explain the working of Babcock and Wilcox boiler with a neat sketch.	CO2	7 Marks

UNIT-II

3	a)	Write a short note on boiler horse power, equivalent evaporation and boiler efficiency.	CO1	7 Marks
	b)	Derive equation for condition of maximum discharge through a chimney.	CO3	7 Marks

(OR)

4	a)	Explain induced draught and forced draught.	CO1	7 Marks
	b)	How much air used per kg of coal burnt in a boiler having chimney of 32.3m height to create a draught of 19mm of water column when the temperature of flue gaeses in the chimney is 370^0C and the temperature of boiler house is 30^0C?	CO4	7 Marks

UNIT-III

5	a)	Write the effect of friction on flow through steam nozzle.	CO1	7 Marks
	b)	Determine the throat area, exit area and exit velocity for a steam nozzle to pass a mass flow of 0.2kg/sec when inlet conditions are 10bar and 250°c and the final pressure is 2bar. Assume expansion is isentropic and that the inlet velocity is negligible use $\mathbf{pv^{1.3}}$=const.	CO2	7 Marks

(OR)

6	a)	A simple impulse turbine, the nozzles are inclined at 22^0 with the direction of motion of the moving blades. The steam leaves the nozzles at 375 m/s. The blade speed is 165 m/s. Find suitable inlet and outlet angles for the blades in order that the axial thrust is zero. The relative velocity of steam as it flows over the blades is reduced by 15 % due to friction. Determine also the power developed for a flow rate of 10 kg/s.	CO1	7 Marks
	b)	What is diagram efficiency and derive the condition for maximum diagram efficiency of impulse turbine?	CO5	7 Marks

UNIT-IV

7	a)	In a reaction stage of a steam turbine, the nozzle angle is 20^0 and the absolute velocity of steam at inlet to the moving blades is 240 m/s. The blade velocity is 210 m/s. If the blades are designed for 50% reaction, determine: i) The blade angle at inlet and exit. ii) The enthalpy drop per unit mass of steam in the moving blades and in the complete stage . iii) The diagram power for a steam flow of 1 kg/s. iv) The diagram efficiency.	CO2	7 Marks
	b)	What is 50% Reaction turbine? What are the Characteristics of 50% reaction turbine?	CO1	7 Marks

(OR)

8	a)	Explain the effects of Air leakage in a condenser.	CO1	7 Marks
	b)	Illustrate the working of a parallel flow jet condenser with the help of a neat sketch.	CO2	7 Marks

UNIT-V

9	a)	The Pressure ratio of an open cycle gas turbine power plant is 5.6 and 1 bar. The compression is carried out in two stages with perfect inter cooling in between. The maximum temperature of the cycle is limited to 700^0C. Assuming the isentropic efficiency of each stage compressor is 85% and Turbine is 95%, Determine the power developed and efficiency of the power plant, if the air flow is 1.2kg/sec. Mass of the fuel may be neglected, and may be assumed that Cp=1.02kJ/kg K and gamma =1.41.	CO1	7 Marks
	b)	Explain the gas turbine power plant with inter cooling with PV and TS diagrams.	CO2	7 Marks

(OR)

10	a)	Discuss the working principle of turbo prop Engine	CO2	7 Marks
	b)	Discuss the working principle of Rocket Engine.	CO2	7 Marks

MECHATRONICS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1	a)	What is a Mechatronics system? List the elements of Mechatronics system.	CO1	6 Marks
	b)	Synthesis about the Control systems with an example.	CO1	8 Marks
		(OR)		
2		Evaluate the Automatic control systems with an example and discuss its advantages and disadvantages.	CO1	14 Marks

UNIT-II

3	a)	Discuss the functional operation of following Electric actuators. i) Stepper motors. ii) Relays.	CO2	8 Marks
	b)	Explain operational performance of LVDT with a neat sketch.	CO2	6 Marks
		(OR)		
4	a)	Discuss the operational performance of following sensors. i) Resistance Temperature Detectors (RTD). ii) Piezoelectric accelerometers.	CO2	8 Marks
	b)	Demonstrate the operation of Rotary actuators with neat sketches.	CO2	6 Marks

UNIT-III

5	a)	Describe about the Analogue-to-Digital converter with a neat sketch.	CO3	7 Marks
	b)	What is Amplification? Explain any one operation amplifier with neat sketch.	CO2	7 Marks
		(OR)		
6	a)	Explain the following. i) Current-Voltage converters. ii) Bridge circuits.	CO3	8 Marks
	b)	Describe the Nyquist sampling theorem.	CO3	6 Marks

UNIT-IV

7	a)	Explain about Proportional-Integral-Derivative (PID) controller with a neat sketch.	CO4	9 Marks
	b)	Discuss the methodology in the process of selection of controllers.	CO4	5 Marks
		(OR)		
8	a)	Explain about Proportional Integral (PI) controller with a neat sketch.	CO4	8 Marks
	b)	What is the controller tuning? Explain.	CO4	6 Marks

UNIT-V

9	a)	Develop a case study on Automobile engine management system.	CO5	9 Marks
	b)	Write a short note on Ethics as design constraint.	CO6	5 Marks
		(OR)		
10		Develop a case study on Pick-and-place robot with a neat sketch.	CO5	14 Marks

CODE No.: 16BT50401 SVEC-16

Roll No. | | | | | | | | | | |

III B.Tech I Semester (SVEC-16) Supplementary Examinations January - 2022

DIGITAL COMMUNICATIONS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Illustrate the differential pulse code modulation digital waveform technique with neat sketches.	CO1	7 Marks
	b)	Draw the block diagram of delta modulation scheme and explain. Mention its advantages and disadvantages.	CO1	7 Marks
		(OR)		
2	a)	How non-uniform quantization is done through companding and explains A-law and μ-law companding with characteristic curves.	CO1	7 Marks
	b)	Draw the block diagram of adaptive delta modulation transmitter and receiver and explain.	CO1	7 Marks

UNIT-II

3	a)	Derive the expression for output signal to noise ratio in PCM.	CO1	7 Marks
	b)	What is the quantization noise PCM? Explain the effect of thermal noise in PCM.	CO3	7 Marks
		(OR)		
4	a)	Derive an expression for output signal to noise ratio in DM.	CO1	7 Marks
	b)	What is the quantization noise DM? Explain the effect of thermal noise in PCM.	CO3	7 Marks

UNIT-III

5	a)	Explain about baseband shaping and correlative coding.	CO6	7 Marks
	b)	Derive an expression for probability of error of phase shift keying.	CO2	7 Marks
		(OR)		
6	a)	Derive an expression for probability of error of amplitude shift keying.	CO2	7 Marks
	b)	Explain the generation and detection of DPSK signal with necessary waveforms. Mention its advantages over binary phase shift keying.	CO2	7 Marks

UNIT-IV

7	a)	a) Calculate the entropy in bits for each of the following random variables: i) Pixel values in an image whose possible grey values are all the integers from 0 to 255 with uniform probability. ii) Humans grouped by whether they are, or are not, mammals. iii) Gender in a tri-sexual insect population whose three genders occur with probabilities1/4, 1/4, and 1/2. iv) A population of persons classified by whether they are older, or not older, than the population's median age.	CO1	8 Marks
	b)	A zero-memory source emits six messages with probabilities 0.3, 0.25, 0.15, 0.12, 0.1, 0.08. Find the 4-ary (quaternary) Huffman code. Determine its average word length, the efficiency, and the redundancy.	CO4	6 Marks
		(OR)		

8	a)	A zero-memory source emits messages m_1 and m_2 with probabilities 0.8 and 0.2 respectively. Find the optimum binary code for this source as well as for its second and third order extensions. Determine the code efficiencies in each case.	CO4	10 Marks
	b)	A communication channel with a bandwidth of 4 kHz has a signal power to noise ratio of 7. The bandwidth is reduced by 25 %. How much should the signal power be increased to maintain the same channel capacity?	CO3	4 Marks

UNIT-V

9	a)	Given a generator matrix G = [1 1 1], construct a (3, 1) code. How many errors can this code correct? Find the code word for data vectors d = 0 and d = 1. Comment.	CO5	6 Marks
	b)	Consider the following (k + 1, k) systematic linear block code with parity-check digit $\mathbf{c}_{k+1}$ given by $\mathbf{c}_{k+1} = d_1+d_2+\ldots\ldots\ldots+d_k$ i) Construct the appropriate generator matrix of this code. ii) Construct the code generated by this matrix for k =3. iii) Determine the error detecting or correcting capabilities of this code.	CO5	8 Marks

(OR)

10	a)	Compare the error probability of coded and uncoded systems under constraints of power and information rate.	CO5	7 Marks
	b)	Consider a (6, 2) code generated by the matrix $G = \begin{bmatrix} 1 & 0 & 1 & 1 & 1 & 0 \\ 0 & 1 & 1 & 0 & 1 & 1 \end{bmatrix}$. Construct the code table for this code and determine the minimum distance between code words	CO5	7 Marks

MICROPROCESSORS AND MICROCONTROLLERS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

		UNIT-I		
1	a)	Describe the architecture and operation 8086.	CO1	8 Marks
	b)	What is NEAR CALL and FAR CALL procedure statement in 8086? Explain how stack is used in these two.	CO5	6 Marks
		(OR)		
2	a)	Write an ALP in 8086 to add 16 digit packed BCD numbers and store the result as BCD number.	CO4	7 Marks
	b)	Illustrate any five Assembler directives.	CO1	7 Marks
		UNIT-II		
3	a)	Compare maximum mode and minimum mode of 8086.	CO2	5 Marks
	b)	Design an interfacing system to connect 8Kb static RAM with the microprocessor 8088 in the minimum mode configuration from address 42000h.	CO3	9 Marks
		(OR)		
4	a)	Explain the interrupt response sequence of 8086 with neat diagram.	CO1	6 Marks
	b)	Draw the timing diagrams for READ and WRITE operations of 8086 microprocessor and explain.	CO2	8 Marks
		UNIT-III		
5	a)	Illustrate the different modes of operation of 8255.	CO1	9 Marks
	b)	Write an ALP for 8086 to generate a square wave of 1 MHz frequency using 8255.	CO4	5 Marks
		(OR)		
6	a)	Differentiate synchronous and asynchronous mode of data transfer.	CO2	6 Marks
	b)	Describe transmitter and receiver section of 8251.	CO1	8 Marks
		UNIT-IV		
7	a)	With neat sketch, explain the architecture of 8051.	CO1	9 Marks
	b)	Explain Program Status Word register functionality of 8051.	CO1	5 Marks
		(OR)		
8	a)	Write an ALP for 8051 to find Least Common Multiple (LCM) and Greatest Common Devisor (GCD) of given two numbers.	CO6	9 Marks
	b)	Describe Read Modify and Write instructions of 8051.	CO1	5 Marks
		UNIT-V		
9	a)	Explain the operation of timer in 8051.	CO2	7 Marks
	b)	Write an ALP for 8051 to generate 1 KHz square wave on Port Pin P3.1.	CO6	7 Marks
		(OR)		
10	a)	Write an ALP Program to transfer data with baud rate of 4800 from 8051 to PC.	CO5	7 Marks
	b)	Write a short note on interrupts of 8051.	CO1	7 Marks

VLSI DESIGN

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive the relation between $I_{ds} - V_{ds}$ in saturation region.	CO2	7 Marks
	b)	Explain NMOS Inverter with the help of transfer characteristics.	CO3	7 Marks
		(OR)		
2	a)	Explain about threshold voltage (V_t) and the influence of body effect on threshold voltage.	CO2	7 Marks
	b)	With neat sketches, explain Lithography process in IC fabrication.	CO4	7 Marks

UNIT-II

3	a)	Draw the schematic and stick diagram of NMOS NOR gate.	CO5	7 Marks
	b)	Explain how the problem of driving large capacitive is solves.	CO4	7 Marks
		(OR)		
4	a)	Draw the λ-based design rules for contacts.	CO2	8 Marks
	b)	Calculate Ron resistance of CMOS inverter.	CO3	6 Marks

UNIT-III

5	a)	Explain the construction of 4-bit carry-lookahead adder.	CO6	8 Marks
	b)	How two binary numbers are compared using comparator and explain with its structure?	CO1	6 Marks
		(OR)		
6	a)	Explain construction of carry-select adder.	CO2	7 Marks
	b)	Illustrate the steps involved in booth multiplier with example.	CO3	7 Marks

UNIT-IV

7	a)	Draw the schematic of ripple-carry binary counter and explain its operation.	CO4	8 Marks
	b)	Explain about EPROM and EEPROM based programming technology.	CO1	6 Marks
		(OR)		
8	a)	Draw and explain the anti-fusebased programmable interconnect.	CO3	7 Marks
	b)	Draw and explain the working of dynamic and static memory cell.	CO1	7 Marks

UNIT-V

9	a)	What are the basic principles of low-power design?	CO2	7 Marks
	b)	What is the need for testing?	CO3	7 Marks
		(OR)		
10		Write short notes on: i) CMOS testing. ii) Design strategies of test.	CO4	14 Marks

COMPUTER NETWORKS

[Electronics and Communication Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe the importance of Layered architecture.	CO1	7 Marks
	b)	Write short notes on guided medium.	CO2	7 Marks
		(OR)		
2	a)	Explain the functionality of OSI layers in detail.	CO1	10 Marks
	b)	Describe the merits of TCP / IP protocol suite over OSI model.	CO1	4 Marks

UNIT-II

3	a)	Explain the design issues of data link layer.	CO2	7 Marks
	b)	Explain about Sliding window protocol.	CO3	7 Marks
		(OR)		
4		A bit stream 110110110 is transmitted using standard CRC method. The $G(x)$ is $x^4 + x^2 + x + 1$. Prove that there are no transmission errors.	CO4	14 Marks

UNIT-III

5	a)	Explain the importance of routing and find the shortest path using distance vector algorithm with an example.	CO4	7 Marks
	b)	Define congestion. Explain different congestion control algorithms.	CO4	7 Marks
		(OR)		
6	a)	How optimality principle achieved in Shortest path routing?	CO4	7 Marks
	b)	Differentiate IP v4 and IP v6.	CO3	7 Marks

UNIT-IV

7	a)	Explain the service primitives of transport layer.	CO1	7 Marks
	b)	Explain the connection establishment in transport layer.	CO2	7 Marks
		(OR)		
8	a)	Describe the transmission policy of transport layer.	CO2	7 Marks
	b)	Describe the format of TCP segment.	CO1	7 Marks

UNIT-V

9		Write short notes on following. i) DNS. ii) SNMP. iii) WWW architecture.	CO1	14 Marks
		(OR)		
10	a)	Define E-mail. Explain about architecture.	CO1	7 Marks
	b)	Explain about Hypertext protocol.	CO1	7 Marks

LINUX PROGRAMMING
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

		UNIT-I		
1	a)	What is GNU? List the various major examples of software from the GNU Project.	CO5	7 Marks
	b)	How to pass arguments to Linux programs? Explain with example.	CO2	7 Marks
		(OR)		
2	a)	What is Environment Variables? Explain the functions getenv() and putenv() with example.	CO1	7 Marks
	b)	Describe difference between localtime and gmtime. Write a program to print raw time and gmtime.	CO2	7 Marks
		UNIT-II		
3	a)	What is Shell? Describe the necessity of shell programming.	CO2	7 Marks
	b)	Write Shell script to find whether an input number is palindrome or not.	CO3	7 Marks
		(OR)		
4	a)	Describe various control structure in shell programming with suitable example.	CO1	10 Marks
	b)	Write the difference between break and continue.	CO1	4 Marks
		UNIT-III		
5	a)	Define file. Describe the structure of File System in Linux.	CO1	7 Marks
	b)	Describe the various formatted input and output commands with example.	CO2	7 Marks
		(OR)		
6	a)	Write a shell script to read source file and copy it to target file.	CO5	7 Marks
	b)	List various low level functions used to access the device drivers and explain.	CO1	7 Marks
		UNIT-IV		
7	a)	How to create new process? Illustrate the working principle of Parent and child process using fork command.	CO5	8 Marks
	b)	What is a process? Describe process structure and process table.	CO1	6 Marks
		(OR)		
8	a)	What is Zombie process? Explain Zombie process with an example.	CO1	6 Marks
	b)	What is signal? Describe the various types of signals names defined in signal.h	CO1	8 Marks
		UNIT-V		
9	a)	What is Inter process communication? Describe implementation of popen call with an example.	CO2	7 Marks
	b)	Define Named pipes and explain difference between pipes and names pipes with an example.	CO2	7 Marks
		(OR)		
10	a)	What is socket? Explain the attributes and various types of sockets.	CO1	7 Marks
	b)	Describe the process of naming socket, creating a socket and accepting connections.	CO4	7 Marks

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe image formation with Pin Hole perspective and weak perspective.	CO1	9 Marks
	b)	Analyze different cameras with lenses by an example.	CO2	5 Marks
		(OR)		
2	a)	Explain the reflection at surfaces for modeling pixel brightness.	CO1	10 Marks
	b)	List any 4 applications of human color perception.	CO2	4 Marks

UNIT-II

3	a)	Investigate pooled texture filters. How they are used for generating different discovering textons?	CO2	7 Marks
	b)	Discuss about texture of an image.	CO1	7 Marks
		(OR)		
4	a)	Write a note on Image denoising shape from texture.	CO2	9 Marks
	b)	List the advantages and disadvantages of Binocular reconstruction.	CO2	5 Marks

UNIT-III

5	a)	Analyze the properties of grouping and gestalt theory.	CO3	7 Marks
	b)	Explain the concepts of image segmentation based on clustering pixels.	CO3	7 Marks
		(OR)		
6	a)	Explain agglomerative clustering with a graph by normalized cuts concept.	CO1	7 Marks
	b)	Give in detail mean shift to find local modes for any sample data.	CO3	7 Marks

UNIT-IV

7		Elucidate In how many ways errors and loss can be classified using loss to determine decisions.	CO3	14 Marks
		(OR)		
8		Discuss the composition of regularization and error rate in the classification and detection of objects.	CO3	14 Marks

UNIT-V

9	a)	What is categorization and provide in detail about it?	CO1	9 Marks
	b)	Describe the purpose of basic technology on smoothing word counts.	CO2	5 Marks
		(OR)		
10		Demonstrate different types of information retrieval with their applications	CO1	14 Marks

DATA COMMUNICATIONS
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

		UNIT-I		
1	a)	A. Mention some standard organizations for Data Communications highlighting their roles and responsibilities.	CO1	6 Marks
	b)	Sketch the binary ASK, FSK, PSK and QPSK waveforms for the sequence 101100111.	CO2	8 Marks
		(OR)		
2	a)	Justify the need for a topology in data communications and Compare the different topologies used.	CO1	8 Marks
	b)	With a sketch, explain the general block diagram of Data Communications circuit. Compare Serial and Parallel data transmission.	CO1	6 Marks
		UNIT-II		
3		Why Multiplexing is required in Communications? List the ways through multiplexing can be carried out. Explain briefly about T Carrier Systems.	CO3	14 Marks
		(OR)		
4	a)	With a block diagram, explain PCM in detail.	CO2	8 Marks
	b)	Explain Digital Companding in detail.	CO1	6 Marks
		UNIT-III		
5	a)	List and explain the optical properties of Radio Waves.	CO1	8 Marks
	b)	Define Crosstalk and explain the three types of crosstalk that impacts communication.	CO1	6 Marks
		(OR)		
6	a)	What are the steps involved in completing a local telephone call.	CO1	7 Marks
	b)	Explain about the three modes of propagation of Electromagnetic waves within the Earth's atmosphere.	CO2	7 Marks
		UNIT-IV		
7	a)	Explain about Digital Cellular Telephone in detail.	CO3	8 Marks
	b)	Describe about POSTNET Code.	CO1	6 Marks
		(OR)		
8	a)	Explain the concepts of Dualization and Splitting with respect to Cellular Systems.	CO3	4 Marks
	b)	What is a bar code and when is it commonly used? Describe what is meant by discrete barcode, continuous barcode and 2D barcode.	CO1	10 Marks
		UNIT-V		
9	a)	List and describe the blocks of a voice band modem.	CO1	7 Marks
	b)	Define Modem Synchronization and explain about its functions.	CO1	7 Marks
		(OR)		
10	a)	Explain the terms bits per second (bps), baud, probability of error, bit error rate with an example each.	CO1	8 Marks
	b)	What is the purpose of Scrambler and Descrambler circuits?	CO1	6 Marks

PRINCIPLES OF COMMUNICATIONS

[Electrical and Electronics Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is modulation? Why is modulation used in communication system?	CO1	7 Marks
	b)	What do you understand of modulation index? What is its significance?	CO1	7 Marks
		(OR)		
2	a)	Explain the generation of AM and Drive an expression for AM wave and sketch its frequency spectrum.	CO1	7 Marks
	b)	With a neat block diagram, explain the balanced modulator method of generation DSB-SC wave.	CO1	7 Marks

UNIT-II

3	a)	Derive an expression for an FM wave. Define Modulation Index, Maximum deviation and Bandwidth of FM Signal.	CO4	7 Marks
	b)	Describe with the help of block diagrams, schemes for Generating: i) FM using PM. ii) PM using FM.	CO5	7 Marks
		(OR)		
4	a)	Explain in detail the Demodulation of FM Using PLL.	CO1	7 Marks
	b)	Write short notes on Pre-emphasis and De-emphasis.	CO1	7 Marks

UNIT-III

5	a)	Write short notes on the following. i) Double polarity PAM. ii) Demodulation of PWM.	CO1	7 Marks
	b)	Explain the operation of Time Division Multiplexing with the help of neat sketches.	CO1	7 Marks
		(OR)		
6	a)	Explain the process of Generation & demodulation of PPM.	CO1	7 Marks
	b)	Write the comparisons among PAM, PWM and PPM.	CO1	7 Marks

UNIT-IV

7	a)	Explain the in detail about Sampling and Quantization of PCM with a neat diagram.	CO1	7 Marks
	b)	What is DM and explain the Noises in DM.	CO1	7 Marks
		(OR)		
8	a)	Explain About FSK and Coherent FSK.	CO1	7 Marks
	b)	Write about QPSK Modulation and Demodulation.	CO1	7 Marks

UNIT-V

9	a)	Apply Shannon-Fano coding procedure of M=2 and M=3. [x]=[x_1, x_2, x_3, x_4, x_5, x_6, x_7, x_8] with probability [P]=[1/4, 1/8, 1/16, 1/16, 1/4, 1/16, 1/8 ,1/16].	CO5	7 Marks
	b)	A DMS has symbols a, b, c with probabilities 0.65, 0.2, 0.15 respectively. i) Calculate the entropy of the source. ii) Calculate the entropy of second order extension of the source.	CO1	7 Marks

(OR)

10	a)	Write a short note on concept of amount of information and its properties.	CO5	7 Marks
	b)	Apply Huffmann's encoding procedure to the following message ensemble and determine the average length of the encoded message. {X} = {x_1, x_2, x_3, x_4, x_5, x_6, x_7, x_8, x_9, x_{10} } P{X} = {0.18, 0.17, 0.16, 0.15, 0.10, 0.08, 0.05, 0.05, 0.04, 0.02} The encoding alphabet is {D} = {0, 1, 2, 3}. Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain DDA algorithm to generate lines.	CO3	7 Marks
	b)	Explain raster scan display devices.	CO1	7 Marks
		(OR)		
2		Describe an algorithm for generating an ellipse.	CO3	14 Marks

UNIT-II

3	a)	Explain about 3-Basic transformations in detail.	CO1	7 Marks
	b)	Find the matrix transformation for rotating the triangle with vertices (7,2), (3,2) and (3,9). With 90 degrees keeping the vertex fixed.	CO4	7 Marks
		(OR)		
4	a)	Write short notes on windowing.	CO1	7 Marks
	b)	Describe the Cohen-Sutherland algorithm for line clipping.	CO3	7 Marks

UNIT-III

5	a)	Write short notes on B-Spline blending functions.	CO4	7 Marks
	b)	Write the properties of B-Spline curves.	CO4	7 Marks
		(OR)		
6		Explain depth buffer method for visible surface detection.	CO4	14 Marks

UNIT-IV

7		What are the various types of video compressions models? Explain.	CO2	14 Marks
		(OR)		
8		Explain Various Graphics and Image data types.	CO4	14 Marks

UNIT-V

9		Explain Arithmetic coding with the help of example.	CO5	14 Marks
		(OR)		
10		Explain Transform coding with the help of Block diagram.	CO2	14 Marks

III B.Tech I Semester (SVEC-16) Supplementary Examinations January - 2022

OBJECT ORIENTED ANALYSIS AND DESIGN
[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Explain in detail about the conceptual model of the unified modeling language.	CO2	8 Marks
	b)	Explain about software development modeling.	CO1	6 Marks
		(OR)		
2	a)	Explain how you model system architecture.	CO1	8Marks
	b)	Discuss Rules and common mechanisms in UML.	CO3	6 Marks
		UNIT-II		
3	a)	Write about modeling techniques for class diagram.	CO2	8 Marks
	b)	Discuss in detail about advanced relationships.	CO3	6 Marks
		(OR)		
4	a)	Discuss terms and concepts of class diagram.	CO2	8 Marks
	b)	Discuss about relationships.	CO2	6 Marks
		UNIT-III		
5	a)	Write common modeling techniques for class and object diagrams.	CO4	8 Marks
	b)	Draw a sequence diagram for "register a student in a school".	CO4	6 Marks
		(OR)		
6	a)	Write about terms and concepts of class and object diagrams.	CO5	8 Marks
	b)	What is use case diagram? Explain the architecture of "Railway Reservation System" using use case diagram.	CO4	6 Marks
		UNIT-IV		
7	a)	Explain in detail about modeling a time constraint.	CO2	8 Marks
	b)	Draw state chart diagram for "Railway Ticket Reservation".	CO4	6 Marks
		(OR)		
8	a)	Draw and explain deployment and component diagrams for "Library Management System"	CO3	8 Marks
	b)	Differentiate event and signals.	CO3	6 Marks
		UNIT-V		
9	a)	Draw use case and class diagram for Library applications.	CO6	8 Marks
	b)	Draw and explain component diagram for ATM.	CO6	6 Marks
		(OR)		
10	a)	Using an artifact diagram explain the unified library applications.	CO5	8 Marks
	b)	Draw and explain use case and state chart diagrams for railway Reservation System.	CO6	6 Marks

WEB TECHNOLOGIES
[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1	a)	Why forms are useful in HTML? How to create them in HTML? Explain.	CO1	7 Marks
	b)	Explain the following HTML tags with suitable example. i) <script>. ii) <!DOCTYPE>. iii) <frameset>. iv) <style>.	CO1	7 Marks
		(OR)		
2	a)	Explain the features of a HTML5. Also explain the structure of HTML5 document.	CO1, CO2	7 Marks
	b)	Explain the following HTML tags with suitable example. i) <video>. ii) <meta>. iii) <fieldset>. iv) <canvas>.	CO1	7 Marks

UNIT-II

3	a)	Describe the Cascading Style Sheet (CSS) with an example use the Font Attributes and Text Attributes in the example.	CO2	7 Marks
	b)	What is function? Explain how parameters are passed to functions in JavaScript.	CO1	7 Marks
		(OR)		
4	a)	Define object. Explain how to use objects in java scripts.	CO1	6 Marks
	b)	What are Cascading style sheets? Explain different types of CSS.	CO2	8 Marks

UNIT-III

5	a)	What are the methods to access HTML elements and attributes in JQuery?	CO5	8 Marks
	b)	Write the advantages and limitations of AJAX.	CO5	6 Marks
		(OR)		
6		Develop a user registration webpage using the grid system in bootstrap.	CO5	14 Marks

UNIT-IV

7	a)	Describe all the ways of creating Arrays in PHP.	CO5	7 Marks
	b)	Demonstrate the implementation of object cloning in PHP.	CO1	7 Marks
		(OR)		
8	a)	Explain the concept of string interpolation in PHP.	CO5	7 Marks
	b)	Write a PHP program to find prime numbers up to ‘n’ numbers.	CO5	7 Marks

UNIT-V

9	a)	Develop a simple PHP web application for verifying user Authenticity using MYSQL.	CO1	7 Marks
	b)	What are the various ways by sending forms data to PHP page and explain each.	CO4	7 Marks
		(OR)		
10	a)	Define a prepared statement. Explain in detail with the suitable program.	CO1	5 Marks
	b)	What are the advantages of cookies and sessions? How Cookies and	CO4	9 Marks

sessions are handled in PHP?

OBJECT ORIENTED PROGRAMMING
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Write short note on the following Object Oriented concepts. i) Encapsulation. ii) Dynamic binding.	CO1	6 Marks
	b)	Write a program to perform the following functions using classes, objects, constructors and destructors wherever necessary. i) Read 5 subjects marks of 5 students. ii) Calculate the total and print the result on the screen.	CO1	8 Marks
		(OR)		
2	a)	Write a java program to implement a binary search procedure to find whether the given element is present in the array or not using objects and classes.	CO1	8 Marks
	b)	Explain the concept of passing the arguments by call by value and call by reference with an example.	CO1	6 Marks

UNIT-II

3	a)	Explain different uses of this keyword in java.	CO1, CO2	6 Marks
	b)	Explain creating packages and accessing a package with examples.	CO1	8 Marks
		(OR)		
4	a)	Write a Java program to find the area and perimeter of square and circle using interface.	CO1, CO2	8 Marks
	b)	What is nested interface? Explain it with an example.	CO1	6 Marks

UNIT-III

5	a)	Explain Arithmetic and NullPointer exception with the help of an example.	CO1	8 Marks
	b)	Explain the flow of control in try-catch-finally blocks with example.	CO1	6 Marks
		(OR)		
6	a)	"Does Java support thread priorities?" Justify your answer with suitable discussion.	CO2	6 Marks
	b)	Describe the need of thread synchronization. How is it achieved in Java programming? Explain with a suitable program.	CO2	8 Marks

UNIT-IV

7	a)	Explain the methods of LinkedList and HashSet class.	CO5	6 Marks
	b)	Write a Java program to create student registration form.	CO6	8 Marks
		(OR)		
8	a)	Write a Java program for calculator operations using AWT Controls	CO4	8 Marks
	b)	Write a Java program to illustrate the use of Flow Layout Manager.	CO4	6 Marks

UNIT-V

9	a)	Write a java program to handle keyboard events.	CO2, CO4	6 Marks
	b)	Write a java program to demonstrate the functionality of adapter class.	CO5	8 Marks
		(OR)		
10	a)	Explain the interfaces and classes in javax**.**servlet package.	CO5	8 Marks
	b)	Write a servlet which displays current system date and time	CO5	6 Marks

COMPILER DESIGN

[Information Technology, Computer Science and System Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1	a)	What is the difference between a phase and a pass? Which pass compiler I suitable for which machines? Explain.	CO1	6 Marks
	b)	What is the role of Lexical analyzer? Describe the input buffering mechanism in lexical analysis.	CO1	8 Marks
		(OR)		
2	a)	Explain the need for grouping the phases of compiler. Describe various compiler Construction tools.	CO5	7 Marks
	b)	Explain the Language for specifying Lexical Analyzer.	CO1	7 Marks

UNIT-II

3	a)	What are the difficulties with Top-Down parsing? How to overcome these difficulties?	CO3	7 Marks
	b)	Construct Predictive parsing table for the grammar E → E+T | T T → T * F | F F → (E) | id and parse the string id+id*id.	CO3	7 Marks
		(OR)		
4	a)	What are the advantages of LR parsing?	CO3	6 Marks
	b)	Construct CLR parsing table for the grammar S → L=R S → R L → *R L→ id R → L	CO3	8 Marks

UNIT-III

5	a)	Differentiate between S-Attributed and L-Attributed definitions.	CO4	6 Marks
	b)	Define syntax trees. How to construct a syntax tree? Describe.	CO4	8 Marks
		(OR)		
6	a)	Describe the rules for type checking.	CO4	6 Marks
	b)	What is a type expression? Explain the equivalence of type expressions with an appropriate example.	CO4	8 Marks

UNIT-IV

7	a)	Write the Syntax Directed Translation for Boolean expressions with Control flow representation.	CO4	7 Marks
	b)	What are the different kinds of storage allocation strategies? Explain.	CO6	7 Marks
		(OR)		
8	a)	What are the different kinds of operations that can be performed on a Symbol table?	CO6	6 Marks
	b)	What are the different storage allocation strategies? Explain the usage of Simple Stack Allocation Scheme.	CO6	8 Marks

UNIT-V

9	a)	What are the principle sources of optimization? Explain.	CO2	8 Marks
	b)	Write a note on optimization of Basic Block.	CO2	6 Marks
		(OR)		
10	a)	What are the issues in generating Machine code? Describe.	CO2	7 Marks
	b)	Write a brief note on peephole optimization.	CO2	7 Marks

SYSTEMS SOFTWARE
[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain internal and external commands in UNIX with examples.	CO1	7 Marks
	b)	With suitable examples, illustrate mkdir, more, cmp and diff commands with all the options.	CO1	7 Marks
		(OR)		
2	a)	List the different categories of files in UNIX. Explain.	CO1	7 Marks
	b)	Discuss the role of kernel in UNIX architecture.	CO1	7 Marks

UNIT-II

3	a)	Write a 'C' program to adjust the position of file I/O.	CO2	7 Marks
	b)	Give a brief note on 'stat' and 'fstat' system calls in UNIX.	CO2	7 Marks
		(OR)		
4	a)	Describe an algorithm for process termination.	CO4	7 Marks
	b)	Write a 'C' program for reading and writing a pipe.	CO2	7 Marks

UNIT-III

5		Define Context of a process. Explain briefly the components of user context, register context and system- level context with a neat diagram.	CO4	14 Marks
		(OR)		
6	a)	Write an algorithm for 'wakeup' system call.	CO3	7 Marks
	b)	Describe the steps executed by kernel to make a process sleeping on an event.	CO3	7 Marks

UNIT-IV

7	a)	Write the steps in checking and handling signals in the context of a process.	CO5	7 Marks
	b)	Give the syntax of wait system call. Explain with an example program.	CO3	7 Marks
		(OR)		
8	a)	How many user IDs will kernel associate with each process? Explain the significance of each user ID with the associated system call.	CO3	7 Marks
	b)	Explain the algorithm for booting the system and Init process.	CO3	7 Marks

UNIT-V

9	a)	Explain IP addressing scheme in networking.	CO2	7 Marks
	b)	Explain how file transfer protocol will be used to transfer files.	CO3	7 Marks
		(OR)		
10	a)	What are the standard file systems in UNIX? Explain.	CO2	7 Marks
	b)	Briefly explain mounting and unmounting file systems in UNIX.	CO3	7 Marks

DIGITAL SIGNAL PROCESSING
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define various elementary discrete time signals. Write notes on them and explain about their properties.	CO4	7 Marks
	b)	Explain frequency analysis of periodic discrete time signal using Fourier series method.	CO2	7 Marks
		(OR)		
2	a)	Define causality and stability of an LTI system and state the conditions for stability.	CO2	7 Marks
	b)	For the following discrete time signals, determine whether or not the system is linear, shift invariant, causal and stable. i) $y(n)=x(n+7)$. ii) $y(n)= x^3(n)$.	CO4	7 Marks

UNIT-II

3	a)	Perform circular convolution of the following sequences. $x_1(n)=\{1,2,3,4\}$ a $x_2(n)=\{1,1,2,1\}$	CO2	7 Marks
	b)	Find the DFT of the send quence $x(n)=\{1, 2, 3, 4, 4, 3, 2, 1\}$ using DIT-FFT algorithm.	CO1	7 Marks
		(OR)		
4	a)	Draw the radix 2 DIF-FFT structure when N=16.	CO1	7 Marks
	b)	State and prove convolution property of DFT in frequency domain.	CO2	7 Marks

UNIT-III

5	a)	For the given analog transfer function $H_a(s) = 3/(s+1)(s+4)$, determine H(z) for T=1sec using impulse invariant method.	CO5	7 Marks
	b)	Derive an expression for order of the Butterwort analog proto type filter.	CO2	7 Marks
		(OR)		
6	a)	Design IIR digital Butterworth low pass filter to satisfy the constraints $0.707 \le \lvert H(\omega) \rvert \le 1$; for $0 \le \omega \le 0.2\pi$ $\lvert H(\omega) \rvert \le 0.1$; for $0.5\pi \le \omega \le \pi$ Use Impulse invariant transformation with T=1 sec.	CO5	7 Marks
	b)	Discuss about different methods of realization of IIR systems.	CO2	7 Marks

UNIT-IV

7	a)	Compare an FIR filter with IIR filter. What conditions are to be satisfied by the impulse response of an FIR filter in order to have a linear phase?	CO2	7 Marks
	b)	Design a Linear phase low pass FIR filter with a cutoff frequency of $\pi/2$ rad/sec frequency sampling technique. Take N=11.	CO3	7 Marks
		(OR)		

8	a)	Analyse the characteristics of rectangular, Bartlet and Blackman windows with neat sketch.	CO3	6 Marks
	b)	Explain the realization of cascade and Linear phase structure of an FIR system.	CO3	8 Marks

UNIT-V

9	a)	Explain various types of general purpose registers in TMS 320C6X DSP processor.	CO1	7 Marks
	b)	Explain about various on-chip peripherals provided on DSP processors.	CO1	7 Marks

(OR)

10	a)	Explain the VLIW architecture with its block diagram. State the advantages and disadvantages of VLIW architecture.	CO1	7 Marks
	b)	Explain the features of TMS 320C6X DSP processor.	CO1	7 Marks

COSTING AND FINANCE MANAGEMENT FOR CIVIL ENGINEERS
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 What is preliminary estimation of costs? Explain. CO1, CO3 14 Marks

(OR)

2 Explain the following concepts: CO1 14 Marks
i) Sunk cost. ii) Opportunity cost.

UNIT-II

3 A company undertook a contract for construction of a large building complex. The construction work commenced on 1st April, 2000 and the following data are available for the year ended 31st March, 2001. CO1, CO4 14 Marks

	Rs. '000		Rs. '000
Contract Price	35,000	Plant Hire Charges	1,750
Work Certified	35,000	Wages Related Costs	500
Progress Payments Received	15,000	Site Office Costs	678
Materials Issued to Site	7,500	Head Office Expenses Apportioned	375
Planning & Estimating Costs	1,000	Site Expenses Incurred	902
Direct Wages Paid	4,000	Work Not certified	149
Materials Returned From site	250		

The contractors own a plant which originally cost Rs.20 lacs has been continuously in use in this contract throughout the year. The residual value of the plant after 5 years of life is expected to be Rs.5 lacs. Straight line method of depreciation is in use . As on 31st March, 2001 the direct wages due and payable amounted to Rs.2,70,000 and the materials at site were estimated at Rs.2,00,000.

Require:

i) Prepare the contract account for the year ended 31st March, 2001.
ii) Show the calculation of profit to be taken to the profit and loss account of the year.
iii) Show the relevant balance sheet entries.

(OR)

4 Analyze the calculation of profit on uncompleted contracts. Explain. CO2, CO3 14 Marks

UNIT-III

5 Distinguish between forecast and a budget. Give examples to illustrate the difference between the two. CO2 14 Marks

(OR)

6 Discuss briefly the objectives and limitations of budgetary control. CO1 14 Marks

UNIT-IV

7	What is incremental cash flow? Explain.	CO1	14 Marks

(OR)

8	Coastal software Ltd., is proposing to mechanize their operations. Two proposals M and N in form of quotations have been received from two different vendors. The proposal in each case costs Rs.5,00,000. A discount factor of 12% is used to compare the proposals. CFAT are likely to be as under:	CO3, CO4	14 Marks

Year	Project M (Rs.)	Project N (Rs.)
1	1,50,000	50,000
2	2,00,000	1,50,000
3	2,50,000	2,00,000
4	1,50,000	3,00,000
5	1,00,000	2,00,000

Which one do you recommend under Present Value method?

UNIT-V

9	Elaborate sources of working capital.	CO1	14 Marks

(OR)

10	Critically analyze the significance of cash conversion cycle in working capital management.	CO2, CO3	14 Marks

CODE No.: 16BT41204 SVEC-16

Roll No. | | | | | | | | | | |

THEORY OF COMPUTATION

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Construct a DFA equivalent to the NFA. CO1 10 Marks

	0	1
q1	{q1}	{q1, q2}
q2	{q3}	{q3}
q3	{q4}	{q4}
q4	{}	{}

b) Tabulate the differences between Moore and Mealy machines. CO2 4 Marks

(OR)

2 a) Convert the following ε-NFA to DFA CO1 10 Marks

	0	1
$\rightarrow p$	{ p, q }	{ p }
q	{ r }	{ r }
r	{ s }	∅
$* \ s$	{ s }	{ s }

b) List and explain briefly about the components of Finite automaton model. CO1 4 Marks

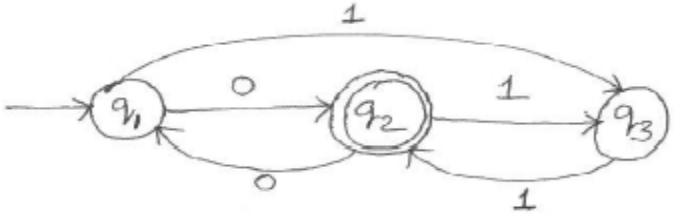
UNIT-II

3 a) Construct a NFA equivalent to the regular expression 10 + (0+11)0*1. CO3 10 Marks

b) Prove that the language L = {0^p,p is prime} is not regular. CO5 4 Marks

(OR)

4 a) Obtain the regular expression denoting the language accepted by the following DFA by using the formula R_{ij}^k. CO3 8 Marks



b) State and explain pumping lemma for regular languages. CO1 6 Marks

UNIT-III

5 a) Obtain a CFG to generate the set of all strings over alphabet {a, b} with exactly twice as many a's as b's. CO3 7 Marks

b) Show that the grammar is ambiguous. CO1 7 Marks
$S \rightarrow aSbS \mid bSaS \mid \epsilon$

(OR)

6	a)	Remove useless symbols and use less productions from the given grammar; $S \rightarrow aAa$ $A \rightarrow Sb \mid bcc \mid DaA$ $C \rightarrow abb \mid DD$ $E \rightarrow ac$ $D \rightarrow aDA$	CO1	8 Marks
	b)	Explain pumping lemma for context free languages.	CO1	6 Marks

UNIT-IV

7	a)	Define pushdown automata and explain its model with a neat diagram.	CO1	6 Marks
	b)	Construct PDA generating all odd palindromes over string {a, b, c}.	CO4	8 Marks

(OR)

8	a)	Construct PDA for the following grammar; $S \rightarrow aABB \mid aAA$ $A \rightarrow aBB \mid a$ $B \rightarrow A$.	CO3	10 Marks
	b)	Write short notes on Deterministic Pushdown Automata.	CO1	4 Marks

UNIT-V

9		Define Turing machine with an example. Explain different types of Turing machines.	CO1	14 Marks

(OR)

10	a)	Differentiate multi tape and multi stack Turing machines.	CO1	9 Marks
	b)	Design a Turing machine that computes a function $\boldsymbol{f}(\boldsymbol{x},\boldsymbol{y}) = \boldsymbol{x} - \boldsymbol{y}$ (proper subtraction)	CO5	5 Marks

IRRIGATION ENGINEERING
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		The left branch canal carrying discharge of 20 cumecs has cultural command area of 20,000 hectares. The intensity of rabi crop is 80 percent and the base period is 120 days. The right branch canal carrying discharge of 8 cumecs has culturable command area of 12,000 hectares, intensity of irrigation of rabi crop is 50 percent and the base period is 120 days. Compare the efficiencies of the two canal systems.	CO5	14 Marks
		(OR)		
2	a)	Enlist the different factors affecting duty. Discuss how duty can be improved.	CO1	7 Marks
	b)	Describe various forms of a soil moisture with a neat sketch and what do you understand by the available moisture.	CO2	7 Marks

UNIT-II

3	a)	Discuss briefly the causes of failure of weirs on permeable foundation and their remedies.	CO2	7 Marks
	b)	Write a note on Khosla's theory of design of weirs on permeable foundation.	CO1	7 Marks
		(OR)		
4	a)	Discuss the various advantages and disadvantages of location of canal headworks.	CO2	7 Marks
	b)	What are the various effects of construction of a weir on the river regime?	CO1	7 Marks

UNIT-III

5	a)	Define gallery. Discuss the classification of galleries in a gravity dam, state its purposes.	CO1	7 Marks
	b)	Explain the stability analysis of a gravity dam.	CO6	7 Marks
		(OR)		
6	a)	Explain the elementary profile of a gravity dam with a neat sketch.	CO2	7 Marks
	b)	Describe various types of earth dams with a neat sketch.	CO2	7 Marks

UNIT-IV

7	a)	What is a canal escape and discuss different types of canal escapes?	CO1	7 Marks
	b)	Explain design procedure for canal cross regulator and head regulator.	CO2	7 Marks
		(OR)		
8		Determine the dimensions of the irrigation channel for the following date B/D ratio = 3.7; N=0.0225; m=1 and S=1/1000. Side slopes of the channel is 1/2 Horizontal to Vertical. Also determine the discharge which will be flowing in the channel.	CO3	14 Marks

UNIT-V

9	a)	What do you understand by bank connections? Draw a sketch of the bank connections of a syphon aqueduct.	CO1	7 Marks
	b)	What is a transition? State its purposes and discuss the various methods for the design of transition.	CO2	7 Marks
		(OR)		
10	a)	Describe the procedure for the design of a syphon aqueduct.	CO3	7 Marks
	b)	Explain the procedure for the design of a canal syphon.	CO4	7 Marks

III B.Tech I Semester (SVEC-16) Supplementary Examinations June – 2022

REINFORCED CEMENT CONCRETE STRUCTURES
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	Interpret the details and design a doubly reinforced beam to carry a superimposed load of 60kN/m. The overall depth and width of the beam are restricted to 840 mm and 300 mm respectively. The beam has a clear span of 5 m and a bearing of 50 cm on each end. Take σcbc=5 N/mm, σst=140 N/mm and m=18. Draw the reinforcement details.	CO2	14 Marks
	(OR)		
2	Sketch the reinforcement a detail of a rectangular beam is to be simply supported on supports of 230 mm width. The clear span of the beam is 6 m. The beam is to have a width of 300 mm, the characteristic superimposed load is 12 KN/m. Design the beam and sketch the reinforcement details.	CO3	14 Marks

UNIT-II

3	Design a cantilever beam of uniform depth for a span of 3.5m, if the superimposed load is 30 kN/m and it is monolithic with R.C column of 300 mm width and 400 mm deep. Use M20 grade concrete and Fe415 steel.	CO3	14 Marks
	(OR)		
4	An RCC beam 230 mm wide and 450 mm deep is reinforced with 4 bars of 16 mm dia of grade Fe415 on tension side. If design shear force is 60 kN, design the shear reinforcement consisting only of vertical stirrups. The grade of concrete used is M20.	CO3	14 Marks

UNIT-III

5	Design a reinforced concrete slab to carry a live load 3 kN/m² on an effective span of 3.5 m. Using M 20 grade concrete and Fe 415 steel reinforcement. Sketch the reinforcement details.	CO3	14 Marks
	(OR)		
6	Design a two way slab for a room size 4m x 5m with discontinuous and simply supported edges on all four sides with corners prevented from lifting to supported a live load 4 kN/m². Adopt M 20 grade concrete and Fe 415 HYSD bars.	CO3	14 Marks

UNIT-IV

7	Design of short column subjected to biaxial bending. Determine the reinforcement for a short column for the following data. Column size: 400mmx600mm, Pu=2000kN, Mux=160kN, Muy=120kN Use M20 grade concrete and Fe415 grade steel.	CO3	14 Marks
	(OR)		
8	Design a rectangular column, 5m long restrained in position and direction at both ends, to carry an axial load of 120 kN. Use M20 and Fe415 grades.	CO3	14 Marks

UNIT-V

9	A rectangular column 600 x 400 mm carries a load of 800 KN. Design a rectangular footing to support the column. The safe bearing capacity of the soil is 200 KN/m^2. Use M20 grade concrete.	CO3	14 Marks
	(OR)		
10	Design a dog-legged stair for a building in which the vertical distance between the floors is 3.6m. The Stair hall measures 2.4m x 5m (inner dimensions). The live load on the stair is 3000N/m^2. Adopt M20 Grade concrete and Fe415Grade Steel. Live load on the stair is 3000N/m^2. Adopt M20 Grade concrete and Fe415Grade Steel.	CO3	14 Marks

SOIL MECHANICS
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is a soil? What are the mineral constituents of a soil? Explain with the help of neat sketches. The structure of any three clay minerals.	CO1	7 Marks
	b)	A soil sample has a porosity of 40%. The specific gravity of solids 2.70. Calculate: i) Void ratio. ii) Dry density. iii) Unit weight if the soil is 50% saturated. iv) Unit weight if the soil is completely saturated.	CO2	7 Marks
		(OR)		
2	a)	Describe the Indian Standard soil classification system.	CO7	7 Marks
	b)	The dry unit weights of sand in the loosest and densest states are respectively 13.34 kN/m^3 and 21.40 kN/m^3. Assuming the specific gravity of the solids is 2.67, determine the relative density of sand with porosity of 30%.	CO2	7 Marks

UNIT-II

3	a)	Write down the procedure for determination of permeability by constant head test in the laboratory.	CO1	7 Marks
	b)	The falling head permeability test was conducted on a soil sample of 4cm diameter and 18cm length. The head fell from 1.0m to 0.40m in 20 minutes. If the cross-sectional area of the stand pipe was 1cm^2, determine the coefficient of permeability.	CO2	7 Marks
		(OR)		
4	a)	What is meant by total stress, neutral stress and effective stress and give its relationship.	CO2	6 Marks
	b)	Compute the total, effective and pore pressure at a depth of 20 m below the bottom of a lake 6 m deep. The bottom of lake consists of soft clay with a thickness of more than 20 m. The average water content of the clay is 35% and specific gravity of the soil may be assumed to be 2.65.	CO3	8 Marks

UNIT-III

5	a)	Explain how Newmark's influence chart is constructed and how it is used to find the vertical stress at a point below the ground surface.	CO8	6 Marks
	b)	A water tank is supported by a ring foundation having outer diameter of 10m and inner diameter of 7.5 m. The ring foundation transmits uniform load intensity of 160 kN/m^2. Compute the vertical stress induced at depth of 4 m, below the centre of ring foundation, using (i) Boussinesq analysis and (ii) Westergaard's analysis, taking $\mu = 0$. 1) Midway between the footings at a depth of 3.5 m below the footing level. 2) Vertically below the centre of each footing at the same depth of 3.5 m.	CO2	8 Marks

(OR)

6	a)	What are the different methods of compaction adopted in the field? How would you select the type of roller to be used?	CO4	6 Marks
	b)	For constructing an embankment, the soil is transported from a Borrow area using a truck which can carry 6m³ of soil at a time. With the following details, determine the number of truck loads of soil required to obtain 100m³ of compacted earth fill and the volume of borrow pit.	CO2	8 Marks

Property	Borrow area (In-situ)	Truck (Loose)	Field (Compacted)
Bulk Unit Weight (kN/m³)	16.6	11.5	18.2
Water Content (%)	14	8	6

UNIT-IV

7	a)	Discuss the spring analogy for primary consolidation. What are its uses?	CO1	6 Marks
	b)	A layer of soft clay is 6m thick and lies under a newly constructed building. The weight of sand overlying the clay layer produces a pressure of 2.6kg/cm² and the new construction increases the pressureby1.0kg/cm². If the compression index is 0.5. Compute the settlement. Water content is 40% and specific gravity of grains is 2.65.	CO3	8 Marks

(OR)

8	a)	Distinguish normally consolidated soils and over consolidated soils. What is over consolidation ratio?	CO1	6 Marks
	b)	An undrained soil sample 30cm thick got 50% consolidation in 20 minutes with drainage allowed at top and bottom in the laboratory. If the clay layer from which the sample was obtained is 3m thick in field condition, estimate the time it will take to consolidate 50% with double surface drainage and in both cases, consolidation pressure is uniform.	CO3	8 Marks

UNIT-V

9	a)	Explain vane shear test with the help of neat sketch.	CO8	6 Marks
	b)	A saturated specimen of cohesionless and was tested in triaxial compression and the sample failed at a deviator stress of 482kN/m² when the cell pressure was 100kN/m² under the drained conditions. Find the effective angle of shearing resistance of sand. What would be the deviator stress and the major principal stress at failure for another identical specimen of sand, if it is tested under cell pressure of 200kN/m². Use either Mohr's circle method or analytical method.	CO2	8 Marks

(OR)

10	a)	What is critical void ratio? Explain briefly Skempton's pore pressure coefficients.	CO1	5 Marks
	b)	Following are the results of un-drained tri-axial compression test on two identical soilspecimens, at failure:	CO2	9 Marks

Lateral pressure σ_3 (kN/m²)	100	300
Total vertical pressure σ_1 (kN/m²)	440	760
Pore water pressure u (kN/m²)	- 20	60

Determine the cohesion and angle of shearing resistance:

i) Referred to total stress.

ii) Referred to effective stress.

STRUCTURAL ANALYSIS-II
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive the expression for maximum bending moment and shear force for a simply supported beam with a moving UDL longer than the span.	CO1	7 Marks
	b)	A uniform load of 5 kN/m run covering a length of 15 m, crosses a girder of span 50 m. Find the values of maximum bending moment and shear force at a section 10 m from the left support.	CO2	7 Marks

(OR)

2		A train of 5-wheel loads 60 kN, 80 kN, 200 kN, 130 kN and 120 kN spaced 2.5 m between the consecutive loads crosses a beam of span 22.5 m with 120 kN load leading. Calculate the maximum positive and negative shear force values at the centre of the span and the absolute maximum bending moment anywhere in the span. Use Influence Lines method.	CO2	14 Marks

UNIT-II

3		Analyse the continuous beam shown in figure 01, by slope deflection method and draw the bending moment diagram.	CO6	14 Marks

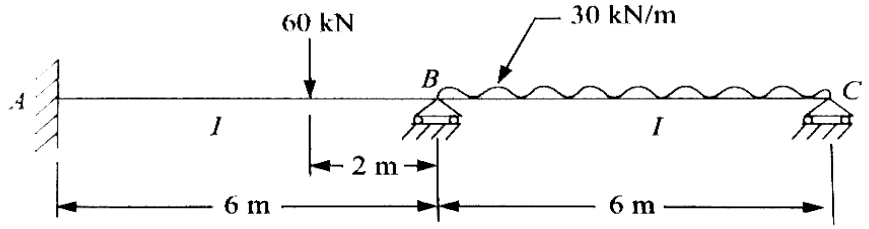

Figure 01

(OR)

4		Analyse the continuous beam shown in figure 02, using moment distribution method.	CO6	14 Marks

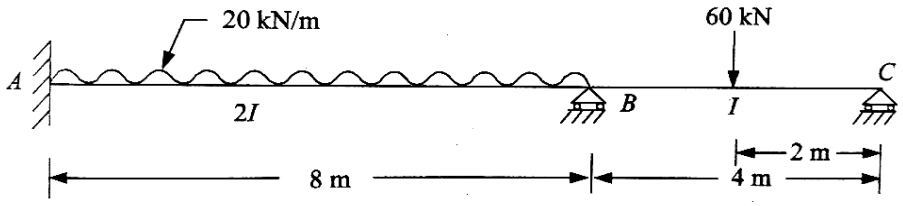

Figure 02

UNIT-III

5		Analyse the continuous beam shown in figure 03 by Kani's method. Flexural rigidity is constant throughout.	CO4	14 Marks

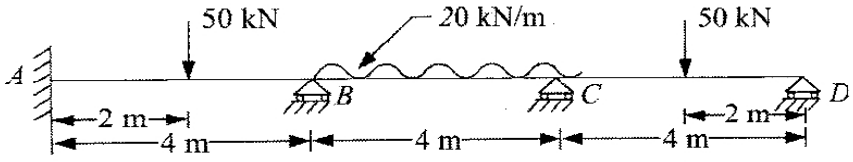

Figure 03

(OR)

6 A simply supported beam of span 12 m shown in figure 04 is loaded with 40 kN loads at C, D and E. Determine the vertical deflection at D. Take EI= 20000 kNm^2. CO2 14 Marks

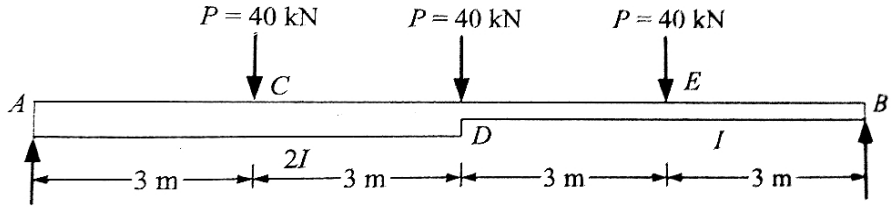

Figure 04

UNIT-IV

7 a) Differentiate the statically determinate structures and statically indeterminate structures. CO2 7 Marks

b) Write short notes on Static and Kinematic Indeterminacy. CO5 7 Marks

(OR)

8 Find the forces in the members of truss shown in figure 05. The cross-sectionalarea and young's modulus of all the members are the same. CO4 14 Marks

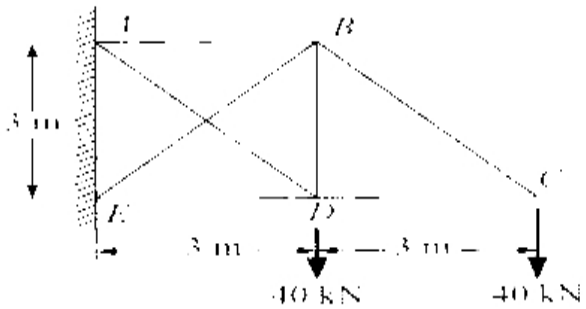

Figure 05

UNIT-V

9 a) Briefly explain the idealized stresses in plastic analysis. CO1 7 Marks

b) Determine the shape factor for the rectangular and circular section. CO3 7 Marks

(OR)

10 Calculate the plastic moment capacity required for the continuous beam with working loads shown in figure 06. CO3 14 Marks

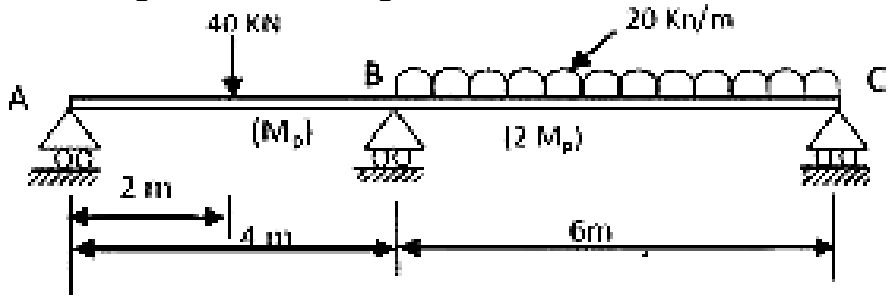

Figure 06

WASTE WATER TECHNOLOGY

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Briefly explain the various factors to be-considered in the design of sewerage system. Design a sanitary sewer to serve a population of 6000 with per capita water supply rate of 135 **lpcd**. Assume n = 0.013.	CO3	7 Marks
	b)	State the functions of Manhole. Describe with the help of neat sketch the components of a manhole and discuss on communicating about its usefulness to society in maintenance of sewerage system.	CO9	7 Marks
		(OR)		
2	a)	Briefly explain the various factors to be considered in the design of sewerage system. Design a sanitary sewer to a population of 7,000 receiving water at 90 **lpcd**. Minimum self cleansing velocity at design flow is 0.8 m/s, maximum depth of flow is 0.5D. Assume other design criteria as applicable.	CO3	7 Marks
	b)	Describe the conservancy and water carriage system of sanitation. In new developing town which method you will prefer and why?	CO1	7 Marks

UNIT-II

3	a)	The BOD_5 at 27°C of wastewater sample has been measured as 480 mg/L. What portions of ultimate BOD would remain unoxidised after 7^{th} and 10^{th}day at 20°C? Assume the reaction rate constant at 20°C as 0.21 d^{-1}.	CO2	7 Marks
	b)	Estimate the settling velocity of spherical particle of specific gravity 2.65 and diameter 0.18mm. Take kinematic viscosity of water as 1.016×10^{-2} m/s.	CO2	7 Marks
		(OR)		
4	a)	Design a screen for a proposed sewage treatment plant (STP) of 60 MLD.	CO3	7 Marks
	b)	Summarize the role of Screen Chamber in Sewage treatment plant and write its design procedure.	CO1	7 Marks

UNIT-III

5	a)	Explain the mechanism of working of a trickling filter with a neat sketch.	CO1	7 Marks
	b)	Design an oxidation ditch for a community of 7500 with per capita sewage contribution of 90 **lpcd** and BOD 250 mg/l, the desired BOD of the treated sewage is 30 mg/l.	CO3	7 Marks
		(OR)		
6	a)	Explain how the algal-bacterial symbiosis with respect to waste stabilization pond can be recommended for the benefit of society in treatment of sewage.	CO4	7 Marks
	b)	Explain activated sludge process (ASP) in treating waste water with neat flow diagram. Discuss the various design parameters involved in it.	CO1	7 Marks

UNIT-IV

7	a)	Discuss the need for sludge treatment and explain the health effects of disposal of untreated sludge disposal.	CO6	7 Marks
	b)	Explain briefly the process of removing of nitrogen and phosphorus from waste water and standards followed in disposal of wastewater.	CO8	7 Marks

(OR)

8	a)	Discuss briefly the various methods of sewage disposal.	CO5	7 Marks
	b)	Explain briefly about the removal process of suspended solids and pathogenic bacteria.	CO1	7 Marks

UNIT-V

9	a)	Summarize the principle of the self-purification process of river and the various stages of oxygen sag curve and communicate its uses.	CO9	7 Marks
	b)	Explain briefly when the on land disposal system of sewage can be recommended.	CO4	7 Marks

(OR)

10	a)	With a neat sketch explain the function of soak pit.	CO1	7 Marks
	b)	Design a septic tank with neat sketch for a hostel having 250 students. Design sewage flow is 60 **lpcd**.	CO3	7 Marks

CONTROL SYSTEMS

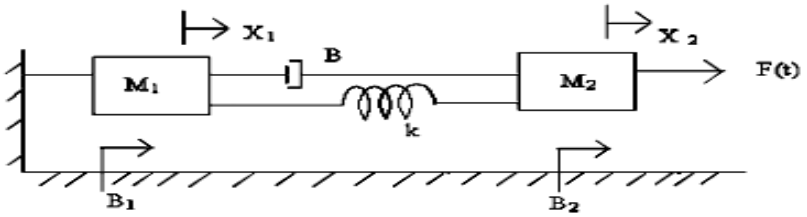
[Electrical and Electronics Engineering, Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

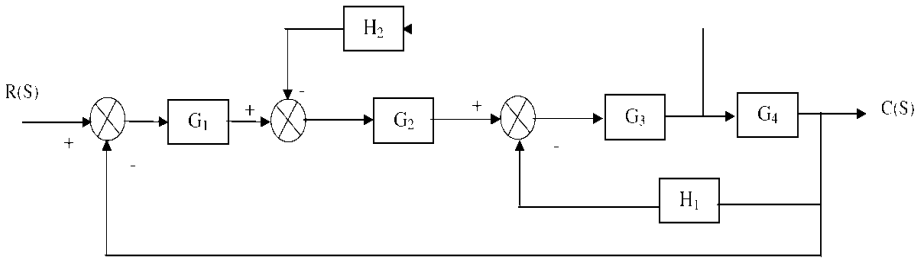
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Determine the transfer function $\frac{X_2(s)}{F(s)}$ for the mechanical system shown in below figure. CO4 7 Marks

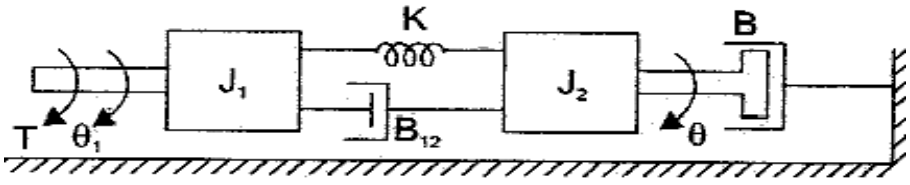


b) Determine the overall system transfer function C(S)/R(S) for the system shown below. CO4 7 Marks



(OR)

2 a) Write the differential equations governing mechanical rotational system shown in below figure. And determine the transfer function $\frac{\theta(s)}{T(s)}$. CO4 7 Marks



b) Apply open loop and closed loop control systems for traffic control system. CO6 7 Marks

UNIT-II

3 a) Illustrate the effect of damping ratio on the location of closed-loop poles of a standard second order system. CO1 7 Marks

b) The open-loop transfer function of a unity feedback system is given by $G(s) = \frac{20}{s(0.2s+1)}$ Calculate positional error constant (K_p), Velocity error constant (K_v), Acceleration error constant (K_a) and steady state error when the system is excited with unit step signal. CO4 7 Marks

(OR)

4	a)	Sketch the root locus of a unity feedback system whose open loop transfer function is given by $G(s) = \frac{K}{s(s+3)(s+6)}$.	CO4	7 Marks
	b)	For the system to be stable, Determine the range of K of a unity feedback system whose open-loop transfer function given by $G(s) = \frac{K}{s(s^2+2s+1)(s+4)}$.	CO4	7 Marks

UNIT-III

5		Sketch the Bode plots showing the magnitude in dB and phase angle in degrees as a function of log frequency for the transfer function $G(s)H(s) = \frac{2000}{s(s+2)(s+100)}$. Determine the gain crossover frequency, Phase crossover frequency, gain margin and phase margin. Also, determine the gain and the corresponding phase margin for a gain crossover frequency of 50 rad/sec.	CO5	14 Marks

(OR)

6		Draw the Nyquist plot and assess the stability of the closed-loop system whose open-loop transfer function is given by $G(s)H(s) = \frac{(6s+1)}{s(s+1)(3s+1)}$.	CO5	14 Marks

UNIT-IV

7		Explain the effect PI and PD controller on time response characteristics of second order system.	CO1	14 Marks

(OR)

8		Explain the realization of basic lag compensator using a Bode plot.	CO2	14 Marks

UNIT-V

9	a)	Develop the state space model for linear continuous systems.	CO2	7 Marks
	b)	The state model of linear system is described by	CO4	7 Marks

$$\dot{X}(t) = \begin{bmatrix} 0 & 1 \\ -2 & -3 \end{bmatrix} \begin{bmatrix} x_1(t) \\ x_2(t) \end{bmatrix} + \begin{bmatrix} 0 \\ 1 \end{bmatrix} u(t) \ .$$

Find the solution of the state equation for the unit step input when, $X(0) = \begin{bmatrix} 1 \\ 1 \end{bmatrix}$.

(OR)

10		Given the system	CO4	14 Marks

$\dot{X} = AX + BU,$

$Y = CX + DU$

Where $A = \begin{bmatrix} -1 & 1 & 0 \\ 0 & -1 & 1 \\ 0 & 0 & -1 \end{bmatrix}$, $B = \begin{bmatrix} 0 \\ 1 \\ 1 \end{bmatrix}$, $C = \begin{bmatrix} 1 & 0 & 1 \end{bmatrix}$

Determine the state controllability and observability of the system.

SYNCHRONOUS MACHINES
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What are the causes of harmonics in the emf waveform of synchronous generators? Also discuss the various ways to minimize them.	CO1	8 Marks
	b)	A 3-phase alternator has 2 slots per pole per phase and coil span of 5 slot pitches. The flux density wave of alternator consists of a fundamental and a 25% third harmonic. Calculate the percentage increase in the phase voltage due to harmonic.	CO4	6 Marks
		(OR)		
2	a)	Write the differences between integral-slot and fractional-slot winding.	CO1	6 Marks
	b)	Develop the phasor diagram for a cylindrical-rotor alternator in case the alternator operates at an internal power factor of : i) ZPF lagging. ii) ZPF leading. iii) UPF. Discuss the nature of armature reaction **mmf** in each case.	CO2	8 Marks

UNIT-II

3	a)	Explain the method of determining voltage regulation of an alternator by emf method.	CO1	6 Marks
	b)	A 100 kVA, 3000V, 50Hz, 3-phase, star connected alternator has effective armature resistance of 0.2Ω per phase. The field current of 50 A produces short-circuit current of 200A and an open-circuit **emf** of 1040 V (line-to-line). Calculate the full-load voltage regulation at 0.8 p.f. lagging and also 0.8 p.f. leading. Draw phasor diagrams.	CO4	8 Marks
		(OR)		
4	a)	Derive the equation for power developed in a salient pole synchronous generator.	CO2	8 Marks
	b)	Discuss about the reluctance power developed in a salient pole synchronous generator.	CO1	6 Marks

UNIT-III

5	a)	With the help of phasor diagram, explain the effect of excitation control of an alternator operating in parallel with another alternator supplying a common load.	CO1	6 Marks
	b)	Two star-connected synchronous generators connected in parallel have an **emf** of 1200V per phase share a common star-connected load of impedance Z_L = (2+j1.0)Ω/phase. The synchronous impedance of the machines are Z_{s1} = (0.1+j2)Ω/phase and Z_{s2} = (0.2+j3)Ω/phase respectively. Determine the no-load circulating current when two machines internal emfs have a phase difference of 5^0 electrical.	CO4	8 Marks
		(OR)		
6	a)	How does the parallel operation of two alternators differ from the condition when an alternator run with an infinite bus bar?	CO2	6 Marks
	b)	How is the power sharing affected in parallel operation when; i) excitation of one of them is changed. ii) prime mover input to one of them is changed.	CO2	8 Marks

UNIT-IV

7	a)	Explain why a synchronous motor is not self-starting. Describe any one method of starting a synchronous motor.	CO1	8 Marks
	b)	A 3-phase 11 kV star-connected synchronous motor takes 50A input current. The effective resistance and synchronous reactance per phase are 1Ω and 30Ω respectively. Calculate the induced **emf** for a power factor of i) 0.8 lagging. ii) 0.8 leading. iii) Power supplied to the motor.	CO4	6 Marks

(OR)

8	a)	Explain the effect of varying excitation on armature current and power factor in a synchronous motor. Draw V-curves and state their significance.	CO1	8 Marks
	b)	A 3-phase synchronous motor of 8000W at 1100V has synchronous reactance of 8Ω per phase. Find the minimum current and the corresponding induced **emf** for full-load condition. The efficiency of the machine is 80%. Neglect armature resistance.	CO4	6 Marks

UNIT-V

9		Mention the problems usually encountered when a DC series motor is operated on AC. What design modifications are to be incorporated for its satisfactory operation on AC?	CO1	14 Marks

(OR)

10	a)	List out the disadvantages of single phase induction motor when compared with a 3-phase induction motor.	CO2	6 Marks
	b)	Describe, with reasons, the type of motor that would be used for the following applications: i) Washing machine. ii) Refrigerators. iii) Ceiling fans. iv) Food mixer.	CO6	8 Marks

DESIGN OF MACHINE ELEMENTS-II
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		A journal bearing is proposed for a steam engine. The load on the journal is 3 kN, diameter 50 mm, length 75 mm, speed 1600 r.p.m., diametral clearance 0.001 mm, ambient temperature 15.5°C. Oil SAE 10 is used and the film temperature is 60°C. Determine the heat generated and heat dissipated. Take absolute viscosity of SAE10 at 60°C = 0.014 kg/m-s.	CO2	14 Marks

(OR)

2		A 80 mm long journal bearing supports a load of 2800 N on a 50 mm diameter shaft. The bearing has a radial clearance of 0.05 mm and the viscosity of the oil is 0.021 kg/m-s at the operating temperature. If the bearing is capable of dissipating 80 J/s, determine the maximum safe speed.	CO3	14 Marks

UNIT-II

3		The rolling contact ball bearing are to be selected to support the Overhung countershaft. The shaft speed is 720 r.p.m. The bearings are to have 99% reliability corresponding to a life of 24000 hours. The bearing is subjected to an equivalent radial load of 1 kN. Consider life adjustment factors for operating condition and material as 0.9 and 0.85 respectively. Find the basic dynamic load rating of the bearing from manufacturer's catalogue, specified at 90% reliability.	CO4	14 Marks

(OR)

4	a)	What are rolling contact bearings? Discuss their advantages over sliding contact bearings.	CO1	7 Marks
	b)	Write short note on classifications and different types of antifriction bearings.	CO1	7 Marks

UNIT-III

5		A cast steel spur gear pinion having 21 teeth and rotating at 1500 r.p.m is required to transmit 9kW to a high grade to run at 500 r.p.m. The teeth are 14.5º Involute form. Design the gears completely.	CO3	14 Marks

(OR)

6		Write the design procedure for Helical gears.	CO1	14 Marks

UNIT-IV

7	a)	Derive shear stress equation for helical spring.	CO5	6 Marks
	b)	Design a leaf spring for the following specifications for a truck maximum load on spring = 120kN, no. of springs = 4, material of spring = Cr Va Steel, span of spring =1200 mm, width of central band = 200 mm, permissible deflection= 120mm.	CO3	8 Marks

(OR)

8	a)	Explain about concentric helical springs under compression due to axial load with neat sketch.	CO1	7 Marks
	b)	A laminated spring having 6 graduated leaves is simply supported at ends at a distance of 0.9 m. it is made of steel having allowable bending stress of 360 MPa. The width and thickness of leaves are 90 mm and 6 mm. find the safe load that can be carried by this spring at the middle and the deflection under that load.	CO3	7 Marks

UNIT-V

9		A belt is running over a pulley of diameter 120 cm at 200 r.p.m. The angle of contact is 1650 and co-efficient of friction between the belt and pulley is 0.3. If the maximum tension in the belt is 3000 N. find the power transmitted by the belt.	CO6	14 Marks

(OR)

10	a)	Explain the various stresses induced in the connecting rod.	CO1	7 Marks
	b)	The cylinder of four stroke diesel engine has following specifications: Break power = 5kW; Speed = 600 r.p.m; Indicated mean effective pressure = 0.5 MPa; Make suitable assumptions and calculate: i) Bore and length of cylinder. ii) Thickness of cylinder liner. iii) Thickness of cylinder head. iv) Size, number and pitch of studs.	CO3	7 Marks

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1		State and explain Henry Fayol's principles of management.	CO1	14 Marks
		(OR)		
2		What do you understand by corporate social responsibility? Discuss the social responsibilities of a management.	CO1	14 Marks
		UNIT-II		
3		What are the various types of plant layout? Explain them clearly bringing out comparative advantages and disadvantages.	CO1	14 Marks
		(OR)		
4	a)	A total of 50 components whose mean time to failure is known to be 200 hours are placed on test continuously. Estimate the number of components which would fail in the time intervals 0 to 50, 50 to 100, 100 to 150 and 150 to 200.	CO2	4 Marks
	b)	A transport bus uses a total of six tyres one on each side of front end and two on each side of rear end. The tyres used at the rear end are identical and each has a failure rate of 0.5×10^{-5} failures per km. Similarly, the tyres at the front end are identical with a failure rate of 0.6×10^{-5} failures per km. Determine the probability that the buses will not fail due to tyre failure for 20000 km. Assume that at the rear end one tyre on each side is sufficient to do the job.	CO5	10 Marks
		UNIT-III		
5		"Productivity is a means for increasing the welfare of the nation". Justify the statement.	CO1	14 Marks
		(OR)		
6		List the procedural steps involved in time study and give the importance of allowances in time study.	CO1	14 Marks
		UNIT-IV		
7		Define materials management. Explain the functions involved in stores management.	CO1	14 Marks
		(OR)		
8		A Company requires 5000 units per year which costs Rs. 10 per unit. Ordering cost is estimated to be Rs. 100 per order, carrying costs are 15 % per annum of average inventory. The supplier is prepared to give 2% discount in price if the company purchases 10,000 units or more but less than 20,000 lot size. A further discount of 1 % in price of original value is available on the orders of 20,000 or more units. Find economical lot size and the minimum total cost.	CO4	14 Marks
		UNIT-V		
9	a)	Discuss the importance of Investigation and analysis of Industrial accidents.	CO6	7 Marks
	b)	Discuss the importance of Indian Factories Act and its effect in the industry.	CO6	7 Marks

(OR)

10 Resistors for electronic circuits are manufactured on a high-speed automated machine. The machine is setup to produce a large run of resistors of 1000Ω each. To set up the machine and to create a control chart to be used throughout the run, 10 samples were taken with four resistors in each sample. The complete list of samples and their measured values are as follows: CO5 14 Marks

Sample Number	**Readings (in ohms)**			
1	1010	991	985	986
2	995	996	1009	994

METROLOGY AND MEASUREMENTS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What do you mean by line and end standards of length? Write down the characteristics of each of them.	CO1	7 Marks
	b)	Discuss the effect of temperature on the application of limits.	CO1	7 Marks
		(OR)		
2		Define the following. i) Accuracy. ii) Precision. iii) Readability. iv) Reproducibility. v) Calibration. vi) Range.	CO1	14 Marks

UNIT-II

3	a)	With the help of neat sketches, explain how a sine bar is used to determine the taper angle of an inclined surface.	CO1	7 Marks
	b)	Name the various factors affecting the accuracy of the sine bar and state the specification of sine bar.	CO1	7 Marks
		(OR)		
4	a)	Explicate the application of interferometer in measuring flatness of surfaces.	CO5	7 Marks
	b)	Explain interference method of measuring flatness of surface.	CO5	7 Marks

UNIT-III

5		The heights of peaks and valleys of 20 successive points on a surface are 80, 60, 88, 66, 78, 62, 80, 62, 81, 63, 83, 62, 80, 60, 80, 60, 81, 59, 82, 62 microns respectively, measured over a length 20 mm, Determine CLA and RMS values of roughness surface	CO4	14 Marks
		(OR)		
6		What is the principle of an auto collimator? Explain the procedure of performing straightness test using auto collimator.	CO5	14 Marks

UNIT-IV

7		Compare a three-wire and two-wire method of measuring the effective diameter of a screw.	CO2	14 Marks
		(OR)		
8		A spur gear of 4 mm module has 45 teeth. Calculate the following proportions i) Pitch circle diameter. ii) Addendum. iii) Dedendum. iv) Tooth working height. Assume the clearance to be 0.25 module. Compute the base pitch of the gear if the spur gear has a pressure angle of 20º.	CO3	14 Marks

UNIT-V

9	a)	Name the various types of strain gauges for different applications.	CO1	7 Marks
	b)	Define Strain Rosette. How it is used for strain measurement.	CO1	7 Marks
		(OR)		
10	a)	Explain working principle of electric resistant sensor.	CO1	7 Marks
	b)	Explain working principle of dead weight pressure gauge with a neat sketch.	CO1	7 Marks

CODE No.: 16BT50304 SVEC-16

REFRIGERATION AND AIR CONDITIONING
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the simple air cooling system with a schematic diagram and show the cycle on T-S diagram.	CO1	7 Marks
	b)	A simple air cooling system is used for an aero plane having a load of 10 tonnes. The atmospheric Pressure and temperature are 0.9 bar and 10^0C respectively. The pressure increases to 1.013 bar due to ramming. The temperature of the air is reduced by 50^0C in heat exchanger. The pressure in the cabin is 1.01 bars and temperature of the air leaving the cabin is 25^0C. Determine: i) Power required to take the load of cooling cabin. ii) COP.	CO2	7 Marks

(OR)

2	a)	Define the following terms of refrigeration. i) Refrigerating effect. ii) Ton of refrigeration. iii) COP. iv) Refrigerator and heat pump.	CO1	8 Marks
	b)	Distinguish open and dense air refrigeration systems.	CO1	6 Marks

UNIT-II

3	a)	Illustrate the refrigeration cycle and T-S diagram. When the refrigerant is dry and saturated at the end of the compression and find an expression for the C.O.P.	CO3	8 Marks
	b)	What are the desirable properties of refrigerants and how do you select?	CO4	6 Marks

(OR)

4		Find the theoretical COP for a CO2 machine working between the temperature ranges of 25^oC and -5^oC. The dryness fraction of CO_2 gas during the suction stroke is 0.6. Following properties of CO_2 are given below.	CO6	14 Marks

Temp. (^{0}C)	Liquid		Vapour		Latent heat KJ/Kg
	Enthalpy kJ/kg	**Entropy KJ/kg k**	**Enthalpy kJ/kg**	**Entropy KJ/kg k**	
25	164.77	0.5978	282.23	0.9918	117.46
-5	72.57	0.2862	321.33	1.2146	248.76

UNIT-III

5	a)	Explain the working principle of steam jet refrigeration system.	CO1	6 Marks
	b)	Explain the working principle of thermoelectric refrigerator.	CO1	8 Marks

(OR)

6		In an aqua-ammonia VAR system of 10TR capacity, the vapour leaving the generator is 100% pure NH_3 saturated at 40^0c. The evaporator, absorber, condenser and generator temperatures are -20^0C, 30^0C, 40^0C and 70^0C respectively. At absorber exit, the concentration of NH_3 is x=0.38 and h=22 kJ/kg. At generator exit is x = 0.1 and h=69.5 kJ/kg. i) Determine mass flow rate of NH_3 in the evaporator. ii) Mass flow rate of weak and strong solution in the absorber. iii) Determine the heat rejection in absorber and condenser. iv) Heat added in generator. v) COP.	CO4	14 Marks

UNIT-IV

7	a)	Define the following. i) Specific humidity. ii) Relative humidity. iii) Sensible heating. iv) Sensible cooling. v) Humidification and dehumidification.	CO1	10 Marks
	b)	List the differences between summer and winter air conditioning systems.	CO1	4 Marks

(OR)

8		A class room of 60 seating capacity is air-conditioned. The outdoor conditions are 32^0C DBT and 22^0C WBT and the required comfort conditions are 22^0C and 55% RH. The quantity of outdoor air supplied is 0.5m^3/min/student. The comfort conditions are achieved first by chemical dehumidifying the air and then cooling by cooling coil. Find: i) DBT of air leaving the dehumidifier. ii) Capacity of dehumidifier.	CO5	14 Marks

UNIT-V

9		Explain the following. i) Effective temperature. ii) Comfort chart. iii) Requirements of human comfort.	CO1	14 Marks

(OR)

10	a)	Describe the following types of air filters for cleaning air with simple sketches. i) Viscous filter. ii) Wet filter.	CO1	6 Marks
	b)	What are the different methods of humidifying the air? Explain the working of any two types of humidifiers.	CO1	8 Marks

THERMAL ENGINEERING-II

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the modified Rankine cycle with P-V and T-S diagrams.	CO1	7 Marks
	b)	A basic steam power plant works on ideal Rankine cycle between 35 bar and 0.04 bar. The initial condition of steam being 0.85 dry and flow rate 15 kg/s determine: i) Work required for pumping ii) Work done by the turbine and iii) Cycle efficiency.	CO2	7 Marks
		(OR)		
2	a)	Explain the working of Locomotive boiler with a neat sketch.	CO1	7 Marks
	b)	A simple Rankine cycle works between pressure 30 bar and 0.45 bar, the initial conditions of steam being dry saturated. Calculate the cycle efficiency, work ratio and specific steam consumption rate.	CO1	7 Marks

UNIT-II

3		A steam boiler evaporates 10 kg of water per kg of coal fired from feed water at 41°C when working at 9 bar pressure. Determine the equivalent evaporation from and at 100°C per kg of coal fired if steam produced is i) 0.95 dry ii) Dry and saturated, and iii) Super heated at 250°C.	CO1	14 Marks
		(OR)		
4	a)	Discuss in detail boiler draught and classification of boiler draught.	CO2	7 Marks
	b)	A boiler plant supplies 5600 kg of steam per hour at 9 bar 0.95 dry from feed water at 42°C when used 700 kg of coal per hour having calorific value of 32000 kJ/kg. Determine; i) The thermal efficiency of the boiler ii) The equivalent evaporation iii) The percentage saving in coal if feed water temperature is raised to 100°C by using economizer. Assume 5% increase in boiler efficiency, other conditions being same.	CO4	7 Marks

UNIT-III

5		Steam at pressure of 10 bar and 0.9 dry discharges through a nozzle having throat area of 450 mm^2. If the back pressure is 1 bar, find: i) Final velocity of the steam and ii) Cross sectional area of the nozzle at exit for maximum discharge.	CO3	14 Marks
		(OR)		
6		Explain the term governing of steam turbines. Describe any one method with a neat sketch.	CO1	14 Marks

UNIT-IV

7	a)	Write a short note on Degree of Reaction.	CO1	6 Marks
	b)	Explain with the help of a neat sketch a single Reaction turbine. Also explain the pressure and velocity variations along the axial direction.	CO5	8 Marks

(OR)

8	a)	Explain the working principle of counter flow jet condenser with neat sketch.	CO1	7 Marks
	b)	The vacuum efficiency of condenser is 96%, the temperature of condenser is 40°C.if the barometer reads 752 mm of Hg, find the vacuum gauge reading of the condenser.	CO5	7 Marks

UNIT-V

9	a)	Where is rocket propulsion used? What are the kinds of rocket propellants?	CO2	7 Marks
	b)	Derive an equation for thermal efficiency of a simple gas turbine cycle in terms of pressure ratio and specific heat ratio.	CO2	7 Marks

(OR)

10	a)	Write the deviations in actual gas turbine as compared with air standard cycle.	CO1	7 Marks
	b)	In a gas turbine plant working on Brayton cycle, the air at inlet is 27°C, 0.1 MPa. The pressure ratio is 6.25 and the maximum temperature is 800°C. The turbine and compressor efficiencies are each 80%. Find compressor work, turbine work, heat supplied, cycle efficiency and turbine exhaust temperature. Mass of air may be considered as 1 kg. Draw T-S diagram.	CO2	7 Marks

DIGITAL COMMUNICATIONS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the principle of operation of DPCM Transmitter and Receiver with the block diagrams. Also outline the advantage of DPCM over PCM.	CO1	8 Marks
	b)	Compare different types of Quantization Techniques.	CO2	6 Marks
		(OR)		
2	a)	Compare and Contrast Digital and Analog Communication systems.	CO2	7 Marks
	b)	What is Quantization error? Explain in detail the effect of Quantization error over the recovered message signal.	CO1	7 Marks

UNIT-II

3	a)	The signal m(t) is band limited to 4KHz, is sampled at twice the Nyquist rate and the samples are transmitted by PCM. An Output SNR of 47dB required. Find the N.	CO3	6 Marks
	b)	Sketch the block diagram of Delta Modulation System and explain the function of each block.	CO1	8 Marks
		(OR)		
4		Estimate the Output Signal To Noise Ratio in DM System.	CO2	14 Marks

UNIT-III

5	a)	Implement a Digital System for generation and reception of DPSK signals with a neat block diagram.	CO6	8 Marks
	b)	Distinguish between ASK, FSK and PSK systems.	CO2	6 Marks
		(OR)		
6	a)	Implement a Matched filter and derive the Probability of error of a Matched Filter.	CO6	7 Marks
	b)	Sketch the power spectra of BPSK and BFSK and explain briefly.	CO1	7 Marks

UNIT-IV

7	a)	Illustrate how Error free communication over Noisy channel can be achieved	CO5	5 Marks
	b)	Implement a source Coding Encoder to more efficiently represent the information by using Huffman coding.	CO6	9 Marks
		(OR)		
8	a)	An event has six possible outcomes with the probabilities 0.5, 0.25, 0.125, 1/16, 1/32, 1/32. Find the entropy of the system. Also find the rate of information if there are 16 outcomes per second.	CO4	8 Marks
	b)	Define the following terms. i) Entropy. ii) Mutual information. iii) Channel Capacity. iv) Rate of information.	CO4	6 Marks

UNIT-V

9	a)	Illustrate how Interleaving can to use for detection and correction of Burst Errors.	CO4	5 Marks
	b)	Find (7, 4) cyclic codeword generated in Systematic and Non systematic form when message data D(1011), D(0101) is applied to Cyclic Encoder with generator polynomial of a is $g(x)=1+X+X^3$.	CO3	9 Marks
		(OR)		
10	a)	Illustrate the merits of cyclic codes.	CO3	6 Marks
	b)	The generator polynomial of a (7, 4) cyclic Encoder is $g(x)=1+X+X^2$. Find the all 8 possible code words of this code.	CO4	8 Marks

MICROPROCESSORS AND MICROCONTROLLERS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Write an ALP for 8086 to find the largest and smallest byte from an array of *N* bytes.	CO4	7 Marks
	b)	Discuss architecture of Intel 8086.	CO1	7 Marks
		(OR)		
2	a)	Compose an ALP to perform String Reversal for Intel 8086.	CO4	7 Marks
	b)	Recall Intel 8086 flag register and outline the function of each bit in it.	CO1	7 Marks

UNIT-II

3	a)	Demonstrate how an 8086 is made capable of handling 64 hardware interrupts.	CO5	7 Marks
	b)	Explain the handshake sequence in RS232C standard between DTE and DCE.	CO2	7 Marks
		(OR)		
4	a)	Bring out the relation between Machine Cycle and Instruction Cycle. Sketch timing diagram for OpCode Fetch.	CO2	7 Marks
	b)	Apply interfacing concept to explain about the sequence in which Initialization control words are needed to interface interrupt handling capability in 8259A.	CO5	7 Marks

UNIT-III

5	a)	Develop an ALP to rotate a stepper motor of 1.8 degrees step size by 180 degrees in clock wise direction rotations. List the applications of it.	CO6	10 Marks
	b)	Compare synchronous to asynchronous modes of serial data transmission.	CO2	4 Marks
		(OR)		
6	a)	Show the setup to and write an ALP to interface a hexadecimal key pad to Intel 8086. Specify the applications of it.	CO6	10 Marks
	b)	Contrast strobed I/O mode and strobed bidirectional I/O mode.	CO2	4 Marks

UNIT-IV

7	a)	Describe the architecture of 8051 with neat diagram.	CO1	7 Marks
	b)	Interpret the logical instructions of 8051 with examples.	CO2	7 Marks
		(OR)		
8	a)	Explain the PIN detail of an 8051 microcontroller.	CO1	7 Marks
	b)	Illustrate the branching instructions available in 8051in detail.	CO2	7 Marks

UNIT-V

9	a)	Design flowchart and develop an ALP to initiate with the format of TCON register.	CO3	8 Marks
	b)	Contrast interrupt *vs* polling.	CO2	6 Marks
		(OR)		
10	a)	Formulate the sequence of different serial communication modes in 8051.	CO3	7 Marks
	b)	Compose 8051 ALP to read data from port 1 when negative edge triggered at INT0 and supply data to port 2 by masking upper bits.	CO5	7 Marks

VLSI DESIGN

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain different processes involved in the fabrication of CMOS transistor with necessary cross sectional diagrams.	CO1	8 Marks
	b)	Implement the Boolean function Y' = (AB + C) using pass transistor logic. Develop the layout corresponding to it.	CO4	6 Marks
		(OR)		
2	a)	Compare various forms of pull up arrangements for the inverter with the help of their transfer curves.	CO4	7 Marks
	b)	Tabulate the comparison between MOS and CMOS technologies various performance parameters.	CO2	7 Marks

UNIT-II

3	a)	Explain VLSI Design flow with the help of Flow Chart.	CO1	7 Marks
	b)	Define and give the expressions for any four scaling factors of MOS device parameters.	CO2	7 Marks
		(OR)		
4	a)	Explain the design rules for wires and contacts.	CO1	7 Marks
	b)	What is meant by standard unit of capacitance? Give some area capacitance calculations.	CO2	7 Marks

UNIT-III

5	a)	Implement booth multiplier and explain with an example.	CO3	7 Marks
	b)	Draw the block diagram of Carry skip adder, the basic cell layout and also explain its principle.	CO1	7 Marks
		(OR)		
6	a)	Explain the operation of 8 x 8 array multiplier with neat sketch.	CO1	7 Marks
	b)	Implement and explain the working of a ripple carry adder using transmission gates.	CO3	7 Marks

UNIT-IV

7	a)	Differentiate between structured design and full custom design.	CO2	6 Marks
	b)	Explain the macrocell architecture of a CPLD.	CO1	8 Marks
		(OR)		
8	a)	Compare the performance parameters of Complex Programmable Logic Devices and Field Programmable Gate Arrays.	CO1	8 Marks
	b)	Write short notes on standard cell design and cell libraries.	CO2	6 Marks

UNIT-V

9	a)	Identify the technology and device innovations for novel high speed low power VLSI devices.	CO6	7 Marks
	b)	Discuss about layout design for improved CMOS testability.	CO5	7 Marks
		(OR)		
10	a)	Briefly outline the need of low power VLSI chips in developing real electronics.	CO6	7 Marks
	b)	Explain the various factors that influence the power dissipation in CMOS VLSI circuits.	CO5	7 Marks

COMPUTER NETWORKS

[Electronics and Communication Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Sketch the Internet architecture.	CO1	7 Marks
	b)	Compare 4-Layer TCP/IP Model and 7-Layer OSI Model.	CO2	7 Marks
		(OR)		
2	a)	Summarize the features of wireless LANs: 802.11.	CO2	7 Marks
	b)	Explain the components of Wide Area Network with a neat diagram.	CO1	7 Marks

UNIT-II

3	a)	What is the remainder obtained by dividing $\mathbf{x^7+x^5+1}$ by the generator Polynomial $\mathbf{X^3+1}$?	CO4	7 Marks
	b)	Write the services provided by link layer.	CO1	7 Marks
		(OR)		
4	a)	Design a CRC process unit for the following two standard generators of computer networking: i) CRC-12. ii) CRC-16.	CO3	7 Marks
	b)	Assume that 101011010101111 is a block data (D) to be transmitted using the CRC error-checking method. Suppose that the common value of generator, G, is 111010. Using modulo-2 arithmetic. Produce the final value that the transmitter sends on the link (D, CRC).	CO4	7 Marks

UNIT-III

5	a)	List and explain the properties of routing algorithms.	CO1	7 Marks
	b)	Compare IPV4 and IPV6 protocols.	CO2	7 Marks
		(OR)		
6	a)	Explain Classful IP addressing scheme.	CO1	7 Marks
	b)	Sketch the IPv6 packet format.	CO5	7 Marks

UNIT-IV

7	a)	Explain why the client issues an active open for the control connection and a passive open for the data connection.	CO1	7 Marks
	b)	Explain the Features of Transport Layer.	CO1	7 Marks
		(OR)		
8		Sketch the State Transition Diagram of TCP Connection Establishment, Data Transfer and Termination and explain in detail.	CO1	14 Marks

UNIT-V

9		Summarize the architecture and services of electronic mail with suitable scenarios.	CO2	14 Marks
		(OR)		
10	a)	What are the services provided by a User Agent? Explain in detail.	CO1	7 Marks
	b)	Define Multi Purpose Internet Mail Extension and draw Multi Purpose Internet Mail Extension (MIME) header.	CO1	7 Marks

OBJECT ORIENTED PROGRAMMING
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What are all the characteristic features of Java Programming language?	CO1	6 Marks
	b)	Compare and contrast visibility controls and also compare with each of them.	CO2	8 Marks
		(OR)		
2	a)	"Java is platform independent". Justify.	CO4	6 Marks
	b)	Compare and contrast Java with C. Explain Constructors with examples.	CO2	8 Marks

UNIT-II

3	a)	Explain the importance of inheritance with the help of an example.	CO1	5 Marks
	b)	What are packages? What are the benefits of creating programs using packaging?	CO1	5 Marks
	c)	How to create an interface? Distinguish between abstract classes and interfaces.	CO1, CO2	4 Marks
		(OR)		
4	a)	How is multiple inheritance achieved in Java?	CO2	3 Marks
	b)	Develop a Library interface which has drawbook(), returnbook() (with fine), checkstatus() and reservebook() methods. All the methods tagged with public.	CO6	11 Marks

UNIT-III

5	a)	Differentiate between exceptions , runtime errors and compile time errors.	CO2	4 Marks
	b)	Differentiate between Thread and Process in Java. How to implement Thread in Java?	CO2	5 Marks
	c)	Develop a java program to read 20 marks and store them in an array. Define your own exception named wrong mark exception. Throw and catch this type of exception when a mark is (<0 and >100).	CO3	5 Marks
		(OR)		
6	a)	When to use Runnable ***vs*** Thread in Java? Difference between start() and run() method of Thread class.	CO2	4 Marks
	b)	Differentiate throw and throws keyword in Java. Can the same exception been declared to be thrown many times by the method? Eg: public void sample() throws IOException, SQLException.	CO1	5 Marks
	c)	Develop a java program for producer consumer problem to illustrate the concept of multithreading.	CO3	5 Marks

UNIT-IV

7	a)	What is an Event? Explain the role of Event handler in AWT.	CO1	5 Marks
	b)	Design and develop an Applet to receive the value of the parameter message from the html file and display it on the webpage.	CO3	9 Marks
		(OR)		
8	a)	What is Java Collections Framework? List out some benefits of Collections framework.	CO1	6 Marks
	b)	Create an anonymous inner class for handling mouse entered event into an Applet.	CO5	8 Marks

UNIT-V

9	a)	List and explain the different situations in which the Action Event is generated. Develop the event handler for the Action Event.	CO2, CO4	10 Marks
	b)	Explain the life cycle methods of a servlet.	CO4	4 Marks
		(OR)		
10	a)	Explain the interfaces and classes in javax.servlet package.	CO5	8 Marks
	b)	Write a servlet which displays current system date and time	CO5	6 Marks

COMPILER DESIGN

[Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Give the reasons for separating lexical analysis from syntax analysis. Write Specification of LEX program.	CO5	6 Marks
	b)	Explain with one example how identifiers and keywords are recognized by lexical analyzer.	CO1	8 Marks
		(OR)		
2	a)	Write about machine independent phases of a Compiler Structure.	CO1	7 Marks
	b)	Describe about Interpreters.	CO1	7 Marks
		UNIT-II		
3	a)	Write Recursive Descent Parser for the Grammar S⇒cAd, A→ab/a.	CO3	7 Marks
	b)	Construct Predictive parsing table for the Grammar S→a/#/(T),T→T,S/S.	CO3	7 Marks
		(OR)		
4		Consider the the following grammer. i) S→AS/b. ii) A→SA/a. Construct SLR Parsing Table. Show the actions of parser for the string "abab".	CO3	14 Marks
		UNIT-III		
5	a)	Write short notes on: i) type conversion. ii) type coercion.	CO1	6 Marks
	b)	Define Structural Equivalence of Type Expressions. Write a function which will test the structural equivalence of two type expressions.	CO1	8 Marks
		(OR)		
6		Discuss briefly about type conversions. What is Coercions? The grammar for expressions is given below. Write the semantics rules for Coercions from integer to real. E→num E→num.num E→id E→E1 op E2	CO4	14 Marks
		UNIT-IV		
7	a)	What are the advantages and disadvantages of heap storage allocation strategy?	CO1	7 Marks
	b)	Discuss briefly about overloading of functions and operators with suitable example.	CO1	7 Marks
		(OR)		
8	a)	Explain the parameter passing mechanisms	CO1	7 Marks
	b)	Explain about Activation Record. With example, explain how runtime memory is allocated for objects.	CO6	7 Marks

UNIT-V

9		Explain briefly about loop optimization techniques.	CO2	14 Marks
		(OR)		
10	a)	Write short notes on: i) Redundant sub expression elimination. ii) Induction variable elements.	CO1	7 Marks
	b)	Explain data flow diagram with an example	CO1	7 Marks

CODE No.: 16BT51502 SVEC-16

SYSTEMS SOFTWARE

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Compare and contrast differences between UNIX command and windows programs.	CO2	7 Marks
	b)	Describe the role played by kernel and shell in UNIX architecture.	CO1	7 Marks
		(OR)		
2	a)	Write the significance of Universal Mailer.	CO1	6 Marks
	b)	Write about the following UNIX commands with options. i) cat. ii) cp. iii) rm. iv) wc.	CO1	8 Marks

UNIT-II

3		Describe the overview of UNIX File system.	CO1	14 Marks
		(OR)		
4	a)	Write a program that changes its root to a particular directory, and investigate the directory tree accessible to that program.	CO4	7 Marks
	b)	Describe the UNIX File system administration.	CO1	7 Marks

UNIT-III

5	a)	Describe process states and transitions with neat diagram.	CO1	7 Marks
	b)	Discuss about interrupts and exceptions.	CO1	7 Marks
		(OR)		
6	a)	Write an algorithm for invocation of system call.	CO4	7 Marks
	b)	Explain the changing the size of region with an example.	CO1	7 Marks

UNIT-IV

7	a)	Compose a C Program for catching death of child signals.	CO3	7 Marks
	b)	Write an algorithm for handling signals in UNIX.	CO4	7 Marks
		(OR)		
8	a)	Design an algorithm that translates virtual addresses to physical addresses.	CO2	7 Marks
	b)	Write a C program to explain **brk** system call with an example.	CO4	7 Marks

UNIT-V

9	a)	Discuss about Domain Name System.	CO1	7 Marks
	b)	Explain the features of Transmission Control Protocol/Internet Protocol.	CO1	7 Marks
		(OR)		
10	a)	Discuss about file system consistency check (fsck) in UNIX.	CO1	7 Marks
	b)	Write a short note on Partitions in UNIX.	CO5	7 Marks

CODE No.: 16BT60402 SVEC-16

DIGITAL SIGNAL PROCESSING

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Determine the z-transform the signal $x(n) = (-1)^n \cos\left(\frac{n\pi}{3}\right)u(n)$.	CO2	7 Marks
	b)	Find the DTFT of the sequence $x(n) = \cos(n\pi/3u(n))$.	CO2	7 Marks
		(OR)		
2	a)	Explain the significance of frequency domain representation of discrete time signals and system.	CO4	7 Marks
	b)	Determine the response of discrete time system given by difference $Y(n) = -0.8y(n-1) + x(n)$. When the input is step and $y(-1) = 0$.	CO2	7 Marks

UNIT-II

3	a)	Contrast the transforms DTFT, DFS and DFT.	CO4	7 Marks
	b)	Develop the inverse FFT algorithm with neat sketch for N=8.	CO3	7 Marks
		(OR)		
4	a)	What is DFT? Interpret role of DFT over the DTFT.	CO4	7 Marks
	b)	Develop the DIT FFT algorithm with neat sketch for N=8.	CO3	7 Marks

UNIT-III

5	a)	Compare Direct form-I and Direct Form –II realizations of system described by the difference equation, $y(n) - 4y(n-1) + 4y(n-2) = x(n) - x(n-1) + x(n-3)$.	CO2	7 Marks
	b)	Interpret the advantages and disadvantage bilinear transformation.	CO4	7 Marks
		(OR)		
6	a)	Design a digital Butterworth filter using bilinear transformation. The specifications of the desired LP filter is; $0.9 \le \lvert H(\omega)\rvert \le 1; \quad 0 \le \omega \le \frac{\pi}{2}$ $\lvert H(\omega)\rvert \le 0.2; \quad 3\frac{\pi}{2} \le \omega \le \pi/2$	CO3	7 Marks
	b)	Obtain the Direct form I and Direct form II realizations of the difference equation $y(n) = b_0x(n) + b_1x(n-1) + b_2x(n-2) - a_1y(n-1) - a_2y(n-2)$.	CO2	7 Marks

UNIT-IV

7	a)	Synthesize the characteristics of Rectangular, Bartlet, Blackman window with neat sketch.	CO4	7 Marks
	b)	Design a linear phase FIR lowpass filter with $W_c = 0.5\pi$rad/sample by taking 11 samples of ideal frequency response using frequency sampling method.	CO5	7 Marks
		(OR)		
8	a)	Discuss the fir filter design by using window method.	CO1	7 Marks
	b)	Design a linear phase FIR bandpass filter to pass frequencies in the range 0.4π to 0.6π rad/sample by taking 7 samples of Hanning window.	CO5	7 Marks

UNIT-V

9	a)	Why the P-DSPs have multiple address and data buses for internal memory and peripherals but have only a single address and data bus for external memory and peripherals? Give the reasons.	CO2	7 Marks
	b)	List the relative merits and demerits of RISC and CISC processors.	CO1	7 Marks
		(OR)		
10	a)	Distinguish synchronous and asynchronous mode of operation of serial ports.	CO1	7 Marks
	b)	What is meant by bit reversal address mode? Write the applications for which this addressing mode is preferred.	CO2	7 Marks

WIRELESS NETWORKS
[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Discuss about ALOHA-Based Wireless Random Access Techniques.	CO1	8 Marks
	b)	Implement CSMA/CD in MAC Layer.	CO5	6 Marks
		(OR)		
2	a)	Identify and solve the complications caused by Wireless Channel.	CO3	7 Marks
	b)	Write short notes on data Integration in Voice-Oriented Networks.	CO1	7 Marks
		UNIT-II		
3	a)	How to increase the capacity of an analog cellular system without increasing the number of antenna sites?	CO2	7 Marks
	b)	Identify the uses of Reuse partitioning.	CO1	7 Marks
		(OR)		
4		Assume that you have six-sector cells in a hexagonal geometry. Draw the hexagonal grid corresponding to this case. Compute S_r for resuse factors of 7, 4 and 3. Find the results.	CO3	14 Marks
		UNIT-III		
5	a)	What is the 802.11 MAC frame that has the type frame control code of 001000?	CO1	10 Marks
	b)	How transmission techniques of WLAN standards are useful for current data networks?	CO6	4 Marks
		(OR)		
6	a)	How to handle MAC Management sub layer?	CO1	10 Marks
	b)	Define Probe and beacon.	CO1	4 Marks
		UNIT-IV		
7	a)	Examine the concept of Pilot processing of IS-95 CDMA forward channel.	CO2	10 Marks
	b)	Solve the network communications Using seamless handoff.	CO4	4 Marks
		(OR)		
8	a)	Explain the concept of Access channel processing in IS-95.	CO1	10 Marks
	b)	List the needs and uses of CDMA.	CO1	4 Marks
		UNIT-V		
9	a)	What is the Relation between logical and transport channel is HIPERLAN-2?	CO1	10 Marks
	b)	Analyze the Security mechanisms in HIPERLAN-2.	CO2	4 Marks
		(OR)		
10	a)	List the Functional requirements of WPAN.	CO1	7 Marks
	b)	What is Protocol stack for Bluetooth?	CO1	7 Marks

ARTIFICIAL INTELLIGENCE

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Discuss the risks and benefits of artificial intelligence.	6 Marks	L2	CO1	PO1
	b)	Explain about the history of Artificial Intelligence.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Explain the foundations and characteristics of Artificial Intelligence.	6 Marks	L2	CO1	PO2
	b)	Differentiate between goal based agents and utility based agents with example.	6 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Describe uninformed search strategies with examples.	6 Marks	L2	CO2	PO2
	b)	Solve the following problem. The eight queen's problem is the problem of placing eight queens on an 8 x 8 chessboard such that none of them attack one another (no two are in the same row, column, or diagonal).	6 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Analyze and apply heuristic functions with real world problems.	6 Marks	L3	CO2	PO2
	b)	Explain about A* Search algorithm.	6 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	Explain local beam search with an example.	6 Marks	L2	CO2	PO1
	b)	Explain about the simulated annealing.	6 Marks	L1	CO2	PO1
		(OR)				
6.	a)	Discuss the importance and benefits of using evolutionary algorithms for optimization problems.	6 Marks	L2	CO2	PO2
	b)	Explain about the Minimax algorithm.	6 Marks	L2	CO2	PO2
		UNIT-IV				
7.	a)	Examine the importance of using Hidden Markov models for localization problem in vacuum world considering noise in sensors and random movement of robot.	6 Marks	L2	CO3	PO2
	b)	Explain in detail about rule based methods for uncertain reasoning.	6 Marks	L2	CO3	PO2
		(OR)				
8.	a)	Explain about Dynamic Bayesian networks.	6 Marks	L2	CO3	PO1
	b)	We have a bag of three biased coins a, b, and c with probabilities of coming up heads of 30%, 60%, and 75%, respectively. One coin is drawn randomly from the bag (with equal likelihood of drawing each of the three coins), and then the coin is flipped three times to generate the outcomes X_1, X_2, and X_3. i) Draw the Bayesian network corresponding to this setup and define the necessary CPTs. ii) Calculate which coin was most likely to have been drawn from the bag if the observed flips come out heads twice and tails once.	6 Marks	L3	CO3	PO3

UNIT-V

9.	a)	Discuss the ethics of artificial intelligence and its impact on society.	6 Marks	L2	CO5	PO8
	b)	Explain in detail about robot perception.	6 Marks	L3	CO4	PO6
		(OR)				
10.	a)	Write short note on safety in artificial intelligence.	6 Marks	L2	CO5	PO6
	b)	List some of the prime application domains for robotic technology and explain them.	6 Marks	L2	CO4	PO6

PYTHON FOR DATA SCIENCE

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Write a python program to compute dot product, vector product and inner product using NumPy.	6 Marks	L3	CO1	PO5
	b)	Discuss the steps involved in data science process.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Illustrate the importance of performing arithmetic computations using NumPy with suitable examples.	6 Marks	L2	CO1	PO2
	b)	Write a python program to compute eigenvalues and eigenvectors for a square matrix.	6 Marks	L3	CO1	PO5
		UNIT-II				
3.	a)	Illustrate the importance of using pandas in data exploration process.	6 Marks	L1	CO2	PO2
	b)	Create a Data Frame from List to perform operations like and row selection, addition and deletion.	6 Marks	L3	CO2	PO4
		(OR)				
4.	a)	Describe with suitable examples the data structures used in pandas.	6 Marks	L2	CO2	PO1
	b)	Write a python program to perform different descriptive statistics functions using pandas.	6 Marks	L3	CO2	PO5
		UNIT-III				
5.	a)	Illustrate the importance of using pandas to handle missing data with relevant example.	6 Marks	L2	CO2	PO1
	b)	Write a python code to fill the missing data using fillna function.	6 Marks	L2	CO2	PO1
		(OR)				
6.	a)	Write a python code to split a string with a variable number of whitespace characters (tabs, spaces, and newlines) and get a list of all patterns matching.	6 Marks	L3	CO2	PO4
	b)	Explain vectorized string functions with relevant examples.	6 Marks	L2	CO2	PO1
		UNIT-IV				
7.	a)	Discuss the importance of using seaborn to perform data visualization.	6 Marks	L2	CO3	PO1
	b)	Create horizontal and vertical bar plots using series.	6 Marks	L3	CO3	PO3
		(OR)				
8.	a)	Compare histogram and density plot with example.	6 Marks	L2	CO3	PO2
	b)	Write a python code to create a Line Plot by setting the title, axis labels, annotations on subplots and save to a file.	6 Marks	L3	CO3	PO5
		UNIT-V				
9.	a)	Illustrate the process of converting timestamps to periods and back with suitable example.	6 Marks	L2	CO4	PO2
	b)	Utilize pandas. date_range function to generate a Date time Index with an indicated length.	6 Marks	L3	CO4	PO3

(OR)

10.	a)	Write a python code to generate data ranges and convert to particular time zone.	6 Marks	L3	CO4	PO5
	b)	Examine with example the importance of using moving window functions to automatically exclude missing data.	6 Marks	L4	CO4	PO4

MATERIAL SCIENCE

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	List few properties and applications of Biomaterials.	6 Marks	L1	CO1	PO1
	b)	Classify engineering materials based on their properties.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	List few advantages and disadvantages of smart materials.	6 Marks	L1	CO1	PO1
	b)	Distinguish between thermoplastic and thermosetting resins.	6 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	What are composite materials? List out various properties and applications of composites.	6 Marks	L1	CO2	PO1
	b)	Outline the advantages and limitations of nanocomposites.	6 Marks	L2	CO2	PO3
		(OR)				
4.	a)	Distinguish fiber reinforced and particulate reinforced composites.	6 Marks	L2	CO2	PO1
	b)	What are structural composites? Give their classification with relevant examples.	6 Marks	L1	CO2	PO2
		UNIT-III				
5.	a)	Outline the advanced applications of smart material in different technical fields.	6 Marks	L1	CO3	PO4
	b)	What are Shape Memory Alloys (SMA)? Describe the characteristics of SMA'S.	6 Marks	L2	CO3	PO2
		(OR)				
6.	a)	Summarize Electro-rheostatic materials with their applications	6 Marks	L3	CO3	PO3
	b)	What are self healing materials? List any two of them with specific applications.	6 Marks	L1	CO3	PO4
		UNIT-IV				
7.	a)	Using lithographic technique, explain the fabrication of nanomaterials.	8 Marks	L3	CO4	PO3
	b)	Identify the role of nanomaterials in renewable energy.	4 Marks	L1	CO4	PO1
		(OR)				
8.		What are biomimetic materials? Classify biomimetic materials and write their advantages and applications in the modern technology.	12 Marks	L3	CO4	PO2
		UNIT-V				
9.	a)	Summarize the applications of functionally graded materials in optoelectronics.	6 Marks	L1	CO5	PO2
	b)	List various processing techniques of functionally graded materials. Explain any one processing method with a neat sketch.	6 Marks	L2	CO5	PO3
		(OR)				
10.		Define Functionally graded materials. Illustrate the types and applications of functionally graded materials with suitable sketches.	12 Marks	L2	CO5	PO2

BANKING AND INSURANCE

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

	UNIT-I				
1.	Explain the significance of Banking in Indian Financial System and illustrate the classification of Banks in India.	12 Marks	L3	CO1	PO3
	(OR)				
2.	Analyze, in detail, the role of RBI in sustainable development of the country, with examples.	12 Marks	L3	CO2	PO8
	UNIT-II				
3.	Explain the significance of Banker Customer Relationship and discuss in detail various relationships shared between Banker and Customer.	12 Marks	L3	CO1	PO3
	(OR)				
4.	Discuss various principles of Lending and explain different types of loans offered by Banks.	12 Marks	L3	CO2	PO9
	UNIT-III				
5.	Contrast RTGC ***Vs*** NEFT ***Vs*** IMPS. Discuss in detail.	12 Marks	L3	CO1	PO3
	(OR)				
6.	Compare the features and types of credit cards and debit cards and explain them in detail, with examples.	12 Marks	L3	CO1	PO3
	UNIT-IV				
7.	Contrast Risk *Vs* Uncertainty. Explain in detail with relevant examples.	12 Marks	L3	CO2	PO8
	(OR)				
8.	"Insurance is a means of protection from financial loss. It is a form of risk management, primarily used to hedge against the risk of a contingent or uncertain loss". Examine the significance of the statement and analyze how insurance functions as risk mitigation mechanism. Explain in detail.	12 Marks	L3	CO2	PO9
	UNIT-V				
9.	Explain various types of Insurance and discuss in detail with examples.	12 Marks	L3	CO1	PO3
	(OR)				
10.	Explain in detail, the role and Functions of IRDAI as a regulator for Insurance industry in India.	12 Marks	L3	CO2	PO9

BUSINESS COMMUNICATION AND CAREER SKILLS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Write the characteristics of business communication.	6 Marks	L2	CO1	PO1 PO5
	b)	Describe the interpersonal communication.	6 Marks	L3	CO2	PO2
		(OR)				
2.		Explain the functions of communication.	12 Marks	L3	CO1	PO1 PO5
		UNIT-II				
3.	a)	Write about cross-cultural communication.	6 Marks	L2	CO4	PO10
	b)	"Crisis communication is important for organization". Comment.	6 Marks	L4	CO2	PO5
		(OR)				
4.		Describe the corporate communication strategy with an example.	12 Marks	L3	CO2	PO2
		UNIT-III				
5.	a)	Explain the importance of written business communication.	6 Marks	L3	CO1	PO1 PO5
	b)	Write the strategies for writing the body of a letter.	6 Marks	L2	CO3	PO2 PO5
		(OR)				
6.		Explain the various kinds of business letters.	12 Marks	L3	CO3	PO5
		UNIT-IV				
7.	a)	Write a short note on career building.	6 Marks	L2	CO3	PO5
	b)	Explain about follow-up letters.	6 Marks	L3	CO3	PO10
		(OR)				
8.		Distinguish between traditional, electronic and video resumes.	12 Marks	L4	CO3	PO2
		UNIT-V				
9.	a)	Write the different types of interviewing questions.	6 Marks	L3	CO2	PO2
	b)	Describe the importance of non-verbal aspects in an interview.	6 Marks	L3	CO2	PO10
		(OR)				
10.		Explain online recruitment process with an example.	12 Marks	L4	CO2	PO5

ENTREPRENEURSHIP FOR MICRO, SMALL AND MEDIUM ENTERPRISES

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

	UNIT-I				
1.	Define the concept growth of entrepreneurship in India.	12 Marks	L1	CO1	PO1
	(OR)				
2.	Briefly explain the characteristics of an entrepreneur.	12 Marks	L2	CO1	PO1
	UNIT-II				
3.	Define idea generation and explain its methods.	12 Marks	L1	CO2	PO2
	(OR)				
4.	Briefly explain the steps in setting up a small business enterprise.	12 Marks	L2	CO2	PO2
	UNIT-III				
5.	Define micro and macro units and explain its essentials.	12 Marks	L1	CO3	PO1
	(OR)				
6.	Briefly explain objectives of micro enterprises.	12 Marks	L2	CO3	PO1
	UNIT-IV				
7.	Define the concept SIDBI.	12 Marks	L1	CO4	PO2
	(OR)				
8.	Define the concept MUDRA.	12 Marks	L1	CO4	PO2
	UNIT-V				
9.	Briefly explain the functions of women entrepreneurs.	12 Marks	L2	CO5	PO1
	(OR)				
10.	Define rural entrepreneurship and explain its need.	12 Marks	L1	CO5	PO1

GENDER AND ENVIRONMENT

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		Discuss the relation between gender and environment.	12 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Explain the need for understanding gender and environment relationship.	6 Marks	L2	CO1	PO7
	b)	Define the feminist political ecology.	6 Marks	L2	CO1	PO7
		UNIT-II				
3.		Explain gender ineqality in household chores and conflict between work and family.	12 Marks	L2	CO1	PO6
		(OR)				
4.	a)	Explain the role of women in NGO.	6 Marks	L2	CO1	PO1
	b)	Explain the need of women initiation in environmental decision making.	6 Marks	L2	CO1	PO1
		UNIT-III				
5.		What is the sustainable development? Anaise various dimensions of it.	12 Marks	L4	CO2	PO7
		(OR)				
6.		Write short notes on the following:				
		i) Ecological modernization.	6 Marks	L2	CO2	PO1
		ii) Gender in policy documents.	6 Marks	L2	CO2	PO1
		UNIT-IV				
7.		Elaborate the relation between human rights and gender, and ecological justice.	12 Marks	L4	CO2	PO6
		(OR)				
8.	a)	Explain the strategies to making sense of environmental justice.	6 Marks	L2	CO2	PO1
	b)	Examine the issues addressed in environment movements in recent years.	6 Marks	L2	CO2	PO1
		UNIT-V				
9.		Identify the connections between security and the environment.	12 Marks	L4	CO3	PO7
		(OR)				
10.	a)	Analyse the competing ways of thinking security.	6 Marks	L2	CO3	PO7
	b)	Write short notes on the impacts of natural disasters.	6 Marks	L2	CO3	PO7

III B.Tech I Semester (SVEC-19) Regular Examinations January – 2022

GERMAN LANGUAGE

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	**Ergäzen Sie: choose the correct answers from the options** 1. Das _____ Trevor Nova. (ist, sind, bist, bin) 2. Er _____ in New York. (wohnen, wohnst, wohnt, wohne) 3. Er _____ aus Johannesburg. (komme, kommen, kommst, kommt) 4. Er _____ Englisch, Xhosa, Zulu, Sotho, Tswana, Tsonga, Afrikaans, und Deutsch. (sprechen, spricht, sprichst, spreche) 5. Seine Hobbys _____ Fußball und Stand-up-comedy. (ist, sind, bist, bin). 6. Er _____ bei Viacom Media Networks.(arbeitest, arbeite, arbeiten, arbeitet)	6 Marks	L1	CO1	PO1
	b)	**Lesen Sie den Dialog. Ergänzen Sie. (ein, ein, eine, / das, der, die) Was ist das? Wie heißt** A : Guten Tag. Fahren Sie mich zum Hotel Michel bitte. B : moin. Hotel Michel, okay. Kennen Sie Hamburg? A : Nein. B : Aha. Na, das ist also der Bahnhof. Er ist über 100 Jahre alt. A : Ah ja. B : Und das hier ist die Kunsthalle. Das ist ein großes Museum. A : Interessant. Und wie heißt der See? B : Das? Das hier ist kein See, das ist ein Fluss: Der Fluss heißt Alster. A : ach so. Und was ist das? Ist das eine kirche? B : Nein, das ist das Rathaus. A : Ah ja. B : Aber das ist eine Kirche. Das ist die Michaeliskirche. Wir sagen „der Michel“. Da vorne ist die Winckler Straße. Da ist das Hotel. A : Ah, sehr schön. 1. Ist das ..... Hotel? Ja, ...2..... 3. Ist das ..... Fluss? Ja, ...4..... 5. Ist das ..... Kirche? Ja, ...6.....	6 Marks	L1	CO2	PO1
		(OR)				
2.	a)	**Ergänzen Sie die Fragen. Ordnen Sie dann die Antworten zu.**	9 Marks	L2	CO2	PO1

1.	_____ heißt du?	a.	Ich bin Lehrerin.
2.	_____ Kommt Flavio?	b.	Mein Name ist Tom.
3.	_____ geht es Ihnen?	c.	Bauer, Siegfried Bauer.
4.	_____ sind Sie von Beruf?	d.	Er kommt aus Italien.
5.	_____ ist Frau Hahn von Beruf?	e.	Sie ist Flugbegleiterin.
6.	_____ heißen Sie?	f.	Danke, gut. Und Ihnen?
7.	_____ ist Herr Born von Beruf?	g.	Gut, und dir?
8.	Hallo, Paul, _____ geht's?	h.	Er ist Pilot.
9.	_____ kommt Frau Wang?	i.	Sie kommt aus China.

b) **Geschäfte. Wie heißen die Wörter richtig?Notieren Sie die Wörter mit Artikel.** 3 Marks L1 CO2 PO1

1. IEREGZTEM _____
2. TKRAM_____
3. IEREKC_____

UNIT-II

3. **Schreiben Sie die wochentage und Jahreszeiten in Deutsch.** 12 Marks L2 CO3 PO1

(OR)

4. a) **Ergänzen Sie die mit (bin – bist – ist – sind - seid)** 6 Marks L2 CO2 PO1

Mein Name .....1... Müller. Wer ...2....Sie? Ich ....3... Fräulein Klein. Ich....4... hier Sekretärin. Herr Weber ....5... Techniker. Er ....6...sehr nett. Wo....7... Herr Hartmann? Er .....8...verreist. Morgen...9.. er wieder zurück. Hallo Anna, wo ...10...du? Ich ....11...in Köln. Und wo ...12.....

b) **Wie viel ist das?** 6 Marks L1 CO1 PO1

1. Drei + neun + vier = ...
2. Sieben + sechsundzwanzig – vier =.....
3. Sechzehn + elf – fuenf =.....
4. Achtundachtzig + neunzehn + eins =.....
5. Siebzig + vierunfuenzig + zwei = ...
6. Sechzehn + Siebzehn+ neun= .....

UNIT-III

5. **Das ist …" Schreiben Sie Sätze.** 12 Marks L2 CO3 PO10

Beispel : Der computer: Das ist mein Computer.

1. Die Autos (plural):.....
2. Die Familie:.....
3. Der Fernseher:.....
4. Das Haus:.....
5. Das Flugezug:.....
6. Der Teppich:.....

(OR)

6. **Bilden Sie Fragen (wer – was - wie)** 12 Marks L2 CO3 PO10

1.	.....?	a.	Das ist Herr Weber.
2.	.....?	b.	Er ist Techniker.
3.	.....?	c.	Das ist Fräulein Klein.
4.	.....?	d.	Sie ist Sekretärin.
5.	.....?	e.	Sie ist sehr nett.
6.	.....?	f.	Das sind Herr und Frau Hartmann.
7.	.....?	g.	Frau Hartmann ist Lehrerin.
8.	.....?	h.	Fräulein Ito ist Studentin.
9.	.....?	i.	Sie ist sehr freundlich.
10.	.....?	j.	Ich bin Heinz Müller, Ihr Lehrer.
11.	.....?	k.	Das ist Frau Schmitt.
12.	.....?	l.	Sie ist nett und freundlich.

UNIT-IV

7. a) **Ergänzen Sie den passenden Possessivartikel.** 6 Marks L2 CO3 PO10

1. Ist das _____ Hund?
2. Nein, das ist _____Hund.
3. Ist das _____ Buch?
4. Ja, das ist _____Buch. Vielen Dank!
5. Ist das _____Auto?
6. Nein, das ist _____Auto.

b) **Wie heißen die Sätze richtig? Notieren Sie.** 6 Marks L2 CO3 PO10

1. Bitte / ich / Entschuldigung / um
2. Leid / tut/ mir /es
3. Gut / schon.
4. Sie / entschuldiegnen / bitte
5. Nichts / macht
6. Heißen / wie / sie

(OR)

8. **Sprechen Sie mit einem Partner / einer Partnerin.** 12 Marks L1 CO4 PO1

i) Fragt nach dem Weg zum Bahnhof. ii) Fragt nach dem Weg zum Markt.	
UNIT-V

9. a) **Das Grillfest. Was sagen Sie? Ordnen Sie zu.** 6 Marks L2 CO2 PO1

b) **Wer macht/kauft was? Was fehlt? Schreiben Sie Sätze.** 6 Marks L2 CO4 PO10

Grillparty am Samstag

Wir brauchen:
Brot und Brötchen,
Salat, Nudelsalat,
Kartoffelsalat, Käse,
Gemüse (kann man grillen ☺),
Oliven, Schinken,
Würstchen, Fleisch,
Kuchen, Obstsalat,
Orangensaft, Cola, Limonade,
Bier, Wasser

Wer	Was
Thomas Frisch	Brot, Bier
Markus Huber	Kuchen, Würstchen
Familie Schulz	Kartoffelsalat und Limonade
Hella Kübler	*Obstsalat*
Frau Mühltal	*Nudelsalat und Fleisch*

(OR)

10. **Lesen Sie den Text Und antworten Sie:** 12 Marks L2 CO4 PO10

EXPO ist eine Exportfirma. Sie exportiert Maschinen und Apparate in viele Länder. Herr Hartmann ist ihr Chef. Er ist oft nicht da, sondern verreist Termine und schreibt Briefe.
Herr Meier ist Ingenieur. „ Ist das Ihr Büro, Herr Meier?“ – „Ja, das ist mein Büro.“ Herr Weber ist Techniker. Er arbeitet oft im Ausland. Günter ist 17 Jahre alt und in Ausbildung. Her Meier ist sein Ausbilder. Günter wird Elektriker. Er lernt noch ein Jahr und macht dann eine Prüfung. Dann ist er Elektriker.

1. Was ist EXPO?
2. Was exportiert sie?
3. Was ist Fräulein Klein?
4. Wer ist ihr Chef?
5. Was macht Fräulein Klein?
6. Wo arbeitet Herr Weber?

INDIAN ECONOMY

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering,]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

	UNIT-I				
1.	Define Engineering Economics. Explain the concept and scope of Engineering Economics.	12 Marks	L2	CO1	PO1
	(OR)				
2.	Compare and contrast between Micro and Macro Economics.	12 Marks	L2	CO2	PO1
	UNIT-II				
3.	Examine the importance of material selection of a product.	12 Marks	L2	CO1	PO6
	(OR)				
4.	Outline the Process modification.	12 Marks	L2	CO1	PO6
	UNIT-III				
5.	What is the need for planning in India? Examine the role of NITI Ayog.	12 Marks	L2	CO1	PO6
	(OR)				
6.	Examine the role of engineers in employment and inclusive growth in India.	12 Marks	L2	CO1	PO6
	UNIT-IV				
7.	Define capital budgeting. Explain the traditional methods of capital budgeting.	12 Marks	L2	CO2	PO12
	(OR)				
8.	What is Depreciation Policy? Explain the Straight Line and Declining Balancing Methods.	12 Marks	L2	CO2	PO1
	UNIT-V				
9.	Explain the functions and aims of value analysis.	12 Marks	L2	CO2	PO12
	(OR)				
10.	Explain the procedure of value engineering in detail.	12 Marks	L2	CO1	PO1

INDIAN HISTORY

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

	UNIT-I				
1.	Explain archaeological sources of History with relevant examples.	12 Marks	L2	CO1	PO1
	(OR)				
2.	Discuss the types of Marriages and its functions.	12 Marks	L2	CO1	PO1
	UNIT-II				
3.	Analyse the reasons for the decline of the Indus Valley Civilization.	12 Marks	L2	CO1	PO1
	(OR)				
4.	Explain the main features of the Indus valley civilization.	12 Marks	L2	CO1	PO1
	UNIT-III				
5.	Describe the administration of the Satavahana dynasty.	12 Marks	L2	CO1	PO1
	(OR)				
6.	Describe the cultural achievements of the Post-Mauryan period.	12 Marks	L2	CO1	PO1
	UNIT-IV				
7.	"Krishnadevaraya 1509- 1529 AD the King of Vijayanagara, was not only an accomplished scholar himself, but was also a great patron of learning and literature. Discuss."	12 Marks	L2	CO2	PO6
	(OR)				
8.	Analyze the social and Economic conditions on the eve of British rule (18th century) in India.	12 Marks	L2	CO2	PO6
	UNIT-V				
9.	Examine the causes for the first war of Independence (1857).	12 Marks	L2	CO2	PO6
	(OR)				
10.	Explain the various the provisions of Indian constitution.	12 Marks	L2	CO2	PO6

LIFE SKILLS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe attitude in a work place.	6 Marks	L3	CO1	PO1
	b)	Detail the way of measuring attitude.	6 Marks	L4	CO1	PO1
		(OR)				
2.		Enlist the mechanism of developing positive attitude.	12 Marks	L2	CO1	PO2
		UNIT-II				
3.		Examine the elements of attitude in interpersonal relationship.	12 Marks	L4	CO3	PO2
		(OR)				
4.	a)	What is meant by SWOT analysis?	6 Marks	L1	CO2	PO2
	b)	Why is it important to know about yourself?	6 Marks	L1	CO3	PO1
		UNIT-III				
5.		What are the potential hot spots in cross-cultural communication?	12 Marks	L4	CO3	PO10
		(OR)				
6.	a)	List out different styles of communication.	6 Marks	L3	CO3	PO2
	b)	Write down the basic tips for cross-cultural communication.	6 Marks	L3	CO3	PO2
		UNIT-IV				
7.	a)	What are the stages of problem solving?	6 Marks	L1	CO2	PO2
	b)	What are the different categories of thinking?	6 Marks	L1	CO2	PO5
		(OR)				
8.		Enlist different types of decision making.	12 Marks	L2	CO2	PO10
		UNIT-V				
9.		Detail the structuring and delivery of sales presentations.	12 Marks	L3	CO3	PO5
		(OR)				
10.	a)	Mention the guidelines for delivery.	6 Marks	L1	CO3	PO1
	b)	What are the key components of a presentation?	6 Marks	L1	CO3	PO2

PERSONALITY DEVELOPMENT

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		What is personality? Explain about different Personalities.	12 Marks	L2	CO2	PO1
		(OR)				
2.	a)	Explain Freudian Analysis.	6 Marks	L2	CO2	PO1
	b)	Explain Leadership qualities.	6 Marks	L2	CO2	PO1
		UNIT-II				
3.		Illustrate how to turn failure into success.	12 Marks	L2	CO1	PO2
		(OR)				
4.	a)	Explain how to build self-confidence.	6 Marks	L1	CO1	PO1
	b)	Discuss the role of monitoring in personality development.	6 Marks	L2	CO3	PO2
		UNIT-III				
5.		Explain the importance of attitude in personality development.	12 Marks	L2	CO2	PO2
		(OR)				
6.	a)	How to change negative attitude? Discuss.	6 Marks	L2	CO1	PO1
	b)	What are internships? Give examples.	6 Marks	L1	CO1	PO1
		UNIT-IV				
7.		Describe the Positive and Negative traits impact on communication.	12 Marks	L2	CO1	PO10
		(OR)				
8.	a)	Discuss open communication with examples.	6 Marks	L2	CO1	PO1
	b)	Discuss Voice mail with suitable examples.	6 Marks	L2	CO1	PO1
		UNIT-V				
9.		Explain how to balance Life and Work.	12 Marks	L2	CO4	PO5
		(OR)				
10.	a)	Discuss how to develop creativity.	6 Marks	L2	CO3	PO1
	b)	Discuss the importance of decision-making.	6 Marks	L1	CO2	PO1

PROFESSIONAL ETHICS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Write the scope and aim of engineering ethics.	6 Marks	L2	CO1	PO1
	b)	Explain the variety of moral issues.	6 Marks	L3	CO1	PO1
		(OR)				
2.		What is Gilligan's theory? Explain it with an example.	12 Marks	L4	CO1	PO1
		UNIT-II				
3.	a)	Explain about of professional responsibility.	6 Marks	L3	CO3	PO1 PO5
	b)	What is integrity? Write its importance.	6 Marks	L2	CO3	PO1 PO5
		(OR)				
4.		Explain briefly about use of ethical theories.	12 Marks	L4	CO3	PO1 PO5
		UNIT-III				
5.	a)	"Engineers as responsible experimenters". Comment.	6 Marks	L4	CO2	PO2 PO5
	b)	Write about industrial standards in detail.	6 Marks	L3	CO2	PO2 PO5
		(OR)				
6.		Discuss briefly about code of ethics and limitations.	12 Marks	L3	CO2	PO2 PO5
		UNIT-IV				
7.	a)	Explain about conflict of interests.	6 Marks	L3	CO1	PO1
	b)	What is occupational crime? Explain it in detail.	6 Marks	L2	CO1	PO1
		(OR)				
8.		Explain in detail about employee rights and discrimination.	12 Marks	L3	CO1	PO1
		UNIT-V				
9.	a)	Write a short note on multinational corporations.	6 Marks	L3	CO2	PO2 PO5
	b)	Write the importance of computer ethics.	6 Marks	L2	CO2	PO2 PO5
		(OR)				
10.		Explain about engineers as consultants with example.	12 Marks	L3	CO2	PO2 PO5

OBJECT ORIENTED PROGRAMMING THROUGH JAVA

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe the relationship between an object and its defining class.	6 Marks	L1	CO1	PO1
	b)	Explain about JIT compiler and what is the significance of byte code.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	What features of java makes it platform independence and portable?	6 Marks	L1	CO1	PO1
	b)	What are the drawbacks of procedural languages and explain the need of object-oriented programming?	6 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Write a java program that reads thee numbers and display their average.	6 Marks	L1	CO1	PO3
	b)	Develop a recursive function to reverse a given number.	6 Marks	L3	CO2	PO3
		(OR)				
4.	a)	Write a java program to calculate area of circle.	6 Marks	L1	CO1	PO1
	b)	List the conventions for naming variables, methods and classes.	6 Marks	L3	CO1	PO1
		UNIT-III				
5.	a)	Design a program to demonstrate multiple inheritance in java.	6 Marks	L3	CO2	PO1
	b)	What are the various uses of final keyword?	6 Marks	L1	CO2	PO1
		(OR)				
6.	a)	What is inheritance and what are various types of inheritance?	6 Marks	L3	CO2	PO4
	b)	What is a package? How to create your own package?	6 Marks	L2	CO2	PO2
		UNIT-IV				
7.	a)	What is an Array List? Give the various constructors of Array List.	6 Marks	L1	CO2	PO2
	b)	Explain user defined exception handling with suitable program.	6 Marks	L1	CO2	PO2
		(OR)				
8.	a)	What is the difference between thread and process and how to achieve thread synchronization?	6 Marks	L2	CO2	PO1
	b)	What is a linked list? What are the various constructors of Linked List?	6 Marks	L2	CO2	PO1
		UNIT-V				
9.	a)	What is an applet and give the life cycle of an applet?	6 Marks	L1	CO3	PO1
	b)	Explain various components in swing.	6 Marks	L1	CO3	PO1
		(OR)				
10.	a)	Develop an applet which displays your college name.	6 Marks	L2	CO3	PO1
	b)	What are the various layout managers used in Java?	6 Marks	L1	CO3	PO1

DISASTER MITIGATION AND MANAGEMENT

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss the disaster profile of India.	6 Marks	L4	CO1	PO1 PO2 PO5
	b)	Discuss disaster impact on Infrastructure and development.	6 Marks	L4	CO1	PO1 PO2 PO8
		(OR)				
2.		Explain the various disasters affecting the environment.	12 Marks	L4	CO1	PO1 PO2 PO5 PO8

UNIT-II

3.	a)	In what Zones earthquakes occur in India? Explain the reason why it occurs in those Zones.	6 Marks	L4	CO1	PO1 PO2
	b)	What is meant by rehabilitation and explain the rehabilitation measures to be taken after earthquakes.	6 Marks	L4	CO2	PO1 PO2 PO3 PO4
		(OR)				
4.		Explain both pre and post disaster measures undertaken to mitigate the sufferings of people in an earthquake situation.	12 Marks	L4	CO2	PO1 PO2 PO3 PO4

UNIT-III

5.		Describe the areas of flood hazard in India. What causes floods?	12 Marks	L4	CO3	PO1 PO2 PO6 PO10
		(OR)				
6.	a)	How is environmental hazard linked to ecology? Explain with respect to Drought.	6 Marks	L6	CO3	PO1 PO2 PO6 PO10
	b)	Drought and floods occur in the same region but at different times. Explain the reason.	6 Marks	L6	CO3	PO1 PO2 PO6 PO10

UNIT-IV

7.		Describe the measures taken during a land slide disaster.	12 Marks	L4	CO3	PO1 PO2 PO5 PO6
		(OR)				
8.		What pre disaster measures would have reduced the impact of land slide disaster? Explain.	12 Marks	L4	CO4	PO1 PO2

UNIT-V

9.	a)	Explain the various approaches in the disaster management.	6 Marks	L4	CO4	PO1 PO2 PO10
	b)	Discuss ecological and sustainable development models for disaster management.	6 Marks	L5	CO5	PO1 PO3 PO11
		(OR)				
10.	a)	Response is the first stage of the disaster management cycle. Discuss.	6 Marks	L4	CO5	PO1 PO3 PO11
	b)	Discuss in brief the Disaster Management Act 2005.	6 Marks	L5	CO5	PO1 PO3 PO11

III B.Tech I Semester (SVEC-19) Regular Examinations January – 2022

SUSTAINABLE ENGINEERING

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Discuss in detail the challenges in sustainable development in India .suggest a way to overcome it.	6 Marks	L4	CO1	PO1 PO2 PO4 PO7
	b)	Explain the availability and depletion on natural resources and discuss how to reduce the wastage of natural resources.	6 Marks	L4	CO1	PO1 PO2 PO4 PO7
		(OR)				
2.	a)	Explain about the project under CDM under that could be executed in developing a village.	6 Marks	L4	CO1	PO2 PO4 PO5
	b)	List out the objectives of Kyoto protocol and discuss the present status in achieving the goals.	6 Marks	L2	CO1	PO2 PO4 PO5
		UNIT-II				
3.	a)	Explain sustainability indicators, metrics and assessment tools in detail.	6 Marks	L3	CO2	PO1 PO4 PO5
	b)	Highlight on life cycle assessment procedure for any building materials.	6 Marks	L2	CO2	PO1 PO4 PO5
		(OR)				
4.	a)	Explain the role of economic input output life cycle analysis which helps in achieving sustainability.	6 Marks	L2	CO2	PO1 PO4 PO5
	b)	Discuss in detail the steps involved in environmental health risk assessment.	6 Marks	L2	CO2	PO1 PO4 PO5
		UNIT-III				
5.	a)	Discuss the measurable metrics relating to municipal solid waste management by focusing on sustainable waste management.	6 Marks	L4	CO3	PO1 PO2 PO4 PO6 PO7
	b)	In a green building suggest two design solutions to effect passive cooling during summer months in order to reduce the total energy requirements.	6 Marks	L4	CO3	PO1 PO2 PO4 PO6 PO7

(OR)

6.	a)	Suggest any two water conservation methods that can be adopted in green buildings.	6 Marks	L4	CO3	PO2 PO5 PO6
	b)	Explain the sustainable remediation of contaminated site with the help of a case study.	6 Marks	L3	CO3	PO2 PO5 PO6

UNIT-IV

7.		Discuss the process of devise selection criteria for the materials of any infrastructure engineering project to attain an environmental sustainability.	12 Marks	L4	CO4	PO1 PO2 PO4 PO5 PO6

(OR)

8.		Explain the criteria of devise selection for the materials of any dam construction project in attaining economic sustainability.	12 Marks	L3	CO4	PO1 PO2 PO4 PO5

UNIT-V

9.	a)	Discuss in detail the prominent causes of urbanization.	6 Marks	L4	CO5	PO4 PO5 PO6 PO7
	b)	Explain any two urban problems affecting sustainability encountered by MEDCs by Listing out all the problems associated with it.	6 Marks	L3	CO5	PO4 PO5 PO6 PO7

(OR)

10.	a)	Highlight on urbanization to growing ground water scarcity in our country and suggest the measures to overcome the water scarcity.	6 Marks	L4	CO5	PO4 PO5 PO6 PO7
	b)	List out three air pollutants that effect human health and discuss control techniques for such air pollutants.	6 Marks	L3	CO5	PO4 PO5 PO6 PO7

MANAGEMENT SCIENCE

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain decision-making concepts in management.	6 Marks	L2	CO1	PO1 PO2
	b)	What are the challenges for management in a global environment?	6 Marks	L2	CO1	PO1 PO2
		(OR)				
2.	a)	Differentiate between process and customer orientation.	6 Marks	L2	CO1	PO1 PO2
	b)	Write short notes on value chain.	6 Marks	L2	CO1	PO1 PO2
		UNIT-II				
3.	a)	What is meant by the human resource information system? Give some examples.	6 Marks	L1	CO2	PO1 PO2
	b)	Write a short note on compensation management.	6 Marks	L3	CO2	PO1 PO2
		(OR)				
4.		Discuss human resource changes in the present scenario. What are the functions of human resource Management?	12 Marks	L2	CO2	PO1 PO2
		UNIT-III				
5.	a)	What are the benefits of supply chain management?	6 Marks	L3	CO3	PO1 PO2
	b)	Explain the line balancing concept with an example.	6 Marks	L3	CO3	PO1 PO2
		(OR)				
6.	a)	Explain make or buy decision with a suitable example.	6 Marks	L2	CO3	PO1 PO2
	b)	Write short notes about the six sigma.	6 Marks	L2	CO3	PO1 PO2
		UNIT-IV				
7.		What is Marketing strategy formulation? Discuss various components of the marketing plan.	12 Marks	L3	CO4	PO1 PO2
		(OR)				
8.	a)	Discuss segmenting and targeting markets with suitable examples.	6 Marks	L2	CO4	PO1 PO2
	b)	Explain the difference between positioning and differentiation with suitable examples.	6 Marks	L2	CO4	PO1 PO2

UNIT-V

9.	a)	What is meant by a work breakdown structure? Give some examples.	6 Marks	L4	CO5	PO1 PO2 PO3 PO4 PO11
	b)	Explain the Gantt chart with an example.	6 Marks	L4	CO5	PO1 PO2 PO3 PO4 PO11

(OR)

10.		Given the following data of the following activities in the given table. i) Draw the project network. ii) Determine the critical path. iii) Determine the earliest start time and earliest finish time.	12 Marks	L4	CO5	PO1 PO2 PO3 PO4 PO11

Activity	Immediate Predecessors	Estimated Completion Time (days)
A. Complete design	-	3
B. Manufacture prototype	A	4
C. Test and redesign cap	B	7
D. Determine interest in product	B	8
E. Design packaging	C	8
F. Manufacture limited quantities	C	30
G. Apply for patent	C	15
H. Negotiate with manufacturers	D,G,F	11
I. Sign contract	H	20
J- Ship initial supplies	E, I	6

LINEAR AND DIGITAL IC APPLICATIONS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Discuss the working of a monostablemultivibrator using 555 IC and explain its design.	6 Marks	L1	CO1	PO3
	b)	Derive the expression for the output frequency of an RC phase shift oscillator.	6 Marks	L3	CO1	PO8
		(OR)				
2.	a)	Explain the operation of VCO IC 566 with the help of block schematic.	6 Marks	L1	CO1	PO2
	b)	Describe with diagram, the working principle of an instrumentation amplifier.	6 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Design a first order low pass filter for high cutoff frequency of 2kHz and pass band gain of 2.	6 Marks	L5	CO2	PO3
	b)	Derive the cutoff frequency in a second order filter.	6 Marks	L3	CO2	PO3
		(OR)				
4.	a)	Explain the important specifications of A/D and D/A converters.	6 Marks	L1	CO3	PO2
	b)	What output voltage would be produced by a DAC controller whose o/p range is 0 to 10 V and whose input binary number is: i) 0110 (4 bit DAC). ii) 10111100 (8 bit DAC).	6 Marks	L3	CO3	PO2
		UNIT-III				
5.	a)	Model the design flow of VHDL program with front-end and back-end steps.	6 Marks	L3	CO4	PO2
	b)	Define and explain the following terms relevant to Verilog HDL language elements. i) White space characters. ii) Comments. iii) Exercises.	6 Marks	L1	CO4	PO2
		(OR)				
6.	a)	Describe the following relevant to gate level modelling with necessary syntax and example. i) Gate delays. ii) Array of instances.	6 Marks	L2	CO4	PO2
	b)	Explain different levels of design description in Verilog HDL programing.	6 Marks	L1	CO4	PO2
		UNIT-IV				
7.		Construct 12-bit comparator using 74 x 85's and write a VHDL program for comparing 8-bit unsigned.	12 Marks	L3	CO5	PO1
		(OR)				
8.		Design a 16-bit barrel shifter using 74 x 151 that performs right circular shift operation. Demonstrate the Circuit using VHDL program.	12 Marks	L4	CO5	PO1

UNIT-V

9.	Designa JK flip flop using NAND gate and write verilog code for it. Also design a T-flipflop using NAND gates.	12 Marks	L5	CO5	PO3
	(OR)				
10.	Design positive edge triggered D flip-flop and explain its functional and timing behavior. Also develop a VHDL program.	12 Marks	L5	CO5	PO6

COMPUTER NETWORKS

[Electronics and Communication Engineering, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Sktech the ISO - OSI Reference Model and explain the functionalities of the layers present in that model.	6 Marks	L2	CO1	PO2
	b)	Differentiate between Connection oriented and Connection less services.	6 Marks	L3	CO1	PO1
		(OR)				
2.	a)	Compare and contrast ISO-OSI Reference model and TCP/IP model.	6 Marks	L3	CO1	PO2
	b)	Write short notes on : i) Twisted pair. ii) Coaxial cable. iii) Fiber optics.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Perform Cyclic Redundancy Check (CRC) for the frame 1101011011 using the Generator polynomial x4 + x + 1 and compute whether the frame is error free or not for the given generator polynomial.	6 Marks	L1	CO2	PO2
	b)	Illustrate the working of Go Back N Sliding window protocol with relevant example.	6 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Elucidate the CSMA Protocols.	6 Marks	L2	CO2	PO1
	b)	Explain a protocol using Selective Repeat with figures.	6 Marks	L3	CO2	PO2
		UNIT-III				
5.		Elaborate the distance vector routing algorithm with an example.	12 Marks	L3	CO3	PO8
		(OR)				
6.	a)	Describe load shedding and jitter control in detail.	6 Marks	L1	CO3	PO1
	b)	Describe Internet Control Message Protocol and Address Resolution Protocol.	6 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Illustrate the UDP with relevant figure.	6 Marks	L3	CO4	PO4
	b)	Describe TCP segment header in detail.	6 Marks	L3	CO4	PO2
		(OR)				
8.	a)	Explain the connection release procedure of transport layer	6 Marks	L3	CO4	PO4
	b)	Describe the flow control procedure for transport layer	6 Marks	L2	CO4	PO1
		UNIT-V				
9.	a)	Explain various message formats of electronic mail.	6 Marks	L3	CO5	PO6
	b)	Draw and explain various parts of the web model.	6 Marks	L3	CO5	PO6
		(OR)				
10.	a)	What is DNS? Explain in detail.	6 Marks	L2	CO5	PO6
	b)	Explain in detail about SNMP.	6 Marks	L3	CO5	PO6

DESIGN AND ANALYSIS OF ALGORTIHMS

[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe the Pseudo code conventions for specifying algorithms of recursive and an iterative algorithm to compute **n**!.	6 Marks	L1	CO1	PO1
	b)	Estimate the time complexity using f(n) and g(n) functions in asymptotic notations.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	What is the importance of random variable in probabilistic analysis? Explain.	6 Marks	L2	CO1	PO1
	b)	Discuss the importance of Space and Time complexities.	6 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Explain the Find algorithm with collapsing rule.	6 Marks	L2	CO2	PO2
	b)	Write the General method of Divide – And – Conquer approach.	6 Marks	L1	CO2	PO2
		(OR)				
4.	a)	What is weighting rule for Union (i, j)? How it improves the performance of union operation?	6 Marks	L2	CO2	PO4
	b)	Perform binary search on list of elements to find the key element using divide and conquer, and also estimate the time complexity.	6 Marks	L3	CO2	PO3
		UNIT-III				
5.	a)	Define merging and purging rules in 0/1 knapsack problem.	6 Marks	L1	CO3	PO2
	b)	Explain how Matrix–chain Multiplication problem can be solved using dynamic programming with suitable example.	6 Marks	L3	CO3	PO3
		(OR)				
6.	a)	Discuss Flow shop scheduling with an example.	6 Marks	L1	CO3	PO4
	b)	Explain the methodology of Dynamic programming. List the applications of Dynamic programming.	6 Marks	L2	CO3	PO2
		UNIT-IV				
7.	a)	Discuss briefly about the minimum cost spanning tree.	6 Marks	L2	CO3	PO2
	b)	Discuss the 4 – queen's problem. Draw the portion of the state space tree for n = 4 queens using backtracking algorithm.	6 Marks	L6	CO3	PO3
		(OR)				
8.	a)	State the Greedy Knapsack. Find an optimal solution to the Knapsack instance n=3, m=20, $(P_1, P_2, P_3) = (25, 24, 15)$ and $(W_1, W_2, W_3) = (18, 15, 10)$.	6 Marks	L3	CO3	PO3
	b)	Write the backtracking algorithm for the sum of subsets problem using the state space tree corresponding to m=35, w = (20, 18, 15, 12, 10, 7, 5).	6 Marks	L1	CO3	PO4

UNIT-V

9.		Obtain reduced cost matrix for travelling sales person problem. Consider the instance define by the cost matrix: $\begin{bmatrix} \infty & 5 & 1 & 10 & 6 \\ 1 & \infty & 4 & 12 & 7 \\ 3 & 6 & \infty & 4 & 16 \\ 7 & 1 & 3 & \infty & 9 \\ 16 & 12 & 7 & 6 & \infty \end{bmatrix}$	12 Marks	L3	CO4	PO2

(OR)

10.	a)	What is LC – Search? Discuss LC – Search algorithm.	6 Marks	L1	CO4	PO4
	b)	Differentiate between: i) P and NP. ii) NP-complete and NP-Hard.	6 Marks	L1	CO4	PO2

THEORY OF COMPUTATION

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Design DFA for the set of all strings over ∑={a,b} ending with abb.	6 Marks	L4	CO1	PO3
	b)	Prove L(DFA)= L(NFA).	6 Marks	L4	CO1	PO3
		(OR)				
2.	a)	Design NFA for (0+1)*(00+11) over ∑={0,1}.	6 Marks	L3	CO1	PO2
	b)	Differentiate Moore and Mealy machines.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	State and prove pumping lemma for regular languages.	8 Marks	L4	CO1	PO3
	b)	Give the applications of regular expressions.	4 Marks	L4	CO3	PO2
		(OR)				
4.	a)	Construct ε -NFA for (a+b)*aa(a+b)*.	6 Marks	L2	CO3	PO1
	b)	Explain closure properties of regular languages.	6 Marks	L4	CO3	PO3
		UNIT-III				
5.	a)	Write CFG for identifiers starting with letter over ∑={a,b,…z| A,B,…Z}.	6 Marks	L3	CO4	PO4
	b)	Simplify the following grammar. S→ AaAb|BbBa A→ε B→ε	6 Marks	L4	CO3	PO2
		(OR)				
6.	a)	Convert to CNF the following grammar. S→aB|bA A→aS|aBB|a B→bS|bAA|b.	6 Marks	L4	CO4	PO4
	b)	Prove that L={$a^n b^n c^n$|n>0} is not CFL.	6 Marks	L2	CO4	PO1
		UNIT-IV				
7.	a)	What is LBA?	6 Marks	L2	CO2	PO1
	b)	Design PDA for L={$a^n b^{2n}$|n>=1}.	6 Marks	L4	CO5	PO4
		(OR)				
8.	a)	Design PDA for E→E+T|T T→T*F|F F→ (E)|id.	6 Marks	L2	CO4	PO3
	b)	Explain properties of recursive and recursively enumerable languages.	6 Marks	L4	CO1	PO1
		UNIT-V				
9.	a)	Explain techniques for Turing machine construction.	6 Marks	L4	CO5	PO1
	b)	What is UTM? Explain.	6 Marks	L2	CO5	PO3
		(OR)				
10		Design Turing machine for L={$a^n b^n c^n$|n>=1}.	12 Marks	L4	CO5	PO3

.

IRRIGATION ENGINEERING AND HYDRAULIC STRUCTURES

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define Irrigation; explain the necessity, advantages and disadvantages of Irrigation.	6 Marks	L4	CO1	PO1 PO2 PO5 PO10
	b)	Find the delta of a crop, if the base period is from 1st April to 15th August and duty is 8 square kilometer per cubic meter per second.	6 Marks	L4	CO1	PO1 PO2 PO6 PO7
		(OR)				
2.	a)	Define consumptive use and explain various methods for the determination of consumptive use.	6 Marks	L2	CO1	PO1 PO8
	b)	Explain the factors effecting duty and methods for improving duty.	6 Marks	L4	CO1	PO1 PO2

UNIT-II

3.	a)	Explain various component parts of a diversion head work with neat sketches.	6 Marks	L4	CO2	PO1 PO2 PO4 PO5 PO6 PO10
	b)	Explain the design criteria based on Bligh's theory.	6 Marks	L4	CO2	PO1 PO2 PO4 PO5 PO6 PO10
		(OR)				
4.	a)	What are the functions of launching apron and inverted filter of a weir and explain in detail?	6 Marks	L2	CO2	PO1 PO6 PO8 PO10
	b)	Explain the silt control devices with neat sketches.	6 Marks	L4	CO2	PO1 PO2 PO6 PO7 PO10

UNIT-III

5.	a)	What is a gravity dam? What are the advantages and disadvantages of gravity dams?	6 Marks	L4	CO3	PO1 PO2 PO6

						PO7 PO10
	b)	Design the practical profile of a gravity dam with the following data. R.L of the base of the dam = 1420m R.L of HFL = 1455m Specific gravity of dam material = 2.4 Safe compressive stress = 120 t/m^2 Height of waves = 1m	6 Marks	L6	CO3	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
		(OR)				
6.	a)	Explain the criteria for safe design of an earth dam.	6 Marks	L4	CO3	PO1 PO6 PO7 PO10
	b)	Briefly explain the Morning Glory Spillway with a neat sketch.	6 Marks	L6	CO3	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO8
		UNIT-IV				
7.	a)	Explain various types of linings in detail.	6 Marks	L2	CO4	PO1 PO6 PO7 PO10
	b)	Discuss the drawbacks of Kennedy's theory.	6 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO5 PO6 CO7 PO8 PO10
		(OR)				
8.	a)	A channel section has to be designed for the following data. Discharge Q = 30 cumecs, silt factor f = 1.00, side slopes = ½ : 1. Find the longitudinal slope also.	6 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO5 PO6 CO7 PO8 PO10
	b)	What is an outlet and explain the Gibb's module with a neat sketch?	6 Marks	L6	CO4	PO1 PO6 CO7 PO10
		UNIT-V				
9.	a)	Differentiate between Syphon aqueduct and canal siphon.	6 Marks	L6	CO5	PO1

						PO6 CO7 PO10
	b)	Discuss the factors in the selection of suitable type aqueduct.	6 Marks	L6	CO5	PO1 PO6 CO7 PO10
		(OR)				
10.	a)	Discuss the factors in the selection of suitable type of cross drainage work.	4 Marks	L2	CO5	PO1 PO6 CO7 PO10
	b)	Design a cross drainage work to suit the following hydraulic data. **Canal:** Discharge = 15 cumecs, Bed width = 15m, Bed level = +65.00, Full supply level = +67.00, Full supply depth = 2m,Ultimate bed level = +64.75, Ultimate FSL = +67.50, velocity of flow in canal = 0.49m/sec, average bed level of drain = +63.00, left bank width = 5m, right bank width = 2m, top bank level = 68.50 **Drain:** Catchment area = 3.4 sq km Maximum flood discharge = 34 cumecs Maximum flood level of the drain at site = +64.00 Soil is hard gravel below +62.00	8 Marks	L6	CO5	PO1 PO2 PO3 PO4 PO5 PO6 CO7 PO8 PO10

FOUNDATION ENGINEERING

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain with a neat sketch wash boring method and Auger boring method of soil exploration.	6 Marks	L2	CO1	PO1 PO5 PO10
	b)	State the various methods of soil exploration and explain in detail the penetration tests.	6 Marks	L2	CO1	PO1 PO2 PO6 PO7 PO8
		(OR)				
2.	a)	Discuss Geophysical method involved in characterization of ground profile? Explain one best method with neat sketch.	6 Marks	L2	CO1	PO1 PO5 PO10
	b)	Describe the two most commonly used geophysical exploration methods and compare their merits and demerits.	6 Marks	L2	CO1	PO1 PO2 PO6 PO7 PO8 PO10

UNIT-II

3.	a)	Bring out the difference between Rankine's and Columb's theory of earth pressure.	6 Marks	L2	CO2	PO1 PO2
	b)	A 10m high retaining wall with smooth vertical back supports a horizontal backfill Φ is 330 , c= 25kPa, Density above water table 15kN/m^3 and below water table 18kN/m^3). The water table is at a depth of 3m below the surface of the backfill. The backfill supports a surcharge of 10kPA) Determine the magnitude and line of action of passive earth pressure.	6 Marks	L3	CO2	PO1 PO2 PO4 PO5 PO8 PO10
		(OR)				
4.	a)	Explain the procedure of computing active earth pressure behind retaining wall using Culmann's graphical method.	6 Marks	L2	CO2	PO1 PO5 PO10
	b)	A retaining wall has a smooth vertical back and is 8.5m in height. It retains a horizontal backfill of sand with Φ is 330. Find out the total active earth pressure per meter length of wall if γ =18kN/m^3. The water table is far below the base of the wall. The water table rises up to 4.5m level above the base. Take at=20.5kN/m^3.	6 Marks	L3	CO2	PO1 PO2 PO4 PO5 PO8 PO10

UNIT-III

5.	a)	Discuss various failure in finite slopes with a neat sketch.	6 Marks	L2	CO3	PO1 PO10
	b)	Discuss the method for checking the stability of an infinite slope in a cohesive soil. What is critical height?	6 Marks	L2	CO3	PO1 PO2 PO4

						PO6
		(OR)				
6.	a)	Explain slope stability analysis in detail.	6 Marks	L2	CO3	PO1 PO6
	b)	Calculate the safe height for an embankment rising 700 to the horizontal and to be made with a clayey soil having unit weight of 20 kN/m^3, Á= 150 and a cohesion of 20 kN/m^2. Factor of safety = 2.5. Value of stability number= 0.14.	6 Marks	L3	CO3	PO1 PO2 PO4 PO6 PO7 PO8 PO10
		UNIT-IV				
7.	a)	Explain in detail on Terzaghi's theory in prediction of ultimate bearing capacity.	6 Marks	L2	CO4	PO1 PO6
	b)	A circular footing is resting on a stiff saturated clay with unconfined compression strength of 250 kN/m^2 . The depth of foundation is 2m. Determine the diameter of the footing if the column load is 700 KN.	6 Marks	L3	CO4	PO1 PO2 PO10
		(OR)				
8.	a)	Distinguish local shear and general shear failure.	6 Marks	L2	CO4	PO1 PO2 PO6 PO10
	b)	Compute the ultimate load that an eccentrically loaded square footing of width 2m width, an eccentricity of 0.315m can take at a depth of 0.45m in soil with γ = 17.7kN/m^3, C=9kN/m^2 and ϕ= 35º, Nc=52, Nq=35 and Ny=42.	6 Marks	L3	CO4	PO1 PO2 PO3 PO4 PO6 PO8 PO10
		UNIT-V				
9.	a)	Enumerate various shapes of foundation and discuss their merits and demerits.	6 Marks	L2	CO5	PO1 PO10
	b)	A group of 16 piles of 50cm diameter is arranged with a centre to centre spacing of 1.0m. The piles are 9m long and are embedded in soft clay with cohesion 32kN/m^2. Bearing resistance may be neglected for the piles - Adhesion factor is 0.6. Determine the ultimate load capacity of the pile group.	6 Marks	L3	CO5	PO1 PO2 PO4 PO6 PO8 PO10
		(OR)				
10.	a)	Explain the measure to be taken in rectifying shifts and tilts.	6 Marks	L2	CO5	PO1 PO2 PO10
	b)	A pile not resting on rock, derives 60% of its ultimate axial capacity from skin friction and the Balance 40% from end bearing. If a safe load of 33% of the ultimate capacity is applied .to the pile,	6 Marks	L3	CO5	PO1 PO2 PO4 PO6 PO8 PO10

III B.Tech I Semester (SVEC-19) Regular Examinations January – 2022

REINFORCED CEMENT CONCRETE STRUCTURES

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Explain about under reinforced, balanced and over reinforced sections with neat sketches.	12 Marks	L5	CO1	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
		(OR)				
2.		A T-beam is singly reinforced and has the following sectional properties. Determine the ultimate moment of resistance of the section. Width of flange = 1200mm, Thickness of flange = 150mm, Width of rib = 300mm, Effective depth = 750mm, Area of tension reinforcement = 5520mm^2. Use M20 mix and Fe-415 steel.	12 Marks	L5	CO1	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10

UNIT-II

3.	a)	Elaborate the cracking control measures.	6 Marks	L6	CO1	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
	b)	What are the factors affecting short term and long term deflection in limit state of serviceability approach?	6 Marks	L1	CO1	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
		(OR)				
4.		A simply supported reinforced concrete beam 300mm width and 450mm effective depth is reinforced with 5 bars of 16mm diameter as tension steel. If the beam is subjected to a shear force of 120 kN at the supports and two of the main bars are cranked up at 45^0, determine the spacing of 8mm dia 2 legged stirrups. Use M20 concrete and Fe 250 steel.	12 Marks	L5	CO2	PO1 PO2 PO3 PO4 PO5 PO6

						PO8 PO10
		UNIT-III				
5.		Design a slab for a room 4m x 5m to support a live load of 3kN/sqm. One long side of the slab is discontinuous. Use M25 concrete and Fe250 steel.	12 Marks	L6	CO3	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
		(OR)				
6.		Design a reinforced concrete slab of dimensions 4m x 6m with two short edges discontinuous. The slab is supported by 230mm thick RCC beams cast monolithically with slab. The live load on the slab is 4kN/sqm. Floor finish on the slab is 1kN/sqm. Use M20 concrete and Fe415 steel.	12 Marks	L6	CO3	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
		UNIT-IV				
7.	a)	Design a rectangular column to carry a service load of 1800kN. Use M25 concrete and Fe 415 steel.	6 Marks	L5	CO4	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
	b)	Discuss the purpose of lateral ties in columns.	6 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
		(OR)				
8.		Design a circular column with spiral reinforcement to carry a factored load of 2000kN. The effective length of the column is 3m. Use M20 and Fe 415 steel.	12 Marks	L6	CO5	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
		UNIT-V				
9.		A Rectangular column of size 300mm x 450mm carries a service load of 800kN. The SBC of the soil is 150kN/sqm. Design a Rectangular isolated footing to support the given column load. Use M25 and Fe415 materials.	12 Marks	L6	CO5	PO1 PO2 PO3 PO4 PO5 PO6

					PO8 PO10
	(OR)				
10.	A square column 450mm x 450mm carries a service load of 1500kN. The SBC of soil is 200 kN/m². Using M30 concrete and Fe415 steel, design a square footing to support the column. Sketch the details of reinforcement.	12 Marks	L6	CO5	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10

TRANSPORTATION ENGINEERING
[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Write the road length formulae of Lucknow plan.	6 Marks	L2	CO1	PO2 PO4 PO5
	b)	Derive an expression for over taking Sight Distance.	6 Marks	L4	CO2	PO1 PO2 PO3 PO8
		(OR)				
2.	a)	Draw neat sketches of various Road patterns.	6 Marks	L2	CO1	PO2 PO4 PO5
	b)	Design the length of transition curve for the following data: Design Speed = 80KMPH, Radius of Circular Curve = 150m, Super elevation = 0.07, Method of introducing super elevation Centre is raised with respect of edges, Allowable rate of introduction of super elevation = 1 in 120, Extra Widening =1.25m, Number of lane = 2, Type of terrain = Plain.	6 Marks	L3	CO2	PO1 PO2 PO4 PO5

UNIT-II

3.	a)	What are the desirable properties of bituminous mixes? Explain in detail.	6 Marks	L2	CO3	PO1 PO4 PO5
	b)	List out various tests conducted on Bitumen. Explain anyone test in detail with neat sketches.	6 Marks	L2	CO3	PO1 PO5
		(OR)				
4.		Calculate the stresses at interior, edge and corner regions of a Cement concrete pavement using Westergards's stress equation. Use the following data: Wheel load P = 5100 kg, Modulus of Elasticity of Concrete E = 3.5×10^5 kg/cm^2, Pavement thickness h = 18cm, Poisson ratio μ= 0.15, Modulus of subgrade reaction k = 6.0 kg/cm^3, Radius of contact area a = 15 cm.	12 Marks	L4	CO3	PO1 PO2 PO3 PO5 PO8

UNIT-III

5.	a)	Explain briefly about road user characteristics.	6 Marks	L2	CO4	PO1 PO2 PO4 PO5
	b)	Explain briefly about Density Speed Curve.	6 Marks	L2	CO4	PO1 PO2 PO4 PO5

(OR)

6.	a)	Explain briefly about Fundamental parameters of traffic flow.	6 Marks	L2	CO4	PO1 PO2 PO4 PO5
	b)	Explain briefly about capacity and LOS with neat sketch.	6 Marks	L2	CO4	PO1 PO2 PO4 PO5

UNIT-IV

7.	a)	If the wheel base of a vehicle moving on a B.G track is 6m, the diameter of wheel is 1.5m and depth of flange below the top of rail is 3.17 cm. Determine the extra width required to be provided on a gauge, if the radius of the curve is 160 m.	6 Marks	L3	CO5	PO1 PO2 PO4
	b)	Write the functions and requirements of sleepers and ballast in a railway track.	6 Marks	L2	CO5	PO1 PO2 PO4

(OR)

8.	a)	What are the requirements of an ideal rail joint and also explain the various rail joints used in railways with neat sketches.	6 Marks	L2	CO5	PO1 PO2 PO4
	b)	Draw a neat sketch of Left Hand Turnout.	6 Marks	L2	CO5	PO1 PO2 PO4

UNIT-V

9.	a)	Discuss Runway Orientation with neat sketches.	6 Marks	L2	CO6	PO1 PO2 PO4
	b)	Explain the special characteristics and requirements of Airport Drainage.	6 Marks	L2	CO6	PO1 PO2 PO4

(OR)

10.	a)	Write short notes on Runway Geometric design elements.	6 Marks	L2	CO6	PO1 PO2 PO4
	b)	Write the construction procedure of the wind rose diagram.	6 Marks	L3	CO6	PO1 PO2 PO4

CODE No.: 19BT50105 SVEC-19

CONSTRUCTION EQUIPMENT AND AUTOMATION
[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Write in detail about the factors affecting selection of construction equipment.	6 Marks	L2	CO1	PO1
	b)	Explain about the cost of owning the construction equipment and cost of operating the construction equipment.	6 Marks	L4	CO1	PO1 PO2 PO5
		(OR)				
2.	a)	Describe various methods involved in replacement analysis.	6 Marks	L2	CO1	PO1 PO5 PO6
	b)	What do you understand by the following terms and elaborate with examples? i) Operating Cost. ii) Equipment management. iii) Equipment maintenance.	6 Marks	L4	CO1	PO1 PO2 PO5 PO10
		UNIT-II				
3.		Write about the forklifts and explain the components of forklifts in the construction industry.	12 Marks	L4	CO2	PO1 PO2
		(OR)				
4.	a)	Write brief introduction and description about bull dozers.	4 Marks	L2	CO2	PO1 PO5
	b)	Enlist the types of rollers and types of compactors and explain any few compactors and rollers in detail.	8 Marks	L4	CO2	PO1 PO2 PO5
		UNIT-III				
5.	a)	Discuss about the aggregate screens and screening plants in construction and explain merits in detail.	6 Marks	L2	CO3	PO1 PO2 PO4 PO5
	b)	Explain in detail about various pumping systems used to inject chemical grout.	6 Marks	L2	CO3	PO1 PO5
		(OR)				
6.	a)	Enlist and discuss various types of dredging.	6 Marks	L4	CO3	PO1 PO5 PO7
	b)	Explain about the applications of instruments used in tunnel construction.	6 Marks	L2	CO3	PO1 PO2 PO5

UNIT-IV

7.	a)	Discuss the applications of building automation systems.	6 Marks	L2	CO4	PO1 PO2 PO5 PO10
	b)	Explain the various sensors used for collection and processing of building data.	6 Marks	L4	CO4	PO1 PO5 PO10
		(OR)				
8.	a)	Explain the functional efficiency of BAS architecture over traditional systems.	6 Marks	L2	CO4	PO1 PO5 PO10 PO11
	b)	What does 5-D mean? Explain how 5D techniques in BIM will make the construction process easier.	6 Marks	L4	CO4	PO1 PO2 PO5 PO10 PO11

UNIT-V

9.	a)	Discuss the advantages and disadvantages of using automation and robotics in civil engineering activities.	6 Marks	L2	CO5	PO1 PO2 PO5 PO6 PO11
	b)	How is automation useful in prefab and precast engineering industries?	6 Marks	L4	CO5	PO1 PO5 PO11
		(OR)				
10.	a)	Discuss the various robotic operations depending on their operation procedure.	6 Marks	L2	CO5	PO1 PO2 PO5 PO6 PO11
	b)	What are the challenges in using robotics in civil engineering industry?	6 Marks	L4	CO5	PO1 PO5 PO11

PIPELINE ENGINEERING

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Enumerate the key factors for pipeline route selection with example.	6 Marks	L2	CO1	PO1 PO5 PO7
	b)	Explain the different types of survey in pipelines.	6 Marks	L4	CO1	PO1 PO5 PO10
		(OR)				
2.	a)	What are the environmental and hydrological consideration for pipeline design?	6 Marks	L2	CO1	PO1 PO5
	b)	Explain the different types of route selection in pipeline.	6 Marks	L4	CO1	PO1 PO5 PO11
		UNIT-II				
3.		A gas transmission line needs to be constructed to transport 1,600,000 m^3/hr off natural gas from a gas refinery to the first compressor station located 100 kilometres away. The route is almost horizontal with no considerable elevation changes. Determine the size of the pipeline required to transport the gas if the pipeline inlet pressure is 1240 Weymouth, Panhandle B, and AGA fully turbulent equations to compare the diameters predicated by each flow equation Ashman effective roughness value of K_e = 750 microinches for the line. Additional data: T_{ave} = 522.68R G = 0.64 T_B = 5208R P_B =14.7 psia Z_{ave} = 1.0	12 Marks	L6	CO2	PO1 PO5 PO10 PO11
		(OR)				
4.	a)	Derive general flow equation for compressible fluids in a pipeline.	6 Marks	L4	CO2	PO1 PO2 PO4 PO5 PO6 PO7 PO8 PO10
	b)	What would be the maximum and minimum velocity of gas in a pipeline Where, Q_b=1,500,000 m^3/hr D = 56 inches P_1 = 1,240 psia P_2 = 890 psia	6 Marks	L6	CO2	PO1 PO2 PO4 PO5 PO6 PO7

		$T_f = T_b = 520$ 8R				PO8
		UNIT-III				
5.		Calculate the compressor horse power required for an adiabatic compression of 110MMSCFD gas with inlet temperature of 70 degrees Fahrenheit and 755 PSIA pressures. The discharge pressure is 1305 psia. Assume the compressibility factors at suction and discharge conditions to be Z_1=1.0, Z_2 =0.85, respectively and adiabatic = 1.4, with the adiabatic efficiency = 0.8. if the mechanical efficiency of the compressor driver is 0.95, what BHP is required? Calculate the outlet temperature of the gas.	12 Marks	L6	CO3	PO1 PO2 PO4 PO5 PO6 PO7 PO8 PO10
		(OR)				
6.	a)	The required discharge pressure in a gas compressor is P_d = 1700 psia, and K=1.4 ; the suction pressure is P_s =100 psia; and suction temperature is T_s =40 degree Fahrenheit the gases hold down to its initial temperature at each stage. For a maximum allowable discharge temperature of 350 degrees Fahrenheit, how many compressors in series will be required?	6 Marks	L6	CO3	PO1 PO2 PO4 PO5 PO6 PO7 PO8
	b)	Derive heat transfer equations for coolers.	6 Marks	L4	CO3	PO2 PO6 PO7
		UNIT-IV				
7.	a)	A pump station installation at corona consists of 2 pumps configured in series each developing 1600 feet of head at 5000 gal/min. Diesel fuel (specific gravity = 0.85, and viscosity = 5.9 CST) is pump from corona to a delivery terminal at sunny mead, 75 miles away bull stop the required discharge pressure at corona based on pipe size, pipe length, liquid properties, elevation profile between corona and sunny mead and the required delivery pressure at sunny mead has been calculated to be 1050 psi. The pump station suction pressure is maintained at 50 PS to prevent from cavitation. Assume the combined efficiency of both pumps at corona at the given flow rate to be 85%. i) Analyse the pump station pressures and determine the amount of throttle pressure and HPV wasted. ii) If electrical energy cars a sentence for kW H estimate the dollars Lost in control valve throttling.	8 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO8 PO10
	b)	Explain in detail about gas coolers with diagrams.	4 Marks	L2	CO5	PO1 PO5 PO6 PO7
		(OR)				
8.	a)	Develop the specific field of a 5 stage double suction centrifugal pump, having 14 inches. Impeller diameter, and that when operated at 3:56 zero rpm generates ahead of 2200 feet at a capacity of 3500 gal/min at the be EP on the head capacity curve. If the NPS H shrink word is 25 feet common, calculate the section specific speed.	8 Marks	L2	CO4	PO1 PO2 PO3 PO4 PO5 PO6 PO10
	b)	Explain in detail about computer applications in transient flow in liquids.	4 Marks	L4	CO5	PO1 PO5 PO6 PO7

UNIT-V

9.	An NPS Eight branch connection is to be welded to an NPS 16 career pipe. The career pipe material is API 5L x 46 wall thickness of 0.406 inch. The outlet material is API 5L grade B (seamless) schedule 40 with a wall thickness of 0.322 inch. The working pressure is 1450 psig and the working temperature is 1258 F. The pipe is being used in a Class 1 division two location. Design the branch pipe wall thickness, carrier pipe wall thickness and reinforcement area.	12 Marks	L4	CO6	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO8 PO10
	(OR)				
10.	A 16 inch crude oil pipeline (0.250 inch wall thickness) is 30 miles long from a point A to point B. The flow rate at the inlet A is 4000 bbl/hr. The crude oil properties are specific gravity of 0.85 and viscosity of 10 CST at flowing temperature of 70 degree Fahrenheit. i) Calculate the pressure required at A without any pipe loop. Assume 50 psi delivery pressure at the terminus B and a flat pipeline elevation profile. ii) If your ten mile portion CD, starting at milepost 10, is looped with an identical 16 inch Pipeline, design the reduced pressure at A. iii) What is the difference in pump HP required at A between cases (i) and (ii) above? Assume 85% pump efficiency and 30 psi pump suction pressure.	12 Marks	L2	CO6	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO8 PO10

CODE No.: 19BT50107 SVEC-19

ENVIRONMENTAL POLLUTION AND CONTROL

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the effects of air pollution on human beings and plants.	6 Marks	L2	CO1	PO1 PO2 PO7
	b)	What is plume? Explain the plume behavior under various atmospheric conditions.	6 Marks	L2	CO1	PO1 PO7
		(OR)				
2.	a)	An industry utilizes 0.5 ml of oil fuel per month. It has also been estimated that for every 1 ml of oil fuel burnt in the factory, per year, the quantities of various pollutants emitted are given as. P.M= 2.9 t/yr, SO_2 = 60 t/yr, NO_x = 8 t/yr, HC = 0.4 t/yr, CO = 0.5 t//yr. Determine the height of chimney required for the safe dispersion of pollutants.	6 Marks	L5	CO1	PO1 PO2
	b)	Derive the mathematical expression to predict air quality by using box model.	6 Marks	L4	CO1	PO1 PO2 PO6 PO7

UNIT-II

3.	a)	Discus about the design and operation of centrifugal separators with a neat diagram.	6 Marks	L6	CO2	PO1 PO2 PO3
	b)	Explain the working principle and operation of wet scrubbers with a neat sketch?	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Discuss the control of air pollution from automobiles.	6 Marks	L6	CO2	PO1 PO2
	b)	Explain the latest developments in control of air and noise pollution.	6 Marks	L2	CO2	PO1 PO5 PO6

UNIT-III

5.	a)	Explain the E-coli test for bacteriological analysis of water.	6 Marks	L2	CO3	PO1 PO2 PO5 PO6
	b)	Compare and contrast the slow sand filters and rapid sand gravity filters.	6 Marks	L5	CO3	PO1 PO2

(OR)

6.	a)	Explain the nitrogen, sulphur and carbon cycles of decomposition and its importance in sewage treatment.	6 Marks	L2	CO3	PO1 PO2
	b)	The effluent from a primary settling tank is applied to a standard rate filter at the rate of 3 MLD, having a BOD of 175 mg/l. Determine the depth and volume of filter. Adopting surface loading of 2000 l/m^2/day and an organic loading of 150 g/m^3/day. Also determine the efficiency of such filter unit.	6 Marks	L5	CO3	PO1 PO2
		UNIT-IV				
7.	a)	Discuss about the methods for minimizing the soil pollution.	6 Marks	L6	CO4	PO1 PO2 PO5 PO10
	b)	Explain the effective measures to control soil pollution.	6 Marks	L2	CO4	PO1 PO2 PO5
		(OR)				
8.	a)	What are the soil pollutants? List the soil quality standards.	6 Marks	L1	CO4	PO1 PO2 PO5
	b)	Discuss the latest developments in the soil pollution control.	6 Marks	L6	CO4	PO1 PO2 PO5 PO6
		UNIT-V				
9.	a)	Discuss the composition and characteristics of solid waste.	6 Marks	L6	CO5	PO1 PO2 PO6 PO7
	b)	Explain 6R concept in solid waste management.	6 Marks	L2	CO5	PO1 PO2 PO6 PO7
		(OR)				
10.	a)	Explain the sanitary land fill and composting methods for disposal of solid waste.	6 Marks	L2	CO5	PO1 PO2 PO5 PO6
	b)	Discuss the latest developments in solid waste management.	6 Marks	L6	CO5	PO1 PO2 PO5 PO6

RURAL TECHNOLOGY

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss the development of technology in India before and after Independence period.	6 Marks	L2	CO1	PO1 PO5
	b)	What are the innovative technologies that are adopted in rural development?	6 Marks	L4	CO1	PO1 PO2 PO6
		(OR)				
2.	a)	Discuss any two techniques that are adopted for poverty eradication in rural areas.	6 Marks	L2	CO1	PO1 PO6
	b)	Explain in detail the role of NABARD in development of various sectors in India.	6 Marks	L4	CO1	PO1 PO2

UNIT-II

3.	a)	List out various sources of non-conventional energy. Discuss with their advantages and disadvantages.	6 Marks	L2	CO2	PO1 PO4 PO5 PO7
	b)	Explain solar pump in agriculture, solar cooker with their working procedure.	6 Marks	L4	CO2	PO1 PO2
		(OR)				
4.	a)	Define energy and describe various types of alternative sources of energy.	6 Marks	L2	CO2	PO1 PO5 PO6
	b)	Draw the sketch of solar heater and explain its working principle.	6 Marks	L4	CO2	PO1 PO2 PO5 PO6 PO7

UNIT-III

5.	a)	Explain how food and agro based technologies gives empowerment to people who are living in rural areas.	6 Marks	L5	CO3	PO1 PO2 PO5
	b)	What are the various traditional and innovative technologies in building construction? Discuss briefly.	6 Marks	L4	CO3	PO1 PO2 PO5 PO6

(OR)

6.	a)	Discuss various building materials used in rural areas with their merits and de-merits.	6 Marks	L5	CO3	PO1 PO2 PO6
	b)	Explain the role of tissue culture and nursery in development of rural areas.	6 Marks	L4	CO3	PO1 PO2 PO5
		UNIT-IV				
7.	a)	In a village the ground water levels were dropped up to great depths. Suggest better techniques to increase the ground water levels by adopting rainwater harvesting technologies.	6 Marks	L4	CO4	PO1 PO2 PO5 PO7 PO8
	b)	Suggest the suitable water purification techniques to solve drinking water problems in rural areas.	6 Marks	L4	CO4	PO1 PO2 PO5 PO7
		(OR)				
8.	a)	Write the drinking water standards and discuss simple treatments used in rural areas.	6 Marks	L4	CO4	PO1 PO2 PO5 PO6
	b)	Explain how the economic status of people in rural areas will enhance by forming medical and aeromatic plants.	6 Marks	L2	CO4	PO1 PO5
		UNIT-V				
9.	a)	Discuss the need and necessity of technology in development of rural areas.	6 Marks	L4	CO5	PO1 PO2 PO4 PO6
	b)	Explain how the agriculture and service sectors will increase in rural areas with private sector participation.	6 Marks	L2	CO5	PO1 PO5
		(OR)				
10.	a)	Discuss with a case study how the government schemes will effect on rural development.	6 Marks	L4	CO5	PO1 PO2 PO5
	b)	Write a note on village adoptions.	6 Marks	L4	CO5	PO1 PO2 PO5

CONTROL SYSTEMS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

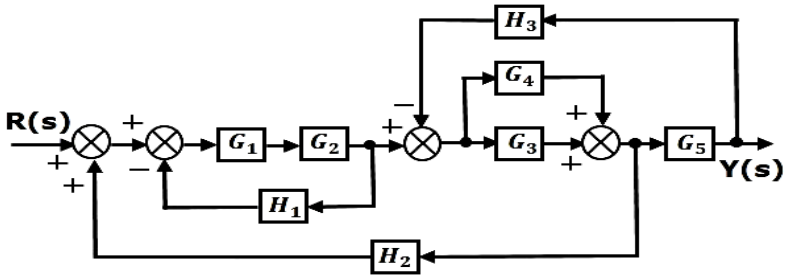
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Differentiate open-loop and closed loop systems.	6 Marks	L3	CO1	PO1
	b)	Derive the expression for the transfer function of field controlled DC motor.	6 Marks	L3	CO1	PO1

(OR)

2.		Find the transfer function for the given system using block diagram reduction.	12 Marks	L3	CO1	PO5



UNIT-II

3.	a)	Measurements conducted on a servo mechanism show the system response to be $c(t) = 1 + 0.2e^{-60t} - 1.2\ e^{-10t}$ when subjected to a unit step input: i) Obtain the expression for closed loop transfer function. ii) Determine the undamped natural frequency and the damping ratio of the system.	8 Marks	L3	CO2	PO2
	b)	What is integral control and explain how it affects the time response of a system?	4 Marks	L2	CO2	PO7

(OR)

4.	a)	The open loop transfer function of a servo system with unity feedback is G(s) = 10/s(0.1s+1). Evaluate the dynamic error coefficients when the system is subjected to an input given by the polynomial $r(t)=a_0+a_1t+(a_2/2)t^2$.	6 Marks	L4	CO3	PO4
	b)	Write a short note on static error constants and expression for steady state error for unit step, unit ramp and unit acceleration inputs.	6 Marks	L3	CO3	PO1

UNIT-III

5.	a)	Sketch the Bode plot for the system with open loop transfer function. G(s) = 2000/s(s+2)(s+100) Determine the phase cross over frequency; gain cross over frequency, phase margin and gain margin.	6 Marks	L3	CO3	PO4
	b)	Draw the root locus for the system whose open loop transfer function is given by G(s) = K/s(s+1)(s+3) and determine the value of K where the system becomes marginally stable.	6 Marks	L3	CO3	PO4

(OR)

6.	a)	Investigate the stability of a closed loop control system whose characteristic equation is given by $s^6+ s^5+ 5s^4+ 3s^3+ 2s^2+4s+8=0$	4 Marks	L3	CO3	PO4
	b)	Draw the Nyquist plot and assess the stability of the closed loop system whose open loop transfer function is given by $G(s) = \frac{(s+4)}{(s+1)(s-1)}$.	8 Marks	L3	CO3	PO4

UNIT-IV

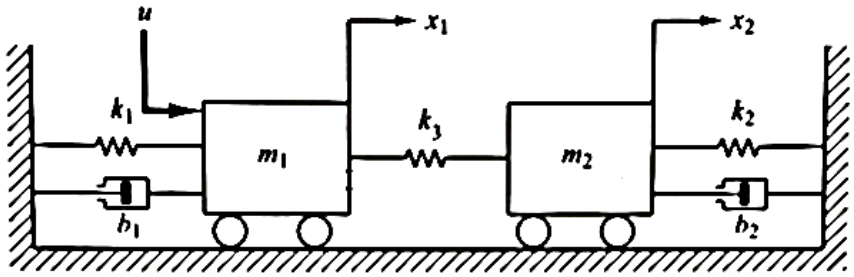
7.	Design a lead compensator using Bode Plot Method such that the velocity error constant K_v = 20 sec^{-1} and Phase Margin PM = 40° For the system $G(s) = \frac{K}{s(s+2)}$.	12 Marks	L4	CO4	PO3

(OR)

8.	Design a lag compensator using Bode Plot Method such that the velocity error constant K_v = 5 sec^{-1}, Phase Margin PM = 50° and Gain Margin GM>10 for the system $G(s) = \frac{K}{s(1+s)\left(1+\frac{1}{2}s\right)}$.	12 Marks	L4	CO4	PO3

UNIT-V

9.	Obtain mathematical model and state space representation of mechanical system show in figure where *u* is the input and X_1, X_2 are the outputs. Write the state equation in matrix form.	12 Marks	L3	CO5	PO2



(OR)

10.	Find a state space model for the following electrical network shown in figure below.	12 Marks	L3	CO5	PO2

POWER SYSTEM OPERATION AND CONTROL

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Draw the flow chart for obtaining optimal scheduling of generating units by neglecting the transmission losses.	6 Marks	L2	CO1	PO2
	b)	Explain the following terms: i) Connected Load. ii) Load Factor. iii) Diversity Factor.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Write down similarities and dissimilarities of load curve and load duration curves.	6 Marks	L2	CO1	PO2
	b)	The fuel costs of two units are given by $F_1 = 1.5+20P_{G1} + 0.1P_{G1}^2$Rs/h and $F_2 = 1.9+30P_{G2}^2$Rs/h PG_1, PG_2 are in MW. Find the optimal schedule neglecting the losses, when the total demand is 200 MW.	6 Marks	L3	CO1	PO4
		UNIT-II				
3.		Describe the hydro thermal economic load scheduling. Derive the necessary equations.	12 Marks	L2	CO2	PO5
		(OR)				
4.	a)	In a two plant operation system, the hydro plant is operate for 8hrs during each day and the steam plant is operate all over the day. The characteristics of the steam and hydro plants are $C_S=20+30P_S+0.04P_S^2$Rs/h and $W_H =7.5\ P_H+0.0012P_H^2$ m^3/Sec. When both plants are running, power flow from steam plant to load is 190 MW and the total quantity of water is used for hydro plant operation during 8 hrs is 220 x $106m^3$. Determine generation of hydro plant and cost of water used. Neglect transmission losses.	6 Marks	L3	CO2	PO4
	b)	Illustrate the advantages of operation of power plants with hydro thermal combinations.	6 Marks	L4	CO2	PO5
		UNIT-III				
5.		Define unit commitment problem, Mention the constraints and Explain the need for unit commitment problem in operation of power system.	12 Marks	L3	CO3	PO2
		(OR)				
6.		With the help of flowchart, explain the solution of unit commitment problem using dynamic programming.	12 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	What are the basic requirements needed for control strategy in LFC system?	8 Marks	L2	CO4	PO1
	b)	Describe the fundamental characteristics of an excitation system.	4 Marks	L3	CO4	PO2
		(OR)				

8.		Clearly explain about the generator-load model with all relevant equations and represent generator load model with a block diagram.	12 Marks	L2	CO4	PO1

UNIT-V

9.		Obtain the mathematical modeling of tie line power in an interconnected system and its block diagram.	12 Marks	L3	CO5	PO4

(OR)

10.	a)	Evaluate proportional plus integral load frequency control of a single area system with a neat block diagram.	8 Marks	L3	CO5	PO1
	b)	Explain the importance of keeping voltage and frequency constant with examples.	4 Marks	L4	CO5	PO2

ELECTRICAL MACHINE DESIGN

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Discuss about the factors that influence the choice of specific electric and magnetic loadings in the design of rotating machines.	12 Marks	L2	CO1	PO1
		(OR)				
2.	a)	In a DC machine the maximum flux density in the armature teeth is to be limited to 2.0Wb/m^2. The ratio of minimum width of tooth to slot pitch is 0.4. Calculate the limiting value of specific magnetic loading if the ratio pole arc to pole pitch =0.7.	4 Marks	L3	CO1	PO2
	b)	List and explain various conducting materials used in electrical machines.	8 Marks	L2	CO1	PO8

UNIT-II

3.	a)	Derive the relation between real and apparent flux densities in DC machine.	6 Marks	L2	CO2	PO5
	b)	Find the main dimensions and the number of poles of a 37kW,230V, 1400 r.p.m shunt motor so that a square pole face is obtained. The average gap density is 0.5Wb/m^2 and the ampere conductors per metre are 22000. The ratio of pole arc to pole pitch is 0.7 and the full load efficiency is 90%.	6 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Explain the selection of number of poles in dc machine and mention the advantages and disadvantages of large number of poles.	6 Marks	L2	CO2	PO1
	b)	Design a suitable commutator for a 350kW, 600 r.p.m, 440V, 6 pole DC generator having an armature of 0.75m. The number of coils is 288. Assume suitable values wherever necessary.	6 Marks	L3	CO2	PO3

UNIT-III

5.		Determine the dimensions of the core, the number of turns and the cross-sectional area of conductors in the primary and secondary windings of a 100kVA, 2200/480V single-phase core type transformer to operate at a frequency of 50Hz, by assuming the following data. Approximate volt per turn =7.5V. Maximum flux density =1.2Wb/m^2. Ratio of effective cross-sectional area of core to square of diameter of circumscribing circle is 0.6. Ratio of height to width of window is 2. Window space factor = 0.28. Current density =2.5A/mm^2.	12 Marks	L4	CO3	PO3
		(OR)				
6.		The tank of 1250kVA, natural oil cooled transformer has the dimensions length, width and height as 1.55 x 0.65 x 1.85m respectively. The full load loss is13.1kW, loss dissipation due to radiations =6W/m^2-°C, loss dissipations due to convection =6.5W/m^2-°C, Improvement in convection due to provision of tubes=40%, Temperature rise =40°C, Length of each tube =1m, Diameter of tube=50mm. Find the number of tubes for this transformer. Neglect the top and bottom surfaces of the tank as	12 Marks	L4	CO3	PO7

regards the cooling.

UNIT-IV

7.		Determine the approximate diameter and length of the stator core, number of stator slots and the number of conductors for a 11kW, 400V, 3-phase, 4 pole, 1425 r.p.m delta connected induction motor. Adopt a specific magnetic loading of 0.45Wb/m^2 and a specific electric loading of 23000A/m. Assume full load efficiency and power factor as 0.85 and 0.88 respectively. The ratio of core length to pole pitch is 1. The stator employs a double layer winding.	12 Marks	L4	CO4	PO4
		(OR)				
8.		A 90kW, 500V, 50Hz, 3-phase, 8 pole induction motor has a star connected stator winding accommodated in 63 slots with 6 conductors per slot. If the slip ring voltage on open circuit is to be about 400V, find a suitable rotor winding, stating: i) number of slots ii) number of conductors per slot iii) coil span iv) slip ring voltage on open circuit v) approximate full load current per phase in rotor. Assume efficiency=0.9 and power factor =0.86.	12 Marks	L4	CO4	PO4

UNIT-V

9.	a)	Mention the factors that govern the design of field system of alternator.	4 Marks	L1	CO4	PO1
	b)	Determine the main dimensions of a 2500kVA, 187.5 r.p.m, 50Hz, 3-phase, 3kV, salient pole synchronous generator. The generator is to be a vertical, water wheel type. The specific magnetic loading is 0.6Wb/m^2 and the specific electric loading is 34000A/m. Use circular poles with ratio of core length to pole pitch =0.65. Specify the type of pole construction used if the run away speed is about 2 times the normal speed.	8 Marks	L3	CO4	PO2
		(OR)				
10.		Explain the step by step procedure for the design of field winding of synchronous machines.	12 Marks	L2	CO4	PO1

ENERGY SYSTEMS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		Write the types of power plant and explain hydroelectric power plant layout in detail with neat sketch and write the names of hydroelectric power plant in India	12 Marks	L2	CO1	PO1
		(OR)				
2.		Describe the schematic arrangement of a thermal power station and explain the function of each briefly.	12 Marks	L2	CO1	PO7
		UNIT-II				
3.		Describe with a neat sketch the principle of operation of open cycle gas turbine power plant. Discuss its advantages over a steam turbine power plant. Also give applications of their type of power plant.	12 Marks	L2	CO2	PO6
		(OR)				
4.	a)	What are the Limitations of Fossil Fuels	6 Marks	L2	CO2	PO7
	b)	What are the effects of Hydro Electric Projects and why there is need for Renewable Energy Sources	6 Marks	L2	CO2	PO6
		UNIT-III				
5.		Explain about photo-voltaic energy conversion with neat sketch. List out advantages and disadvantages of the above system.	12 Marks	L2	C03	PO1
		(OR)				
6.		Explain about Horizontal and Vertical Axis wind turbines with diagrams.	12 Marks	L2	C03	PO1
		UNIT-IV				
7.		Explain the principle of OTEC operations with diagram	12 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Explain about Simple Single Pool Tidal system.	6 Marks	L2	C04	PO1
	b)	Explain working of H_2– O_2fuel cell.	6 Marks	L2	C04	PO7
		UNIT-V				
9.		Briefly discuss about the operating modes of co-generating systems.	12 Marks	L2	C05	PO7
		(OR)				
10.		Explain about Stand-alone PV-wind system with a block diagram	12 Marks	L2	C05	PO1

COMPUTER ORGANIZATION AND ARCHITECTURE

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Identify and analyze four main structural elements of computer.	6 Marks	L3	CO1	PO2
	b)	Paraphrase about working principle of flash memory.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Exploit the Memory hierarchy and its characteristics	6 Marks	L3	CO1	PO3
	b)	Illustrate the software and performance in computer system.	6 Marks	L1	CO1	PO5
		UNIT-II				
3.	a)	Evaluate and explain with relevant diagrams the 8085 architecture and its working.	6 Marks	L2	CO2	PO3
	b)	With timing diagram, determine the memory read operation in 8085microprocessor	6 Marks	L2	CO2	PO2
		(OR)				
4.	a)	List out the I/O and machine control instructions in microprocessor	6 Marks	L3	CO2	PO1
	b)	Discuss about the arithmetic and logic operations of 8085 microprocessor in detailed.	6 Marks	L1	CO2	PO5
		UNIT-III				
5.	a)	Summarize different types of interrupts used in 8085 microprocessor	6 Marks	L2	CO3	PO2
	b)	Show the control word format of 8255 and explain how each bit is programmed.	6 Marks	L2	CO3	PO3
		(OR)				
6.	a)	Differentiate between memory mapped I/O and I/O mapped I/O.	6 Marks	L1	CO3	PO5
	b)	Analyze and present the architecture of 8255.	6 Marks	L3	CO3	PO1
		UNIT-IV				
7.	a)	What is instruction cycle? Briefly explain with the help of state diagram.	6 Marks	L1	CO4	PO1
	b)	Interpret how registers are connected to common bus in the computer with a neat diagram.	6 Marks	L2	CO4	PO3
		(OR)				
8.	a)	Contrast various computer instruction formats with neat sketches.	6 Marks	L1	CO4	PO4
	b)	Present the concept of stored program organization.	6 Marks	L2	CO4	PO2
		UNIT-V				
9.	a)	Clarify the design of micro programmed control unit in detail.	6 Marks	L2	CO4	PO2
	b)	Explicate the selection of address for control memory.	6 Marks	L1	CO4	PO5
		(OR)				
10.	a)	With neat sketch, determine the decoding of micro operation fields.	6 Marks	L3	CO4	PO1
	b)	Specify how data hazard occurs in pipelining in detail.	6 Marks	L2	CO4	PO3

COMPUTER AIDED DESIGN AND MANUFACTURING

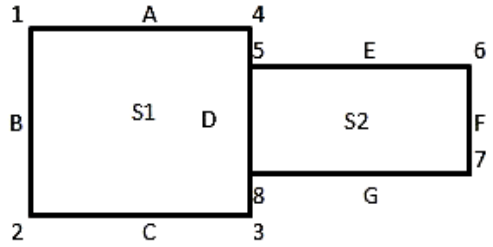
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What are the reasons for implementing a computer aided design system?	6 Marks	L2	CO1	PO1 PO2
	b)	Draw and explain the flow chart of product life cycle.	6 Marks	L2	CO1	PO1 PO2
		(OR)				
2.	a)	Describe nature and role of different elements in CIM system.	6 Marks	L2	CO1	PO1 PO2
	b)	Can you prepare all possible data base of the given object shown below?	6 Marks	L2	CO1	PO1 PO2

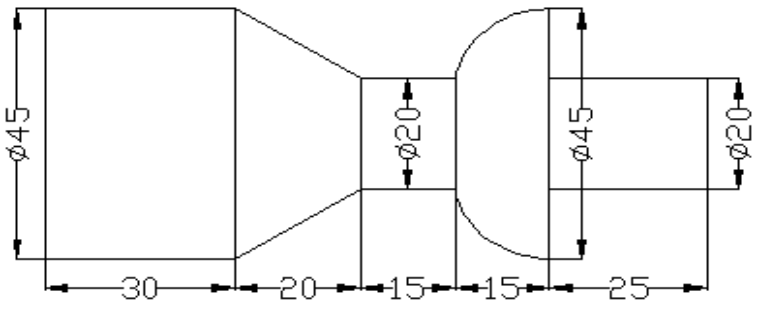


UNIT-II

3.	a)	Find the transformed coordinates when a square [(1, 1), (2, 1), (1,2) and (2, 2)] is rotated by 90° anticlockwise about a line passing through one of its vertex (1, 1) and parallel to x-axis.	6 Marks	L2	CO2	PO2 PO3
	b)	Reflect your understanding about synthetic curves commonly used in CAD with examples.	6 Marks	L2	CO2	PO2 PO3
		(OR)				
4.	a)	What is meant by geometric transformation? What is the need for it?	6 Marks	L2	CO2	PO1 PO2
	b)	Develop the parametric forms for Bezier and B spline curves	6 Marks	L3	CO2	PO1 PO2

UNIT-III

5.		Write the CNC part program to machine the component to get final profile as shown in figure.	12 Marks	L2	CO3	PO1 PO5



(OR)

6.	a)	Describe various G and M codes used in CNC machines.	6 Marks	L2	CO3	PO1 PO5
	b)	What are the basic components of NC system and explain the function of each component?	6 Marks	L2	CO3	PO1 PO2

UNIT-IV

7.	a)	Discuss the objectives of CAQC. Explain the different computer aided inspection methods.	6 Marks	L2	CO4	PO1 PO5
	b)	With a neat diagram, explain the working of generative CAPP system.	6 Marks	L2	CO4	PO1 PO5

(OR)

8.	a)	Discuss the Structure of Automated process planning system and compare it with conventional process planning.	6 Marks	L2	CO4	PO1 PO2
	b)	Describe any one contact and any one non contact Inspection methods.	6 Marks	L2	CO4	PO1 PO2 PO5

UNIT-V

9.	a)	Describe three stage transfer lines.	6 Marks	L2	CO5	PO1 PO2
	b)	Classify robot end effectors and explain any one.	6 Marks	L2	CO5	PO1 PO2

(OR)

10.	a)	Discuss elements of automation.	6 Marks	L2	CO5	PO1 PO2
	b)	Explain robot joints and grippers.	6 Marks	L2	CO5	PO1 PO2 PO5

CODE No.: 19BT50302 SVEC-19

OPERATIONS RESEARCH

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define and explain the significance of Slack variable, Surplus variable, and Artificial variable in linear programming resource allocation model.	4 Marks	L2	CO1	PO1 PO2
	b)	A patient visits the doctor to get treatment for ill health. The doctor examines the patient and advises him to consume **at least** 40 units of vitamin *A* and 50 units of vitamin *B* daily for a specified time period. He also advises the patient that to get vitamin *A* and vitamin *B* he has to drink tonic *X* and tonic *Y* that have both vitamin *A* and vitamin *B* in a proportion. One unit of tonic *X* consists 2 units of vitamin *A* and 3 units of vitamin *B* and one unit of tonic *Y* consists of 4 units of vitamin *A* and 2 units of vitamin *B*. These tonics are available in medical shops at a cost of Rs.3.00 and Rs.2.50 per unit of *X* and *Y* respectively. Now the problem of patient is how much of *X* and how much of *Y* is to be purchased from the shop to **minimize** the total cost and at the same time he can get required amounts of vitamins *A* and *B*. Formulate an LPP for this and hence find the optimal product mix.	8 Marks	L3	CO1	PO1 PO2

(OR)

2.	a)	Answer the following in brief. i) Outline the scope of OR techniques. ii) Purpose of Artificial variable. iii) Purpose of slack/surplus variable.	5 Marks	L2	CO1	PO1 PO2
	b)	Solve the following LPP with Two- Phase Simplex method. Maximize $Z=3x_1-x_2$. S/t $2x_1+x_2\geq 2$; $x_1+3x_2\leq 2$; $x_2\leq 4$ and $x_1, x_2 \geq 0$	7 Marks	L3	CO1	PO1 PO2

UNIT-II

3.	a)	List the applications of AP.	2 Marks	L1	CO2	PO1 PO2
	b)	A manager has 4 jobs on hand to be assigned to 3 of his clerical staff. Clerical staff differs in efficiency. The efficiency is a measure of time taken by them to do various jobs. The manager wants to assign the duty to his staff, so that the total time taken by the staff should be minimum. The matrix given below shows the time taken by each person to do a particular job. Help the manager in assigning the jobs to the personnel.	10 Marks	L3	CO2	PO1 PO2

Jobs	Men (time taken to do job in hrs.)		
	X	Y	Z
A	10	27	16
B	14	28	7
C	36	21	16

D	19	31	21

(OR)

4.	a)	What is degeneracy in transportation problems? How can you resolve it?	2 Marks	L2	CO1	PO1 PO2
	b)	Solve the following Transportation Problem to find the minimum cost.	10 Marks	L3	CO1	PO1 PO2

Factories→ ↓Markets	I	II	III	IV	Supply
A	2	3	11	7	6
B	1	0	6	1	1
C	5	8	15	9	10
Demand	7	5	3	2	--

UNIT-III

5.	a)	Give the limitations of game theory in brief.	2 Marks	L2	CO2	PO1 PO2
	b)	Solve the following game.	10 Marks	L3	CO2	PO1 PO2

Player B

		I	II	III	IV
	I	-5	3	1	20
Player A	II	5	5	4	6
	III	-4	2	0	5

(OR)

6.	a)	Explain in detail about the costs associated with inventory.	4 Marks	L2	CO3	PO1 PO2
	b)	The demand for an item is 8000 units per annum and the unit cost is Re.1/-. Inventory carrying charges of 20% of average inventory cost and ordering cost is Rs. 12.50 per order. Calculate optimal order quantity, optimal order time, optimal inventory cost and number of orders.	8 Marks	L3	CO3	PO1 PO2

UNIT-IV

7.	a)	Define the three time estimates in PERT.	2 Marks	L2	CO4	PO1 PO2
	b)	For the network given below, calculate the various starts and finish times of the activities and also different floats.	10 Marks	L3	CO5	PO1 PO2 PO3

Activity	A	B	C	D	E	F	G	H
Immediate Predecessor	-	A	A	C	C	B,C	B,C	D,F
Duration	3	2	3	3	2	7	5	6

(OR)

8.	a)	What are the rules of network construction?	2 Marks	L2	CO5	PO1 PO2
	b)	A project is comprised of 8 independent activities as given below:	10 Marks	L3	CO5	PO1 PO2 PO3

Activity	A	B	C	D	E	F	G	H
Predecessor activity	-	-	-	A	C	B, D, E	A	C
Optimistic time	1	2	3	2	4	5	2	1
Normal time	3	3	4	9	5	6	4	3
Pessimistic time	5	4	5	10	6	13	6	6

i) What is the expected time to complete the project?

ii) What is the probability of completing the project in 20 weeks (or) less?

UNIT-V

9.	a)	Explain the structure of a Queuing system in detail.	4 Marks	L2	CO4	PO1 PO2
	b)	The arrival rate of customers at a banking counter follows Poisson distribution with a mean of 45 per hour. The service rate of the counter clerk also follows Poisson distribution with a mean of 60 per hour. i) What is the probability of having 0, 5 and 10 customers in the system? ii) Find the average number of customers waiting in the queue and in the system. iii) Find average waiting time of the customer in the queue and in the system.	8 Marks	L3	CO4	PO1 PO2 PO3

(OR)

10.	a)	What is Monte-Carlo simulation? Explain the steps involved.	4M	L2	CO5	PO1 PO2
	b)	A tourist car operator finds that during the past few months the car's use has varied so much that the cost of maintaining the car varied considerably. During the past 200 days the demand for the car fluctuated as below:	8M	L3	CO5	PO1 PO2 PO3

Trips per week	Frequency	Probability
0	16	0.08
1	24	0.12
2	30	0.15
3	60	0.30
4	40	0.20
5	30	0.15

Using the following random numbers, simulate the demand for a ten week period.
82, 95, 18, 96, 20, 84, 56, 11, 52, 03.

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	With the help of neat sketch, explain the working principle of Benson boiler.	6 Marks	L2	CO1	PO1 PO2 PO3 PO4 PO6
	b)	Discuss the construction and working principle of Cochran boiler indicating the flow path of flue gases and water circulation.	6 Marks	L2	CO1	PO1 PO2 PO3 PO4 PO6
		(OR)				
2.	a)	Explain induced draught and forced draught.	6 Marks	L3	CO1	PO1 PO2 PO3 PO4 PO6
	b)	Determine the height of the chimney to produce a static draught of 22 mm of water if the mean flue gas temperature in chimney is 290ºC and atmospheric temperature is 28ºC. The gas constant for air is 0.287 kJ/kg/K. Assume barometer reading as 760mm of Hg.	6 Marks	L3	CO1	PO1 PO2 PO3 PO4 PO6

UNIT-II

3.	a)	In a steam nozzle, the steam expands from 10 bar and 250ºC to 2 bar. Assuming isentropic expansion and negligible velocity determine: i) Throat area. ii) Exit velocity. iii) Exit area of the nozzle.	6 Marks	L3	CO2	PO1 PO2 PO3 PO4 PO6
	b)	What is the effect of friction flow through a steam nozzle? Explain with the help of h-s diagram.	6 Marks	L3	CO2	PO1 PO2 PO3 PO4 PO6
		(OR)				
4.	a)	Explain the effect of air leakage in a condenser.	6 Marks	L3	CO2	PO1 PO2 PO3 PO4 PO6
	b)	The inlet and out let temperatures of cooling water to a condenser are 37.5ºC and 30ºC respectively. If the vacuum in the barometer is 706 mm of mercury with barometer reading 760mm. Determine condenser efficiency.	6 Marks	L3	CO2	PO1 PO2 PO3 PO4

						PO6
		UNIT-III				
5.	a)	Distinguish between impulse and reaction turbine.	6 Marks	L2	CO3	PO1 PO2 PO3 PO4 PO6
	b)	The velocity of steam exiting the nozzle of the impulse stage of a turbine is 400 m/s. The blade operates close to the maximum balding efficiency. The nozzle angle is 20º. Considering equiangular blades and neglecting blade friction, calculate for a steam flow of 0.6 kg/s, the diagram power and diagram efficiency.	6 Marks	L3	CO3	PO1 PO2 PO3 PO4 PO6
		(OR)				
6.	a)	Define the term degree of reaction and show that for parson's reaction turbine the degree of reaction is 50%.	6 Marks	L2	CO3	PO1 PO2 PO3 PO4 PO6
	b)	A certain stage of Parson's turbine consists of one row of fixed blades and one row of moving blades. The details of the turbine are: The mean diameter of the blades = 68cm, RPM of the turbine = 3600, the mass of the steam passing per sec = 13.5 Kg, Steam velocity at the exit from fixed blades = 143.7m/s, the blade outlet angle = 20º. Calculate the power developed in the stage and gross efficiency. Assuming carry over coefficient as 0.74 and the efficiency of conversion of heat energy into kinetic energy in the blade channel as 0.92.	6 Marks	L3	CO3	PO1 PO2 PO3 PO4 PO6
		UNIT-IV				
7.	a)	Derive an expression for the COP of Bell-Coleman cycle.	6 Marks	L2	CO4	PO1 PO2 PO3 PO4 PO6 PO7
	b)	An air refrigeration plant working on Bell Coleman cycle operates between 1 bar and 5 bar. The adiabatic efficiency of compression is 85% and expansion is 90%. Find out the COP of the system and its tonnage when the air flow rate is 1kg/sec. The cooler temperature is 270C and refrigerant temperature is 0ºC. Also, draw the cycle on P-V and T-S planes.	6 Marks	L3	CO4	PO1 PO2 PO3 PO4 PO6 PO7
		(OR)				
8.	a)	Explain the working of simple vapour absorption refrigeration system with a neat sketch.	6 Marks	L2	CO4	PO1 PO2 PO3 PO4 PO6 PO7
	b)	In a standard vapour compression refrigeration cycle, operating between an evaporator temperature of -10ºC and a condenser temperature of 40ºC, the enthalpy of refrigerant, Freon -12 at the end of the compression is 220kJ/kg. Show the cycle diagram on T-s plane. Calculate i) COP of the cycle. ii) refrigerating	6 Marks	L3	CO4	PO1 PO2 PO3 PO4 PO6

capacity. iii) compressor power. Assume mass flow rate 1kg/min. Property table of F-12 is given below. PO7

T (ºC)	P(bar)	h_f (kJ/kg)	h_g (kJ/kg)
-10	0.2191	26.85	183.1
40	0.9607	74.53	203.1

UNIT-V

9.	a)	Outline the layout of summer Air-conditioning system and explain briefly.	6 Marks	L3	CO5	PO1 PO2 PO3 PO4 PO6 PO7
	b)	5 grams of water vapour per kg of atmospheric air is removed and temperature of air after removing the water vapour becomes 25ºC DBT. Find the following: i) R.H ii) D.P.T Assume condition of atmospheric air is 35ºC and 60% R.H and a pressure of 1.013 kg/cm.	6 Marks	L3	CO5	PO1 PO2 PO3 PO4 PO6 PO7
		(OR)				
10.	a)	Explain the process of Heating and dehumidification.	6 Marks	L2	CO5	PO1 PO2 PO3 PO4 PO6 PO7
	b)	Air is cooled from 39^0C DBT and 29% RH to 24^0C at the rate of $5m^3/s$. Calculate the capacity of the cooling coil if the surface of the coil is 20^0C. Also, calculate bypass factor.	6 Marks	L3	CO1	PO1 PO2 PO3 PO4 PO6 PO7

AUTOMOBILE ENGINEERING
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		Explain briefly various parts of an automobile with the help of a neat sketch.	12 Marks	L2	CO1	PO2
		(OR)				
2.	a)	List different types of nozzles and describe the working of pintle nozzle.	8 Marks	L2	CO1	PO2
	b)	Justify the need for a governor in a CI engine and list various types of governors.	4 Marks	L1	CO1	PO2
		UNIT-II				
3.	a)	Describe the function of a thermostat.	4 Marks	L2	CO2	PO2
	b)	With the help of a neat sketch elucidate tubular radiator and mentions the materials used for radiators.	8 Marks	L2	CO2	PO1
		(OR)				
4.		Elucidate the working of electronic ignition system and explain the benefits of electronic ignition system over ignition system with distributor.	12 Marks	L2	CO2	PO2
		UNIT-III				
5.		Draw simple wiring diagram of electric system of an automobile and mention the necessity of each component.	12 Marks	L2	CO3	PO1
		(OR)				
6.		Explain the following terms: i)VVT. ii)ASS. iii) EBD.	12 Marks	L2	CO3	PO2
		UNIT-IV				
7.	a)	Describe the working of a synchromesh type of gear box.	8 Marks	L2	CO4	PO2
	b)	Differentiate between a live and a dead axle.	4 Marks	L1	CO4	PO2
		(OR)				
8.		Explain steering geometry.	12 Marks	L2	CO4	PO1
		UNIT-V				
9.		Describe the MacPherson strut assembly of independent suspension system. Compare it with the double wish bone suspension system.	12 Marks	L2	CO5	PO2
		(OR)				
10.	a)	What is brake adjustment? When is it required?	4 Marks	L1	CO5	PO1
	b)	Elucidate the working of hydraulic braking system with necessary diagram.	8 Marks	L2	CO5	PO2

ARTIFICIAL INTELLIGENCE AND ROBOTICS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		List out AI Techniques and explain in detail about LISP programming.	12 Marks	L2	CO1	PO1
		(OR)				
2.		Explain the concept of rationality and structure of Intelligent agents.	12 Marks	L2	CO1	PO1
		UNIT-II				
3.		What are the various types of robot configuration? Explain with neat sketch.	12 Marks	L2	CO2	PO1 PO2
		(OR)				
4.	a)	What do you understand by degree of freedom (DOF)? How many DOFs are required to position an end effect or at any point in 3-D space?	6 Marks	L2	CO2	PO1 PO2
	b)	Discuss in detail about Joint notation scheme in robotics.	6 Marks	L2	CO2	PO1 PO2
		UNIT-III				
5.	a)	What is homogenous transformation of coordinates? Write homogenous transformation matrices for rotation in 3D.	6 Marks	L2	CO3	PO1 PO2
	b)	Distinguish forward and inverse kinematics.	6 Marks	L3	CO3	PO1 PO2
		(OR)				
6.		Derive the expression for planar R-R Manipulator using Lagrange Euler Formulations.	12 Marks	L3	CO3	PO1 PO2 PO3
		UNIT-IV				
7.	a)	Determine the time required for each joint of a three-axis RRR manipulator to travel the following distances using skew motion; Joint 1, 1000; joint 2, 300; and joint 3, 600. All joints travel at a rotation velocity of 150/s.	8 Marks	L3	CO4	PO1 PO2 PO3
	b)	Define straight line motion and joint integrated motion in robot manipulator.	4 Marks	L1	CO4	PO1
		(OR)				
8.	a)	Discuss the functions of sensors used in robotics.	6 Marks	L2	CO4	PO1
	b)	Explain the working of any two position sensors with neat sketches.	6 Marks	L2	CO4	PO1 PO2
		UNIT-V				
9.		Write a VAL program for inserting a bolt in a hole by approaching 50mm above the bolt, by moving to an intermediate point A, along a straight line and approaching the hole 70mm from above and finally setting the gripper 50mm above the hole.	12 Marks	L3	CO5	PO1 PO2 PO3
		(OR)				
10.	a)	Discuss in detail about modern robots and its future applications.	6 Marks	L2	CO5	PO1
	b)	Explain the concept of robot intelligence and task planning.	6 Marks	L2	CO5	PO1

CODE No.: 19BT50313 SVEC-19

NON-CONVENTIONAL ENERGY SOURCES

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Enumerate the prospects of Non-conventional energy sources availability in India.	6 Marks	L1	CO1	PO1
	b)	What are the advantages and limitations of renewable energy sources?	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Illustrate the working principles of Pyrheliometer and Sunshine recorder.	6 Marks	L2	CO1	PO1
	b)	Enumerate the advantages, disadvantages and limitations of solar energy.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	State the advantages of disadvantages of concentrated collectors over flat plate collectors.	6 Marks	L2	CO2	PO1
	b)	Derive an expression for efficiency of a flat plate collector.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Classify concentrating collectors and explain the working of parabolic concentrating collector with a neat sketch.	6 Marks	L2	CO2	PO1
	b)	Write a short note on Air collectors and applications of solar air heaters.	6 Marks	L2	CO2	PO1 PO2
		UNIT-III				
5.	a)	Explain photovoltaic conversion and state the reasons for low efficiency of solar cells.	6 Marks	L2	CO3	PO1
	b)	Explain the working of Solar cooling with the help of schematic diagram.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Explain in brief about thermal storage system of solar energy.	6 Marks	L2	CO3	PO1 PO2
	b)	Write a short note on Solar distillation.	6 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Discuss in detail the advantages and disadvantages of horizontal axis and vertical axis wind mills.	6 Marks	L2	CO4	PO1
	b)	Explain briefly the factors that determine the power output from wind energy.	6 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Discuss the principle of wind energy conversion and basic components of wind energy conversion systems.	6 Marks	L2	CO4	PO1
	b)	With the help of a neat sketch, explain the anaerobic digestion process for the production of bio-gas.	6 Marks	L2	CO4	PO1

UNIT-V

9.	a)	What are the environmental problems caused by geothermal energy?	6 Marks	L2	CO5	PO1 PO2
	b)	Explain Hot dry rocks resources of geothermal energy and how they can be exploited as a source of energy.	6 Marks	L2	CO5	PO1
		(OR)				
10.	a)	Explain in detail with a neat sketch the closed OTEC cycle.	6 Marks	L2	CO5	PO1
	b)	Explain in detail about the double basic tidal energy system.	6 Marks	L2	CO5	PO1 PO2

DIGITAL COMMUNICATIONS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain in detail the Delta modulation transmitter and Receiver.	6 Marks	L2	CO1	PO1
	b)	What is a Compander? Why Compander is invariably used in PCM system? Explain different ways of implementing Compander in a PCM system.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Explain the effects of thermal noise in binary PCM.	6 Marks	L2	CO1	PO1
	b)	A μ- law compressor has a quantizer range of -5 V to 5 V. Find the output range of this quantizer for inputs of -25 mV, 300 mV, and 4.5 V.	6 Marks	L2	CO1	PO4

UNIT-II

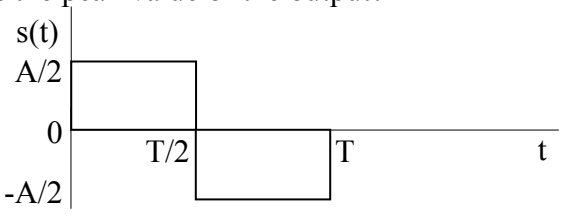
3.	a)	Explain how Nyquist's Criterion eliminates interference in the absence of noise for distortion-less baseband binary transmission.	6 Marks	L2	CO2	PO1
	b)	The binary data stream 001101101 is applied to the input of duo-binary system. Determine the duo-binary coder output and the receiver output with and without precoder.	6 Marks	L1	CO2	PO3
		(OR)				
4.	a)	Explain the duo binary signaling scheme with and without a precoder.	6 Marks	L1	CO2	PO1
	b)	A binary PAM wave with bit duration of 10 μsec is to be transmitted over a channel with a maximum bandwidth of 75kHz. Determine a suitable raised cosine spectrum for this purpose.	6 Marks	L1	CO2	PO4

UNIT-III

5.	a)	Derive the expression for error probability of Coherent FSK system.	6 Marks	L3	CO2	PO2
	b)	The bit stream 11001100101…. is to be transmitted using DPSK. Determine the encoded sequence and transmitted phase sequence and also find the demodulated signal.	6 Marks	L2	CO2	PO3
		(OR)				
6.	a)	Explain the receiver and signal space diagram of BPSK	6 Marks	L2	CO2	PO1
	b)	Consider the signal shown below.	6 Marks	L3	CO2	PO4

i) Determine the impulse response of a filter matched to this signal and sketch it as a function of time.
ii) Plot the matched filter output as a function of time.
iii) What is the peak value of the output?

-



UNIT-IV

7.	a)	State and explain the channel coding theorem.	6 Marks	L2	CO3	PO1
	b)	Consider the discrete memory less source, the source alphabet $S=\{s_1, s_2, s_3\}$ with probabilities $P=\{0.4, 0.35, 0.25\}$ respectively. Find the entropy of the 1^{st} order source and the 2^{nd} order extension of the source.	6 Marks	L3	CO3	PO3
		(OR)				
8.	a)	State and prove the properties of Entropy?	6 Marks	L1	CO3	PO1
	b)	Define: i) Discrete entropy H (X), joint entropy H (X,Y) and Mutual information I(X;Y). ii) Show that I (X;Y) = H (X)+ H (Y) - H (X,Y).	6 Marks	L2	CO3	PO3

UNIT-V

9.	a)	Draw the block diagram of syndrome calculator for an (n, k) cyclic code and explain its working.	6 Marks	L2	CO4	PO2
	b)	A rate 1/3 convolutional encoder has generator vectors {1 0 0}, {1 1 1} and {1 0 1}. Draw the encoder circuit, code tree and state diagram.	6 Marks	L3	CO4	PO4
		(OR)				
10.	a)	Describe how the errors are corrected using Hamming code with an example.	6 Marks	L2	CO4	PO2
	b)	Determine the generator polynomial g(x) for a (7, 4) cyclic code, and find code vectors for the following data vectors 1100, 1010, and 1000.	6 Marks	L3	CO4	PO3

DIGITAL SIGNAL PROCESSING

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

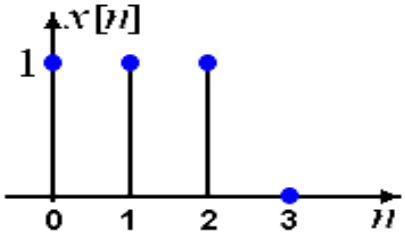
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Check the Causal or Non-Causal, and time invariance of the following systems. $i)\ y[n] = \cos\{x[n]\}$ $ii)\ y[n] = 2x[n] + 1$	6 Marks	L2	CO1	PO1
	b)	Test the linearity and Stability of the following systems. Also comment on the results. $i)\ y[n] = x^2[n]$ $ii)\ y[n] = x[n^2]$s	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Consider the Z-Transform $X[z] = \dfrac{1 - \frac{1}{3}z^{-1}}{\left(1 + \frac{1}{2}z^{-1}\right)\left(1 - \frac{2}{3}z^{-1}\right)}$, for causal sequence. Determine the sequence $x[n]$	8 Marks	L2	CO1	PO3
	b)	Find the impulse response for the following discrete-time system. $y[n] + 0.2y[n-1] = x[n] - x[n-1]$.	4 Marks	L2	CO1	PO2

UNIT-II

3.	a)	State and Prove the following Properties. i) Convolution. ii) Frequency Shifting using DFT.	6 Marks	L2	CO2	PO1
	b)	Determine the 4-point DFT of an aperiodic sequence shown in figure.	6 Marks	L3	CO2	PO2



(OR)

4.		Compute 8-point DFT of the following sequence using Radix-2 DIT-FFT and DIF-FFT algorithm. X[n]={1,1,1,1,1,1,1,1}.	12 Marks	L3	CO2	PO2

UNIT-III

5.	a)	Illustrate the steps involved in designing IIR digital low pass filters using Bi-linear transformation.	6 Marks	L2	CO3	PO1
	b)	List out the advantages and disadvantages of FIR filter and IIR filters.	6 Marks	L3	CO3	PO2
		(OR)				

6.		Design a Butterworth digital high pass filter with the following specifications $\left\|H(e^{j\omega})\right\| \le 0.2 \qquad 0 \le \omega \le 0.2\pi$ $0.8 \le \left\|H(e^{j\omega})\right\| \le 1 \qquad 0.6\pi \le \omega \le \pi$ Using Bilinear transformation.	12 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Compare the performance of Triangular window and Hamming window.	6 Marks	L2	CO3	PO1
	b)	Consider the following transfer function $H[z] = 1 + \frac{3}{4}z^{-1} + \frac{17}{8}z^{-2} + \frac{3}{4}z^{-3} + z^{-4}$. Realize the system in i) Cascaded form. ii) Minimum number of multipliers in cascaded form.	6 Marks	L3	CO3	PO2
		(OR)				
8.	a)	Design a linear phase LPF with a cutoff frequency of 1 KHz and sampling rate of 4 KHz. Take 9 samples. Use Hamming window.	6 Marks	L4	CO3	PO2
	b)	Obtain the FIR linear phase and cascade form realization for the system characterized by the transfer function given as, $H[z] = \left(1 + \frac{1}{2}z^{-1} + z^{-2}\right)\left(1 + \frac{1}{4}z^{-1} + z^{-2}\right)$.	6 Marks	L3	CO3	PO2
		UNIT-V				
9.		Discuss different addressing modes used in programmable Digital Signal Processor	12 Marks	L2	CO4	PO1
		(OR)				
10.		Explain the architecture of YMS320C6X with neat sketch and explain the operation.	12 Marks	L2	CO4	PO1

VLSI DESIGN

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain briefly the operation of TTL NAND gate in tristate output configurations.	6 Marks	L2	CO1	PO2
	b)	Explain the ECL circuit.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Compare the performance of I^2C, CMOS and ECL logic.	6 Marks	L1	CO1	PO2
	b)	i) Define Fan-out. ii) What is propagation delay? iii) Define noise margin. iv) Define fan in. v) What is Operating temperature? vi) What are the types of TTL logic?	6 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Derive the relation between IDS and VDS of MOSFET.	8 Marks	L2	CO2	PO2
	b)	What are the effects of scaling of Vt?	4 Marks	L3	CO2	PO3
		(OR)				
4.	a)	Explain the process of fabrication for CMOS technology with neat diagrams.	8 Marks	L3	CO2	PO3
	b)	Using necessary sketches, explain about photolithography process, in semiconductor device manufacture.	4 Marks	L2	CO2	PO1

UNIT-III

5.	a)	Two nMOS inverters are cascaded to drive a capacitive load $C_L = 16C_g$ as shown in Figure. Calculate the pair delay (V_{in} to V_{out}) in terms of geometry indicated in the figure.	6 Marks	L4	CO3	PO4

	b)	Explain the problem of driving large capacitive loads. How such loads can be driven?	6 Marks	L2	CO3	PO2
		(OR)				
6.	a)	Explain the terms figure of merit of MOSFET and output conductance using necessary equations.	4 Marks	L2	CO3	PO2
	b)	Draw the stick diagram and mask layout for CMOS two input NOR gate and stick diagram of two input NAND gates.	8 Marks	L3	CO3	PO6

UNIT-IV

7.	a)	Draw the architecture of Carry Select Adder and explain its operation for 16-bit.	6 Marks	L3	CO3	PO4
	b)	Implement 4**:**1 multiplexer circuit using transmission logic.	6 Marks	L2	CO3	PO5
		(OR)				
8.	a)	Design a parity generator for n-bit and explain the functioning of it with a transistor schematic and layout.	7 Marks	L2	CO3	PO5
	b)	Explain 4-bit array multiplier with neat diagram.	5 Marks	L2	CO3	PO5

UNIT-V

9.	a)	What type of switch technologies are used for CPLDs and FPGAs? Compare them.	6 Marks	L1	CO4	PO2
	b)	Draw the macro cell used in CPLD and explain its working.	6 Marks	L4	CO4	PO4
		(OR)				
10.	a)	Write about SRAM Programming technology of programmable FPGAs with neat sketches.	6 Marks	L4	CO4	PO4
	b)	What is an FPGA? explain about “why Field programmable gate arrays”	6 Marks	L1	CO4	PO1

FIBER OPTIC COMMUNICATIONS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Outline various elements of an optical communication system. Explain each element in brief.	6 Marks	L3	CO1	PO1
	b)	Paraphrase about Cut-off wavelength and mode field diameter of single mode fibers.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Distinguish the step index fibers and graded index fibers.	6 Marks	L3	CO1	PO1
	b)	Identify different fiber materials used in optical communication. Explain.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Illustrate the absorption mechanism in optical communication.	6 Marks	L3	CO2	PO3
	b)	With relevant diagrams and appropriate expressions, explain about the intermodal dispersion.	6 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Summarize core and cladding losses in an optical fiber.	6 Marks	L3	CO2	PO1
	b)	Interpret the information capacity determination and group delay with necessary equations.	6 Marks	L3	CO2	PO3
		UNIT-III				
5.	a)	Generate the laser diode rate equation.	6 Marks	L2	CO3	PO1
	b)	Develop the expression for how temperature effects on Avalanche gain in a p-i-n diode.	6 Marks	L3	CO3	PO2
		(OR)				
6.	a)	Suggests improvements in reach through avalanche photodiode structure and the electric fields.	6 Marks	L2	CO3	PO2
	b)	Discuss about the Resonant frequencies of laser.	6 Marks	L3	CO3	PO4
		UNIT-IV				
7.	a)	Mention and explain different Splicing techniques.	6 Marks	L1	CO4	PO1
	b)	Describe about connector return loss.	6 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Bring out the necessary equations to associate with the optical power launching from a light source to a fiber.	6 Marks	L2	CO4	PO5
	b)	Define about the equilibrium Numerical aperture with its principles.	6 Marks	L1	CO4	PO1
		UNIT-V				
9.	a)	Justify NRZ and RZ line codes in optical link with an example.	6 Marks	L3	CO5	PO1
	b)	Explain about point-point links in Optical system design.	6 Marks	L2	CO5	PO2
		(OR)				
10.	a)	Infer the contribution of how the attenuation does and dispersion is measured in optical communication.	6 Marks	L3	CO5	PO5
	b)	Compare the overall fiber dispersion in multimode and single mode fibers.	6 Marks	L2	CO6	PO1

All questions carry equal marks

		UNIT-I				
1.	a)	Distinguish between programmable logic devices.	6 Marks	L1	CO1	PO2
	b)	Explain about PAL and implement $f_1 = \Sigma (1, 2, 3, 4, 6, 8)$, $f_2 = \Sigma (0, 2, 3, 4, 5)$.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Implement a BCD to Excess-3 code convertor by ROM.	6 Marks	L3	CO1	PO3
	b)	Write short notes on Sequential Programmable Logic Deceives.	6 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Discuss in detail the architecture of programmable interconnects in FPGAs.	6 Marks	L1	CO2	PO1
	b)	With neat diagrams, explain programmable logic block architectures of FPGAs.	6 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Draw the internal architecture of FPGA and explain its operation in detail.	6 Marks	L2	CO2	PO2
	b)	Explain advantages and limitations of FPGAs.	6 Marks	L1	CO2	PO1
		UNIT-III				
5.	a)	Draw and explain the Xilinx XC4000 Architecture and describe its CLB, I/O block functional operations.	6 Marks	L2	CO3	PO2
	b)	Analyse an FPGA with a simple SRAM programmable architecture.	6 Marks	L3	CO3	PO1
		(OR)				
6.	a)	List out salient features of Xilinx 2000 CLB.	6 Marks	L1	CO3	PO1
	b)	Draw and explain the Xilinx XC3000 Architecture and describe its CLB, I/O block functional operations.	6 Marks	L2	CO3	PO2
		UNIT-IV				
7.	a)	With a neat block diagram, explain ACT2 architecture and its logic modules.	6 Marks	L1	CO3	PO1
	b)	Discuss the architectural differences and specifications of Act_1, Act_2 and Act_3 of family FPGAs.	6 Marks	L2	CO3	PO2
		(OR)				
8.	a)	With a neat block diagram, explain ACT3 architecture and its logic modules.	6 Marks	L1	CO3	PO1
	b)	Explain the ACT_2 architecture for high fan-in example.	6 Marks	L2	CO3	PO2
		UNIT-V				
9.	a)	Explain about position tracker of a Robot manipulator with help of FPGA along with circuit diagram.	6 Marks	L2	CO4	PO2
	b)	Design a five bit binary counter with ACT devices.	6 Marks	L3	CO4	PO3
		(OR)				
10.	a)	Draw the circuit diagram of fast video controller and explain its operation in detail.	6 Marks	L2	CO4	PO2
	b)	Design Mod-6 counter using ACT FPGA and explain its operation.	6 Marks	L3	CO4	PO3

RADAR ENGINEERING

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What are the desirable pulse characteristics and the factors that govern them in a radar system?	6 Marks	L2	CO1	PO1
	b)	Compute the maximum detectable range of a radar system specified below: Operating wavelength = 3.5cm Peak pulse transmitted power = 400 kW. Minimum detectable power = 10^{-13} W. Capture area of the antenna = 6sq.m. Radar cross-sectional area of the target = 12sq.m.	6 Marks	L3	CO1	PO4
		(OR)				
2.	a)	Explain about the Integration of radar pulses.	6 Marks	L2	CO1	PO1
	b)	Define the following terms: i) PRF. ii) Unambiguous range.	6 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Explain the butterfly effect that is produced by MTI radar.	6 Marks	L2	CO1	PO1
	b)	An MTI radar is operating at 9GHz with a PRF of 2000pps. Calculate the first two lowest blind speeds of this radar. Derive the formula used.	6 Marks	L3	CO1	PO4
		(OR)				
4.	a)	"A simple MTI delay line canceller is an example of time domain filter". Why? Explain.	6 Marks	L2	CO1	PO2
	b)	An 8 GHz police radar measures a doppler frequency of 1565Hz from a car approaching the stationary police vehicle in an 70km/h speed limit zone. What should the police officer do?	6 Marks	L3	CO1	PO4
		UNIT-III				
5.	a)	Explain the block diagram of amplitude comparison mono pulse radar for two coordinate and explain its operation.	6 Marks	L2	CO2	PO1
	b)	Explain about sequential lobing technique, with the help of sketches.	6 Marks	L2	CO2	PO1
		(OR)				
6.	a)	Compare and contrast various types of tracking radars.	6 Marks	L4	CO2	PO2
	b)	Define the following terms: i) tracking range. ii) scattering patterns.	6 Marks	L1	CO2	PO1
		UNIT-IV				
7.	a)	What are the advantages of electronically steered phased array antennas?	6 Marks	L2	CO3	PO2
	b)	Explain the concept of false Alarm rate.	6 Marks	L2	CO3	PO1
		(OR)				
8.	a)	Briefly explain about various types of radar displays.	6 Marks	L2	CO3	PO1
	b)	Describe the working principle of CFAR receiver	6 Marks	L2	CO3	PO2

UNIT-V

9.	a)	Explain the principle of VOR with a neat block diagram.	6 Marks	L2	CO5	PO1
	b)	List out the salient features of VOR.	6 Marks	L2	CO5	PO2
		(OR)				
10.	a)	Explain the principle of DME with a neat block diagram.	6 Marks	L4	CO5	PO2
	b)	Explain the Instrument Landing Systems.	6 Marks	L2	CO5	PO2

MICROPROCESSORS AND INTERFACING

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain about physical memory organization of 8086 with suitable block diagram.	6 Marks	L2	CO1	PO2
	b)	Explain the register organization of 8086 microprocessor.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	With a neat sketch, explain the function of BIU and EU of 8086 microprocessor.	6 Marks	L1	CO1	PO2
	b)	Explain the memory read operation with timing diagram in minimum mode.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Explain the interrupt response sequence of 8086 with a neat sketch.	6 Marks	L2	CO2	PO2
	b)	Write an assembly language program to find average of n numbers.	6 Marks	L3	CO2	PO3
		(OR)				
4.	a)	Write an assembly language program to find maximum and minimum numbers in a series of data.	6 Marks	L3	CO2	PO3
	b)	Explain the procedure for passing parameters to a macro.	6 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Interface DAC with 8086 and write an assembly language program to generate a RAMP waveform.	6 Marks	L4	CO3	PO4
	b)	Explain in detail the operation of 8255 in Mode 1 configuration with an example.	6 Marks	L2	CO3	PO2
		(OR)				
6.	a)	Describe the procedure of interfacing static memories with a CPU. List the differences between static and dynamic RAM.	6 Marks	L2	CO3	PO2
	b)	Explain the interfacing of stepper motor with 8086 with a neat sketch.	6 Marks	L3	CO3	PO6
		UNIT-IV				
7.	a)	Explain the initialization sequence of 8259A.	6 Marks	L3	CO3	PO4
	b)	What is key de-bouncing? Show connections to interface a hexadecimal keypad to Intel 8086.	6 Marks	L2	CO3	PO5
		(OR)				
8.	a)	What is DMA data transfer? Explain different DMA data transfer schemes.	6 Marks	L2	CO3	PO5
	b)	Illustrate and explain the internal architecture of 8251 USART.	6 Marks	L2	CO3	PO5
		UNIT-V				
9.	a)	Explain different addressing modes used in 8051 with an example.	6 Marks	L1	CO4	PO2
	b)	Write an assembly language program to count the number of even numbers in a given array of size 10 elements.	6 Marks	L4	CO4	PO4
		(OR)				

10.	a)	Write an assembly language program to generate a pulse with a delay of 1msec on P2.5 using timer0 of 8051. Assume crystal frequency f=11.0592MHz.	6 Marks	L4	CO4	PO4
	b)	Explain the bit fields of TMOD and TCON registers of 8051.	6 Marks	L1	CO4	PO1

PRINCIPLES OF COMMUNICATIONS

[Electrical and Electronics Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Define modulation. What are the need for modulation?	6 Marks	L2	CO1	PO2
	b)	What is meant by coherent detection? Explain about the coherent detection of DSB-SC Modulated wave.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Derive the expression for single tone Amplitude modulated wave.	6 Marks	L2	CO1	PO1
	b)	Explain the generation of SSB-SC wave using phase discrimination method with help of a neat functional diagram.	6 Marks	L3	CO1	PO2
		UNIT-II				
3.	a)	What is time division multiplexing? Explain the need of guard band and commutator-decommutator in Time division Multiplexing.	6 Marks	L1	CO1	PO2
	b)	Explain generation of PAM with neat sketches.	6 Marks	L2	CO1	PO4
		OR)				
4.	a)	Explain demodulation of Pulse Width Modulation wave.	6 Marks	L4	CO1	PO2
	b)	What is pulse position modulation? Explain how PPM can be generated from PWM with the help of waveforms.	6 Marks	L2	CO1	PO4
		UNIT-III				
5.	a)	Define the Quantization and show that the quantization error in PCM is $\Delta^2/12$.	6 Marks	L4	CO2	PO2
	b)	Draw the block diagram of delta modulator and explain each block with mathematical modeling.	6 Marks	L4	CO2	PO2
		(OR)				
6.	a)	A signal whose amplitude varies from 0 to 10V is band limited to 4k Hz and transmitted through the channel using 5 bit PCM. The sampling rate is 50% higher than the nyquist rate. Calculate all parameters of the PCM.	6 Marks	L4	CO2	PO2
	b)	Explain the encoding scheme used in DPCM scheme with block diagram description and mathematical modeling.	6 Marks	L1	CO2	PO1
		UNIT-IV				
7.	a)	Explain the generation and detection of BPSK and BFSK signal with neat block diagram and necessary waveforms.	6 Marks	L1	CO3	PO1
	b)	Derive the expression for the probability of error in Coherent FSK.	6 Marks	L1	CO3	PO3
		(OR)				
8.	a)	Explain the generation and detection of DPSK signal with necessary waveforms. Mention its Advantages clearly.	6 Marks	L4	CO3	PO2
	b)	Distinguish the different types of digital modulation scheme.	6 Marks	L1	CO3	PO1

UNIT-V

9.	a)	Explain the terms: i) Self information. ii) Entropy. iii) Information rate.	6 Marks	L1	CO4	PO1
	b)	A binary source with B (0)=0.25, B(1)=0.75 the binary source is extended in such a way to generate 3rd extension calculate the entropy of extended source $\mathbf{s^3}$ and verify using extension property.	6 Marks	L3	CO4	PO2
		(OR)				
10.	a)	Discrete memory less source emits 5 symbols with probability { 0.4, 0.2, 0.2, 0.1, 0.1}. Find code efficiency and redundancy using Huffman code.	6 Marks	L1	CO4	PO1
	b)	Explain clearly the Shannon-Fano code algorithm.	6 Marks	L2	CO4	PO1

ARTIFICIAL INTELLIGENCE

[Computer Science and Engineering, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	How the AI improves the customer experience in shopping?	6 Marks	L2	CO1	PO1
	b)	Give the comparison between rationality and omniscience.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	With a neat structure, explain the intelligent agents of AI.	6 Marks	L1	CO1	PO1
	b)	What are the risks and benefits of AI?	6 Marks	L2	CO1	PO2

UNIT-II

3.	a)	Draw the graph with start nodes and child nodes from the table shown below. Apply Breadth first search algorithm and draw the state space graph (BFS Spanning tree) to find optimal solution to reach from A to G and show the steps.	6 Marks	L1	CO2	PO1

Start Node	A	A	B	C	C	D	E	F
Child Node	C	B	F	D	E	E	G	G

	b)	Draw the state space diagram of Hill Climbing algorithm and explain the different regions in it.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Demonstrate greedy best first search algorithm with suitable example.	6 Marks	L2	CO2	PO2
	b)	What id heuristic function? Explain its role and advantages in solving the problems.	6 Marks	L3	CO2	PO2

UNIT-III

5.	a)	Describe what you understand by the artificial intelligence technique, evolutionary strategies? Ensure you describe the mutation operator and the importance it plays.	6 Marks	L2	CO3	PO1
	b)	Explain the minimax search algorithm in detail.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	How the Monte Carlo tree search strategy works? Explain with an example.	6 Marks	L1	CO3	PO2
	b)	What is alpha-beta pruning? Explain its working process.	6 Marks	L2	CO3	PO2

UNIT-IV

7.	a)	What is a Probabilistic Reasoning? What are the problem areas of Probabilistic Reasoning?	6 Marks	L1	CO4	PO2
	b)	A coin toss experiment with 3 biased coins, with the Probabilities shown in table and with the state transition probability 1/3 for each state. Find the most likely path for the observation sequence H HHH T H T TTT.	6 Marks	L2	CO4	PO2

	STATE1	STATE2	STATE3
P(H)	0.5	0.75	0.25
P(T)	0.5	0.25	0.75

(OR)

8.	a)	Write various knowledge representation issues. Provide the solution of any two issues.	6 Marks	L2	CO4	PO1
	b)	Draw a Bayesian network that contains 3 variables where the factorization of their joint probability distribution is P (A, B, C) = P(C | A, B)P(A)P(B).	6 Marks	L2	CO4	PO1

UNIT-V

9.	a)	What are the three critical tasks for designing and implementing transparent AI? Explain in detail.	6 Marks	L2	CO5	PO1
	b)	What is the impact of artificial intelligence on society?	6 Marks	L2	CO5	PO1

(OR)

10.	a)	What are the limitations of AI?	6 Marks	L1	CO5	PO2
	b)	Write a short note on alternative robotic frameworks.	6 Marks	L2	CO5	PO2

CODE No.: 19BT50505 SVEC-19

ETHICAL HACKING

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Discuss in detail about the role of security and penetration testers with requirements for a typical ad.	8 Marks	L2	CO1	PO1
	b)	Discuss in detail about Penetration-Testing Methodologies.	4 Marks	L2	CO1	PO1
		(OR)				
2.		Discuss the different types of malicious software and explain what damage they can do to a system.	12 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Discuss in detail about various types of Application layer programs.	6 Marks	L2	CO1	PO1
	b)	Explain in detail about TCP/IP Protocol stack with a neat sketch.	6 Marks	L3	CO1	PO1
		(OR)				
4.	a)	Explain in detail about broad categorization of Human-based social engineering techniques.	6 Marks	L2	CO1	PO8
	b)	Discuss in detail about art of manipulation in social engineering with an example.	6 Marks	L3	CO1	PO6
		UNIT-III				
5.	a)	List out and describe the function of some of the many tools available for foot printing.	6 Marks	L2	CO2	PO1
	b)	Explain in detail about Domain Name System Zone Transfers.	6 Marks	L3	CO2	PO5
		(OR)				
6.	a)	List out and explain the types of scans that can be used for port scanning.	8 Marks	L3	CO2	PO5
	b)	List out and explain various types of HTTP methods.	4 Marks	L3	CO2	PO1
		UNIT-IV				
7.	a)	Discuss in detail about different types of passwords and list out the rules proposed by the EC Council while password creation.	6 Marks	L3	CO3	PO5
	b)	Explain the process of Cover Your Tracks and Erasing Evidence from system using various tools and techniques.	6 Marks	L3	CO3	PO1
		(OR)				
8.	a)	Explain the following terms. i) Performing Automated Password Guessing. ii) Defending Against Password Guessing.	6 Marks	L3	CO3	PO5
	b)	Illustrate the process of hiding files on a system so that they can be prevented from detection.	6 Marks	L3	CO3	PO1
		UNIT-V				
9.	a)	Discuss in detail about public key infrastructure.	8 Marks	L3	CO4	PO1
	b)	List out the several technologies used by firewalls in reducing the attacks.	4 Marks	L2	CO4	PO5
		(OR)				
10.		List out and explain in detail about various cryptographic attacks.	12 Marks	L2	CO4	PO1

OPTOELECTRONICS AND LASER INSTRUMENTATION

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the structure of optical fiber and discuss the classification of optical fibers in detail.	6 Marks	L1	CO1	PO1
	b)	Define dispersion. Why is dispersion so important in optical transmission system?	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Discuss various types of losses in optical fibers.	6 Marks	L2	CO1	PO1
	b)	Write the requirements of light detectors. Differentiate PIN photo diode and avalanche photo diode with respect to their construction and working.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	With a neat sketch, explain the interferometric method of measurement of length.	6 Marks	L2	CO1	PO2
	b)	Illustrate with an example, the difference between an extrinsic and intrinsic fiber optic sensor.	6 Marks	L2	CO1	PO1
		(OR)				
4.	a)	Apply fiber grating sensors in real time applications and discuss in detail.	6 Marks	L3	CO2	PO2
	b)	Discuss about phase and polarization fiber sensors.	6 Marks	L2	CO1	PO2
		UNIT-III				
5.	a)	With the help of energy level diagram, explain how a molecular gas laser is used widely in industries for cutting and welding purpose.	6 Marks	L2	CO2	PO1
	b)	Define Q-switching. Analyze a Q-switched laser for obtaining energetic pulses from laser by modulation.	6 Marks	L3	CO2	PO2
		(OR)				
6.	a)	Explain the construction and working principle of solidstate laser with neat diagram.	6 Marks	L2	CO2	PO1
	b)	Differentiate liquid laser with gas laser.	6 Marks	L2	CO2	PO1
		UNIT-IV				
7.	a)	Explain in detail about the principle of laser welding and laser melting.	6 Marks	L1	CO3	PO1
	b)	Discuss the usage of different lasers in material processing applications in industries.	6 Marks	L2	CO2	PO1
		(OR)				
8.	a)	Explain how lasers are used in removal of tumors of vocal cards.	6 Marks	L2	CO3	PO6
	b)	Illustrate the application of lasers in treatment of eye tissues and diseases.	6 Marks	L3	CO3	PO6

UNIT-V

9.	a)	Using suitable technique, construct a hologram with four level laser.	6 Marks	L3	CO3	PO1
	b)	Discuss the operation of holographic interferometer in detail.	6 Marks	L2	CO4	PO2
		(OR)				
10.	a)	Analyze different opto-electronic modulators with respect to their working principle.	6 Marks	L2	CO4	PO1
	b)	Describe the application of electro optic planar waveguide in digital modulation.	6 Marks	L2	CO4	PO2

PLC AND SCADA

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Compare discrete and analog I/O modules with respect to the type of input or output devices with which they can be used.	6 Marks	L3	CO1	PO1
	b)	Briefly describe each of the following PLC modes of operation: i) Program. ii) Test. iii) Run.	6 Marks	L3	CO1	PO1
		(OR)				
2.	a)	Describe the PLC scan sequence in detail.	6 Marks	L3	CO1	PO1
	b)	List any three standard PLC languages as defined by the International Standard for Programmable Controllers, and give a brief description of each.	6 Marks	L3	CO1	PO1

UNIT-II

3.		A pump is to be used to fill two storage tanks. The pump is manually started by the operator from a start/stop station. When the first tank is full, the control logic must be able to automatically stop flow to the first tank and direct flow to the second tank through the use of sensors and electric solenoid valves. When the second tank is full, the pump must shut down automatically. Indicator lamps are to be included to signal when each tank is full. i) Draw a sketch of the process. ii) Prepare a typical PLC program for this control process.	12 Marks	L3	CO2	PO3
		(OR)				
4.	a)	Design a PLC program and prepare a typical I/O connection diagram and ladder logic program for the following counter specifications. i) Counts the number of times a push button is closed. ii) Decrements the accumulated value of the counter each time a second push button is closed.	6 Marks	L3	CO2	PO3
	b)	Name the three forms of PLC counter instructions, and explain the basic operation of each.	6 Marks	L1	CO2	PO3

UNIT-III

5.	a)	Explain how the PLC handles overflow and negative numbers for the ADD and SUBTRACT functions.	6 Marks	L3	CO1	PO1
	b)	Apply not-equal-to COMPARE function, the output is to be on except when an input count is exactly 86.	6 Marks	L3	CO2	PO3
		(OR)				
6.	a)	Describe the operation of the SKIP function.	6 Marks	L3	CO1	PO1
	b)	Two part conveyor lines, A and B, feed a main conveyor line, M. A third conveyor line, R, removes rejected parts a short distance away from the main conveyor. Conveyors A, B and R have parts counters connected to them. Construct a PLC program to obtain	6 Marks	L3	CO1	PO1

the total parts output of main conveyor M.

UNIT-IV

7.		An RTU can gather data in the form of a discrete switch position. This is used for alarm and status monitoring. What three other forms of field data can be an RTU gather? Describe in detail.	12 Marks	L3	CO3	PO3
		(OR)				
8.	a)	Discuss about central control and navigation facilities used in SCADA system.	6 Marks	L2	CO3	PO3
	b)	Describe about how MTU message calls for Analog output of particular register.	6 Marks	L2	CO3	PO3

UNIT-V

9.		Explain in detail about how HMI applications and I/O servers are configured.	12 Marks	L3	CO3	PO3
		(OR)				
10.		Design of water treatment plant SCADA system using system graphic displays.	12 Marks	L3	CO3	PO3

CODE No.: 19BT51042 SVEC-19

SENSORS AND SIGNAL CONDITIONING

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Define gauge factor of a strain gauge and derive the expression of gauge factor for metals and semiconductors.	4 Marks	L1	CO1	PO1
	b)	A resistance wire strain gauge having a nominal resistance of 350Ω is subjected to a strain of 500 microstrain. Find the change in value of resistance neglecting the Piezoresistive effect.	8 Marks	L1	CO1	PO1
		(OR)				
2.	a)	With neat schematic, explain the principle and working of Resistive temperature detector and thermistor.	4 Marks	L3	CO1	PO1
	b)	Demonstrate the following terms: i) Foil type strain gauges. ii) Semiconductor strain gauges.	8 Marks	L1	CO1	PO2
		UNIT-II				
3.	a)	Describe the construction and working of variable reluctance sensors.	6 Marks	L2	CO2	PO2
	b)	Explain the construction and working of synchro's and synchro resolvers.	6 Marks	L3	CO1	PO1
		(OR)				
4.	a)	Discuss the principle of working and applications of frequency response of capacitive sensors with a neat sketch.	6 Marks	L2	CO2	PO1
	b)	Explain the principle of any one of inductive transducer with necessary diagrams.	6 Marks	L3	CO2	PO1
		UNIT-III				
5.	a)	Discuss about the measurement of temperature using radiation sensors.	4 Marks	L2	CO2	PO3
	b)	What are the basic characteristics of pyroelectric sensors? Explain the working principle with a neat sketch.	8 Marks	L1	CO2	PO6
		(OR)				
6.	a)	With neat schematic, explain the principle and working of magnetostrictive sensor.	6 Marks	L2	CO2	PO1
	b)	Describe the properties of materials used for piezoelectric transducers. Derive the expressions for voltage and charge sensitivities.	6 Marks	L2	CO2	PO1
		UNIT-IV				
7.	a)	What are optical fibers? Show how the fiber optic sensors are constituted for measuring linear and rotary displacement, with necessary diagrams.	6 Marks	L1	CO3	PO1
	b)	Describe the basics of a Semiconductor gas detector and explain its usefulness in chemical analysis.	6 Marks	L2	CO3	PO1
		(OR)				

8.	a)	What are biosensors? List their applications. Illustrate the structure of biosensor.	6 Marks	L1	CO3	PO1
	b)	Explain the construction and working of ultrasonic sensors.	6 Marks	L3	CO3	PO1

UNIT-V

9.	a)	With a neat block diagram, explain in detail about chopper amplifier.	6 Marks	L2	CO4	PO2
	b)	Describe the construction and working of Infrared Pyrometers. List their fields of application, advantages and disadvantages.	6 Marks	L3	CO4	PO2

(OR)

10.	a)	Discuss about the measurement of linear and angular displacement using capacitive transducers with neat sketch.	5 Marks	L2	CO2	PO1
	b)	Demonstrate the following terms: i) Push-pull bridge for signal conditioning. ii) Instrumentation amplifier.	7 Marks	L2	CO4	PO2

III B.Tech I Semester (SVEC-19) Regular Examinations January – 2022

DATA WAREHOUSING AND DATA MINING

[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe the role of concept hierarchies in data mining.	6 Marks	L2	CO1	PO1
	b)	Explain multidimensional data model with a neat diagram.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Differentiate ROLAP, MOLAP and HOLAP.	6 Marks	L5	CO1	PO1
	b)	List out the OLAP operations and explain the same with an example.	6 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Define Data Mining. Describe the important tasks of data mining.	6 Marks	L1	CO1	PO2
	b)	What are the types of data? Differentiate among structured and unstructured data with suitable examples.	6 Marks	L1	CO1	PO2
		(OR)				
4.	a)	Explain the steps for data preprocessing with an example.	6 Marks	L2	CO2	PO2
	b)	Explain various measures of similarity and dissimilarity.	6 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	Elaborate the steps for improving the efficiency of Apriori algorithm.	6 Marks	L6	CO3	PO1
	b)	Explain FP-Growth algorithm for suitability of mining frequent patterns.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Describe various error measures with respect to computation of classification accuracy.	6 Marks	L2	CO3	PO2
	b)	Discuss Back propagation algorithm for classification with an example.	6 Marks	L6	CO3	PO2
		UNIT-IV				
7.		Write short notes on: i) K-Means. ii) DBSCAN.	12 Marks	L2	CO4	PO2
		(OR)				
8.	a)	What is a cluster? Discuss in detail Partition-based clustering techniques.	6 Marks	L1	CO4	PO2
	b)	Describe various outlier handling methods.	6 Marks	L2	CO4	PO3
		UNIT-V				
9.	a)	How data mining is useful for the society? Explain in brief.	6 Marks	L1	CO5	PO2
	b)	Explain the trends of data mining.	6 Marks	L2	CO5	PO2
		(OR)				
10.	a)	Discuss about multimedia mining in brief.	6 Marks	L6	CO5	PO2
	b)	Explain about spatial mining.	6 Marks	L2	CO5	PO2

WEB TECHNOLOGIES

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Create a simple HTML page which demonstrates the use of various types of lists.	6 Marks	L6	CO1	PO1
	b)	Explain the drag and drop feature in HTML5 with suitable example.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Explain the following tags in detail with example. i) Table. ii) Form iii. Frame.	6 Marks	L2	CO1	PO1
	b)	Explain the following HTML tags with suitable example: i) <font> . ii) <meta>. iii) <p> . iv) <video>.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Explain the following terms related to CSS with examples. i) Font-size. ii) Font-weight. iii) Text-decoration. iv) Text-transform. v) Padding. vi) Border style.	6 Marks	L2	CO2	PO2
	b)	Explain absolute and relative positioning elements using Z-index property with suitable example.	6 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Explain image maps and animations with example.	6 Marks	L1	CO2	PO2
	b)	Explain about JQuery selectors with suitable example.	6 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	Create badges as numerical indicators of how many items are associated with a link.	6 Marks	L6	CO3	PO1
	b)	Develop a mobile optimized website for displaying the images using responsive classes.	6 Marks	L5	CO6	PO6
		(OR)				
6.	a)	Develop Contact Us Web page using the grid system in bootstrap.	6 Marks	L5	CO6	PO6
	b)	Develop a predefined alert messages web page using bootstrap.	6 Marks	L5	CO3	PO1
		UNIT-IV				
7.	a)	Develop a PHP code to implement multi-level inheritance.	6 Marks	L5	CO4	PO3
	b)	Demonstrate the implementation of Object Cloning in PHP.	6 Marks	L3	CO4	PO4
		(OR)				
8.	a)	Explain how to create functions in PHP with example.	6 Marks	L2	CO4	PO3
	b)	Demonstrate OOP principles with suitable example using PHP.	6 Marks	L3	CO4	PO4
		UNIT-V				
9.	a)	Explain with example how the validation of forms is done using PHP.	6 Marks	L2	CO5	PO1
	b)	Demonstrate cookies and session handlers using PHP.	6 Marks	L3	CO5	PO5
		(OR)				
10.	a)	Explain how to interact with the database in PHP using MySQL.	6 Marks	L2	CO6	PO1
	b)	What is prepared statement? Explain in detail with the suitable example.	6 Marks	L1	CO6	PO6

LINUX PROGRAMMING

[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Compare and contrast the cmp command and comm Command	6 Marks	L3	CO1	PO3
	b)	Define sed utility. Explain two formats of the sed command and address types with examples.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Specify the usage of following commands with an example. i) cat. ii) diff .	6 Marks	L2	CO1	PO1
	b)	Compare and contrast rmdir and rm commands working with suitable examples.	6 Marks	L3	CO1	PO3
		UNIT-II				
3.	a)	Illustrate the significance of Process execution and Quoting shell meta characters.	6 Marks	L2	CO2	PO2
	b)	Explain case structure in shell script with suitable example.	6 Marks	L4	CO2	PO4
		(OR)				
4.	a)	Write a shell script for given year is leap year or not.	6 Marks	L4	CO2	PO4
	b)	Summarize the loop control structures used in bash with examples.	6 Marks	L4	CO2	PO4
		UNIT-III				
5.	a)	Differentiate soft link and hard link with examples.	6 Marks	L2	CO3	PO2
	b)	Demonstrate these system calls with syntax. i) open(). ii) read().	6 Marks	L2	CO3	PO4
		(OR)				
6.	a)	Illustrate the working of following system calls with examples. i) chmod( ). ii) getcwd().	6 Marks	L2	CO3	PO2
	b)	Write a C Program to copy the contents of one file to another file.	6 Marks	L3	CO3	PO1
		UNIT-IV				
7.	a)	Illustrate the working of exec family of library functions with examples.	6 Marks	L2	CO4	PO2
	b)	Explain the concept of process creation and process termination with suitable example.	6 Marks	L1	CO4	PO2
		(OR)				
8.	a)	Differentiate between reliable signals and unreliable signals.	6 Marks	L2	CO4	PO1
	b)	Illustrate the concept of the orphan process.	6 Marks	L4	CO4	PO2
		UNIT-V				
9.	a)	Define usage of pipe and how IPC can be implemented using pipes.	6 Marks	L2	CO5	PO1
	b)	Differentiate the host byte and network byte ordering addresses.	6 Marks	L2	CO5	PO1
		(OR)				
10.	a)	Explain briefly about the following socket APIs with clear syntax: i) socket ( ). ii) bind( ).	6 Marks	L3	CO5	PO3
	b)	Define FIFO and how FIFO's are called as named pipes.	6 Marks	L2	CO5	PO1

MOBILE COMPUTING

[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Write a short note on GPRS.	6 Marks	L2	CO1	PO1
	b)	Demonstrate the process of call Handover when a mobile station moves.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	List and explain the novel application of mobile devices.	6 Marks	L2	CO1	PO1
	b)	Explain in detail about protocol layers in DECT.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Examine Medium Access Control in Near and Far Terminal.	6 Marks	L4	CO2	PO2
	b)	Explain Frequency Hopping Spread Spectrum in detail.	6 Marks	L2	CO2	PO2
		(OR)				
4.	a)	List the advantages and disadvantages of Spread Spectrum based wireless System.	6 Marks	L1	CO2	PO1
	b)	Explain WCDMA 3G Communication Standards.	6 Marks	L2	CO2	PO5
		UNIT-III				
5.	a)	Illustrate the working of mobile IP with Architecture.	6 Marks	L3	CO3	PO2
	b)	Explain in detail about IP sec suite of protocols.	6 Marks	L2	CO3	PO2
		(OR)				
6.	a)	Determine the functions of home and foreign agent in Mobile IP.	6 Marks	L5	CO3	PO1
	b)	How does VoIP function? Explain in detail.	6 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Explain Indirect TCP. What are its advantages and disadvantages?	6 Marks	L2	CO3	PO1
	b)	Discover the special requirements in transport layer protocols in case of 2.5G/3G wireless networks.	6 Marks	L4	CO3	PO2
		(OR)				
8.	a)	Describe with a diagram the fast retransmission/fast recovery in mobile network.	6 Marks	L4	CO3	PO2
	b)	Describe Snooping TCP. What are the advantages and disadvantages of Snooping TCP?	6 Marks	L2	CO3	PO1
		UNIT-V				
9.	a)	Explain briefly the layers of WAP.	6 Marks	L2	CO4	PO1
	b)	List and explain ZigBee Features.	6 Marks	L4	CO4	PO1
		(OR)				
10.	a)	Explain in detail about WDP.	6 Marks	L2	CO4	PO1
	b)	List the advantages of WLAN.	6 Marks	L4	CO4	PO1

AI IN HEALTHCARE

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	How Artificial Intelligence can bring improvements in Health Care? Explain.	6 Marks	L2	CO1	PO1
	b)	What are the benefits and risks of Artificial Intelligence in Healthcare?	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	"Artificial Intelligence ***Vs*** Human Intelligence" – which has good results in Health care? Justify?	6 Marks	L2	CO1	PO2
	b)	Discuss about the terminology Artificial Intelligence and Neural Networks.	6 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Discuss about artificial intelligence in preventive healthcare.	6 Marks	L1	CO2	PO5
	b)	Describe the present state and future state of Artificial Intelligence in healthcare for Surgery and Anesthesiology.	6 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Describe the status of Artificial Intelligence in any two Healthcare specialties.	6 Marks	L1	CO2	PO1
	b)	Describe the present state and future state of Artificial Intelligence in healthcare for Pharmacy and Dermatology.	6 Marks	L1	CO2	PO1
		UNIT-III				
5.		Demonstrate the role of Microsoft in Artificial Intelligence in healthcare applications.	12 Marks	L3	CO3	PO5
		(OR)				
6.	a)	What is the significance of Face book and Baidu in Artificial intelligence in Health care.	6 Marks	L2	CO3	PO6
	b)	Demonstrate the role of IBM Watson in healthcare applications.	6 Marks	L2	CO3	PO5
		UNIT-IV				
7.	a)	How artificial intelligence help in remote monitoring in healthcare?	6 Marks	L3	CO4	PO6
	b)	Describe the following terminology in healthcare: Block chain and Robots.	6 Marks	L2	CO4	PO5
		(OR)				
8.	a)	Briefly discuss about Incentivized wellness and smart implantable in healthcare.	6 Marks	L2	CO4	PO5
	b)	Discuss about the usage of drones, smart places and smart hospitals in Healthcare.	6 Marks	L2	CO4	PO5

UNIT-V

9.	a)	Describe about delivering a scalable and engaging digital Therapy case study with examples.	6 Marks	L3	CO5	PO5
	b)	Demonstrate about the outcomes of a digitally delivered, Low carbohydrate, Type 2 Diabetes self-Management with examples.	6 Marks	L3	CO5	PO5
		(OR)				
10.	a)	Discuss the impact of Big data Analytics in diagnosing Disease Risk from patient data.	6 Marks	L2	CO5	PO5
	b)	Describe the benefits of using Augmented and Virtual reality for Epilepsy.	6 Marks	L2	CO5	PO5

IoT ARCHITECTURE AND PROTOCOLS

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Discuss the main design principles in developing an IoT System. Explain.	6 Marks	L2	CO1	PO1
	b)	Write about devices and gateways used in IoT with suitable examples.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	How does an M2M gateway work in an IoT System? Explain.	6 Marks	L2	CO1	PO1
	b)	Write about XaaS in detail.	6 Marks	L4	CO1	PO2
		UNIT-II				
3.	a)	With a neat sketch, explain the IoT reference model.	6 Marks	L3	CO2	PO2
	b)	Illustrate steps of design methodology for a Smart Home IoT application.	6 Marks	L4	CO2	PO2
		(OR)				
4.	a)	Write in detail about Smart Traffic Control application and map IoT concepts to develop a deployment view of the System.	6 Marks	L4	CO2	PO2
	b)	Explain the devices and networks required for implementing IoT solutions in real-world.	6 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	Illustrate on Bluetooth technology used in IoT.	6 Marks	L4	CO3	PO1
	b)	Compare and contrast 6LoWPAN, 6TiSCH and 6Lo.	6 Marks	L2	CO3	PO2
		(OR)				
6.	a)	Draw MAC frame structure of IEEE802.15.4 and explain in detail.	6 Marks	L2	CO3	PO1
	b)	Explain the working of CARP with an example in detail.	6 Marks	L1	CO3	PO1
		UNIT-IV				
7.	a)	Illustrate the roles and functionality of the MQTT protocol with a neat diagram.	6 Marks	L4	CO4	PO1
	b)	Discuss about SCADA protocol translation in detail.	6 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Write short notes on: i) XMPP. ii) DDS.	6 Marks	L2	CO4	PO1
	b)	Define Web socket. Give examples of generic web-based Protocols.	6 Marks	L2	CO4	PO2
		UNIT-V				
9.	a)	Mention in detail about the security considerations in MAC802.11ah.	6 Marks	L2	CO5	PO1
	b)	Illustrate the IoT Architecture for Smart City.	6 Marks	L4	CO5	PO2
		(OR)				
10.	a)	What are the main security challenges and issues in IoT? Explain.	6 Marks	L2	CO5	PO3
	b)	Describe the methodology to design an Energy Management System using IoT.	6 Marks	L4	CO5	PO2

MODERN CRYPTOGRAPHY

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain encryption and decryption process of affine cipher.	6 Marks	L2	CO1	PO1
	b)	Encrypt the message "**meet me at the usual place at ten rather than eight o clock**" using the Hill cipher with the key $\begin{pmatrix} 9 & 4 \\ 5 & 7 \end{pmatrix}$. Show your calculations and the result.	6 Marks	L4	CO1	PO3
		(OR)				
2.	a)	Explain Random and Pseudo-Random-Sequence Generation.	6 Marks	L2	CO1	PO3
	b)	What is a One-Way hash function? Explain briefly hash function properties.	6 Marks	L3	CO2	PO3
		UNIT-II				
3.	a)	What is a Stream cipher? How it differs from block cipher mode of encryption?	6 Marks	L1	CO2	PO4
	b)	Compare different block cipher modes of symmetric algorithms.	6 Marks	L4	CO2	PO5
		(OR)				
4.	a)	What is PKI? Explain with a suitable example.	6 Marks	L2	CO2	PO1
	b)	Design a key generation mechanism using random bit strings.	6 Marks	L3	CO3	PO3
		UNIT-III				
5.	a)	State and prove Euler's theorem.	6 Marks	L2	CO4	PO1
	b)	Explain the steps of primality test using Lehmann method.	6 Marks	L2	CO4	PO1
		(OR)				
6.	a)	Describe RSA algorithm. Perform encryption/decryption using RSA algorithm with instances: p=3; q=11,e=7;m=5 .	6 Marks	L4	CO3	PO5
	b)	Discuss the security of DES.	6 Marks	L2	CO4	PO3
		UNIT-IV				
7.	a)	Briefly explain one way hash functions using Symmetric Block algorithms.	6 Marks	L2	CO5	PO1
	b)	Explain Snefru hash function.	6 Marks	L4	CO5	PO5
		(OR)				
8.	a)	Describe the major steps in Secure Hash algorithm.	6 Marks	L2	CO5	PO1
	b)	Differentiate MD4 and MD5 algorithms.	6 Marks	L4	CO5	PO2
		UNIT-V				
9.	a)	Discuss the process of digital signature signing and verification process.	6 Marks	L2	CO6	PO1
	b)	Explain SCHNORR authentication and encryption algorithm with an example.	6 Marks	L2	CO6	PO1
		(OR)				
10.	a)	Explain the steps involved in Diffie Hellman key exchange algorithm.	6 Marks	L2	CO6	PO1
	b)	Discuss Shamir's Three-Pass protocol.	6 Marks	L2	CO6	PO1

SOFTWARE TESTING

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe the Goals and Psychology of testing.	6 Marks	L2	CO1	PO1
	b)	With a neat sketch, explain the life cycle of software testing.	6 Marks	L3	CO1	PO1
		(OR)				
2.	a)	List out the Verification and Validation activities and explain.	6 Marks	L3	CO1	PO2
	b)	What is the use of Test strategy? Explain with an example.	6 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	What is the need of White-Box testing? Explain.	6 Marks	L1	CO2	PO1
	b)	What is meant by mutation testing? Explain with an example.	6 Marks	L3	CO2	PO2
		(OR)				
4.	a)	What are the differences between White-Box testing and Black-Box testing?	6 Marks	L2	CO2	PO1
	b)	Describe briefly about Boundary Value analysis.	6 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	What are the guidelines for test administration and estimation?	6 Marks	L2	CO3	PO3
	b)	Differentiate Test plan and Quality plan.	6 Marks	L3	CO3	PO2
		(OR)				
6.	a)	Describe the process of writing templates for Test Cases and Test Scripts.	6 Marks	L1	CO3	PO1
	b)	What test processes need improvement? Explain.	6 Marks	L2	CO3	PO2
		UNIT-IV				
7.	a)	"Regression Testing produces Quality software". Justify the statement.	6 Marks	L2	CO4	PO4
	b)	Describe the classification of Software Metrics.	6 Marks	L2	CO4	PO4
		(OR)				
8.	a)	What are different types of Regression testing? Define Regression Test problem.	6 Marks	L2	CO4	PO2
	b)	Discuss any two regression techniques to measure to software quality.	6 Marks	L2	CO4	PO3
		UNIT-V				
9.	a)	What are the parameters to be considered to select the testing tools?	6 Marks	L2	CO5	PO2
	b)	How the testing tools are categorized? Explain.	6 Marks	L3	CO5	PO4
		(OR)				
10.	a)	What are different costs incurred in Testing Tools?	6 Marks	L2	CO5	PO4
	b)	Give an overview on some commercial Testing Tools.	6 Marks	L2	CO5	PO2

OPTIMIZATION TECHNIQUES
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the statement of an optimization problem.	6 Marks	L3	CO1	PO1
	b)	Enlist various engineering applications of optimization.	6 Marks	L2	CO1	PO1
		(OR)				
2.		Solve the following non linear programming problem using the Lagrange multipliers method. Minimize $Z = X_1^2 + X_2^2 + X_3^2$ Subject to the constraints : $4X_1 + X_2^2 + 2X_3 = 14$ $X_1, X_2 \& X_3 \geq 0$	12 Marks	L3	CO1	PO1 PO2
		UNIT-II				
3.		Solve the following Linear Programming Problem by using Simplex method. Maximize $Z = 10X_1 + 15X_2 + 20X_3$ Subject to the constraints : $2X_1 + 4X_2 + 6X_3 \leq 24$, $3X_1 + 9X_2 + 6X_3 \leq 30$ $X_1, X_2 \& X_3 \geq 0$	12 Marks	L3	CO2	PO1 PO2
		(OR)				
4.		Solve the following Linear Programming Problem by using Dual Simplex Method. Minimize $Z = 2X_1 + 3X_2$ Subject to the constraints : $2X_1 + 2X_2 \leq 30$, $X_1 + 2X_2 \geq 10$ $X_1, X_2 \geq 0$	12 Marks	L3	CO2	PO1 PO2
		UNIT-III				
5.		Minimize the function $f(X_1, X_2) = X_1 - X_2 + 2X_1^2 + 2X_1X_2 + X_2^2$, starting from point $X_1 = \{0\ 0\}$ using Steepest descent method.	12 Marks	L3	CO3	PO1 PO2
		(OR)				
6.		Minimize the function $f(X_1, X_2) = X_1^2 - X_2^2 + X_1 - X_2$, starting from point $X_1 = \{0\ 0\}$ using Powell's Method.	12 Marks	L3	CO3	PO1 PO2
		UNIT-IV				
7.		Use dynamic programming approach to solve the following Linear Programming Problem. Maximize $Z = X_1 + 9X_2$ Subject to the constraints : $2X_1 + X_2 \leq 25$, $X_2 \leq 11$ $X_1 \& X_2 \geq 0$	12 Marks	L3	CO4	PO1 PO2 PO3
		(OR)				

8.	A distance network consists of nine nodes which are distributed as shown in the following table. Find the shortest path from node 1 to node 9 and the corresponding distance.	12 Marks	L3	CO4	PO1 PO2 PO3

Arc	Distance
1 - 2	2
1 - 3	2
1 - 4	1
2 - 6	4
3 - 7	5

III B.Tech I Semester (SVEC-19) Regular Examinations January – 2022

MACHINE LEARNING

[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	List the steps that are involved in designing a learning system and explain about choosing the training experience with an example.	6 Marks	L2	CO3	PO1
	b)	Illustrate Find S algorithm over Water Sport concept. Training instances given below.	6 Marks	L3	CO3	PO2

Day	Sky	Airtemp	Humidity	Wind	Water	Forecast	WaterSport
1.	Sunny	Warm	Normal	Strong	Warm	Same	Yes
2.	Sunny	Warm	High	Strong	Warm	Same	Yes
3.	Rainy	Cold	High	Strong	Warm	Change	No
4.	Sunny	Warm	High	Strong	Cool	Change	Yes

(OR)

2.	a)	Discuss concept learning as search with respect to general to specific ordering of hypothesis.	6 Marks	L2	CO1	PO1
	b)	Explain the different issues in machine learning.	6 Marks	L2	CO2	PO2

UNIT-II

3.	a)	Discuss about inductive bias in decision tree learning.	6 Marks	L2	CO2	PO1
	b)	List the issues in decision tree learning and explain them.	6 Marks	L2	CO2	PO1

(OR)

4.	a)	Construct decision trees to represent the Boolean functions for Play Tennis. (Outlook = Sunny A Humidity = Normal). V (Outlook = Overcast). v (Outlook = Rain A Wind = Weak).	6 Marks	L4	CO2	PO3
	b)	Explain about Large margin principle in SVM.	6 Marks	L2	CO2	PO2

UNIT-III

5.	a)	Discuss the appropriate problems for neural network learning.	6 Marks	L2	CO4	PO3
	b)	Demonstrate under what conditions the perceptron rule fails and it becomes necessary to apply the delta rule.	6 Marks	L2	CO4	PO4

(OR)

6.	a)	Explain in detail about the representational power of feed forward neural networks with respect to back propagation.	6 Marks	L2	CO4	PO1
	b)	Distinguish between hypothesis space search and inductive bias in back propagation algorithm.	6 Marks	L2	CO4	PO2

UNIT-IV

7.	a)	Explain belief network and conditional independence with an example.	6 Marks	L2	CO2	PO1
	b)	Write about maximum likelihood hypothesis for predicting probabilities.	6 Marks	L2	CO2	PO1

(OR)

8.	a)	Prove that how maximum likelihood (Bayesian learning) can be used in any learning algorithms that are used to minimize the squared error between actual hypotheses and predicted output hypothesis.	6 Marks	L3	CO2	PO2
	b)	Explain about Bayes optimal classifier.	6 Marks	L2	CO5	PO6

UNIT-V

9.	a)	Explain in detail about temporal difference learning.	6 Marks	L2	CO2	PO1
	b)	Discuss the learning tasks and Q learning in the context of reinforcement learning.	6 Marks	L2	CO2	PO1

(OR)

10.	a)	Explain K nearest Neighbor learning algorithm.	6 Marks	L2	CO2	PO1
	b)	Write about case-based reasoning.	6 Marks	L2	CO2	PO2

MOBILE APPLICATION DEVELOPMENT
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Discuss in detail about mobile web presence.	6 Marks	L2	CO1	PO1
	b)	List out the various scenarios that would say where a native app would be the best solution.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Explain in brief the various benefits of a mobile app.	8 Marks	L2	CO1	PO1
	b)	List out and explain the few reasons why users might need access to mobile content.	4 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Explain in detail about the two techniques to handle changes in screen orientation and illustrate in detail about anchoring views.	6 Marks	L1	CO1	PO1
	b)	List out the various common attributes used in views and view groups.	6 Marks	L1	CO1	PO1
		(OR)				
4.		Discuss in detail about linking activities using intents.	12 Marks	L2	CO1	PO1
		UNIT-III				
5.	a)	List out and explain in detail about basic views that you can use to design the UI for Android applications.	8 Marks	L3	CO2	PO2
	b)	List out and define main types of menus in android.	4 Marks	L2	CO2	PO5
		(OR)				
6.	a)	Discuss in detail about using picker views.	6 Marks	L2	CO2	PO1
	b)	List out and explain the various image views in detail.	6 Marks	L3	CO2	PO5
		UNIT-IV				
7.	a)	Discuss in detail about Consuming Web Services Using HTTP.	8 Marks	L2	CO3	PO3
	b)	Identify and explain the process of sending SMS messages using intent.	4 Marks	L3	CO3	PO5
		(OR)				
8.	a)	Explain the process of sending SMS messages programmatically in detail.	6 Marks	L3	CO3	PO5
	b)	Discuss in detail about preventing the messaging application from receiving a message.	6 Marks	L2	CO3	PO3
		UNIT-V				
9.	a)	Illustrate the process of performing long-running tasks in a service in brief.	6 Marks	L3	CO4	PO5
	b)	Explain in detail about binding activities to services with an example.	6 Marks	L3	CO4	PO3
		(OR)				
10.	a)	Discuss in brief about establishing communication between a service and an activity.	6 Marks	L2	CO4	PO3
	b)	Discuss in detail about understanding threading in android application.	6 Marks	L3	CO4	PO5

MATERIAL SCIENCE

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		Differentiate advanced materials with engineering materials with suitable applications.	12 Marks	L2	CO1	PO1
		(OR)				
2.		Summarize the processing, properties and applications of polymers and ceramics.	12 Marks	L2	CO1	PO1
		UNIT-II				
3.		What are Laminated composite materials? Explain the Laminated composite materials with suitable structures and applications.	12 Marks	L3	CO2	PO1
		(OR)				
4.	a)	Briefly describe the classification and application of structural composites in commercial air crafts.	8 Marks	L2	CO2	PO1
	b)	List four reasons why glass fibers are most commonly used for reinforcement.	4 Marks	L1	CO2	PO1
		UNIT-III				
5.		Discuss in detail the characteristics of shape memory alloys and applications of shape memory alloys.	12 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Elaborate on smart materials.	5 Marks	L6	CO3	PO1
	b)	List the properties and advance applications of electro-rheostatic and magneto static materials	7 Marks	L1	CO3	PO1
		UNIT-IV				
7.		What are nano materials? Describe the fabrication of nano materials by using any suitable technique.	12 Marks	L2	CO4	PO1
		(OR)				
8.		Describe about biomimetic materials and their modern applications in the field of technology.	12 Marks	L2	CO4	PO1
		UNIT-V				
9.		Explain the processing and potential applications of functionally graded materials.	12 Marks	L2	CO5	PO1
		(OR)				
10.	a)	Illustrate functionally graded fiber cement as structural material.	6 Marks	L2	CO5	PO1
	b)	Identify any six applications of functionally graded materials in optoelectronic devices.	6 Marks	L3	CO5	PO1

ENTREPRENEURSHIP FOR MICRO, SMALL AND MEDIUM ENTERPRISES

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	Discuss the concept of entrepreneurship as Leadership, Risk taking, Decision- making and Business Planning.	12 Marks	L2	CO1	PO1
	(OR)				
2.	Explain the entrepreneurial decision process in Entrepreneurship development.	12 Marks	L2	CO2	PO2

UNIT-II

3.	Enumerate the role of incubation centers for promoting entrepreneurships and start-ups.	12 Marks	L1	CO1	PO1
	(OR)				
4.	Discuss the concept of business plan. And discover its significant role in micro small and medium enterprises.	12 Marks	L2	CO2	PO2

UNIT-III

5.	Describe the essential elements that are required for small enterprises.	12 Marks	L2	CO1	PO1
	(OR)				
6.	Execute the objectives of Micro Enterprises.	12 Marks	L3	CO2	PO2

UNIT-IV

7.	List out the main functions of SFCs. Explain.	12 Marks	L2	CO1	PO1
	(OR)				
8.	What is NIESBUD? State the role of NIESBUD in India.	12 Marks	L1	CO2	PO2

UNIT-V

9.	Examine the role of Bharatiyamahila bank for encouraging women entrepreneurs.	12 Marks	L4	CO1	PO1
	(OR)				
10.	Define rural entrepreneurship. And demonstrate the need for rural entrepreneurship in India.	12 Marks	L3	CO2	PO2

INDIAN ECONOMY

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering,]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

	UNIT-I				
1.	Define Indian Economy and explain its importance in economic development.	12 Marks	L2	CO1	PO1
	(OR)				
2.	Compare and contrast between Law of demand and Law of supply.	12 Marks	L2	CO1	PO1
	UNIT-II				
3.	Examine the importance of material selection of a product.	12 Marks	L2	CO1	PO6
	(OR)				
4.	Outline the design selection process with your own example.	12 Marks	L2	CO1	PO6
	UNIT-III				
5.	Examine the role of engineers in employment and inclusive growth.	12 Marks	L2	CO1	PO6
	(OR)				
6.	Compare and contrast between five year plans and NITI aayog in the development of economy in our country.	12 Marks	L2	CO1	PO6
	UNIT-IV				
7.	Demonstrate with your own examples the importance of time value of money.	12 Marks	L2	CO2	PO12
	(OR)				
8.	Explain cash flow diagram with your own examples.	12 Marks	L2	CO2	PO1
	UNIT-V				
9.	Compare between value analysis and value engineering.	12 Marks	L2	CO2	PO12
	(OR)				
10.	Demonstrate the procedure of value engineering in detail.	12 Marks	L2	CO1	PO1

PROFESSIONAL ETHICS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Where and how do Moral problems arise in Engineering?	6 Marks	L2	CO1	PO1
	b)	List the steps involved in confronting Moral Dilemmas.	6 Marks	L2	CO1	PO1
		(OR)				
2.		"The three types of Inquiry influence the Engineering Ethics". Examine the given statement.	12 Marks	L2	CO3	PO8
		UNIT-II				
3.	a)	What do you understand by the terms: Utilitarianism and Virtue Ethics?	6 Marks	L2	CO3	PO8
	b)	Write a short note on: Duty Ethics and Deontology.	6 Marks	L2	CO3	PO8
		(OR)				
4.		Discuss briefly the competencies and expectations of a professional.	12 Marks	L4	CO2	PO2
		UNIT-III				
5.	a)	Explain briefly about engineering experiments.	6 Marks	L2	CO1	PO1
	b)	Explain briefly about standard experiments.	6 Marks	L2	CO1	PO1
		(OR)				
6.		"The responsibilities of engineers play a significant role in building a nation". Justify.	12 Marks	L4	CO2	PO2
		UNIT-IV				
7.	a)	Explain the concept of whistle blowing giving a suitable example.	6 Marks	L2	CO1	PO1
	b)	What is meant by Conflicts of Interest?	6 Marks	L2	CO1	PO1
		(OR)				
8.		"Professional rights can lead to conflicts of interest". Justify the given statement suggesting a few tips to solve.	12 Marks	L4	CO2	PO2
		UNIT-V				
9.	a)	Explain briefly the ethical aspects of corporate governance.	6 Marks	L2	CO3	PO8
	b)	Explain the role of engineers as expert witnesses.	6 Marks	L2	CO3	PO8
		(OR)				
10.		What is meant by 'morally creative leaders' and participation in professional societies?	12 Marks	L4	CO2	PO2

OBJECT ORIENTED PROGRAMMING THROUGH JAVA

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Differentiate between Procedural Oriented and Object Oriented Languages.	6 Marks	L2	CO1	PO1
	b)	Write about Garbage Collection in Java.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Illustrate the usage of this keyword using an example program.	6 Marks	L2	CO1	PO1
	b)	Explain the following: i) class. ii) object. iii) constructor.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Develop a java program to implement Towers of Hanoi Problem.	6 Marks	L3	CO1	PO3
	b)	Analyze the concept of constructor overloading with an example program.	6 Marks	L2	CO2	PO2
		(OR)				
4.	a)	List and explain any four operators in java.	6 Marks	L1	CO1	PO1
	b)	Give the purpose of using the final keyword in java.	6 Marks	L1	CO1	PO1
		UNIT-III				
5.	a)	"Java supports reusability". Justify the statement.	6 Marks	L5	CO2	PO1
	b)	Write the process of creating and accessing a package.	6 Marks	L1	CO2	PO1
		(OR)				
6.	a)	Design a program to demonstrate multiple inheritance in java	6 Marks	L3	CO2	PO4
	b)	Explain the following: i) Abstract class. ii) Final keyword with inheritance.	6 Marks	L1	CO2	PO1
		UNIT-IV				
7.	a)	Develop a java program for producer consumer problem to illustrate the concept of multithreading.	6 Marks	L3	CO2	PO4
	b)	What is Java Collections Framework? List out some benefits of Collection framework.	6 Marks	L1	CO2	PO1
		(OR)				
8.	a)	Difference between Thread and Process in Java. How to implement Thread in Java?	6 Marks	L2	CO2	PO2
	b)	Develop a java program to read 20 marks and store them in an array. Define your own exception named wrong mark exception. Throw and catch this type of exception when a mark is (<0 and >100).	6 Marks	L3	CO2	PO3
		UNIT-V				
9.	a)	What is an Event? Explain the role of Event handler in AWT.	6 Marks	L1	CO3	PO1
	b)	Design and develop an Applet to receive the value of the parameter message from the html file and display it on the webpage.	6 Marks	L3	CO3	PO5
		(OR)				
10.	a)	Construct an anonymous inner class for handling mouse entered events into an Applet.	6 Marks	L3	CO3	PO3
	b)	List and explain any three Swing GUI Components.	6 Marks	L2	CO3	PO1

LINEAR AND DIGITAL IC APPLICATIONS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	With relevant diagram illustrate the working principle of a Monostable multivibrator using 555 timer. Derive the expression of time delay.	6 Marks	L4	CO1	PO3
	b)	Describe the principle of operation of RC Phase shift oscillator using op-amp. Derive the condition for frequency of oscillations.	6 Marks	L2	CO1	PO8
		(OR)				
2.	a)	Describe the NE 565 PLL with relevant diagram and explain its working principle with states of PLL and make circuit connections to track the input signal.	6 Marks	L2	CO1	PO6
	b)	A PLL has a free running frequency of 500 KHz, the bandwidth of the LPF=10KHz. Will the PLL lock-in if f_i =60 KHz? What is the frequency of the VCO output?	6 Marks	L3	CO1	PO4
		UNIT-II				
3.	a)	Develop a First order Butter worth HPF using op-amp and plot the Frequency response.	6 Marks	L3	CO2	PO3
	b)	Design a first order low pass filter with a cut off frequency of 1KHz and a pass band gain of 2.	6 Marks	L3	CO2	PO4
		(OR)				
4.	a)	Examine the operation of a Dual slope Analog to Digital converter with relevant circuit diagram and conversion time graph.	8 Marks	L2	CO3	PO2
	b)	A 8- bit ADC outputs all 1's when Vi=5.1V. Find it's resolution and digital output when Vi=1.28V.	4 Marks	L3	CO3	PO4
		UNIT-III				
5.	a)	Differentiate initial and always statements.	6 Marks	L1	CO4	PO1
	b)	Explain the structure of various LOOP statements in Verilog HDL with examples.	6 Marks	L1	CO4	PO1
		(OR)				
6.	a)	Discuss system tasks and compiler directives available in Verilog HDL.	6 Marks	L1	CO4	PO1
	b)	Write Verilog HDL code for 4-to-1 Multiplexer Using Conditional Operators.	6 Marks	L2	CO5	PO2
		UNIT-IV				
7.	a)	With neat circuit diagram, explain the working of a 4-bit odd parity generator.	6 Marks	L2	CO5	PO1
	b)	Sketch the symbol, logic diagram & write Verilog HDL source code of 74x138 IC.	6 Marks	L2	CO5	PO6
		(OR)				

8.	a)	Design barrel shifter for 8-bit using three control inputs using multiplexers or shift registers.	6 Marks	L4	CO5	PO3
	b)	Write a Verilog code for full subtractor using two half subtractors and an OR Gate.	6 Marks	L2	CO5	PO1

UNIT-V

9.	a)	Examine the process to convert a D- flip-flop to J-K flip-flop. Write dataflow style Verilog HDL program.	6 Marks	L3	CO5	PO2
	b)	Design a 4-bit binary synchronous counter using IC 74 x 74. Write Verilog HDL program for this logic. Using data flow style.	6 Marks	L3	CO5	PO6

(OR)

10.	a)	Sketch the logic diagram of 74 x 194 4-bit universal shift register and develop a Verilog HDL module for the same.	6 Marks	L2	CO5	PO2
	b)	Develop MOD 16 Down ripple counter with D-flip-flops and explain its operation.	6 Marks	L3	CO5	PO4

DESIGN AND ANALYSIS OF ALGORITHMS

[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Demonstrate various types on complexities and Asymptotic notations with examples.	6 Marks	L2	CO1	PO1
	b)	Solve the recurrence relation and compute its complexity. $T(n) = 2T(n/2) + n$, if $n > 1$ $= 1$ otherwise	6 Marks	L4	CO1	PO2
		(OR)				
2.	a)	Define amortized analysis illustrate aggregate analysis with example.	6 Marks	L3	CO1	PO1
	b)	Apply Master's theorem on the following recurrence relation and find its complexity. $T(n)=8T(n/2) +1000n^2$	6 Marks	L4	CO1	PO2

UNIT-II

3.	a)	Illustrate SimpleUnion() and WeightedUnion() algorithms with an example.	4 Marks	L2	CO2	PO2
	b)	Consider the array of ten elements a[1:7] = (36, 25, 40, 2, 7, 80, 15). Sort these elements using Merge sort algorithm. Analyze its time and space complexity and represent in the form of recurrence relation.	8 Marks	L4	CO2	PO2
		(OR)				
4.	a)	Analyze and compare the complexities of recursive and iterative versions of binary search algorithm.	6 Marks	L4	CO2	PO2
	b)	Outline an algorithm to find MaxMin on a given set of elements.	6 Marks	L4	CO2	PO1

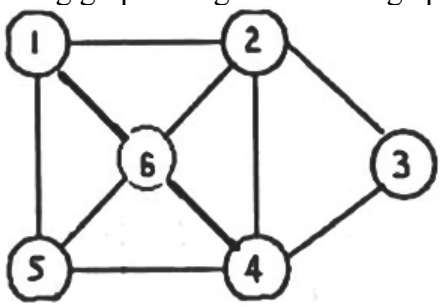
UNIT-III

5.	a)	Differentiate characteristics of greedy method and dynamic programming.	6 Marks	L2	CO2	PO1
	b)	Analyze the working of Matrix Chain Multiplication algorithm and compute its complexity.	6 Marks	L3	CO2	PO2
		(OR)				
6.	a)	Compute the cost of shortest path for the following digraph using All Paths algorithm.	6 Marks	L4	CO2	PO2

	b)	Apply 0/1 knapsack method for the case in which n = 3, W_1 =2, W_2 =3; W_3 = 4, p_1 = 1, p_2= 2, p_3= 5, and m = 6, compute the maximum profit.	6 Marks	L4	CO3	PO3

UNIT-IV

7.	a)	Apply algorithm Job sequencing with deadlines and find out optimal solutions for the following problem. Let n = 4, $(p_1, p_2, p_3, p_4) = (100, 10, 15, 27)$, $(d_1, d_2, d_3, d_4) = (2, 1, 2, 1)$	6 Marks	L4	CO3	PO2
	b)	Use algorithm Shortest Paths to obtain in non decreasing order the lengths of the shortest paths from vertex1 to all remaining vertices by taking suitable digraph.	6 Marks	L3	CO2	PO2
		(OR)				
8.	a)	Outline an algorithm to the Job sequencing with deadlines.	6 Marks	L3	CO2	PO2
	b)	Write about Hamiltonian Cycle. Draw the portion of state space tree for the following graph using backtracking approach.	6 Marks	L3	CO2	PO2



UNIT-V

9.	a)	Draw the portion of the state space tree generated by LCBB for the following knapsack instances. n = 5, $(P_1, P_2, P_3, P_4, P_5) = (w_1, w_2, w_3, w_4, w_5) = (4, 4, 5, 8, 9)$ and m = 15.	6 Marks	L3	CO3	PO1
	b)	Present an algorithm schema LCBB for a LC branch and bound search for a least cost answer node.	6 Marks	L2	CO3	PO1
		(OR)				
10.	a)	Explain the classes of NP-hard and NP-complete.	6 Marks	L2	CO4	PO1
	b)	Briefly explain deterministic and nondeterministic algorithms with example.	6 Marks	L2	CO4	PO2

IRRIGATION ENGINEERING AND HYDRAULIC STRUCTURES

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

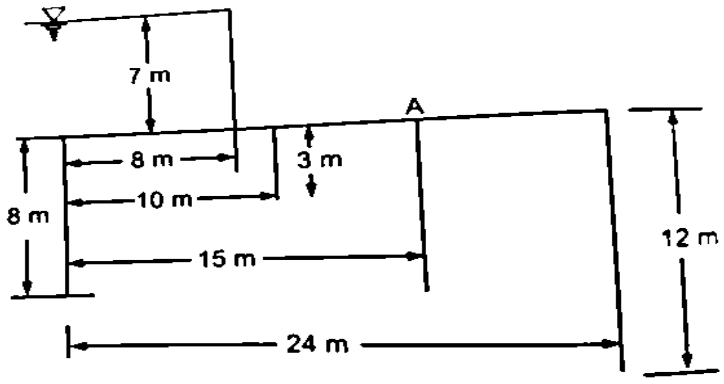
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define irrigation and explain its necessity in a tropical country like India.	6 Marks	L2	CO1	PO1 PO7
	b)	Determine the field capacity of soil for the following data. Depth of root zone = 1.50m Existing moisture = 7% Dry density of soil = 1400 kg/m^3 Quantity of water applied to soil = 600 m^3 Water lost due to deep percolation and Evaporation=8% Plot area =1000m^2	6 Marks	L4	CO1	PO1 PO2 PO6 PO7
		(OR)				
2.	a)	What is the classification of irrigation water having the following characteristics: Concentration of Na, Ca and Mg are 22.2, 3.2 and 1.5 milli-equvalent per litter respectively and the electrical conductivity is 190 micro mhos per cm at 25^0 C.	6 Marks	L4	CO1	PO1 PO2 PO5 PO8
	b)	Explain the terms duty and delta. Derive the relationship between Duty, Delta and Base period.	6 Marks	L4	CO1	PO1 PO2

UNIT-II

3.	a)	Explain the Bligh's creep theory for seepage flow below a weir.	6 Marks	L4	CO2	PO1 PO2 PO4 PO5 PO6 PO7 PO10
	b)	For the section of hydraulic structure given below, Determine i) average hydraulic gradient, ii) residual seepage head at point 'A', iii) Uplift pressure at Point 'A', iv) Bligh's coefficient of creep.	6 Marks	L4	CO2	PO1 PO2 PO4 PO5 PO6 PO7



(OR)

4.	a)	Analyze and explain the functions of silt excluder with a neat sketch.	6 Marks	L4	CO2	PO1 PO2 PO6 PO7 PO10
	b)	Explain the design principles of vertical drop weir.	6 Marks	L2	CO2	PO1 PO6 PO8 PO10

UNIT-III

5.	a)	Derive an expression for elementary profile of a gravity dam.	4 Marks	L4	CO3	PO1 PO2 PO6 PO7 PO10
	b)	Design the practice profile of a gravity dam of stone masonry given the following data: RL of base of dam = 1480 m RL of FRL = 1500.5 m Specific gravity of the masonry = 2.3 Safe compressive stress for masonry = 1200 kN/m² Height of waves = 1.2 m.	8 Marks	L6	CO3	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10

(OR)

6.	a)	Explain the different failures of earth dam.	4 Marks	L2	CO3	PO1 PO6 PO7 PO10
	b)	Design a suitable section for the overflow portion of a concrete gravity dam having the downstream face sloping 0.75 H:1V. The design discharge for the spillway is 8600 cumecs. The height of the spillway crest is kept at RL 205.0 m. the spillway length consists of 6 spans having clear width of 10 m each. Thickness of each pier may be taken as 2.6 m.	8 Marks	L6	CO3	PO1 PO2 PO3 PO4 PO6 PO8 PO10

UNIT-IV

7.	a)	Explain canal regulation works.	4 Marks	L2	CO4	PO1 PO6 PO7 PO8 PO10
	b)	Design a 1.6 m Sarda type fall for a canal having a discharge of 15 cumecs with following data: Bed level upstream = 103.0 m Side slope of channel = 1:1 Bed level downstream = 101.5 m Full supply level = 104.5 Bed level with u/s and d/s soil = 1.0 m Assume Bligh's Coefficient = 6	8 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO8 PO10

(OR)

8.	a)	Discuss canal outlets and its classification.	4 Marks	L4	CO4	PO1 PO2 PO6 PO7 PO10
	b)	Using Kennedy's theory, design an irrigation canal for a discharge of5 cumecs, assume N= 0.0225, m= 1.0 and B/D = 3.24. Also find the bedslope of the channel.	8 Marks	L6	CO4	PO1 PO2 PO4 PO5 PO7 PO8 PO10

UNIT-V

9.	a)	Differentiate between aqueduct and super passage with a neat sketch.	4 Marks	L4	CO5	PO1 PO2 PO6 PO7 PO10
	b)	Design a drainage waterway, canal waterway and bed levels at any two sections for a cross drainage work with given the following data: Full supply discharge = 35 cumecs Full supply level = R.L. 215.5 m Canal bed level = R.L. 213.0 m Canal bed width = 21.5 Trapezoidal canal section with $1\frac{1}{2}$H:1V slopes. Canal water depth = 1.5 m Drainage High flood discharge = 300 cumecs High flood level = 210.0 m High flood depth = 2.5 m General ground level = 212.5 m.	8 Marks	L6	CO5	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO8 PO10

(OR)

10.	a)	What are the various factors for selection of site for aqueducts?	4 Marks	L4	CO5	PO1 PO2 PO6 PO7
	b)	Design waterways and bed levels at any two sections for a Syphon aqueduct if the following data at the crossing of a canal and a drainage are given: Discharge of canal = 40 cumecs Bed width of canal= 30 Full supply depth of canal = 1.6 m Bed level of canal = 206.4 m Side slope of canal = $1\frac{1}{2}$ H:1V High flood discharge of drainage = 450 cumecs High flood level of drainage = 207.0 m Bed level of drainage = 204.5 m General ground level = 206 .5 m.	8 Marks	L6	CO5	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO8 PO10

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

III B.Tech I Semester (SVEC-19) Supplementary Examinations June – 2022

FOUNDATION ENGINEERING
[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	List the different methods of soil exploration. Explain any one of the methods.	6 Marks	L2	CO1	PO1 PO5 PO10
	b)	The field 'N' value in a deposit of fully submerged fine sand was 50 at a depth of 8 m. The average saturated unit weight of soil is 19 kN/m^3. Calculate the corrected 'N' value.	6 Marks	L4	CO1	PO1 PO2 PO8
		(OR)				
2.	a)	Distinguish between disturbed and undisturbed soil samples. Also give the typical values of area ratio, inside clearance and outside clearance for extracting an undisturbed sample.	6 Marks	L4	CO1	PO1 PO2 PO4 PO10
	b)	Discuss about the planning of subsurface exploration programme. What are the factors affecting the depth of exploration?	6 Marks	L2	CO1	PO1 PO11

UNIT-II

3.	a)	What is lateral earth pressure? Explain the different types of earth pressures with neat sketches.	6 Marks	L2	CO2	PO1 PO10
	b)	A 5.0m high vertical wall supports a cohesive backfill with upper horizontal surface. The properties of backfill are as follows: Upper 3.0 m depth γ_{sat} = 17.6 kN/m^3, c = 7.5kN/m^2 and ϕ = 20^o (ii) Lower 2.0m depth γ_{sat} = 19.2kN/m^3, c = 10kN/m^2 and ϕ = 20^o The free water table stands behind the wall at a depth of 4m from top, neglecting negative pressure up to a depth of tension cracks, determine the total active pressure and its point of application.	6 Marks	L4	CO2	PO1 PO2 PO4 PO6 PO7 PO10
		(OR)				
4.	a)	What are the assumptions of Rankine's earth pressure theory? Derive the Rankine's expression for active and passive earth pressure for a horizontal ground surface condition.	6 Marks	L4	CO2	PO1 PO2 PO5 PO10
	b)	Determine the passive pressure by Rankine's theory per unit run for a retaining wall 4m high, with i=15^0, Φ'=30^0 and γ= 19 kN/m^3. The back face of the wall is smooth and vertical.	6 Marks	L4	CO2	PO1 PO2 PO4 PO10

UNIT-III

5.	a)	Illustrate the different types of earth slope failures with neat sketches.	6 Marks	L2	CO3	PO1 PO6

						PO10
	b)	A 5 m deep canal has side slopes 1:1. The properties of soil are c_u = 20 kPa, $\phi = 10^0$, e = 0.8 and G = 2.80. If Taylor's stability number is 0.108, determine the factor of safety with respect to cohesion, when the canal runs full. Also find the same in case of sudden drawdown, if Taylor's stability number for this condition is 0.137.	6 Marks	L4	CO3	PO1 PO2 PO4 PO6 PO7 PO8 PO10
		(OR)				
6.	a)	Derive an expression for the factor of safety of a purely cohesive soil slope using Swedish slip circle method.	6 Marks	L4	CO3	PO1 PO2 PO10
	b)	Define Taylor's stability number and explain how it is used in the stability analysis of slope under submerged condition.	6 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	State the assumptions made in Terzaghi's bearing capacity analysis. Distinguish between general and local shear failures.	6 Marks	L4	CO4	PO1 PO2 PO10
	b)	A square footing of size 2.5 m is built in a homogeneous bed of dense sand of unit weight 20 kN/m^3 at a depth of 1.5 m below the ground surface. Estimate the safe load that can be carried by footing with a factor of safety of 3 against shear failure. Take N_c=65.4, N_q=49.4 and N_γ=54.0.	6 Marks	L4	CO4	PO1 PO2 PO4 PO6 PO7 PO10
		(OR)				
8.	a)	Explain the plate load test to determine the bearing of soils. What are its limitations?	6 Marks	L2	CO4	PO1 PO10
	b)	Plate load tests were conducted in a cohesive soil using two plates of different sizes and the following results were obtained. Find the size of the square footing to carry a load of 800 kN at a settlement of 25 mm.	6 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO6 PO8 PO10

Load (kN)	Size of plate (m)	Settlement (mm)
40	0.3 x 0.3	25
100	0.6 x 0.6	25

		UNIT-V				
9.	a)	With the help of sketch, explain the load transfer mechanism in a single pile.	6 Marks	L2	CO5	PO1 PO10
	b)	A group of nine piles of 10 m length are arranged in square pattern in sand. Each pile is of 300 mm in diameter with centre to centre spacing of 900 mm. Calculate the ultimate load capacity of the pile group. Take N_q 27, $\emptyset = 30^0$, γ = 19 kN/m^3	6 Marks	L4	CO5	PO1 PO2 PO4 PO8 PO10
		(OR)				
10.	a)	Discuss the process of sinking of well foundation in detail.	6 Marks	L2	CO5	PO1 PO10
	b)	Design a pile group to carry 3000 kN in a soil of uniform clay to depth of 6m underlain by hard rock. The unconfined compressive strength (average) of the clay is 30 kN/m^2. Adopt a factor of safety of 3 against shear failure.	6 Marks	L6	CO5	PO1 PO2 PO3 PO4 PO6 PO8

REINFORCED CEMENT CONCRETE STRUCTURES

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		A reinforced concrete beam is to be designed over an effective span of 5m to support a design service load of 8 kN/m. Adopt M20 grade concrete and Fe 415 HYSD bars and design the beam to satisfy the collapse and serviceability limit states.	12 Marks	L6	CO1	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
		(OR)				
2.		A tee beam slab floor of an office comprises of a slab 150mm thick spanning between ribs spaced at 3m apart. The effective span of the beam is 8m. Live load on floor is 4 kN/m². Using M20 grade concrete and Fe 415 HYSD bars, design one of the intermediate tee beams.	12 Marks	L6	CO1	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
		UNIT-II				
3.	a)	An RCC beam 230mm wide and 450mm deep is reinforced with 4 bars of 16mm diameter of grade Fe 415 on tension side. If design shear force is 60 kN. Design the shear reinforcement consisting only of vertical stirrups. The grade of concrete used is M20.	6 Marks	L6	CO2	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
	b)	A tee beam continuous over 8 m spans has a flange width 900 mm and web width of 300 mm. Effective depth = 400 mm, Area of tension reinforcement = 1600 mm², Area of compression reinforcement = 900 mm². Adopting Fe 415 HYSD bars, estimate the safety of the beam for deflection control using the empirical method.	6 Marks	L4	CO2	PO1 PO2 PO4 PO5 PO6 PO8 PO10
		(OR)				
4.		A rectangular reinforced concrete beam section of size 400 mm overall depth and 200 mm wide is subjected to a twisting moment of 2500 N-m in addition to a transverse shear of 60 kN at the critical section. Calculate the stirrups necessary. Assume M20 grade concrete and Fe 415 steel. The bending moment at a critical section is 25000 N-m. Take effective cover as 40 mm.	12 Marks	L6	CO2	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10

UNIT-III

5.	a)	Explain where and how you provide torsion reinforcement in slabs.	6 Marks	L4	CO3	PO1 PO2
	b)	Design Two way slab for an office floor to suit the following data. Size of office floor is 4 x 6 m, the edge condition is two adjacent edges discontinuous, materials is M20 grade concrete and Fe 415 HYSD bars.	6 Marks	L6	CO3	PO1 PO2 PO3 PO4 PO5 PO6 PO8 P010
		(OR)				
6.		Design a reinforced concrete slab to carry a live load 3 kN/m² on an effective span of 3.5 m. Using M20 grade concrete and Fe 415 steel reinforcement. Sketch the reinforcement details.	12 Marks	L6	CO3	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10

UNIT-IV

7.	a)	How the compression failures occur in RCC columns.	4 Marks	L2	CO4	PO1
	b)	Design the reinforcement in a circular column of diameter 350 mm with helical reinforcement of 8 mm diameter to support a factored load of 1400 kN. The column has an unsupported length of 3.5 m and is braced against side sway. Adopt M20 grade concrete and Fe 415 steel bars.	8 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
		(OR)				
8.		A short rectangular column having an effective length of 3 m carries a factored axial compressive load of 2000kN. Architectural requirements dictate the column size as 600 x 450 mm. Design the column using M20 concrete and Fe415 steel.	12 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10

UNIT-V

9.	a)	Write down the different types of footings and their suitability. Enumerate the procedure for the design of combined rectangular footing for two columns only.	6 Marks	L4	CO5	PO1 PO2
	b)	A square column of size 400 mm carries a service load of 600 KN. Design an isolated footing for the column by limit state method, if the safe bearing capacity of the soil is 250 KN/m². Use M20 concrete and Fe 415 steel.	6 Marks	L6	CO5	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10

(OR)

10.	A straight stair in residential building is supported on wall on one side and stringer beam on the other side. The risers are 150 mm and treads are 250 mm, and the horizontal span of the stair as 1.2 m. Design the steps use M20 grade concrete.	12 Marks	L6	CO5	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10

TRANSPORTATION ENGINEERING

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What are the required surveys to select the best alignment for given road?	6 Marks	L2	CO1	PO1 PO5 PO6 PO7
	b)	Design the extra widening required for a pavement of width 7m on a horizontal curve of radius 255 m if the longest wheel base of vehicle expected on the road is 7.0 m. Design speed is 75 kmph.	6 Marks	L6	CO2	PO1 PO2 PO3 PO4 PO8
		(OR)				
2.	a)	Write a short note on Jayakar Committee recommendations.	6 Marks	L2	CO1	PO1
	b)	Design overtaking sight distance for a design speed of 90 KMPH. Assume all other required data as per IRC recommendations.	6 Marks	L6	CO2	PO1 PO2 PO3 PO4 PO6 PO7 PO8

UNIT-II

3.	a)	A two lane road at present carrying a traffic of 1500 CVPD. It is to be strengthen for growing traffic needs, VDF=3.75, rate of growth of traffic 7.5% annum, period of construction is 5 years. The pavement is to be designed for a life of 10 years after completion. Calculate the cumulative standard axles used for design.	6 Marks	L4	CO3	PO1 PO2 PO5 PO8
	b)	Write a short note on Los Angeles abrasion test and its significance.	6 Marks	L2	CO1	PO1 PO5 PO8
		(OR)				
4.	a)	Write a short note on ductility test on bitumen and its significance.	6 Marks	L2	CO1	PO1 PO2 PO5 PO8
	b)	Calculate the stress at interior, edge and corner regions of a cement concrete pavement using Westergaard's equation. Use the following data. Wheel load, P=5500kg; Modulus of elasticity of concrete, E=3.0x10^5 kg/cm^2; Pavement thickness, h=15 cm, Poisson's ratio=0.15; Modulus of subgrade reaction=6.0 kg/cm^3; Radius of contact area=12 cm.	6 Marks	L4	CO3	PO1 PO2 PO8

UNIT-III

5.	a)	What is the need of spot speed studies discuss briefly?	6 Marks	L2	CO4	PO1
	b)	Briefly discuss the scope of traffic engineering.	6 Marks	L4	CO4	PO1 PO2
		(OR)				
6.	a)	Write short note road user characteristics.	6 Marks	L2	CO4	PO1
	b)	Briefly discuss the latest developments in traffic volume data collection.	6 Marks	L4	CO4	PO1 PO2 PO5 PO12

UNIT-IV

7.	a)	Discuss briefly about rail joints with neat sketches.	6 Marks	L4	CO5	PO1 PO2 PO10
	b)	A turnout takes off as a 6^0 curve with contrary flexure from a BG main line on a 4^0 curve. The speed on the branch line is restricted to 45 km/hr. Determine the maximum permissible speed on the main line.	6 Marks	L4	CO5	PO1 PO2 PO4
		(OR)				
8.	a)	Briefly discuss the permanent way with a neat sketch.	6 Marks	L2	CO5	PO1 PO10
	b)	Determine the quantity of all the materials required for 5 km track laying for BG.	6 Marks	L4	CO5	PO1 PO2 PO4 PO8

UNIT-V

9.	a)	Write a short note on Airport drainage.	6 Marks	L2	CO6	PO1 PO6 PO7 PO8
	b)	The monthly average of the maximum daily temperature at the proposed site of an airport is 45^0 C during the hottest month of the year. During the same month, the average daily temperature is 33^0 C. Calculate the airport reference temperature. If the site is at MSL and is having an effective gradient of 0.5%. Calculate the actual length to be provided, if basic runway length is 2000 m.	6 Marks	L4	CO6	PO1 PO2 PO4 PO8
		(OR)				
10.	a)	Write a short note on Terminal builidng and its functions.	6 Marks	L2	CO6	PO1 PO8
	b)	The basic length of runway required for take-off and landing are 2000m and 2400m respectively at the proposed site for an airport situated 450m above MSL. The airport reference temperature is 24^0C and the effective gradient along the proposed runway is 0.4%. Calculate the actual length of the runway to be provided.	6 Marks	L4	CO6	PO1 PO2 PO4 PO8

CONSTRUCTION EQUIPMENT AND AUTOMATION

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Describe various criteria for deciding two–shift or three-shift working in a construction project.	6 Marks	L2	CO1	PO1 PO2
	b)	Elucidate safety control measures during construction.	6 Marks	L4	CO1	PO1 PO2 PO7
		(OR)				
2.	a)	Write short notes on: i) Field repairs. ii) Servicing of equipment. iii) Maintenance of engine of heavy earthmoving equipment.	6 Marks	L2	CO1	PO1 PO5 PO6
	b)	A machine was purchased for Rs.45000/- on 1st January, 1985, the erection and installation work costs Rs.7000/-. This was replaced by a new one on 31st December 2005. If the scrap value was estimated fund on 15th June, 1996.	6 Marks	L4	C01	PO1 PO2 PO5 PO10

UNIT-II

3.	a)	Explain the importance of forklifts and mention its types.	6 Marks	L2	CO2	PO1 PO2 PO5
	b)	Discuss different activities an excavator can perform. Also, list the applications of excavator.	6 Marks	L4	CO2	PO1 PO2 PO5
		(OR)				
4.	a)	Discuss the functions of scrapper and List the types of scrapper.	8 Marks	L4	CO2	PO1 PO2 PO5
	b)	Name different portable bins. Write the uses and applications of different portable bins.	4 Marks	L2	CO2	PO1 PO2 PO5

UNIT-III

5.	a)	Discuss in detail about the process of Ready mix concrete manufacturing with a neat sketch.	6 Marks	L2	CO3	PO1 PO5 PO10
	b)	How will you enhance the production capacity of: i) Jaw crushers. ii) Hammer mills. iii) Screening plants. iv) Crushing plants.	6 Marks	L4	CO3	PO1 PO2 PO5 PO6
		(OR)				
6.	a)	Define the process of grouting. Explain the different types of grouting and their applications.	6 Marks	L2	CO3	PO1 PO5
	b)	Suggest two air pollution control equipment used in hot mix asphalt plants and explain about its working.	6 Marks	L4	CO3	PO1 PO2 PO5

UNIT-IV

7.	a)	What is BIM? Explain which professionals and which areas can BIM is useful.	6 Marks	L4	CO4	PO1 PO2 PO5 PO11 PO12
	b)	Explain the stages of project planning.	6 Marks	L2	CO4	PO1 PO5 PO10 PO11
		(OR)				
8.	a)	Explain different dimensions in construction and specify how 5-D is useful in undertsanding the construction process.	6 Marks	L4	CO4	PO1 PO2 PO5 PO10 PO11
	b)	How do engineers are trained in manging these autonomous applications in construction.	6 Marks	L4	CO4	PO1 PO2 PO10 PO11

UNIT-V

9.	a)	Suggest the statement "Robots are very useful in the field of construction".	6 Marks	L4	CO5	PO1 PO2 PO5 PO6 PO11
	b)	"Automation in pre-cast industry" give advantages and disadvantages.	6 Marks	L2	CO5	PO1 PO5 PO11
		(OR)				
10.	a)	Differentiate AGVs and AMVs.	6 Marks	L4	CO5	PO1 PO2 PO5 PO11
	b)	As an engineer would like to prefer robots over mechanical equipment. Why?	6 Marks	L4	CO5	PO1 PO2 PO5 PO6 PO11

ENVIRONMENTAL POLLUTION AND CONTROL

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What is air pollution? Differentiate between primary and secondary air pollutants with examples.	6 Marks	L4	CO1	PO1 PO2 PO6 PO7
	b)	Explain about the different layers of atmosphere with a neat sketch.	6 Marks	L2	CO1	PO1 PO6 PO7 PO10
		(OR)				
2.	a)	Analyze the various impacts of noise pollution on animals and humans.	6 Marks	L4	CO1	PO1 PO2 PO6 PO7
	b)	Discuss about the role of particulate matter in air.	6 Marks	L2	CO1	PO1 PO6 PO7

UNIT-II

3.	a)	Briefly explain self-purification of environment and the associated mechanism.	6 Marks	L2	CO2	PO1 PO6 PO7 PO10
	b)	Briefly explain any one of the case studies in controlling the noise pollution.	6 Marks	L4	CO2	PO1 PO4 PO5 PO6 PO8 PO12
		(OR)				
4.	a)	What are the control options available to reduce of air pollution generated from automobiles?	6 Marks	L2	CO2	PO1 PO6 PO7 PO8
	b)	There are five air conditioners in a room producing 56 dB, 53 dB, 59 dB, 53 dB, 79 dB. Calculate the total sound produced by them.	6 Marks	L4	CO2	PO1 PO2 PO4 PO6 PO7

UNIT-III

5.	a)	Differentiate preliminary and primary treatment of waste water.	6 Marks	L4	CO4	PO1 PO2 PO5 PO6 PO7 PO8 PO10
	b)	What is the need of coagulation process in water treatment? Explain different type coagulants used.	6 Marks	L4	CO3	PO1 PO4 PO5 PO6 PO7 PO10
		(OR)				
6.	a)	Prepare a flow chart of water treatment steps of a water treatment plant. Discuss about disinfection.	6 Marks	L4	CO3	PO1 PO2 PO5 PO6 PO7 PO8 PO10
	b)	What is the purpose of preliminary treatment in wastewater treatment plant?	6 Marks	L2	CO3	PO1 PO5 PO6 PO8 PO10

UNIT-IV

7.	a)	How does surface mining cause soil pollution?	6 Marks	L4	CO4	PO1 PO2 PO4 PO6 PO7
	b)	How polluted soils can impact on human health in urban areas?	6 Marks	L4	CO4	PO1 PO2 PO4 PO6 PO7 PO8 PO10
		(OR)				
8.		How to solve the challenges associated with land pollution?	12 Marks	L4	CO4	PO1 PO2 PO4 PO6 PO7 PO8 PO10

UNIT-V

9. a) Waste composition has been measured for two cities. The results are summarized in Table below: — 6 Marks — L4 — CO5 — PO1 PO2 PO4 PO6 PO7

	City 1	City 2
Wet Weight Generation Rate (kg/person-day)	2.0	1.8
Wet Weight Composition (%)		
Food	15	10
Paper	30	40
Yard	20	15
Other	35	35
Moisture content of fractions (% on wet weight basis)		
Food	80	50
Paper	10	4
Yard	80	30
Other	5	4

i) Which city generates more paper on a dry weight basis?
ii) Find the percent moisture (wet weight basis) for city 1. A nearby disposal site receives all of its MSW (Municipal Solid Waste) from cities 1 and 2. The average moisture content for MSW disposed of at the site is 20 percent.
iii) What fraction of the dry weight refuse comes from city 1?

b) Distinguish open dumping and sanitary land filling. — 6 Marks — L4 — CO5 — PO1 PO2 PO4 PO6 PO7 PO8

(OR)

10. a) What are the wastes to energy options? Discuss any one of the technique in detail. — 6 Marks — L2 — CO5 — PO1 PO5 PO6 PO7 PO8

b) Differentiate primary and secondary air pollutants. — 6 Marks — L4 — CO1 — PO1 PO2 PO6 PO7

CONTROL SYSTEMS

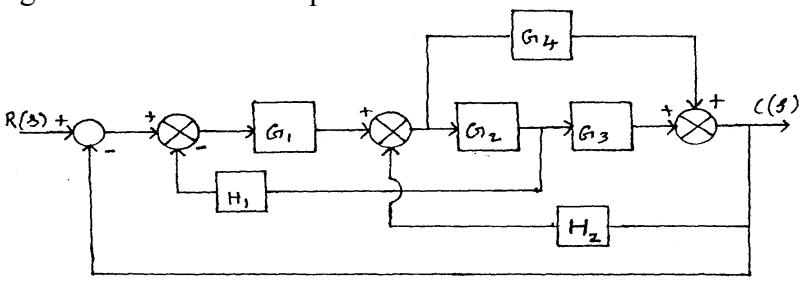
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

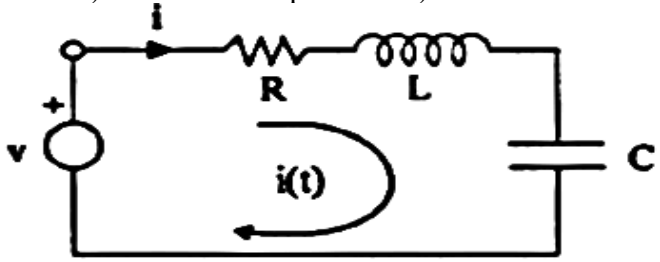
UNIT-I

1.	a)	Derive an expression for the transfer function of an Armature controlled DC motor.	6 Marks	L3	CO1	PO1
	b)	Obtain transfer function for the given system using block diagram reduction techniques.	6 Marks	L3	CO1	PO5



(OR)

2.	a)	Define transfer function and enumerate its advantages and disadvantages.	4 Marks	L2	CO1	PO1
	b)	Obtain the relation between the applied voltage and the current in the form of : i) Differential equation. ii) Transfer function.	8 Marks	L3	CO1	PO2



UNIT-II

3.	a)	Derive the expression for steady state error and obtain its static error constants k_p, k_v and k_a.	6 Marks	L2	CO2	PO1
	b)	For a system whose transfer function is $G(S) = \frac{1}{S(S+1)}$, the input to the system is described by $r(t) = 4 + 6t + 2t^2$. Find the generalized error coefficients and steady state error.	6 Marks	L4	CO2	PO2

(OR)

4.	a)	What is an integral controller and justify how does it improves the dynamics of a control system?	4 Marks	L2	CO2	PO7
	b)	Determine the nature of the closed-loop system for a unit-step input from open loop transfer function of unity feedback system given by $G(S) = \frac{8}{S(S+1)}$. Also determine rise time, peak time and peak overshoot.	8 Marks	L2	CO2	PO2

UNIT-III

5.	a)	Draw the Nyquist plot for the system whose open loop transfer function is $G(S)H(S) = \frac{K}{S(S+2)(S+10)}$. Determine the range of 'K' for which closed loop system is stable.	6 Marks	L2	CO3	PO2
	b)	Determine the range of K for which the system represented by the characteristic equation $S^2 + KS + 2K - 1 = 0$ is stable.	6 Marks	L2	CO3	PO4

(OR)

6.		Sketch the Bode plots showing the magnitude in dB and phase angle in degrees as a function of log frequency for the transfer function $G(S)H(S) = \frac{KS^2}{(1+0.2S)(1+0.02S)}$. Determine the system gain *K* for the gain cross over frequency to be 5 rad/sec.	12 Marks	L2	CO3	PO4

UNIT-IV

7.		A Unity feedback system has an open loop transfer function $G(S) = \frac{K}{S(1+2S)}$. Design a lag compensator so that the phase margin is 40° and the steady state error for ramp input is less than or equal to 0.2.	12 Marks	L4	CO4	PO3

(OR)

8.		Consider the unity feedback system whose open loop transfer function is $G(s)H(s) = \frac{K}{S(S+3)(S+6)}$. Design a suitable compensator to meet the following specifications i) Velocity error constant, K_v= 80 and ii) Phase margin=35^0.	12 Marks	L4	CO4	PO3

UNIT-V

9.		Test the controllability and observability of a system described by $\begin{bmatrix} \dot{X}_1 \\ \dot{X}_2 \\ \dot{X}_3 \end{bmatrix} = \begin{bmatrix} 0 & 1 & 0 \\ 0 & 0 & 1 \\ -160 & -56 & -14 \end{bmatrix} \begin{bmatrix} X_1 \\ X_2 \\ X_3 \end{bmatrix} + \begin{bmatrix} 0 \\ 1 \\ -14 \end{bmatrix} u, \quad y = \begin{bmatrix} 1 & 0 & 0 \end{bmatrix} \begin{bmatrix} X_1 \\ X_2 \\ X_3 \end{bmatrix}$	12 Marks	L4	CO5	PO4

(OR)

10.	a)	State the properties of state transition matrix and its significance.	6 Marks	L2	CO5	PO1
	b)	Find the state transitions matrix of the following system. $\dot{X} = \begin{bmatrix} 0 & 1 & 0 \\ 0 & 0 & 1 \\ -2 & -5 & -4 \end{bmatrix} X.$	6 Marks	L3	CO5	PO2

COMPUTER AIDED DESIGN AND MANUFACTURING

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What is CAM and write the advantages of CAM?	6 Marks	L2	CO1	PO1 PO2
	b)	Explain the database requirements for CIM.	6 Marks	L2	CO1	PO1 PO2
		(OR)				
2.	a)	Briefly describe various types of storage devices used in computer.	8 Marks	L2	CO1	PO1 PO2
	b)	Write a short note on Computer Integrated Manufacturing (CIM).	4 Marks	L2	CO1	PO1 PO2
		UNIT-II				
3.		Explain 2D and 3D transformations in detail.	12 Marks	L2	CO2	PO1 PO2
		(OR)				
4.	a)	Explicate Geometric transformation. Explain any three common transformations used in computer graphics.	6 Marks	L2	CO2	PO1 PO2
	b)	Differentiate parametric and non-parametric representation of curves.	6 Marks	L2	CO2	PO1 PO2
		UNIT-III				
5.		Discuss on CNC hardware basics.	12 Marks	L2	CO3	PO1 PO5
		(OR)				
6.	a)	Discuss the functions of G codes and explain any five of them in detail.	8 Marks	L2	CO3	PO1 PO5
	b)	What are canned cycles in CNC programming? Explain with an example.	4 Marks	L2	CO3	PO1 PO2
		UNIT-IV				
7.	a)	Write a short note on part family concept.	6 Marks	L2	CO4	PO1 PO5
	b)	Describe production flow analysis in GT concept.	6 Marks	L2	CO4	PO1 PO2
		(OR)				
8.	a)	Contrast contact and non-contact inspection methods.	6 Marks	L3	CO4	PO1 PO2 PO5
	b)	Describe the typical activities involved in CAQC.	6 Marks	L2	CO4	PO1 PO2 PO5

UNIT-V

9.		Define a flow line and classify various types of flow lines.	12 Marks	L1	CO5	PO1 PO2 PO5
		(OR)				
10.	a)	Define Automation. Describe the elements of Automation.	6 Marks	L2	CO5	PO1 PO2 PO5
	b)	Classify Robots by coordinate system with a neat sketch.	6 Marks	L2	CO5	PO1 PO2 PO5

III B.Tech I Semester (SVEC-19) Supplementary Examinations June – 2022

OPERATIONS RESEARCH

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	A company produces two types of leather belts types A and B. Belt A is of a superior quality and belt B is of a lower quality. Profits on the two types of belts are 40 and 30 paise per belt respectively. Each belt of type A requires twice as much time as required by a belt of type B. If all the belts were of type B, the company could produce 1000 belts per day. The supply of leather however is sufficient only for 800 belts per day. Belt A requires a fancy buckle and only 400 fancy buckles are available per day. For belt of type B only 700 buckles are available per day. Formulate LP model and solve the problem.	12 Marks	L3	CO1	PO1 PO2 PO3

(OR)

2.	Solve the following problem by Big-M method. Maximize $Z = 2x_1+5x_2$ Subject to $x_1+4x_2 \geq 24$ $3x_4+x_2 = 21$ $x_1+x_2 \leq 9$ when $x_1 , x_2 \geq 0$	12 Marks	L3	CO1	PO1 PO2 PO3

UNIT-II

3.	A company has received a contract to supply gravel for three new construction projects located in towns A, B and C.	12 Marks	L3	CO1	PO1 PO2 PO3

Project Location	Weekly Requirement (truck loads)
A	72
B	102
C	41

The company has three gravel plants X, Y and Z located in three different towns.

Plant	Amount available/week (truck loads)
X	76
Y	62
Z	77

The company has computed the delivery cost from each plant to each project site. These costs (in rupees) are shown below:

	A	B	C
X	4	8	8
Y	16	24	16
Z	8	16	35

i) Schedule the shipment from each plant to each project location in such a manner so as to minimize the total transportation cost within the constraints imposed by plant capacities and project requirements.

ii) Find the minimum cost.

Is the solution unique? If it is not, find alternative schedule with the same minimum cost.

(OR)

4. A 400m medley relay involves 4 different swimmers, who successively swim 100m of the backstroke, breaststroke, butterfly and freestyle. A coach has six very fast swimmers whose expected times (in seconds) in the individual events are given below: — 12 Marks — L2 — CO1 — PO1

Swimmer	Event 1	2	3	4
1	65	73	63	57
2	67	70	65	58
3	68	72	69	55
4	67	75	70	57
5	71	69	75	57
6	69	71	66	59

How should the coach assign swimmers to the relay?

UNIT-III

5. a) Explain briefly the following: — 4 Marks — L1 — CO2 — PO1

i) Dominance. ii) Mixed strategy.

b) Consider the 5 x 2 game played by players C and D and solve it by graphical method. — 8 Marks — L3 — CO2 — PO1 PO2 PO3

	Player D		
Player C		I	II
	I	1	2
	II	4	5
	III	9	-7
	IV	-3	-4
	V	2	1

(OR)

6. a) A manufacturing company purchases 9000 components for its annual requirement, ordering one month usage at a time. Each component costs Rs 20. The ordering cost per order is Rs 15 and the carrying charges are 15 % of the average inventory per year. You have been assigned to suggest a more economical purchasing policy for the company. What advice would you offer and how much would it save the company per year? — 5 Marks — L2 — CO3 — PO1

b) A manufacturing company needs 2500 units of a particular component every year. The company buys it at the rate of Rs 30 per unit. The order processing cost for this component is estimated at Rs 15 and the cost of carrying a component in stock comes to about Rs 4/ year. The company can manufacture this component internally. In that case it saves 20% of the price of the product. However, it estimates a setup cost of Rs 250 per production run. The annual production rate would be 4800 units. The inventory holding cost remains unchanged. Determine EOQ and the optimal Number of orders placed in a year. Determine the optimum production lot size. Should the company manufacture the component internally or continue to purchase it from the supplier? — 7 Marks — L3 — CO3 — PO1 PO2

UNIT-IV

7. The following table gives the activities and other relevant data for a project. — 12 Marks — L3 — CO4 — PO1 PO2 PO3

Activity	Immediate predecessor (s)	Normal time (days)	Crash time (days)	Normal cost (Rs.)	Crash cost (Rs.)
A	__	4	3	60	90
B	__	6	4	150	250
C	__	2	1	38	60
D	A	5	3	150	250
E	C	2	2	100	100
F	A	7	5	115	175
G	B, D, E	4	2	100	240

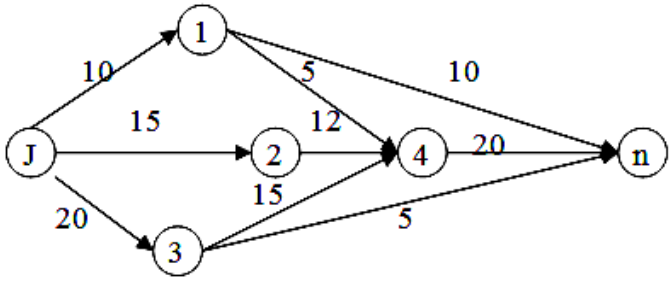
Indirect cost varies as follows:

Days	15	14	13	12	11	10	9	8	7	6
Cost(Rs.)	600	500	400	250	175	100	75	50	35	25

i) Draw the network diagram.
ii) Find the normal project duration and the associated total cost.
iii) Find the optimal project duration and the associates total cost.

(OR)

8. Find the maximum flow for the following network from source to sink. — 12 Marks — L3 — CO4 — PO1 PO2 PO3



UNIT-V

9. a) The arrival rate of customers at the single window booking counter of a two wheeler agency follows poission distribution and and the service time follows exponential distribution and hence, the service rate also follows poission distribution. The arrival rate and the service rate are 25 customers per hour and 35 customers per hour respectively. Find the following: — 5 Marks — L3 — CO5 — PO1 PO2 PO3
   i) Utilization of the booking clerk.
   ii) Average number of waiting customers in the queue.
   iii) Average number of waiting customers in the system.
   iv) Average waiting time per customer in the queue.
   v) Average waiting time per customer in the system.

   b) An oil company is constructing a service station on a high way. Traffic analysis indicated that customers' arrivals over most of the day would approximate a poisson distribution with a mean of 40 automobiles per hour, with that service time distribution approximating the negative exponential. If 5 pumps are installed; — 7 Marks — L3 — CO5 — PO1 PO2 PO3

i) What is the probability that an arrival would have to wait in line?
ii) Find out the average waiting time, average time spent in the system and the average number of automobiles in the system.

(OR)

10. A dentist schedules all her patients for 30 minutes appointments. Some of the patients take more or less than 30 minutes depending on the type of dental work to be done. The following summary shows the various categories of work, their probabilities and time needed to complete the work. — 12 Marks — L4 — CO5 — PO1, PO2, PO3

Category	Time required (Minutes)	Probability of category
Filling	45	0.4
Crown	60	0.15
Cleaning	15	0.15
Extraction	45	0.1
Checkup	15	0.2

Simulate the dentist's clinic for four hours and determine the average waiting time for the patients as well as the idleness of the doctor. Assume that all the patients show up at the clinic at exactly their scheduled arrival times, starting at 8 A.M. Use the following random numbers for handling the above problem: 40, 82, 11, 34, 25, 66, 17, 79.

THERMAL ENGINEERING-II
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Define boiler. Briefly explain boiler accessories.	6 Marks	L2	CO1	PO1
	b)	Illustrate with a neat sketch working of lamont boiler.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Discuss boiler efficiency and heat balance sheet.	6 Marks	L2	CO1	PO1
	b)	The following observations were made in a boiler trail. Coal used = 250 kg of calorific value = 29800 KJ/kg, Water evaporated = 2000 kg, Steam pressure = 11.5 bar, dryness fraction of steam = 0.95 and feed water temperature = 34ºC. Calculate: i. Equivalent of evaporation ii. Boiler efficiency	6 Marks	L3	CO1	PO1 PO2
		UNIT-II				
3.	a)	Derive an expression for discharge of steam flow through nozzle.	6 Marks	L2	CO2	PO1
	b)	Dry saturated steam at a pressure of 8 bar with negligible velocity expands isentropically in a convergent nozzle to 2 bar and dryness fraction 0.89. Determine the velocity of steam leaving the nozzle.	6 Marks	L3	CO2	PO1 PO2
		(OR)				
4.	a)	Compare the merits and demerits of surface condenser over jet condenser.	6 Marks	L2	CO2	PO1
	b)	Vacuum efficiency of condenser is 96%. The temperature of condensate is 40ºC. If the barometer reads 752 mm of hg, find the vacuum gauge reading of the condenser.	6 Marks	L2	CO2	PO1 PO2
		UNIT-III				
5.	a)	Differentiate between impulse and reaction turbines.	6 Marks	L1	CO3	PO1
	b)	The steam supply to an impulse turbine with a single row of moving blades is 2 kg/sec. The turbine develops 130KW, the blade velocity being 175 m/s. The steam flows from the nozzle with a velocity of 400 m/s and the velocity coefficient of blades is 0.9. Find the nozzle angle, blade angle at entry and exit, if the steam flows axially after passing over the blades.	6 Marks	L3	CO3	PO1 PO2 PO3 PO4
		(OR)				
6.	a)	What is degree of reaction? Explain with h-s diagram.	6 Marks	L3	CO3	PO1
	b)	A parson's reaction turbine, while running at 400 r.p.m consumes 30 tons of steam per hour. The steam at a certain stage is at 1.6 bar with dryness fraction of 0.9 and the stage develops 10KW. The axial velocity of flow is constant and equal to 0.75 of the blade velocities. Find mean diameter of the drum and volume of the steam flowing per second. The balde tip angles at inlet and exit as 35º and 20º respectively.	6 Marks	L3	CO3	PO1 PO2 PO3 PO4

UNIT-IV

7.	a)	List the desirable properties of refrigerants.	6 Marks	L3	CO4	PO1 PO2
	b)	In a refrigeration plant works on bell Coleman cycle. Air is compressed to 5 bars from 1 bar. Its initial temperature is 10º C after compression the air is cooled up to 20º C in a cooler before expanding back to a pressure of 1 bar. Determine the theoretical COP of the plant and net refrigerating effect. Take Cp = 1.005 KJ/kg K and Cv = 0.718 KJ/kg K.	6 Marks	L3	CO4	PO1 PO2 PO3
		(OR)				
8.	a)	Discuss the advantages of vapour absorption refrigeration system over vapour compression refrigeration system.	6 Marks	L3	CO4	PO1 PO2
	b)	Differentiate between heat engine, refrigerator and heat pump with neat sketch.	6 Marks	L3	CO4	PO1 PO2 PO3

UNIT-V

9.	a)	With the help of psychrometric charts, explain the following process: i) Heating and humidification process. ii) Cooling and de humidification.	6 Marks	L3	CO5	PO1
	b)	Atmospheric air with dry bulb temperature of 28ºC and a wet bulb temperature of 17ºC is cooled to 15ºC without changing its moisture content. Find i) Original relative humidity. ii) Final relative humidity. iii) Final wet bulb temperature.	6 Marks	L3	CO5	PO1 PO2 PO3
		(OR)				
10.	a)	Define the following terms: i) Specific humidity. ii) Absolute humidity. iii) Relative humidity.	6 Marks	L3	CO5	PO1 PO2
	b)	Draw a neat diagram of air conditioning system required for winter season. Explain the working of different components in the circuit.	6 Marks	L3	CO5	PO1 PO2 PO3 PO4

DIGITAL SIGNAL PROCESSING

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Check the stability of the LTI systems , whose impulse responses are. i) $h(n) = 4^n u(-n)$. ii) $h(n) = 0.3^n u(n) + 2^n u(n)$.	6 Marks	L2	CO1	PO2
	b)	Test the causality of the following system. i) $y(n) = x(n) + 2x(n+3)$. ii) $y(n) = x(n^2)$.	6 Marks	L2	CO1	PO2
		(OR)				
2.		Evaluate the transfer function of the system $y(n) = 0.7y(n-1) - 0.12y(n-2) + x(n-1) + x(n-2)$ using Z transform. Assume the system is initially at rest.	12 Marks	L3	CO1	PO4

UNIT-II

3.	a)	State and prove any two properties of DFT.	6 Marks	L2	CO2	PO1
	b)	Construct the general flow graph for 8 point DIFFFT algorithm and analyze its computational complexity.	6 Marks	L2	CO2	PO2
		(OR)				
4.		Apply decimation in time algorithm and compute the DFT of the following sequence: x(n)={2, 1, 2, 1, 1, 2, 1, 2 }.	12 Marks	L3	CO2	PO5

UNIT-III

5.	a)	Apply impulse invariant transformation method and Convert the analog filter into a digital filter whose system function is $H(S) = \frac{S + 0.4}{(S + 0.4)^2 + 16}$. Assume T=0.1sec.	8 Marks	L3	CO3	PO5
	b)	Express the relationship between digital and analog frequency in bilinear and impulse invariant method.	4 Marks	L2	CO3	PO1
		(OR)				
6.		Design a digital Butterworth filter satisfying the constraints. $0.707 \le \left\| H\left(e^{j\omega}\right) \right\| \le 1 \quad 0 \le \omega \le \frac{\pi}{2}$ $\left\| H\left(e^{j\omega}\right) \right\| \le 0.2 \quad \frac{3\pi}{4} \le \omega \le \pi$ with T=1sec using bilinear transformation.	12 Marks	L4	CO3	PO3

UNIT-IV

7.	a)	Evaluate the frequency response of FIR filter defined by $y(n) = 0.25x(n) + x(n-1) + 0.25\ x(n-2)$. Calculate the phase delay and group delay.	7 Marks	L4	CO3	PO2
	b)	Realize the FIR filter having transfer function $H(z)=\mathbf{z^5+2z^4+0.5z^3+0.5z^2+2z+1}$.	5 Marks	L3	CO3	PO5
		(OR)				
8.		Design a linear phase FIR highpass filter using hamming window with cut off frequency $Wc=0.8\pi$ rad/sample and N=7.	12 Marks	L4	CO3	PO3

UNIT-V

9.	a)	What are the functional units in the architecture of TMS320C6X processor and explain their operations.	8 Marks	L2	CO4	PO1
	b)	Write short notes on Control Register file.	4 Marks	L2	CO4	PO1
		(OR)				
10.		Discuss different addressing modes used in programmable Digital signal processor.	12 Marks	L2	CO4	PO1

RADAR ENGINEERING

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	With neat diagram of normalized radar cross section of sphere as a function of its circumference. Explain Rayleigh, Mie and optical region.	6 Marks	L2	CO1	PO2
	b)	With appropriate diagrams explain the process of envelope detection.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Identify and build the relation between range and minimum detectable signal for RADAR.	6 Marks	L2	CO1	PO2
	b)	With the basic principles of RADAR discuss the various parameters which improve the performance of the RADAR.	6 Marks	L4	CO1	PO4
		UNIT-II				
3.	a)	Explain how isolation between transmitter and receiver is obtained in CW RADAR.	6 Marks	L2	CO1	PO1
	b)	Construct a block diagram to evaluate the working of MTI RADAR with power amplifier transmitter.	6 Marks	L2	CO1	PO1
		(OR)				
4.	a)	What is the use of delay line canceller? Obtain the frequency response of a single and double delay line canceller.	6 Marks	L3	CO1	PO5
	b)	Demonstrate MTI RADAR using range gates and filters using block diagram and discuss its frequency response characteristics.	6 Marks	L3	CO1	PO5
		UNIT-III				
5.	a)	What do you mean by term tracking radar? Explain the working of monopulse radar with the help of block diagram.	6 Marks	L3	CO2	PO5
	b)	With a neat diagram explain the operation of a conical scan Radar. Explain the various factors that need to be considered for optimum squint angle.	6 Marks	L2	CO2	PO1
		(OR)				
6.	a)	Distinguish scanning and tracking. Explain any one method of tracking in detail.	6 Marks	L2	CO2	PO5
	b)	Why is the acquisition needed? What are the various search patterns available explain them with neat sketches.	6 Marks	L3	CO2	PO5
		UNIT-IV				
7.	a)	Elaborate the various displays available and specify their characteristics.	6 Marks	L2	CO3	PO1
	b)	What is the role of duplexers in radar system? Illustrate transmit and receive condition in case of balanced duplexer.	6 Marks	L2	CO3	PO1
		(OR)				
8.	a)	Infer how beam width of a phase array antenna will vary with steering angle.	6 Marks	L2	CO3	PO2
	b)	Illustrate how Neyman-Pearson observer criteria are used for detection of RADAR signals.	6 Marks	L2	CO4	PO5

UNIT-V

9.	a)	Write a short note on Instrument landing system.	6 Marks	L1	CO5	PO2
	b)	Demonstrate the salient features of VHF Omnidirectional Range (VOR) navigation system used for detecting the position of aircrafts.	6 Marks	L2	CO5	PO6
		(OR)				
10.	a)	Elaborate how range and accuracy can be calculated for an ILS navigator system for any application.	6 Marks	L2	CO5	PO6
	b)	Explain the localizer and glide path systems of ILS.	6 Marks	L2	CO5	PO6

III B.Tech I Semester (SVEC-19) Supplementary Examinations June – 2022

MICROPROCESSORS AND INTERFACING

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the Register organization of 8086.	5 Marks	L1	CO1	PO1
	b)	Sketch the pin diagram of 8086 and explain each and every pin.	7 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Illustrate the timing diagram for the minimum mode of read cycle of 8086.	6 Marks	L2	CO1	PO2
	b)	Write an ALP to find largest byte in given set of n bytes.	6 Marks	L4	CO1	PO4
		UNIT-II				
3.	a)	Explain in detail about PUSH and POP Instructions in 8086.	6 Marks	L1	CO2	PO1
	b)	Elaborate Interrupt Service Routine.	6 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Define the following with an example. i) Byte, ii)Word, iii)Quad word	6 Marks	L1	CO2	PO1
	b)	Write an ALP to count number of bit '1's in a given word '56FA'H.	6 Marks	L4	CO2	PO4
		UNIT-III				
5.	a)	Define Interfacing and mention the purpose of interfacing.	6 Marks	L2	CO3	PO1
	b)	Develop an ALP to generate a 100 KHz saw tooth signal.	6 Marks	L3	CO3	PO3
		(OR)				
6.	a)	Explain how a stepper motor is different from a conventional motor for few 8086 based applications.	6 Marks	L2	CO3	PO2
	b)	Develop an Assembly language program in 8086 to rotate a stepper motor by 180º in anti clockwise direction followed by another 180º in clockwise direction.	6 Marks	L4	CO3	PO6
		UNIT-IV				
7.	a)	Write in detail about the operating modes of 8259.	6 Marks	L1	CO3	PO1
	b)	Explain the Pin architecture of 8257.	6 Marks	L1	CO3	PO1
		(OR)				
8.	a)	Explain the internal architecture of 8257 DMA controller.	6 Marks	L1	CO3	PO1
	b)	Analyze an Interrupt request response of an 8086 system.	6 Marks	L2	CO3	PO2
		UNIT-V				
9.	a)	Explain any two applications of microcontrollers.	4 Marks	L1	CO4	PO1
	b)	Analyze the operational features of 8051 microcontroller.	8 Marks	L2	CO4	PO2
		(OR)				
10.	a)	Write an ALP for 8051 microcontrollers to rotate stepper motor by 90º.	6 Marks	L3	CO4	PO5
	b)	Write an ALP to add and multiply unsigned bytes.	6 Marks	L4	CO4	PO4

PRINCIPLES OF COMMUNICATIONS

[Electrical and Electronics Engineering,
Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain how the signal of an SSB-SC is reconstructed at the receiver using block diagram.	6 Marks	L2	CO1	PO2
	b)	What does modulation actually do to a message and carrier?	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Define frequency modulation. Derive the expression for single tone FM wave and specify the bandwidth requirements.	8 Marks	L1	CO1	PO1
	b)	Give the relationship between phase and Frequency modulation and explain.	4 Marks	L2	CO1	PO2
		UNIT-II				
3.		Explain TDM and FDM with the help of block diagram and give their advantages and disadvantages.	12 Marks	L2	CO2	PO1
		(OR)				
4.	a)	What are the advantages of digital communication systems over analog communication systems?	4 Marks	L1	CO2	PO2
	b)	With neat block diagram and waveforms, explain the generations of PAM, PWM and PPM.	8 Marks	L1	CO2	PO2
		UNIT-III				
5.	a)	Explain the terms: i) Quantization error ii) Slopeover distortion iii) Effects of Quantization	6 Marks	L2	CO3	PO2
	b)	Explain adaptive delta modulation with neat block diagram and brief its advantages over delta modulation.	6 Marks	L2	CO3	PO1
		(OR)				
6.		Explain each block of a PCM system and elaborate the advantages when compared to pulse modulation techniques.	12 Marks	L4	CO3	PO2
		UNIT-IV				
7.	a)	Differentiate BFSK, BASK and BPSK with relevant waveforms.	6 Marks	L3	CO4	PO1
	b)	Briefly explain about the coherent and non-coherent techniques of a pass band digital transmission.	6 Marks	L4	CO4	PO2
		(OR)				
8.		Sketch the waveforms for the bit pattern 1100010101 using DPSK and QPSK.	12 Marks	L4	CO4	PO2

UNIT-V

9.	a)	Explain Huffman coding for ½, 1/8, 1/8, 1/16, 1/16, 1/16, 1/32 and 1/32.	6 Marks	L3	CO5	PO1
	b)	An event has six possible outcomes with the probabilities 0.5, 0.25, 0.125, 0.15, 0.25, 0.125. Find the entropy of the system. Also find rate of information if there are 16 outcomes per second.	6 Marks	L3	CO5	PO3
		(OR)				
10.	a)	Derive the coding efficiency in Shannon-Fano method.	7 Marks	L3	CO5	PO4
	b)	Design an encoder for a generator polynomial with (6, 3) block code.	5 Marks	L4	CO5	PO3

ARTIFICIAL INTELLIGENCE

[Computer Science and Engineering, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the disciplines that contribute ideas and techniques to artificial intelligence.	6 Marks	L2	CO1	PO1
	b)	Discuss the advantages of artificial intelligence.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Define rational agent? Describe the properties of task environment.	6 Marks	L1	CO1	PO1
	b)	Construct schematic diagrams for simple-reflex agent and model-based reflex agents.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Explain the four-phase problem-solving process followed by agents.	6 Marks	L1	CO2	PO1
	b)	Discuss the importance of using problem-solving agents to solve real-world problems.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Describe informed search strategies with examples.	6 Marks	L2	CO2	PO2
	b)	Analyze the process of generating heuristics from sub-problems with suitable example.	6 Marks	L4	CO2	PO2

UNIT-III

5.	a)	Explain simulated annealing algorithm.	6 Marks	L2	CO2	PO1
	b)	Examine the importance of using alpha-beta pruning to make optimal decision in multiplayer games.	6 Marks	L2	CO2	PO3
		(OR)				
6.	a)	Illustrate Hill-climbing search mechanism using 8-queens problem.	6 Marks	L2	CO2	PO1
	b)	Discuss the importance of using move ordering in game with relevant example.	6 Marks	L2	CO2	PO2

UNIT-IV

7.	a)	Elaborate the process of constructing Bayesian networks with suitable example.	6 Marks	L2	CO3	PO1
	b)	Examine the importance of using transition and sensor models to handle dynamic situations.	6 Marks	L4	CO3	PO3
		(OR)				
8.	a)	Explain the Simplified matrix algorithms used in Hidden Markov Model.	6 Marks	L2	CO3	PO2
	b)	Discuss the applications of kalman filter.	6 Marks	L1	CO3	PO1

UNIT-V

9.	a)	Elaborate on the types of robots from the hardware perspective.	6 Marks	L2	CO4	PO1
	b)	Discuss the negative aspects of artificial intelligence and its impact on society.	6 Marks	L2	CO5	PO8
		(OR)				

10.	a)	Analyze localization and mapping using a simplified kinematic and sensor model for robots.	6 Marks	L2	CO4	PO1
	b)	Outline the Trust and Transparency mechanism in artificial intelligence.	6 Marks	L2	CO5	PO6

SENSORS AND SIGNAL CONDITIONING

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Differentiate primary and secondary transducers.	6 Marks	L2	CO1	PO2
	b)	Describe the materials used for RTD's, along with their properties. Sketch their typical characteristics.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Explain the construction of wire wound strain gauges and derive the expression for the gauge factor.	6 Marks	L2	CO1	PO2
	b)	What are thermistors? Explain their different forms of construction.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Derive the expressions for voltages in the three phases of a synchro-transmitter.	6 Marks	L2	CO1	PO2
	b)	Derive the relationship between linear displacement and change in overlapping area of parallel plates of capacitor and prove that sensitivity of the sensor is constant.	6 Marks	L2	CO1	PO6
		(OR)				
4.	a)	Explain principle and working of eddy current sensor with neat sketch.	6 Marks	L2	CO1	PO1
	b)	Elaborate the measurement of linear displacement with a reluctance sensor with neat sketch.	6 Marks	L2	CO1	PO6
		UNIT-III				
5.	a)	Describe the properties of materials used for piezo-electric transducers. Derive expressions for voltage and charge sensitivities.	6 Marks	L2	CO2	PO2
	b)	Select a suitable sensor used for measurement of temperature range of 1200ºC to 3500ºC and explain its working.	6 Marks	L2	CO2	PO2
		(OR)				
6.	a)	Explain the principle of working and constructional details of a photo-voltaic cell. Explain why it is useful for space applications.	6 Marks	L3	CO2	PO3
	b)	Distinguish infrared and radiation pyrometers with respect to construction and working principles.	6 Marks	L2	CO2	PO2
		UNIT-IV				
7.	a)	Select an appropriate non contact sensor to measure liquid level. Justify your sensor selection and explain its principle using a neat sketch.	6 Marks	L2	CO3	PO5
	b)	Describe how fiber optic transducers are used for measurement of liquid level.	6 Marks	L2	CO3	PO2

(OR)

8.	a)	Select a suitable transducer for measurement of speed and explain its operation.	6 Marks	L2	CO3	PO5
	b)	Demonstrate how smart sensors are used for measurement of physical parameters using suitable example.	6 Marks	L2	CO3	PO6

UNIT-V

9.	a)	Derive the expressions for bridge sensitivity factor for Blumlein bridge having inductors in push pull configuration.	6 Marks	L3	CO4	PO2
	b)	Describe the functioning of a carrier amplifier using an operational amplifier. Sketch the relevant waveforms.	6 Marks	L2	CO4	PO1

(OR)

10.	a)	Write short notes on A.C bridges using Push-pull transducers.	6 Marks	L2	CO4	PO2
	b)	Derive the expressions for output voltage of a instrumentation amplifier in terms of the two input voltages.	6 Marks	L3	CO4	PO2

WEB TECHNOLOGIES

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		Design a web page which provides the following details: i) Train Name ii) Starting Place iii) Destination iv) Arrival and Departure time v) Fare Place a border for the table and use cell padding to present the cell data with clarity. Align the table in the center of the screen. Use a caption saying 'Time and Fare List'.	12 Marks	L2	CO1	PO3
		(OR)				
2.		Design a web page with fields user id, password and a submit button. Consider the following while writing a HTML code. i) Table to include fields. ii) Background image with repeatable option. iii) Font Styles and Sizes.	12 Marks	L2	CO1	PO3
		UNIT-II				
3.	a)	Classify different types of CSS. List the advantages of external CSS.	6 Marks	L1	CO2	PO1
	b)	Develop a web page to perform hiding and showing of HTML elements using JQuery.	6 Marks	L3	CO2	PO4
		(OR)				
4.	a)	Compare and Contrast AJAX Web Application Model and Classical Web Application Model.	6 Marks	L2	CO2	PO2
	b)	Design a webpage with animation effects using JQuery methods.	6 Marks	L3	CO2	PO4
		UNIT-III				
5.		Create contact us page using bootstrap responsive classes.	12 Marks	L3	CO3	PO5
		(OR)				
6.		Create a grid system for mobile, tablet and desktop with bootstrap.	12 Marks	L3	CO3	PO5
		UNIT-IV				
7.	a)	Define Associative array. Write a code to implement associative array.	6 Marks	L1	CO4	PO1
	b)	Explain the following concepts of PHP arrays: i) Merging ii) Slicing iii) Splicing	6 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Classify data types of PHP.	6 Marks	L1	CO4	PO1
	b)	Define Type casting. List cast operators of PHP with syntax.	6 Marks	L1	CO4	PO1

UNIT-V

9.	Develop a PHP code to perform the following with MySQL database: i) Connection Establishment. ii) Query generation for table creation. iii) Retrieving the data from the select query.	12 Marks	L3	CO5	PO6
	(OR)				
10.	Develop a PHP code for the following: i) Fetching database results into an object. ii) Retrieving database results using indexed and associative arrays.	12 Marks	L3	CO6	PO6

MOBILE COMPUTING

[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Show with a diagram the steps involved in a mobile terminated call (a station calling and a mobile station) in GSM	6 Marks	L3	CO1	PO2
	b)	Explain about GPRS system in detail.	6 Marks	L2	CO1	PO1
		(OR)				
2.		Give reasons for a handover in GSM and the problems associated with it. Discuss the typical steps for handover are and what types of handover can occur?	12 Marks	L1	CO1	PO2
		UNIT-II				
3.	a)	"TDMA is much more flexible than FDMA"-Justify this statement with various TDMA algorithms.	6 Marks	L4	CO2	PO5
	b)	Explain about CDMA.	6 Marks	L1	CO2	PO1
		(OR)				
4.	a)	Compare and Contrast LTE Advanced and WiMax 16M.	6 Marks	L4	CO2	PO5
	b)	Write a short notes on WCDMA 3G.	6 Marks	L1	CO2	PO1
		UNIT-III				
5.	a)	Explain mechanism for IP packet delivery using mobile IP concept.	6 Marks	L2	CO2	PO1
	b)	Explain the format of Agent Advertisement Packet.	6 Marks	L1	CO3	PO1
		(OR)				
6.	a)	Explain in detail about IP-in-IP encapsulation.	6 Marks	L2	CO3	PO1
	b)	Define care of address (CoA) and what are the two different possibilities for the location of CoA?	6 Marks	L1	CO3	PO1
		UNIT-IV				
7.	a)	Describe slow start of congestion control. How can fast recovery take place in the congestion avoidance phase?	6 Marks	L2	CO3	PO2
	b)	Discuss the working principle, advantage and disadvantages of Indirect TCP in detail.	6 Marks	L1	CO3	PO1
		(OR)				
8.	a)	Describe briefly on congestion control in traditional TCP.	6 Marks	L1	CO3	PO1
	b)	Write about selective retransmission policy in mobile TCP.	6 Marks	L2	CO3	PO1
		UNIT-V				
9.	a)	Explain the session establishment in WSP/B.	6 Marks	L1	CO4	PO1
	b)	Compare and Contrast ZigBee and Wi-Fi.	6 Marks	L4	CO4	PO2
		(OR)				
10.	a)	Discuss MAC layer Bluetooth system.	6 Marks	L2	CO4	PO1
	b)	Write short notes on Wireless LANs.	6 Marks	L1	CO4	PO1

OPTIMIZATION TECHNIQUES

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What is a saddle point? Find the dimensions of a cylindrical tin (with top and bottom) made up of sheet metal to maximize its volume such that the total surface area is equal to $A_0 = 36\pi$.	6 Marks	L3	CO1	PO1 PO2
	b)	Classify the optimization technique methods and provide suitable example for each case.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Use Kuhn-Tucker conditions to solve the following non-linear programming problem. Maximize $Z = 3.6x_1-0.4x_1^2+1.6x_2-0.2x_2^2$ Subject to the constraints $2x_1+x_2 \le 10$ $x_1, x_2 \ge 0$	8 Marks	L3	CO1	PO1 PO2
	b)	How would you formulate an Optimization problem in general statement? Also provide insights of ; i) Design Constraints. ii) Constraint Surface. iii) Objective Function. iv) Design Vector.	4 Marks	L2	CO1	PO1 PO2

UNIT-II

3.	a)	Solve the following LPP using Simplex method. *Maximize* $Z = 10x_1 + 4x_2 + x_3$ *subject to* $2x_1 + x_2 \le 1$ $x_1 + 4x_2 \le 6$ $x_3 \le 6$ $x_1, x_2, x_3 \ge 0$	8 Marks	L3	CO2	PO1 PO2
	b)	Define: i) Surplus variable, ii) Slack variable	4 Marks	L2	CO2	PO1
		(OR)				
4.		Solve the following LPP by using Dual Simplex Method Minimize $Z = 2x_1 + 3x_2$ Subjected to $2x_1+2x_2 \le 30$ $x_1+2x_2 \ge 10$ $x_1, x_2 \ge 0$	12 Marks	L3	CO2	PO1 PO2

UNIT-III

5.		Perform four iterations of Powell's method to minimize the function $f = 4x_1^2+3x_2-5x_1x_2-8x_1$ from the starting point (0, 0).	12 Marks	L3	CO3	PO1 PO2

(OR)

6.		Minimize $f(x_1,x_2)=\frac{1}{3}(x_1+1)^3+x_2$ Subject to $g_1(x_1, x_2) = 1 - x_1 \leq 0$ $g_2(x_1, x_2) = -x_2 \leq 0$ using exterior penalty function method.	12 Marks	L3	CO3	PO1 PO2

UNIT-IV

7.	a)	Explain the concept of sub-optimization in the context of the design of the water tank shown below.  	6 Marks	L2	CO4	PO1 PO2 PO3
	b)	Explain the computational procedure in Dynamic programming.	6 Marks	L2	CO4	PO1

(OR)

8.		Use dynamic programming approach to minimize; $f = 50x_1 + 100x_2$ Subject to $10x_1 + 5x_2 \leq 2500$ $4x_1 + 10x_2 \leq 2000$ $x_1 + 1.5x_2 \leq 450$ $x_2 \geq 0 x_2 \geq 0$ s	12 Marks	L3	CO4	PO1 PO2 PO3

UNIT-V

9.		Explain the steps involved in Genetic Algorithm with a flow chart.	12 Marks	L2	CO5	PO1 PO2 PO3

(OR)

10.	a)	What is global best and local best in Particle Swarm Optimization?	4 Marks	L2	CO5	PO1 PO2 PO3
	b)	Explain the algorithm of Ant Colony Optimization.	8 Marks	L2	CO5	PO1

CODE No.: 19BT60502 SVEC-19

MACHINE LEARNING

[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Investigate the different perspectives and issues in Machine Learning.	6 Marks	L4	CO2	PO2
	b)	Illustrate the General-to-Specific Ordering of Hypotheses using example hypotheses.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Write the algorithm for the Finding A Maximally Specific Hypothesis.	6 Marks	L3	CO3	PO1
	b)	Explain the simple learning algorithm to represent the version space.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Information gain measures the expected reduction in entropy. Justify.	6 Marks	L4	CO2	PO2
	b)	Illustrate the operations of ID3 algorithm with an example.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Explain the hypothesis space search in Decision tree learning.	6 Marks	L2	CO1	PO2
	b)	Analyze the use of kernels in SVM and which kernel can be used in the case of non-linear data.	6 Marks	L4	CO2	PO2
		UNIT-III				
5.	a)	Investigate the advantage of gradient descent rule over the perceptron training rule.	6 Marks	L4	CO4	PO3
	b)	Find the stochastic approximation to gradient descent rule and explain.	6 Marks	L3	CO4	PO2
		(OR)				
6.	a)	Derive the gradient descent training rule and explain the steps with necessary equations.	6 Marks	L3	CO4	PO3
	b)	Explain the architecture of a typical multilayer neural network and illustrate its decision surface.	6 Marks	L2	CO4	PO2
		UNIT-IV				
7.	a)	Discuss in detail about maximum likelihood hypotheses for predicting probabilities.	6 Marks	L2	CO2	PO2
	b)	Apply the MDL principle to the problem of learning decision trees. Explain in detail.	6 Marks	L3	CO2	PO2
		(OR)				
8.	a)	Explain the Bayes optimal classification process in detail.	6 Marks	L2	CO2	PO2
	b)	Analyze the drawback of Bayes Optimal Classifier and advantage of Gibbs algorithm.	6 Marks	L4	CO3	PO3
		UNIT-V				
9.	a)	Discuss in detail about the locally weighted linear regression algorithm.	6 Marks	L2	CO2	PO2
	b)	Write a short note on the Radial Basis Functions.	6 Marks	L2	CO2	PO2
		(OR)				
10.	a)	Analyze the various remarks on the k-nearest neighbor algorithm.	6 Marks	L4	CO2	PO2
	b)	Describe the learning task in reinforcement learning process.	6 Marks	L2	CO2	PO2

MOBILE APPLICATION DEVELOPMENT
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Analyze and explain the mobile user browsing behavior.	6 Marks	L2	CO1	PO1
	b)	Discuss the key principles those are followed to design the user interfaces of mobile apps.	6 Marks	L2	CO1	PO1
		(OR)				
2.		Explain the design patterns of Mobile apps.	12 Marks	L3	CO1	PO2
		UNIT-II				
3.	a)	Discuss the procedure to passing data between the activities using an Intent object.	6 Marks	L2	CO2	PO2
	b)	Develop an android program to understand the activity behavior when changes in screen orientation.	6 Marks	L3	CO2	PO3
		(OR)				
4.	a)	Develop an android program to display notifications on status bar.	6 Marks	L4	CO2	PO4
	b)	List and discuss the common attributes of Views and View Groups.	6 Marks	L2	CO2	PO2
		UNIT-III				
5.		List and discuss the Basic views in Android to design the user interface.	12 Marks	L4	CO3	PO4
		(OR)				
6.		List and discuss the picker views in Android to design the user interface with an example program.	12 Marks	L2	CO3	PO2
		UNIT-IV				
7.	a)	Develop an Android program to access a web service and returns a string of random quotes.	8 Marks	L3	CO3	PO3
	b)	Explain the methods to get location details that was touched on map by the user with a suitable program.	4 Marks	L2	CO3	PO2
		(OR)				
8.		Discuss the accessing of web services using GET method with an example program.	12 Marks	L2	CO3	PO2
		UNIT-V				
9.		Discuss the integration of Google play In-App billing into an android application.	12 Marks	L2	CO4	PO5
		(OR)				
10.		Illustrate the usage of the threads in an Android application with a suitable example.	12 Marks	L2	CO4	PO5

[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Write Algorithms to illustrate UNION and FIND operations on sets.	14 Marks
		(OR)	
2	a)	Write and explain the final Algorithm for collapse Rule with an example.	7 Marks
	b)	Explain about various Asymptotic Notations.	7 Marks

UNIT-II

3	a)	Write a Pseudo code for Divide and Conquer algorithm for merging two sorted arrays into a single sorted one with example.	7 Marks
	b)	Explain graph traversal algorithm with examples.	7 Marks
		(OR)	
4	a)	Explain Strassen's matrix multiplication algorithm with example.	7 Marks
	b)	Find the Best, Worst and Average case complexities of Quick Sort algorithm.	7 Marks

UNIT-III

5		Consider n=4 and (q_1, q_2, q_3, q_4)=(do, if, int, while) and the values for p's and q's are give as p(1:4)=(3, 3, 1, 1) and q(0:4)=(2, 3, 1, 1, 1). Construct the Optimal binary search Tree.	14 Marks
		(OR)	
6		Write and explain the general method of Greedy Technique in detail.	14 Marks

UNIT-IV

7		Apply back tracking to solve sum of subsets problem for the following instance S={1,3,4,5}, d={1,2,1,3}.	14 Marks
		(OR)	
8	a)	Write a short notes on: i) Graph coloring. ii) Hamiltonian cycles.	10 Marks
	b)	Explain the general method Branch and Bound Algorithm.	4 Marks

UNIT-V

9	a)	Compare and contrast Deterministic and Non-Deterministic algorithms. Explain the Searching process using non deterministic algorithms.	7 Marks
	b)	Explain NP-hard Scheduling problems with examples.	7 Marks
		(OR)	
10		Explain the Cook's theorem with example.	14 Marks

III B.Tech II Semester (SVEC14) Supplementary Examinations August - 2021

REINFORCED CEMENT CONCRETE STRUCTURES – II

[CIVIL ENGINEERING]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	Explain the different types of stair case with neat sketch	14 Marks
	(OR)	
2	Design a dog-legged stair case for a building in which the vertical distance is 3.6m. The stair hall measures 2.5m x 5.0m. The live load may be taken as 2.5 kN/m^2. Use M20 grade concrete and Fe415 grade steel. Draw a neat sketch showing reinforcement details in the waist slab	14 Marks

UNIT-II

3	Design a combined rectangular footing for two columns C1 and C2 spaced at 3m apart. Characteristic loads on C1 and C2 are 750kN and 1000kN respectively and the size of the columns is 300mm x 600mm where 600mm size is along C1-C2. Width of the footing shall be 2m. The A.B.P on soil is 150kN/m^2.	14 Marks
	(OR)	
4	Design a pile under a column transmitting an axil load of 500kN. The pile is to be driven to a hard stratum available at a depth of 8m. Use M20 concrete and Fe: 415 steel.	14 Marks

UNIT-III

5	Describe the behaviour of the various elements of a counterfort retaining wall and write the design steps of this retaining wall.	14 Marks
	(OR)	
6	Design the counter fort retaining wall to suit the following data: Height of the wall above ground level = 6m; Density of soil: 16 kN/m^3 ; Angle of repose: 33^0; S.B.C. of soil: 160 kN/m^2; Spacing of counterforts :3m c/c	14 Marks

UNIT-IV

7	Design a rectangular water tank 5m x 4m with depth of storage 3m, resting on ground and whose walls are rigidly joined at vertical and horizontal edges. Assume M20 concrete and Fe415 grade steel. Sketch the details of reinforcement in the tank	14 Marks
	(OR)	
8	Design a conical dome roof for a room with base diameter as 10m. The live load due to wind, snow, etc may be taken as 2N/m. The height of the roof is 4m.	14 Marks

UNIT-V

9	Describe in detail the design steps for the design of chimney.	14 Marks
	(OR)	
10	Design a circular silo of 12m height and 6m internal diameter to store cement of unit weight 15.5kN/m^3 and $\phi = 25^0$.	14 Marks

CODE No.:14BT60103 SVEC-14

TRANSPORTATION ENGINEERING - I

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) What is highway alignment? What factors are to be given consideration while fixing the alignment? Also discuss the role of obligatory points in finalizing alignment. 7 Marks

b) Calculate the length of transition curve and the shift using the following data: Design speed = 65kmph; Radius of circular curve = 220m; Allowable rate of introduction of super elevation (pavement rotated about the center line)=1 in 150; Pavement width including extra widening =7.5 m 7 Marks

(OR)

2 a) List the Drawings and Reports to be prepared in Highway Projects. 7 Marks

b) There is a horizontal highway curve of radius 400m and length 200m on highway. Compute the set-back distances required from the centre line on the inner of the curve so as to provide for: 7 Marks

i) Stopping sight distance of 90m.
ii) Safe overtaking sight distance of 300m.
iii) The distance between the centre lines of the road and the inner lane is 1.9m

UNIT-II

3 Discuss the construction of Road in water-Logged areas and explain the process of drainage of slopes and erosion control. 14 Marks

(OR)

4 The maximum quantity of water expected in one of the open longitudinal drains on clayey soil is 0.9 m^3/sec. Design the cross section and longitudinal slope of trapezoidal drain assuming the bottom width of the trapezoidal section to be 1.0m and cross slope to be 1.0 vertical to 1.5 horizontal. The allowable velocity of flow in the drain is 1.2m/sec and Manning's roughness coefficient is 0.02. 14 Marks

UNIT-III

5 a) Explain design of Dowel bars along with equations. 7 Marks

b) Calculate the stresses at interior, edge and corner regions of a cement concrete pavement using Westergaard's stress equation. Use the following data: 7 Marks
Wheel load, P=5100kg.
Modulus of elasticity of cement concrete, E=3.0×105 kg/cm^2
Pavement thickness, h=18cm
Poisson's ratio of concrete, μ=0.15
Modulus of sub grade reaction ,K=6.0 kg/cm^3
Radius of contact area, a=15cm

(OR)

6 Elaborate IRC recommended procedure for design of rigid pavements. 14 Marks

UNIT-IV

7 a) What are the materials used in Cement Concrete roads? Write the construction procedure of CC Pavements. 7 Marks

b) Write a brief note on PCC pavements. 7 Marks

(OR)

8 Write in detail with the help of neat sketches: 14 Marks

i) Compacting equipment of Asphalt Pavement.

ii) Air Compressors.

UNIT-V

9 a) Explain the causes, effects and adjustment of creep. Write short notes on the following: 7 Marks

i) Summit Curves and Valley Curves. ii) Cant deficiency.

iii) Points and Crossings. iv) Coning of wheels.

b) Discuss the theories related to creep. What are the function of various components like: 7 Marks

i) rails. ii) sleepers. iii) ballast.

(OR)

10 a) Elaborate factors affecting selection of site for Airport. 7 Marks

b) What are the different types of horizontal and vertical curves? Derive the relation between radius and versine of the curve. 7 Marks

HIGH VOLTAGE ENGINEERING
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Enumerate the various applications of insulating materials.	7 Marks
	b)	Estimate the control of electric stresses in the insulating materials.	7 Marks
		(OR)	
2	a)	Distinguish between solid, liquid, gaseous breakdown theories.	7 Marks
	b)	Discuss about the electric field stresses in the insulating materials.	7 Marks

UNIT-II

3	a)	Write about the composite dielectrics along with its properties.	7 Marks
	b)	Explain the process of thermal breakdown in solid dielectrics.	7 Marks
		(OR)	
4		State Paschen's law? How do you account for the minimum voltage for breakdown under PD condition?	14 Marks

UNIT-III

5	a)	What is a Tesla coil? How is damped high frequency oscillations obtained from a Tesla coil?	7 Marks
	b)	Explain one method of controlled tripping of impulse generators. Why is controlled tripping necessary?	7 Marks
		(OR)	
6		Why is a Cockcroft-Walton circuit preferred for voltage multiplier circuits? Explain its working with a schematic diagram.	14 Marks

UNIT-IV

7		Explain the different methods of high current measurements with their relative merits and demerits.	14 Marks
		(OR)	
8	a)	What are the conditions to be satisfied by a potential divider to be used for impulse work?	7 Marks
	b)	What is a mixed potential divider? How it is used for impulse voltage measurements?	7 Marks

UNIT-V

9		What is 'Wagner's earthing device'? Explain how it is used for eliminating stray capacitances.	14 Marks
		(OR)	
10		Explain the power frequency and impulse voltage test conducted on bushings.	14 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Anantapur)

III B.Tech II Semester (SVEC14) Supplementary Examinations August - 2021

OPERATIONS RESEARCH

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Solve the following Linear Programming Problem (LPP). 14 Marks

$Max\ Z = 4x_1 + 6x_2 + 2x_3 \quad st$

$4x_1 - 4x_2 \le 5, -x_1 + 6x_2 \le 5, -x_1 + x_2 + x_3 \le 5$

$x_i \ge 0$

(OR)

2 Solve the following LPP by using dual simplex method. 14 Marks

$Min\ Z = x_1 + 2x_2 + 3x_3$

$st \quad x_1 - x_2 + x_3 \ge 4$

$x_1 + x_2 + 2x_3 \le 8$

$x_2 - x_3 \ge 2 \quad x_i \forall i \ge 0$

UNIT-II

3 Solve the following transportation problem. Use North-West method for generating the initial basic feasible solution. 14 Marks

Demand / Factory	S_1	S_2	S_3	S_4	Supply
A	7	10	12	10	40
B	9	12	10	10	30
C	12	9	14	12	20
Requirement	25	15	30	10	

(OR)

4 The owner of a small machine shop has four machinists available to assign to jobs for the day. Five jobs are offered with the expected profit (in hundreds of rupees) for each machinist on each job being as follows. 14 Marks

Machinist	**A**	**B**	**C**	**D**	**E**
1	6	8	5	10	8
2	7	9	6	7	6
3	9	9	11	7	8
4	5	6	9	8	8

Find the assignment of machinists to jobs that result in a maximum profit. Which job should be declined?

UNIT-III

5 From the activity details given below, determine the optimal project duration by taking indirect cost as Rs.4.50/day. 14 Marks

Activity	Normal time(days)	Crash time(days)	Cost slope Rs/day
1-2	3	1	4
2-3	4	2	4
2-4	7	3	1
3-4	5	2	2

(OR)

6 A distance network consists of 11 nodes which are distributed as shown in the following table. Find the shortest path from node 1 to node 11 and the corresponding distance. 14 Marks

Arc	Distance	Arc	Distance
1-2	8	5-8	12
1-3	7	5-9	7
1-4	1	6-9	9
2-5	5	7-9	6
3-5	9	7-10	13
3-6	2	8-11	4
3-7	8	9-11	2
4-7	10	10-11	15

UNIT-IV

7 A bank has 2 tellers working on SB A/c. The first teller handles withdrawals only. The second teller handles deposits only. It has been found that the service time distribution for the deposits and withdrawals both are exponentially with mean service time of 3 minutes / customer. Depositors one found to arrive in a Poisson distribution throughout the day with mean arrival rate of 16/hr. withdrawals also arrive in a poisons fashion with mean arrival rate of 14/hr. What would be the average waiting time for depositors and withdrawals, if each teller would handle both withdrawals and deposits? What would be the effect, if this could only be accomplished by increasing the service time to 3.5 minutes? 14 Marks

(OR)

8 a) Explain about various types of customers in queuing theory. 7 Marks

b) In a railway yard goods train arrive at a rate of 30 trains/day. Assuming that the inter-arrival time follows an exponential distribution and service time distribution is also exponential with an average 36 minutes. Calculate the following: 7 Marks

i) The average number of trains in the queue.
ii) The average waiting of a train in the system.
iii) The probability that the number of trains in the system exceeds 10.

UNIT-V

9 Find the optimum strategies and value of game for the following game by graphical method. 14 Marks

		B				
A		1	2	3	4	5
	1	-1	3	4	-2	6
	2	4	2	6	3	2

(OR)

10 a) State the dominance rules used in games theory. 7 Marks

b) Obtain the optimal strategies for both persons and the value of the game for zero-sum two-person game whose payoff matrix is given as follows 7 Marks

Player B	Player A					
	1	3	-1	4	2	-5
	-3	5	6	1	2	0

MICROWAVE ENGINEERING

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain and derive the expression for quality factor Q of microstrip line.	10 Marks
	b)	Explain various applications of Microwaves	4 Marks

(OR)

2	a)	Prove that the rectangular waveguide is high pass filter. Define the terms cut-off frequency and cut-off wavelength.	7 Marks
	b)	Show that the velocity of the wave in waveguides is a function of frequency. What is guide wavelength?	7 Marks

UNIT-II

3	a)	Derive the scattering matrix of E-plane Tee.	7 Marks
	b)	With a neat diagram, explain the dielectric and rotary wave phase shifters.	7 Marks

(OR)

4		Write short notes on the following. i) Directional coupler. ii) Wave guide windows. iii) Flap attenuator.	14 Marks

UNIT-III

5	a)	List the classification of microwave tubes. Differentiate between klystrons and TWT.	7 Marks
	b)	Explain how oscillations are generated in reflex klystron. How to calculate its electronic admittance?	7 Marks

(OR)

6	a)	Explain the principle of operation of two cavity Klystron with neat diagrams.	7 Marks
	b)	Derive an expression for the power output and efficiency of a two cavity Klystron.	7 Marks

UNIT-IV

7	a)	What are the salient features of TWT? How it is able to give large bandwidth.	6 Marks
	b)	A TWT operates at f = 3 GHz. The slow wave structure has a pitch angle of 5^0 and the attenuation constant is 3 Np/m. Determine the propagation constant of the travelling wave in the tube.	8 Marks

(OR)

8	a)	Draw the structure of 8 cavity magnetron and explain its bunching process.	7 Marks
	b)	Explain how cross field is used to generate oscillations in Magnetron.	7 Marks

UNIT-V

9	a)	Explain the operation of Gunn diode along with its V-I characteristics.	7 Marks
	b)	Give the microwave bench setup to measure wavelength of a given signal.	7 Marks

(OR)

10	a)	Explain the measurement procedure for Q-factor of a resonant cavity.	7 Marks
	b)	Explain in detail about RWH theory.	7 Marks

VLSI DESIGN

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	With neat diagrams, explain the different steps in n-well fabrication of CMOS transistors.	8 Marks
	b)	Define threshold voltage of a MOS device and explain its significance.	6 Marks
		(OR)	
2	a)	Illustrate an equation for I_{DS} of an n-channel Enhancement MOSFET operating in linear region.	8 Marks
	b)	Estimate g_m of the device for a PMOS transistor is operating in saturation region with the following parameters. $V_{GS} = -5V$; $V_{tp} = -1.2V$; W/L = 95; $\mu_n C_{ox} = 95\ \mu A/V^2$	6 Marks

UNIT-II

3	a)	What are various limitations of scaling?	4 Marks
	b)	Design a symbolic layout for a complementary CMOS circuit that implements Y= (A+BC)**'.**	10 Marks
		(OR)	
4	a)	Drive an expression for a nMOS inverter pair delay whose transistor size is 4**:**1.	8 Marks
	b)	Drive the expression for effective resistance and capacitance estimation using RC delay models.	6 Marks

UNIT-III

5	a)	Explain the operation of 8 x 8 array multiplier with neat sketch	8 Marks
	b)	With the help of the logical schematic, explain the working of a parity generator.	6 Marks
		(OR)	
6	a)	Explain the CMOS system design based on the data path operators with a suitable example.	6 Marks
	b)	Discuss the working principle of booth multiplier with an example.	8 Marks

UNIT-IV

7	a)	Design an OR-AND PLA that provides the following outputs. F1 = M2**.** M3**.** M5 F2 = M0**.** M1**.** M4 F3 = M1**.** M2**.** M6**.** M7	8 Marks
	b)	With neat diagram, explain the operation of synchronous counter.	6 Marks
		(OR)	
8	a)	With neat sketch, explain CLB, IOB and programmable interconnects of FPGA device.	8 Marks
	b)	Compare the features of PLA, PAL, CPLD and FPGAs.	6 Marks

UNIT-V

9	a)	Explain the various logic synthesis tools available for ASIC and FPGA-based design.	7 Marks
	b)	Explain various types of simulation.	7 Marks

(OR)

10	a)	What is need for testing? Explain the difference between testing and verification.	6 Marks
	b)	Explain the chip level test techniques. Explain the chip level test techniques.	8 Marks

PRINCIPLES OF COMMUNICATION

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Find the Fourier transform of $\cos w_0 t$ and $\sin w_0 t$. Compare their power spectral densities.	7 Marks
	b)	A signal x(t) is having a fourier Transform of x(f). Find the Fourier Transform of dx(t)/dt.	7 Marks
		(OR)	
2	a)	Explain the effect of PSD on Transfer function.	7 Marks
	b)	Show that $R_{12}(\tau)=R_{21}(-\tau)$.	7 Marks

UNIT-II

3	a)	Explain the operation of envelop detector with a neat circuit diagram.	7 Marks
	b)	Draw the spectrum of WBFM and explain the effect of modulation index on the spectrum.	7 Marks
		(OR)	
4	a)	Explain clearly about pre-emphasis and de-emphasis in FM wave.	7 Marks
	b)	Explain the difference between DSB and SSB system.	7 Marks

UNIT-III

5	a)	Explain the generation and detection of PPM signal.	8 Marks
	b)	Assess the effect of aliasing in sampling process.	6 Marks
		(OR)	
6	a)	Compare FDM and TDM. What is meant by an asynchronous multiplexing?	7 Marks
	b)	Explain the methods for demodulation of PAM signals.	7 Marks

UNIT-IV

7	a)	Derive the expression for signal to quantization noise ratio for PCM system that employs linear quantization technique. Assume the input to the PCM system is a sinusoidal signal.	7 Marks
	b)	Distinguish between QPSK and MSK.	7 Marks
		(OR)	
8	a)	Explain the delta modulation with block diagram. Discuss the disadvantages of delta modulation.	8 Marks
	b)	Discuss coherent, non coherent detection of ASK.	6 Marks

UNIT-V

9	a)	Discuss the viterbi algorithm with example.	7 Marks
	b)	What is the use of syndrome? Draw the (n-k) syndrome calculation circuit for (n,k) cyclic code? Explain.	7 Marks
		(OR)	
10	a)	Find a generator polynomial for a (7, 4 cyclic code and hence find the code word for[1000].	7 Marks
	b)	Consider 5 messages with probabilities 0.22, 0.34, 0.17, 0.19, 0.08 are transmitted. Estimate its coding efficiency using Huffman code.	7 Marks

MICROPROCESSORS AND MICROCONTROLLERS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Illustrate 8086 Physical address generation using segment base and offset with an example. What are the advantages of doing so? 7 Marks

b) What is the difference between Macro and Procedure? Support your discussion with suitable programs. 7 Marks

(OR)

2 a) Review Intel 8086 register organization. 7 Marks

b) Summarize 8086 string related instructions with suitable examples. 7 Marks

UNIT-II

3 a) Discuss in detail about the interrupts structure of 8086. 7 Marks

b) Draw and explain the timing diagram of memory READ operation of 8086 microprocessor. 7 Marks

(OR)

4 a) Interface two 4K x 8 EPROMS and two 4K x 8 RAM chips with 8086. Select suitable maps. 10 Marks

b) Write the functions of the following pins of 8086. 4 Marks

i) RESET. ii) NMI. iii) $\overline{BHE}$. iv) $\overline{LOCK}$.

UNIT-III

5 a) Discuss different modes of operations of 8257 during different types of transfers. 6 Marks

b) Write a program for 8086 to receive data with 8251 using polling method. 8 Marks

(OR)

6 a) Draw and discuss internal architecture of USART 8251. 7 Marks

b) Draw and discuss the architecture of 8257. 7 Marks

UNIT-IV

7 a) List out the alternate functions of port3 in 8051 microcontroller. 4 Marks

b) Explain addressing modes supported by 8051 microcontroller with examples. 10 Marks

(OR)

8 a) Draw and explain the formats of IE and PSW registers of 8051 microcontroller. 6 Marks

b) Explain the following instructions of 8051 with suitable examples. 8 Marks

i) ACALL. ii) DJNZ. iii) LJMP. iv) SJMP.

UNIT-V

9 a) Write an assembly language program to generate a square wave of 50 Hz frequency in port 0, using timer of 8051 microcontroller. Assume XTAL=11.0592 MHz. 7 Marks

b) Explain the interrupt structure of 8051 microcontroller with neat sketches. 7 Marks

(OR)

10 a) Explain the different types of timer modes available in 8051 microcontroller and its control registers. 7 Marks

b) Explain with a neat diagram the procedure to interface a matrix keyboard to the 8051 microcontroller, explain the algorithm and write the assembly language program to interface the keyboard. 7 Marks

MICROWAVE ENGINEERING

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Write the basic advantages and applications of microwaves.	7 Marks
	b)	What is meant by the dominant mode of a waveguide? What is the dominant mode in rectangular wave guide?	7 Marks
		(OR)	
2	a)	What is the measured frequency on a waveguide slotted line if the distance between adjacent minima is 1.27 cm and the width dimensions of the waveguide is 2.286 cm?	7 Marks
	b)	Derive an expression for the cutoff frequency of rectangular waveguide in terms of the dimensions of the waveguide.	7 Marks

UNIT-II

3	a)	Explain the Hybrid Ring. Compare its performance with Magic Tee.	7 Marks
	b)	With a neat diagram, explain the operation of a microwave attenuator.	7 Marks
		(OR)	
4	a)	What is magic tee? Describe its structure and list various properties of an ideal magic tee.	10 Marks
	b)	What are scattering parameters? Why they only are suitable at microwave frequencies to model a network?	4 Marks

UNIT-III

5	a)	Write about the limitations and losses in a conventional tubes when used at microwave frequencies	7 Marks
	b)	With a neat schematic, explain the working principle of single cavity Reflex Klystron.	7 Marks
		(OR)	
6	a)	How is tuning achieved in reflex klystron oscillators? Mention the tuning range of such a device.	7 Marks
	b)	Explain the bunching process of reflex klystron and also derive the equation for efficiency?	7 Marks

UNIT-IV

7	a)	Explain the salient features, performance characteristics and applications of TWT.	7 Marks
	b)	Determine the hull cutoff voltage for a given anode voltage of 26kv. Assume radii of cathode and anode cylinders as 5cm and 10cm respectively.	7 Marks
		(OR)	
8	a)	What are slow wave structures? Explain how a helical TWT achieves amplification.	7 Marks
	b)	A helical TWT has diameter of 2mm with 50 turns per cm. i) Calculate axial phase velocity. ii) Calculate anode voltage at which the TWT can be operated for useful gain.	7 Marks

UNIT-V

9	a)	Explain the modes of operation for Gunn diode.	7 Marks
	b)	Explain the operation and V-I characteristics of the varactor diode.	7 Marks
		(OR)	
10	a)	Explain the RF substitution method of measurement of attenuation.	7 Marks
	b)	Explain the measurement of low VSWR.	7 Marks

UNIT-I

1	a)	Design CMOS using twin tub process with suitable figures.	10 Marks
	b)	Compare Bipolar and CMOS technology.	4 Marks
		(OR)	
2		Discuss all four types of alternative forms of pull ups.	14 Marks

UNIT-II

3	a)	Mention different lambda based design rules.	4 Marks
	b)	Draw the stick diagram and lay out for a 2 input NAND gate.	10 Marks
		(OR)	
4	a)	Discuss rise time and fall time estimations of a CMOS inverter.	8 Marks
	b)	Write about the scaling factors : (i) gate capacitance (ii) gate delay (iii) current density.	6 Marks

UNIT-III

5		Explain in detail about the operation of carry skip adder using example.	14 Marks
		(OR)	
6		Discuss about the classification of array multipliers and explain any one in detail.	14 Marks

UNIT-IV

7	a)	Design an OR-AND PLA that provides the following outputs: F1 = M2. M3. M5 F2 = M0. M1. M4 F3 = M1. M2. M6. M7	8 Marks
	b)	With neat diagram explain the operation of synchronous counter.	6 Marks
		(OR)	
8	a)	With neat sketch explain CLB, IOB and programmable interconnects of FPGA device.	8 Marks
	b)	Compare the features of PLA, PAL, CPLD and FPGAs.	6 Marks

UNIT-V

9	a)	Explain logic verification in detail.	7 Marks
	b)	What is logic synthesis? Show how VHDL support logic synthesis.	7 Marks
		(OR)	
10	a)	Explain the principles of manufacturing test.	4 Marks
	b)	Describe the ad hoc testing and scan based testing approaches to enhance the testability of VLSI circuits.	10 Marks

PRINCIPLES OF COMMUNICATION
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Plot the convolution of a function $f(t)$ with a pair of impulses.	7 Marks
	b)	Find the Fourier transform of a signal $x(t)=te^{-at}u(t)$.	7 Marks
		(OR)	
2	a)	Find the Fourier transform of $x(t) = 2/1+t^2$.	7 Marks
	b)	Explain Autocorrelation of a periodic waveform.	7 Marks

UNIT-II

3	a)	The output power of an AM transmitter is 1KW when sinusoidally modulated to a depth of 100%. Calculate the power in each side band when the modulation depth is reduced to 40%.	7 Marks
	b)	Explain the operation of balanced modulator.	7 Marks
		(OR)	
4	a)	Explain a method for the generation of FM.	7 Marks
	b)	Explain the operation of diode detector with necessary equations.	7 Marks

UNIT-III

5	a)	Explain the differences between DM and ADM.	7 Marks
	b)	Explain the block diagram of FDM system.	7 Marks
		(OR)	
6	a)	Compare TDM and FDM.	7 Marks
	b)	Explain the natural and flat tap sampling techniques.	7 Marks

UNIT-IV

7	a)	Define and derive an expression for quantization error.	7 Marks
	b)	With the help a neat diagram, explain the transmitter and receiver of PCM.	7 Marks
		(OR)	
8	a)	Explain about PSK, QPSK.	7 Marks
	b)	Explain the working of Coherent and non coherent PSK.	7 Marks

UNIT-V

9	a)	Define mutual information. State and prove the properties of it.	7 Marks
	b)	Explain the concept of Huffman coding technique by taking an example.	7 Marks
		(OR)	
10	a)	Explain the concept of error detection and correction using hamming codes.	7 Marks
	b)	Explain about code tree, trellis and state diagrams for a convolutional encoder.	7 Marks

COMPILER DESIGN

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define regular expression. Give examples of regular expressions.	6 Marks
	b)	Develop a lexical analyzer to recognize a few patterns in PASCAL, C and FORTRAN (eg: identifiers, constants and operators)	8 Marks
		(OR)	
2	a)	Distinguish between: i) pass and phase. ii) lexeme and token.	7 Marks
	b)	Write short notes on different Compiler-Construction Tools.	7 Marks

UNIT-II

3	a)	Explain the Non-Recursive predictive parsing with an example.	7 Marks
	b)	Verify whether the following grammar is LL(1) Grammar or not. $S \rightarrow iEtSS^1 / a \quad S^1 \rightarrow eS / \varepsilon \quad E \rightarrow b.$	7 Marks
		(OR)	
4	a)	Construct Canonical LR(1) Parsing table for the grammar $S \rightarrow CC$, $C \rightarrow cC$, and $C \rightarrow d$.	7 Marks
	b)	What is a Handle pruning? List down the conflicts during Shift - reduce parsing.	7 Marks

UNIT-III

5	a)	What is type checker? Write translation scheme for type checking of expressions	10 Marks
	b)	Give an example each for implicit and explicit type conversion.	4 Marks
		(OR)	
6	a)	What is an L-attributed definition? Give one example and draw annotated parse tree for a sentence generated by the example grammar.	7 Marks
	b)	Write a syntax directed definition to convert the given binary number with its decimal equivalent.	7 Marks

UNIT-IV

7	a)	Explain the implementation of a simple stack - allocation scheme.	6 Marks
	b)	What are the problems with implementing dynamic memory allocation in a Compiled language? Explain.	8 Marks
		(OR)	
8	a)	Give the structure of a symbol table for the following 3 dimensional array. ARRAY (-10; 20, N: M, O: M+L).	8 Marks
	b)	Compare Static and Stack storage allocation strategies.	6 Marks

UNIT-V

9	a)	Explain the principles of source optimization in detail.	7 Marks
	b)	Construct DAG for the following basic block. d:=b*c e:=a+b b:=b*c a:=e-d	7 Marks
		(OR)	
10	a)	Explain how the following techniques help code optimization: i) Code Motion. ii) Strength Reduction.	8 Marks
	b)	What is a basic block? With suitable examples, discuss various transformations on the basic block.	6 Marks

MICROPROCESSORS AND MICROCONTROLLERS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Discuss the advantages offered by inheriting Pipelining and Segmentation in 8086 internal architecture	7 Marks
	b)	Recall Intel 8086 Flag register and outline the function of each bit.	7 Marks
		(OR)	
2	a)	Sketch how memory is organized in Intel 8086 as even and odd banks and point out how a byte and word are accessed.	7 Marks
	b)	What is an assembler directive? List few Assembler directives supportable for Intel 8086 with examples.	7 Marks

UNIT-II

3	a)	Compose Intel 8086 Interrupt supporting structure.	7 Marks
	b)	Interface 4KX8 EPROM and 8Kx8 RAM to Intel 8086 starting at FF000H and 00000H respectively.	7 Marks
		(OR)	
4	a)	Contrast Minimum to Maximum modes of 8086 operation with suitable block diagrams.	7 Marks
	b)	Interpret the functionality of following pins in Intel 8086. i) HOLD ii) ALE iii) $\overline{BHE}$ iv) READY	

UNIT-III

5	a)	Explain how to interface Analog-to-Digital Converter (ADC) to 8086 processor. Give the hardware and software for it.	10 Marks
	b)	Discuss the status word format of 8251.	4 Marks
		(OR)	
6	a)	Explain the different operating modes of 8255 PPI chip.	6 Marks
	b)	Write a program for 8086 to transmit data with 8251 using polling method.	8 Marks

UNIT-IV

7	a)	List out the alternate functions of port3 in 8051 microcontroller.	4 Marks
	b)	Explain addressing modes supported by 8051 microcontroller with examples.	10 Marks
		(OR)	
8	a)	Draw and explain the formats of IE and PSW registers of 8051 microcontroller.	6 Marks
	b)	Explain the following instructions of 8051 with suitable examples.	8 Marks

i) ACALL ii) DJNZ iii) LJMP iv) SJMP

UNIT-V

9 a) Write an 8051 ALP to transfer the message "HELLO" serially at 9600 baud, 8-bit, 1 stop bit. 10 Marks

b) Discuss about various modes of operations of timer in 8051. 4 Marks

(OR)

10 a) Interface push button switches and LEDs to 8051 microcontroller. Give the suitable hardware and software details. 10 Marks

b) Discuss the advantages of microcontroller based system over microprocessor based systems. 4 Marks

HEAT TRANSFER
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	The temperatures on the two surfaces of a 25mm thick steel plate (k=48 W/mk), having a uniform heat generation of $30x10^6 W/m^3$, are at 180^oC and 120^oC. Determine (i) The temperature distribution across the plate. (ii) The value and position of maximum temperature. (iii) The flow of heat from each surface of the plate.	10 Marks
	b)	State different types of boundary conditions applied to heat conduction problems.	4 Marks

(OR)

2		Derive the general two-dimensional unsteady state heat conduction equation for an isotropic solid cylindrical rod with internal heat generation. Simplify the obtained equation to Poisson's equation, Fourier's equation and Laplace equation.	14 Marks

UNIT-II

3	a)	Derive expression for the "temperature distribution" and the "rate of heat flow" for the case of short fin end insulated.	10 Marks
	b)	Sketch four different types of fin configurations.	4 Marks

(OR)

4	a)	Define lumped heat analysis.	4 Marks
	b)	A stainless steel rod of outer diameter 1 cm originally at a temperature of 320^0C is suddenly immersed in a liquid at 120^0C for which the convective heat transfer coefficient is 100 W/m^2K. Determine the time required for the rod to reach a temperature of 200^0C.	10 Marks

UNIT-III

5		Air at 20°C flows over a flat plate having a uniform heat flux of 800 W/m^2. The flow velocity is 4 m/s and the length of the plate is 1.2 m. Determine the value of heat transfer coefficient and also the temperature of the plate as the air leaves the plate.	14 Marks

(OR)

6	a)	Air at 4×10^{-4} kg/s and 27ºC enters a triangular duct that is 20 mm on a side and 2 m long. The duct surface is maintained at 100ºC. Assuming fully developed flow through the duct, determine air outlet temperature.	8 Marks
	b)	Explain with neat sketch how the flow and temperature development in the entrance region of pipe differs among air, water and liquid metals.	6 Marks

UNIT-IV

7	a)	Define condensation and Differentiate filmwise and dropwise condensation.	6 Marks
	b)	Water is boiled at the rate of 25 kg/h in a polished copper pan, 280 mm in diameter, at atmospheric pressure. Assume nucleate boiling conditions, calculate the temperature of the bottom surface of the pan.	8 Marks

(OR)

8 a) Explain the conditions under which drop wise condensation can take place. Why does the rate of heat transfer in drop-wise condensation many times larger than in film-wise condensation? 7 Marks

b) Dry saturate steam at a pressure of 2.45 bar condenses on surface of a vertical tube of height 1m. The tube surface temperature is kept at 117^0C. Estimate the thickness of the condensate film and local heat transfer coefficient at a distance of 0.2 m from the upper end of the tube. 7 Marks

UNIT-V

9 A truncated cone has top and bottom diameters of 20 cm and 10 cm respectively and a height of 10 cm. calculate the shape factor between the top surface and side (conical surface). Also the shape factor between the side and itself. The fraction of radiation leaving the top surface which is intercepted by the bottom surface is 0.12. 14 Marks

(OR)

10 a) What is the shape factor with respect to itself if the surface is concave, convex or flat? 7 Marks

b) Show that for two infinite parallel gray planes exchanging radiant energy, the mean emissivity is given by $\left[1/\left(\frac{1}{\varepsilon 1}+\frac{1}{\varepsilon 2}-1\right)\right] S$ 7 Marks

MICROWAVE ENGINEERING

[ELECTRONICS AND COMMUNICATION ENGINEERING]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive the relationship between λg, λc and λo in a waveguide.	7 Marks
	b)	A rectangular waveguide with dimensions 4×2 cms operates for the TM11 mode at 10GHz .Determine the characteristics wave impedance.	7 Marks
		(OR)	
2	a)	What is Q-factor .Derive the expression for the quality factor-Q for rectangular cavity resonator?	7 Marks
	b)	The dimensions of a guide are 2.5cm×1cm, the frequency is 8.6GHz. Find the following : i) Possible modes; ii) Cut-off frequency; iii) Guide wavelength	7 Marks

UNIT-II

3		Write short notes on: i) Wave guide Irises ii) Rat-Race hybrid Tee iii) Dielectric phase shifters	14 Marks
		(OR)	
4	a)	What are ferrites and give their properties?	7 Marks
	b)	Calculate the coupling factor of the directional coupler when incident power is 600 mW and power in the auxiliary wave guide is 350 μW.	7 Marks

UNIT-III

5	a)	List the performance characteristics and applications of a typical reflex klystron.	7 Marks
	b)	A two cavity klystron amplifier has the following characteristics, Voltage gain = 15 dB, Input power= 5 mW, R_{sh} of Input cavity = 30 Kilo-ohms, R_{sh} of Output cavity = 40 Kilo-ohms, R_L (Load impedance) = 40 Kilo-ohms, Determine: i) The input rms voltage; ii) The output rms voltage; iii) The power delivered to the load.	7 Marks
		(OR)	
6	a)	Draw beam current waveforms of a klystron for at least four values of bunching parameters. Write an expression for the bunching parameter and specify each quantity in the expression.	7 Marks
	b)	Describe how velocity modulation is converted to current modulation in two cavity klystron amplifier.	7 Marks

UNIT-IV

7	a)	Explain the salient features, performance characteristics and applications of TWT.	7 Marks

b) A normal circular magnetron has the following parameters Inner Radius R_a = 0.15 m, Outer Radius R_o = 0.45 m, Magnetic flux density =1.2 mW b/m^2. 7 Marks

i) Determine the Hull cut off voltage.

ii) Determine the cut off magnetic flux density if the beam voltage Vo as 6000V.

iii) Determine the cyclotron frequency in GHz.

(OR)

8 a) What are slow wave structures? Explain how a helical TWT achieves amplification. 7 Marks

b) A helical TWT has diameter of 2mm with 50 turns per cm. i) Calculate axial phase velocity. ii) Calculate anode voltage at which the TWT can be operated for useful gain. 7 Marks

UNIT-V

9 a) Explain how the VSWR for a short circuit is measured. 7 Marks

b) What is Gunn effect and What are its salient features? 7 Marks

(OR)

10 a) Describe how power can be measured using Bolometer technique. 7 Marks

b) Explain a method of measuring impedance of a terminating load in a microwave system. 7 Marks

VLSI DESIGN

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Discuss the performance of BICMOS technology.	4 Marks
	b)	Define threshold voltage of a MOS device and explain its significance.	4 Marks
	c)	Derive the pull up to pull down ratio for an NMOS inverter.	6 Marks
		(OR)	
2		Write a short notes on:	
	a)	BICMOS inverter with a suitable diagram.	8 Marks
	b)	Pass transistor logic	6 Marks

UNIT-II

3	a)	Draw the schematic and layout diagram of 2-input CMOS NAND gate.	8 Marks
	b)	What are the various scalable design rules for λ-based technology?	6 Marks
		(OR)	
4	a)	Explain why different criteria might be used to size transistors in tightly coupled small-fan-out circuits versus widely spaced high-fan-out circuits.	8 Marks
	b)	What is Resistive Interconnect delay? Why is it present in logic circuits?	6 Marks

UNIT-III

5	a)	Implement a look-up table based full adder using suitable ROM.	7 Marks
	b)	Design a logarithmic shifter circuit using CMOS.	7 Marks
		(OR)	
6	a)	Why do we go for Carry Look-Ahead Adder? Develop the circuits for Propagate (Pi) and Generate (Gi) terms needed for a 4-bit CLA.	10 Marks
	b)	Draw and explain zero/one detection circuit.	4 Marks

UNIT-IV

7	a)	Explain in detail about FPGA architecture.	7 Marks
	b)	Design Full adder using PLA.	7 Marks
		(OR)	
8		Discuss different FPGA architectures in detail.	14 Marks

UNIT-V

9	a)	Explain the various logic synthesis tools available for ASIC and FPGA-based design.	7 Marks
	b)	Explain various types of simulation.	7 Marks
		(OR)	
10	a)	What is need for testing? Explain the difference between testing and verification.	6 Marks
	b)	Explain the chip level test techniques. Explain the chip level test techniques.	8 Marks

PRINCIPLES OF COMMUNICATION
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain Autocorrelation of a periodic waveform.	7 Marks
	b)	Draw the impulse responses of $Sin\omega_0(t)$ and $Cos\omega_0(t)$.	7 Marks
		(OR)	
2	a)	Find the Fourier transform of $x(t) = 2/1+t^2$.	7 Marks
	b)	Plot the convolution of a function f(t) with a pair of impulses.	7 Marks

UNIT-II

3	a)	Explain the operation of envelop detector with a neat circuit diagram.	7 Marks
	b)	Draw the spectrum of WBFM and explain the effect of modulation index on the spectrum.	7 Marks
		(OR)	
4	a)	Explain clearly about pre-emphasis and de-emphasis in FM wave.	7 Marks
	b)	Explain the difference between DSB and SSB system.	7 Marks

UNIT-III

5	a)	Explain the generation and detection of PPM signal.	8 Marks
	b)	Assess the effect of aliasing in sampling process.	6 Marks
		(OR)	
6	a)	Compare FDM and TDM. What is meant by an asynchronous multiplexing?	7 Marks
	b)	Explain the methods for demodulation of PAM signals.	7 Marks

UNIT-IV

7	a)	Define and derive an expression for quantization error.	7 Marks
	b)	With the help a neat diagram, explain the transmitter and receiver of PCM.	7 Marks
		(OR)	
8	a)	Explain the delta modulation with block diagram. Discuss the disadvantages of delta modulation.	8 Marks
	b)	Discuss coherent, non coherent detection of ASK.	6 Marks

UNIT-V

9	a)	Define mutual information. State and prove the properties of it.	7 Marks
	b)	Explain the concept of Huffman coding technique by taking an example.	7 Marks
		(OR)	
10	a)	Explain the concept of error detection and correction using hamming codes.	7 Marks
	b)	Explain about code tree, trellis and state diagrams for a convolutional encoder.	7 Marks

MANAGERIAL ECONOMICS AND PRINCIPLES OF ACCOUNTANCY
[Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define Demand and explain its determinants.	CO1	7 Marks
	b)	Discuss about types of Price Elasticity of Demand with examples.	CO1	7 Marks

(OR)

2.		What is Demand Forecasting? Explain about different methods of Demand Forecasting.	CO2	14 Marks

UNIT-II

3.		Discuss the following: i) Fixed costs *Vs.* Variable costs. ii) Separable Costs *Vs.* Joint costs. iii) Avoidable Costs *Vs.* Unavoidable costs.	CO1	14 Marks

(OR)

4.		From the following particulars calculate the Break-Even Point in terms of both quantity and value: Production in units : 20,000 Sales price : Rs.6/- per unit Variable costs : Rs.40,000/- Fixed costs : Rs.24,000/-	CO2	14 Marks

UNIT-III

5.		What is Perfect Competition? Explain its features in detail.	CO4	14 Marks

(OR)

6.		Explain the following: i) Marginal cost pricing. ii) Cost plus pricing. iii) Skimming pricing. iv) Peak load pricing.	CO3	14 Marks

UNIT-IV

7.		Define double entry book keeping and explain its importance with an example.	CO3	14 Marks

(OR)

8.		Write and explain in detail about various types of Capital.	CO4	14 Marks

UNIT-V

9.		What is a Profit and Loss account? Mention briefly the advantages of preparing a Profit and Loss account.	CO1	14 Marks

(OR)

10. The following is the Trial Balance as on 31-03-2018. Prepare Trading and Profit and Loss Account and Balance Sheet CO4 14 Marks

Particulars	Debit (Rs.)	Credit (Rs.)
Stock (01-04-2017)	14,000	
Purchases	1,26,000	
Wages	50,500	
Sales		2,20,000
Salaries	16,000	
Carriage inward	9,100	
Rent and Rates	5,200	
Insurance	1,320	
Machinery	52,000	
Capital		1,45,600
Building	67,000	
Sundry debtors	44,000	
Furniture	3,350	
General expenses	2,600	
Sundry creditors		20,000
Cash in hand	1,930	
Bad debt	1,020	
Bank	6,580	
Secured Loan		15,000
	4,00,600	**4,00,600**

Adjustments to be made:

i) Stock on 31-03-2018 was Rs.20,600/-

ii) Depreciate machinery at 10% p.a.

iii) Make provision @5% for bad and doubtful debts.

iv) Provide discount on debtors @2.5%.

v) Insurance prepaid Rs.120.

MANAGEMENT SCIENCE

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the functions of Management.	CO1	7 Marks
	b)	Define Organization. Write the objectives and principles of Organization.	CO1	7 Marks

(OR)

2.	a)	Write the nature and importance of Management.	CO3	7 Marks
	b)	What is Line Organization? Write the benefits of line Organization.	CO3	7 Marks

UNIT-II

3.	a)	Define Marketing? Write functions of Marketing.	CO2	7 Marks
	b)	Explain the classical model of E.O.Q.	CO2	7 Marks

(OR)

4.	a)	Write short notes on: i) Just in Time. ii) Work study.	CO1	4 Marks
	b)	The data given below shows the details for the inspection of 10 consecutive batches:	CO4	10 Marks

Batch No.	1	2	3	4	5	6	7	8	9	10
No. of pieces inspected	175	181	208	166	217	158	199	220	162	212
No. of defectives	5	10	7	4	8	6	7	5	3	5

Construct a chart showing the control and warning limits.

UNIT-III

5.	a)	Write the role of H.R manager in an Organization.	CO1	7 Marks
	b)	Explain Herzberg's two factor theory of motivation with suitable examples.	CO1	7 Marks

(OR)

6.	a)	Briefly explain the nature and scope of H.R.M.	CO1	7 Marks
	b)	Define Job Evaluation. Explain the importance of Job Evaluation.	CO1	7 Marks

UNIT-IV

7.	a)	Discuss the role of women in an Entrepreneurship.	CO5	7 Marks
	b)	Write the differences between Entrepreneur and Manager.	CO5	7 Marks

(OR)

8. The activity details along with time estimates in days and precedence relationships are given below: CO4 14 Marks

Activity	Predecessor	Time estimate		
		Optimistic	Most likely	Pessimistic
A	-	4	6	8
B	A	5	7	15
C	A	4	8	12
D	B	15	20	25
E	B	10	18	26
F	C	8	9	16
G	E	4	8	12
H	D,F	1	2	3
I	G,H	6	7	8

i) Construct network diagram for the project.
ii) Determine the critical path and compute the expected completion time.
iii) Determine the probability of completing the project in 65 days.

UNIT-V

9. a) What is E.R.P? Explain its subsystems with suitable examples. CO1 7 Marks
b) What do you mean by Globalisation? Explain the importance of Globalisation. CO2 7 Marks

(OR)

10. a) What is B.P.O? Explain the features of B.P.O. CO6 7 Marks
b) Write the importance of Material Requirements Planning. CO1 7 Marks

BUSINESS COMMUNICATION AND CAREER SKILLS
[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		List the characteristics of communication and discuss the barriers to effective communication.	CO2	14 Marks
		(OR)		
2.	a)	Elaborate Upward and Downward communication.	CO2	7 Marks
	b)	Elaborate Horizontal communication.	CO2	7 Marks

UNIT-II

3.		Define Corporate communication. Explain about Corporate communication strategy	CO1	14 Marks
		(OR)		
4.		Describe the steps involved in communicating Corporate social responsibility of an Organization.	CO2	14 Marks

UNIT-III

5.	a)	How does general writing differ from business writing?	CO3	7 Marks
	b)	Discuss the various types of business messages.	CO1	7 Marks
		(OR)		
6.		Describe the various strategies followed for writing the body of a letter.	CO1	14 Marks

UNIT-IV

7.		How does a resume affect your employability? What are the components of resume?	CO4	14 Marks
		(OR)		
8.	a)	How do you differentiate traditional resume and electronic resume?	CO3	7 Marks
	b)	State the components of video resume.	CO4	7 Marks

UNIT-V

9.		State the importance of non verbal aspects in interviews.	CO5	14 Marks
		(OR)		
10.	a)	Summarize the elements involved in Panel Interview	CO6	7 Marks
	b)	Summarize the elements involved in Telephone Interview.	CO6	7 Marks

PERSONALITY DEVELOPMENT

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		"Success is a peak and cannot be reached in a leap". Discuss the implications of the above statement.	CO1	14 Marks
		(OR)		
2.	a)	Self-confidence is both a cause and consequence of Self-esteem. Explain.	CO1	7 Marks
	b)	**Loyalty *vs* Self-esteem : a case study** Lauren's first job after graduation from Santa Clara University was working as a quality engineer with a highly respected technology company. She had to monitor the manufacturing process and make sure that all products met customer specifications. Just three months into her position, the company booked a very large deal with a strategic customer, helping establish the company's dominance in the industry. Specifically, Lauren's company was designing a device that would be integrated into another company's product. The customer contracted out this work because they were experiencing rapid growth and cannot meet demand otherwise. They picked Lauren's company because of its good reputation and fast turnaround time. Lauren's role was to test the new device and make sure it met technical and environmental specifications, particularly functionality under extreme conditions, such as high humidity. The test results showed that the products did not meet the quality standards agreed upon, but only by a very small margin. Her general manager instructed her to push it through anyway, stating that the risk of failure was not great enough to delay mass production. Moreover, the likelihood of the product ever being placed in such extreme situations was so small that the manager did not feel jeopardizing the contract was worth it. Lauren spoke to her immediate boss, who worked under her general manager, and he also advocated pushing the product through to production. She was faced with the choice of ignoring company protocols or going against management. Sweeping the problem under the rug would require Lauren to sign off on a report that she knew to be fraudulent. She also knew that if she went to upper management her working relationships with her immediate bosses would be strained, maybe even preventing her success in the company. Not to mention, the company would have to delay production and possibly lose the contract. What should Lauren do?	CO4	7 Marks

UNIT-II

3.		List the advantages of positive thinking and the disadvantages of negative thinking.	CO1	14 Marks

(OR)

4.	a)	"Negative thinking is the early stage of the chronic illness called pessimism." Discuss.	CO2	7 Marks
	b)	How do positive greetings, enthusiasm and a sense of humour help in the work place?	CO2	7 Marks

UNIT-III

5.		List the ways employers can encourage and inspire critical thinking in their employees.	CO2	14 Marks

(OR)

6.	a)	Define Stress management.	CO1	7 Marks
	b)	How can stress affect productivity and success?	CO3	7 Marks

UNIT-IV

7.		Discuss the six leadership qualities that a good leader should possess.	CO1	14 Marks

(OR)

8.	a)	"A leader is one who knows the way, goes the way, and shows the way" Elaborate how these leadership qualities contribute to workplace success.	CO4	7 Marks
	b)	Contrast the above with the team spirit of the rest of the members.	CO4	7 Marks

UNIT-V

9.		"One should make sure of the rules of one's job by the end of the first day of employment." Justify the statement.	CO5	14 Marks

(OR)

10.	a)	Evaluate the purpose of form "W-4"	CO5	7 Marks
	b)	What is Job description? Why should it be studied closely?	CO2	7 Marks

PYTHON PROGRAMMING
[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the fundamental concepts of Computer Algorithms.	CO1	7 Marks
	b)	Describe the importance of Computational Problem Solving Characteristics in detail.	CO2	7 Marks
		(OR)		
2.	a)	Explain in detail about the variables and Identifiers in Python Programming.	CO1	7 Marks
	b)	Mention any five operations in Python.	CO1	3 Marks
	c)	Write a simple program in python to print greatest number in given three numbers.	CO2	4 Marks

UNIT-II

3.	a)	Explain "for" statement in python with an example.	CO1	7 Marks
	b)	Write a python script to calculate sum of individual digits of a given number using "for".	CO4	7 Marks
		(OR)		
4.	a)	Differentiate between the Selection Control and Iterative Control.	CO2	7 Marks
	b)	Illustrate the importance of implementation of Sets in Python.	CO1	7 Marks

UNIT-III

5.	a)	Write a short note on recursive problem solving. How it is differed from normal function calling? Justify.	CO3	10 Marks
	b)	Explain the concept of using text files in detail with an relevant examples.	CO2	4 Marks
		(OR)		
6.	a)	Illustrate with a program, the concept of Cigarette Use/Lung Cancer Correlation program with justification.	CO4	9 Marks
	b)	Describe the String Processing in detail in python programming.	CO1	5 Marks

UNIT-IV

7.	a)	Elucidate the turtle graphics, how are helpful in creating the graphics window? Justify the concept with exploration of relevant programs.	CO3	7 Marks
	b)	Develop a simple python program for bouncing ball using multiple turtles concept.	CO5	7 Marks
		(OR)		
8.		Illustrate the concept of Inheritance in detail? Explain the types of Inheritance with respective examples in python programming.	CO5	14 Marks

UNIT-V

9.	a)	Explain in detail the Binding events.	CO1	7 Marks
	b)	Describe the usage of Tkinter extensions and structures.	CO2	7 Marks
		(OR)		
10.	a)	Write a short note on Tkinter coding alternatives in detail.	CO1	7 Marks
	b)	Develop a reusable GUI component with classes like dialogs, check buttons and radio buttons.	CO3	7 Marks

DATABASE MANAGEMENT SYSTEMS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Illustrate the Data Models in detail.	CO1	7 Marks
	b)	Describe Schema and Instance with an example.	CO1	7 Marks
		(OR)		
2.	a)	What are the different types of database users? Discuss the main activities of each.	CO1	7 Marks
	b)	Explain the conceptual design with the ER model.	CO3	7 Marks
		UNIT-II		
3.	a)	Explain the Relational calculus in brief.	CO4	7 Marks
	b)	What is a View? Explain the SQL constructs to modify the structure of tables.	CO3	7 Marks
		(OR)		
4.	a)	Explain the Integrity constraints over relations in detail.	CO2	7 Marks
	b)	Describe the various types of Join with an example.	CO3	7 Marks
		UNIT-III		
5.	a)	Illustrate the problems caused by redundancy. Give examples of insertion, updation and deletion anomalies.	CO2	7 Marks
	b)	Describe 1NF, 2NF and 3NF with a suitable example.	CO2	7 Marks
		(OR)		
6.	a)	Write about Set comparison operators.	CO3	7 Marks
	b)	Explain the Closure of a Set of FDs with an example.	CO2	7 Marks
		UNIT-IV		
7.	a)	Describe the Implementation of Atomicity and Durability.	CO4	7 Marks
	b)	Explain in detail the Validation based protocols.	CO3	7 Marks
		(OR)		
8.	a)	Explain how granularities of locking affect the performance of concurrency control algorithm.	CO3	7 Marks
	b)	Describe timestamp ordering concurrency control techniques.	CO3	7 Marks
		UNIT-V		
9.	a)	Explain ISAM in detail.	CO5	7 Marks
	b)	Explain in detail the tree structured indexing with neat sketch.	CO5	7 Marks
		(OR)		
10.	a)	Write short note on comparison of File organizations.	CO5	7 Marks
	b)	Apply the concept of B+ tree to implement multilevel indexing.	CO6	7 Marks

JAVA PROGRAMMING

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Explain the iteration statements used in java.	CO1	9 Marks
	b)	Write short notes on garbage collection in java.	CO1	5 Marks
		(OR)		
2.	a)	Explain the java buzzwords in detail.	CO1	8 Marks
	b)	Write a java program to print Fibonacci series using recursion.	CO3	6 Marks
		UNIT-II		
3.	a)	Explain multi level inheritance. Demonstrate the execution order of constructors in multi level inheritance with a java code.	CO3	9 Marks
	b)	What are packages? Explain the benefits of creating programs using packages.	CO1	5 Marks
		(OR)		
4.	a)	Does java supports multiple inheritance? Justify.	CO1	4Marks
	b)	Differentiate between abstract classes and interfaces.	CO1	4Marks
	c)	Write a java program on extending interface to other interface.	CO3	6Marks
		UNIT-III		
5.	a)	Explain exception handling mechanism in detail.	CO1	8 Marks
	b)	Explain methods used in inter-thread communication.	CO1	6 Marks
		(OR)		
6.	a)	Differentiate between exceptions, runtime errors and compile time errors	CO1	5 Marks
	b)	Write a java program to demonstrate multithreading using Runnable interface.	CO3	9 Marks
		UNIT-IV		
7.	a)	Demonstrate Linked List class with its methods.	CO3	7 Marks
	b)	Explain in detail about applet architecture and applet skeleton.	CO4	7 Marks
		(OR)		
8.	a)	Write an applet program reading parameters from a html file and display.	CO3	8 Marks
	b)	Illustrate about different layout managers in AWT.	CO4	6 Marks
		UNIT-V		
9.	a)	Explain in detail about various event classes.	CO1	7 Marks
	b)	Explain about any three classes and interfaces in javax. Servlet package.	CO1	7 Marks
		(OR)		
10.	a)	Explain in detail about adapter classes.	CO1	5 Marks
	b)	Write a servlet program which displays “Welcome to Servlets” on execution.	CO3	9 Marks

MECHATRONICS
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.		Explain in detail about the Emerging areas in Mechatronics.	CO1	14 Marks
		(OR)		
2.	a)	Discuss a measurement system and its constituent elements.	CO1	7 Marks
	b)	What are the major advantages of using Microprocessor based controllers? Explain with example.	CO2	7 Marks
		UNIT-II		
3.	a)	Explain Dynamic characteristics of transducer and their effect on performance of transducer.	CO1, CO3	7 Marks
	b)	Explain the components of hydraulic activation system with neat sketch and block diagram. Distinguish between Servo valve and Direct Control valve.	CO2	7 Marks
		(OR)		
4.	a)	Explain the working and types of a stepper motor. In detail.	CO2	7 Marks
	b)	Describe the use of Eddy Current and Capacitance for proximity sensing.	CO2	7 Marks
		UNIT-III		
5.	a)	What is Data acquisition? Explain with a block diagram, the DAQ System.	CO3	7 Marks
	b)	Explain in detail Analogue to Digital Conversion process.	CO3	7 Marks
		(OR)		
6.	a)	What do you mean by the time Filtering and filter? How are filters classified?	CO3	7 Marks
	b)	Explain the working of op-Amp as Sample and hold circuit.	CO3	7 Marks
		UNIT-IV		
7.	a)	What are the limitations of a two - step (on - off) control and in what situation is such a control system commonly used?	CO4	7 Marks
	b)	Explain in detail adaptive control system.	CO4	7 Marks
		(OR)		
8.	a)	Discuss in detail about PI and PD mode electronic controllers.	CO4	7 Marks
	b)	Compare the control system performance for the system with a Derivative and Integral controller.	CO4	7 Marks
		UNIT-V		
9.		Explain the various stages in Mechatronics design approach and state how it differs from the traditional approach.	CO5, CO6	14 Marks
		(OR)		
10.		Device a pick and place robot system explain the various Mechatronics elements used in the design.	CO5	14 Marks

COMPUTER NETWORKS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		During the communication, how various layers of OSI model exchange information to establish a connection? Justify this with a suitable diagram.	CO1	14 Marks

(OR)

2.	a)	Explain how the information gets passed from one layer to the next in the TCP/IP model.	CO2	7 Marks
	b)	Compare network topologies with their performance indicator.	CO2	7 Marks

UNIT-II

3.	a)	Mention the Collision Free Protocols with an example.	CO2	7 Marks
	b)	Solve the One-bit Sliding window Protocol disadvantage in detail and specify how it can overcome.	CO2	7 Marks

(OR)

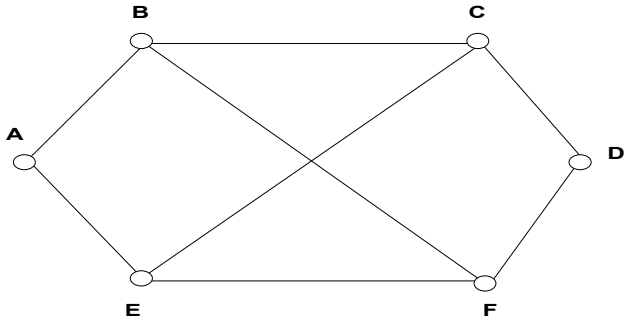
4.	a)	A bit string, 0111101111101111110, needs to be transmitted at the data link layer. What is the string transmitted after bit stuffing?	CO2	4 Marks
	b)	Explain stop and wait protocol in both noisy and noiseless channel when: i) the data is lost. ii) ACK is lost. iii) ACK is delayed.	CO2	10 Marks

UNIT-III

5.	a)	Explain steps involved in Link State Routing.	CO3	7 Marks
	b)	What is congestion, why congestion occurs, how congestion control is performed by leaky bucket algorithm?	CO3	7 Marks

(OR)

6.	a)	Describe Bellman-Ford Algorithm. What are the disadvantages of Bellman Ford Algorithm?	CO3	7 Marks
	b)	Consider the network shown in below.	CO3	7 Marks



Which uses distance vector routing? You are router C. You have just received the following distance vectors:

from B: (4, 0, 8, 13, 7, 2)
from D: (17, 11, 6, 0, 8, 10)
from E: (8, 6, 2, 10, 0, 4)

Your distances to B, D and E are 7, 4 and 6, respectively. What is your new routing table (include the distance and next hop for each destination)?

UNIT-IV

7.		Compare the TCP header and UDP header. List the field in the TCP header that is missing from UDP header. Give the reason for their absence.	CO2	14 Marks

(OR)

8.	a)	How is congestion controlled? Explain in detail about congestion control techniques in transport layer.	CO3	8 Marks
	b)	What is meant by data encapsulation? Explain data encapsulation in TCP/IP.	CO3	6 Marks

UNIT-V

9.		Infer the steps involved in DNS for resource records identification.	CO2	14 Marks

(OR)

10.	a)	Examine and discuss Electronic Mail and its services.	CO3	7 Marks
	b)	Explain in detail about HTTP.	CO3	7 Marks

WEB TECHNOLOGIES

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Write the HTML code for creating multi-line text box with necessary parameters.	CO1	7 Marks
	b)	Explain how basic and nested tables are created using HTML.	CO2	7 Marks
		(OR)		
2.	a)	Describe HTML text formatting tags with example.	CO4	7 Marks
	b)	Design a web page using HTML with image, navigation.	CO2	7 Marks
		UNIT-II		
3.	a)	Explain different types of control statements in Java script with example.	CO5	7 Marks
	b)	Define CSS. Explain inline, internal, external and embedded style sheets with examples.	CO3	7 Marks
		(OR)		
4.	a)	Write a Java script to display a given number in words.	CO4	7 Marks
	b)	Design a web page to convert Indian rupees to Foreign currency. Read the Indian rupees through input dialog and select foreign currency to which Indian rupees are converted using drop down menu.	CO6	7 Marks
		UNIT-III		
5.		Develop a mobile optimized website for displaying the images using responsive classes.	CO5	14 Marks
		(OR)		
6.	a)	Explain jQuery Selectors. Give some examples.	CO4	7 Marks
	b)	Explain HTML structure for Bootstrap with example.	CO3	7 Marks
		UNIT-IV		
7.	a)	Demonstrate the implementation of Object cloning in PHP.	CO5	7 Marks
	b)	Explain Control structures in PHP with example.	CO3	7 Marks
		(OR)		
8.	a)	Develop a PHP code to implement multi-level inheritance.	CO3	8 Marks
	b)	Explain the predefined and user defined functions in PHP with an example.	CO4	6 Marks
		UNIT-V		
9.	a)	Write a PHP code to validate the form consisting of a username, password and email fields.	CO3	7 Marks
	b)	Define a prepared statement. Explain in detail with the suitable program.	CO3	7 Marks
		(OR)		
10.	a)	Write a PHP script to retrieve the data from MySQL database.	CO4	7 Marks
	b)	Design a web page to store the Bio-data form data in the database using PHP. (Note: Bio-data page contains the fields Name, E-mail, Address, Phone number and photo).	CO6	7 Marks

OBJECT ORIENTED PROGRAMMING
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	How to create a two dimensional array in Java? Write a program to print unit matrix of size 5x5.	CO1	5 Marks
	b)	What is meant by parameterized constructor? Explain with an example.	CO1	9 Marks
		(OR)		
2.	a)	Illustrate how methods are overloaded in Java with an example.	CO3	7 Marks
	b)	List any five methods of string class with its syntax and example on each of it.	CO1	7 Marks

UNIT-II

3.	a)	Differentiate between this and super keyword in Java.	CO3	8 Marks
	b)	What is an abstract class? Write an example how abstract classes are created and accessed.	CO2	6 Marks
		(OR)		
4.	a)	Why java does not support multiple inheritances? How to solve this problem?	CO3, CO6	8 Marks
	b)	Elaborate the process of creating a user defined package.	CO3	6 Marks

UNIT-III

5.	a)	Illustrate the need of finally keyword in programming languages.	CO1	6 Marks
	b)	Discuss about how a user defined exception is created in Java.	CO1, CO2	8 Marks
		(OR)		
6.	a)	Describe how priorities will be used in invoking multiple threads created through Runnable interface.	CO1	7 Marks
	b)	Sketch the life cycle of a Thread and discuss about each of its state.	CO1, CO2	7 Marks

UNIT-IV

7.	a)	What is the need of Collection Classes in Java? Discuss about LinkedList class with an example.	CO2	6 Marks
	b)	Illustrate how TreeSet will be used in Collections with an example.	CO4	8 Marks
		(OR)		
8.	a)	How do you pass parameters to an Applet in Java?	CO4	7 Marks
	b)	Discuss about various layout managers available in AWT.	CO4	7 Marks

UNIT-V

9.	a)	With an example, discuss how MouseListener interface is implemented.	CO4	8 Marks
	b)	Elaborate the need of delegation event model of Java Language.	CO4	6 Marks
		(OR)		
10.	a)	Create a Servlet to read Login Credentials of a user and display that information in it.	CO6	9 Marks
	b)	Discuss about life cycle of a Servlet with its skeleton.	CO5, CO6	5 Marks

FOUNDATION ENGINEERING
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss in brief about various methods of boring.	CO1	8 Marks
	b)	Explain about Seismic refraction method with an aid of neat sketch.	CO1	6 Marks
		(OR)		
2.	a)	With an aid of neat sketch, discuss about static cone penetration test. Give out correlations between cone resistance (q_c) and SPT number (N).	CO1	7 Marks
	b)	Explain in brief about various design features effecting sample disturbance.	CO1	7 Marks

UNIT-II

3.	a)	Differentiate between Rankine's earth pressure theory and Coulomb's earth pressure theory.	CO1	8 Marks
	b)	A retaining wall of height 7m retains a backfill with horizontal surface. The backfill was having $\phi = 30^o$, γ_{sat}= 21kN/m^3 and γ = 17 kN/m^3. The water table is at a depth of 4m from backfill surface. Calculate the total passive earth pressure acting on retaining wall.	CO2	6 Marks
		(OR)		
4.	a)	Explain in brief about stability considerations of gravity retaining wall with a neat sketch.	CO1	7 Marks
	b)	A retaining wall with a smooth vertical back, retains a clayey backfill with c = 17 kN/m^2, $\phi = 27^o$, γ = 20 kN/m^3. Calculate the total active thrust acting on retaining wall assuming that tension crack may develop to the full theoretical depth.	CO2	7 Marks

UNIT-III

5.	a)	What are the various types of slope failure? Explain them briefly.	CO2	6 Marks
	b)	An infinite slope in sandy soil is inclined at 20^o to the horizontal has γ = 18 kN/m^3, γ_{sat} = 21 kN/m^3, $\phi = 35^o$. A hard layer exists 5m below and parallel to the surface. What is the factor of safety against slip when: (i) the slope has negligible water in it, (ii) the slope submerged with steady seepage parallel to the surface up to a height of 3m from failure surface?	CO2	8 Marks
		(OR)		
6.	a)	Explain the stability analysis for finite slopes using Bishop's method.	CO2	8 Marks
	b)	An embankment constructed with an inclination of 35^0 and its height is 15m. The angle of shearing resistance is 15^0, cohesion intercept is 20 kN/m^2 and unit weight of soil is 18.0 kN/m^3. If the embankment was fully submerged, then find the factor of safety with respect to cohesion. Use Taylors stability number. For $i = 35^0$ and $\phi = 15^0$, take Sn = 0.06.	CO2	6 Marks

UNIT-IV

7.	a)	Discuss about the effect of water table on bearing capacities of shallow foundation.	CO1	8 Marks
	b)	Determine the allowable bearing pressure of a shallow foundation of 2m width with its base at 1.5m depth. The water table is at a depth of 2m from ground surface. The corrected N value obtained from SPT test at depth of foundation is 25. Use Teng's formulae and assume allowable settlement as 40mm.	CO2	6 Marks

(OR)

8.	a)	What are the assumptions of Terzaghi's bearing capacity theory?	CO1	6 Marks
	b)	A square footing of size 3m x 3m rests on a c- ϕ soil having c = 12kN/m^2, ϕ= 30^o and γ = 18 kN/m^3. The base of the footing is at a depth of 2.5 m below ground surface. Calculate the safe bearing capacity of the soil for following conditions: i) When water table is at a depth of 3m from ground surface. ii) When water table is at ground surface. (For ϕ= 30^o, N_c = 37.2, N_q = 22.5 and N_γ = 19.7) Take F.S = 3.	CO2	8 Marks

UNIT-V

9.	a)	What is a pile foundation? What are the conditions where a pile foundation is more suitable than a shallow foundation?	CO1	8 Marks
	b)	Discuss in brief about various formulae used for determining capacity of driven piles.	CO1	6 Marks

(OR)

10.	a)	Explain the following rectifying methods of tilts and shifts of well foundation. i) Controlled dredging. ii) Pushing the well. iii) Water jetting.	CO1	6 Marks
	b)	What are the various types of caissons? Give out their advantages and disadvantages.	CO1	8 Marks

HIGHWAY AND TRAFFIC ENGINEERING
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain briefly the following. i) IRC. ii) Central Road Fund.	CO1	6 Marks
	b)	Explain various factors controlling highway alignment with a neat sketch.	CO1	8 Marks

(OR)

2.	a)	What is super elevation? Derive an expression for super elevation with a neat sketch.	CO3	7 Marks
	b)	Define over taking sight distance. Derive an expression for over taking sight distance with a neat sketch.	CO3	7 Marks

UNIT-II

3.	a)	List the desirable properties of bitumen and mention various tests performed on bituminous materials.	CO2	7 Marks
	b)	Explain crushing test on aggregate with a neat sketch	CO2	7 Marks

(OR)

4.	a)	Differentiate between flexible and rigid pavement.	CO3	7 Marks
	b)	Write equations for load, temperature and frictional stresses in rigid pavement.	CO3	7 Marks

UNIT-III

5.	a)	List out elements involved in traffic operation. Discuss the primary functions of traffic engineering.	CO5	7 Marks
	b)	Explain various static vehicle characteristics affecting road design and traffic performance.	CO4	7 Marks

(OR)

6.	a)	A vehicle travelling with a speed of 45 kmph was stopped within 1.7 seconds after application of brakes. Find the average skid resistance.	CO4	6 Marks
	b)	Discuss fundamental diagrams of traffic flow.	CO6	8 Marks

UNIT-IV

7. a) Enlist method of traffic volume study and explain mechanical counters method with advantages. CO6 7 Marks

   b) Using the spot speed data given in the following table, determine: CO8 7 Marks

   i) Modal Speed. ii) Median Speed.

   iii) Speed limit for Traffic Regulations.

   iv) Speed to be used in geometric design.

Speed Range (kmph)	No. of Vehicles observed
21-25	2
26-30	6
31-35	18
36-40	25
41-45	19
46-50	16
51-55	17
56-60	12
61-65	7
66-70	4
71-75	3
76-80	1

(OR)

8. a) Enlist purposes of travel time and delay study. Also explain fixed delay and operational delay. CO7 7 Marks

   b) Define practical capacity. Briefly discuss various factor affecting the practical capacity of road CO7 7 Marks

UNIT-V

9. a) Explain collision and condition diagram. List preventive measure for road accidents. CO6 7 Marks

   b) Explain various methods of on-street parking with neat sketch. CO7 7 Marks

(OR)

10. a) Draw a neat sketch of rotary intersection. Show all design components and explain about them in brief. CO7 7 Marks

    b) List various traffic signs as per IRC and draw neat sketch of following signs. CO7 7 Marks

    i) No parking. ii) Hair pin Band. iii) Give way.

STEEL STRUCTURES
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	Design a double cover plate butt joint using M24 bolts of product grade C and property class 5.6 to connect two flats of size 350mm x 16mm for maximum efficiency. Assume that one shear plane intercepts the threads of the bolts. The yield and ultimate tensile strengths of the flats are 250 MPa and 410 MPa, respectively.	CO3	14 Marks
	(OR)		
2.	Determine the size of end fillets to connect two plates with cross sections of 125 x 8mm and 125 x 12mm which are subjected to a tension of 100kN at working load. The ultimate strength of the plates, fu = 410 MPa.	CO2	14 Marks

UNIT-II

3.	Design a laterally unsupported beam for the following data: Effective span: 4 m; Maximum bending moment: 550 kNm; Maximum shear force: 200 kN; Steel of grade: Fe 410.	CO3	14 Marks
	(OR)		
4.	Design a simply supported beam of span 5m carrying a reinforced concrete floor capable of providing lateral restraint to the top compression flange. The uniform distributed load of 60kN/m. Assume Fe 410 grade steel.	CO3	14 Marks

UNIT-III

5.	Determine the tension capacity of 150 x 90 x 8mm angles in Fe 410 steel assuming: i) Connection through the longer leg by two rows of M20 bolts and ii) Connection through shorter leg by a single row of M24 bolts.	CO2	14 Marks
	(OR)		
6.	A double angle discontinuous strut consists of two ISA 75 x 75 x 6 connected back to back to both sides of the 10mm thick gusset plate with two bolts. The length of the strut is 4.5m. Calculate the safe load carrying capacity of the section.	CO3	14 Marks

UNIT-IV

7.	Design a batten system for a column of 10m long to carry a factored axial load of 1000kN. The column is restrained in position but not in direction at both ends. Assume that the two channels back to back.	CO4	14 Marks
	(OR)		

8.	Design a suitable slab base for a column section ISHB 200 at 365.9 N/m supporting an axial load of 400kN. The base plate is to rest on a concrete pedestal of M-20 grade.	CO2	14 Marks

UNIT-V

9.	As per IS 875 (Part 3), determine the basic wind pressure to be considered for a shed in the outskirts of Bangalore. Given data: Structure: General purpose with probable life of 50 years. Terrain category is I, Building Class B. Eye board height: 11 m. Topography: Plain area.	CO6	14 Marks

(OR)

10.	Explain the following terms as per IS 875 (Part 3):		
	i) Basic wind speed.	CO7	3 Marks
	ii) Design wind speed.	CO7	3 Marks
	iii) Risk coefficient.	CO7	3 Marks
	iv) Terrain, Height and structure size factor.	CO7	3 Marks
	v) Topography factor.	CO7	2 Marks

FIRE ENGINEEERING
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.		Write a detailed note on shock waves, auto ignition and boiling liquid expanding vapour explosion.	CO1	14 Marks
		(OR)		
2.	a)	Describe the theory of combustion and explosion.	CO1	8 Marks
	b)	Discuss briefly about toxicity of products of combustion.	CO1	6 Marks
		UNIT-II		
3.		Discuss in detail about types of fire extinguishers, fire stoppers, alarm and detection systems.	CO2	14 Marks
		(OR)		
4.	a)	Explain the concept of fire triangle.	CO1	6 Marks
	b)	Explain the various classes of fires.	CO2	8 Marks
		UNIT-III		
5.	a)	Explain about active and passive fire protection systems.	CO2	7 Marks
	b)	Write a note on portable extinguishers.	CO5	7 Marks
		(OR)		
6.		Explain the selection criteria, reliability, maintenance and evaluation of various fire protection systems.	CO3	14 Marks
		UNIT-IV		
7.		Discuss the significance of structural fire protection and structural integrity.	CO2	14 Marks
		(OR)		
8.		Explain the fire safety requirements for high rise buildings.	CO7	14 Marks
		UNIT-V		
9.		Explain the explosion relief of large enclosures, explosion venting and inert gases.	CO9	14 Marks
		(OR)		
10.		Discuss in detail about explosion protection, flame arresters, isolation and venting.	CO10	14 Marks

ADVANCED STRUCTURAL ANALYSIS

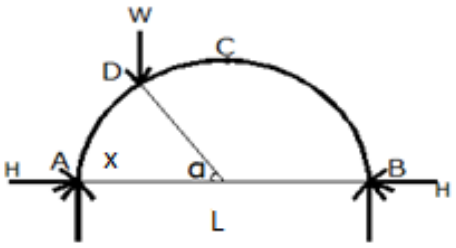
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

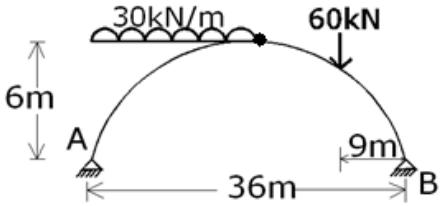
UNIT-I

1. a) Explain in detail. CO1 7 Marks
   i) Effects of yielding of supports in arches. CO2
   ii) Rib shortening and temperature changes in the arches.
   b) Find the horizontal thrust of a two hinged arch subjected to concentrated load as shown below. CO4 7 Marks



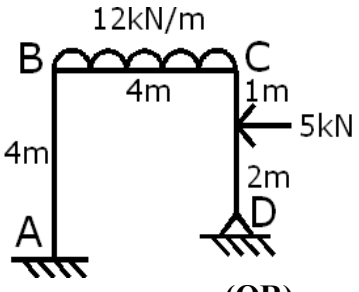
(OR)

2. A three hinged parabolic arch is shown in figure, determine the bending moment, normal thrust and radial shear at quarter span and draw bending moment. CO2 CO4 14 Marks



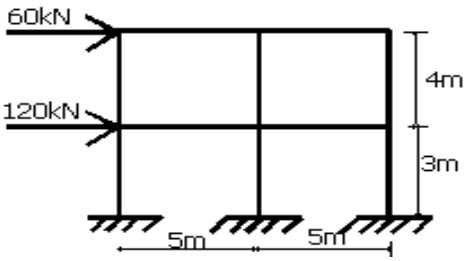
UNIT-II

3. Analyse the below portal frame by moment distribution method. CO4 14 Marks



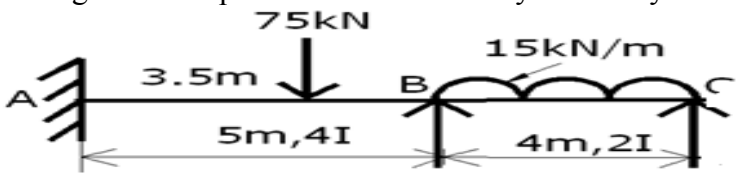
(OR)

4. Analyze the following portal frame by portal method. Draw BMD CO4 14 Marks



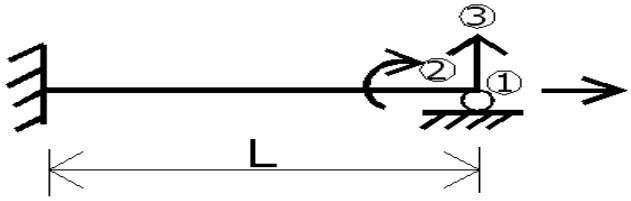
UNIT-III

5. Analyze the given two span continuous beam by flexibility method. CO3 14 Marks



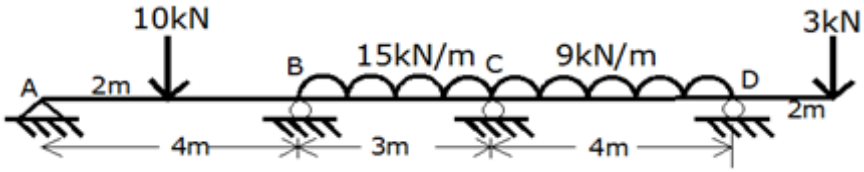
(OR)

6. For the simply supported beam shown below, develop the flexibility matrix with reference to the coordinates as specified. CO2 14 Marks



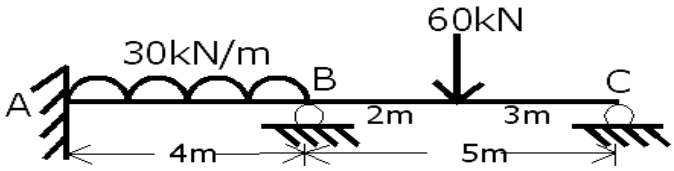
UNIT-IV

7. Analyse the given continuous beam by stiffness matrix method and sketch BMD. CO2 14 Marks



(OR)

8. Calculate the support moments for the given continuous beam by support B sinks by 2.5mm. Draw BMD. Take E=200kN/mm^2, I=3.5x10^7 mm^4 CO3 14 Marks



UNIT-V

9. A curved beam is in the form of a full continuous circle in plan with a radius of 3m and is supported continuously on five supports. The beam carries a uniformly distributed load of 30kN/m length, inclusive of its own weight. Determine the bending moment, twisting moment and shear force at salient locations. Also plot the B.M., T.M. and S.F. diagrams for one span. CO2 14 Marks

(OR)

10. A semi-circular beam is simply supported on three equally spaced columns. Show that the maximum bending moment and maximum twisting moment are equal to 0.429wR^2 and 0.1045wR^2 respectively. CO2 14 Marks

GROUNDWATER DEVELOPMENT AND MANAGEMENT
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define Darcy law. Derive the expression for the Darcy law. List the different assumptions and discuss it validity.	CO1	8 Marks
	b)	Briefly explain Aquifer, Aquiclude, Aquitard and Aquifuge.	CO1	6 Marks
		(OR)		
2.	a)	Discuss the terms specific yield, specific retention, porosity and their relationship.	CO1	8 Marks
	b)	With the help of neat sketch, explain in detail the vertical distribution of ground water.	CO1	6 Marks

UNIT-II

3.	a)	Derive the expression for discharge "Q" through a well, fully penetrating a confined aquifer or artesian aquifer.	CO2	8 Marks
	b)	An unconfined aquifer has a thickness of 40m. A fully penetrating 20cm diameter well in this aquifer, is used to pumped water at a rate of 35 lit/sec. the drawdown measured in two observation wells located at distances of 20m and 120m from the well are 7.0m and 1.0m respectively. Determine the average hydraulic conductivity of the aquifer.	CO2	6 Marks
		(OR)		
4.	a)	Derive an expression for discharge from a well fully penetrating a unconfined aquifer under steady state flow. Assume if any data required.	CO2	7 Marks
	b)	An unconfined aquifer has a thickness of 30m. A fully penetrating 20cm diameter well in this aquifer is pumped at a rate of 35 lit/sec. The drawdown measured in two observation wells located at distances of 10m and 100m from the well are 7.5m and 0.5m respectively. Determine the average hydraulic conductivity of the aquifer and transmissibility of the unconfined aquifer. Assume if any data required.	CO2	7 Marks

UNIT-III

5.	a)	Briefly discuss saline water intrusion. List the different reason for the saline water intrusion.	CO4	8 Marks
	b)	List the different disadvantages of saline water intrusion in aquifers.	CO4	6 Marks
		(OR)		
6.	a)	Explain Glover method.	CO4	5 Marks
	b)	A well screen 1m in length is located 15m below the groundwater table in an unconfined aquifer having permeability of 20 m/day. The fresh water and sea water interface exist at a depth of 36m below the water table depth. What is the maximum discharge that can be sustained from the well without causing the salt to intrude into the well?	CO6	9 Marks

UNIT-IV

7.		List and briefly explain different techniques used for ground water recharge methods in detail with neat sketches.	CO3	14 Marks

(OR)

8.	a)	List and explain the indirect techniques used of the ground water recharge.	CO3	7 Marks
	b)	Describe any one combined techniques of subsurface and surface used for recharge of ground water.	CO3	7 Marks

UNIT-V

9.		Briefly discuss geophysical logging and resistivity logging sub-surface methods of ground water investigation.	CO5	14 Marks

(OR)

10.	a)	Explain the principle of subsurface investigation using electrical resistivity methods for exploration of ground water.	CO5	8 Marks
	b)	Explain the basic principle of seismic refraction method.	CO5	6 Marks

SOLID WASTE MANAGEMENT
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) Explain physical and chemical characteristics of solid waste. CO1 7 Marks

   b) Using the data for a municipal solid waste sample provided below, find the average moisture content of the sample. Base your calculations on a100kg sample size. CO2 7 Marks

Component	Moisture content (%)	Weight (%)
Paper waste	5	29
Yard Waste	45	20
Food waste	70	16
Plastic	1	11
Wood	25	8
Glass	6	9
Metals	3	7

(OR)

2. Investigate the importance of role of NGOs and legislation in effective Solid Waste Management. CO2 14 Marks

UNIT-II

3. a) Discuss how the waste is collected, removed and transported. CO2 7 Marks

   b) Write the importance of color containers and materials used for storage containers. CO5 7 Marks

(OR)

4. How the recyclable materials are separate at source? Discuss briefly processing of solid waste at residential dwellings. CO2 14 Marks

UNIT-III

5. a) Investigate the important factors to be considered in preparation of collection routes. CO4 7 Marks

   b) Explain the different options available for collection of waste under Indian condition. CO2 7 Marks

(OR)

6. Explain in detail about selection of location, operation and maintenance of transfer station. CO9 14 Marks

UNIT-IV

7.	a)	Write a detailed note on "composting".	CO5	7 Marks
	b)	What is incineration? Explain the advantages and disadvantages of incineration of refuse.	CO2	7 Marks

(OR)

8.		Explain in detail about any two techniques used for processing of solid waste.	CO5	14 Marks

UNIT-V

9.	a)	Write a brief note on management rules in Bio-medical waste.	CO6	7 Marks
	b)	What is pyrolysis and explain process with neat sketch.	CO5	7 Marks

(OR)

10.	a)	What are the factors that are considered for selecting a land filling site in terms of environmental sustainability?	CO7	7 Marks
	b)	Write the adverse effects of a land filling leachate and list approximate Control measures.	CO5	7 Marks

RURAL TECHNOLOGY

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Write about Rural Indian life and Indian farmer.	CO2	7 Marks
	b)	Explain how the technology plays a vital role in improving rural infrastructure.	CO1	7 Marks
		(OR)		
2.	a)	Describe how poverty eradication is carried out in rural areas and also describe about rural business hubs.	CO4	7 Marks
	b)	What is the role of CAPART, NABARD, CSIR and NIF in issues of technology transfer?	CO4	7 Marks

UNIT-II

3.	a)	Enumerate various sources of non-conventional energy and describe them with merits and de-merits.	CO4	7 Marks
	b)	Write about assessment and production of biomass products and their utilization.	CO2	7 Marks
		(OR)		
4.	a)	Explain how the rural areas will develop with solar energy.	CO4	7 Marks
	b)	Write the working principle involved in solar cooker.	CO4	7 Marks

UNIT-III

5.	a)	Explain how the food and agro based technologies will plays a vital role in the development of rural areas.	CO4	7 Marks
	b)	What are the building materials used for construction in rural areas and explain the construction technologies?	CO1	7 Marks
		(OR)		
6.	a)	What do you mean by tissue culture and nursery?	CO4	7 Marks
	b)	Write the procedure for processing of economic plants.	CO4	7 Marks

UNIT-IV

7.	a)	The village which is located in a drought prone area, suggest how rain water harvesting is useful in such areas.	CO4	7 Marks
	b)	How can you educate the village farmers in view of Bio-fertilizers with their importance and uses?	CO4	7 Marks
		(OR)		
8.	a)	Write a note on drinking water, environment and sanitation.	CO4	7 Marks
	b)	Explain various employment generating technologies.	CO4	7 Marks

UNIT-V

9.	a)	Write about the role of Information Technology (IT) in rural areas.	CO3	7 Marks
	b)	Explain about Saansad Adarsh Gram Yojana (SAGY).	CO1	7 Marks
		(OR)		
10.	a)	Discuss the impact of IT in rural development.	CO3	7 Marks
	b)	Describe about village adoption schemes.	CO2	7 Marks

POWER SEMICONDUCTOR DRIVES
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Derive the fundamental torque equation of an electrical drive.	CO1	8 Marks
	b)	A drive has the following parameters: T = 150 – 0.1 N, N-m, where N is the speed in r.p.m. Load torque Tl = 100, N-m, Initially the drive operating in steady-state. The characteristics of the load torque are changed to Tl = -100. Calculate initial and final equilibrium speeds.	CO1	6 Marks

(OR)

2.	a)	Explain Modes of operation of electrical drives.	CO2	7 Marks
	b)	Draw and explain the closed loop speed control schemes in multi motor drives.	CO1	7 Marks

UNIT-II

3.		A 230V, 960 r.p.m, 20A separately excited dc motor has armature resistance and inductance of 1.2Ω and 50mH respectively. Motor is controlled by a single phase half controlled rectifier with source voltage of 230V, 50Hz. Identify the modes and calculate speeds for: (i) $\alpha = 60^0$ and torque =1000 N-m. (ii) $\alpha = 120^0$ and torque =1000 N-m.	CO3	14 Marks

(OR)

4.		Analyze speed torque relation and characteristics of separately excited DC motor fed by a 3-phase fully controlled converter. Draw the relevant waveforms.	CO2	14 Marks

UNIT-III

5.		Describe operation of chopper fed to separately excited DC motor under motoring and regenerative braking control with circuit and waveforms.	CO2	14 Marks

(OR)

6.		A 230 V, 1200 r.p.m, 15 A separately excited motor has an armature resistance of 1.2Ω. Motor is operated under dynamic braking with chopper control; braking resistance has a value of 20Ω. i) Calculate duty ratio of chopper for motor speed of 1000 r.p.m and braking torque equal to 1.5 times rated torque. ii) What will be the motor speed for duty ratio of 0.5 and motor torque equal to its rated torque.	CO4	14 Marks

UNIT-IV

7.	a)	With necessary block diagram, explain operation of variable frequency control of 3-phase Induction motor.	CO2	10 Marks
	b)	List out difference between CSI and VSI fed drives. Justify.	CO4	4 Marks

(OR)

8.		A 440 V, 50Hz, 970 r.p.m, 6 pole Y connected three phase wound rotor induction motor has following parameters referred to stator. Rs=0.1 Ω, Rr'=0.08 Ω, Xs=0.3 Ω, Xr'=0.4 Ω. Stator to rotor turns ratio is 2. Motor speed is controlled by Static Scherbius Drive. Drive is designed for a speed range of 25% below the synchronous speed. Max value of firing angle is 165^{o}. DC link inductor resistance is 0.01 Ω. Calculate: i) Transformer turns ratio. ii) Torque for a speed of 780 r.p.m at $\alpha=140^{o}$ iii) Firing angle for half the rated motor torque and speed of 800 r.p.m.	CO5	14 Marks

UNIT-V

9.	a)	Analyze the operation of self-controlled synchronous motor with Voltage source inverter.	CO2	10 Marks
	b)	Name the different modes employed to achieve variable frequency control in synchronous motors.	CO1	4 Marks

(OR)

10.	a)	When can a synchronous motor be load commutated?	CO1	4 Marks
	b)	List out and explain the drive circuits for stepper motors, depending on load torque capability how drive circuit selected.	CO5	10 Marks

POWER SYSTEM ANALYSIS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) Form Y bus for the network by direct inspection method: CO4 7 Marks

Element	5-1	5-2	1-2	2-3	1-4	3-6	4-6
Positive sequence reactance	0.04	0.05	0.04	0.03	0.02	0.07	0.10

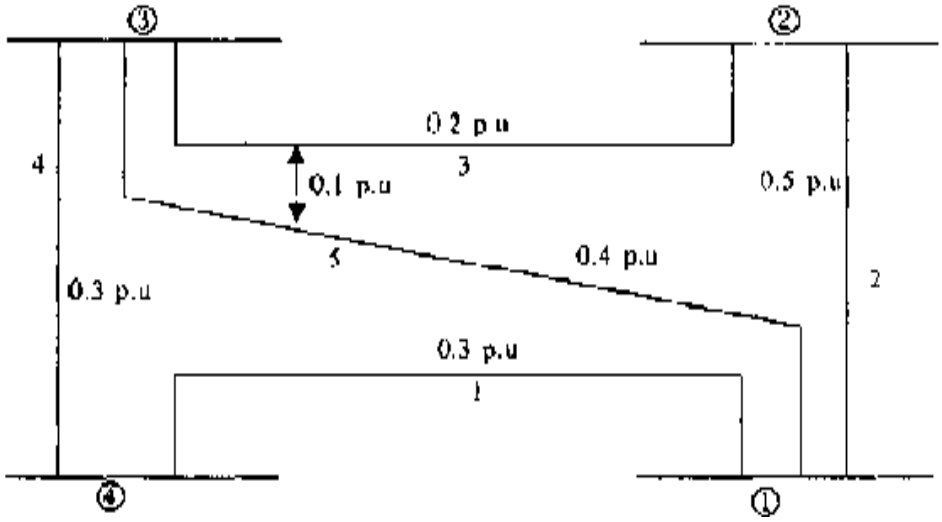
b) Define the per unit value of a quantity. How will you change the base impedance from one set of base values to another set? CO1 7 Marks

(OR)

2. a) Describe the per phase generator model with required diagrams. CO2 7 Marks
b) With neat diagrams, explain the transformer model used for per phase analysis. CO2 7 Marks

UNIT-II

3. a) Illustrate the modifications necessary in the Z_{BUS} when a mutually coupled element is removed. CO5 7 Marks
b) Using the building algorithm construct Z_{BUS} for the system shown in figure. Choose 4 as reference bus. CO4 7 Marks



(OR)

4. a) Explain the procedure for modification of Z_{BUS} when a line is added, which has no mutual reactance. CO5 7 Marks
b) Form bus impedance matrix for the data given below. CO3 7 Marks

Element number	Bus code From bus – To bus	Self-impedance
1	2-3	0.6 p.u.
2	1-3	0.5 p.u.
3	1-2	0.4 p.u.

UNIT-III

5.		Explain the step by step computational procedure for the Gauss-Seidel method of load flow studies when the system contains all types of buses.	CO5	14 Marks

(OR)

6.	a)	What are the assumptions made in reducing Newton Raphson method to decoupled method for power flow solution?	CO1	7 Marks
	b)	Derive the static load flow equations of n-Bus system.	CO2	7 Marks

UNIT-IV

7.	a)	With the help of a detailed flow chart, explain how a symmetrical fault can be analysed using Z_{BUS}.	CO2	7 Marks
	b)	What are the various types of faults? Discuss their frequency of occurrence and severity. Find the fault current when an L-L-G fault occurs at the terminals of an unloaded generator.	CO3	7 Marks

(OR)

8.	a)	Illustrate the procedure for making short circuit studies of a large power system.	CO1	7 Marks
	b)	A 3-phase, 25 MVA, 11 KV alternator has internal reactance of 6%. Find the external reactance per phase to be connected in series with the alternator so that steady state short circuit current does not exceed six times the full load current.	CO3	7 Marks

UNIT-V

9.	a)	Discuss the various factors affecting the transient stability of the system.	CO1	7 Marks
	b)	Explain the equal area criterion. How it is useful for predicting system stability?	CO4	7 Marks

(OR)

10.	a)	Write short notes on assumptions made in deducing equal area criterion.	CO1	7 Marks
	b)	Define steady state stability and explain the methods for improving steady state stability.	CO5	7 Marks

DESIGN AND ESTIMATION OF ELECTRICAL SYSTEMS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. Estimate the quantity of material required along the cost for conduit (PVC) wiring in one room of dimensions 20 x 8 x 5 meters. The following are to be points to be fitted and draw the layout of the given system. CO3, CO4, CO7 — 14 Marks
   i) Lights points – 8 Nos x 20W ii) Fan Points – 6 Nos x 60W
   iii) Plug Points – 3 point socket type – 3 x 100W
   iv) AC - 2 x 1.5 Ton (appox. rating assume 2kW).

(OR)

2. a) Write the general rules to be considered for wiring systems and also explain the estimation of Conductor size and selection cables for a particular load (Assume necessary data for explanation) CO1, CO3 — 7 Marks
   b) Explain tin brief different types of domestic and commercial wiring systems. List out all merits and demerits. CO1, CO3 — 7 Marks

UNIT-II

3. a) An overhead 3-phase, 415V distributor to be laid along route 450m long. The end supports are terminal poles with 60m span in between. Prepare list for laying distributor. Consider the following data: CO1, CO3 — 8 Marks
   Conductor: ACSR 6/1 x 2.11mm for phase, neutral and street light Earth wire, GI wire –6 SWG , 1.92kg /10m weight. L.T cable: 4 core, 60mm^2, 1100V grade. Distance of first terminal pole from the substation is 10m.
   b) Discuss the methods of installation of service line and overhead line. CO3 — 6 Marks

(OR)

4. a) Find the material required for 1 phase overhead service line of a house located 10 mts away from the pole, with following loads: CO1, CO3 — 7 Marks
   i) Lighting and other loads = 2.5 kW,
   ii) AC Load: 10kW (Assume safety factor = 1.66)
   b) Explain the procedure for estimation of H.T lines for distribution line. CO1, CO3 — 7 Marks

UNIT-III

5. a) A 15HP 415V 3-Phase, 50Kz squirrel cage induction motor is to be installed in a pump house, of dimensions given in below Fig. Show its wiring diagram layout and estimate the quantity of materials required and its cost. CO3. CO4 — 8 Marks

   b) Describe the selection of switch gears for 33kV/11kV substation and draw substation lay out. CO2, CO3, CO6 — 6 Marks

(OR)

6.	a)	Explain in brief selection of distribution architecture.	CO2, CO3	6 Marks
	b)	Explain the how you will calculate full load current and decide size of the conductor size for the following motor. i) DC Motor. ii) 3-phase induction motor (Assumerating of motor for explanation for both the cases).	CO3, CO4	8 Marks

UNIT-IV

7.	a)	A small area of 10 meters in diameter is to be illuminated by a lamp suspended at a height of 4.5 meters over the center of area. A lamp having an efficacy of 30 lumens per watt is fitted with a reflector which directs the light output only over the surface to be illuminated. If the utilization coefficient is 0.66 and illumination 850 lux, determine the wattage of the lamp.	CO1	7 Marks
	b)	Discuss inverse square law and cosine law of Illumination.	CO1	7 Marks

(OR)

8.	a)	A hall of dimensions 40m x 15m x 5m is to be provided with a general illumination of 150 lumens/m^2. Taking a coefficient of utilization of 0.6 and depreciation factor of 1.42, determine the number of fluorescent tubes required, their spacing, mounting height and total wattage. Taking luminous efficiency of florescent tube as 40 lumens/watt for 40W tube.	CO1	7 Marks
	b)	The candle power of a lamp is 120. A plane surface is placed at a distance of 2.5m from this lamp. Calculate the illumination on the surface when it: i) normal. ii) inclined to 45^0.	CO1	7 Marks

UNIT-V

9.	a)	A piece of an insulating material is to be heated by dielectric heating. The size of the piece is 10m x 10 cm x 3cm. A frequency of 20 MHz is used and the power absorbed is 450W. If the material has a relative permittivity of 6 and a power factor of 0.05, calculated the voltage necessary for heating and current that follows in the material.	CO1, CO4, CO5, CO7	8 Marks
	b)	Explain the classifications of resistance welding. What are its advantages and disadvantages?	CO1, CO5	6 Marks

(OR)

10.	a)	A 50 kW single phase, 220V resistance oven employees circular nichrome wire for its heating element. If the wire temperature is not to exceed 1500^0C and the temperature of the charge is to be 450^0C, calculate the size and length of wire required. Assume e = 0.95 and radiation efficiency K = 0.65. What would be the temperature of wire when the charge is cold (25^0C)?	CO1, CO4, CO7	8 Marks
	b)	Explain the reasons for considering the electric heating as superior compared to other types of heating.	CO1	6 Marks

DIGITAL SIGNAL PROCESSING FOR ELECTRICAL ENGINEERS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) Two signals $x(n)$ and $h(n)$ given as, $x(n) = \{1,2,3,4,5\}$ and $h(n)=\{5,4,3,2,1\}$. CO1 6 Marks

Determine the following signals.

i) $p(n)= 2 + x(n)$

ii) $q(n) = x(n)h(n)$

iii) $r(n) = 1.5\ h(n)$

b) Solve the linear difference equation CO1 8 Marks

$y(n) - 0.5\ y(n-1) + 0.06\ y(n-2) = 2\ (0.1)^n$ with $y(-1) = 1$ and $y(-2) = 0$.

(OR)

2. a) Find the z-transform of the signal $x(n) = n(0.1)^n\ u(n)$. CO1 7 Marks

b) Compare analog signal processing and digital signal processing. CO1 7 Marks

UNIT-II

3. a) Consider a finite length sequence $x(n) = \delta(n) + 2\ \delta(n-5)$. Find the 10-point DFT. CO2, CO4 4 Marks

b) State and prove the circular frequency shifting and conjugate symmetry properties of DFT. CO2 10 Marks

(OR)

4. a) Discuss the properties of Radix-2 decimation in time algorithm. Find 8- point DFT of sequence. $x(n)=1,\ 0 \le n \le 7$. Using DIT-FFT algorithm. CO2, CO4 10 Marks

b) Find the circular convolution of CO4 4 Marks

$x(n) = \{1,3,\underset{\uparrow}{4},-2,-5\}$ and $h(n) = \{1,\underset{\uparrow}{2},-2,-5\}$.

UNIT-III

5. a) Obtain direct form-I realization of the LTI system governed by the difference equation. CO3 8 Marks

$Y(n) = 1.5y(n-1) - 0.6\ y(n-2) - 0.2y(n-3) + x(n) - 1.5x(n-1)$.

b) Compare analog and digital filters. CO1 6 Marks

(OR)

6. a) Design an IIR low-pass Butterworth filter using bilinear transformation for the following speciation's. CO3 9 Marks

$$passband: \quad 0.8 \le \left|H(e^{j\omega})\right| \le 1, \ \ |\omega| \le 0.2\pi$$

$$stopband: \quad \left|H(e^{j\omega})\right| \le 0.2, \ \ 0.6\pi \le |\omega| \le \pi$$

b) What is Warping Effect? What is its effect on magnitude and phase response? CO3 5 Marks

UNIT-IV

7.		Design an ideal differentiator with frequency response $H(e^{j\omega}) = j\omega$, $-\pi \leq \omega \leq \pi$ using Hamming window for N=8 and also plot the magnitude response.	CO3	14 Marks

(OR)

8.		Design an ideal FIR LPF of length N=11 with cutoff frequency of 1KHz and sampling frequency of 4KHz using Fourier series method. Find the non causal FIR filter impulse response and system function. Moreover find the causal FIR filter system function and frequency response.	CO3	14 Marks

UNIT-V

9.	a)	How the memory is allocated in LF2407 DSP controller? Also give the types of physical memory.	CO5	8 Marks
	b)	List the components that are included in peripheral set of LF2407.	CO5	6 Marks

(OR)

10.		Explain the control of stepper motor using LF2407 DSP controller in full step and half step modes.	CO5, CO6	14 Marks

CODE No.: 16BT60205 SVEC-16

Roll No. | | | | | | | | | | |

ELECTRICAL MACHINE DESIGN

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Illustrate the Faraday's Law of electro-magnetic induction and Justify the "Change in flux linkages can be caused in three ways".	CO1	7 Marks
	b)	What are the major considerations accounted for the good design of electrical machines?	CO1	7 Marks
		(OR)		
2.	a)	Discuss the design factors effecting temperature rise in electrical machines during operation.	CO1	7 Marks
	b)	Calculate the specific electric and magnetic loading of 100HP, 300V, 3-Phase, 50Hz, 8-pole, star connected, flame proof induction motor having stator core length of 0.5m and stator bore of 0.66m. Turns / phase are 286. Assume full load efficiency as 0.938 and pf as 0.86.	CO2	7 Marks

UNIT-II

3.	a)	Explain the procedure of designing a shunt field coil of DC machine.	CO1	7 Marks
	b)	Determine the main dimensions, number of poles and length of air gap of a 600kW, 500V, 900 r.p.m DC generator. Assume average gap density as 0.6 Wb/m² and ampare conductors per meter as 35000. The ratio of pole arc to pole pitch is 0.75 and the efficiency as 91%. The design limitations are: Peripheral speed not to exceed 40 m/sec Armature mmf/pole not to exceed 7500 The mmf required for the air gap is 50% of armature mmf. Kg=1.15.	CO3	7 Marks
		(OR)		
4.	a)	i) Prove that in a DC motor torque is proportional to the volume of active material used. ii) "Insulation decides the rating of the machines" - justify the statement.	CO2	7 Marks
	b)	Show that the output of a DC generator with a single coil is given by ((0.03E'V.qA) / (P.N)) kW. where E' is the average voltage between adjacent commutator segments, V is the peripheral velocity in meters/sec, q is the specific electric loading in ac/motor, P is the number of poles and N is the speed in rpm.	CO2	7 Marks

UNIT-III

5.	a)	Derive an expression for the leakage reactance of a transformer with primary and secondary cylindrical coils of equal length.	CO1	7 Marks
	b)	Calculate the approximate overall dimensions for a 200 kVA, 6600/440V, 50Hz, 3-Phase core type transformer. The following data may be assumed: EMF per turn = 10V, Maximum flux density = 1.3 Wb/m². Current density = 2.5 A/mm². Window space factor = 0.3, overall height - overall width. Stacking factor = 0.9. Use a three stepped core. For a three stepped core, take a = 0.9d, Ai = 0.6d², with usual notations.	CO5	7 Marks

(OR)

6.	a)	Obtain an expression for the no load current of a single and three phase transformer.	CO4	9 Marks
	b)	Write an elaborated note on cooling of transformers.	CO4	5 Marks

UNIT-IV

7.	a)	Derive the power and voltage output equation of a three phase induction motor.	CO1	6 Marks
	b)	A 15kW, 400V, 3-Phase, 50Hz, 6-pole induction motor has a diameter of 30cm and core length of 12cm. The number of stator slots is 72 with 20 conductors per slot. The stator is delta connected. Calculate the magnetising current per phase if the length of the air gap is 0.55 mm. Assume gap contraction factor as 1.2. Assume, mmf required for the iron parts is 35% of the air mmf coil span = 11 slots.	CO3	8 Marks

(OR)

8.	a)	Explain the phenomenon of Cogging and Crawling of a 3-phase squirrel cage induction motor. What are the rules used to avoid cogging and crawling on the torque speed characteristic of the motor?	CO5	7 Marks
	b)	A 90kW, 500V, 50Hz, 3-phase, 8-pole induction motor has a stator connected stator winding kept in 63 slots with 6 conductors per slot. If the slip ring voltage on open circuit is to be 400V, find a suitable rotor winding stating: i) Number of slots. ii) Number of conductors per slot. iii) Coil span. iv) Slipping voltage on open circuit. v) Full load current per phase in rotor. Assume efficiency = 0.9, Power factor = 0.86.	CO5	7 Marks

UNIT-V

9.	a)	Define short circuit ratio of a synchronous machine. What are its effects on the machine performance?	CO1	7 Marks
	b)	Determine the main dimensions for a 10kVA, 3-phase, 400/230V, star connected 1500 r.p.m, 50Hz, alternator. Assume B_{avg} = 0.45T, q = 22000 ac/m, winding factor = 0.96. Ratio of core length to pole pitch = 1. Also determine the number of slots and conductors per slot.	CO2	7 Marks

(OR)

10.	a)	Derive the output equation of a synchronous machine and mention the salient features	CO1	7 Marks
	b)	The field coils of a salient pole alternator are wound with a single layer winding of bare copper strip 30mm deep, with separating insulation of 0.15mm thick. Determine suitable winding length, number of turns and thickness of conductor to develop an mmf of 12000 amp turns with a potential difference of 5V per coil and with a loss of 1200 Wb/m^2 of total coil surface. The mean length of turn is 1.2m. The resistivity of copper is 0.021Ω/m and mm^2.	CO2	7 Marks

HVDC TRANSMISSION

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Write a short note about the different types of DC links with neat sketches.	CO1	8 Marks
	b)	Write a brief summary of technical advantages of DC over AC transmission.	CO6	6 Marks
		(OR)		
2.	a)	Classify the inherent problems associated with HVDC transmission.	CO2	6 Marks
	b)	Illustrate the applications of HVDC transmission system in detail.	CO2	8 Marks
		UNIT-II		
3.		Draw the schematic diagram of a 6-pulse Gratez's circuit and explain its operation with overlap angle less than 60^0 and represent relevant voltage and current waveforms.	CO2	14 Marks
		(OR)		
4.		Analyze the converter bridge characteristics both in rectifier and inverter modes of operation.	CO5	14 Marks
		UNIT-III		
5.		Explain about the two basic firing schemes in HVDC system and list out the drawbacks of EPC scheme.	CO5	14 Marks
		(OR)		
6.		Draw the diagram of basic power controller and explain about power flow controller in detail.	CO2	14 Marks
		UNIT-IV		
7.	a)	What are non-characteristic harmonics? Explain the effect of pulse number on harmonics.	CO1	7 Marks
	b)	Briefly explain about the design criteria of AC filters.	CO3	7 Marks
		(OR)		
8.	a)	Mention different types of filters? Explain about design of a high pass filter with the relevant equations.	CO3	10 Marks
	b)	Explain about protection of filters.	CO3	4 Marks
		UNIT-V		
9.		Write down the causes of over voltages in a converter station explain each cause in detail.	CO2	14 Marks
		(OR)		
10.	a)	Explain about the phenomena of protection against over currents in detail.	CO1	8 Marks
	b)	Write a short note about arrangement a DC breaker with diagram.	CO1	6 Marks

ADVANCED CONTROL SYSTEMS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. What is lag compensator? Explain the procedure for the design of lag compensator using root locus technique. CO3 14 Marks

(OR)

2. a) What is PI controller? What are its effects on system performance? CO1 4 Marks

   b) A unity feedback system has an open loop transfer function, $G(s) = \frac{50}{(s+3)(s+1)}$. Design PI controller so that the phase margin of the system is 35° at a frequency of 1.2 rad/sec. CO3 10 Marks

UNIT-II

3. Describe the concept of controllability and observability. Explain any two testing methods to check controllability and observability of a system. CO2 14 Marks

(OR)

4. a) Describe the principle of duality. CO1 4 Marks

   b) Convert the following system matrix to canonical form. CO1 10 Marks

$$A = \begin{bmatrix} 4 & 1 & -2 \\ 1 & 0 & 2 \\ 1 & -1 & 3 \end{bmatrix}$$

UNIT-III

5. Derive the expression for describing function of backlash non-linearity. CO2 14 Marks

(OR)

6. A linear second-order servo is described by the equation CO2 14 Marks

$$\ddot{e} + 3\xi_n \dot{e} + 2_n^2 e = 0; \text{ where } \boldsymbol{\xi = 0.5}; \boldsymbol{n = 1}; \boldsymbol{e(0) = 1}\ \dot{e}(0) = 0$$

Determine the singular points. Draw the phase trajectory using the method of isoclines.

UNIT-IV

7. a) Discuss in detail the direct method of Lyapunov for linear continuous time autonomous system. CO2 7 Marks

   b) Test the stability of the system described by CO4 7 Marks

$$\dot{x}_1 = -2x_1 + 5x_1^2 x_2, \qquad \dot{x}_2 = -3x_2$$

Determine the region of asymptotic stability using Krasovskii's method.

(OR)

8. Describe any two methods of generating Lyapunov functions. CO5 14 Marks

UNIT-V

9.	Explain necessary and sufficient conditions for the design of state feedback control through pole placement.	CO4	14 Marks

(OR)

10.	Consider the closed loop poles at $-1.5 \pm j4$, -5.5, design a state feedback controller, the closed loop transfer function of a plant is $\frac{Y(s)}{U(s)} = \frac{7}{S^2 + 2S^2 + 5S + 9}$ with the help of state feedback control $u = -kx$, it is desired to place the closed loop poles at $-1 \pm j3.5$ and -4. Calculate the necessary state feedback gain matrix 'K'.	CO4	14 Marks

SPECIAL ELECTRICAL MACHINES
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain in detail the multi stack construction of Stepper Motor.	CO1	7 Marks
	b)	Explain the modes of excitation of Stepper Motor with neat diagram.	CO1	7 Marks
		(OR)		
2.	a)	Describe the principle of operation of Hybrid Stepper Motor.	CO1	7 Marks
	b)	Explain briefly a closed–loop operation system using a Microprocessor for a hybrid Stepper Motor	CO1	7 Marks

UNIT-II

3.	a)	Explain with neat diagram, the microprocessor based control of Switched Reluctance Motor.	CO1	9 Marks
	b)	Derive the expression for static torque in Switched Reluctance Motor.	CO2	5 Marks
		(OR)		
4.	a)	Develop Switched Reluctance Motor using two converter topologies and draw relevant diagrams.	CO3	7 Marks
	b)	Discuss the torque speed characteristics of Switched Reluctance Motor in detail.	CO2	7 Marks

UNIT-III

5.	a)	Discuss in detail about the construction and working of Synchronous Reluctance Motor with neat diagrams.	CO1	7 Marks
	b)	Draw and discuss phasor diagram with Torque – Angle characteristics of Synchronous Reluctance Motor.	CO2	7 Marks
		(OR)		
6.	a)	Derive the expression for the torque equation of a Synchronous Reluctance Motor.	CO2	7 Marks
	b)	Describe in detail the speed – Torque characteristics of Synchronous Reluctance Motor.	CO2	7 Marks

UNIT-IV

7.	a)	Discuss in detail about magnetic circuit analysis of PMBLDC Motor on open circuit.	CO1	7 Marks
	b)	Write the principle of operation of PMBLDC Motor.	CO1	7 Marks
		(OR)		
8.	a)	What is the need of sensor less control? Explain in detail how sensor less control is implemented on BLDC Motor.	CO5	7 Marks
	b)	A BLPM Motor has a no load speed of 6000 r.p.m, when connected to a 120V DC supply. The armature resistance is 2Ω. Rotational and iron losses may be neglected. Determine the speed when the supply voltage is 60V and the torque is 0.5 N-M.	CO4	7 Marks

UNIT-V

9.	a)	Discuss the construction and working of a transverse flux linear Induction Motor.	CO1	7 Marks
	b)	For a Linear Induction Motor, the supply frequency is equal to 24Hz, Input power = 6.3kW, Stator Copper and Iron losses = 1.3kW, Velocity of the Motor = 2.5m/s, pole pitch = 0.6cm. Determine the gross mechanical power developed and trust developed.	CO4	7 Marks

(OR)

10.	a)	Discuss the construction and principle of operation of Linear Synchronous Motor with neat diagrams.	CO1	9 Marks
	b)	Discuss about applications of LSM in Transport System.	CO6	5 Marks

ENERGY AUDIT AND CONSERVATION
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the need of energy auditing.	CO1	6 Marks
	b)	Write a brief notes on: i) Pie charts. ii) Sankey diagrams.	CO2	8 Marks
		(OR)		
2.	a)	Define: i) Energy Index. ii) Cost index.	CO2	8 Marks
	b)	Describe the procedure for building audit.	CO8	6 Marks

UNIT-II

3.		Explain the roles and responsibilities of energy managers in industries.	CO9	14 Marks
		(OR)		
4.		List the various rules for efficient energy conservation.	CO8	14 Marks

UNIT-III

5.		What are the different procedures that can be followed for proper ventilation in buildings?	CO3	14 Marks
		(OR)		
6.		Describe the block diagram of solar passive architecture.	CO6	14 Marks

UNIT-IV

7.		Explain any four the energy audit instruments along with their importance while energy auditing.	CO2	14 Marks
		(OR)		
8.		What are the measures taken while design of energy efficient motors?	CO3	14 Marks

UNIT-V

9.		Demonstrate simple payback method with an example along with its merits and demerits.	CO10	14 Marks
		(OR)		
10.		A chemical company is considering investment to an energy project costing Rs.4,00,000/-. The estimated salvage value is zero. The tax rate is also zero. The company uses straight line depreciation and the proposed project has cash flows as follows.	CO10	14 Marks

Year	Cash Flows in INR
1	1,00,000/-
2	1,00,000/-
3	1,50,000/-
4	1,50,000/-
5	2,50,000/-

Determine (i) Payback period (ii) NPV at 15% interest

CAD / CAM
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	How the product cycle is revised with introduction of CAD/CAM?	CO1	7 Marks
	b)	How CAD/CAM systems are evaluated? Explain in detail by categorizing evaluation parameters during selection.	CO1	7 Marks
		(OR)		
2.	a)	What are the various memories used in a computer?	CO1	7 Marks
	b)	Explain how CAD helps to synthesize a product design and do engineering analysis for getting optimal design?	CO1	7 Marks

UNIT-II

3.	a)	Find the degree of Bezier curve controlled by three points (4, 2), (0, 0) and (2, 8). Also find the equation of the Bezier curve in parametric format with parameter "μ".	CO6	7 Marks
	b)	What is meant by a Geometric Entity? Explain the common entities used in Geometric Modeling.	CO6	7 Marks
		(OR)		
4.	a)	What are the various curve representation methods?	CO1	7 Marks
	b)	How the line and circle are parametrically represented as Analytic curves?	CO1	7 Marks

UNIT-III

5.	a)	What are the different types of contouring system in a CNC machine? Explain with neat sketches.	CO5	7 Marks
	b)	What is meant by the DNC? Discuss how it is different from CNC.	CO5	7 Marks
		(OR)		
6.	a)	Explain various types of input devices used in modern CNC controller for loading programs.	CO5	7 Marks
	b)	What is right hand rule in NC where it is used?	CO5	7 Marks

UNIT-IV

7.	a)	What is group technology? Discuss machine cell design in G.T.	CO3	7 Marks
	b)	Explain briefly the OPITZ CLASS system of codification.	CO3	7 Marks
		(OR)		
8.	a)	Differentiate between retrieval type and generative type CAPP systems. List out the merits and demerits of each type.	CO3	7 Marks
	b)	Explain about the production flow analysis.	CO3	7 Marks

UNIT-V

9.	a)	Write briefly on contact inspection method.	CO4	7 Marks
	b)	Explain the need for automated inspection strategies in manufacturing plant.	CO4	7 Marks
		(OR)		
10.	a)	Compare and contrast, contact and non-contact inspection techniques.	CO4	7 Marks
	b)	Define CAD/CAM and CIM. Give a brief note of their application in industries.	CO4	7 Marks

HEAT TRANSFER
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss elaborately on thermal conductivity of solids, liquids and gases.	CO1	7 Marks
	b)	Describe different types of boundary conditions applied to heat conduction problems.	CO1	7 Marks

(OR)

2.	a)	Derive 1D steady state heat conduction equation for a plane wall.	CO2	7 Marks
	b)	A brick wall (k = 0.7 W/m K) is 0.3 m thick. If the temperatures of inner and outer surfaces are maintained at 50^0C and 30^0C respectively, calculate the heat loss through one square meter area. Find also the temperature at an interior point of the wall 24cm distant from the outer wall.	CO5	7 Marks

UNIT-II

3.	a)	Derive an expression for heat dissipated by a fin of uniform cross-section with convective heat transfer at tip.	CO2	7 Marks
	b)	A copper cylinder 60cm diameter and 75cm long is initially at a uniform temperature of 25^0C. When the cylinder is exposed to hot flue gases, the surface temperature suddenly changes to 450^0C. Make calculations for the temperature at the centre of cylinder 3 minutes after the operation of change in surface temperature. Also calculate the time required for the temperature at the centre to attain 375^0C. Thermal diffusivity of copper is 1.12×10^{-4} m^2/s.	CO3	7 Marks

(OR)

4.	a)	A very long copper rod 20mm in diameter extends horizontally from a plane heated wall maintained at 100^0C. The surface of the rod is exposed to an air at 20^0C with heat transfer coefficient of 8.5 W/m^2 K. Workout the heat loss, if the thermal conductivity of copper is 400 W/m K. Further, considering it infinite, estimate the length of rod.	CO3	7 Marks
	b)	Explain the significance of Hesler and Grober charts.	CO1	7 Marks

UNIT-III

5.	a)	Explain the concept of boundary layer theory.	CO1	7 Marks
	b)	A 50cm long glass plate is hung vertically in air at 35^0C while the temperature is maintained at 85^0C. Calculate the boundary layer thickness at the leading edge of the plate. If a similar plate is placed in a wind tunnel and air is blown over it, at a velocity of 4m/s. Estimate the boundary layer thickness at its leading edge.	CO4	7 Marks

(OR)

6.	a)	Derive the Von-Karman integral equation.	CO2	7 Marks
	b)	A plate of length 750mm and width 250mm has been placed longitudinally in a stream of crude oil which flows with a velocity of 5m/s. If the oil has specific gravity 0.8 and kinematic viscosity 1 stoke, calculate: i) Boundary layer thickness at the middle of plate. ii) Shear stress at the middle of the plate. iii) Friction drag on one side of plate.	CO4	7 Marks

UNIT-IV

7.	a)	Derive LMTD equation for counter flow heat exchanger.	CO2	7 Marks
	b)	A heat exchanger is to be designed to condense 8 kg/s of an organic liquid (t_{sat} = 80^{0}C: h_{fg} = 600 kJ/kg) with cooling water available at 15^{0}C and at a flow rate of 60kg/s. The overall heat transfer coefficient is 480W/m^2 K. Calculate: i) The number of tubes required. The tubes are to be of 25mm outer diameter, 2mm thickness and 4.85m length, ii) The number of tube passes. The velocity of the cooling water is not to exceed 2m/s.	CO3	7 Marks

(OR)

8.	a)	Explain the regimes of Pool boiling curve.	CO1	7 Marks
	b)	Water at atmospheric pressure is to be boiled in polished copper pan. The diameter of the pan is 350mm and is kept at 115^{0}C. Calculate the following: i) Power of the burner. ii) Rate of evaporation in kg/hr. iii) Critical heat flux.	CO4	7 Marks

UNIT-V

9.	a)	Derive an expression $E_b = \pi I_b$.	CO2	7 Marks
	b)	Determine the radiant heat exchange per m^2 area for two infinite parallel plates held at temperature of 800K and 400K respectively. Take emissivity as 0.6 for the hot plate and 0.4 for the cold plate. What should be the emissivity of a polished aluminum shield placed between them, if heat flow is to be reduced to 40% of its original value? Calculate the equilibrium temperature of the shield.	CO4	7 Marks

(OR)

10.	a)	Discuss on shape factor algebra with simple sketches.	CO1	6 Marks
	b)	Estimate the solar radiation on a plate normal to the sun rays. Assume the sun to be a black body at a temperature of 5520^{0}C. The diameter of the sun is 1.39 x 10^{6}Km and its distance from the earth is 1.5 x 10^{8}km.	CO3	8 Marks

NON-CONVENTIONAL ENERGY SOURCES
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the methods of direct energy conversion with examples.	CO1	6 Marks
	b)	Outline the various solar radiation measurement technologies in detail.	CO2	8 Marks
		(OR)		
2	a)	Define the terms: i) Altitude angle. ii) Incident angle. iii) Zenith angle. iv) Solar Azimuth angle. v) Latitude angle. vi) Declination angle.	CO1	6 Marks
	b)	What is the present status of development of solar energy in India?	CO2	8 Marks

UNIT-II

3	a)	What are the important performance indices of a solar collector? Explain them briefly.	CO2	8 Marks
	b)	Explain the working of a flat plate collector with their thermal analysis.	CO2	6 Marks
		(OR)		
4	a)	Classify various types of air collectors with suitable sketches.	CO3	8 Marks
	b)	Why orientation is needed in concentrating type collectors? Describe various method of sun tracking.	CO2	6 Marks

UNIT-III

5	a)	Discuss about the applications of solar thermal energy.	CO3	8 Marks
	b)	Explain the types of PV cells and I-V curve characteristics in brief.	CO2	6 Marks
		(OR)		
6	a)	Describe a passive space solar heating system.	CO3	8 Marks
	b)	Discuss about Thermionic power generation.	CO2	6 Marks

UNIT-IV

7	a)	Explain the working of horizontal axis wind turbine.	CO3	7 Marks
	b)	Discuss about the utilization bio-mass in IC engines.	CO5	7 Marks
		(OR)		
8	a)	Describe the main considerations in selecting a site for wind power plants.	CO3	7 Marks
	b)	With a neat diagram, discuss the biomass gasification methodology.	CO2	7 Marks

UNIT-V

9	a)	How is geothermal energy generated inside the earth crust? Explain the operational features of vapour dominated geo-energy system with a neat sketch.	CO4	7 Marks
	b)	What are the environmental impacts of geothermal energy?	CO5	7 Marks
		(OR)		
10		Explain with neat sketches the various methods of Tidal power generation. What are the limitations of each method?	CO5	14 Marks

GAS TURBINES AND JET PROPULSION
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Describe with neat sketches the working of a simple constant pressure open cycle gas turbine and enumerate the various uses of gas turbine.	CO1	7 Marks
	b)	The gas turbine unit has a pressure ratio of 6:1 and maximum cycle temperature of 610ºC. The isentropic efficiencies of the compressor and turbine are 0.80 and 0.82 respectively. Calculate the power output in kilowatts when the air enters the compressor at 15ºC at the rate of 16 kg/s.	CO2	7 Marks
		(OR)		
2.		The pressure ratio of open cycle gas turbine power plant is 5.6. Air is taken at 30ºC and 1 bar. The compression is carried out in two stages with perfect inter-cooling in between. The maximum temperature of the cycle is limited to 700ºC. Assuming the isentropic efficiency of each compressor stage as 85% and that of turbine as 90%, determine the power developed and efficiency of the power plant, if the air-flow is 1.2 kg/s. The mass of fuel may be neglected, and it may be assumed that c_p= 1.02 kJ/kg K and γ = 1.41.	CO1, CO2	14 Marks

UNIT-II

3.	a)	Explain the working of Centrifugal compressor with the aid velocity diagrams	CO1, CO2	7 Marks
	b)	An axial flow compressor with an overall isentropic efficiency of 85% draws air at 20ºC and compresses it in the pressure ratio of 4:1. The mean blade speed and flow velocity are constant throughout the compressor. Assuming 50% reaction blading and taking blade velocity as 180m/s and work input factor as 0.82, calculate flow velocity and number of stages. Take α_1=12º and β_1=42º.	CO2	7 Marks
		(OR)		
4.	a)	Classify rotary compressors and explain the working of Roots blower.	CO1	7 Marks
	b)	A centrifugal compressor running at 1440 r.p.m, handles air at 101kPa and 20ºC and compresses it to a pressure of 6 bar isentropically. The inner and outer diameters of the impeller are 14cm and 28cm respectively. The width of the blade at the inlet is 2.5 cm. The blade angles are 16º and 40º at entry and exit. Calculate mass flow rate of air, degree of reaction and power input and width of blades at outlet.	CO2	7 Marks

UNIT-III

5.	a)	What are the requirements of Gas turbine combustion chamber? Explain the various forms of combustion.	CO3	7 Marks
	b)	Explain the performance and operating characteristics of combustion chamber.	CO4	7 Marks
		(OR)		
6.	a)	What are the various types of gas turbine combustion chambers?	CO3	7 Marks
	b)	Explain various factors affecting combustion chamber design.	CO4	7 Marks

UNIT-IV

7.	a)	Explain the working principle of Turbo-Jet with the aid of neat sketch and define the following terms related to jet propulsion. i) thrust. ii) thrust power. iii) propulsive efficiency. iv) thermal efficiency.	CO1, CO4	7 Marks
	b)	Explain the working of Ram jet and discuss the advantages and disadvantages.	CO4	7 Marks
		(OR)		
8.	a)	Explain the working of turboprop engine and turbofan engine.	CO1	7 Marks
	b)	Why is thrust augmentation necessary? What are the methods for thrust augmentation in a turbojet engine?	CO4	7 Marks

UNIT-V

9.	a)	Classify the rackets and discuss about various types of propellants.	CO1, CO5	7 Marks
	b)	Derive expression for optimum expansion ratio for rocket.	CO1, CO5	7 Marks
		(OR)		
10.	a)	Explain briefly the working principle of rocket and derive the expression for propulsion efficiency of a rocket in-terms of speed ratio.	CO1, CO5	7 Marks
	b)	State the difference between jet propulsion and rocket propulsion and discuss about the advantage of using nuclear thermal rocket for space propulsion.	CO4, CO5	7 Marks

HYDRAULICS AND PNEUMATICS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Elaborate hydraulic power systems advantage and applications.	CO1	7 Marks
	b)	What are the desirable properties of hydraulic fluids? Disuss any two of them in detail.	CO1	7 Marks
		(OR)		
2.	a)	A pump has a displacement volume of 90cm^3. It delivers 0.75m^3/s oil at 1000 r.p.m and 75bars. If the prime over input torque is 125 N-m, what is the overall efficiency of the pump? What is the theoretical torque required to operate the pump?	CO2	7 Marks
	b)	How the capacity of variable displacement vane pump is adjusted? Explain with a diagram.	CO2	7 Marks

UNIT-II

3.	a)	How to calculate frictional losses in common valve and fittings.	CO3	8 Marks
	b)	Draw fluid power symbols of any six different types of valves.	CO3	6 Marks
		(OR)		
4.	a)	Design a hydraulic circuit for operating shaping machine to achieve fast and slow movement of ram.	CO4	7 Marks
	b)	Explain the working of five way two position direction control valve.	CO3	7 Marks

UNIT-III

5.	a)	Draw the neat sketch of the pneumatic filter and explain its construction and working.	CO3	7 Marks
	b)	Describe various pneumatic actuators with neat sketches.	CO3	7 Marks
		(OR)		
6.	a)	Enumerate types of pressure control valves and explain any one valve with neat sketch.	CO4	7 Marks
	b)	Elaborate time delay and memory valves used in pneumatics.	CO4	7 Marks

UNIT-IV

7.	a)	What is cascade control? Explain with suitable example of circuit diagram.	CO5	7 Marks
	b)	Explain with neat block diagram an air pilot control circuit for a double acting cylinder.	CO5	7 Marks
		(OR)		
8.	a)	Explain with a circuit diagram how is the control of an air motor is achieved. A flow control valve used to adjust the speed of the motor.	CO5	7 Marks
	b)	Discuss motion and control diagrams.	CO5	7 Marks

UNIT-V

9.		Develop an electro pneumatic circuit for the following sequence A+B+A-B- where A and B stand for cylinder (+) indicates extension and (-) indicates retraction of cylinders	CO6	14 Marks

(OR)

10.	a)	Describe different logic gates used in pneumatic circuits.	CO5	7 Marks
	b)	Explain pilot assisted solenoid control of directional control valves.	CO5	7 Marks

CODE No.: 16BT60307 SVEC-16

SUPPLY CHAIN MANAGEMENT
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Discuss the goal of Supply Chain Management and explain the impact of Supply Chain decisions on the success of a firm.	CO1	14 Marks

(OR)

2.		Give an example of a Supply Chain of your choice that has evolved over a period of time.	CO1	14 Marks

UNIT-II

3.	a)	Explicate the difference between FIFO and LIFO.	CO2	7 Marks
	b)	Discuss five costs associated with Inventories.	CO2	7 Marks

(OR)

4.	a)	Name and describe the categories of Inventory-Carrying costs.	CO2	7 Marks
	b)	Explain the three main approaches used in Warehousing.	CO2	7 Marks

UNIT-III

5.		Relate how Bullwhip effect leads to lack of coordination in a Supply Chain.	CO3	14 Marks

(OR)

6.		Examine the role of Information Technology in the supply chain of an Automobile industry. Explicate with a practical example.	CO3	14 Marks

UNIT-IV

7.		Differentiate between Distribution Channel and Transaction Channel in Supply Chain Transportation.	CO4	14 Marks

(OR)

8.		Explicate the objectives of a Physical Distribution System.	CO4	14 Marks

UNIT-V

9.		Determine the Inventory and Flow of Materials in Supply Chain Management using Flow Chart.	CO2	14 Marks

(OR)

10.		Examine the role of B2B and B2C in Supply Chain Management for a global manufacturing company. Explicate the process and how it is done using a practical example.	CO5	14 Marks

ANTENNAS AND WAVEGUIDES
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Derive the wave equation for a TM wave and obtain the expression for the field component in a rectangular wave guide.	CO1	8 Marks
	b)	An air-filled rectangular waveguide of inside dimensions 7 x 3.5cm operates in the dominant TE_{10} mode. i) Find the cutoff frequency. ii) Determine the phase velocity of the wave in the guide at a frequency of 3 .5 GHz. iii) Determine the guided wavelength at the same frequency.	CO1	6 Marks

(OR)

2.		Derive the wave equation for TM wave and TE wave. Obtain the expression for the field component in a rectangular wave guide.	CO1	14 Marks

UNIT-II

3.	a)	Explain the following terms: i) Antenna effective height. ii) Antenna aperture. iii) Current distribution on a thin wire antenna.	CO2	8 Marks
	b)	An antenna has a radiation resistance of 72Ω, a loss resistance of 8Ω and a power gain of 12-dB. Determine the antenna efficiency and its directivity.	CO3	6 Marks

(OR)

4.	a)	Define radiation resistance of an antenna. Calculate the radiation resistance of a λ /10wire dipole in free space.	CO4	7 Marks
	b)	Explain the concept of short magnetic dipole.	CO4	7 Marks

UNIT-III

5.	a)	What is the requirement for tapering of arrays? Describe the applications of arrays.	CO5	8 Marks
	b)	Calculate: i) HPBW. ii) Solid angle, if a linear array having 10 isotropic point source with $\lambda/2$ spacing and phase difference δ=900.	CO2	6 Marks

(OR)

6.	a)	What is a broadside array? Explain in detail the structure, radiation pattern and the principle of operation of such an antenna.	CO5	7 Marks
	b)	Write a brief note on binomial arrays.	CO5	7 Marks

UNIT-IV

7.	a)	With a neat sketch, explain the different types of horn antennas. Mention merits and demerits of each type.	CO4	8 Marks
	b)	A Parabolic dish provides a power gain of 50dB at 10GHz, with 70% efficiency. Find out i) HPBW. ii) BWFN.	CO2	6 Marks

(OR)

8.	a)	What is spillover with reference to parabolic reflectors? Explain the remedial measures to reduce spillover.	CO4	7 Marks
	b)	Explain the principle of parabolic reflector antenna and discuss on different types of feeds.	CO5	7 Marks

UNIT-V

9.	a)	Write short notes on source of errors and radiation pattern lobes.	CO6	7 Marks
	b)	Select a suitable coordinate system for antenna measurements and explain about it.	CO5	7 Marks

(OR)

10.	a)	Evaluate the directivity of: i) An isotropic source. ii) Source with bidirectional cosθ power pattern.	CO5	7 Marks
	b)	Explain in detail the terms beam efficiency and directivity. Use relevant expression a diagram.	CO6	7 Marks

DIGITAL SIGNAL PROCESSING

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Check the following systems for time variance causality, linearity and stability. i) $y(n)= x(n) + x(n-1)$; ii) $y(n) = n\,x(n)$.	CO4	7 Marks
	b)	Given the sequence x(n)=(5-n)[u9n0-u9n-5), make a sketch of: i) $y(n) = x(4-n)$; ii) $y(n) = x(n^2 - 2n + 1)$.	CO2	7 Marks
		(OR)		
2.	a)	Discuss the concept of causality and stability with examples.	CO2	7 Marks
	b)	State and prove linearity, time shifting and symmetry properties of DFS.	CO4	7 Marks

UNIT-II

3.	a)	Perform circular convolution of the following sequences. $x_1(n) = \{1,2,3,4\}$ and $x_2(n) = \{1,1,2,1\}$	CO2	7 Marks
	b)	With a neat derivation, explain the procedure to compute IDFT using Radix - 2 FFT.	CO1	7 Marks
		(OR)		
4.	a)	An 8 point sequence is given by $x(n)$ {1,0,1,0,1,0,1,0}. Compute 8 point DFT of $x(n)$ by Radix - 2 DIT FFT.	CO1	7 Marks
	b)	Determine 4 point Discrete time Fourier Transform of a sequence $x(n) = \{1, -1, 2, -2\}$.	CO2	7 Marks

UNIT-III

5.	a)	For the given analog transfer function $H_a(s) = 3/(s+1)(s+4)$, determine H(z) for T=1sec using impulse invariant method.	CO5	7 Marks
	b)	Obtain the direct form I and II form realization for the system $y(n) = -0.1y(n-1) + 0.2y(n-2) + 3x(n) + 3.6x(n-1) + 0.6x(n-2)$	CO2	7 Marks
		(OR)		
6.	a)	Design a digital low pass Butterworth digital IIR filter which is required to meet the following specifications. Pass band attenuation ≤ 2dB, Pass band edge frequency = 4KHz, Stop band attenuation ≥ 40dB, Stop band edge frequency = 8KHz, Sampling rate = 24 KHz by using bilinear transformation.	CO5	7 Marks
	b)	Derive an expression for order of the chebyshev analog proto type filter.	CO2	7 Marks

UNIT-IV

7.	a)	Compare an FIR filter with IIR filter. What conditions are to be satisfied by the impulse response of an FIR filter in order to have a linear phase.	CO2	7 Marks
	b)	Obtain direct form and cascade form realizations for the transfer function of an FIR system given by $H(z) = \left(1 - \frac{1}{4}z^{-1} + \frac{3}{8}z^{-2}\right)\left(1 - \frac{1}{8}z^{-1} - \frac{1}{2}z^{-2}\right)$.	CO3	7 Marks
		(OR)		

8.	a)	Analyse the characteristics of rectangular, Bartlet and Blackman windows with neat sketch.	CO3	7 Marks
	b)	Design a Linear phase band pass FIR filter with cutoff frequencies in the range 0.4π to 0.6π rad/sample by taking 7 samples of hamming window.	CO3	7 Marks

UNIT-V

9.	a)	Explain various types of general purpose registers in TMS 320C6X DSP processor.	CO1	7 Marks
	b)	Explain about various on-chip peripherals provided on DSP processors.	CO1	7 Marks

(OR)

10.	a)	Explain the VLIW architecture with its block diagram. State the advantages and disadvantages of VLIW architecture.	CO1	7 Marks
	b)	Discuss in detail bout pipelining of instruction execution in DSP processors.	CO1	7 Marks

IMAGE PROCESSING

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define the terms sampling and quantization and discuss their role in image quality.	CO1	6 Marks
	b)	Discuss about Hadamard transform.	CO2	8 Marks
		(OR)		
2.	a)	Discuss about the arithmetic and logical operations.	CO1	6 Marks
	b)	Find the discrete cosine transform and its inverse for the following images: i) $\begin{matrix} 3 & 6 \\ 6 & 4 \end{matrix}$ ii) $\begin{matrix} 2 & 4 \\ 6 & 1 \end{matrix}$	CO4	8 Marks

UNIT-II

3.	a)	Prove that the probability density function of a histogram equalized image is a uniform density function.	CO2	7 Marks
	b)	Explain image smoothing using ideal lowpass, butterworth and Gaussian lowpass filters in frequency domain.	CO5	7 Marks
		(OR)		
4.	a)	Discuss about sharpening spatial filters.	CO1	7 Marks
	b)	Discuss about homomorphic filtering.	CO1	7 Marks

UNIT-III

5.	a)	Discuss different noise models used in image restoration.	CO1	7 Marks
	b)	Define image restoration. Explain the operation of inverse filtering.	CO3	7 Marks
		(OR)		
6.	a)	Discuss about restoration in the presence of noise only spatial filtering.	CO1	7 Marks
	b)	Explain the method of Constrained Least Squares Filtering for image restoration.	CO4	7 Marks

UNIT-IV

7.	a)	Explain about general image compression system model with the help of a neat block diagram.	CO1	7 Marks
	b)	Discuss about bit plane coding.	CO2	7 Marks
		(OR)		
8.	a)	Explain dictionary based compression with an example.	CO6	7 Marks
	b)	Describe the subjective and objective fidelity criteria.	CO1	7 Marks

UNIT-V

9.	a)	Explain global thresholding.	CO6	7 Marks
	b)	Describe the HIS colour model.	CO6	7 Marks
		(OR)		
10.	a)	Explain region growing by pixel aggregation for image segmentation.	CO5	7 Marks
	b)	With neat diagram, explain intensity slicing in pseudo color image processing.	CO2	7 Marks

RADAR ENGINEERING

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Draw the block diagram of Radar and explain its working in detail.	CO1	7 Marks
	b)	Calculate the maximum range of Radar system which operates at 3cm wavelength with peak power of 500KW, if the power of minimum detectable signal is 10-12W, the effective aperture of the receiving Antenna is $5m^2$, and Radar cross section of the target is $20m^2$.	CO4	7 Marks
		(OR)		
2.	a)	Discuss the role of Radar in remote sensing, military, aircraft navigation.	CO1	7 Marks
	b)	A radar has repletion frequency of 1000Hz. Estimate range of radar. Assume the presence of noise.	CO4	7 Marks

UNIT-II

3.	a)	Summarize briefly about the Frequency Modulated Continuous Wave radar system with suitable block diagram.	CO2	7 Marks
	b)	Describe briefly about the Doppler frequency shift in radar operation. A continuous wave radar system is working at a frequency of 10 GHz. If the observed Doppler frequency is 1000 Hz, calculate the radial velocity of the target.	CO4	7 Marks
		(OR)		
4.	a)	With neat diagram, explain the working principle of conventional Continuous Wave (CW) radar.	CO1	7 Marks
	b)	Distinguish between Pulse Doppler Radar (PDR) and Moving Target Indicator (MTI) Radar.	CO1	7 Marks

UNIT-III

5.	a)	Illustrate the working principle of conical scan tracking method with neat diagram.	CO4	7 Marks
	b)	Discuss about the working principle of sequential lobbing with neat diagram for the application of target tracking.	CO4	7 Marks
		(OR)		
6.	a)	Compare the advantages and disadvantages of different target trackers.	CO5	7 Marks
	b)	Draw the functional block diagram of the lobe switching tracking radar system and explain its working principle.	CO4	7 Marks

UNIT-IV

7.	a)	Discuss in brief about: i) branch-type duplexer. ii) circulator as duplexer.	CO1	7 Marks
	b)	Explain how radar signals can be detected under noise considerations.	CO5	7 Marks
		(OR)		
8.	a)	Describe the design procedure of matched filter receiver.	CO3	7 Marks
	b)	Calculate the receiver bandwidth if the noise figure of a radar receiver is 1 dB and the available gain is 400. The available noise output power of the receiver is 4 dB. Assume necessary data if required.	CO4	7 Marks

UNIT-V

9.	a)	Explain the operation of VOR system.	CO5	7 Marks
	b)	Explain the operations of LORAN system.	CO5	7 Marks
		(OR)		
10.	a)	Explain the source of errors in VOR system.	CO6	7 Marks
	b)	Explain the operations DECCA systems.	CO5	7 Marks

TELECOMMUNICATION SWITCHING SYSTEMS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain Telephone Communication with the circuit and also explain how to eliminate side tone.	CO1	7 Marks
	b)	Draw and explain Time Division Space Switch.	CO1	7 Marks
		(OR)		
2.	a)	Explain Cross bar switching and blocking configurations.	CO2	7 Marks
	b)	Draw and explain basic time division time switching.	CO1	7 Marks

UNIT-II

3.	a)	Draw and explain cable hierarchy for subscriber loops.	CO1	7 Marks
	b)	Explain about various transmission systems.	CO4	7 Marks
		(OR)		
4.	a)	Draw and explain switching hierarchy and routing techniques.	CO2	7 Marks
	b)	Explain the methods for improving the quality of telecommunication transmission.	CO3	7 Marks

UNIT-III

5.	a)	Compare in channel and Common channel signaling.	CO2	7 Marks
	b)	Explain Telephone Traffic pattern on a working day.	CO1	7 Marks
		(OR)		
6.	a)	Explain why we require wire signaling techniques.	CO3	7 Marks
	b)	Write short notes on Grade of service and blocking probability.	CO1	7 Marks

UNIT-IV

7.	a)	Explain how Data Transmission in PSTNs.	CO3	7 Marks
	b)	Draw and Explain circuit switching network.	CO1	7 Marks
		(OR)		
8.	a)	Write about Expert Systems in ISDN.	CO4	7 Marks
	b)	How the modules are interconnected BISDN and explain?	CO2	7 Marks

UNIT-V

9.	a)	Write about HFC Networks.	CO1	7 Marks
	b)	Explain about synchronous Transport Signals.	CO1	7 Marks
		(OR)		
10.	a)	Write short notes on: i) CM & CMTS. ii) DOCSIS.	CO1	7 Marks
	b)	Explain about Virtual Tributaries.	CO1	7 Marks

DIGITAL CMOS IC DESIGN

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the concept of MOS Transistor Secondary Effects.	CO1	7 Marks
	b)	Illustrate the operation of Pseudo NMOS logic with neat sketch.	CO4	7 Marks
		(OR)		
2.	a)	Articulate the operation of MOS Transistor Characteristic under Static and Dynamic Conditions.	CO1	10 Marks
	b)	Define Technology Scaling operation in MOS Transistor.	CO1	4 Marks

UNIT-II

3.	a)	Illustrate the operation of CMOS inverter with neat sketch.	CO3	6 Marks
	b)	Construct the Stick diagram and Layout of CMOS inverter.	CO3	8 Marks
		(OR)		
4.	a)	Articulate the operation of two-input NAND Gate with the help of CMOS Technology.	CO4	7 Marks
	b)	Write short note on Area capacitance and wire capacitance.	CO4	7 Marks

UNIT-III

5.	a)	Explain about various categories of Memories.	CO1	6 Marks
	b)	Articulate the concept of Flash Memory using NOR flash and NAND flash with neat sketch.	CO1	8 Marks
		(OR)		
6.	a)	Explain the characteristics of Static Random-Access Memory.	CO1	4 Marks
	b)	Articulate the Read and Write operation of SRAM cell with neat Sketch.	CO5	10 Marks

UNIT-IV

7.		Describe the concept Related to Interconnect Parameters.		
		i) Interconnect- Capacitance.	CO2	5 Marks
		ii) Interconnect- Resistance.	CO2	5 Marks
		iii) Interconnect- Inductance.	CO2	4 Marks
		(OR)		
8.		Illustrate the concept of Timing classification of Digital System.		
		i) Synchronous Interconnect.	CO2	7 Marks
		ii) Asynchronous Interconnect.	CO2	7 Marks

UNIT-V

9.		Write Short notes on:		
		i) PLD.	CO6	3 Marks
		ii) CPLD.	CO6	3 Marks
		iii) FPGA.	CO6	4 Marks
		iv) ASIC.	CO6	4 Marks
		(OR)		
10.	a)	Articulate the concept of Economics in VLSI System Design.	CO5	7 Marks
	b)	Illustrate the concept Design Strategies using in VLSI System Design.	CO4	7 Marks

CODE No.: 16BT60408 SVEC-16

INFORMATION THEORY AND CODING
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) Consider a discrete memory less source with source probabilities {0.35, 0.25, 0.20, 0.15, 0.10}. Find the following: CO1 4 Marks
   i) Calculate amount of information gained by observing the source emitting each of these symbols.
   ii) Calculate source entropy.

   b) Consider the following source: CO1 10 Marks
   S = (A, B, C, D, E, F)
   P = (0.10, 0.15, 0.25, 0.35, 0.08, 0.07)
   Apply Shannon-Fanon algorithm to find the code words and also find coding efficiency, redundancy.

(OR)

2. a) Apply the Huffman coding procedure for the following message ensemble: CO1 7 Marks

$$[X] = [\, x_1 \quad x_2 \quad x_3 \quad x_4 \quad x_5 \quad x_6 \quad x_7 \quad x_8 \,]$$

$$[P] = [0.25 \quad 0.125 \quad 0.625 \quad 0.62 \quad 0.625 \quad 0.25 \quad 0.625 \quad 0.125]$$

   Estimate code efficiency and redundancy.

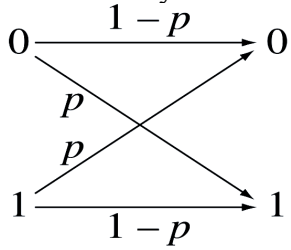
   b) Let 'X' represent the outcome of a single roll of a fair die. Find the entropy of 'X'. CO1 3 Marks

   c) A certain digital frame consists of 15 fields. The first and the last field. Of each frame are same. The remaining 13 fields can be filled by any of the 16 symbols with equal probability. Find the average information conveyed by the frame. Also find the average rate of information, if 100 frames are transmitted every second. CO1 4 Marks

UNIT-II

3. a) Compute Channel capacity of the following channels: CO2 7 Marks
   i) Lossless. ii) Deterministic.
   iii) Noiseless. iv) Binary Symmetric Channel.

   b) Consider a binary symmetric channel as shown in below figure. Estimate the rate of Information transmission over this channel when 'p' value is 0.8. Assume that symbol rate is 2000 symbols/sec. CO2 7 Marks



(OR)

4. A Binary symmetric Channel has the following noise matrix CO2 14 Marks

$$p(X_1) = \frac{2}{3} \text{ and } p(X_2) = \frac{1}{3} \quad p\left(\frac{Y}{X}\right) = \begin{bmatrix} \frac{3}{4} & \frac{1}{4} \\ \frac{1}{4} & \frac{3}{4} \end{bmatrix}$$

Estimate the following:

i) H(X) and H(Y).

ii) H(X,Y).

iii) H(Y/X) and H(X/Y).

iv) I(X,Y).

UNIT-III

5. Consider a (6, 3) linear block code whose generator matrix is given by CO3 14 Marks

$$\begin{bmatrix} 1 & 0 & 0 & 1 & 0 & 1 \\ 0 & 1 & 0 & 1 & 1 & 0 \\ 0 & 0 & 1 & 0 & 1 & 1 \end{bmatrix}$$

i) Find the parity check matrix.

ii) Find the minimum distance of the code.

iii) Draw the encoder and syndrome computation circuit.

(OR)

6. In a Linear Block Code, the syndrome is given by, CO3 14 Marks

$\mathbf{S_1 = r_1 + r_2 + r_3 + r_5}$

$\mathbf{S_2 = r_1 + r_2 + r_4 + r_6}$

$\mathbf{S_3 = r_1 + r_3 + r_4 + r_7}$

i) Find the parity check matrix [H].

ii) Draw the encoder circuit.

iii) Find the code word for all input sequences.

iv) How many errors it can detect and correct.

v) Estimate the syndrome for the received data 1 0 1 1 0 1 1.

UNIT-IV

7. a) Consider a (7, 4) cyclic code with generator polynomial $\boldsymbol{g(x) = 1 + x + x^2}$. Obtain the code Polynomial in a systematic form for the following information sequences: CO4 7 Marks

i) 1011. ii) 1001.

b) Consider a (3, 1, 3) Convolution code with generator polynomials $\mathbf{g_1 = (1\ 1\ 1\ 0)}$, $\mathbf{g_2 = (1\ 0\ 0\ 1)}$ and $\mathbf{g_3 = (1\ 1\ 0\ 1)}$. Do the following: CO4 7 Marks

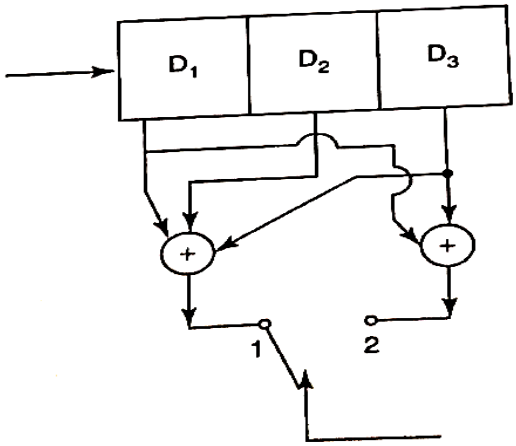
i) Draw its encoder diagram.

ii) Find the encoded sequence for the input (1 0 0 0 1 1 0 1) using time-domain approach

(OR)

8. a) Consider a (7, 4) cyclic code with $g(x) = 1 + x + x^3$. Obtain the syndrome for the received polynomial $r(x) = x^3 + x^5 + x^6$. CO4 7 Marks

b) Consider the convolution encoder as shown in below figure: CO4 7 Marks



Find n, k, m and code rate. Also find the output sequence for the input message sequence (1 1 0 0 1 1) using time domain approach and transform domain approach.

UNIT-V

9. Explain how Coding and Interleaving applied to the compact disc digital audio system. CO5 14 Marks

(OR)

10. Write short note on: CO5 14 Marks
    i) R-S codes.
    ii) Concatenated codes.
    iii) Turbo codes.

Roll No. | | | | | | | | | | |

III B.Tech II Semester (SVEC-16) Regular/Supplementary Examinations August - 2021

LIGHT WAVE COMMUNICATIONS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1.	a)	Explain the law of Optics.	CO1	7 Marks
	b)	A light wave is travelling in a semiconducter medium of refractive index 3.6. It is incident on a different semiconducter medium of refractive index 3.4 and the angle of incidence is 80^o.will this result in TIR.	CO4	7 Marks
		(OR)		
2.	a)	Explain the fundamental block diagram for fiber optics communication.	CO1	7 Marks
	b)	A light ray is incident from medium -1 to medium -2. if the refractive indices of mediums are 1.8 and 1.5 respectively, then determine the angle of refraction for an angle of incidence of 40^o.	CO4	7 Marks

UNIT-II

3.	a)	Explain core and cladding losses.	CO4	7 Marks
	b)	Consider two silica fibers that are doped with 6% mole fractions of Geo2. Compute the UV absorption loss at λ=1.3μm.	CO4	7 Marks
		(OR)		
4.	a)	Write a short note on Intramodel dispersion.	CO4	7 Marks
	b)	Consider two silica fibers that are doped with 20% mole fractions of Geo2. Compute the UV absorption loss at λ=0.7μm.	CO4	7 Marks

UNIT-III

5.		Discuss the operation of edge-emitting double-hetero junction LED, with neat schematic diagram.	CO3	14 Marks
		(OR)		
6.		Discuss about the signal frequency, single mode injection lasers with fabry- perot structure and explain the methods of controlling longitudinal modes of ILDs.	CO3	14 Marks

UNIT-IV

7.	a)	Explain the concept of fiber joints.	CO1	7 Marks
	b)	A Step index fiber has a core refractive index of 1.5 and core diameter of 50μm. The fiber is jointed with a lateral misalignment between the core axes of 5μm. Estimate the insertion loss at the joint due to the lateral misalignment assuming a uniform distribution of power between all guided modes, when there is a small air gap at the joint.	CO4	7 Marks
		(OR)		
8.	a)	Explain the different fiber connectors in brief.	CO1	7 Marks
	b)	Two single mode fibers with mode -field diameters of 9.2μm and 8.4μm are to be connected together. Assuming no extrinsic losses, determine the loss at the connection due to the mode-field diameter mismatch.	CO4	7 Marks

UNIT-V

9.		Write short notes on optical networks. i) network terminology. ii) network categories. iii) network layers. iv) network topologies.	CO1	14 Marks
		(OR)		
10.		Explain the principle of WDM networks.	CO5	14 Marks

SOFTWARE TESTING
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What are goals of Software Testing? Explain.	CO1	6 Marks
	b)	Why Effective testing is hard? Explain with example.	CO1	8 Marks
		(OR)		
2.	a)	With a neat diagram, explain about all the elements in Software Testing model.	CO1	8 Marks
	b)	What is the difference between : i) Verification and Validation; ii) Static and Dynamic testing.	CO2	6 Marks

UNIT-II

3.	a)	What are the challenges in white box testing? Explain about Basis Path testing with suitable example.	CO2	6 Marks
	b)	How do you calculate the cyclomatic complexity number of the program having many connected components? Explain with an example.	CO2	8 Marks
		(OR)		
4.	a)	Design and develop Data Flow testing with an example.	CO3	8 Marks
	b)	What is the difference between primary and secondary mutants? Explain.	CO2	6 Marks

UNIT-III

5.	a)	Discuss in detail about various techniques that are to be used to generate test scenarios for effective black box testing.	CO3	6 Marks
	b)	Give examples of: i) Decision-table Testing. ii) Cause-Effect Graphic-based Testing.	CO3	8 Marks
		(OR)		
6.	a)	Design and explain in detail about Equivalence Class testing.	CO3	8 Marks
	b)	What are the software implementation issues in state testing? Explain.	CO4	6 Marks

UNIT-IV

7.	a)	Briefly write the steps of test planning and test process for finding factorial of a number.	CO4	8 Marks
	b)	Describe about test case design for validating a user.	CO4	6 Marks
		(OR)		
8.	a)	Write short notes on Size Metrics.	CO5	8 Marks
	b)	Discuss in detail about classification of Software metrics.	CO5	6 Marks

UNIT-V

9.	a)	Why regression testing produces quality software? Explain.	CO3	8 Marks
	b)	Explain in detail the need for Automated Testing tools.	CO5	6 Marks
		(OR)		
10.	a)	Write in detail about the guidelines for Automated testing.	CO5	8 Marks
	b)	Give an overview of some available commercial testing tools.	CO5	6 Marks

SOFT COMPUTING
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Explain Evolution of Neural Networks.	CO1	7 Marks
	b)	Explain Hebb Network.	CO2	7 Marks
		(OR)		
2.	a)	Explain the classification of Hybrid Systems.	CO2	7 Marks
	b)	Write about the applications of Soft Computing.	CO2	7 Marks
		UNIT-II		
3.	a)	Explain the Perceptron testing algorithm for Single and Multiple Output Classes.	CO2	10 Marks
	b)	What is supervised learning?	CO1	4 Marks
		(OR)		
4.	a)	Explain the testing algorithm for back-Propagation Networks.	CO1	7 Marks
	b)	Write about perceptron learning rule.	CO3	7 Marks
		UNIT-III		
5.		What is self-organizing map and discuss the algorithm and features of Kohonen's map?	CO2	14 Marks
		(OR)		
6.		Construct and test the Hamming network to cluster four vectors. Given the example Vectors are $e(1)=[1\ \ -1\ \ -1\ \ -1]$; $e[2]=[-1\ \ -1\ \ -1\ \ 1]$ The bipolar input vectors are $X_1=[1\ \ -1\ \ 1\ \ -1]$ $X_2=[-1\ \ -1\ \ 1\ \ 1]$; $X_3=[-1\ \ -1\ \ -1\ \ +1]$; $X_4=[1\ \ 1\ \ -1\ \ -1]$.	CO4	14 Marks
		UNIT-IV		
7.	a)	With the help of examples, explain various fuzzy prepositions.	CO5	7 Marks
	b)	Show that the following fuzzy sets satisfy DeMorgan's law: i) $\mu A(x) = 1 / 1+5X$ ii) $\mu B(x) = (1 / 1+5x)^{1/2}$	CO4	7 Marks
		(OR)		
8.	a)	Discuss in detail the operations and properties of fuzzy sets.	CO3	7 Marks
	b)	Explain the different methods for fuzzy approximate reasoning.	CO3	7 Marks
		UNIT-V		
9.	a)	Explain in detail about various operators involved in genetic algorithm.	CO3	7 Marks
	b)	Explain the role of fitness function in Genetic algorithms.	CO6	7 Marks
		(OR)		
10.		Explain the genetic operators and fitness functions in respect of evolutionary computing.	CO6	14 Marks

WIRELESS NETWORKS
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain in detail the methods of data services get integrated with Voice Oriented Networks.	CO2	10 Marks
	b)	Explain in detail the architecture of the 2G GSM system.	CO1	4 Marks
		(OR)		
2.	a)	Explain in detail the forward and reverse channels in W-CDMA and CDMA 2000.	CO2	10 Marks
	b)	Explain about the handoff and power control mechanisms.	CO2	4 Marks

UNIT-II

3.	a)	What is location management? What are the three components of location management?	CO3	8 Marks
	b)	Explain in detail about wireless network topologies.	CO2	6 Marks
		(OR)		
4.	a)	Differentiate ADHOC network and infrastructures network topologies.	CO2	8 Marks
	b)	Explain in brief about mobility management.	CO5	6 Marks

UNIT-III

5.	a)	Why IEEE 802.11 standard has two divisions in the MAC layer? Explain in detail about the MAC sub layer.	CO2	8 Marks
	b)	Explain in detail about HAN Technologies.	CO5	6 Marks
		(OR)		
6.	a)	Explain in detail about 802.11b and 802.11a.	CO2	10 Marks
	b)	Write short notes on FHSS, DFIR.	CO3	4 Marks

UNIT-IV

7.	a)	Describe the different logical channels used in the GSM network.	CO5	7 Marks
	b)	Explain the Waveform Encoding for the IS-95 reverse channel.	CO5	7 Marks
		(OR)		
8.	a)	Compare GSM and CDMA.	CO1	7 Marks
	b)	Describe the different interface connection between MS and DTS in a GSM network.	CO5	7 Marks

UNIT-V

9.	a)	Explain in detail about HIPERLAN and BLUETOOTH.	CO6	10 Marks
	b)	Explain the Physical and MAC layer details of Wimax Network.	CO3	4 Marks
		(OR)		
10.	a)	Explain in detail about the IEEE 802.15 WPAN standards.	CO5	10 Marks
	b)	Write short notes of PICONETS and SCATTERNETS.	CO5	4 Marks

CODE No.: 16BT60504 SVEC-16

PRINCIPLES OF PROGRAMMING LANGUAGES
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What are the important factors that influence the basic design of programming language?	CO1	7 Marks
	b)	Discuss language evaluation criteria and the characteristics that affect them.	CO1	7 Marks
		(OR)		
2.	a)	Explain various user-defined ordinal types with examples.	CO1	7 Marks
	b)	What is meant by type checking? Differentiate between static type checking and dynamic type checking and give their relative advantages.	CO1	7 Marks

UNIT-II

3.	a)	Distinguish between Counter-Controlled Loops and Logically Controlled Loops.	CO2	7 Marks
	b)	Explain Short-Circuit Evaluation with examples.	CO1	7 Marks
		(OR)		
4.	a)	How does operand evaluation order interact with function side effects?	CO2	7 Marks
	b)	Compare the Boolean and Relational Expressions along with examples.	CO2	7 Marks

UNIT-III

5.	a)	What is meant by subprogram level concurrency? Explain.	CO1	7 Marks
	b)	Explain about Co-Routines with an example.	CO3	7 Marks
		(OR)		
6.	a)	Write the Design Issues for Abstract Data Types and compare the Encapsulation and Information Hiding.	CO1	7 Marks
	b)	Discuss the applications of indirect subprogram calls.	CO4	7 Marks

UNIT-IV

7.	a)	What are the primary problems with using semaphores to provide Synchronization?	CO2	7 Marks
	b)	Discuss the design issues of Exception Handling.	CO1	7 Marks
		(OR)		
8.	a)	Compare and contrast the cooperation synchronization and competition synchronization in message passing.	CO2	7 Marks
	b)	Describe the three possible levels of concurrency in programs.	CO3	7 Marks

UNIT-V

9.	a)	Discuss Terms and Goal statements in Prolog with examples.	CO5	7 Marks
	b)	Compare the importance of logic programming languages over functional programming languages.	CO5	7 Marks
		(OR)		
10.	a)	Explain about LISP functional programming language	CO5	7 Marks
	b)	Examine the different types of propositions present in logic programming.	CO5	7 Marks

ARM PROCESSORS AND PIC MICROCONTROLLERS
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Compare Microcontrollers and general purpose Microprocessor.	CO1	7 Marks

	b)	State the contents of the file register RAM locations 12H and WREG after the following program:
		MOVLW 0
		MOVWF 12H
		MOVLW 22H
		ADDWF 12H, W
		ADDWF 12H, W
		ADDWF 12H, W
		ADDWF 12H, W.
			CO2	7 Marks

(OR)

2.	a)	Explain in detail about PIC status register.	CO1	6 Marks
	b)	Write a program to i) place each of your 5-digit ID numbers into a RAM location starting at 0. ii) add each digit to WREG and store the sum in RAM location 6. iii) use the program listing and show the ROM memory addresses and their contents.	CO2	8 Marks

UNIT-II

3.	a)	Explain in detail about Timer 0 and 1.	CO1	8 Marks
	b)	Assuming that XTAL =10 MHz, write a program to generate a square wave of 50 Hz frequency on pin PORTB.7. Use Timer 0, 16 bit mode with prescaler = 128	CO4	6 Marks

(OR)

4.	a)	Explain with example programming the PIC18 to receive the data serially.	CO2	7 Marks
	b)	Describe the different DB9 pins used for handshaking in RS232.	CO1	7 Marks

UNIT-III

5.		Design an interfacing circuit and write a program to send characters (command/data) to the LCD without checking the busy flag and the delay between the issuing character is 5-10 ms(simple delay).	CO3	14 Marks

(OR)

6.	a)	Write a program to rotate the stepper motor by an angle of 180^{o}. Assume step size of 1.8^{o}.	CO1	8 Marks
	b)	Explain the steps in programming the A/D converter using polling.	CO6	6 Marks

UNIT-IV

7.	a)	Mention the CORTEX-M3 Processor applications.	CO1	7 Marks
	b)	With a neat sketch, explain the basic architecture of ARM CORTEX M3.	CO1	7 Marks

(OR)

8.	a)	List the different stages of a pipeline of an ARM CORTEX M3 processor and explain them.	CO3	8 Marks
	b)	List the registers present in different exception modes of ARM CORTEX M3 and explain the functionality of them.	CO1	6 Marks

UNIT-V

9.	a)	Compare ARM Mode and Thumb Mode with example.	CO1	7 Marks
	b)	Explain Data transfer instructions, Pseudo instructions and Data processing instructions.	CO1	7 Marks

(OR)

10.	a)	Write an ALP to perform multiplication of two numbers in arm mode and then switch to thumb mode to perform addition.	CO1	7 Marks
	b)	Explain call, unconditional and conditional branch instructions with example.	CO1	7 Marks

PROCESS CONTROL INSTRUMENTATION
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Derive the transfer function of the tank interacting liquid system.	CO2	7 Marks
	b)	Give the characteristics of thermal process and derive the transfer function for single time constant type thermal process.	CO2	7 Marks
		(OR)		
2.	a)	Explain the elements of process control with a neat diagram.	CO1	7 Marks
	b)	Explain Servo and Regulatory operation in process control.	CO1	7 Marks

UNIT-II

3.	a)	Explain On-Off controller characteristics with suitable example.	CO1	7 Marks
	b)	Discuss the working of electronic PID controller and mention the methods for adjusting P, I and D settings.	CO1	7 Marks
		(OR)		
4.	a)	Explain in detail about Pneumatic PID controller with suitable example.	CO1	7 Marks
	b)	Compare the characteristics of P, PI and PID control actions.	CO3	7 Marks

UNIT-III

5.	a)	Describe the points to be considered in selecting controller modes. Mention the criteria for good control.	CO1	7 Marks
	b)	Compare and contrast the features of Ziegler-Nichol's and Cohen-Coon methods of tuning.	CO1	7 Marks
		(OR)		
6.	a)	Explain the frequency response method in controller tuning.	CO1	7 Marks
	b)	Time integral criteria lead to unique solution to determine the controller parameters. Justify.	CO3	7 Marks

UNIT-IV

7.	a)	What is an actuator? List the types of actuators.	CO1	7 Marks
	b)	Identify suitable control valve with one part opening and one seat plug. Explain it with a neat diagram.	CO6	7 Marks
		(OR)		
8.	a)	Explain clearly about hydraulic actuator.	CO1	7 Marks
	b)	Explain the operation of rotating shaft control valve with neat diagrams	CO1	7 Marks

UNIT-V

9.	a)	Write about the analysis of cascade control for set point changes and load changes.	CO6	7 Marks
	b)	Explain the role of load expression in implementing feed forward transfer function.	CO6	7 Marks
		(OR)		
10.	a)	Discuss the working of distillation column with suitable application.	CO1	7 Marks
	b)	Explain clearly about over-ride control with neat sketch.	CO1	7 Marks

OPTO-ELECTRONICS AND LASER INSTRUMENTATION
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Illustrate the significance of total internal reflection and numerical aperture of an optical fiber.	CO1	7 Marks
	b)	Draw the block diagram of a typical fiber optic communication system and illustrate the operation.	CO1	7 Marks
		(OR)		
2.	a)	Explain various splicing techniques with neat diagrams.	CO1	7 Marks
	b)	Demonstrate about Pulse dispersion in step index fibers with the necessary equations and diagrams.	CO1	7 Marks

UNIT-II

3.	a)	Describe the fiber optic instrumentation system for the measurement of strain.	CO3	7 Marks
	b)	Discuss the operation of fiber optic gyroscope with the help of neat sketches.	CO3	7 Marks
		(OR)		
4.	a)	Write short notes on fiber grating sensors and acoustic sensors.	CO3	7 Marks
	b)	List any three applications of optical fibers for instrumentation and explain them with the necessary figures.	CO3	7 Marks

UNIT-III

5.	a)	Illustrate the principle of Q switching and mode locking.	CO1	7 Marks
	b)	Write brief notes on semiconductor lasers and gas lasers.	CO1	7 Marks
		(OR)		
6.	a)	Discuss the methods used for the measurement of velocity and voltage.	CO3	7 Marks
	b)	Describe the structure and operation of glass fiber laser.	CO1	7 Marks

UNIT-IV

7.	a)	With neat sketches, explain the operation of Laser Doppler velocity meter.	CO5	7 Marks
	b)	Mention the significance of LASERS in medicine fields.	CO1	7 Marks
		(OR)		
8.	a)	Illustrate the principle of lasers in melting and trimming of material.	CO5	7 Marks
	b)	Write short notes on laser instruments for plastic surgery and endoscopy.	CO6	7 Marks

UNIT-V

9.	a)	Discuss the phenomenon of electro-optic effect with neat sketches.	CO2	7 Marks
	b)	Write short notes on acoustical holography and 3-D Cinematography.	CO1	7 Marks
		(OR)		
10.	a)	Describe the method of character recognition by holography.	CO1	7 Marks
	b)	Differentiate between magneto-optic and acousto-optic modulators.	CO5	7 Marks

AIRCRAFT INSTRUMENTATION
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define pitch angle. Differentiate between pitch angle and angle of attack.	CO2	7 Marks
	b)	Explain attitude direction indicator.	CO1	7 Marks
		(OR)		
2.	a)	Elaborate on the forces and moments experienced by an aircraft.	CO1	7 Marks
	b)	List the secondary control surfaces and explain their functionalities.	CO1	7 Marks

UNIT-II

3.		Elaborate on the air data instruments.	CO2	14 Marks
		(OR)		
4.		With neat diagram, explain pneumatic air speed indicator.	CO3	14 Marks

UNIT-III

5.		Elaborate on the conventional mechanical gyroscopes.	CO3	14 Marks
		(OR)		
6.		Analyze the working principle of fiber optic gyros with a diagram.	CO3	14 Marks

UNIT-IV

7.		Explain the principle of servo type RPM Indicator with neat sketch.	CO3	14 Marks
		(OR)		
8.	a)	Give various methods of measuring the engine's shaft speed.	CO5	10 Marks
	b)	If speed of the engine is 1420 RPM and torque is 3000 Ft-lbs, then find the horse power of the engine.	CO4	4 Marks

UNIT-V

9.		With suitable diagrams, explain black box operation.	CO2	14 Marks
		(OR)		
10.		Elaborate on fuel quantity indicators.	CO1	14 Marks

CODE No.: 16BT61041 SVEC-16

Roll No. | | | | | | | | | | |

III B.Tech II Semester (SVEC-16) Regular/Supplementary Examinations August - 2021

PROGRAMMABLE LOGIC CONTROLLERS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	List the benefits offer by PLC. Explain at least four in brief.	CO6	7 Marks
	b)	Explain difference between fixed I/O's and modular I/O's.	CO3	7 Marks
		(OR)		
2.	a)	Draw a block diagram of a PLC showing the main functional items and how busses link them, explaining the functions of each block.	CO1	7 Marks
	b)	Compare ladder logic diagram and relay ladder diagram with examples.	CO2	7 Marks

UNIT-II

3.	a)	Develop ladder logic diagram for each of the following Boolean expressions using AND, OR and NOT gates: i) $Y = ABC + D$; ii) $Y = AB + CD$; iii) $Y = (A + B)(\overline{C} + D)$.	CO2	7 Marks
	b)	Describe in detail about output group register scheme.	CO3	7 Marks
		(OR)		
4.	a)	Explain ON delay timer instruction of PLC with timing diagram and suitable ladder logic example.	CO1	7 Marks
	b)	In an automatic car parking system entry and exit of a car is detected by sensors. A PLC will keep a record of number of cars enter and exit. Maximum 50 numbers of cars in the parking area. An entry gate (controlled by electric motor) will be kept open only when number of cars in the parking area is less than 50. Design a ladder diagram to control the operation of the entry gate of the car parking system.	CO6	7 Marks

UNIT-III

5.	a)	Describe the operation of skip, jump function in PLC.	CO5	7 Marks
	b)	Explain about Sweep functions and their application.	CO5	7 Marks
		(OR)		
6.	a)	Describe the number comparison functions.	CO4	7 Marks
	b)	With neat ladder diagram an instruction list, show how more than one master control relay can be used in a program.	CO4	7 Marks

UNIT-IV

7.	a)	Explain with ladder diagram and the sequence signals of a 4-bit shift register.	CO3	7 Marks
	b)	Explain PLC sequencer functions in detail.	CO4	7 Marks
		(OR)		
8.	a)	Describe controlling of three axis robots with PLC.	CO6	7 Marks
	b)	Explain the ONE shot (ONS) function with an application.	CO3	7 Marks

UNIT-V

9.	a)	Explain the PID control using PLC.	CO4	7 Marks
	b)	Explain how the monitor function is made operational and what data and functions may be observed.	CO5	7 Marks
		(OR)		
10.	a)	Apply the analog IN PLC function operation to convert into discrete O/P.	CO5	7 Marks
	b)	Explain the operation of networking of PLCS.	CO4	7 Marks

CLOUD COMPUTNG

[Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define Virtualization. Explain its characteristics and benefits.	CO1	7 Marks
	b)	Explain the various features of VMware technologies.	CO2	7 Marks
		(OR)		
2.	a)	List and explain Pros and Cons of virtualization.	CO1	7 Marks
	b)	Discuss various features of Hyper-V and Zen technologies.	CO2	7 Marks

UNIT-II

3.	a)	Explain about origins and characteristics of cloud computing.	CO3	7 Marks
	b)	Compare various cloud delivery models.	CO1	7 Marks
		(OR)		
4.	a)	Analyze various roles and boundaries in cloud.	CO4	7 Marks
	b)	Differentiate horizontal and vertical scaling.	CO3	7 Marks

UNIT-III

5.		Outline various Cloud-Enabling Technologies i) Data Center Technology. ii) Virtualization Technology. iii) Web Technology. iv) Multitenant Technology.	CO1	14 Marks
		(OR)		
6.		Explain the components in workload distribution and pooling architecture.	CO1	14 Marks

UNIT-IV

7.	a)	Discuss various security services in cloud.	CO1	7 Marks
	b)	Analyze the need for disaster management in cloud.	CO2	7 Marks
		(OR)		
8.		Explain how security is provided to network and host in cloud.	CO2	14 Marks

UNIT-V

9.	a)	Distinguish between SaaS and IaaS.	CO2	7 Marks
	b)	What is platform as a service? Write in detail about Google App engine.	CO5	7 Marks
		(OR)		
10.		Explain in detail about Amazon EC2 and NetFlix with a neat diagram.	CO6	14 Marks

AD-HOC AND WIRELESS SENSOR NETWORKS
[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Draw the schematic diagram of the Ad-hoc wireless Internet and discuss the major issues.	CO1	9 Marks
	b)	Why power management is important for Ad-hoc wireless networks?	CO3	5 Marks
		(OR)		
2.	a)	Describe the design goals of a MAC protocol for Ad-hoc wireless networks.	CO1	6 Marks
	b)	How busy tone multiple access protocol overcomes the hidden terminal problem?	CO2	8 Marks

UNIT-II

3.	a)	Explain about the following challenges faced in designing a routing protocol for Ad-hoc wireless networks. i) Hidden and Exposed terminal problems. ii) Mobility. iii) Bandwidth Constraint. iv) Error Prone shared broadcast radio channel.	CO2	6 Marks
	b)	Explain the working of AODV with suitable example.	CO5	8 Marks
		(OR)		
4.	a)	Differentiate source initiated and receiver initiated multicast protocols.	CO1	7 Marks
	b)	Describe the working of bandwidth efficient multicast routing protocol initialization phase and route optimization phase.	CO2	7 Marks

UNIT-III

5.	a)	Illustrate the working of TCP congestion window.	CO2	6 Marks
	b)	Discuss the issues to be considered while designing a transport layer protocol for Ad-hoc wireless networks.	CO2	8 Marks
		(OR)		
6.	a)	Explain the challenges faced when implementing security in Ad-hoc wireless networks.	CO4	6 Marks
	b)	Describe various network layer and transport layer attacks.	CO2	8 Marks

UNIT-IV

7.	a)	What is the need for energy management in Ad-hoc wireless networks?	CO3	5 Marks
	b)	Write about various energy conservation schemes for Ad-hoc networks.	CO3	9 Marks
		(OR)		
8.		Explain in detail about system power management schemes.	CO4	14 Marks

UNIT-V

9.		Explain the wireless sensor network architecture and applications.	CO5	14 Marks
		(OR)		
10.	a)	Compare rumor routing and sequential assignment routing protocols.	CO5	7 Marks
	b)	How location discovery is done in wireless sensor networks.	CO1	7 Marks

CYBER SECURITY AND LAWS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What do you mean by information security? Explain.	CO1	7 Marks
	b)	Discuss different issues and challenges in cyber crimes.	CO1	7 Marks
		(OR)		
2.	a)	Categorize the cyber laws under ITA2000.	CO6	7 Marks
	b)	Why would social engineering be used by a cyber stalker?	CO4	7 Marks

UNIT-II

3.	a)	Briefly explain various types of viruses.	CO1	7 Marks
	b)	What is DDoS attack? Explain.	CO1	7 Marks
		(OR)		
4.		Briefly explain Phishing and Identity theft.	CO1	14 Marks

UNIT-III

5.	a)	What is the need of cyber laws?	CO5	4 Marks
	b)	Explain the impact of Digital Signatures in ITA 2000.	CO2	10 Marks
		(OR)		
6.	a)	State the consequences of not addressing the weakness in IT act.	CO2	10 Marks
	b)	Explain the various offences and punishments on cyber crime.	CO6	4 Marks

UNIT-IV

7.	a)	How social media marketing will impact organization security?	CO4	7 Marks
	b)	Explain Organizational guidelines for internet usage.	CO6	7 Marks
		(OR)		
8.	a)	How peoples privacy is protected in organizations?	CO4	7 Marks
	b)	How cloud computing will affect the security and privacy of an organization?	CO3	7 Marks

UNIT-V

9.	a)	Describe in detail about Intellectual property in the cyber space.	CO3	7 Marks
	b)	Briefly write about the Information warfare.	CO3	7 Marks
		(OR)		
10.	a)	Illustrate the ethical dimension of cyber crimes.	CO2	7 Marks
	b)	Briefly write about the purchasing goods and services scam.	CO2	7 Marks

DATA WAREHOUSING AND DATA MINING
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What is a concept hierarchy? Briefly describe the OLAP operations in the multidimensional data model.	CO3	7 Marks
	b)	Draw a multi tiered data warehouse architecture and explain.	CO3	7 Marks
		(OR)		
2.	a)	Explain the star schema of data warehouse model with the help of diagram.	CO2	7 Marks
	b)	Discuss about the operations roll-up, drill down, slice and pivot in the design of data warehouse.	CO1	7 Marks

UNIT-II

3.	a)	What are various methods for data reduction? Explain with examples.	CO1	7 Marks
	b)	Discuss the challenges that motivate the development of data mining.	CO1	7 Marks
		(OR)		
4.	a)	What is data integration? Discuss the issues to be considered for data integration.	CO2	7 Marks
	b)	Why do we need to preprocess data? What are the different forms of pre-processing?	CO2	7 Marks

UNIT-III

5.	a)	What is meant by frequent item set? Write the Apriori algorithm for frequent item set generation. Explain with example.	CO2	7 Marks
	b)	Discuss Bayesian classification method with example.	CO3	7 Marks
		(OR)		
6.	a)	With an example, explain the classification by decision tree induction.	CO4	7 Marks
	b)	What is association rule mining? Briefly describe the criteria for classifying association rules.	CO4	7 Marks

UNIT-IV

7.	a)	Explain k-means algorithm with an example. Describe the pros and cons of k-means in comparison with the k-medoids algorithm.	CO4	8 Marks
	b)	Describe how categorization of major clustering methods is being done.	CO3	6 Marks
		(OR)		
8.	a)	Explain DBSCAN clustering algorithm in detail.	CO6	7 Marks
	b)	Discuss in detail about hierarchical methods of clustering.	CO5	7 Marks

UNIT-V

9.	a)	Explain web content mining and how it is used for discovering useful information from the web.	CO6	7 Marks
	b)	Describe sequential mining technique with an example.	CO2	7 Marks
		(OR)		
10.	a)	Describe various trends in data mining.	CO2	6 Marks
	b)	What is multimedia data mining? How similarity search can be performed on multimedia data?	CO6	8 Marks

NETWORK SECURITY
[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Explain Five-Step Program for a successful security strategy with figure.	CO1	7 Marks
	b)	Explain why electronic attacks on information systems are easier to make than attacks on paper information systems.	CO1	7 Marks
		(OR)		
2.	a)	Describe a case study of Business Processes ***vs.*** Business Software.	CO1	5 Marks
	b)	Illustrate IP spoofing with relevant figures.	CO1	9 Marks
		UNIT-II		
3.	a)	Why does a packet filtering firewall maintain the state of connections?	CO1	7 Marks
	b)	Examine the differences between VPN types.	CO2	7 Marks
		(OR)		
4.	a)	Explain how to develop firewall configuration.	CO1	7 Marks
	b)	What are the requirements are necessary to set up VPN? What are the benefits and concerns of using site VPNs?	CO2	7 Marks
		UNIT-III		
5.	a)	Illustrate simplified model of symmetric encryption with relevant figure along with principles.	CO2	7 Marks
	b)	Explain Cipher block modes of operation in detail.	CO2	7 Marks
		(OR)		
6.	a)	Illustrate AES encryption and Decryption with figure.	CO3	7 Marks
	b)	Describe RC4 algorithm.	CO3	7 Marks
		UNIT-IV		
7.	a)	Show comparison of SHA parameters and Describe Message digest generation using SHA-512.	CO4	7 Marks
	b)	Explain digital signature with example.	CO4	7 Marks
		(OR)		
8.	a)	Illustrate RSA Public-Key encryption algorithm with example.	CO3	7 Marks
	b)	Clarify Message authentication codes in detail.	CO4	7 Marks
		UNIT-V		
9.	a)	Analyse and describe profiles of behavior of intruders and authorized users.	CO5	7 Marks
	b)	List and describe various types of viruses.	CO5	7 Marks
		(OR)		
10.	a)	Illustrate UNIX Password scheme with figures.	CO6	7 Marks
	b)	What are worms? Explain with examples.	CO5	7 Marks

HUMAN COMPUTER INTERACTION
[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Analyze the history of screen design.	CO2	7 Marks
	b)	Discuss the characteristics of graphical user interface.	CO1	7 Marks
		(OR)		
2.	a)	What is direct and indirect manipulation? Differentiate both.	CO1	7 Marks
	b)	Discuss in detail the popularity of web user interface.	CO3	7 Marks

UNIT-II

3.	a)	Explain the Human considerations in Design.	CO2	10 Marks
	b)	Write short note on human interaction speeds.	CO2	4 Marks
		(OR)		
4.		Discuss about users knowledge and experience in the design of business system.	CO1	14 Marks

UNIT-III

5.	a)	Discuss about organizing and ordering of screen elements.	CO5	7 Marks
	b)	Explain any four qualities which provide visually pleasing composition.	CO6	7 Marks
		(OR)		
6.	a)	Explain various guidelines for presenting information on screen.	CO4	7 Marks
	b)	Write about technological considerations in interface design.	CO2	7 Marks

UNIT-IV

7.	a)	Discuss any five window operations.	CO1	7 Marks
	b)	Explain the guidelines for selecting proper screen based controls.	CO5	7 Marks
		(OR)		
8.	a)	Explain in detail text and messages.	CO1	7 Marks
	b)	Illustrate the guidelines for creating images.	CO5	7 Marks

UNIT-V

9.		Explain various features of interface building tools.	CO5	14 Marks
		(OR)		
10.	a)	What is multimedia? Discuss in detail about multimedia.	CO1	7 Marks
	b)	Write short note on pointing devices.	CO6	7 Marks

MOBILE APPLICATION DEVELOPMENT
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Describe and discuss the base Android OS Features.	CO1	7 Marks
	b)	Explain in detail Android OS Architecture five sections with neat sketch.	CO2	7 Marks
		(OR)		
2.	a)	Explain different Mobile Application users.	CO1	7 Marks
	b)	Write the Hello World first Android application with detailed steps.	CO4	7 Marks
		UNIT-II		
3.	a)	Define Layoutd Discuss different layouts are available in Android.	CO2	7 Marks
	b)	How to display activities as dialog windows explain with one example?	CO1	7 Marks
		(OR)		
4.	a)	What is Intent? Discuss how to linking activities using Intent.	CO1	7 Marks
	b)	Explain how to managing changes to a screen orientation.	CO2	7 Marks
		UNIT-III		
5.	a)	What is a List View? Explain how to use List View in long lists with an example.	CO4	7 Marks
	b)	Write an Android App to display the Date & Time by using Picker View.	CO3	7 Marks
		(OR)		
6.	a)	What is Menu item? Discuss how to create Menu item with your Android App.	CO2	7 Marks
	b)	Create an Android App Database connection steps with suitable example.	CO4	7 Marks
		UNIT-IV		
7.	a)	Explain how to send email messages from your Android App.	CO6	7 Marks
	b)	Develop an Android App how to display and switching another Google Map.	CO6	7 Marks
		(OR)		
8.	a)	What is web service? How to consume the web service in Android OS?	CO3	7 Marks
	b)	Discuss the different ways in which you can send SMS message in your Android App.	CO1	7 Marks
		UNIT-V		
9.	a)	Explain in detail how to establishing communication between a service and an activity.	CO1	7 Marks
	b)	Briefly discuss how to binding activities to services in your Android App.	CO3	7 Marks
		(OR)		
10.	a)	Discuss how to building the Derby App in your iOS.	CO4	7 Marks
	b)	Describe and discuss the different iOS tools with suitable examples.	CO5	7 Marks

MOBILE COMPUTING

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Name the main elements of the GSM system architecture and describe their functions.	CO1	7 Marks
	b)	List the peak data transfer rates for LTE? Explain its functioning.	CO5	7 Marks
		(OR)		
2.	a)	Discuss the Applications and limitations of Mobile computing.	CO1	7 Marks
	b)	Explain security services offered by GSM with relevant Algorithms.	CO1	7 Marks

UNIT-II

3.	a)	Compare IEEE 802.11 and Bluetooth with regard to their ad-hoc capabilities.	CO2	7 Marks
	b)	Perceive the problem of hidden and exposed terminals. Determine what happens in the case of such terminals if Aloha, slotted Aloha, reservation Aloha, or MACA is used.	CO4	7 Marks
		(OR)		
4.	a)	Elaborate various protocols used to provide Bluetooth security.	CO4	7 Marks
	b)	Differentiate Packet reservation multiple access with Demand assigned multiple access methods.	CO2	7 Marks

UNIT-III

5.	a)	List advantages of IPv6 offer for mobility. Identify the additional messages for optimized Mobile IP protocol.	CO4	7 Marks
	b)	Examine the reason why congestion occurs in network. Analyze how does TCP detect and handle congestion.	CO2	7 Marks
		(OR)		
6.	a)	How and why does I-TCP isolate problems on the wireless link? What are the main drawbacks of this solution?	CO1	7 Marks
	b)	Explain the working of Mobile IP with the help of neat diagram.	CO4	7 Marks

UNIT-IV

7.	a)	Explain the concepts of Cache Invalidation mechanisms and what is importance of data cache maintenance and web cache maintenance.	CO1	4 Marks
	b)	Compare and contrast Push Data delivery and Pull Data delivery Mechanisms.	CO2	10 Marks
		(OR)		
8.	a)	Compare database hoarding and data caching. Describe Database hoarding techniques.	CO2	9 Marks
	b)	Which type of indexing is suitable for broad casting data through wireless Channel, why?	CO2	5 Marks

UNIT-V

9.	a)	Why does WAP define its own security layer and does not rely on the security provided by the mobile phone network?	CO1	5 Marks
	b)	Sketch the WAP Architecture. Explain its layers and components briefly.	CO1	9 Marks
		(OR)		
10.	a)	Why doesn't WSP/B put responses into the same order as the requests? Analyze the requests for different items on a web page.	CO2	7 Marks
	b)	Elaborate on how to classify Wireless transaction protocol based on Services provided?	CO4	7 Marks

CODE No.: 16BT71205 SVEC-16

CRYPTOGRAPHY AND NETWORK SECURITY

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Draw and explain the models of network security.	CO1	7 Marks
	b)	Briefly define the monoalphabetic cipher. What is the difference between a Monoalphabetic cipher and Polyalphabetic cipher?	CO4	7 Marks
		(OR)		
2.	a)	Explain various types of security attacks and security mechanisms.	CO1	7 Marks
	b)	Explain classical encryption techniques with Symmetric cipher and Hill cipher model.	CO4	7 Marks

UNIT-II

3.	a)	Explain the block cipher design principles.	CO2	7 Marks
	b)	Briefly explain the Diffie Hellman Key exchange algorithm.	CO1	7 Marks
		(OR)		
4.	a)	Explain the strength of DES.	CO1	4 Marks
	b)	Explain in detail DES encryption and decryption with neat sketches.	CO2	10 Marks

UNIT-III

5.		Briefly explain the different message authentication functions with neat diagrams.	CO2	14 Marks
		(OR)		
6.	a)	Explain digital signature algorithm.	CO2	7 Marks
	b)	Discuss about HMAC.	CO2	7 Marks

UNIT-IV

7.	a)	Draw the IP Security authentication header and describe the functions of each field.	CO1	7 Marks
	b)	Explain about Secure Socket Layer (SSL).	CO3	7 Marks
		(OR)		
8.	a)	Illustrate how PGP encryption is implemented through a suitable diagram.	CO3	7 Marks
	b)	Explain about transport layer security.	CO2	7 Marks

UNIT-V

9.		Explain about: i) Viruses; ii) Worms; iii) Intruders.	CO1	14 Marks
		(OR)		
10.	a)	Explain about key loggers.	CO4	7 Marks
	b)	Explain Firewall design principles.	CO5	7 Marks

MANAGERIAL ECONOMICS AND PRINICIPLES OF ACCOUNTANCY

[Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	Define Managerial Economics and explain its nature.	CO1	14 Marks
	(OR)		
2.	Analyze and suggest a suitable demand forecasting technique for a new and highly technical product being launched by a company.	CO2	14 Marks

UNIT-II

3.	Define "Production Function" and explain "Factors of Production".	CO3	14 Marks
	(OR)		
4.	Determine: i) BEP. ii) Sales required to earn a profit of Rs. 40,000. iii) BEP, when fixed cost increases by Rs. 10,000. iv) BEP when variable cost increases by Rs.20/unit. Selling Price /unit Rs. 200 Variable Cost/unit Rs. 50 Fixed Cost Rs. 1,00,000.	CO2	14 Marks

UNIT-III

5.	Define "Market". Explain essentials of a market structure.	CO1	14 Marks
	(OR)		
6.	Discuss the following: i) Objectives of Pricing. ii) Overpricing and Under pricing. iii) Pricing Policy.	CO3	14 Marks

UNIT-IV

7.	Define Accountancy. Explain concepts and conventions of accounting.	CO1	14 Marks
	(OR)		
8.	Discuss briefly various sources of capital for a business.	CO4	14 Marks

UNIT-V

9.	Define Balance Sheet. Elucidate various elements of balance sheet.	CO1	14 Marks
	(OR)		

10. The trial balance of a firm on 31.12.2018 is as follows. Prepare final accounts of this firm. CO4 14 Marks

Particulars	**Debit(Rs)**	**Credit(Rs)**
Capital		100,000
Plant and Machinery	160,000	
Sales		354,000
Returns	2,000	1,500
Opening Stock	700	
Bank charges	150	
Sundry Debtors	90,000	
Sundry Creditors		51,600
Furniture	60,000	
Wages	20,000	
Salaries	13,600	
Carriage inwards	1,500	
Carriage outwards	2,400	
Bad debts provision		1,050
Rent, rates, taxes	20,000	
Advertisements	4,000	
Cash in hand	1,800	
Cash at bank	12,000	
Purchases	1,20,000	

Adjustments:

i) Closing Stock Rs 17,000.
ii) Depreciate plant 6% P.A.
iii) Interest on capital to be allowed @ 5% P.A.

III B.Tech II Semester (SVEC-16) Supplementary Examinations January – 2022

MANAGEMENT SCIENCE

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. Identify different functions of management and explain each one of them with examples. CO1 14 Marks

(OR)

2. a) What are the advantages of Centralization and Decentralization? Explain. CO3 6 Marks
   b) Write the organization structure of your college. What type of structure is that? CO3 8 Marks

UNIT-II

3. a) Explain the basic steps of Method study. CO1 7 Marks
   b) Explain briefly the basic principles involved in preparing the layout of any industrial plant indicating the important techniques available for the purpose. CO2 7 Marks

(OR)

4. a) List and explain the steps involved in work-measurement. CO1 7 Marks
   b) Enumerate the factors affecting quality and explain how to overcome them. CO1 7 Marks

UNIT-III

5. a) Write the differences between on job training and off job training. CO1 6 Marks
   b) What is performance appraisal? List the objectives and steps involved in performance appraisal. CO1 8 Marks

(OR)

6. a) Explain the methods of merit rating with examples. CO1 8 Marks
   b) Enumerate the assumptions of McGregor's theory of 'X' and 'Y'. CO1 6 Marks

UNIT-IV

7. A small project is composed of 8 activities whose time estimates are listed in the table below. CO4 14 Marks

Activity	Predecessor	Estimated duration(Weeks)		
		Optimistic	Most likely	Pessimistic
A	-	1	1	7
B		1	4	7
C		2	2	8
D	A	1	1	1
E	B	2	5	14
F	C	2	5	8
G	D,E	3	6	15
H	F,G	1	2	3

i) Draw the project network and determine the expected project completion time.
ii) What duration will have 95% confidence of project completion?

(OR)

8.	a)	Explain the term 'Entrepreneur'. State the characteristics of an entrepreneur.	CO5	6 Marks
	b)	Differentiate between entrepreneur and manager.	CO5	8 Marks

UNIT-V

9.	a)	What is meant by Business Process Outsourcing? Also state its need.	CO6	7 Marks
	b)	Explain the concept of Just-In-Time and state its advantages.	CO6	7 Marks
		(OR)		
10.	a)	Explain the concept of six sigma.	CO6	7 Marks
	b)	Discuss in detail the role of BPO in the area of manufacturing.	CO6	7 Marks

CODE No.: 16BT6HS02 SVEC-16

BUSINESS COMMUNICATION AND CAREER SKILLS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Define communication and explain the effectiveness of communication with the help of Mehrabian model.	CO1	14 Marks
		(OR)		
2.	a)	Explain horizontal mode of communication in an organization by giving suitable examples.	CO1	7 Marks
	b)	Explain vertical mode of communication in an organization by giving suitable examples.	CO1	7 Marks

UNIT-II

3.		Analyze the given statement. "It is important for organizations to have a crisis communication plan in place."	CO2	14 Marks
		(OR)		
4.	a)	Summarize 'Reputation Management' and 'Employee Communication' in corporate communication.	CO2	7 Marks
	b)	Summarize 'Community Relations' and Media Relations' in corporate communication.	CO2	7 Marks

UNIT-III

5.		“Writing is crucial to business organizations as it serves as a major source of documentation.” Elucidate the given statement with suitable examples.	CO3	14 Marks
		(OR)		
6.	a)	State the importance of 'Direct Approach Style' in writing a business message.	CO3	7 Marks
	b)	State the importance of 'Indirect Approach Style' in writing a business message.	CO3	7 Marks

UNIT-IV

7.		Explain briefly the various formats of a resume.	CO4	14 Marks
		(OR)		
8.	a)	"Understanding yourself plays a vital role in career building". Justify.	CO4	7 Marks
	b)	"Changes in your personality and in working environment may tend to change your career goals." Justify.	CO4	7 Marks

UNIT-V

9.		Discuss the significance of non-verbal aspects in an interview.	CO5	14 Marks
		(OR)		
10.	a)	Describe the stages involved in an ‘on-campus interview’.	CO5	7 Marks
	b)	Describe the stages involved in an ‘off-campus interview’.	CO5	7 Marks

PERSONALITY DEVELOPMENT

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		"Failure can pave the way to success". Describe.	CO1	14 Marks
		(OR)		
2.	a)	List out the strategies to develop self-esteem.	CO1	7 Marks
	b)	List four examples of try-out experiences that might be of interest to you.	CO1	7 Marks

UNIT-II

3.		Classify the consequences for the people who have positive and negative attitudes.	CO2	14 Marks
		(OR)		
4.	a)	"Cultivating a positive attitude requires mental discipline". Interpret.	CO2	7 Marks
	b)	Organize the ideas for overcoming the pull of negativity.	CO2	7 Marks

UNIT-III

5.		"Employers want people who can think". Illustrate.	CO3	14 Marks
		(OR)		
6.	a)	Illustrate the causes and effects of the stress management.	CO3	7 Marks
	b)	Draw out the thinking strategies.	CO3	7 Marks

UNIT-IV

7.		Develop the three basic leadership styles.	CO4	14 Marks
		(OR)		
8.	a)	Supervisor's communication style plays a pivotal role in organizations. Develop the idea.	CO4	7 Marks
	b)	Create a few artificial situations for communicating specially with supervisor and the others.	CO4	7 Marks

UNIT-V

9.		"One should make sure of the rules of one's job by the end of the first day of employment". Justify the statement.	CO5	14 Marks
		(OR)		
10.	a)	Evaluate the purpose of form 'W-4'.	CO5	7 Marks
	b)	Planning 'career' plays a significant role in one's life. Evaluate.	CO5	7 Marks

PYTHON PROGRAMMING
[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the Fundamental concepts of Computer software.	CO1	7 Marks
	b)	Describe the essence of computational problem solving.	CO2	7 Marks
		(OR)		
2.	a)	Model the limits of computational problem solving.	CO2	7 Marks
	b)	Compare and Contrast syntax errors with semantic errors.	CO1	7 Marks

UNIT-II

3.	a)	Explain while statement in python with example.	CO2	7 Marks
	b)	Write a python script to calculate sum of individual digits of a given number using while.	CO5	7 Marks
		(OR)		
4.	a)	Differentiate between input error checking and infinite loops.	CO3	7 Marks
	b)	Write a python script to display Fibonacci sequence of numbers using while loop, for loop and do-while loop constructs.	CO5	7 Marks

UNIT-III

5.	a)	For the following recursive functions, indicate which of the requirements of a properly designed recursive function each violates	CO2	7 Marks

```
i) def   rfunc1(n):
         return n + rfunc( n-1)
ii) def  rfunc2(n):
         if  n==0:
         return 1
         return  n+ rfunc2(n+1).
```

	b)	Specify the requirements to design proper recursive function.	CO2	7 Marks
		(OR)		
6.	a)	Implement a Python code that determines how many times a given letter occurs in a given string using Recursion.	CO4	7 Marks
	b)	List out various String Methods used in Python.	CO1	7 Marks

UNIT-IV

7.	a)	Explain the fundamental features of turtle graphics.	CO1	7 Marks
	b)	Develop a simple program for bouncing ball using multiple turtles.	CO5	7 Marks
		(OR)		
8.	a)	Describe the use of object references.	CO4	7 Marks
	b)	Write a python script to create turtle graphics window and explain.	CO5	7 Marks

UNIT-V

9.	a)	Discuss about the tkinter pragmatics in Python Programming.	CO1	7 Marks
	b)	Compare and contrast about all tkinter extensions.	CO2	7 Marks
		(OR)		
10.	a)	Write a brief note on structure of tkinter package.	CO1	7 Marks
	b)	List and explain the uses of Lambda.	CO2	7 Marks

DATA BASE MANAGEMENT SYSTEMS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Identify different types of database users and write in detail about their roles.	CO2	7 Marks
	b)	List and explain the advantages of DBMS.	CO1	7 Marks
		(OR)		
2.	a)	Write short notes on the following and give examples to each: Entity, Entity sets, Relationship and Relationship sets.	CO1	7 Marks
	b)	How to maintain class hierarchies in ER-Diagrams? Explain with employee database.	CO2	7 Marks

UNIT-II

3.	a)	Create a view with fields register name and stud-name and explain how to implement views.	CO3	7 Marks
	b)	Distinguish candidate key and primary key with an example relation.	CO1	7 Marks
		(OR)		
4.	a)	Discuss about Set operations in relational algebra with examples.	CO1	7 Marks
	b)	Explain the following terms with an example: i) condition-join ii) equi-join iii) natural-join	CO1	7 Marks

UNIT-III

5.	a)	Write the basic form of SQL query and explain.	CO1	7 Marks
	b)	Consider the following schemas: Sailors (sid, sname, rating, age) Reserves (sid, bid, day) Boats (bid, bname, color) Write the following queries in relational algebra, tuple relational Calculus and domain relational calculus: i) Find the name of sailors who have reserved boat 103. ii) Find the names and ages of sailors with a rating above 7. iii) Find the names of sailors who have reserved a red boat.	CO4	7 Marks
		(OR)		
6.	a)	Discuss the problems caused for the redundancy and the purpose of normalization.	CO2	7 Marks
	b)	Describe properties of decompositions.	CO1	7 Marks

UNIT-IV

7.	a)	Illustrate concurrent execution of transaction with examples.	CO1	7 Marks
	b)	Discuss about Implementation of Isolation.	CO1	7 Marks

(OR)

8.	a)	Explain the concept of multiple granularity with a suitable example.	CO1	7 Marks
	b)	Describe the various transaction states in detail.	CO1	7 Marks

UNIT-V

9.	a)	Enumerate Indexed Sequential Access Method in detail.	CO1	7 Marks
	b)	Illustrate insertion of an element in B+ trees with an example.	CO4	7 Marks

(OR)

10.	a)	Show the method to reduce access time with primary index by considering example.	CO3	7 Marks
	b)	Make a comparison of hash file organization with heap file organization.	CO1	7 Marks

CODE No.: 16BT50308 SVEC-16

MECHATRONICS
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Describe the various levels of mechatronic system with examples.	CO1	8 Marks
	b)	Discuss the design approach of a Mechatronic system.	CO1	6 Marks
		(OR)		
2.	a)	Explain the terms stability, Accuracy and Response with respect to a system.	CO1	6 Marks
	b)	Design a mechatronic system for controlling a temperature control of refrigeration system.	CO5	8 Marks

UNIT-II

3.	a)	Describe any two proximity sensors with neat diagrams.	CO2	8 Marks
	b)	Explain how thermistors can be used as temperature sensor.	CO2	6 Marks
		(OR)		
4.	a)	What is a load cell? Explain the working of strain gauge load cell.	CO2	8 Marks
	b)	Explain how control valves can be used as processing elements.	CO2	6 Marks

UNIT-III

5.	a)	Explain one type of DAC with a neat sketch.	CO3	8 Marks
	b)	Explain the importance of data acquisition system.	CO3	6 Marks
		(OR)		
6.	a)	Signal conditioning is required for meaning full analysis of any signal. Justify and explain various components in it.	CO3	8 Marks
	b)	Mention the use of current-voltage converters in a mechatronic system.	CO3	6 Marks

UNIT-IV

7.	a)	Discuss, in detail, the methods of PI and PD controllers.	CO4	8 Marks
	b)	"Adaptive controllers are the future". Justify with an example with clear explanation.	CO4	6 Marks
		(OR)		
8.	a)	Explain PID controller with circuit diagram.	CO4	8 Marks
	b)	Discuss any two methods of tuning the controller.	CO4	6 Marks

UNIT-V

9.	a)	"Ethics should be followed in designing a Mechatronic System" Justify.	CO6	8 Marks
	b)	Describe the elements of an Antilock braking system with a neat block diagram.	CO5	6 Marks
		(OR)		
10.		Explain the application of mechatronics in present day engine control unit. Mention atleast 3 sensors and 3 actuators.	CO5	14 Marks

COMPUTER NETWORKS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	With a neat diagram explain Internet architecture.	CO1	7 Marks
	b)	Compare 4-Layer TCP/IP Model and 7-Layer OSI Model.	CO2	7 Marks
		(OR)		
2.	a)	Summarize the features of wireless LANs: 802.11.	CO2	7 Marks
	b)	Assess the impact of wireless transmission media in the context of network applications.	CO6	7 Marks

UNIT-II

3.	a)	What is the remainder obtained by dividing $x^7 + x^5 + 1$ by the generator Polynomial $x^3 + 1$?	CO4	7 Marks
	b)	Write the data link layer design issues.	CO1	7 Marks
		(OR)		
4.	a)	Describe one-bit sliding window protocol with an example.	CO1	7 Marks
	b)	Briefly describe the differences between store-and-forward and cut-through switches.	CO2	7 Marks

UNIT-III

5.	a)	Suppose all of the interfaces in each of three subnets are required to have the prefix 223.1.17/24. Also suppose that Subnet 1 is required to support at least 60 interfaces, Subnet 2 is to support at least 90 interfaces, and Subnet 3 is to support at least 12 interfaces. Provide three network addresses that satisfy these constraints.	CO3	7 Marks
	b)	Compare IPv4 and IPv6 protocols.	CO2	7 Marks
		(OR)		
6.	a)	Apply distance vector routing algorithm to compute shortest path routing.	CO5	7 Marks
	b)	Draw the IPv6 packet header format.	CO1	7 Marks

UNIT-IV

7.	a)	Explain why the client issues an active open for the control connection and a passive open for the data connection.	CO1	6Marks
	b)	Elaborate TCP Congestion Control mechanisms. Differentiate these mechanisms.	CO2	8 Marks
		(OR)		
8.	a)	Sketch the state transition diagram of TCP connection establishment, data transfer and termination and explain it.	CO1	6 Marks
	b)	Summarize the functions of Real-time Transport control protocol.	CO2	8 Marks

UNIT-V

9.	a)	Tabulate the various HTTP request operations.	CO1	7 Marks
	b)	Discuss the working of email in detail.	CO1	7 Marks
		(OR)		
10.	a)	Briefly explain the Domain Name Service protocol with an example.	CO1	7 Marks
	b)	When user clicks a hyperlink, what are the steps that occur between the user's click and the page being displayed?	CO4	7 Marks

WEB TECHNOLOGIES
[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the creation of "mouseovers" in JavaScript. Give examples to change the Size and Color of the Text in a Web Page.	CO5	7 Marks
	b)	Explain the following suitable example. i) Spell-check ii) Content Editable iii) Custom data attributes iv) Offline web applications.	CO1	7 Marks
		(OR)		
2.	a)	Explain the frames and table tags of HTML with suitable example.	CO1	7 Marks
	b)	Design a web page to drag and drop an object on a web browser using a mouse.	CO5	7 Marks

UNIT-II

3.	a)	Design a web page to enroll student details including Name, Id, Address, Mobile No. and e-Mail id.	CO2	7 Marks
	b)	Compare and contrast JavaScript and JQuery features.	CO2	7 Marks
		(OR)		
4.	a)	Design a web page that display credit card type and then validate the entered card number according to the card type.	CO6	7 Marks
	b)	Summarize the properties and methods of JavaScript String object.	CO2	7 Marks

UNIT-III

5.	a)	Develop a mobile optimized webpage using the following i) Glyph Icons ii) Navigation bar.	CO5	7 Marks
	b)	Classify different layouts in **bootstrap.**	CO2	7 Marks
		(OR)		
6.	a)	Develop a mobile optimized webpage using the following i) Alerts ii) Tool bars and button group.	CO5	7 Marks
	b)	Develop a web page using nested grid column layout.	CO5	7 Marks

UNIT-IV

7.	a)	Build a PHP code to retrieve variables passed using GET and POST super global variables.	CO3	7 Marks
	b)	Explain the PHP code embedding procedure into web pages.	CO1	7 Marks
		(OR)		
8.	a)	Build a PHP Page to read User Name and Favorite Programming language from the html form.	CO3	7 Marks
	b)	Explain the various methods offered by PHP to output data into browser. Write a PHP code to demonstrate each method.	CO1	7 Marks

UNIT-V

9.		Develop a PHP page that reads user details like name, id, gender, date of birth, address, phone no. and email id and then store the same into MySQL database.	CO6	14 Marks

(OR)

10.	a)	Develop a PHP code to perform the following: i) To fetch employee records from MySQL database. ii) To Update employee salary by 10% whose experience greater than 15 years.	CO6	10 Marks
	b)	List and explain transaction methods of MySQL.	CO1	4 Marks

OBJECT ORIENTED PROGRAMMING
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What are all the characteristic features of Java Programming language?	CO1	6 Marks
	b)	Compare and contrast visibility controls and also compare with each of them.	CO2	8 Marks
		(OR)		
2.	a)	Java is platform independent. Justify?	CO4	6 Marks
	b)	Compare and Contrast Java with C. Explain Constructors with examples.	CO2	8 Marks

UNIT-II

3.	a)	Explain the importance of inheritance with the help of an example?	CO1	6 Marks
	b)	What are packages? What are the benefits of creating programs using packaging?	CO1	4 Marks
	c)	How to create an interface? Distinguish between abstract classes and interfaces.	CO1, CO2	4 Marks
		(OR)		
4.	a)	How is multiple inheritance achieved in Java?	CO1	3 Marks
	b)	Develop a Library interface which has drawbook(), returnbook() (with fine), checkstatus() and reservebook() methods. All the methods tagged with public.	CO6	11 Marks

UNIT-III

5.	a)	Differentiate between exceptions , runtime errors and compile time errors	CO2	4 Marks
	b)	Difference between Thread and Process in Java? How to implement Thread in Java?	CO2	5 Marks
	c)	Develop a java program to read 20 marks and store them in an array, Define your own exception named wrong mark exception. Throw and catch this type of exception when a mark is (<0 and >100).	CO3	5 Marks
		(OR)		
6.	a)	When to use Runnable vs Thread in Java? Difference between start() and run() method of Thread class?	CO2	4 Marks
	b)	Differentiate throw and throws keyword in Java? Can the same exception been declared to be thrown many times by the method. **eg:** `public void sample() throws IOException, SQLException`	CO1	5 Marks
	c)	Develop a java program for producer consumer problem to illustrate the concept of multithreading.	CO3	5 Marks

UNIT-IV

7.	a)	What is an Event? Explain the role of Event handler in AWT.	CO1	5 Marks
	b)	Design and Develop an Applet to receive the value of the parameter message from the html file and display it on the webpage.	CO3	9 Marks

(OR)

8.	a)	What is Java Collections Framework? List out some benefits of Collections framework?	CO1	6 Marks
	b)	Create an anonymous inner class for handling mouse entered event into an Applet.	CO5	8 Marks

UNIT-V

9.	a)	List and explain the different situations in which the Action Event is generated? Develop the event handler for the Action Event.	CO2, CO4	10 Marks
	b)	Explain the life cycle methods of a servlet.	CO4	4 Marks

(OR)

10.	a)	What do you mean by HTTP servlet request and response? What is the procedure for initializing a servlet?	CO1	7 Marks
	b)	What is the advantage of having anonymous classes while handling events in Java?	CO1	7 Marks

FOUNDATION ENGINEERING
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Briefly explain about Standard Penetration Test with neat sketch and the corrections to be applied to find 'N' value.	CO1	7 Marks
	b)	Compute the area ratio of a thin walled tube samples having an external diameter of 60 cm and wall thickness of 2.25 mm. Do you recommend the sampler for obtaining un-disturbed soil samples?	CO2	7 Marks
		(OR)		
2.	a)	Discuss various types of soil samplers for obtaining undisturbed samples.	CO1	6 Marks
	b)	What are the methods of soil exploration? Describe briefly Geo Physical methods of sub-surface exploration.	CO1	8 Marks

UNIT-II

3.		A gravity retaining wall retains 10 m of a backfill, unit weight of soil = 18 kN/m^3, angle of shearing resistance = 30^o with a horizontal surface. Assume the wall interface to be vertical, determine (i) the magnitude and point of application of the total active pressure (ii) if the water table is at a height of 5 m, and how far do the magnitude and the point of application of active pressure changed. Take submerged unit weight = 10 kN/m^3.	CO2	14 Marks
		(OR)		
4.	a)	Describe the procedure of computing active earth pressure behind a retaining wall using Culmann's graphical method.	CO1	7 Marks
	b)	A retaining wall is 7m high, with its back face smooth and vertical. It retains sand with its surface horizontal. Using Rankine's theory, determine magnitude and line of action of active earth pressure at the base when the backfill is: i) Dry and ii) submerged, with water table at the surface. Take Y=18 kN/m^3 ii) Y_{sat}= 21 kN/m^3 and ϕ'=300.	CO2	7 Marks

UNIT-III

5.	a)	Explain the Bishop's method of analysis for stability of slopes.	CO2	6 Marks
	b)	A cutting 8m deep is to be made in a saturated clay soil with γ = 20kN/m^3, C_u = 20 kN/m^2 and φ = 0^o. A hard stratum exists at a depth of 12m below the ground level. Determine the angle of the slope at which failure would occur.	CO2	8 Marks
		(OR)		
6.	a)	Write short notes on: i) Taylor's stability number. ii) Types of slope failure.	CO1	6 Marks
	b)	The average height of a 2.0m wide earth slice is 20m. The properties of soil are: c′=23 kPa, φ'= 30^o, γ= 17 kN/m^3. The water table is located at a depth of 4.0m below the surface along the centre line of slice. The bottom of the slice is inclined at 30^o to horizontal. Calculate the safety factor against sliding using effective stress analysis.	CO2	8 Marks

UNIT-IV

7.	a)	Derive Terzaghi's bearing capacity equation.	CO2	7 Marks
	b)	A square footing is resting on stiff saturated clay with unconfined compression strength of 200kN/m². The depth of foundation is 2m. Determine the size of the footing if the column load is 700 kN. Assume a factor of safety as 2.5. The bulk unit weight of soil is 20kN/m³. What will be the change in ultimate, net ultimate and safe bearing capacity if the water table is at ground level?	CO2	7 Marks

(OR)

8.	a)	Explain plate load test, in detail.	CO1	7 Marks
	b)	A footing 6m x 4m in plan, transmits a pressure of 150 kN/m² on a cohesive soil having E = 6 x 104 kN/m² andμ = 0.50. Determine the immediate settlement at the centre, assuming it to be: i) flexible footing. ii) a rigid footing.	CO2	7 Marks

UNIT-V

9.	a)	Briefly explain dynamic formulae of load carrying capacity of piles.	CO1	6 Marks
	b)	A 16 pile group was driven into soft clay extending to a large depth. The diameter and length of the piles were 30 cm and 9 m respectively. If the unconfined compression strength of the clay is 9 t/m² and the pile spacing is 90 cm c/c, what is the capacity of the group? Assume a factor of safety of 3 and the adhesion factor of 0.7.	CO3	8 Marks

(OR)

10.	a)	What are the different shapes of foundation wells and what are their comparative merits and demerits?	CO1	6 Marks
	b)	What are the various components of well foundation and discuss them in detail?	CO1	8 Marks

FIRE ENGINEERING
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Briefly explain the different types of fire spread.	CO1	7 Marks
	b)	Compare the Complete combustion and Incomplete combustion	CO2	7 Marks
		(OR)		
2.		Discuss any case study related to unconfined vapour cloud explosion (UVCE) in detail.	CO4	14 Marks

UNIT-II

3.	a)	Explain in detail about the fire triangle measure in building.	CO1	7 Marks
	b)	What are the strategies to be adopted for fire prevention?	CO8	7 Marks
		(OR)		
4.		Write short notes on i) Fire stoppers ii) Foam generators iii) Fire station	CO1	14 Marks

UNIT-III

5.	a)	Illustrate the 'Deluge and Emulsifier' system.	CO2	7 Marks
	b)	Explain the method of Water Sprinkler System.	CO4	7 Marks
		(OR)		
6.		Discuss the CO_2 system and Dry chemical powder (DCP) system.	CO6	14 Marks

UNIT-IV

7.		As an engineer how would you describe safety as an essential parameter in designing residential building?	CO3	14 Marks
		(OR)		
8.	a)	Discuss the necessity of fire certificates.	CO8	7 Marks
	b)	Mention the fire safety requirements for high rise buildings.	CO6	7 Marks

UNIT-V

9.	a)	Compare the detonation and blast waves.	CO2	7 Marks
	b)	Give the details of plant for generation of inert gas.	CO9	7 Marks
		(OR)		
10.		Describe the Rupture disc in process vessels and lines explosion.	CO10	14 Marks

CODE No.: 16BT60110 SVEC-16

SOLID WASTE MANAGEMENT
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) Describe legislation for municipal solid waste. CO8 7 Marks
   b) Using the data for a municipal solid waste sample provided below, find the average moisture content of the sample. Base your calculations on a 100 kg sample size. CO2 7 Marks

Component	Moisture Content (%)	Weight (%)
Paper Waste	7	25
Yard Waste	55	18
Food Waste	65	20
Plastic	2	5
Wood	20	8
Glass	3	7
Metals	3	9
Textiles	12	8

(OR)

2. Investigate the importance of public awareness and role of NGOs in effective solid waste management. CO4 14 Marks

UNIT-II

3. Describe the types of storage methods and materials used for the storage containers. CO1 14 Marks

(OR)

4. Discuss on-site processing of solid wastes in medium and high rise buildings. CO5 14 Marks

UNIT-III

5. Describe the operation of hauled container system and stationary container system of waste collection. CO9 14 Marks

(OR)

6. a) Discuss briefly about layout of collection routes. CO1 7 Marks
   b) Explain the factors to be considered in deciding collection frequency in a solid waste management system to achieve the environment sustainability. CO7 7 Marks

UNIT-IV

7. Describe the various processing techniques of solid waste. CO5 14 Marks

(OR)

8. Explain the factors influencing the process of composting. State various practical problems associated with it. CO1 14 Marks

UNIT-V

9. a) Describe the occupational hazards and safety measures in Bio-medical waste management. CO6 7 Marks
   b) Write short note on Environmental factors in sanitary landfill sites. CO9 7 Marks

(OR)

10. Explain design and operation of sanitary landfill. CO3 14 Marks

RURAL TECHNOLOGY

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Differentiate between ancient agriculture and traditional agriculture.	CO2	7 Marks
	b)	Krishna want to grow cotton in his crop field through traditional method in Hosoor village. What is the process involved from sowing seeds to storage?	CO1	7 Marks
		(OR)		
2.	a)	Thandrapadu is one of the backward village in Kurnool District with lack of infrastructure facilities. Choose the technologies that can improve the rural infrastructure.	CO4	7 Marks
	b)	Chandrasekhar is recently elected as the panchayat president of Puttramraju Kandriga village and started developing the village. Explain the roles and responsibilities involved under Panchayat Raj Institutions.	CO1	7 Marks

UNIT-II

3.	a)	Day by day waste generation is increasing more and to minimize this waste 3R principle use is necessary. What is meant by 3R principle? State the advantages of 3R principle.	CO4	7 Marks
	b)	Ramesh who supplies solar cooker from Bangalore and want to sell in the village. What is the principle behind the working of solar cooker?	CO2	7 Marks
		(OR)		
4.	a)	The increase of wood waste and animal waste is more in the village Ramapuram which is near to the forest area. Show how the waste can be used by the rural people with the technology for cooking.	CO4	7 Marks
	b)	Explain the various alternate sources of technologies in particular to solar.	CO4	7 Marks

UNIT-III

5.	a)	Define tissue culture. Explain briefly how the production of one of the ornamental plant orchids can be increased with the plant tissue culture.	CO4	7 Marks
	b)	Explain the role of food and agro based technologies in rural development.	CO4	7 Marks
		(OR)		
6.		The government of India is giving training to the rural women who is unemployed. Discuss in detail the role of cottage industries in rural development.	CO1	14 Marks

UNIT-IV

7.	a)	Raghunath is an agricultural scientist wants to give awareness to the rural people about the usage of organic fertilizers in the crop filed. Suggest the importance and uses of bio fertilizers.	CO6	7 Marks
	b)	Pandurangapuram which is one of the village in the drought prone area of the Rayalaseema area. Show how rain water technology is useful for the village.	CO4	7 Marks
		(OR)		

8.	a)	Write the importance of medical and aromatic plants and explain their need in community development.	CO5	7 Marks
	b)	Give solution how dry land can be converted to farming land keeping in view of biofertilizers.	CO1	7 Marks

UNIT-V

9.	a)	What is meant by CSR? How development can be achieved with the involvement of private sector participation in the rural area?	CO3	7 Marks
	b)	Write a short note on village adoption schemes focusing particularly in Andhra Pradesh and in India.	CO1	7 Marks

(OR)

10.		Information technology for the rural development is a boon or bane and apply its principles for a specific purpose.	CO2	14 Marks

POWER SEMICONDUCTOR DRIVES
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Derive the fundamental torque equations governing DC Motor load dynamics.	CO1	10 Marks
	b)	Compare DC and AC drives.	CO2	4 Marks

(OR)

2.	a)	Derive the mathematical conditions for steady state stability analysis of equilibrium operating point.	CO2	10 Marks
	b)	Mention the necessary condition to obtain the three modes of operation of an electric drive.	CO1	4 Marks

UNIT-II

3.		Analyse the operation of 3φ fully controlled converter fed dc drive with neat waveforms for $\alpha=30^{o}$ and $\alpha=120^{o}$ and give the justification about the waveforms.	CO2, CO4	14 Marks

(OR)

4.	a)	Explain using a power circuit the working of a single phase semi converter fed separately excited motor drive.	CO1	10 Marks
	b)	What are the advantages of three phase drives over the single phase drives?	CO1	4 Marks

UNIT-III

5.	a)	Discuss the four quadrant operation of chopper control in a DC motor drive.	CO2	8 Marks
	b)	With a neat diagram, illustrate the closed loop model of separately excited DC motor drive.	CO1	6 Marks

(OR)

6.	a)	Explain the motoring mode operation of chopper fed DC motor.	CO1	6 Marks
	b)	Compare regenerative braking and dynamic braking of separately excited DC motor by chopper control and identify the suitable braking method for DC motor.	CO5	8 Marks

UNIT-IV

7.	a)	With an aid of a neat diagram, explain the operation of static Scherbius system for slip power recovery scheme	CO1	10 Marks
	b)	Compare Current Source Inverter drive with Voltage Source Inverter drive in steady state conditions.	CO4	4 Marks

(OR)

8.	a)	Discuss the steady state analysis of constant slip-speed controlled induction motor.	CO2	7 Marks
	b)	Explain the speed control scheme employed in industries for induction motor drive with stator voltage control and mention the reason for choosing induction motor drive rather than other motor drives.	CO6	7 Marks

UNIT-V

9.	a)	Analyse the operation of self-controlled synchronous motor with Voltage Source Inverter	CO2	10 Marks
	b)	When can a synchronous motor be load commutated?	CO1	4 Marks

(OR)

10.	a)	Explain self-control of synchronous motor drive operated with constant margin angle control.	CO1	10 Marks
	b)	Mention the different modes employed to achieve variable frequency control in synchronous motors.	CO1	4 Marks

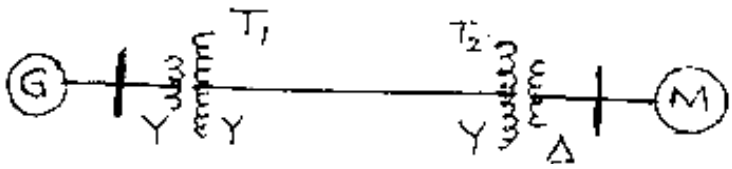
POWER SYSTEM ANALYSIS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	List the advantages of per unit system of computations.	CO1	6 Marks
	b)	Draw the per unit impedance diagram of the system shown in figure, by taking a base of 100 MVA, 11 kV in the generator circuit. The various components ratings are: Transformer T_1: 3 phase 90 MVA, 11/110 kV, X=10%; Transformer T_2: 3 single phase units of each 33.33 MVA, 68/6.6 kV, X=10 %; Synchronous generator: 80 MVA, 10 kV, X=10%; synchronous motor: 95 MVA, 6.3 kV, X=15% and the line reactance is 20 Ω.	CO3	8 Marks

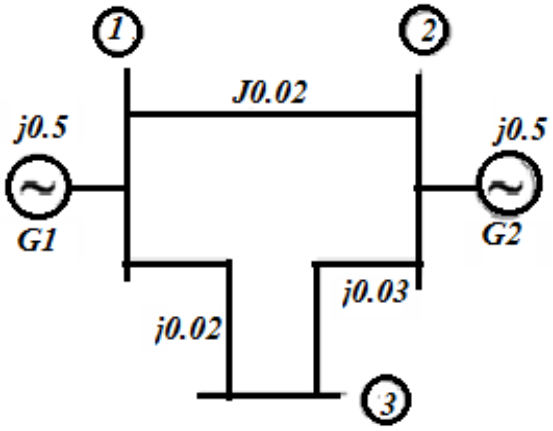


(OR)

2.	a)	Write a note on significance of unsymmetrical fault analysis by symmetrical component transformations.	CO1	7 Marks
	b)	Given the sequence components of a phase voltages:V_{b1}=100; V_{c2}=10j and V_{ao}=10; Determine the phase voltages V_a, V_b and V_c.	CO3	7 Marks

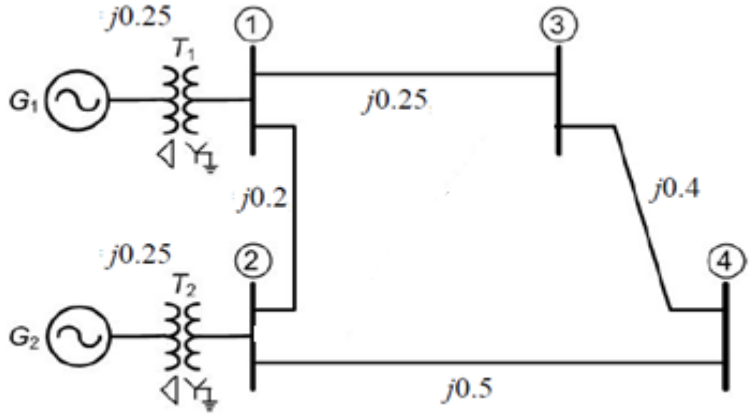
UNIT-II

3.	a)	Prove that when there is no mutual coupling between the elements of a network, the diagonal and off-diagonal elements of the bus admittance matrix can be computed as $Y_{ij} = \sum_{i=j} y_{ij}$ and $Y_{ij} = Y_{ji}$.	CO2	6 Marks
	b)	Develop a Y_{bus} by direct inspection method for the given power system shown in figure with reactances mentioned in *p.u*.	CO3	8 Marks



(OR)

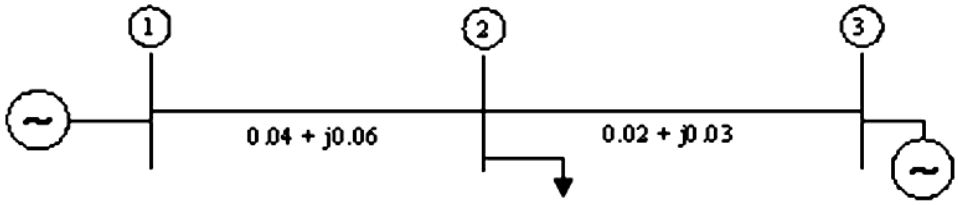
4. Construct the Z_{bus} for the network shown using Z_{bus} building algorithm — CO3 — 14 Marks



UNIT-III

5. a) Derive the static load flow equations of n-bus system. — CO2 — 4 Marks

b) Obtain the complex bus voltages at bus No. 2 and 3 at the end of first iteration, using GS method for the network shown in figure. The line impedances are mentioned in p.u.; Given Bus-1 is slack bus with $V_1=1.0\angle 0°$; $P_2 + jQ_2 = -5.96 + j1.46$; $|V_3| = 1.02$; $P_3 = 2.0$ p.u. Assume $V_2 = 1\angle 0°$ and $V_3 = 1.02\angle 0$. — CO4 — 10 Marks



(OR)

6. a) Derive the expressions for diagonal and off-diagonal elements of Jacobin matrix of N-R (Polar form) method. — CO5 — 7 Marks

b) Explicate in detail with a flow chart, the computational procedure for load flow analysis using decoupled method deriving necessary equations. — CO1 — 7 Marks

UNIT-IV

7. a) What are the different types of faults in power system? Justify which types of faults are more severe and are more frequent. — CO1 — 4 Marks

b) A 3-phase, 3-wire system has a normal voltage of 10·4 kV between the lines. It is supplied by a generator having positive, negative and zero sequence reactances of 0·6, 0·5 and 0·2 Ohms per phase respectively. Calculate the fault current which flows when a line-to-line fault occurs at the generator terminals. — CO3 — 10 Marks

(OR)

8. Develop the sequence network for a double line to ground (LLG) fault and express the fault current in terms of sequence components of the network. — CO2 — 14 Marks

UNIT-V

9. a) Derive an expression for the maximum power transfer between two nodes. Show that this power is maximum when $X = \sqrt{3}R$, where X is the reactance and R the resistance of the system. — CO2 — 7 Marks

b) Station A transmits 50 MW of power to station B through a tie line. The maximum steady state capacity of the line is 100 MW. Determine the allowable sudden load that can be switched on without loss of stability. — CO2 — 7 Marks

(OR)

10. a) Define the following terms: CO1 6 Marks

i) Steady state stability limit.

ii) Dynamic state stability limit.

iii) Transient state stability limit.

b) A synchronous generator operating at 50 Hz delivers 1 p.u. power to an infinite bus bar through a network in which resistance may be neglected. A fault occurs which reduces the maximum power transferable to 0.4 p.u., whereas before the fault this power was 1.8 p.u., and after the clearance of the fault it is 1.3 p.u. By the use of equal area criterion, determine the critical clearing angle for designing a circuit breaker operating time. CO3 8 Marks

DESIGN AND ESTIMATION OF ELECTRICAL SYSTEMS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Draw and explain a typical wiring diagram for a house installation showing connections for energy meter, main switch and distribution boards.	CO1	7 Marks
	b)	List out the general rules to be followed for internal wiring.	CO1	7 Marks
		(OR)		
2.		Design and develop the layout of electric wiring and estimate the quantity of material required and cost, for PVC conduit wiring system proposed to be used in a hall with dimensions 15m x 6m x $4\frac{1}{2}$ m. The hall is to be fitted with fan points and light points. Make your own assumptions for number of fans and light points required and other missing data. Follow IE rules while designing and estimating the wiring system.	CO3, CO7	14 Marks

UNIT-II

3.	a)	List out the main components of an Over Head Transmission lines.	CO1	6 Marks
	b)	An Over Head 11 kV, 50 Hz line has to be erected using 27 kg, 10 m long steel poles and copper wire of size no. 3/2.6424 m, with an average span of 150 m. Furnish the list of material required and estimate the cost/km.	CO3	8 Marks
		(OR)		
4.		An OH 11 kV, 50 Hz, 3-phase line is to be tapped off from the existing 11 kV line pole at about 90^0 angle. The proposed line has to be erected on 10 m long RCC poles with ACSR conductor of size 6/1 x 2.11 mm with average span of 100 m. Line has to pass through the city area spreading about 500 m long. Furnish the list of material required and estimate the cost for 3.2 km long line.	CO3, CO4	14 Marks

UNIT-III

5.	a)	State some important points that guides in carrying out wiring for a motor installation.	CO1	5 Marks
	b)	Prepare and exhibit the layout and estimate for installation of a 7 HP, 3-phase, 415 V Squirrel cage motor in a workshop of size 5m x 5m at the centre with main board at one corner of the workshop.	CO3	9 Marks
		(OR)		
6.	a)	Categorize the power circuits on the basis of applications and explain.	CO2, CO5	7 Marks
	b)	Calculate the size of the conductor to be used for wiring of 15 HP, 400 V, 3-phase, 50 Hz Induction Motor. Consider the efficiency and power factor of motor as 0.85 and 0.8 respectively.	CO4	7 Marks

UNIT-IV

7.	a)	Explain the following terms. i) Illumination. ii) Luminous intensity. iii) Lamp efficiency. iv) Space-height ratio.	CO1	7 Marks
	b)	A small assembly shop with 16 m long, 10m wide and 3 m up to trusses is to be illuminated to a level of 20 lux. The utilization and maintenance factors are 0.74 and 0.8 respectively. Calculate the number of lamps required to produce 3000 lumens.	CO4	7 Marks

(OR)

8.		Write short notes on: i) Sodium vapour lamp. ii) High pressure mercury vapour lamp.	CO1	14 Marks

UNIT-V

9.	a)	List out various types of heating and explain about resistance heating in detail.	CO1	7 Marks
	b)	Explain in detail about dielectric heating.	CO2	7 Marks

(OR)

10.	a)	Suggest and explain suitable welding technique to fabricate transformer oil tank.	CO5	7 Marks
	b)	A 20 kW, 1-phase, 220 V resistance oven employs a circular Nichrome wire as its heating element. If the wire temperature is not to exceed 1127^0 C and the temperature of a charge is to be 427^0C. Design a heating element assuming emissivity, e=0.9 and radiation efficiency, K=0.6. Consider the specific resistance of a Nichrome wire as 1.09×10^{-6} Ω-m.	CO3, CO4	7 Marks

DIGITAL SIGNAL PROCESSING FOR ELECTRICAL ENGINEERS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) Investigate whether the following signals are periodic or not. CO2 8 Marks

i) $x(n) = \cos\left(\frac{5\pi}{9}n + 1\right)$. ii) $x(n) = \sin\frac{\pi}{8}n^2$.

iii) $x(n) = \sin\left(\frac{n}{9} - \pi\right)$. iv) $x(n) = e^{\frac{j7\pi n}{4}}$.

b) Determine whether the following signals belongs to energy or power signals. CO2 6 Marks

i) $x(n) = \left(\frac{1}{4}\right)^n u(n)$. (ii) $x(n) = \sin\left(\frac{\pi}{3}n\right)$. (iii) $x(n) = u(n)$.

(OR)

2. Find the impulse response and step response of a discrete-time linear time invariant system whose difference equation is given by CO2 14 Marks

$y(n) = y(n-1) + 0.5y(n-2) + x(n) + x(n-1)$.

UNIT-II

3. a) Find the DFT of sequence $x(n) = \{1, 0, 1, 0\}$ using DIF-FFT algorithm. CO4 4 Marks

b) Write the procedure to compute DIF - FFT for N=8 with neat sketch. CO4 10 Marks

(OR)

4. a) Write the advantages of FFT algorithm in computing DFT. CO1 4 Marks

b) Discuss Decimation in time and decimation in frequency algorithms in detail. CO1 10 Marks

UNIT-III

5. Design a digital Butterworth filter using bilinear transformation. The specifications of the desired Low Pass filter is. CO3 14 Marks

$0.9 \le |H(\omega)| \le 1; \quad 0 \le \omega \le \frac{\pi}{2}$

$|H(\omega)| \le 0.2; \quad 3\frac{\pi}{2} \le \omega \le \frac{\pi}{2}$

(OR)

6. a) For the analog transfer function $H(s) = \frac{2}{(S+1)(S+2)}$. Determine its digital transfer function using impulse invariance method and bilinear transformation method taking $T = 1$sec. CO3 10 Marks

b) What is warping effect in bilinear transformation? Explain in brief. CO1 4 Marks

UNIT-IV

7.	a)	Compare the characteristics of different types of windows used in the design of FIR filter.	CO2	10 Marks
	b)	What is Fourier series method of designing FIR filters?	CO1	4 Marks

(OR)

8.	a)	How to characterize Linear phase FIR filters using delay functions?	CO1	6 Marks
	b)	Show that the magnitude response $\|H(\omega)\|$ of an FIR filter is symmetric when impulse response is symmetric and N is even.	CO2	8 Marks

UNIT-V

9.		Develop a flow chart for implementing voltage regulation scheme in Buck-Boost converter using TMSLF2407 processor.	CO5	14 Marks

(OR)

10.		In a residential apartment, solar panel is required to rotate in steps by using a stepper motor. Interface the stepper motor with TMSLF2407 processor for controlling its speed in two phase half-step mode.	CO6	14 Marks

ELECTRICAL MACHINE DESIGN
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain various factors affecting the choice of the specific electric loading on a machine while designing.	CO1	7 Marks
	b)	Write the significance of leakage reactance calculation.	CO1	7 Marks
		(OR)		
2.	a)	List the factors that impose technical limitations on the design of electrical machines. Explain any three in brief.	CO1	7 Marks
	b)	A 700 kW, 700 V, 500 RPM, 6 pole DC generator is built with an armature diameter of 0.87 m and a core length of 0.32 m. The lap wound armature has 660 conductors. Calculate the specific magnetic and electric loadings.	CO2	7 Marks

UNIT-II

3.	a)	List and discuss the factors affecting the choice of specific electric loading of DC machine.	CO1	7 Marks
	b)	Determine suitable values for the number of poles, diameter and length for a 1000 kW, 500 V, and 300 RPM DC shunt generator. Assume average gap density of 1 Tesla and specific electric loading as 400 Ampere conductors / centimeter.	CO4	7 Marks
		(OR)		
4.	a)	Predict the performance of DC machine using design values.	CO1	7 Marks
	b)	Estimate the main dimensions of a 200 kW, 250 Volts, 6 pole, 1000 RPM DC generator to meet the specifications. The maximum value of flux density in the air gap is 0.87 Wb/m^2 and the ampere conductors per metre length of armature periphery are 31000; The ratio of pole arc to pole pitch is 0.67 and the efficiency is 91 percent; Assume that the ratio of length of core to pole pitch as 0.75.	CO3	7 Marks

UNIT-III

5.	a)	Describe the methods of cooling of transformers.	CO1	7 Marks
	b)	List the advantages and disadvantages of stepped cores. Give reasons for circular coils are widely used in transformers.	CO1	7 Marks
		(OR)		
6.	a)	Prepare the list of factors to be considered for selecting the cooling methods of a transformer.	CO1	7 Marks
	b)	Calculate the core and window areas required for a 1000 kVA, 6600 V/400 V, 50 Hz, single phase core type transformer. Assume a maximum flux density of 1.25 Wb/m^2 and a current density of 2.5 A/mm^2. Voltage per turn = 30 V. Window space factor = 0.32.	CO4	7 Marks

UNIT-IV

7.	a)	List and explain the design considerations for reducing harmonic torques in induction motor.	CO1	7 Marks
	b)	Find the values of diameter and length of stator core of a 7.5 kW, 415 V, 50 Hz, 4 pole, 1425 RPM, 3 phase delta connected induction motor. Bav=0.45 Wb/m², ac=2300 amp. cond./m, full load efficiency = 0.85, Power factor = 0.88. Assume (L/τ) value is unity.	CO4	7 Marks

(OR)

8.	a)	Explain the design of squirrel cage rotor.	CO5	8 Marks
	b)	Write about dispersion co-efficient applied to induction motors. Discuss its effect on maximum power factor and overload capacity of induction motors.	CO1	6 Marks

UNIT-V

9.	a)	Derive output equation of synchronous machine.	CO2	7 Marks
	b)	Evaluate the main dimensions of stator core for an 8 pole alternator rated at 3300 kVA, 300 V, 50 Hz. Assume specific electric loading to be 28000 amp. cond./m and magnetic loading to be 0.6 Wb/m². Pole arc is equal to 0.65 times pole pitch. Assume square pole.	CO4	7 Marks

(OR)

10.	a)	Explain the factors to be considered while selecting number of armature slots in the design of a synchronous machine.	CO1	7 Marks
	b)	Compute the main dimensions of a 12 MVA, 13.8 kV, 50 Hz, 1500 RPM, 3-phase star connected alternator. Bav= 0.6 Tesla, ac = 42000 amp. cond./m, peripheral speed = 80 m/s. Find also the maximum flux.	CO4	7 Marks

HVDC TRANSMISSION

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Distinguish AC and DC transmission in detail.	CO1	7 Marks
	b)	With neat sketches, explain the different kinds of dc links available in HVDC transmission.	CO1	7 Marks
		(OR)		
2.	a)	State the advantages and disadvantages of dc transmission system in terms of economics, reliability and performance.	CO6	7 Marks
	b)	Explain the applications of HVDC transmission.	CO6	7 Marks

UNIT-II

3.	a)	Comment on the choice of the converter configuration for a pulse number at converter station.	CO2	7 Marks
	b)	Elucidate the features of converter transformer and its influence on the HVDC converter station.	CO6	7 Marks
		(OR)		
4.	a)	Draw the schematic diagram of a 6 pulse gratez's circuit and explain its principle of operation.	CO1	7 Marks
	b)	Explain the individual characteristics of a HVDC inverter with sketches.	CO1	7 Marks

UNIT-III

5.	a)	What is meant by current margin between two stations in a HVDC link? Why is the inverter station operated as a constant voltage controller under normal conditions?	CO2	7 Marks
	b)	Comprehend constant extinction angle control with relevant illustrations.	CO1	7 Marks
		(OR)		
6.	a)	Illustrate the starting and stopping of a DC link.	CO1	7 Marks
	b)	Explain inverse cosine control scheme for firing pulse generations.	CO1	7 Marks

UNIT-IV

7.	a)	Enumerate the types of filters employed in HVDC converter station. Discuss them in detail.	CO1	7 Marks
	b)	What are the adverse effects of harmonics produced by the HVDC converters?	CO6	7 Marks
		(OR)		
8.	a)	Write short notes on the following: i) Telephone influence factor. ii) Harmonic distortion.	CO1	7 Marks
	b)	Discuss the effect of pulse number and overlap angle on harmonics generated by HVDC converters.	CO6	7 Marks

UNIT-V

9.		Explain the role of DC breakers in the protection of HVDC converter station. Also, mention their applications.	CO6	14 Marks
		(OR)		
10.	a)	Explain the basic principle of operation over voltages in converter station.	CO2	7 Marks
	b)	How do the components of a DC line protect the HVDC converter station?	CO6	7 Marks

ADVANCED CONTROL SYSTEMS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. Consider a unity feedback system with open loop transfer function given by $G(S) = \frac{5}{S(S+0.5)(S+1)}$ CO3 14 Marks

   Design a PD controller so that the phase margin (γ) of the system is 30^0 at a frequency (ω_n) of 1.2 rad/sec.

(OR)

2. a) With a suitable example, explicate the root locus approach for the design of lead compensator. CO1 8 Marks
   b) Derive the transfer function of lag compensator. CO2 6 Marks

UNIT-II

3. Convert the given transfer function model into controllable canonical form CO1 14 Marks

$$\frac{Y(S)}{U(S)} = \frac{S^3 + 8S^2 + 17S + 8}{S^3 + 6S^2 + 11S + 6}$$

(OR)

4. a) State and explain Kalman's principle of duality. CO1 8 Marks
   b) Check whether the second order state model given below is controllable and/or observable. CO2 6 Marks

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \end{bmatrix} = \begin{bmatrix} 0 & 1 \\ 1 & 1 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix} + \begin{bmatrix} 0 \\ 2 \end{bmatrix} U$$

UNIT-III

5. Analyze the stability of the system given by the second order differential equation by plotting the phase trajectory using isoclines method. CO2 14 Marks

$$\ddot{e} + \xi \omega_n \dot{e} + \omega_n^2 e = 0$$

where $\zeta = 0.15$, $\omega_n = 1$ rad/sec, e(0) = 1.5 and e(0)=0

(OR)

6. a) Explain the concept of 'Describing function' for analysis of non-linear systems. CO1 7 Marks
   b) Discuss the characteristics of non-linear systems. CO1 7 Marks

UNIT-IV

7. Using lyapunov theorem analyze the stability of the given state model CO5 14 Marks

$$\dot{X} = AX;\ A = \begin{bmatrix} -1 & 1 \\ -2 & -4 \end{bmatrix}$$

(OR)

8. a) Determine the stability of a non linear system governed by the state equations CO4 8 Marks

$$\dot{x}_1 = -x_1 + 2x_1^2 x_2$$

$$\dot{x}_2 = -x_2$$

b) Explicate the stability in the sense of Lyapunov. CO1 6 Marks

UNIT-V

9. Determine the state feedback gain matrix (K) for the state model defined by CO2 14 Marks

$$\dot{X} = AX + BU; A = \begin{bmatrix} 0 & 1 & 0 \\ 0 & 0 & 1 \\ -1 & 5 & -6 \end{bmatrix}; B = \begin{bmatrix} 0 \\ 0 \\ 1 \end{bmatrix}$$

with the desired poles at $S = -2 \pm j4$ and $S = -10$.

(OR)

10. a) What are the necessary conditions for arbitrary pole placement? CO1 6 Marks

b) Derive the reduced order state equations from the full order observer. CO2 8 Marks

CODE No.: 16BT60210 SVEC-16

SPECIAL ELECTRICAL MACHINES
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What is meant by half stepping? Explain how it is achieved in a 2- phase 2- Pole Permanent magnet stepper motor.	CO1	7 Marks
	b)	Sketch and explain the static and dynamic characteristics of stepper motor.	CO1	7 Marks
		(OR)		
2.	a)	Sketch the closed loop control circuit of a 2-phase hybrid stepper motor. Discuss the working of various blocks of this control circuit.	CO1	10 Marks
	b)	Discuss about applications of stepper motor in computer peripherals.	CO6	4 Marks

UNIT-II

3.	a)	How Switched Reluctance Motor is different from Variable reluctance stepper motor?	CO2	5 Marks
	b)	From the fundamentals, derive the expression for torque developed in a switched reluctance motor.	CO2	9 Marks
		(OR)		
4.	a)	A switched reluctance motor with six stator poles and four rotor poles has a stator pole arc of 30° and a rotor pole arc of 32°. The aligned inductance is 10.7 mH and the unaligned inductance is 1.5 mH. Saturation can be neglected. Sketch the L-θ profile. Calculate the instantaneous torque when the rotor is 30° before the aligned position and the phase current is 7 A. Neglect fringing.	CO4	10 Marks
	b)	What is the need for sensing the rotor position of Switched reluctance motor? Explain how hall probes are useful in rotor position sensing with the help of Hall effect.	CO5	4 Marks

UNIT-III

5.	a)	Compare Synchronous Reluctance Motor (SyRM) with Switched Reluctance Motor (SRM).	CO2	5 Marks
	b)	A 3-phase, 4 Pole, 50 Hz, 400V star connected synchronous reluctance motor has direct axis and quadrature axis synchronous reactances of 8Ω and 2Ω respectively. For a load torque of 80 N-m, find load angle, line current and power factor. Neglect armature resistance and mechanical losses.	CO4	9 Marks
		(OR)		
6.	a)	Explain the constant direct axis current control of Synchronous Reluctance motor with the help of a block diagram.	CO1	7 Marks
	b)	Discuss the different rotor structures of Synchronous reluctance motor and compare them.	CO1	7 Marks

UNIT-IV

7.		Perform the magnetic circuit analysis of a three phase BLDC motor and hence derive the expression for Permeance coefficient.	CO2	14 Marks

(OR)

8.	a)	The below figure shows a magnet used in Magnetic Resonance (MR) experiments for non-invasive medical diagnosis. Calculate the flux-density in the work space if the permanent magnet is ferrite with a remanent flux-density of 0.4 T and a straight demagnetization characteristic with recoil permeability of 1.0.	CO4	7 Marks

	b)	Explain the constructional details and principle of operation of BLDC square wave motor.	CO1	7 Marks

UNIT-V

9.	a)	The frequency of voltage applied to a linear induction motor is 50 Hz. The pole pitch of its double-sided primary is 10 cm. Find its synchronous velocity.	CO4	4 Marks
	b)	Explain the constructional details and working of a transverse flux linear induction motor.	CO1	10 Marks

(OR)

10.	a)	Develop the equivalent circuit of a linear induction motor at standstill and running conditions.	CO3	6 Marks
	b)	The following data are given for a linear induction motor: Supply frequency=25 Hz, Input power =6 kW, Stator copper loss and iron loss=1.2 kW, Velocity of the motor=2.4 m/s, Pole pitch=0.6 cm. Find the gross mechanical power developed and thrust developed.	CO4	8 Marks

CAD/CAM
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Briefly describe the steps involved in CAD design process.	CO1	10 Marks
	b)	Classify the CAD standards.	CO1	4 Marks
		(OR)		
2.		Differentiate between product cycle in conventional and computerized manufacturing systems with the help of neat diagrams.	CO2	14 Marks

UNIT-II

3.		Elucidate the Bresenham's Line algorithm in detail.	CO5	14 Marks
		(OR)		
4.	a)	Explain in detail about 2D transformations.	CO1	7 Marks
	b)	Illustrate the Constructive Solid Geometry (CSG) in detail.	CO4	7 Marks

UNIT-III

5.	a)	Discuss the feedback devices used in CNC.	CO2	7 Marks
	b)	What is Canned cycle? Explain it with an example.	CO1	7 Marks
		(OR)		
6.	a)	Sketch and explain automatic tool changers.	CO3	7 Marks
	b)	Write a short note on Preparatory and Miscellaneous functions.	CO1	7 Marks

UNIT-IV

7.	a)	Briefly explain the Opitz coding system generally used in group technology.	CO6	10 Marks
	b)	List out the benefits of GT.	CO1	4 Marks
		(OR)		
8.		Enumerate the difference between retrieval type and generative type CAPP systems. List down the merits and de-merits of each type.	CO2	14 Marks

UNIT-V

9.	a)	Elucidate the process of SLA in rapid prototyping.	CO5	7 Marks
	b)	Name the benefits of CIM.	CO1	7 Marks
		(OR)		
10.		List out various types of CMM. Explain each of them in detail with neat sketches.	CO1	14 Marks

HEAT TRANSFER
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the importance of Thermal Conductivity.	CO1	6 Marks
	b)	An immersion water heater of surface area 0.1 m^2 and rating 1 KW is designed to operate fully submerged in water. Estimate the surface temperature of the heater when the water is at 40^0C and the heat transfer coefficient is 300 W/m^2K. If this heater is by mistake used in air at 400C with h= 9 W/m^2K, what will be its surface temperature?	CO5	8 Marks
		(OR)		
2.		Derive the general two-dimensional unsteady state heat conduction equation for an isotropic solid cylindrical rod with internal heat generation. Simplify the obtained equation to Poisson's equation, Fourier's Equation and Laplace equation.	CO2	14 Marks

UNIT-II

3.		Derive an expression of Temperature distribution through a infinitely long rectangular fin by stating its assumptions. Also estimate the heat flow, Efficiency and Effectiveness through the fin.	CO5	14 Marks
		(OR)		
4.		A metallic sphere of radius 10mm is initially at a uniform temperature of 400^0C. It is heat treated by first cooling it in air(h=10 W/m^2K) at 20^0C until its central temperature reaches 335^0C. It is then quenched in a water bath at 20^0C with h= 600 W/m^2K until the center of the sphere cools from 335^0C to 50^0C. Compute the time required for cooling in air and water for the following physical properties of the sphere. P = 3000 kg/m^3, C_p = 1000 J/kg-K, K=20W/m K, $\alpha = 6.66 \times 10^{-6}$ m^2/s. Also calculate the surface temperature at the end of cooling in water.	CO3	14 Marks

UNIT-III

5.	a)	Briefly explain the concept of heat transfer by free convection	CO1	7 Marks
	b)	A horizontal plate 1 m x 0.8 m is kept in a water tank with the top surface at 60^0C providing heat to warm stagnant water at 20^0C. Determine the value of convection coefficient.	CO2	7 Marks
		(OR)		
6.		Water at 60^0C enters a tube of 2.54 cm diameter at a mean velocity of 2 cm/s. Calculate the exit water temperature if the tube is 3.0 m long and wall temperature is constant at 80^0C.	CO2	14 Marks

UNIT-IV

7.		In a counter flow double pipe heat exchanger, oil is cooled from 85^0C to 55^0C by water entering at 25^0C. The mass flow rate of oil is 9,800 kg/h and specific heat of oil is 2000 j/kg K. the mass flow rate of water is 8,000 kg/h and specific heat of water is 4180 j/kg K. Determine the heat exchanger area and heat transfer rate for an overall heat transfer coefficient of 280 W/m^2 K.	CO5	14 Marks

(OR)

8.		Saturated steam, at 120^0C condenses on a 2cm OD vertical tube which is 20cm long. The tube wall is maintained at a temperature of 119^0C. Calculate the average heat transfer coefficient and the thickness of the condensate film at the base of the tube. Assume Nusselt solution is valid.	CO2	14 Marks

UNIT-V

9.	a)	State and explain Kirchoff's identity. What are the conditions under which it is applicable?	CO4	7 Marks
	b)	Two parallel grey planes with emissivities of 0.8 and 0.7 are maintained at 800^0C and 1500^0C. What is the net radiant energy exchange? What would be the reduction in heat transfer, if a radiation shield of polished aluminum (Emissivity = 0.04) is placed between them?	CO4	7 Marks

(OR)

10.	a)	Distinguish between a black body and grey body.	CO2	6 Marks
	b)	Estimate the solar radiation on a plate normal to the sun rays. Assume the sun to be a black body at a temperature of 55200C. The diameter of the sun is 1.39×10^6Km and its distance from the earth is 1.5×10^8km.	CO3	8 Marks

NON-CONVENTIONAL ENERGY SOURCES
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the depletion process of solar radiation as it passes through the atmosphere to reach the surface of the earth.	CO1	10 Marks
	b)	List the various non-conventional energy sources.	CO2	4 Marks
		(OR)		
2		Estimate the monthly average of daily global radiation on a tilted surface.	CO3	14 Marks

UNIT-II

3	a)	Explain the basic components of a solar collector and its working principle.	CO2	8 Marks
	b)	How is the performance of a flat plate collector evaluated?	CO2	6 Marks
		(OR)		
4		Enumerate and explain in brief the different types of concentrating type collectors.	CO2	14 Marks

UNIT-III

5	a)	Explain in detail about the passive Solar Space heating System.	CO3	10 Marks
	b)	What do you mean by a Solar Energy storage system and how is it broadly classified?	CO3	4 Marks
		(OR)		
6	a)	Explain the different maximum power techniques used along with Solar PV System.	CO3	7 Marks
	b)	Describe the application of solar energy for the solar refrigeration.	CO5	7 Marks

UNIT-IV

7	a)	Discuss on wind energy potential in India and its growth scenario.	CO5	7 Marks
	b)	Explain the main considerations in selecting a site for wind generators.	CO4	7 Marks
		(OR)		
8	a)	Discuss the functioning of a single stage standard rate anaerobic digester.	CO3	10 Marks
	b)	Identify the different biomass energy resources. What is the energy yield from each of them?	CO4	4 Marks

UNIT-V

9	a)	Explain the efforts being done in India for utilizing geothermal energy as an alternative source of energy.	CO6	10 Marks
	b)	What principles guide in the location of a geothermal power station?	CO6	4 Marks
		(OR)		
10		Discuss the theory and working principle of ocean thermal energy conversion system. Also mention its limitations and applications.	CO4	14 Marks

GAS TURBINES AND JET PROPULSION
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain Back work Ratio in Gas turbines.	CO1	4 Marks
	b)	The air enters the compressor of an open cycle gas turbine at a constant pressure at 1bar and 20^0C. The pressure of air after compression is 4bar. The isentropic efficiency of compressor and turbine are 80 % and 85 %. The air fuel ratio is 90:1. If the flow rate is 3 kg/sec; i) Evaluate the power developed. ii) Thermal Efficiency of the cycle. C_p=1kJ/kg, C_v= 41800 kJ/kg and γ=1.4.	CO2	10 Marks

(OR)

2.	a)	Illustrate the effect of regeneration on gas turbine power plant with PV and TS diagrams.	CO1	6 Marks
	b)	An Air standard regenerative gas turbine cycle the pressure ratio is 5. Air enters the compressor at 1bar 300K and leaves at 490K. The maximum temperature of the cycle is 1000K. Estimate the cycle efficiency, Given the efficiency of the regenerator and adiabatic efficiency of turbine is 80%. Assume the air ratio for specific heat is 1.4. Show in T-S Chart.	CO2	8 Marks

UNIT-II

3.		A centrifugal compressor running at 7000 r.p.m delivers 500 m^3/min of free air. The air is compressed from 1 bar and 20°C. To a pressure ratio of 4 with an isentropic efficiency of 0.85. Blades are radial at outlet of impeller and the flow velocity of 60 m/s may be assumed constant .The outer radius of the impeller is twice the inner and slip factor may be assume as 0.9. Evaluate the: i) Final temperature of air. ii) The theoretical power. iii) Inner diameter at inlet and outlet. iv) Breadth of the impeller at inlet. v) Impeller blade angle at inlet. vi) Diffuser blade angle at outlet.	CO2	14 Marks

(OR)

4.	a)	Illustrate the working of centrifugal compressor with neat sketch.	CO2	7 Marks
	b)	Explain the how a centrifugal compressor impeller is designed.	CO2	7 Marks

UNIT-III

5.	a)	What are the basic requirements of a combustion chamber? Explain.	CO1	7 Marks
	b)	Explain the process of combustion in gas turbine combustion chambers.	CO3	7 Marks

(OR)

6.		Explain the combustion chamber geometry bringing out the various zones that play a part in the process of combustion with a neat sketch.	CO3	14 Marks

UNIT-IV

7.	a)	Explain the working of Turbo Propulsive Jet engine with neat sketch.	CO1	7 Marks
	b)	Discuss the terms propulsive efficiency and overall efficiency.	CO4	7 Marks

(OR)

8.	a)	Outline the Basic cycle for Turbo Jet engine with TS Chart.	CO1	7 Marks
	b)	What are the advantages and disadvantages of ram jet engine and what are its applications?	CO4	7 Marks

UNIT-V

9.	a)	Draw a schematic diagram of a liquid propellant rocket and explain its working. What are the applications of this type of rocket?	CO1	7 Marks
	b)	Briefly describe the two types of solid propellant rocket.	CO5	7 Marks

(OR)

10.		Draw a schematic diagram of a liquid propellant rocket. What are the different systems of injecting liquid propellant into the combustion chamber?	CO5	14 Marks

HYDRAULICS AND PNEUMATICS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	State Pascal's law and explain in details about the application of Pascal's law with neat sketch.	CO1	5 Marks
	b)	Explain with neat sketch of the basic hydraulic system and its Components.	CO2	9 Marks
		(OR)		
2.	a)	Explain the working principle of external Gear pump and Internal Gear pump with neat sketch.	CO1	8 Marks
	b)	Explain the working principle following types of cylinders. i) Single acting cylinder. ii) Double acting cylinder.	CO2	6 Marks

UNIT-II

3.	a)	Explain the construction and working of pilot operated sequence valve.	CO2	7 Marks
	b)	Explain with a neat sketch the working of shuttle valve with symbolic representation.	CO2	7 Marks
		(OR)		
4.	a)	Explain the working principle of following. i) 3/2 way valve. ii) 4/2 way valve. iii) 4/3 way valve.	CO3	8 Marks
	b)	Sketch and explain commonly used 3-position 4-way direction control valves.	CO3	6 Marks

UNIT-III

5.		Sketch and explain construction and principle of operation of a quick exhaust valve.	CO1	14 Marks
		(OR)		
6.	a)	Discuss the working principle of an air compressor.	CO2	7 Marks
	b)	What are flow control valves? Draw graphical symbols of F.C.V.	CO4	7 Marks

UNIT-IV

7.	a)	Discuss in detail the considerations taken while designing pneumatic circuits.	CO3	7 Marks
	b)	Explain with block diagram the components present in a PLC and give their functions.	CO3	7 Marks
		(OR)		

8.	A double acting pneumatic cylinder is required to provide the following operation: Fast extension till the mid stroke, slow extension till the end of stroke and on sensing the stroke end provides rapid return. Develop a pneumatic circuit employing shuttle valve and suitable flow control valves.	CO6	14 Marks

UNIT-V

9.	Explain the working principle of pilot assisted solenoid control of directional control valve with a neat sketch. Illustrate the graphical symbol of the valve.	CO5	14 Marks

(OR)

10.	Briefly explain the use of logic gates in pneumatic applications. Explain with any one practical example.	CO3	14 Marks

ANTENNAS AND WAVEGUIDES
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Derive the expressions for the fields in rectangular waveguide in case of Transverse Magnetic (TM) wave.	CO2	7 Marks
	b)	Show that for a TE_{10} mode, a frequency of 6 GHz will pass through the waveguide of dimensions a=1.5cm and b=1cm. If a dielectric with $\varepsilon_r = 4$ is inserted into the waveguide.	CO4	7 Marks

(OR)

2.	a)	Consider a rectangular waveguide with a/b = 2, a = 2.29 cm, $\mu_r = 1$ and ε_r=2.5. Find out the cutoff wavelength, cutoff frequency for TE_{10}, TM_{11} mode.	CO4	7 Marks
	b)	Explain in brief about strip line transmission lines.	CO1	7 Marks

UNIT-II

3.	a)	An infinitesimal electric dipole of constant current Io is placed symmetrically about the origin and directed along z-axis. Derive the: i) Far-zone fields radiated by the dipole. ii) Directivity of the antenna.	CO6	10 Marks
	b)	How many distant point sources can a receiving antenna with directivity D resolve?	CO2	4 Marks

(OR)

4.	a)	Find the transmitter power required to operate a link with identical antennas of 25 dBi separated by 15 KM such that received power is -45 dBm and f = 5.8 GHz.	CO6	7 Marks
	b)	Calculate effective length and effective aperture area of antenna whose radiation resistance is 73Ω.	CO4	7 Marks

UNIT-III

5.	a)	Design a broad side array (array of any length) and develop the expression for null directions of the array.	CO3	8 Marks
	b)	Draw the radiation pattern of 4 - isotropic elements fed in phase, spaced λ/2 apart with the principle of pattern multiplication.	CO3	6 Marks

(OR)

6.	a)	Two isotropic point sources of unequal amplitude and any phase difference are separated by distance 'd'. Derive the expressions for the total field in the direction ϕ at a large distance 'r'.	CO2	7 Marks
	b)	Design a Yagi-Uda array having five elements operating at 250 MHz.	CO3	7 Marks

UNIT-IV

7.	a)	Suggest different feeding techniques of Microstrip patch antenna.	CO5	8 Marks
	b)	What are the advantages and limitations of Microstrip antennas?	CO1	6 Marks

(OR)

8.	a)	Formulate expression for BWFN, HPBW, Directivity and Gain for the large circular aperture with uniform illumination.	CO2	7 Marks
	b)	Describe the construction and basic principle of operation of a helical antenna. i) Normal mode of operation. ii) Axial mode of operation.	CO1	7 Marks

UNIT-V

9.	a)	Discuss a technique to measure the null directions of an antenna.	CO5	8 Marks
	b)	Write short notes on reciprocity in antenna measurements.	CO1	6 Marks

(OR)

10.	a)	Transmitting and receiving antennas operating at 1 GHz with gains of 20 and 15 dB, respectively, are separated by a distance of 1 km. Find the power delivered to the load when the input power is 150 W.	CO6	6 Marks
	b)	Apply gain transfer method for measuring gain of an antenna.	CO5	8 Marks

DIGITAL SIGNAL PROCESSING
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Classify discrete time systems with examples.	CO2	7 Marks
	b)	State and prove any two properties of DTFT.	CO2	7 Marks

(OR)

2.	a)	Explain the significance of frequency domain representation of discrete time signals and system.	CO4	7 Marks
	b)	Solve the difference equation $y(n) = x(n) + \frac{5}{6}y(n-1) - \frac{1}{6}y(n-2)$ for the input sequence $x(n) = \begin{cases} 3^n & n \geq 0 \\ 0 & n < 0 \end{cases}$. Assume that initial condition $y(n) = 0$ for $n < 0$.	CO2	7 Marks

UNIT-II

3.	a)	Synthesize $x(n)$ of $X(K) = \{4, 2, 0, 4\}$ using IDFT.	CO4	7 Marks
	b)	Derive and sketch the structure of Decimation in Frequency FFT algorithm for $N = 8$.	CO3	7 Marks

(OR)

4.	a)	What is DFT? Interpret role of DFT over the DTFT.	CO4	7 Marks
	b)	Derive and sketch the structure of decimation in time FFT algorithm for N = 8.	CO3	7 Marks

UNIT-III

5.	a)	Discuss transpose form of second order IIR system realizations.	CO2	7 Marks
	b)	Convert the following analog filter transfer function Bilinear Transformation method. $H(s) = 1/(s + 0.2)$ Consider T = 1 Sec.	CO4	7 Marks

(OR)

6.	a)	Design a digital butterworth filter using bilinear transformation. The specifications of the desired LP filter is $0.9 \leq \lvert H(\omega)\rvert \leq 1; \quad 0 \leq \omega \leq \frac{\pi}{2}$ $\lvert H(\omega)\rvert \leq 0.2; \; 3\frac{\pi}{2} \leq \omega \leq \frac{\pi}{2}$	CO3	7 Marks
	b)	Compare the characteristics of butter worth and chebyshev approximations.	CO2	7 Marks

UNIT-IV

7.	a)	Realization of the following system with minimum number of multipliers. $$H(z) = 1 + \frac{1}{3}z^{-1} + \frac{1}{4}z^{-2} + \frac{1}{4}z^{-3} + \frac{1}{3}z^{-4} + z^{-5}$$	CO4	7 Marks
	b)	Apply windowing technique to design a linear phase FIR highpass filter using hamming window with cut off frequency $Wc = 0.8\pi$ rad/sample and N = 7.	CO5	7 Marks

(OR)

8.	a)	Discuss the different realizations of FIR filter.	CO1	7 Marks
	b)	Design a linear phase FIR bandpass filter to pass frequencies in the range 0.4π to 0.6π rad/sample by taking 7 samples of hamming window.	CO5	7 Marks

UNIT-V

9.	a)	Why the P-DSPs have multiple address and data buses for internal memory and peripherals but have only a single address and data bus for external memory and peripherals? Give the reasons.	CO2	7 Marks
	b)	Discuss in detailed about pipelining of instruction execution in DSP processor.	CO1	7 Marks

(OR)

10.	a)	Discuss the modified bus structures and memory access schemes with supporting block diagrams.	CO1	7 Marks
	b)	Why MAC operations is implemented in hardware? Explain.	CO2	7 Marks

IMAGE PROCESSING

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Draw the Block diagram of Image Processing System and explain each block in detail.	CO1	8 Marks
	b)	Analyze the Performance of Haar Transform with kernel.	CO2	6 Marks
		(OR)		
2.	a)	Write the Properties of : i) Slant Transform. ii) KL Transform.	CO1	4 Marks
	b)	Derive the kernel for $N = 4$ using Discrete Cosine Transform.	CO3	10 Marks
		UNIT-II		
3.	a)	How Histogram Equalization is used in Modern Digital Image Processing.	CO6	7 Marks
	b)	Apply various techniques in image Sharpening and explain in brief.	CO5	7 Marks
		(OR)		
4.	a)	What are the techniques used in image processing to remove blurring in an image?	CO5	7 Marks
	b)	What are the applications of image enhancement in the society?	CO6	7 Marks
		UNIT-III		
5.	a)	Write a brief notes on Weiner Filtering?	CO1	7 Marks
	b)	Differentiate between enhancement and restoration processes. Present the restoration technique employing inverse filter.	CO2	7 Marks
		(OR)		
6.	a)	Design additive and multiplicative noise models.	CO1	7 Marks
	b)	Briefly explain the approach of inverse filtering method used for image restoration.	CO2	7 Marks
		UNIT-IV		
7.	a)	Write notes on image compression standards.	CO1	7 Marks
	b)	Develop an algorithm for 'Huffman coding' to compress an image.	CO3	7 Marks
		(OR)		
8.	a)	What is meant by Error-free compression? Discuss about variable-length coding and Token based coding.	CO1	7 Marks
	b)	What is the algorithm used in Arithmetic coding? Explain with an example.	CO3	7 Marks
		UNIT-V		
9.	a)	Explain RGB color model using Cartesian coordinate system with supporting diagram.	CO1	7 Marks
	b)	Identify various color models used in the digital representation of a color image.	CO4	7 Marks
		(OR)		
10.	a)	Write a short notes on: i) Color models. ii) Color image segmentation.	CO1	8 Marks
	b)	Suggest an operator to perform edge detection in 2-D and explain its significance.	CO4	6 Marks

TELECOMMUNICATION SWITCHING SYSTEMS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Summarize the block diagram of Elements of telecommunication systems.	CO1	7 Marks
	b)	Appraise the Principles of cross bar switching of telecommunication systems.	CO2	7 Marks
		(OR)		
2.	a)	Elaborate Time multiplexed time switching with the help of neat sketch.	CO1	7 Marks
	b)	Contrast the Classifications of switching systems.	CO2	7 Marks

UNIT-II

3.	a)	Estimate the need of Switching hierarchy and routing and also discuss the environmental issues pertaining to routing.	CO5	9 Marks
	b)	Examine the necessity of Numbering plan and charging plan.	CO6	5 Marks
		(OR)		
4.	a)	Assess the charging plan for telecommunication services.	CO5	7 Marks
	b)	Examine the necessity of Numbering plan and charging plan.	CO6	7 Marks

UNIT-III

5.	a)	A subscriber loop of 18km is to be supported from an exchange that uses a 40 V battery with a 400 short-circuit protection resistance. Electronic telephones are used as the subscriber instruments. Determine the wire gauge that needs to be used.	CO3	7 Marks
	b)	What are the advantages of common channel signalling over in channel signalling?	CO2	7 Marks
		(OR)		
6.	a)	During the busy hours, 1200 calls were offered to a group of trunks and six calls were lost. The average calls duration was 3 minutes find: i) The traffic offered. ii) The traffic carried. iii) The traffic lost. iv) The grade of service. v) The total duration of periods of congestion.	CO3	7 Marks
	b)	Distinguish Channel associated and channel non associated signalling.	CO2	7 Marks

UNIT-IV

7.	a)	Generalize ISDN standards and appraise in detail about Broadband ISDN.	CO6	7 Marks
	b)	Explain the Various switching techniques used for data transmission in PSTN.	CO4	7 Marks
		(OR)		
8.	a)	Elaborate basic rate and primary rate access to ISDN.	CO6	7 Marks
	b)	Name some services provided by ISDN and explain in detail.	CO4	7 Marks

UNIT-V

9.	a)	Discuss the functions of each SONET layer.	CO1	4 Marks
	b)	Discuss features of HFC Networks and explain in detail.	CO2	10 Marks
		(OR)		
10.	a)	Summarize the features of HFC Networks.	CO1	7 Marks
	b)	How does ADSL divide the band width of a twisted pair cable?	CO2	7 Marks

INFORMATION THEORY AND CODING

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

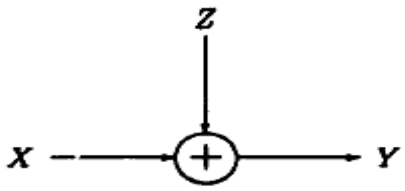
UNIT-I

1.	a)	Explain source coding theorem and develop equation for efficiency.	CO1	7 Marks
	b)	A discrete source generates independent symbols with probabilities 0.2, 0.25, 0.15, 0.15, 0.15 and 0.1. Determine the entropy of the source.	CO4	7 Marks
		(OR)		
2.	a)	List out the properties of Entropy.	CO1	7 Marks
	b)	Apply Shano-Fano coding procedure for the following message ensemble. Find entropy and efficiency. Take $M = 2$. $[X] = [x_1, x_2, x_3, x_4, x_5, x_6, x_7]$; $[P] = [0.4, 0.2, 0.12, 0.08, 0.08, 0.08, 0.04]$.	CO4	7 Marks

UNIT-II

3.	a)	Compute the channel capacity of the BSC shown in figure	CO2	7 Marks

	b)	Derive the channel capacity for Water filling channel.	CO5	7 Marks
		(OR)		
4.	a)	Compute the channel capacity of the following discrete memoryless channel:	CO5	8 Marks



Where $Pr\{Z = 0) = Pr\{Z = \alpha\} = 1/2$. The alphabet for x is $X = \{0, 1\}$ Assume that Z is independent of X.

	b)	Describe the tradeoff between bandwidth and signal to noise ratio using Shannon-Hartley theorem.	CO1	6 Marks

UNIT-III

5.		Design the decoder circuit diagram for (n, k) linear block code.	CO3	14 Marks
		(OR)		
6.		The parity check matrix of a particular (6, 3) block code is given as: H = [1 0 1 1 0 0 1 1 0 0 1 0 0 1 1 0 0 1]	CO3	14 Marks

i) Calculate all code words.
ii) Find the min. Distance between the code word.
iii) How many errors can be detected and corrected.
iv) Draw encoder diagram.
v) Suppose that the received code word is 110110, decode this code word.

UNIT-IV

7.	a)	Write about Viterbi algorithm and its applications.	CO6	7 Marks
	b)	Explain the sequential decoding algorithm with an example.	CO1	7 Marks

(OR)

8.	a)	Discuss some of Practical applications of Convolution codes.	CO6	7 Marks
	b)	The generator polynomial of a (7, 4) cyclic code is $g(x) = 1 + x + x^3$. Obtain all the code vectors for the code in non-systematic and systematic form.	CO4	7 Marks

UNIT-V

9.		Explain about types of concatenated codes with block diagram.	CO1	14 Marks

(OR)

10.		Design a (7, 3) RS decoder for a receiving vector R = 10000110111110101101111.	CO3	14 Marks

CODE No.: 16BT60409 SVEC-16

LIGHT WAVE COMMUNICATIONS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1.	a)	Determine the normalized frequency at 820nm for a step index fiber having a 25μm x 5m core radius, $n_1 = 1.48$ and $n_2 = 1.46$. i) How many modes propagate in this fiber at 820nm? ii) What percent of the optical power flows in the cladding?	CO4	5 Marks
	b)	Explain in detail about Materials used in fabrication of Optical fibers.	CO1	9 Marks

(OR)

2.	a)	A light wave is travelling in a semiconductor medium (GaAs) of refractive index 3.6. It is incident on a different semiconductor medium (AlGaAs) of refractive index 3.4 and the angle of incidence is 80^0. Conclude whether this can result in Total Internal Reflection.	CO4	6 Marks
	b)	Sketch and explain optical fiber structure.	CO1	8 Marks

UNIT-II

3.	a)	Find the radius of curvature R at which the number of modes decreases by 50% in a graded index fiber. For this fiber consider $\alpha=2$, $n_2=1.5$, $\Delta=0.01$, $a=25\mu m$ and wavelength of guided light is 1.3μm.	CO4	7 Marks
	b)	Two step index fibers exhibit the following parameters: (i) a multimode fiber with a core refractive index of 1.500, a relative refractive index difference of 3% and an operating wavelength of 0.82 μm; (ii) an 8 μm core diameter single-mode fiber with a core refractive index the same as (i), a relative refractive index difference of 0.3% and an operating wavelength of 1.55 μm. Estimate the critical radius of curvature at which large bending losses occur in both cases.	CO4	7 Marks

(OR)

4.	a)	A 6 km optical link consists of multimode step index fiber with a core refractive index of 1.5 and a relative refractive index difference of 1%. Estimate: (i) the delay difference between the slowest and fastest modes at the fiber output (ii) the **rms** pulse broadening due to intermodal dispersion on the link (iii) the maximum bit rate that may be obtained without substantial errors on the link assuming only intermodal dispersion (iv) the bandwidth–length product corresponding to (iii).	CO4	7 Marks
	b)	A 30 km long fiber at 1300 nm has an attenuation of 0.8dB/km. If 200μm power is launched into the fiber, find the output power in dBm and in watts.	CO4	7 Marks

UNIT-III

5.	a)	Develop an expression for Noise generated due to Avalanche Multiplication.	CO3	7 Marks
	b)	Discuss the LASER Diode Principle, modes and threshold conditions.	CO1	7 Marks

(OR)

6.	a)	If at the half power point $\lambda - \lambda_0$=2nm, design the spectral width σ of GaAs laser operating at 850nm. It has a 500μm length and a refractive index n=3.7. Also find the frequency and wavelength spacings.	CO3	6 Marks
	b)	Explain with relevant diagrams the basic principle of confinement of carriers optical power in the active region of double hetero junction LED.	CO1	8 Marks

UNIT-IV

7.	a)	Formulate the expressions for the maximum power coupled into a step index and graded index fibers.	CO2	8 Marks
	b)	Define Radiance. Illustrate the source output patterns.	CO1	6 Marks

(OR)

8.	a)	Derive an expression for calculating the amount of power coupling in to fiber from the optical source.	CO2	10 Marks
	b)	List the factors affecting the amount of power coupled into fiber from optical source.	CO1	4 Marks

UNIT-V

9.	a)	Suggest an analysis mechanism to determine the dispersion limitation of an optical fiber link.	CO5	7 Marks
	b)	List and explain the various Deployment Techniques for Optical Networks.	CO1	7 Marks

(OR)

10.	a)	Model power penalties in digital links.	CO5	6 Marks
	b)	Identify and justify the transmission modes suited for Optical Networks.	CO2	8 Marks

CODE No.: 16BT60501 SVEC-16

SOFTWARE TESTING
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Explain Software Testing Model with neat diagram.	CO1	8 Marks
	b)	Explain Software Testing as process. Justify?	CO2	6 Marks
		(OR)		
2.	a)	Define STLC and explain each step in detail.	CO1	8 Marks
	b)	Compare Positive and Negative testing.	CO2	6 Marks
		UNIT-II		
3.	a)	Distinguish between decision node and junction node.	CO2	7 Marks
	b)	Discuss about Cyclomatic Complexity in path testing.	CO3	7 Marks
		(OR)		
4.	a)	Explain data flow testing in detail.	CO1	6 Marks
	b)	Write a program to display the prime numbers up to a given number. Draw the control flow graph and calculate the cyclomatic complexity number for the given program.	CO4	8 Marks
		UNIT-III		
5.	a)	List and explain the elements of state testing.	CO1	7 Marks
	b)	Identify the possible states, inputs of a software process and draw its corresponding state table.	CO2	7 Marks
		(OR)		
6.	a)	Describe the need of state table. Explain the process of converting state table into test cases.	CO3	7 Marks
	b)	"Error Guessing is an ad hoc approach for testing". Comment on this statement.	CO1	7 Marks
		UNIT-IV		
7.	a)	Discuss the key components of test management.	CO1	7 Marks
	b)	List and explain the major activities of a testing group.	CO2	7 Marks
		(OR)		
8.	a)	List the differences between size oriented metrics and function point analysis metrics.	CO2	7 Marks
	b)	Explain the process of calculating function points of real time software.	CO4	7 Marks
		UNIT-V		
9.	a)	Identify the different parameters required for evaluating regression test selection techniques.	CO2	7 Marks
	b)	T contains 90 tests of which 20 are modification-revealing for P and P' and M selects 12 of these 20 tests, then calculate the inclusiveness of M relative to P, P' and T.	CO4	7 Marks
		(OR)		
10.	a)	Apply any regression testing tool and perform testing on login screen of gmail application.	CO5	7 Marks
	b)	Use any testing tool and insert standard checkpoints for flight application.	CO5	7 Marks

SOFT COMPUTING

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	State the terminologies of Artificial Neural Networks like weights, Bias, Theshold, Learningrate, Momentum factor and Vigilance Parameter.	CO1	7 Marks
	b)	Compare contrast biological neuron and artificial neuron.	CO1	7 Marks
		(OR)		
2.	a)	Implement OR function using Hebb network (consider bipolar inputs and targets).	CO5	7 Marks
	b)	With a flowchart explain the Hebb training algorithm.	CO3	7 Marks

UNIT-II

3.	a)	Find the weights required to perform the following classification using perceptron network. The vectors (1,1,1,1) and (-1,1,-1,1) are belonging to class(have target value 1), vectors(1,1,-1) and(1,-1,-1,1) are not belonging to the class so have target value -1.Assume learning rare as 1 and initial weight as 0.	CO5	10 Marks
	b)	Design the architecture of perceptron network.	CO1	4 Marks
		(OR)		
4.	a)	Discuss the importance of Perceptron network testing algorithm.	CO2	7 Marks
	b)	List the Perceptron learning rule.	CO1	7 Marks

UNIT-III

5.		Build aKohonen self-organizing map to cluster four given vectors, [0 0 1 1], [1 0 0 0], [0 1 1 0] and [0 0 0 1].The number of clusters to be formed is two. Assume an initial learning rate of 0.5.	CO6	14 Marks
		(OR)		
6.	a)	Build a counter_propagation network for approximating the functions: $f(x) = 1/x$ $f(x) = 7x^2$	CO6	8 Marks
	b)	Differentiate fast learning and slow learning.	CO2	6 Marks

UNIT-IV

7.	a)	Outline the importance of fuzzy sets.	CO1	6 Marks
	b)	Justify the following statement: "Partial membership is allowed in fuzzy sets.	CO1	8 Marks
		(OR)		
8.	a)	Design the fuzzy sets operations using Venn Diagram.	CO3	7 Marks
	b)	Compare and contrast classical logic and fuzzy logic.	CO4	7 Marks

UNIT-V

9.	a)	Determine image and inverse for the following interval $\underline{A} = [5, 3]$.	CO4	7 Marks
	b)	Mention the properties of performing addition and multiplication on intervals.	CO1	7 Marks
		(OR)		
10.	a)	With a neat flowchart, explain the operation of a simple genetic algorithm.	CO1	8 Marks
	b)	State the importance of genetic algorithm.	CO1	6 Marks

WIRELESS NETWORKS
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Draw and explain working principle of 3G systems.	CO1	10 Marks
	b)	Using QPSK modulation and convolution coding, the IS-95 digital cellular systems require 3dB < S_r < 9dB. The bandwidth of the channel is 1.25 MHz, and the transmission rate is R = 9600bps. Find the capacity of a single IS-95 cell.	CO5	4 Marks
		(OR)		
2.	a)	With neat sketch explain the CDMA systems.	CO1	10 Marks
	b)	Discuss about Near-Far problem in FDMA.	CO1	4 Marks

UNIT-II

3.	a)	Discuss about Ad Hoc and Infrastructure topology.	CO1	10 Marks
	b)	Why band splitting is not used in 2G cellular networks.	CO2	4 Marks
		(OR)		
4.	a)	How to increase the capacity of an analog cellular system without increasing the number of antenna sites?	CO2	7 Marks
	b)	Describe in detail about cellular hierarchy.	CO3	7 Marks

UNIT-III

5.	a)	Design the DFIR packet format specification.	CO3	8 Marks
	b)	Explain the MAC frame control field.	CO1	6 Marks
		(OR)		
6.	a)	What is the 802.11 MAC frames that has the type frame control code of 001000?	CO1	10 Marks
	b)	Identify the transmission techniques of WLAN standards.	CO3	4 Marks

UNIT-IV

7.	a)	Compare Soft and Hard handoffs.	CO2	8 Marks
	b)	With neat sketch explain the reverse traffic channel processing.	CO1	6 Marks
		(OR)		
8.	a)	How GPRS does provides variety of data rates.	CO2	6 Marks
	b)	Build the Reference architecture of GPRS.	CO6	8 Marks

UNIT-V

9.	a)	Identify the Protocol entities on WATM network.	CO4	10 Marks
	b)	Describe about mobility support of WATM.	CO1	4 Marks
		(OR)		
10.	a)	Draw and explain the topologies in the HIPERLAN-2	CO1	8 Marks
	b)	Differentiate between IEEE 802.11a and HIPERLAN-2.	CO2	6 Marks

ARM PROCESSORS AND PIC MICROCONTROLEERS
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) Using the instruction set reference sheets, write an ALP to move a 8 byte block of data from 100H to destination starting at 200H. CO4 8 Marks

   b) Analyze the following program and write the contents of registers, Ports, and corresponding memory location value in those locations accordingly step by step. CO2 6 Marks

```
MOVLB   0x4
MOVLW   H'00'
MOVWF   TRISB
MOVLW   0x66
IORLW   36H
BCF     PORTB,1
MOVWF   PORTB
BSF     PORTB,3
MOVWF   PORTB
MOVF    40H,1
RRNCF   40H,1,1
```

(OR)

2. a) Write an ALP to perform the following. CO4 6 Marks

   If(N_1Bit0 == 1)
   {N_2Bit3 = 0}
   else if {N_1Bit6 == 0}
   {N_3Bit4 = 1}.

   Assume N_2 = 10100101, N_3 = 11110000, N_1 = 11001100 being in locations of data RAM. For additional information use the Instruction set provided for reference.

   b) List the basic elements and registers of a PIC 18 microcontroller and explain their functionality. CO1 8 Marks

UNIT-II

3. a) Explain the timer structure in 8-Bit mode using suitable example program. CO1 7 Marks

   b) Write a program in assembly or C to read Port B and transmit the same serially and also on Port A using interrupts with clock frequency of 10 MHz and baud rate of 9600. For additional information refer to Register file summary provided for reference. CO5 7 Marks

(OR)

4.	a)	Select appropriate clock frequency and timer in required mode, write a program in assembly or C to generate a square wave on Port A Pin 3 using timer with a duty cycle of 30% with and without interrupt.	CO5	8 Marks
	b)	Explain the different registers used for serial communication.	CO1	6 Marks

UNIT-III

5.		Design an interfacing circuit and program to read keypad and convert to an ASCII value.	CO3	14 Marks

(OR)

6.	a)	Calculate the memory required and the time it takes to execute any one of the program given in this paper. Use the instruction set summary provided as reference.	CO6	7 Marks
	b)	Write a program to rotate the stepper motor by an angle of 306º. Assume step size of 1.8º.	CO4	7 Marks

UNIT-IV

7.	a)	Draw the block diagram of cortex M3 and explain the different units.	CO1	9 Marks
	b)	Present the history of ARM processors and their applications.	CO2	5 Marks

(OR)

8.	a)	Explain the different registers of ARM cortex M3 in exception modes.	CO2	8 Marks
	b)	Explain the basic structure of memory system of ARM cortex M3 using a suitable diagram.	CO1	6 Marks

UNIT-V

9.	a)	Show how ARM provides features to control the updation of flags and conditional execution of instructions using suitable examples. Show the example for cases where flags are updated, and when not updated. Also case when instructions get executed, and when skipped.	CO1	6 Marks
	b)	Write an ALP to perform addition of two numbers in arm mode and then switch to thumb mode to perform subtraction.	CO4	8 Marks

(OR)

10.	a)	Demonstrate the use of the following instructions using suitable example. Stack operations - Full decrement, Full increment, Empty decrement and Empty increment with suitable example.	CO1	8 Marks
	b)	Demonstrate how a arm mode is beneficial as compared to thumb mode using suitable examples.	CO2	6 Marks

PROCESS CONTROL INSTRUMENATION
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What are the process elements? Explain each.	CO1	7 Marks
	b)	Determine the transfer function of a single tank liquid level system.	CO2	7 Marks

(OR)

2.	a)	Evaluate the transfer function of two single tanks liquid level systems are connected in interacting.	CO2	10 Marks
	b)	Explain servo problem with an example.	CO1	4 Marks

UNIT-II

3.	a)	Explain the working of Electronic PID controller with a neat diagram.	CO1	7 Marks
	b)	Explain the working of Pneumatic proportional integral controller with neat diagram.	CO1	7 Marks

(OR)

4.	a)	Plot a graph of a PI controller output as s function of time for given error signal shown in figure. Assume that the Proportional gain $K_p = 5$, Integral gain $K_I = 0.1\text{sec}^{-1}$ and $p_I(0) = 20\%$.	CO3	8Marks

	b)	Explain the working of Pneumatic proportional integral Derivative controller with neat diagram.	CO1	6 Marks

UNIT-III

5.	a)	What is meant by controller tuning?	CO1	7 Marks
	b)	Discuss the two classes of dynamic performance criteria. Give physical examples and demonstrate how different criteria lead to different controller design.	CO1	7 Marks

(OR)

6.	a)	What are the relative advantages and disadvantages of time integral criteria ISE, IAE and ITAE? How would you select the most appropriate for a particular application?	CO1	7 Marks
	b)	"Time integral criteria lead to unique solution to determine the controller parameters". Justify.	CO1	7 Marks

UNIT-IV

7.	a)	What is an actuator? List the types of pneumatic actuators.	CO1	6 Marks
	b)	Identify the appropriate control valve used for the fluids contacting solid matter. Explain it with a neat diagram.	CO6	8 Marks

(OR)

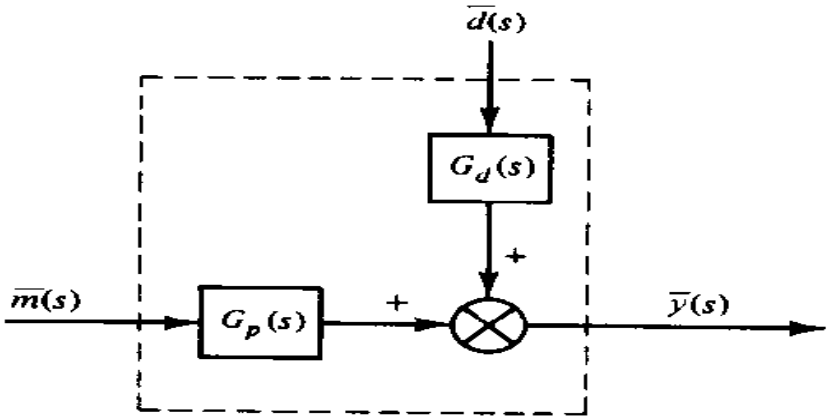
8.	a)	Write an importance of a valve positioner.	CO1	7 Marks
	b)	Identify the appropriate control valve with one port opening and one seat plug. Explain it with a neat diagram.	CO5	7 Marks

UNIT-V

9.	a)	List the applications of cascade control system. Explain any one with neat diagram.	CO6	7 Marks
	b)	Consider a process with one controlled output and two active manipulated variables. Under what conditions could you use both manipulated variables to control the single output?	CO6	7 Marks

(OR)

10.	a)	Compare the cascade control and signal loop control systems.	CO1	4 Marks
	b)	Design the feed forward controller of a given process.	CO3	10 Marks



CODE No.: 16BT61005 SVEC-16

OPTO-ELECTRONICS AND LASER INSTRUMENTATION
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the operation of step index and graded index multimode fibers in detail.	CO1	7 Marks
	b)	Explain the historical development of optical fibers with the help of Electromagnetic spectrum.	CO1	7 Marks
		(OR)		
2.	a)	Differentiate PIN photodiode and avalanche photodiode with respect to construction and working.	CO2	7 Marks
	b)	List the optical parameters of optical fiber and derive expression for Numerical Aperture.	CO1	7 Marks

UNIT-II

3.	a)	"Polarization maintaining fibers have linear polarization state". Justify it	CO2	4 Marks
	b)	Compare intensity modulated sensor and interferometric fiber optic sensor with examples.	CO2	10 Marks
		(OR)		
4.	a)	Design an optical fiber sensor for liquid level measurement.	CO3	7 Marks
	b)	Describe the real time applications of fiber for acceleration measurement.	CO4	7 Marks

UNIT-III

5.	a)	State the properties of laser and explain each in detail.	CO1	4 Marks
	b)	With the aid of energy band diagram, explain He-Ne laser in detail.	CO1	10 Marks
		(OR)		
6.	a)	Explain mode locking which gives an engineering solution for the lasers in the medical fields.	CO6	7 Marks
	b)	Design a solid state laser system which uses ruby rod as source and electrical pumping mechanism.	CO3	7 Marks

UNIT-IV

7.	a)	With neat sketch, explain Lasers in diagnostics in detail.	CO1	7 Marks
	b)	Discuss the usage of advanced lasers in material processing applications	CO5	7 Marks
		(OR)		
8.	a)	Define endoscopy. Specify the requirements of laser endoscopy and design a laser setup to perform laser endoscopy.	CO3	7 Marks
	b)	Explain the principle and working of lasers in photo medicine.	CO1	7 Marks

UNIT-V

9.	a)	Specify the importance of optical modulators in industries; differentiate acousto-optic effect and pockel's effect.	CO2	10 Marks
	b)	Examine and differentiate photography and holography.	CO1	4 Marks
		(OR)		
10.	a)	Explain the process of 3-D image construction and reconstruction with neat sketch.	CO1	10 Marks
	b)	Enumerate different applications of holography.	CO1	4 Marks

AIRCRAFT INSTRUMENTATION
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Give a brief account on primary control surfaces in an aircraft.	CO1	7 Marks
	b)	What are the secondary control surfaces and their functionalities?	CO1	7 Marks
		(OR)		
2.	a)	Discuss the three forces and moments experienced by an aircraft.	CO1	7 Marks
	b)	Define the angle-of-attack. Differentiate between angle of attack and pitch angle.	CO2	7 Marks

UNIT-II

3.		Explain with a diagram, how the combined pitot-static tube is used to measure the total, static and dynamic pressures in an aircraft.	CO5	14 Marks
		(OR)		
4.		Discuss about atmospheric variations with altitude.	CO2	14 Marks

UNIT-III

5.		Analyze the principle and working of Ring laser gyros with a neat sketch.	CO3	14 Marks
		(OR)		
6.		How does a gyro horizon work, explain with a diagram and draw different flight altitude displays?	CO2	14 Marks

UNIT-IV

7.	a)	Calculate the horse power if the speed of an engine is 1600 RPM and torque is 3000 Ft-lbs.	CO4	4 Marks
	b)	Discuss the various methods of measuring the engine's shaft speed.	CO5	10 Marks
		(OR)		
8.	a)	Calculate the horse power if the speed of an engine is 1520 RPM and torque is 3100 Ft-lbs.	CO4	4 Marks
	b)	Describe with an appropriate diagram the operation of shaft-speed measurement using a suitable instrument.	CO5	10 Marks

UNIT-V

9.		Draw the dial of horizontal situation indicator and explain the different of HIS display.	CO1	14 Marks
		(OR)		
10.		With suitable diagrams, explain Flight director system.	CO1	14 Marks

CODE No.: 16BT61041 SVEC-16

PROGRAMMABLE LOGIC CONTROLLERS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	List and describe the various types of solid-state memory used in a PLC CPU.	CO1	7 Marks
	b)	Write major steps in creating a PLC program for an industrial automation.	CO1	7 Marks
		(OR)		
2.		Design a ladder logic diagram for spray process system.	CO3	14 Marks

UNIT-II

3.	a)	Describe about input group registers scheme with neat diagram.	CO1	7 Marks
	b)	Apply PLC counter for the control of Dual control application this circuit would monitor the proper counts.	CO2	7 Marks
		(OR)		
4.	a)	Illustrate output group registers scheme with neat diagram.	CO1	7 Marks
	b)	There are three mixing devices on a processing line: A, B and C. After the process begins, mixer A is start after 7 seconds elapse. Next mixer b is to start 3.6 seconds after A. All then remain on until a master enable switch is turned off. Construct a ladder diagram to accomplish this operation.	CO4	7 Marks

UNIT-III

5.	a)	Illustrate a process requiring a jump with nonreturn instruction and draw the ladder logic diagram.	CO1	7 Marks
	b)	Describe SWEEP function and its application.	CO1	7 Marks
		(OR)		
6.	a)	Examine process requiring a jump with return instruction and draw the ladder logic diagram.	CO2	7 Marks
	b)	Describe the CLEAR function and its application.	CO1	7 Marks

UNIT-IV

7.		Develop to automate the paint spray process after a certain process count is reached. After a count of 15 from a sensor, a paint spray is to run for 25 seconds.	CO6	14 Marks
		(OR)		
8.	a)	Explain how PLC matrix functions help to reduce the program length.	CO1	7 Marks
	b)	Compare the different functions available in PLC for changing a REGISTER BIT STATUS? Explain each of them.	CO2	7 Marks

UNIT-V

9.	a)	Explain how the FORCE mode is used for PLC program testing and analysis.	CO1	7 Marks
	b)	Compare discrete and analog operation of a PLC.	CO2	7 Marks

(OR)

10.	a)	Interpret the data flow and number conversions involved in PLC analog operation.	CO1	7 Marks
	b)	Name one application each for which a mini PLC may be appropriate. Provide Justifications for your choice.	CO5	7 Marks

CLOUD COMPUTNG

[Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What is purpose of Virtualization? Explain characteristics and benefits of Virtualization.	CO1	7 Marks
	b)	Explain Pros and Cons of Virtualization Technology.	CO1	7 Marks
		(OR)		
2.		Explain features and services of Hyper-V Virtualization Technology.	CO1	14 Marks

UNIT-II

3.	a)	What is Cloud Computing? Explain different types of services in cloud computing with suitable examples.	CO1	7 Marks
	b)	Compare and contrast benefits of Cloud Computing.	CO2	7 Marks
		(OR)		
4.	a)	Explain various components of Cloud Computing Architecture.	CO1	7 Marks
	b)	Categorize Infrastructural Models of Cloud Computing.	CO2	7 Marks

UNIT-III

5.		Analyze various clouds of Data Center Technologies.	CO2	14 Marks
		(OR)		
6.		Outline various features and services of Capacity Planning in Cloud.	CO1	14 Marks

UNIT-IV

7.	a)	Distinguish between IaaS *vs.* SaaS.	CO2	7 Marks
	b)	Develop a SaaS based cloud e-Ticket application using Salesforce.com cloud.	CO4, CO6	7 Marks
		(OR)		
8.		Discuss various recovery methods for Cloud Disaster applications.	CO1	14 Marks

UNIT-V

9.		Create employee web home page using Google App Engine Cloud.	CO5	14 Marks
		(OR)		
10.		Develop and list various steps to create bucket with 4GB storage space using Amazon EC2 Cloud.	CO3	14 Marks

AD-HOC AND WIRELESS SENSOR NETWORKS
[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Identify and illustrate some of the important issues in pricing for multi-hop wireless communication.	CO3	7 Marks
	b)	Explain a common method used in alleviating the hidden terminal problem at the MAC layer.	CO1	7 Marks
		(OR)		
2.	a)	List out the goals to be met while designing a medium access control (MAC) protocol for Ad-hoc wireless networks.	CO1	7 Marks
	b)	Explain about MACAW (A Media Access Protocol for Wireless LANs).	CO1	7 Marks

UNIT-II

3.	a)	Classify the routing protocols for Ad-hoc wireless networks.	CO2	4 Marks
	b)	Explain how route establishment and route maintenance takes place in destination sequenced distance-vector routing protocol (DSDV).	CO1	10 Marks
		(OR)		
4.	a)	Identify some of the key issues involved in QoS routing in Ad-hoc networks.	CO3	6 Marks
	b)	Explain about Dynamic source routing protocol (DSR).	CO1	8 Marks

UNIT-III

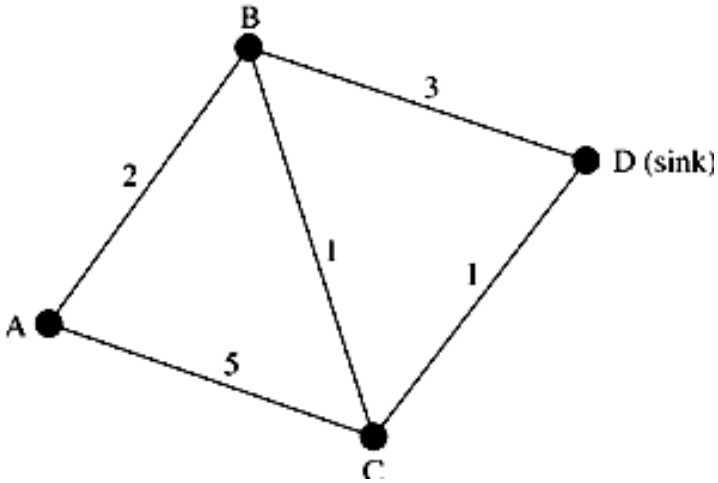
5.		List the issues and challenges that TCP experiences when used in Ad-hoc wireless networks.	CO1	14 Marks
		(OR)		
6.	a)	Assume that when the current size of the congestion window is 48 KB, the TCP sender experiences a timeout. What will be the congestion window size if the next three transmission bursts are successful? Assume that MSS is 1 KB. Consider (i) TCP Tahoe and (ii) TCP Reno.	CO2, CO3	8 Marks
	b)	Discuss the issues to be considered while designing a transport layer protocol for Ad-hoc wireless networks.	CO1	6 Marks

UNIT-IV

7.	a)	Outline The Classification of Energy Management Schemes.	CO5	7 Marks
	b)	Explain in detail about Heterogeneous battery-scheduling technique**.**	CO1	7 Marks
		(OR)		
8.	a)	Illustrate power-aware techniques handled at the TCP/IP and the application layers of the protocol stack.	CO3	7 Marks
	b)	Explain Network layer -Power-Saving Localized Routing (SP-Power) Algorithm.	CO1	7 Marks

UNIT-V

9.	a)	List out the applications of sensor networks.	CO1	6 Marks
	b)	Consider the network topology shown in Figure below. The numbers on the edges indicate the cost of the particular hop. Show the step-wise working of the cost-field approach to determine optimal paths, if the sink is *D*.	CO3, CO5	8 Marks



(OR)

10.	a)	Compare wireless ad-hoc and sensor networks.	CO2	7 Marks
	b)	List out the Issues and Challenges in Designing a Sensor Network.	CO1	7 Marks

CYBER SECURITY AND LAWS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Categorize cyber criminals and explain.	CO2	7 Marks
	b)	State the Indian legal perspective on cyber crimes.	CO1	7 Marks
		(OR)		
2.	a)	Categorize the Cyber laws under ITA 2000.	CO2	8 Marks
	b)	Categorize the various cyber crimes under IPC.	CO2	6 Marks

UNIT-II

3.	a)	Explain Proxy Server and Anonymizers.	CO1	5 Marks
	b)	Demonstrate about the password cracking process. List the password attack methods.	CO3	9 Marks
		(OR)		
4.	a)	Illustrate various Keyloggers and Spywares attacks.	CO3	9 Marks
	b)	List and illustrate various DoS attacks.	CO1	5 Marks

UNIT-III

5.		Explain the impact of Digital Signatures in ITA 2000.	CO1	14 Marks
		(OR)		
6.	a)	Generalize the challenges to Indian law in cyber crime scenario.	CO1	8 Marks
	b)	Discuss your views on punishments for cybercriminals. Is it possible to punish them? If not, then what do you think are the deterring factors in India?	CO2	6 Marks

UNIT-IV

7.	a)	Can "cookies" impact data security and personal security? Explain how?	CO1	7 Marks
	b)	Describe any three of the "fair information practices" in the context of cookie usage in website design.	CO4	7 Marks
		(OR)		
8.	a)	Show the various web threats for organizations.	CO1	9 Marks
	b)	Explain the organizational guidelines for Internet usage.	CO6	5 Marks

UNIT-V

9.	a)	Describe in detail about Intellectual Property in the cyber space.	CO5	7 Marks
	b)	Classify and describe the bank and credit card related frauds.	CO2	7 Marks
		(OR)		
10.		Compare cyber crime illustration "Indian Banks lose Millions of Rupees" with "Nigerian 419 Scam".	CO2	14 Marks

DATA WAREHOUSING AND DATA MINING
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Draw and explain 3 tier Data Warehouse Architecture and its various components.	CO1	7 Marks
	b)	Describe in detail about Mapping the Data Warehouse to a multiprocessor architecture.	CO1	7 Marks

(OR)

2.	a)	Suppose that a data warehouse consists of four dimensions customer, product, salesperson and sales time, and the three measure sales Amt (in rupees), VAT (in rupees) and payment type (in rupees). Draw the different classes of schemas that are popularly used for modeling data warehouses and explain it.	CO4	7 Marks
	b)	How is data warehouse different from a database? How are they similar?	CO1	7 Marks

UNIT-II

3.	a)	How is Attribute-Oriented Induction implemented? Explain in detail.	CO1	7 Marks
	b)	Why do perform Data Transformation? Mention the ways by which data can be transformed.	CO5	7 Marks

(OR)

4.	a)	Why do we need to preprocess the data? What are the different forms of data preprocessing?	CO2	7 Marks
	b)	Describe in detail on the data mining functionalities and different kinds of patterns to be mined.	CO1	7 Marks

UNIT-III

5.	a)	Why naïve bayes classification is called naïve? Briefly outline the major steps involved in Bayes classification.	CO5	7 Marks
	b)	Write and explain the algorithm for mining frequent item sets without candidate generation.	CO1	7 Marks

(OR)

6.	a)	Consider the Data set D. Given the minimum support 2, apply apriori algorithm on this dataset.	CO4	7 Marks

Transaction ID	Items
100	A,C,D
200	B,C,E
300	A,B,C,E
400	B,E

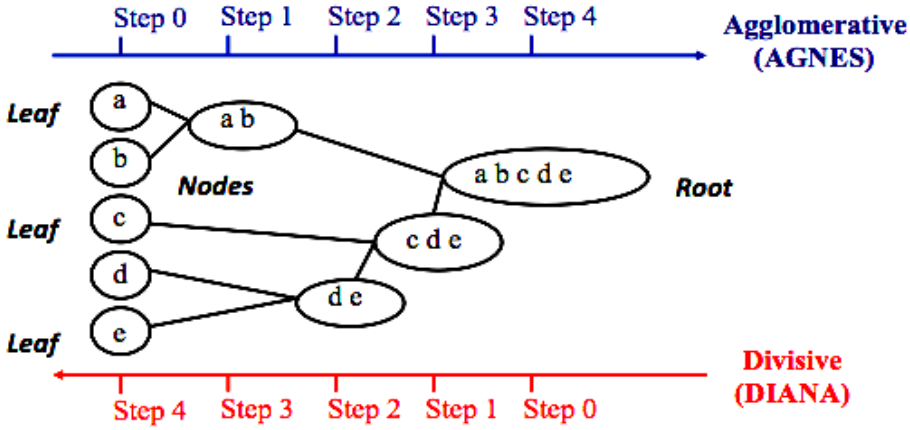
	b)	Develop an algorithm for classification using decision trees. Illustrate the algorithm with a relevant example.	CO6	7 Marks

UNIT-IV

7. a) Discuss the steps in K-means algorithm and evaluate the following table using K- means. CO4 7 Marks

Subject	A	B
1	1.0	1.0
2	1.5	2.0
3	3.0	4.0
4	5.0	7.0
5	3.5	5.0
6	4.5	5.0
7	3.5	4.5

b) Analyse the below diagram and draw the dendrogram using hierarchical clustering algorithm. CO3 7 Marks



(OR)

8. BIRCH and CLARANS are two interesting clustering algorithms that perform effective clustering in large data sets. Generalize the above statement in detail with examples. CO1 14 Marks

UNIT-V

9. Discuss in detail about web mining. Explain the algorithms used in mining structure and content of web with suitable examples. CO1 14 Marks

(OR)

10. Summarize the concepts and techniques in mining the text and spatial databases. CO1 14 Marks

MOBILE APPLICATION DEVELOPMENT
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Analyze and explain the mobile user browsing behavior.	CO2	7 Marks
	b)	Discuss the key principles those are followed to design the user interfaces of mobile apps.	CO2	7 Marks
		(OR)		
2.		Explain the design patterns of Mobile apps.	CO1	14 Marks
		UNIT-II		
3.	a)	Explain the procedure to passing data between the activities using an Intent object.	CO1	7 Marks
	b)	Develop an android program to understand the activity behaviour when changes in mobile screen orientation.	CO3	7 Marks
		(OR)		
4.	a)	Develop an android program to display notifications on status bar.	CO3	7 Marks
	b)	List and discuss the common attributes of Views and View Groups.	CO1	7 Marks
		UNIT-III		
5.		List and discuss the Basic views in Android to design the user interface.	CO1	14 Marks
		(OR)		
6.		List and discuss the picker views in Android to design the user interface with an example program.	CO1	14 Marks
		UNIT-IV		
7.	a)	Create a Android program to access a web service and returns a string of random quotes.	CO4	7 Marks
	b)	Explain the methods to get the location detail that was touched on map by the user with a suitable program.	CO6	7 Marks
		(OR)		
8.		Discuss the accessing of web services using GET method with an example program.	CO4	14 Marks
		UNIT-V		
9.		Discuss the debugging methods of iOS applications with a neat sketch.	CO5	14 Marks
		(OR)		
10.		Illustrate the usage of the threads in an Android application with a suitable example.	CO3	14 Marks

CRYPTOGRAPHY AND NETWORK SECURITY

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	List the security services and describe the role of each service in network communication.	CO1	7 Marks
	b)	Generate the cipher text for the message "me" using hill cipher and with the key $\begin{pmatrix} 9 & 4 \\ 5 & 7 \end{pmatrix}$.	CO4	7 Marks
		(OR)		
2.	a)	Define security attack and describe different Security attacks.	CO1	7 Marks
	b)	Generate Cipher text for the plain text "Welcome to the Lab" using the Mono-alphabetic ciphering technique with key "craft".	CO4	7 Marks

UNIT-II

3.	a)	Compare the improvements of Oakley compared to Diffie–Hellman Algorithm	CO2	7 Marks
	b)	Differentiate Cipher block modes of operation.	CO2	7 Marks
		(OR)		
4.	a)	Illustrate how the diffie-hellman algorithm can be used for symmetric key distribution.	CO1	7 Marks
	b)	Explain the working of RSA algorithm with an example.	CO1	7 Marks

UNIT-III

5.	a)	Analyze the purpose of HMAC in network security and how it is generated? Explain with a neat sketch.	CO2	10 Marks
	b)	Define and explain the use of digital signature.	CO2	4 Marks
		(OR)		
6.	a)	Define Kerberos and Outline the procedure for authentication using Kerberos version4.	CO1	7 Marks
	b)	Write the role of digital signature in e-commerce?	CO3	7 Marks

UNIT-IV

7.	a)	IPSec provides Anti-Replay service. Justify	CO4	7 Marks
	b)	Apply Secure Electronic Transaction (SET) for online purchase.	CO3	7 Marks
		(OR)		
8.	a)	Differentiate between Transport and tunneling modes	CO2	7 Marks
	b)	Write the role of Security Association in IP Security and List the parameters used to identify the Security Association.	CO3	7 Marks

UNIT-V

9.	a)	Describe firewall configuration which can provide security at 3 levels to a private network.	CO5	7 Marks
	b)	Write about distributed denial of service attacks.	CO1	7 Marks
		(OR)		
10.	a)	Explain in detail the password selection strategies.	CO1	7 Marks
	b)	Explain the nature of viruses and the countermeasures to be taken to overcome them.	CO4	7 Marks

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. Define managerial economics. Explain the scope and importance of managerial economics. CO1 14 Marks

(OR)

2. Define Price elasticity. Explain the various factors determining the price elasticity of Demand. CO1, CO2 14 Marks

UNIT-II

3. What is production function? How the production functions are classified? Explain. CO2, CO3 14 Marks

(OR)

4. The following information was extracted from the books of Swadesh Ltd. CO2 14 Marks

Particulars	Rs.
Sales	3,00,000
Variable Costs	2,10,000
Fixed costs	70,000

Calculate the following
i) P/V Ratio.
ii) Break Even Point
iii) Margin of Safety.
iv) Sales require to earn a profit of Rs. 35,000.

UNIT-III

5. What is monopolistic competition? Explain the important features of monopolistic competition. CO1, CO2 14 Marks

(OR)

6. Why is price so significant in the context of business? Explain any four methods of pricing based on strategy. CO1, CO3 14 Marks

UNIT-IV

7. What is Trail balance? State the main objectives of preparing the trail balance. CO1, CO4 14 Marks

(OR)

8. From the following transactions write Journal entries into the books of Govardhan. CO3 14 Marks

2018	Particulars	Rs.
May 5	Goods sold for Cash	2,50,000
May 7	Goods Purchased for cash	1,20,000
May 9	Purchase of Goods on credit from Vishnu	80,000
May 11	Sale of Goods to Mahesh on credit	60,000
May 14	Cash received from Mahesh	55,000
May 16	Cash paid to Vishnu	80,000
May 25	Furniture purchased for cash	30,000

UNIT-V

9. What is Tally? Explain the advantages of using Tally for computerizing the accounts of an organisation. CO1, CO2 — 14 Marks

(OR)

10. From the following Trail Balance of Manoj prepare Trading and Profit and Loss Account for the year ended 31st December, 2017 and Balance Sheet as on that date. CO4, CO5 — 14 Marks

Particulars	Debit Balances	Credit Balances
Capital		13,000
Wages	6,500	
Carriage inwards	275	
Administrative expenses	105	
Purchases and Sales	21,750	35,000
Commission	425	
Salaries	2,000	
Trade expenses	600	
Interest	250	
Travelling expenses	400	
Building	5,000	
Furniture	200	
Sundry Debtors	4,250	
Cash in hand	7,045	
Sundry Creditors		2,100
Discount allowed	1,300	
Suspense Account		
TOTAL	**50,100**	**50,100**

Additional information:

i) Stock on December 31st , 2017 was Rs 6,000
ii) Depreciation on Buildings by 5% and
iii) Interest on Capital at 10%.

MANAGEMENT SCIENCE

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Describe the nature and importance of Management.	CO1	7 Marks
	b)	Explain about the merits and demerits of line and staff organization.	CO3	7 Marks
		(OR)		
2.	a)	Explain Henry Fayol's principles of management.	CO1	7 Marks
	b)	Illustrate the Matrix and Functional organizational in detail.	CO1	7 Marks

UNIT-II

3.	a)	What are the various types of plant layouts? Explain with suitable examples and diagrams.	CO3	7 Marks
	b)	Define EOQ. What are the factors that determine EOQ?	CO2	7 Marks
		(OR)		
4.	a)	Define the term "Work Study" and state its objectives.	CO2	7 Marks
	b)	What are the objectives of Inventory Control?	CO2	7 Marks

UNIT-III

5.	a)	Explain about the role of HR manager in an organization with suitable examples.	CO4	7 Marks
	b)	Explain about Mc Gregor's Theory X and theory Y.	CO3	7 Marks
		(OR)		
6.	a)	Define HRM. Explain the Nature and scope of HRM.	CO2	7 Marks
	b)	Elaborate the Maslow's Hierachey human needs with examples.	CO3	7 Marks

UNIT-IV

7.	a)	Compare and contrast between CPM and PERT, in the context of project management.	CO4	7 Marks
	b)	Describe the role of entrepreneurship in Economic development.	CO4	7 Marks
		(OR)		
8.		The essentials of cost and duration are provided.	CO5	14 Marks

	Normal Cost		*Crash Cost*	
Activity	Days	Cost (Rs.)	Days	Cost (Rs.)
1-2	3	500	2	1,000
1-3	2	1,000	1	2,000
2-4	6	1,400	3	2,500
4-5	4	1,000	2	2,500

Draw the network diagram and calculate cost slopes.

UNIT-V

9.	a)	Explain about the role of supply chain management in modern era.	CO5	7 Marks
	b)	Write short notes on Balanced Score Card.	CO3	7 Marks
		(OR)		
10.		Explain the concept of JIT. How does it help the manufacturing system to improve productivity?	CO5	14 Marks

CODE No.: 16BT40502 SVEC-16

Roll No. | | | | | | | | | | |

DATABASE MANAGEMENT SYSTEMS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	List and explain the advantages of DBMS.	CO2	7 Marks
	b)	A company database needs to store information about employees (identified by ssn, with salary and phone as attributes), departments (identified by dno, with dname and budget as attributes), and children of employees (with name and age as attributes). Employees work in departments; each department is managed by an employee; a child must be identified uniquely by name when the parent (who is an employee; assume that only one parent works for the company) is known. We are not interested in information about a child once the parent leaves the company. Draw an ER diagram that captures this information.	CO1	7 Marks

(OR)

2.	a)	What is data abstraction? Classify the levels of abstraction in a DBMS.	CO2	7 Marks
	b)	Define the following with examples: i) Key Constraints. ii) Aggregation. iii) Weak Entities. iv) Strong Entities.	CO1	7 Marks

UNIT-II

3.	a)	Consider the following relational schema : Sailors(sid: integer, sname: string, rating: integer, age: real) Boats(bid: integer, bname: string, color: string) Reserves(sid: integer, bid: integer, day: date) Write the Relational Algebraic expressions for the following. i) Find the names of sailors who have reserved boat number 103. ii) Find the names of sailors who have reserved at least one boat. iii) Find the names of sailors who have reserved both a red and a green boat . iv) Find the names of sailors who have reserved all boats.	CO3	7 Marks
	b)	Mention the differences between Relational Algebra and Relational Calculus with suitable examples.	CO3	7 Marks

(OR)

4.	a)	What is view? Discuss in detail about altering tables and views with examples.	CO3	7 Marks
	b)	Consider the following schema: Suppliers(sid: integer, sname: string, address: string) Parts(pid: integer, pname: string, color: string) Catalog(sid: integer, pid: integer, cost: real) The key fields are underlined, and the domain of each field is listed after the field name. Therefore sid is the key for Suppliers, pid is the key for Parts, and sid and pid together form the key for Catalog. The Catalog relation lists the prices charged for parts by Suppliers. Write the following queries in tuple relational calculus, and domain relational calculus: i) Find the names of suppliers who supply some red part. ii) Find the sids of suppliers who supply some red or green part.	CO4	7 Marks

UNIT-III

5.	a)	The employee information in a company is stored in the relation Employee (name, sex, salary, deptName). Write an SQL query to return the names of the department in which the average salary of male employees is more than the average salary in the company.	CO3	7 Marks
	b)	Demonstrate correlated nested queries with examples.	CO3	7 Marks

(OR)

6.	a)	Define Trigger? Identify different types joins in SQL with examples.	CO3	7 Marks
	b)	Consider the following relation for published books: BOOK (Book_title, Authorname, Book_type, Listprice, Author_affil, Publisher) Author_affil referes to the affiliation of the author. Suppose the following dependencies exist: Book_title → Publisher, Book_type Book_type → Listprice Author_name → Author-affil i) What normal form is the relation in? Explain your answer. ii) Apply normalization until you cannot decompose the relations further. State the reasons behind each decomposition.	CO2	7 Marks

UNIT-IV

7.	a)	Enumerate validation based locking protocol with example.	CO4	7 Marks
	b)	What is the two-phase locking protocol? How does it guarantee serializability?	CO4	7 Marks

(OR)

8.	a)	Identify the way to implement Atomicity and Durability.	CO2	7 Marks
	b)	Discuss Multiple Granularity and Deadlock handling in concurrency control.	CO4	7 Marks

UNIT-V

9.	a)	Explain how hashing is used for file organization. Discuss about static hashing and dynamic hashing.	CO5	7 Marks
	b)	Outline an algorithm for deletion from a B+ Tree.	CO3	7 Marks

(OR)

10.	a)	Explain the difference between Hash indexes and B+ Tree indexes.	CO5	7 Marks
	b)	Apply the concept of B+ tree to implement multilevel indexing.	CO6	7 Marks

III B.Tech II Semester (SVEC-16) Supplementary Examinations June - 2022

FOUNDATION ENGINEERING
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What kind of care is to be exercised for preservation, labeling and shipment of the samples?	CO6	7 Marks
	b)	What do you understand about disturbed and undisturbed samples? How would you obtain undisturbed samples?	CO1	7 Marks
		(OR)		
2.	a)	Describe the various methods of drilling techniques for sub surface investigations.	CO1	5 Marks
	b)	Discuss standard penetration test. What are the various corrections? What is the importance of the test in geotechnical engineering?	CO2	9 Marks

UNIT-II

3.	a)	Define lateral earth pressure, explain culmann's graphical construction for active pressure and write the steps involved in construction of culmann's graphical method.	CO4	7 Marks
	b)	A 6m high retaining wall is to support a soil of unit weight Υ=17.4kN/m^3. Soil friction angle Φ' = 26^0 and cohesion C'= 14.36kN/m^2. Determine the Rankine active force per unit length of the wall both before and after the tensile crack occurs and determine the line of action of the resultant in both cases	CO6	7 Marks
		(OR)		
4.	a)	Explain briefly the design considerations for retaining walls.	CO4	6 Marks
	b)	A retaining wall of 8 m high with a smooth vertical back retains a clay backfill with c' = 18 kN/m^2, ϕ' = 15° and y = 17 kN/m^3. Estimate the total active thrust on the wail assuming that tension cracks may develop to the full theoretical depth.	CO2	8 Marks

UNIT-III

5.	a)	Explain the conditions of failure for cohesionless soils and cohesive soils in stability analysis of infinite slopes.	CO2	6 Marks
	b)	Determine the factor of safety with respect to cohesion only for a submersed embankment 25m high whose upstream face has an inclination of 45^0. The soil has the following properties, c=40 kN/m^2, ϕ=10^o, γ_{sat}=18 kN/m^3. The relevant stability number is equal to 0.108.	CO2	8 Marks
		(OR)		
6.	a)	Discuss different types of failure surfaces that can be considered in slope stability analyses.	CO1	6 Marks
	b)	Derive the equation for FS of infinite slope in a dry cohesionless soil.	CO2	8 Marks

UNIT-IV

7.	a)	Explain the Terzaghi's bearing capacity theory with assumptions	CO2	6 Marks
	b)	A 3m x 4m rectangular footing is eccentrically loaded. The resultant is 0.2m outside of centroid widthwise, and 0.3m outside of centroid lengthwise. If c = 10 kPa, ø= 25º, γ=16kN/m³, find the safe load carried by footing. What would have been the increase in load carried, if the load was concentric? Take N**c**=25.1, N**q** =12.7, N**γ** = 9.7.	CO3	8 Marks

(OR)

8.	a)	A column carrying a load of 750 kN, has to be supported by a square footing with its base at 1.5m depth. What is the required size of the foundation which will provide a factor of safety of 3 against shear failure? Assume c′ = 10kN/m² and Φ′ = 30⁰, γt = 18kN/m³, γ′ = 10kN/m³. Water table is at 1.5m depth. Use Terzaghi's equation. Take N**c**=37.2, N**q**=22.5, N**γ**=19.7	CO2	6 Marks
	b)	Calculate the ultimate bearing capacity of 2m wide square footing resting on the ground surface of sand deposit with the following properties; Unit weight 18.6 kN/m³, angle of internal friction 35º, Nq = 41.4, Nγ = 42.2. Also calculate ultimate bearing capacity, if same footing is placed at a depth of 1 m below ground surface.	CO2	8 Marks

UNIT-V

9.	a)	Explain open caisson, Box caisson and Pneumatic caisson.	CO1	4 Marks
	b)	A 30 cm diameter concrete pile is driven in a normally consolidated clay deposit 15m thick. Estimate the safe load. Take Cu = 70 kN/m², α = 0.9 and F.S = 2.5.	CO2	5 Marks
	c)	Compute the immediate settlement beneath the center of 2.0m x 3.0m flexible footing resting at 0.6m below the ground surface and carrying 800 kN load. The supporting soil deposit is uniform unsaturated clay with an average undrained strength of 120 kN/m².	CO2	5 Marks

(OR)

10.	a)	With a neat sketch, explain the components of well foundations.	CO2	4 Marks
	b)	How can you estimate the settlement of foundation cohesion less soils?	CO1	3 Marks
	c)	A group of 16 piles of 50 cm diameter is arranged with a centre to centre spacing of 1.0m. The piles are 9m long and are embedded in soft clay with cohesion 30 kN/m². Bearing resistance may be neglected for the piles. Adhesion factor is 0.6. Determine the ultimate load capacity of the pile group.	CO2	7 Marks

SOLID WASTE MANAGEMENT
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Explain the sources and types of solid wastes.	CO1	7 Marks
	b)	Explain the effects of improper disposal of solid wastes.	CO6	7 Marks
		(OR)		
2.	a)	What are the characteristics of municipal solid waste?	CO1	7 Marks
	b)	Explain the role of NGOs in effective solid waste management.	CO4	7 Marks
		UNIT-II		
3.	a)	What are the principles of solid waste management?	CO4	7 Marks
	b)	Explain about on site segregation and storage methods of municipal solid waste.	CO1	7 Marks
		(OR)		
4.	a)	Describe the types of materials used for the storage containers.	CO9	7 Marks
	b)	Describe the public health and economical aspects of storage of municipal solid waste.	CO6	7 Marks
		UNIT-III		
5.	a)	Briefly explain the status of collection and transportation of municipal solid waste in India.	CO1	7 Marks
	b)	Discuss briefly about layout of collection routes.	CO1	7 Marks
		(OR)		
6.	a)	Explain about the operation and maintenance of vehicles used for collection and transportation of municipal solid waste.	CO9	7 Marks
	b)	Enumerate the various methods which can be used for collection of solid waste, and explain methods.	CO1	7 Marks
		UNIT-IV		
7.		Describe the various processing techniques and equipment of solid waste.	CO5	14 Marks
		(OR)		
8.	a)	What is the importance of C-N ratio and moisture content of compost heap mass of the organic solid waste to be used for anaerobic composting process?	CO4	7 Marks
	b)	Explain off-site processing of solid waste by incineration and pyrolysis.	CO1	7 Marks
		UNIT-V		
9.	a)	What are the environmental effects due to leaching and also explain the leachate collection systems?	CO5	7 Marks
	b)	Discuss the design and operation process of sanitary landfill.	CO3	7 Marks
		(OR)		
10.	a)	Enumerate the various methods which can be used n for disposal of solid waste, and explain any two adopted methods in India.	CO1	7 Marks
	b)	Describe the biomedical waste management.	CO1	7 Marks

POWER SYSTEM ANALYSIS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) What are sequence components? Prove that the generator will produce positive sequence voltages only. CO2 4 Marks

   b) A 100 MVA, 13.2 kV generator (G) having a synchronous reactance of 10% is connected to a star-star transformer T_1 which feeds a 132 kV line having an impedance per phase of 20+j50Ω. At the receiving end of the line there is a star-star step down transformer T_2. A load drawing 60 MVA at 0.9 power factor lagging is connected to the secondary of transformer T_2. The transformer ratings are as follows: CO4 10 Marks
   Transformer T_1: 120MVA, 13.2/132kV, XT1=12%.
   Transformer T_2: 100MVA, 138/33kV, XT2=15%.
   Using a base of 100 MVA and a voltage base of 33 kV in the load side of the circuit, draw a one line impedance diagram for the above power system showing all the equipment parameters and the voltage base in different sections of the system.

(OR)

2. a) Show that the symmetrical component transformation is power invariant. CO2 7 Marks

   b) The line currents in a 3-phase supply to an unbalanced load are I_a = - 10+ j 20 , I_b = 12 - j10 and I_c = - 3 - j5 amperes respectively**.** The phase sequence is *abc*. Determine the sequence components of currents. CO3 7 Marks

UNIT-II

3. a) Prove that when there is no mutual coupling between the elements of a network, the diagonal and off-diagonal elements of the bus admittance matrix can be computed as $Y_{ij} = \sum_{i=j} y_{ij}$ and $Y_{ij} = Y_{ji}$. CO3 7 Marks

   b) Using the method of direct inspection, find the bus admittance matrix for the network connection given: CO3 7 Marks

Element	Bus code (From-To)	Impedance
1	1- 2	0.2j
2	2-3	0.5j
3	2-1	0.15j
4	3-1	0.3j

(OR)

4. a) Develop step-by-step algorithm to form Z_{bus}, for the addition of element from a new bus to reference without mutual coupling. CO2 7 Marks

   b) Form Z_{bus} by algorithm for the power system network, data for the network is given in the table below. CO3 7 Marks

Element	Bus Code	Impedance (p.u)
1	1-2	0.15
2	2-3	0.65
3	3-1	0.35

UNIT-III

5. a) Write down the assumptions made in reducing decoupled method to fast decoupled method of power flow solution. CO1 6 Marks

   b) Carry out one iteration of power flow analysis for the power system with the following data and given the voltages in polar form at the end of first iteration by NR method. CO4 8 Marks

Bus No.	Bus type	V (pu)	Generation		Load		Line data	
			P	Q	P	Q	Bus code	Impedance
1	Slack	1.01	---	---	---	---	1-2	0.15j
2	PV	1.0	0.7	---	---	---	2-3	0.15j
3	PQ	---	---	---	1.0	0.4	3-1	0.15j

(OR)

6. a) Compare GS-method, NR, decoupled and FDLF methods with respect to: Number of iterations, convergence characteristic and memory requirements. CO2 4 Marks

   b) In a 2-Bus power system with Bus-1 as slack bus, $V_1 = 1.0\angle 0°$ p.u., $P_2=1$ and $Q_2 = 0.5$ p.u. with $Z_{12} = 0.012+j0.16$ p.u. Using GS-method, determine V_2 after first iteration. Also find the line flows and line losses. CO3 10 Marks

UNIT-IV

7. a) Derive an expression for the fault current for a single line-to-ground fault with fault impedance on an unloaded generator. CO2 7 Marks

   b) A three phase fault with a fault impedance of 0.16 p.u. occurs at bus 3 , for which Z_{BUS} is given by : CO3 7 Marks

$$Zbus = \begin{bmatrix} 0.016j & 0.08j & 0.12j \\ 0.08j & 0.24j & 0.16j \\ 0.12j & 0.16j & 0.34j \end{bmatrix}$$

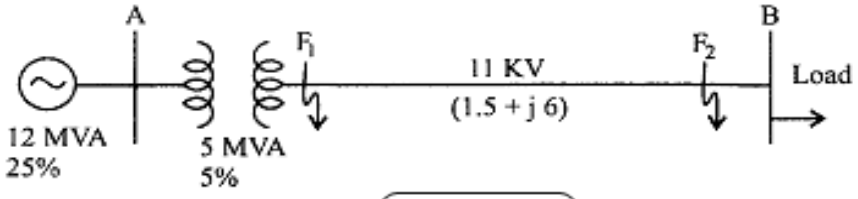
Compute the fault current, the bus voltages and the line currents during the fault. Assume pre-fault bus voltages 1.0 per unit.

(OR)

8. a) List the various types of shunt and series faults and enumerate their attributes. CO1 4 Marks

   b) A 3-phase line shown in figure, operating at 11 kV and having a resistance of 1.5 Ohms and reactance of 6 Ohms is connected to a generating station bus bars through a 5 MVA step-up transformer having reactance of 5%. The bus bars are supplied by a 12 MVA generator having 25% reactance. Calculate the short circuit kVA fed into a symmetric fault: CO5 10 Marks

   i) at the load end of the transformer and
   ii) at the h.v. terminals of the transformer.



UNIT-V

9. a) Deduce the equation to find synchronizing power coefficient. CO2 7 Marks

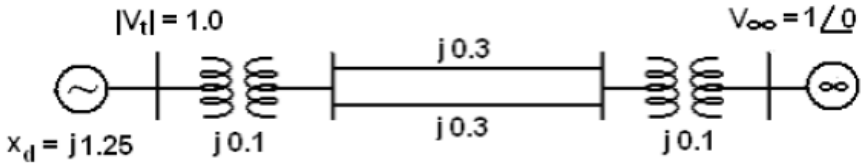
   b) A 275 kV transmission line has following line constants. $A = 0.85\angle 50^0$, $B=200\angle 75^0$. The line delivers 150 MW with $|V_S| = |V_R| = 275$ kV. Determine synchronizing power coefficient. CO3 7 Marks

(OR)

10. a) Differentiate between steady state stability and transient stability of a CO2 6 Marks

power system. Discuss the factors that affect steady state stability and transient state stability.

b) A generator supplies 1.0 p.u. power to an infinite bus as shown in figure. The terminal voltage and infinite bus voltage are 1.0 p.u. All the reactances are on a common base. CO5 8 Marks



Determine steady state stability limit when both lines are in and when one line is switched off.

DESIGN AND ESTIMATION OF ELECTRICAL SYSTEMS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Describe the different systems of wiring used for domestic installations.	CO1	7 Marks
	b)	Explain the tests to be performed under the Indian electricity rules before energising a domestic installation.	CO7	7 Marks
		(OR)		
2.	a)	Describe the procedure for determination of conductor size in domestic installation.	CO1	7 Marks
	b)	Describe the methods of draining cables through a conduit. Explain why a conduit is earthed.	CO3	7 Marks

UNIT-II

3.	a)	Explain the procedure for the estimation of H.T. lines for the distribution line.	CO2	7 Marks
	b)	Estimate the quantity of material required for an 11 kV, 3-phase overhead line with 7/2.59 mm ACSR conductors for 1 km long on 8 m PSCC poles. The span between two poles is 75 m.	CO2	7 Marks
		(OR)		
4.	a)	Explain the testing and commissioning of overhead distribution lines.	CO1	6 Marks
	b)	An overhead 3-phase, 415 V distributor is to be laid along a straight route 300m long. The end supports are terminal poles with 50m span in between. Prepare list of material for lying distributor. The following data may used: Conductor: ACSR $\frac{6}{1} \times 2.11$ mm for phase, neutral and street light. Earth wire: GI wire, 8 SWG, 1 kg/10m weight. L.T. cable: 4-core, 60 mm², 1100 V grade. Distance of first terminal pole from the substation is 12 m.	CO2	8 Marks

UNIT-III

5.	a)	Explain the purpose of providing the substation earthing systems.	CO2	6 Marks
	b)	Estimate the quantity of material required for the augmentation of 33 kV grid substation of 500 KVA to 1000 KVA, 33/11 KV grid substation.	CO2	8 Marks
		(OR)		
6.	a)	Explain the classification of substations.	CO1	6 Marks
	b)	Draw and estimate the material required for 66/11 KV substation, with following details: i) Input lines – 2, having 66 KV. ii) Output lines – 2, 66 KV. iii) Output line – 0, 6 numbers, 11 KV.	CO2	8 Marks

UNIT-IV

7.	a)	Explain how the polar curves can be applied to light sources.	CO1	6 Marks
	b)	Two similar lamps having uniform intensity of 500 CP in all directions below the horizontal are mounted at a height of 4 m. What must be the maximum spacing between the lamps so that the illumination on the ground midway between the lamps shall be at least one-half the illuminations directly under the lamps?	CO3	8 Marks

(OR)

8.	a)	State the laws of illumination. Explain the laws with the help of diagrams and derive an equation of the same.	CO5	7 Marks
	b)	A room with an area of 6 x 9m is illuminated by ten 80 W lamps. The luminous efficiency of the lamp is 80 lumens/W and the coefficient of utilization is 0.65. Find the average illumination.	CO3	7 Marks

UNIT-V

9.	a)	Describe the methods of direct and indirect resistance heating. Explain their applications.	CO6	7 Marks
	b)	A 4.5 kW, 200 V and single phase resistance oven is to have nichrome wire heating elements. If the wire temperature is to be 1000^0C and that of the charge 500^0C. Estimate the diameter and length of the wire. The resistivity of the nichrome alloy is 42.5μΩ-m. Assume the reading efficiency and the emissivity of the element as 1.0 and 0.9 respectively.	CO5	7 Marks

(OR)

10.	a)	Explain the difference between carbon and metallic arc welding. Give their relative merits and demerits.	CO5	6 Marks
	b)	Describe the various methods of current flow control in welding transformers.	CO5	8 Marks

III B.Tech II Semester (SVEC-16) Supplementary Examinations June – 2022

ELECTRICAL MACHINE DESIGN
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss the basic design principles for an Electrical Machine.	CO1	7 Marks
	b)	Discuss different insulating materials used in modern electrical machines.	CO1	7 Marks
		(OR)		
2.	a)	Derive the equation for mean temperature rise of an electrical machine during its intermittent heating.	CO2	7 Marks
	b)	The temperature rise of a transformer is 25^{o}C after one hour and 37.5^{o}C after 2 hours of starting from cold conditions. Calculate its final steady temperature rise and the heating time constant, If its temperature falls from the final steady value to 40^{o}C in 1.5 hours when disconnected, calculate its cooling time constant. The ambient temperature is 30^{o}C.	CO4	7 Marks

UNIT-II

3.	a)	Discuss the factors to be considered while selecting the specific electric and magnetic loading for DC Machine.	CO3	7 Marks
	b)	A 4 pole, 25 HP, 500 V, 600 r.p.m series motor has an efficiency of 82%. The pole faces are square and the ratio of pole arc to pole pitch is 0.67. Take Bav = 0.58 Wb/m^2 and ac = 17000 amp.cond/m. Obtain the main dimensions of the core.	CO4	7 Marks
		(OR)		
4.	a)	Derive the relation between real and apparent flux densities in DC Machines.	CO2	7 Marks
	b)	Design a suitable commutator for a 350kw, 600 r.p.m, 440V, 6 poles DC generator having an armature diameter of 0.75m. The number of slots is 288. Assume suitable values where it's necessary.	CO4	7 Marks

UNIT-III

5.	a)	Derive the output equation of a Three phase Transformer	CO2	5 Marks
	b)	Determine the main dimensions of the core for a 250 kva, 6600/415v, 50Hz, 3-Φ transformer with star connection windings. Assume the following data. Volt per turn = 9v, Maximum flux density = 1.25 wb/m^2, A_i = 0.62d^2, window space factor = 0.27. Height of window / width of window = 2, current density = 2.50A/sq mm.	CO4	9 Marks
		(OR)		
6.	a)	List the factors affecting the choice of flux density of core in transformer.	CO3	5 Marks
	b)	A single phase 400V, 50HZ transformer is built from stampings having a relative permeability of 1000. The length of the flux path is 2.5 x 10^{-3}m^2 and the primary winding has 800 turns. Estimate the maximum flux and no load current of the transformer. The iron loss at the working flux density is 2.6W/Kg. Iron weighs 7.8 x 1000 Kg/m^3. Stacking factor is 0.9.	CO4	9 Marks

UNIT-IV

7.	a)	Derive the output equation of a 3-phase induction motor.	CO2	5 Marks
	b)	Determine the main dimensions for a 400V, 3-phase, 50hz, 1410 r.p.m, 250HP, delta connected IM has specific loading of 0.5wb/m² and 30000 ampere conductors per meter, efficiency =0.9, p.f = 0.9, K_w = 0.955.	CO4	9 Marks

(OR)

8.	a)	Discuss the various points to be considered for selecting the rotor slots of a 3-phase Squirrel cage Induction motor.	CO5	5 Marks
	b)	Calculate the magnetizing current of a 450V, 4 pole, 3-phase, 50HZ, induction motor having the following data. No. of slots = 36, No. of stator conductor/slot =30, stator core diameter = 13cm, axial length of stator = 13cm, effective air gap length = 0.1cm, winding is full pitched, phase spread angle is 60^o, gap contraction factor = 1, assume that the iron loss has infinite permeability.	CO4	9 Marks

UNIT-V

9.	a)	List the important consideration for the choice of no of slots on the armature of Synchronous machine.	CO5	7 Marks
	b)	Find the main dimensions of a 2550 KVA, 187.5 r.p.m, 50 c/s, 3-ϕ 3.3 KV salient pole generator. Assume Bav = 0.61 wb/m², ac = 34500 A/m. use circular poles. L/τ = -.66, KW=0.955, η=90%.	CO4	7 Marks

(OR)

10.	a)	Discuss the design of a field coil for an alternator.	CO3	7 Marks
	b)	A 3-phase alternator has D=1.7m, L=0.35m, Bav= 0.55 wb/m², star connected. Find suitable number of slots and conductors/slot, for terminal voltage of 6.6KW, 50c/s at 375 r.p.m.	CO4	7 Marks

HVDC TRANSMISSION
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Illustrate the various types of dc link available with neat sketches. Also list any four of HVDC lines existing in India with technical specifications.	CO6	7 Marks
	b)	Explain the Modern trends in HVDC transmission.	CO1	7 Marks
		(OR)		
2.	a)	For a fixed power of transmission explain how the economic choice of voltage levels is selected in DC transmission system.	CO6	8 Marks
	b)	Explain the technical development in control and protection for better performance and reliability of DC transmission system.	CO1	6 Marks

UNIT-II

3.	a)	Draw the schematic circuit diagram of a 6 pulse gratez's circuit and explain its principle of operation.	CO2	8 Marks
	b)	If a 6-pulse bridge rectifier is operating from 220 kV voltage supply through the transformer. Find the output voltage of rectifier when the firing (delay) angle is (i) 0^0 (ii)15^0 and (iii) 90^0. Assume there is no source reactance.	CO4	6 Marks
		(OR)		
4.	a)	Develop the equivalent circuit of a converter working as rectifier with an overlap angle μ and delay angle α. Show that the equivalent resistance of the converter is $3\omega Ls/\pi$.	CO2	7 Marks
	b)	Show that the expression for the power factor of an HVDC converter is $1/2(\cos \alpha+\cos(\alpha+ \mu))$.	CO2	7 Marks

UNIT-III

5.	a)	Explain the necessity of compounding both rectifier and inverter station with constant current control.	CO2	6 Marks
	b)	Explain constant Extinction angle and constant ignition angle to control the HVDC system.	CO2	8 Marks
		(OR)		
6.	a)	State the different firing control schemes adopted for HVDC systems with neat sketches. Explain the difference in operation of each method.	CO5	8 Marks
	b)	Explain start and stop process of DC link.	CO6	6 Marks

UNIT-IV

7.	a)	Define characteristic and non characteristics harmonics. Derive the expression for characteristic harmonics on AC network side with 6 pulse converter operation.	CO1	8 Marks
	b)	Explain the design procedure for passive AC filters for mitigating AC side harmonics in HVDC Link.	CO3	6 Marks
		(OR)		

8.	a)	With the aid of an equivalent circuit, outline the design procedure of a single tuned filter used in the AC side of a HVDC link.	CO3	7 Marks
	b)	Illustrate the main objectives in designing the size and branches o f AC harmonic filters and DC harmonic filters in a HVDC substation.	CO3	7 Marks

UNIT-V

9.	a)	Explain briefly the faults on the AC side of HVDC systems.	CO1	7 Marks
	b)	Explain the occurrence of commutation failure in inverters. Discuss its effects with voltage and current waveforms.	CO1	7 Marks

(OR)

10.	a)	Explain the principle of current interruption in DC circuit breakers.	CO5	7 Marks
	b)	Explain the protection schemes against over voltage and over current in converter station.	CO2	7 Marks

ADVANCED CONTROL SYSTEMS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. What is Lag Compensator? Explain the procedure for cascade lag compensation using root locus technique. CO1 14 Marks

(OR)

2. A Unity feedback system has an open loop transfer function $(s) = \frac{K}{s(s+2)}$. The system is to be compensated to meet the following specifications. CO3 14 Marks

Damping ratio $\varsigma = 0.707$
Settling time $t_s \leq 5$ sec
Velocity error constant $K_v \geq 4$

UNIT-II

3. Determine the state controllability, output controllability and observability of the system represented by CO4 14 Marks

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \\ \dot{x}_3 \end{bmatrix} = \begin{bmatrix} 0 & 2 & 0 \\ 1 & 2 & 0 \\ -1 & 0 & 1 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \\ x_3 \end{bmatrix} + \begin{bmatrix} 0 \\ 1 \\ 1 \end{bmatrix} u$$

$$y = \begin{bmatrix} 1 & 0 & 1 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \\ x_3 \end{bmatrix}$$

(OR)

4. The state model for a system is given by CO1 14 Marks

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \\ \dot{x}_3 \end{bmatrix} = \begin{bmatrix} 0 & 0 & 1 \\ -2 & -3 & 0 \\ 0 & 2 & -3 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \\ x_3 \end{bmatrix} + \begin{bmatrix} 0 \\ 2 \\ 0 \end{bmatrix} u$$

$$y = \begin{bmatrix} 1 & 0 & 0 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \\ x_3 \end{bmatrix}$$

Determine the controllability and observability of the system using Jordan canonical form.

UNIT-III

5. a) Derive the describing function for dead zone nonlinearity. CO2 7 Marks
   b) Explain about some common physical nonlinearities. CO2 7 Marks

(OR)

6.		Construct phase trajectory for the system described by the equation $\frac{dx_2}{dx_1} = \frac{4x_1 + 3x_2}{x_1 + x_2}$ Comment on the stability of the system.	CO2	14 Marks

UNIT-IV

7.	a)	Explain the Direct method of Lyapunov for LTI autonomous systems.	CO2	7 Marks
	b)	Determine the stability of the system $\dot{x} = AX$ where $A = \begin{bmatrix} -1 & -2 \\ 1 & -4 \end{bmatrix}$ and obtain suitable Lyapunov function.	CO5	7 Marks

(OR)

8.	a)	State Explain variable gradient method for constructing Lyapunov function theorem.	CO4	7 Marks
	b)	Consider the nonlinear system $\dot{x}_1 = -x_1$ $\dot{x}_2 = x_1 - x_2 - 2x_2^3$ Determine the stability using Krasovskii's method.	CO4	7 Marks

UNIT-V

9.		A regulator system has a plant $\frac{Y(s)}{U(s)} = \frac{5}{(s+4)(s+5)(s+6)}$ Define state variables as $x_1 = y$ $x_2 = \dot{x}_1$ $x_3 = \dot{x}_2$ Design the necessary state feedback gain matrix K to place the closed-loop poles at $s = -4 \pm j2\sqrt{3}, s = -20$.	CO3	14 Marks

(OR)

10.		With the help of neat block diagram, design a full order observer and compare it with minimum order observer.	CO3	14 Marks

SPECIAL ELECTRICAL MACHINES
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss in detail, about the construction and working principle of Variable Stepper Motor.	CO1	7 Marks
	b)	A single stack, 3-phase variable Reluctance Motor has a step angle of 15 degrees. Find the number of stator and rotor poles.	CO4	7 Marks

(OR)

2.	a)	Explain the mechanism of static torque production in a variable reluctance Stepping Motor.	CO1	7 Marks
	b)	Describe the dynamic characteristics of a variable reluctance Stepper Motor.	CO1	7 Marks

UNIT-II

3.	a)	Draw the cross sectional view of Switched Reluctance Motor and explain the principle of operation.	CO1	9 Marks
	b)	Discuss how SRM different from other motors and state the advantages of switched reluctance motor.	CO2	5 Marks

(OR)

4.	a)	Why do we need rotor position sensing? Discuss the various methods of rotor position sensing in SRMs	CO5	7 Marks
	b)	Explain the closed loop control operation of SRM and its performance characteristics in detail.	CO1	7 Marks

UNIT-III

5.		Explain the construction and operation of Axial and Radial flux motors with neat diagrams.	CO1	14 Marks

(OR)

6.	a)	Discuss the various stator current modes in a Synchronous Reluctance Motor in detail.	CO1	7 Marks
	b)	A 3-Phase, 4 pole, 50hz, 390 Volts star connected Synchronous Reluctance Motor has direct axis and quadrature axis synchronous reactances of 8 ohms and 2 ohms respectively. For a load torque of 82 N-M, find load angle, line current and power factor, Neglect armature resistance and mechanical losses.	CO4	7 Marks

UNIT-IV

7.		Discuss the sensing and switching logic Schemes of BLDC motor with neat diagrams.	CO1	14 Marks

(OR)

8.		Why do we need sensors? Discuss the sensing and sensor less based control of BLDC Motor with neat diagrams	CO5	14 Marks

UNIT-V

9.		Discuss Construction and principle of operation of LIM with neat diagrams.	CO1	14 Marks

(OR)

10.	a)	Develop the equivalent circuit of a linear Induction Motor at standstill and running conditions.	CO3	7 Marks
	b)	Discuss the principle of operation of LSM.	CO1	7 Marks

CODE No.: 16BT60301 SVEC-16

CAD / CAM
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Explain the computer aided design process. In what way it is different from conventional design process.	CO1	14 Marks
		(OR)		
2.	a)	Summarize a short note on CAD database and structure.	CO1	7 Marks
	b)	With the help of block diagram, explain the hard ware configuration of a typical standalone CAD system.	CO1	7 Marks

UNIT-II

3.	a)	Apply a 45º rotation of a triangle, $A(0,0)$, $B(1,1)$, $C(5,2)$ about the point P(-1, -2).	CO1	7 Marks
	b)	Interpret on: i) Composite transformation. ii) Reflection transformation.	CO1	7 Marks
		(OR)		
4.	a)	Give a brief account on Solid representation and Sweep representation.	CO3	6 Marks
	b)	Explain CSG scheme for complex solid modeling objects representations. Also give its disadvantages.	CO3	8 Marks

UNIT-III

5.	a)	What is dwell? Explain its function and how it is specified in part program.	CO4	6 Marks
	b)	What is computer aided part programming? Discuss its need.	CO1	8 Marks
		(OR)		
6.	a)	Explain manual part programming procedure through a flow chart.	CO4	6 Marks
	b)	How is the tool length compensation specified in a machining center?	CO4	4 Marks
	c)	List out the advantages derived from the use of CNC as compared to NC.	CO1	4 Marks

UNIT-IV

7.		What are the differences between retrieval and generative type of computer aided process planning? Which is better? Explain your choice.	CO1	14 Marks
		(OR)		
8.	a)	List out the advantages and limitations of using GT.	CO5	6 Marks
	b)	Describe the OPTIZ classification system generally used in group technology.	CO5	8 Marks

UNIT-V

9.	a)	Distinguish between Conventional manufacturing and CIM.	CO1	5 Marks
	b)	What are the various types of layouts used in FMS design? Explain briefly about their applications.	CO6	9 Marks
		(OR)		
10.	a)	What do you understand by the term flexibility in FMS? What are the various types of flexibilities that are relevant?	CO6	8 Marks
	b)	Distinguish between Contact and Non-contact Inspection methods.	CO6	6 Marks

HEAT TRANSFER
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What is Thermal Diffusivity? Explain its significance.	CO1	4 Marks
	b)	A surface having an area of 1.5 m^2 and maintained at 300ºC exchanges heat by radiation with another surface at 40^0C. The value of factor due to the geometric location and emissivity is 0.52. Determine: i) Heat lost by Radiation ii) The value of Thermal Resistance and iii) The value of equivalent convection coefficient.	CO5	10 Marks

(OR)

2.		Derive the general one-dimensional unsteady state heat conduction equation for a spherical body with internal heat generation. Simplify the obtained equation to Poisson's equation, Fourier's Equation and Laplace equation.	CO2	14 Marks

UNIT-II

3.		Fins, 12 in number, having K=75 W/m K and 0.75 mm thickness protrude 25mm from a cylindrical surface of 50mm diameter and 1 m length placed in an atmosphere of 40ºC. If the cylindrical surface is maintained at 150ºC and the heat transfer coefficient is 23 W/m²K Calculate: i) the rate of heat transfer ii) the percentage increase in heat transfer due to fins iii) the temperature at the centre of fins and iv) the fin efficiency and effectiveness.	CO3	14 Marks

(OR)

4.	a)	A solid copper sphere of 10 cm diameter, initially at a uniform temperature of 250 ºC, is suddenly immersed in a well-stirred fluid which is maintained at a uniform temperature of 50 ºC. The heat transfer coefficient between the sphere and the fluid is h= 200 W/m²K. Determine the temperature of the copper block at 5 minutes after immersion.	CO5	7 Marks
	b)	A semi-infinite slab of copper is exposed to a constant heat flux at the surface of 0.3 MW/m². Neglecting convection at the surface, Calculate the surface temperature after 10 minutes if the initial temperature of the slab is 30ºC. What is the temperature at a distance of 20 cm from the surface after 10 min? For copper K= 386W/m K, c_e= 0.404 m²/hr.	CO5	7 Marks

UNIT-III

5.	a)	Derive the general form of equation for natural convection heat transfer using dimensional analysis.	CO2	7 Marks
	b)	A horizontal plate 1 m x 0.8 m is kept in a water tank with the top surface at 60ºC providing heat to warm stagnant water at 20ºC. Determine the value of convection coefficient	CO2	7 Marks

(OR)

6.		Air at 20°C at atmospheric pressure flows over a flat plate at a velocity of 3 m/s. If the plate is 1 m wide and 80°C, calculate the following at x=300mm. i) Hydrodynamic boundary layer thickness, ii) Thermal boundary layer thickness, iii) Local friction coefficient, iv)Average friction coefficient, v) Local heat transfer coefficient vi)Average heat transfer coefficient, vii) Heat transfer.	CO2	14 Marks

UNIT-IV

7.	a)	Derive an expression for LMTD on the counter flow heat exchanger.	CO1	7 Marks
	b)	Explain the flow regimes in two phase flow through a tube. What is the difference between slug flow regime and annular flow region?	CO1	7 Marks

(OR)

8.		A shell and tube type steam condenser, employed in a large steam power plant, effects a heat exchange rate of 2200 MW. The condenser of a single pass shell and 32,000 tubes, each exceeding two passes. The water at the rate of 3.2 **x** 10^4 kg/sec passes through the tubes which are of thin wall and of diameter 30 m the steam condenser on the outer surface on the tubes. The heat transfer coefficient on the steam side may be taken as 11500 W/m²K. Steam condenses at 50ºC while water enters the condenser at 20ºC. Using LMTD correction factor method and NTU method, calculate the following: i) outlet temperature of cooling water. ii) length of tube per pass, take following properties of water: C_p = 4.18 kJ/ kgK, u = 855 **x** 10^{-6} N-sec/m^2 , K = 0.613 W/mK, P_r = 5.83.	CO5	14 Marks

UNIT-V

9.	a)	Distinguish between specular and diffuse surfaces.	CO1	7 Marks
	b)	Two large parallel planes with emissivities of 0.3 and 0.5 are maintained at temperatures of 800ºC and 300ºC respectively. Determine the net radiant heat exchange per unit area between the planes. If a radiation shield having an emissivity of 0.05 on both sides is placed between the two planes, calculate the temperature of the shield and the heat transfer rate per unit area.	CO2	7 Marks

(OR)

10.	a)	What is intensity of radiation? Prove that total emissive power is ***n***-times the intensity of radiation.	CO2	7 Marks
	b)	Two parallel plates 0.5 by 1.0 m are spaced 0.5 m apart. One plate is maintained at 1000ºC and the other at 500ºC. The emissivities of the plates are 0.2 and 0.5, respectively. The plates are located in a very large room, the walls of which are maintained at 30ºC. The plates exchange heat with each other and with the room, but only the plate surfaces facing each other are to be considered in the analysis. Find the net heat transfer to each plate and to the room.	CO2	7 Marks

NON-CONVENTIONAL ENERGY SOURCES

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe the main features of various types of renewable energy resources.	CO1	4 Marks
	b)	What's the difference between a pyranometer and pyrheliometer? Draw neat diagram and explain about pyrheliometer.	CO2	10 Marks
		(OR)		
2	a)	Explain the concept of total radiation on Tilted Surface.	CO2	6 Marks
	b)	Explain the following terms w.r.t solar radiation geometry: i) Zenith Angle. ii) Solar Azimuth angle. iii) Surface azimuth angle. iv) Sun Angle.	CO2	8 Marks

UNIT-II

3	a)	List and explain the factors that affect the performance of Flat plate collectors.	CO2	9 Marks
	b)	List the advantages of concentrating collector over flat collector.	CO2	5 Marks
		(OR)		
4	a)	Express heat lost from collector in terms of overall loss coefficient. Explain top loss coefficients in detail.	CO2	7 Marks
	b)	Draw a neat sketch of solar flat plate collector and explain its working principle.	CO2	7 Marks

UNIT-III

5	a)	With the help of neat sketch, describe a solar heating system using water heating Solar collectors. Give the advantages and disadvantages of this method.	CO3	8 Marks
	b)	Explain with a neat diagram the working of thermoelectric generator.	CO3	6 Marks
		(OR)		
6	a)	Describe the working of a solar photovoltaic cell. With help of a neat diagram, explain the working of solar photovoltaic power system.	CO3	8 Marks
	b)	With a neat sketch, explain space cooling system using liquid FPC.	CO3	6 Marks

UNIT-IV

7	a)	List and briefly explain the various parts of horizontal axis wind turbine.	CO3	8 Marks
	b)	Discuss about Betz limit.	CO1	6 Marks
		(OR)		
8	a)	What are the reactions phases that take place in a digester, explain them in detail?	CO2	6 Marks
	b)	With a neat sketch, explain biomass gasification.	CO2	8 Marks

UNIT-V

9	a)	With a neat sketch, explain the working of open cycle OTEC system.	CO5	7 Marks
	b)	List the advantages of geothermal energy over conventional energy sources and also explain its impact on Environment.	CO6	7 Marks
		(OR)		
10		Explain with sketches the various methods of tidal power generation. What are the limitations of each method?	CO3	14 Marks

GAS TURBINES AND JET PROPULSION
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Illustrate the working of a constant pressure and a constant volume gas turbine.	CO1	8 Marks
	b)	What is total energy system incorporating gas turbine? Discuss its importance.	CO1	6 Marks

(OR)

2.		In a simple gas turbine plant air enters the compressor at 1 bar and 15^0C and leaves at 6 bar. It is then heated in the combustion chamber to 700^0C and then enters the turbine and expands to atmospheric pressure. The isentropic efficiency of compressor and turbine are 0.80 and 0.85 respectively and the combustion efficiency is 0.90. The fall in pressure through the combustion chamber is 0.1 bar. Determine: i) the thermal efficiency. ii) the work ratio. iii) the air rate in kg/hr. iv) SFC and v) Air fuel ratio.	CO1	14 Marks

UNIT-II

3.	a)	Define Isentropic and Polytropic efficiencies of dynamic compressors and obtain a relation between them.	CO2	6 Marks
	b)	In a single sided straight vaned rotary compressor is required to deliver 10 kg of air per second with a total pressure ratio of 4.5:1, and operates at a speed of 16000 r.p.m. The air inlet pressure and temperature are 1 bar and 27^0C. Find: i) rise in total temperature. ii) tip speed of impeller. iii) tip diameter.	CO2	8 Marks

(OR)

4.	a)	Discuss the various factors involved in the design of impellers.	CO2	10 Marks
	b)	A rotary compressor, having a pressure ratio 10:1, takes in 25 kg of air per second at 15^0C. Calculate the required power input in KW.	CO2	4 Marks

UNIT-III

5.	a)	Describe the flow pattern in a gas turbine combustion chamber.	CO3	8 Marks
	b)	What are the reasons for pressure losses in a combustion chamber? How they can be reduced?	CO3	6 Marks

(OR)

6.	a)	How combustion efficiency of a gas turbine combustion chamber is defined? What are the main factors on which it depends?	CO3	8 Marks
	b)	What are the main requirements of a gas turbine combustion chamber?	CO3	6 Marks

UNIT-IV

7.	a)	What is the difference between a turbo prop engine and a bypass engine? When a bypass engine would be preferred over a turboprop or turbojet engine?	CO4	6 Marks
	b)	When thrust augmentation is necessary in an aircraft engine? Briefly describe the various methods of thrust augmentation in a jet engine. For which applications these various methods are suitable?	CO4	8 Marks

(OR)

8.	a)	Draw a schematic diagram of a ramjet engine and describe its operation. What are its advantages and disadvantages?	CO4	8 Marks
	b)	A jet plane having 2 jets works on turbojet system. It flies at a speed of 800 km/hr at an altitude where the specific mass of air is 0.15 kg/m^3. The propulsive efficiency is 55%. The drag on the plane is 6500 kW. Calculate i) absolute velocity of jet. ii) quantity of air compressed. iii) diameter of jet.	CO4	6 Marks

UNIT-V

9.	a)	Derive a general expression for the thrust produced by a chemical rocket and hence discuss the importance of the molecular weight of the propellants.	CO5	8 Marks
	b)	What are the desirable requirements of a liquid propellant for rockets?	CO5	6 Marks

(OR)

10.	a)	Describe how nuclear energy can be used for propulsion of rockets.	CO5	8 Marks
	b)	What are the advantages and disadvantages of liquid propellant rockets over solid propellant rockets?	CO5	6 Marks

ANTENNAS AND WAVEGUIDES
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Solve the wave equation for a rectangular wave-guide and obtain the solution for the field components of TM_{mn} mode of propagation.	CO3	7 Marks
	b)	Analyze the significance of the cut-off frequency, f_c of a wave-guide and show that λ_c, λ_g and λ are related by $\frac{1}{\lambda_c^2} + \frac{1}{\lambda_g^2} = \frac{1}{\lambda^2}$.	CO2	7 Marks

(OR)

2.	a)	What is dominant mode? Derive the expressions for β, f_c, λ_c, λ_g and v_p for the dominant mode of rectangular wave-guide.	CO1, CO2	7 Marks
	b)	Consider a parallel plane wave guide, for which the two conducting planes are placed at $x = 0$ and $x = a$. Solve the Maxwell's equations between the conducting planes to express E_x, E_y, H_x and H_y of the wave in terms of E_z and H_z and hence classify the waves in the wave-guide.	CO4	7 Marks

UNIT-II

3.	a)	Two Hertzian dipoles with horizontal orientation are placed at $z = \pm d/2$, and the excitation currents are $I_0\angle\alpha/2$ and $I_0\angle - \alpha/2$. Deduce an expression for the Array Factor and also calculate the radiation pattern of the array.	CO2	7 Marks
	b)	A lossless resonant Half-wave dipole antenna with an input impedance of 73Ω is to be connected to a transmission line whose characteristic impedance is 50Ω. Assuming that the radition intensity is given approximately by $U(\theta, \varphi) = A_0 \sin^3\theta$, calculate: *i*) the maximum gain of the antenna. *ii*) the total efficiency.	CO4	7 Marks

(OR)

4.	a)	A short dipole has its normalized field $E_n(\theta, \varphi) = \sin\theta$. Show that its maximum directivity $D_0 = 1.5$. If P_{rad} is the total power radiated by an antenna, show that $D_0 = (4\pi U(\theta, \varphi)/P_{rad})$. Comment on the directional characteristics of the antenna.	CO3, CO2	7 Marks
	b)	A uniform plane wave incidents on a very short lossless dipole ($l<<\lambda$), find the maximum effective aperture A_{em}, assuming that $R_r = 80\pi^2 (dl/\lambda)^2$ and incident field is lineally polarized.	CO2	7 Marks

UNIT-III

5.	a)	Given a linear, broadside, uniform array of 10 isotropic elements with separation of $d=\lambda/4$ between the elements, find the directivity of the array.	CO3	7 Marks
	b)	What is broad side array? Evaluate the expression for the radiation pattern for an end fire array of N identical elements.	CO1	7 Marks

(OR)

6.	a)	Design a four element ordinary end-fire array with the elements spacing along the *z*-axis a distance d apart. For a spacing of $d = \frac{\lambda}{2}$ between the elements find the: i) Progressive phase excitation between the elements. ii) Nulls. iii) Maximum Band-with between the nulls. iv) Directivity.	CO3	7 Marks
	b)	Prove that the directivity of an end-fire array of the point sources spaced distance d apart, is given by $D(\theta) = \frac{2}{1+\frac{\sin 2kd}{2kd}}$.	CO2	7 Marks

UNIT-IV

7.	a)	With a neat sketch justify how off-set feed mechanism avoids impedance mismatching and aperture blocking.	CO1	7 Marks
	b)	"In a parabolic reflector horn feed performs better than waveguide feed", justify this statement.	CO1	7 Marks

(OR)

8.	a)	Create a cassegrain feed for a parabolic reflector.	CO4	7 Marks
	b)	Suggest an antenna which covers curved wave front to plane wave front during transmission and vice versa during reception. Elaborate its functioning with neat sketches.	CO1	7 Marks

UNIT-V

9.	a)	Inferanechoic chamber measurement and illustrate the reciprocity in antenna measurements.	CO5	7 Marks
	b)	Demonstrate the compact antenna test ranges and near field ranges with neat diagrams.	CO1	7 Marks

(OR)

10.	a)	How the radiation pattern of an antenna are measured. Support with neat diagram.	CO5	7 Marks
	b)	Measurement of field strength and field pattern of a yagi uda array working at 850MHz band is required. What will be the far field at the testing antenna has to be setup? Explain the procedure with a neat diagram.	CO4	7 Marks

DIGITAL SIGNAL PROCESSING

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit

All questions carry equal marks

UNIT-I

1.	a)	Determine the response of discrete time system given by difference $y(n) = -0.8y(n-1) + x(n)$. When the input is step and $y(-1) = 0$.	CO2	7 Marks
	b)	Define the symmetric and anti symmetric signals with examples.	CO1	7 Marks
		(OR)		
2.	a)	Check the following system described with difference equations for linearity, shift invariance, stability and causality: $y(n) + y(n+1) = nx(n)$.	CO2	7 Marks
	b)	Categories the classification of discrete time signals with examples.	CO1	7 Marks

UNIT-II

3.	a)	Develop the inverse FFT algorithm with neat sketch for N=8.	CO3	7 Marks
	b)	Determine linear convolution of $x(n) = \{1,1,2,2\}$ and $h(n) = \{1,2,1\}$ using DFT.	CO5	7 Marks
		(OR)		
4.	a)	Develop the DIT FFT algorithm with neat sketch for $N = 8$.	CO3	7 Marks
	b)	Contrast the transforms DTFT, DFS and DFT.	CO4	7 Marks

UNIT-III

5.	a)	For the system function $H(z) = \frac{(z^2 + z + 1)}{(z + 0.5)(z + 0.4)}$, obtain the parallel from of realization.	CO4	7 Marks
	b)	Discuss briefly about analog to analog transformation in analog filters.	CO1	7 Marks
		(OR)		
6.	a)	Interpret the advantages and disadvantage bilinear transformation.	CO4	7 Marks
	b)	Mention the important features of IIR filter.	CO1	7 Marks

UNIT-IV

7.	a)	Distinguish the window functions used in the design of FIR filters.	CO2	7 Marks
	b)	Prove that linear phase characteristics can be achieved if impulse response is symmetric with conditions $h(N-1-n) = h(n)$ centered at $\alpha = (N-1)/2$.	CO5	7 Marks
		(OR)		
8.	a)	Derive the frequency response of Linear phase FIR filter when impulse response is symmetric when N even no. samples.	CO2	7 Marks
	b)	Design a linear phase FIR lowpass filter with $Wc = 0.5\pi$ rad/sample by taking 11 samples of ideal frequency response using frequency sampling method.	CO5	7 Marks

UNIT-V

9.	a)	Write a short note on Memory Access schemes in P-DSPs.	CO1	7 Marks
	b)	Explain Von Neumann and Harvard architecture with a neat sketch.	CO1	7 Marks
		(OR)		
10.	a)	Discuss various techniques adapted for increasing the number of memory accesses/instruction cycle.	CO1	7 Marks
	b)	Discuss in detailed about pipelining of instruction execution in DSP processor.	CO1	7 Marks

IMAGE PROCESSING
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Explain the different components in digital image processing.	CO1	8 Marks
	b)	Explain the basic relationship between the pixels.	CO2	6 Marks
		(OR)		
2.	a)	Analyze the performance of Hadamard transforms.	CO1	7 Marks
	b)	Explain about spatial operations performed on images.	CO2	7 Marks
		UNIT-II		
3.	a)	Develop image enhancement by point processing method.	CO1	6 Marks
	b)	List and explain different grey level intensity transformation functions.	CO3	8 Marks
		(OR)		
4.	a)	Distinguish between spatial domain and frequency domain filters for image enhancement.	CO1	5 Marks
	b)	Define histogram? Explain the histogram equalization.	CO3	9 Marks
		UNIT-III		
5.	a)	Distinguish between image restoration & enhancement.	CO1	6 Marks
	b)	Define impulse noise and explain how to remove impulse noise from an image.	CO4	8 Marks
		(OR)		
6.	a)	How to estimate the degradation function using inverse filtering?	CO1	8 Marks
	b)	Write a short notes on: i) Order statistic filter. ii) Mean filter. iii) Adaptive filter.	CO4	6 Marks
		UNIT-IV		
7.	a)	Write a short notes on: i) Bit plane coding. ii) Transform basic coding.	CO5	6 Marks
	b)	Apply various techniques used in dictionary based compression and explain in detail.	CO1	8 Marks
		(OR)		
8.	a)	Define compression and what are the different types of compression techniques	CO5	9 Marks
	b)	Explain redundancy & fidelity criteria.	CO1	5 Marks
		UNIT-V		
9.	a)	Define segmentation. Explain detection of discontinuities.	CO5	9 Marks
	b)	Explain about region based segmentation.	CO6	5 Marks
		(OR)		
10.	a)	How to convert RGB to HSI color components?	CO5	6 Marks
	b)	Explain about pseudo color image compression.	CO6	8 Marks

TELECOMMUNICATION SWITCHING SYSTEMS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Write about the classification of switching systems.	CO1	7 Marks
	b)	What are the components of a telecommunication network?	CO1	7 Marks
		(OR)		
2.	a)	Draw the circuit diagram of a half duplex telephone circuit and explain its operation.	CO1	7 Marks
	b)	Draw 3 x 3 crossbar switching and describe it.	CO1	7 Marks

UNIT-II

3.	a)	What are the factors that limits the maximum length of the subscriber loop?	CO2	7 Marks
	b)	Describe the methods used to decide the route for a particular connection.	CO2	7 Marks
		(OR)		
4.	a)	What is a subscriber loop interface and also mention the functions performed by it.	CO2	7 Marks
	b)	How to supress the echo in telecommunication networks?	CO2	7 Marks

UNIT-III

5.	a)	Describe the three forms of signalling involved in a telecommunication network.	CO3	7 Marks
	b)	Distinguish between inband and outband signalling techniques.	CO3	7 Marks
		(OR)		
6.	a)	Compare and contrast inchannel and common channel signalling.	CO3	7 Marks
	b)	Draw and explain the formats of SUM and MUM.	CO3	7 Marks

UNIT-IV

7.	a)	What are the issues involved in data communication using PSTN?	CO4	7 Marks
	b)	What is circuit switching and describe it in detail about phases involved in data transfer?	CO4	7 Marks
		(OR)		
8.	a)	What are the new services available in ISDN?	CO4	7 Marks
	b)	How to transfer data via ATM?	CO4	7 Marks

UNIT-V

9.	a)	What are the advantages of ADSL?	CO5	7 Marks
	b)	Draw and describe the cable TV network.	CO5	7 Marks
		(OR)		
10.	a)	What are the components of HFC network?	CO5	7 Marks
	b)	Draw and describe the SONET layers.	CO5	7 Marks

LIGHT WAVE COMMUNICATIONS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define an optical fiber. Explain in detail different types of optical fibers giving neat sketches.	CO1	7 Marks
	b)	A silica glass fibers has a core refractive index of 1.5 and the cladding refractive index of 1.45 then calculate the critical angle and the percentage of power collected by the fiber?	CO1	7 Marks
		(OR)		
2.	a)	Explain about graded index fibers with diagrams.	CO1	6 Marks
	b)	A Graded index fiber with parabolic refractive index at the core axis is 1.5 and relative index difference is 1%. Estimate the maximum possible core diameter in single mode operation at wavelength 1.3mm?	CO4	8 Marks

UNIT-II

3.	a)	Explain the material dispersion in optical fibers.	CO2	7 Marks
	b)	Define and explain the linear polarized modes in optical fiber.	CO4	7 Marks
		(OR)		
4.	a)	Explain stimulated Brillouin scattering and stimulated raman scattering.	CO4	7 Marks
	b)	Write short notes on bending losses and explain how to overcome the losses.	CO4	7 Marks

UNIT-III

5.	a)	Derive the expression for threshold condition in laser oscillator.	CO1	5 Marks
	b)	The minority carrier recombination lifetime of an LED IS 5ns. When a constant d.c drive current is applied to the device the optical output power is 300μW. Determine the optical output power when the device is modulated with an rms drive current corresponding to the d.c drive current at frequencies of (i)200Mhz (ii)100Mhz	CO3	9 Marks
		(OR)		
6.	a)	Explain quantum efficiency and the responsitivity of the optical detectors.	CO3	6 Marks
	b)	Draw the structures of PIN and APD photo detectors and explain their operations.	CO1	8 Marks

UNIT-IV

7.	a)	Describe lensing mechanisms to improve coupling efficiency between source and a fiber.	CO1	7 Marks
	b)	Explain about straight sleeve connectors.	CO1	7 Marks
		(OR)		
8.	a)	Discuss the source output pattern of a fiber.	CO3	7 Marks
	b)	Define splices and explain about the different types of splices.	CO1	7 Marks

UNIT-V

9.	a)	Derive an expression for the total system rise time budget in terms of transmitter and receiver fiber rise time.	CO5	7 Marks
	b)	calculate the system rise time of a 6KM fiber optic link with the following specifications, rise time of the LED and its drive electronics is 12ns, material dispersion related rise time degradation is 24ns, bandwidth of the optical receiver 20Mhz, bandwidth distance product of the fiber 400 Mhz-Km and mode mixing Factor 'q' over 6Km fiber is 1.0.	CO5	7 Marks

(OR)

10.	a)	Discuss the component choices a system designer has when selecting components for an optical fiber communication systems.	CO5	7 Marks
	b)	Explain in detail about SONET/SDH rings.	CO5	7 Marks

CODE No.: 16BT60501 SVEC-16

SOFTWARE TESTING

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define early testing. List the benefits of early testing.	CO1	7 Marks
	b)	What is the psychology behind testing by an independent team?	CO6	7 Marks
		(OR)		
2.	a)	Compare manual testing and automated testing.	CO2	8 Marks
	b)	Define test strategy matrix. Explain.	CO1	6 Marks

UNIT-II

3.	a)	What is loop testing? Explain various loops.	CO1	8 Marks
	b)	Explain data flow testing in detail.	CO1	6 Marks
		(OR)		
4.	a)	Differentiate statement coverage and condition coverage	CO2	8 Marks
	b)	Explain multiple condition coverage.	CO1	6 Marks

UNIT-III

5.	a)	List the steps involved in deriving test cases using cause effect graphing based testing.	CO2	7 Marks
	b)	Derive the test cases for the following scenario. "A program has been designed to determine the nature of roots of a quadratic equation. The quadratic equation takes three input values from the range [0, 100]."	CO3	7 Marks
		(OR)		
6.	a)	Design a finite state machine which accepts "aabb" character sequence in a given text.	CO3	7 Marks
	b)	Write an algorithm that simulates the behavior of finite state machine.	CO1	7 Marks

UNIT-IV

7.		Test the Auto Teller Machine software by developing the following. i) Unit test plan ii) Integration test plan iii) System test plan.	CO6	14 Marks
		(OR)		
8.		Consider a project with the following components: EI (Simple) = 30, EO(average) = 20, EQ(average)=35, ILF(complex)=8, ELF(complex)=05. In addition, the system requires significant end-user efficiency, moderate distributed data processing, critical data communications, and other GSCs are incidental. Compute the function points for this system using FPA.	CO4	14 Marks

UNIT-V

9.	a)	Explain the need for automated testing tools.	CO1	7 Marks
	b)	Illustrate the steps involved in selection of testing tools.	CO2	7 Marks
		(OR)		
10.		Draw and discuss the analysis and design models for any web application.	CO5	14 Marks

WIRELESS NETWORKS
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Illustrate with a neat sketch about PSTN and its extensions to cellular telephone services.	CO1	10 Marks
	b)	List and explain the uses of wireless networks in various market sectors.	CO5	4 Marks
		(OR)		
2.	a)	Compare and Contrast 1G and 2G wireless standards.	CO2	10 Marks
	b)	Write about wireless LAN standards.	CO1	4 Marks
		UNIT-II		
3.	a)	List and explain in detail various security requirements for wireless networks.	CO2	7 Marks
	b)	Compare and contrast various wireless Network Topologies.	CO2	7 Marks
		(OR)		
4.	a)	Write in detail about Cell Fundamentals.	CO1	5 Marks
	b)	Explain in keen about Location and Handoff Management.	CO2	9 Marks
		UNIT-III		
5.	a)	Explain in detail about Carrier sensing and its importance.	CO1	7 Marks
	b)	Illustrate with a neat sketch general MAC frame format.	CO2	7 Marks
		(OR)		
6.	a)	Explain the physical specification of FHSS.	CO1	7 Marks
	b)	Compare and Contrast between 802.11a and 802.11b.	CO3	7 Marks
		UNIT-IV		
7.	a)	Briefly explain SMS operation.	CO2	7 Marks
	b)	With a neat Sketch explain forward CDMA channel.	CO1	7 Marks
		(OR)		
8.	a)	Explain in detail about IS-95 frame format.	CO2	7 Marks
	b)	Brief about wireless application Protocol.	CO1	7 Marks
		UNIT-V		
9.	a)	Brief about HOME-RF.	CO1	7 Marks
	b)	List and Explain the requirements and basic architecture of HYPER LAN.	CO2	7 Marks
		(OR)		
10.	a)	Classify SWAN and WAND WATM Systems.	CO2	7 Marks
	b)	Explain in keen the architecture of Bluetooth.	CO1	7 Marks

ARM PROCESSORS AND PIC MICROCONTROLEERS

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain architecture of PIC 18 with a suitable block diagram.	CO4	7 Marks
	b)	Explain Branch, call and time delay instructions of PIC with example.	CO2	7 Marks
		(OR)		
2.	a)	Differentiate between microprocessor and microcontroller.	CO4	7 Marks
	b)	Write PIC to toggle bits of port B, Port C and port D continuously with delay.	CO1	7 Marks

UNIT-II

3.	a)	Describe the different DB9 pins used for handshaking in RS232.	CO1	7 Marks
	b)	Select appropriate clock frequency and timer in require mode, write a program in assembly to generate a square wave on Port A Pin1 using timer with a duty cycle of 40 % with and without interrupt.	CO5	7 Marks
		(OR)		
4.	a)	Write a program to read Port A and transmit serially using interrupts with clock Frequency of 10MHz and baud rate of 9600.	CO5	7 Marks
	b)	Explain the interrupt mechanism, types and priority of PIC microcontroller.	CO1	7 Marks

UNIT-III

5.	a)	Draw interfacing diagram of 16x2 LCD with PIC 18Fxx microcontroller, and explain function of each pin of LCD panel.	CO3	7 Marks
	b)	Design an interfacing circuit and program to convert an analog signal connected to channel 2 into a digital signal.	CO3	7 Marks
		(OR)		
6.	a)	With a neat circuit diagram explain how a 4 x 4 keypad is interfaced with PIC microcontroller and write ALP for keypad scanning.	CO6	7 Marks
	b)	Write a program to rotate the stepper motor by an angle of 180 Degrees. Assume step size of 1.8 Degrees.	CO4	7 Marks

UNIT-IV

7.	a)	List the registers present in different exception modes of ARM cortex M3 and explain the functionality of them.	CO1	7 Marks
	b)	Explain about the exception support of ARM cortex M3.	CO4	7 Marks
		(OR)		
8.	a)	Give the important features and applications of ARM cortex M3.	CO1	7 Marks
	b)	Describe various registers available in ARM cortex M3 processor.	CO2	7 Marks

UNIT-V

9.	a)	Explain the concept of pre-indexing, auto indexing and post indexing with suitable examples.	CO1	7 Marks
	b)	Explain data processing arithmetic instructions with examples.	CO4	7 Marks
		(OR)		
10.	a)	Illustrate the Combined Compare and Conditional Branch instruction with examples.	CO1	7 Marks
	b)	Write an ALP to perform multiplication of two numbers in arm mode and then switch to thumb mode to perform addition.	CO2	7 Marks

OPTO-ELECTRONICS AND LASER INSTRUMENTATION
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define an optical fiber. Explain in detail different types of optical fibers with neat sketches.	CO1	7 Marks
	b)	Explain p-i-n photo detector with neat sketch.	CO1	7 Marks
		(OR)		
2.	a)	What are the need of connectors and the principle requirements of a connectors design?	CO1	7 Marks
	b)	What is the significance of total internal reflection and numerical aperture of an optical fiber?	CO1	7 Marks

UNIT-II

3.	a)	Explain the block diagram of basic optical fiber sensor system.	CO1	7 Marks
	b)	Describe in detail the principle of measurement of pressure and temperature using fiber optic sensors.	CO3	7 Marks
		(OR)		
4.		Explain the operation of: i) optical fluid level detector. ii) optical reflective type displacement sensor. iii) ring interferometer with multiturnfiber coil.	CO1	14 Marks

UNIT-III

5.	a)	List the properties of lasers and how it fulfills the major requirements for an optical fiber emitter.	CO1	7 Marks
	b)	Derive Einstein relation for the rates of the three transition process of absorption, spontaneous emission and simulated emission for two level atomic systems.	CO1	7 Marks
		(OR)		
6.	a)	Explain about: i) Population inversion. ii) Optical feedback and laser oscillation.	CO3	7 Marks
	b)	Explain about the operation of Q switching in detail.	CO5	7 Marks

UNIT-IV

7.	a)	Explain about material processing using laser.	CO2	7 Marks
	b)	Explain about: i) Laser welding. ii) Laser cutting. iii) Laser drilling.	CO6	7 Marks
		(OR)		

8.	a)	Explain how laser is used in material processing and also explain laser heating process	CO6	7 Marks
	b)	How the distance is measured by Michaelson interferometry using laser?.	CO6	7 Marks

UNIT-V

9.	a)	Explain about any three scientific applications of holography.	CO1	7 Marks
	b)	Explain the principle and operation of magneto optic modulator with a neat diagram.	CO1	7 Marks

(OR)

10.	a)	Describe the construction and reconstruction of hologram.	CO1	7 Marks
	b)	List the use of holography.	CO1	7 Marks

AIRCRAFT INSTRUMENTATION
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Give a brief account on display colour and markings, instrument grouping.	CO1	7 Marks
	b)	Give a brief account on Aircraft instruments and their layout.	CO1	7 Marks
		(OR)		
2.	a)	Discuss about horizontal situation indicator.	CO1	7 Marks
	b)	What are the secondary control surfaces and their functionalities?	CO2	7 Marks

UNIT-II

3.		Give a brief account on International Standard Atmosphere (ISA).	CO1	14 Marks
		(OR)		
4.		Explain with a neat diagram how the combined pitot-static tube is used to measure the total static and dynamic pressures in an aircraft.	CO1	14 Marks

UNIT-III

5.		Analyse the principle and working of vibrating gyros.	CO4	14 Marks
		(OR)		
6.		Discuss about basic mechanical gyros and its properties.	CO4	14 Marks

UNIT-IV

7.	a)	With an appropriate diagram, describe the operation of electronic torque meter.	CO5	10 Marks
	b)	Calculate the horse power. If the speed of an engine is 1800 rpm and torque is 4000 ft-lbs.	CO1	4 Marks
		(OR)		
8.	a)	Give a brief account about non-contact type tacho probe.	CO1	7 Marks
	b)	With a neat diagram, explain about operation of optical tachometer.	CO1	7 Marks

UNIT-V

9.		Explain in detail about flight director system with suitable diagrams.	CO1	14 Marks
		(OR)		
10.		Explain in detail about altitude director indicator.	CO1	14 Marks

CODE No.: 16BT61205 SVEC-16

Roll No. | | | | | | | | | | |

CYBER SECURITY AND LAWS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What do you mean by cyber crime? Discuss the nature and types of cyber crime. Explain its challenges.	CO2	9 Marks
	b)	What is Social Engineering? How to prevent it?	CO1	5 Marks
		(OR)		
2.	a)	Discuss about monetary penalties, adjudication and appeals under IT Act 2000.	CO2	10 Marks
	b)	Explain in detail about botnets with an example.	CO1	4 Marks

UNIT-II

3.		Explain the terms: Phishing, Spyware, Steganography, Trojan Horses.	CO3	14 Marks
		(OR)		
4.	a)	Demonstrate about the password cracking Process.	CO3	5 Marks
	b)	Discuss in detail about DoS and DDoS Attacks.	CO1	9 Marks

UNIT-III

5.	a)	Discuss about the consequences of not addressing weaknesses in the IT act.	CO1	6 Marks
	b)	What is meant by Digital Signature? Explain its impact in IT Act.	CO1	8 Marks
		(OR)		
6.	a)	Briefly describe the challenges to Indian Law in cyber crime scenario.	CO1	7 Marks
	b)	Give detailed description about cyber laws in Indian context.	CO1	7 Marks

UNIT-IV

7.	a)	Explain in detail about Security and privacy implications of cloud Computing.	CO6	7 Marks
	b)	Explain the Organizational Guidelines for Safe Computing.	CO6	7 Marks
		(OR)		
8.		Describe the fair information practices in the context of cookie usage in the website design.	CO4	14 Marks

UNIT-V

9.	a)	Discuss in detail about intellectual property in the cyber space.	CO5	7 Marks
	b)	What are the main reasons that motivates a hacker to target any business.	CO1	7 Marks
		(OR)		
10.	a)	Illustrate about cyber terrorism with reference to parliament attack.	CO2	8 Marks
	b)	Discuss about Ethical hacking and Hactivism in detail.	CO3	6 Marks

CODE No.: 16BT61501 SVEC-16

Roll No. | | | | | | | | | | |

DATA WAREHOUSING AND DATA MINING
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Draw and explain the components of Data Warehouse Architecture.	CO1	7 Marks
	b)	Differentiate OLTP and OLAP.	CO1	7 Marks
		(OR)		
2.	a)	What is multi-dimensional data model? Explain its concept.	CO2	7 Marks
	b)	Discuss about ROLAP, MOLAP, and HOLAP.	CO1	7 Marks

UNIT-II

3.		Discuss in detail about the major issues in Data Mining and its functionalities.	CO4	14 Marks
		(OR)		
4.		What is data pre-processing? Explain why it is essential to pre-process the data before mining. Explain in detail about various preprocessing techniques.	CO3	14 Marks

UNIT-III

5.	a)	Write and explain APRIORI algorithm with a suitable example.	CO4	7 Marks
	b)	Describe the concept of Multilevel and multidimensional Association rule mining.	CO2	7 Marks
		(OR)		
6.	a)	Write and explain decision tree induction algorithm.	CO3	7 Marks
	b)	What is pruning? Discuss about various pruning techniques.	CO1	7 Marks

UNIT-IV

7.	a)	Discuss about different data types used in cluster analysis.	CO2	7 Marks
	b)	What is an outlier? Describe various outlier handling methods.	CO4	7 Marks
		(OR)		
8.		Explain the following clustering techniques. i) K-Means. ii) DBSCAN.	CO1	14 Marks

UNIT-V

9.	a)	Describe complex data types used in data mining.	CO4	8 Marks
	b)	Explain the concept of sequence mining.	CO4	6 Marks
		(OR)		
10.	a)	Explain the characteristics of multimedia mining.	CO4	7 Marks
	b)	Explain how web mining is different from text mining.	CO6	7 Marks

CRYPTOGRAPHY AND NETWORK SECURITY

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Apply Caesar cipher and k=5 decrypt the given Cipher text "YMJTYMJWXNIJTKXNQJSHJ".	CO3	7 Marks
	b)	Describe in detail about the types of cryptanalytic attack.	CO2	7 Marks
		(OR)		
2.	a)	Differentiate between transposition cipher and substitution cipher. Apply two stage transpositions Cipher on the "treat diagrams as single units" using the keyword "sequence".	CO1	7 Marks
	b)	Solve using Playfair cipher. Encrypt the word "SREE VIDYANIKETHANENGINEERING COLLEGE" with the keyword "MOHANBABU". List the rules used.	CO3	7 Marks

UNIT-II

3.	a)	Formulate the single round of DES algorithm.	CO1	7 Marks
	b)	Summarize the role of discrete log in the Diffie-Hellman key exchange in exchanging the secret key among two users.	CO1	7 Marks
		(OR)		
4.	a)	How AES is used for encryption/Decryption? Discuss with example.	CO1	7 Marks
	b)	Estimate the encryption and decryption values for the RSA algorithm parameters. P=7, Q=11, E=17, M=8.	CO3	7 Marks

UNIT-III

5.	a)	Compare the features of SHA and MD5 algorithm.	CO2	7 Marks
	b)	Summarize CMAC algorithm and its usage.	CO2	7 Marks
		(OR)		
6.	a)	Discuss about the objectives of HMAC and its security features.	CO1	7 Marks
	b)	Describe the authentication protocol and list its limitations, how the limitations overcome.	CO1	7 Marks

UNIT-IV

7.	a)	Discover how ESP is applied to both transport and tunnel modes in IP.	CO1	7 Marks
	b)	Demonstrate secure Electronic Transaction with neat diagram.	CO5	7 Marks
		(OR)		
8.	a)	What is the need for security in IP networks?	CO3	7 Marks
	b)	Describe the IPv6 authentication header.	CO6	7 Marks

UNIT-V

9.	a)	Discuss the role of intrusion detection system. What are the three benefits that can be provided by the intrusion detection system?	CO1	7 Marks
	b)	Discuss the architecture of distributed intrusion detection system with the necessary diagrams.	CO1	7 Marks
		(OR)		
10.	a)	Discover the participants of SET system and explain in detail.	CO5	7 Marks
	b)	Illustrate the Trojan Horse Defence in trusted system.	CO1	7 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

III B.Tech II Semester (SVEC-16) Supplementary Examinations March - 2021

MANAGERIAL ECONOMICS AND PRINCIPLES OF ACCOUNTANCY

[Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. "Managerial Economics is the discipline which deals with the application of business management". Discuss. CO1 14 Marks

(OR)

2. What is elasticity of demand? Explain different types of price elasticity of demand. CO2 14 Marks

UNIT-II

3. Define production function. How does a long run production function differ from short run production function? CO1. CO3 14 Marks

(OR)

4. From the following information calculate: CO2 14 Marks
   i) P/V Ratio.
   ii) Break Even Point.
   iii) Margin of Safety.
   iv) Sales require to earn a profit of Rs. 2,40,000.

Particulars	Rs.
Total Sales	6,00,000
Selling price per unit	150
Variable cost per unit	90
Fixed costs	1,80,000

UNIT-III

5. Explain the various features of a perfectly competitive market. How is price of a commodity determined under it? CO1, CO2 14 Marks

(OR)

6. How are price and output determined under monopoly? Show that under monopoly, price is higher and output smaller than under perfect competition. CO2 14 Marks

UNIT-IV

7. What is Accounting? What are the accounting concepts and conventions? Explain any two accounting concepts in detail. CO1, CO4 14 Marks

(OR)

8. From the following transactions write Journal entries into the books of Purohith CO3 14 Marks

Date	Particulars	Rs.
2018 April 5	Started Business with Capital	2,00,000
April 9	Sold goods to Mudiliar on credit	60,000
April 10	Sold goods to Aswathama for cash	40,000
April 13	Goods returned by Mudiliar	2,200
April 17	Purchased goods from Madhu on credit	45,000
April 18	Goods returned to Madhu	1,000
April 24	Paid cash to Madhu	44,000

UNIT-V

9. Explain the role of computerized accounting system in modern business organizations. CO3, CO4 14 Marks

(OR)

10. From the following Trail Balance of Gowham, prepare Trading Account, Profit and Loss Account for year ending 31st March 2017 and Balance Sheet as on date. CO5 14 Marks

Trail Balance as on 31st March, 2017

Particulars	Dr. Rs	Cr. Rs
Buildings	20,000	
Capital		60,000
Purchases and Sales	10,000	30,000
Opening stock (1-4-2016)	5,000	
Debtors and Creditors	12,000	6,000
Drawings account	4,000	
Sales returns and Purchase returns	2,000	500
Freight	2,500	
Office Salaries	8,000	
Wages	1,500	
Postage and Telegrams	1,000	
Machinery	15,000	
Bills Receivables & Bills Payables	8,000	2,000
Advertisement	2,000	
Cash in Hand	3,500	
Loose Tools	4,000	
Total	**98,500**	**98,500**

Adjustments:

1. Closing stock valued at Rs. 6,00/-
2. Depreciation on Buildings by 10% and Loose Tools by 20%.
3. Interest on Capital at 10%.

MANAGEMENT SCIENCE

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss in detail the various functions of management.	CO3	7 Marks
	b)	What are the Social responsibilities of Management?	CO1	7 Marks
		(OR)		
2.	a)	Explain about the elements of corporate planning process.	CO2	7 Marks
	b)	Elaborate the different types of organizations with examples.	CO3	7 Marks

UNIT-II

3.	a)	Describe the principle and types of plant layout.	CO2	7 Marks
	b)	Describe the concept of ABC analysis in detail.	CO2	7 Marks
		(OR)		
4.		What do you mean by work study? Explain the basic procedure involved in method study and work measurement.	CO4	14 Marks

UNIT-III

5.	a)	Explain about the Herzberg two factor theory of motivation.	CO3	7 Marks
	b)	Explain in detail any four methods of Job evaluation.	CO3	7 Marks
		(OR)		
6.	a)	Define HRM. Explain the nature and functions of HRM.	CO4	7 Marks
	b)	Explain the role of merit rating in HRM.	CO3	7 Marks

UNIT-IV

7.	a)	What do you understand by Project crashing?	CO4	7 Marks
	b)	Explain the differences between entrepreneur and manager.	CO4	7 Marks
		(OR)		
8.		Consider a project consisting of nine jobs with the following precedence relations and average time estimates.	CO5	14 Marks

Job	Predecessor	Time (Days)
A	-	30
B	-	20
C	A, B	20
D	A, B	20
E	B	10
F	D, E	10
G	C, F	40
H	D, E	20
I	G, H	30

Draw the project network, Identify the critical path and variance.

UNIT-V

9.	a)	Explain how Just-In-Time (JIT) has changed production environment.	CO5	7 Marks
	b)	Briefly explain Enterprise Resource Planning.	CO3	7 Marks
		(OR)		
10.	a)	Explain about the supply chain management.	CO5	7 Marks
	b)	Elaborate the concept of six sigma with examples.	CO3	7 Marks

CODE No.: 16BT6HS10 SVEC-16

INDIAN HISTORY

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	What are the nonliterary sources describing about Indian history and explain briefly about inscriptions and numismatics.	CO1	14 Marks
	(OR)		
2.	Describe the principles of community origination and draw the conclusions from sociological concepts.	CO2	14 Marks

UNIT-II

3.	Explain the importance of Great bath in Mohenjodaro and its construction features.	CO1	14 Marks
	(OR)		
4.	What are the edits of Asoka and briefly narrate them.	CO1	14 Marks

UNIT-III

5.	Name any two rulers ruled the southern states and explain about them briefly.	CO2	14 Marks
	(OR)		
6.	How the Moghul empire disappeared in India and write salient feature Akbar ruling?	CO2	14 Marks

UNIT-IV

7.	Explain various steps taken by British to improve the industry sector in India.	CO3	14 Marks
	(OR)		
8.	How Muslims are separated in the war of independence and how they are provoked by Walli?	CO2	14 Marks

UNIT-V

9.	What do you mean by social exclusion and explain its importance in Indian context?	CO2	14 Marks
	(OR)		
10.	Communalism and secularism are part of India. Explain.	CO2	14 Marks

CODE No.: 16BT6HS11 SVEC-16

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

III B.Tech II Semester (SVEC-16) Supplementary Examinations March - 2021

PERSONALITY DEVELOPMENT

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.		"Moral compass plays a vital role in making difficult decisions". Describe.	CO1	14 Marks
		(OR)		
2.	a)	"Wearing a mask is the right thing to do". Describe.	CO1	7 Marks
	b)	List out the strategies to improve yourself.	CO1	7 Marks
		UNIT-II		
3.		Attitudes are learned with careful step-by-step instruction- Examine.	CO2	14 Marks
		(OR)		
4.	a)	Classify the consequences for the people who have positive and negative attitudes.	CO2	7 Marks
	b)	Discover a few situations that show the influence of person's attitude on others.	CO2	7 Marks
		UNIT-III		
5.		"Thinking skills can be developed". Illustrate.	CO3	14 Marks
		(OR)		
6.	a)	Employers want people who can think. Draw out different strategies.	CO3	7 Marks
	b)	Show some important ways to handle stress management.	CO3	7 Marks
		UNIT-IV		
7.		Prepare the procedure you adapt to present a problem with your supervisor.	CO4	14 Marks
		(OR)		
8.	a)	What personal qualities do you need to work well under the supervision of a Laiser-Faire Leader?	CO4	7 Marks
	b)	Construct a few strategies to develop an effective relationship with your supervisor.	CO4	7 Marks
		UNIT-V		
9.		Evaluate your personal characteristics to exhibit on the job to keep your position.	CO5	14 Marks
		(OR)		
10.	a)	"Sharing your goals with others helps in achieving them". Evaluate.	CO5	7 Marks
	b)	"Visualization plays a vital role for the success in your career". Justify.	CO5	7 Marks

CODE No.: 16BT30503 SVEC-16

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

III B.Tech II Semester (SVEC-16) Supplementary Examinations March - 2021

PYTHON PROGRAMMING
[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Write notes on Python Standard Library.	CO1	7 Marks
	b)	Write a simple Python program that prompts the user for a certain number of cities for the Traveling Salesman problem and displays the total number of possible routes that can be taken. Your program should function as shown below. How many cities? 10 For 10 cities, there are 3628800 possible routes.	CO1, CO3	7 Marks
		(OR)		
2.	a)	Write a Python program that prompts the user to enter an upper or lower case letter and displays the corresponding Unicode encoding.	CO1, CO3	7 Marks
	b)	Algorithms and computers are a "perfect match". Justify.	CO1	7 Marks

UNIT-II

3.	a)	Write a brief notes on relational, membership and boolean operators along with suitable examples.	CO1	7 Marks
	b)	Write a Python program in which a student enters the number of college credits earned. If the number of credits is greater than 90, 'Senior Status' is displayed; if greater than 60, 'Junior Status' is displayed; if greater than 30, 'Sophomore Status' is displayed; else, 'Freshman Status' is displayed.	CO1-CO3	7 Marks
		(OR)		
4.	a)	Create a dictionary named member table that contains users' email addresses as keys and their current password as the values. Write a function that generates a temporary new password for a given user and updates it in the table.	CO1-CO3	7 Marks
	b)	Elaborate on dictionaries in Python, Set and Frozenset Types in Python.	CO1, CO3	7 Marks

UNIT-III

5.	a)	Write a Python function named modCount that is given a positive integer, n, and a second positive integer, m <= n, and returns how many numbers between 1 and n are evenly divisible by m.	CO1-CO3	7 Marks
	b)	Write notes on String Methods in Python.	CO1	7 Marks
		(OR)		
6.	a)	Write a python program segment that opens and reads a text file and displays how many lines of text are in the file.	CO1, CO3	7 Marks
	b)	Write a python program segment that reads a text file named original_text and displays how many times the letter 'e' occurs.	CO1, CO3, CO5	7 Marks

UNIT-IV

7.	a)	Discuss the fundamental turtle attributes and behavior.	CO1	7 Marks
	b)	Using relative positioning, give a set of instructions for controlling the turtle to draw an isosceles triangle on the screen (that is, a triangle with two equal-length sides).	CO1, CO4, CO5	7 Marks
		(OR)		
8.	a)	Describe what it means for a member of a class to be Private and to be Public. How to denote Public and Private Class Members in Python?	CO1, CO3	7 Marks
	b)	Implement a class named AvgList as a subclass of the built-in list class in Python, able to compute the average of a list of numeric values. If the list contains any nonnumeric types, a ValueError exception should be raised.	CO1, CO3-CO5	7 Marks

UNIT-V

9.	a)	Briefly Discuss tkinter Extensions.	CO4, CO5	7 Marks
	b)	With the aid of suitable examples, illustrate binding events.	CO5	7 Marks
		(OR)		
10.		Elaborate on reusable GUI components with classes.	CO5	14 Marks

CODE No.: 16BT40502 SVEC-16

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

III B.Tech II Semester (SVEC-16) Supplementary Examinations March - 2021

DATABASE MANAGEMENT SYSTEMS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Differentiate between DDL and DML with examples.	CO1	7 Marks
	b)	Discuss different notations used in ER model. Draw ER model for university database.	CO1	7 Marks
		(OR)		
2.	a)	Describe different types of users involved in database.	CO1	7 Marks
	b)	With a neat diagram, illustrate database architecture.	CO3	7 Marks

UNIT-II

3.	a)	Consider the following relations for a database that keeps track of automobile sales in a car dealership (OPTION refers to some optional equipment installed on an automobile): CAR(Serial_no, Model, Manufacturer, Price) OPTION(Serial_no, Option_name, Price) SALE(Salesperson_id, Serial_no, Date, Sale_price) SALESPERSON(Salesperson_id, Name, Phone) First, specify the foreign keys for this schema, stating any assumptions you make. Next, populate the relations with a few sample tuples, and then give an example of an insertion in the SALE and SALESPERSON relations that *violates* the referential integrity constraints and of another insertion that does not.	CO2	7 Marks
	b)	Discuss in detail the operators SELECT, PROJECT and UNION with suitable examples.	CO3	7 Marks
		(OR)		
4.	a)	What is Relational Calculus? Interpret Tuple and Domain Relation Calculus.	CO3	7 Marks
	b)	Define Logical database design. Classify the properties of a Relational Algebra.	CO4	7 Marks

UNIT-III

5.	a)	Consider the table employee (empId, name, department, salary). Assuming that department 5 has more than one employee. Write an SQL query to find the employees who get higher salary than anyone in the department 5.	CO2	7 Marks
	b)	State and explain different Aggregate functions in SQL.	CO4	7 Marks
		(OR)		
6.	a)	Define normalization. Explain 1*NF*, 2*NF*, 3*NF* Normal Forms.	CO1	7 Marks
	b)	Consider the relation scheme $R = (E, F, G, H, I, J, K, L, M, N)$ and the set of functional dependencies: $\{E, F\}\rightarrow\{G\}$, $\{F\}\rightarrow\{I,J\}$, $\{E,H\}\rightarrow\{K,L\}$, $\{K\}\rightarrow\{M\}$, $\{L\}\rightarrow\{N\}\}$ on R. What is the minimal key for R?	CO6	7 Marks

UNIT-IV

7.	a)	Briefly explain ACID property with an example.	CO3	7 Marks
	b)	Demonstrate testing for serializability with suitable example.	CO4	7 Marks

(OR)

8.	a)	Illustrate concurrent execution of transaction with examples.	CO3	7 Marks
	b)	Explain the following protocols for concurrency control: i) Lock-based protocols. ii) Time stamp based protocols.	CO4	7 Marks

UNIT-V

9.	a)	Differentiate between clustered and unclustered indexes.	CO5	7 Marks
	b)	A PARTS file with Part# as the key field includes records with the following Part# values: 23, 65, 37, 60, 46, 92, 48, 71, 56, 59, 18, 21, 10, 74, 78, 15, 16, 20, 24, 28, 39, 43, 47, 50, 69, 75, 8, 49, 33, 38. Suppose that the search field values are inserted in the given order in a B+-tree of order $p = 4$ and p leaf = 3; show how the tree will expand and what the final tree will look like.	CO6	7 Marks

(OR)

10.	a)	How can hashing be used to construct an index? Explain.	CO5	7 Marks
	b)	Write short notes on Indexed Sequential Access Methods (ISAM).	CO1	7 Marks

CODE No.: 16BT50308 SVEC-16

MECHATRONICS
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Define the term Mechatronics. Describe the key elements of the Mechatronics System.	CO1	14 Marks
		(OR)		
2.		Define the term feedback control system. Describe the characteristics of feedback control system.	CO1	14 Marks

UNIT-II

3.	a)	Explain the working principle of LVDT.	CO2	10 Marks
	b)	Explain the principle of light sensor.	CO2	4 Marks
		(OR)		
4.		Explain the principle of operation and characteristics of DC motor.	CO2	14 Marks

UNIT-III

5.		With a diagram, explain any two operational amplifiers.	CO3	14 Marks
		(OR)		
6.	a)	What do you mean by converters? Explain any one analog to digital converters.	CO3	8 Marks
	b)	With circuit, explain current to voltage circuit.	CO3	6 Marks

UNIT-IV

7.	a)	Explain proportional controller with application.	CO4	8 Marks
	b)	Explain the procedure to select controller.	CO4	6 Marks
		(OR)		
8.	a)	What is composite controller mode?	CO4	7 Marks
	b)	Explain adaptive controller with application.	CO4	7 Marks

UNIT-V

9.	a)	Discuss the ethics to be followed in mechatronic design.	CO6	7 Marks
	b)	Discus the merits and demerits of the coin counter designed as per mechatrnics approach.	CO5	7 Marks
		(OR)		
10.		With the help of ladder diagram, explain the automatic car barrier system.	CO5	14 Marks

CODE No.: 16BT51203 SVEC-16

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

WEB TECHNOLOGIES

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Create a simple HTML page which demonstrates the use of various types of lists. Try adding a definition list which uses an unordered list to define term.	CO1, CO2	7 Marks
	b)	Create a HTML document that has your image and your friend's image with a specific height and width. Also when clicked on the images it should be navigate to their respective profiles.	CO1, CO2	7 Marks
		(OR)		
2.	a)	Explain the frames and table tags of HTML with suitable example.	CO2	7 Marks
	b)	Explain the following HTML tags with suitable example. i) <font>. ii) <meta>. iii) <p>. iv) <video>.	CO2	7 Marks

UNIT-II

3.	a)	Describe the different ways that CSS styles can be added to a page.	CO3	6 Marks
	b)	Explain the following terms related to CSS with examples. i) Font-size. ii) Font-weight. iii) Text-decoration. iv) Text-transform. v) Padding. vi) Border style.	CO3	8 Marks
		(OR)		
4.	a)	Explain the following built–in objects of java Script. i) Window. ii) Document.	CO3	8 Marks
	b)	Write a JavaScript which validates registration form.	CO4	6 Marks

UNIT-III

5.	a)	Demonstrate in detail about JQuery selectors and events.	CO5	7 Marks
	b)	How to access HTML elements and attributes using JQuery.	CO5	7 Marks
		(OR)		
6.		Develop packaged components in bootstrap.	CO5	14 Marks

UNIT-IV

7.	a)	What is regular expression? Explain its functions in PHP.	CO5	7 Marks
	b)	Explain the various operators and control structures in PHP with examples.	CO5	7 Marks
		(OR)		
8.	a)	Develop a PHP code to implement multi-level inheritance.	CO5	8 Marks
	b)	Demonstrate OOP principals with suitable example using PHP.	CO5	6 Marks

UNIT-V

9.		Demonstrate how to handle cookies and sessions in PHP.	CO5	14 Marks
		(OR)		
10.	a)	List the different authentication methodologies used in PHP.	CO6	7 Marks
	b)	Design a web page to store the contact us form data in the database using PHP. (Note: contact us page contains the following fields name, email-id, subject, message and submit button).	CO6	7 Marks

III B.Tech II Semester (SVEC-16) Supplementary Examinations March - 2021

OBJECT ORIENTED PROGRAMING
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Discuss fundamental principles of OOPs with respect to java language.	CO1	8 Marks
	b)	Is Java Strongly Typed Language? Discuss.	CO1	6 Marks
		(OR)		
2.	a)	Demonstrate various iterative statements in java with suitable examples.	CO1, CO2	8 Marks
	b)	With the help of an example, explain constructor overloading in java.	CO1	6 Marks
		UNIT-II		
3.	a)	Explain Creating Packages and Accessing a Package with examples.	CO2	7 Marks
	b)	What is inheritance? How inheritance is implemented in java? And discuss the advantages of inheritance.	CO1, CO3	7 Marks
		(OR)		
4.	a)	Define an interface. With an example, discuss how interfaces are implemented and accessed in java.	CO2	8 Marks
	b)	Explain the usage of super keyword with suitable example.	CO2	6 Marks
		UNIT-III		
5.	a)	What do understand by Synchronization? Discuss with an example.	CO2	8 Marks
	b)	Illustrate the creation of user defined exception with an example.	CO2	6 Marks
		(OR)		
6.	a)	Explain inter thread communication with suitable example.	CO2	8 Marks
	b)	Explain thread life cycle methods.	CO1, CO3	6 Marks
		UNIT-IV		
7.		What is the need of layout managers? Explain different types of layout managers available in AWT.	CO4	14 Marks
		(OR)		
8.	a)	Define an applet. Discuss applet life cycle methods with an example.	CO4	7 Marks
	b)	Write a java program to create single linked list with ten student names using LinkedList collection java class.	CO6	7 Marks
		UNIT-V		
9.	a)	Explain various interfaces and classes available in javax.servlet Package	CO5	8 Marks
	b)	Write a java program using listeners for handling mouse events.	CO5	6 Marks
		(OR)		
10.	a)	What is the role of event listeners in event handling? List the Java event listeners with suitable example.	CO5	8 Marks
	b)	Discuss about any four Event Classes.	CO5	6 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

III B.Tech II Semester (SVEC-16) Supplementary Examinations March - 2021

FOUNDATION ENGINEERING

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain in brief about various stages in soil exploration.	CO1	8 Marks
	b)	Standard penetrate test was conducted in a deposit of fully submerged fine sand and field N value was reported as 56 at a depth of 4.5m. The average saturated unit weight of the soil is 21kN/m^3. Calculate the corrected N value.	CO2	6 Marks

(OR)

2.	a)	Discuss about following samplers. i) Split spoon sampler. ii) Rotary sampler.	CO1	7 Marks
	b)	Explain in brief about limitations of plate load test.	CO1	7 Marks

UNIT-II

3.	a)	With an aid of neat sketch, explain how active earth pressure condition can be determined using Culmann's graphical method.	CO1	8 Marks
	b)	A retaining wall, 5m high supports a backfill (c = 20kN/m^2, Φ = 28^o, γ = 21kN/m^3) with horizontal surface. The backfill carries surcharge load of 25kN/m^2. If the wall pushed towards backfill, compute the total thrust acting on retaining wall.	CO2	6 Marks

(OR)

4.	a)	What are assumptions of Coulomb's earth pressure theory? Give out the analytical equation for determined the coefficient of active earth pressure using this theory.	CO1	6 Marks
	b)	A retaining wall with a smooth vertical back is 8m high and retains a 2-layer sand backfill each having a depth of 4 m. For top layer $\Phi' = 30^0$ and γ = 19kN/m^3 and for bottom layer $\Phi' = 32^0$ and γ = 20kN/m^3. Calculate the active thrust acting per meter run on the retaining wall. Show active earth pressure distribution.	CO2	8 Marks

UNIT-III

5.	a)	Derive an equation for find out the stability of infinite slopes in cohesion-less soil for steady seepage condition.	CO2	6 Marks
	b)	A 7m deep canal has side slope of 1:1. The soil has C_u = 20kN/m^2, $\Phi_u = 10^0$, e = 0.8 and G = 2.67. Determine the factor of safety with respect to cohesion, when canal runs fully. Also, find the same in case of sudden drawdown condition. For $\Phi_u = 10^0$, slope 1:1, take S_n=0.11 For $\Phi_u = 4.81^0$, slope 1:1, take S_n=0.135.	CO2	8 Marks

(OR)

6.	a)	Explain about Swedish Circle method for slope stability analysis of finite slopes.	CO2	8 Marks
	b)	An embankment of height 10m and slope with an inclination of 40^0 was made with soil having c' = 25kN/m^2, $\Phi = 28^0$, γ = 18kN/m^3. Determine the critical height of the infinite slope for fully submerged condition and write a comment on stability of embankment.	CO2	6 Marks

UNIT-IV

7.	a)	Mention the Terzaghi's bearing capacity equation. What are the major assumptions made in the Terzaghi's bearing capacity theory?	CO2	7 Marks
	b)	For a square footing that is B x B in plan, the following are given: D_f = 1m; vertical gross allowable load Q_{all} = 665kN; γ = 18kN/m^3; Φ' = 40^0 ; C' = 0; and factor of safety = 3; determine the size of the footing.	CO2	7 Marks

(OR)

8.	a)	Give out equations for determining allowable bearing pressure from following methods. i) Teng's Method. ii) Peck Method. iii) As per IS 6403-1971. iv) Bowle's method.	CO1	8 Marks
	b)	A circular footing of size 2.5m rests on soil having c= 20kN/m^2, Φ = 25^0 and γ = 17.5kN/m^3. The depth of the foundation is 1m. Determine the gross allowable load on foundation with a factor of safety of 3. Assume general shear failure. (For Φ = 25^0, N_c= 25.1, N_q= 12.72 and N_γ = 8.34)	CO2	6 Marks

UNIT-V

9.	a)	Classify the types of pile foundation based on: i) Material used. ii) Method of installation. iii) Mode of load transfer. iv) Displacement.	CO1	8 Marks
	b)	A group of 16 bored pile are installed in clayey soil having unconfined compression strength, q_u = 60kN/m^2. The piles are 8m long and 30cm diameter with c/c spacing of 90cm. Estimate the safe load of pile group. Take F.S = 3 and α = 0.7.	CO2	6 Marks

(OR)

10.	a)	Discuss in detail about various components of well foundations.	CO1	8 Marks
	b)	Explain about pneumatic caisson with the help of neat sketch.	CO1	6 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

III B.Tech II Semester (SVEC-16) Supplementary Examinations March - 2021

HIGHWAY AND TRAFFIC ENGINEERING

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	With neat sketches, explain different road patterns.	CO1	7 Marks
	b)	What are the objectives of 3rd road development plan? How do you determine road lengths by 3rd road development plan formulae?	CO1	7 Marks
		(OR)		
2.	a)	Design the rate of super elevation for a horizontal highway curve of radius 500m and speed 80 kmph on a plain terrain.	CO3	7 Marks
	b)	What are the various types gradients used in highways? Explain briefly.	CO3	7 Marks

UNIT-II

3.	a)	Explain briefly about the material and equipment requirements for organizing different tests on coarse aggregates as per IRC standards.	CO2	7 Marks
	b)	How do you determine the CBR of Soil in the laboratory?	CO2	7 Marks
		(OR)		
4.	a)	Determine the warping stress at interior edge and corner of a 25cm thick cement concrete pavement with transverse points at 5m interval and longitudinal joints at 3.6m intervals. The modules of sub grade reaction k is 6.9 kg/cm^3. Assume Max. Temperature differential during day to be 0.6^{0}C per cm slab thickness (for warping stress at interior and edge) and max temp. Differential of 0.4^{0}C per slab thickness during night (for warping stress at the corner). Additional data given. ($e = 10 \times 10^{-6}$ per ^{0}C, $E = 3 \times 10^5$ kg/cm^2, $\mu = 0.15$, $Cx = 0.88$, $Cy = 0.54$)	CO2	7 Marks
	b)	What are the factors influencing the design of pavements?	CO2	7 Marks

UNIT-III

5.	a)	Explain skidding along with the factors determining skid resistance and road construction practices for obtaining skid resistant surfaces.	CO5	7 Marks
	b)	Explain the basic relationship between Volume, Speed and Density.	CO4	7 Marks
		(OR)		
6.	a)	Explain various road user characteristics that effect traffic performance.	CO4	7 Marks
	b)	Discuss fundamental diagrams of traffic flow.	CO6	7 Marks

UNIT-IV

7.	a)	Enlist methods of travel time and delay study. Describe moving observer method.	CO6	7 Marks
	b)	Mention the methods available for origin and destination survey. Explain in detail home questionnaire survey.	CO8	7 Marks
		(OR)		

8. a) Explain the various factors that affect the level of service. Explain the different types of level of service. CO7 7 Marks

b) A test car was used on a north-south road 0.75 km long and the following data given below was collected for the moving car was collected. Calculate traffic volume, average travel time and space mean speeds in both directions. CO6 7 Marks

North trip no.	Travel Time (along) in min	No. of vehicles met Against	No of vehicles overtaking test car	No of vehicles overtaken by test car
1	2.65	85	1	0
2	2.70	83	3	2
3	2.35	77	0	2
4	3.00	85	2	0
5	2.42	90	1	1

North trip no.	Travel Time (along) in min	No. of vehicles met Against	No of vehicles overtaking test car	No of vehicles overtaken by test car
1	2.33	110	2	0
2	2.71	115	0	2
3	2.48	120	0	0
4	2.54	125	1	1
5	2.16	105	0	2

UNIT-V

9. a) Discuss various advantages and disadvantages of traffic signals in detail. CO6 7 Marks

b) Explain the various types of off street parking systems in detail. CO7 7 Marks

(OR)

10. a) Write a detailed note on various driver factors that cause accidents and mention the concerned preventive measures. CO7 7 Marks

b) Draw a neat sketch of rotary intersection, show all design components and explain about them in brief. CO7 7 Marks

III B.Tech II Semester (SVEC-16) Supplementary Examinations March - 2021

STEEL STRUCTURES
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	A tie member consisting of an ISA 80mm x 50mm x 8mm is welded to a 12mm thick gusset plate at site. Design welds to transmit load equal to the design strength of the member. Assume Fe 410 grade steel.	CO2	14 Marks
	(OR)		
2.	Design a single bolted double cover butt joint to connect boiler plates of thickness 12mm for maximum efficiency. Use M16 bolts of grade 4.6. Boiler plates are of Fe 410 grade. Find the efficiency of the joint.	CO3	14 Marks

UNIT-II

3.	Design a laterally supported beam of effective span 6 m for the following data: Grade of steel: Fe 410; Maximum bending moment: 160 kNm; Maximum shear force: 220 kN. Check for deflection is not required.	CO3	14 Marks
	(OR)		
4.	A steel floor beam in a building has a span of 6m. It is simply supported over supports and carries a uniform load of 40kN/m, inclusive of self weight. Design the beam (Fe 410) if, i) the compression flange is restrained throughout the span against lateral bending. ii) the lateral supports for the compression flange are provided only at the ends.	CO2	14 Marks

UNIT-III

5.	Select a suitable angle section to carry a factored tensile force of 180 kN assuming a single row of M20 bolts and assuming design strength as fy = 250 MPa.	CO5	14 Marks
	(OR)		
6.	A double angle discontinuous strut 2.25m long consists of two ISA 60 x 60 x 5 connected to the same side of the 8mm thick gusset plate by one bolt. Calculate the load that this strut can carry.	CO7	14 Marks

UNIT-IV

7.	Design a laced column 10m long to carry a factored axial load of 1100kN. The column is restrained in position but not in direction at both ends. Provide single lacing system with bolted connection. Design the column with two channels back to back.	CO3	14 Marks
	(OR)		
8.	A column ISHB 350 at 661.2 N/m carries an axial compressive factored load of 1600kN. Design a suitable welded gusset base. The base rests on M-15 grade of concrete.	CO3	14 Marks

UNIT-V

9. By using IS Codes, determine the design loads on the purlins of an industrial building near Visakhapatnam: CO7 14 Marks

Given data:

Class of building:	General with life of 50 years.
Terrain:	Category 2.
Maximum dimension:	40 m.
Width of building:	15 m.
Height at eve level:	8 m.
Topography:	θ less than 3^0.
Permeability:	Medium
Span of truss:	15 m.
Pitch:	1/5.
Sheeting of purlins:	1.35 m.
Spacing of trusses:	4 m.

(OR)

10. Explain the following with neat sketches: CO1 14 Marks

i) Bracing system in roof trusses.
ii) Anchorages of truss with concrete column.
iii) Connection of purlin to rafter.

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

III B.Tech II Semester (SVEC-16) Supplementary Examinations March - 2021

GROUNDWATER DEVELOPMENT AND MANAGEMENT

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain vertical distribution of groundwater with a neat sketch.	CO1	7 Marks
	b)	Discuss various geological formations of aquifers with suitable examples.	CO1	7 Marks
		(OR)		
2.		Describe Groundwater flow contours and their applications with respect to flownet analysis.	CO2	14 Marks

UNIT-II

3.	a)	Explain unconfined aquifer with a neat sketch.	CO2	6 Marks
	b)	In an artesian aquifer, the drawdown is 1.2 meters at a radial distance of 10 meters from a well after two hours of pumping. On the basis of Thies, non-equilibrium equations, determine the pumping time for the same drawdown at a radial distance of 30 meters from the well.	CO2	8 Marks
		(OR)		
4.	a)	Derive an expression to determine the discharge through unconfined aquifer using Dupit's equation.	CO3	7 Marks
	b)	A well is located in a 30m thick confined aquifer of permeability 35m per day and storage coefficient of 0.004. If the well is pumped at a rate of 1500 litres per minute, calculate the drawdown at a distance of 40m from the well after 20 hours of pumping.	CO3	7 Marks

UNIT-III

5.		Describe the shape of fresh salt water interface.	CO6	14 Marks
		(OR)		
6.		Explain the structure of the fresh salt water interface.	CO6	14 Marks

UNIT-IV

7.	a)	Explain the advantages and disadvantages artificial recharge of groundwater.	CO5	7 Marks
	b)	List artificial recharge methods and explain stream channel method with a neat sketch.	CO5	7 Marks
		(OR)		
8.		Describe the application of Remote Sensing in artificial recharge of groundwater along with a case study.	CO4	14 Marks

UNIT-V

9.		List surface methods in groundwater exploration and explain seismic refraction method with a neat sketch.	CO4	14 Marks
		(OR)		
10.		List the types of information that can be obtained from various logging techniques.	CO7	14 Marks

CODE No.: 16BT60110 SVEC-16

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

SOLID WASTE MANAGEMENT
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Describe the effects of improper disposal of solid waste on human health and environment.	CO6	7 Marks
	b)	Explain the factors influencing solid waste generation.	CO2	7 Marks
		(OR)		
2.		Write about the interrelationship of the functional elements in a solid waste management system.	CO4	14 Marks

UNIT-II

3.	a)	Compose the impacts of public health and economic aspects of on-site solid waste storage system.	CO6	7 Marks
	b)	Explain the factors that should be considered in evaluating onsite processing equipment.	CO1	7 Marks
		(OR)		
4.		Describe on-site segregation and handling of solid waste.	CO9	14 Marks

UNIT-III

5.		Discuss the methods adopted in India for collection and disposal of refuse. What changes would you recommend in these, so as to make the process more hygienic and aesthetic?	CO7	14 Marks
		(OR)		
6.	a)	Describe the operation of hauled container system of waste collection.	CO1	7 Marks
	b)	Assess the various methods of house to house solid waste collection and their advantage.	CO2	7 Marks

UNIT-IV

7.	a)	Describe the mechanical methods of volume reduction of solid waste.	CO2	7 Marks
	b)	Write short note on air pollution problems in incineration process and suggest which act should be followed for safety implementation of incineration process.	CO8	7 Marks
		(OR)		
8.		Explain composting process of bio-degradable municipal solid waste.	CO5	14 Marks

UNIT-V

9.	a)	Write short note on environmental factors in sanitary landfill sites.	CO1	7 Marks
	b)	Explain different methods used for municipal solid waste on land.	CO1	7 Marks
		(OR)		
10.		What is leachate? Design various methods for treatment and disposal of lleachate.	CO3	14 Marks

CODE No.: 16BT60114 SVEC-16

DISASTER MITIGATION AND MANAGEMENT

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define the term 'disaster' and describe its classification.	CO2	7 Marks
	b)	What are the pre-disaster measures to be taken to prevent loss of life due to this hazard?	CO1	7 Marks
		(OR)		
2.	a)	Define vulnerability and discuss the process of vulnerability analysis.	CO1	7 Marks
	b)	Write a short note on major initiatives for disaster preparedness in India.	CO5	7 Marks

UNIT-II

3.	a)	What are the guidelines for preparation of disaster management plans?	CO1	7 Marks
	b)	List a few of the prominent earthquakes which occurred in India in last two decades and what are the lessons leant from them.	CO6	7 Marks
		(OR)		
4.	a)	Explain the terms: i) Epicentre. ii) Hypocentre. iii) Fault plane.	CO1	7 Marks
	b)	Give a brief note on seismic activity in India.	CO1	7 Marks

UNIT-III

5.	a)	How do engineered structures help us to withstand cyclones?	CO3	7 Marks
	b)	Discuss in brief various flood control measures.	CO1	7 Marks
		(OR)		
6.	a)	Explain the classification of drought.	CO2	7 Marks
	b)	What are the consequences of drought? Explain briefly.	CO1	7 Marks

UNIT-IV

7.	a)	Write a short note on factors responsible for landslides.	CO2	7 Marks
	b)	What are the effects and consequences of landslides?	CO1	7 Marks
		(OR)		
8.		Briefly explain the structural and non-structural mitigation measures for landslides.	CO1	14 Marks

UNIT-V

9.	a)	Explain the phases of disaster management.	CO1	7 Marks
	b)	Discuss the importance of disaster preparedness with special reference to issues and problems in it.	CO4	7 Marks
		(OR)		
10.	a)	Make an overview of recent trends in disaster management.	CO5	7 Marks
	b)	What are the objectives of National Disaster Management Plan (NDMP)?	CO1	7 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

RURAL TECHNOLOGY

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Ramu wants to construct an own house by taking loan from the bank through government schemes. List the schemes that are associated with housing and explain them.	CO1	7 Marks
	b)	What are the safety issues that have to be taken while transferring any documents?	CO5	7 Marks
		(OR)		
2.	a)	List out and explain the different ways how you will eradicate poverty.	CO1	7 Marks
	b)	Examine the role of financial institutions in rural development with special emphasis on NABARD.	CO4	7 Marks

UNIT-II

3.		What is meant by non-conventional energy? Mudipatla is a village having problem with electricity. Explain how it helps to prevent power deficiency problems in rural areas.	CO1	14 Marks
		(OR)		
4.	a)	What do you understand by 3R principle? How this can be useful for the rural people for the waste management?	CO4	7 Marks
	b)	Explain in detail the production of biomass with the waste available in the village areas.	CO1	7 Marks

UNIT-III

5.	a)	Enumerate the technologies involved in food processing units in detail.	CO4	7 Marks
	b)	Elaborate the role of cottage industry in rural development.	CO1	7 Marks
		(OR)		
6.		What is plant tissue culture? How plant tissue culture is carried out in the laboratory?	CO2	14 Marks

UNIT-IV

7.	a)	Suggest the rural people to construct various rainwater harvesting structures to store and to increasing the groundwater levels.	CO4	7 Marks
	b)	What are the problems associated with poor water quality? Address the issues that are involved in environment and sanitation.	CO5	7 Marks
		(OR)		
8.		Educate the use of bio fertilizers to the rural people with the resources available in the rural area. What are the disadvantages of using chemical fertilizers?	CO6	14 Marks

UNIT-V

9.		Explain how ICT are helpful to the rural people. List some of the ICT applications which are used in rural areas.	CO1	14 Marks
		(OR)		
10.		Carryout feasibility study on the public and private partnership for rural development. Suggest the government in various ways how the village can be developed under adoption scheme.	CO3	14 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

III B.Tech II Semester (SVEC-16) Supplementary Examinations March - 2021

POWER SEMICONDUCTOR DRIVES
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain about nature and classification of different load torques.	CO1	7 Marks
	b)	Explain the multi-quadrant operation of an electric motor with relevant characteristics when the motor is driving a hoist load.	CO2	7 Marks
		(OR)		
2.	a)	The electric motor drive develops a torque expressed by $T_M = a\omega+b$ where **a** and **b** are positive constants, the motor is supposed to drive the load torque which is given by $T_L = c\omega^2 + d$ where c and d are other positive constants, the total inertia of the rotating masses is J. Determine the relation among the among **a, b**, **c** and **d** in order to start the motor and load together and have an equilibrium operating speed and also calculate this equilibrium operating speed.	CO2	7 Marks
	b)	Develop a criterion for finding the steady state stability of an electric drive.	CO1	7 Marks

UNIT-II

3.	a)	Explain various relative operational merits and demerits of single phase fully controlled converters fed to DC motors.	CO2	4 Marks
	b)	Explain the operation of a separately excited dc motor supplied from 3-Φ semi controlled rectifier and draw voltage and current waveforms.	CO3	10 Marks
		(OR)		
4.	a)	Draw and explain the speed–torque characteristics of a DC separately excited motor fed by three phase semi converter with relevant equations.	CO2	6 Marks
	b)	Explain the operation of single phase dual converter controlling the separately excited DC motor.	CO5	8 Marks

UNIT-III

5.	a)	Describe the operation of DC separately excited motor fed by type-B chopper with relevant waveforms.	CO3	7 Marks
	b)	Briefly explain the chopper control performance fed with separately excited DC motor in regenerative braking control mode with neat diagrams.	CO2	7 Marks
		(OR)		
6.	a)	Draw the block diagram and explain the closed loop speed control of separately excited DC motor.	CO4	7 Marks
	b)	Explain with circuit and waveforms of four quadrant chopper fed separately excited DC motor.	CO2	7 Marks

UNIT-IV

7.	a)	Illustrate the stator frequency control of induction motor with torque and power limitations in real time applications.	CO5	7 Marks
	b)	Show that variable frequency control of induction motor is more efficient than stator voltage control.	CO1	7 Marks

(OR)

8.	a)	Explain closed loop operation of CSI fed induction motor drives with a neat diagram.	CO4	7 Marks
	b)	Explain static Scherbius drive control for speed control of induction motor. Draw speed -torque characteristics	CO2	7 Marks

UNIT-V

9.	a)	Describe the advantages of self-controlled variable speed synchronous motor drive over the separate controlled drive.	CO1	6 Marks
	b)	In variable frequency control of a synchronous motor why (V/f) ratio is maintained constant up to base speed and V constant above the base speed. Explain briefly with necessary waveforms.	CO6	8 Marks

(OR)

10.	a)	Explain the operation of self controlled synchronous motor fed by voltage source inverter with a neat diagram.	CO4	7 Marks
	b)	Briefly explain the various drive circuits for stepper motor.	CO5	7 Marks

POWER SYSTEM ANALYSIS
[Electrical and Electronics Engineering]

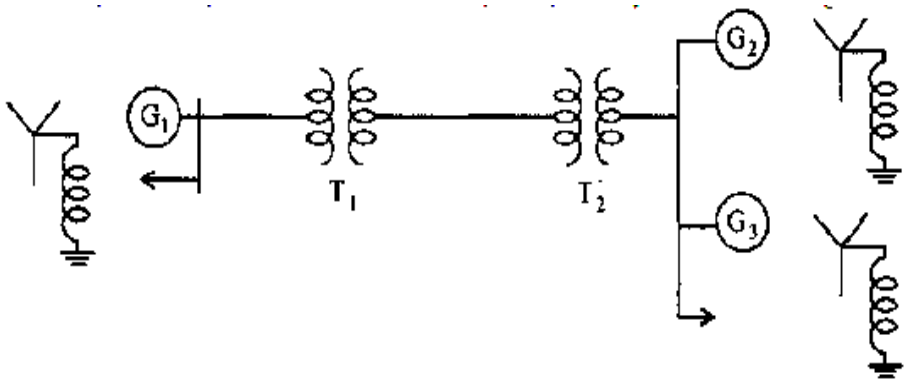
Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) List the advantages of the p.u form of representation. CO1 5 Marks

   b) Obtain the per unit representation for the three-phase power system shown in figure CO3 9 Marks



Generator 1 : 50 MVA; 10.5 KV; X = 1.8 ohm
Generator 2 : 25 MVA; 6.6 KV; X = 1.2 ohm
Generator 3 : 35 MVA; 6.6 KV; X = 0.6 ohm
Transformer T1 : 30 MVA; 11/66 KV; X = 15 ohm/phase
Transformer T2 : 25 MVA; 66/6.2 KV, as h.v. side X = 12 ohms
Transmission line: XL = 20 ohm/phase

(OR)

2. a) Why are Per phase analysis done in a symmetrical three-phase system? CO2 7 Marks

   b) Discuss in detail about the modelling of transmission lines. CO2 7 Marks

UNIT-II

3. a) For the 3-bus system shown in the figure, Obtain Z_{BUS}. CO3 7 Marks

   b) Derive an expression for adding a branch element between two buses in the Z_{BUS} building algorithm. CO5 7 Marks

(OR)

4.	a)	For the system shown below, Obtain Y_{BUS} by direct inspection method. Take bus (1) as reference. The element impedances are indicated in p.u.	CO4	9 Marks

	b)	List the merits and demerits of Z_{BUS} building algorithm.	CO1	5 Marks

UNIT-III

5.	a)	Derive the generalized expressions for elements of Jacobian matrix for decoupled load method.	CO5	7 Marks
	b)	Compare Gauss-Seidel method and Newton-Raphson method of load flow studies	CO1	7 Marks

(OR)

6.		Explain clearly with detailed flowchart, the computational procedure for load flow solution using N-R method when the system contains all types of buses.	CO5	14 Marks

UNIT-IV

7.	a)	Illustrate the step by step procedure for systematic fault analysis using bus impedance matrix.	CO4	7 Marks
	b)	What do you understand by short-circuit KVA? Explain.	CO1	7 Marks

(OR)

8.	a)	The short circuit MVA at the bus bars for a power plant A is 1200 MVA and for another plant B is 1000 MVA at 33 KV. If these two are to be interconnected by a tie-line with reactance 1.2 ohm, determine the possible short circuit MVA at both the plants.	CO3	7 Marks
	b)	Derive the expression for fault current for a single line-to-ground fault in a power system faulted through fault impedance $\mathbf{Z_f}$.	CO3	7 Marks

UNIT-V

9.	a)	Derive the swing equation for a single machine connected to infinite bus system. State the assumptions if any and state the usefulness of this equation. Neglect the damping.	CO4	7 Marks
	b)	Describe the methods of improving transient stability.	CO1	7 Marks

(OR)

10.	a)	State the bad effects of instability. Distinguish between steady state and dynamic stability.	CO1	7 Marks
	b)	Explain critical clearing time and critical clearing angle, deriving the expressions.	CO4	7 Marks

DESIGN AND ESTIMATION OF ELECTRICAL SYSTEMS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

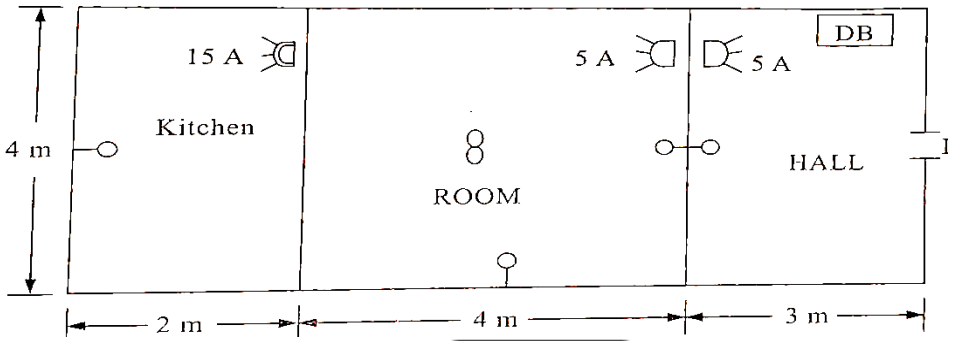
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain briefly CTS and TRS systems of wiring with neat sketches and mention advantages and disadvantages.	CO3	7 Marks
	b)	List out the general rules to be followed for internal wiring.	CO1	7 Marks

(OR)

2.		The plan of a residential building is shown in fig below. It is to be provided with CTS system of wiring. Estimate the material required and its cost. Wattage of Lamps = 60W, Fan = 80W, 5A socket = 100W, 15 A socket = 1000W. Also draw the wiring diagram. Assume any missing date.	CO2	14 Marks



UNIT-II

3.	a)	A 11kv line is to be erected to give supply to village 2km from existing 11kv line. Prepare a schedule of materials required for the line. Assume an average span of 50m and 2 cut points in line.	CO1	7 Marks
	b)	Calculate the number of various insulators needed for the erection of 500m, 3-phase, 11kv overhead line with two angled points and two turning points. The length of span is 70m.	CO3	7 Marks

(OR)

4.		An OH 11kv, 50Hz, 3-phase line is to be tapped off from the existing 11kv line pole at about 90^0 angle. The proposed line has to be erected on 10m long RCC poles with ACSR conductor of size 6/1 x 2.11mm with average span of 100m. Line has to pass through the city area spreading about 500m long. Furnish the list of materials required and estimate the cost for 3.2km ling line.	CO3. CO4	14 Marks

UNIT-III

5.	a)	Categorize the power circuits on the basis of applications and explain.	CO5	7 Marks
	b)	What are the advantages of Electric drives?	CO4	7 Marks

(OR)

6.	a)	Calculate the size of the conductor to be used for wiring of 15HP, 400V, 3-phase, 50Hz Induction motor. Consider the efficiency and power factor of motor as 0.85 and 0.8 respectively.	CO4	7 Marks
	b)	State some important points that guides in carrying out wiring for a motor installation.	CO1	7 Marks

UNIT-IV

7.	a)	What do you understand by polar curves?	CO1	7 Marks
	b)	Explain the principle of operation of sodiumvapor lamp with a neat diagram. Mention its uses.	CO5	7 Marks
		(OR)		
8.	a)	State and explain different lighting schemes.	CO5	7 Marks
	b)	State and explain laws of illumination.	CO1	7 Marks

UNIT-V

9.	a)	Describe the construction and operation of an electric arc furnace.	CO1	7 Marks
	b)	Describe the Ajax Wyatt type induction furnace and explain its working.	CO1	7 Marks
		(OR)		
10.	a)	Explain the principle of electric spot welding and seam welding.	CO5	7 Marks
	b)	What are the basic components of DC and AC welding sets and explain their working?	CO5	7 Marks

DIGITAL SIGNAL PROCESSING FOR ELECTRICAL ENGINEERS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) For each of the following systems, test whether or not the system is linear or nonlinear, causal or non-causal and stable or not. CO2 12 Marks

   i) $y(n) = x(n) + x^2(n-1)$. ii) $y(n) = x(2n)$.
   ii) $y(n) = ax(n) + bx(n-1)$. iv) $y(n) = |x(n)|$.

   b) List out the basic operations on discrete time signals. CO1 2 Marks

(OR)

2. a) Discuss sampling and quantization methods in A/D conversion process in detail. CO1 8 Marks

   b) Determine the solution of difference equation $y(n) = \frac{5}{6}y(n-1) - \frac{1}{6}y(n-2) + x(n)$ for the input $x(n) = 2^n u(n)$. CO1 6 Marks

UNIT-II

3. a) Find the DFT of sequence $x(n) = \{1, 2, 3, 4\}$ using Direct method. CO4 4 Marks

   b) Find the DFT of sequence $x(n) = \{1, 1, 1, 1, 1, 1, 1, 1\}$ using DIF-FFT algorithm. CO4 10 Marks

(OR)

4. What is the advantage of FFT? Discuss decimation in time and decimation in frequency algorithms in detail. CO1 14 Marks

UNIT-III

5. Design a digital IIR low pass filter with pass band edge of 1000Hz and stop band edge at 1500Hz for a sampling frequency of 5000Hz. The filter is to have a pass band ripple of 0.5dB and a stop band ripple below 30dB. Design a Butterworth filter using the bilinear transformation. CO3 14 Marks

(OR)

6. a) What is warping effect? What is its effect on magnitude and phase response? CO1 6 Marks

   b) Convert the given analog filter with system function $H(s) = \frac{1}{(s+3)(s+4)}$ into a digital filter using impulse invariant method assuming T=1s. CO3 8 Marks

UNIT-IV

7. a) Discuss the Fourier series method of designing FIR filters in detail. CO2 8 Marks

   b) What are the advantages and disadvantages of FIR filters? CO1 6 Marks

(OR)

8. Design an ideal lowpass filter with a frequency response CO3 14 Marks

   $H_d(e^{jw}) = 1$ for $-\frac{\pi}{2} \le \omega \le \frac{\pi}{2} = 0$ for $\frac{\pi}{2} \le |\omega| \le \pi$

   Find the values of $h(n)$ for N=11.
   Find H(Z) using Fourier series method.

UNIT-V

9.	Implement the process of controlling stepper motor using TMSLF2407 DSP controller in robotics.	CO5	14 Marks
	(OR)		
10.	Develop an algorithm by interfacing TMSLF2407 processor with stepper motor drive system for controlling its speed.	CO6	14 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

III B.Tech II Semester (SVEC-16) Supplementary Examinations March - 2021

ELECTRICAL MACHINE DESIGN

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain various factors affecting the choice of the specific magnetic loading on a machine while designing.	CO1	7 Marks
	b)	A 350kW, 500V, 450 RPM, 6 pole DC generator is built with an armature diameter of 0.87m and a core length of 0.32m. The lap wound armature has 660 conductors. Calculate the specific magnetic and electric loadings.	CO2	7 Marks
		(OR)		
2.	a)	List the classes of electrical conducting materials and describe their properties and applications of those materials.	CO1	7 Marks
	b)	Classify the insulating materials used in electrical machines according to their thermal stability. Comment on selection of class of insulating material.	CO1	7 Marks

UNIT-II

3.	a)	Select and explain suitable procedure for designing the series field of DC machine.	CO3	8 Marks
	b)	Derive formula for air gap length of DC machine.	CO2	6 Marks
		(OR)		
4.	a)	List the guiding factors for selecting the armature slots.	CO1	6 Marks
	b)	Calculate the mmf required for air gap of a DC machine with an axial length of 20cm (no ducts) and a pole arc of 18cm. The slot pitch = 27mm, slot opening = 12mm, air gap = 6mm and the useful flux per pole = 25mWb. Take Carter's coefficient for slot as 0.3.	CO4	8 Marks

UNIT-III

5.	a)	Give the relationship between emf per turn and kVA rating of a transformer.	CO1	6 Marks
	b)	The tank of 1250 kVA, natural oil cooled transformer has the dimensions length, width and height as 0.65 x 1.55 x 1.85 m respectively. The full load loss = 13.1 kW, loss dissipation due to radiations = 6 $W/m^2\ ^0C$, loss dissipation due to convection=6.5 $W/m^2\ ^0C$, improvement in convection due to provision of tubes = 40%, temperature rise = 40^0C, length of each tube=1m, diameter of tube = 50mm. Find the number of tubes for this transformer. Neglect the top and bottom surface of the tank as regards the cooling.	CO4	8 Marks
		(OR)		
6.	a)	Derive the output equation of single phase transformer.	CO2	7 Marks
	b)	A 3-Phase, 50Hz, oil cooled core type transformer has the following dimensions: Distance between core centres = 0.2m, Height of window = 0.24m, Diameter of circumscribing circle = 0.14m, The flux density in the core = $1.25 Wb/m^2$, The current density in the conductor = $2.5 A/mm^2$. Assume a window space factor of 0.2 and the core area factor = 0.56. The core is two stepped. Estimate kVA rating of the transformer.	CO4	7 Marks

UNIT-IV

7.	a)	State and discuss the factors to be considered while determining the air gap in case of 3-phase induction motors.	CO1	7 Marks
	b)	Determine the approximate diameter and length of stator core for a 10kW, 415V, 3-phase, 4 pole, 1425 RPM, delta connected induction motor. Bav = 0.45Wb/m^2, ac = 2300 amp. cond./m, full load efficiency = 0.85, Power factor = 0.88. Assume (L/τ) value is unity.	CO4	7 Marks

(OR)

8.		Estimate the stator core dimensions number if stator slots and number of stator conductors per slot for a 100kW, 3300V, 50Hz, 12 pole, star connected slip ring induction motor. Bav = 0.4Wb/m^2, ac = 25000 amp.cond./m. the efficiency of machine is 90% and operating at 0.9 power factor. Compute main dimensions to give best power factor. The slot loading should not exceed 500 amp. conductors.	CO4	14 Marks

UNIT-V

9.	a)	Discuss pole design procedure for salient pole synchronous generators.	CO5	7 Marks
	b)	Determine core diameter and core length of 250kVA, 2200V, 12 pole, 500 RPM, 3-phase alternator by assuming average gap density as 0.6 Wb/m^2 and specific electric loading of 30000 amp. cond./m. take (L/τ) value as 1.5.	CO4	7 Marks

(OR)

10.	a)	Formulate the output equation of a synchronous machine.	CO2	7 Marks
	b)	Explain the step by step procedure for the design of field winding of synchronous machine.	CO5	7 Marks

SPECIAL ELECTRICAL MACHINES
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the constructional details and working of a 3-phase variable reluctance stepper motor with 4/2 poles.	CO1	9 Marks
	b)	Enlist the applications of different types of stepper motor.	CO1	5 Marks

(OR)

2.	a)	What is bifilar winding? How it is used in a variable reluctance stepper motor?	CO1	4 Marks
	b)	Show the rotor positions of a 4-phase VR stepper motor with 6 rotor teeth when it rotates in a counter clockwise direction. Assume two-phase ON mode of excitation of phase windings.	CO2	10 Marks

UNIT-II

3.	a)	What is the need for sensing the rotor position of a SRM? Discuss in detail how an optical position sensor works.	CO1	7 Marks
	b)	Sketch the variation of inductance with rotor position of a three phase switched reluctance motor by ignoring fringing and saturation effects.	CO2	7 Marks

(OR)

4.	a)	Show that the torque developed in a switched reluctance motor is independent of the direction of the current.	CO1	7 Marks
	b)	Differentiate VR stepper motor from a switched reluctance motor.	CO4	7 Marks

UNIT-III

5.	a)	Show that a synchronous reluctance motor, develops maximum torque at a load angle of 45^0.	CO2	7 Marks
	b)	A 3-phase, 4 pole, 60Hz, 230V star connected synchronous reluctance motor has direct axis and quadrature axis synchronous reactances of 22.5Ω and 3.5Ω respectively. The load toque is 12.5 N-m. The Voltage to frequency ratio is maintained constant at rated value. Find: i) load angle. ii) line current. iii) power factor. Neglect rotational losses and armature resistance.	CO4	7 Marks

(OR)

6.	a)	Sketch the rotor structure of a line start synchronous reluctance motor and explain why these type of motors are self starting.	CO1	10 Marks
	b)	Discuss how SyRM are effectively employed in industrial applications.	CO6	4 Marks

UNIT-IV

7.	a)	A permanent magnet DC motor has an armature resistance of 1.03Ω. It draws a current of 1.25A at no load with 50V supply and running at 2100 r.p.m. Find: i) speed-voltage constant. ii) rotational losses. iii) constant power when it runs at 1700 r.p.m at 48V supply.	CO4	7 Marks
	b)	Sketch the drive circuit for a three phase BLDC motor and explain how rotation is achieved in clockwise and anticlockwise directions.	CO2	7 Marks

(OR)

8.	a)	What are the disadvantages of sensor based control of BLDC motor? Explain how sensor-less control will overcome these disadvantages with the help of a block diagram.	CO1	7 Marks
	b)	Explain in detail sensing and switching logic schemes of PMBLDC motor.	CO1	7 Marks

UNIT-V

9.	a)	Explain how a linear induction motor is developed from a cylindrical rotor induction motor. Why the stator and rotor of equal lengths cannot move continuously? What modifications can be made to achieve propulsion force continuously?	CO1	7 Marks
	b)	Discuss how a double sided Linear induction motor is used in electric traction with the help of a neat schematic diagram.	CO6	7 Marks

(OR)

10.	a)	Analyze the magnetic fields and forces within the air gap of a short-primary long-secondary Double Sided Linear Induction Motor (DSLIM).	CO2	7 Marks
	b)	Derive the expression for the thrust of linear force developed in a linear induction motor.	CO1	7 Marks

CAD / CAM
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Identify why graphic standards are required? Explain IGES STEP and DXF.	CO1	7 Marks
	b)	List benefits and the applications of CAD.	CO1	7 Marks
		(OR)		
2.	a)	How does a work station differ from a PC? Give the hardware structure of a CAD work station.	CO1	6 Marks
	b)	Classify different types of input devices used in CAD environment and discuss each one of them with a neat sketch.	CO1	8 Marks

UNIT-II

3.	a)	Prove that two successive reflections about any two coordinate axis is equal to single rotation about origin.	CO1, CO3	6 Marks
	b)	Derive and write the general 2-D transformation matrices for Rotation, Reflection and Scaling transformations.	CO1, CO3	8 Marks
		(OR)		
4.	a)	Describe various commonly used primitives for solid modeling.	CO3	8 Marks
	b)	Explain through neat sketches the effect of standard Boolean Operations on any two basic solid primitives.	CO3	6 Marks

UNIT-III

5.	a)	What is computer aided part programming? Discuss its need.	CO1	6 Marks
	b)	What is dwell? Explain its function and how it is specified in part program.	CO4	4 Marks
	c)	How is the tool length compensation specified in a machining center?	CO4	4 Marks
		(OR)		
6.	a)	Classify the basic elements of CNC system.	CO1	8 Marks
	b)	Explain with neat sketch the operation of the canned cycle G81 as per ISO.	CO4	6 Marks

UNIT-IV

7.	a)	What is the basis for forming groups in group technology?	CO5	8 Marks
	b)	Explain the concept of composite part with an example.	CO5	6 Marks
		(OR)		
8.	a)	What methods are available for taking decisions in the process of developing a process plan?	CO1	7 Marks
	b)	What is a pocket with respect to process planning? Explain a simple method that can be used for pocket identification.	CO1	7 Marks

UNIT-V

9.	a)	Describe in detail about the benefits of CIM.	CO6	6 Marks
	b)	Explain the concept Rapid prototyping procedure with a neat schematic diagram.	CO6	8 Marks

(OR)

10.	a)	Write in detail about the computer aided testing of parts produced by CIM process.	CO6	7 Marks
	b)	Distinguish between Contact and Non-contact Inspection methods.	CO6	7 Marks

HEAT TRANSFER
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What are the mechanisms of heat transfer? How are they distinguished from each other?	CO1	7 Marks
	b)	Super heated steam at an average temperature of 200^0C is transported through a steel pipe (K = 50 w/m. K, D_0 = 8 cm, D_i = 6cm and L = 20m). The pipe is insulated with a 4-cm thick layer of gypsum plaster (K=0.5W/m.K). The insulated pipe is placed horizontally inside a warehouse where the average air temperature is 10^0C. The steam and air heat transfer coefficients are estimated to be 800 and 200W/m^2K respectively. Calculate: i) the daily rate of heat transfer from the superheated steam. ii) the temperature on the outside surface of the gypsum plaster insulation.	CO2, CO5	7 Marks

(OR)

2.	a)	Derive general three dimensional conduction equation for Rectangular co-ordinate system and deduce from it equation applicable 1-Dimensional steady state heat transfer with heat generation.	CO1	7 Marks
	b)	Calculate the rate of heat flow per m^2 through a furnace wall consisting of 200 mm thick inner layer of chrome brick, a centre layer of Kaolin brick 100 mm thick and an outer layer of masonry brick 100 mm thick. The heat transfer coefficient at the inner surface is 74 W/m^2 ^{0}C and the outer surface temperature is 70^0C. The temperature of the gases inside the furnace is 1670^0C. What temperatures prevail at the inner and outer surface of the centre layer? Take: $K_{chromebrick}$ = 1.25 W/m^0C, $K_{Kaolinbrick}$ = 0.074 W/m^0C $K_{masonrybrick}$ = 0.555 W/m^0C Assume steady heat flow.	CO2, CO5	7 Marks

UNIT-II

3.	a)	Derive an expression for temperature distribution and for heat transfer rate in the case of short fin with end insulated case.	CO2	7 Marks
	b)	Consider a very long rectangular fin attached to a flat surface such that the temperature at the end of the fin is essentially that of the surrounding air, i.e 20^0C. Its width is 5cm; thickness is 1mm, thermal conductivity is 200W/m.K and base temperature is 40^0C. The heat transfer coefficient is 20W/m^2K. Estimate the fin temperature at a distance of 5cm from the base and the rate of heat loss from the entire fin.	CO5, CO4	7 Marks

(OR)

4.	a)	What is meant by Lumped system analysis? Derive the expression for temperature distribution in a body with respect to time variation.	CO2, CO3	7 Marks
	b)	An aluminium sphere weighing 5.5 kg and initially at a temperature of 290^0C is suddenly immersed in a fluid at 15^0C. The convective heat transfer coefficient is 58W/m^2K. Estimate the time required to cool the aluminium sphere to 95^0C, using lumped capacity method of analysis. Also determine the temperature attained by the sphere after 30 min.	CO5	7 Marks

UNIT-III

5.	a)	Using dimensional analysis, obtain the general form of equation for natural convective heat transfer.	CO2	7 Marks
	b)	Air at 20^0C flows along a heated plate at 134^0C with a velocity of 3 m/s. The plate is 2m long and 1.5m wide. Calculate the thickness of the hydrodynamic boundary layer and the skin friction coefficient (Fanning Friction Factor) at 40cm from the leading edge of the plate. The Kinematic viscosity of air at 20^0C may be taken as 15.06 x 10^{-6} m^2/s. Also calculate the local heat transfer coefficient at a distance of 0.4 m from the leading edge and heat transfer from the first 40cm of the plate.	CO4	7 Marks

(OR)

6.	a)	Explain the mechanism of heat flow by natural convection and define Grashoff number and explain its significance in Natural convection heat transfer.	CO1	7 Marks
	b)	A 30cm long glass plate is hung vertically in the air at 2^0C while its temperature maintained at 77^0C. Calculate the boundary layer thickness at the trailing edge of the plate. If a similar plate is placed in a wind tunnel and air is blown over it at a velocity of 4m/s, estimate the boundary layer thickness at its trailing edge.	CO4	7 Marks

UNIT-IV

7.	a)	Derive an expression for LMTD of a counter flow heat exchanger.	CO2	7 Marks
	b)	Hot oil with a Heat capacity rate of 2500 W/K flows through a double pipe heat exchanger. It enters at 360^0C and leaves at 300^0C. Cold fluid enters at 30^0C and leaves at 26^0C. If the overall heat transfer coefficient is 800 W/m2K, determine the heat exchanger area required for: i) Parallel flow. ii) Counter flow.	CO4	7 Marks

(OR)

8.	a)	Explain various regimes in boiling heat transfer and distinguish between filmwise and and dropwise condensation.	CO1	7 Marks
	b)	A heated polished copper plate is immersed in a pool of water boiling at atmosphere pressure. If the surface temperature of copper plate is maintained at a temperature of 113^0C, determine the surface heat flux and the evaporation rate per unit area of the plate.	CO4	7 Marks

UNIT-V

9.	a)	What is Stefan-Boltzmann Law? Derive an expression for the same.	CO1	7 Marks
	b)	A black body having surface area 0.2m^2 has an effective temperature 800K. Determine the following. i) Total emission. ii) Intensity of radiation. iii) Wavelength for maximum spectral emissive power.	CO2, CO4	7 Marks

(OR)

10.	a)	Using the definition of radiosity and irradiation, deduce an expression for the radiation interchange between two grey bodies.	CO1	7 Marks
	b)	Two large parallel planes with emissivities 0.4 are maintained at different temperatures exchange heat only by radiation. What percentage change in net radiation heat transfer would occur, if two equally large radiation shields with surface emissivities 0.04 are introduced in parallel to the plates?	CO2, CO4	7 Marks

NON-CONVENTIONAL ENERGY SOURCES
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Discuss the importance of Renewable energy over Conventional energy.	CO1	6 Marks
	b)	With the help of neat sketch, describe solar liquid heating system.	CO2	8 Marks
		(OR)		
2		Discuss in detail about the availability and growth of renewable and non renewable energy sources in India.	CO1	14 Marks

UNIT-II

3		Compare the performance of various types of solar collectors with neat sketches.	CO2	14 Marks
		(OR)		
4	a)	Outline the different heat losses in a solar collector with a suitable sketch.	CO2	8 Marks
	b)	What are the advantages and disadvantages of concentrating collectors over a flat - plate collectors?	CO2	6 Marks

UNIT-III

5	a)	Outline the principle of solar photovoltaic power generation. What are the main elements of a PV system?	CO3	8 Marks
	b)	Explain about Magneto-Hydro Dynamic (MHD) power generation with a neat sketch.	CO3	6 Marks
		(OR)		
6		Write a note on the following; i) Solar Ponds. ii) Solar Desalination. iii) I-V curves of a PV Cell. iv) Thermoelectric power.	CO3	14 Marks

UNIT-IV

7	a)	Brief about the factors to be considered in the development of wind power.	CO5	8 Marks
	b)	Discuss about anaerobic digestion. List out the factors that affect it.	CO5	6 Marks
		(OR)		
8	a)	Explain about the Vertical axis wind turbine with a neat sketch.	CO1	6 Marks
	b)	How are Gasifiers classified? Describe the pyrolysis process in detail.	CO2	8 Marks

UNIT-V

9	a)	What are the environmental impacts of geothermal energy?	CO3	6 Marks
	b)	Explain the operational features of liquid dominated geo-energy system with a neat sketch.	CO2	8 Marks
		(OR)		
10	a)	Explain the working principle of OTEC with suitable diagram.	CO2	7 Marks
	b)	What are the limitations and applications of OTEC plants?	CO5	7 Marks

HYDRAULICS AND PNEUMATICS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	State Pascal's law and explain in details about the application of Pascal's law with neat sketch.	CO1	7 Marks
	b)	Explain the construction and working of a vane pump.	CO1	7 Marks
		(OR)		
2.	a)	Explain the basic hydraulic system and its Components with neat sketch.	CO1	4 Marks
	b)	Explain the construction and working of Diaphragm Accumulator.	CO2	10 Marks

UNIT-II

3.	a)	Explain the pressure control valve with graphical symbol.	CO1	4 Marks
	b)	Explain the working of shuttle valve with symbolic representation with a neat sketch.	CO2	10 Marks
		(OR)		
4.	a)	Draw the ANSI symbol for pressure relief valve and sequence valve.	CO1	4 Marks
	b)	Explain the construction and working of following. i) Meter-in circuit. ii) Meter-out circuit.	CO1	10 Marks

UNIT-III

5.		With a neat sketch of the Quick Exhaust and flow control valve and explain its construction and working.	CO1	14 Marks
		(OR)		
6.	a)	Discuss the working principle of an air compressor.	CO2	7 Marks
	b)	Explain with schematic sketch of FRL unit with ANSI symbol.	CO4	7 Marks

UNIT-IV

7.	a)	Explain the components present in a PLC and give their functions with block diagram.	CO3	7 Marks
	b)	What is cascade control? Explain giving suitable example circuit.	CO3	7 Marks
		(OR)		
8.		Discuss in detail the considerations taken while designing pneumatic circuits.	CO3	14 Marks

UNIT-V

9.		Explain the working principle of pilot assisted solenoid control of directional control valve with a neat sketch. Illustrate the graphical symbol of the valve.	CO6	14 Marks
		(OR)		
10.		Design the electro pneumatic circuit for the following sequence. A1B1 A0B0, where 1 is extension and 0 is retraction	CO5	14 Marks

SUPPLY CHAIN MANAGEMENT
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What are the decision phases in SCM? Discuss in full.	CO1	7 Marks
	b)	In what way did the supply chain flows affect the success or failure of a firm? List any two supply chain decisions that have a significant impact on supply chain profitability.	CO2	7 Marks

(OR)

2.	a)	Explain the basic trade-off between responsiveness and efficiency for each of the major drivers of supply chain performance.	CO1	7 Marks
	b)	Discuss the major obstacles that must be overcome to manage a supply chain successfully.	CO1	7 Marks

UNIT-II

3.	a)	How do firms determine the optimum level of cycle stock in a chain? Discuss with a real world example.	CO4	7 Marks
	b)	What happened to the current inventory levels as we move backward, up the supply chain from retailer to manufacturer? Why?	CO1	7 Marks

(OR)

4.	a)	What is bullwhip effect and what are the main causes of bullwhip effect? What can a firm do to minimize demand distortions across the chain?	CO2	7 Marks
	b)	How could industrial supplies distributor use information to increase its responsiveness?	CO3	7 Marks

UNIT-III

5.	a)	Explain the main transportation strategies used by the firms. How to choose the optimum transportation strategy?	CO1	7 Marks
	b)	Discuss key drivers that may be used to tailor transportation. How does tailoring help?	CO2	7 Marks

(OR)

6.	a)	Explain why achieving strategic fit is critical to company's overall success.	CO2	7 Marks
	b)	How do firms build successful partnerships in supply chains?	CO2	7 Marks

UNIT-IV

7.	a)	What are the basic building blocks of an effective mass customization program? What kind of companywide cooperation is required for a successful mass customization program?	CO2	7 Marks
	b)	Explain the parameters to be considered in integrating supplies into new product development.	CO3	7 Marks

(OR)

8.	a)	What are the key challenges in adapting information technology to improve the efficiency of supply chain?	CO5	7 Marks
	b)	Why is IT the key component of SCM system? "Successful IT implementation is the outgrowth of the participation of knowledge workers". Comment with examples.	CO2	7 Marks

UNIT-V

9.	a)	What are the global issues in SCM? Discuss them by giving an account to cross border trade.	CO1	7 Marks
	b)	Elaborate on Supply Chain Management Metrics.	CO3	7 Marks

(OR)

10.	a)	Discuss about the global issues and outsourcing problems in SCM in the context of Indian industries perspective.	CO3	7 Marks
	b)	What do you understood by Mass Customization? Describe with advantages and limitations.	CO2	7 Marks

ANTENNAS AND WAVEGUIDES
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Obtain the expression for characteristic impedance of a rectangular waveguide for TE mode of propagation.	CO1	9 Marks
	b)	A rectangular waveguide has a dimension of a = 22.86mm. Calculate the b dimension such that cut-off wavelength of TE_{11} mode is half that of TE_{10} mode.	CO1	5 Marks

(OR)

2.	a)	Derive the expressions for cut-off frequency, guide wavelength, phase velocity of TE mode in a rectangular waveguide and prove that $V_p V_g = V_c^2$.	CO5	7 Marks
	b)	A rectangular wave guide has dimensions 2.5cm x 5cm. Determine the guide wave length, phase constant (β) and phase velocity (V_P) at a wavelength of 4.5 cms for the dominant mode.	CO2	7 Marks

UNIT-II

3.	a)	Explain the current distribution on a thin-wire antenna.	CO3	7 Marks
	b)	For an infinitesimal dipole excited by a constant RF current I, determine radiation intensity U, maximum value of U and directivity.	CO5	7 Marks

(OR)

4.	a)	Explain the working principle of a single wire antenna.	CO3	7 Marks
	b)	Define effective height (h_{eff}) of an antenna? Discuss h_{eff} for half wave dipole and short dipole antenna.	CO5	7 Marks

UNIT-III

5.	a)	With a neat sketch, explain the operation of Yagi-Uda array.	CO3	7 Marks
	b)	Deduce an expression for the radiation pattern of an end-fire array with N vertical dipoles.	CO6	7 Marks

(OR)

6.	a)	Derive the array factor of N-element isotropic linear uniform distributed Antenna.	CO3	7 Marks
	b)	An array contains 10 isotropic radiators with an inter element spacing of 0.5λ. It is required to produce broadside and end-fire beams: i) Find Null-to-Null beam width and half-power beam width in degrees. ii) Find the directivity of both forms of arrays.	CO5	7 Marks

UNIT-IV

7.	a)	Design and explain the working principle of a Microstrip antenna.	CO4	7 Marks
	b)	Explain the working principle of a helical antenna in normal mode.	CO5	7 Marks

(OR)

8.	a)	Find the directivity of 10 turn helix antenna having pitch angle 10^0, circumference C equal to λ.	CO5	5 Marks
	b)	Explain the radiation mechanism of Microstrip antenna.	CO6	5 Marks
	c)	Describe the different types of Microstrip antennas.	CO3	4 Marks

UNIT-V

9.	a)	Write short notes on Field regions on antenna.	CO3	4 Marks
	b)	Define radiation intensity, directivity, and solid angle.	CO5	6 Marks
	c)	Calculate the directivity of an antenna, if HPBW on one plane is 30^0 and 60^0 on orthogonal plane.	CO2	4 Marks

(OR)

10.	a)	State the reciprocity theorem for antennas. Prove that the self-impedance of an antenna in transmitting and receiving mode is same.	CO6	7 Marks
	b)	Explain in detail the terms beam efficiency and directivity. Use relevant expression and diagrams.	CO5	7 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

III B.Tech II Semester (SVEC-16) Supplementary Examinations March - 2021

DIGITAL SIGNAL PROCESSING
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define various elementary discrete time signals. Write notes on them and explain about their properties.	CO4	7 Marks
	b)	For the following discrete time signals, determine whether or not the system is linear, shift invariant, causal and stable. i) $y(n) = x(n + 7)$; ii) $y(n) = x^3(n)$.	CO4	7 Marks

(OR)

2.	a)	Find the DFT of the sequence $x(N) = \cos(n\pi/3)u(n)$.	CO4	7 Marks
	b)	Define stability of a system. Explain about BIBO stability criterion of a discrete system with an example.	CO4	7 Marks

UNIT-II

3.	a)	State and prove circular convolution property of DFT in frequency domain.	CO2	7 Marks
	b)	Find the DFT of the send quence $x(n)=\{1,2,3,4,4,3,2,1\}$ using DIT-FFT algorithm.	CO1	7 Marks

(OR)

4.	a)	Contrast the transforms DTFT,DFS and DFT.	CO1	7 Marks
	b)	Draw the radix 2 DIF-FFT structure when $N = 16$.	CO2	7 Marks

UNIT-III

5.	a)	Analog filter with transfer function $\boldsymbol{H_a(s) = s + 0.1/(s+ 0.1)^2 + 9}$. Convert into a digital IIR filter by using bilinear transformation.	CO5	7 Marks
	b)	Discuss about different methods of realization of IIR systems.	CO2	7 Marks

(OR)

6.	a)	Design a digital low pass Butterworth digital IIR filter which is required to meet the following specifications. Pass band attenuation ≤ 2dB. Pass band edge frequency = 4KHz stop band attenuation ≥ 40 dB stop band edge frequency = 8KHz. Sampling rate = 24 KHz by using bilinear transformation.	CO5	7 Marks
	b)	Derive an expression for order of the Butterwort analog proto type filter.	CO2	7 Marks

UNIT-IV

7.	a)	Explain designing of FIR filter using frequency sampling technique.	CO2	7 Marks
	b)	What is Gibbs phenomenon? How its effect can be reduced in the design of FIR filters.	CO1	7 Marks

(OR)

8.	a)	Derive an expression for frequency response of linear phase FIR filter when impulse response is symmetry having N odd number of samples.	CO3	7 Marks
	b)	Design a Linear phase low pass FIR filter with a cutoff frequency of π/2 rad/sec frequency sampling technique. Take N=11.	CO3	7 Marks

UNIT-V

9.	a)	Explain various types of general purpose registers in TMS 320C6X processor.	CO1	7 Marks
	b)	What is meant by bit reversal address mode? Write the applications for which addressing are proffered.	CO1	7 Marks
		(OR)		
10.	a)	Explain special addressing modes in programmable DSPs.	CO1	7 Marks
	b)	Explain the features of TMS 320C6X DSP processor.	CO1	7 Marks

CODE No.: 16BT60404 SVEC-16

IMAGE PROCESSING
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain about fundamental steps in image processing with the help of a neat block diagram.	CO1	8 Marks
	b)	State and prove any three properties of 2-D Discrete Fourier Transform.	CO1	6 Marks
		(OR)		
2.	a)	Explain the following with an example: i) Neighbours of a pixel. ii) Adjacency. iii) Distance measures.	CO1	9 Marks
	b)	Explain the properties of slant transform.	CO3	5 Marks

UNIT-II

3.	a)	For the given 4 x 4 image having grey scale between [0, 9], get the histogram equalized image and draw the histogram of image before and after equalization. 2 3 3 2 4 2 4 3 2 2 3 5 2 4 2 4	CO4	7 Marks
	b)	Explain image sharpening using ideal high pass, butterworth and Gaussian high pass filters in frequency domain.	CO2	7 Marks
		(OR)		
4.	a)	Discuss about smoothing spatial filters.	CO2	7 Marks
	b)	With the help of a neat block diagram, explain the basic steps to perform image filtering in frequency domain.	CO2	7 Marks

UNIT-III

5.	a)	Draw and explain image degradation and restoration model.	CO3	6 Marks
	b)	Discuss how wiener filtering is useful to reduce mean square error.	CO5	8 Marks
		(OR)		
6.	a)	Explain different methods to estimate the degradation functions.	CO3	7 Marks
	b)	Discuss various order statistics filters for restoring the images in presence of noise.	CO1	7 Marks

UNIT-IV

7.	a)	Discuss about different types of redundancies in images.	CO1	6 Marks
	b)	Demonstrate arithmetic coding with an example.	CO4	8 Marks
		(OR)		
8.	a)	Define image compression and explain about run length coding.	CO5	8 Marks
	b)	Discuss about transform coding.	CO2	6 Marks

UNIT-V

9.	a)	Explain the detection of point, line and edge detection techniques.	CO1	7 Marks
	b)	Explain how the RGB color model converted into HSI color space.	CO6	7 Marks

(OR)

10.	a)	Explain adaptive thresholding.	CO5	7 Marks
	b)	Explain how gray level converted to color in pseudo color image processing.	CO6	7 Marks

CODE No.: 16BT60405 SVEC-16

RADAR ENGINEERING

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Derive the simple form of radar range equation and explain how to calculate the range.	CO4	7 Marks
	b)	Analyze various system losses occurring in radar systems.	CO2	7 Marks
		(OR)		
2.	a)	Identify the need for integration of Radar Pulses. List their Types. Justify the best suited integration for practical applications.	CO6	7 Marks
	b)	Calculate the Doppler frequency of stationary CW radar transmitting at 8 MHz frequency when a moving target approaches the radar with a radial velocity of 100 Km/Hour.	CO4	7 Marks
		UNIT-II		
3.	a)	Illustrate the operation of an MTI radar system with a power amplifier in the transmitter.	CO1	7 Marks
	b)	Apply appropriate techniques to determine Range and Doppler measurements in radar systems.	CO5	7 Marks
		(OR)		
4.	a)	Sketch the block diagram of CW radar and explain the process of detection of radar signals.	CO1	7 Marks
	b)	Discuss the design constraints and band width requirements in a CW radar receiver.	CO3	7 Marks
		UNIT-III		
5.	a)	Illustrate conical scan tracking technique for tracking targets and its advantages.	CO5	7 Marks
	b)	Explain amplitude comparison monopulse tracking with neat diagrams.	CO1	7 Marks
		(OR)		
6.	a)	Illustrate the techniques to measure range of a target and discuss how the target is tracked continuously in radar systems giving some examples.	CO5	10 Marks
	b)	Identify the best search pattern for fire control tracking radar.	CO2	4 Marks
		UNIT-IV		
7.	a)	Design a Matched Filter receiver for optimum echo detection in the presence of noise.	CO3	7 Marks
	b)	Compare branch type and balance type of duplexer.	CO2	7 Marks
		(OR)		
8.	a)	Compare Range Height Indicator (RHI) and Plan Position Indicator (PPI) radar displays.	CO2	7 Marks
	b)	Demonstrate how beam width can be changed with steering angle in phased array antenna design.	CO3	7 Marks
		UNIT-V		
9.	a)	Explain in detail about LORAN navigation system.	CO1	7 Marks
	b)	Analyze and contrast between LORAN and DECCA navigation systems.	CO2	7 Marks
		(OR)		
10.	a)	Explain the salient features of VHF Omni Directional Range (VOR) navigation system.	CO4	7 Marks
	b)	Identify some real time applications of Navigational aids in the present	CO6	7 Marks

era and its advantages.

TELECOMMUNICATION SWITCHING SYSTEMS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Classify switching systems. With simple circuit, explain the working of telephone network.	CO1	7 Marks
	b)	Why is it necessary to keep the magnetic diaphragm in an earphone displaced from its unstressed position? How is this achieved?	CO3	7 Marks
		(OR)		
2.	a)	Explain 3 x 3 and 6 x 6 crossbar switching with neat sketches.	CO1	7 Marks
	b)	What happens if the ratio φ/φ0 is not very small in case of an earphone?	CO3	7 Marks

UNIT-II

3.	a)	Infer the objectives of numbering plan. How are they classified?	CO6	7 Marks
	b)	Paraphrase the objectives of numbering plan with the help of example.	CO1	7 Marks
		(OR)		
4.	a)	Conclude the functions performed by subscriber line interface. Explain.	CO1	7 Marks
	b)	Analyze the objectives of charging plan. How are they classified?	CO6	7 Marks

UNIT-III

5.	a)	Originate channel associated and channel non associated mode of signalling techniques.	CO4	7 Marks
	b)	A group of 20 servers carry a traffic control of 10 erlangs. If the average duration of a call is three minutes, calculate the number of calls put through by a single server and the group as a whole in a one hour period.	CO3	7 Marks
		(OR)		
6.	a)	What is grade of service? Obtain grade of service for three stage and four stage networks.	CO4	7 Marks
	b)	On an average, one call arrives every 5 sec. During a period of 10 seconds, what is the probability that: i) No call arrives? ii) One call arrives? iii) Two call arrives? iv) More than two calls arrive?	CO3	7 Marks

UNIT-IV

7.	a)	What are the new services supported by ISDN? Explain any four of them in detail.	CO5	7 Marks
	b)	Compare NISDN and BISDN.	CO2	7 Marks
		(OR)		
8.	a)	Summarize the motivation of ISDN. Explain its services, network and protocol architecture used for different applications.	CO5	7 Marks
	b)	How functional modules are interconnected in BISDN and explain.	CO2	7 Marks

UNIT-V

9.	a)	What is CM and CMTS? Explain.	CO1	7 Marks
	b)	Compare ADSL, VDSL, HDSL and SDSL technologies.	CO4	7 Marks
		(OR)		
10.	a)	Write short notes on: i) CM and CMTS. ii) DOCSIS.	CO1	7 Marks
	b)	Explain in detail about ADSL with suitable block diagram.	CO4	7 Marks

DIGITAL CMOS IC DESIGN
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Explain the basic operation of 2-phase dynamic circuit.	CO1	7 Marks
	b)	Determine how to optimize multiple source drain connections in CMOS logic design.	CO4	7 Marks
		(OR)		
2.	a)	Define body effect. Explain the effect in a multiple input gate with example.	CO1	6 Marks
	b)	Write short notes for the following. i) C^2 MOS. ii) CVSL.	CO4	8 Marks
		UNIT-II		
3.	a)	Analyze how the digital CMOS circuits are designed and verified by using the tools.	CO2	9 Marks
	b)	Construct the layout diagram for CMOS inverter.	CO3	5 Marks
		(OR)		
4.	a)	What is Transmission gate? Draw the layout diagram for Transmission gate.	CO2	7 Marks
	b)	Construct the stick diagram for NMOS Inverter.	CO3	7 Marks
		UNIT-III		
5.	a)	Sketch and explain the schematic diagram of a SRAM memory cell along with sense amplifier and data write circuitry.	CO1	11 Marks
	b)	Criticize the difference between SRAM and DRAM techniques.	CO5	3 Marks
		(OR)		
6.	a)	Demonstrate the logic circuit of a basic RAM cell.	CO1	10 Marks
	b)	Compare random access and serial access Flash memory techniques.	CO5	4 Marks
		UNIT-IV		
7.	a)	Define Cross Talk and relate it to inter wire capacitance. Differentiate Floating Lines and Driven Lines.	CO6	7 Marks
	b)	Write short notes on latch based clocking.	CO1	4 Marks
	c)	Justify the concepts clock distribution techniques.	CO6	3 Marks
		(OR)		
8.	a)	Relate Ohmic voltage drop and resistance.	CO6	6 Marks
	b)	Discuss the process of Electromigration.	CO1	8 Marks
		UNIT-V		
9.	a)	Differentiate Logic design and Physical design.	CO2	7 Marks
	b)	Develop flow chart for Logic design flow and explain the significance of each block.	CO3	7 Marks
		(OR)		
10.	a)	Develop flow chart for FPGA design flow.	CO3	8 Marks
	b)	Appraise the parameters represented in data sheets.	CO2	6 Marks

LIGHT WAVE COMMUNICATIONS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks

UNIT-I

1.	a)	Conclude the advantages of modified Chemical Vapor Deposition over Vapor Phase Deposition.	CO2	7 Marks
	b)	Design a silica optical fiber with a core diameter large enough to be considered by ray theory analysis having a core refractive index of 1.5 and a cladding refractive index of 1.47 for proper parametric values of numerical aperture, critical angle at core- cladding interface, acceptance angle in air for the fiber.	CO3	7 Marks
		(OR)		
2.	a)	Derive the numerical aperture of Step Index fiber (SI) from Snell's law.	CO2	7 Marks
	b)	With relevant diagrams, appraise the different types of optical fibers considering number of modes and material composition of core suited for practical applications.	CO3	7 Marks

UNIT-II

3.	a)	Discuss about nonlinear scattering losses in optical fiber.	CO1	7 Marks
	b)	A long single-mode optical fiber has an attenuation of 0.5dBkm^{-1} when operating at a wavelength of 1.3 μm. The fiber core diameter is 6 μm and the laser source bandwidth is 600MHz. Compare the threshold optical powers for stimulated Brillouin and Raman scattering within the fiber at the wavelength specified.	CO4	7 Marks
		(OR)		
4.	a)	Summarize the Signal Distortion in Single Mode Fibers.	CO1	7 Marks
	b)	Infer the contribution of various absorption mechanisms for losses in optical fibers.	CO4	7 Marks

UNIT-III

5.	a)	Conclude the effect of temperature on Avalanche Gain of a photo detector.	CO6	7 Marks
	b)	Differentiate simulated and spontaneous Emissions.	CO2	7 Marks
		(OR)		
6.	a)	Suggest improvements in Structures of InGaAs APDs to improve its performance.	CO6	7 Marks
	b)	Contrast PIN Diode and Avalanche Photo Diode.	CO2	7 Marks

UNIT-IV

7.	a)	A graded index fiber has a parabolic refractive index profile ($\alpha = 2$) and a core diameter of 50μm. Estimate the insertion loss due to a 3μm lateral misalignment at a fiber joint when there is index matching and assuming: i) there is uniform illumination of all guided modes only. ii) there is uniform illumination of all guided and leaky modes.	CO3	7 Marks
	b)	The end faces of two optical fibres with core refractive indices of 1.5 are perfectly aligned and have a small between them. This gap is filled with a gel having refractive index of 1.3. Find the optical losses in dB at this joint.	CO4	7 Marks
		(OR)		

8.	a)	Develop an expression to relate the power launched into a fiber and its brightness. Justify the effect of equilibrium numerical aperture in a long fiber length.	CO3	7 Marks
	b)	A silica multimode step index fiber has a core refractive index of 1.46. Determine the optical loss in decibels due to Fresnel reflection at a fiber joint with: i) a small air gap. ii) an index matching epoxy which has a refractive index of 1.40. It may be assumed that the fiber axes and end faces are perfectly aligned at the joint.	CO4	7 Marks

UNIT-V

9.	a)	Explain the significance of Link Power budget.	CO1	7 Marks
	b)	Define carrier-to-noise ratio. Identify the limiting conditions of the receiver.	CO5	7 Marks
		(OR)		
10.	a)	List and summarize various multi-channel transmission techniques.	CO1	7 Marks
	b)	Develop a model setup for an ARQ Error Control Scheme.	CO5	7 Marks

SOFTWARE TESTING
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss the evolution of software Testing. Also explain the different levels of Testing.	CO1	6 Marks
	b)	Differentiate between Effective and Exhaustive software testing.	CO2	8 Marks
		(OR)		
2.	a)	What are the different schools of Software Testing? Explain.	CO1	8 Marks
	b)	Take a project and identify the Test Activities according to SDLC phases.	CO3	6 Marks

UNIT-II

3.	a)	What is the need of white-box testing? List out and explain various white box testing techniques.	CO2	8 Marks
	b)	Explain about Graph Matrices based testing technique.	CO2	6 Marks
		(OR)		
4.	a)	Explain loop testing with an example.	CO2	6 Marks
	b)	Write short notes on: i) Data Flow testing. ii) Mutation testing.	CO2	8 Marks

UNIT-III

5.	a)	Differentiate between White Box testing and Black Box testing techniques.	CO3	8 Marks
	b)	Explain about Boundary Value Analysis in detail.	CO3	6 Marks
		(OR)		
6.	a)	Explain about software Test management in detail.	CO3	8 Marks
	b)	What is meant by test plan? Give detailed test design for a sample test project.	CO3	6 Marks

UNIT-IV

7.	a)	What are Software metrics? Give an example.	CO4	8 Marks
	b)	Explain about size metrics in testing.	CO4	6 Marks
		(OR)		
8.	a)	What are the costs incurred in adopting a testing tool? List out with examples.	CO3	8 Marks
	b)	Differentiate between static and dynamic tools. Explain.	CO3	6 Marks

UNIT-V

9.	a)	What is meant by Regression Testing? Give an example.	CO4	8 Marks
	b)	Mention about Progressive testing and Regressive testing in detail.	CO4	6 Marks
		(OR)		
10.	a)	What is the use of automation? What are the costs involved in it? Explain.	CO5	8 Marks
	b)	How do you test a project with commercial testing tool? Explain.	CO5	6 Marks

III B.Tech II Semester (SVEC-16) Supplementary Examinations March - 2021

SOFT COMPUTING
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Compare and contrast neuro genetic and fuzzy genetic hybrid systems.	CO1	7 Marks
	b)	Discuss in detail application scope of neural networks.	CO4	7 Marks
		(OR)		
2.	a)	What is Hebb net? Design a Hebb network to realize logical OR function.	CO3	7 Marks
	b)	Write a short note on evolution of neural networks.	CO2	7 Marks

UNIT-II

3.	a)	What is the role of learning rule in perceptrons? Discuss about different learning rules.	CO1	7 Marks
	b)	Illustrate the flowchart for training process with suitable example.	CO2	7 Marks
		(OR)		
4.		Explain in detail back-propagation algorithm with an example.	CO5	14 Marks

UNIT-III

5.	a)	Differentiate supervised learning and unsupervised learning.	CO1	7 Marks
	b)	What is adaptive response theory? Discuss in detail.	CO2	7 Marks
		(OR)		
6.	a)	Illustrate the process involved in learning vector quantization.	CO2	7 Marks
	b)	What is fixed weight competitive nets? Discuss in detail.	CO5	7 Marks

UNIT-IV

7.	a)	What is Fuzzy sets and membership function? $A = \{ 0.1 / 2 + 0.6/ 3 + 0.4/ 4 + 0.3/ 5 + 0.8/ 6 \}$ $B = \{ 0.5/ 2 + 0.8/ 3 + 0.4/ 4 + 0.6/ 5 + 0.4/ 6 \}$ Calculate $A \cap B$, $B \cap A$ using fuzzy operation.	CO5	7 Marks
	b)	Write a short note on classical sets with an example.	CO1	7 Marks
		(OR)		
8.	a)	Differentiate tolerance relations and equivalence relations.	CO1	7 Marks
	b)	Explain about non-interactive fuzzy sets with an example.	CO2	7 Marks

UNIT-V

9.		Illustrate the working principle of genetic algorithm with suitable example.	CO6	14 Marks
		(OR)		
10.	a)	Write a short note on measures of fuzziness.	CO4	7 Marks
	b)	Discuss in detail extension principle.	CO1	7 Marks

WIRELESS NETWORKS
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain Non- Persistent, I-Persistent and P- Persistent CSMA protocols.	CO2	8 Marks
	b)	Explain the principle, frame structures and working of TDMA system.	CO1	6 Marks
		(OR)		
2.	a)	Explain in detail the performance of the random access scheme for data oriented networks.	CO1	10 Marks
	b)	Mention some key factors that contribute to security problems in wireless networks.	CO2	4 Marks

UNIT-II

3.	a)	Explain in detail the random access for mobile data services and wireless LAN data services.	CO3	8 Marks
	b)	What are the advantages and disadvantages of CDMA cellular network?	CO3	6 Marks
		(OR)		
4.	a)	Explain in detail about wireless network operations.	CO2	10 Marks
	b)	Explain the techniques for improving coverage and capacity in cellular network.	CO4	4 Marks

UNIT-III

5.	a)	Explain IEEE802.11 with PHY and MAC layer.	CO3	10 Marks
	b)	Explain in detail about security requirements for wireless network.	CO3	4 Marks
		(OR)		
6.	a)	Write short notes on Home Access network.	CO5	7 Marks
	b)	Discuss the principle working of wireless LAN.	CO3	7 Marks

UNIT-IV

7.	a)	Mention the key features of IS-95 systems and explain packets and frame format of IS-95 reverse channel.	CO5	10 Marks
	b)	Write short notes on SMS operations.	CO5	4 Marks
		(OR)		
8.	a)	Write a short note on protocol layers in GPRS.	CO4	7 Marks
	b)	Explain the mechanisms that support a mobile environment.	CO5	7 Marks

UNIT-V

9.	a)	Describe overall architecture of HomeRF-Architecture.	CO6	8 Marks
	b)	Discuss how 3G Technology has revolutionized our lives in present scenario.	CO6	6 Marks
		(OR)		
10.	a)	Describe how the wireless home networking has changed the lives of the people in today's world.	CO6	7 Marks
	b)	Write short notes convergence layer.	CO5	7 Marks

PRINCIPLES OF PROGRAMMING LANGUAGES

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Why is it useful for a programmer to have some background in language design, even though he or she may never actually design a programming language?	CO1	7 Marks
	b)	Explain the areas of computer applications and their associated languages.	CO1	7 Marks
		(OR)		
2.	a)	How pointers are implemented in Pascal?	CO2	7 Marks
	b)	List and explain briefly about user defined data types with examples.	CO1	7 Marks

UNIT-II

3.	a)	Explain about the switch statement in Algol with an example.	CO4	7 Marks
	b)	What is lazy evaluation? Explain the reasons why lazy evaluation may be desirable.	CO4	7 Marks
		(OR)		
4.	a)	Describe the different categories of control flow mechanisms.	CO3	7 Marks
	b)	Explain about control flow in Recursion.	CO3	7 Marks

UNIT-III

5.	a)	Explain about the models of parameter passing.	CO4	7 Marks
	b)	Explain about the co-routines with an example.	CO2	7 Marks
		(OR)		
6.	a)	Discuss about design issues of data abstraction.	CO3	7 Marks
	b)	List and explain about different abstract data types.	CO1	7 Marks

UNIT-IV

7.	a)	Define Monitor. Explain its concept.	CO2	7 Marks
	b)	Explain about the concurrency in Ada 95.	CO4	7 Marks
		(OR)		
8.	a)	Describe the java throwable class hierarchy and the types of exceptions. Can you claim multiple exceptions in a method declaration? Illustrate by means of an example.	CO2	7 Marks
	b)	What is exception? How to handle the exceptions in C++ with an example?	CO1	7 Marks

UNIT-V

9.	a)	Explain the applications of logic programming.	CO4	7 Marks
	b)	Describe about the search strategies in prolog.	CO4	7 Marks
		(OR)		
10.	a)	Explain the characteristics of functional programming languages.	CO4	7 Marks
	b)	Explain about the LISP, ML.	CO6	7 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

III B.Tech II Semester (SVEC-16) Supplementary Examinations March - 2021

ARM PROCESSORS AND PIC MICROCONTROLLERS

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Differentiate microcontrollers versus general purpose microcontroller.	CO1	8 Marks
	b)	Write instructions to add the values 16H and CDH. Place the result in WREG register.	CO1	6 Marks

(OR)

2.	a)	Explain about file register and access bank in the PIC18.	CO2	8 Marks
	b)	Explain about: i) COMF. ii) DECF. iii) MOVFF.	CO2	6 Marks

UNIT-II

3.	a)	Select appropriate clock frequency and timer in required mode, write a program in assembly or C generate a square wave on port A pin 1 using timer with a duty cycle of 40% with and without interrupt.	CO3	7 Marks
	b)	Explain the time structure for use as a counter with a suitable example program.	CO1	7 Marks

(OR)

4.	a)	Explain about serial communication.	CO1	7 Marks
	b)	Write a program in assembly or C to read port A and transmit serially using interrupts with clock frequency of 1000MHZ and baud rate of 9600. For additional information refer to Register file summary provided for reference.	CO3	7 Marks

UNIT-III

5.	a)	Write a program to interface a 7 segment display.	CO4	7 Marks
	b)	Write a program to interface a DAC.	CO4	7 Marks

(OR)

6.	a)	Write a program to interface a LCD.	CO4	7 Marks
	b)	Write a program to interface a ADC.	CO4	7 Marks

UNIT-IV

7.	a)	With a neat sketch, explain the basic architecture of ARM cortex M3.	CO5	7 Marks
	b)	List the different stages of a pipeline of an ARM cortex M3 processor and explain them.	CO1	7 Marks

(OR)

8.	a)	List the registers present in different exception modes of ARM cortex M3 and explain the functionality of them.	CO1	7 Marks
	b)	Explain about various exception types in ARM.	CO1	7 Marks

UNIT-V

9.	a)	Explain about concept of pre indexing, auto indexing and post indexing using suitable examples.	CO1	7 Marks
	b)	Write an ALP to perform division of two numbers in ARM mode and then switch to thumb mode to perform subtraction.	CO6	7 Marks

(OR)

10.	a)	Demonstrate the use of the following instructions using suitable example. RSC, ADC, CMN, TST, BL.	CO1	7 Marks
	b)	Compare ARM mode and thumb p mode programming of ARM.	CO6	7 Marks

PROCESS CONTROL INSTRUMENTATION
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Describe the mathematical model of liquid process.	CO3	7 Marks
	b)	Explain the characteristics of electric system.	CO1	7 Marks
		(OR)		
2.	a)	What are process elements? Explain each one.	CO1	7 Marks
	b)	Determine the transfer function of a single tank liquid level system.	CO2	7 Marks

UNIT-II

3.	a)	What are the advantages of the displacement type pneumatic controllers?	CO3	7 Marks
	b)	Explain the working of electronic PID controller with a neat diagram.	CO3	7 Marks
		(OR)		
4.		Explain the working of pneumatic PI controller with a neat diagram.	CO3	14 Marks

UNIT-III

5.	a)	Explain in detail about one-quarter decay ratio criteria.	CO4	7 Marks
	b)	Explain in detail about open-loop transient response method.	CO4	7 Marks
		(OR)		
6.		Explain in detail how time integral criteria lead to unique solution.	CO2	14 Marks

UNIT-IV

7.	a)	Explain in detail about solenoid.	CO5	7 Marks
	b)	Explain in detail about Sliding-stem control valve.	CO3	7 Marks
		(OR)		
8.		Explain in detail about pneumatic and electronic valve positioner.	CO5	14 Marks

UNIT-V

9.		Explain the applications of cascade control system. What are the advantages of cascade control and for what kind of process can you employ cascade control?	CO2	14 Marks
		(OR)		
10.		Compare cascade and signal loop control systems.	CO4	14 Marks

CODE No.: 16BT61005 SVEC-16

OPTO-ELECTRONICS AND LASER INSTRUMENTATION

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Derive an expression for numerical aperture of a step Index fibre.	CO1	7 Marks
	b)	Describe what is meant by the fusion splicing of optical fibers. Discuss the advantages and drawbacks of these joining techniques.	CO1	7 Marks
		(OR)		
2.	a)	Derive an expression for the internal optical power level generated in LEDs.	CO1	7 Marks
	b)	The relative index difference between the core axis and the cladding of a graded index fibre is 0.7% when the refractive index at the core axis is 1.45. Estimate values for the numerical aperture of the fibre along the axis when the index profile is assumed to be triangular.	CO1	7 Marks

UNIT-II

3.	a)	Explain the interferometric method of measurement of length by using an optical fibre.	CO2	7 Marks
	b)	Explain the concept of polarization in optical fibers and discuss the polarization sensors.	CO3	7 Marks
		(OR)		
4.	a)	What are the properties that can be sensed using Fiber Optics?	CO3	7 Marks
	b)	Explain the concept of polarization in optical fibers and discuss the polarization sensors.	CO3	7 Marks

UNIT-III

5.	a)	Explain the liquid dye laser in detail.	CO6	7 Marks
	b)	Explain the construction and operation of ruby laser with a neat diagram.	CO6	7 Marks
		(OR)		
6.	a)	With the aid of energy band-diagram, explain HE-NE laser in detail.	CO6	7 Marks
	b)	Explain the construction and operation of gas laser with a neat diagram.	CO6	7 Marks

UNIT-IV

7.	a)	Explain about laser interaction with tissue.	CO6	7 Marks
	b)	Mention the advantages of laser surgery and photo thermal application.	CO5	7 Marks
		(OR)		
8.	a)	List and explain how lasers are used in nonlinear optics for basic sciences.	CO6	7 Marks
	b)	What are the areas of medical laser surgery where laser will be used?	CO5	7 Marks

UNIT-V

9.	a)	Describe the construction and reconstruction of hologram.	CO1	7 Marks
	b)	Explain about any three scientific applications of holography.	CO1	7 Marks
		(OR)		
10.		Define modulation and its types. Compare the types and explain about figure of merits.	CO1	14 Marks

CODE No.: 16BT61006 SVEC-16

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

III B.Tech II Semester (SVEC-16) Supplementary Examinations March - 2021

AIRCRAFT INSTRUMENTATION
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss the reconfiguration of aircraft systems.	CO1	7 Marks
	b)	List the problems experienced by Wright Brothers in their first error manned flight.	CO1	7 Marks
		(OR)		
2.	a)	Differentiate qualitative and quantitative instruments.	CO2	7 Marks
	b)	List the most important aircraft instruments.	CO1	7 Marks

UNIT-II

3.	a)	Calculate the mach number if aircraft is flying at a speed of 600 mph at sea level.	CO4	4 Marks
	b)	Describe with a suitable, how the static ports are used to measure the ambient atmospheric pressure?	CO5	10 Marks
		(OR)		
4.		With the help of a diagram, explain the operation of combined Pitot-static tube.	CO2	14 Marks

UNIT-III

5.	a)	Discuss the different errors in a directional gyro.	CO1	7 Marks
	b)	What are the limitations of a directional gyroscope?	CO1	7 Marks
		(OR)		
6.		List the properties of mechanical gyros and explain mechanical gyros with a neat sketch.	CO1	14 Marks

UNIT-IV

7.		Define the Engine Pressure Ratio and how is it measured in a jet engine.	CO5	14 Marks
		(OR)		
8.		How does an electromagnetic vibrating pickup work? Discuss with the help of a block schematic diagram the construction and operation of a dedicated vibration monitoring system using an electromagnetic pickup.	CO5	14 Marks

UNIT-V

9.		Explain Flight director system with a neat sketch.	CO1	14 Marks
		(OR)		
10.		How does a compensating probe compensate for changes in fuel's dielectric constant? Draw the sketch of a compensating probe along with the main probe.	CO3	14 Marks

CODE No.: 16BT61041 SVEC-16

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

III B.Tech II Semester (SVEC-16) Supplementary Examinations March - 2021

PROGRAMMABLE LOGIC CONTROLLERS

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Explain the principle of operation of discrete ac input and output modules used in PLC with suitable diagrams.	CO1	14 Marks
		(OR)		
2.	a)	Draw the block diagram of I/O modules and explain it.	CO1	7 Marks
	b)	Explain about Fail-safe circuits.	CO1	7 Marks

UNIT-II

3.	a)	Implement following logic gates in ladder diagram. 3 Input AND gate 2 Input NAND gate 3 Input NOR gate 2 Input NOR gate.	CO2	7 Marks
	b)	How will high speed counter module works describe with suitable application.	CO2	7 Marks
		(OR)		
4.		Explain ladder diagram construction and flow chart for spray process system.	CO2	14 Marks

UNIT-III

5.	a)	Explain about MOVE, FIFO functions and their applications.	CO3	7 Marks
	b)	Describe the number conversion functions.	CO3	7 Marks
		(OR)		
6.	a)	Explain Master control relay functions.	CO3	7 Marks
	b)	Describe the Arithmetic functions.	CO1	7 Marks

UNIT-IV

7.	a)	Explain how bit patterns in registers can be used in machine control.	CO4	7 Marks
	b)	Explain basic two-axis robot with PLC sequencer control.	CO6	7 Marks
		(OR)		
8.	a)	Use matrix functions in combination to simulate combination gates such as NAND and NOR in PLC.	CO4	7 Marks
	b)	Explain how to change a Register Bit Status in detail.	CO5	7 Marks

UNIT-V

9.	a)	Explain various programming languages in PLC.	CO5	7 Marks
	b)	A machine is connected to a load cell that outputs a voltage. Proportional to the mass on a platform, when unloaded the cell outputs a voltage of 1V. A mass of 500Kg results in a 6V output. Write a program that will measure the mass when an input sensor (M) becomes true. If the mass is not between 300Kg and 400Kg and alarm output (A) will be turned on. Write a program and indicate the general settings for the analog I/O.	CO4	7 Marks
		(OR)		
10.	a)	Describe PID tuning functions and methods.	CO4	7 Marks
	b)	Explain about PLC auxiliary commands and functions.	CO5	7 Marks

CLOUD COMPUTING

[Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define Data center. Explain the need and benefits of virtualization on Data center.	CO1	7 Marks
	b)	Describe the types of virtualization in cloud computing with suitable examples.	CO1	7 Marks
		(OR)		
2.		Compare the services and applications of Hyper-V and VMware virtualization technologies.	CO2	14 Marks

UNIT-II

3.	a)	Discuss the risks and challenges in cloud computing.	CO1	7 Marks
	b)	Interpret the critical cloud computing challenges pertaining to IT resources in public clouds.	CO1	7 Marks
		(OR)		
4.		State and explain various cloud deployment models with suitable examples.	CO1	14 Marks

UNIT-III

5.	a)	Illustrate multitenant technologies with suitable examples.	CO2	7 Marks
	b)	State the web based services to process data in cloud computing.	CO1	7 Marks
		(OR)		
6.		Classify and analyze the components in cloud bursting architecture, elastic disk provisioning architecture and redundant storage architectures with neat sketch.	CO4	14 Marks

UNIT-IV

7.	a)	Explain various applications of cloud security.	CO6	7 Marks
	b)	Explain cloud scale for disaster recovery in cloud.	CO2	7 Marks
		(OR)		
8.		Analyze various disasters that can occur in cloud. Evaluate the appropriate recovery measures.	CO2	14 Marks

UNIT-V

9.	a)	Compare and contrast IaaS, PaaS and SaaS with suitable examples each.	CO2	7 Marks
	b)	Design and develop a web application in Google App Engine.	CO5	7 Marks
		(OR)		
10.		Outline the features of Amazon EC2 cloud and develop an Amazon Machine Instance on EC2 cloud	CO4	14 Marks

AD-HOC AND WIRELESS SENSOR NETWORKS
[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the applications of Ad-hoc wireless networks.	CO1	5 Marks
	b)	Explain about the following issues which affect the design, deployment and performance of an Ad-hoc wireless system. i) Medium access scheme. ii) Routing. iii) Multicasting.	CO2	9 Marks
		(OR)		
2.	a)	Explain the following contention based MAC protocols of Ad-hoc networks. i) MACA. ii) MACAW.	CO1	9 Marks
	b)	Draw and explain the frame structure in D-PRMA protocol.	CO1	5 Marks

UNIT-II

3.	a)	With suitable example, explain establishment and route maintenance in DSR.	CO4	7 Marks
	b)	Write about hierarchical state routing protocol. Discuss the advantages of hierarchical topology based protocols over protocols that use flat topology.	CO5	7 Marks
		(OR)		
4.	a)	Explain the table driven routing protocol DSDV in detail.	CO5	8 Marks
	b)	Discuss the following phases of on demand multicast routing protocol. i) Mesh initialization phase. ii) Mesh maintenance phase.	CO5	6 Marks

UNIT-III

5.	a)	Why does TCP not perform well in Ad-hoc wireless networks?	CO2	7 Marks
	b)	Explain the working, advantages and disadvantages of TCP-ELFN.	CO2	7 Marks
		(OR)		
6.	a)	List and explain the network security requirements.	CO1	5 Marks
	b)	Discuss about some of the multi-layer attacks in Ad-hoc wireless networks.	CO2	9 Marks

UNIT-IV

7.	a)	Explain the following design choices for providing QOS system. i) Hard state versus soft state resources reservation. ii) Stateful versus Stateless approach. iii) Hard QOS versus soft QOS.	CO4	9 Marks
	b)	Describe the layer wise classification of QOS solutions.	CO4	5 Marks
		(OR)		
8.		Explain in detail about transmission power management schemes.	CO3	14 Marks

UNIT-V

9.	a)	Describe the power efficient gathering for sensor information systems.	CO3	7 Marks
	b)	Compare wireless sensor networks with Ad-hoc wireless networks.	CO1	7 Marks
		(OR)		
10.		List and explain various MAC protocols of wireless sensor networks.	CO2	14 Marks

DATA WAREHOUSING AND DATA MINING

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the three-tier data warehouse architecture and its various components.	CO3	7 Marks
	b)	Describe the multidimensional data model with neat sketch.	CO2	7 Marks
		(OR)		
2.	a)	What is a data warehouse? Distinguish between operational database system and data warehouses.	CO1	7 Marks
	b)	What are OLAP operations in the multidimensional data model? Explain.	CO3	7 Marks

UNIT-II

3.	a)	What is data cleaning? Describe the approaches to fill missing values.	CO2	7 Marks
	b)	What is datamining? Briefly explain the knowledge discovery process.	CO1	7 Marks
		(OR)		
4.	a)	Briefly describe various forms of data preprocessing.	CO3	7 Marks
	b)	Describe in detail datamining functionalities and the different kinds of patterns can be mined.	CO5	7 Marks

UNIT-III

5.	a)	Discuss the F-P growth algorithm with an example.	CO4	7 Marks
	b)	What is association and correlation? With an example, describe classification and prediction.	CO2	7 Marks
		(OR)		
6.	a)	Elucidate the steps in the decision tree classification process with an example.	CO4	7 Marks
	b)	Discuss the Apriori algorithm with an example.	CO4	7 Marks

UNIT-IV

7.	a)	Describe different grid-based methods in cluster analysis.	CO2	7 Marks
	b)	What do you mean by clustering? Explain different types of clusters.	CO1	7 Marks
		(OR)		
8.	a)	Write the DBSCAN algorithm and explain.	CO5	7 Marks
	b)	What is partitioning method? Describe k-means clustering algorithm.	CO1	7 Marks

UNIT-V

9.	a)	What is multimedia data? Briefly describe the similarity search in multimedia data.	CO2	7 Marks
	b)	What is text mining? Describe about basic measures for text retrieval.	CO2	7 Marks
		(OR)		
10.	a)	How web usage mining different from web structure mining and web content mining.	CO2	7 Marks
	b)	Discuss about spatial mining and its applications.	CO1	7 Marks

NETWORK SECURITY
[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define DOS attack. Explain various types of DOS attacks with suitable examples.	CO1	8 Marks
	b)	Discuss the benefits of good security practices.	CO1	6 Marks
		(OR)		
2.	a)	How to perform IP spoofing attack?	CO1	8 Marks
	b)	Differentiate passive and active attacks.	CO1	6 Marks

UNIT-II

3.	a)	With a neat sketch, explain the working, advantages and disadvantages of packet filtering firewall.	CO4	8 Marks
	b)	Describe the firewall rules for the router and firewall architecture.	CO4	6 Marks
		(OR)		
4.	a)	List and explain about the key components of a VPN.	CO6	7 Marks
	b)	Describe the user VPN configuration and issues.	CO6	7 Marks

UNIT-III

5.	a)	What are the requirements of random numbers? Discuss various pseudo random number generators.	CO3	6 Marks
	b)	Draw and explain the symmetric encryption model and its principles.	CO2	8 Marks
		(OR)		
6.	a)	Explain how to generate stream using RC4 algorithm.	CO2	10 Marks
	b)	List all the advantages of CTR mode.	CO3	4 Marks

UNIT-IV

7.	a)	How to provide message authentication using MAC and one way hash functions.	CO6	5 Marks
	b)	Discuss the generation of message digest using SHA 512 algorithm.	CO6	9 Marks
		(OR)		
8.	a)	Explain the public key cryptography principles.	CO2	8 Marks
	b)	Perform encryption and decryption using the RSA algorithm if $p = 7$, $q = 11$, $e = 17$ and $M = 8$.	CO2	6 Marks

UNIT-V

9.	a)	What is the role of honey pot in intrusion detection?	CO5	5 Marks
	b)	Discuss about the following malicious software's.	CO5	9 Marks
		(OR)		
10.	a)	Explain the phases and structure of virus.	CO5	8 Marks
	b)	List and explain the four generations of antivirus software's.	CO5	6 Marks

MOBILE APPLICATION DEVELOPMENT
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Explain the mobile web presence briefly.	CO1	7 Marks
	b)	Explain the reasons to create a mobile application.	CO1	7 Marks
		(OR)		
2.	a)	Explain the behavior of mobile user web browsing.	CO1	7 Marks
	b)	What is Android and explain its features.	CO1	7 Marks
		UNIT-II		
3.	a)	Sketch the life cycle of an Activity and discuss its events.	CO1	7 Marks
	b)	Develop an android program to illustrate the usage of all events of an activity.	CO3	7 Marks
		(OR)		
4.		Create an Android application to add action items to the action bar.	CO4	14 Marks
		UNIT-III		
5.	a)	Create an Android application to display the long list of items using List View.	CO4	7 Marks
	b)	List and explain the different views for displaying images.	CO1	7 Marks
		(OR)		
6.	a)	Develop an Android program to perform image transition using Image Switcher View.	CO3	9 Marks
	b)	Distinguish different ways to save and load of User Preferences.	CO2	5 Marks
		UNIT-IV		
7.	a)	Create an Android application to send SMS message using Intent class.	CO6	7 Marks
	b)	Develop an Android program to zoom in or zoom out of the Google Map.	CO3	7 Marks
		(OR)		
8.	a)	Discuss the procedure to prevent the standard messaging application from receiving a SMS message.	CO1	7 Marks
	b)	Create an Android application to send an e-mail.	CO6	7 Marks
		UNIT-V		
9.	a)	Discuss the tools required to develop the applications for an iOS.	CO5	7 Marks
	b)	Define Service and discuss the functionality a Service with a suitable example.	CO1	7 Marks
		(OR)		
10.	a)	Outline the anatomy of an iOS app.	CO1	7 Marks
	b)	Develop an Android program to start a counter from zero and stop the counter using Runnable, Thread and AsyncTask.	CO3	7 Marks

CODE No.: 16BT71204 SVEC-16

MOBILE COMPUTING

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss the applications and limitations of Mobile Computing.	CO1	7 Marks
	b)	Define Mobile Computing? List the features of Mobile Computing.	CO1	7 Marks
		(OR)		
2.	a)	Draw WCDMA protocol layered Architecture between MS and BTS.	CO5	7 Marks
	b)	Elaborate the features of Long Term Evolution (LTE).	CO5	7 Marks

UNIT-II

3.	a)	Compare explicit reservation and implicit reservation schemes with a timing diagram.	CO2	7 Marks
	b)	Assume all stations can hear all other stations. One station wants to transmit and senses the carrier idle. Why can a collision still occur after the start of transmission? Analyze and provide solution.	CO2	7 Marks
		(OR)		
4.	a)	Elaborate various protocols used to provide Bluetooth security.	CO4	7 Marks
	b)	Discuss the basic structure of an IEEE 802.11 MAC data frame together with the content of frame control field.	CO4	7 Marks

UNIT-III

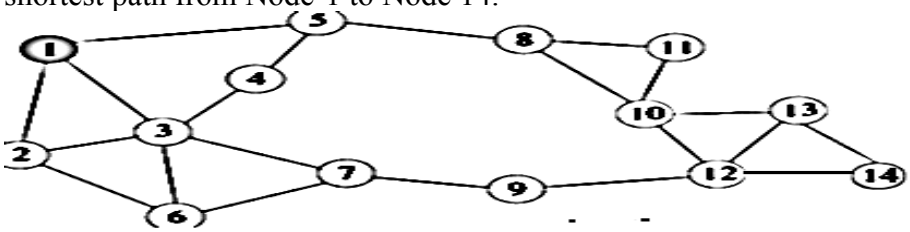
5.	a)	Explain the basic purpose of DHCP. Name the entities of DHCP. How can DHCP be used for mobility and support of mobile IP?	CO1	7 Marks
	b)	Discuss the advantages and disadvantages of three encapsulation methods in mobile IP.	CO1	7 Marks
		(OR)		
6.	a)	Explain the concept of Indirect TCP. How it is helpful for handover between different access points?	CO1	7 Marks
	b)	Explain mobile TCP and its advantages and disadvantages.	CO1	7 Marks

UNIT-IV

7.	a)	Compare database hoarding and data caching. Describe Database hoarding techniques.	CO2	7 Marks
	b)	Justify how web cache is maintained in mobile Environment.	CO2	7 Marks
		(OR)		
8.		Summarize on following Indexing techniques: i) (I, M) indexed method. ii) Distributed Index-based method.	CO1	14 Marks

UNIT-V

9.		Apply AODV Routing algorithm for the following network to find the shortest path from Node-1 to Node 14.	CO3	14 Marks



(OR)

10.		Sketch the WAP architecture. Explain its layers and components briefly.	CO1	14 Marks

CRYPTOGRAPHY AND NETWORK SECURITY

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Sketch the model for network security and discuss each of its components.	CO1	7 Marks
	b)	List and briefly define categories of passive and active security attacks.	CO1	7 Marks
		(OR)		
2.	a)	Decipher the message YITJP GWJOW FAQTQ XCSMA ETSQU SQAPU SQGKC PQTYJ using the Hill cipher with the inverse key $\begin{bmatrix} 5 & 1 \\ 2 & 7 \end{bmatrix}$. Show your calculations and result.	CO3	8 Marks
	b)	Distinguish between monoalphabetic cipher and polyalphabetic cipher.	CO2	6 Marks

UNIT-II

3.	a)	Discuss about strengths of DES.	CO2	5 Marks
	b)	Illustrate Diffie Hellman key Exchange in detail with an example.	CO3	9 Marks
		(OR)		
4.	a)	Describe the key management of public key encryption in detail.	CO3	7 Marks
	b)	Explain RSA Algorithm with the following: P=11, q=5, e=3 and PT=9.	CO4	7 Marks

UNIT-III

5.	a)	What is message authentication? List out various attacks that are to be identified while communication across a network. What are possible solutions to those attacks?	CO3	8 Marks
	b)	Discuss about Message Authentication methods.	CO3	6 Marks
		(OR)		
6.	a)	Describe how SHA-512 is used to generate Message Digest and how it is different from SHA-1?	CO4	8 Marks
	b)	Elaborate on Digital Signature standard and the approach used in it to provide security.	CO4	6 Marks

UNIT-IV

7.	a)	Describe the architecture of IPSec.	CO6	7 Marks
	b)	Discuss about PGP message generation and reception.	CO5	7 Marks
		(OR)		
8.	a)	Briefly explain Encapsulating IP Security Payload.	CO6	9 Marks
	b)	Differentiate between SSL and SET.	CO6	5 Marks

UNIT-V

9.	a)	What is an audit record? What is the use of audit record in intrusion detection?	CO6	8 Marks
	b)	Explain about counter measures to be considered for DDoS attacks.	CO4, CO6	6 Marks
		(OR)		
10.	a)	Write a short note on: i) Viruses. ii) Firewalls.	CO5	7 Marks
	b)	Discuss about spear phishing and phishing countermeasures.	CO5	7 Marks

DATA SCIENCE

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Discuss unstructured data and explain its challenges.	6 Marks	L2	CO1	PO2
	b)	Explain the need of data reduction.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Explain the principles associated with open data.	6 Marks	L2	CO1	PO1
	b)	Discuss the role descriptive analysis in data science.	6 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Explain user retention with an appropriate example.	6 Marks	L3	CO2	PO2
	b)	Compare filters and wrappers.	6 Marks	L4	CO2	PO4
		(OR)				
4.	a)	Explain entropy with an example.	6 Marks	L3	CO2	PO2
	b)	Illustrate decision tree with areal-time example.	6 Marks	L4	CO2	PO6
		UNIT-III				
5.	a)	Draw a simple line plot using matplotlib API Primer.	6 Marks	L3	CO3	PO5
	b)	Design a pair plot matrix of statsmodels.	6 Marks	L3	CO3	PO5
		(OR)				
6.	a)	Design a simple Simple Series plot with pandas.	6 Marks	L3	CO3	PO5
	b)	Plot a histogram using pandas/ seaborn with an appropriate example.	6 Marks	L3	CO3	PO5
		UNIT-IV				
7.	a)	Explain how the goals depend on the reporting results.	6 Marks	L2	CO4	PO3
	b)	Discuss how the PMFs can be limited with an example.	6 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Explain histogram by designing it for pound part of birth weight.	6 Marks	L4	CO4	PO6
	b)	Illustrate how percentiles are used to tackle the cumulative distribution function.	6 Marks	L4	CO4	PO4
		UNIT-V				
9.	a)	Illustrate Serial Correlation with an example.	6 Marks	L3	CO5	PO2
	b)	Explain the steps involved in building a model for sentiment analysis for micro-blogging websites.	6 Marks	L2	CO5	PO6
		(OR)				
10.	a)	Discuss the three sources of error should be taken into account for prediction accuracy.	6 Marks	L2	CO5	PO2
	b)	Illustrate the Model factory architecture used for Building Big Data Predictive Model Solutions.	6 Marks	L4	CO5	PO3

CODE No.: 19BM60503 SVEC-19

MACHINE LEARNING

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss Concept learning as search with respect to General to specific ordering of hypothesis.	6 Marks	L2	CO1	PO1
	b)	Illustrate Find S Algorithm over EnjoySport concept. Training instances given below.	6 Marks	L4	CO5	PO4

Example	Sky	AirTemp	Humidity	Wind	Water	Forecast	EnjoySport
1	Sunny	Warm	Normal	Strong	Warm	Same	Yes
2	Sunny	Warm	High	Strong	Warm	Same	Yes
3	Rainy	Cold	High	Strong	Warm	Change	No
4	Sunny	Warm	High	Strong	Cool	Change	Yes

(OR)

2.	a)	Apply candidate elimination algorithm to obtain the final version space.	6 Marks	L4	CO5	PO4

Origin	Manufacturer	Color	Decade	Type	Example Type
Japan	Honda	Blue	1980	Economy	Positive
Japan	Toyota	Green	1970	Sports	Negative
Japan	Toyota	Blue	1990	Economy	Positive
USA	Chrysler	Red	1980	Economy	Negative
Japan	Honda	White	1980	Economy	Positive

	b)	Explain Version Space and Representation of version Space with an example.	6 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Describe the following with examples: i) Decision Tree. ii) Decision Tree Learning. iii) Decision Tree Representation.	6 Marks	L2	CO2	PO1
	b)	Explain about SVMs for classification.	6 Marks	L2	CO2	PO2

(OR)

4.	a)	Discuss Inductive Bias in Decision Tree Learning.	6 Marks	L2	CO2	PO1
	b)	Explain about Support Vector Machines.	6 Marks	L2	CO2	PO1

UNIT-III

5.	a)	Explain how to learn Multilayer Networks using Back propagation Algorithm.	6 Marks	L2	CO4	PO1
	b)	Briefly explain about Convergence and Local Minima of MLP.	6 Marks	L2	CO4	PO1

(OR)

6.	a)	Explain about, Hypothesis space search and inductive bias.	6 Marks	L2	CO2	PO1
	b)	Demonstrate under what conditions the perceptron rule fails and it becomes necessary to apply the delta rule.	6 Marks	L2	CO5	PO4

UNIT-IV

7.	a)	Explain the concept of EM algorithm. Discuss what are Gaussian Mixtures.	6 Marks	L2	CO2	PO1
	b)	Explain Bayesian belief network with example.	6 Marks	L2	CO2	PO1

(OR)

8.	a)	Discuss Maximum Likelihood and Least Square Error Hypothesis.	6 Marks	L2	CO2	PO1
	b)	Discuss Learning to Classify Text with example.	6 Marks	L2	CO2	PO2

UNIT-V

9.	a)	Discuss the learning tasks and Q learning in the context of reinforcement learning.	6 Marks	L2	CO2	PO1
	b)	Explain K-Nearest Neighbor Learning.	6 Marks	L2	CO2	PO1

(OR)

10.	a)	Write the algorithm for the K-Nearest Neighbor for approximating a discrete-valued function.	6 Marks	L2	CO3	PO3
	b)	Write the algorithm for Q learning with example.	6 Marks	L2	CO3	PO3

PRINCIPLES OF BUSINESS ECONOMICS AND ACCOUNTANCY

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Explain diagrammatically, the Law of Demand. Give its importance. Why is this law not applicable for Giffen goods?	12 Marks	L2	CO1	PO3
		(OR)				
2.		Discuss the usefulness of demand forecasting. Explain the various methods of demand forecasting.	12 Marks	L2	CO1	PO2

UNIT-II

3.	a)	Explain the Law of Variable Proportions. What are the causes of its application?	6 Marks	L2	CO2	PO1
	b)	Explain in detail the various cost concepts. Also explain the relationship between AC and MC.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Break-Even Analysis assumes that variable cost and revenue are linear and that fixed cost is fixed. Briefly explain it through the help of diagram.	6 Marks	L2	CO2	PO3
	b)	**From the following data, you are required to calculate:** i) P/V ratio. ii) Break-even sales with the help of P/V ratio. iii) Sales required to earn a profit of Rs. 4,50,000 Fixed Expenses = Rs. 90,000 Variable Cost per unit: Direct Material = Rs. 5 Direct Labour = Rs. 2 Direct Overheads = 100% of Direct Labour Selling Price per unit = Rs. 12.	6 Marks	L2	CO2	PO3

UNIT-III

5.		Explain the price output determination under monopoly both in short run and long run time periods.	12 Marks	L3	CO3	PO2
		(OR)				
6.		Explain the laws of return to scale. Explain the reasons of return to scale.	12 Marks	L3	CO3	PO3

UNIT-IV

7.		Describe the basic concepts and conventions of accounting. What is basic accounting equation?	12 Marks	L3	CO4	PO3
		(OR)				

8.	From the following ledger balances of M/s Aravind and Company as on 31-12-2013, prepare Trial Balance. All figures are given in Rupees. i) Capital 72000 ii) Creditors 17440 iii) Bills Payable 5054 iv) Sales 156364 v) Loan 24000 vi) Debtors 7770 vii) Salaries 8000 viii) Discount-Dr 2000 ix) postage 546 x) bad debts 574 xi) interest-Dr 2590 xii) insurance 834 xiii) Machinery 20000 xiv) Stock as on 01.01.13 = 19890 xv) purchases 124000 xvi) Wages 8600 xvii) buildings 47560 xviii) Furniture 32310 and xix) Vehicles 28600.	12 Marks	L3	CO4	PO1

UNIT-V

9.	**prepare Profit and Loss account from the following particulars for the year ended March 31, 2021:**	12 Marks	L4	CO5	PO2

Gross Profit	Rs. 4,50,000
Commission Received	Rs.40,000
Rent, tax, and Insurance	Rs.10,000
Export Duty	Rs.15,000
Rent Received	Rs.20,000
Discount Received	Rs.24,000
Audit Fees	Rs.5,000
Dividend Received	Rs.16,000
Depreciation	Rs.24,000
Administration Expenses	Rs.35,000
Selling Expenses	Rs.25,000
Printing and Stationery	Rs.15,000
Distribution Expenses	Rs.28,000
Office Expenses	Rs.32,000
Trade Expenses	Rs.50,000
General Expenses	Rs.25,000
Carriage outward	Rs.15,000

(OR)

10.	Explain the types of financial statements in financial accounts with illustrations.	12 Marks	L4	CO5	PO3

CODE No.: 19BT6HS02 SVEC-19

Roll No. | | | | | | | | | | |

ORGANIZATIONAL BEHAVIOUR

[Civil Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What is organizational behavior? Explain its nature and scope.	6 Marks	L2	CO1	PO1
	b)	Explain the features of organizational behavior.	6 Marks	L2	CO1	PO1
		(OR)				
2.		Describe the emerging issues and challenges of organizational behavior.	12 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Explain the role of brain and mind in individual behaviors.	6 Marks	L2	CO2	PO1
	b)	What are attitudes? Explain the functions of attitudes.	6 Marks	L2	CO2	PO1
		(OR)				
4.		Discuss various models of man with their implication on organizational behavior.	12 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Explain about inter personal perception in detail.	6 Marks	L2	CO3	PO9
	b)	What is a group? Explain the need for formation of groups.	6 Marks	L2	CO3	PO9
		(OR)				
6.		Discuss the different stages of group development.	12 Marks	L3	CO3	PO9
		UNIT-IV				
7.	a)	Discuss various sources of power of a leader.	6 Marks	L2	CO4	PO2
	b)	Explain the charismatic and transformational theories of leadership.	6 Marks	L3	CO4	PO2
		(OR)				
8.		Discuss different leadership styles.	12 Marks	L3	CO4	PO1
		UNIT-V				
9.	a)	What is organizational change? Explain the reasons for change.	6 Marks	L3	CO5	PO12
	b)	Explain the steps to be taken by the management to overcome the resistance to change.	6 Marks	L3	CO5	PO2
		(OR)				
10.		Explain the organizational development process.	12 Marks	L4	CO5	PO12

VLSI DESIGN

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Interpret the basic RTL and TTL circuit diagram with its truth table.	6 Marks	L1	CO1	PO2
	b)	Describe the circuit diagram of 3 input DTL NAND gate using transistors and explain its operation.	6 Marks	L1	CO1	PO1
		(OR)				
2.		Illustrate CMOS Steady state electrical behavior. i) Logic levels. ii) Noise margin. iii) Fanout. iv) Effect of loading and unused inputs.	12 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Paraphrase the transfer characteristics nMOS enhancement mode fabrication process for different conditions.	6 Marks	L2	CO2	PO2
	b)	Derive an expression for transconductance of an n-channel enhancement MOSFET operating in active region.	6 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Describe a step-by-step procedure for a typical Twin Tub CMOS process with neat diagrams.	6 Marks	L1	CO2	PO1
	b)	Analyze pull up to pull down ratio of NMOS driven to another NMOS inverter with necessary equations.	6 Marks	L4	CO2	PO2
		UNIT-III				
5.	a)	Draw a stick diagram and layout for two input CMOS NAND gate indicating all the regions and layers.	6 Marks	L1	CO3	PO1
	b)	Explain 2 μm Double Metal, Double Poly CMOS / BiCMOS Rules.	6 Marks	L1	CO3	PO1
		(OR)				
6.	a)	Define and explain the standard units of capacitance.	6 Marks	L1	CO3	PO1
	b)	Calculate the gate capacitance value of 5 mm technology minimum size transistor with gate to channel value is 4×10^{-4} pF/mm^2.	6 Marks	L1	CO3	PO1
		UNIT-IV				
7.	a)	Design 4 bit carry look ahead adder.	6 Marks	L2	CO4	PO2
	b)	Design Conditional Sum Adder for given inputs A=11010011 and B =10001011.	6 Marks	L2	CO4	PO3
		(OR)				
8.	a)	With neat circuit diagram, Analyze the operation of i) Manchester carry chain adder ii) Array Multiplier.	6 Marks	L2	CO4	PO2
	b)	With neat circuit diagram, analyze the operation of Array Multiplier.	6 Marks	L2	CO4	PO2

UNIT-V

9.	a)	Draw the architecture of CPLD and explain in detail.	6 Marks	L2	CO5	PO2
	b)	Design a 6 transistor SRAM cell in CMOS logic.	6 Marks	L2	CO5	PO3
		(OR)				
10.	a)	With the necessary diagrams explain operation of DRAM. Show its timing diagram.	6 Marks	L2	CO5	PO2
	b)	Design a 4-bit ripple counter and draw the timing diagram of that counter.	6 Marks	L2	CO5	PO3

CODE No.: 19BT50406 SVEC-19

FPGA ARCHITECTURES AND APPLICATIONS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Illustrate the Read-Only Memory with n Inputs and m Outputs.	6 Marks	L2	CO1	PO2
	b)	Design the following Boolean functions using PLA, $F_0 = \sum m(0,1,4,6)$, $F_1 = \sum m(2,3,4,6,7)$.	6 Marks	L6	CO1	PO3
		(OR)				
2.	a)	Design a Full Adder Using a PAL.	6 Marks	L6	CO1	PO3
	b)	Compare various Programmable Logic Devices.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Outline the concept of SRAM Programming Technology.	6 Marks	L2	CO2	PO2
	b)	With neat sketch, explain Look-Up Table–Based Programmable Logic Blocks.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Classify Interconnects in Symmetric Array FPGAs and explain in detail.	6 Marks	L2	CO2	PO1
	b)	Sketch the Programmable I/O Block for an FPGA and explain.	6 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	List out the Advantages and Disadvantages of SRAM Programming.	6 Marks	L2	CO3	PO1
	b)	Brief the Block-to-Interconnect Connections of XC2000.	6 Marks	L2	CO3	PO2
		(OR)				
6.	a)	Explain in detail about the Wiring Architecture of Xilinx XC3000.	6 Marks	L2	CO3	PO2
	b)	With neat sketch, interpret the XC4000 IO Block.	6 Marks	L3	CO3	PO2
		UNIT-IV				
7.	a)	Interpret the Principles of Programmable Routing.	6 Marks	L2	CO3	PO2
	b)	List out the characteristics of the programming element of FPGA architecture.	6 Marks	L2	CO3	PO1
		(OR)				
8.	a)	Explain Logic Module of Act-1 architecture.	6 Marks	L2	CO3	PO1
	b)	Brief the Sequential Module of Act-2 architecture.	6 Marks	L2	CO3	PO2
		UNIT-V				
9.	a)	Design a five bit binary counter with ACT devices.	6 Marks	L6	CO4	PO2
	b)	Write a short note on a position tracker for a robot manipulator.	6 Marks	L1	CO4	PO3
		(OR)				
10.	a)	Brief about a fast DMA Controller.	6 Marks	L2	CO4	PO1
	b)	Illustrate the design of fast video controller.	6 Marks	L6	CO4	PO2

CODE No.: 19BT50502 SVEC-19

III B.Tech II Semester (SVEC-19) Regular Examinations June – 2022

ARTIFICIAL INTELLIGENCE

[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		Define in your own words the following terms: agent, agent function, agent program, rationality, autonomy, task environment.	12 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Write brief notes of any three disciplines that contributed ideas, viewpoints, and techniques to AI.	6 Marks	L2	CO1	PO1
	b)	Discuss the risks and benefits AI can bring.	6 Marks	L2	CO1	PO6
		UNIT-II				
3.	a)	With the aid of an example, explain the working of greedy best-first search.	6 Marks	L2	CO2	PO2
	b)	Suppose two friends live in different cities on a map. On every turn, we can simultaneously move each friend to a neighboring city on the map. The amount of time needed to move from city **i** to neighbor **j** is equal to the road distance **d(i, j)** between the cities, but on each turn the friend that arrives first must wait until the other one arrives (and calls the first on his/her cell phone) before the next turn can begin. We want the two friends to meet as quickly as possible. Write a detailed formulation for this search problem.	6 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Trace the operation of **A*** search applied to the problem of getting to Bucharest from Lugoj using the straight-line distance heuristic. That is, show the sequence of nodes that the algorithm will consider and the f, g, and h score for each node.	6 Marks	L3	CO2	PO2
	b)	Explain why problem formulation must follow goal formulation.	6 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	Describe how to solve travelling salesperson problem using hill climbing technique.	6 Marks	L3	CO2	PO3
	b)	Explain local beam search. What are its limitations? Describe how to alleviate them using stochastic beam search.	6 Marks	L2	CO2	PO2
		(OR)				
6.	a)	Discuss how to extend the minimax idea to multiplayer games.	6 Marks	L2	CO2	PO2
	b)	Describe the role of Alpha-Beta pruning in reducing the number of game states.	6 Marks	L2	CO2	PO2
		UNIT-IV				
7.	a)	Describe the semantics of Bayesian networks.	6 Marks	L2	CO3	PO2
	b)	How to formulate the basic inference tasks of a generic temporal model? Explain.	6 Marks	L2	CO3	PO2
		(OR)				

8.		Explain the concept of Hidden Markov Model (HMM).	12 Marks	L2	CO3	PO1
		UNIT-V				
9.	a)	Describe the role of probabilistic filtering algorithms such as Kalman filters and particle filters for robot perception.	6 Marks	L2	CO4	PO1
	b)	Discuss any 3 application domains of robots.	6 Marks	L2	CO5	PO6
		(OR)				
10.		Analyze the potential threats from AI technology to society. What threats are most serious, and how might they be combated? How do they compare to the potential benefits?.	12 Marks	L4	CO5	PO6 PO8

CYBER SECURITY

[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain in keen the need for Cyberlaws in Indian context.	6 Marks	L1	CO1	PO1
	b)	List and analyze various classifications of cybercrime.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Explain in keen global perspective on cybercrimes.	6 Marks	L1	CO1	PO1
	b)	Discuss in detail about cybercrime and information security.	6 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Explain the process on how criminal plan the attacks with appropriate example.	6 Marks	L1	CO1	PO1
	b)	Explain in detail Cyber Stalking and its types.	6 Marks	L1	CO1	PO1
		(OR)				
4.	a)	List and explain various types of Identity Thefts.	6 Marks	L2	CO1	PO2
	b)	Explain various types of phishing techniques.	6 Marks	L1	CO1	PO2
		UNIT-III				
5.	a)	Illustrate with a neat sketch about proliferation of mobile and wireless devices.	6 Marks	L2	CO3	PO3
	b)	Brief on all possible attacks on mobile/cell phones.	6 Marks	L1	CO3	PO1
		(OR)				
6.	a)	Explain in ken on Registry settings for mobile devices.	6 Marks	L1	CO3	PO1
	b)	List and explain Security implications of mobile devices for organizations.	6 Marks	L2	CO3	PO2
		UNIT-IV				
7.	a)	List and explain various types of Keyloggers in cybercrime.	6 Marks	L1	CO2	PO1
	b)	Discuss in detail about SQL Injection and Buffer Overflow.	6 Marks	L1	CO2	PO2
		(OR)				
8.	a)	List and explain various tools that are used to find the common vulnerabilities in a cybercrime.	6 Marks	L2	CO2	PO5
	b)	Explain in detail about attacks on wireless networks.	6 Marks	L1	CO2	PO1
		UNIT-V				
9.	a)	Explain in keen on smart phone forensics and device seizure.	6 Marks	L1	CO4	PO6
	b)	Discuss in detail about Digital Forensics Lifecycle.	6 Marks	L1	CO4	PO6
		(OR)				
10.	a)	Explain in your own way on the case study of Charity scams.	6 Marks	L3	CO5	PO8
	b)	Illustrate the concept of how official website of Maharashtra government was hacked.	6 Marks	L3	CO5	PO6

PLC AND SCADA

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the main function of each of the following major components of a PLC: i) Processor module (CPU) ii) I/O modules iii) Programming device	6 Marks	L3	CO1	PO1
	b)	Compare Ladder logic diagram and relay logic diagram with examples.	6 Marks	L3	CO1	PO1
		(OR)				
2.	a)	List the advantages, disadvantages and applications of PLC.	6 Marks	L3	CO1	PO1
	b)	Outline the operational procedures used in PLC.	6 Marks	L3	CO1	PO1
		UNIT-II				
3.		A temperature control system consists of four thermostats controlling three heating units. The thermostat contacts are set to close at 50°, 60°, 70°, and 80°F, respectively. The PLC ladder logic program is to be designed so that at a temperature below 50°F, three heaters are to be ON. From 50° to 60°F, two heaters are to be ON. For 60° to 70°F, one heater is to be ON. Above 80°F, there is a safety shutoff for all three heaters in case one stays on because of a malfunction. A master switch is to be used to turn the system ON and OFF. Prepare a typical PLC program for this control process.	12 Marks	L3	CO2	PO3
		(OR)				
4.	a)	Implement the following logic gates using PLC ladder program. i) NAND. ii) Ex-OR. iii) Ex-NOR. iv) AND. v) NOR. vi) OR.	6 Marks	L3	CO2	PO3
	b)	Design a PLC program and prepare a typical I/O connection diagram and ladder logic program for the following counter specifications. i) Counts the number of times a push button is closed. ii) Decrements the accumulated value of the counter each time a second push button is closed.	6 Marks	L3	CO2	PO3
		UNIT-III				
5.	a)	Illustrate the operation of Master control relay in PLC with an example.	6 Marks	L2	CO1	PO1
	b)	Apply not –equal- to COMPARE function, the output is to be on except when an input count is exactly 90.	6 Marks	L3	CO2	PO3
		(OR)				

6.	a)	Outline the following instructions of PLC in detail. i) SKIP. ii) Matrix functions. iii) Jump functions.	6 Marks	L3	CO1	PO1
	b)	Explain how three axis robot control is performed using PLC.	6 Marks	L3	CO1	PO1

UNIT-IV

7.		An RTU can gather data in the form of a discrete switch position. This is used for alarm and status monitoring. What three other forms of field data can be an RTU gather? Describe in detail.	12 Marks	L3	CO3	PO3

(OR)

8.	a)	Explain the SCADA system architecture in detail.	6 Marks	L2	CO3	PO3
	b)	Describe about Master terminal units of SCADA system.	6 Marks	L2	CO3	PO3

UNIT-V

9.		Explain about configuration of I/O server and any two HMI applications.	12 Marks	L3	CO3	PO3

(OR)

10.		Design of water treatment plant SCADA system using system graphic displays.	12 Marks	L3	CO3	PO3

SOFTWARE TESTING

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe the evolution of software testing.	6 Marks	L1	CO1	PO1
	b)	Compare and contrast static and dynamic testing.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Discuss the myths and facts of testing.	6 Marks	L4	CO1	PO2
	b)	Explain software testing life cycle.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Explain the different testing techniques.	6 Marks	L2	CO2	PO1
	b)	Write about basis path testing.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Compare state table based testing and decision based testing.	6 Marks	L2	CO2	PO1
	b)	Discuss about graph matrices.	6 Marks	L4	CO2	PO2
		UNIT-III				
5.	a)	Write the steps to prepare test policy.	6 Marks	L2	CO3	PO2
	b)	List the standards for building test data.	6 Marks	L1	CO3	PO1
		(OR)				
6.	a)	Write the template for test plan.	6 Marks	L2	CO3	PO2
	b)	How to monitor the test process.	6 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Justify “Regression Testing Produces Quality Software”.	6 Marks	L4	CO4	PO1
	b)	Write about Progressive testing.	6 Marks	L2	CO4	PO2
		(OR)				
8.	a)	What are the techniques of regression testing?	6 Marks	L3	CO4	PO1
	b)	Discuss the classification of software metrics.	6 Marks	L2	CO4	PO2
		UNIT-V				
9.	a)	Explain the structure of testing group.	6 Marks	L3	CO5	PO2
	b)	Highlight the need for automation.	6 Marks	L2	CO5	PO1
		(OR)				
10.	a)	List out the different test specifications.	6 Marks	L2	CO6	PO1
	b)	Case study on Income Tax Calculator.	6 Marks	L4	CO6	PO2

STEEL STRUCTURES

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

	UNIT-I				
1.	Design a web-angle connection for a beam MB350 @ 52.4 kg/m which transfers a factored end shear of 200 kN to the flange of the column HB300 @ 63 kg/m. Use M20 bolts of product grade C and property class 5.6.	12 Marks	L6	CO1	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
	(OR)				
2.	A beam HB 300 transfers an end factored shear of 300 kN and a factored end moment of 120 kNm to the flange of a HB 400 column. Design the welded connection.	12 Marks	L6	CO1	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
	UNIT-II				
3.	A roof of a hall measuring 8m x 12m consists of 100mm thick R.C slab supported on steel I-beam spaced 3m apart. The finishing load may be taken as 1.5 kN/m² and live load as 1.5 kN/m². Design the steel beam.	12 Marks	L6	CO2	PO1 PO2 PO3 PO4 PO5 PO6 PO8
	(OR)				
4.	Design a beam of 5m effective span, carrying a uniform load of 20kN/m, if the compression flange is laterally unsupported. Assume f_y = 250 MPa.	12 Marks	L6	CO2	PO1 PO2 PO3 PO4 PO5 PO6 PO8
	UNIT-III				
5.	Design a single angle section for a tension member of a roof truss to carry a factored tensile force of 225kN. The member is subjected to the possible reversal of stress due to the action of wind. The effective length of the member is 3m. Use 20mm shop bolts of grade 4.6 for the connection.	12 Marks	L6	CO3	PO1 PO2 PO6 PO8 PO10

(OR)

6.	Design a single angle strut connected to the gusset plate to carry 180 kN factored load. The length of the strut between centre to centre connection is 3m.	12 Marks	L6	CO3	PO1 PO2 PO6 PO8 PO10

UNIT-IV

7.	Design a laced column with two channels back to back of length 8m to carry an axial factored load of 1200 kN. The column may be assumed to have restrained in position but not in direction at both ends (hinged ends).	12 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10

(OR)

8.	A steel column ISHB 250 @ 537 N/m supports a total factored load of 1000 kN. Design a slab base for the column. The column is supported on a pedestal made of M20 concrete.	12 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10

UNIT-V

9.	Explain the following terms in accordance to IS: 875 (Part III) i) Basic wind speed ii) Design wind speed iii) Wind pressure iv) Risk coefficient v) Terrain, Height and Structure size factor vi) Wind load.	12 Marks	L2	CO5	PO1 PO8

(OR)

10.	A roof truss shed is to be built in Lucknow for an industry. The size of shed is 24m x 40m. The height of building is 12m at the eves. Determine the basic wind pressure.	12 Marks	L4	CO5	PO1 PO2 PO4 PO6 PO8

AIR AND NOISE POLLUTION AND CONTROL

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Define air pollution. Explain primary and secondary air pollutants.	6 Marks	L2	CO1	PO1 PO10
	b)	Classify the impacts of noise pollution on humans.	6 Marks	L2	CO1	PO1 PO2 PO4 PO5 PO6 PO7 PO10
		(OR)				
2.	a)	With a neat sketch, explain the Plume behavior for the different atmospheric conditions.	6 Marks	L2	CO1	PO1 PO4 PO6 PO7 PO10
	b)	Briefly explain the control aspects of noise pollutants.	6 Marks	L2	CO1	PO1,PO2 PO4,PO5 PO6 PO7 PO10
		UNIT-II				
3.		Discuss in detail about the effects of air pollution on human health and plants.	12 Marks	L2	CO2	PO1 PO2 PO6 PO7 PO10
		(OR)				
4.	a)	Differentiate between green house effect and acid rain. Explain in detail about them with a neat sketch.	6 Marks	L4	CO2	PO1 PO2 PO6 PO7 PO10
	b)	What is power and intensity in noise pollution? Also write the significance of noise pollution.	6 Marks	L4	CO2	PO1 PO2 PO6 PO7 PO10
		UNIT-III				
5.		What is meant by air sampling? Classify the various sampling methods and explain any two briefly.	12 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO6 PO7 PO8 PO10
		(OR)				
6.	a)	List the various stack sampling techniques and explain briefly.	6 Marks	L2	CO3	PO1 PO4 PO5 PO7 PO10
	b)	Explain in detail the outdoor noise propagation and indoor noise propagation in relation with noise pollution and control.	6 Marks	L4	CO3	PO1 PO4 PO5 PO7 PO10
		UNIT-IV				
7.	a)	Explain the working principle of settling chamber to control particulate air pollutants.	6 Marks	L2	CO4	PO1 PO2 PO4 PO5 PO6 PO7 PO10
	b)	Briefly discuss the use of catalytic converters in vehicular pollution control.	6 Marks	L4	CO4	PO1 PO2 PO4 PO5 PO6 PO7 PO10

(OR)

8.	a)	With the neat sketch explain the working principle of Cyclone separator.	6 Marks	L2	CO4	PO1 PO2 PO4 PO5 PO6 PO7 PO10
	b)	Explain the principle, design and working of catalytic converters?	6 Marks	L4	CO4	PO1 PO2 PO4 PO5 PO6 PO7 PO10

UNIT-V

9.	a)	Discuss the impact of mining activities on air quality in nearby environment. How to overcome the impacts?	6 Marks	L4	CO5	PO1 PO2 PO4 PO6
	b)	Explain the sources and different methods to control the noise pollution.	6 Marks	L2	CO5	PO1 PO2 PO4 PO6
		(OR)				
10.	a)	What is the noise standard for different zones during day time and night time?	6 Marks	L2	CO5	PO1 PO2 PO4 PO6
	b)	Write a note on subsidence inversion and double inversion in relation to atmospheric stability.	6 Marks	L2	CO5	PO1 PO2 PO4 PO6

CODE No.: 19BT60106 SVEC-19

Roll No. | | | | | | | | | | |

GROUND IMPROVEMENT TECHNIQUES

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the conditions that necessitate ground improvement.	6 Marks	L2	CO1	PO1
	b)	What other design or construction alternatives would be considered besides soil improvement such as compaction in order to overcome a difficult foundation problem? Explain in detail.	6 Marks	L2	CO1	PO1 PO5 PO7
		(OR)				
2.	a)	Explain the need and suitability of the ground improvement technique for different types of soils.	6 Marks	L2	CO1	PO1
	b)	Explain the role of ground improvement in foundation engineering.	6 Marks	L2	CO1	PO1 PO7

UNIT-II

3.	a)	What is dewatering? List out various methods. Explain its importance in Civil engineering works.	6 Marks	L2	CO2	**PO1 PO5 PO6 PO7 PO8 PO10**
	b)	What are the uses of drainage of soils?	6 Marks	L2	CO2	PO1 PO5
		(OR)				
4.	a)	Explain the working of a single-stage well point system with neat sketch. What are its limitations?	6 Marks	L2	CO2	PO1 PO5
	b)	Elaborate the criterion for the selection of filling material.	6 Marks	L4	CO2	**PO1 PO5 PO10**

UNIT-III

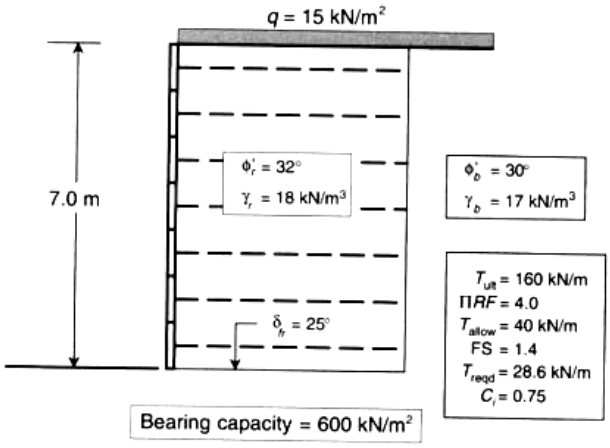
5.	a)	Describe the deep dynamic compaction in granular soil with the factors influencing.	6 Marks	L2	CO3	PO1 PO5 PO10
	b)	Explain the terms Vibro-Compaction and Vibro-Replacement, highlighting the typical characteristics and the relative effectiveness of both the terms.	6 Marks	L4	CO3	PO1 PO5 PO10
		(OR)				
6.	a)	Explain the blasting technique with a neat sketch to densify cohesionless soil beds.	6 Marks	L2	CO3	PO1 PO2 PO5 PO6 PO7 PO8 PO10
	b)	Evaluate the technique of vibro-floatation.	6 Marks	L4	CO3	PO1 PO5 PO10

UNIT-IV

7.	a)	What is soil stabilization? And what are the different methods of soil stabilization? Explain.	6 Marks	L2	CO4	PO1 PO2 PO5 PO7
	b)	List out four physical characteristics of grouting liquid relevant to engineering applications.	6 Marks	L4	CO4	PO1 PO5
		(OR)				
8.	a)	Discuss the effectiveness of lime stabilization with respect to different type of soils.	6 Marks	L2	CO4	PO1 PO2 PO5 PO7
	b)	Differentiate between the compaction grouting and displacement grouting.	6 Marks	L4	CO4	PO1 PO5

UNIT-V

9.	a)	What are Geogrids as compared to Geotextiles? What are the advantages of Geogrids over Geotextiles?	6 Marks	L2	CO5	PO1 PO5
	b)	Design a 7-meter-high geogrid-reinforced wall where the reinforcement must be at 1,0 meter spacing, since the wall facing is of the articulated precast concrete type of this same dimension. The coverage ratio is 0.8. The length to height ratio of on the reinforced wall not less than 0.7. Additional details of the problem, including soil and geogrid data are shown in the diagram below.	6 Marks	L6	CO5	PO2 PO3 PO4 PO5 PO6 PO7 PO8 PO10



(OR)

10.	a)	Explain the with neat sketches the various functions of geotextiles.	6 Marks	L2	CO5	PO1 PO2 PO5 PO7 PO8
	b)	Identify various failure modes of geosynthetic-reinforced soil retaining walls? Explain them briefly.	6 Marks	L6	CO5	PO1 PO5

III B.Tech II Semester (SVEC-19) Regular Examinations June – 2022

ADVANCED REINFORCED CEMENT CONCRETE STRUCTURES

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	Two columns C_1 and C_2 are the boundary columns of a building of size 6m 16m in city area. Size of the columns is 230mm x 500mm spaced at 6m out to out (i.e., 5.77 m c/c). Column C_1 and C_2 carry 500 kN and 600 kN characteristic loads respectively. Design a strap footing for columns C_1 and C_2. A.B.P. on soil is 200 kN/m². The materials are M 20 grade concrete and HYSD reinforcement of grade Fe 415.	12 Marks	L6	CO1	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
	(OR)				
2.	An R.C.C. column of a multi-storeyed building transfers following service loads on the pile cap of a pile foundation. Propose the arrangement of piles and determine the loads in the piles. The service loads are: P= 1600 kN M = 400 kNm about major axis Column size = 400mm x 600mm.	12 Marks	L5	CO1	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10

UNIT-II

3.	A flat slab is supported on 600 mm dia circular columns spaced 8 m x 6 m apart in both directions. The column head has a diameter of 120 cm. The live load on the flat slab is 5 kN/m² Determine the moments in the flat slab along its 8m span.	12 Marks	L5	CO2	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
	(OR)				
4.	Design the exterior panel of a flat slab floor system for a warehouse 18 m x 18 m divided into panels of 6 m x 6 m by columns. Adopt a live load of 5 kN/m² with columns of size 400 mm diameters. Height of floor = 3 m. Adopt M20 grade concrete and Fe415 HYSD bars. The design should confirm to the specifications of IS: 456-2000 code.	12 Marks	L6	CO2	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10

UNIT-III

5.	Design a cantilever retaining wall to support a bank of earth 5 m high above the earth level at the toe of the wall. A building is to be built on the backfill. Assume that a 3m surcharge will approximate the lateral earth pressure effect. Given: earth density = 17 kN/m³, angle of internal friction (repose) = 35° coefficient of friction between concrete and soil 0.45; bearing capacity = 150 kN/m². Use M15 mix and Fe 415 grade steel.	12 Marks	L6	CO3	PO1 PO2 PO3 PO4 PO5 PO6 PO8
	(OR)				
6.	A counterfort retaining wall has a height of retaining earth of 6 m. The top surface is horizontal behind the wall. The soil behind the wall is a well drained medium dense sand with following properties: Unit weight 16.2 kN/m³ Angle of internal friction = 30°. The material under the wall base is the same as above with allowable bearing pressure of 150 kN/m². The coefficient of friction between the base and the soil is 0.6 Design the wall using M 20 grade concrete and HYSD reinforcement of grade Fe 415.	12 Marks	L6	CO3	PO1 PO2 PO3 PO4 PO5 PO6 PO8

UNIT-IV

7.	A rectangular R.C. water tank with an open top is required to store 250,000 litres of water. The inside dimensions of tank may be taken as 16 m x 18 m. The tank rests on walls on all the four sides. Design the side walls of the tank using M20 concrete and Grade-I steel.	12 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10
	(OR)				
8.	Design a circular tank with a flexible base for capacity of 400,000 litres. The depth of water is to be 4 m. Free board = 200 mm. Use M-25 grade concrete and Grade-I mild steel. Permissible direct tensile stress in concrete = 1.4 N/mm². Permissible stress in steel in direct tension = 120 N/mm². Sketch the details of reinforcement in tank walls.	12 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO5 PO6 PO8 PO10

UNIT-V

9.	A concrete chimney of height 80 m with the external diameter of the shaft being 3.6 m at top and 5 m at bottom is required in a place where the wind intensity is 1.5 kN/m².thickness of fire brick lining = 12 cm. temperature difference between inside and outside shaft is 85 degree Celsius. Permissible bearing pressure on soil at the site = 165 kN/m². By adopting M15 grade concrete and Fe415 steel, design the base section of chimney.	12 Marks	L6	CO5	PO2 PO3 PO4 PO5 PO6 PO8 PO10
	(OR)				
10.	Explain the design steps for silos as codal guidelines.	12 Marks	L2	CO5	PO1 PO4 PO5 PO6 PO8

REHABILITATION AND RETROFITTING OF STRUCTURES

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	List out the facets of maintenance.	6 Marks	L1	CO1	PO1 PO2
	b)	Describe about the inspection to be carried out during and after the construction of structure.	6 Marks	L2	CO1	PO1 PO2 PO5
		(OR)				
2.	a)	Identify the various steps involved in the systematic approach of investigations and the factors to be ascertained.	6 Marks	L3	CO1	PO1 PO6 PO7
	b)	As a site engineer examine what are the factors you would check during the day of concreting to assure quality in construction.	6 Marks	L4	CO1	PO1 PO5
		UNIT-II				
3.	a)	Tabulate the cover to be provided for various exposure conditions to concrete as per IS codes.	6 Marks	L1	CO2	PO1 PO2
	b)	Define durability and name two tests to assess durability of concrete.	6 Marks	L5	CO2	PO1 PO6 PO7
		(OR)				
4.	a)	How does the properties of fine aggregate, coarse aggregate and cement affect the relationship of water demand on slump, and the water-cement ratio and compressive strength?	6 Marks	L1	CO2	PO1 PO6 PO8
	b)	Elaborately explain about the effect of temperature on concrete.	6 Marks	L4	CO2	PO1 PO6 PO8 PO10
		UNIT-III				
5.	a)	What is mean by Geopolymer concrete? List the materials used for making geopolymer concrete.	6 Marks	L2	CO3	PO1 PO4 PO6 PO8
	b)	What are the applications of special concretes?	6 Marks	L4	CO3	PO1 PO5 PO7
		(OR)				
6.	a)	Explain the following: i) High strength concrete. ii) Vacuum concrete.	6 Marks	L2	CO3	PO1 PO2 PO4
	b)	Describe in detail about the reactive powder concrete.	6 Marks	L2	CO3	PO1 PO4 PO6

UNIT-IV

7.	a)	What is the fundamental principle behind rebound hammer test?	6 Marks	L1	CO4	PO1 PO6 PO7 PO8
	b)	Write note on jacketing.	6 Marks	L6	CO4	PO4 PO5 PO6
		(OR)				
8.	a)	Explain in detail the types of corrosion protection methods.	6 Marks	L4	CO4	PO1 PO5 PO7
	b)	Summarize the process of epoxy injection. Also explain routing and sealing with sketches.	6 Marks	L6	CO4	PO6 PO7 PO12

UNIT-V

9.	a)	List out types of demolition techniques.	6 Marks	L1	CO5	PO7 PO8 PO12
	b)	What are the effects of fire on concrete?	6 Marks	L2	CO5	PO1 PO2 PO4
		(OR)				
10.	a)	Demonstrate crack repair by routing and sealing with neat sketch.	6 Marks	L4	CO5	PO1 PO2 PO5
	b)	Differentiate between dormant cracks and active cracks.	6 Marks	L4	CO5	PO1 PO4 PO5

SOLID AND HAZARDOUS WASTE MANAGEMENT

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss the legislation for disposal of municipal solid waste.	6 Marks	L1	CO1	PO1 PO6 PO8 PO12
	b)	Classify the solid waste based on its characteristics and explain them in brief.	6 Marks	L1	CO1	PO1 PO2
		(OR)				
2.	a)	List and brief the properties of municipal solid waste. How are these properties important in the management of municipal solid waste?	6 Marks	L1	CO1	PO1 PO4 PO5 PO12
	b)	What do you understand about the sources of municipal solid waste?	6 Marks	L1	CO1	PO1 PO2

UNIT-II

3.	a)	List and discuss about the various factors influencing equipment selection for on-site processing of solid waste.	6 Marks	L1	CO2	PO1 PO2 PO5 PO6
	b)	Enumerate the guiding principles of municipal solid waste in India.	6 Marks	L3	CO2	PO1 PO6 PO8
		(OR)				
4.	a)	Explain Various storage and processing Options under Indian conditions.	6 Marks	L2	CO2	PO1 PO2 PO6
	b)	Explain various Public health and economic aspects of storage.	6 Marks	L2	CO2	PO1 PO8

UNIT-III

5.	a)	Describe various types of vehicles used for transport of municipal solid waste.	6 Marks	L3	CO3	PO1
	b)	List the important aspects to be considered in selecting the crew size and route for efficient collection of solid waste in your city.	6 Marks	L2	CO3	PO1 PO2 PO4 PO6 PO7 PO11

(OR)

6.	a)	Explain various methods of solid waste collection.	6 Marks	L2	CO3	PO1
	b)	Mention various Guidelines for selection of Transfer stations.	6 Marks	L2	CO3	PO1 PO2 PO11
		UNIT-IV				
7.	a)	Analyze various off-site processing techniques for solid wastes which are well suited under Indian conditions.	6 Marks	L4	CO4	PO1 PO2 PO4 PO5 PO6 PO7
	b)	List and discuss the factors to be considered while selecting a site for sanitary land fill.	6 Marks	L3	CO5	PO1 PO2 PO4 PO6 PO7
		(OR)				
8.	a)	Distinguish between incineration and pyrolysis. As a solid waste management expert, which method do you prefer for organic wastes?	6 Marks	L2	CO4	PO1 PO2 PO7
	b)	Emphasize leachate and its control in a landfill of municipal solid waste.	6 Marks	L4	CO5	PO1 PO7
		UNIT-V				
9.	a)	Relate the improper disposal of e-waste on human health and environment.	6 Marks	L2	CO6	PO1 PO2 PO5 PO7
	b)	Discuss the environmental legislations to be followed in disposal of hazardous waste.	6 Marks	L2	CO6	PO1 PO6 PO7 PO8
		(OR)				
10.	a)	List five Hazardous Waste Treatment Operations and Processes.	6 Marks	L2	CO6	PO1 PO7
	b)	Emphasize types of biomedical waste, hazards associated with biomedical waste and their disposal methods.	6 Marks	L3	CO6	PO1 PO6

HIGHWAY CONSTRUCTION AND MAINTENANCE

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Discuss about WBM road construction as per IRC.	6 Marks	L2	CO1	PO1 PO5 PO8
	b)	Discuss about cement concrete pavement construction.	6 Marks	L2	CO1	PO1 PO5 PO8
		(OR)				
2.		Classify the different types of joints in cc pavements. Discuss briefly with neat sketches.	12 Marks	L4	CO1	PO1 PO2 PO10
		UNIT-II				
3.		Compare and contrast different types of soil stabilization techniques suitable for road construction.	12 Marks	L4	CO2	PO1 PO2 PO5 PO8
		(OR)				
4.	a)	Write a short note on latest developments in stabilization methods.	6 Marks	L3	CO2	PO1 PO12
	b)	Explain how optimum content of lime is chosen in lime soil stabilization.	6 Marks	L3	CO2	PO1 PO2 PO5 PO8
		UNIT-III				
5.	a)	Explain which type of road construction method is suitable for water logged areas and why.	6 Marks	L3	CO3	PO1 PO5
	b)	Explain the Importance of highway drainage	6 Marks	L3	CO3	PO1 PO5
		(OR)				
6.		The maximum quantity of water expected in one of the open longitudinal drains on clayey soil is 1.3 m^3 /sec. Design the cross section and longitudinal slope of trapezoidal drain assuming the bottom width of the trapezoidal section to be 0.75 m and cross slope to be 1.0 vertical to 1.5 horizontal. The allowable velocity of flow in the drain is 0.88 m/sec and Manning's roughness coefficient is 0.02.	12 Marks	L6	CO3	PO1 PO2 PO3 PO4
		UNIT-IV				
7.	a)	Write in detail about compacting equipment for bituminous mixes.	6 Marks	L3	CO4	PO1 PO5
	b)	Discuss about hot mix plants for production of bituminous mixes	6 Marks	L2	CO4	PO1 PO5

(OR)

8.	a)	Discuss about piles and pile driving equipments in detail.	6 Marks	L2	CO4	PO1 PO5
	b)	Discuss about Air compressors and pumps used in construction.	6 Marks	L2	CO4	PO1 PO5

UNIT-V

9.	a)	Enlist the various flexible pavement failures.	6 Marks	L1	CO5	PO1 PO6
	b)	Classify pavements overlays.	6 Marks	L2	CO5	PO1 PO6

(OR)

10.		Define pavement evaluation and explain different pavement evaluation techniques.	12 Marks	L3	CO5	PO1 PO6

CODE No.: 19BT60118 SVEC-19

III B.Tech II Semester (SVEC-19) Regular Examinations June – 2022

INDUSTRIAL WASTEWATER TREATMENT

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain in detail about Industrial sources of wastewater and characteristics.	6 Marks	L1	CO1	PO1 PO2 PO6
	b)	What are the differences between Industrial and municipal waste water?	6 Marks	L3	CO1	PO1 PO7
		(OR)				
2.	a)	What is meant by self-purification of a stream?	6 Marks	L4	CO1	PO1 PO2 PO6 PO7
	b)	Explain the sources of wastewater and characteristics.	6 Marks	L3	CO1	PO1 PO2 PO8 PO10

UNIT-II

3.	a)	Distinguish between preliminary and primary treatments operations. Illustrate with a flow diagram.	6 Marks	L2	CO2	PO7 PO8 PO10
	b)	Sketch and describe the construction and working of grit chambers.	6 Marks	L3	CO2	PO1 PO2 PO3 PO4
		(OR)				
4.	a)	Explain in detail about Microbiological metabolism.	6 Marks	L4	CO2	PO5 PO7 PO10
	b)	Design a complete mixed activated sludge process aeration tank for treatment of 7 MLD sewage having BOD concentration of 380 mg/L. The treated sewage should have BOD less than or equal to 25 mg/L. Consider the following data for design of aeration tank: MLSS in the aeration tank = 4000 mg/l. Return sludge SS concentration = 10000 mg/l. Mean cell residence time adopted in design is 10 days, Yield coefficient = 0.65, and Decay coefficient = 0.23 d^{-1}. Assume that the BOD removed is 35% in the primary treatment.	6 Marks	L6	CO2	PO1 PO2 PO3

UNIT-III

5.	a)	Differentiate the Nitrification and Denitrification.	6 Marks	L4	CO3	PO1 PO2 PO4

	b)	Discuss the problems arising when industrial waste waters are discharged into rivers.	6 Marks	L2	CO3	PO5 PO6 PO7 PO10
		(OR)				
6.	a)	Explain in detail about different types of toxic chemicals.	6 Marks	L1	CO3	PO1 PO2
	b)	Explain in detail about Phosphate removal by activated sludge process.	6 Marks	L4	CO3	PO5 PO6 PO7
		UNIT-IV				
7.	a)	What are the major chemical compositions of waste water obtained from dairy units?	6 Marks	L2	CO3	PO1 PO2 PO10 PO12
	b)	What are the possible hazardous substances that can be present in waste water obtained from tanneries and distilleries?	6 Marks	L2	CO3	PO1 PO2 PO5 PO12
		(OR)				
8.	a)	A combined effluent from tannery industry has the following characteristics. pH = 8.5, Temperature = 25°C, Turbidity = 200 NTU, BOD = 1000 mg/L, COD = 2000 mg/L, Total Dissolved Solids = 3200 mg/L and Chromium (VI) = 4 mg/L. Analyse and suggest a suitable treatment method by interpreting the above data and draw a suggested treatment flow sheet diagram for the same.	6 Marks	L4	CO4	PO1 PO2 PO4 PO10
	b)	Explain the conventional treatment of dairy wastewater with flow sheet of a typical diary effluent treatment plant.	6 Marks	L2	CO4	PO1 PO2 PO5 PO6 PO7
		UNIT-V				
9.	a)	Explain the 4R principle of waste management with latest technologies.	6 Marks	L4	CO5	PO1 PO2 PO5 PO7 PO12
	b)	Explain about flow measurement in waste water minimization.	6 Marks	L2	CO5	PO1 PO2 PO4
		(OR)				
10.	a)	What are the limitations of waste water minimization?	6 Marks	L3	CO5	PO1 PO2 PO6
	b)	Explain in detail about water conservation.	6 Marks	L3	CO5	PO1 PO2 PO7 PO10

INFRASTRUCTURE DEVELOPMENT AND MANAGEMENT

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Briefly explain the reasons for rise of public sector and government involvement in infrastructural activities.	6 Marks	L4	CO1	PO1 PO2 PO6
	b)	Discuss about the changed socio-economic scenario and current infrastructure problems in India.	6 Marks	L4	CO1	PO1 PO2 PO6 PO11
		(OR)				
2.	a)	Explain briefly the impact of Standard of living and environment.	6 Marks	L4	CO1	PO1 PO2 PO6
	b)	Explain Impact of Infrastructure development on economic development.	6 Marks	L4	CO1	PO1 PO2 PO6 PO7

UNIT-II

3.	a)	Discuss in detail about public private partnership contracts. Explain its role in infrastructure development.	6 Marks	L4	CO2	PO1 PO2 PO6 PO8 PO11
	b)	Write a short note on turnkey contracts.	6 Marks	L4	CO2	PO1 PO2 PO8 PO11
		(OR)				
4.	a)	Explain different strategies of power generation and factors affecting power generation.	6 Marks	L4	CO2	PO1 PO2 PO6 PO7
	b)	What is the current power scenario in India?	6 Marks	L4	CO2	PO1 PO2 PO6 PO7

UNIT-III

5.	a)	Write a brief note on current public policies on transportation, power and telecom sectors.	6 Marks	L4	CO3	PO1 PO2 PO4 PO7
	b)	Explain the legal framework for regulating private participation in roads and highways.	6 Marks	L4	CO3	PO1 PO2 PO8
		(OR)				
6.	a)	Explain the different 20-year plan for the development of highways in India.	6 Marks	L4	CO3	PO1 PO2 PO6
	b)	Discuss in detail about Roads and highways, Ports and Airports.	6 Marks	L4	CO3	PO1 PO2 PO4 PO7

UNIT-IV

7.		Discuss the technological and methodological demands on construction management in infrastructure development projects.	12 Marks	L4	CO4	PO1 PO2 PO4 PO6
		(OR)				
8.	a)	Explain briefly about the component of Highway, Ports and aviation.	6 Marks	L4	CO4	PO1 PO2 PO4
	b)	Explain the construction component of oil and gas sector.	6 Marks	L4	CO4	PO1 PO2

UNIT-V

9.	a)	Explain the toll collection strategy in India. Differentiate between shadow tolling and direct tolling.	6 Marks	L4	CO5	PO1 PO2 PO5 PO8 PO11
	b)	Write a brief note on MRTS, LRT and Multi model transport system.	6 Marks	L4	CO5	PO1 PO2 PO4 PO5 PO6 PO7
		(OR)				
10.		Write a brief note on scope and role of Terminal management, ATC and Requisites of domestic & International airports and cargo & military airports.	12 Marks	L4	CO5	PO1 PO2 PO5 PO8 PO11

CODE No.: 19BT60123 SVEC-19

FIRE ENGINEERING

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Briefly explain the Different types of fire speed.	6 Marks	L1	CO1	PO1 PO2
	b)	Compare the complete Combustion and in complete combustion.	6 Marks	L2	CO1	PO1 PO7
		(OR)				
2.		Differentiate Unconfined vapour cloud explosion and Boiling liquid expanding vapour explosion.	12 Marks	L4	CO1	PO1 PO2 PO6 PO7

UNIT-II

3.	a)	Explain in detail about the fire triangle measure in building.	6 Marks	L4	CO2	PO1 PO2
	b)	What are the strategies to be adopted for fire prevention?	6 Marks	L2	CO2	PO1
		(OR)				
4.		List the fire rescue operations and explain in detail.	12 Marks	L6	CO2	PO1 PO2 PO7

UNIT-III

5.		Discuss in detail the design features, installation, maintenance and operation of explosion detection and control systems.	12 Marks	L4	CO3	PO1 PO2 PO5 PO8
		(OR)				
6.	a)	Illustrate the "Deluge and Emulsifier" System.	6 Marks	L2	CO3	PO1 PO2
	b)	Explain the method of Water Sprinkler system.	6 Marks	L4	CO3	PO1 PO5

UNIT-IV

7.	a)	Discuss the Necessity of fire certificates.	6 Marks	L2	CO4	PO1 PO2
	b)	As an Engineer how would you describe safety as an essential parameter in designing residential building?	6 Marks	L4	CO4	PO1 PO2 PO3
		(OR)				
8.		Simplify the concept of egress design for residential building.	12 Marks	L4	CO4	PO1 PO2 PO4

UNIT-V

9.	a)	Compare the detonation and blast waves.	6 Marks	L2	CO5	PO1 PO2
	b)	Give the details of plant for generation of inert gas.	6 Marks	L2	CO5	PO1 PO7
		(OR)				
10.		As an engineer how would you describe explosion protection systems in industry and residential building.	12 Marks	L4	CO5	PO1 PO2 PO6 PO7 PO10 PO11

INTELLIGENT TRANSPORTATION SYSTEMS

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define ITS and list out its objectives.	6 Marks	L2	CO1	PO1 PO5 PO6 PO7
	b)	Explain the historical background of ITS and list the benefits.	6 Marks	L2	CO1	PO1 PO5 PO6 PO7
		(OR)				
2.	a)	Explain the following terms: i) Automated Vehicle Location (AVL) ii) Automated Vehicle Identification (AVI)	6 Marks	L2	CO1	PO1 PO5 PO6 PO12
	b)	Discuss about detectors for data collection.	6 Marks	L4	CO1	PO1 PO2 PO5 PO8 PO10

UNIT-II

3.	a)	What is the importance of telecommunications in ITS system?	6 Marks	L2	CO2	PO1 PO5 PO6 PO8 PO10
	b)	Discuss how information management system helps in traffic management.	6 Marks	L4	CO2	PO1 PO2 PO6 PO7
		(OR)				
4.	a)	ITS approach through telecommunications is effective in solving transportation problems? Justify.	6 Marks	L4	CO2	PO1 PO2 PO4 PO5 PO6 PO8
	b)	Explain about road side communication system in effective traffic management.	6 Marks	L2	CO2	PO1 PO6

		UNIT-III				
5.	a)	Compare and Contrast Advanced Traffic Management Systems (ATMS) and Advanced Traveller Information Systems (ATIS).	6 Marks	L4	CO3	PO1 PO2 PO5 PO6
	b)	Discuss briefly about Commercial Vehicle Operations (CVO).	6 Marks	L2	CO3	PO1 PO5
		(OR)				
6.	a)	Discuss briefly about Advanced Vehicle Control Systems (AVCS).	6 Marks	L2	CO3	PO1 PO5
	b)	List out various advantages of Advanced Public Transportation Systems (APTS) and Advanced Rural Transportation Systems (ARTS).	6 Marks	L4	CO3	PO1 PO2 PO6
		UNIT-IV				
7.	a)	Discuss briefly about travel and traffic management.	6 Marks	L2	CO4	PO1 PO6 PO7
	b)	Discuss how effective ITS can be in Public transportation management.	6 Marks	L2	CO4	PO1 PO6 PO7
		(OR)				
8.	a)	Discuss in detail about commercial vehicle operations and emergency management in ITS.	6 Marks	L4	CO4	PO1 PO2 PO5 PO6
	b)	Explain how Advanced vehicle safety systems can be implemented using ITS.	6 Marks	L4	CO4	PO1 PO2 PO5 PO6
		UNIT-V				
9.		List the various challenges involved in the implementation of automated highway systems. Discuss in detail.	12 Marks	L4	CO5	PO1 PO2 PO6
		(OR)				
10.	a)	Enumerate different ITS system components throughout the world.	6 Marks	L2	CO5	PO1 PO5 PO6
	b)	Explain how ITS is implemented in developing countries.	6 Marks	L2	CO5	PO1 PO5 PO6

SMART MATERIALS AND STRUCTURES

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Define smart materials and smart structures discuss on types of smart structures.	12 Marks	L1	CO1	PO1 PO2 PO4 PO5 PO6 PO7
		(OR)				
2.		Explain the functions of various sensing systems and actuation systems in smart structures.	12 Marks	L4	CO1	PO1 PO2 PO4 PO5 PO6 PO7

UNIT-II

3.	a)	What are the different types of strain gauges in smart structure? Explain any two of them with simple sketches.	6 Marks	L2	CO2	PO1 PO2 PO4 PO5 PO6 PO7
	b)	Brief on the role of: i) Wheatstone bridge. ii) Pressure transducer in smart structure.	6 Marks	L3	CO2	PO1 PO2 PO4 PO5 PO6 PO7
		(OR)				
4.		Explain briefly about strain measuring techniques using electric strain gauges.	12 Marks	L4	CO2	PO1 PO2 PO4 PO5 PO6 PO7

UNIT-III

5.	a)	Explain the phenomenon of piezo electric effect and discuss on its application.	6 Marks	L2	CO3	PO1 PO2 PO4 PO5 PO6 PO7
	b)	Write a brief note on spectroscopes.	6 Marks	L2	CO3	PO1

						PO2 PO4 PO5 PO6 PO7
		(OR)				
6.	a)	Explain how fiber optics used to detect crack in any structures.	6 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO6 PO7
	b)	What are different types of sensors and explain any two of them.	6 Marks	L1	CO3	PO1 PO2 PO4 PO5 PO6 PO7
		UNIT-IV				
7.	a)	Describe the current generation actuator materials and give 2 examples.	6 Marks	L3	CO4	PO1 PO2 PO4 PO5 PO6 PO7
	b)	List and explain the applications of Shape Memory alloys (SMA).	6 Marks	L3	CO4	PO1 PO2 PO4 PO5 PO6 PO7
		(OR)				
8.		What do mean by ER fluid? Explain with examples, the application of ER fluids in different modes. Also state the advantages of ER fluids.	12 Marks	L3	CO4	PO1 PO2 PO4 PO5 PO6 PO7
		UNIT-V				
9.		Write brief technical note on: i) Data acquisition ii) Signal processing	12 Marks	L2	CO5	PO1 PO2 PO4 PO5 PO6 PO7
		(OR)				
10.		Explain: i) Data visualization ii) Data reliability	12 Marks	L2	CO5	PO1 PO2 PO4 PO5 PO6 PO7

POWER ELECTRONICS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Briefly explain the two transistor analogy of SCR. Derive the expression for the anode current.	6 Marks	L1	CO1	PO1
	b)	Briefly explain the forward voltage triggering and gate triggering method of an SCR.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Briefly explain the V-I characteristics of MOSFET.	6 Marks	L1	CO1	PO2
	b)	Briefly explain the V-I characteristics of BJT.	6 Marks	L1	CO1	PO7

UNIT-II

3.	a)	Explain the operation of the single phase fully controlled rectifier with RL load for discontinuous mode of operation. Derive the expression for the average, RMS output voltage.	6 Marks	L2	CO1	PO5
	b)	Explain the operation of single phase semi controlled rectifier for RL load. Derive the expression for the average and RMS output voltage.	6 Marks	L2	CO1	PO2
		(OR)				
4.	a)	Explain the operation of three phase fully controlled rectifiers with R load for continuous mode of operation. Derive the expression for the average and RMS output voltage.	6 Marks	L3	CO1	PO3
	b)	A single phase semi converter is operating from a 120V, 50Hz ac supply. The load resistance is 10Ω. If the average output voltage is 25% of the maximum possible output voltage. Calculate the i) firing angle ii) average and RMS output voltage. iii) average and RMS output current.	6 Marks	L3	CO1	PO5

UNIT-III

5.	a)	Define forced commutation. Briefly explain the class-A commutation method.	6 Marks	L3	CO2	PO2
	b)	 The circuit shown in above Fig. is employing resonant-pulse commutation (or class-B commutation) has C = 20μF and	6 Marks	L3	CO2	PO5

		L = 5 μH. Initial voltage across capacitor is Vs= 230 V. For a constant load current of 300 A, calculate i) Conduction time for the auxiliary thyristor. ii) Voltage across the main thyristor when it gets commutated. iii) The circuit turn-off time for the main thyristor.				
		(OR)				
6.	a)	Explain the principle of operation of the step-down chopper. What are the applications of it?	6 Marks	L2	CO2	PO1
	b)	For step up chopper the DC source voltage is 230V, load resistance is 10Ω. Consider a voltage drop of 2V across chopper when it is on. For a duty cycle of 0.4, calculate i) average and rms values of output voltage and ii) chopper efficiency.	6 Marks	L2	CO2	PO2
		UNIT-IV				
7.	a)	Explain the operation of single-phase dual converter in circulating mode of operation for R load.	6 Marks	L3	CO3	PO5
	b)	A single phase AC voltage controller is employed for controlling the power flow from a 230V, 50Hz ac source in to a load consisting of 3Ω and ωL=4Ω. Calculate the control range of the firing angle, maximum value of rms load current, maximum value of load power and power factor.	6 Marks	L3	CO3	PO2
		(OR)				
8.	a)	Explain the principle of operation of single-phase step down cyclo converter for R load. What are the applications of it?	6 Marks	L3	CO3	PO2
	b)	A single-phase step down cyclo converter has input voltage of 230V, 50Hz. The output frequency is 8one third of the input frequency, for a firing angle of 30 degrees. Calculate the rms value of output voltage, rms value of output current, rms current of each converter, rms value of each thyristor current, input power factor.	6 Marks	L3	CO3	PO7
		UNIT-V				
9.	a)	Explain the operation of single-phase full bridge voltage source inverter employing the sinusoidal PWM technique.	6 Marks	L3	CO4	PO2
	b)	Explain the operation of single-phase full bridge voltage source inverter employing the multipulse PWM technique.	6 Marks	L2	CO4	PO7
		(OR)				
10.		Explain the operation of three phase volage source inverter for 180-degree mode of operation.	12 Marks	L3	CO4	PO2

III B.Tech II Semester (SVEC-19) Regular Examinations June – 2022

POWER SYSTEM ANALYSIS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define per unit quantity. Mention its advantages.	4 Marks	L1	CO1	PO1
	b)	A 50kW, three phase, Y connected load is fed by a 210kVA transformer with voltage rating 11kV/415V through a feeder. The length of feeder is 1km and the impedance of the feeder is (0.25+j 4) ohm/km. If the load power factor is 0.8. Solve the p.u impedance of the feeder and load.	8 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Develop Y_{bus} by direct inspection method for the following network; assume the values are in p.u. admittances. 	8 Marks	L3	CO1	PO5
	b)	What are the advantages of Y_{bus} over Z_{bus}?	4 Marks	L1	CO1	PO2

UNIT-II

3.	a)	Show the generalized expressions for elements of Jacobian matrix for fast decoupled load flow method.	6 Marks	L2	CO2	PO2
	b)	Model the expression for the limits of reactive power and discuss how it is considered for PV bus to PQ bus conversion.	6 Marks	L3	CO2	PO2
		(OR)				
4.	a)	For the power system network, the generators are connected at all four buses, while loads are at buses 2, 3 and 4. The values of real and reactive powers are listed in table 1. All buses other than slack bus are of P-Q type. Line data are given in table 2. Assuming a flat voltage start, determine the voltage magnitudes and the phase angles at the three buses using G- S(Gauss-Seidel) method for first iteration.	8 Marks	L3	CO2	PO5

Table 1. Input data

Bus	P_i	Q_i	V_t	Type of bus
1	--	--	1.05 0º	Slack
2	-0.45	-0.15	--	PQ
3	-0.51	-0.25	--	PQ
4	-0.6	-0.3	--	PQ

Table 2. Line data

Line No	Bus Code (p-q)	Line Impedance
1	1-2	0.08 + j0.2
2	1-4	0.05 + j0.1
3	2-3	0.04 + j0.12
4	3-4	0.04 + j0.14

	b)	Compare the decoupled method and fast decoupled methods with the Newton Rapson method.	4 Marks	L4	CO2	PO5

UNIT-III

5.		Two 11 kV, 3-phase, 5MVA generators having sub transient reactance of 3% and 2% respectively operate in parallel. Suppose the power load through a 11/220 kV, 10 MVA transformer has 4% equivalent reactance. Calculate fault current and fault MVA for three phase fault occurs on the HT side of the transformer. Also calculate the fault MVA supplied by each generator.	12 Marks	L3	CO3	PO2
		(OR)				
6.		For a three phase symmetrical fault on a balanced power system using matrix notation, Interpret the expression for i) current ii) current at any other bus iii) Voltage at any bus excluding the faulted bus.	12 Marks	L2	CO3	PO1

UNIT-IV

7.	a)	What do you understand by sequence networks? What is their importance in unsymmetrical fault calculations?	6 Marks	L1	CO3	PO4
	b)	Derive the expression for fault current in single line to ground fault and draw the sequence network representing LG fault.	6 Marks	L3	CO3	PO1
		(OR)				
8.	a)	A 25 MVA, 13.2 kV alternator with solidly grounded neutral has a sub transient reactance of 0.25 p.u. The negative and zero sequence reactance's are 0.35 and 0.1 p.u. respectively. A single line to ground fault occurs at the terminals of an unloaded alternator; Examine the fault current and the line-to-line voltages. Neglect resistance.	8 Marks	L4	CO3	PO2
	b)	Explain operator 'a' and what are the properties of operator 'a'.	4 Marks	L2	CO3	PO1

UNIT-V

9.	a)	Define steady state stability and stability limit. What are the techniques available to improve the steady state stability?	6 Marks	L1	CO4	PO2
	b)	A 4-pole, 50 Hz, 26 kV turbo alternator has a rating of 100 MVA, p.f 0.8 lag. The moment of inertia of rotor is 8000 kg-m². Interpret M and H.	6 Marks	L2	CO4	PO4
		(OR)				
10.	a)	Derive an expression for steady state stability limit of a short transmission line having sending end and receiving end voltages V_s and V_r an impedance Z.	6 Marks	L3	CO4	PO1
	b)	A synchronous generator, capable of developing 500MW power per phase, operates at a power angle of 8°. By how much can the input shaft power be increased suddenly without loss of stability? Assume that P_{max} will remain constant.	6 Marks	L4	CO4	PO5

HIGH VOLTAGE ENGINEERING

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define field enhancement factor. Discuss its importance in Designing insulating system.	6 Marks	L1	CO1	PO1
	b)	Distinguish electrical field strength and stress. Mention various factors that affect the breakdown strength of insulating material.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	What are the various reasons for over voltages and enumerate the adverse effects of over voltages in power system?	6 Marks	L1	CO1	PO1
	b)	How do earthling screen and ground wires provide protection against direct lightning strokes?	6 Marks	L1	CO1	PO1

UNIT-II

3.	a)	Explain the Streamer theory of breakdown in air at atmospheric pressure.	6 Marks	L1	CO1	PO1
	b)	In an experiment for determining the breakdown strength of transformer the following observations are made. Determine the power law dependence between the gap spacing and the applied voltage of the oil.	6 Marks	L2	CO1	PO2

Gap Spacing(mm)	4	6	10	12
Voltage at Breakdown(kV)	90	140	210	255

(OR)

4.	a)	What are commercial liquid dielectrics, and how are they different from pure liquid dielectrics?	6 Marks	L1	CO1	PO1
	b)	A coaxial cylindrical capacitor is to be designed with an effective length of 20 cm. The capacitor is expected to have a capacitance of 1000 pF and to operate at 15 kV, 500 kHz. Select a suitable insulating material and give the dimensions of the electrodes.	6 Marks	L2	CO1	PO2

UNIT-III

5.	a)	Why is a Cockcroft-Walton circuit preferred for voltage multiplier circuits? Explain its working with a schematic diagram.	6 Marks	L1	CO2	PO2
	b)	A Cockcroft-Walton type voltage multiplier has eight stages with capacitances, all equal to 0.05 μF. The supply transformer secondary voltage is 125 kV at a frequency of 150 Hz. If the load current to be supplied is 5 mA, find: i) the percentage ripple, ii) the regulation, iii) the optimum number of stages for minimum regulation or voltage drop.	6 Marks	L2	CO2	PO4
		(OR)				

6.	a)	What is a Tesla coil? How is damped high-frequency oscillations obtained from a Tesla coil?	6 Marks	L1	CO2	PO1
	b)	An impulse generator has eight stages with each condenser rated for 0.16 μF and 125 kV. The load capacitor available is 1000pF. Find the series resistance and the damping resistance needed to produce 1.2/50 μs impulse wave. What is the maximum output voltage of the generator, if the charging voltage is 120 kV?	6 Marks	L1	CO2	PO2
		UNIT-IV				
7.	a)	Give the basic circuit for measuring the peak voltage of i) ac voltage, and ii) impulse voltage. What is the difference in measurement technique in the above two cases?	6 Marks	L1	CO3	PO1
	b)	A generating voltmeter has to he designed so that it can have a range from 20 to 200 kV dc If the indicating meter reads a minimum current of 2μα and maximum current of 25μα, what should the capacitance of the generating voltmeter be?	6 Marks	L2	CO3	PO2
		(OR)				
8.	a)	Explain how a sphere gap can be used to measure the peak value of voltages. What are the parameters and factors that influence such voltage measurement?	6 Marks	L1	CO3	PO1
	b)	What are the different types of resistive shunts used for impulse current measurements? Discuss their characteristics and limitations.	6 Marks	L1	CO3	PO2
		UNIT-V				
9.	a)	Explain the terms: i) withstand voltage, ii) flashover voltage, iii) 50% flashover voltage, and iv) wet and dry power frequency tests as referred to high voltage testing.	6 Marks	L1	CO4	PO1
	b)	How is a lossy dielectric represented? Explain how an ideal capacitor in parallel with a resistor can represent a lossy dielectric over a wide frequency range.	6 Marks	L1	CO4	PO2
		(OR)				
10.	a)	Briefly explain the measurement of DC resistivity using loss of charge method.	6 Marks	L1	CO4	PO1
	b)	What is the significance of impulse tests? Briefly explain the impulse testing of insulators.	6 Marks	L1	CO4	PO1

SPECIAL ELECTRICAL MACHINES

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the working of open loop controller of 3-phase Variable Reluctance stepper motor with the help of a neat sketch.	6 Marks	L2	CO1	PO1
	b)	Explain the modes of excitation of Stepper Motor with neat diagram.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Brief the construction and working principle of hybrid stepper motor with neat diagrams.	6 Marks	L2	CO1	PO2
	b)	Explain in detail the multi stack construction of Stepper Motor.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	A 3-Φ switched reluctance motor has 6 stator poles and 4 rotor teeth. Draw the feasible zone for stator and rotor pole arcs. Design the pole arc and rotor tooth arc.	6 Marks	L4	CO2	PO3
	b)	From the fundamentals, derive the expression for torque developed in a switched reluctance motor.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Develop Switched Reluctance Motor using two converter topologies and draw relevant diagrams.	6 Marks	L2	CO2	PO1
	b)	What is the step angle of a three-phase switched reluctance motor having 12 stator poles and 8 rotor poles? What is the commutation frequency in each phase at a speed of 6000 r.p.m.?	6 Marks	L4	CO2	PO3
		UNIT-III				
5.	a)	Discuss in detail about the construction and working of Synchronous Reluctance Motor with neat diagrams.	6 Marks	L2	CO3	PO1
	b)	Describe in detail the speed – Torque characteristics of Synchronous Reluctance Motor.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Explain the construction and operation of axial and radial flux machines. List the advantages and disadvantages of each construction.	8 Marks	L2	CO3	PO1
	b)	Elaborate the various applications of synchronous reluctance motor.	4 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Explain the principle of operation of permanent magnet brushless DC motor with neat diagram.	6 Marks	L2	CO4	PO2
	b)	What is meant by sensor less control? What are its advantages?	6 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Explain the principle of operation of permanent magnet AC motor with neat diagram.	6 Marks	L2	CO4	PO2
	b)	Derive the expression for torque developed in a three-phase BLDC motor with two rotor poles having an arc length of 180° each.	6 Marks	L2	CO4	PO5

UNIT-V

9.	a)	With a neat diagram, explain the construction and working principle of AC series motor.	6 Marks	L2	CO5	PO1
	b)	Derive the thrust equation of linear synchronous motor.	6 Marks	L2	CO5	PO1
		(OR)				
10.	a)	Develop the equivalent circuit of a linear induction motor at standstill and running conditions.	6 Marks	L2	CO5	PO1
	b)	Draw the block diagram of control scheme for linear synchronous motor. Discuss the function of different blocks in the control circuit.	6 Marks	L2	CO5	PO1

DESIGN AND ESTIMATION OF ELECTRICAL SYSTEMS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain about selection of size of conductor applicable to residential wiring system.	6 Marks	L2	CO1	PO1
	b)	List out the general rules to be followed for internal wiring of a domestic building.	6 Marks	L2	CO1	PO8
		(OR)				
2.	a)	Draw and explain a typical wiring diagram for a house installation showing connections for energy meter, main switch and distribution boards.	6 Marks	L3	CO1	PO1
	b)	Explain about various methods of residential wiring systems	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Enumerate the main components of an Over Head Transmission lines and explain each of them.	6 Marks	L1	CO2	PO1
	b)	List the points to be considered at the time of erection of overhead lines.	6 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Explain about testing and commissioning of over head transmission line.	6 Marks	L1	CO2	PO1
	b)	An Over Head 11 kV, 50 Hz line has to be erected using 27 kg, 10 m long steel poles and copper wire of size no. 3/2.6424 m, with an average span of 150 m. Furnish the list of material required and estimate the cost/km.	6 Marks	L3	CO2	PO11
		UNIT-III				
5.	a)	Describe the selection of switch gears for 33kV/11kV substation and draw substation lay out	6 Marks	L2	CO3	PO3
	b)	Explain in brief design process of industry less than 1 MVA load.	6 Marks	L2	CO3	PO2
		(OR)				
6.	a)	Illustrate the quantity of materials required for the installation of 1 MVA indoor type 11 kV/440 V transformers.	6 Marks	L3	CO3	PO11
	b)	Explain about calculation of full load current and selection of size of the conductor size for DC motor.	6 Marks	L2	CO3	PO2
		UNIT-IV				
7.	a)	Explain the following terms : i) Candle Power. ii) Luminance. iii) Illumination. iv) Luminous Intensity.	6 Marks	L2	CO4	PO2
	b)	A small area of 10 meters in diameter is to be illuminated by a lamp suspended at a height of 4.5 meters over the center of area. A lamp having an efficacy of 30 lumens per watt is fitted with a reflector which directs the light output only over the surface to be illuminated. If the utilization coefficient is 0.66 and illumination 850 lux, Calculate the wattage of the lamp.	6 Marks	L3	CO4	PO2

(OR)

8.		Explain in brief about: i) Sodium vapour lamp. ii) High pressure mercury vapour lamp.	12 Marks	L2	CO4	PO2

UNIT-V

9.		Explain suitable welding technique to fabricate transformer oil tank.	12 Marks	L2	CO5	PO2

(OR)

10.	a)	A 50 kW single phase, 220V resistance oven employees circular nichrome wire for its heating element. If the wire temperature is not to exceed 15000C and the temperature of the charge is to be 4500C, calculate the size and length of wire required. Assume e = 0.95 and radiation efficiency K = 0.65. Calculate the temperature of wire when the charge is cold (250C).	6 Marks	L3	CO5	PO2
	b)	Explain in detail about dielectric heating.	6 Marks	L2	CO5	PO2

POWER SYSTEM AUTOMATION

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What is Deregulation? List the advantages of Deregulation in power system.	6 Marks	L1	CO1	PO1
	b)	Explain about Congestion Management briefly.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Explain functions of power system control centers.	6 Marks	L2	CO1	PO6
	b)	Discuss briefly about Investment factor in power system.	6 Marks	L2	CO1	PO6
		UNIT-II				
3.	a)	Describe about Intelligent electronic devices in SCADA system.	6 Marks	L2	CO2	PO6
	b)	With block diagram explain Remote terminal unit.	6 Marks	L3	CO2	PO6
		(OR)				
4.	a)	Explain Data concentrators and merging units in power system automation.	6 Marks	L2	CO2	PO6
	b)	Explain the objectives and functions of Human-Machine Interface (HMI).	6 Marks	L2	CO2	PO8
		UNIT-III				
5.	a)	Compare conventional and automated substations. List out merits and demerits of automated substations.	6 Marks	L2	CO3	PO1
	b)	Describe briefly substation automation application functions.	6 Marks	L2	CO3	PO1
		(OR)				
6.		Draw the substation automation architecture and explain the function of each block.	12 Marks	L2	CO3	PO6
		UNIT-IV				
7.	a)	Explain Data acquisition and communication of EMS frame work in control centers.	6 Marks	L2	CO3	PO1
	b)	Explain briefly the concept of Smart transmission through control centers.	6 Marks	L2	CO3	PO1
		(OR)				
8.		Explain control centers functions with respect to Generation operation and management.	12 Marks	L2	CO3	PO1
		UNIT-V				
9.		With neat block diagram, explain in detail about the distribution automation architecture.	12 Marks	L2	CO4	PO1
		(OR)				
10.	a)	Describe overview of Distribution automation system.	6 Marks	L2	CO4	PO6
	b)	List out applications of DMS frame work.	6 Marks	L2	CO4	PO6

RENEWABLE ENERGY SOURCES

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What are the various forms of energy? And briefly explain about non conventional energy sources.	6 Marks	L2	CO1	PO1
	b)	Write a short notes on the following: i) Green house effect. ii) Ozone layer depletion. iii) Global warming.	6 Marks	L3	CO1	PO6
		(OR)				
2.		What are the 5 major renewable energy sources? How can renewable energy contribute to sustainable development? Explain in detail.	12 Marks	L3	CO1	PO7
		UNIT-II				
3.	a)	What are the main components of a flat plate solar collector? Explain the function of each.	6 Marks	L3	CO2	PO1
	b)	Illustrate the absorption and scattering phenomenon of solar radiation in earth's atmosphere.	6 Marks	L4	CO2	PO6
		(OR)				
4.	a)	Explain the principle of photo-voltaic effect with neat sketches.	6 Marks	L3	CO2	PO1
	b)	Analyze the working of Solar Water heater with component based diagram.	6 Marks	L4	CO2	PO1
		UNIT-III				
5.	a)	Interpret the working of Wind Energy Conversion System (WECS) with main components.	6 Marks	L2	CO3	PO1
	b)	Discuss different types of horizontal-axis wind turbines.	6 Marks	L3	CO3	PO1
		(OR)				
6.	a)	Deduce an expression for the total power of a wind stream taking all factors into consideration.	6 Marks	L4	CO3	PO1
	b)	Distinguish horizontal-axis & vertical axis wind turbines.	6 Marks	L5	CO3	PO1
		UNIT-IV				
7.	a)	What are the advantages and disadvantages of geothermal energy?	6 Marks	L3	CO4	PO1
	b)	Determine current – voltage characteristics of Fuel Cell and give its Significance.	6 Marks	L3	CO4	PO1
		(OR)				
8.	a)	What is meant by anaerobic digestion? What are the factors that affect bio-digestion? Explain briefly.	6 Marks	L3	CO4	PO6
	b)	Explain about vapor dominated and liquid dominated geothermal power plants.	6 Marks	L3	CO4	PO1

UNIT-V

9.	a)	Enumerate the concept of Ocean Thermal Energy Conversion (OTEC).	6 Marks	L2	CO5	PO1
	b)	Derive an expression for Power generated by a Tidal System.	6 Marks	L4	CO5	PO1
		(OR)				
10.	a)	Illustrate the principle and working of tidal power plant with its schematic diagram.	6 Marks	L4	CO5	PO1
	b)	Explain six each merits and demerits of wave energy.	6 Marks	L2	CO5	PO1

INDUSTRIAL ENGINEERING AND MANAGEMENT

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain any two theories applicable to management.	6 Marks	L1	CO1	PO1
	b)	Mention the role of Managers for meeting the goals of the organization.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Explain any two functions of the management.	6 Marks	L1	CO1	PO1
	b)	What is the role of corporate governance?	6 Marks	L2	CO1	PO1 PO6
		UNIT-II				
3.	a)	Describe the Maslow's Hierarchy of human needs.	6 Marks	L1	CO2	PO1 PO2
	b)	Explain why management by wandering around considered as effective communication. What are the barriers to effective communications?	6 Marks	L2	CO2	PO1 PO2
		(OR)				
4.	a)	Describe the importance of "leading the effective teams" in a management of organizational behavior.	6 Marks	L1	CO2	PO1 PO2
	b)	State the Qualities required for a leader for organizational transformation.	6 Marks	L2	CO2	PO1 PO2
		UNIT-III				
5.	a)	Define Work Study. State its objectives. Differentiate between Method Study and Work Measurement.	6 Marks	L1	CO3	PO1 PO2 PO3
	b)	What is the purpose of string diagram and explain it with an example?	6 Marks	L2	CO3	PO1 PO2 PO3
		(OR)				
6.	a)	What is performance rating? Give an elaborate description about various methods of performance rating.	6 Marks	L1	CO3	PO1 PO2 PO3
	b)	The worker in an engineering company is expected to work for 420 min in a shift of 8 hrs. The remaining time is allows for rest and personal needs etc. i) Determine the standard time per piece of a job whose normal time is 4 min ii) Calculate the number of pieces produced per day iii) If the worker produced 100 pieces in his shift what is his efficiency.	6 Marks	L3	CO3	PO1 PO2 PO3

UNIT-IV

7.	a)	Explain the different types of Production.	6 Marks	L1	CO4	PO1 PO2
	b)	What are advantages and disadvantages of urban and suburban locations for a plant? Compare rural and urban sites for the location of the plant.	6 Marks	L2	CO4	PO1 PO2

(OR)

8.	a)	Draw and explain Bath tub Curve.	6 Marks	L1	CO4	PO1 PO2
	b)	A system is composed of three components. Component 1 is in series with the parallel combination of components 2 and 3. Given λ_1=2 failures per year and $\lambda_2=\lambda_3$=3 failures/year. Calculate the reliability and MTTF of the system for a mission time of 1000 hours.	6 Marks	L3	CO4	PO1 PO2 PO3

UNIT-V

9.	a)	What is the purpose of control charts? Explain how this purpose achieved in manufacturing.	6 Marks	L2	CO5	PO1 PO2
	b)	In a factory producing spark plug the number of defectives found in inspection of 20 lots of 100 each, is given below:	6 Marks	L3	CO5	PO1 PO2 PO3

Lot No	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20
No of defectives	5	10	12	8	6	4	6	3	3	5	4	7	8	3	3	4	5	8	6	10

Construct appropriate control chart and state whether the process is in statistical control.

(OR)

10.	a)	What is O.C Curve? Explain the step by step procedure for construction of an O.C curve.	6 Marks	L1	CO5	PO1 PO2
	b)	What are factories Act? As per the factories act 1948, what are the major provisions for safety and health?	6 Marks	L1	CO5	PO1 PO2

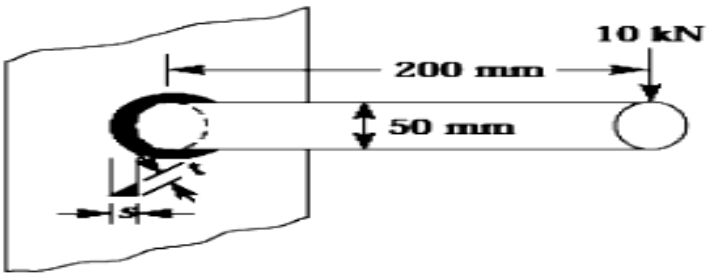
DESIGN OF MACHINE ELEMENTS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the general considerations of design process.	4 Marks	L2	CO1	PO1 PO2
	b)	A steel alloy has an ultimate tensile strength of 600 MPa, yield strength of 400 MPa and an endurance limit of 200 MPa under reversed bending. Sketch a modified Goodman diagram. Indicate on the sketch and give the magnitude of the endurance stress for released load.	8 Marks	L3	CO1	PO1 PO2 PO3
		(OR)				
2.	a)	Explain the basic modes of failure of a mechanical component.	4 Marks	L2	CO1	PO1 PO2
	b)	A machine component is subjected to a flexural stress which fluctuates between +300 MN/m^2 and -150 MN/m^2. Determine the value of minimum ultimate strength according to 1. Modified Goodman relation; and 2. Soderberg relation. Take yield strength = 0.55 Ultimate strength; Endurance strength= 0.5 Ultimate strength and factor of safety = 2.	8 Marks	L3	CO1	PO1 PO2 PO3
		UNIT-II				
3.		Explain the design procedure for Flange coupling with neat sketch in detail.	12 Marks	L2	CO2	PO1 PO2
		(OR)				
4.		Design a cotter joint to support a load varying from 30kN in compression to 30kN in tension. The material used is carbon steel. Assume tensile stress=compressive stress = 50 Mpa, Shear stress = 35 Mpa and crushing stress = 90 Mpa.	12 Marks	L4	CO2	PO1 PO2 PO3
		UNIT-III				
5.	a)	Explain the types of welded joints.	4 Marks	L2	CO3	PO1 PO2
	b)	A plate 100 mm wide and 10 mm thick is to be welded with another plate by means of transverse welds at the ends. If the plates are subjected to a load of 70kN, find the size of weld for static as well as fatigue load. The permissible tensile stress should not exceed 70MPa.	8 Marks	L3	CO3	PO1 PO2 PO3
		(OR)				
6.		A 50mm diameter solid shaft is welded to a flat plate as shown in fig. if the size of the weld is 15 mm; Calculate the maximum normal and shear stress in the weld.	12 Marks	L3	CO3	PO1 PO2 PO3



UNIT-IV

7.	A full journal bearing operates under an axial load of 25 kN. The length and diameter of the journal are 150mm and 100mm respectively. The radial clearance is 0.05mm. The journal rotates at a speed of 300 r.p.m. If the viscosity of the oil used at the operating temperature is 0.01 kg/ms, find the coefficient of friction in the bearing and power loss due to friction. Use McKee's equation.	12 Marks	L3	CO4	PO1 PO2 PO3
	(OR)				
8.	A single row ball bearing carries a radial load of 8 kN and an axial thrust of 3.5 kN. The radial load factor and the axial load factor are given as 0.56 and 1.48 respectively. Desired reliability is 90 percent. The mounting of the bearing is such that the inner ring is stationary. The shaft rotates at 500 r.p.m and the expected life is 2500 operating hours. Find the dynamic load capacity of the bearing required for the application.	12 Marks	L4	CO4	PO1 PO2 PO3

UNIT-V

9.	A helical compression spring made of oil tempered carbon steel, is subjected to a load which varies from 400 N to 1000 N. The spring index is 6 and the design factor of safety is 1.25. If the yield stress in shear is 770MPa and endurance stress in shear is 350MPa, find: i). Size of the spring wire, ii). Diameters of the spring, iii). Number of turns of the spring, and iv). Free length of the spring. The compression of the spring at the maximum load is 30 mm. The modulus of rigidity for the spring material may be taken as 80kN/mm^2.	12 Marks	L4	CO5	PO1 PO2 PO3
	(OR)				
10.	A spur gear pair with a module of 6 mm has transmission ratio of 4. The number of teeth on the pinion is 16 of 200 pressure angle, full depth and involute profile. Face width of the teeth may be taken as 10 times module. Taking the permissible bending stress as 105 MPa, calculate the power that the gear pair can transmit based on the beam strength of the teeth.	12 Marks	L4	CO5	PO1 PO2 PO3

HEAT TRANSFER

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What are the mechanisms of heat transfer? How are they distinguished from each other?	6 Marks	L1	CO1	PO1 PO2
	b)	Determine the steady heat transfer per unit area through a 3.8 cm thick homogeneous slab with its two faces maintained at uniform temperature of 35ºC and 25ºC. The thermal conductivity of wall material is 1.9×10^{-4} kW/mºC.	6 Marks	L3	CO1	PO1 PO2 PO3
		(OR)				
2.	a)	Derive a 3-dimensional general conduction equation in Cartesian Co-ordinates for a homogeneous material.	6 Marks	L2	CO1	PO1 PO2
	b)	Consider a steam pipe of length 20 m, inner radius 6 cm, outer radius = 8 cm, and thermal conductivity k = 20 W/m·K. The inner and outer surfaces of the pipe are maintained at average temperatures of 150°C and 60°C, respectively. Determine the rate of heat loss from the steam through the pipe.	6 Marks	L3	CO1	PO1 PO2 PO3 PO4

UNIT-II

3.	a)	List out the various types of fins.	6 Marks	L1	CO2	PO1 PO2
	b)	A fin 30 cm long and 10mm diameters throughout is made of steel alloy of thermal conductivity 43 W/m-deg. the fin attached to a plane heated wall at 200ºC temperature, extends into surroundings at 25ºC and convective heat transfer coefficient of 120W/m²ºC. Workout the heat flow rate from the fin to surroundings. Presume that the tip of the fin is insulated.	6 Marks	L3	CO2	PO1 PO2 PO3 PO4
		(OR)				
4.	a)	For a transient heat conduction with negligible internal resistance, Prove that: $(\theta/\theta_i) = \exp(-B_i F_0)$ where $\theta = (T-T_\infty)$ and $\theta_i = (T_i-T_\infty)$	6 Marks	L2	CO2	PO1 PO2 PO3
	b)	Alloy steel ball of 15 mm diameter heated to 1000ºC is quenched in a bath at 120 ºC. The material properties of the ball are k=56.94 W/m.K, Cp = 0.45kJ/kg.K, ρ = 7860 kg/m³, h=41.66 W/m²·K. Determine (i) Temperature of ball after 20 seconds (ii) Time for the ball to cool to 500 ºC.	6 Marks	L3	CO2	PO1 PO2 PO3 PO4

UNIT-III

5.	a)	What do you understand by the hydrodynamic and thermal boundary layers? Illustrate with reference to flow over a flat heated plate.	6 Marks	L2	CO3	PO1 PO2

	b)	Air at 20°C at atmospheric pressure flows over a flat plate at a velocity of 3 m/s. If the plate is 1 m wide and 80° C, calculate the following at x = 300 mm. i) Hydrodynamic boundary layer thickness, ii) Thermal boundary layer thickness, iii) Local friction coefficient, iv) Average friction coefficient, v) Local heat transfer coefficient, vi) Average heat transfer coefficient, and vii) Heat transfer.	6 Marks	L3	CO3	PO1 PO2 PO3 PO4
		(OR)				
6.	a)	Define Grashof number and explain its significance in free convection heat transfer.	6 Marks	L2	CO3	PO1 PO2
	b)	A vertical pipe of 20 cm outer diameter, at a surface temperature of 100ºC is in a room where the air is at 20ºC. The pipe is 3 m long. What is the rate of heat loss per meter length of the pipe?	6 Marks	L3	CO3	PO1 PO2 PO3
		UNIT-IV				
7.	a)	Derive expression for LMTD for counter flow double pipe heat exchanger.	6 Marks	L3	CO4	PO1 PO2
	b)	Water enters a counter flow, double pipe heat exchanger at 15°C, flowing at the rate of 1300 kg/h. It is heated by oil (C_p =2000 J/kgK) flowing at the rate of 550 kg/h from the inlet temperature of 94°C. For an area of 1 m² and an overall heat transfer coefficient of 1075 W/m²K, determine the total heat transfer and the outlet temperature of water and oil.	6 Marks	L3	CO4	PO1 PO2 PO3 PO4
		(OR)				
8.	a)	Discuss briefly the various regimes in boiling heat transfer	6 Marks	L2	CO4	PO1 PO2
	b)	Distinguish between filmwise and dropwise condensation. Which of two gives a higher heat transfer coefficient? Why?	6 Marks	L3	CO4	PO1 PO2
		UNIT-V				
9.	a)	State Planck, Wien's displacement and Kirchhoff laws.	6 Marks	L1	CO5	PO1 PO2
	b)	A 20 cm diameter spherical ball at 800 K is suspended in the air. Assuming that the ball closely approximates a black body, determine: i) total black body emissive power and ii) the spectral black body emissive power at a wave length of 3μm.	6 Marks	L3	CO5	PO1 PO2 PO3 PO4
		(OR)				
10.	a)	Explain the following: i) Irradiation ii) Radiosity iii) radiation shape factor	6 Marks	L2	CO5	PO1 PO2
	b)	Two very large parallel plates are maintained at uniform temperatures of 600 K and 400K and have emissivities 0.5 and 0.9 respectively. Determine the net rate of radiation heat transfer between the two surfaces per unit area of the plates.	6 Marks	L3	CO5	PO1 PO2 PO3 PO4

INTERNAL COMBUSTION ENGINES

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Classify IC engines based on cylinder arrangement.	6 Marks	L1	CO1	PO1 PO2
	b)	Compare Four-stroke and Two-stroke engines and give examples for each case.	6 Marks	L1	CO1	PO1 PO2
		(OR)				
2.	a)	Explain briefly about Cooling and lubricating systems employed for IC engines.	6 Marks	L2	CO1	PO1
	b)	List out the requirements of fuel supply systems for CI engines and give the names of different fuel supply systems used for diesel engines.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Discuss briefly the different parameters considered in the Fuel-air cycle analysis.	6 Marks	L2	CO2	PO1
	b)	Explain how the variable-specific heat and dissociation will affect the performance of actual cycles.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Compare air standard cycles and actual cycles.	6 Marks	L2	CO2	PO1
	b)	Define volumetric efficiency and discuss the factors affecting volumetric efficiency.	6 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Explain the normal combustion in SI engine with the help of the Pressure ***Vs*** Crank angle diagram and show various stages in it.	6 Marks	L2	CO3	PO1
	b)	Explain the phenomena of Detonation in SI engines and discuss its effects.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Explain the fuel-air requirements for starting, idling, normal cruising speeds, and acceleration periods of SI engine with the help of a neat sketch.	6 Marks	L2	CO3	PO1 PO7
	b)	Write a short note on: i) Octane rating of SI engine fuels. ii) Requirements of the combustion chamber for SI engines.	6 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Discuss briefly different stages of combustion in CI engines with the help of P-θ diagram.	6 Marks	L2	CO4	PO1 PO2
	b)	Discuss briefly the factors affecting the Ignition delay period in CI engines.	6 Marks	L2	CO4	PO1 PO2
		(OR)				

8.	a)	Discuss briefly the different methods adopted to reduce CI engine emissions.	6 Marks	L2	CO4	PO1
	b)	Explain the fuel-air requirements of CI engines at different operating conditions and list out the different combustion chambers used for CI engines.	6 Marks	L2	CO4	PO1 PO7

UNIT-V

9.	a)	What are the advantages and disadvantages of an electronic fuel injection system and list out different sensors used in this system?	6 Marks	L2	CO5	PO1 PO2
	b)	Why Gasoline injection is necessary for SI engines and explain the working of the Gasoline direction injection system?	6 Marks	L2	CO5	PO1 PO2
		(OR)				
10.	a)	Explain the working of the Lean burn engine with the help of a neat sketch and give its merits.	6 Marks	L2	CO5	PO1 PO2
	b)	What is a variable compression ratio ignition engine and discuss the methods to vary the compression ratio in CI engines?	6 Marks	L2	CO5	PO1 PO2

QUALITY MANAGEMENT AND RELIABILITY ENGINEERING

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Write a short note on ISO 9000 Quality Management System.	4 Marks	L2	CO1	PO1
	b)	"ISO certification quality system speaks about the company's commitment for Customer service". Do you agree? Substantiate your answer with suitable examples.	8 Marks	L2	CO1	PO1 PO6
		(OR)				
2.		Classify the "Costs of Quality (CoQ)" and briefly explain each one of them.	12 Marks	L3	CO1	PO1 PO6

UNIT-II

3.		Briefly explain the seven tools of Quality Control.	12 Marks	L2	CO2	PO1 PO2
		(OR)				
4.		A quality control inspector at the Cocoa Fizz soft drink company has taken ten samples with four observations each of the volume of bottles filled. The data and the computed means are shown in the table. Use this information to determine process mean and whether the process is in control for the operation. (for sample size n=4, A_2=0.73, D_3 = 0, D_4 = 2.28).	12 Marks	L3	CO2	PO1 PO2 PO3 PO6

Sample Number	Observations (Volume in Oz.)			
	S1	S2	S3	S4
1	15.85	16.02	15.83	15.93
2	16.12	16.00	15.85	16.01
3	16.00	15.91	15.94	15.83
4	16.20	15.85	15.74	15.93
5	15.74	15.86	16.21	16.10
6	15.94	16.01	16.14	16.03
7	15.75	16.21	16.01	15.86
8	15.82	15.94	16.02	15.94
9	16.04	15.98	15.83	15.98
10	15.64	15.86	15.94	15.89

UNIT-III

5.		A production shop decides to use single sampling plan to inspect its products which are offered in lots of 1000 items for inspection. The management wants to know the effect of sample on operating characteristics. However, it is decided that number of defective items should not be more than 2 in a sample. If three sets of experiments are conducted with three samples of sizes 50, 60 and 100, discuss the effect of the sample size on the probability of acceptance by constructing the OC curve.	12 Marks	L3	CO3	PO1 PO2 PO3 PO6

(OR)

6.		Explain the procedures of single and double sampling plans with the help of flow charts. Mention their merits and demerits.	12 Marks	L2	CO3	PO1 PO2

UNIT-IV

7.		A, B and C are three components in series with reliabilities R_A, R_B, R_C respectively. Components D and E which are in series with reliabilities R_D, R_E respectively are parallel to component B. Deduce the expression for the overall reliability of the system.	12 Marks	L3	CO4	PO3 PO6 PO7

(OR)

8.	a)	Distinguish between MTBF and MTTF. For which types of equipment are they used?	6 Marks	L2	CO4	PO1 PO2
	b)	Explain the significance of the term "Reliability Improvement Factor (RIF)".	6 Marks	L2	CO4	PO2

UNIT-V

9.		Describe in detail following terms with suitable examples. i) Operating Availability. ii) Intrinsic Availability. iii) Achieved Availability.	12 Marks	L2	CO4	PO2 PO3 PO7

(OR)

10.		A medical equipment manufacturing company subjected 1000 heart pacemakers to 5,000 hours of testing. Halfway through the testing, 5 pacemakers failed. What was the failure rate in terms of the following? i) Percentage of failures. ii) Number of failures per unit-hour. iii) Number of failures per unit-year. iv) If 1,100 people receive pacemaker implants, how many units can we expect to fail during the following year?	12 Marks	L3	CO4	PO2 PO3 PO6

AUTOMOTIVE FUELS AND COMBUSTION

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Write a note on fossil fuels.	6 Marks	L2	CO1	PO1
	b)	Briefly explain the chemical structure of petroleum.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Briefly describe the following types of solid fuels: Wood, coke, Charcoal and briquetted coal.	6 Marks	L1	CO1	PO1
	b)	Briefly describe the different petroleum based liquid fuels of importance in IC engines.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Explain the physical properties of fuel.	6 Marks	L2	CO2	PO1
	b)	Define Calorific value of a fuel. Differentiate between higher and lower calorific values.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Describe the properties of coal obtained by ultimate analysis.	4 Marks	L2	CO2	PO1
	b)	Distinguish clearly between Octane number and Cetane Number. What is their significance in rating of fuels for S.I and C.I engines?	8 Marks	L2	CO2	PO1 PO2
		UNIT-III				
5.	a)	Enumerate the desirable properties of alcohol as engine fuel.	6 Marks	L2	CO3	PO1
	b)	Discuss about the usage of alcohols in IC engines specific to their performance and emission parameters.	6 Marks	L2	C03	PO1 PO2
		(OR)				
6.	a)	Explain the production of vegetable oils from various vegetables.	6 Marks	L2	CO3	PO1
	b)	Describe the following: i) Biodiesel feedstock selection. ii) Raw material for biodiesel production.	6 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Explain with a neat sketch the working of hydrogen operated diesel engine.	6 Marks	L2	CO3	PO1
	b)	Discuss the aspects of hydrogen storage and handling. Also list out the safety aspects in hydrogen usage as a fuel in an engine.	6 Marks	L2	CO3	PO1 PO7
		(OR)				
8.	a)	List the advantages and disadvantages of using the following alternative fuels: i) Hydrogen. ii) Biogas.	6 Marks	L2	CO3	PO1
	b)	Discuss the performance and emission characteristics of biogas in CI engines.	6 Marks	L2	CO4	PO1 PO2

UNIT-V

9.	a)	How particulate traps works in diesel engine emission reduction? Explain.	6 Marks	L2	CO4	PO1 PO2
	b)	Mention the importance of total emission control packages. Describe two types of total emission control packages with neat sketches.	6 Marks	L2	CO4	PO1 PO7
		(OR)				
10.	a)	What are various sources of automobile pollution and what are different pollutants emitted by an automobile?	6 Marks	L2	CO4	PO1 PO7
	b)	Illustrate the working of Positive Crankcase Ventilation (PCV) system with a neat sketch.	6 Marks	L2	CO4	PO1

NON TRADITIONAL MACHINING PROCESSES

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Mention the characteristics of unconventional machining process.	4 Marks	L1	CO1	PO2
	b)	Explain the working principle of chemical machining with neat sketch.	8 Marks	L3	CO1	PO1
		(OR)				
2.	a)	List the various factors to be considered in the selection of Etchants for a particular application.	6 Marks	L1	CO1	PO6
	b)	What do you understand by the term unconventional or non-traditional machining methods? What is their importance?	6 Marks	L1	CO1	PO7
		UNIT-II				
3.	a)	Write the functions of an electrolyte.	4 Marks	L1	CO2	PO2
	b)	Explain the working principle, constructional details and advantages of electro chemical machining process with neat sketch.	8 Marks	L3	CO2	PO1
		(OR)				
4.	a)	List the advantages and disadvantages of ECM process.	4 Marks	L1	CO2	PO6
	b)	Describe the working principle, constructional details of electro chemical honing process.	8 Marks	L3	CO2	PO7
		UNIT-III				
5.	a)	What is the function of a transducer in USM?	4 Marks	L1	CO3	PO2
	b)	With the aid of simple sketch, explain the working principle of WJM process. List the practical applications.	8 Marks	L3	CO3	PO1
		(OR)				
6.	a)	Draw the graph showing the effect of slurry viscosity and MRR, in Ultra Sonic Machining (USM).	4 Marks	L1	CO3	PO6
	b)	How is metal removed in abrasive jet machining process? Explain the mechanism with neat diagram.	8 Marks	L3	CO3	PO7
		UNIT-IV				
7.	a)	Explain the term "Sinking" in Electro Discharge Machining Method.	4 Marks	L1	CO4	PO2
	b)	Explain the importance of flushing in EDM. Enumerate any one method of flushing used in EDM process.	8 Marks	L3	CO4	PO1
		(OR)				
8.	a)	Write short notes on grinding by EDM process. Draw a figure.	5 Marks	L1	CO4	PO6
	b)	Explain Electro discharge Machining process with a neat sketch.	7 Marks	L2	CO4	PO7
		UNIT-V				
9.	a)	List out various types of lasers used in LBM process.	4 Marks	L1	CO5	PO2
	b)	Explain in detail various industrial applications of plasma machining.	8 Marks	L3	CO5	PO1
		(OR)				

10.	a)	List various types of plasma arc torches used in PAM process.	4 Marks	L1	CO5	PO6
	b)	State the merits, limitations applications of electron beam and laser beam machining processes.	8Marks	L3	CO5	PO7

REFRIGERATION AND AIR CONDITIONING

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the working of a Bell Coleman cycle and give its applications. What factors will influence its efficiency?	6 Marks	L2	CO1	PO1
	b)	A refrigerating plant working on Bell – Coleman cycle draws air from cold chamber at 1 bar and 12^{0}C and compressed to 6 bar. The air is cooled to 25^{0}C before passing into the expansion cylinder and expands to 1 bar. Determine the refrigerating capacity of the system and COP if the air circulation is 10 kg/min	6 Marks	L3	CO1	PO1 PO2 PO3
		(OR)				
2.	a)	Explain Vapor compression refrigeration system and show the processes on T-S and P-h property charts.	6 Marks	L2	CO1	PO1
	b)	What is the need of a cascade refrigeration system? Explain the system with a sketch and property charts.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Discuss about the different types of condensers used in VCR systems and list their applications.	6 Marks	L2	CO2	PO1
	b)	Explain the impact of refrigerants on the environment and suggest alternatives.	6 Marks	L4	CO2	PO1 PO2 PO6 PO7
		(OR)				
4.	a)	What is ASHRAE coding of refrigerants? Give examples for each class.	6 Marks	L2	CO2	PO1
	b)	Sketch and explain how a Thermostatic expansion valve operates. What are the merits of this device over other expansion devices used in refrigeration?	6 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Explain working of Vortex tube refrigeration with a neat sketch	6 Marks	L2	CO3	PO1
	b)	Describe the working of a vapor absorption refrigeration system and obtain an expression for maximum COP of a VAR system	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Explain working of Thermo-electric refrigeration and obtain expression for COP	6 Marks	L2	CO3	PO1
	b)	Give a comparative study between Ammonia-water and Water-LiBr vapor absorption systems with respect to process and applications.	6 Marks	L4	CO3	PO1

UNIT-IV

7.	a)	Draw the layouts for a summer and Winter Air condition systems and discuss the processes with the help of a Psychometric chart.	6 Marks	L2	CO4	PO1
	b)	Atmospheric air is at 32^{0}C and contains 13.4 grams of water vapor per kg of dry air. Determine i) partial pressure of vapor, ii) Relative Humidity and iii) Dew point temperature. Use property relations and check results from psychrometric chart.	6 Marks	L3	CO4	PO1 PO2 PO3
		(OR)				
8.	a)	Atmospheric air at 15^{0}C DBT and 30% RH passes through a furnace and through a humidifier, in such a way that the final DBT is 32^{0}C and 40% RH. Determine i) Heat and moisture added to air and ii) Sensible heat factor of the process.	6 Marks	L3	CO4	PO1 PO2 PO3
	b)	What are the different heat sources to an AC room and explain how RSHF and GSHF are calculated?	6 Marks	L3	CO4	PO1

UNIT-V

9.	a)	List and explain the commonly used duct systems in air conditioning systems.	6 Marks	L2	CO5	PO1
	b)	What is Comfort chart? Analyze its use in designing air conditioning applications focused to human comfort.	6 Marks	L4	CO5	PO1
		(OR)				
10.	a)	Define EPR used in heat pump systems. Develop an Air to Air heat pump circuit for space heating application.	6 Marks	L3	CO5	PO1
	b)	Explain the humidification process by evaporating the water and air washing methods.	6 Marks	L2	CO5	PO1

III B.Tech II Semester (SVEC-19) Regular Examinations June – 2022

HYDRAULICS AND PNEUMATICS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Define pump and state the purpose of the pump in hydraulic system and classify pumps.	6 Marks	L2	CO1	PO1
	b)	Explain the working of Lobe pump with suitable sketch.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Sketch and explain the constructional feature of poppet relief valve.	6 Marks	L2	CO1	PO1
	b)	Explain the construction and working of following with neat sketch Double acting cylinder.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Sketch & explain Check valve.	6 Marks	L2	CO2	PO1
	b)	Explain Bleed-off circuit in detail.	6 Marks	L2	CO2	PO1
		(OR)				
4.		List and explain the components used in the hydraulic system, mention any six.	12 Marks	L2	CO2	PO1
		UNIT-III				
5.		Sketch and explain the Safety relief valve in detail.	12 Marks	L2	CO3	PO1
		(OR)				
6.		State the difference between pressure relief valve and sequence valve in detail.	12 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	What in 4/3 DCV? Explain with neat sketch.	6 Marks	L2	CO4	PO1
	b)	Explain with neat sketch Non-Return Valve.	6 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Explain construction & working of the single acting cylinder.	6 Marks	L2	CO4	PO1
	b)	Explain with a neat sketch of an air pilot control circuit for a double acting actuator.	6 Marks	L2	CO4	PO1
		UNIT-V				
9.		Explain in detail about Pneumatic valve functions with neat sketches.	12 Marks	L2	CO4	PO1
		(OR)				
10.		Describe an example of Pneumatic Cylinder sequencing circuit using logic gates.	12 Marks	L2	CO4	PO1 PO2 PO3

CODE No.: 19BT60318 SVEC-19

INDUSTRIAL INTERNET OF THINGS

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe IIOT architecture.	6 Marks	L2	CO1	PO1 PO5
	b)	Demonstrate Functional and Informational views.	6 Marks	L2	CO1	PO1 PO5
		(OR)				
2.	a)	Illustrate Deployment and Operational Views.	6 Marks	L2	CO1	PO1 PO2 PO5
	b)	Enumerate IOT domestic applications.	6 Marks	L2	CO1	PO1 PO2 PO5
		UNIT-II				
3.	a)	What is the main objective of IIoT in manufacturing and other industrial process?	6 Marks	L2	CO2	PO1 PO5
	b)	Illustrate Wireless Communication Technologies.	6 Marks	L2	CO2	PO1 PO5
		(OR)				
4.	a)	Discuss Proximity Network and WSN Edge Node.	6 Marks	L2	CO2	PO1 PO5
	b)	Describe Legacy Industrial and Modern Communication Protocols.	6 Marks	L2	CO2	PO1 PO5
		UNIT-III				
5.	a)	Enlist the benefits of adopting an Industry 4.0 model.	6 Marks	L2	CO3	PO1 PO2
	b)	Explain Four Main Characteristics of Industry 4.0.	6 Marks	L2	CO3	PO1 PO2
		(OR)				
6.		Explain Real-World Smart Factories and through some light on strategies and technical know-how it is involved in it.	12 Marks	L2	CO3	PO1 PO6
		UNIT-IV				
7.	a)	Compare in detail the OneM2M IoT Architecture and IoTWF standardized reference model.	6 Marks	L2	CO4	PO1 PO8
	b)	Differentiate IoT and M2M.	6 Marks	L2	CO4	PO1 PO8
		(OR)				
8.	a)	Explain the constructional features of Identity Access Management.	6 Marks	L2	CO4	PO1 PO2
	b)	Differentiate between PLCs and DCS.	6 Marks	L2	CO4	PO1 PO2
		UNIT-V				

9.	Discuss the following in detail: i) SOCRADES ii) IMC-AESOP.	12Marks	L2	CO5	PO1 PO5
	(OR)				
10.	Illustrate Service-oriented architecture and explain device integration.	12Marks	L2	CO5	PO1 PO5

CODE No.: 19BT60320 SVEC-19

MECHATRONICS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

	UNIT-I				
1.	Differentiate between traditional system and mechatronics system with an example.	12 Marks	L2	CO1	PO1 PO2
	(OR)				
2.	Explain automatic camera with a neat sketch.	12 Marks	L2	CO1	PO1 PO2
	UNIT-II				
3.	Explain the basic elements of hydraulic system with a neat sketch and write the advantages and disadvantages of hydraulic system.	12 Marks	L2	CO2	PO1 PO2
	(OR)				
4.	Illustrate the construction and working of single acting and double acting cylinder with a neat sketch.	12 Marks	L2	CO2	PO1 PO2
	UNIT-III				
5.	Explain simple and compound gear train and illustrate their gear ratios.	12 Marks	L2	CO3	PO1 PO2
	(OR)				
6.	What is stepper motor? Explain the types of stepper motor with a neat sketch.	12 Marks	L2	CO3	PO1 PO2
	UNIT-IV				
7.	Explain the dynamic characteristics of sensors.	12 Marks	L2	CO4	PO1 PO2
	(OR)				
8.	Explain Hall effect sensor with integration of analog and digital controllers.	12 Marks	L2	CO4	PO1 PO2
	UNIT-V				
9.	Describe the procedure of Digital to Analog (D/A) conversion with a sketch. Explain any one type of D/A converter in detail.	12 Marks	L2	CO5	PO1 PO2
	(OR)				
10.	Compare the characteristics of i) proportional control, ii) proportional plus integral control, iii) proportional plus integral plus derivative control.	12 Marks	L2	CO5	PO1 PO2

ANTENNAS AND PROPAGATION

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Define the terms directivity and gain. State the relation between gain of the antenna and the antenna aperture.	6 Marks	L3	CO1	PO1
	b)	Find the radiation resistance of a Hertzian dipole of length λ/40, λ/60, λ/80.	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Explain the current distribution in thin linear wire antenna.	6 Marks	L2	CO1	PO3
	b)	Define radiation resistance and determine the radiation resistance of antenna which is drawing 15 Ampere and radiating power 5 kW.	6 Marks	L3	CO1	PO1
		UNIT-II				
3.	a)	Consider a two point sources element array separated a distance "d". Determine the total far field E for the given array.	6 Marks	L3	CO2	PO3
	b)	An end fire array composed of λ/2 radiators with axes at right angles to the line of the array is required to have a power gain of 20. Determine the array length and the width of a major lobe between the nulls.	6 Marks	L2	CO2	PO2
		(OR)				
4.	a)	A uniform linear array consists of 16 isotropic sources with a spacing of λ/2. If the phase difference (φ) is -45^0. Determine HPBW, directivity and effective aperture.	6 Marks	L2	CO2	PO3
	b)	Discuss the conditions under which an array of antenna will behave either as a broadside array or an end fire array.	6 Marks	L3	CO2	PO2
		UNIT-III				
5.	a)	Narrate in detail about Cassegrain feed of a parabolic reflector.	6 Marks	L2	CO1	PO1
	b)	Give the equations for the effective length and effective width of the microstrip patch antenna and list the limitations of microstrip antennas.	6 Marks	L2	CO1	PO2
		(OR)				
6.	a)	With neat diagram, explain the helical antenna and briefly describe its operation in normal mode.	6 Marks	L3	CO1	PO1
	b)	Explain the Horn antenna. How this antenna fed and what is its application?	6 Marks	L2	CO1	PO2
		UNIT-IV				
7.	a)	Describe the methods for measuring the gain and half power beam width of an antenna.	6 Marks	L2	CO3	PO2
	b)	How the far field pattern of a receiving antenna experimentally determined? Explain with a neat block diagram.	6 Marks	L3	CO3	PO5
		(OR)				

8.	a)	With neat setup, explain the absolute method of measuring the gain of the antenna.	6 Marks	L3	CO3	PO2
	b)	Explain the first transmission formula and its applicability for antenna gain measurement.	6 Marks	L2	CO3	PO2

UNIT-V

9.	a)	Explain in detail the mechanism of space wave propagation with a neat sketch.	6 Marks	L2	CO4	PO2
	b)	Assume the reflection takes place at height of 400km and that the maximum density in the ionosphere corresponds to a 0.9 refractive index at 10MHz. What will be the range for flat earth condition for which the MUF is 10 MHz.	6 Marks	L3	CO4	PO2

(OR)

10.	a)	Write a short note on Collison frequency in the ionosphere.	6 Marks	L2	CO4	PO1
	b)	Explain briefly the terms Ray Path, Critical frequency and virtual height as used in ionospheric propagation.	6 Marks	L2	CO4	PO1

MICROCONTROLLERS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain bit manipulation instructions of 8051 with sufficient examples.	6 Marks	L1	CO1	PO1
	b)	Develop an assembly language program to convert a packed BCD to ASCII code.	6 Marks	L4	CO1	PO2
		(OR)				
2.	a)	Demonstrate counter operation in 8051.	6 Marks	L2	CO1	PO1
	b)	Differentiate 8051 and PIC microcontroller.	6 Marks	L4	CO1	PO2
		UNIT-II				
3.	a)	Draw neat block diagram of PIC18 controller and explain architecture.	6 Marks	L1	CO2	PO1
	b)	Identify the role of W register and illustrate the instructions that use W register.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Predict how status register helps the programmer to model conditions while composing software for PIC18 based products.	6 Marks	L1	CO2	PO1
	b)	Demonstrate the assembler directives used in PIC microcontroller programming.	6 Marks	L3	CO2	PO2
		UNIT-III				
5.	a)	With neat internal circuit diagram port pin of PIC18, describe data writing operation.	6 Marks	L2	CO3	PO2
	b)	Write an assembly language program for the PIC18 microcontroller to toggle all the bits of PORTB, PORTC and PORTD every ¼ of a second. Assume crystal frequency is 4MHz.	6 Marks	L4	CO3	PO3
		(OR)				
6.	a)	Summarize timer related SFRs and present steps to program timer 0 in 16 bit mode of PIC18.	6 Marks	L4	CO3	PO3
	b)	Write an assembly language program to generate a square wave of 40KHz on PORTB.5. Assume crystal frequency is 10MHz.	6 Marks	L4	CO3	PO3
		UNIT-IV				
7.	a)	Describe the interrupt handling mechanism of PIC18 microcontroller.	6 Marks	L2	CO4	PO1
	b)	Write a C code for PIC18 microcontroller to transfer serially the message “SVEC skilling the young minds to achieve unparallel brilliance”	6 Marks	L4	CO4	PO3
		(OR)				
8.	a)	Compare interrupt and polling methods of microcontroller programming to servicing the peripherals.	6 Marks	L3	CO4	PO6
	b)	Write a C code for PIC18 to illustrate external hardware interrupt programming.	6 Marks	L4	CO4	PO3

UNIT-V

9.	a)	Write a C code for PIC18 microcontroller to display the following data on LCD. First line: "Sree Vidhyanikethan" Second line: "Engineering College"	6 Marks	L4	CO4	PO3
	b)	Assess the role of Key de-bouncing routine while interfacing keyboard. Roll out the implementation routine for PIC18.	6 Marks	L4	CO4	PO6
		(OR)				
10.	a)	Plan connections to interface ADC0848 to PIC18 and code it to acquire all 8 channels with time delay 250 msec between each acquisition.	6 Marks	L3	CO4	PO8
	b)	Write a C code for PIC18 to monitor switch, which is connected to RD7, and perform the following: i) If SW=0, the DC motor moves with 50% duty cycle pulse ii) If SW=1, the DC motor moves with 25% duty cycle pulse.	6 Marks	L4	CO4	PO3

DIGITAL IC DESIGN

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Draw and describe the transfer characteristics of CMOS inverter.	6 Marks	L3	CO1	PO1
	b)	Distinguish between static and dynamic power dissipations in CMOS circuits.	6 Marks	L4	CO1	PO3
		(OR)				
2.	a)	What is domino logic?	6 Marks	L3	C02	PO2
	b)	How to minimize power consumption in CMOS gates?	6 Marks	L4	C02	PO4
		UNIT-II				
3.	a)	How to implement pipelined structures?	6 Marks	L3	CO2	PO1
	b)	Distinguish static and dynamic sequential circuits.	6 Marks	L4	C03	PO2
		(OR)				
4.	a)	What is clock skew and how to minimize it?	6 Marks	L2	CO2	PO1
	b)	How to synchronize clock in digital circuits?	6 Marks	L1	CO2	PO2
		UNIT-III				
5.	a)	Define logical effort.	6 Marks	L3	CO2	PO3
	b)	Determine the effect of transistor sizing on logical effort.	6 Marks	L4	CO2	PO3
		(OR)				
6.	a)	How to design low power CMOS circuits?	6 Marks	L4	CO1	PO2
	b)	Draw and explain DRAM cell.	6 Marks	L4	CO3	PO1
		UNIT-IV				
7.	a)	What is meant by subsystem design?	6 Marks	L2	CO1	PO1
	b)	Describe the operation of 4 bit shifter.	6 Marks	L1	CO1	PO2
		(OR)				
8.	a)	Explain modified Booth's algorithm.	6 Marks	L3	CO2	PO3
	b)	Implement ALU functions with adder.	6 Marks	L4	CO2	PO3
		UNIT-V				
9.	a)	What is structured design?	6 Marks	L3	CO4	PO4
	b)	Write short note on design methods.	6 Marks	L2	CO4	PO4
		(OR)				
10.	a)	Describe design flow.	6 Marks	L2	CO4	PO4
	b)	Write short note on design economics.	6 Marks	L2	CO4	PO4

SATELLITE COMMUNICATIONS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Derive an expression for the velocity of a satellite at its perigee and apogee in terms of semi major axis and eccentricity of earth.	6 Marks	L1	CO1	PO1
	b)	An earth station is located at latitude of 35º N and longitude of 65º E. calculate the antenna look angle for the satellite at 156º E.	6 Marks	L1	CO1	PO4
		(OR)				
2.	a)	What are look angles? With the help of suitable mathematical expressions, explain how elevation and azimuth angles are calculated.	6 Marks	L3	CO1	PO2
	b)	The earth rotates once per sidereal day of 23h 56 min 4.09s. Show that the radius of GEO is 42,164.17 km.	6 Marks	L4	CO1	PO2
		UNIT-II				
3.	a)	Derive the expressions for system noise temperature and G/T ratio for earth stations.	6 Marks	L2	CO2	PO1
	b)	Explain in detail about tracking subsystem with neat block diagram.	6 Marks	L1	CO2	PO3
		(OR)				
4.	a)	Explain the working of telemetry tracking and control with a suitable diagram.	6 Marks	L2	CO2	PO8
	b)	For a satellite circuit the individual link carrier-to-noise spectral density ratios are:uplink 100 dB Hz; Downlink: 87 dB Hz. Calculate the combined U/No ratio.	6 Marks	L3	CO2	PO2
		UNIT-III				
5.	a)	What are the advantages of CDMA over TDMA?	6 Marks	L2	CO3	PO1
	b)	With the help of block diagram, explain how CDMA is used for satellite communication.	6 Marks	L1	CO3	PO5
		(OR)				
6.	a)	Explain the spread spectrum transmission and reception.	6 Marks	L2	CO3	PO5
	b)	What are different antennas used on satellites? Explain with the help of typical satellite antenna patterns and coverage zones.	6 Marks	L1	CO3	PO2
		UNIT-IV				
7.	a)	Which factors influences the design of any satellite communication systems? Explain.	6 Marks	L3	CO4	PO1
	b)	Explain Delay and Throughput considerations for typical LEO, MEO and GEO systems.	6 Marks	L1	CO4	PO2
		(OR)				
8.	a)	Explain the terminal characteristics and common requirements of NGSO.	6 Marks	L2	CO4	PO1
	b)	Discuss the following NGSO (Non Geo Stationary Orbit) Constellation designs: i) Global star. ii) Teledesic.	6 Marks	L4	CO4	PO6

UNIT-V

9.	a)	Define Geodesy and Time Systems of NAVIC.	6 Marks	L1	CO5	PO1
	b)	Find the maximum Doppler shift of the L1 signal frequency for a GPS satellite has an elevation angle of 10^{o}.	6 Marks	L3	CO5	PO7
		(OR)				
10.	a)	Explain NAVIC space segment in detail.	6 Marks	L1	CO5	PO2
	b)	Explain the following satellite applications. i) GPS. ii) Satellite Navigational system.	6 Marks	L2	CO5	PO6

IMAGE PROCESSING

[Electrical and Electronics Engineering, Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Summarize various distance functions applied to digital images.	6 Marks	L1	CO1	PO1
	b)	Discuss the properties of Discrete cosine Transform	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Demonstrate the process of converting analog images to digital images.	6 Marks	L3	CO1	PO4
	b)	Discuss Walsh Transform with suitable equations.	6 Marks	L2	CO1	PO5
		UNIT-II				
3.	a)	Contrast between mean and median filters for restoring images in the presence of Gaussian noise.	6 Marks	L1	CO2	PO2
	b)	What is Homomorphic filtering? Explain in detail	6 Marks	L1	CO2	PO2
		(OR)				
4.	a)	What are image sharpening filters? Explain the various types of it.	6 Marks	L2	CO2	PO1
	b)	Discuss the image smoothing filter with its model in the spatial domain.	6 Marks	L2	CO2	PO5
		UNIT-III				
5.	a)	Compare the two morphological operations Erosion and Dilation.	6 Marks	L2	CO3	PO2
	b)	What is meant by Inverse filtering? Explain.	6 Marks	L1	CO3	PO4
		(OR)				
6.	a)	Discuss about Constrained Least square restoration for a digital image in detail.	6 Marks	L2	CO3	PO1
	b)	What are the two approaches for blind image restoration? Explain in detail.	6 Marks	L1	CO3	PO3
		UNIT-IV				
7.	a)	What is data redundancy? Explain three basic data redundancy.	6 Marks	L2	CO4	PO1
	b)	Explain run length coding with an example.	6 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Demonstrate the Error free Compression with relevant equations.	6 Marks	L2	CO4	PO5
	b)	What are the operations performed by error free compression?	6 Marks	L1	CO4	PO3
		UNIT-V				
9.	a)	Explain Boundary descriptors in detail with a neat diagram.	6 Marks	L1	CO5	PO2
	b)	How is line detected? Explain through the operators.	6 Marks	L2	CO6	PO5
		(OR)				
10.	a)	Describe the HSI color image model.	6 Marks	L2	CO5	PO2
	b)	Explain different edge detection operators and compare them.	6 Marks	L1	CO6	PO2

NANOSTRUCTURES AND NANOTECHNOLOGY

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Compare the various dimension of nanomaterials.	4 Marks	L1	CO1	PO1
	b)	Classify the NSM and discuss their chemical composition and the dimensionality with neat diagram.	8 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Write about the significance of specific surface area of nanomaterials.	4 Marks	L1	CO1	PO2
	b)	Discuss the Grain boundaries effects on NSM.	8 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Compare and contrast SEM and TEM.	6 Marks	L1	CO2	PO1
	b)	Describe the working functions of Laser induced electronic spectroscopy.	6 Marks	L2	CO2	PO2
		(OR)				
4.		Illustrate and discuss the X-ray Diffraction Intensity from a Polycrystalline Sample and derive the Bragga's Law.	12 Marks	L2	CO2	PO1
		UNIT-III				
5.		Elaborate the working principle, application and advantages of soft lithography.	12 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Explain the self-assemble method for preparation of nano wire/nanoparticles.	4 Marks	L1	CO3	PO1
	b)	Illustrate the schematic of the detailed lithographic process with necessary diagram.	8 Marks	L2	CO3	PO2
		UNIT-IV				
7.	a)	Describe the optical and electrical properties of nanotubes.	6 Marks	L1	CO4	PO1
	b)	Discuss the Gold Catalyst Preparation Methods with suitable examples.	6 Marks	L2	CO4	PO2
		(OR)				
8.		With help of neat diagram, explain the working of chemical vapor deposition.	12 Marks	L2	CO4	PO2
		UNIT-V				
9.	a)	Write short notes on nanobots.	6 Marks	L1	CO5	PO1
	b)	Discuss the Surface plasmon polaritons.	6 Marks	L2	CO5	PO2
		(OR)				
10.	a)	Discuss the anti-bacterial properties of various types of nanoparticle and its role in bio-nanotechnology.	6 Marks	L1	CO5	PO1
	b)	Summarize the various types of photochemical cell and its principle of operation.	6 Marks	L2	CO5	PO2

TESTING AND TESTABILITY

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Draw and explain about equivalent fault collapsing for Boolean gates, wires, and fanouts.	6 Marks	L1	CO1	PO1
	b)	List and explain various levels of modelling.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Define Fault dominance and explain in detail with an example.	6 Marks	L2	CO1	PO1
	b)	Explain the modeling digital circuit at logical level.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Illustrate the functionality of series fault simulation.	6 Marks	L2	CO1	PO1
	b)	Give brief summary of different modeling levels and simulators.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Give the steps involved in Concurrent Fault Simulation with an example.	6 Marks	L1	CO1	PO1
	b)	What is fault sampling? And analyze its performance.	6 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	Mention the basic steps involved in implementing D-Algorithm with an example.	6 Marks	L1	CO2	PO1
	b)	Explain FAN Algorithm using combinational circuit.	6 Marks	L2	CO2	PO2
		(OR)				
6.	a)	Describe the process of PODEM algorithm with the help of high-level flow chart.	6 Marks	L2	CO2	PO2
	b)	Explain 9V algorithm with an example used for ATG.	6 Marks	L2	CO2	PO2
		UNIT-IV				
7.	a)	Explain IDDQ testing and motivation behind it.	6 Marks	L2	CO3	PO2
	b)	How responses are observed at rated clock speed using At-speed testing?	6 Marks	L3	CO3	PO2
		(OR)				
8.	a)	What is Delta IDDQ testing and what are the differences between IDQQ and Delta IDDQ testing procedures?	6 Marks	L1	CO3	PO1
	b)	What is the need for BIC testing? And draw the diagram of BIC sensor.	6 Marks	L2	CO3	PO1
		UNIT-V				
9.	a)	What are the design practices of ad-hoc DFT method?	6 Marks	L1	CO4	PO1
	b)	Discuss the concept of BSIT.	6 Marks	L1	CO4	PO1
		(OR)				
10.	a)	What are the steps involved in partial scan design?	6 Marks	L1	CO4	PO1
	b)	Explain the process of Test-per-Clock Scan BIST Systems.	6 Marks	L1	CO4	PO1

III B.Tech II Semester (SVEC-19) Regular Examinations June – 2022

COMPILER DESIGN

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	With a neat sketch, explain the phases of compiler.	6 Marks	L2	CO1	PO1
	b)	Give the parse tree for the following while statement. while **A>B&A<=2*B-5** do **A:=A+B**.	6 Marks	L3	CO1	PO1
		(OR)				
2.	a)	Write the specification of YACC parser generator and explain with example.	6 Marks	L2	CO2	PO1
	b)	Explain Input buffering with example.	6 Marks	L2	CO2	PO1 PO2 PO3
		UNIT-II				
3.	a)	Define ambiguity. How to eliminate ambiguity explain with an example.	6 Marks	L3	CO3	PO1 PO2 PO3 PO4
	b)	Consider the grammar given below **E → E+E | E-E | E*E | E/E | a | b** Obtain leftmost and rightmost derivation trees and syntax trees for the string **a+b * a+b**.	6 Marks	L3	CO3	PO1 PO2 PO3 PO4
		(OR)				
4.	a)	Find the First and Follow sets for the following grammar. **E → TA** **A →+TA / ∈** **T → FB** **B → *FB / ∈** **F → (E) / id**	6 Marks	L3	CO3	PO1 PO2 PO3 PO4
	b)	Give the limitations of Recursive descent parser.	6 Marks	L2	CO3	PO1 PO2 PO3 PO4
		UNIT-III				
5.	a)	Give an example each for implicit and explicit type conversion.	6 Marks	L3	CO4	PO1 PO2
	b)	Define static checking. Give some examples of static checks.	6 Marks	L2	CO4	PO1 PO2
		(OR)				

6.	a)	Explain any two syntax directed translation. Explain applications of SDT's.	6 Marks	L2	CO4	PO1 PO2
	b)	Consider the CFG for a desk calculator. **S →E$ E → E+E|E-E|E*E|E/E|(E)|id** i) Write the semantic actions and Program fragment for the above grammar. ii) Construct the parse tree for the evaluation of the expression **23*5 + 4**.	6 Marks	L3	CO4	PO1 PO2
		UNIT-IV				
7.	a)	Compare various forms of three address code.	6 Marks	L2	CO4	PO1 PO2
	b)	Convert the following arithmetic expression into syntax tree and three address code $b* - (a + b)$.	6 Marks	L3	CO4	PO1 PO2
		(OR)				
8.	a)	Write a syntax directed definition to convert the given binary number with its decimal equivalent.	6 Marks	L3	CO4	PO1 PO2
	b)	Explain the usage of search tree in implementing symbol table.	6 Marks	L2	CO4	PO1 PO2
		UNIT-V				
9.	a)	What are the issues in code generation process? Explain in detail.	6 Marks	L2	CO5	PO1 PO2
	b)	Design an algorithm for code generation from three address code.	6 Marks	L3	CO5	PO1 PO2
		(OR)				
10.	a)	Elaborate on various function preserving techniques of loop optimization in code optimization phase.	6 Marks	L3	CO5	PO1 PO2
	b)	Identify different object code forms in code generation phase and explain them.	6 Marks	L3	CO5	PO1 PO2

MACHINE LEARNING

[Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) Discuss Concept learning as search with respect to General to specific ordering of hypothesis. — 6 Marks L2 CO1 PO1

   b) Illustrate Find S Algorithm over the Training instances given below. — 6 Marks L4 CO4 PO4

EXAMPLE	COLOR	TOUGHNESS	FUNGUS	APPEARANCE	POISONOUS
1.	GREEN	HARD	NO	WRINKELD	YES
2.	GREEN	HARD	YES	SMOOTH	NO
3.	BROWN	SOFT	NO	WRINKLED	NO
4.	ORANGE	HARD	NO	WRINKLED	YES
5.	GREEN	SOFT	YES	SMOOTH	YES
6.	GREEN	HARD	YES	WRINKLED	YES
7.	ORANGE	HARD	NO	WRINKLED	YES

(OR)

2. a) Apply candidate elimination algorithm to obtain the final version space. — 6 Marks L4 CO3 PO4

Sky	Temperature	Humid	Wind	Water	Forest	Output
sunny	warm	normal	strong	warm	same	yes
sunny	warm	high	strong	warm	same	yes
rainy	cold	high	strong	warm	change	no
sunny	warm	high	strong	cool	change	yes

   b) Explain perspectives and issues in machine learning. — 6 Marks L2 CO1 PO1

UNIT-II

3. a) Describe the following with examples: — 6 Marks L2 CO2 PO1
      i) Hypothesis space search.
      ii) Decision tree learning.
      iii) Version Space.

   b) Discuss the issues involved in decision tree learning. — 6 Marks L2 CO2 PO1

(OR)

4. a) Differentiate between supervised and unsupervised training with suitable examples. — 6 Marks L2 CO2 PO2

   b) Construct Decision trees to represent the Boolean Functions for the example. — 6 Marks L4 CO3 PO4
   (Day=Weekday ^ Discount=Given) V (Day=Weekend) V (Day= Holiday ^ Purchase=Yes)

UNIT-III

5.	a)	Discuss various types of problems in which Artificial Neural Network can be applied.	6 Marks	L2	CO4	PO1
	b)	Illustrate Bayesian belief network and conditional independence with example.	6 Marks	L2	CO4	PO1
		(OR)				
6.	a)	Derive the Back propagation rule considering the training rule for Output Unit weights and Training Rule for Hidden Unit weights.	6 Marks	L3	CO4	PO2
	b)	Describe Maximum Likelihood Hypothesis for predicting probabilities.	6 Marks	L2	CO4	PO1

UNIT-IV

7.	a)	Explain the concept of Bayes theorem with an example.	6 Marks	L2	CO2	PO1
	b)	Describe the concept of MDL.	6 Marks	L2	CO2	PO1
		(OR)				
8.	a)	Discuss the following: i) Prior Probability. ii) Conditional Probability. iii) Posterior Probability.	6 Marks	L2	CO2	PO1
	b)	Prove that how maximum likelihood (Bayesian learning) can be used in any learning algorithms that are used to minimize the squared error between actual output hypotheses and predicted output hypothesis.	6 Marks	L3	CO2	PO2

UNIT-V

9.	a)	Describe k-Nearest Neighbor learning in detail.	6 Marks	L2	CO2	PO1
	b)	Explain CADET System using Case based reasoning.	6 Marks	L2	CO2	PO1
		(OR)				
10.	a)	Explain Q learning algorithm assuming deterministic rewards and actions.	6 Marks	L2	CO2	PO1
	b)	How reinforcement learning problems differs from other function approximation tasks?	6 Marks	L2	CO2	PO2

CRYPTOGRAPHY AND NETWORK SECURITY

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	List out and explain Essential Network and Computer Security Requirements.	6 Marks	L1	CO1	PO2
	b)	Differentiate between secret-key encryption and public-key encryption.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Explain briefly passive and active security attacks.	6 Marks	L1	CO1	PO3
	b)	Differences between a monoalphabetic cipher and a polyalphabetic cipher and justify why polyalphabetic is more secure than monoalphabetic.	6 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Explain in detail Data Encryption Standard with example.	6 Marks	L1	CO1	PO1
	b)	List and explain Block cipher design principles.	6 Marks	L1	CO1	PO2
		(OR)				
4.	a)	Compare stream ciphers and block ciphers.	6 Marks	L2	CO1	PO4
	b)	Explain Decryption process in AES.	6 Marks	L1	CO1	PO1
		UNIT-III				
5.	a)	Differentiate Conventional and Public-Key Encryption.	6 Marks	L2	CO2	PO1
	b)	List and explain message authentication requirements.	6 Marks	L2	CO2	PO2
		(OR)				
6.	a)	Explain in detail about encryption and decryption of process RSA.	6 Marks	L2	CO2	PO2
	b)	Outline and explain in detail the two approaches of Digital signature.	6 Marks	L2	CO2	PO2
		UNIT-IV				
7.	a)	List four general categories of schemes for the distribution of public keys.	6 Marks	L2	CO3	PO1
	b)	Explain in detail about : i) Public announcement in public keys. ii) Publicly available directory.	6 Marks	L2	CO3	PO2
		(OR)				
8.	a)	Describe X.509 Certificate formats and fields.	6 Marks	L2	CO3	PO3
	b)	How does remote user authentication principles helps to adapt Authentication and security polices? Justify.	6 Marks	L4	CO3	PO3
		UNIT-V				
9.	a)	List out various types of MIME.	6 Marks	L2	CO4	PO1
	b)	Discuss authentication, header and ESP in detail with their packet format.	6 Marks	L2	CO4	PO2
		(OR)				
10.	a)	Explain in detail about the security services (PGP, S/MIME) for E-mail.	6 Marks	L2	CO4	PO2
	b)	List and briefly explain four principal services provided by S/MIME.	6 Marks	L2	CO4	PO2

CRYPTOGRAPHY AND NETWORK SECURITY

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the various active attacks. What security mechanisms are suggested to counter attack active attacks?	6 Marks	L2	CO1	PO2
	b)	Discuss any four Substitution Technique and list their merits and demerits.	6 Marks	L2	CO1	PO1 PO2
		(OR)				
2.	a)	Explain the operations, requirements, components of Network security model.	6 Marks	L2	CO1	PO1 PO4
	b)	Generate Cipher text for the plain text "Welcome to the Lab" using the Mono-alphabetic ciphering technique with key "craft".	6 Marks	L2	CO1	PO1 PO2
		UNIT-II				
3.	a)	Draw the general structure of DES. Explain the encryption and decryption process.	6 Marks	L2	CO1	PO1 PO2
	b)	Briefly discuss about Stream cipher principles.	6 Marks	L2	CO1	PO1 PO2
		(OR)				
4.	a)	Describe Triple DES and its applications.	6 Marks	L2	CO2	PO1 PO4
	b)	Write a note on Block Cipher Design Principles.	6 Marks	L2	CO2	PO1 PO4
		UNIT-III				
5.	a)	Given p=19, q=23, and e=3 Use RSA algorithm to find n, $\phi(n)$ and d.	6 Marks	L3	CO3	PO2 PO4
	b)	What characteristics are needed in secure hash function? Write about the security of hash functions and MACs.	6 Marks	L2	CO3	PO1 PO2
		(OR)				
6.	a)	Briefly explain the Diffie Hellman Key Exchange algorithm.	6 Marks	L2	CO2	PO1 PO2
	b)	Illustrate in detail about the message authentication code and its requirements.	6 Marks	L3	CO2	PO1 PO2
		UNIT-IV				
7.	a)	What are the environmental shortcomings of Kerberos4? How does Kerberos 5 address them?	6 Marks	L2	CO3	PO1 PO2
	b)	How does a remote user authentication principle helps to adapt Authentication and security polices? justify?	6 Marks	L4	CO3	PO1 PO2
		(OR)				
8.	a)	Give a brief notes on X.509 authentication services.	6 Marks	L2	CO3	PO1 PO2
	b)	Compare symmetric key distribution using symmetric and asymmetric encryption techniques.	6 Marks	L2	CO3	PO1 PO2

UNIT-V

9.	a)	Give the structure of PGP message generation. Explain with a diagram.	6 Marks	L2	CO4	PO1 PO2
	b)	Explain IP Security protocols in detail.	6 Marks	L2	CO4	PO1 PO2
		(OR)				
10.	a)	Give the summary of cryptographic algorithms used by S/MIME.	6 Marks	L2	CO4	PO1 PO2
	b)	Explain the web security considerations for transport level security.	6 Marks	L2	CO4	PO1 PO2

FULL STACK DEVELOPMENT

[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Demonstrate the selectors in jQuery, and mention the types of Selectors.	6 Marks	L3	CO1	PO1
	b)	Identify the effects methods used in jQuery and describe any 3 of them.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Construct a jQuery program using change() and submit() functions.	6 Marks	L3	CO1	PO2
	b)	Develop a jQuery program to set the background color to <p> tag using $().	6 Marks	L3	CO1	PO2
		UNIT-II				
3.	a)	Show the steps to Create the collection, print the documents in reverse order / descending order. student = ([{ S.No: 10, Name: "BHARAT" }, { S.No: 7, Name: "SITA" }, { S.No: 9, Name: "RAMA" }].	6 Marks	L2	CO2	PO2
	b)	Explain Projection and how to use projection in Mongo DB.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Illustrate the following methods with syntax. Limit( ) Skip( ) Pretty( )	6 Marks	L3	CO2	PO1
	b)	Prepare the commands for the following: Inserting multiple documents at a time into Collection Dropping a Collection and Database	6 Marks	L3	CO2	PO3
		UNIT-III				
5.	a)	Develop a Nodejs program to generate 8-digit OTP number.	8 Marks	L3	CO3	PO3
	b)	Explain about asynchronous programming with call back functions in NodeJs.	4 Marks	L2	CO3	PO4
		(OR)				
6.	a)	Implement a NodeJs program to create the document in Mongo database.	6 Marks	L4	CO3	PO4
	b)	Implement a NodeJs program to read 10 numbers from command line and display the numbers.	6 Marks	L3	CO3	PO2
		UNIT-IV				
7.	a)	Demonstrate mongo database connectivity using express to insert the following details into student collection? Student name, studentID, student Dept.	8 Marks	L2	CO4	PO5
	b)	Explain any three core functions of express it's features.	4 Marks	L2	CO4	PO1

(OR)

8.	a)	Establish the router configuration using GET request to display "welcome to endsem exam" message on browser in express.	6 Marks	L3	CO4	PO1
	b)	Demonstrate Mongo DB connectivity using express by fetching the data from the collection 'Student'.	6 Marks	L2	CO4	PO2

UNIT-V

9.	a)	Illustrate the process of data transfer from parent to child component and child to parent component.	6 Marks	L3	CO5	PO1
	b)	Describe the following with examples (i) Transpiller (ii) Single page application and how they work in angular.	6 Marks	L1	CO5	PO3

(OR)

10.	a)	Create three components student, faculty, admin. When the user gives the url '/student' it should display "hello iam student"? When the user gives the url '/faculty' it should display "hello students" and repeat same for admin as well write ts files and routing file?	6 Marks	L3	CO5	PO2
	b)	Demonstrate the usage of 'ngFor' for displaying all 10 items (create a array of 10 items) from on array "items" in a list.	6 Marks	L3	CO5	PO1

SOFT COMPUTING

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe the application and scope of neural networks.	6 Marks	L2	CO1	PO1
	b)	Compare biological neuron and artificial neuron.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Explain the concept of Back Propagation Learning.	6 Marks	L2	CO1	PO1
	b)	Write a note on Augmented Back Propagation Networks.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	State the activation function used in perceptron network.	6 Marks	L3	CO2	PO1 PO2 PO3 PO4
	b)	Explain the testing algorithm for back propagation network.	6 Marks	L2	CO2	PO1 PO2 PO3 PO4
		(OR)				
4.	a)	Compare feed forward and feedback network.	6 Marks	L2	CO2	PO1 PO2 PO3 PO4
	b)	Describe the factors that improve the convergence of learning in back propagation network.	6 Marks	L3	CO2	PO1 PO2 PO3 PO4
		UNIT-III				
5.	a)	Implement AND function using perceptron networks for bipolar inputs and targets.	6 Marks	L3	CO3	PO1 PO2
	b)	With architecture, describe how LVQ nets are trained.	6 Marks	L3	CO3	PO1 PO2
		(OR)				
6.	a)	With neat architecture, explain the training algorithm of Kohonen's Self-Organizing feature maps.	6 Marks	L3	CO3	PO1 PO2
	b)	State the merits and demerits of Kohonen self-organizing feature map.	6 Marks	L3	CO3	PO1 PO2
		UNIT-IV				
7.	a)	What is the cardinality of a fuzzy set? Whether a power set can be formed for a fuzzy set?	6 Marks	L2	CO4	PO1 PO2
	b)	List the properties of classical sets.	6 Marks	L2	CO4	PO1 PO2
		(OR)				

8.	a)	Explain the fuzzy sets operations using Venn diagram.	6 Marks	L2	CO4	PO1 PO2
	b)	Identify the importance of fuzzy sets and its application in engineering sector.	6 Marks	L2	CO4	PO1 PO2

UNIT-V

9.	a)	How are necessity and possibility measures obtained from belief and plausibility?	6 Marks	L2	CO5	PO1 PO2 PO3
	b)	How is an interval analysis obtained in fuzzy arithmetic? Explain.	6 Marks	L2	CO5	PO1 PO2 PO3

(OR)

10.	a)	Given the two intervals $\underline{E}$ = [2, 4], $\underline{F}$ = [4, -5], find the max and min operations over these intervals.	6 Marks	L3	CO5	PO1 PO2 PO3
	b)	Compare and contrast traditional algorithm and genetic algorithm.	6 Marks	L2	CO5	PO1 PO2 PO3

AD HOC AND WIRELESS SENSOR NETWORKS

[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain about the electromagnetic spectrum.	6 Marks	L2	CO1	PO2
	b)	Differentiate cellular Networks and Ad hoc Wireless Networks.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	List the major advantages of Ad hoc Wireless Internet.	6 Marks	L2	CO4	PO6
	b)	Describe the various characteristics of the wireless channel.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Compare and Contrast Various Contention Protocols.	6 Marks	L3	CO2	PO2
	b)	Write the major issues that are taken into consideration for designing a MAC protocol.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	How Power consumption effects routing? Analyze the problem with an example.	6 Marks	L2	CO2	PO2
	b)	Illustrate hidden and exposed terminals with clear diagrams.	6 Marks	L4	CO2	PO1
		UNIT-III				
5.	a)	Apply On Demand Routing Protocols to find out Minimal path in Ad hoc Networks.	6 Marks	L3	CO2	PO3
	b)	Discuss in detail hybrid routing protocols.	6 Marks	L2	CO2	PO1
		(OR)				
6.	a)	Comment on Table driven routing protocols could be advantageous or disadvantageous as far as routing of networks in considered.	6 Marks	L1	CO2	PO3
	b)	Write the issues in designing a transport layer protocol for adhoc wireless networks.	6 Marks	L2	CO2	PO2
		UNIT-IV				
7.		With a neat sketch, discuss in detail about sensor network architecture.	12 Marks	L2	CO1	PO1
		(OR)				
8.	a)	Write the applications of Sensor Networks.	6 Marks	L2	CO1	PO1
	b)	Discuss energy consumption of sensor nodes.	6 Marks	L2	CO1	PO1
		UNIT-V				
9.	a)	Write a short on IEEE 802.15.4 MAC protocol.	6 Marks	L2	CO4	PO6
	b)	Discuss the concept of Bluetooth.	6 Marks	L2	CO4	PO6
		(OR)				
10.	a)	Explain Reliable MASN communication protocols.	6 Marks	L2	CO3	PO2
	b)	Write short notes on Schedule based protocols.	6 Marks	L1	CO3	PO2

PROCESS CONTROL INSTRUMENTATION

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	List the applications of process control.	6 Marks	L1	CO1	PO1
	b)	Determine the transfer function of a first order thermal system with necessary assumptions.	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Give the characteristics of liquid and gas system.	8 Marks	L2	CO1	PO1
	b)	What is self-regulation? List the advantages of self-regulation.	4 Marks	L1	CO1	PO1

UNIT-II

3.	a)	Explain the floating control mode in detail.	6 Marks	L2	CO2	PO3
	b)	Summarize the characteristics of the derivate mode.	6 Marks	L2	CO2	PO3
		(OR)				
4.	a)	Draw the output of a PD controller as a function of time for given error signal shown in figure. Assume that the Proportional gain $K_p = 5$, Derivative gain $K_D = 0.5$ sec and $p_o = 20\%$.	6 Marks	L3	CO2	PO4

	b)	Explain the working of pneumatic proportional controller with neat diagram.	6 Marks	L2	CO2	PO3

UNIT-III

5.	a)	Describe the ¼ decay ratio, IAE, ISE and ITAE performance criteria of controller settings.	6 Marks	L1	CO2	PO3
	b)	Discuss the procedure for setting controller parameters using frequency response method.	6 Marks	L2	CO2	PO4
		(OR)				
6.		Describe the controller tuning procedure in Cohen-Coon method.	12 Marks	L1	CO2	PO2

UNIT-IV

7.	a)	Sketch a pneumatic spring type actuator, label its parts and explain its working principle.	6 Marks	L3	CO3	PO1
	b)	The stroke length of a spring motor is 7.5 cm and the diameter of the diaphragm is 25 cm, what should be the spring constant? For a specified hysteresis of 1 per cent, what would be the thrust and frictional forces?	6 Marks	L3	CO3	PO5
		(OR)				

8.	a)	Write a shot note on Sliding-stem control valves.	6 Marks	L2	CO3	PO1
	b)	What is control valve sizing? Explain in detail.	6 Marks	L1	CO3	PO1

UNIT-V

9.		Explain the feed forward control with an example. Compare this with feedback control.	12 Marks	L2	CO4	PO6

(OR)

10	a)	Explain over-ride control scheme.	8 Marks	L2	CO4	PO5
.	b)	What is constant reflex rate and steam rate?	4 Marks	L1	CO4	PO2

CODE No.: 19BT61002 SVEC-19

ANALYTICAL INSTRUMENTATION

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe the working of paramagnetic gas analyzer with suitable diagrams.	6 Marks	L1	CO1	PO1
	b)	Explain different conductivity meters with neat sketches.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Outline the working principle of any two pH meters with necessary diagrams.	6 Marks	L3	CO2	PO2
	b)	Illustrate the working of hydrogen gas analyzer.	6 Marks	L3	CO1	PO1
		UNIT-II				
3.	a)	Interpret the application of detection system in gas chromatography.	6 Marks	L2	CO1	PO1
	b)	Select suitable liquid chromatography detector system for analysis of a liquid sample.	6 Marks	L3	CO2	PO5
		(OR)				
4.	a)	Outline the construction and working principle of fluorescence detector with neat diagram.	6 Marks	L4	CO1	PO2
	b)	Illustrate the significance of refractive index detector in liquid chromatography.	6 Marks	L3	CO2	PO1
		UNIT-III				
5.	a)	Explain the various components of absorption instrument with a neat sketch.	6 Marks	L2	CO1	PO1
	b)	Outline the working principle of double beam spectrophotometer.	6 Marks	L4	CO2	PO2
		(OR)				
6.	a)	Illustrate the working of FTIR spectrophotometer with neat diagrams.	6 Marks	L3	CO1	PO1
	b)	Select a suitable spectrophotometer for qualitative analysis in the field of biomedical with a detailed explanation.	6 Marks	L3	CO2	PO6
		UNIT-IV				
7.	a)	Illustrate the working of atomic absorption spectrometer with neat diagram.	6 Marks	L3	CO2	PO1
	b)	Outline the use of clinical flame photometer in biomedical applications.	6 Marks	L4	CO1	PO2
		(OR)				
8.	a)	Describe the working of Magnetic deflection type mass analyzer.	6 Marks	L2	CO2	PO1
	b)	Discuss the construction and working of ESR spectrometer with a neat sketch.	6 Marks	L2	CO2	PO1
		UNIT-V				
9.	a)	Outline the significance of nuclear radiation detection in nuclear power plants.	6 Marks	L4	CO3	PO7
	b)	Compare different nuclear radiation detectors.	6 Marks	L4	CO3	PO2

(OR)

10.	a)	Analyze the working of any one pollution monitoring instrument with suitable application.	6 Marks	L4	CO4	PO7
	b)	Explain turbidity and nephelometery with neat diagrams.	6 Marks	L2	CO4	PO1

INDUSTRIAL DATA COMMUNICATIONS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Sketch a typical SCADA system.	6 Marks	L3	CO1	PO1
	b)	Explain impedance coupling of electrical noise and the solution to minimize its effect in the data communications system.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	With a neat diagram, explain various layers of OSI model.	6 Marks	L2	CO1	PO1
	b)	Discuss some rules that are useful in troubleshooting a communications system effectively.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Describe half-duplex operation of the EIA-232 interface.	8 Marks	L2	CO1	PO1
	b)	Compare EIA-232 and EIA-485 interfaces.	4 Marks	L4	CO1	PO2
		(OR)				
4.	a)	Discuss the ways by which noise can be induced into an EIA-232 circuit.	6 Marks	L2	CO1	PO1
	b)	Analyze the test equipment used for troubleshooting an EIA-485 system.	6 Marks	L4	CO1	PO2
		UNIT-III				
5.	a)	Interpret the frequency shift keying technique used in HART protocol with a neat sketch.	6 Marks	L3	CO2	PO1
	b)	Describe the main features of AS-interface.	6 Marks	L2	CO2	PO1
		(OR)				
6.	a)	How to use HART protocol in point-to-point or multi-drop network configurations?	6 Marks	L3	CO2	PO1
	b)	Explain in detail about data link layer in AS-interface.	6 Marks	L2	CO2	PO1
		UNIT-IV				
7.	a)	Summarize the architecture of the ProfiBus protocol stack	6 Marks	L3	CO3	PO1
	b)	Illustrate the operation of ProfiBus DP mono-master and multi-master systems.	6 Marks	L4	CO3	PO2
		(OR)				
8.	a)	Analyze the relationship between the real field device and the Virtual Field Device (VFD).	6 Marks	L4	CO3	PO2
	b)	Discuss the role of bus monitor in a ProfiBus network.	6 Marks	L2	CO3	PO1
		UNIT-V				
9.	a)	Describe Manchester Bi-phase L encoding scheme used in physical layer of Foundation Field Bus, with a neat diagram.	6 Marks	L2	CO4	PO1
	b)	Discuss about wiring configuration of FieldBus with a neat diagram.	6 Marks	L2	CO4	PO1
		(OR)				
10.	a)	Summarize the features and benefits of Foundation Field Bus.	6 Marks	L2	CO4	PO1
	b)	Explain data link layer and application layer of Foundation Field Bus.	6 Marks	L2	CO4	PO1

POWER PLANT INSTRUMENTATION

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	With neat sketch, describe the process of thermal power plant.	6 Marks	L2	CO1	PO1
	b)	Emphasize the objectives of instrumentation and control in power generation.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	With neat sketch, describe the process of hydropower plant.	6 Marks	L2	CO1	PO1
	b)	Categorize the various conventional power plants.	6 Marks	L4	CO1	PO1
		UNIT-II				
3.	a)	Describe the operation of Gas holder level measuring technique for the measurement of gas in air fuel circuit.	6 Marks	L2	CO4	PO2
	b)	Explain the measurement of fuel flow/quantity in air fuel circuit.	6 Marks	L2	CO4	PO2
		(OR)				
4.	a)	Illustrate the operation of steam temperature measurement with a neat sketch.	6 Marks	L2	CO2	PO2
	b)	Justify how the differential pressure method is used for drum level measurement.	6 Marks	L5	CO2	PO2
		UNIT-III				
5.	a)	Describe the operation of Cascade steam temperature control with neat sketch.	6 Marks	L2	CO3	PO1
	b)	Explain the operation of Furnace draft control in air fuel circuit.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Explain the operation of two element drum level control in boilers.	6 Marks	L2	CO3	PO2
	b)	Illustrate the operation of super heater by pass damper control in fire side steam temperature control with a neat sketch.	6 Marks	L2	CO3	PO2
		UNIT-IV				
7.	a)	Explain the operation of turbine safety monitoring system with a neat sketch.	6 Marks	L2	CO5	PO1
	b)	Design a system to measure mechanical parameters in the measurement of turbine in power plants.	6 Marks	L6	CO4	PO2
		(OR)				
8.	a)	Illustrate the schematic diagram of turbo alternator cooling system and describe briefly.	6 Marks	L1	CO1	PO1
	b)	Describe the operation of various controls in lubrication system.	6 Marks	L2	CO4	PO1
		UNIT-V				
9.		Discuss in detail about start up and shutdown interlocks in boilers.	12 Marks	L6	CO5	PO1
		(OR)				
10.	a)	Discuss in detail about explosion hazards and intrinsic safety.	6 Marks	L2	CO5	PO6
	b)	Discuss in detail about maintenance and life cycle costs in power plants.	6 Marks	L6	CO5	PO1

CLOUD COMPUTING

[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe challenges involved in adopting cloud computing.	6 Marks	L1	CO1	PO1
	b)	Differentiate types of virtualizations.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Define Virtualization. List and explain the characteristics of Virtualization.	6 Marks	L2	CO1	PO1
	b)	What is Xen? Discuss its elements for virtualization.	6 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Describe different types of deployment models in Cloud computing.	6 Marks	L2	CO2	PO1
	b)	Describe the features of the Jolicloud Netbook OS.	6 Marks	L1	CO2	PO1
		(OR)				
4.	a)	Illustrate and explain the portion of the cloud computing stack that is designated as the server.	6 Marks	L2	CO2	PO1
	b)	Compare and Contrast between NIST and Cloud Cube model.	6 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	Recall IaaS workload. Show how three virtual private server instances are partitioned in an IaaS stack.	8 Marks	L1	CO3	PO1
	b)	Describe system Metrics for capacity planning.	4 Marks	L1	CO3	PO2
		(OR)				
6.	a)	Describe the baseline measurements for Capacity planning.	6 Marks	L1	CO3	PO1
	b)	What is capacity planning? Explain the steps involved in the iterative process of capacity planning.	6 Marks	L2	CO3	PO4
		UNIT-IV				
7.	a)	Distinguish between Indexed search and the dark web in Google service portfolio.	7 Marks	L4	CO4	PO3
	b)	Describe the features of Windows Azure platform.	5 marks	L2	CO4	PO3
		(OR)				
8.		Azure is a virtualized infrastructure to which a set of additional enterprise services has been layered on top. Justify.	12 Marks	L4	CO4	PO3
		UNIT-V				
9.	a)	Describe different types of Amazon Database Services.	8 Marks	L2	CO5	PO2
	b)	Describe Elastic Compute Cloud (EC2).	4 Marks	L2	CO5	PO3
		(OR)				
10.		Create a virtual machine instance with 2GB RAM and 200 GB hard disk configuration on Amazon Web Services (AWS) cloud through Elastic Compute Cloud (EC2) service and develop a home web page for online book store information.	12 Marks	L4	CO5	PO5

INFORMATION SECURITY

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Enumerate the impact of active and passive attacks on a system with necessary examples.	6 Marks	L1	CO1	PO1
	b)	List and explain the different security mechanisms.	6 Marks	L1	CO1	PO2
		(OR)				
2.	a)	Explain about Distributed SYN flood attack.	6 Marks	L1	CO1	PO2
	b)	List and explain the four phases in the lifetime of a virus.	6 Marks	L1	CO2	PO3
		UNIT-II				
3.	a)	Draw SSH protocol stack explaining SSH connection protocol.	6 Marks	L2	CO3	PO2
	b)	List the nine services provided by wireless LANs defined by IEEE 802.11.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Interpret the working of SSL record protocol operation.	6 Marks	L2	CO3	PO1
	b)	Draw the WAP architecture explaining the different components.	6 Marks	L2	CO3	PO2
		UNIT-III				
5.	a)	List the MIME content types with suitable description.	6 Marks	L1	CO4	PO1
	b)	Illustrate the key components of the internet mail architecture.	6 Marks	L3	CO4	PO4
		(OR)				
6.	a)	Summarize the function of keyrings in PGP.	6 Marks	L2	CO4	PO1
	b)	Compare the transport and tunnel modes of IPSec.	6 Marks	L3	CO4	PO3
		UNIT-IV				
7.	a)	Discuss briefly about Statistical Anamoly detection approach for intrusion detection.	6 Marks	L2	CO5	PO2
	b)	List and briefly define four techniques to avoid guessable passwords.	6 Marks	L1	CO6	PO3
		(OR)				
8.	a)	Illustrate the functioning of a packet filtering firewall.	6 Marks	L3	CO5	PO1
	b)	Define the terms: i) Masquerader. ii) Misfeasor. iii) Clandestine user.	6 Marks	L2	CO2	PO1
		UNIT-V				
9.	a)	Identify the steps involved in installing Tor.	6 Marks	L2	CO6	PO5
	b)	Discuss various tools that can be used for safeguarding against phishing.	6 Marks	L2	CO6	PO1
		(OR)				
10.	a)	Illustrate the steps to setup GPG with Apple's Mail.app.	6 Marks	L3	CO6	PO5
	b)	Describe how PwdHash and Remote PwdHash would help users for password management.	6 Marks	L2	CO6	PO1

EMBEDDED SYSTEMS

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Compare Harvard and Von-Neumann architecture.	6 Marks	L3	CO1	PO1
	b)	Summarize the registers of MSP 430.	6 Marks	L4	CO1	PO2
		(OR)				
2.	a)	Describe anatomy of a small microcontroller.	6 Marks	L2	CO1	PO2
	b)	Discuss different types of exceptions.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Illustrate the addressing modes of MSP 430.	6 Marks	L3	CO2	PO1
	b)	Write a C code for MSP 430 to flash LED with a frequency of 1Hz using a software delay.	6 Marks	L4	CO2	PO3
		(OR)				
4.		Discuss various aspects of C for Embedded Systems.	12 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	Demonstrate each bit of watchdog timer control register.	6 Marks	L3	CO3	PO6
	b)	List the steps involved s a program to carry out measurements of the charging time followed by the discharging time of Comparator_A.	6 Marks	L1	CO3	PO6
		(OR)				
6.	a)	Write a short note on capacitative touch sensing with Comparator_A.	6 Marks	L4	CO3	PO1
	b)	Compare ADC10 and ADC12.	6 Marks	L3	CO3	PO8
		UNIT-IV				
7.	a)	Demonstrate interfacing of master with multiple slaves using SPI.	6 Marks	L3	CO3	PO8
	b)	Describe the bit banging in I2C Protocol.	6 Marks	L2	CO3	PO8
		(OR)				
8.	a)	Write short notes on CAN bus.	6 Marks	L1	CO3	PO1
	b)	Draw the simplified block diagram of the USCI_B0 module in SPI master mode.	6 Marks	L1	CO3	PO2
		UNIT-V				
9.	a)	Justify the need for concurrent process model.	6 Marks	L3	CO4	PO8
	b)	Compare different IC technologies.	6 Marks	L3	CO4	PO6
		(OR)				
10.	a)	Illustrate the elevator problem using PSM.	6 Marks	L4	CO4	PO8
	b)	Discuss various design technologies used for embedded system development.	6 Marks	L2	CO4	PO6

BIG DATA TECHNOLOGIES

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the concept of Hadoop EcoSystem.	6 Marks	L3	CO1	PO1
	b)	Explain the advantages and applications of BigData.	6 Marks	L3	CO1	PO1
		(OR)				
2.	a)	Describe the structure of Big Data.	6 Marks	L1	CO1	PO1
	b)	Illustrate various Hadoop releases.	6 Marks	L3	CO1	PO5
		UNIT-II				
3.		Explain the below concepts. i) Data flow. ii) Hadoop Archives. iii) Java Interface.	12 Marks	L3	CO2	PO1
		(OR)				
4.	a)	Explain the concept of Hadoop Distributed file system.	6 Marks	L3	CO2	PO2
	b)	Define Integrity. Explain Hadoop data Integrity.	6 Marks	L3	CO2	PO1
		UNIT-III				
5.	a)	List and explain MapReduce types.	6 Marks	L1	CO3	PO2
	b)	Outline the concept of sorting feature in Hadoop.	6 Marks	L2	CO3	PO3
		(OR)				
6.		Discuss the process of data analysis with Hadoop.	12 Marks	L2	CO3	PO3
		UNIT-IV				
7.	a)	State Hive command to create a table with four columns: First name, last name, age, and Gender.	6 Marks	L1	CO4	PO2
	b)	Explain the difference between MapReduce and PIG.	6 Marks	L3	CO4	PO3
		(OR)				
8.	a)	Explain the concept of Zookeeper.	6 Marks	L3	CO4	PO3
	b)	Explain the concept of joins in MapReduce.	6 Marks	L3	CO3	PO2
		UNIT-V				
9.	a)	Explain the concept of Data Processing operators.	6 Marks	L3	CO3	PO3
	b)	Explain how to import large objects by using Sqoop.	6 Marks	L3	CO4	PO5
		(OR)				
10.	a)	Describe the concept of SQOOP in detail.	6 Marks	L1	CO4	PO3
	b)	Write the hive commands to create Twitter Database.	6 Marks	L4	CO4	PO8

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Anantapur)

IV B.Tech I Semester (SVEC10) Supplementary Examinations February – 2021

FINITE ELEMENT METHODS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer any FIVE questions
All questions carry equal marks

1. a) Enumerate the advantage of FEM. List out some of the computer software packages available for FEM. Mention their general capabilities.
b) In a plane stress problem, we have σ_x=1000MPa, σ_y= -150MPa, E=200GPa, G =100GPa and v = 0.3. Deter the value of the stress ϵ_x, ϵ_y and σ_{xy}.

2. Derive the element stiffness matrix for a quadratic one dimensional bar element.

3. A cantilever beam of length 3.4m has an elastic spring support of stiffness 230kN/m at its free end, where a point load of 13kN acts. Take Young's modulus as 200GPa and area moment of inertia of the cross-section as 1×10^{-4} m^4. Determine the displacement and slope at the node and reactions.

4. For a triangular plate shown in the figure 1, determine the deflection at the point of load using one triangular element. Thickness is 10mm, E = 70×10^3MPa, μ = 0.3

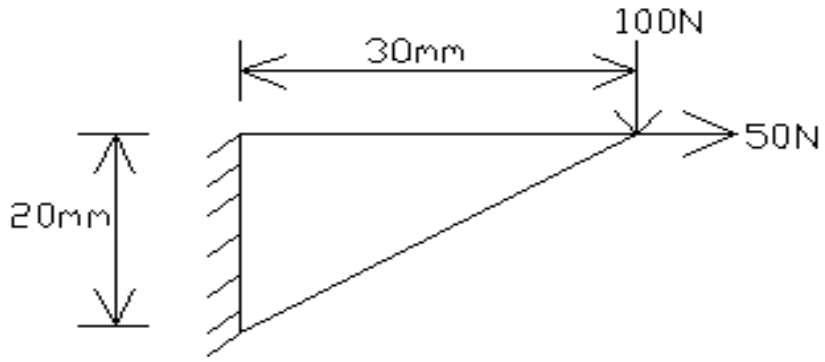

Fig. 1

5. Derive the element stiffness matrix for a quadrilateral element.

6. Heat is generated in a large plate with k = 0.7 w/m°c at the rate of 3000 w/m^3, the plate is 20cm thickness, outside surface of plate is exposed to atmospheric air at 35°c with convective heat transfer coefficient, h=25w/m^2 ^{0}c. Determine the temperature distribution in plate by taking 2 elements.

7. Explain the basic differential equations for fluid flow problems, its one dimensional formulation and corresponding finite element equations and also method of solving by taking a suitable example.

8. Determine the lowest Eigen value and corresponding mode for the beam shown in the Fig.2. Take E = 200GPa, ρ = 7840kg/m^3, I = 2000mm^4, A = 240mm^2.

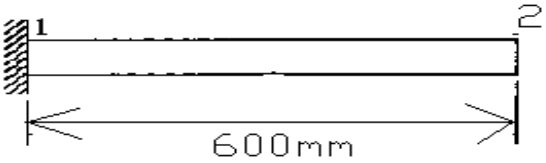

Fig. 2

DIGITAL SIGNAL PROCESSING

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Determine the z-transform the signal $x(n) = (-1)^n \cos\left(\frac{n\pi}{3}\right)u(n)$ 7 Marks

b) Find the DTFT of the sequence $x(n) = \cos(n\pi/3)u(n)$. 7 Marks

(OR)

2 a) Explain the significance of frequency domain representation of discrete time signals and system. 7 Marks

b) Determine the response of discrete time system given by difference $Y(n) = -0.8y(n-1) + x(n)$. When the input is step and y(-1)=0. 7 Marks

UNIT-II

3 a) Contrast the transforms DTFT, DFS and DFT. 7 Marks

b) Develop the inverse FFT algorithm with neat sketch for N=8. 7 Marks

(OR)

4 a) What is DFT? Interpret role of DFT over the DTFT. 7 Marks

b) Develop the DIT FFT algorithm with neat sketch for N=8. 7 Marks

UNIT-III

5 a) Derive the relation between analog and digital frequency in bilinear transformation. 7 Marks

b) Compare Bi-linear and Impulse Invariant Transformations. 7 Marks

(OR)

6 a) For the given specifications α_p = 3 dB; α_s = 15 dB Ω_p = 1000 Rad/sec. Design a high pass filter using Butterworth approximation. 7 Marks

b) Derive the frequency mapping expression for bilinear transformation. 7 Marks

UNIT-IV

7 a) Design a linear phase FIR low pass filter using rectangular window with a cut off frequency ω_c=0.2πrad/sample by taking 7samples of window sequence. 7 Marks

b) What is the drawback in FIR filter design using windows and frequency sampling method? How is it overcome? 7 Marks

(OR)

8 a) Explain the design of linear phase FIR filter by the Frequency sampling method. 5 Marks

b) Obtain the Cascade and parallel form of realizations for the following transfer function $H(z) = \frac{16(1+z)z^2}{(4z^2 - 27z + 1)(4z + 3)}$. 9 Marks

UNIT-V

9 a) Describe the function of on-chip peripherals used in P-DSP. 7 Marks

b) Explain the addressing modes supported by C6X. 7 Marks

(OR)

10 a) Discuss about multiple access memory and multiported memory. 7 Marks

b) Explain the features of 'C6X processes. 7 Marks

PRINCIPLES OF COMMUNICATION

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) What are the types of communications? Explain. 6 Marks

b) Deduct the Fourier transform for a Gate function 8 Marks

$G_\tau(t)=1 \quad |t| < \tau/2$

$0 \quad |t| > \tau/2$

(OR)

2 a) Explain in detail about each block of basic electrical communication system with neat block diagram. 8 Marks

b) Define autocorrelation function and prove all its properties. 6 Marks

UNIT-II

3 a) With necessary expressions, waveforms and spectrums, explain AM for an arbitrary baseband signal m(t). 8 Marks

b) Explain the indirect method of generation of FM wave. 6 Marks

(OR)

4 a) What is the need for modulation? 4 Marks

b) Deduce the equation for narrow band FM. 6 Marks

c) An AM transmitter radiates 9KW of power when the carrier is Unmodulated and 10.125KW when the carrier is sinusoidally modulated. Find the modulation index. 4 Marks

UNIT-III

5 a) What are FDM And TDM? Compare both of them. 8 Marks

b) Explain cross talk in PAM due to HF and LF limitations of the channel. Which of these two affects more than one channel and mention the reasons? 6 Marks

(OR)

6 a) Explain natural sampling and flat top sampling and compare these two. 8 Marks

b) Two signals are band limited to 3 and 5 kHz, and are to be time division multiplexed. Find the maximum possible interval between two successive samples. 6 Marks

UNIT-IV

7 a) Discuss about the block diagram of PCM and explain each block in detail. 8 Marks

b) Explain the Generation and Detection of Coherent Binary PSK Signals. 6 Marks

(OR)

8 a) Determine the bandwidth required for M-ary FSK. Draw the geometrical representation of M-ary FSK signal. 9 Marks

b) Discuss the principle of DPSK. 5 Marks

UNIT-V

9 a) If a transmitter transmits the message with their probabilities are 0.4, 0.2, 0.1, 0.21, 0.05, 0.03, 0.01. Find the coding efficiency using Shanon-Fano algorithm. 8 Marks

b) Define minimum distance of a code word and weight of the code word. 6 Marks

(OR)

10 a) Write short notes on the following: 6 Marks

i) Mutual Information. ii) Average information.

b) Discuss and examine the Convolution Codes with examples. 8 Marks

DATAWAREHOUSING AND DATA MINING

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw and explain the components of Data Warehouse Architecture.	8 Marks
	b)	Differentiate OLAP ***Vs*** OLTP systems.	6 Marks
		(OR)	
2	a)	Discuss in detail about data mining functionalities.	8 Marks
	b)	Explain the concept of data generalization and summarization based characterization.	6 Marks

UNIT-II

3	a)	What is preprocessing and why is it required to preprocess the data.	7 Marks
	b)	Define data cleaning. Explain basic methods for data cleaning.	7 Marks
		(OR)	
4	a)	Write about data integration and transformation with examples.	7 Marks
	b)	Explain about data cube aggregation in data reduction.	7 Marks

UNIT-III

5		What is Association Rule? Write and explain Apriori algorithm with a suitable example.	14 Marks
		(OR)	
6		Explain in detail about Multilevel and Multidimensional association rule mining.	14 Marks

UNIT-IV

7	a)	What is tree pruning? Explain various pruning techniques.	4 Marks
	b)	Explain feed forward neural network with suitable example.	10 Marks
		(OR)	
8	a)	Differentiate classification and Prediction.	6 Marks
	b)	Describe various Prediction techniques with suitable examples.	8 Marks

UNIT-V

9	a)	Explain Density based method with example.	7 Marks
	b)	Differentiate between partitioning and Hierarchical clustering methods.	7 Marks
		(OR)	
10	a)	Describe about Detection methods.	7 Marks
	b)	Describe AGNES vs DIANA.	7 Marks

STEEL STRUCTURES
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Mention the standard specifications and codes of steel structures. Mention mechanical properties of steel. 14 Marks

(OR)

2 Define rolled steel sections and mention the types of rolled steel sections with a neat sketch representing the shapes and dimensions. 14 Marks

UNIT-II

3 Two ISF sections 200mm x 10mm each and 1.5m long are to be jointed to make a member length of 3.0m. Design a butt joint with the bolts arranged in the diamond pattern. The flats are supposed to carry a factored tensile force of 450KN. Steel of grade Fe410 .20mm diameter bolts of a grade 4.6 are used to make the connection also determine the net tensile strength or the main plate and corner plate. 14 Marks

(OR)

4 Design a fillet weld to join a tension member consisting of 2 ISA 100mm x 75mm x 8mm to a 12mm thick gusset plate. The factored tensile load is 410 KN. 14 Marks

UNIT-III

5 Design a single angle to carry a tension of 150kN. The end connection is to be done using M20 bolts of product Grade C and property class 4.6. The yield and ultimate strengths of the steel are 250MPa and 410MPa, respectively. 14 Marks

(OR)

6 Design a single angle discontinuous strut to carry a factored axial compressive load of 65 kN. The length of strut is 3.0m between intersections. It is connected to 12mm thick gusset plate by 20mm diameter 4.6 grade bolts. Use steel of grade Fe 410. 14 Marks

UNIT-IV

7 Design a laterally unsupported beam for the following data: 14 Marks
Effective span = 4 m; Maximum bending moment = 550 kN-m;
Maximum shear force=200 kN; Steel of grade Fe = 410.

(OR)

8 Design a column of effective length 5.90 m. It is subjected to a factored axial compressive load of 2000 kN. Provide two channels back to back connected with battens by site welded connections. Use steel of grade Fe 410. 14 Marks

UNIT-V

9	A column of ISMB 400 is subjected to an axial force of 750kN. Use appropriate techniques to analyse and design suitable base plate. Assume necessary data required.	14 Marks

(OR)

10	A built up column consists ISHB 400@ 77.40 kg/m with one 300mm x 12mm flange plate on each side. The column carries an axial load of 2600kN. Determine the suitable dimension for a gusseted base, if the column is supported on concrete pedestal with a bearing pressure of $5N/mm^2$.	14 Marks

IV B.Tech I Semester (SVEC-14) Supplementary Examinations August – 2021

TRANSPORTATION ENGINEERING–II

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) A vehicle of weight 2.0 tonneshidsthreough a distance equal to 40 m before colliding with another parked vehicle of weight 1.0 tonne. After collision both the vehicles skid through a distance equal to 12 m before stopping. Compute the initial speed of the moving vehicle. Assume coefficient of friction as 0.5. 7 Marks

b) Discuss about accident studies and records. Analyse accident rate with respect to time 7 Marks

(OR)

2 a) Explain Road user and Vehicle characteristics. 7 Marks

b) Analyse graphically and through formulae, the relationship between Speed, Travel time, Volume, Density and Capacity. 7 Marks

UNIT-II

3 a) Indicate the how the traffic volume data are presented and results used in traffic volume studies? 7 Marks

b) A vehicle skids through a distance equal to 40 m before colliding with another parked vehicle, the weight of which is 75 per cent of the former. After collision if both the vehicles skid through 14 m before stopping compute the initial speed of moving vehicle. Assume friction coefficient of 0.62. 7 Marks

(OR)

4 a) Explain traffic capacity, basic capacity, possible capacity, practical capacity and PCU. 7 Marks

b) Calculate the basic capacity of traffic lane at a speed of 50 kmph. Assume that all the vehicles are of average length 5 m. 7 Marks

UNIT-III

5 What are various traffic signs and explain with neat sketches. 14 Marks

(OR)

6 At a right-angled intersection of two roads, Road 1 has four lanes with a total width of 12.00 m and Road 2 has two lanes with a total width of 6.6m. The volume of traffic approaching the intersection during design hour are 900 and 743 PCU/hour on the two approaches of Road 2. Design the signal timings as per IRC guidelines. 14 Marks

UNIT-IV

7 The spot speeds at a particular location are normally distributed with a mean of 51.7 KPH and a standard deviation of 8.3 KPH. What is the probability that 14 Marks

i) The sppeds exceed 65 KPH.
ii) And the speeds lie between 40 KPH and 70 KPH.
iii) What is the 85^{th} percentile speed?

(OR)

8 At a highway location with poor geometrics, the mean spot speed observed with a sample of 200 vehicles was 58.3 KPH with a standard deviation of 12.2 KPH. After effecting improvements to the geometrics, the mean speed observed with a sample of 250 vehicles was 61.2 KPH with a standard deviation of 9.8 KPH. Has there been a significant increase in the speed after the improvements? 14 Marks

UNIT-V

9	a)	Explain briefly the methodology of Road safety Audit.	7 Marks
	b)	Write a short note on the following. i) Transport system magement. ii) Travel demand Management.	7 Marks

(OR)

10	a)	Briefly explain various methods to reduce air and noise pollution due to traffic.	7 Marks
	b)	Briely explain Various traffic forecasting techniques.	7 Marks

POWER SYSTEM OPERATION AND CONTROL
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Derive the condition for economical load dispatch among various generating plants. Also explain with flow chart for the solution of economical load dispatch problem by λ-iteration method — 7 Marks

b) Determine the operating schedule of 2-generator case of 100MW each whose incremental characteristics are given by — 7 Marks

$$\frac{dF_1}{dF_2} = 2 + 0.012P_1 \qquad \frac{dF_2}{dP_2} = 1.5 + 0.015P_2$$

The minimum load on each unit is 10MW .The total load to be supplied is 150MW

(OR)

2 a) Derive transmission line loss equation in terms of B-Coefficients. — 7 Marks

b) Three plants of total capacity 500Mw are scheduled for operation to supply a total system load Of 310Mw. Evaluate the optimum load scheduling .If the plants have the following incremental cost characteristics and the limitations — 7 Marks

$$\frac{dc_1}{dp_{g_1}} = 0.12P_{G1} + 30Rs/MWh$$

$$\frac{dc_2}{dp_{g2}} = 0.2P_{G2} + 40.0Rs/MWh$$

$$\frac{dc_3}{dp_{g3}} = 0.15P_{G3} + 10Rs/MWh$$

$30 \le P_{G1} \le 150 \qquad 20 \le P_{G2} \le 100 \qquad 50 \le P_{G3} \le 250.$

UNIT-II

3 Obtain the Optimal Operation of a fundamental hydro thermal system with necessary equations. — 14 Marks

(OR)

4 a) Obtain the short-term scheduling of hydrothermal power system using penalty factor. — 7 Marks

b) Derive and explain about Hydro Power Equation. — 7 Marks

UNIT-III

5 Draw the flowchart and explain the unit commitment problem using priority list method. — 14 Marks

(OR)

6 a) Explain the dynamic programming method used for unit commitment of power flow. — 7 Marks

b) Explain the various constraints in unit commitment problem. — 7 Marks

UNIT-IV

7	a)	Derive the Model of a Speed governing systems and represent it by a block diagram.	7 Marks
	b)	Explain the effect of varying excitation of a Synchronous generator	7 Marks

(OR)

8	a)	Draw the block diagram representation of steam turbine and obtain the approximate linear model.	7 Marks
	b)	Derive the Model of a Generator Load model and represent it by a block diagram.	7 Marks

UNIT-V

9	a)	Explain about LFC of isolated power system; derive the steady state frequency error.	8 Marks
	b)	Define the terms: Tie Line, Coherent group, Control Area.	6 Marks

(OR)

10	a)	Explain the concept of 'control area' with respect to power system and develop the appropriate block diagram representation of two area LFC and explain.	7 Marks
	b)	What are tie-line oscillations? What determines the frequency of these oscillations?	7 Marks

POWER SYSTEM ANALYSIS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Develop all incidence matrices A, A^, B, B^, C and C^ for the network shown in fig 1.consider bus 1 as reference. 14 Marks

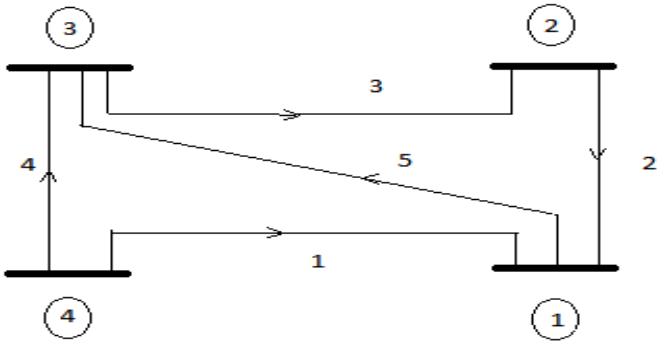

fig (1)

(OR)

2 a) Deduce the equation to form Y_{bus} using singular transformation method. 8 Marks

b) State and explain primitive network. 6 Marks

UNIT-II

3 Develop the design procedure of modification of existing Z_{Bus} by adding branch from new bus (p) to reference node, from new bus (p) to existing bus (k), from existing bus (k) to reference node and between existing buses (j) and (k).

(OR)

4 a) With the help of expressions, explain the procedure of representing tap changing transformers. 7 Marks

b) Write down the expressions and explain the terms in Park's and Clarke's transformations. 7 Marks

UNIT-III

5 a) Explain the algorithm for Gauss seidel load flow method. 10 Marks

b) Explain the significance of slack bus in load flow studies. What is the data needed for load flow studies? 4 Marks

(OR)

6 Determine bus voltages at the end of 2nd iteration by Gauss-Seidal method. Take acceleration factor as 1.6. 14 Marks

Table 1

Bus Code	Admittances (p.u)
1 – 2	2 – j8
1 – 3	1 – j4
2 – 3	0.6 – j2.6

Table 2

Bus Code	P_D in p.u	Q_D in p.u	V in p.u	Remarks
1	–	–	1.06∟0°	Slack
2	0.5	0.2	–	PQ
3	0.4	0.3	–	PQ

UNIT-IV

7	a)	Derive the necessary expressions for Jacobian matrix elements for N-R method in Polar form.	10 Marks
	b)	Compare the features of Gauss - Seidel and Newton - Raphson load flow methods.	4 Marks

(OR)

8		Explain with a flow chart the computational procedure for load flow solution using Newton Raphson method.	14 Marks

UNIT-V

9	a)	Write a note on methods of improving steady state and transient stabilities of a power system network.	7 Marks
	b)	Explain point by point method of solving Swing equation by deriving necessary equations.	7 Marks

(OR)

10	a)	Define the following terms: i) Steady state stability. ii) Dynamic stability. iii) Transient stability. iv) Steady state stability limit. v) Synchronizing power co-efficient.	7 Marks
	b)	List the assumptions made in stability solution. Also discuss the various methods of improving stability.	7 Marks

FINITE ELEMENT METHODS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) List the advantages, disadvantages and limitations of FEM. 7 Marks

b) Describe the general steps of the finite element method. 7 Marks

(OR)

2 For the three stepped bar shown in below Fig.1. 14 Marks

Consider E_1=70 GPa, E_2=105 GPa, E_3=200 GPa, A_1=900 mm², A_2= 400 mm² and A_3 = 200 mm².

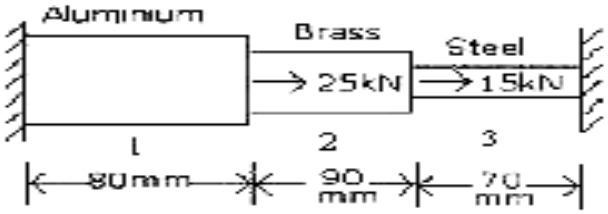

Fig .1

Determine

(a) i) The displacement at Nodes 2 and 3.
ii) Stresses in three sections.
iii) Reactions at the ends.

UNIT-II

3 For the beam shown in Fig.2 calculate the deflection under the load and construct the shear force and bending moment diagrams for the beam. 14 Marks

Take E = 20 x 10^6 N/cm² and I = 2500 cm⁴.

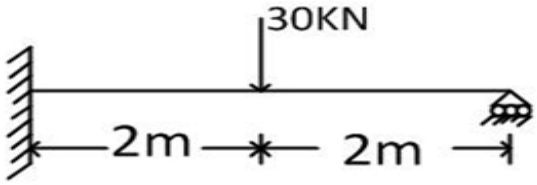

Fig.2

(OR)

4 Derive the element stiffness matrix and the nodal load matrices for a B-nodal triangular element. 14 Marks

UNIT-III

5 Derive the element stiffness matrix and load vector and traction for a CST element. 14 Marks

(OR)

6 For a long cylinder of inside diameter 8cm and outside diameter 12cm snugly fits in a hole over its full length as shown in Fig.3. The cylinder is subjected to an internal pressure of 5 MPa. Using two element model over a length of 1cm, Evaluate nodal displacements and element stresses. Take $E = 20 \times 10^6$ N/cm^2 and $k = 0.3$ 14 Marks

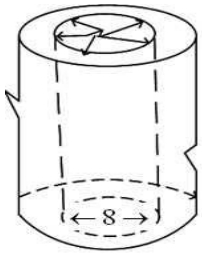

Fig.3

UNIT-IV

7 Consider a brick wall thickness 0.3m with the thermal conductivity of 0.7 W/mK. The inner surface is at 28ºC and the outer surface is exposed to cold air with the heat transfer coefficient of 40 W/m² K at -15ºC. Determine the steady state temperature distribution and also the heat flux through the wall. Use two elements and obtain the solution. 14 Marks

(OR)

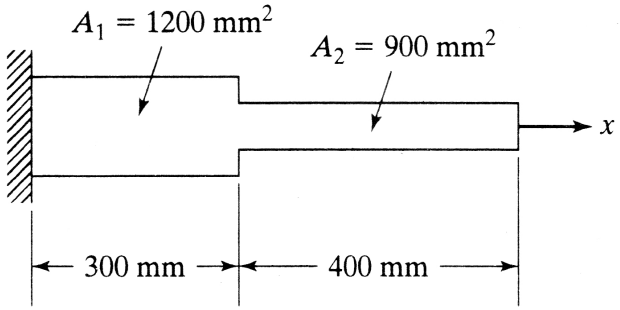
8 Discuss the formulation of 4-noded iso parametric element and derive the stiffness matrix for it. 14 Marks

UNIT-V

9 Derive the element consistent mass matrix for a CST element. 14 Marks

(OR)

10 Determine the natural frequencies of the stepped bar shown in Fig. 4. Take E=200GPa and density=7850 kg/m³. 14 Marks



Steel bar

Fig. 4.

SIMULATION AND MODELING
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Briefly explain simulation of inventory system.	7 Marks
	b)	Describe how arrays are used for List Processing.	7 Marks
		(OR)	
2		Discuss in detail various features when selecting simulation software.	14 Marks

UNIT-II

3	a)	Explain the following continuous distribution: i) Uniform distribution. ii) Exponential distribution.	6 Marks
	b)	Explain the properties of a Poisson process.	8 Marks
		(OR)	
4	a)	Discuss about non stationary Poisson process.	7 Marks
	b)	Describe empirical distributions.	7 Marks

UNIT-III

5		List out the measures of performance of queuing systems.	14 Marks
		(OR)	
6	a)	Describe the steady state behavior of finite population model.	7 Marks
	b)	The malfunctions occur in a widget making machines follows Poisson process with rate of malfunctions at 1.5 per hour. The repair times by the single mechanic takes with mean time of 30 minutes and standard deviation of 20 minutes. What is the steady time average number of broken machines?	7 Marks

UNIT-IV

7	a)	What is a random number and what are its properties?	7 Marks
	b)	Describe the process to test the uniformity using Kolmogorov -Smirnov test.	7 Marks
		(OR)	
8	a)	Describe the method of generating random numbers using combined linear congruential method.	7 Marks
	b)	Describe the method of generating random variates for the exponential distribution.	7 Marks

UNIT-V

9	a)	List out the precautions to be taken while collecting the data.	7 Marks
	b)	What are the parameter estimators for Poisson, Exponential and Normal Distributions?	7 Marks
		(OR)	
10		Describe the general strategy to obtain Batch means for interval estimation in steady state simulation.	14 Marks

DIGITAL SIGNAL PROCESSING
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Find out the Z-transform for the discrete time sequence $x(n) = kn,\ n \geq 0$.	7 Marks
	b)	Define causality and stability of an LTI system and state the conditions for stability.	7 Marks

(OR)

2	a)	Explain frequency analysis of periodic discrete time signal using Fourier series method.	7 Marks
	b)	Determine the impulse response of a discrete time system given by difference equation $y(n) - 3y(n-1) - 4y(n-2) = x(n) + 2x(n-1)$.	7 Marks

UNIT-II

3	a)	Contrast the transforms DTFT, DFS and DFT.	7 Marks
	b)	Develop the inverse FFT algorithm with neat sketch for N=8.	7 Marks

(OR)

4	a)	What is DFT? Interpret role of DFT over the DTFT.	7 Marks
	b)	Develop the DIT FFT algorithm with neat sketch for N=8.	7 Marks

UNIT-III

5	a)	Derive the relation between analog and digital frequency in bilinear transformation.	7 Marks
	b)	Compare Bi-linear and Impulse Invariant Transformations.	7 Marks

(OR)

6	a)	For the given specifications $\boldsymbol{\alpha_p}$ = 3dB; $\boldsymbol{\alpha_s}$ = 15dB $\boldsymbol{\Omega_p}$ = 1000 Rad/sec. Design a high pass filter using Butterworth approximation.	7 Marks
	b)	Derive the frequency mapping expression for bilinear transformation.	7 Marks

UNIT-IV

7	a)	Analyze the characteristics of Rectangular, Bartlet and Blackman windows with neat sketch.	7 Marks
	b)	Explain the realization of cascade and Linear phase structure of an FIR system.	7 Marks

(OR)

8	a)	Discuss the FIR filter design by using window method.	8 Marks
	b)	Design a linear phase FIR band pass filter to pass frequencies in the range 0.4π to 0.6π rad/sample by taking 7 samples of hanning window.	6 Marks

UNIT-V

9	a)	Explain the various addressing modes used in P-DSPs.	7 Marks
	b)	Explain the internal and external memory organization in C6X.	7 Marks

(OR)

10	a)	Discuss about multiple access memory and multiported memory.	7 Marks
	b)	Describe the peripheral used in C6X processor with a block diagram.	7 Marks

DATAWAREHOUSING AND DATA MINING

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define data ware housing. Explain the characteristics of data ware house.	7 Marks
	b)	Briefly discuss the working principle of data mining.	7 Marks
		(OR)	
2	a)	List and explain different types of data mining functionalities.	7 Marks
	b)	What are the major issues in data mining?	7 Marks

UNIT-II

3	a)	Differentiate data preprocessing and data cleaning methods.	7 Marks
	b)	Write about dimensionality reduction.	7 Marks
		(OR)	
4	a)	Describe about discretization and concept hierarchy generation.	7 Marks
	b)	Write about data integration and transformation with examples.	7 Marks

UNIT-III

5	a)	Explain about multilevel and multidimensional association rule mining.	7 Marks
	b)	Illustrate about mining frequent and closed patterns with examples.	7 Marks
		(OR)	
6	a)	Explain Apriori algorithm, finding frequent itemset using candidate generation.	7 Marks
	b)	Explain the approaches to mine multilevel association rules.	7 Marks

UNIT-IV

7	a)	Explain issues regarding Bayesian classification with an example.	7 Marks
	b)	Describe the techniques to improve classification accuracy.	7 Marks
		(OR)	
8	a)	Describe about decision tree induction with an example.	7 Marks
	b)	Demonstrate about rule based classification with an example.	7 Marks

UNIT-V

9	a)	Define cluster analysis. Write types with examples.	7 Marks
	b)	Explain outlier analysis.	7 Marks
		(OR)	
10	a)	Explain partitioning methods with examples.	7 Marks
	b)	Explain Hierarchical methods with example.	7 Marks

POWER SEMICONDUCTOR DRIVES
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	State the advantages of electric drives over other drives.	7 Marks
	b)	List and explain various components of load torques.	7 Marks
		(OR)	
2	a)	Describe the closed loop configurations in electric drives.	7 Marks
	b)	Discuss the nature and classification of load torque.	7 Marks

UNIT-II

3	a)	Explain rectifier control of **dc** series motor.	7 Marks
	b)	Speed of a **dc** series motor coupled to a fan load is controlled by variation of armature voltage. When armature voltage is 400 V, motor takes 20A and the fan speed is 250 r.p.m. The combined resistance of armature and field is 1.0Ω. Calculate: i) Motor armature voltage for the fan speed of 350 r.p.m. ii) Motor speed for the armature voltage of 250 V.	7 Marks
		(OR)	
4	a)	Explain continuous and discontinuous operation of three phase semi controlled converter connected to separately excited **dc** motor.	7 Marks
	b)	A 220V, 1200 r.p.m 15A separately excited motor has the armature resistance and Inductance of 1.8 Ω and 32mH respectively. This motor is controlled by a single phase fully controlled rectifier with an AC source voltage of 230V, 50Hz. Identify modes and calculate developed speeds for: i) $\alpha = 45^0$ and Torque = 40 N-m. ii) $\alpha = 45^0$ and Torque = 10 N-m.	7 Marks

UNIT-III

5		Explain closed loop control scheme for speed control of dc separately excited motor.	14 Marks
		(OR)	
6	a)	Explain the speed control of dc series motor fed from two quadrant choppers. Draw the motoring and regenerative braking characteristics.	7 Marks
	b)	A 220 V, 24 A, 1000 r.p.m **dc** separately excited motor has an armature resistance of 2Ω. Motor is controlled by a basic chopper with frequency of 500Hz and source voltage of 230V. Calculate the duty ratio for 1.2 times rated torque and 500 r.p.m.	7 Marks

UNIT-IV

7	a)	Explain speed control of Induction motors using AC voltage controller.	6 Marks
	b)	Explain with circuit and waveforms for speed control of induction motor by Static rotor resistance.	8 Marks

(OR)

8	a)	Why stator voltage control is suitable for speed control of induction motors in fan and pump drives.	7 Marks
	b)	With necessary block diagram, explain operation of variable frequency control of 3-phase Induction motor.	7 Marks

UNIT-V

9	a)	Discuss modes of operation of switched reluctance motor.	8 Marks
	b)	State the advantages and disadvantages of stepper motors.	6 Marks

(OR)

10	a)	Discuss torque-stepping rate characteristics of stepper motor.	6 Marks
	b)	Explain converter circuits and modes of operation of switched reluctance motor.	8 Marks

POWER SYSTEM OPERATION AND CONTROL

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Derive the condition for economical load dispatch among various generating plants. Also explain with flow chart for the solution of economical load dispatch problem by λ-iteration method — 7 Marks

b) Determine the operating schedule of 2-generator case of 100MW each whose incremental characteristics are given by — 7 Marks

$$\frac{dF_1}{dF_2} = 2 + 0.012P_1 \qquad \frac{dF_2}{dP_2} = 1.5 + 0.015P_2$$

The minimum load on each unit is 10MW. The total load to be supplied is 150MW

(OR)

2 a) Incremental fuel costs for a power plant consisting of 3 generating units are — 7 Marks

$IC_1=20+0.3P_1$ $IC_2=30+0.4P_2$ $IC_3=30$.

Where p_1 is the power in MW generated by unit i for i=1, 2 and 3. Assume that all the generators are operating all the time. Minimum and maximum loads on each unit are 50MW and 300MW respectively. If the plant is operating on economic load dispatch to supply the total power demand of 700MW, the power generated by each unit is?

b) Derive the Exact coordination equation (economic operation of power system considering losses). — 7 Marks

UNIT-II

3 a) Derive the co-ordination equation for the optimal scheduling of hydrothermal interconnected power plants**.** — 7 Marks

b) Explain different constraints to be considered for mathematical modeling of hydrothermal scheduling. — 7 Marks

(OR)

4 a) Obtain the short-term scheduling of hydrothermal power system using penalty factor. — 7 Marks

b) Derive and explain about Hydro Power Equation. — 7 Marks

UNIT-III

5 a) Discuss the dynamic programming method to solve unit commitment problem in a power system. — 7 Marks

b) What is the cost function for unit commitment? Explain its significance in unit commitment. — 7 Marks

(OR)

6 What are the various methods of unit commitment? Explain each of them with relevant equations. — 14 Marks

UNIT-IV

7	a)	Draw the block representation of a complete AC excitation system and explain its features.	7 Marks
	b)	Explain the various performance requirements of excitation system.	7 Marks

(OR)

8		Draw a neat sketch of a typical turbine speed governing system and derive its block representation and transfer function.	14 Marks

UNIT-V

9	a)	Define the terms: i) Control Area. ii) Coherent Group. iii) Area Control Error.	5 Marks
	b)	Deduce with necessary equations, Dynamic response of LFC of an isolated power system with integral controller.	9 Marks

(OR)

10	a)	Explain about LFC of isolated power system; derive the steady state frequency error.	8 Marks
	b)	Define the following terms: i) Tie Line ii) Coherent group iii) Control Area.	6 Marks

POWER SYSTEM ANALYSIS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) For the network of the Fig.1, draw the graph and write a tie-set schedule. Using the tie-set schedule obtain the loop equations and find the currents in all branches. 7 Marks

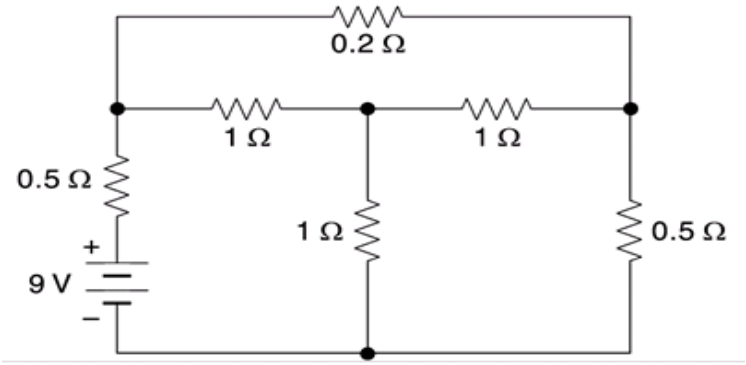

Fig. 1

b) For the network of Fig.1, write a cut-set schedule, obtain modal equations and find branch currents. 7 Marks

(OR)

2 a) What is primitive network matrix and represent its forms? Prove $Y_{bus} = A_t[y]A$ using singular transformation. 10 Marks

b) What is the difference between element-node incidence matrix and bus-incidence matrix? 2 Marks

c) What is primitive network matrix? 2 Marks

UNIT-II

3 a) Starting from Z_{bus} for a partial network describe step - by - step how you willobtain the Z_{bus} for a modified network when a new line is to be added to a bus in theexisting network. 7 Marks

b) Obtain the Park's Transformation matrix. 7 Marks

(OR)

4 a) Describe the procedure for the modification of Z_{bus} when a line with mutual impedance is added or removed. 8 Marks

b) Explain the purpose of Parks's transformation with neat diagram and relevant equations. 6 Marks

UNIT-III

5 a) What are the initial conditions assumed for the power flow studies by GS method? What is acceleration factor? What is its role in GS method for power flow studies? 7 Marks

b) Draw and explain the flow chart for Gauss Seidel load flow method. 7 Marks

(OR)

6 Determine bus voltages at the end of 2nd iteration by Gauss-Seidal method. Take acceleration factor as 1.6. 14 Marks

Table 1

Bus Code	Admittances (p.u)
1 – 2	2 – j8
1 – 3	1 – j4
2 – 3	0.6 – j2.6

Table 2

Bus Code	P_D in p.u	Q_D in p.u	V in p.u	Remarks
1	–	–	$1.06\angle 0^\circ$	Slack
2	0.5	0.2	–	PQ
3	0.4	0.3	–	PQ

UNIT-IV

7 a) Develop static load flow equations in rectangular form. 7 Marks

b) Compare different methods of load flow studies. 7 Marks

(OR)

8 a) Explain fast decoupled load flow studies with relevant equations. 7 Marks

b) Deduce the equations of elements of Jacobin matrix in rectangular coordinates. 7 Marks

UNIT-V

9 a) Derive the expression for Swing equation of a SMIB system. What is the significance of swing curve? 7 Marks

b) With the help of Equal area criterion for one machine connected to Infinite bus, derive the expressions for critical clearing angle and critical clearing time. 7 Marks

(OR)

10 a) With the help of relevant expressions, explain the procedure of solving transient stability problem by Step by Step method. 7 Marks

b) A 50HZ generator is delivering 50% of the power that is capable of delivering through a transmission line to an infinite bus. A fault occurs that increases the reactance between generator and infinite bus 500% of the value before fault. When the fault is isolated the maximum power that can be delivered is 75% of the original maximum value. Determine the critical clearing angle for the condition delivered. 7 Marks

IV B.Tech I Semester (SVEC14) Supplementary Examinations February – 2021

FINITE ELEMENT METHODS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Write short notes on plane stress problem with suitable examples.	7 Marks
	b)	Derive the material constitutive matrix for a plane strain problem .	7 Marks
		(OR)	
2	a)	Derive the stress-strain relation matrix for a two-dimensional plane stress case.	7 Marks
	b)	Discuss the philosophy of finite element method.	7 Marks

UNIT-II

3	a)	Plot Hermite shape functions of a beam element and discuss the end conditions.	7 Marks
	b)	Explain the procedure used to determine support reactions of beam in FEM.	7 Marks
		(OR)	
4		A cantilever beam of 1m length carries a single point load at the end of the beam of 10kN. Calculate the deflection at the end of the beam using FEM, if E = 70Gpa, A=500mm^2 and I = 2500mm^4.	14 Marks

UNIT-III

5	a)	Derive the stiffness matrix of a constant strain triangle from fundamentals using Potential Energy approach.	8 Marks
	b)	Define plane stress and plane strain conditions with examples.	6 Marks
		(OR)	
6	a)	Give four different examples of axisymmetric problems with sketches.	7 Marks
	b)	Derive traction force vector for a uniformly distributed load acting on one of the sides of a linear Axisymmetric triangular element.	7 Marks

UNIT-IV

7		Discuss the formulation of 4-noded iso-parametric element and derive the stiffness matrix for it.	14 Marks
		(OR)	
8	a)	Discuss in detail about the concept of iso parametric element.	7 Marks
	b)	Differentiate sub parametric and super parametric elements.	7 Marks

UNIT-V

9	a)	Discuss about Lumped mass matrix and Consistent mass matrix.	6 Marks
	b)	Derive the elemental mass matrix for CST element**.**	8 Marks
		(OR)	
10	a)	Derive the element mass matrix for 1-D bar element.	7 Marks
	b)	Explain the features of Hamilton's interpolation function with an example.	7 Marks

METROLOGY AND MEASUREMENTS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define "Interchangeability" and discuss its importance.	5 Marks
	b)	Describe in brief the construction and working of an optical comparator with a neat sketch.	9 Marks
		(OR)	
2	a)	What is meant by the term "fit". Explain the various types of fits.	7 Marks
	b)	State and explain Taylor's Principe of limit gauging.	7 Marks

UNIT-II

3	a)	Outline the importance of providing standards of length while measuring.	7 Marks
	b)	What is sine bar? How is it used for angle measurements?	7 Marks
		(OR)	
4	a)	Explain the principle of working of a sine bar for angular measurement with the help of a diagram. List the advantages and limitations of sine bar.	9 Marks
	b)	With the help of sketches, explain the working of an external micrometer.	5 Marks

UNIT-III

5	a)	Discuss the following terms in connection with surface finish measurement. i) Waviness. ii) Lay. iii) Sampling Length. iv) R_z value.	6 Marks
	b)	Explain the principle of Talysurf surface recorder with neat sketch.	8 Marks
		(OR)	
6	a)	List out various BIS symbols for indication of surface finish.	7 Marks
	b)	What are the elements of screw thread? Also explain errors in screw threads.	7 Marks

UNIT-IV

7		Mention various types of electrical transducers and explain in detail the working of inductance type of transducers with its advantages and disadvantages.	14 Marks
		(OR)	
8		List out different types of speed measuring devices and explain about Mechanical Tachometer and Electrical Tachometer.	14 Marks

UNIT-V

9	a)	Explain the calibration procedure in temperature measurement.	7 Marks
	b)	What is the principle of Radiation methods of measuring temperature?	7 Marks
		(OR)	
10	a)	Explain the principle of dead weight gauge.	7 Marks
	b)	Explain the principle of Prony brake Dynamometer.	7 Marks

REFRIGERATION AND AIR CONDITIONING

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Compare air refrigeration systems with vapor compression systems.	6 Marks
	b)	A Bell Coleman refrigeration cycle works between 1 bar and 5 bar. The adiabatic efficiency of compressor is 85% and expander is 90%. Find out COP of the system and its tonnage when air flow rate is 2 kg/s. The ambient temperature is 27^0C and the air coming out of refrigerator is 0^0C.	8 Marks
		(OR)	
2	a)	Sketch and explain the working of Boot strap cooling system used in Aircrafts.	10 Marks
	b)	Discuss the concepts of Heat engines, Refrigerators and Heat pumps.	4 Marks

UNIT-II

3	a)	Explain Vapor compression refrigeration system and sketch the processes on T-S and P-h property charts.	8 Marks
	b)	What is ASHRAE coding of refrigerants? Give examples for each class.	6 Marks
		(OR)	
4	a)	Discuss the effects of superheating and sub cooling on the performance of simple vapor compression refrigeration cycle.	6 Marks
	b)	What are the types of refrigerants and discuss the need of new refrigerants.	8 Marks

UNIT-III

5	a)	What are the desirable properties of a refrigerant - absorbent pair?	6 Marks
	b)	Sketch the layout of a Steam jet refrigeration system and explain its working.	8 Marks
		(OR)	
6	a)	Explain the working principle of steam jet refrigeration system.	8 Marks
	b)	Explain the working principle of thermoelectric refrigerator.	6 Marks

UNIT-IV

7	a)	Define the following. i) Specific humidity. ii) Relative humidity. iii) Sensible heating. iv) Sensible cooling. v) Humidification and dehumidification.	10 Marks
	b)	List the differences between summer and winter air conditioning systems.	4 Marks
		(OR)	
8	a)	Explain the following and represent it on psychometric chart. i) Cooling and dehumidification. ii) Heating and humidification. iii) Adiabatic saturation temperature. iv) Bypass factor.	10 Marks
	b)	Define psychometry and show all psychometric properties on psychometric chart.	4 Marks

UNIT-V

9	a)	Explain the factors on which comfort feeling of people in A/C depends.	6 Marks
	b)	Discuss Air to Air heat pump circuit and list its applications.	8 Marks
		(OR)	
10	a)	What is the importance of 'Thermodynamics of human body' in A/C system design?	8 Marks
	b)	Discuss the ways adopted to dehumidify the air in A/C systems.	6 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Anantapur)

IV B.Tech I Semester (SVEC14) Supplementary Examinations February – 2021

LIGHT WAVE COMMUNICATIONS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	State and derive Snell's Law.	6 Marks
	b)	Explain about various types of fiber materials.	8 Marks
		(OR)	
2	a)	Discuss briefly about fiber fabrication.	7 Marks
	b)	What is the basic principle of light propagation in optical fiber? Explain in detail.	7 Marks

UNIT-II

3	a)	Explain linear scattering losses in fibers.	7 Marks
	b)	Discuss dispersion mechanisms with regard to single mode fibers indicating the dominating effects. Hence describe how intermodal dispersion may be minimized within a single mode region?	7 Marks
		(OR)	
4		Write a short note on fiber connectors and explain types of connectors.	14 Marks

UNIT-III

5		Discuss PIN and Avalanche photo diode.	14 Marks
		(OR)	
6	a)	Discuss the principle working of distributed feedback laser.	7 Marks
	b)	What is the resonant frequency of laser? Derive the expression of wavelength spacing between two modes.	7 Marks

UNIT-IV

7	a)	Discuss in detail about fiber splicing and connectors.	7 Marks
	b)	Derive an expression for coupling of a total power from LED to graded index fiber.	7 Marks
		(OR)	
8	a)	Draw and explain various fiber alignment and joint losses.	7 Marks
	b)	Discuss briefly about fiber-fiber joints.	7 Marks

UNIT-V

9	a)	Explain the design and operation of a polarization independent isolator.	7 Marks
	b)	Discuss the concept of SONET.	7 Marks
		(OR)	
10		What is rise time budget analysis? Derive an expression for the total system rise time budget in terms of transmitter fiber and receiver rise time.	14 Marks

MULTIMEDIA AND APPLICATION DEVELOPMENT

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain in detail multimedia software tools.	7 Marks
	b)	Write short notes on various image data types.	7 Marks
		(OR)	
2	a)	Explain various color model s in images.	7 Marks
	b)	Write short notes on Digital Video.	7 Marks

UNIT-II

3	a)	Describe about Bound methods in Action Script.	7 Marks
	b)	Write about associative arrays and objects.	7 Marks
		(OR)	
4	a)	Write about overloading of methods in ACTION SCRIPT.	7 Marks
	b)	Write a program that shows the usage of data types.	7 Marks

UNIT-III

5	a)	Explain Subclasses of Movieclip.	7 Marks
	b)	Discuss MPEG4.	7 Marks
		(OR)	
6		Write about.	
		i) Analog Video.	7 Marks
		ii) Digital Video.	7 Marks

UNIT-IV

7		Describe the steps in the JPEG Encoder with a block diagram.	14 Marks
		(OR)	
8	a)	Explain Dictionary-Based Coding with an example.	7 Marks
	b)	Explain the following.	7 Marks
		i) Differential Coding of Images. ii) Lossless JPEG	

UNIT-V

9	a)	Discuss various parameters to improve the quality of multimedia data transmission.	6 Marks
	b)	Explain RTP and RTCP in detail.	8 Marks
		(OR)	
10	a)	Write short notes on video bitrates over ATM.	6 Marks
	b)	Explain Staggered Broadcasting and Pyramid Broadcasting.	8 Marks

CODE No.:14BT71501 SVEC-14

EMBEDDED SYSTEM PROGRAMMING

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw and explain System On Chip (SOC).	7 Marks
	b)	Explain skills required foe an embedded system designer.	7 Marks
		(OR)	
2		Describe design process in embedded system with an example.	14 Marks

UNIT-II

3	a)	Explain different arithmetic and logic instructions in 8051 with examples.	10 Marks
	b)	Discuss about flags and register banks in 8051.	4 Marks
		(OR)	
4	a)	Write an assembly language program in 8051 for to place 00h to all memory locations from 20h to 2Ah.	7 Marks
	b)	Write an assembly language program in 8051 to find factorial of a given number.	7 Marks

UNIT-III

5	a)	Describe memory management in RTOS.	7 Marks
	b)	Discuss about interrupt mechanism in RTOS.	7 Marks
		(OR)	
6	a)	Discuss on State Machine Programming Models with an example.	7 Marks
	b)	Illustrate the suitability of object oriented programming in embedded systems.	7 Marks

UNIT-IV

7	a)	Discuss about the preprocessor global variable and preprocessor directives in embedded programming.	6 Marks
	b)	Discuss about program elements in embedded programming.	8 Marks
		(OR)	
8	a)	Discuss about the advantages and disadvantages of C++ in embedded programming.	6 Marks
	b)	Discuss about sequential program model of AVCM.	8 Marks

UNIT-V

9	a)	Discuss about simulators and laboratory tools.	10 Marks
	b)	Describe about linking and locating software's.	4 Marks
		(OR)	
10	a)	Distinguish between linkers and locators.	7 Marks
	b)	What is hardware software co-design? Explain in detail.	7 Marks

CODE No.:14BT71504 SVEC-14

SIMULATION AND MODELING

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Briefly explain simulation of inventory system.	7 Marks
	b)	Describe how arrays are used for List Processing.	7 Marks
		(OR)	
2	a)	Describe the issues in the evaluation and selection of simulation software.	7 Marks
	b)	Describe the time advance algorithm.	7 Marks

UNIT-II

3	a)	Discuss about properties of a Poisson process.	7 Marks
	b)	Discuss about empirical distributions.	7 Marks
		(OR)	
4	a)	Explain any two discrete distributions and give equation for probability mass function. Also calculate mean and variance of same.	8 Marks
	b)	Illustrate the use of empirical distribution.	6 Marks

UNIT-III

5		List out the measures of performance of queuing systems.	14 Marks
		(OR)	
6	a)	Describe the steady state behavior of finite population model.	7 Marks
	b)	The malfunctions occur in a widget making machines follows Poisson process with rate of malfunctions at 1.5 per hour. The repair times by the single mechanic takes with mean time of 30 minutes and standard deviation of 20 minutes. What is the steady time average number of broken machines?	7 Marks

UNIT-IV

7	a)	Define random number. Explain statistical properties of random numbers with example.	7 Marks
	b)	Explain the various testes used for testing random numbers for their desirable properties.	7 Marks
		(OR)	
8		Categorize the distributions where the inverse transform technique can be used for sampling.	14 Marks

UNIT-V

9	a)	Discuss about Chi-Square test applied to Poisson assumption for goodness of it.	7 Marks
	b)	Discuss about AR[1] model.	7 Marks
		(OR)	
10	a)	Explain data collection and analysis for input modeling.	7 Marks
	b)	What is time series - input model? Explain AR (1) and EAR (1) model.	7 Marks

OPERATING SYSTEMS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	State and explain different operating system services.	7 Marks
	b)	Differentiate between sequential and batch processing.	7 Marks
		(OR)	
2	a)	What is meant by CPU Scheduling? Explain different scheduling algorithms with examples.	7 Marks
	b)	Write about Bootstrap program.	7 Marks

UNIT-II

3	a)	Illustrate reader's writer's problem and give a solution to it using semaphores.	7 Marks
	b)	Discuss monitor solution for dining philosopher's problem.	7 Marks
		(OR)	
4	a)	Outline the procedure for deadlock recovery.	7 Marks
	b)	Describe any one method for handling deadlock.	7 Marks

UNIT-III

5	a)	Illustrate how paging supports virtual memory.	7 Marks
	b)	Explain contiguous and non-contiguous memory allocation with example.	7 Marks
		(OR)	
6	a)	What is demand paging? Explain its concept.	5 Marks
	b)	Describe Page Replacement algorithms with an example.	9 Marks

UNIT-IV

7	a)	Explain the concept of Swap-Space Management.	6 Marks
	b)	Explain in detail about the following disk scheduling algorithms with examples. i) FCFS. ii) SSTF. iii) SCAN. iv) LOOK.	8 Marks
		(OR)	
8	a)	Explain the concept of file directory structures.	6 Marks
	b)	Discuss in detail about various file access methods.	8 Marks

UNIT-V

9	a)	Explain the goals and principles of protection.	7 Marks
	b)	What are access matrices? Explain its implementation.	7 Marks
		(OR)	
10		Write a short note on: i) Domain of protection. ii) Access Matrix.	14 Marks

Roll No. | | | | | | | | | | |

IV B.Tech I Semester (SVEC14) Supplementary Examinations January – 2022

DIGITAL SIGNAL PROCESSING
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Synthesize the response of LTI system for an input of unit impulse sequence. 7 Marks

b) Apply the knowledge of Z transform to find the response of discrete time system given by difference $y(n) = -0.8y(n-1) + x(n)$. 7 Marks

(OR)

2 a) Find the inverse z-transform of $x(z) = \dfrac{z^5 - 3}{1 - z^{-5}}$ $|z| > 1$. 7 Marks

b) Find the DTFT of the sequence $x(n) = \alpha^n \sin(nw_0)u(n)$.. 7 Marks

UNIT-II

3 a) Why DFT is preferred over DTFT? 2 Marks

b) Explain the need of zero padding in DFT Sequence. Compute the 8-point of DFT of the following sequence $x(n) = \{1, 1, 1, 1, 0, 0, 0, 0\}$. 5 Marks

c) By using DFT properties solve the following. 7 Marks

i) The even samples of the 11-pint DFT of a length-11 real sequence are given by $x(0) = 4$; $x(2) = -1 + 3j$; $x(4) = 2 + j5$; $x(6) = 9 - j6$; $x(8) = -5 - j8$; $x(10) = \sqrt{3} - j2$.

Determine the missing odd samples of the DFT.

(OR)

4 a) Compute the 8-point DFT of the sequence $x(n)=\cos(n\pi/2)$ using the DIT-FFT algorithm. Show all intermediate results. 7 Marks

b) Explain the need to go for FFT rather than DFT. 2 Marks

c) Find the inverse FFT of the given $x(k)=\{1, 2, 3, 4\}$ using DIF algorithm. 5 Marks

UNIT-III

5 a) Derive the frequency mapping expression for impulse invariant transformation. 7 Marks

b) Determine the order of a butterworth low pass filter satisfying the following specifications. fp = 0.10Hz, fs = 0.15Hz, αp = 0.5dB, αs = 15dB, f sample=1Hz. 7 Marks

(OR)

6 a) For the given specifications $\alpha_p = 3$ dB; $\alpha_s = 15$ dB $\Omega_p = 1000$ Rad/sec. Design a high pass filter using Butterworth approximation. 7 Marks

b) Derive the frequency mapping expression for bilinear transformation. 7 Marks

UNIT-IV

7 a) Explain the need for the use of window sequence in the design of FIR Filter. Describe the window sequence generally used and compare the properties. 5 Marks

b) Design an ideal high pass filter with a frequency response 9 Marks

$H_d(e^{j\omega}) = 1 \; for \; \dfrac{-\pi}{2} \le \omega \le \dfrac{\pi}{2}$; and $H_d(e^{j\omega}) = 0 \; for \; \dfrac{\pi}{2} \le |\omega| \le \pi$

Use Hamming window with N=11. Sketch the magnitude response.

(OR)

8 a) Explain the design of linear phase FIR filter by the Frequency sampling method. 5 Marks

b) Obtain the Cascade and parallel form of realizations for the following transfer function $H(z) = \frac{16(1+z)z^2}{(4z^2 - 27z + 1)(4z + 3)}$. 9 Marks

UNIT-V

9 a) Explain the various addressing modes used in P-DSPs. 7 Marks

b) Explain the internal and external memory organization in C6X. 7 Marks

(OR)

10 a) Discuss about multiple access memory and multiported memory. 7 Marks

b) Explain the features of 'C6X processes. 7 Marks

CODE No.:14BT70301 SVEC-14

FINITE ELEMENT METHODS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	List the advantages, disadvantages and limitations of FEM.	7 Marks
	b)	Describe the general steps of the finite element method.	7 Marks

(OR)

2	a)	Derive the stress-strain relation matrix for a two-dimensional plane stress case.	7 Marks
	b)	Discuss the philosophy of finite element method.	7 Marks

UNIT-II

3		Starting from the first principles derives the stiffness matrix for a 1-D bar element and extends it for the plane truss element.	14 Marks

(OR)

4		A cantilever beam of 1 m length carries a single point load at the end of the beam of 10 kN. Calculate the deflection at the end of the beam using FEM, if E = 70 Gpa, A=500 mm^2 and I = 2500 mm^4.	14 Marks

UNIT-III

5		Derive the element stiffness matrix and load vector and traction for a CST element.	14 Marks

(OR)

6		With suitable examples, explain the meaning and formulations of properties of axi-symmetric elements. State their properties.	14 Marks

UNIT-IV

7	a)	Explain the capabilities of: i) Sub parametric. ii) Iso parametric. iii) Super parametric elements.	7 Marks
	b)	Discuss the concept of numerical integration.	7 Marks

(OR)

8		Analyze the following integral using one and two point Gaussian Quadrature formula and compare with exact solution.	14 Marks

$$I = \int_{-1}^{+1} \left[3e^{\xi} + \xi^2 + \frac{1}{(\xi+2)}\right] d\xi$$

UNIT-V

9	a)	Derive the element mass matrix for 1-D bar element.	7 Marks
	b)	Explain the features of Hamilton's interpolation function with an example.	7 Marks

(OR)

10	a)	Discuss about Lumped mass matrix and Consistent mass matrix.	6 Marks
	b)	Derive the elemental mass matrix for CST element.	8 Marks

METROLOGY AND MEASUREMENTS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define the following terms with an example: i) Allowance. ii) Clearance. iii) Interference.	9 Marks
	b)	List out various advantages and limitations of limit gauges.	5 Marks
		(OR)	
2	a)	Explain unilateral system and bilateral system of tolerances.	5 Marks
	b)	Describe in brief the construction and working of a pneumatic comparator with a neat sketch.	9 Marks

UNIT-II

3	a)	Name the various factors affecting the accuracy of a sine bar.	7 Marks
	b)	Explain why it is not performed to use a sine bar for generating angles larger than 45^0, if high accuracy in angle generation is required.	7 Marks
		(OR)	
4	a)	Explain the utility of straight edge and surface plate in laboratories.	7 Marks
	b)	Describe working principle of NPL flatness interferometer with a neat sketch.	7 Marks

UNIT-III

5	a)	What is the 'best size' wire? Derive an expression for the same in terms of the pitch and angle of the thread.	7 Marks
	b)	Explain with the help of sketch, the working principle of the instrument which is used in checking of profile of the gear.	7 Marks
		(OR)	
6	a)	What is meant by alignment tests on machine tools and why they are necessary?	6 Marks
	b)	Name and describe with neat sketches, the various alignment tests performed on a drilling machine.	8 Marks

UNIT-IV

7	a)	With neat sketch, explain the working principle of Strain gauge load cell.	7 Marks
	b)	With the help of neat sketches, explain the working of any two non contact type Tachometers.	7 Marks
		(OR)	
8	a)	With a neat sketch of LVDT, explain the measurement of displacement.	7 Marks
	b)	What are the different arrangements of strain gauge rosettes? Explain them.	7 Marks

UNIT-V

9	a)	Explain the principle of Thermocouple.	7 Marks
	b)	Briefly explain any one method of pressure measurement.	7 Marks
		(OR)	
10	a)	Explain the force measuring technique with neat sketch.	7 Marks
	b)	Explain the principle of vibrating wire transducer.	7 Marks

ELECTRONIC MEASUREMENTS AND INSTRUMENTATION

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Classify the errors in measurement.	7 Marks
	b)	Differentiate between accuracy and precision.	7 Marks
		(OR)	
2	a)	How a calibration is done using potentiometer method for a **dc** Voltmeter?	7 Marks
	b)	Explain in detail about the Ramp type DVM.	7 Marks

UNIT-II

3	a)	List out different applications of spectrum analyzer.	7 Marks
	b)	Describe the working of Function generator with the block diagram.	7 Marks
		(OR)	
4	a)	Describe the working of a sweep frequency generator with the block diagram.	7 Marks
	b)	Explain in detail about the Heterodyne Harmonic Distortion analyzer.	7 Marks

UNIT-III

5	a)	Explain the basic principle of oscilloscope and explain the function of sweep generator.	7 Marks
	b)	Draw the block diagram of digital storage oscilloscope and explain functions of each block.	7 Marks
		(OR)	
6	a)	Draw the block diagram of dual-beam CRO and explain its working.	8 Marks
	b)	Explain the method of finding phase, frequency relationship of two waveforms using Lissajous figures.	6 Marks

UNIT-IV

7	a)	Derive the balanced condition for Modified Wheatstone Bridge.	7 Marks
	b)	The arms of an AC Maxwell's bridge are arranged as follows AB and BC are non reactive resistors of 100Ω each. DA a standard variable reactor L_1 of resistance 32.7 Ω and CD consists of standard variable resistor R in series with a coil of the unknown impedance Z, balance was found with L_1=50mH and Z=1.36R. Find R and L of coil.	7 Marks
		(OR)	
8	a)	Derive the balance condition for Anderson's bridge.	7 Marks
	b)	Select various precautions to be taken while using X-Y Recorder.	7 Marks

UNIT-V

9	a)	Derive the expression for Gauge factor of a strain Gauge.	8 Marks
	b)	Explain the operation of piezo electric transducers.	6 Marks
		(OR)	
10	a)	Explain about single channel data acquisition system.	6 Marks
	b)	Explain the working principle of an accelerometer.	8 Marks

IV B.Tech I Semester (SVEC14) Supplementary Examinations January - 2022

LIGHT WAVE COMMUNICATIONS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain in detail about Materials used in fabrication of Optical fibers.	9 Marks
	b)	Determine the normalized frequency at 820nm for a step index fiber having a 25μm x 5m core radius, $n_1 = 1.48$ and $n_2 = 1.46$. i) How many modes propagate in this fiber at 820nm? ii) What percent of the optical power flows in the cladding?	5 Marks
		(OR)	
2	a)	A given APD (Avalanche Photo Diode) has a quantum efficiency of 65% at wavelength of 900nm. If 0.5μw of optical power produces a multiplied photo current of 10μA, find the multiplication factor M.	6 Marks
	b)	Explain the following terms with reference to a photo detector. i) Quantum noise. ii) Dark current noise.	8 Marks

UNIT-II

3	a)	Explain what is intermodal dispersion and how it could be reduced.	8 Marks
	b)	A step index multimode glass fiber has a core diameter of 70μm and cladding refractive index of 1.45. If it is to have a limiting intermodal dispersion δT of 10ns/km. Calculate the maximum bit rate for transmission over a distance of 10km.	6 Marks
		(OR)	
4	a)	What is meant by material dispersion? Derive its expression.	7 Marks
	b)	Explain what do you understand by phase and group velocity of the signal transmitted in a fiber.	7 Marks

UNIT-III

5	a)	Contrast PIN Diode and Avalanche Photo Diode.	7 Marks
	b)	Discuss the LASER Diode Principle, modes and threshold conditions.	7 Marks
		(OR)	
6	a)	Calculate the ratio of the stimulated emission rate to the spontaneous emission rate for an incandescent lamp at a temperature of 1000K. It may be assumed that the average operating wavelength is 0.5μm.	6 Marks
	b)	Sketch and explain the Fabry-Perot resonator cavity of laser for sustained oscillations.	8 Marks

UNIT-IV

7	a)	What are splices? Explain different types of splices.	7 Marks
	b)	Derive an expression for coupling of a total power from LED to single mode fiber.	7 Marks
		(OR)	
8	a)	With the help of diagrams, neatly explain about Lensing schemes for coupling Improvement.	8 Marks
	b)	Explain the following terms: (i)V-groove splicing. (ii)Elastic tube splicing.	6 Marks

UNIT-V

9	a)	Discuss the working of isolator and circulators.	8 Marks
	b)	What is WDM and list the reasons for its development as a major communication technology?	6 Marks

(OR)

10	a)	Explain the working principle of passive optical star coupler.	7 Marks
	b)	Discuss in detail about SONET/SDH ring architecture.	7 Marks

CODE No.:14BT51501 SVEC-14

Roll No. | | | | | | | | | | |

OPERATING SYSTEMS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Differentiate between preemptive and non-preemptive scheduling.	7 Marks
	b)	Illustrate the purpose of fork system call with an example.	7 Marks
		(OR)	
2	a)	Explain briefly about Inter Process Communication.	7 Marks
	b)	Name the common services provided by an operating system. Explain them.	7 Marks

UNIT-II

3	a)	Define process synchronization. Describe the critical section problem.	7 Marks
	b)	Explain in detail about semaphores.	7 Marks
		(OR)	
4		Write bankers algorithm for deadlock. Illustrate it with an example.	14 Marks

UNIT-III

5	a)	Given memory partitions of 100K, 500K, 200K, 300K and 600K. Apply first fit, best fit and worst fit to place 212K, 417K, 112K, and 426K.	7 Marks
	b)	Illustrate about Translation Lookaside Buffer (TLB) in detail.	7 Marks
		(OR)	
6	a)	What is locality of reference? Differentiate between paging and segmentation.	7 Marks
	b)	Explain the differences between : i) Logical and physical address space. ii) Internal and external fragmentation.	7 Marks

UNIT-IV

7	a)	Write briefly about file attributes, operations, types and structure.	7 Marks
	b)	Discuss in detail about any two file allocation methods.	7 Marks
		(OR)	
8	a)	Explain about any two disk scheduling with suitable example.	7 Marks
	b)	Describe briefly about disk structure.	7 Marks

UNIT-V

9	a)	Write a short note on: i) Polling. ii) Interrupts.	7 Marks
	b)	Explicate direct memory access.	7 Marks
		(OR)	
10		Illustrate with an example about implementation of access matrix.	14 Marks

DIGITAL SIGNAL PROCESSING

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Synthesize the response of LTI system for an input of unit impulse sequence. 7 Marks

b) Apply the knowledge of Z transform to find the response of discrete time system given by difference $y(n) = -0.8y(n-1) + x(n)$. 7 Marks

(OR)

2 a) Using the properties of DTFT, find the frequency domain representation of following signals. 7 Marks

i) $\left(\frac{1}{3}\right)^{|n-3|} u(n-3)$; ii) $n3^{-n}\, u(-n)$.

b) Interpret why Convolution sum is not sufficient for realizing IIR discrete time system. 7 Marks

UNIT-II

3 a) Determine linear convolution of $x(n) = \{1, 1, 2, 2\}$ and $h(n) = \{1, 2, 1\}$ using DFT. 10 Marks

b) State and prove circular convolution in time domain property of DFT. 4 Marks

(OR)

4 a) Determine 4-Point DFT of $x(n) = \{1, -1, 2, -2\}$. 7 Marks

b) State and prove the circular frequency shifting property of DFT. 7 Marks

UNIT-III

5 a) Explain about Frequency warping effect and suggest a remedy for it. 7 Marks

b) For the given analog transfer function $H_a(s) = 3/(s+1)(s+4)$, determine H(z) for T=1 sec using impulse invariant method. 7 Marks

(OR)

6 a) Derive the relation between analog and digital frequency in bilinear transformation. 7 Marks

b) Compare Bi-linear and Impulse Invariant Transformations. 7 Marks

UNIT-IV

7 a) Explain designing of FIR filter using frequency sampling technique. 7 Marks

b) Realize the following FIR system described by equation using the direct form and linear phase structure. $H(z) = \frac{1}{4} + \frac{1}{2}z^{-1} + \frac{3}{4}z^{-2} + \frac{1}{2}z^{-3} + \frac{1}{4}z^{-4}$. 7 Marks

(OR)

8 a) Discus about characteristics of symmetric and anti-symmetric FIR filters. 7 Marks

b) Design a Linear phase band pass FIR filter with a cutoff frequencies in the range 0.4π to 0.6π rad/sample by taking 7 samples of hamming window. Take N=11. 7 Marks

UNIT-V

9 a) Distinguish synchronous and asynchronous mode of operation of serial ports. 7 Marks

b) Explain special addressing modes in Programmable DSPs. 7 Marks

(OR)

10 a) List the relative merits and demerits of RISC and CISC processors. 7 Marks

b) What is the function of MAC unit used in DSP? Explain any two methods used to avoid over flow and underflow. 7 Marks

FINITE ELEMENT METHODS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Write short notes on plane stress problem with suitable examples.	7 Marks
	b)	Derive the material constitutive matrix for a plane strain problem. .	7 Marks

(OR)

2	a)	Describe the general steps of finite element method.	7 Marks
	b)	State few applications of FEM.	4 Marks
	c)	Write the stress strain relations in three dimensional stress systems.	3 Marks

UNIT-II

3		Starting from the first principles derives the stiffness matrix for a 1- d bar element and extends it for the plane truss element.	14 Marks

(OR)

4		A cantilever beam of 1m length carries a single point load at the end of the beam of 10 kN. Calculate the deflection at the end of the beam using FEM, if E = 70 Gpa, A=500 mm^2 and I = 2500 mm^4.	14 Marks

UNIT-III

5		Derive the element stiffness matrix and load vector and traction for a CST element.	14 Marks

(OR)

6	a)	Derive the stiffness matrix of a constant strain triangle from fundamentals using Potential Energy approach.	8 Marks
	b)	Define plane stress and plane strain conditions with examples.	6 Marks

UNIT-IV

7		Discuss the formulation of 4-noded iso-parametric element and derive the stiffness matrix for it.	14 Marks

(OR)

8		Consider a brick wall (0.7 W/m K) of thickness 30 cm. The inner surface is at 28^0C and the outer surface is exposed to cold air with heat transfer coefficient of 36 W/m^2 K at -15^0C. Determine the steady state temperature distribution and heat flux throw the wall.	14 Marks

UNIT-V

9	a)	Derive the element mass matrix for 1-D bar element.	7 Marks
	b)	Explain the features of Hamilton's interpolation function with an example.	7 Marks

(OR)

10	a)	Explain the features of, Hamilton's interpolation function with an example.	5 Marks
	b)	Derive the shape functions for four noded bar element using Lagrangian interpolation function. Nodes are equally spaced.	5 Marks
	c)	Derive the elemental mass matrix for 2-D triangular element.	4 Marks

METROLOGY AND MEASUREMENTS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define "Interchangeability" and discuss its importance.	5 Marks
	b)	Describe in brief the construction and working of an optical comparator with a neat sketch.	9 Marks

(OR)

2	a)	What is meant by the term "fit". Explain the various types of fits.	7 Marks
	b)	State and explain Taylor's Principe of limit gauging.	7 Marks

UNIT-II

3	a)	Brief note on Calibration of slip gauges and Dial indicators.	7 Marks
	b)	Distinguish between line, end and wave length standards.	7 Marks

(OR)

4	a)	List out different methods of measurement of angles and tapers and explain about angular measurement with bevel protractor.	8 Marks
	b)	Describe about working principle of optical flat and autocollimators.	6 Marks

UNIT-III

5	a)	List out various BIS symbols for indication of surface finish.	7 Marks
	b)	What are the elements of screw thread? Also explain errors in screw threads.	7 Marks

(OR)

6	a)	List out various gear measuring instruments. Also describe the procedure about finding pressure angle and tooth thickness.	7 Marks
	b)	Explain the various standard alignment tests performed on Milling Machine.	7 Marks

UNIT-IV

7		Mention various types of electrical transducers and explain in detail the working of inductance type of transducers with its advantages and disadvantages.	14 Marks

(OR)

8		List out different types of speed measuring devices and explain about Mechanical Tachometer and Electrical Tachometer.	14 Marks

UNIT-V

9	a)	Differentiate between Radiation and Optical Pyrometers.	5 Marks
	b)	How can you measure force with load cell? Explain in detail.	9 Marks

(OR)

10	a)	Explain the Laws of Thermo Couples and also their practical significance.	5 Marks
	b)	Explain the construction and working of Prony break Dynamometer.	9 Marks

INDUSTRIAL AUTOMATION AND ROBOTICS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe the basic elements of an automated system.	7 Marks
	b)	Illustrate various part transfer methods and mechanisms.	7 Marks
		(OR)	
2	a)	Discuss various levels of automation.	7 Marks
	b)	List out various challenges in assembly process and systems assembly line.	7 Marks

UNIT-II

3		Classify Robots by workspace geometry with a neat sketch.	14 Marks
		(OR)	
4	a)	Illustrate end effectors' types, challenges.	8 Marks
	b)	Compare electrical actuators with Hydraulic actuators and write any five advantages of electrical actuators.	6 Marks

UNIT-III

5		Obtain the resultant vector, given a vector u = 2i + 4j + 6k, translating it to (0, 2, 4), rotating by 90^0 about Z-axis and then 30^0 about X-axis.	14 Marks
		(OR)	
6		Discuss about the forward solution in robot kinematics, using D-H matrix.	14 Marks

UNIT-IV

7		Explain the various steps involved in Trajectory Planning.	14 Marks
		(OR)	
8	a)	With a neat sketch, explain the working of a tactile position sensor.	6 Marks
	b)	What is a proximity sensor? Explain any one of such sensor.	8 Marks

UNIT-V

9	a)	What are the methods used for programming a robot?	8 Marks
	b)	What are the goals of artificial intelligence?	6 Marks
		(OR)	
10	a)	Discuss about robot intelligence and task planning.	6 Marks
	b)	Give over view of robot application.	8 Marks

REFRIGERATION AND AIR CONDITIONING

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	How is ideal reversed Carnot cycle modified to result in Bell-Coleman cycle?	7 Marks
	b)	The capacity of a refrigerator is 200TR when working between -6ºC.and 25ºC. Determine the mass of ice produced per day from water at 25ºC. Also find the power required to drive the unit. Assume that the cycle operates on reversed Carnot cycle and latent heat of ice is 335Kj/Kg.	7 Marks

(OR)

2	a)	Explain the differences between heat engine, refrigerator and heat pump and find their COP'S.	7 Marks
	b)	Explain the working principle of bootstrap air cooling system.	7 Marks

UNIT-II

3	a)	Discuss the effects of superheating and sub cooling on the performance of simple vapor compression refrigeration cycle.	6 Marks
	b)	What are the types of refrigerants and discuss the need of new refrigerants.	8 Marks

(OR)

4	a)	Illustrate the refrigeration cycle and T-S diagram. When the refrigerant is dry and saturated at the end of the compression and find an expression for the C.O.P.	8 Marks
	b)	What are the desirable properties of refrigerants and how do you select?	6 Marks

UNIT-III

5	a)	Explain the working principle of Li-Br vapour absorption refrigeration system.	8 Marks
	b)	Explain the working principle vortex tube.	6 Marks

(OR)

6	a)	Explain the working of an Electrolux refrigerator with a neat sketch.	7 Marks
	b)	Explain the working principle of steam Jet refrigeration system.	7 Marks

UNIT-IV

7		A spray cooling coil is chosen to operate under the following conditions. Air inlet - 28^0C & 21^0c WBT. Air outlet temperature -10^0C & 6^0C WBT. Amount of air flow – 2000 m^3/min. The chilled water inlet and out temperature – 7^0 C & 12^0C. Find i) the cooling load on the coil. ii) Water flow rate through the coil.	14 Marks

(OR)

8	a)	Explain the following and represent it on psychometric chart. i) Cooling and dehumidification. ii) Heating and humidification. iii) Adiabatic saturation temperature. iv) Bypass factor.	10 Marks
	b)	Define psychometry and show all psychometric properties on psychometric chart.	4 Marks

UNIT-V

9	a)	Draw the Skelton Comfort chart and explain its salient features.	7 Marks
	b)	Explain various factors governing the optimum effective temperature.	7 Marks
		(OR)	
10	a)	Compare the viscous impingement filter with the dry filter.	7 Marks
	b)	Write a short note on the air-washer type humidifier.	7 Marks

MULTIMEDIA AND APPLICATION DEVELOPMENT

[Computer Science And Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain in detail multimedia software tools.	7 Marks
	b)	Write short notes on various image data types.	7 Marks
		(OR)	
2	a)	Explain various color model s in images.	7 Marks
	b)	Write short notes on Digital Video.	7 Marks

UNIT-II

3		Write an example program to Illustrate Inheritance and Polymorphism in Action script 2.0.	14 Marks
		(OR)	
4	a)	What is class and explain class definition in ACTION SCRIPT?	7 Marks
	b)	Write an example program to illustrate Exception Handling in Action Script 2.0.	7 Marks

UNIT-III

5	a)	What is Interface? Explain about Interface syntax and use.	7 Marks
	b)	Discuss about Exception handling life cycle.	7 Marks
		(OR)	
6		Write an Action Script to convert Indian currency to US dollar with all necessary consideration.	14 Marks

UNIT-IV

7		Describe the steps in the DCT and DFT with a block diagram.	14 Marks
		(OR)	
8	a)	Explain Variable-length Coding with an example.	7 Marks
	b)	Differentiate MPEG-1 and MPEG-2.	7 Marks

UNIT-V

9	a)	How many sub layers are there in ATM? What are they?	7 Marks
	b)	Draw and explain general architecture of Set-top Box.	7 Marks
		(OR)	
10	a)	What are the important parameters of QoS for multimedia data transmission?	7 Marks
	b)	Explain IP-Multicast.	7 Marks

NON-CONVENTIONAL ENERGY SOURCES

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Explain basics of energy sources and Conservation.	CO1	7 Marks
	b)	Explain energy conservation opportunities.	CO1	7 Marks
		(OR)		
2	a)	Explain the estimation of monthly average, daily total radiation on horizontal surface.	CO2	7 Marks
	b)	Explain the working principle of Pyranometer with a neat sketch.	CO1	7 Marks
		UNIT-II		
3	a)	Define transmissivity of the cover system and transmittance-absorptance product.	CO1	7 Marks
	b)	What is meant by selective surface and how it is important in solar energy collection?	CO1	7 Marks
		(OR)		
4	a)	Explain the efficiency of flat plate collector in detail.	CO1	7 Marks
	b)	Classify types of concentrating collectors.	CO1	7 Marks
		UNIT-III		
5	a)	What are the applications of solar thermal energy?	CO1	7 Marks
	b)	Explain solar pond importance and working principle with neat diagram.	CO1	7 Marks
		(OR)		
6	a)	Explain working principle of H2-O2 cell with neat diagram.	CO3	7 Marks
	b)	Explain arrangements of PV cells and classification of PV cell.	CO3	7 Marks
		UNIT-IV		
7	a)	Explain the construction and working of floating drum type bio gas plant.	CO3	7 Marks
	b)	Illustrate the working principle of horizontal axis wind turbine.	CO3	7 Marks
		(OR)		
8	a)	Derive an expression for maximum power and maximum efficiency from wind.	CO4	7 Marks
	b)	Compare the differences between floating drum and fixed dome bio gas plant.	CO3	7 Marks
		UNIT-V		
9	a)	Illustrate the working of vapor dominated Geo Thermal power plant.	CO1	7 Marks
	b)	Describe the working of double basin tidal power plant.	CO3	7 Marks
		(OR)		
10	a)	Classify Ocean Thermal Energy Conversion systems and explain any one method.	CO4	7 Marks
	b)	How wave energy is converted? Explain any one method neatly.	CO4	7 Marks

MANAGEMENT SCIENCE
[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Describe the Nature and Importance of Management in Modern Business Context.	CO1	7 Marks
	b)	Discuss the Henry Fayol principles of Management.	CO2	7 Marks
		(OR)		
2.	a)	Discuss critically the principles of Organisation.	CO3	7 Marks
	b)	What do you understand by SWOT analysis?	CO1	7 Marks

UNIT-II

3.	a)	"Product Layout is better than process Layout". Do You agree with this statement? Support your answer.	CO1	7 Marks
	b)	The following information is about the shock absorbers used by automobile workshop: Annual Demand - 4800 Units Unit Price: Rs.300/- Cost of Placing an Order – Rs.50/- Storage Cost 3% Per Annum Interest Rate 15% Per Annum. Calculate: i) EOQ. ii) How many orders to be placed?	CO4	7 Marks
		(OR)		
4.	a)	Define Marketing. Explain the functions of Marketing.	CO1	7 Marks
	b)	For each of the 14 Days, a number of magnets used in electric relays are inspected and the number of defectives is recorded. The total number of magnets tested is 14,000. The following are the particulars of the number of defectives found every day. You are required to construct P chart.	CO4	7 Marks

Day Number	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Number of Defectives	100	50	150	200	150	50	80	120	60	14	50	70	40	140

UNIT-III

5.	a)	Explain the nature and scope of HRM.	CO1	7 Marks
	b)	What do you understand by Abraham Maslow's theory of Motivation?	CO1	7 Marks
		(OR)		
6.	a)	Identify the role of HR Manager in an Organisation.	CO1	7 Marks
	b)	Explain the methods of Job Evaluation.	CO1	7 Marks

UNIT-IV

7. a) Define Entrepreneurship. Explain the Entrepreneurial Traits. CO5 7 Marks

b) Consider the following activity: CO4 7 Marks

Activity	A	B	C	D	E	F	G	H	I
Predecessor Activity	-	-	A, B	A, B	B	D, E	C, F	D, E	G, H
Time (Days)	30	20	20	20	10	10	40	20	30

i) Draw the Project work.

ii) Identify the Critical Path.

(OR)

8. The following table gives the information about various activities of a project work. CO4 14 Marks

Activity	Normal Duration (Days)	Normal Cost (Rs/-)	Crash Time (Days)	Crash cost (Rs/-)
1-2	9	8,000	7	10,000
1-3	5	5,000	3	8,000
2-3	7	7,000	5	8,600
2-4	8	6,000	6	7,000
3-4	6	9,000	4	11,400

The overhead costs are Rs.1,300 per day. Determine the optimum cost and duration of the project.

UNIT-V

9. a) Explain the basic concepts of MRP. CO6 7 Marks

b) Discuss the concept of Six Sigma. CO1 7 Marks

(OR)

10. a) Explain the Crosby's 14 points of TQM. CO6 7 Marks

b) What do you understand by the concept of Supply Chain Management? CO1 7 Marks

BANKING AND INSURANCE

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

	UNIT-I		
1.	Explain the importance and functions of Banking.	CO1	14 Marks
	OR)		
2.	What are the goals of Monetary Policy in India? How well they have been achieved in recent times?	CO1 CO2	14 Marks
	UNIT-II		
3.	Outline the Anti Money Laundering. Explain the guidelines on prevention of money laundering.	CO1	14 Marks
	(OR)		
4.	Discuss on the different types of loans and their features in present scenario.	CO2	14 Marks
	UNIT-III		
5.	What do you mean by credit cards? Discuss in detail mechanism, types of credit cards and regulatory framework applicable to credit cards in India.	CO2	14 Marks
	(OR)		
6.	Critically examine the B2B and B2C Business Models with an example.	CO1 CO2	14 Marks
	UNIT-IV		
7.	What is Risk Management? Describe the various methods of handling risks.	CO2	14 Marks
	(OR)		
8.	Discuss the origin and growth of Insurance Industry in India.	CO3	14 Marks
	UNIT-V		
9.	Elaborate on commercial Insurance Contracts.	CO1 CO3	14 Marks
	(OR)		
10.	Explain the role of IRDA in regulating the insurance companies in India. And also explain the insurance players in India.	CO3 CO4	14 Marks

BUSINESS COMMUNICATION AND CAREER SKILLS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.		Discuss at length with suitable examples the various functions of communication and the role of manager.	CO1	14 Marks
		(OR)		
2.	a)	Elaborate on Interpersonal Communication.	CO5	7 Marks
	b)	What are the various 'Communication Barriers'? How to overcome them?	CO5	7 Marks
		UNIT-II		
3.		Illustrate the concept of cross-cultural communication.	CO4	14 Marks
		(OR)		
4.	a)	Differentiate 'Corporate Citizenship' and 'Corporate Social Responsibility'.	CO2	7 Marks
	b)	Interpret why a plan for handling crisis situation is a must for companies.	CO2	7 Marks
		UNIT-III		
5.		Describe the importance of written business communication with examples. Elaborate on types of business messages.	CO3	14 Marks
		(OR)		
6.	a)	Discuss and illustrate the components of a business letter.	CO1	7 Marks
	b)	What are the various strategies for writing the body of a letter? Discuss.	CO1	7 Marks
		UNIT-IV		
7.		"A resume that has to be sent through e-mail needs to be developed with a specific process." Illustrate.	CO4	14 Marks
		(OR)		
8.	a)	Analyze the basic patterns of the main body/text of the business presentation.	CO2	7 Marks
	b)	Examine online recruitment process.	CO2	7 Marks
		UNIT-V		
9.		Elaborate on the various stages of Campus Interviews and the strategies to be successful in the Interviews.	CO3	14 Marks
		(OR)		
10.	a)	Discuss the various types of interviews and the importance of nonverbal aspects in interviews.	CO5	7 Marks
	b)	Elaborate on types of interviewing questions and the styles of interviewing.	CO5	7 Marks

PERSONALITY DEVELOPMENT

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Write the process of knowing yourself. Explain with benefits.	CO1	14 Marks
		(OR)		
2.	a)	How your self- image will not be in conflict with your life experiences? Interpret with diagram.	CO1	7 Marks
	b)	Explain stages of self-improvement.	CO3	7 Marks

UNIT-II

3.		Attitude is one of the types of learning. Illustrate.	CO2	14 Marks
		(OR)		
4.	a)	Illustrate how attitudes are influential in relationship?	CO2	7 Marks
	b)	How negative attitude can be modified towards positive attitude?	CO3	7 Marks

UNIT-III

5.		Differentiate between critical thinking and creative thinking.	CO2	14 Marks
		(OR)		
6.	a)	Explain efficient work habits in details.	CO3	7 Marks
	b)	Explain motivation and its sources.	CO4	7 Marks

UNIT-IV

7.		Bring out a few real life situations in an organization for effective communication with supervisor and subordinate.	CO4	14 Marks
		(OR)		
8.	a)	"Ethics is the foundation of leadership". Justify.	CO3	7 Marks
	b)	How criticism can be handled in efficient way?	CO4	7 Marks

UNIT-V

9.		"Safety rules are necessary on workplace". Justify the statement.	CO5	14 Marks
		(OR)		
10.	a)	Describe career goal and its planning.	CO1	7 Marks
	b)	Explain a career path.	CO1	7 Marks

CODE No.: 16BT50303 SVEC-16

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

METROLOGY AND MEASUREMENTS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What do you mean by unilateral and bilateral methods of tolerancing? Explain with neat diagrams.	CO1	7 Marks
	b)	Distinguish between clearance and allowance.	CO1	7 Marks

(OR)

2.		A hole and mating shaft are to have a nominal assembly size of 55mm. The assembly is to have a maximum clearance of 0.04mm and a minimum clearance of 0.02mm. The hole tolerance is 1.5 times the shaft tolerance. Determine the limits for both hole and shaft by using hole basis system.	CO2	14 Marks

UNIT-II

3.	a)	With the help of neat sketches, explain how a sine bar is used to determine the taper angle of an inclined surface.	CO1	7 Marks
	b)	What is the working principle of LVDT?	CO1	7 Marks
4.		Describe about mechanical comparator. Write the advantages and disadvantages of the mechanical comparator.	CO4	14 Marks

UNIT-III

5.		In the measurement of surface roughness, heights of 20 successive peaks and valleys from the datum were measured to be 35, 25, 40, 22, 35, 18, 42, 25, 35, 22, 36, 18, 42, 22, 32, 21, 37, 18, 35, 20 microns. Determine the CLA and RMS values of surface roughness over a sampling length of 20mm.	CO3	14 Marks

(OR)

6.	a)	Name the various numerical methods of assessment of surface finish. Explain them in detail with an example.	CO2	7 Marks
	b)	Describe the working principle of an auto collimator.	CO5	7 Marks

UNIT-IV

7.	a)	Explain how effective diameter of screw thread is measured using three wire method. Include the sketches.	CO2	7 Marks
	b)	What is the "best size" wire? Derive an expression for the same in terms of the pitch and angle of the thread.	CO3	7 Marks

(OR)

8.		What are the different methods of measuring gear tooth thickness? Explain the chordal thickness method. Sketch and describe how chordal thickness is measured using gear tooth vernier.	CO5	14 Marks

UNIT-V

9.	a)	Explain working principle of electrical strain gauge with neat sketch.	CO1	7 Marks
	b)	Define Strain Rosette. How it is used for strain measurement?	CO1	7 Marks
		(OR)		
10.	a)	Explain working principle of thermocouples.	CO1	7 Marks
	b)	Explain how pressure can be measured with bourdon tube pressure gauge with a neat sketch.	CO5	7 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

IV B.Tech I Semester (SVEC-16) Supplementary Examinations February - 2021

REFRIGERATION AND AIR CONDITIONING

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. An air refrigerator working on Bell-Coleman cycle takes air into the compressor at 1 bar and 268 K. It is compressed in a compressor to 5 bar and cooled to 298 K at the same pressure. It is further expanded in the expander to 1 bar and discharged to take the cooling load. The isentropic efficiencies of the compressor and expander are 85% and 90% respectively. Determine : (i) Refrigeration capacity of the system if the air circulated is 40 kg/ min; (ii) Power required for the compressor; and (iii) C.O.P of the system. CO2 14 Marks

(OR)

2. a) What is refrigeration? Define one ton of refrigeration. CO1 7 Marks
   b) Determine the temperature ratio for a Carnot refrigerator whose C.O.P is 4. What is the refrigeration capacity of the machine in tons of refrigeration if the power consumption is 7.5 kW. If the cycle is used as a heat pump, find its COP. CO2 7 Marks

UNIT-II

3. A vapour compression refrigeration machine, with Freon-12 as refrigerant, has a capacity of 12 tonne of refrigeration operating between -28^{0}C and 26^{0}C. The refrigerant is subcooled by 4^{0}C before entering the expansion valve and the vapour is superheated by 5^{0}C before leaving the evaporator. The machine has a six-cylinder single-acting compressor with stroke equal to 1.25 times the bore. It has a clearance of 3% of the stroke volume. Determine: (i) Theoretical power required, (ii) C.O.P, (iii) Volumetric efficiency, (iv) Bore and stroke of cylinder. The speed of compressor is 1000 r.p.m. the following properties of Freon-12 may be used: CO2 14 Marks

Temperature ^{0}C)	Pressure bar	Sp. Volume of vapour, m3/kg	Liquid heat (kJ/kg)	Latent heat (kJ/kg)	Entropy of liquid (kJ/kg K)	Entropy of Vapour (kJ/kg K)
-28	1.093	0.1475	10.64	175.11	0.0444	0.7153
26	6.697	0.0262	60.67	198.11	0.2271	0.6865

(OR)

4. a) Mention the advantages of vapour compression refrigeration system over air refrigeration system. CO1 6 Marks
   b) A refrigerating machine using NH3 operates between the temperature limits of -5^{0}C and 30^{0}C. Find the COP of the system. Also find the corresponding value for a reversed Carnot cycle operating between the same temperatures. The properties of NH3 are given below: CO3 8 Marks

Temperature ^{0}C	Pressure bar	Liquid heat (kJ/kg)	Latent heat (kJ/kg)	Entropy of liquid (kJ/kg K)	Entropy of Vapour (kJ/kg K)
-5	2.41	351	1667.5	3.95	9.05
30	11.895	562	1711	4.69	8.48

UNIT-III

5.	a)	What is the function of the following components in an absorption system: i) Absorber. ii) Rectifier. iii) Analyser. iv) Heat exchangers.	CO1	7 Marks
	b)	Derive an expression for the C.O.P. of an ideal vapour absorption system in terms of temperature at which heat is supplied to the generator, the temperature at which heat is absorbed in the evaporator and the temperature at which heat is discharged from condenser and absorber.	CO3	7 Marks

(OR)

6.	a)	Discuss the function of absorber in vapour absorption refrigeration system.	CO1	6 Marks
	b)	Draw a neat line diagram of Electrolux refrigerator and explain its working principle. What is the important role of hydrogen in this refrigeration system?	CO1	8 Marks

UNIT-IV

7.		The following data apply to an air conditioning system: Room sensible heat=41868 kJ/hr room latent heat=41868 kJ/hr; inside design condition= 25^0C, 50% RH, outside design condition=35^0C, DBT, 27.8 WBT. Return air from the room is mixed with the outside air before entering the cooling coil in the ratio of 4:1. Return air from the room is mixed with the cooling air, i.e. after the cooling coil in the ratio of 1:4. Cooling coil by pass factor is 0.1. The air may be reheated if necessary before supplying to the conditioned space. Assume ADP as 10^0C and determine: i) Supply air conditions into the room. ii) Refrigeration load due to the reheat. iii) Total refrigeration capacity. iv) The quantity of fresh air supplied.	CO6	14 Marks

(OR)

8.	a)	Represent the following process in a skeleton psychometric chart. i) Sensible cooling. ii) Cooling and humidification. iii) Adiabatic mixing of air streams.	CO5	6 Marks
	b)	In a laboratory test a psychometer recorded 36^0C DBT and 30^0C WBT calculate the following terms. i) Vapour pressure. ii) Relative humidity. iii) Specific humidity. iv) Degree of saturation. v) Sew point temperature. vi) Enthalpy of the mixture.	CO4	8 Marks

UNIT-V

9.	a)	What are the advantages and disadvantages of spray type dehumidifier over a coil type dehumidifier	CO1	7 Marks
	b)	Explain the use of heat pump for heating and cooling cycle with neat diagram	CO1	7 Marks

(OR)

10.	a)	What is effective temperature? How does it account for human comfort? What is comfort equation?	CO1	7 Marks
	b)	What is the function of fan in air conditioning system? Explain the various types of axial fans.	CO1	7 Marks

COMPUTER NETWORKS

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	List out the various forms of address in TCP Model and map them to OSI Model layers.	CO1	7 Marks
	b)	Compare the functionality of TCP/ IP over OSI Model.	CO1	7 Marks
		(OR)		
2.		Explain the different methods of digital to analog representation methods with neat sketches.	CO1	14 Marks

UNIT-II

3.	a)	Explain the flow control protocols in a noise less channel.	CO2	7 Marks
	b)	Explain the concept of pure ALOHA with flow chart.	CO2	7 Marks
		(OR)		
4.	a)	Calculate the hamming code for x^4+x^3+x+1. Assume even parity.	CO2	7 Marks
	b)	List out the assumptions of dynamic channel allocation and explain each in detail.	CO2	7 Marks

UNIT-III

5.	a)	Draw the header format of IPv6 and explain each field.	CO2	8 Marks
	b)	Compare the concept of virtual circuit and datagram subnets.	CO2	6 Marks
		(OR)		
6.	a)	Describe the concept of class ful addressing in IPv4.	CO3	7 Marks
	b)	Explain the transition strategies of logical addressing.	CO3	7 Marks

UNIT-IV

7.	a)	Draw the header format of UDP and explain each field in detail.	CO2	7 Marks
	b)	Explain the concept of three-way handshaking in connection establishment in TCP.	CO3	7 Marks
		(OR)		
8.		Explain the concept of sliding window protocol in transport layer with and without errors	CO3	14 Marks

UNIT-V

9.	a)	Explain the concept of DNS.	CO2	7 Marks
	b)	Describe the concept of web documents.	CO3	7 Marks
		(OR)		
10.	a)	Explain in brief about the formats of HTTP request and response messages.	CO3	7 Marks
	b)	What is a name server? List and explain the features of various name servers.	CO3	7 Marks

WEB TECHNOLOGIES
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Which HTML tag is used to display the data in a tabular form? Discuss with an example.	CO1	8 Marks
	b)	Describe the use of local storage in HTML5.	CO1	6 Marks
		(OR)		
2.	a)	List new features which were not present in HTML but are added to HTML5 with an example.	CO2	7 Marks
	b)	Illustrate new Form input types in HTML5.	CO1	7 Marks

UNIT-II

3.	a)	Discuss the merits and demerits of Embedded Style Sheets.	CO2	7 Marks
	b)	Describe the need of window object with an example.	CO2	7 Marks
		(OR)		
4.	a)	Elaborate different ways to include jQuery in a page.	CO1	6 Marks
	b)	List and explain different technologies used in AJAX.	CO5	8 Marks

UNIT-III

5.	a)	Briefly discuss about Grid classes in the Bootstrap.	CO5	8 Marks
	b)	Explain about various key components of Bootstrap.	CO5	6 Marks
		(OR)		
6.	a)	Discuss about Bootstrap Badges and Labels.	CO5	7 Marks
	b)	Discuss in detail about various types of layouts available in Bootstrap.	CO5	7 Marks

UNIT-IV

7.	a)	What are the different types of PHP variables? Explain.	CO1	8 Marks
	b)	Discuss various control structures in PHP with its syntax and an example on each of them.	CO4	6 Marks
		(OR)		
8.	a)	Write a PHP script to remove duplicate elements from an array.	CO3	7 Marks
	b)	What is difference between method overriding and method overloading in PHP?	CO3	7 Marks

UNIT-V

9.	a)	Write short note on Session Tracking.	CO6	5 Marks
	b)	Discuss and give an example on how to retrieve HTML Form Data with PHP.	CO4	9 Marks
		(OR)		
10.	a)	Describe how transactions are managed in PHP.	CO3	7 Marks
	b)	Illustrate how Cookies are created and retrieved in PHP.	CO4	7 Marks

CODE No.: 16BT51501 SVEC-16

COMPILER DESIGN

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain about compiler construction tools in detail.	CO5	7 Marks
	b)	Define Interpreter. Explain about Recursive and Iterative interpreters.	CO1	7 Marks

(OR)

2.	a)	Explain the input buffer scheme for scanning the source program. How the use of sentinels can improve its performance?	CO1	8 Marks
	b)	Explain the role of the lexical analyzer.	CO5	6 Marks

UNIT-II

3.		Write an algorithm for construction of a predictive parsing table. And construct a predictive parsing table for the following grammar: $E \rightarrow T\ E^I$ $E^I \rightarrow +\ T\ E^I \mid €$ $T \rightarrow F\ T^I$ $T^I \rightarrow *\ F\ T^I \mid €$ $F \rightarrow (\ E\ ) \mid id$	CO3	14 Marks

(OR)

4.		Convert the following grammar into LL(1) grammar and construct the LL(1) Parsing table. bexpr → bexpr or bterm | bterm bterm → bterm and bfactor | bfactor bfactor → not bfactor | (bexpr) | true | false	CO3	14 Marks

UNIT-III

5.	a)	Write a note on the type equivalence using example.	CO4	7 Marks
	b)	What is a type conversion? Explain the type conversion with an appropriate example.	CO1	7 Marks

(OR)

6.	a)	Construct the syntax tree for an arithmetic expression a * (b + c) .	CO3	7 Marks
	b)	Write short notes on the following. i) S – attributed definitions. ii) L – attributed definitions .	CO4	7 Marks

UNIT-IV

7.		Explain about Block and Non Block structure storage allocation for: i) Dynamic scoping. ii) Parameter passing mechanisms.	CO6	14 Marks

(OR)

8.	a)	Write about different data structures suitable for Symbol Table.	CO1	7 Marks
	b)	Generate the three-address code for the following C program fragment ***while(a > b)*** ***{*** ***if (c < d) x = y + z;*** ***else x = y - z;*** ***}***	CO2	7 Marks

UNIT-V

9.	a)	What is a flow graph? Explain how a given program can be converted into a flow graph.	CO3	7 Marks
	b)	What are the various machine dependent code optimization techniques?	CO2	7 Marks

(OR)

10.		Explain about Code-Generation algorithm.	CO2	14 Marks

CODE No.: 16BT60118 SVEC-16

RURAL TECHNOLOGY

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Rama wants to grow cotton in his crop field through traditional method in Hosoor village. What is the process involved from sowing seeds to storage?	CO1	7 Marks
	b)	Explain the role of technology poverty eradication in rural development.	CO1	7 Marks

(OR)

2.	a)	Thandrapadu is one of the backward village in Kurnool district with lack of infrastructure facilities. Choose the technology that can improve the rural infrastructure.	CO4	7 Marks
	b)	Write about various organizations related to innovation of technology for rural development.	CO2	7 Marks

UNIT-II

3.	a)	Day by day waste generation is increasing more and to minimize this waste 3R principle use is necessary. What is meant by 3R principle? State the advantages of 3R principle.	CO4	7 Marks
	b)	Kumar is a young doctorate in mechanical engineering from NIT Tirchy and carried out of his research in renewable energy sources. He wants to implement his ideas in rural areas. How can he help rural areas in using solar energy?	CO4	7 Marks

(OR)

4.	a)	The increase of wood waste and animal waste is more in the village Ramapuram which is near to the forest area. Show how the waste can use by the rural people with the technology for cooking.	CO4	7 Marks
	b)	Explain the process, advantages and disadvantages of biogas.	CO2	7 Marks

UNIT-III

5.	a)	Define tissue culture. Explain briefly how the production of one of the ornamental plant orchids can be increased by the plant tissue culture.	CO4	7 Marks
	b)	Explain the building materials used in the rural areas.	CO2	7 Marks

(OR)

6.		The government of India is giving training to the rural women who are unemployed. Discus in detail the rural of cottage industries in rural development.	CO1	14 Marks

UNIT-IV

7.	a)	Raghunath is an agricultural scientist wants to give awareness to the rural people about the usage of organic fertilizers in the crop field. Suggest the importance uses of bio fertilizer.	CO6	7 Marks
	b)	Explain methodologies used for water conservation in rural development.	CO1	7 Marks

(OR)

8.	a)	Write the importance of medical and aromatic plants and explains their need in community development.	CO5	7 Marks
	b)	Explain the importance of environment and sanitation in community development.	CO4	7 Marks

UNIT-V

9.	a)	What is meant by CSR? How development can be achieved with the involvement of private sector participation in the rural area?	CO3	7 Marks
	b)	Write short note on village adoption schemes in India.	CO2	7 Marks

(OR)

10.		Information technology for the rural development is a boon or bane and applies its principle for a specific purpose.	CO2	14 Marks

CODE No.: 16BT60501 SVEC-16

SOFTWARE TESTING
[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Differentiate error, bug, defect, fault, failure, testware and incident giving examples of each.	CO2	7 Marks
	b)	List the states of software bug.	CO1	7 Marks
		(OR)		
2.	a)	Explain software testing methodology.	CO1	7 Marks
	b)	Describe about testing life cycle model.	CO1	7 Marks

UNIT-II

3.	a)	Explain cyclomatic complexity in with example.	CO1	8 Marks
	b)	Explain guidelines for basic path testing.	CO1	6 Marks
		(OR)		
4.	a)	Explain about the different criteria for logic coverage.	CO1	8 Marks
	b)	How do you calculate the number of decision nodes foe switch-case?	CO1	6 Marks

UNIT-III

5.	a)	With a neat sketch, explain the decision table.	CO1	7 Marks
	b)	A program calculates the total salary of an employee with the conditions that if the working hours are less than or equal to 48, then give normal salary. The hours over 48 on normal working days are calculated at the rate of 1.25 of the salary. However, on holidays or Sundays, the hours are calculated at the rate of 2.00 times of the salary. Design test cases using decision table testing.	CO3	7 Marks
		(OR)		
6.	a)	What is an immaterial case? Explain its role in decision tables.	CO1	7 Marks
	b)	List the steps involved in checking the consistency and completeness of specifications using decision tables.	CO2	7 Marks

UNIT-IV

7.	a)	Illustrate the major activities in V and V planning.	CO1	7 Marks
	b)	Discuss the role of users/clients in preparing the test plans.	CO1	7 Marks
		(OR)		
8.	a)	Justify the role of classifying software metrics on monitoring the progress of the software project.	CO4	7 Marks
	b)	What type of projects can be best counted with function point analysis?	CO1	7 Marks

UNIT-V

9.	a)	With a neat diagram, explain the selective retest technique.	CO1	7 Marks
	b)	Design test cases by using regression testing to produce quality software.	CO5	7 Marks
		(OR)		
10.		Implement data driven testing on flight reservation application using regression testing tool.	CO6	14 Marks

SOFTWARE TESTING

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.		Explain the model of testing in detail. Also render software testing life. Cycle model. Justify whether complete testing is possible or not.	CO1	14 Marks
		(OR)		
2.	a)	List the goals of software testing	CO2	7 Marks
	b)	Describe the features of software testing methodology.	CO2	7 Marks
		UNIT-II		
3.	a)	Discuss on Loop testing and Data flow testing techniques in detail.	CO2	7 Marks
	b)	Explain about unit testing with an example.	CO1	7 Marks
		(OR)		
4.	a)	A program calculates the GCD of three numbers in the range [1, 50]. Design test cases for this program using BVC, robust testing and worst-case testing methods.	CO4	7 Marks
	b)	Explain in detail about Cyclomatic Complexity. Illustrate with an example.	CO1	7 Marks
		UNIT-III		
5.	a)	Explore on State Table based testing and Error guessing.	CO2	7 Marks
	b)	What is the need for minimizing test cases in a project? Illustrate with an example.	CO3	7 Marks
		(OR)		
6.	a)	Explain Bottom-up Integration testing with suitable example and compare it with Top-Down Integration.	CO1	7 Marks
	b)	How do you represent Graph matrices for testing process? Device the same with example.	CO4	7 Marks
		UNIT-IV		
7.	a)	What is Test Suit Prioritization? How should prioritize test cases in Software Testing?	CO3	7 Marks
	b)	Explain the steps involved in automated testing process.	CO5	7 Marks
		(OR)		
8.	a)	List the difference between size oriented metrics and function point analysis metrics.	CO2	7 Marks
	b)	Discuss the key components of test management.	CO1	7 Marks
		UNIT-V		
9.	a)	Explain about testing of web based systems.	CO5	7 Marks
	b)	What are the different regression testing tools and techniques? Explain in detail.	CO5	7 Marks
		(OR)		
10.	a)	List the quality aspects of a website and perform performance testing for it.	CO6	7 Marks
	b)	List and explain various guidelines Automated testing.	CO6	7Marks

CLOUD COMPUTING
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Does VMM acts as an interface in virtualization? Justify.	CO5	7 Marks
	b)	Define Virtualization and explain the taxonomy of virtualization.	CO1	7 Marks
		(OR)		
2.		Compare and Contrast any two virtualization technologies of Cloud Computing.	CO4	14 Marks

UNIT-II

3.	a)	Illustrate about various services of Cloud Computing with a neat sketch.	CO3	7 Marks
	b)	List and explain five characteristics of Cloud.	CO1	7 Marks
		(OR)		
4.	a)	List and explain various risks and challenges in Cloud.	CO1	7 Marks
	b)	Define Cloud Computing as per NIST and explain the origin of Cloud.	CO1	7 Marks

UNIT-III

5.		Outline the following Cloud Enabled Technologies. i) Cloud Bursting. ii) Load Balancing. iii) Elastic Resource Capacity.	CO4	14 Marks
		(OR)		
6.		Analyse various components in Cloud Architecture and explain each in detail.	CO4	14 Marks

UNIT-IV

7.	a)	Compare and contrast SaaS and IaaS based on their services.	CO4	7 Marks
	b)	Explain in detail on Capacity Planning and Cloud Scale.	CO1	7 Marks
		(OR)		
8.		Briefly explain the following. i) Host Security. ii) Network Security.	CO2	14 Marks

UNIT-V

9.		Design and develop bucket instance with 4GB storage space using Amazon Simple storage service Cloud.	CO5	14 Marks
		(OR)		
10.		Sales force is a Cloud Computing service specializes in Customer Relationship Management (CRM). Justify the above statement and list few benefits of CRM.	CO6	14 Marks

SOFTWARE PROJECT MANAGEMENT
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1.	a)	Briefly explain waterfall model by stating its merits and demerits.	CO1	7 Marks
	b)	How do we achieve the required software quality?	CO1	7 Marks
		(OR)		
2.	a)	Explain how improvement in software processes will reduce cost.	CO1	7 Marks
	b)	How do we improve team effectiveness?	CO1	7 Marks
		UNIT-II		
3.		Explain the essential activities in the transition phase. Explain how you control them effectively in project.	CO1	14 Marks
		(OR)		
4.		Describe in detail about Engineering and production stage.	CO1	14 Marks
		UNIT-III		
5.		In detail write the artifact set for software project management	CO2	14 Marks
		(OR)		
6.		What is work flow? Explain various levels of software process work flows.	CO4	14 Marks
		UNIT-IV		
7.	a)	Explain in detail about periodic status assessments.	CO3	7 Marks
	b)	What are the fundamental flaws in Conventional Work Breakdown Structures? Write the solution to overcome these flaws.	CO4	7 Marks
		(OR)		
8.	a)	Briefly explain cost and schedule estimating process.	CO3	7 Marks
	b)	What is meant by "line of business organizations"? Write the roles and responsibilities of these organization people.	CO4	7 Marks
		UNIT-V		
9.		Briefly explain Seven core metrics related to project control.	CO5	14 Marks
		(OR)		
10.		What are the roles of project manager in the agile management?	CO6	14 Marks

CODE No.: 16BT70101 SVEC-16

IV B.Tech I Semester (SVEC-16) Regular/Supplementary Examinations February - 2021

ESTIMATION AND QUANTITY SURVEYING
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. Estimate the detailed quantity for the following items of two roomed building from the given plan and cross section as shown in Fig.1. By using long wall and short wall method. CO4 14 Marks
   i) Earth work excavation.
   ii) Brick work in CM (1:4) for substructure up to plinth level.
   iii) R.C.C. slab with (1:1.5:3)
   iv) Inside Plastering in cm (1:5) with 12 mm thick.

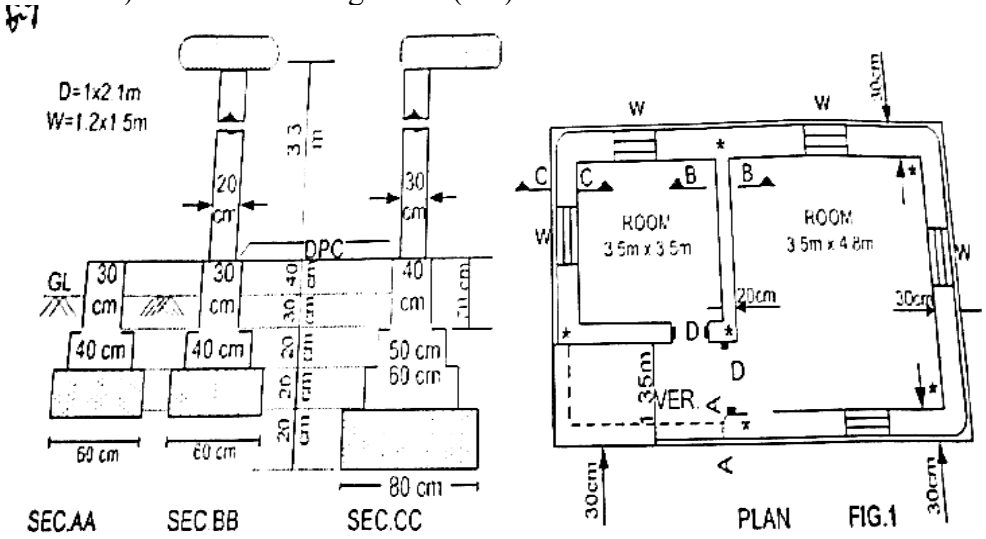

Fig. 1

(OR)

2. a) Define estimate? List out the various quantity surveying for residential building along with units. CO1 10 Marks
   b) Clearly distinguish between long wall and short wall method. CO1 4 Marks

UNIT-II

3. a) Calculate the quantity of earth work for 350 meter length for a portion of road in a uniform ground the heights of banks at the two ends being 1.00 meter and 1.75 meters. The formation width is 12.0 meters and side slopes 2:1 (Horizontal: Vertical). Assume that there is no transverse slope. Use the following methods and justify which method is good. CO4 8 Marks
      (i) Mid sectional area method
      (ii) Prismoidal formula.
   b) Calculate the quantity of cement concrete for cement concreting two kilometers length of 7.50 meters wide road for 8.50 cm thick layer. And also prepare a detailed estimate. Cost at the rate of Rs.750.00 per cu.m. CO2 6 Marks

(OR)

4.		Prepare a detailed estimate for supplying, laying and jointing 300mm diameter glazed stone ware pipe line jointing with 1:3 cement mortar. Measurement of trench is 600m x 0.9m x 0.8m, sand filling with 230mm depth around the pipe.	CO2	14 Marks

UNIT-III

5.		Workout cost per unit for the following items of work. i) Brick work in CM (1:6) for foundation. ii) PCC in 1:3:6 for foundation. iii) R.C.C for M20 grade concrete (1:1.5:3). iv) Painting for walls.	CO6	14 Marks

(OR)

6.	a)	What is the purpose and method of writing specification? Describe briefly general and detailed specification.	CO1	8 Marks
	b)	What is the necessity and importance of the specification related to civil engineering constructions?	CO5	6 Marks

UNIT-IV

7.	a)	Discuss in brief about different contracts.	CO1	8 Marks
	b)	What is meant by arbitration? Explain advantages of setting the disputes by arbitration.	CO1	6 Marks

(OR)

8.	a)	A building is to be constructed on a site of dimensions 30m x 20m. Prepare a contract document for the construction of the building.	CO7	8 Marks
	b)	Summarize the contents of contract document.	CO1	6 Marks

UNIT-V

9.		A three storied building has been constructed on a plot of land measuring 800m^2. The plinth area of each story is 400m^2. The life of the building structure may be taken as 70 years. The building fetches a gross rent of Rs 5000/- per month. Calculate the capitalized value of the property on the basis of 10% net yield. For sinking fund 3% compound interest may be assumed. Cost of land may be taken as Rs 500/- per m^2, other data required may be assumed suitably.	CO3	14 Marks

(OR)

10.	a)	What do you mean by valuation and explain various purposes of valuation.	CO1	10 Marks
	b)	Explain capitalized value with example.	CO8	4 Marks

CODE No.: 16BT70102 SVEC-16

GEOSPATIAL TECHNOLOGIES

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define Arerial Photogrammetry and its types.	CO1	7 Marks
	b)	Explain determination of scale of Aerial Photographs.	CO1	7 Marks
		(OR)		
2.		Explain briefly about methods of mosaicing.	CO2	14 Marks

UNIT-II

3.		Review in detail about the various elements of image interpretation in remote sensing.	CO3	14 Marks
		(OR)		
4.	a)	Explain the various Energy Interactions with Earth's surface and atmosphere.	CO3	7 Marks
	b)	Explain are the types of Remote Sensing Platforms.	CO3	7 Marks

UNIT-III

5.	a)	Explain the hardware and software components of GIS.	CO1	7 Marks
	b)	Distinguish between Raster GIS and Vector GIS.	CO2	7 Marks
		(OR)		
6.		Write the polyconic projection of traformation of map.	CO2	14 Marks

UNIT-IV

7.	a)	Write overview of data management in GIS.	CO4	7 Marks
	b)	Explain functions of Global Positioning System.	CO4	7 Marks
		(OR)		
8.		Evaluate various surface analysis tools and explain the slope analysis in GIS.	CO6	14 Marks

UNIT-V

9.	a)	Elaborate the application of GIS in traffic congestion analysis.	CO5	7 Marks
	b)	Enumerate the applications of Watershed management for sustainable management.	CO7	7 Marks
		(OR)		
10.		Brief on land use land cover classification.	CO5	14 Marks

RAILWAY, AIRPORT AND HARBOUR ENGINEERING

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss different types of rail joints with help of neat sketches and give their merits and limitations.	CO1	7 Marks
	b)	Discuss merits and limitations of railways.	CO1	7 Marks

(OR)

2.	a)	How do you define super elevation? What are the objectives of providing super elevation on a railway track?	CO1	7 Marks
	b)	If a 8^0 curve track diverges from a main curve of 50 in an opposite direction in the layout of a standard gauge track. Calculate the super elevation and speed on the branch line, if the maximum speed permitted on the main line is 45 kmph.	CO3	7 Marks

UNIT-II

3.	a)	Summarize how poor soil is being stabilized and explain the methods in detail.	CO5	7 Marks
	b)	Discuss the materials required for track laying and list the factors considered in the construction of railway track.	CO6	7 Marks

(OR)

4.	a)	Describe the different types of marshaling yards with neat sketches.	CO4	7 Marks
	b)	What is a gradient? What are they provided on railway track? How are they classified?	CO5	7 Marks

UNIT-III

5.	a)	Draw a neat sketch of aeroplane showing its parts. Also explain the functions of the component parts.	CO1	7 Marks
	b)	What are the factors affecting airport operating capacity?	CO4	7 Marks

(OR)

6.	a)	Explain about different types of surveys for site selection.	CO3	7 Marks
	b)	What are the essential features of a runway lightning system?	CO3	7 Marks

UNIT-IV

7.	a)	What is basic runway length? How it is determined and what are the corrections applied?	CO3	7 Marks
	b)	The length of runway under standard conditions is 1620m. The airport site has an elevation of 270m. Its reference temperature is 32.90^0C. If the runway is to be constructed with an effective gradient of 0.20%. Determine the corrected runway length.	CO3	7 Marks

(OR)

8.	a)	Write the construction procedure of the wind rose diagram.	CO3	6 Marks
	b)	Determine length of runway under standard conditions is 1900m the airport is to be provided at an elevation of 400m above the mean sea level. The airport reference temperature is 40^0C. If the runway is to be constructed with an effective gradient of 0.4%, determine the corrected runway length.	CO3	8 Marks

UNIT-V

9.	a)	Explain the function and role of dry docks in detail.	CO1	7 Marks
	b)	Explain working principle of Light House with neat sketch.	CO1	7 Marks

(OR)

10.	a)	Explain the classification of ports and enumerate the factors involved in site selection.	CO1	7 Marks
	b)	Mention the benefits and constraints of Water Transportation.	CO1	7 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

ADVANCED FOUNDATION ENGINEERING

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain Vesic's theory of bearing capacity. How it differ from the Terzaghi's bearing capacity theory?	CO1	8 Marks
	b)	Consider a square footing of size 2m x 2m constructed on saturated clay. The depth of the foundation is 1.5m and rock layer is at a depth of 0.75m from base of the footing. The clay is having γ = 18kN/m^3, C_u = 60kN/m^2 and ϕ = 0^0. Estimate the ultimate bearing capacity of foundation. Take F.S = 3.	CO2	6 Marks

OR)

2.	a)	Explain the 3-dimensional consolidation theory of settlements.	CO2	8 Marks
	b)	Find the dimensions of a square footing which carries a column load of 480kN. The dimensions of the columns is 0.4m x 0.4m and the allowable bearing pressure of soil is 100kPa.	CO2	6 Marks

UNIT-II

3.	a)	How the point bearing resistance of the pile is determined from SPT and CPT tests?	CO5	8 Marks
	b)	Determine the load carrying capacity of a cast in-situ pile of length 15m and size 0.5m x 0.5m constructed in a clayey soil with average C_u = 50kN/m^2 and γ = 17.5kN/m^3.	CO2	6 Marks

(OR)

4.	a)	Explain the load carrying capacity of the pile by using α-method for cohesive soils.	CO1	7 Marks
	b)	Explain in brief about the ultimate capacity of pile groups during pull out and lateral loads.	CO1	7 Marks

UNIT-III

5.	a)	What is a sheet pile wall? Explain the procedure for determining the embedment depth of free cantilever sheet pile wall.	CO2	7 Marks
	b)	A bulk head with free earth support retains cohesion-less soil up to a height of 5m. The soil have frictional angel of 20^0, unit weigh of 19kN/m^3. Determine the force developed in the tie rod placed at 1 m below the top of the surface.	CO3	7 Marks

(OR)

6.	a)	With an aid of neat sketch, explain the procedure for determining the embedded depth required for a bulk head with fixed earth support.	CO1	7 Marks
	b)	A cantilever sheet pile wall supporting a cohesive soil up to a height of 6 above the dredge level. The soil has C_u = 35kN/m^2 and γ = 17kN/m^3. Determine the depth embedded. Take F.S = 1.	CO3	7 Marks

UNIT-IV

7.	a)	What is an expansive soil? Explain the foundation problems associated with it.	CO1	7 Marks
	b)	Explain about: i) CNS layer. ii) Classification of expansive soil.	CO4	7 Marks

(OR)

8.	a)	Explain the lime column techniques in expansive soil.	CO4	7 Marks
	b)	With an aid of neat sketch, explain the construction procedure of under-reamed pile foundation. Give out an expression for determining the load carrying capacity for a double bulb under-reamed pile foundation.	CO1	7 Marks

UNIT-V

9.	a)	Explain in brief about ship impact on pilled wharf structure.	CO1	7 Marks
	b)	What is a breakwater? Explain in brief about rubble mount break water and wall type break water.	CO2	7 Marks

(OR)

10.		Briefly explain the following terms: i) Quay walls. ii) Wharves. iii) Docks. iv) Piers.	CO1	14 Marks

ENVIRONMENTAL IMPACT ASSESSMENT AND MANAGEMENT

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain main stages of EIA process.	CO1	7 Marks
	b)	Discuss about the need of EIA in engineering projects.	CO1	7 Marks
		(OR)		
2.	a)	What are the Elements of EIA?	CO1	7 Marks
	b)	What is Initial environmental examination?	CO1	7 Marks

UNIT-II

3.	a)	Explain network method of EIA.	CO2	7 Marks
	b)	Explain matrix method of EIA.	CO2	7 Marks
		(OR)		
4.	a)	Explain the criteria for the selection of EIA methodology.	CO2	7 Marks
	b)	Explain matrix method of EIA.	CO2	7 Marks

UNIT-III

5.	a)	Explain the methodology for the assessment of Soil.	CO3	7 Marks
	b)	Discuss the need for public awareness on EIA.	CO3	7 Marks
		(OR)		
6.	a)	What are the mitigation measures to be taken for reducing the impact on surface water quality by the use of agricultural chemicals?	CO3	7 Marks
	b)	Explain impacts on surface water environment.	CO3	7 Marks

UNIT-IV

7.	a)	What are the causes and effects of Deforestation?	CO4	7 Marks
	b)	What is the necessity of delineation of study area of EIA?	CO4	7 Marks
		(OR)		
8.	a)	Explain the generalized approach for assessment of air pollution impact.	CO4	7 Marks
	b)	Explain the impact of developmental activities on vegetation.	CO4	7 Marks

UNIT-V

9.	a)	Explain the Types of environmental audit.	CO5	7 Marks
	b)	Explain briefly about Air Act and Water Act.	CO5	7 Marks
		(OR)		
10.		Explain one case study on EIA in Industries.	CO5	14 Marks

CODE No.: 16BT70110 SVEC-16

WATER RESOURCES SYSTEMS PLANNING AND MANAGEMENT

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) Describe the concept of system analysis to water resources applications. CO1 7 Marks
   b) Explain the system approach to water resources system management. CO1 7 Marks

(OR)

2. a) What is the role of constraints in modeling of water resources systems? CO2 7 Marks
   b) Discuss the applicability of different optimization techniques used in water resources systems. CO2 7 Marks

UNIT-II

3. a) Give a general mathematical formulation of LPP. Explain all terms. CO2 7 Marks
   b) Solve the following LPP by using graphical method. CO4 7 Marks
   Maximize $\mathbf{Z = 2x_1 + 3x_2}$
   Subjected to constraints
   $\mathbf{2x_1+x_2 \leq 2}$
   $\mathbf{3x_1+4x_2 \geq 12}$
   $\mathbf{x_1, x_2 \geq 0}$

(OR)

4. Solve the following LPP. CO4 14 Marks
   Maximize $\mathbf{Z = x_1 + 4x_2}$
   Subjected to constraints
   $\mathbf{3x_1 + x_2 \leq 3}$
   $\mathbf{2x_1 + 3x_2 \leq 6}$
   $\mathbf{4x_1 + 5x_2 \geq 20}$
   $\mathbf{x_1, x_2 \geq 0}$

UNIT-III

5. a) Explain Bellman's principle of optimality. CO5 7 Marks
   b) What is the role of dimensionality in dynamic programming problem. CO5 7 Marks

(OR)

6. Solve the following 4-user water allocation problem to maximize the total returns using **backward recursion** of dynamic programming water available foe allocation = 60units, to be allocated in discrete units of 0, 10, 20 ….. 60. Returns from the four users for a given allocation are given in the table below. CO4 14 Marks

Allocation	Returns from			
	User 1	User 2	User 3	User 4
0	0	0	-3	1
10	3	4	3	1
20	5	4	5	1
30	6	4	5	7
40	3	4	4	8
50	3	6	2	10
60	3	7	0	10

UNIT-IV

7.		Minimize $Z=2x_1^2+x_2^2+3x_3^2+10x_1+8x_2+6x_3-100$ subject to $x_1+x_2+x_3=20$ $x_1, x_2 \geq 0$	CO4	14 Marks

(OR)

8.	a)	Explain any one classical method of optimization with suitable example.	CO5	7 Marks
	b)	What is the procedure for applying simulation in water resource planning?	CO5	7 Marks

UNIT-V

9.		There are two alternatives to water supply in an irrigation district. Plan A is to construct an open channel at an initial cost of Rs. 50 lakhs with O and M cost of Rs. 4 lakhs per year. The alternative plan B is to go for a piping system at an initial cost of Rs.90 lakhs and an O and M cost of Rs. 50000 per year. Money is available for 6% interest rate and sinking fund will improve at 4% interest. Useful life of the project in both cases is 20 years. Select the more economical of the two alternatives.	CO8	14 Marks

(OR)

10.	a)	What are the economics considered in planning of reservoir system?	CO7	7 Marks
	b)	Explain the concept of conjunctive use of surface and sub-surface water resources.	CO6	7 Marks

CODE No.: 16BT70112 SVEC-16

EARTHQUAKE RESISTANT DESIGN OF STRUCTURES

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain in detail any five Building characteristics that are to be considered during the earthquake resistant design.	CO1	7 Marks
	b)	Define lateral load resisting system and explain its types.	CO1	7 Marks

(OR)

2.	a)	Explain about Response reduction factor and Zone factor during the seismic analysis.	CO2	7 Marks
	b)	Explain about various classifications of earthquakes. Explain in detail about magnitude and intensity of earthquakes.	CO1	7 Marks

UNIT-II

3.		Derive the equation of motion of SDOF system for free vibration and find the solution for: i) Under damped system. ii) Over damped system. iii) Critically damped system.	CO2	14 Marks

(OR)

4.	a)	Explain about the importance of ductility and what are the general requirements of ductility.	CO4	7 Marks
	b)	Define Ductility and explain various types of Ductility in detail.	CO2	7 Marks

UNIT-III

5.	a)	Explain the step by step procedure for seismic design coefficient method in detail.	CO4	7 Marks
