(An Autonomous Institution, Affiliated to JNTUA, Anantapur)

I B.Tech (SVEC14) Supplementary Examinations June - 2022

ENGINEERING CHEMISTRY

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Distinguish between smectic, nematic and cholesteric liquid crystal types with suitable examples.	7 Marks
	b)	Define electrochemical sensors. Write important applications of electrochemical sensors.	7 Marks
		(OR)	
2	a)	Write different types of conducting polymers and give their important engineering applications.	7 Marks
	b)	Write different types of composites and their applications.	7 Marks

UNIT-II

3	a)	A sample of water on analysis gives the following $MgCl_2$ = 9.5 ppm, $CaSo_4$ = 3.4 ppm, $Mg(HCO_3)_2$ = 7.3 ppm $MgSO_4$ = 6.0 ppm. Calculate temporary and permanent hardness of the sample.	7 Marks
	b)	What are scales and sludges? How do they effect the boiler? How can they be prevented?	7 Marks
		(OR)	
4	a)	Discuss the estimation of hardness by EDTA method.	7 Marks
	b)	Discuss desalination of brackish water by reverse osmosis method.	7 Marks

UNIT-III

5	a)	Write the construction of standard hydrogen electrode and calomel electrode.	7 Marks
	b)	What is fuel cell? Write brief construction and reactions involved in H_2-O_2 fuel cell. Write its important applications.	7 Marks
		(OR)	
6	a)	Define electroplating. Explain electroplating of nickel.	8 Marks
	b)	Write the chemistry of Ni-Cd battery and give its important applications.	6 Marks

UNIT-IV

7	a)	Discuss various types of liquid lubricants.	7 Marks
	b)	How do you synthesis petrol by Fischer-Tropsch process.	7 Marks
		(OR)	
8	a)	How to determine the calorific value of solid fuel by bomb calorimeter	7 Marks
	b)	Write short note on: i) Fire Point	7 Marks

ii) Cloud Point

UNIT-V

9	a)	What is the effect of nanotechnology on food science?	7 Marks
	b)	How Plasma Enhanced Chemical Vapour Deposition is useful for synthesis of nanomaterials. How it is advantage over sol-gel process.	7 Marks

(OR)

10	a)	Explain about green manufacturing systems by taking suitable example.	7 Marks
	b)	Write short notes on: i) Green solvents ii). Biocatalysis	7 Marks

CODE No.:14BT1BS03 SVEC-14

Roll No. | | | | | | | | | | |

ENGINEERING MATHEMATICS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Solve the Differential equation: $\frac{dy}{dx} + y\cos x = y^3 \sin 2x$ 7 Marks

b) Find the orthogonal trajectories of the family of circles $\mathbf{x^2 + y^2 + 2gx + c = 0}$ where g is the parameter. 7 Marks

(OR)

2 a) Solve the differential equation $(D^2 + 2D + 2)y = e^{-x} + \sin 2x$ 7 Marks

b) Applying the method of variation of parameters solve $(D^2 + 4)y = \sec 2x$ 7 Marks

UNIT-II

3 a) If $u = \sin^{-1}\left(\frac{x}{y}\right) + \tan^{-1}\left(\frac{y}{x}\right)$, show that $x\frac{\partial u}{\partial x} + y\frac{\partial u}{\partial y} = 0$ 7 Marks

b) Determine the point where the function $u = x^2 + xy + 3x + 2y + 5$ has a maxima or minima. 7 Marks

(OR)

4 a) Sketch the curve for the equation $r = a\sin 3\theta$. 7 Marks

b) Find the radius of curvature at the point (r, θ) of the cardioids $r = a(1 - \cos\theta)$. 7 Marks

UNIT-III

5 a) Show that the whole length of the curve $\mathbf{x^2(a^2 - x^2) = 8a^2y^2}$ is $\pi a\sqrt{2}$ 7 Marks

b) Evaluate $\iint (x^2 + y^2)dxdy$ in the positive quadrant for which $x + y \le 1$. 7 Marks

(OR)

6 a) Evaluate $\iiint xyz\,dxdydz$ taken through the positive octant of the sphere $\mathbf{x^2 + y^2 + z^2 = a^2}$ by transforming in to spherical coordinates. 7 Marks

b) Change the order of integration and evaluate $\int_0^1 \int_{x^2}^{2-x} xydxdy$. 7 Marks

UNIT-IV

7 a) Find the Laplace transformation of $f(t) = |t - 1| + |t + 1|, t \ge 0$. 7 Marks

b) Use convolution theorem to evaluate $L^{-1}\left\{\frac{S}{(s+2)(s^2+9)}\right\}$. 7 Marks

(OR)

8 a) Find $L\left\{\int_0^t \frac{e^{-t}\sin t}{t}\,dt\right\}$ 7 Marks

b) Solve $\frac{d^2x}{dt^2} + 9x = \cos 2t$, if $x(0) = 1, x\left(\frac{\pi}{2}\right) = -1$ 7 Marks

UNIT-V

9 a) A vector field is given by $A = \left(x^2 + xy^2\right)\hat{i} + \left(y^2 + yx^2\right)\hat{j}$. Show that the field is irrotational, and find the scalar potential. 7 Marks

b) Find the work done in moving a particle in the force field $\bar{F} = 3x^2 i + (2xz - y)j + zk$, along the straight line from (0, 0, 0) to (2, 1, 3). 7 Marks

(OR)

10 a) Verify divergence theorem for $\boldsymbol{F = x^2 i + y^2 j + z^2 k}$ taken over the rectangular parallelepiped $\boldsymbol{0 \le x \le a, 0 \le y \le b, 0 \le z \le c}$. 7 Marks

b) Evaluate $\iiint_V xyz\,dx\,dy\,dz$ take over the volume V of the tetrahedron given by $x \ge 0,\ y \ge 0,\ z \ge 0$ and $x + y + z \le 1$. 7 Marks

MATHEMATICAL METHODS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Find the rank of the matrix $\begin{bmatrix} 1 & 2 & 3 & 0 \\ 2 & 4 & 3 & 2 \\ 3 & 2 & 10 & 3 \\ 6 & 8 & 7 & 5 \end{bmatrix}$ by reducing it into normal form. 7 Marks

b) Verify Cayley –Hamilton Theorem for the matrix $\begin{bmatrix} 1 & 1 & 3 \\ 1 & 3 & -3 \\ -2 & -4 & -4 \end{bmatrix}$ 7 Marks

(OR)

2 a) Find the eigen values and eigen vectors of the matrix $\begin{bmatrix} 8 & -6 & 2 \\ -6 & 7 & -4 \\ 2 & -4 & 3 \end{bmatrix}$ 7 Marks

b) Reduce the quadratic form $3x^2 + 5y^2 + 3z^2 - 2xy - 2yz + 2zx$ to the canonical form and find its rank, index and signature 7 Marks

UNIT-II

3 a) Find the positive root of $x^4 - x = 10$ correct to three decimal places, using Newton-Raphson method. 7 Marks

b) Given $\log_{10}654=2.8156$, $\log_{10}658=2.8182$, $\log_{10}659=2.8189$, $\log_{10}661=2.8202$, find by using Lagrange's formula, the value of $\log_{10}656$. 7 Marks

(OR)

4 a) Find a real root of the equation $x \log_{10} x = 1.2$ lying between 2 and 3 by Regula-falsi method, correct to four decimal places. 7 Marks

b) Find the values of a, b, c so that $y = a + bx + cx^2$ is the best fit to the following data: x **0 1 2 3 4 y 1 0 3 10 21** 7 Marks

UNIT-III

5 a) The population of certain town(as obtained from census data) is shown in the table: 7 Marks

year:	1971	1981	1991	2001	2011
Population in thousands:	19.96	39.65	58.81	77.21	94.61

Find the rate of the growth of the population in 1971 and 2011.

b) Compute y (0.1) from first approximation of Picard's method for the initial value problem $\frac{dy}{dx} = \frac{y - x}{y + x}$. 7 Marks

(OR)

6 a) Using Euler's modified method, obtain a solution of the equation $\frac{dy}{dx} = x + |\sqrt{y}|$ with initial condition y=1 at x=0, for the range $0 \le x \le 0.4$ in steps of 0.2 . 7 Marks

b) A river is 80 feet wide. The depth d in feet at a distance x feet from one bank is given by the following table: 7 Marks

X	0	10	20	30	40	50	60	70	80
D	0	4	7	9	12	15	14	8	3

Find approximately the area of the cross-section of the river.

UNIT-IV

7 a) Find the half-range Sine series for the function $f(x) = x - x^2$, $0 < x < 1$. 7 Marks

b) Find $Z^{-1}\left[\frac{z^2 - 3}{(z+2)(z^2+1)}\right]$. 7 Marks

(OR)

8 a) Find the Fourier series to represent the function $f(x) = |\sin x|, = \pi < x < \pi$. 7 Marks

b) Evaluate $Z^{-1}\left(\frac{z}{(z-a)(z-b)}\right)$ using convolution theorem. 7 Marks

UNIT-V

9 a) Find the differential equation of all spheres whose centers lie on the Z-axis. 7 Marks

b) A rod of length l with insulated sides is initially at a uniform temperature u_0. Its ends are suddenly cooled to 0ºC and are kept at that temperature. Find the temperature function u(x, t). 7 Marks

(OR)

10 a) Form the partial differential equation from $xyz = \phi(x + y + z)$ by eliminating the arbitrary function. 7 Marks

b) Form a partial differential equation arising from $\varphi\left(x + y + z, x^2 + y^2 + z^2\right) = 0$ where φ is an arbitrary function. 7 Marks

PROGRAMMING IN C AND DATA STRUCTURES

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	How does a program get executed? Discuss the role of interpreter and compiler.	7 Marks
	b)	Write a flowchart for acquiring B.Tech degree from your college after EAMCET examination.	7 Marks
		(OR)	
2	a)	Explain the structure of C program.	7 Marks
	b)	What is a datatype? Discuss C datatypes.	7 Marks

UNIT-II

3	a)	What are Non-formatted input and output statements in C? Give suitable examples.	7 Marks
	b)	Explain the use of break and continue statement in loops with example.	7 Marks
		(OR)	
4	a)	Explain the 'while' statement with an example.	7 Marks
	b)	Write a C program to find the GCD of two numbers.	7 Marks

UNIT-III

5	a)	What is an array? Discuss its declaration. How to initialize multidimensional array.	7 Marks
	b)	Write a program to print binary equivalent of a decimal number using array.	7 Marks
		(OR)	
6	a)	How functions help in handling complexity of problem solving? Explain.	7 Marks
	b)	Write a C program to reverse a string with out using library function.	7 Marks

UNIT-IV

7	a)	Explain array of structures and structure within a structure with examples.	7 Marks
	b)	Write a C program to read and display a text from the file.	7 Marks
		(OR)	
8	a)	Explain the following with syntax and example : i) Pointer as function argument. ii) Function returning pointer.	7 Marks
	b)	Describe the pointer in C with an example.	7 Marks

UNIT-V

9	a)	Discuss the operations allowed on queues with illustrations.	7 Marks
	b)	Can you construct a stack using single linked list? Justify your answer.	7 Marks
		(OR)	
10	a)	Give an example for binary tree. Explain various kinds of binary tress.	7 Marks
	b)	Write a program to implement a queue using arrays.	7 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

I B.Tech (SVEC10) Supplementary Examinations February – 2021

ENGINEERING MATHEMATICS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Electronics and Control Engineering, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer any FIVE questions
All questions carry equal marks

1. a) Solve the differential equation $(1+y^2)dx = (\tan^{-1}y - x)dy$.

b) Find the orthogonal trajectories of the family of curves $r^n = a\sin n\theta$.

2. a) Using the method of variation of parameters, solve $y'' - 6y' + 9y = \frac{e^{3x}}{x^2}$.

b) Show that the frequency of free vibrations in a closed electrical circuit with inductance L and capacity C in series is $\frac{30}{\pi\sqrt{LC}}$.

3. a) Determine whether the following functions are functionally dependent or not. If they are functionally dependent find the relation between them.

$$u = \frac{x}{y} \qquad v = \frac{x+y}{x-y}$$

b) Examine for extreme values of $\mathbf{f(x,y) = x^4 + y^4 - 2x^2 + 4xy - 2y^2}$

4. a) Show that the evolute of the cycloid x = a(θ - sin θ) , y = a(1 - cos θ) is another cycloid.

b) Trace the curve $\mathbf{ay^2 = x^3}$

5. a) Find the Laplace transform of (i) e^{4t} sin2t cost. (ii) $(1-e^t)/t$.

b) Apply convolution theorem to evaluate $L^{-1}\left[\frac{s^2}{(s^2+a^2)(s^2+b^2)}\right]$.

6. a) Use Laplace transform method to solve $\frac{d^2x}{dt^2} - 2\frac{dx}{dt} + x = e^t$ with x=2, $\frac{dx}{dt} = -1$ at t = 0.

b) Find the inverse Laplace transform of $\log\frac{s+1}{s-1}$.

7. a) Transform the integral $\int_0^\infty\int_0^\infty e^{-1(x^2+y^2)}dxdy$ to polar coordinates and hence evaluate.

b) Change the order of integration $\int_0^1\int_{x^2}^{2-x} xy\,dxdy$ and hence evaluate the same.

8. a) Prove that $\nabla^2 f(r) = f^{11}(r) + \frac{2}{r}f^1(r)$.

b) Use the divergence theorem to evaluate $\iint_S xdydz + ydzdx + zdxdy)$, where S is the portion of the plane $x + 2y + 3z = 6$ which lies in the first octant.

ENGINEERING PHYSICS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain absorption process, spontaneous and stimulated emission and derive Einstein's coefficients.	6 Marks
	b)	Explain construction and working of a He-Ne Laser with the help of energy level diagram. Mention few applications of Lasers in engineering field.	8 Marks
		(OR)	
2	a)	Discuss the construction and reconstruction of a Hologram.	6 Marks
	b)	What are different types of Optical Fibers? Classify them based on modes of propagation and index profile. Mention few industrial and medical applications of Optical Fibers.	8 Marks

UNIT-II

3	a)	Explain the construction of Hologram.	6 Marks
	b)	Describe the acceptance cone and numerical aperture.	8 Marks
4	a)	Derive the Separation between Successive (hkl) Planes.	6 Marks
	b)	Explain Laue Diffraction of crystals with diagram.	8 Marks

UNIT-III

5	a)	Why is the wave nature of matter not apparent in our daily observations? Explain it with suitable example.	4 Marks
	b)	What is the importance of Schrodinger's wave equation? Derive an expression for the wave function and energy of a particle confined in a one dimensional potential box.	10 Marks
		(OR)	
6	a)	What is effective mass? Derive an expression for effective mass of an electron.	9 Marks
	b)	Explain origin of energy band formation in solids.	5 Marks

UNIT-IV

7	a)	Derive Clausius - Mossotti Equation in dielectrics subjected to static fields.	8 Marks
	b)	Describe frequency and temperature dependence of polarization in dielectric medium.	6 Marks
		(OR)	
8	a)	Derive an expression for intrinsic carrier concentration.	7 Marks
	b)	Explain qualitatively the working of a PN Junction Diode using energy level diagram.	7 Marks

UNIT-V

9	a)	Explain the Hysteresis of ferromagnetism.	6 Marks
	b)	Describe the classification of magnetic materials with properties and examples.	8 Marks

(OR)

10	a)	Explain the general properties of Superconductors.	6 Marks
	b)	Describe the BCS theory. What is the penetration depth?	8 Marks

ENGINEERING CHEMISTRY

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Write a note on electrical insulators.	7 Marks
	b)	Define the terms: i) Dielectric constant. ii) Dielectric loss. iii) Dielectric strength.	7 Marks
		(OR)	
2	a)	What are conducting polymers? How they are classified? Write important applications of conducting polymers.	7 Marks
	b)	Explain about amperometric sensors. Give its applications.	7 Marks

UNIT-II

3	a)	What is meant by hardness of water? What are its units and write interrelation between them.	7 Marks
	b)	Define scale and sludge. How it will be overcome?	7 Marks
		(OR)	
4	a)	Discuss the estimation of hardness by EDTA method.	7 Marks
	b)	Discuss desalination of brackish water by reverse osmosis method.	7 Marks

UNIT-III

5	a)	Explain the working principle of solid oxide fuel cells with reactions.	7 Marks
	b)	Give the significance of hydrogen electrode in electrochemical cells.	7 Marks
		(OR)	
6	a)	Define corrosion. Discuss concentration cell corrosion.	7 Marks
	b)	Compare H_2-O_2 fuel cell with traditional cells.	7 Marks

UNIT-IV

7	a)	Explain mechanism of lubrication using boundary film lubrication.	7 Marks
	b)	Describe various steps involved in refining of petroleum.	7 Marks
		(OR)	
8	a)	How do you measure viscosity using Redwood viscometer?	8 Marks
	b)	Explain how refining of petroleum is carried out.	6 Marks

UNIT-V

9	a)	What is meant by nano materials? Explain some of its properties.	7 Marks
	b)	How nano materials are synthesized? Explain aSol-Gel process.	7 Marks
		(OR)	
10	a)	Write about any two methods for synthesis of nano materials.	7 Marks
	b)	Discuss Green Computing method.	7 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Anantapur)

I B.Tech (SVEC14) Supplementary Examinations August – 2021

ENGINEERING MATHEMATICS

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Solve: $xy(1+xy^2)\frac{dy}{dx} = 1$. 7 Marks

b) Solve: $(D^2+4)y = \tan 2x$ by the method of variation of parameters. 7 Marks

(OR)

2 a) A body of temperature 80^0F is placed in a room of constant temperature 50^0F at a time $t = 0$. At the end of 5 minutes the body has cooled to a temperature of 70^0F. When will the temperature of the body by 60^0F. 7 Marks

b) Solve: $y'' + 2y' + 3y = e^x \cos x$ 7 Marks

UNIT-II

3 a) If $u = \sin^{-1}\left(\frac{x}{y}\right) + \tan^{-1}\left(\frac{y}{x}\right)$, show that $x\frac{\partial u}{\partial x} + y\frac{\partial u}{\partial y} = 0$ 7 Marks

b) Determine the point where the function $u = x^2 + xy + 3x + 2y + 5$ has a maxima or minima. 7 Marks

(OR)

4 a) Sketch the curve for the equation $r = a\sin^3\theta$. 7 Marks

b) Find the radius of curvature at the point (r, θ) of the cardioids $r = a(1-\cos\theta)$. 7 Marks

UNIT-III

5 a) Find the volume when the loop of the curve $y^2 = x(2x-1)^2$ revolves about the x-axis. 7 Marks

b) Evaluate the following by changing into polar coordinates 7 Marks

$$\int_0^4 \int_0^{\sqrt{16-y^2}} y^2\sqrt{x^2+y^2}\,dx\,dy$$

(OR)

6 a) Change the order of integration in $\int_0^a \int_0^a \frac{x\,dy\,dx}{x^2+y^2}$ and hence evaluate it. 7 Marks

b) Evaluate $\iiint_V (x+y+z)\,dxdydz$ where V volume of the cylinder $x^2+y^2=1$, $z=0$ and $z=4$ by transforming into cylindrical coordinates. 7 Marks

UNIT-IV

7 a) Find the Laplace transform of (i) $\cos^3 4t$ (ii) $e^{-3t}.t^2.\sin(t)$. 7 Marks

b) Solve $\mathbf{y''+2y'+y = 3x.e^{-x}}$ given y(0)=4, y'(0)=0. 7 Marks

(OR)

8 a) Find the inverse Laplace transform of (i) $\cot^{-1}(s)$ (ii) $\frac{s}{(s^2+9)^2}$. 7 Marks

b) Solve $\mathbf{y''-3y'+2y = 4t+e^{3t}}$ given y(0)=1, y'(0)=-1, using Laplace transform. 7 Marks

UNIT-V

9 a) Show that the vector field $\bar{F} = (x^2 + xy^2)\vec{i} + (y^2 + x^2y)\vec{j}$ is irrotational and find a scalar potential **φ** such that $\bar{F} = \nabla\phi$ — 7 Marks

b) Verify Green's Theorem for $\oint_c (xy + y^2)dx + x^2dy$, where C is bounded by $y = x$ and $y = x^2$. — 7 Marks

(OR)

10 a) A vector field is given by $F = (x^2 - y^2 + x)\bar{i} - (2xy + y)\bar{j}$. Show that the field F is irrotational and find its scalar potential. — 7 Marks

b) If $\bar{F} = 3x^2yz^2\bar{i} + x^3z^3\bar{j} + 2x^3yz\bar{k}$, then show that $\int_C \bar{F}.d\bar{r}$ is independent of the path of integration. Hence evaluate the integral where C is any path joining (0, 0, 0) to (1, 2, 3). — 7 Marks

Roll No. | | | | | | | | | | |

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Anantapur)

I B.Tech (SVEC14) Supplementary Examinations August – 2021

MATHEMATICAL METHODS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Determine the non-singular matrices P and Q such that PAQ is in the normal form for A, and hence obtain the rank of the matrix $A = \begin{bmatrix} 1 & 2 & 3 & -2 \\ 2 & -2 & 1 & 3 \\ 3 & 0 & 4 & 1 \end{bmatrix}$. 7 Marks

b) Solve the following system of equations by Gauss-elimination method: 7 Marks
$2x + 4y + z = 3;\ 3x + 2y - 2z = -2;\ x - y + z = 6.$.

(OR)

2 a) Verify Cayley-Hamilton theorem for $A = \begin{bmatrix} 2 & 1 & 1 \\ 0 & 1 & 0 \\ 1 & 1 & 2 \end{bmatrix}$. Hence find A^{-1}. 7 Marks

b) Reduce the quadratic form $6x^2 + 3y^2 + 14z^2 + 4yz + 18zx + 4xy$ into the canonical form. 7 Marks

UNIT-II

3 a) Find an approximate root of the equation $x^3 - 3x - 5 = 0$, using Newton-Raphson method and correct to four decimal places. 7 Marks

b) Fit a parabola $y = a + bx + cx^2$ to the following data 7 Marks

x :	2	4	6	8	10
y :	3.07	12.85	31.47	57.38	91.29

(OR)

4 a) Estimate the value of f(3.5) from the following data 7 Marks

x :	3	4	5	6	7	8	9
f(x) :	2.7	6.4	12.5	21.6	34.3	51.2	72.9

b) Define forward, backward , central difference operators 7 Marks

UNIT-III

5 a) Find the value of y at x = 0.1, 0.2, if $\frac{dy}{dx} = x - y^2$ and y = 1 at x = 0 , by using Modified Euler's method. 7 Marks

b) A rod is rotating in a plane. The following table gives angle θ (in radians) through which the: 7 Marks
rod has turned for various values of time t (in seconds).

t :	0	0.2	0.4	0.6	0.8	1.0	1.2
θ	0	0.12	0.49	1.12	2.02	3.2	4.67

Estimate angular velocity and angular acceleration of the rod at t = 0.2, 1.0 sec .

(OR)

6 A rod is rotating in a plane. The following table gives angle θ (in radians) through which the: 14 Marks

rod has turned for various values of time t (in seconds).

t :	0	0.2	0.4	0.6	0.8	1.0	1.2
θ	0	0.12	0.49	1.12	2.02	3.2	4.67

Estimate angular velocity and angular acceleration of the rod at t = 0.2, 1.0 sec .

UNIT-IV

7 a) Find the Fourier series to represent function $f(x) = \frac{1}{4}(\pi - x)^2, 0 < x < 2\pi$. 7 Marks

b) Find the Fourier Sine transform of $f(x) = \frac{1}{x(1+x^2)}$. 7 Marks

(OR)

8 a) Find $Z^{-1}\left(\frac{3z^2+z}{(5z-1)(5z+2)}\right)$. 7 Marks

b) Obtain the Half Range Sine series for $f(x) = ax + b$, in (0,1). 7 Marks

UNIT-V

9 a) Form the partial differential equation for $z = y^2 + 2f\left(\frac{1}{x} + \log y\right)$. 7 Marks

b) Solve by the method of separation of variables $3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0$ with $u(x,0) = 4e^{-x}$. 7 Marks

(OR)

10 An insulated rod of length has its ends A and B maintained at 0^0 C and 100^0 C respectively until steady state condition prevails . If B is suddenly reduced to 0^0 C and maintained at 0^0 C. Find the temperature at a distance x from A at time t. 14 Marks

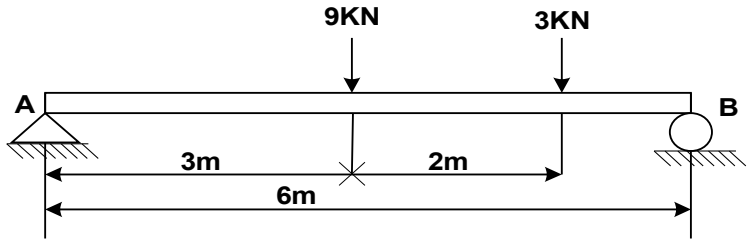
ENGINEERING MECHANICS
[Civil Engineering, Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 A system of parallel forces acting on a rigid bar as shown in figure. Reduce this system to i) A single force ii) A single force at A and couple at A iii) A single force at B and couple at B. 14 Marks



(OR)

2 a) State laws of dry friction. 4 Marks

b) A screw jack has square threads of mean diameter 6cm, helix angle 10^0 and coefficient of friction 0.3. Determine the force that must be applied to the end of 60cm lever to raise a weight of 3000N. 10 Marks

UNIT-II

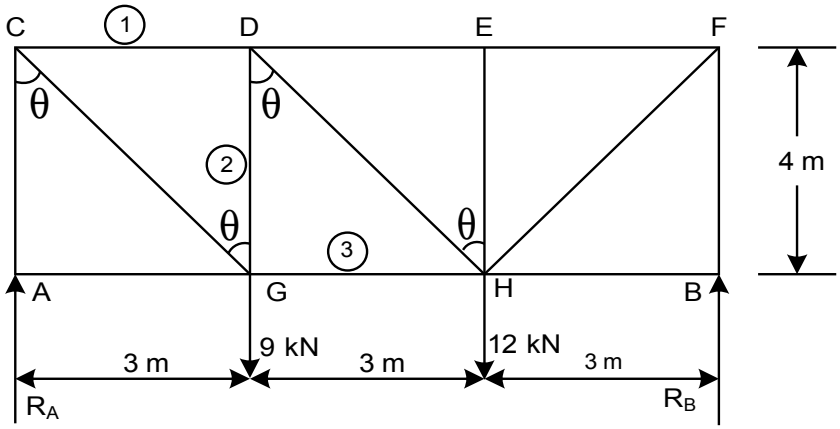
3 a) Differentiate between a roller support and a hinged support. 4 Marks

b) A simply supported beam AB is subjected to a distributed load increasing from 1600 N/m to 4600 N/m from end A to end B respectively. The span AB = 6.5 meters. Determine the reactions at the supports. 10 Marks

(OR)

4 a) State the difference between a perfect frame and an imperfect frame. 4 Marks

b) A truss of span 9m is loaded as shown in figure. Find the forces in the members marked as 1, 2 and 3, by method of sections. 10 Marks



UNIT-III

5	a)	What do you understand by axes of reference?	4 Marks
	b)	A body consists of right circular solid cone of height 100cm and radius of 80cm placed on solid hemisphere of radius equal to 80cm radius of same material. Find the position of the CG of body.	10 Marks

(OR)

6	a)	State and explain Pappus -Guldinus theorems for surface of revolution.	4 Marks
	b)	Find the moment of inertia of a rectangular section of 12cm long and 10cm deep about the centre of gravity.	10 Marks

UNIT-IV

7		A bullet of mass 0.5 kg moving with a speed of 30m/sec was fired into a wooden block of weight 200N, resting on an incline, and inclined 30^0 to the horizontal. If the coefficient of friction is 0.35, find the distance the block travels along the incline in the upward direction	14 Marks

(OR)

8		The motion of a particle is given by $x=2(t+1)^2$ and $y=2(t+1)^{-2}$. Determine the velocity and acceleration of the particle at t=0 and at t=1sec.	14 Marks

UNIT-V

9		A cylinder, a circular hoop and a sphere each having mass M and radius R are released from rest along a rough plane having inclination β. If in each case rolling occurs without slipping, compare the accelerations of mass centres of these three objects. Determine their ratios also.	14 Marks

(OR)

10	a)	Define the Newton Laws of motion for linear motion and rotational motion.	4 Marks
	b)	A train of weight 2000kN starts from rest and attains a speed of 100km/hr in 4 minutes. If the frictional resistance of the track is 8 N per kN of the train's weight, find the average pull required. Take $g=9.8$ m/sec^2.	10 Marks

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What are the characteristics of Lasers?	6 Marks
	b)	Explain the semiconductor laser construction with neat diagram.	8 Marks
		(OR)	
2	a)	Write the Sabine's formula for reverberation time.	6 Marks
	b)	Explain the basic requirements of acoustically good hall.	8 Marks

UNIT-II

3	a)	What is time dilation and length contraction?	4 Marks
	b)	Derive the energy-momentum relation.	10 Marks
		(OR)	
4	a)	Explain the reverberation and time reverberation.	6 Marks
	b)	Describe the absorption coefficient of sand and its measurements.	8 Marks

UNIT-III

5	a)	Explain de Broglie hypothesis.	5 Marks
	b)	Describe G.P Thomson's experiment in support of de Broglie hypothesis.	9 Marks
		(OR)	
6	a)	Distinguish between metal, semiconductors and insulators based on band theory.	6 Marks
	b)	Derive the Kronig-Penney model for Potential Well.	8 Marks

UNIT-IV

7	a)	Describe the drift and diffusion currents in a semiconductor. Derive their expressions and deduce Einstein's relations.	9 Marks
	b)	Define Hall effect and explain its uses.	5 Marks
		(OR)	
8	a)	What is a photo diode? Describe the working of photo diode.	6 Marks
	b)	How can you differentiate intrinsic and extrinsic semiconductors? Derive an expression for the electron concentration in intrinsic semiconductor.	8 Marks

UNIT-V

9	a)	Distinguish between soft and hard magnetic materials.	6 Marks
	b)	Explain the origin of magnetic moment.	8 Marks
		(OR)	
10	a)	Describe the BCS theory of superconductivity.	10 Marks

b) Mention any four applications of super conductivity. 4 Marks

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Solve: $xy(1+xy^2)\frac{dy}{dx} = 1$. 7 Marks

b) Solve: $(D^2 + 4)y = \tan 2x$ by the method of variation of parameters. 7 Marks

(OR)

2 a) Solve $\mathbf{y''+ 4y'+3y=e^{-x}.sin(x) + x.e^{3x}.}$ 7 Marks

b) Solve $\mathbf{y''+-3y'+2y=(1+e^{-x})^{-1}}$, using the method of variation of parameters. 7 Marks

UNIT-II

3 a) Express equation $\frac{\partial^2 y}{\partial x^2} + \frac{\partial^2 y}{\partial y^2} = 0$ in polar form (r, θ). 7 Marks

b) Show that the rectangular solid of maximum volume that can be inscribed in a sphere is cube. 7 Marks

(OR)

4 a) Trace the curve $a^2y^2 = x^2(a^2 - x^2)$ 7 Marks

b) Find the radius of curvature at any point of the cardioid $r = a(1 - \cos\theta)$. 7 Marks

UNIT-III

5 a) Find the length of the arc of the parabola $\mathbf{x^2=4ay}$ measured from the vertex to one extremity of the latus rectum. 7 Marks

b) Find the surface of the solid formed by revolving the cardioids r = a(1+cos(θ)) about the initial line. 7 Marks

(OR)

6 a) Change the order of integration in $\int_0^a \int_0^a \frac{x\,dy\,dx}{x^2 + y^2}$ and hence evaluate it. 7 Marks

b) Evaluate $\iiint_V (x + y + z)\,dxdydz$ where V volume of the cylinder $\mathbf{x^2 + y^2 = 1}$, $\mathbf{z = 0}$ and $\mathbf{z = 4}$ by transforming into cylindrical coordinates. 7 Marks

UNIT-IV

7 a) Find the Laplace transform of (i) $\mathbf{\cos^3 4t}$ (ii) $\mathbf{e^{-3t}.t^2.sin(t).}$ 7 Marks

b) Solve $\mathbf{y''+ 2y'+y = 3x.e^{-x}}$ given y(0)=4, y'(0)=0. 7 Marks

(OR)

8 a) Find the inverse Laplace transform of (i) $\mathbf{\cot^{-1}(s)}$ (ii) $\frac{s}{(s^2 + 9)^2}$ 7 Marks

b) Solve $\mathbf{y''- 3y'+2y = 4t+e^{3t}}$ given y(0)=1, y'(0)=-1, using Laplace transform. 7 Marks

UNIT-V

9 a) Show that the vector field $\overline{F} = (x^2 + xy^2)\vec{i} + (y^2 + x^2y)\vec{j}$ is irrotational and find a scalar potential φ such that $\overline{F} = \nabla\phi$ — 7 Marks

b) Verify Green's Theorem for $\oint_c (xy + y^2)dx + x^2dy$, where C is bounded by $y = x$ and $y = x^2$. — 7 Marks

(OR)

10 a) Use Gauss divergence theorem to evaluate $\iint_S \overline{A} \cdot d\overline{S}$ where $A = x^3\bar{i} + y^3\bar{j} + z^3\bar{k}$ and S is the surface of the sphere $\boldsymbol{x^2 + y^2 + z^2 = a^2}$. — 7 Marks

b) A vector field is given by $F = (x^2 - y^2 + x)\bar{i} - (2xy + y)\bar{j}$. Show that the field F is irrotational and find its scalar potential. — 7 Marks

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Discuss the solutions of the system of equations $2x + 3ky + (3k + 4)z = 0$; $x + (k + 4)y + (4k + 2)z = 0$; $x + 2(k + 1)y + (3k + 4)z = 0$ for all values of k — 7 Marks

b) Using Cayley Hamilton theorem find A^{-1} where $A = \begin{bmatrix} 2 & 1 & -1 \\ 0 & 2 & 1 \\ 5 & 2 & -3 \end{bmatrix}$ — 7 Marks

(OR)

2 a) Find the eigen values and eigen vectors of the matrix $\begin{bmatrix} 3 & 2 & 2 \\ 1 & 2 & 2 \\ -1 & -1 & 0 \end{bmatrix}$ — 7 Marks

b) Reduce the quadratic form $7x^2 + 6y^2 + 5z - 4xy - 4yz$ to the canonical form and find its rank, index and signature. — 7 Marks

UNIT-II

3 a) Find a real root of the equation $x^3 - x - 11 = 0$ by bisection method. — 7 Marks

b) Fit a straight line of the form y = a + bx for the following data — 7 Marks

x	0	5	10	15	20	25
y	12	15	17	22	24	30

(OR)

4 a) Find a real root of the equation $x \log_{10} x = 1.2$ lying between 2 and 3 by Regula-falsi method, correct to four decimal places. — 7 Marks

b) Find the positive root of $x^4 - x = 10$ correct to three decimal places, using Newton-Raphson method. — 7 Marks

UNIT-III

5 a) The following data gives the velocity of a particle for 20 seconds at an interval of 5 seconds. Find the initial acceleration using the entire data; — 7 Marks

Time t (sec):	0	5	10	15	20
Velocity V(m/sec)	0	3	14	69	228

b) Solve $y' = x + y$, given $y(1) = 0$. Find $y(1.1)$ and $y(1.2)$ by Taylor's series method. Also, compare the result with its exact value. — 7 Marks

(OR)

6 a) Find the first and second derivatives of the function tabulated below at the point 1.1 — 7 Marks

x :	1.0	1.2	1.4	1.6	1.8	2.0
y :	0	0.128	0.544	1.296	2.432	4.000

b) Use fourth order Runge-Kutta method to find — 7 Marks
y at x = 0.1, given that $dy/dx = 3e^x + 2y$, $y(0) = 0$ and $h = 0.1$

UNIT-IV

7 a) Find the half-range Sine series for the function $f(x) = x - x^2$, $0 < x < 1$. 7 Marks

b) Find $Z^{-1}\left[\frac{z^2 - 3}{(z+2)(z^2+1)}\right]$. 7 Marks

(OR)

8 a) Find the Fourier series of the function: $f(x) = \begin{cases} 0, when - \pi < x < 0 \\ Sinx, when 0, x < \pi \end{cases}$ 7 Marks

b) Solve the difference equation: $u_{x+2} + u_x = 5(2^x)$, given that $u_0 = 1$ and $u_1 = 0$ 7 Marks

.

UNIT-V

9 a) Find the partial differential equation of all spheres whose centers lie on the z-axis. 5 Marks

b) Solve the equation $\frac{\partial u}{\partial t} = \frac{\partial^2 u}{\partial x^2}$ with boundary conditions $u(x,0) = 3 \sin n\pi x$, $u(0,t) = 0$ and $u(1,t) = 0$, where $0 < x < 1$, $t > 0$. 9 Marks

(OR)

10 An insulated rod of length has its ends A and B maintained at 0^0 C and 100^0 C respectively until steady state condition prevails. If B is suddenly reduced to 0^0 C and maintained at 0^0 C. Find the temperature at a distance x from A at time t. 14 Marks

PROGRAMMING IN C AND DATA STRUCTURES

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw a flow chart that to find the reverse of a given number.	7 Marks
	b)	What is a Compiler? Differences between Compiler and an Interpreter.	7 Marks
		(OR)	
2	a)	Explain the structure of C program.	7 Marks
	b)	What is a datatype? Discuss C datatypes.	7 Marks

UNIT-II

3	a)	Discuss various single character input and output functions.	7 Marks
	b)	Differentiate between pretest and post test loops.	7 Marks
		(OR)	
4	a)	Write a program to check whether a number is a power of 2 or not.	7 Marks
	b)	Discuss the need for nested loop. Explain any one scenario with C code.	7 Marks

UNIT-III

5	a)	Derive the expression for finding the address of any element of a 1-dimensional array for any data type.	7 Marks
	b)	Define Recursion. Write a C program to print Fibonacci sequence using recursion.	7 Marks
		(OR)	
6	a)	Differentiate between call by value and call by reference with suitable program.	7 Marks
	b)	Demonstrate quick sort with a program.	7 Marks

UNIT-IV

7	a)	Comprehend how command line arguments can be passed and used.	7 Marks
	b)	Discuss array of pointers and array of pointers as formal parameter.	7 Marks
		(OR)	
8	a)	What is the difference between structure and union? Give example program.	7 Marks
	b)	Write a program to copy one existing fie into other named file.	7 Marks

UNIT-V

9	a)	Compare linked list with array. List the merits and demerits of linked list.	7 Marks
	b)	Explain operations performed on doubly linked list.	7 Marks
		(OR)	
10	a)	What is queue? Discuss all its variants.	7 Marks
	b)	Discuss tree as a data structure. Explain its applications in detail.	7 Marks

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Reduce the following forces into single force and couple acting at the origin. 14 Marks

F_1 = 200N passing through (2,3) and (4,5)
F_2 = 400N passing through (-2,3) and (3,4)
F_3 = 600N passing through (2,-3) and (4,0)

(OR)

2 a) State laws of dry friction. 4 Marks

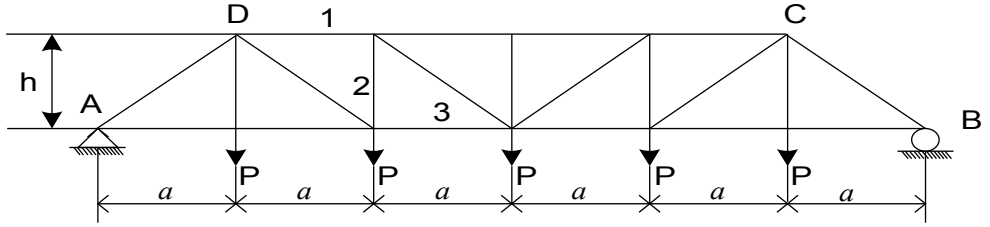
b) A screw jack has square threads of mean diameter 6cm, helix angle 10^0 and coefficient of friction 0.3. Determine the force that must be applied to the end of 60cm lever to raise a weight of 3000N. 10 Marks

UNIT-II

3 A simply supported beam AB of 7m span is subjected to (i) 4KN-m clockwise couple at 2m from A, (ii) 8KN-m anti-clockwise couple at 5m from A and (iii) a triangular load with zero intensity at 2m from A increasing at 4KN/m at a point 5m from A. Determine the reactions at A and B. 14 Marks

(OR)

4 Using the method of sections, determine the forces in bars 1,2 and 3 of the plane truss loaded and supported as shown in the figure. 14 Marks



UNIT-III

5 Determine the Second moment area of an unsymmetrical I-section about two orthogonal axes passing through the centroid. Overall height of the section is 400mm, Top flange is 150mm wide and 10mm thick and the bottom flange is 200mm wide and 10mm thick. Web thickness is 12mm. 14 Marks

(OR)

6 State theorems of Pappus and hence find the total surface area of a frustum of a hollow cone of height 40mm, base outer radius and inner radius 100mm and 40mm respectively and top outer radius and inner radius 60mm and 40mm respectively. (inner face of the cone is vertical) 14 Marks

UNIT-IV

7 A bullet of mass 0.5kg moving with a speed of 30m/sec was fired into a wooden block of weight 200N, resting on an incline and inclined 30^0 to the horizontal. If the coefficient of friction is 0.35, find the distance the block travels along the incline in the upward direction 14 Marks

(OR)

8 The motion of a particle is given by $x = 2(t+1)^2$ and $y = 2(t+1)^{-2}$ determine the velocity and acceleration of the particle at t = 0 and at t = 1sec. 14 Marks

UNIT-V

9 A circular rotating disc of mass ***m*** and radius of gyration ***i*** has a clockwise angular speed of magnitude $\mathbf{w_0}$ when it is placed on the horizontal floor. Assuming a coefficient of friction **μ** at contiguous surface, determine the expression for time when skidding stops and rolling starts. 14 Marks

(OR)

10 a) Derive the expressions for velocity and acceleration of a particle subjected to a force as a function of velocity. 7 Marks

b) Explain the equations of equilibrium of a rigid body experiencing a planar motion. 7 Marks

UNIT-I

1	a)	What are the characteristics of Lasers?	6 Marks
	b)	Explain the Semiconductor Laser construction with neat diagram.	8 Marks
		(OR)	
2	a)	Write the Sabine's formula for reverberation time.	6 Marks
	b)	Explain the basic requirements of acoustically good hall.	8 Marks

UNIT-II

3	a)	What is absorption coefficient of sound? Explain the method of measurement of sound absorption coefficient.	4 Marks
	b)	How can you deduce Sabine's formula for the reverberation time of an auditorium?	10 Marks
		(OR)	
4	a)	Derive an expression for length contraction from Lorentz transformation equations.	7 Marks
	b)	Derive Einstein's Mass-Energy equivalence relation.	7 Marks

UNIT-III

5	a)	Describe the various Scattering source of electrical resistance in metals.	6 Marks
	b)	Derive and explain Fermi-Dirac distribution.	8 Marks
		(OR)	
6	a)	Discuss the electron in a periodic potential.	8 Marks
	b)	Explain the origin of energy band formation in solids.	6 Marks

UNIT-IV

7	a)	Explain electronic polarization in atoms and obtain an expression for electronic polorizability in terms of the radius of the atom.	8 Marks
	b)	Explain the important characteristics of ferroelectric materials.	6 Marks
		(OR)	
8	a)	Derive an expression for the number of electrons per unit volume in the conduction band of an intrinsic semiconductor.	9 Marks
	b)	Describe LED.	5 Marks

UNIT-V

9	a)	Define magnetic moment. Explain the origin of magnetic moment at the atomic level.	9 Marks
	b)	Explain clearly difference between hard and soft magnetic materials.	5 Marks
		(OR)	
10	a)	Describe the BCS theory of superconductivity.	10 Marks

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Solve $(3y + 2x + 4)dx - (4x + 6y + 5)dy = 0$ 7 Marks

b) Find the orthogonal trajectories of the family circles $x^2 + y^2 = ax$. 7 Marks

(OR)

2 a) Solve: $y'' + 4y' + 4y = 3\sin x + 4\cos x$, $y(0) = 1$ and $y'(0) = 0$. 7 Marks

b) Find the orthogonal trajectories of the cardioids $r = a(1 - \cos\theta)$. 7 Marks

UNIT-II

3 a) Express equation $\frac{\partial^2 y}{\partial x^2} + \frac{\partial^2 y}{\partial y^2} = 0$ in polar form (r, θ). 7 Marks

b) Show that the rectangular solid of maximum volume that can be inscribed in a sphere is cube. 7 Marks

(OR)

4 a) Trace the curve $a^2y^2 = x^2(a^2 - x^2)$. 7 Marks

b) Find the radius of curvature at any point of the cardioid $r = a(1 - \cos\theta)$. 7 Marks

UNIT-III

5 a) Find the area of the segment cut off from the parabola $x^2 = 8y$ by the line $x - 2y+8=0$. 7 Marks

b) Find the length of an arc of the curve y=log sec x between θ = 0 and π/3. 7 Marks

(OR)

6 a) Change the order of integration in $\int_0^a \int_0^a \frac{x\,dy\,dx}{x^2 + y^2}$ and hence evaluate it. 7 Marks

b) Evaluate $\iiint_V (x + y + z)\,dxdydz$ where V volume of the cylinder $x^2 + y^2 = 1$, $z = 0$ and $z = 4$ by transforming into cylindrical coordinates. 7 Marks

UNIT-IV

7 a) Find the Laplace transform of (i) $\cos^3 4t$ (ii) $e^{-3t}.t^2.\sin(t)$. 7 Marks

b) Solve $y''+ 2y'+y = 3x.e^{-x}$ given $y(0)=4$, $y'(0)=0$. 7 Marks

(OR)

8 a) Solve $y'' + 2y' - 3y = \sin t$ such that $y'(0) = 0$ *and* $y(0) = 0$. 7 Marks

b) Find the Laplace transform of *(i)*$\cos^3 2t$ *(ii)* $e^{-2t}\cosh 3t$. 7 Marks

UNIT-V

9 a) A vector field is given by $A = \left(x^2 + xy^2\right)\hat{i} + \left(y^2 + yx^2\right)\hat{j}$. Show that the field is irrotational, and find the scalar potential. 7 Marks

b) Find the work done in moving a particle in the force field $\bar{F} = 3x^2 i + (2xz - y)j + zk$, along the straight line from (0, 0, 0) to (2, 1, 3). 7 Marks

(OR)

10 a) Use Gauss divergence theorem to evaluate $\iint_S \bar{A} \cdot d\bar{S}$ where $A = x^3\bar{i} + y^3\bar{j} + z^3\bar{k}$ and S is the surface of the sphere $x^2 + y^2 + z^2 = a^2$. 7 Marks

b) A vector field is given by $F = (x^2 - y^2 + x)\bar{i} - (2xy + y)\bar{j}$. Show that the field F is irrotational and find its scalar potential. 7 Marks

MATHEMATICAL METHODS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Find the rank of the matrix $\begin{bmatrix} 1 & 2 & 3 & 0 \\ 2 & 4 & 3 & 2 \\ 3 & 2 & 10 & 3 \\ 6 & 8 & 7 & 5 \end{bmatrix}$ by reducing it into normal form. 7 Marks

b) Verify Cayley –Hamilton Theorem for the matrix $\begin{bmatrix} 1 & 1 & 3 \\ 1 & 3 & -3 \\ -2 & -4 & -4 \end{bmatrix}$. 7 Marks

(OR)

2 a) Find the eigen values and eigen vectors of the matrix $\begin{bmatrix} 8 & -6 & 2 \\ -6 & 7 & -4 \\ 2 & -4 & 3 \end{bmatrix}$. 7 Marks

b) Reduce the quadratic form $3x^2 + 5y^2 + 3z^2 - 2xy - 2yz + 2zx$ to the canonical form and find its rank, index and signature 7 Marks

UNIT-II

3 a) Find an approximate root of the equation $x^3 - 3x - 5 = 0$, using Newton-Raphson method and correct to four decimal places. 7 Marks

b) Fit a parabola $y = a + bx + cx^2$ to the following data. 7 Marks

x :	2	4	6	8	10
y :	3.07	12.85	31.47	57.38	91.29

(OR)

4 a) Estimate the value of f(3.5) from the following data 7 Marks

x :	3	4	5	6	7	8	9
f(x) :	2.7	6.4	12.5	21.6	34.3	51.2	72.9

b) Define forward, backward , central difference operators 7 Marks

UNIT-III

5 a) The distance covered by an athlete for the 50 metre is given in the following table: Time(sec): 0 1 2 3 4 5 6 Distance (metre) 0 2.5 8.5 15.5 24.5 36.5 50. Determine the speed of the athlete at t = 5 sec. correct to two decimals. 7 Marks

b) Solve $y' = x + y$, given $y(1) = 0$. Find $y(1.1)$ and $y(1.2)$ by Taylor's series method. Also, compare the result with its exact value. 7 Marks

(OR)

6 a) A curve passes through the points (0, 23), (0.5, 19), (1, 14), (1.5, 11), (2, 12.5), (2.5, 16), (3, 19), (3.5, 20) and (4, 20). Obtain the area bounded by the curve, the x – axis and the extreme ordinates. 7 Marks

b) Using modified Euler's method, determine y(0.4) in steps of 0.2, given that y = 1 at x = 0. 7 Marks

UNIT-IV

7 a) Obtain the Half Range Cosine series for $x \sin x$ in $(0, \pi)$. 7 Marks

b) Find the Fourier Cosine transform of $f(x) = \frac{1}{1+x^2}$. 7 Marks

(OR)

8 a) Find $Z^{-1}\left(\frac{z}{(z-2)(z-3)}\right)$ using Convolution theorem. 7 Marks

b) Find the Fourier series to represent function $f(x) = |x|, -\pi < x < \pi$. 7 Marks

UNIT-V

9 a) Find the differential equation of all spheres whose centers lie on the Z-axis. 7 Marks

b) A rod of length ***l*** with insulated sides is initially at a uniform temperature u_0. Its ends are suddenly cooled to 0^0C and are kept at that temperature. Find the temperature function u(x, t). 7 Marks

(OR)

10 An insulated rod of length has its ends A and B maintained at 0^0 C and 100^0 C respectively until steady state condition prevails . If B is suddenly reduced to 0^0 C and maintained at 0^0 C. Find the temperature at a distance x from A at time **t**. 14 Marks

PROGRAMMING IN C AND DATA STRUCTURES

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Differentiate compiler and interpreter.	7 Marks
	b)	Draw the flow chart for finding the maximum of three numbers.	7 Marks
		(OR)	
2	a)	What is an identifier? Write the algorithm for checking whether the given number is prime or not.	8 Marks
	b)	Explain in detail about any three input and output statements used in C language.	6 Marks

UNIT-II

3	a)	Describe formatted input in scanf function.	7 Marks
	b)	Write a program to convert a decimal number into any base.	7 Marks
		(OR)	
4	a)	Discuss multiway selection statement with an example program.	7 Marks
	b)	How to construct an infinite loop using while loop, for loop?	7 Marks

UNIT-III

5	a)	What is an array? Discuss its declaration. How to initialize multidimensional array?	7 Marks
	b)	Write a program to print binary equivalent of a decimal number using array.	7 Marks
		(OR)	
6	a)	How functions help in handling complexity of problem solving? Explain.	7 Marks
	b)	Write a C program to reverse a string with out using library function.	7 Marks

UNIT-IV

7	a)	Give the syntax with suitable programs for dynamic memory allocation functions available in C.	7 Marks
	b)	Illustrate the differences between structures and unions.	7 Marks
		(OR)	
8	a)	Demonstrate how to declare, open, process and close the files in C using a C program.	7 Marks
	b)	Explain the concept of pointer to pointers with examples.	7 Marks

UNIT-V

9	a)	Illustrate stack data structure based on lists.	7 Marks
	b)	State and discuss on binary tree traversals with an example.	7 Marks
		(OR)	
10	a)	Write the steps with illustrative figures involved in the following operations of a singly linked list without the head node. i) Delete the first element. ii) Delete the last element. iii) Delete before a given element. iv) Delete after a given element.	7 Marks
	b)	Define tree and explain binary search tree.	7 Marks

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Business Systems, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science)]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Solve the differential equation $(D-2)^2 = 8(e^{2x} + \sin 2x)$.	7 Marks	L3	CO1	PO1
	b)	Solve the differential equation $(D^2 - 3D + 2)y = 2$.	7 Marks	L3	CO1	PO1
		(OR)				
2.	a)	Solve the differential equation $\frac{d^2y}{dx^2} - 2\frac{dy}{dx} + y = xe^x \sin x$.	7 Marks	L3	CO1	PO2
	b)	Solve the following differential equation by the method of variation of parameters $y'' - 6y' + 9y = \frac{e^{3x}}{x^2}$.	7 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Construct the partial differential equation by eliminating the arbitrary function ϕ from $\phi(xy + z^2, x + y + z) = 0$.	7 Marks	L3	CO1	PO1
	b)	Solve the partial differential equation $x^2(y-z)p + y^2(z-x)q = z^2(x-y)$.	7 Marks	L3	CO1	PO2
		(OR)				
4.	a)	Construct the partial differential equation by eliminating the arbitrary functions f and ϕ from $z = yf(x) + x\phi(y)$.	7 Marks	L3	CO1	PO1
	b)	Solve the linear homogeneous partial differential equation $\frac{\partial^2 z}{\partial x^2} - \frac{\partial^2 z}{\partial x \partial y} = \sin x \cos 2y$.	7 Marks	L3	CO1	PO2

UNIT-III

5.	a)	Show that $\frac{\partial u}{\partial x} + \frac{\partial u}{\partial y} + \frac{\partial u}{\partial z} = 0$, if $u = f(y-z, z-x, x-y)$.	7 Marks	L2	CO2	PO1
	b)	Using Lagrange's method of undetermined multipliers, find the minimum value of $x^2 + y^2 + z^2$ subject to the condition $x+y+z=1$.	7 Marks	L3	CO2	PO2
		(OR)				
6.	a)	If $x = e^r \sec\theta$, $y = e^r \tan\theta$ then show that $\frac{\partial(x,y)}{\partial(r,\theta)} \times \frac{\partial(r,\theta)}{\partial(x,y)} = 1$.	7 Marks	L2	CO2	PO1
	b)	Find the dimensions of the rectangular box requiring least material for its construction when the box is open at the top is to	7 Marks	L1	CO2	PO2

have a volume of 32 cubic feet.

UNIT-IV

7.	a)	Evaluate $\int\int_R y\,dx\,dy$ where R is the region bounded by the first quadrant of the ellipse $\frac{x^2}{a^2}+\frac{y^2}{b^2}=1$.	7 Marks	L5	CO2	PO2
	b)	Evaluate $\int_{-1}^{1}\int_{0}^{z}\int_{x-z}^{x+z}(x+y+z)\,dy\,dx\,dz$.	7 Marks	L5	CO2	PO1
		(OR)				
8.	a)	By changing the order of integration, evaluate $\int_{0}^{16}\int_{\sqrt{x}}^{4}\cos y^3\,dy\,dx$.	7 Marks	L2	CO2	PO2
	b)	Evaluate $\int_{0}^{a}\int_{0}^{\sqrt{a^2-x^2}} y\sqrt{x^2+y^2}\,dy\,dx$ by transforming into polar coordinates.	7 Marks	L5	CO2	PO2

UNIT-V

9.	a)	Find $div\overline{F}$ *and* $curl\overline{F}$ where $\overline{F}$ = $grad\,(x^3+y^3+z^3-3xyz)$.	7 Marks	L1	CO3	PO1
	b)	Find the directional derivative of $f(x,y,z)=x^2-y^2+2z^2$ at the point P(1,2,3) in the direction of the line PQ where Q is the point (5,0,4).	7 Marks	L1	CO3	PO1
		(OR)				
10.		Verify Green's theorem for $\int_C (xy+y^2)\,dx+x^2\,dy$, where c is bounded by y = x and y = x^2.	14 Marks	L5	CO3	PO2

ENGINEERING CHEMISTRY

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Describe the zeolite process used for softening of water with a neat diagram and mention its limitations.	8 Marks	L2	CO1	PO1
	b)	Discuss the effect of fluorides present in drinking water on human health.	6 Marks	L2	CO1	PO6
		(OR)				
2.	a)	Explain reverse osmosis process used for desalination of brackish water and mention its advantages.	7 Marks	L2	CO1	PO1
	b)	0.50 g of $CaCO_3$ was dissolved in HCl and the solution made up to 1 Liter with distilled water. 50mL of the solution required 20mL of EDTA solution for titration. 50mL of hard water sample required 15mL of EDTA and after boiling and filtering required 10mL of EDTA solution. Calculate permanent and temporary hardness of water.	7 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Derive the expression for Schrodinger wave equation and explain the significance of Ψ and Ψ^2.	7 Marks	L3	CO2	PO1
	b)	Predict the magnetic behavior and calculate the bond order of $\mathbf{O_2}$ molecule based on its energy level diagram.	7 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Discuss the Postulates of molecular orbital theory.	10 Marks	L2	CO2	PO1
	b)	Identify and draw the shapes of the following molecules using VSEPR theory, i) XeF_4 ii) NH_3 iii) BrF_5 and iv) ClF_3.	4 Marks	L3	CO2	PO2

UNIT-III

5.	a)	Define battery. Explain the construction and working principle of Lithium ion battery.	8 Marks	L2	CO3	PO1
	b)	Discuss how underground pipelines and cables can be protected from corrosion.	6 Marks	L2	CO3	PO2
		(OR)				
6.	a)	Discuss the construction and working of H_2-O_2 fuel cell and identify its advantages and limitations.	7 Marks	L2	CO3	PO1
	b)	Define corrosion and explain galvanic corrosion with examples.	7 Marks	L2	CO3	PO1

UNIT-IV

7.	a)	Write the principle and applications of Scanning Electron Microscope.	7 Marks	L1	CO4	PO1
	b)	Explain different types of fundamental modes of vibrations.	7 Marks	L2	CO4	PO1
		(OR)				

8.	a)	Define the terms auxochrome, chromophore and explain their significance.	7 Marks	L2	CO4	PO1
	b)	State the principle of Transmission Electron Microscope and explain its applications.	7 Marks	L1	CO4	PO1

UNIT-V

9.	a)	Describe the Fischer-Tropsch method with a neat diagram and write the advantages, disadvantages of synthetic petrol.	9 Marks	L2	CO5	PO1
	b)	Calculate the HCV and LCV of coal having the following compositions; carbon = 70%, hydrogen = 20%, nitrogen = 7%, sulphur = 1% and ash = 3%, latent heat of steam = 585 kcal/kg.	5 Marks	L3	CO5	PO2
		(OR)				
10.	a)	Discuss about solid lubricants with suitable examples.	7 Marks	L2	CO5	PO1
	b)	Define lubricant and explain the characteristic functions of lubricants.	7 Marks	L2	CO5	PO1

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What are Newton's rings?	2 Marks	L1	CO1	PO1
	b)	Describe the formation of Newton's rings in reflected light and hence prove that in reflected light, the diameters of the dark rings are proportional to the square root of natural numbers.	12 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Interpret the Fraunhofer diffraction pattern due to a double slit with relevant diagrams.	8 Marks	L2	CO1	PO1
	b)	Illustrate the use of Nicol prism as a polarizer with a suitable diagram.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.		Recall Maxwell's equations in integral and differential forms and write the physical significance of each equation.	14 Marks	L1	CO2	PO1
		(OR)				
4.	a)	Classify optical fibers based on number of modes and refractive index.	8 Marks	L2	CO2	PO1
	b)	Explain with a neat block diagram, the principle of optical fiber communication system.	6 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Outline the differences between intrinsic and extrinsic semiconductors.	2 Marks	L2	CO3	PO1
	b)	Derive an expression for the Hall coefficient of a p-type semiconductor in terms of hall voltage.	12 Marks	L3	CO3	PO2
		(OR)				
6.	a)	Compare direct and indirect band gap semiconductors.	2 Marks	L2	CO3	PO1
	b)	Describe the construction and working of a semiconductor laser diode with relevant diagrams.	10 Marks	L2	CO3	PO1
	c)	Calculate the wavelength of laser light emitted by a GaAs laser of band gap 1.44 eV.	2 Marks	L3	CO3	PO2
		UNIT-IV				
7.	a)	Explain the dependence of various polarization mechanisms on the frequency of the applied field.	6 Marks	L2	CO4	PO1
	b)	Discuss the different types of polarization mechanisms involved in dielectric materials.	8 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Classify magnetic materials.	6 Marks	L2	CO4	PO1
	b)	Differentiate soft and hard magnetic materials.	8 Marks	L2	CO4	PO1

UNIT-V

9.	a)	Outline BCS theory of superconductivity.	8 Marks	L2	CO5	PO1
	b)	State Meissner effect and show that all superconductors exhibit diamagnetic property.	6 Marks	L1	CO5	PO1
		(OR)				
10.	a)	Explain with a necessary diagram, the synthesis of nanomaterial using pulsed laser deposition technique.	6 Marks	L2	CO5	PO1
	b)	List the physical, magnetic and optical properties of a nanomaterial.	6 Marks	L1	CO5	PO1
	c)	Summarize the applications of nanomaterials.	2 Marks	L2	CO5	PO1

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define critical angle. Develop an expression for acceptance angle of an optical fiber.	10 Marks	L3	CO1	PO1
	b)	Calculate the refractive indices of the core and cladding material of a fiber if numerical aperture is 0.20 and refractive index difference $\Delta = 0.0415$.	4 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Discuss the construction and working of an optical fiber.	10 Marks	L2	CO1	PO1
	b)	Identify any four applications of fiber optic sensors.	4 Marks	L3	CO1	PO1

UNIT-II

3.	a)	Recall absorption co-efficient with its units. Outline the basic requirements for an acoustically good hall.	12 Marks	L2	CO1	PO1
	b)	A cinema hall has a volume of 7500m^3. What should be the total absorption in the hall if the reverberation time of 1.5 sec is to be maintained?	2 Marks	L1	CO1	PO2
		(OR)				
4.	a)	Explain the production of ultrasonic waves using magnetostriction method with a neat diagram. List any two draw backs of this method.	9 Marks	L2	CO1	PO1
	b)	Choose any five important applications of ultrasonics.	5 Marks	L3	CO1	PO1

UNIT-III

5.		Define instantaneous velocity. Explain with sketches the construction and uses of i) displacement–time graph, ii) velocity–time graph and iii) acceleration-time graph.	14 Marks	L2	CO2	PO1
		(OR)				
6.	a)	Define terms work, energy and power with units.	6 Marks	L1	CO2	PO1
	b)	State and derive the work–energy principle.	8 Marks	L3	CO2	PO2

UNIT-IV

7.	a)	Select any three modes of heat transfer and explain.	7 Marks	L2	CO2	PO1
	b)	Derive the expression for effective thermal conductivity through compound media in series.	7 Marks	L3	CO2	PO2
		(OR)				
8.	a)	Describe the method to determine the thermal conductivity of a bad conductor using Lee's disc method.	10 Marks	L2	CO2	PO1
	b)	Predict how much heat will be conducted through a slab of area $90 \times 10^{-4} m^2$ and thickness $1.2 \times 10^{-3} m$ in one second when its opposite faces is maintained at difference in temperature of 20 K. The co-efficient of thermal conductivity of that material is $0.04 Wm^{-1}K^{-1}$.	4 Marks	L3	CO2	PO2

UNIT-V

9.	a)	Describe the preparation of metallic glasses using RF Sputtering technique.	10 Marks	L2	CO3	PO1
	b)	Select few applications of metallic glasses.	4 Marks	L3	CO3	PO1
		(OR)				
10.	a)	What is Shape Memory Alloy? Classify the Shape Memory Alloys with its characteristics.	8 Marks	L2	CO3	PO1
	b)	List few applications of Shape Memory Alloys.	6 Marks	L1	CO3	PO1

ENGINEERING MECHANICS

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	State and prove Lami's theorem.	7 Marks	L4	CO1	PO1 PO10
	b)	Determine the reactions at the supports of the given loaded beam shown in the Fig.1.	7 Marks	L4	CO1	PO1 PO2 PO4 PO10

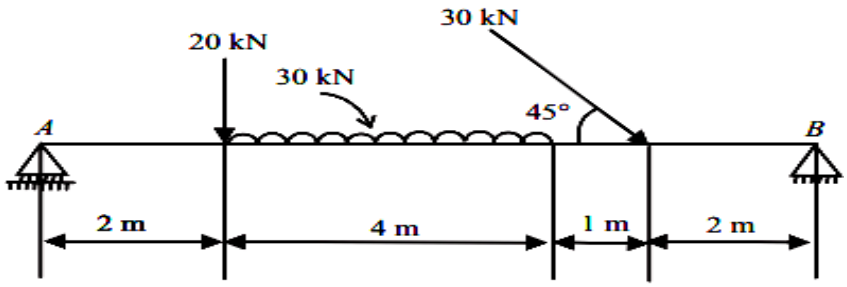

Fig.1

(OR)

2.	a)	What is perfect frame and imperfect frame? Write the advantage of method of sections as compared to method of joints.	4 Marks	L4	CO1	PO1 PO2
	b)	Identify the truss type and determine the forces in all the members of a truss shown in Fig.2 using method of joints.	10 Marks	L4	CO1	PO1 PO2 PO4 PO5 PO6 PO10

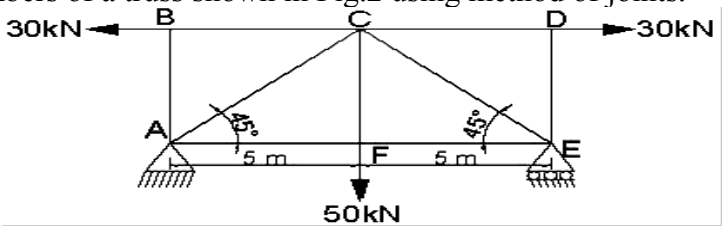

Fig.2

UNIT-II

3.	a)	A ladder 5 m long and of 250 N weight is placed against a vertical wall in a position where its inclination to the vertical is 30^0. A man weighing 800 N climbs the ladder. At what position will he induce slipping? The co-efficient of friction for both the contact surfaces of the ladder with the wall and the floor is 0.2.	7 Marks	L4	CO2	PO1 PO2 PO4 PO6 PO10
	b)	The coefficient of friction between a copper block A and an aluminum block B is 0.3, and between the block B and the floor is 0.2. The weight of block A is 30 N and of block B is 20 N as shown in given Fig.3. What force P will cause the motion of block A to impend?	7 Marks	L4	CO2	PO1 PO2 PO4 PO6 PO10

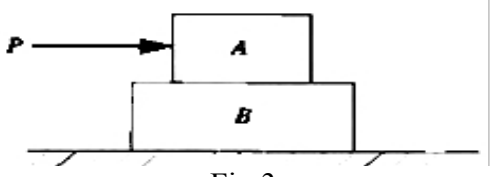

Fig.3

(OR)

4.	a)	What is friction? Explain how friction is both desirable and undesirable in engineering applications and also state the laws of static and dynamic friction.	7 Marks	L2	CO2	PO1
	b)	A body of weight 50 N is placed on a rough horizontal plane. To just move the body on the horizontal plane, a push of 15 N inclined at 30° to the horizontal plane is required. Find the coefficient of friction between the body and the plane.	7 Marks	L4	CO2	PO1 PO2 PO6 PO10

UNIT-III

5.	a)	Define the following: i) Centroid. ii) Centre of gravity. iii) Moment of inertia.	4 Marks	L1	CO3	PO1
	b)	Find the area moment of inertia about the x and y axes of the plane area shown in Fig.4.	10 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO10

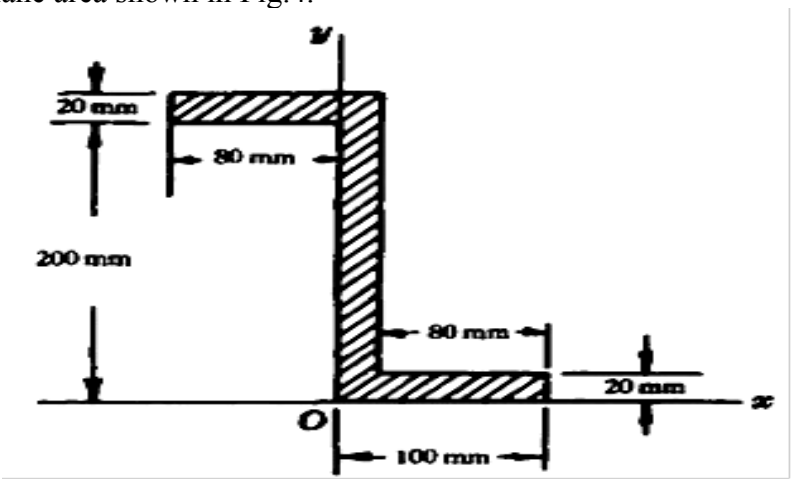

Fig.4

(OR)

6.	a)	State and prove theorems of Pappus–Guldinus.	7 Marks	L2	CO3	PO1 PO2 PO10
	b)	Calculate the centroid of T-section shown in the Fig.5.	7 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO10

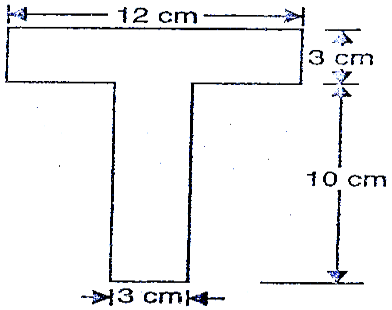

Fig.5

UNIT-IV

7.	a)	A bar of uniform cross sectional area 100mm^2 is subjected to forces as shown in the Fig.6. Calculate the change in the length of the bar. Young's modulus of material is 2 x 10^5 N/mm^2.	7 Marks	L4	CO4	PO1 PO2 PO5 PO10

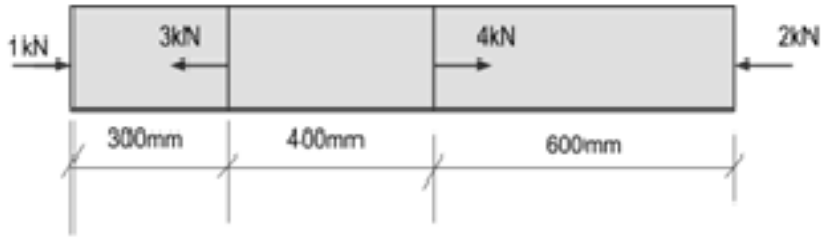

Fig.6

	b)	The following data refer to a mild steel specimen tested in a laboratory. Diameter of the specimen = 20 mm Length of the specimen = 250 mm Extension under a load of 10 kN = 0.035 mm Load at yield point = 120.15 kN Maximum load = 195.50 kN Length of the specimen under failure = 300 mm The neck diameter = 15.25 mm Determine Young's Modulus, Yield point, Ultimate stress, percentage of elongation and percentage reduction in area and safe stress adopting factor of safety of 2.	7 Marks	L4	CO4	PO1 PO2 PO4 PO5 PO6 PO10
		(OR)				
8.	a)	Derive the relationship between Young's modulus and bulk modulus.	7 Marks	L4	CO4	PO1 PO2 PO10
	b)	Compound tube consist of a steel tube 130mm internal diameter and 100mm thickness and an outer brass tube 150mm internal diameter and 100mm thickness. The two tubes are of same length. The compound tube carries an axial load of 950kN. Identify the stresses and the load carried by each tube and the amount it shortens. Length of each tube is 130mm. $E_s = 2 \times 10^5$ N/mm^2 and $E_b = 1 \times 10^5$ N/mm^2.	7 Marks	L4	CO4	PO1 PO2 PO4 PO6 PO10
		UNIT-V				
9.	a)	Derive the circumferential stress and longitudinal stress of a thin cylinder with neat sketch.	7 Marks	L4	CO5	PO1 PO2 PO10
	b)	Calculate the thickness of the metal required for a cast iron main 800mm in diameter for water at a pressure head of 100m, if the maximum permissible tensile stress is 20 MN/m^2 and weight of water is 10 kN/m^3.	7 Marks	L6	CO5	PO1 PO2 PO3 PO4 PO5 PO6 PO10
		(OR)				
10.		Mention the assumptions in Lame's theory. Derive Lame's equation for radial and circumferential stress of thick cylinder.	14 Marks	L4	CO5	PO1 PO2 PO10

I B.Tech I Semester (SVEC-20) Supplementary Examinations September – 2021

BASIC ELECTRICAL AND ELECTRONICS ENGINEERING

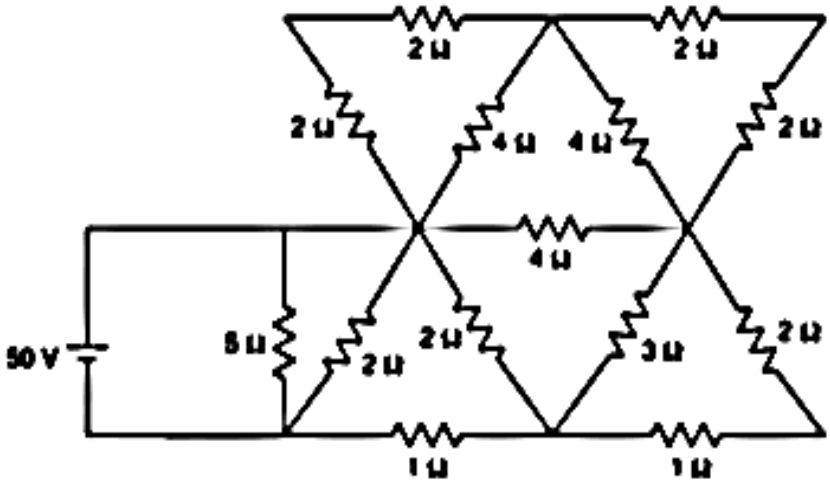
[Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science)]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	With the help of neat sketch, explain in detail the working of the single loop generator.	7 Marks	L2	CO1	PO1
	b)	Find the current delivered by the source in the network shown below.	7 Marks	L3	CO1	PO2



(OR)

2.	a)	State Kirchhoff's laws and validate the law with suitable examples.	7 Marks	L2	CO1	PO1
	b)	Obtain the RMS and Average values of a sinusoidal voltage of peak V_m and angular frequency ω rad/s.	7 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Is Hydro Power plant a sustainable electrical source of generation? Justify your answer. Also, with neat sketch, explain the operation of hydro power plant.	7 Marks	L2	CO2	PO7
	b)	Explain the functional aspects of a relay.	4 Marks	L2	CO2	PO1
	c)	What are the various BEE standards that a consumer has to look while purchasing any electrical product?	3 Marks	L2	CO2	PO8

(OR)

4.	a)	With neat sketch, explain the operation of sustainable power generation using thermal power plant.	7 Marks	L2	CO2	PO7
	b)	Explain the significance of power factor and enumerate the methods of improving the power factor.	4 Marks	L2	CO2	PO1
	c)	Explain the significance of Energy Efficiency ratio.	3 Marks	L2	CO2	PO8

UNIT-III

5.	a)	With neat sketch, demonstrate the working principle of single phase transformer.	7 Marks	L2	CO3	PO1
	b)	Explain the working principle of Three phase induction motor and mention any one application.	7 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Explain the constructional details of single phase capacitor start and run induction motor.	7 Marks	L2	CO3	PO1
	b)	Explain the working of permanent magnet DC motor and mention any one application.	7 Marks	L2	CO3	PO1

UNIT-IV

7.		Explain the operation of a PN junction diode in forward biased and reverse biased condition. Draw its V-I characteristics.	14 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Distinguish between Half wave Rectifier and full wave rectifier.	7 Marks	L2	CO4	PO2
	b)	What is the need for biasing in transistor operation?	7 Marks	L2	CO4	PO1

UNIT-V

9.	a)	Draw the block diagram of Op-Amp and explain in detail.	7 Marks	L2	CO4	PO1
	b)	In an inverting adder circuit, the input voltages ate 0.3 V, 0.5 V, 0.1 V while $R_1=R_2=R_3=1$ KΩ. If $R_f = 10$ KΩ, calculate the output voltage.	7 Marks	L2	CO4	PO2
		(OR)				
10.	a)	Examine and derive an expression for V_0 of the differentiator circuit by using Op-Amp.	7 Marks	L2	CO4	PO2
	b)	Define Op-Amp and list out the ideal characteristics of ideal Op-Amp.	7 Marks	L1	CO4	PO1

MATERIAL SCIENCE AND ENGINEERING

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe Burger's vector for the Edge and Screw Dislocation.	7 Marks	L1	CO1	PO1
	b)	List out different type's imperfections in crystals and briefly explain Schottkey, Frenkel defects, Edge and Screw dislocations.	7 Marks	L2	CO1	PO1 PO2
		(OR)				
2.		Draw Iron-Iron-Carbide diagram neatly and explain cooling of steel from Liquid phase to room temperature for 0.4% C and 0.8% C.	14 Marks	L2	CO1	PO1 PO2
		UNIT-II				
3.	a)	Write short notes surface hardening techniques. Explain any two methods with neat sketches.	7 Marks	L1	CO1	PO1 PO2
	b)	Define annealing and recall the types of annealing.	7 Marks	L1	CO1	PO1 PO2
		(OR)				
4.		Differentiate the CCT and TTT diagram. Explain construction method of TTT and CCT diagrams.	14 Marks	L1	CO1	PO1 PO2 PO3
		UNIT-III				
5.	a)	What is the effect of Carbon on the properties of steel? Explain the properties and applications of Low, Medium and High carbon steels.	7 Marks	L2	CO2	PO1 PO2
	b)	What is stainless steel? How they are classified and give their applications?	7 Marks	L1	CO2	PO1 PO2
		(OR)				
6.		Draw the microstructures of Grey cast iron and White cast iron. Also mention its composition, properties and applications.	14 Marks	L3	CO2	PO1 PO2
		UNIT-IV				
7.	a)	Compare brass and bronze materials.	7 Marks	L3	CO2	PO1 PO2
	b)	List the properties and applications of copper.	7 Marks	L1	CO2	PO1 PO2
		(OR)				
8.		What is aluminium? Explain the types, properties and uses of aluminium alloys in detail.	14 Marks	L2	CO2	PO1
		UNIT-V				
9.	a)	Write a brief note on Metal-Matrix Composites (MMCs) and Ceramic-Matrix Composites (CMCs).	7 Marks	L1	CO2	PO1 PO2
	b)	Discuss on the characteristics and classification of polymers.	7 Marks	L1	CO2	PO1 PO2
		(OR)				
10.		Explain classification, properties and applications of polymer matrix composites. Also discuss its effect on environment.	14 Marks	L2	CO2	PO1 PO7

BASIC CIVIL AND MECHANICAL ENGINEERING

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Convert the following whole circle bearings to quadrantal bearings: i) 22º30' ii) 50º40' iii) 120º iv) 170º12' v) 211º54' vi) 327º24'	6 Marks	L4	CO1	PO1 PO2 PO10
	b)	Classify bricks based on their quality and explain them briefly.	8 Marks	L4	CO1	PO1 PO2 PO8
		(OR)				
2.	a)	Explain the various laboratory tests on bricks to check their suitability in construction.	6 Marks	L1	CO1	PO1 PO5 PO6
	b)	Define the following: i) Stress. ii) Strain. iii) Young's Modulus. iv) Hooke's law.	8 Marks	L1	CO1	PO1

UNIT-II

3.	a)	Briefly explain the various types of foundation.	7 Marks	L2	CO1	PO1
	b)	What is lintel? Where do you use lintel? Briefly explain different types of lintels used.	7 Marks	L2	CO1	PO1
		(OR)				
4.	a)	Explain the components of a stairs with neat sketch.	7 Marks	L2	CO1	PO1 PO10
	b)	Distinguish between separate and combined systems of sewerage.	7 Marks	L4	CO1	PO1 PO2 PO7

UNIT-III

5.		Explain the working principle of 2 stroke petrol engine with neat sketch	14 Marks	L2	CO2	PO1
		(OR)				
6.		Describe the working principle of double acting reciprocating pump with neat sketch.	14 Marks	L2	CO2	PO1

UNIT-IV

7.		Derive the expression for length of the cross belt drive.	14 Marks	L2	CO2	PO1 PO2
		(OR)				
8.	a)	List the types of gear trains and explain.	7 Marks	L1	CO2	PO1
	b)	Derive the expression for power transmitted by the simple gear train.	7 Marks	L2	CO2	PO1 PO2

UNIT-V

9.		Write a short note on soldering and brazing processes.	14 Marks	L2	CO2	PO1
		(OR)				
10		Give an illustrative explanation of milling process and explain its	14 Marks	L2	CO2	PO1

. working principle.

PROGRAMMING FOR PROBLEM SOLVING

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science), Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	List the data types of C Language. Explain with a neat syntax.	7 Marks	L2	CO1	PO1
	b)	Compare operator precedence and associativity. Demonstrate with a suitable example.	7 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Explain the operators of C Language.	7 Marks	L2	CO1	PO1
	b)	Write a C program to swap the values of two variables without using a third variable.	7 Marks	L3	CO1	PO3
		UNIT-II				
3.	a)	Demonstrate the looping statements with a suitable example.	7 Marks	L2	CO1	PO1
	b)	Write a C program to find the sum of individual digits of a positive integer.	7 Marks	L3	CO1	PO3
		(OR)				
4.	a)	Define algorithm. Design an algorithm to check whether a number given by the user is odd or even.	7 Marks	L2	CO2	PO3
	b)	Explain the top-down design technique for solving the given problem.	7 Marks	L2	CO2	PO5
		UNIT-III				
5.	a)	Write a C program to find the second largest number in a list of integers.	7 Marks	L2	CO3	PO3
	b)	Write a C program to generate the prime numbers between 1 and *N*. Define a separate function to generate prime numbers.	7 Marks	L3	CO3	PO3
		(OR)				
6.	a)	Compare and contrast automatic, external and static variables.	7 Marks	L2	CO3	PO2
	b)	Write a C program to insert a sub-string in to a main string at a given position.	7 Marks	L3	CO3	PO3
		UNIT-IV				
7.	a)	Write a C program using pointers to read in an array of integers and print its elements in reverse order.	7 Marks	L2	CO3	PO1
	b)	Compare static and dynamic memory allocation. Describe dynamic memory allocation functions.	7 Marks	L3	CO3	PO2
		(OR)				
8.	a)	Differentiate call-by-value and call-by-address with a suitable C program.	7 Marks	L2	CO4	PO2
	b)	Write a C program to count the number of vowels and consonants in a string using pointers.	7 Marks	L3	CO4	PO3

UNIT-V

9.	a)	Define structure. Show the procedure to access structure members with a suitable example.	7 Marks	L2	CO5	PO1
	b)	Write a C program that demonstrates the creation of nodes using a self-referential structure.	7 Marks	L3	CO5	PO3
		(OR)				
10.	a)	Write a C program that demonstrates passing a structure to a function.	7 Marks	L2	CO5	PO3
	b)	Explain the following: i) Union. ii) Enumeration types.	7 Marks	L2	CO5	PO1

DISCRETE MATHEMATICAL STRUCTURES

[Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Find the Conjunctive normal form of $\sim(PVQ) \leftrightarrow (P \vee Q)$.	7 Marks	L3	CO1	PO3
	b)	Is $[(P \rightarrow R) \wedge (Q \rightarrow R)] \rightarrow [(P \vee Q) \rightarrow R]$ a Tautology or not? Justify	7 Marks	L4	CO1	PO2
		(OR)				
2.	a)	What is the first order predicate calculus statement equivalent to the following premise? "Every teacher is liked by the student".	7 Marks	L2	CO1	PO1
	b)	Given the truth value of P and Q as T and those of R and S as F. Find the Truth value for the following statements. i) $(P \rightleftarrows R) \wedge (\sim Q \rightarrow S)$. ii) $(P \vee (Q \rightarrow (R \wedge \sim P))) \rightleftarrows (Q \vee \sim S)$.	7 Marks	L3	CO1	PO3
		UNIT-II				
3.	a)	Give an example for symmetric, antisymmetric, compatibility and transitive relations.	7 Marks	L3	CO2	PO2
	b)	Determine the value of fog, gof, f^{-1}og and $g^{-1}$of^{-1} for the functions f and g defined by $f(x) = x^2-2$, $g(x) = x + 4$ where R → R (set of real numbers).	7 Marks	L3	CO2	PO7
		(OR)				
4.	a)	Show that the "greater than or equal "relation is a partial ordering on set of integers.	7 Marks	L4	CO2	PO2
	b)	Draw the Hasse diagram of the set {2, 4, 8, 16} under the partial ordering relation "divides" and indicate those which are totally ordered.	7 Marks	L3	CO2	PO3
		UNIT-III				
5.	a)	Show that the set of Natural numbers is a semi group under the operation x*y = max{x, y} and also calculate is it Monoid.	7 Marks	L3	CO3	PO1
	b)	Let H = {0, 2, 4}. Check that (H, +6) is a subgroup of $(z_6, +6)$.	7 Marks	L3	CO3	PO2
		(OR)				
6.	a)	Discuss that monoid homomorphism preserves the property of invertibility with an example.	7 Marks	L2	CO3	PO1
	b)	Examine the relation a * b = a + b - ab for all a, b Є G is a group or not.	7 Marks	L4	CO3	PO2
		UNIT-IV				
7.	a)	Find the coefficient of x^{23} and x^{32} for the function $(1 + x^5 + x^9)^{10}$.	7 Marks	L3	CO4	PO3
	b)	How many ways can 5 day's be chosen from each of the 12 months of an ordinary year of 365 day's.	7 Marks	L3	CO4	PO4
		(OR)				

8.	a)	Solve the Recurrence Relation $a_n - 9a_{n-1} - 26a_{n-2} - 24a_{n-3} = 0$ where $a_0 = 0$, $a_1 = 1$ and $a_2 = 10$.	7 Marks	L2	CO4	PO4
	b)	Compute the number of six letter combinations of the letter of English alphabet. If no letter is to appear in the combination more than 2 times.	7 Marks	L3	CO4	PO2

UNIT-V

9.	a)	Define the following with examples: i) Graph. ii) Degree of a vertex. iii) Complete Graph. iv) Sub Graph.	8 Marks	L2	CO5	PO1
	b)	Write a short note on: i) Euler circuit. ii) Hamiltonian circuit.	6 Marks	L2	CO5	PO4

(OR)

10.	a)	Show that a tree with **n** vertices has exactly (n-1) edges.	7 Marks	L4	CO5	PO2
	b)	Show that the K_7 has Hamiltonian graph. How many edge disjoint Hamiltonian cycles are there in K_7?	7 Marks	L4	CO5	PO2

FUNDAMENTALS OF BUSINESS INFORMATION SYSTEMS

[Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe business environment of an organization with a neat diagram.	9 Marks	L2	CO1	PO1
	b)	Compare explicit knowledge, tacit knowledge and wisdom in Business information systems.	5 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Discuss about the characteristics of generic systems.	7 Marks	L2	CO1	PO1
	b)	Distinguish between deterministic, probabilistic and adaptive systems.	7 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Briefly explain the secondary storage devices.	7 Marks	L2	CO2	PO1
	b)	Explain the advantages of virtual computing.	7 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Describe the tools and technologies of Rich Internet Applications.	7 Marks	L4	CO2	PO3
	b)	Explain the mechanism followed by affiliate marketing.	7 Marks	L4	CO2	PO3
		UNIT-III				
5.	a)	Describe the Business-level advantages of databases.	7 Marks	L2	CO3	PO1
	b)	Compare and contrast scorecards and dashboards.	7 Marks	L4	CO3	PO2
		(OR)				
6.	a)	Discuss about data mining techniques to extract useful information from large databases.	7 Marks	L2	CO3	PO1
	b)	Explain the ETL process within a data warehouse.	7 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Explain, with the aid of diagrams, differentiate between the following network topologies: i) star. ii) bus. iii) ring.	7 Marks	L2	CO4	PO2
	b)	Discuss the merits and demerits of locating company e-business services inside a company, in comparison with outsourcing to an ISP or ASP.	7 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Explain the client/sever model of computing with neat diagram.	7 Marks	L2	CO4	PO1
	b)	Compare and contrast business and consumer models of internet access.	7 Marks	L4	CO4	PO1
		UNIT-V				
9.	a)	Discuss the advantages of Enterprise system approach.	7 Marks	L2	CO6	PO1
	b)	Describe the usage of supplier management systems in an organisation.	7 Marks	L2	CO5	PO2
		(OR)				
10.	a)	Explain the key elements of transaction processing systems.	7 Marks	L2	CO5	PO2
	b)	Discuss the different types of vertical integration in supply chain design.	7 Marks	L2	CO6	PO1

ENGINEERING CHEMISTRY

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science)]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe the principle and process of determination of hardness of a water sample by EDTA method.	7 Marks	L2	CO1	PO1
	b)	Define defluoridation. "*Presence of fluoride in drinking water causes several health issues*" – Support the statement with necessary explanation.	7 Marks	L3	CO1	PO6
		(OR)				
2.	a)	Discuss ion exchange process of softening of water with a neat diagram.	7 Marks	L2	CO1	PO2
	b)	Explain the reasons for formation of scales in boilers. Mention any three disadvantages of scales.	7 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Write Schrodinger wave equation and explain the terms involved in it. Describe briefly the significance of Ψ and Ψ^2.	7 Marks	L1	CO2	PO1
	b)	List the salient features of molecular orbital theory.	7 Marks	L1	CO2	PO2
		(OR)				
4.	a)	Explain about quantum-mechanical model of atom.	7 Marks	L2	CO2	PO1
	b)	Draw the energy level diagram of any hetero nuclear diatomic molecule and calculate its bond order.	7 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	Define electrode potential. Write Nernst equation and explain the terms involved in it.	7 Marks	L1	CO3	PO1
	b)	Compare sacrificial anodic protection and impressed current cathodic protection applied for corrosion control.	7 Marks	L4	CO3	PO6
		(OR)				
6.	a)	Explain construction and working of any lithium ion battery.	7 Marks	L2	CO3	PO1
	b)	Differentiate between dry corrosion and wet corrosion with an example each.	7 Marks	L4	CO3	PO2
		UNIT-IV				
7.	a)	Differentiate between chromophore and auxochrome with an example each. Define and explain the terms 'bathochromic shift' and 'hypsochromic shift'.	7 Marks	L4	CO4	PO1
	b)	Make use of a neat diagram to explain instrumentation of IR spectrophotometer.	7 Marks	L3	CO4	PO5
		(OR)				
8.	a)	Discuss the two types of electronic transitions involving π-orbitals in UV-visible spectroscopy.	7 Marks	L2	CO4	PO1
	b)	Describe any three applications of IR spectroscopy.	7 Marks	L2	CO4	PO5

UNIT-V

9.	a)	Explain different types of fuels with suitable examples.	7 Marks	L2	CO5	PO1
	b)	List the functions of lubricants and discuss mechanism of lubrication.	7 Marks	L1	CO5	PO2
		(OR)				
10.	a)	Discuss the concept of knocking and role of anti-knocking agents in its control.	7 Marks	L2	CO5	PO6
	b)	Distinguish the following pairs of properties of lubricants: i) Flash points and Fire point ii) Cloud point and Pour point	7 Marks	L4	CO5	PO1

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Derive an expression for condition of maxima and minima for reflected light in case of thin transparent film of uniform thickness.	10 Marks	L1	CO1	PO2
	b)	List out the conditions for obtaining the interference pattern.	4 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Describe the construction and working of a Nicol Prism	10 Marks	L2	CO1	PO2
	b)	Plane polarized light passes through a double refracting crystal of thickness 40μm and emerges out as circularly polarized light .If the birefringence of crystal is 0.00004, find the wavelength of the incident light.	4 Marks	L3	CO1	PO1
		UNIT-II				
3.	a)	Identify four Maxwell's field equations along with their physical significance.	8 Marks	L3	CO2	PO2
	b)	Outline the divergence and curl of electric and magnetic fields.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Using a block diagram, explain the optical fiber communication system.	10 Marks	L2	CO2	PO2
	b)	Outline the various applications of optical fibers.	4 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Differentiate direct and indirect band semiconductors.	4 Marks	L2	CO3	PO2
	b)	Derive an expression for concentration of holes in intrinsic semiconductors.	10 Marks	L3	CO3	PO1
		(OR)				
6.	a)	Explain construction and working of semiconductor diode laser.	8 Marks	L2	CO3	PO2
	b)	Describe the formation of pn-junction.	6 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Develop the theory and expression for Lorenz field experienced by an atom in a dielectric material.	10 Marks	L3	CO4	PO2
	b)	Describe the dielectric breakdown and the piezoelectric effect.	4 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Extend the theory of hysteresis of fero - magnetic materials.	7 Marks	L2	CO4	PO1
	b)	Distinguish between soft and hard magnetic materials.	7 Marks	L4	CO4	PO1
		UNIT-V				
9.	a)	Explain critical parameters of superconductors and Josephson effect.	8 Marks	L2	CO5	PO2
	b)	Discuss the BCS theory of superconductors.	6 Marks	L2	CO5	PO1
		(OR)				
10.	a)	Discuss the properties of Nano materials.	8 Marks	L2	CO5	PO1
	b)	Explain the synthesis of Nano material by PLD method.	6 Marks	L2	CO5	PO2

I B.Tech II Semester (SVEC-20) Regular Examinations September – 2021

APPLIED PHYSICS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Summarize the classification of an optical fibre based on refractive index profile and modes of propagation with neat sketches.	10 Marks	L2	CO1	PO1
	b)	List any four applications of optical fibres.	4 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Explain the principle of operation of optical fiber. Draw a schematic layout of a step index optical fiber.	9 Marks	L2	CO1	PO1
	b)	A step index fiber has a core of refractive index 1.5. If the numerical aperture of the fiber is 0.26, calculate the refractive index of the cladding material.	5 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Derive Sabine's formula for reverberation time. Write its drawbacks.	9 Marks	L2	CO2	PO1 PO2
	b)	The reverberation time is found to be 2.4 sec for an empty hall, and it is found to be 1.9 sec when a curtain cloth of 25m^2 is suspended at the center of the hall. If the dimensions of the hall are 15 x 10 x 6m, calculate the coefficient of absorption of curtain cloth.	5 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Explain the principle, construction and working of production of ultrasonic waves using piezoelectric method.	10 Marks	L2	CO2	PO1
	b)	A X-cut piezoelectric crystal plane has a thickness of 1.6mm. The velocity of propagation of sound waves along the x-direction is 5760m/sec. Calculate the fundamental frequency of the crystal.	4 Marks	L3	CO2	PO2

UNIT-III

5.	a)	If a body is thrown horizontally into space, find the path traced by that body mathematically.	7 Marks	L2	CO3	PO2
	b)	Sketch the displacement ***Vs*** time curve, velocity ***Vs*** time curve and acceleration ***Vs*** time curve of a body travelling in a straight-line path and give your inferences.	7 Marks	L3	CO3	PO2
		(OR)				
6.	a)	Assume that a wheel is acted upon by torque, derive an expression for moment the wheel undergoes, if the body rotates about its own axis with an acceleration "α".	7 Marks	L1	CO3	PO1
	b)	Derive an expression for work energy equation for a body of weight W undergoing a translation motion.	7 Marks	L2	CO3	PO1 PO2

UNIT-IV

7.	a)	Explain in detail a technique to find the thermal conductivity of bad conductor.	8 Marks	L2	CO4	PO1
	b)	Explain in detail different modes of heat transfer.	6 Marks	L2	CO4	PO1 PO2

(OR)

8.		Derive an expression for heat conducted through compound media when the materials are connected in series.	14 Marks	L2	CO4	PO1

UNIT-V

9.	a)	Explain the preparation of metallic glass by RF sputtering technique. Write its advantage over other techniques.	10 Marks	L2	CO5	PO1
	b)	Describe any two applications of metallic glasses.	4 Marks	L2	CO5	PO1 PO2

(OR)

10.	a)	Define shape memory effect. Briefly explain the main features of shape memory alloys.	9 Marks	L2	CO5	PO1
	b)	List the properties of NiTi alloy.	5 Marks	L3	CO5	PO1 PO2

CODE No.: 20BT1HS01 SVEC-20

COMMUNICATIVE ENGLISH

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		What are the language skills involved in Technical communication? Explain in detail.	14 Marks	L1	CO2	PO2
		(OR)				
2.	a)	Discuss in detail the differences between Interpersonal communication and Intrapersonal communication.	7 Marks	L6	CO2	PO1
	b)	Identify the differences between 'postures' and 'gestures' in Nonverbal communication.	7 Marks	L3	CO4	PO5
		UNIT-II				
3.		Illustrate the traits of a good listener.	14 Marks	L2	CO2	PO2
		(OR)				
4.	a)	'Sometimes, it is necessary to be a Passive listener.' Justify the statement.	7 Marks	L5	CO2	PO1
	b)	What signals can you identify among listeners during the stage of Empathetic listening?	7 Marks	L1	CO2	PO2
		UNIT-III				
5.		Explain 'Paralinguistic features' in detail.	14 Marks	L2	CO1	PO1
		(OR)				
6.	a)	Discuss the role of 'Confidence' in one's communication and presentation.	7 Marks	L6	CO4	PO10
	b)	'Awareness of Intercultural differences plays a significant role in communication.' Develop the statement meaningfully.	7 Marks	L3	CO4	PO10
		UNIT-IV				
7.		Explain the techniques followed for good comprehension of a text.	14 Marks	L2	CO3	PO5
		(OR)				
8.	a)	What role does Topic sentence play in a text?	7 Marks	L1	CO3	PO5
	b)	Why do you think SQ3R Reading technique is a widely used reading technique? Discuss.	7 Marks	L1	CO3	PO5
		UNIT-V				
9.		Classify the types of Essays and explain them in detail.	14 Marks	L4	CO1	PO1
		(OR)				
10.	a)	What are the Characteristic features of an Essay? Explain.	7 Marks	L1	CO1	PO1
	b)	Identify the steps to elaborate to produce an effective Precis writing.	7 Marks	L3	CO3	PO5

TRANSFORMATION TECHNIQUES AND LINEAR ALGEBRA

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science), Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define an even function and give an example. Obtain Fourier series for the function $f(x) = x^2$ in $(-\pi, \pi)$.	7 Marks	L3	CO1	PO1
	b)	Express $f(x) = \begin{cases} 1, & 0 < x < \pi \\ 0, & > \pi \end{cases}$ as a Fourier sine integral and hence, evaluate $\int_0^\infty \frac{1-\cos\pi\lambda}{\lambda} \sin x\lambda \, d\lambda$.	7 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Find the half-range sine series of $f(x) = \begin{cases} kx, & 0 < x < \frac{\pi}{2} \\ k(\pi - x), & \frac{\pi}{2} < x < \pi \end{cases}$ *in* $0 < x < \pi$.	7 Marks	L1	CO1	PO1
	b)	Find the Fourier sine transform of $f(x) = \frac{e^{-ax}}{x}$ and deduce that $\int_0^\infty \frac{e^{-ax} - e^{-bx}}{x} \sin sx \, dx = \tan^{-1}\left(\frac{s}{a}\right) - \tan^{-1}\left(\frac{s}{b}\right)$.	7 Marks	L1	CO1	PO1

UNIT-II

3.	a)	Using Laplace transform, evaluate $\int_0^\infty \frac{e^{-2t}\sin^2 t}{t} dt$.	7 Marks	L3	CO2	PO2
	b)	Find the Laplace transform of the triangular wave of period 2a given by $f(t) = \begin{cases} t & 0 < t < a \\ 2a - t, & a < t < 2a \end{cases}$.	7 Marks	L1	CO2	PO1
		(OR)				
4.	a)	Find the Laplace transform of $f(t) = t^2 e^{-2t} \cos t$.	7 Marks	L1	CO2	PO1
	b)	Define unit step function and find its Laplace transform. Find Laplace transform of $f(t) = e^{-2t}\{1 - u(t-1)\}$.	7 Marks	L1	CO2	PO1

UNIT-III

5.	a)	Apply convolution theorem, find the inverse Laplace transform of the function $\frac{s^2}{(s^2+a^2)(s^2+b^2)}$, $a \neq b$.	7 Marks	L5	CO2	PO2
	b)	Find $L^{-1}\left\{\frac{e^{-2s}}{s^2+4s+5}\right\}$.	7 Marks	L1	CO2	PO1
		(OR)				
6.		Solve the differential equation $\frac{d^2x}{dt^2} + 9x = \sin t$, using Laplace transform, given that x(0) = 1, x(π/2) = 1.	14 Marks	L3	CO2	PO2

UNIT-IV

7.	a)	Find the rank of the matrix $A = \begin{bmatrix} 1 & 2 & 3 & 0 \\ 2 & 4 & 3 & 2 \\ 3 & 2 & 1 & 3 \\ 6 & 8 & 7 & 5 \end{bmatrix}$ by reducing it to echelon form.	7 Marks	L1	CO3	PO2
	b)	Are the systems of equations consistence? If so, solve them. **x + y + 2z + w = 5; 2x + 3y – z – 2w = 2; 4x + 5y + 3z = 7**.	7 Marks	L3	CO3	PO2
		(OR)				
8.		Is the matrix $A = \begin{bmatrix} 0 & 1 & 1 \\ 1 & 0 & 1 \\ 1 & 1 & 0 \end{bmatrix}$ diagonalizable? If so, find the model matrix and diagonal matrix.	14 Marks	L3	CO3	PO2

UNIT-V

9.	a)	Determine whether or not the vectors (1, -2, 6), (3, 2, 7), (2, 4, 1) in R^3 are linearly dependent. If so find the relationship between them.	7 Marks	L4	CO4	PO2
	b)	Find the rank and nullity of the linear transformation T : $R^2 \rightarrow R^3$ defined by $T\left(\begin{bmatrix} a \\ b \end{bmatrix}\right) = \begin{bmatrix} a-b \\ a+b \\ b \end{bmatrix}$.	7 Marks	L1	CO4	PO1
		(OR)				
10.	a)	Show that the set B = **{1 + x, x + x^2, 1 + x^2}** is a basis for the vector space P_2 of all polynomials of degree at most 2 over R.	7 Marks	L2	CO4	PO1
	b)	Determine matrix of the linear transformation T : $P_2 \rightarrow P_2$ defined by T(p(x)) = p(x + 2) with respect to the basis B = {1, x, x^2}, here P_2 is the vector space of all polynomials of degree at most 2.	7 Marks	L3	CO4	PO2

BASIC ELECTRICAL AND ELECTRONICS ENGINEERING

[Civil Engineering, Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Find the current in 5ohm resistor from the circuit diagram given below: 	8 Marks	L3	CO1	PO2
	b)	Discuss briefly about the phasor representation of a sinusoidal waveform.	6 Marks	L2	CO1	PO1

(OR)

2.	a)	Illustrate Kirchoff's Voltage and Kirchoff's Current laws with the help of an example each.	8 Marks	L2	CO2	PO2
	b)	Define the following terms: i) Power factor. ii) Reactive power. iii) Apparent power.	6 Marks	L2	CO2	PO2

UNIT-II

3.	a)	Illustrate the working details of Hydro power plants with neat diagrammatic representation.	10 Marks	L2	CO2	PO2
	b)	Discuss about power factor correction and its importance in electrical system.	4 Marks	L2	CO2	PO2

(OR)

4.	a)	Explain the sustainable power generation process in thermal power plant with a neat diagram.	8 Marks	L2	CO2	PO7
	b)	Write short notes on: i) BEE standards. ii) ELCB. iii) Relay.	6 Marks	L2	CO2	PO2

UNIT-III

5.	a)	Explain in detail about working of a single phase transformer.	6 Marks	L3	CO4	PO2
	b)	Differentiate resistor start and capacitor start single phase induction motor.	8 Marks	L2	CO4	PO2

(OR)

6.	a)	Illustrate the construction and working principle of a 3-phase induction motor with a neat sketch.	10 Marks	L2	CO4	PO2
	b)	What is the significance of EMF equation of a single phase transformer?	4 Marks	L2	CO4	PO2

UNIT-IV

7.	a)	Explain the input and output characteristics of CE configuration.	10 Marks	L2	CO4	PO2
	b)	Define the following terms: i) Ripple factor. ii) Peak Inverse Voltage.	4 Marks	L2	CO4	PO2

(OR)

8.	a)	Explain the working principle of a Zener diode in forward and reverse bias conditions and draw its V-I characteristics.	8 Marks	L2	CO2	PO1
	b)	Compare CE, CB and CC configurations of a transistor.	6 Marks	L2	CO2	PO2

UNIT-V

9.	a)	Define an Op-Amp. Illustrate the equivalent circuit of an Op-Amp with a neat sketch.	7 Marks	L2	CO2	PO2
	b)	Illustrate the differentiator circuit with a neat diagram and derive the output voltage.	7 Marks	L2	CO2	PO1

(OR)

10.	a)	Write short notes on: i) Operational Amplifier. ii) Comparator circuit.	8 Marks	L2	CO2	PO2
	b)	Illustrate various applications of an Op-Amp.	6 Marks	L2	CO2	PO2

CIVIL ENGINEERING MATERIALS AND CONCRETE TECHNOLOGY

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the various factors that cause deterioration of stone work and the preservation of stones.	8 Marks	L4	CO1	PO1
	b)	Explain any two laboratory tests on bricks.	6 Marks	L4	CO1	PO1 PO2 PO4 PO5 PO6 PO7 PO8 PO10
		(OR)				
2.	a)	Explain dressing of stones and what are the requirements of good building stones.	7 Marks	L3	CO1	PO1 PO5 PO6 PO7
	b)	List out the types of tiles.	7 Marks	L4	CO1	PO1 PO8

UNIT-II

3.	a)	Explain the qualities of a good timber.	7 Marks	L4	CO2	PO1 PO5 PO6 PO7 PO8
	b)	Give a brief description of the process of painting on different surfaces.	7 Marks	L4	CO2	PO1 PO2 PO7 PO12
		(OR)				
4.	a)	What are the materials used for construction.	7 Marks	L4	CO2	PO1
	b)	How do you select the materials and sizes of forms for construction work?	7 Marks	L4	CO2	PO1

UNIT-III

5.	a)	Explain about soundness test for Portland cement by using Le-chateliers apparatus as per IS: 4031(part 3)-1988.	7 Marks	L4	CO3	PO1 PO5 PO8
	b)	What are the properties of good aggregates for making concrete and discuss in brief various tests carried out on aggregates.	7 Marks	L4	CO3	PO1 PO5 PO8
		(OR)				

6.	a)	Explain how do you determine moisture content of aggregate.	7 Marks	L4	CO3	PO1 PO2
	b)	Write about sieve analysis.	7 Marks	L4	CO3	PO1 PO2
		UNIT-IV				
7.	a)	What is segregation and bleeding of concrete why they occur, discuss how to prevent them.	7 Marks	L4	CO4	PO1 PO5 PO8
	b)	Write short notes on Ultrasonic pulse velocity test.	7 Marks	L4	CO4	PO1 PO5 PO8
		(OR)				
8.	a)	Discuss about the maturity concept of concrete. The strength of sample of fully matured concrete is found to be 40Mpa. Find the strength of identical concrete at the age of 7 days when cured at an average temperature during day time at 20^0C and night time at 10^0C.	7 Marks	L4	CO4	PO1
	b)	Explain about factors affecting the compressive strength of concrete.	7 Marks	L4	CO4	PO1 PO7
		UNIT-V				
9.	a)	What is shrinkage of concrete? Explain the various factors affecting shrinkage of concrete.	7 Marks	L4	CO5	PO1 PO7
	b)	How does strength of concrete influence the modulus of elasticity and Poisson's ratio of concrete?	7 Marks	L4	CO5	PO1 PO2
		(OR)				
10.		Explain in detail the various steps involved in designing concrete mixes using IS 10262 method.	14 Marks	L4	CO6	PO1 PO2 PO3 PO4 PO5 PO6 PO7 PO8

ELECTRICAL CIRCUITS

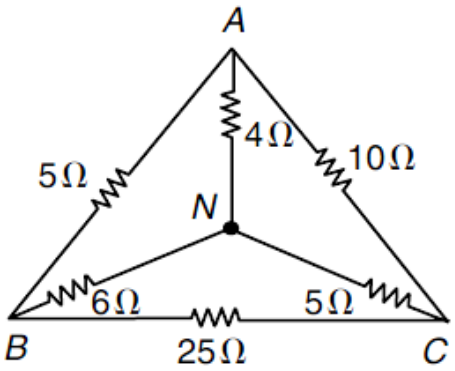
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

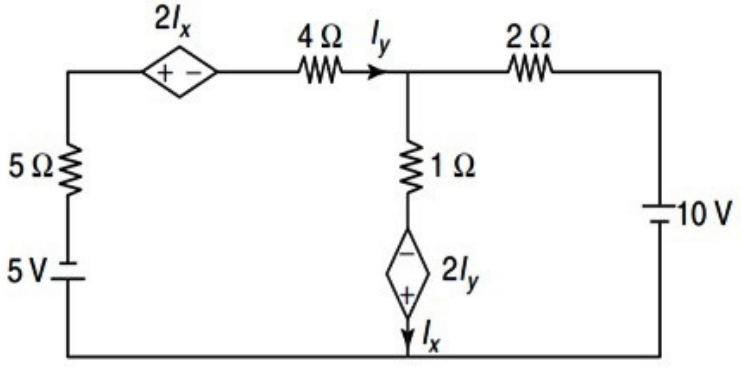
1.	a)	Derive the expressions for equivalent resistance in case of star to delta transformation.	7 Marks	L2	CO1	PO1
	b)	Find the equivalent resistance between A and N of the circuit below.	7 Marks	L3	CO1	PO2



(OR)

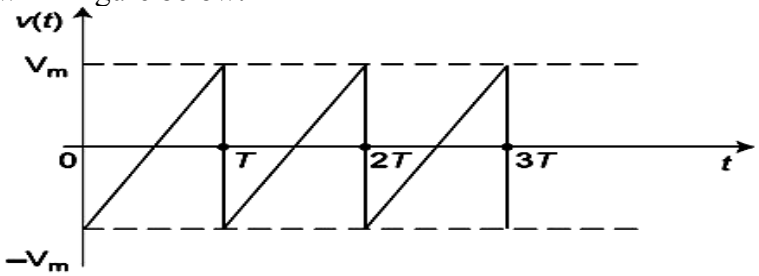
2.	a)	Determine the voltage V which causes the current I_1 to be zero in the network shown in Fig.	7 Marks	L3	CO1	PO4

	b)	Find currents I_X and I_Y of the network shown in the Fig.	7 Marks	L3	CO1	PO4



UNIT-II

3.	a)	Determine the average and r.m.s values of a sinusoidal current having I_m as the maximum value. Hence, find the values of the peak factor and form factor.	7 Marks	L2	CO2	PO2
	b)	Determine the form factor and peak factor of the waveform shown in figure below.	7 Marks	L3	CO2	PO2



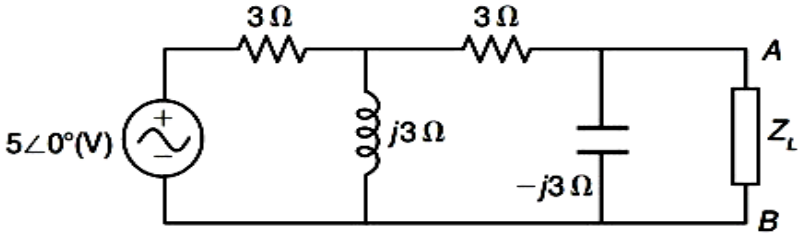
(OR)

4.	a)	In a particular RL series circuit, a voltage of 10V at 50Hz produces a current of 700mA while the same voltageat 75Hz produces a current of 500mA. Design the values of R and L in the circuit?	7 Marks	L6	CO2	PO3
	b)	A series RLC circuit consists of a resistance of 1kΩ, an inductance of 10mH and a capacitance of 100μF. For a supply voltage of 100 V, determine the following: i) Resonant frequency. ii) Q-Factor of the circuit. iii) Half-power frequencies.	7 Marks	L3	CO2	PO2

UNIT-III

5.	a)	Use the superposition theorem and determine the value of voltageV_x in the given circuit.	7 Marks	L3	CO3	PO5

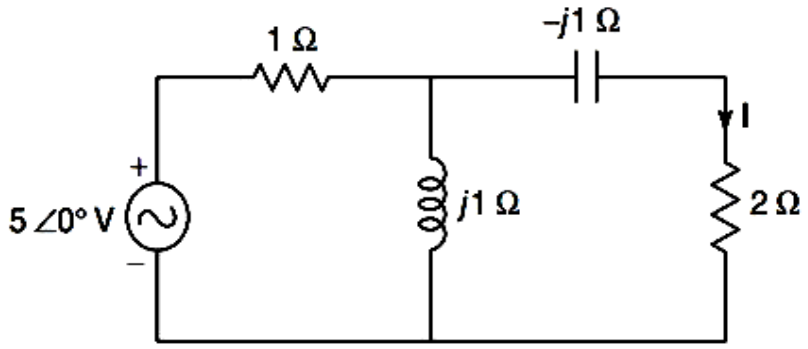
	b)	In the network shown, find the value of Z_L to which the maximum power can be delivered. Hence, find the value of the maximum power.	7 Marks	L3	CO3	PO5



(OR)

6.	a)	Obtain the Thevenin's equivalent circuit and find the current through 2Ω resistor connected between terminals A and B in the given circuit.	7 Marks	L3	CO3	PO5

	b)	Find the current through the 6Ω resistor and verify the reciprocity theorem.	7 Marks	L3	CO3	PO5



UNIT-IV

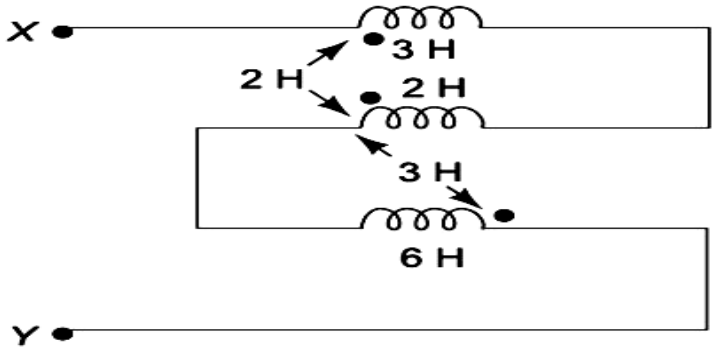
7.	a)	Show that power consumption, when three identical impedances are connected in delta across a balanced 3-phase supply, is three times that when the same impedances are connected in star across the same 3-phase supply.	7 Marks	L5	CO4	PO4
	b)	A balanced 3-phase, star-connected load of 100kW takes a leading current of 80A, when connected across a 3-phase 1100-V, 50-Hz supply. Find the circuit constants of the load per phase.	7 Marks	L4	CO4	PO3

(OR)

8.	a)	Explain the measurement of 3-phase active and reactive powers using two watt meter method with a neat phasor diagram.	7 Marks	L2	CO4	PO2
	b)	Three coils each with a resistance of 10Ω and reactance of 10Ω are connected in star across a 3-phase, 50Hz, 400V supply. Calculate: i) line current, and ii) readings on the two watt meters connected to measure the power.	7 Marks	L3	CO4	PO2

UNIT-V

9.	a)	Determine the equivalent inductance of two coils with self-inductances L_1, L_2 and mutual inductance M are connected in parallel aiding and parallel opposing.	7 Marks	L2	CO5	PO2
	b)	Find the equivalent inductance between the terminals across XY for the coupled circuit shown.	7 Marks	L4	CO5	PO2



(OR)

10.	a)	Explain the dot convention used in magnetically coupled circuits with the help of suitable examples.	7 Marks	L2	CO5	PO1
	b)	Two inductors are connected in parallel. Their equivalent inductance when the mutual inductance aids the self-inductance is 6mH and it is 2mH when the mutual inductance opposes the self-inductance. If the ratio of the self-inductances is 1:3 and the mutual inductance between the coils is 4mH, find the self-inductances.	7 Marks	L3	CO5	PO3

NETWORK ANALYSIS

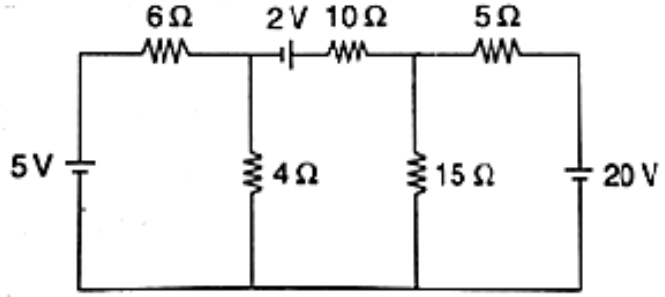
[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

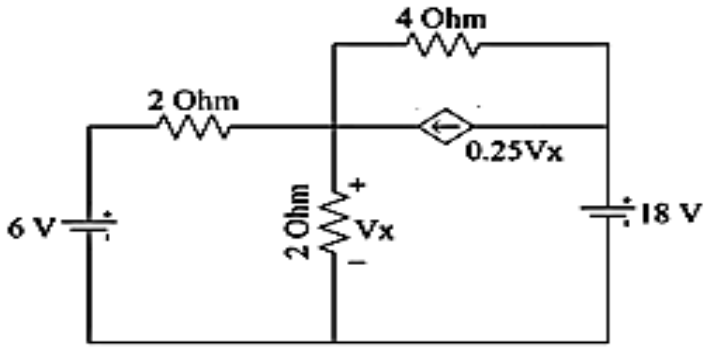
1.	a)	State and explain KVL and KCL with examples.	7 Marks	L2	CO1	PO2
	b)	Determine the current through 10Ω resistor in the fig below using mesh analysis.	7 Marks	L4	CO1	PO2



(OR)

2.	a)	Obtain the Node equation for the circuit shown below and compute the V_0.	7 Marks	L3	CO1	PO2

	b)	Find Vx for the circuit shown below.	7 Marks	L4	CO1	PO2



UNIT-II

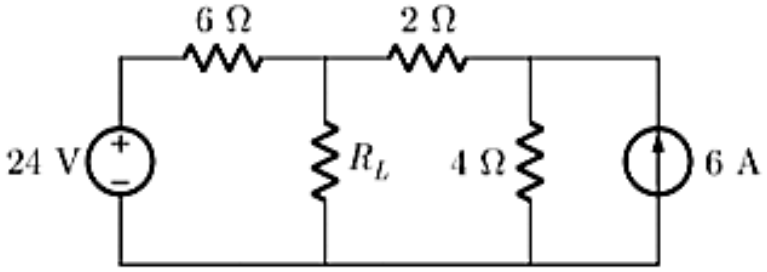
3.	a)	Derive expression for bandwidth of series resonance circuit.	7 Marks	L2	CO1	PO2
	b)	In a series RLC circuit with R = 10 Ω, L = 0.1 H and C = 50 μF, find resonant frequency, quality factor and band width.	7 Marks	L3	CO2	PO2

(OR)

4.	a)	A series connected load draws a current I(t) = 4sin (100πt)A when the applied voltage is V(t) = 120 sin (100πt)V. Find the power factor.	7 Marks	L4	CO1	PO2
	b)	Design a series RLC circuit that resonates at 1.5kHz and consumes 50W from a 50V A.C source operating at the resonance frequency. The bandwidth is 0.75kHz.	7 Marks	L3	CO2	PO2

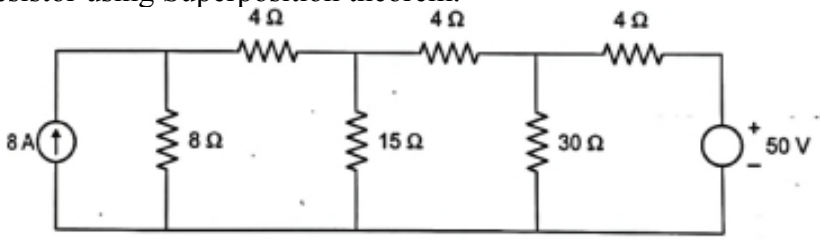
UNIT-III

5.	a)	State and explain Thevinin's theorem.	7 Marks	L2	CO1	PO2
	b)	Determine the value of RL and also calculate Pmax by using maximum power transfer theorem.	7 Marks	L4	CO1	PO5



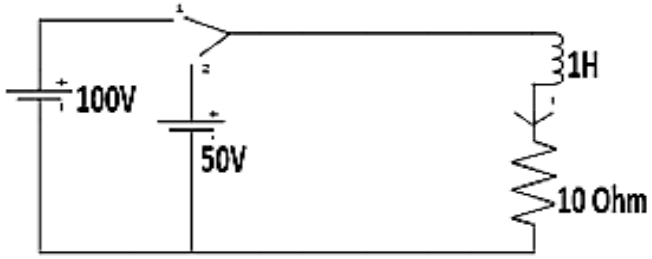
(OR)

6.	a)	State and explain reciprocity theorem.	7 Marks	L3	CO1	PO2
	b)	For the circuit shown in figure find the current through the 15Ω resistor using Superposition theorem.	7 Marks	L4	CO1	PO2



UNIT-IV

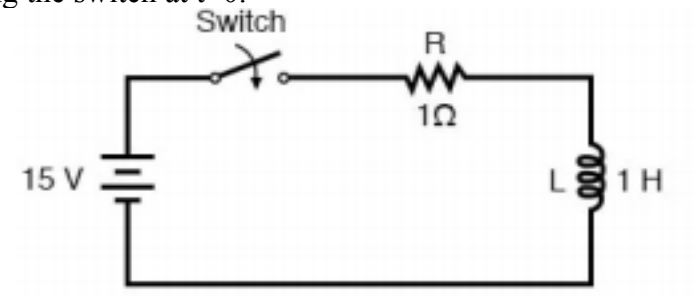
7.	a)	Find the transient response of RL series circuit for dc excitation.	7 Marks	L3	CO1	PO2
	b)	The switch is in position 1 for long time and moved to position 2 at t= 0, find current i.	7 Marks	L4	CO1	PO2



(OR)

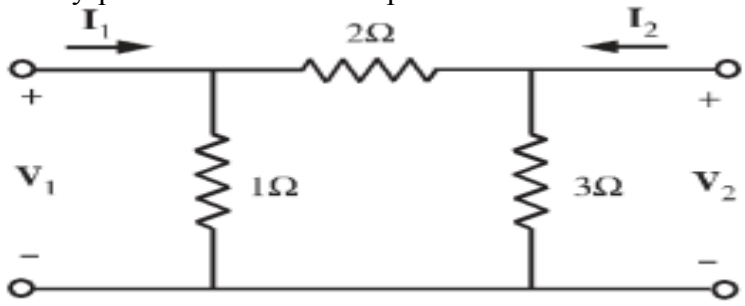
8.	a)	Find the current in the circuit shown for t > 0. At t = 0 sec. the network was unenergized.	7 Marks	L3	CO2	PO6

	b)	For the circuit shown below find the current in the circuit after closing the switch at t=0.	7 Marks	L4	CO1	PO2



UNIT-V

9.	a)	Express h parameters in terms of ABCD parameters for a generalized network.	7 Marks	L2	CO5	PO1
	b)	Find the y-parameters of the two-port network shown below.	7 Marks	L4	CO2	PO5



(OR)

10.	a)	Prove that reciprocity and symmetry condition for Z-parameters.	7 Marks	L2	CO1	PO2
	b)	Find the ABCD parameters of the two-port network shown below.	7 Marks	L4	CO1	PO2

BASIC ENGINEERING MECHANICS

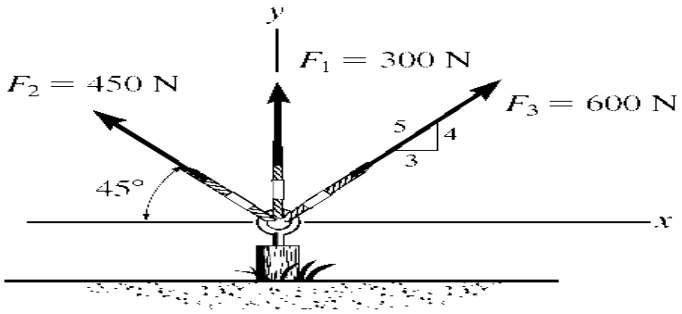
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

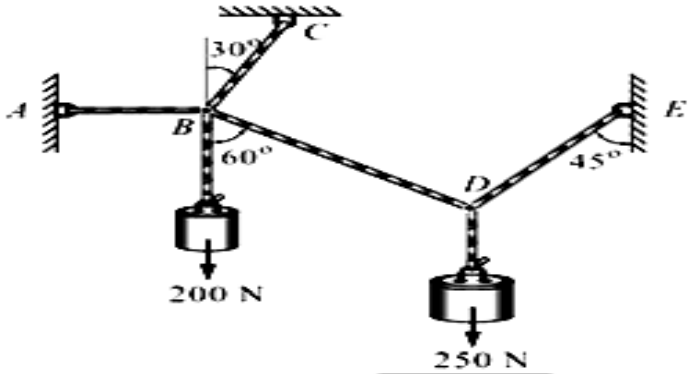
UNIT-I

1.	a)	State and prove Lami's theorem.	7 Marks	L3	CO1	PO1
	b)	Resolve each force acting on the post into its *x* and *y* components and determine the magnitude and direction of resultant force.	7 Marks	L4	CO1	PO6



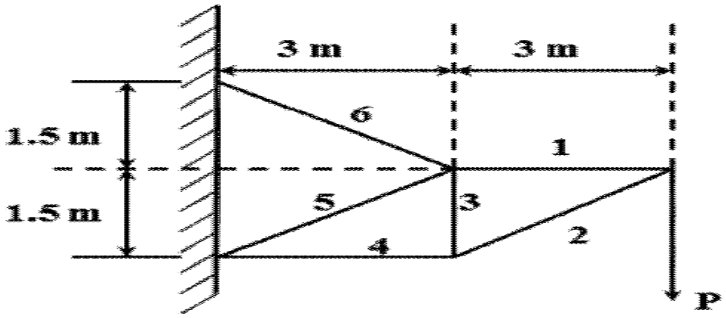
(OR)

2.	a)	What is Newton's first law of motion and law of transmissibility of forces?	7 Marks	L3	CO1	PO2
	b)	A system of connected flexible cables shown in fig. is supporting two vertical forces 200N and 250N at points B and D. Determine the forces in various segments of the cable.	7 Marks	L4	CO1	PO4



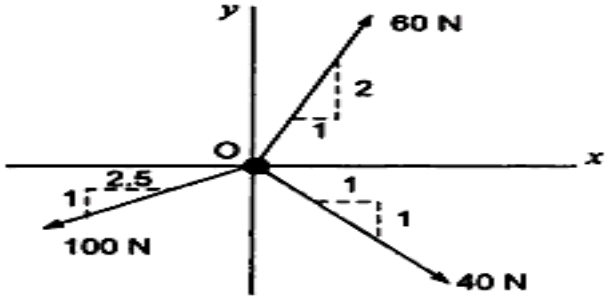
UNIT-II

3.	a)	State and explain varignon's thorem.	7 Marks	L3	CO2	PO1
	b)	Determine the axial force in each bar of the plane truss loaded as shown in the figure.	7 Marks	L4	CO2	PO2



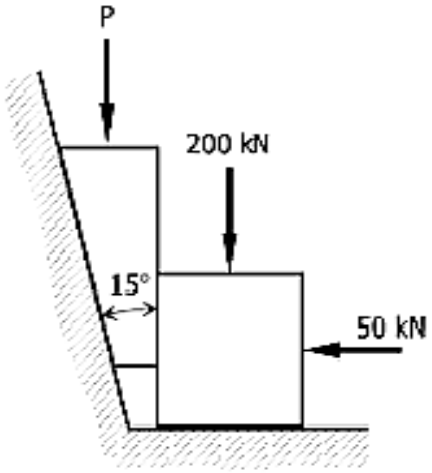
(OR)

4.	a)	Explain the concept of moment of a force about a point. For what condition the moment of a force will be zero?	7 Marks	L3	CO2	PO1
	b)	Determine analytically the equilibrant of the three coplanar forces shown in Fig. The slopes of the force directions are indicated in the Fig.	7 Marks	L4	CO2	PO3



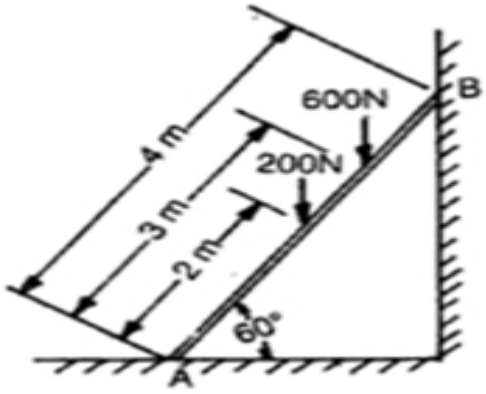
UNIT-III

5.	a)	State the laws of dry friction.	4 Marks	L3	CO3	PO1
	b)	Referring to the Figure the coefficient of friction is as follows: 0.25 at the floor, 0.30 at the wall, 0.20 between the blocks. Find the minimum value of a horizontal force P applied to the lower block that will hold the system in equilibrium.	10 Marks	L4	CO3	PO3



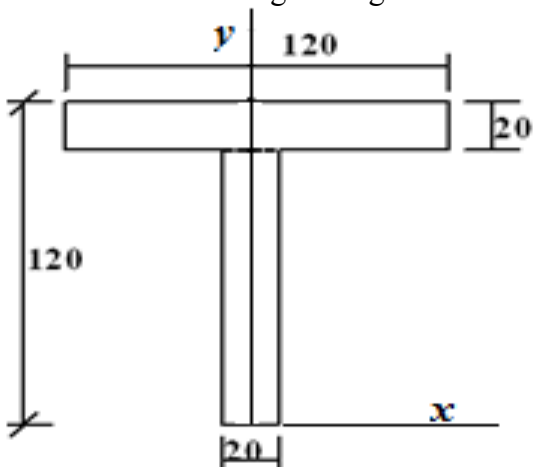
(OR)

6.	a)	Define wedge and write the equilibrium conditions for ladder friction.	4 Marks	L3	CO3	PO1
	b)	Determine the minimum horizontal force to be applied at A to prevent slipping. $\mu = 0.2$ between the wall and ladder, $\mu = 0.3$ between the floor and ladder. The ladder weighs 200N and a man weighing 600 N is at 3m from A.	10 Marks	L4	CO3	PO2



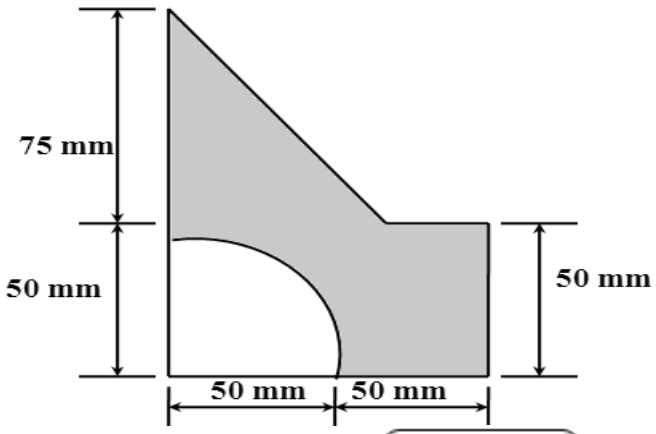
UNIT-IV

7.	a)	State and prove theorems of Pappus-Guldinus.	8 Marks	L3	CO4	PO1
	b)	Find the Moment of inertia of the given figure about the X-axis.	6 Marks	L4	CO4	PO2



(OR)

8.	a)	State and prove perpendicular axis theorem for area moment of inertia.	5 Marks	L3	CO4	PO1
	b)	With respect to coordinate axes x and y, locate the centroid C of the shaded area as shown in the figure.	9 Marks	L4	CO4	PO2



UNIT-V

9.	a)	Find amplitude and time period of a particle moving with SHM, which has a velocity of 9m/s and 16 m/s at the distance of 3m and 4m respectively from the centre.	8 Marks	L4	CO4	PO1
	b)	A mass of 2 kg is supported on as isolator having a spring scale of 2940 N/m and viscous damping. If the amplitude of free vibration of the mass falls to one half it original value in 1.5 seconds, determine the damping coefficient of the isolator.	6 Marks	L4	CO4	PO3

(OR)

10.	a)	State and explain D'Alembert's principle.	8 Marks	L3	CO4	PO1
	b)	A body moving with simple harmonic motion has amplitude of 1 m and a period of oscillation of 2 seconds. What will be its velocity and acceleration 0.4 seconds after passing an extreme position?	6 Marks	L4	CO4	PO3

DIGITAL LOGIC DESIGN

Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science)]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Express the following numbers in decimal: i) (26.24)8 ii) (16.5)16.	6 Marks	L3	CO1	PO1
	b)	Perform the following subtraction in binary using 1's and 2's complement method: (677)10 – (899)10.	8 Marks	L3	CO1	PO1
		(OR)				
2.	a)	Implement the following Boolean function with only two input NOR gates: F=(AB'+CD')E+BC(A+B).	7 Marks	L3	CO1	PO1
	b)	Explain the Theorems of Boolean algebra.	7 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Implement the following Boolean function with only two input NAND gates: F=(AB'+D')E+C(A'+B') .	7 Marks	L4	CO2	PO2
	b)	Simplify the following Boolean function with the don't conditions d using Kmap method: F(A, B, C, D)=Σ(1,3,8,10,15); d(A, B, C, D)=Σ(0, 2, 9).	7 Marks	L4	CO2	PO2
		(OR)				
4.	a)	Simplify the following using K-map and implement the same using NAND gates. Y (A, B, C) = ∑ (0, 3, 4, 5, 7).	7 Marks	L4	CO2	PO2
	b)	Reduce the following Boolean function to four literals and draw the logic diagram: (A'+C)(A'+C')(A+B+C'D).	7 Marks	L4	CO2	PO2
		UNIT-III				
5.	a)	Define Combinational Circuit. Explain Design Procedure for Combinational Circuit.	7 Marks	L2	CO3	PO3
	b)	Implement full adder using decoder and OR gates.	7 Marks	L4	CO3	PO3
		(OR)				
6.	a).	Design a 1:8 demultiplexer using two 1:4 demultiplexer.	7 Marks	L4	CO3	PO3
	b).	Define an encoder. Design octal to binary encoder.	7 Marks	L4	CO3	PO3
		UNIT-IV				
7.	a)	Convert JK flip-flop to T flip-flop.	7 Marks	L2	CO4	PO4
	b)	Draw the logic diagram of a JK flip-flop and using excitation table explain its operation.	7 Marks	L4	CO4	PO4
		(OR)				
8.	a)	Draw and Explain Bidirectional Shift Register.	7 Marks	L4	CO4	PO4
	b)	Design and explain about the Ring counter.	7 Marks	L4	CO4	PO4
		UNIT-V				
9.	a)	Design a BCD to Excess-3 code converter using a PAL.	8 Marks	L4	CO5	PO5
	b)	Compare PROM, PLA and PAL.	6 Marks	L2	CO5	PO5
		(OR)				
10.		Implement the following Boolean functions using PLA. A(x,y,z)=∑(1,2,4,6); B(x,y,z)= ∑(0,1,6,7); C(x,y,z)= ∑(2,6).	14 Marks	L4	CO5	PO5

PROGRAMMING IN C AND DATA STRUCTURES

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Compare and contrast flowchart and algorithm.	7 Marks	L4	CO1	PO1
	b)	Write an algorithm, find the sum of the given **n** numbers.	7 Marks	L3	CO1	PO2
		(OR)				
2.	a)	List and explain various operators used in C with examples and evaluate expression K=3/2 * +3/8+3.	9 Marks	L2	CO1	PO1
	b)	Write a C program to generate electricity bill.	5 Marks	L3	CO1	PO2
		UNIT-II				
3.		List and explain about different input and output functions with examples.	14 Marks	L2	CO2	PO3
		(OR)				
4.	a)	Differentiate between while and do-while statements. Give examples.	7 Marks	L4	CO2	PO1
	b)	Write a program to find the factorial of a given number.	7 Marks	L3	CO2	PO4
		UNIT-III				
5.	a)	What is dynamic array? How is it created? Give example.	7 Marks	L1	CO3	PO2
	b)	Write a program to perform matrix multiplication.	7 Marks	L3	CO3	PO2
		(OR)				
6.	a)	What is user defined functions? Discuss with an example.	7 Marks	L1	CO3	PO1
	b)	Write a recursive function to find GCD value.	7 Marks	L3	CO3	PO4
		UNIT-IV				
7.	a)	How is a pointer initialized? Discuss about the importance of pointers.	7 Marks	L1	CO3	PO1
	b)	Describe self-referential structure and nested structure with suitable examples.	7 Marks	L4	CO3	PO2
		(OR)				
8.		Explain about different types of lists.	14 Marks	L2	CO3	PO2
		UNIT-V				
9.	a)	Define Queue. Explain its concept.	7 Marks	L1	CO3	PO3
	b)	Write a program to implement Queue using arrays.	7 Marks	L3	CO3	PO4
		(OR)				
10.	a)	Explain about Selection sort with an example.	7 Marks	L2	CO4	PO1
	b)	Write an algorithm for Linear search and give an example.	7 Marks	L3	CO4	PO4

OBJECT ORIENTED PROGRAMMING THROUGH JAVA

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science), Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe objects with example program.	7 Marks	L1	CO1	PO1
	b)	Write a program to find factorial of given number using classes.	7 Marks	L6	CO1	PO1
		(OR)				
2.	a)	Describe Garbage collection with relevant example.	7 Marks	L1	CO1	PO1
	b)	Solve any java program using constructors.	7 Marks	L3	CO1	PO1
		UNIT-II				
3.	a)	Compare method overloading and constructor overloading.	7 Marks	L2	CO3	PO3
	b)	Write a program to find area of triangle using parameter passing.	7 Marks	L6	CO2	PO3
		(OR)				
4.	a)	Develop a program to display prime numbers between 40 and 100.	7 Marks	L6	CO2	PO1
	b)	Describe type conversions and casting with examples.	7 Marks	L1	CO2	PO1
		UNIT-III				
5.	a)	Design a program to find area of rectangle and triangle using abstract methods and classes.	7 Marks	L6	CO3	PO2
	b)	Illustrate packages with example java program.	7 Marks	L4	CO2	PO3
		(OR)				
6.	a)	Explain Block Lambda expressions with examples.	7 Marks	L1	CO3	PO3
	b)	Develop a program to implement nested interfaces.	7 Marks	L6	CO2	PO2
		UNIT-IV				
7.	a)	Illustrate multiple catch statements with example program.	7 Marks	L4	CO3	PO2
	b)	Design a program to convert an Array List into an array.	7 Marks	L6	CO3	PO3
		(OR)				
8.	a)	Describe synchronization with example program.	7 Marks	L1	CO4	PO1
	b)	Plan nested try statements using Java Program.	7 Marks	L5	CO3	PO3
		UNIT-V				
9.	a)	Develop a program to create a vertical and horizontal scroll bars.	7 Marks	L6	CO5	PO3
	b)	Design a program to demonstrate the functionality of adapter classes.	7 Marks	L6	CO5	PO2
		(OR)				
10.	a)	Develop a code to create swing application.	7 Marks	L6	CO5	PO3
	b)	Design a program for java event handling by outer class.	7 Marks	L6	CO5	PO3

DATA STRUCTURES AND ALGORITHMS

[Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define data structure and discuss how performance analysis is measured for an algorithm.	6 Marks	L2	CO1	PO1
	b)	Illustrate the result of each pass of selection sort for the following. 2, 3 78, 5, 46, 32, 56, 8, 99, 9.	8 Marks	L3	CO2	PO2
		(OR)				
2.	a)	Write the algorithm for insertion sort and write its time complexity.	8 Marks	L2	CO2	PO2
	b)	Distinguish between binary search and linear search. In searching point of view, which of the two algorithms is best?	6 Marks	L2	CO2	PO2

UNIT-II

3.	a)	Write a program to create a double linked list and insert a node at the middle.	7 Marks	L2	CO3	PO2
	b)	Illustrate with an example on how circular double linked list are created.	7 Marks	L2	CO3	PO2
		(OR)				
4.	a)	List and explain applications of linked lists.	5 Marks	L 2	CO4	PO2
	b)	Write an algorithm insertion operation of singly linked list.	9 Marks	L2	CO3	PO2

UNIT-III

5.	a)	Write an algorithm to insert and delete elements in a linear queue.	7 Marks	L 2	CO4	PO2
	b)	Write an algorithm to implement stack operations.	7 Marks	L2	CO4	PO2
		(OR)				
6.	a)	Define queue. Discuss various types of queues and the operations that can be performed.	5 Marks	L 2	CO4	PO2
	b)	Convert the given infix expression to postfix expression using stack (a+b*c^d)*(e+f/g).	9 Marks	L3	CO4	PO3

UNIT-IV

7.	a)	Construct a binary search tree whose post order traversal is : 5, 4, 9, 11, 12, 8, 13 and 7.	8 Marks	L3	CO5	PO2
	b)	Write non-recursive procedures for preorder traversals of a binary tree.	6 Marks	L2	CO5	PO2
		(OR)				
8.	a)	Illustrate with an example on how single rotation takes place in AVL trees.	7 Marks	L 3	CO5	PO2
	b)	The order of nodes of a binary tree in Preorder and Inorder traversal are as given below. Preorder Sequence: A B D G H C E F I K J In order Sequence: B G H D A E I C K F J Draw the corresponding binary tree	7 Marks	L4	CO5	PO2

UNIT-V

9.		Distinguish between B Tree and B+ tree. Create a B tree of order 5 by inserting the following elements: 3,14,7,1,8,5,11,17,13,6,23,12,20,26,4,16,18,24,28 and 19.	14 Marks	L 3	CO5	PO2

(OR)

10.	a)	Implement Breadth First Search algorithm for the following graph. 	10 Marks	L3	CO5	PO2
	b)	Write short note on hashing.	4 Marks	L 1	CO6	PO2

ENGINEERING CHEMISTRY

[Civil Engineering; Mechanical Engineering; Computer Science and Engineering; Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Discuss briefly about boiler troubles and methods to be adapted for their treatment. 14 Marks

(OR)

2 a) Explain Nalgonda method used for Defluoridation of water and list out the merits and demerits of various deflouridation methods. 7 Marks

b) What is the threshold level of fluoride in ground water? Discuss the adverse effects of fluorides on human health 7 Marks

UNIT-II

3 a) Discuss about: 7 Marks
i) particulate composites. ii) layered composites.

b) Give the potential applications of biodegradable polymers. 7 Marks

(OR)

4 Define doped conducting polymer. Illustrate p-doped and n-doped conducting polymers. 14 Marks

UNIT-III

5 a) Outline the role of Green Chemistry in our day-to-day life. 7 Marks

b) Summarize the commercial applications of bio-diesel. 7 Marks

(OR)

6 Explain the following tools with suitable examples. 14 Marks
i) Alternative feed stocks.
ii) Alternative products.
iii) Alternative reaction conditions.

UNIT-IV

7 Define sensor. Explain the working principle and construction of potentiometric sensor. 14 Marks

(OR)

8 Classify the sensors with examples and give the applications of electrochemical sensor. 14 Marks

UNIT-V

9 Outline the method of electroplating for the control of corrosion. Apply it for nickel electroplating. 14 Marks

(OR)

10 a) Classify the lubricants based on their state. 7 Marks

b) Examine the influence of ‘pH’ and ‘purity of metal’ on the rate of corrosion. 7 Marks

ENGINEERING PHYSICS

[Electrical and Electronics Engineering, Electronics and Communications Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the characteristics of a laser.	6 Marks
	b)	Distinguish spontaneous and stimulated emission of radiation. Define life time of an atom and metastable state.	8 Marks

(OR)

2	a)	Derive the relation between the probabilities of spontaneous emission and stimulated emission in terms Einstein coefficients.	9 Marks
	b)	What is population inversion in lasers? Describe various methods of achieving population inversion.	5 Marks

UNIT-II

3	a)	Formulate one dimensional Schrodinger's time independent wave equation and discuss the physical significance of wave function.	10 Marks
	b)	A quantum particle confined to one dimensional box of width of 'a' is known to be in its first exited state. Determine the probability of the particle in the central half.	4 Marks

(OR)

4		Evaluate expressions for Eigen function and Eigen values for the particle in one dimensional potential box of length 'L'.	14 Marks

UNIT-III

5	a)	Classify different types of semiconductor.	4 Marks
	b)	Derive an expression for intrinsic carrier concentration in an intrinsic semiconductor.	10 Marks

(OR)

6	a)	What is intrinsic Semiconductor?	4 Marks
	b)	Derive the expression for electron concentration in an intrinsic semiconductor.	10 Marks

UNIT-IV

7	a)	Define Reverberation time. Formulate Sabine's mathematical relation for reverberation time of the Hall. The volume of a hall is 2265 m^3 and its absorption is equal to 92.9 m^2 of open window. If the hall is filled with audience, then the absorption becomes double. Find the reverberation time when the hall is without and with audience.	10 Marks
	b)	Outline the three basic requirements of an acoustically good hall.	4 Marks

(OR)

8	a)	Explain the various factors affecting the architectural acoustics of a building and their remedies.	8 Marks
	b)	Discuss the following: i) Reverberation. ii) Reverberation time. iii) Echelon effect. iv) Absorption coefficient.	6 Marks

UNIT-V

9	a)	Explain crystal planes and crystal direction.	4 Marks
	b)	Derive the expression for inter-planar distance between consecutive planes for a cubic system.	10 Marks

(OR)

10		Describe the procedure to find the Miller Indices and its mention significance. Draw the planes of (111) (110) (112) (100) and directions of [111] [100] in a cubic lattice.	14 Marks

MATRICES AND NUMERICAL METHODS

[Civil Engineering, Mechanical Engineering, Electrical and Electronics Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Define the Quadratic form and reduce $x^2 + 4y^2 + z^2 + 4xy + 6yz + 2zx$ to canonical form by technique of orthogonal transformation and hence find its rank index and signature. 14 Marks

(OR)

2 Define rank, index, signature of a quadratic form. Reduce $5x^2 + 26y^2 + 10z^2 + 4yz + 14zx + 6xy$ to canonical form by orthogonal reduction technique. Hence find index, Signature and nature of the quadratic form. 14 Marks

UNIT-II

3 a) Construct a second degree polynomial to the following data using technique of least square principle. 7 Marks

x	10	15	20	25	30	35
y	35.3	32.4	29.2	26.1	23.2	20.5

b) Construct by the technique of least squares fit a curve of the form $y = ae^{bx}$ to the following data. 7 Marks

x	0	2	4
y	5.1	10	31.1

(OR)

4 a) Using method of least square, fit a straight line $y = a + bx$ to the following data. 7 Marks

x	0	5	10	15	20	25
y	12	15	17	22	24	30

b) Applying method of least square principle, construct a curve of the Form $y = ae^{bx}$ to the following data. 7 Marks

x	77	100	185	239	285
y	2.4	3.4	7.0	11.1	19.6

UNIT-III

5 a) State Newton's backward interpolation formula and using it evaluate $\cos 73^0$ from the following data. 7 Marks

x^0	10	20	30	40	50	60	70	80
$\cos x^0$	0.9848	0.9397	0.8660	0.7660	0.6428	0.5000	0.3420	0.1737

b) State Lagrange's interpolation formula and using it find the value of y when x = 10 from the following data. 7 Marks

x	5	6	9	11
y	12	13	14	16

(OR)

6 a) Prove the results (i) $\Delta = \frac{\delta^2}{2} + \delta\sqrt{1+\frac{\delta^2}{4}}$. (ii) $\mu\delta = \frac{1}{2}\Delta E^{-1} + \frac{1}{2}\Delta$. 7 Marks

b) Write Newton's backward interpolation formula and using it estimate the value of $f(42)$ from the following data. 7 Marks

x	20	25	30	35	40	45
$f(x)$	354	332	291	260	231	204

UNIT-IV

7 a) Determine the first and second derivatives of the function tabulated below at the point $x = 1.5$. 7 Marks

x	1.5	2.0	2.5	3.0	3.5	4.0
y	3.375	7.0	13.625	24.0	38.875	59.0

b) Evaluate $\int_0^1 x^3 dx$ with five sub-intervals by Trapezoidal rule. 7 Marks

(OR)

8 a) The following data gives the velocity of a particle for 20 seconds at an interval of 5 seconds. Obtain the initial acceleration using the data. 7 Marks

Time(t sec)	0	5	10	15	20
Velocity v(m/sec)	0	3	14	69	228

b) Evaluate $\int_0^6 x\sec x dx$ taking eight sub intervals by Trapezoidal rule. 7 Marks

UNIT-V

9 a) Calculate $y(0.3)$ from $y' = x^2 + y^2, y(0) = 1$ by apply Milne's Predictor-Corrector method. Take the straight values $y(-0.1) = 0.9087$, $y(0.1)=1.1113$, $y(0.2)=1.2506$. 7 Marks

b) Compute the value of y(0.2) by Euler's method, given $y' = x + y^2, y = 1$ at $x=0$. 7 Marks

(OR)

10 a) Given the differential equation $y' = x^2(1+y)$ with $y(1) = 1$, $y(1.1) = 1.233$, $y(1.2) = 1.548$, $y(1.3)=1.974$. Estimate y(1.4) using Milne's Predictor – Corrector method. 7 Marks

b) Given that $\frac{dy}{dx} = 2 + \sqrt{xy}$ and $y = 1$ when $x = 1$. Find approximate value of y at $x = 2$ in steps of h=0.2, using Euler's modified method. 7 Marks

❀ ❀ ❀

MULTI-VARIABLE CALCULUS AND DIFFERENTIAL EQUATIONS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Design a mathematical equation of the family of orthogonal trajectories to the curves $a\,y^2 = x^3$ where a is the parameter. 7 Marks

b) Check whether the two families of curves given by $x^2 - y^2 = a^2$ and $xy = c^2$ are mutually orthogonal to each other or not and justify your answer. 7 Marks

(OR)

2 a) Design a mathematical equation for the orthogonal trajectories of the family of curves $r = 2a\,(\cos\theta + \sin\theta)$. 7 Marks

b) If the temperature of the body is changing from 100°C to 70°C in 15 minutes estimate the time for which the body comes to 40°C, the temperature of air being 30°C. 7 Marks

UNIT-II

3 a) A circuit has in series on electromotive force given by E = 100 (sin 40t) volts. A resistor of 10Ω and an inductor of 0.5 H. If the initial current is 0 find the current at time $t > 0$. 7 Marks

b) A conductor of capacity C discharged through an inductance L and resistance R in series and the charge q at time t satisfies the equation $L\frac{d^2q}{dt} + R\frac{dq}{dt} + \frac{q}{C} = 0$. Given that L = 0.25 henries , R = 250Ω C = 2 x 10^{-6} farads and that when t = 0, charge q = 0.02 coulombs and the current $\frac{dq}{dt} = 0$. Estimate the value of q in terms of t. 7 Marks

(OR)

4 For an L – R – C circuit, the charge q on a plate of the condenser is given by $L\frac{d^2q}{dt} + R\frac{dq}{dt} + \frac{q}{C} = E\sin\omega t$ where $i = \frac{dq}{dt}$ The circuit is turned to resonance so that $\omega^2 = \frac{1}{LC}$. If $CR^2 < 4L$ and initially q = 0 ,i = 0 then show that $q = \frac{E}{R\omega}\left[e^{\frac{Rt}{2L}}\left(\cos pt + \frac{R}{2LP}\sin pt\right) - \cos\omega t\right]$ where $p^2 = \frac{1}{LC} - \frac{R^2}{4L^2}$ and $i = \frac{E}{R}\left[\sin\omega t - \frac{1}{p\sqrt{LC}}e^{-\frac{Rt}{2L}}\sin pt\right]$. 14 Marks

UNIT-III

5 a) Examine the function for extreme values $f(x,y) = x^4 + y^4 - 2x^2 + 4xy - 2y^2$ **(x> 0 , y > 0)**. 7 Marks

b) Evaluate three positive numbers whose sum is 100 and whose product is maximum. 7 Marks

(OR)

6 a) Expand in Taylor series the function $e^x \cos y$ about the point $(1, \frac{\pi}{4})$. 7 Marks

b) Making use of the Lagrange's method of multipliers, find the maximum or minimum of $u = x^2 + y^2 + z^2$ subject to the conditions $ax^2 + by^2 + cz^2 = 1$ *and* $lx + my + nz = 0$. 7 Marks

UNIT-IV

7 Change the order of integration, evaluate $\int_0^{4a} \int_{x^2/4a}^{2\sqrt{ax}} dydx$ 14 Marks

(OR)

8 Evaluate $\int_0^1 \int_{x^2}^{2-x} xydxdy$ by the change of order technique. 14 Marks

UNIT-V

9 a) State Greens theorem in a place and verify it for $\oint (3x^2 - 8y^2)dx + (4y - 6xy)dy$ where C is the region bounded by y = √x and y = x². 7 Marks

b) State stokes theorem and applying it evaluate $\oint_C ydx + zdy + xdz$ where C is the curve of intersection of the sphere $\mathbf{x^2 + y^2 + z^2 = a^2}$ and $\mathbf{x + z = a}$. 7 Marks

(OR)

10 a) State stokes theorem and applying it show that curlgrad $\phi = \bar{0}$. 7 Marks

b) State Gauss divergence theorem and use it to evaluate $\iint (yz^2\bar{i} + xz^2\bar{j} + 2z^2\bar{k}) \cdot d\bar{s}$. where S is the closed surface bounded by xy – plane and the upper half of the sphere $\mathbf{x^2 + y^2 + z^2 = a^2}$ above this plane. 7 Marks

ELECTRIC CIRCUITS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) State ohm's law and give its applicability to electrical network and explain convention current direction and voltage across an element 7 Marks

b) Find the total power dissipated in the circuit shown in the Fig. 1 (All resistances are in ohms). 7 Marks

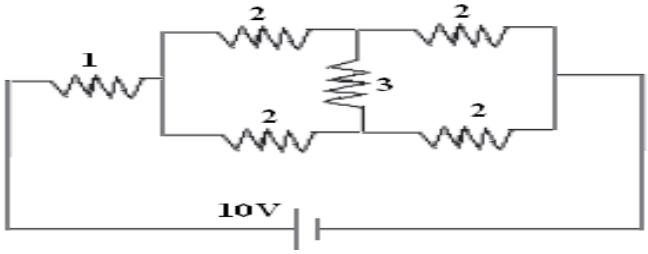

Fig. 1

(OR)

2 a) What are passive and active elements? Explain the volt-current relationship of passive elements with examples. 7 Marks

b) Using Kirchoff's current law, find the values of the currents i_1 and i_2 in the circuit shown in Fig. 2. 7 Marks

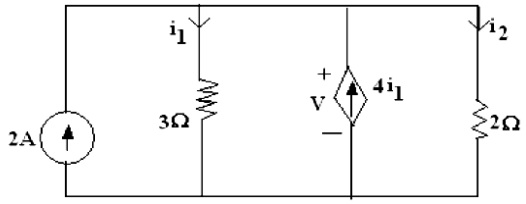

Fig. 2

UNIT-II

3 a) Derive the expression of resonant frequency for RLC series circuit shown in Fig.3 6 Marks

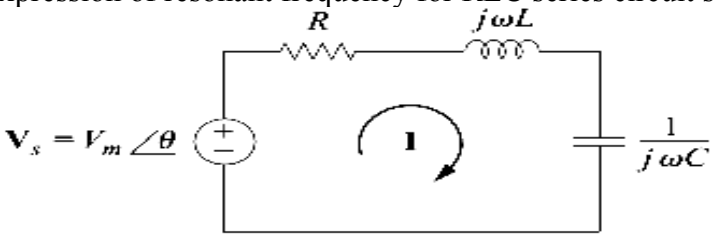

Fig. 3

b) For the circuit shown in Fig. 4 compute: 8 Marks

(i) Power factor. (ii) Average power delivered by the source.
(iii) Reactive power. (iv) Apparent power. (v) Complex power.

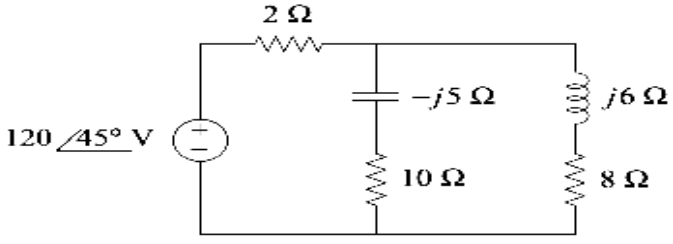

Fig. 4

(OR)

4 a) A series RLC circuit consists of R=100Ω, L = 0.02 H and C = 0.02 microfarad. Calculate frequency of resonance. A variable frequency sinusoidal voltage of constant RMS value of 50V is applied to the circuit. Find the frequency at which voltage across L and C is maximum and find maximum current in the circuit. 6 Marks

b) For the circuit shown in Fig. 5, find the load impedance Z_L that absorbs the maximum average power. Calculate that maximum average power. 8 Marks

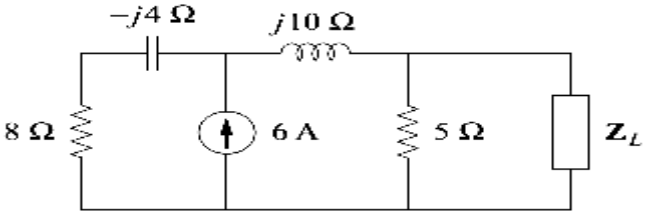

Fig. 5

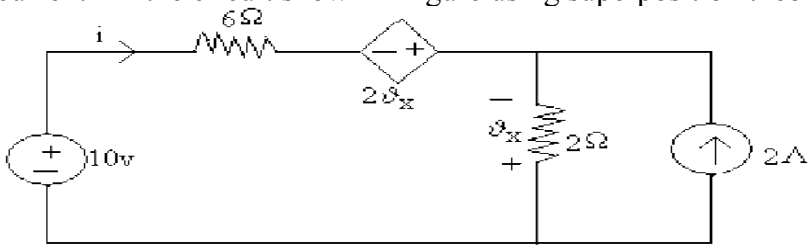
UNIT-III

5 State and explain Maximum power transfer theorem and derive the necessary conditions for maximum power transfer for DC and AC excitations. 14 Marks

(OR)

6 a) State and explain Maximum power transfer theorem and derive the necessary conditions for maximum power transfer for a DC excitations. 6 Marks

b) Find the current **i** in the circuit shown in figure using superposition theorem. 8 Marks



UNIT-IV

7 a) Elucidate the measurement of power and power factor of a balanced three phase load with neat sketch. 6 Marks

b) For the following Fig.6, the RMS value of the line voltage is 208 V. Find the average power delivered to the load. 8 Marks

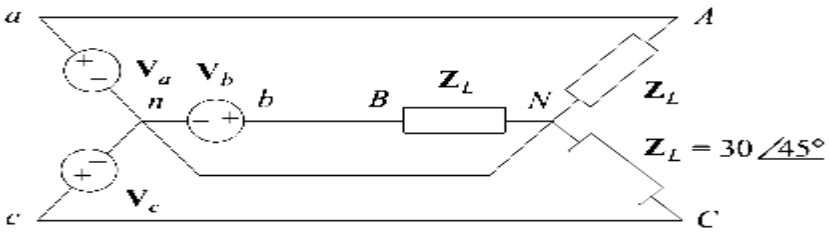


Fig. 6

(OR)

8 a) Explain how a single wattmeter can be used to measure the reactive power with the help of circuit connection and derive the necessary equations. 6 Marks

b) The unbalanced Δ-connected load of Fig.7 is supplied by balanced line-to-line voltage of 440V in the positive sequence. Find the line currents. Take V_{ab} as a reference. 8 Marks

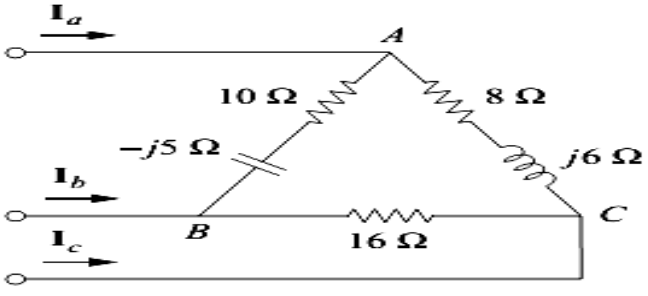

Fig. 7

UNIT-V

9 a) Derive the expressions for equivalent inductance of two coils in parallel with i) parallel aiding. ii) parallel opposition. 6 Marks

b) Find the input impedance of the circuit in Fig. 8 and the current from the voltage source. 8 Marks

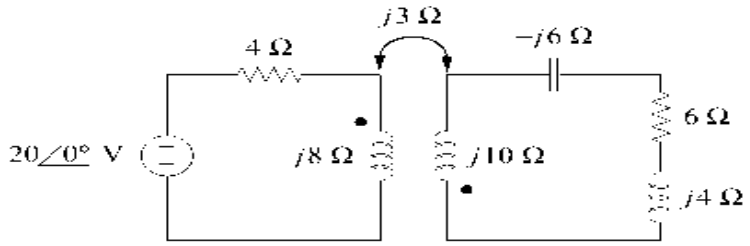

Fig. 8

(OR)

10 a) Derive the expressions for equivalent inductance of two coils in series with i) series aiding. ii) series opposition. 6 Marks

b) Calculate the mesh currents shown in Fig. 9 8 Marks

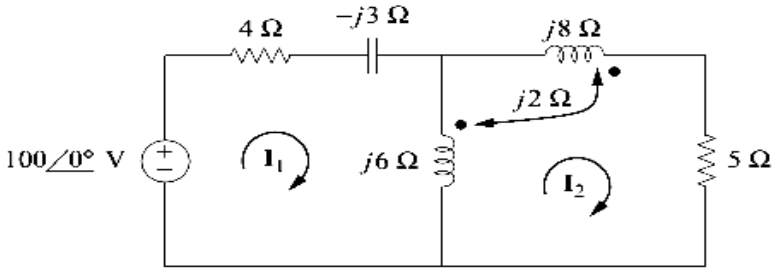

Fig. 9

PROGRAMMING IN C

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Define C character set and explain about the C tokens and Data types with examples.	14 Marks
		(OR)	
2	a)	Illustrate the structure of 'C' Program with an example.	7 Marks
	b)	List various steps to develop Programs in 'C'.	7 Marks

UNIT-II

3	a)	Demonstrate One way and Two way decision statements with example programs.	7 Marks
	b)	Write a 'C' Program that determines if a year is Leap Year (or) not.	7 Marks
		(OR)	
4		Write a 'C' Program that Prints Largest among Three numbers.	14 Marks

UNIT-III

5	a)	Define Function. Explain its syntax and advantages.	7 Marks
	b)	Write a 'C' Program to compute X^{n} where X is a any valid number and **n** is an Integer Value.	7 Marks
		(OR)	
6	a)	Define Array. Discuss 2-Dimensional and Multi-Dimensional Arrays with its syntax.	7 Marks
	b)	Write a 'C' Program that prints Fibonacci Series using Arrays.	7 Marks

UNIT-IV

7	a)	Define Pointer Data type. Write a 'C' Program using Pointers to exchange the contents of two variables.	7 Marks
	b)	Write a short note on Pointer Operators.	7 Marks
		(OR)	
8	a)	What is Pointer Arithmetic? Explain about Pointer Expressions.	7 Marks
	b)	Write a 'C' Program to Add 'N' numbers using Pointers.	7 Marks

UNIT-V

9	a)	With an example, explain how to Declare and Access Structures.	6 Marks
	b)	Write a 'C' Program to initialize Structure Members.	8 Marks
		(OR)	
10	a)	What is the use of typedef in structure declaration? Explain.	9 Marks
	b)	Write a 'C' Program to copy one structure into another.	5 Marks

ENGINEERING CHEMISTRY

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the following. i) Priming. ii) Foaming.	7 Marks
	b)	Write short note on internal treatment methods for softening of water.	7 Marks
		(OR)	
2	a)	What is the principle of reverse osmosis? Explain the process of reverse osmosis.	7 Marks
	b)	"Reverse osmosis is advantageous over ion exchange process" justify the statement	7 Marks

UNIT-II

3	a)	Differentiate short and long fibre-reinforced composites	7 Marks
	b)	What are the advantages of composite material? Mention its applications	7 Marks
		(OR)	
4		Write the synthesis, properties and applications of the following engineering plastics. i) Poly Carbonates. ii) Teflon.	14 Marks

UNIT-III

5		Discuss any three tools of Green Chemistry with examples.	14 Marks
		(OR)	
6		Write the twelve principles of Green Chemistry and evaluate their role on chemistry and environment.	14 Marks

UNIT-IV

7		Discuss the construction and working of Lithium-ion battery with the reactions occurring during charging and discharging. Mention the applications of Li-ion batteries.	14 Marks
		(OR)	
8		Define fuel cell. Explain the construction, working of H_2-O_2 fuel cell and its applications.	14 Marks

UNIT-V

9	a)	Define flash point and fire point of a lubricant and explain their significance.	7 Marks
	b)	Illustrate semi-solid lubricants with their uses.	7 Marks
		(OR)	
10	a)	Write short note on: i) Cloud and pour points. ii) Mechanical strength of lubricants.	7 Marks
	b)	Compare the terms viscosity and viscosity index	7 Marks

ENGINEERING PHYSICS

[Electrical and Electronics Engineering, Electronics and Communications Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the construction and working of a semiconductor laser. Give the applications of semiconductor laser.	10 Marks
	b)	Calculate the wavelength of emitted radiation from GaAs which has a band gap of 1.44 Ev.	4 Marks
		(OR)	
2	a)	What is an optical fiber? What is the principle involved in its working? Derive an expression for acceptance angle of an optical fiber and how it is related to numerical aperture.	10 Marks
	b)	The refractive indices of core and cladding materials of an optical fiber are 1.48 and 1.45 respectively. Calculate numerical aperture and acceptance angle	4 Marks

UNIT-II

3	a)	Explain origin of energy band formation in solids.	4 Marks
	b)	Distinguish between conductors, insulators and semiconductors based on band theory. An electron is bound in one dimensional infinite well of width 1×10^{-10} m then find the energy values in the ground state and in the first two excited states.	10 Marks
		(OR)	
4	a)	Explain de-Broglie hypothesis.	8 Marks
	b)	Find the velocity and kinetic energy of an electron having wavelength 1.66Å.	6 Marks

UNIT-III

5	a)	Write a note on extrinsic semiconductors. How they are formed?	6 Marks
	b)	Obtain an expression for the electrical conductivity in semiconductors.	8 Marks
		(OR)	
6		Predict the theory behind the formation of p-n junction and explain its energy band diagram.	14 Marks

UNIT-IV

7	a)	How the reverberation and reverberation time influences the acoustically good hall?	6 Marks
	b)	Distinguish between echo and reverberation. A hall with a volume of 1000m^3 has a sound absorbing surface of area of 400m^2. If the average absorption coefficient of the hall is 0.2 sabine, what is the reverberation time of the hall?	8 Marks
		(OR)	
8	a)	Elaborate Meissner's effect.	7 Marks
	b)	Distinguish between Type-I and Type-II superconductors.	7 Marks

UNIT-V

9	a)	How X-rays are suitable in determination of crystal structure.	4 Marks
	b)	State and explain Bragg's law for diffraction in crystals. Calculate the glancing angle at (110) plane of a cubic crystal having lattice constant of 0.26 nm corresponding to the second order diffraction maximum for the X-rays having wavelength of 0.65 nm.	10 Marks

(OR)

10	a)	Explain the principle factors which affect the properties of nanomaterials.	5 Marks
	b)	Discuss in detail about the fabrication of nanomaterials by pulsed laser deposition.	9 Marks

MATRICES AND NUMERICAL METHODS

[Civil Engineering, Mechanical Engineering, Electrical and Electronics Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Construct the diagonal matrix $A=\begin{bmatrix} 8 & -8 & -2 \\ 4 & -3 & -2 \\ 3 & -4 & 1 \end{bmatrix}$ 14 Marks

(OR)

2 Define modal matrix and spectral matrix. Determine the modal matrix P of $A=\begin{bmatrix} -2 & 2 & -3 \\ 2 & 1 & -6 \\ -1 & -2 & 0 \end{bmatrix}$ 14 Marks

UNIT-II

3 a) Estimate the value of y at $x = 3.5$ by fitting the curve of the form $y = a + bx + cx^2$ by method of least square principle to the following data 7 Marks

x	1	2	3	4	5	6	7
y	2.3	5.2	9.7	16.5	29.4	35.5	54.4

b) Determine the values of a and b and fit an exponential curve of the form $y = ae^{bx}$ that best fits the following data 7 Marks

X	0	1	2	3
Y	1.05	2.10	3.85	8.30

(OR)

4 a) Construct a straight line by method of least square principle to the following data 7 Marks

x	1	2	3	4	5
y	4	3	6	7	11

b) Using the technique of least squares, fit the parabola $y = a + bx + cx^2$ to the data $f(-1) = -2,\ f(0) = 1,\ f(1) = 2,\ f(2) = 4$ 7 Marks

UNIT-III

5 a) Evaluate the value of $\sin 1.747$ using the values given in the table below 7 Marks

x	1.70	1.74	1.78	1.82	1.86
$\sin x$	0.9916	0.9857	0.9781	0.9691	0.9584

b) Using the technique of Lagrange's interpolation, express the function $f(x) = \dfrac{3x^2 + x + 1}{(x-1)(x-2)(x-3)}$ as a sum of partial fractions. 7 Marks

(OR)

6 a) Define (i) Average operator (ii) Central difference operator and hence show that 7 Marks

$E^{\frac{1}{2}} = \mu + \frac{\delta}{2}$

b) State Newton's forward interpolation formula. Calculate the values of e^{185} from the following table 7 Marks

x	1.7	1.8	1.9	2.0	2.1	2.2	2.3
e^x	5.474	6.050	6.686	7.389	8.166	9.025	9.974

UNIT-IV

7 a) A Slider in a machine moves along a fixed straight rod. Its distance **x** cm along the rod is given below for various values of the time t seconds. Obtain the velocity and acceleration of the slider when $t = 0.1$ seconds. 7 Marks

t(sec)	0	0.1	0.2	0.3	0.4	0.5	0.6
x (cm)	30.13	31.62	32.87	33.64	33.95	33.81	33.24

b) Write Simpson's 3/8 rule and evaluate $\int_0^{\frac{1}{2}} \frac{1}{\sqrt{1-x^2}}\,dx$ applying it with n=6. 7 Marks

(OR)

8 a) The Velocity ***v*** of a particle moving in a straight line covers a distance **x** in time **t** related as follows. Estimate $f'(15)$ 7 Marks

x	0	10	20	30	40
v	45	60	65	54	42

b) Evaluate the following integral $\int_1^2 \frac{e^x}{x}\,dx$ using Simpson's $\frac{1}{3}$rd rule for $n = 4$ 7 Marks

UNIT-V

9 Write Runge-Kutta 4th order formulae and use it to evaluate $y(0.1)$ and $y(0.2)$ given $y' = x^2 - y$ and $y(0)=1$. Compare the numerical solution obtained with analytical solution. 14 Marks

(OR)

10 a) Write Milne's Predictor-Corrector formula and apply it to obtain the solution of the equation $y' = x - y^2$ at $x = 0.8$ given that 7 Marks

$y(0)=0,\ y(0.2) = 0.02,\ y(0.4) = 0.0795,\ y(0.6) = 0.1762.$

b) Estimate the value of y at $x = 0.1$ given that $y' = xy^2 - 1, y(0) = 1,$ by Taylor's series method. 7 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

I B.Tech I Semester (SVEC-16) Supplementary Examinations February – 2021

MULTI-VARIABLE CALCULUS AND DIFFERENTIAL EQUATIONS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology and Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Solve the differential equation $(x^2y - 2xy^2)dx - (x^3 - 3x^2y)dy = 0$ by reducing it into exact equation. 7 Marks

b) Find a solution for the differential equation 7 Marks
$(xy\sin xy + \cos xy)\,y\,dx + (xy\sin xy - \cos xy)\,x\,dy = 0$

(OR)

2 a) Identify the integrating factor and solve the differential equation 7 Marks
$(2xy + 1)\,y\,dx + (1 + 2xy - x^3y^3)\,x\,dy = 0$

b) Multiplying with the corresponding integrating factor, find a solution for the differential equation $2xy\,dy - (x^2 + y^2 + 1)\,dx = 0$ 7 Marks

UNIT-II

3 a) Applying the method of variation of parameters, solve the differential equation $(D^2 - 2D)y = e^x \sin x$ 7 Marks

b) Solve the equation $\frac{d^2y}{dx^2} - y = \frac{2}{1 + e^x}$ by the method of variation of parameters. 7 Marks

(OR)

4 a) Find a solution of the differential equation $(D^2 + a^2)y = \sec ax$ by using partial fractions 7 Marks

b) An uncharged condenser of capacity C is charged by applying an e.m.f. $E\sin(\frac{t}{\sqrt{LC}})$, through leads of self-inductance L and negligible resistance. Show that at any time t, the charge on one of the plates is $\frac{EC}{2}\left\{\sin\frac{t}{LC} - \frac{t}{\sqrt{LC}}\cos\frac{t}{\sqrt{LC}}\right\}$ 7 Marks

UNIT-III

5 a) Using the appropriate technique of finding stationary values, estimate the maximum and minimum values for the function $x^3 + y^3 - 3axy$ 7 Marks

b) Write the Taylor series for a function f(x,y) about a point (a,b) and hence expand the function $x^3 + y^3 + xy^2$ in powers of $(x - 1)$ *and* $(y - 2)$. 7 Marks

(OR)

6 a) By the technique of finding stationary values for the function $x^2y^2 - 5x^2 - 8xy - 5y^2$, decide at what points the function becomes maximum and minimum. 5 Marks

b) By the technique of Lagrange's undetermined multipliers establish a minimum value for $x^2 + y^2 + z^2$ subject to the condition $xyz = a^3$ 9 Marks

UNIT-IV

7 a) Evaluate $\iint (x^2 + y^2)dxdy$ in the positive quadrant for which $x + y \le 1$. 7 Marks

b) Evaluate $\iint (x + y)dxdy$ over the region of the positive quadrant bounded by the ellipse $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$. 7 Marks

(OR)

8 a) Evaluate the following integral by the technique of transforming into polar coordinates $\int_0^a \int_0^{\sqrt{a^2 - x^2}} y\sqrt{x^2 + y^2}\,dxdy$. 7 Marks

b) Evaluate $\iint_R (1 - \frac{x^2}{a^2} - \frac{y^2}{b^2})dxdy$ over the first quadrant of the ellipse $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$ using the transformations x = au and y = bv. 7 Marks

UNIT-V

9 a) Define flux of a vector point function across a surface and compute the flux of water through the parabolic cycloid $y = x^2$, $0 \le x \le 2$; $0 \le z \le 3$, if the velocity vector $\bar{V} = 3z^2\bar{i} + 6\bar{j} + 6xz\bar{k}$ m/sec. 6 Marks

b) By transforming into triple integral evaluate $\iint_S x^3 dydz + x^2 ydzdx + x^2 zdxdy$ where S is the closed surface consisting of the cylinder $\mathbf{x^2 + y^2 = a^2}$ and the circular discs z = 0 and z = b 8 Marks

(OR)

10 a) Define surface integral and evaluate $\int_S \bar{F} \cdot \bar{n}dS$ where $\bar{F} = z\bar{i} + x\bar{j} - 3y^2z\bar{k}$ and S is the surface $\mathbf{x^2 + y^2 = 16}$ included in the first octant between z = 0 and z = 5. 9 Marks

b) State Gauss divergence theorem and use it to evaluate $\iint_S \bar{F} \cdot dS$ where $\bar{F} = 4x\bar{i} - 2y^2\bar{j} + z^2\bar{k}$ and S is the surface of the closed region bounded by $\mathbf{x^2 + y^2 = 4}$, z = 0 and z = 3. 5 Marks

TECHNICAL ENGLISH

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	Discuss the various types of communication, explaining in detail verbal and non-verbal communication.	14 Marks
	(OR)	
2	Distinguish between Intrapersonal, Interpersonal and Organisational barriers to communication.	14 Marks

UNIT-II

3	Discuss the barriers which affect the process of listening and suggest methods to overcome the barriers.	14 Marks
	(OR)	
4	State the factors on which the listening modes depend and elaborate on different kinds of listening modes.	14 Marks

UNIT-III

5	Distinguish semi-formal and informal speaking with examples.	14 Marks
	(OR)	
6	State the importance of reasoning and emotional appeal in persuasive speaking.	14 Marks

UNIT-IV

7	Provide guidelines to enhance reading rate.	14 Marks
	(OR)	
8	Explain the various purposes of reading.	14 Marks

UNIT-V

9	Describe how you achieve conciseness and flow in technical writing, with the help of suitable examples.	14 Marks
	(OR)	
10	Define the terms clichés and Jargon with examples and how to avoid them.	14 Marks

ELECTRIC CIRCUITS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Using nodal method, find the battery current in the circuit of Fig. 1. 14 Marks

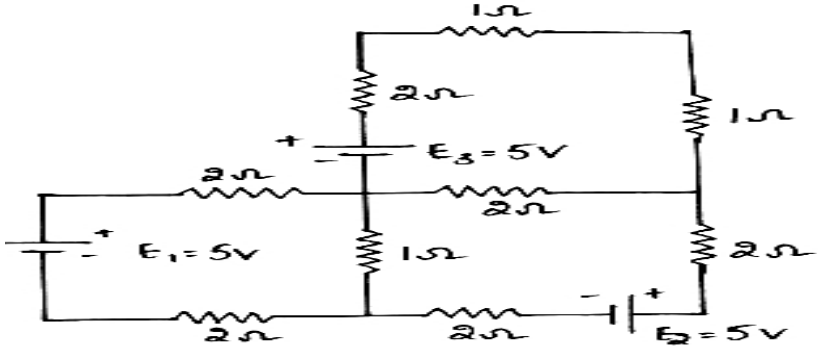

Fig. 1

(OR)

2 a) Explain the concept of dual and duality in electrical circuits. 7 Marks

b) Find the loop currents i_1, i_2 and i_3 in the network of Fig.2 by mesh method. 7 Marks

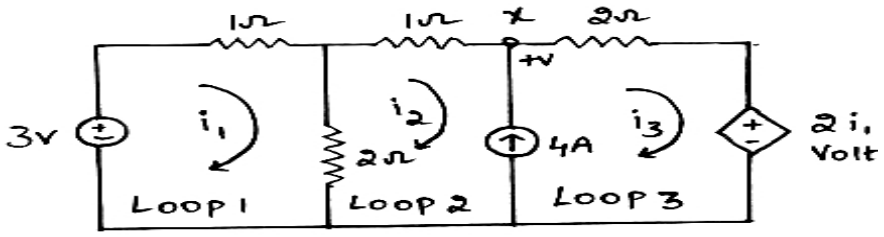

Fig. 2

UNIT-II

3 a) Derive the expression of resonant frequency for RLC parallel circuit shown in Fig. 3 6 Marks

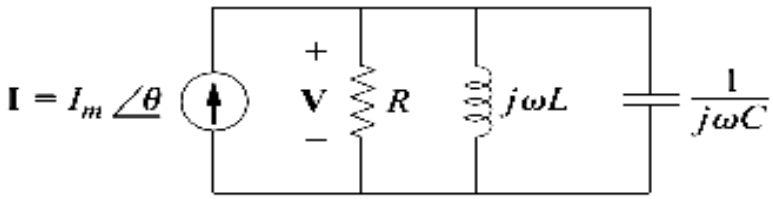

Fig. 3

b) Find the RMS value of the current waveform of Fig. 4, if the current flows through a 9Ω resistor, calculate the average power absorbed by the resistor. 8 Marks

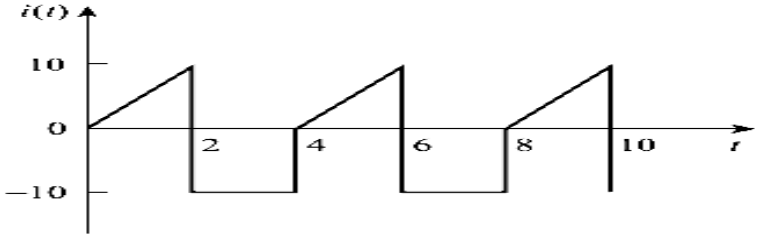

Fig. 4

(OR)

4 a) Develop the relation between resonant frequency and half-power frequencies for 6 Marks

RCL series circuit shown in Fig. 5

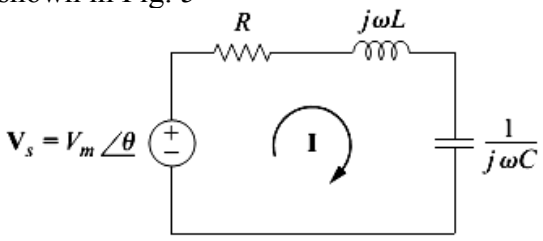

Fig. 5

b) In the parallel RLC circuit of Fig. 6, assume R=8kΩ, L=0.2mH and C=8μF then calculate Resonant frequency, Half-power frequencies, Bandwidth and Quality factor. 8 Marks

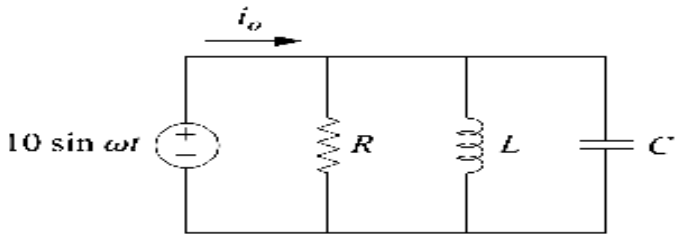

Fig. 6

UNIT-III

5 a) State and explain Millman's theorem. 7 Marks

b) Find the current through load resistance RL and also find the voltage drop across load using Millman's theorem shown in figure Fig. 7. 7 Marks

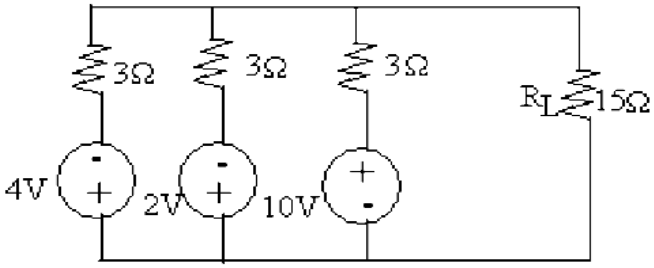

Fig. 7

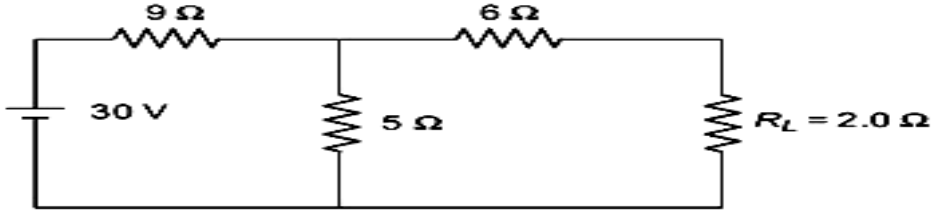
(OR)

6 a) State and explain compensation theorem. 7 Marks

b) Calculate the change in current of the network given below using compensation theorem when load resistor changes to 10Ω. 7 Marks



UNIT-IV

7 a) Explain how the power factor of a three phase load can be determined by two wattmeter method. 6 Marks

b) Find the line currents in the unbalanced three-phase circuit of Fig. 8 and the real power absorbed by the load. 8 Marks

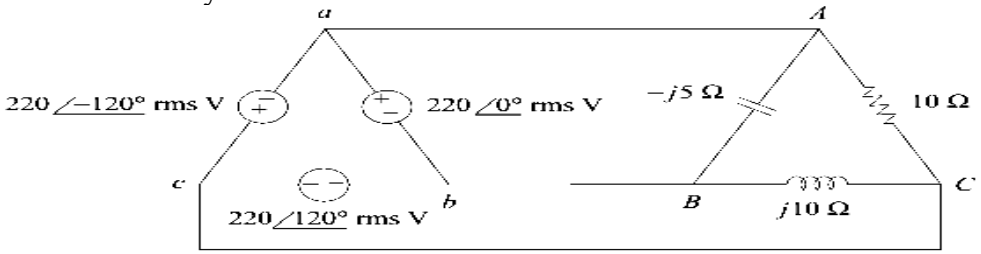


Fig. 8

(OR)

8 Three identical coil having impedance of (17.32 + j10) Ω each are connected in star across a 3-phase, 50 Hz, 400V supply. Find: 14 Marks

i) The total power supplied.
ii) Power factor of the load.
iii) If same coils are now connected in delta, calculate the total power taken by the load. Comment on result.

UNIT-V

9 a) For the coupled circuit shown in fig. 9 find the input impedance at the terminals **ab**. 6 Marks

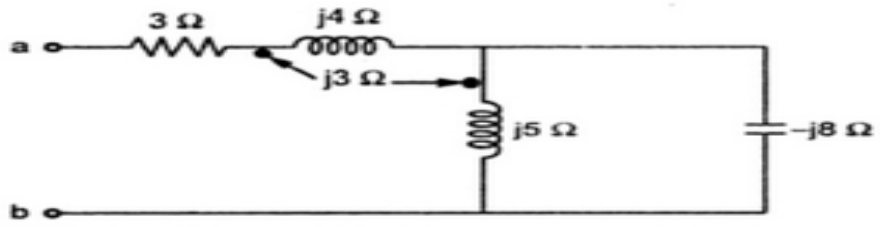

Fig. 9

b) Determine the mesh currents I_1 and I_2 in the circuit of Fig. 10 8 Marks

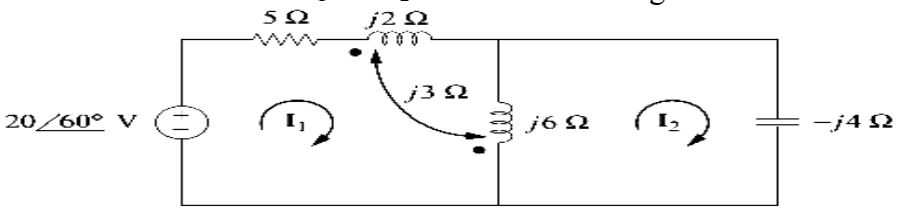

Fig. 10

(OR)

10 a) Determine the voltage V_0 in the circuit of Fig. 11 7 Marks

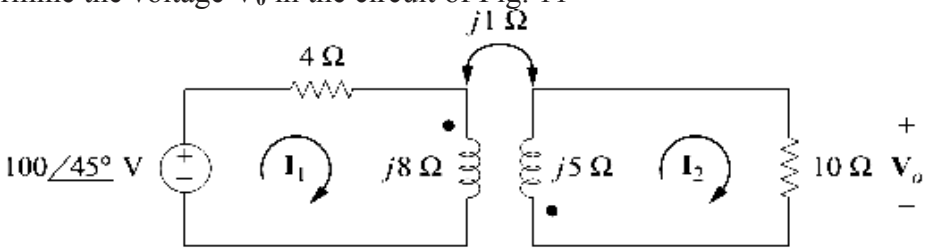

Fig. 11

b) For the circuit in Fig. 12, determine the coupling coefficient and the energy stored in the coupled inductors at t =1.5s. 7 Marks

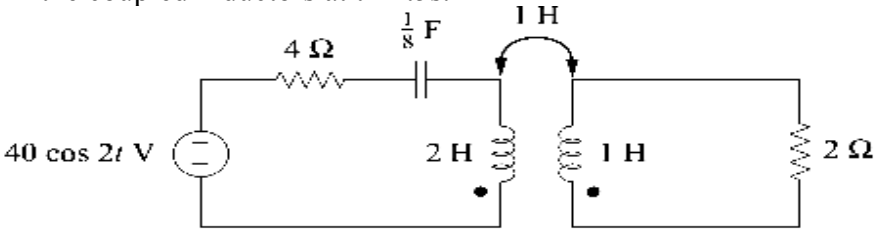

Fig. 12

NETWORK ANALYSIS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

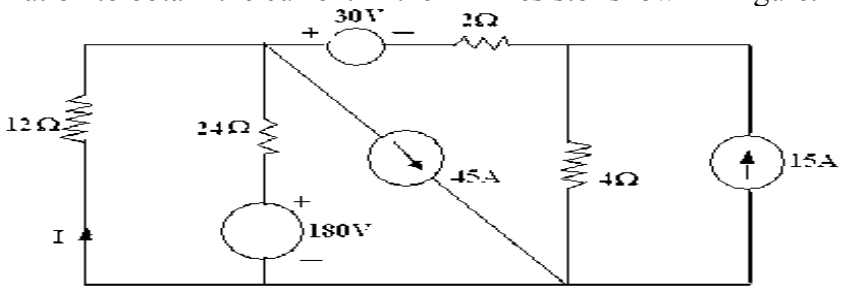
Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Write short notes on source transformation. 7 Marks

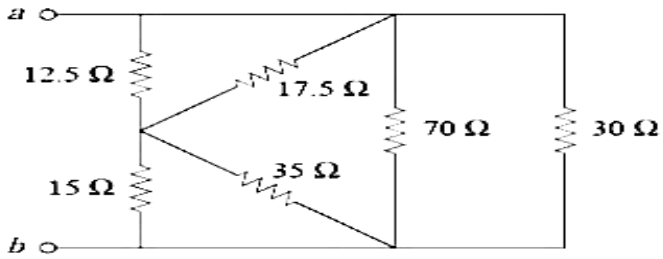
b) Reduce the network to a single loop network by successive source transformation to obtain the current in the 12 Ωresistor shown in figure. 7 Marks



(OR)

2 a) State ohm's law and give its applicability to electrical network and explain convention current direction and voltage across an element. 7 Marks

b) Determine the equivalent resistance between the points **ab** in the circuit shown in figure. 7 Marks



UNIT-II

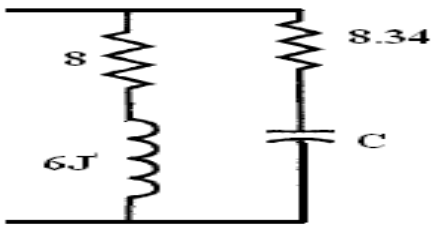
3 a) Explain the concept of active, reactive and apparent power and draw the power triangle. 7 Marks

b) In an AC circuit with 500sin100t as source voltage, connected across series combination of resistance and capacitance of 10Ω and 10F respectively. Calculate the source current flowing through the circuit. Also construct impedance and power triangles. 7 Marks

(OR)

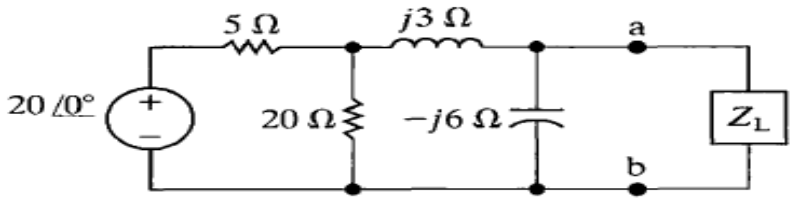
4 a) Define cut-off frequencies and bandwidth. Derive the expressions for cut-off frequencies and bandwidth of series RLC circuit. 7 Marks

b) Design the capacitance C, which results in resonance at 5000 rad/sec for the circuit shown in figure. 7 Marks



UNIT-III

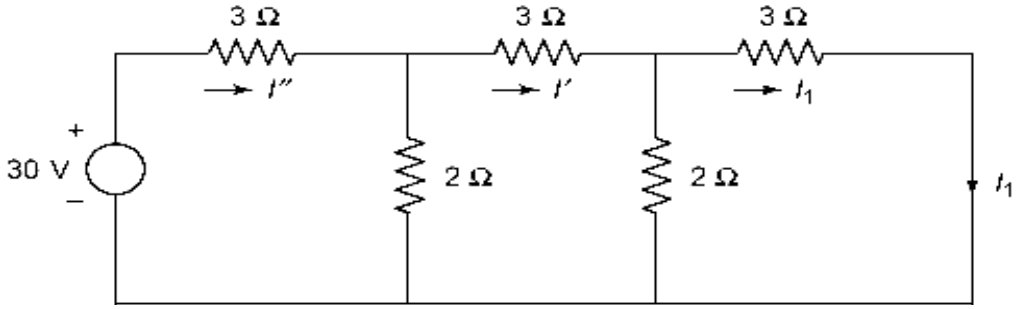
5 For the circuit shown in figure, determine the impedance Z_L that results in maximum average power transfer to Z_L. Also find the maximum power transferred. 14 Marks



(OR)

6 a) State and explain Tellegen's theorem. 7 Marks

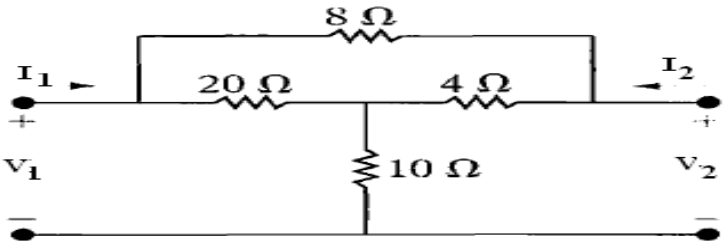
b) Verify reciprocity theorem for the circuit shown in below figure. 7 Marks



UNIT-IV

7 a) Obtain the relation between hybrid and ABCD parameters. 7 Marks

b) Find the y- Parameters for the circuit shown in the figure 7 Marks



(OR)

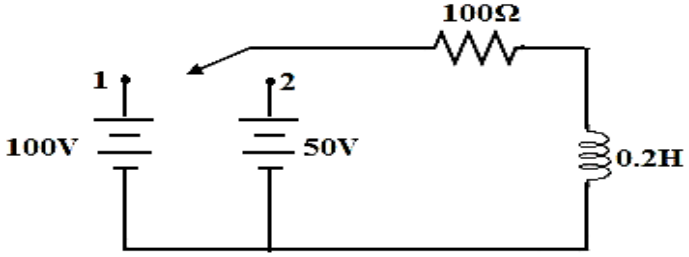
8 a) Define reciprocity and symmetry for a generalized two port network and derive the conditions for reciprocity and symmetry in terms of ABCD parameters. 7 Marks

b) Z-parameters for a two port network are given as Z_{11}=25, Z_{12}=Z_{21}=20, Z_{22}=50. Design an equivalent T-network. 7 Marks

UNIT-V

9 a) What are initial conditions? Explain the procedure to evaluate initial conditions 6 Marks

b) In the circuit shown, theswitchisclosedonposition1at t=0 thereby applying 100V source to the R-L branch, att=500micro seconds, the switch is moved to position 2. Obtain the equations for the current in both intervals. 8 Marks



(OR)

10 A Series RLC circuit with R=100Ω, L=0.1H and C=100μF has a DC voltage of 200 Volts applied to it att=0 through a switch. Determine the transient current. Assume initially the capacitor is charged to a voltage of 10V. 14 Marks

All questions carry equal marks

UNIT-I

1 Illustrate Relational, Increment and Decrement, Assignment and Special Operators with example programs. 14 Marks

(OR)

2 a) Why Operator Precedence is necessary? Explain with suitable example. 7 Marks
b) Classify 'C' expressions in detail. 7 Marks

UNIT-II

3 Distinguish between while and do-while statements. Write a C program to determine whether the given no is Armstrong Number or not. 14 Marks

(OR)

4 a) Write a short notes on gets( ) and puts( ) functions with suitable examples. 7 Marks
b) Write a C program to calculate electricity bill using else-if ladder. Read the starting and ending meter readings. The charges are as follows. 7 Marks

No. of Units	Consumed rates in (Rs.) per unit
0-50	1.50
51-100	2.00
101-150	2.50
151-200	2.75
>200	3.00

UNIT-III

5 a) Write short notes on usage of Pre-Processor directives in 'C' programming. 7 Marks
b) Write a 'C' program to find out whether a number is Perfect or not using Functions. 7 Marks

(OR)

6 a) How 1-Dimesional and 2-Dimensional arrays will be Passed to functions? Explain with suitable examples. 7 Marks
b) Write a 'C' program to find Transpose of a Given Matrix using Functions. 7 Marks

UNIT-IV

7 Demonstrate Dynamic Memory Allocation functions with syntax. 14 Marks

(OR)

8 a) What is Pointer to Pointer? Explain with example. 7 Marks
b) Write a program using Functions and Pointers to accept a given amount in Figures and display it in Words. (Ex:input:123 output>One Hundred and Twenty Three Rupees) 7 Marks

UNIT-V

9 a) What is the difference between sequential access and Random access of files? 7 Marks
b) Using command line arguments, write a program to copy two files. 7 Marks

(OR)

10 a) Explain in detail about Random Access file functions with suitable examples. 7 Marks
b) Explain about fread( ) and fwrite( ) functions with its syntax. 7 Marks

ENGINEERING CHEMISTY

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Four samples of water are collected at Naravari palli (**NP**), Pullaiahgari palli (**PP**), Kunchivari Palli (**KP**) and the other at Bandara Palli (**BP**). 100 ml of the each water sample collected at NP, PP, KP, and BP requires 28, 26, 20, 18 mL of EDTA solution on titrations respectively. 100ml of standard hard water (0.28 g of $CaCO_3$ per liter) requires 24ml of EDTA solution on titration. Calculate and compare the degree of hardness and Write the chemical reactions involved in titration.	8 Marks
	b)	Discuss the effects of fuorides in water on human Health and Nalgonda technique for defluoridation of water.	6 Marks

(OR)

2	a)	Rishika want to investigate the reason for unpredicted explosion of home boiler. After explosion the following deposits were found on analysis of boiler pieces. $CaSO_4$, $CaSiO_3$, $MgSiO_3$, Fe_2O_3, $Mg(OH)_2$, Na_2FeO_2, $CaCO_3$. Looking at the data Rishika Discussed about how boiler has suffered before explosion predicting the impurities present in water. Can you write the report discussing the attributes for explosion?	8 Marks
	b)	Write the chemistry of estimation of water hardness by EDTA method.	6 Marks

UNIT-II

3	a)	Discuss the preparation, properties and uses of PTFE and PMMA.	8 Marks
	b)	Explain Engineering applications of conducting polymers.	6 Marks

(OR)

4	a)	Explain the types of conducting polymer with suitable examples.	7 Marks
	b)	Explain the conduction mechanism of polyaniline.	7 Marks

UNIT-III

5	a)	Discuss the synthesis of Biodiesel by Trans esterification method.	7 Marks
	b)	Enumerate advantages, disadvantages and important applications of Biodiesel.	7 Marks

(OR)

6	a)	Write informative notes on recent trends in NANO TECHNOLOGY and future trends of GREEN CHEMISTRY.	10 Marks
	b)	Illustrate disadvantages of Nanomaterials.	4 Marks

UNIT-IV

7	a)	Explain the construction and working of bio-fuel cell with a rough diagram. Mention its two applications.	10 Marks
	b)	Generation of electricity by fuel cell is eco-friendly-give your comments.	4 Marks

(OR)

8	a)	Calculate the standard e.m.f. of the H_2-O_2 fuel cell, given E^0 values as -0.40V and 0.83V for the hydrogen and oxygen half cells respectively	5 Marks
	b)	Identify the type of battery that is truly the power behind everyday life. They start and power vehicles, back up uninterruptible operations like hospitals, railroad signals, air traffic controls, and help electric utilities shift loads among grids. Explain the chemistry with neat diagram.	9 Marks

UNIT-V

9	a)	Analyze the possible means of rendering a metal cathodic to protect it from corrosion.	7 Marks
	b)	What is metallic corrosion? Pin holes on tin coated iron are more prone to corrosion of iron than those on zinc coated iron. Why?	7 Marks

(OR)

10	a)	How will you assess the situation and identify the type of corrosion from the physical manifestation of the corroded components / parts?	8 Marks
	b)	Discuss the functions of lubricants with suitable examples.	6 Marks

ENGINEERING PHYSICS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain briefly the three processes involved in the LASER action with suitable diagrams.	10 Marks
	b)	List six applications of optical fibers.	4 Marks
		(OR)	
2	a)	Illustrate how a LASER is different from other light sources.	4 Marks
	b)	Explain the various types of optical fibers.	10 Marks

UNIT-II

3	a)	What are matter waves? Explain their properties and derive the expression for de-Broglie wavelength.	9 Marks
	b)	Explain the origin of energy bands in solids.	5 Marks
		(OR)	
4	a)	Basing on the energy band structure classify solids into conductors, semiconductors and insulators with neat diagrams.	9 Marks
	b)	What is the physical significance of the wave function?	5 Marks

UNIT-III

5	a)	Define the following terms as they pertain to semi conducting materials: intrinsic, extrinsic, compound, elemental and give an example for each.	4 Marks
	b)	In your own words, explain how donor impurities in semiconductors give raise to free electrons in numbers in excess of those generated by valence band-conduction band excitations.	6 Marks
	c)	Germanium to which $\mathbf{10^{24}/m^3}$ **'P'** atoms have been added in an extrinsic semiconductor at room temperature, and virtually all the **'P'** atoms may be thought of as being ionized (i.e. one charge carrier exists for each **'P'** atom). (i) Is this material n – type or p – type? (ii) Calculate the electrical conductivity of this material, assuming electron and hole mobilities of 0.1 and $0.05\mathbf{m^2/V\text{-}s}$ respectively.	4 Marks
		(OR)	
6	a)	Derive an expression for the intrinsic carrier concentration of a semiconductor.	7 Marks
	b)	Describe the drift and diffusion currents in a semiconductor.	4 Marks
	c)	The intrinsic carrier concentration at room temperature of Ge is $2.37 \times 10^{19}/m^3$. If the electron and hole mobilities are 0.38 and 0.18 m^2/V-s respectively, calculate the resistivity.	3 Marks

UNIT-IV

7	a)	Mention the properties of superconductors. Give some applications of superconductors.	7 Marks
	b)	Show that a superconductor in its superconducting state acts as a perfect diamagnetic material.	7 Marks
		(OR)	

8	a)	Define the terms reverberation, reverberation time and absorption coefficient of a material.	6 Marks
	b)	Derive Sabine's formula for reverberation time.	8 Marks

UNIT-V

9	a)	Derive an expression for the interplanar spacing in case of a cubic structure.	8 Marks
	b)	Discuss the physical, chemical and thermal properties of nano materials.	6 Marks

(OR)

10	a)	Describe any one top down method by which nano materials are fabricated.	10 Marks
	b)	List the significances of miller indices.	4 Marks

MATRICES AND NUMERICAL METHODS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Define the rank of a matrix and find the rank of the following matrix. 7 Marks

$$A = \begin{bmatrix} 2 & 1 & 3 & 5 \\ 4 & 2 & 1 & 3 \\ 8 & 4 & 7 & 3 \\ 8 & 4 & -3 & -1 \end{bmatrix}$$

b) Discuss for what values of λ and μ, the simultaneous equations $x + y + z = 6$; $x + 2y + 3z = 10$; $x + 2y + \lambda z = \mu$ have: 7 Marks
i) no solution. ii) a unique solution. iii) an infinite number of solutions.

(OR)

2 a) For the matrix $A=\begin{bmatrix} 1 & 2 & -3 \\ 0 & 3 & 2 \\ 0 & 0 & -2 \end{bmatrix}$, estimate the Eigen values of $3A^3+5A^2-6A+2I$. 7 Marks

b) Find the inverse of the matrix A by applying elementary row operations. 7 Marks

$$A=\begin{bmatrix} 1 & 2 & 3 \\ 2 & -1 & 4 \\ 3 & 1 & -1 \end{bmatrix}$$

UNIT-II

3 a) Applying bisection method, find the real root of $x \log_{10} x = 1.2$ correct to five decimal places. 7 Marks

b) The temperature T(in ^{o}c) and length L (in mm) of a heated rod are given below. 7 Marks
If $L= a_0+a_1T$, estimate the best values for a_0 and a_1.

T	20	30	40	50	60	70
L	800.3	800.4	800.6	800.7	800.9	801.0

(OR)

4 a) Evaluate a real root of the equation $xe^x - \cos x = 0$, using the Newton-Raphson method. 7 Marks

b) By the method of least squares, evaluate a straight line that best fits the following data: 7 Marks

x	1	2	3	4	5
y	14	27	40	55	68

UNIT-III

5 a) The following table gives the viscosity of a lubricant as a function of temperature 7 Marks

Temperature ^{0}C	100	120	150	170
Viscosity	10.2	7.9	5.1	4.4

Using Lagrange's formula, find the viscosity of the lubricant at a temperature 130ºC.

b) Develop the relations between the difference operators. 7 Marks

i) $E = e^{hD}$ (D is the differential operator). ii) $(1+\Delta)(1-\nabla) = 1$

(OR)

6 a) State appropriate interpolation formula which is to be used to calculate the value of y when x=1.75 from the following data and hence estimate the value of y(1.75). 7 Marks

b) i) Establish a relation between the difference operators E and ∇. 3 Marks

ii) Develop the relation between forward and back ward difference operators. 4 Marks

UNIT-IV

7 a) The following table gives the angular displacements θ(radians) at different intervals of time t (seconds): 7 Marks

t	0	0.02	0.04	0.06	0.08	0.10	0.12
θ	0.052	0.105	0.168	0.242	0.327	0.408	0.489

Calculate the angular velocity at t= 0.12 seconds.

b) Given that, 7 Marks

x:	4.0	4.2	4.4	4.6	4.8	5.0	5.2
logx:	1.3863	1.4351	1.4816	1.5261	1.5686	1.6094	1.6484

Evaluate $\int_4^{5.2} \log x \, dx$ by Simpson's 1/3 rule.

(OR)

8 a) Given that: 7 Marks

x	1.0	1.1	1.2	1.3	1.4	1.5	1.6
y	7.989	8.403	8.781	9.129	9.451	9.750	10.031

Estimate the value of dy/dx at x = 1.1.

b) The following table gives the velocity V of a particle at a distance S from a point on its path. 7 Marks

S(feets)	0	10	20	30	40	50	60
V(feets/sec)	47	58	64	65	61	52	38

Estimate the time taken by the particle to travel 60 feet using Simpson's 1/3 rd rule.

UNIT-V

9 a) Employ Taylor's method to obtain approximate value of y at x = 0.2 for the differential equation $\frac{dy}{dx} = 2y + 3e^x, y(0) = 0$. 7 Marks

b) Use the Euler algorithm with a step size h=0.5, find an approximate solution of the linear first order initial value problem $\frac{dy}{dx} = \sin x - y$, $y(0) = 1$ in the interval $0 \le x \le 3$. 7 Marks

(OR)

10 a) Tabulate y(0.1), y(0.2) and y(0.3) using Taylor's series method given that $\frac{dy}{dx} = y^2 + x$ and y(0)=1. 7 Marks

b) Apply Euler's method, solve for y at x=0.1 from $\frac{dy}{dx} = x + y + xy$ with initial condition y=1 at x=0, taking h=0.025. 7 Marks

Roll No. | | | | | | | | | | |

MULTIVARIABLE CALCULUS AND DIFFERENTIAL EQUATIONS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Identify the order and degree and determine the solution of the differential equation $\frac{dy}{dx} + \frac{y}{x\log x} = \frac{\sin 2x}{\log x}$. 7 Marks

b) Apply differentiation and Obtain the orthogonal trajectories of the family of curves $x^2 + y^2 = a^2$. 7 Marks

(OR)

2 a) Determine the solution of the differential equation. 7 Marks
$\frac{dy}{dx} + 2y = e^x + x$, given $y = 1$, when $x = 0$.

b) Verify the system of parabolas $y^2 = 4a(x + a)$ is self orthogonal. 7 Marks

UNIT-II

3 a) Determine the solution of $(D^2 + 4D + 3)y = e^{e^x}$. 7 Marks

b) The charge $q(t)$ on the capacitor is given by the differential equation $10\frac{d^2q}{dt^2} + 120\frac{dq}{dt} + 1000q = 17\sin 2t$. At time zero, the current is zero and the charge on the capacitor is $\frac{1}{2000}$ coloumbs. Determine the charge on the capacitor for $t > 0$. 7 Marks

(OR)

4 a) Obtain the solution of $(D^2 - 3D + 2)y = \cos 3x$. 7 Marks

b) An uncharged condenser of capacity C is charged by applying an e.m.f $E\sin\left(\frac{t}{\sqrt{LC}}\right)$, through leads of self inductance L and negligible resistance. Determine the charge on one plate at any time t. 7 Marks

UNIT-III

5 a) Examine for continuity at the origin of the function defined by 7 Marks
$f(x,y) = \begin{cases} \frac{x^2}{\sqrt{(x^2 + y^2)}} & x \neq 0, y \neq 0; \\ 0; x = 0. y = 0 \end{cases}$

b) Examine the function for extreme values, where the function $f(x,y) = x^4 + y^4 - 2x^2 + 4xy - 2y^2 \quad (x > 0, y > 0)$. 7 Marks

(OR)

6 a) If $u = f(y-z, z-x, x-y)$ then find the value of $\frac{\partial u}{\partial x} + \frac{\partial u}{\partial y} + \frac{\partial u}{\partial z}$. 7 Marks

b) Show that the rectangular solid of maximum volume that can be inscribed in a sphere is a cube. 7 Marks

UNIT-IV

7 a) Evaluate the length of the arc of the parabola $x^2 = 4ay$ measured from the vertex to one extremity of the latus-rectum. 7 Marks

b) Evaluate the surface of the solid formed by revolving the cardioid $r = a(1+\cos\theta)$ about the initial line. 7 Marks

(OR)

8 a) Find the surface area of the solid revolution of the curve $r = 2a\cos\theta$ about the initial line. 7 Marks

b) Evaluate the double integral $\int_0^5 \int_0^{x^2} x(x^2+y^2)dxdy$. 7 Marks

UNIT-V

9 a) Evaluate unit normal vector to the surface $x^3 + y^3 + 3xyz = 3$ at the point (1, 2, -1). 7 Marks

b) Evaluate $\oint_C F.dR$, If $F = 3xyi - y^2 j$, and c is the curve in the XY-plane $y = 2x^2$ from (0,0) to (1,2). 7 Marks

(OR)

10 a) Evaluate divergence of the flux F at the point (1, 2, 3) given $F = grad\left[x^3y + y^3z + z^3x - x^2y^2z^2\right]$. 7 Marks

b) Compute the work done in the moving a particle in the force field $F = 3x^2i + (2xz - y)j + zk$, along the curve define by $x^2 = 4ay, 3x^3 = 8z$ from x=0 to x=2. 7 Marks

TECHNICAL ENGLISH

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Discuss the different levels of communication in detail. 14 Marks

(OR)

2 Define barriers to Communication. Give two example of each of the following: 14 Marks
- i) Intrapersonal barriers.
- ii) Organisation barriers.
- iii) Interpersonal barriers.

UNIT-II

3 List some of the common external and personal barriers to listening. How are they similar / dissimilar to the general barriers to communication? 14 Marks

(OR)

4 What do you understand by the following terms? 14 Marks
- i) Appreciative Listening. ii) Empathetic Listening.
- iii) Comprehensive Listening. iv) Critical Reasoning.

UNIT-III

5 Explore the various types of speaking with appropriate guidelines. 14 Marks

(OR)

6 Suggest guidelines to achieve confidence. 14 Marks

UNIT-IV

7 Explain the following in about 150 words each: 14 Marks
- i) Study skills. ii) Inductive Logic.
- iii) Lexical meaning. iv) SQ3R.

(OR)

8 Discuss in detail the various purposes and methods of reading that are employed by readers. 14 Marks

UNIT-V

9 How does language help in technical writing? Explain which the help of suitable examples. 14 Marks

(OR)

10 Explain the techniques for good technical writing. 14 Marks

ELECTRICAL CIRCUITS

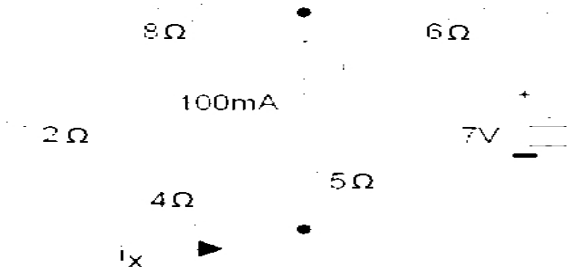
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

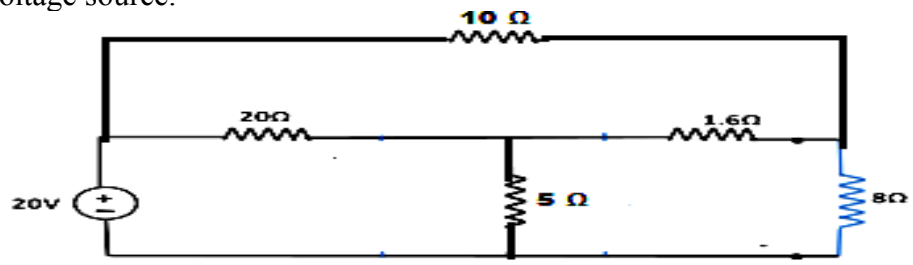
UNIT-I

1 a) Solve the current i_x passing through the 4Ω resistor using Mesh Analysis for the circuit shown in Figure. 7 Marks



Figure

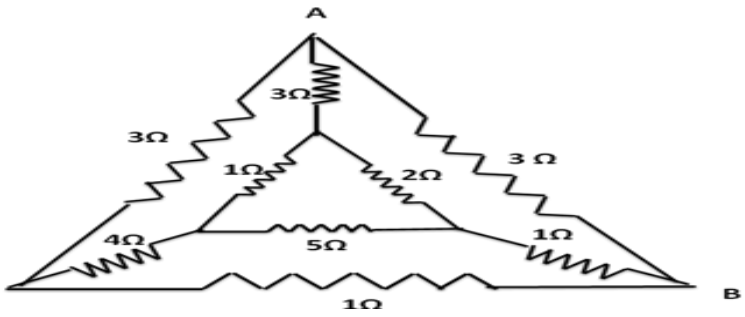
b) Compute the equivalent resistance across voltage source using star/delta transformation for the circuit shown in Figure. Also compute current delivered by voltage source. 7 Marks



Figure

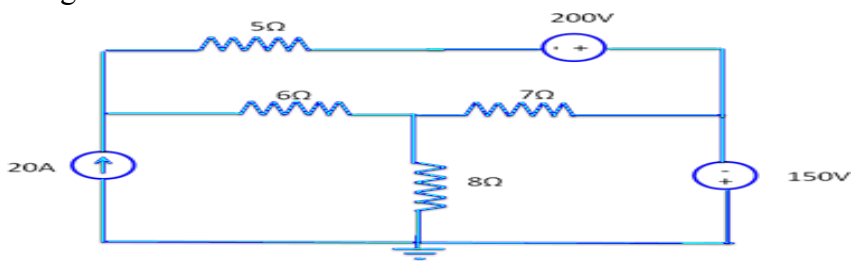
(OR)

2 a) Find the equivalent resistance across AB for the network shown in Figure. 7 Marks



Figure

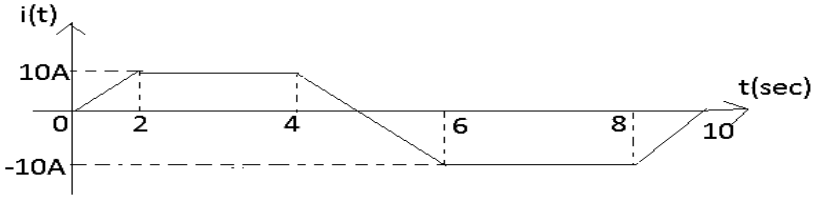
b) Find the current flowing through 8Ω by using Mesh analysis for the circuit shown in Figure. 7 Marks



Figure

UNIT-II

3 a) Compute the effective value, average value, form factor and peak factor of the waveform shown in Figure. 7 Marks

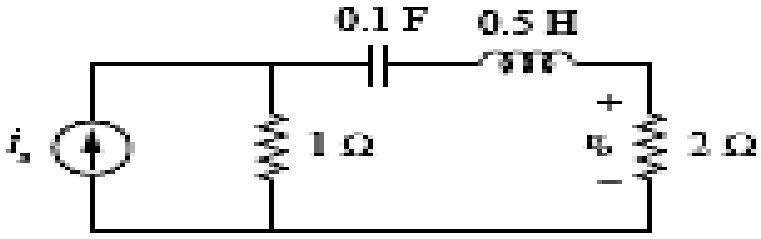


Figure

b) Define current locus. Explain the procedure to draw the current locus diagram for series RL circuit. 7 Marks

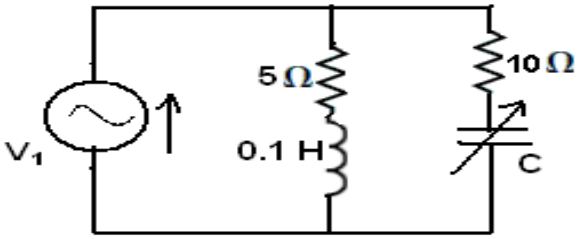
(OR)

4 a) For the circuit shown in Figure, If the voltage across 2 Ω resistor $V_0(t)$=-5 cos 2t, Compute the source current $\mathbf{i_s}$. 7 Marks



Figure

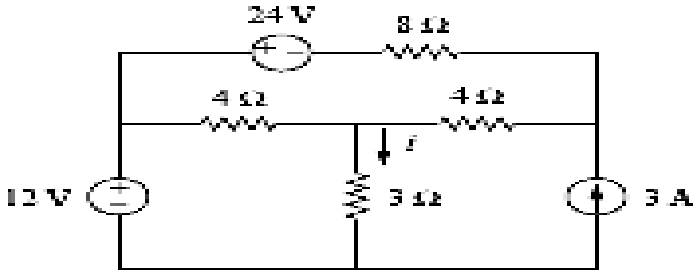
b) In a given network shown in Figure, obtain its resonance at 100 kHz. Determine capacitance value. If V_1 = 200 ∠30^0 V, compute current passing through inductor and capacitor. 7 Marks



Figure

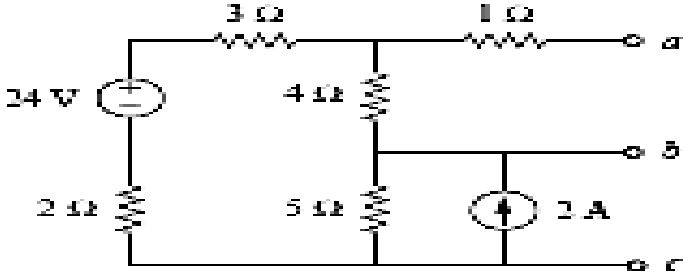
UNIT-III

5 a) For the circuit shown in Figure, use the superposition theorem to find **i.** 7 Marks



Figure

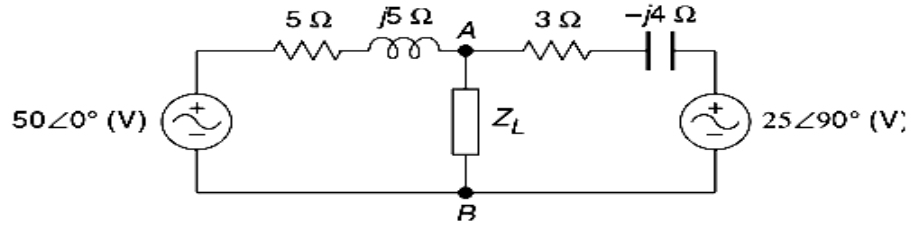
b) For the circuit shown in Figure, obtain the Thevenin's equivalent as seen from terminals. (i) a-b and (ii) b-c. 7 Marks



Figure

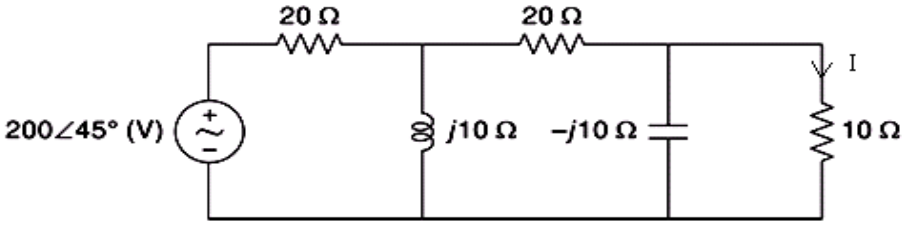
(OR)

6 a) For the circuit shown in Figure, compute the equivalent impedance for which Z_L will receive the maximum power. What is the maximum power delivered to load? 7 Marks



Figure

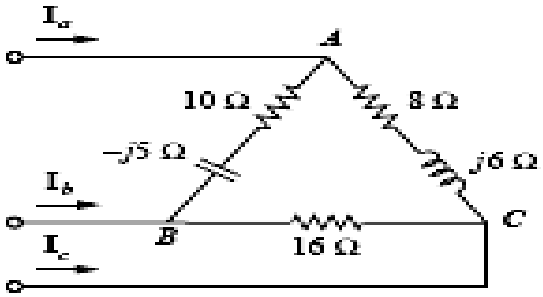
b) Verify the reciprocity theorem for the ladder network shown in Figure. 7 Marks



Figure

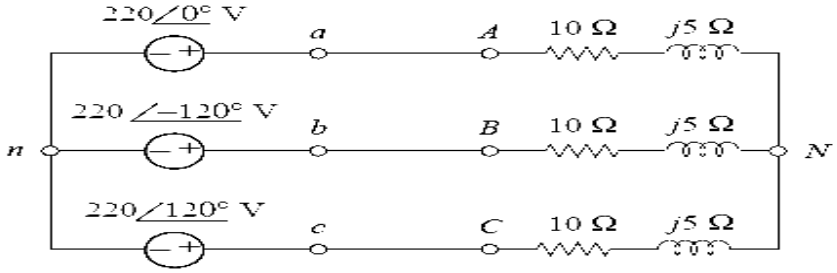
UNIT-IV

7 a) The unbalanced Δ - load shown in Figure is supplying by balanced line to line voltage of 240V in positive sequence. Find the line currents. Take V_{ab} as reference. 7 Marks



Figure

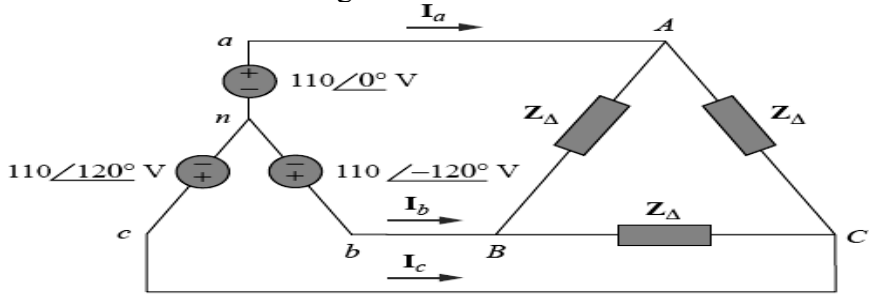
b) For the Y-Y circuit shown in Figure, find the line currents, the line voltages, and the load voltages. 7 Marks



Figure

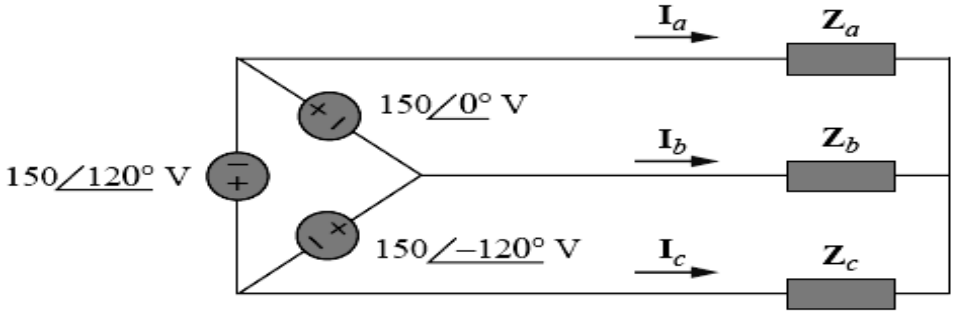
(OR)

8 a) Solve for the line currents in the Y connected source feeding Δ connected balanced circuit shown in Figure. Take $Z_\Delta = 60\angle 45^0$. 7 Marks



Figure

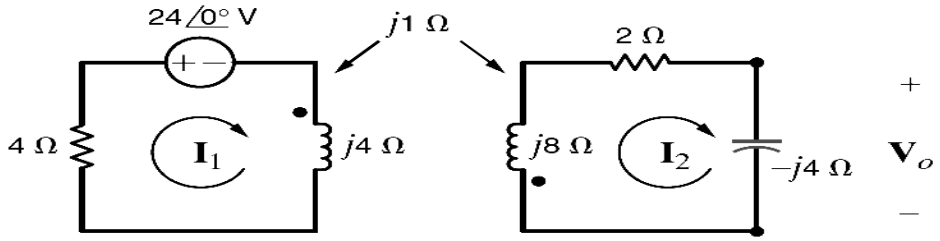
b) For the circuit in shown in Figure, $Z_a = 6 - j8\ \Omega$, $Z_b = 12 + j9\ \Omega$, and $Z_c = 15\ \Omega$. Find the line currents I_a , I_b, and I_c. Compute the active, reactive and apparent power delivered to load. 7 Marks



Figure

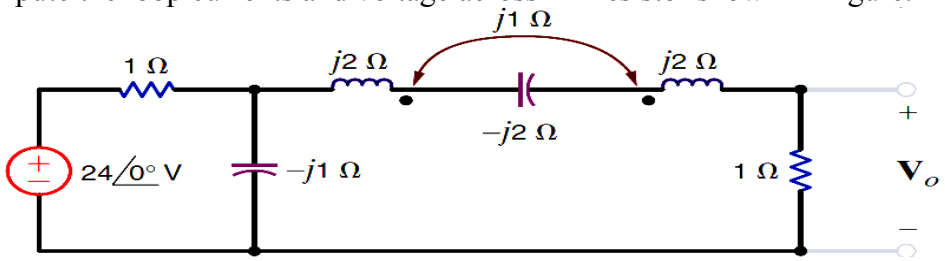
UNIT-V

9 a) Find the current I_1 and I_2 and the output V_0 in the network shown in Figure. 7 Marks



Figure

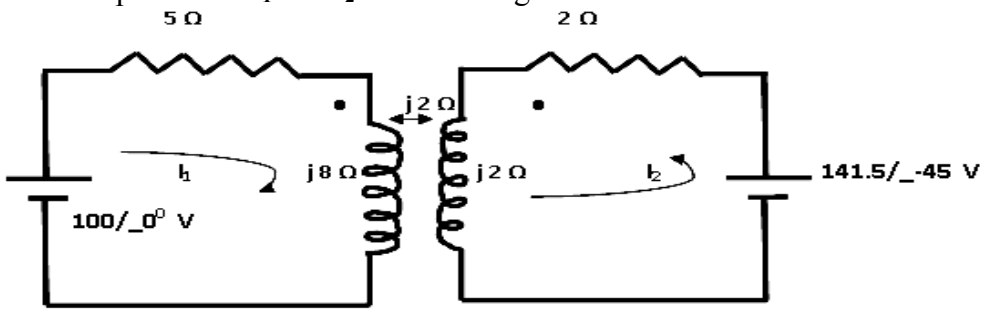
b) Compute the loop currents and voltage across 1Ω resistor shown in Figure. 7 Marks



Figure

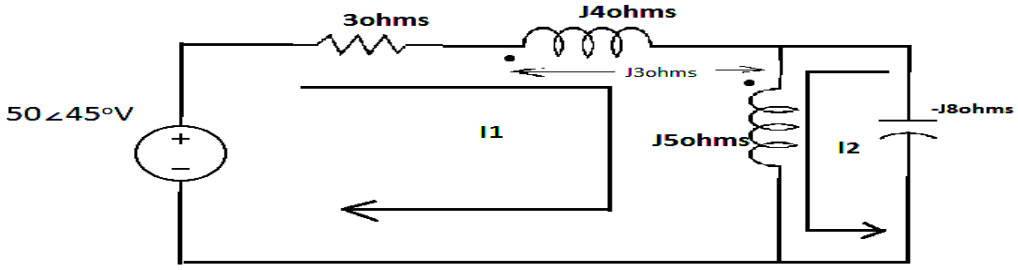
(OR)

10 a) Find the loop currents I_1 and I_2 shown in Figure. 7 Marks



Figure

b) In the circuit of Figure, find the voltage across the capacitance with the polarity shown. 7 Marks



Figure

PROGRAMMING IN C

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Write a menu driven program to compute electricity bill taking different categories of users for different slabs.	14 Marks
		(OR)	
2		Describe the logical not (logical negation) operator. What is its purpose. Within which precedence group is it included? How many operands does it require? What is it's associatively?	14 Marks

UNIT-II

3	a)	Write a program that illustrates the use of the precision feature with floating-point numbers.	8 Marks
	b)	Compare and contrast break and continue statements with relevant examples.	6 Marks
		(OR)	
4	a)	Design an algorithm to check a given integer is prime or not.	7 Marks
	b)	Explain in detail about do-while statement with suitable example.	7 Marks

UNIT-III

5	a)	What relationship must exist between the data type appearing at the beginning of the first line of the function definition and the value returned by the return statement?	7 Marks
	b)	What is the difference between single dimensional arrays and double dimensional arrays explain with examples.	7 Marks
		(OR)	
6	a)	How is a static variable defined in a single-file program? How is a static variable initialized? Compare with automatic variables.	7 Marks
	b)	Program for addition of two given matrices using functions to read, display and add the matrices.	7 Marks

UNIT-IV

7	a)	Develop a program to read two strings **str1** and **str2** and then find out whether the string **str2** is the substring of **str1**or not.	7 Marks
	b)	Develop a program to read two strings **str1** and **str2** from the user and then find whether the given two strings are equal or not without using **strength** library functions.	7 Marks
		(OR)	
8	a)	Develop a program to read a line of text and a string **str1** and then replace each occurrence of **str1** with its reverse string in the given line of text.	7 Marks
	b)	Develop a program to read a string and a character and then insert the character into a specified position of the given string.	7 Marks

UNIT-V

9	a)	Suppose a pointer variable points to a structure that contains another structure as a member. How can a member of the embedded structure be accessed?	7 Marks
	b)	Write a program to read student data consisting of Id.No, Name and marks in six subjects from the keyboard, write it to a file called INPUT, again read the same data from the file INPUT, and find the total and percentage marks of each student. Display the output in tabular form.	7 Marks

(OR)

10	a)	How can an entire structure be passed to a function? Describe fully, both for older and newer versions of C.	7 Marks
	b)	What are the three steps followed while accessing a file? Write a program to convert the case of alphabets in a text file. Upper case letters should be converted to lower case and vice versa.	7 Marks

ENGINEERING CHEMISTRY

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Explain the Ion-Exchange process for softening of water with the reactions involved and mention the advantages, disadvantages of this process.	14 Marks
		(OR)	
2	a)	Define hardness of water and give various units of hardness, interrelate various units with ppm.	7 Marks
	b)	Give reasoning for the following: i) Why does hard water consume lot of soap? ii) Calgon treatment prevents scale formation in boilers. Give reason.	7 Marks

UNIT-II

3		Define Engineering plastics. Discuss their general properties and applications	14 Marks
		(OR)	
4		Explain in brief about the types of composite materials and mention their applications.	14 Marks

UNIT-III

5		Design the synthesis of nanomaterials by Sol-Gel method with a neat sketch.	14 Marks
		(OR)	
6		Why the properties of nanomaterials differ significantly from bulk materials? Explain the properties of nanomaterials with examples.	14 Marks

UNIT-IV

7		Define EMF of an electrochemical cell. Discuss the construction and representation of electrochemical cell.	14 Marks
		(OR)	
8	a)	How does fuel cell differ from battery? Mention the advantages of fuel cells.	7 Marks
	b)	Write the classification of batteries with examples.	7 Marks

UNIT-V

9	a)	Explain the mechanism of thick film lubrication.	7 Marks
	b)	Discuss the importance of viscosity, aniline point and neutralization number.	7 Marks
		(OR)	
10	a)	Define lubricant. Mention the important functions of lubricant.	7 Marks
	b)	Write an explanatory note on any two solid lubricants.	7 Marks

I B.Tech I Semester (SVEC-16) Supplementary Examinations June – 2022

ENGINEERING PHYSICS

[Electrical and Electronics Engineering, Electronics and Communications Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Classify the optical fibers on the basis of refractive index profile and modes of propagation.	10 Marks
	b)	Mention the applications of optical fibers in various fields.	4 Marks
		(OR)	
2	a)	Draw the block diagram of an optical fiber communication system and explain the function of each block.	9 Marks
	b)	Mention various applications of optical fibers.	5 Marks

UNIT-II

3	a)	Discuss the de-Broglie hypothesis of duality of material particles.	6 Marks
	b)	Formulate time independent Schrodinger's wave equation for a free particle.	8 Marks
		(OR)	
4		Show that the energies of a particle in a infinite potential box are quantized.	14 Marks

UNIT-III

5	a)	Explain direct and indirect band gap semiconductors.	6 Marks
	b)	Write a short note on LED. Calculate the wavelength of radiation emitted by a LED made up of GaAs with band gap of 1.43 eV.	8 Marks
		(OR)	
6		Construct and explain the working mechanism of photo diode and solar cell.	14 Marks

UNIT-IV

7	a)	What is superconductivity? Explain the general properties of superconductors. A superconducting tin has a critical temperature of 3.7 K at zero magnetic field and a critical field of 0.0306 Tesla at 0K. Find the critical field at 2K.	10 Marks
	b)	List various applications of superconductivity.	4 Marks
		(OR)	
8	a)	Elaborate Meissner effect.	7 Marks
	b)	Explain Penetration depth and Flux quantization.	7 Marks

UNIT-V

9	a)	Define Nanomaterial. Explain any five properties of nanomaterials.	8 Marks
	b)	Describe the fabrication of nanomaterials by using ball milling method.	6 Marks
		(OR)	
10	a)	Describe any one method of fabrication of nanomaterials.	7 Marks
	b)	Write few applications of nanomaterials.	7 Marks

MATRICES AND NUMERICAL METHODS

[Civil Engineering, Mechanical Engineering, Electrical and Electronics Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Determine the non-singular matrices P and Q such that PAQ is in the normal form for A and hence find the rank of the matrix $A=\begin{bmatrix} 1 & 2 & 3 & -2 \\ 2 & -2 & 1 & 3 \\ 3 & 0 & 4 & 1 \end{bmatrix}$ 14 Marks

(OR)

2 a) Find the inverse of the matrix by elementary row operations $\begin{bmatrix} 1 & 1 & 3 \\ 1 & 3 & -3 \\ -2 & -4 & -4 \end{bmatrix}$ 7 Marks

b) Define the terms consistency and inconsistency. Determine whether the following system of equations are consistent. If so solve them. 7 Marks
$x + y + 2z = 9, x - 2y + 2z = 3, 2x - y + z = 3, 3x - 6 + z = 4.$

UNIT-II

3 a) Apply Bisection method to calculate the negative root for the equation $x^3 - 4x + 9 = 0$. 7 Marks

b) Design a recurrence formula for evaluating $\sqrt{N}$ by Newton Raphson's method and hence estimate $\sqrt{41}$ correct to four decimal places. 7 Marks

(OR)

4 a) Design a recurrence formula for the reciprocal of a natural number N byNewton-Raphson's method and hence find the reciprocal of 18. 7 Marks

b) Using method of false position, find an approximate root for the equation $x \log_{10} x = 1.2$ near to 2.5. 7 Marks

UNIT-III

5 a) Construct an interpolating polynomial for the following data using Newton's forward formula. 7 Marks

x	0	1	2	3	4
y	3	6	11	18	27

b) Estimate the value of $y(10)$ from the following data using Lagrange's interpolation formula . 7 Marks

x	5	6	9	11
y	12	13	14	16

(OR)

6 a) Define : 7 Marks

i) Shift operator.

ii) Forward difference operator and obtain the relation between them.

b) Estimate the value of y at $x = 1.5$ applying Newton's forward interpolation formula from the following data (0, 1), (1, 14), (2, 15), (3, 5) , (4, 6). 7 Marks

UNIT-IV

7 a) The Velocities of a Car (running of straight rod) at intervals of 2 minutes are given below 7 Marks

Time in minutes	0	2	4	6	8	10	12
Velocity in km/hr	0	22	30	27	18	7	10

Apply the Simpson's rule to find the distance covered by car in 12 minutes.

b) The following data gives corresponding values of pressure(p) and specific volume(v) of superheated system 7 Marks

v	2	4	6	8	10
p	10.5	42.7	25.3	16.7	13

Evaluate the rate of change of pressure with respect to volume when $\boldsymbol{v} = 2$.

(OR)

8 a) The population of a certain town (as obtained from census data) is shown in the following table 7 Marks

Year	1951	1961	1971	1981	1991
Population (in thousands)	19.96	39.65	58.81	77.21	94.61

Estimate the rate of growth of the population in the year 1981.

b) State Simpson's 1/3 rule and applying it evaluate $\int_0^{\frac{\pi}{2}} \sqrt{\sin\theta}\, d\theta$. 7 Marks

UNIT-V

9 a) Compute y at x = 0.25 by Euler's method given that $y' = 2xy, y(0) = 1$. Compare with exact solution. 7 Marks

b) Write Runge-Kutta formula of fourth order and estimate $y(0)$, given $y' = 3x + \frac{1}{2}y,\ y(0) = 1$ by using it, taking h = 0.1. 7 Marks

(OR)

10 a) Solve numerically $y' = y + e^x,\ y(0) = 0$ for $x = 0.2, 0.4$ by Modified Euler's method. 7 Marks

b) Apply the fourth order R-K method to find $y(0.1)$ and $y(0.2)$, given $y' = xy + + y^2,\ y(0) = 1$. 7 Marks

MULTI-VARIABLE CALCULUS AND DIFFERENTIAL EQUATIONS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Write the general form of a first order linear equation, its general solution and hence find the solution of $x\cos x\frac{dy}{dx}+(x\sin x+\cos x)y=1$. 7 Marks

b) Write the general form of first order linear equation in x and its general solution and hence solve the differential equation $(x+y+1)\frac{dy}{dx}=1$. 7 Marks

(OR)

2 a) Evaluate the equation of the curve satisfying the differential equation $(1+x^2)\frac{dy}{dx}+2xy=4x^2$ and passing through origin. 7 Marks

b) Find the solution of the differential equation $(1+y^2)\,dx=(\tan^{-1}y-x)\,dy$. 7 Marks

UNIT-II

3 a) Write the general form of an n^{th} order homogeneous linear equation with constant coefficients and hence solve equation $4y'''+4y''+y'=0$. 7 Marks

b) Solve the differential equation $y''+6y'+9y=0$, $y(0)=-4$ and $y'(0)=14$. 7 Marks

(OR)

4 a) By the technique of finding the particular integrals , find the general solution of the differential equation $(D^2+4D+13)y=2e^{-x}$ 7 Marks

b) Write the general form of a non-homogeneous differential equation of order n and establish a general solution for the differential equation $(D+2)(D-1)^2y=e^{-2x}+2\sinh x$. 7 Marks

UNIT-III

5 a) Evaluate $\lim_{\substack{x\to 1\\ y\to 2}}\frac{2x^2y}{x^2+y^2+1}$. 7 Marks

b) Define continuity of the function f(x, y) at a point (a, b) and analyze the function $f(x,y)=\begin{cases}\frac{2xy}{x^2+y^2}, & (x,y)\neq(0,0)\\ 0 & (x,y)=(0,0)\end{cases}$ for the continuity at origin. 7 Marks

(OR)

6 a) If $f(x,y)=\frac{x-y}{2x+y}$ then show that $\underset{x\to 0}{Lt}\ \underset{y\to 0}{Lt}\ f(x,y) \neq \underset{y\to 0}{Lt}\ \underset{x\to 0}{Lt}\ f(x,y)$. 5 Marks

b) Define continuity of the function f(x, y) and analyze the following function $f(x,y)=\begin{cases}\frac{x^2}{\sqrt{x^2+y^2}} & for\quad x\neq 0\ ,y\neq 0\end{cases}$ for its continuity at origin by appropriately defining the function at origin. 9 Marks

UNIT-IV

7 a) Prove that the length of the arc of the parabola $y^2 = 4ax$ cut off by its latus-rectum is $2a(\sqrt{2} + \log(1+\sqrt{2}))$. 7 Marks

b) Find the surface area generated by the revolution of an arc of the catenary $y = c\cosh\frac{x}{c}$ about the x – axis. 7 Marks

(OR)

8 a) Find the perimeter of the cardioid $r = a(1 - \cos\theta)$. 7 Marks

b) Change the order of integration and evaluate $\int_0^b \int_0^{\frac{a\sqrt{b^2-y^2}}{b}} xydxdy$. 7 Marks

UNIT-V

9 a) Define gradient of a scalar point function and show that $\nabla[f(r)] = \frac{f'(r)}{r}\bar{r}$ where $\bar{r} = x\bar{i} + y\bar{j} + z\bar{k}$. 6 Marks

b) Define directional derivative and find the directional derivative of $f = x^2 - y^2 + 2z^2$ at the point p = (1, 2, 3) in the direction of the line PQ, where Q= (5, 0, 4). 8 Marks

(OR)

10 a) Find the directional derivative of $xyz^2 + xz$ at (1,1,1) in a direction of the normal to the surface $3xy^2 + y = z$ at (0,1,1). 7 Marks

b) Find the angle between the normal to the surface $x^2 = yz$ at the points (1,1,1) and (2, 4, 1). 7 Marks

PROGRAMMING IN C

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe two different ways to utilize the increment and decrement operators. Explain with suitable examples.	7 Marks
	b)	Define unary operators. How many operands are associated with unary operators explain with examples?	7 Marks
		(OR)	
2		What is an operator? Describe the different types of operator that are included wit in the 'C' language with the example for each.	14 Marks

UNIT-II

3	a)	Compare and Contrast Pre-Test and Post-Test Loops with examples.	7 Marks
	b)	Write short notes on Break, Continue and Go to statements.	7 Marks
		(OR)	
4	a)	Illustrate Entry-Controlled and Exit-Controlled Loops.	7 Marks
	b)	Write a 'C' Program that prints Mathematical Table of a given number.	7 Marks

UNIT-III

5	a)	Describe briefly about various Storage Classes available in 'C'.	7 Marks
	b)	Write a 'C' Program to calculate GCD of given numbers using Recursion.	7 Marks
		(OR)	
6	a)	Differentiate Recursion with Iteration.	7 Marks
	b)	Write a 'C' Program that uses a Function to copy One String into another.	7 Marks

UNIT-IV

7	a)	Define String. Explain String input and output functions with syntax.	7 Marks
	b)	Write a 'C' Program to check whether the given string is Palindrome or not.	7 Marks
		(OR)	
8	a)	Compare array of Characters and Pointer to characters.	7 Marks
	b)	Explain how to pass a Pointer array to a function.	7 Marks

UNIT-V

9	a)	Explain the concept of Structures and Pointers with suitable examples.	7 Marks
	b)	Write a Program which will read students Name, Roll number and Marks in 3 Subjects. Calculate its sum and average and print them on output screen. (Note: Use Structure)	7 Marks
		(OR)	
10	a)	What is Self-Referential Structure? Explain.	7 Marks
	b)	Write a 'C' Program to determine the frequency of letters in a given string. (Note: Use Structure to represent words).	7 Marks

DIFFERENTIAL EQUATIONS AND MULTIVARAIBLE CALCULUS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Solve the differential equation $\frac{d^2y}{dx^2} + \frac{dy}{dx} + y = \left(1 - e^x\right)^2$.	6 Marks	L3	CO1	PO1 PO2
	b)	Solve the differential equation $\frac{d^2y}{dx^2} - 2\frac{dy}{dx} + y = xe^x \sin x$.	6 Marks	L3	CO1	PO1 PO2
		(OR)				
2.	a)	Using the method of variation of parameters, solve $y'' - 2y' + y = e^x \log x$.	6 Marks	L3	CO1	PO1 PO2
	b)	Change the differential equation $x^2\frac{d^2y}{dx^2} - x\frac{dy}{dx} + y = \log x$ in to linear equation with constant coefficients and find its general solution.	6 Marks	L2	CO1	PO1 PO2

UNIT-II

3.	a)	Construct the partial differential equation by eliminating arbitrary function f from the relation $f\left(x^2 + y^2, z - xy\right) = 0$.	6 Marks	L3	CO1	PO1
	b)	Find the complete solution of the partial differential equation $z^2\left(p^2 + q^2\right) = x^2 + y^2$.	6 Marks	L1	CO1	PO1 PO2
		(OR)				
4.	a)	Solve the partial differential equation $r - 4s + 4t = e^{2x+y}$.	6 Marks	L3	CO1	PO1 PO2
	b)	Applying the method of separation of variables to solve $\frac{\partial u}{\partial x} = 2\frac{\partial u}{\partial t} + u$.	6 Marks	L3	CO1	PO1 PO2

UNIT-III

5.	a)	Determine $\frac{du}{dx}$ *when* $u = x\log xy$ *and* $x^3 + y^3 + 3xy = 1$.	6 Marks	L3	CO2	PO1
	b)	Define Jacobian for two variables and find the Jacobian of the variables $u = \frac{x+y}{1-xy}$ *and* $v \tan^{-1}x + \tan^{-1}y$.	6 Marks	L1	CO2	PO1
		(OR)				
6.	a)	Divide the number 24 into three parts such that the continued product of the first, square of the second and cube of the third may be maximum.	6 Marks	L4	CO2	PO1 PO2
	b)	Using Lagrange's method of undetermined multipliers, calculate the maximum value of xyz *when* $x + y + z = a$.	6 Marks	L3	CO2	PO1 PO2

UNIT-IV

7.	a)	Evaluate $\iint_R xydxdy$ where R is the region by $x-axis,\ x=2a\ and\ x^2=4ay$.	6 Marks	L5	CO2	PO1 PO2
	b)	Apply change the order of integration and evaluate $\int_0^{\infty}\int_x^{\infty} \frac{e^{-y}}{y}\,dydx$.	6 Marks	L3	CO2	PO1 PO2
		(OR)				
8.	a)	Evaluate $\int_0^a \int_o^x \int_0^{x+y} e^{x+y+z}\,dzdydx.$	6 Marks	L5	CO2	PO1
	b)	By changing to polar coordinates, evaluate $\int_0^{\infty}\int_0^{\infty} e^{-\left(x^2+y^2\right)}dxdy.$	6 Marks	L3	CO2	PO1 PO2

UNIT-V

9.	a)	Determine directional derivative of the field $xy+yz+zx$ at the point $(1,1,1)$ in the direction of $\bar{i}+\bar{j}+\bar{k}$.	6 Marks	L3	CO3	PO1
	b)	Evaluate the line integral $\int_c \left(x^2+xy\right)dx+\left(x^2+y^2\right)dy$, where C is the square formed by the lines $y=\pm 1\ and\ x=\pm 1$.	6 Marks	L5	CO3	PO1 PO2
		(OR)				
10.		Verify Gauss divergence theorem for the field $\bar{F}\left(x^2-yz\right)\bar{i}+\left(y^2-zx\right)\bar{j}+\left(z^2-xy\right)\bar{k}$ taken over the rectangular parallelepiped $0\le x\le a,\ 0\le y\le b,\ 0\le z\le c.$	12 Marks	L5	CO3	PO1 PO2

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	List the conditions for sustained interference.	4 Marks	L1	CO1	PO1
	b)	Describe the construction and working of a Nicol Prism.	8 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Why do soap bubbles appear multicolored when viewed under sun light?	2 Marks	L1	CO1	PO1
	b)	Explain necessary theory of Fraunhoffer diffraction due to 'n' slits.	10 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Recall the principle behind the functioning of optical fiber. Explain the differences between the step index fiber and graded index fiber.	9 Marks	L2	CO2	PO1 PO2
	b)	Calculate the numerical aperture and acceptance angle for an optical fiber with core and cladding refractive indices being 1.48 and 1.45 respectively.	3 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Derive an expression for acceptance angle and numerical aperture of an optical fiber.	8 Marks	L3	CO2	PO1 PO2
	b)	List the applications of fiber optic sensors.	4 Marks	L1	CO2	PO2
		UNIT-III				
5.	a)	Define electrical conductivity and develop an equation for electrical conductivity of intrinsic semiconductors.	6 Marks	L3	CO3	PO1 PO2
	b)	Distinguish the direct and indirect band gap semiconductors.	6 Marks	L4	CO3	PO1
		(OR)				
6.	a)	Discuss the formation of extrinsic semiconductors.	5 Marks	L2	CO3	PO1
	b)	Develop an equation for density of charge carriers in p-type semiconductors.	7 Marks	L3	CO3	PO2
		UNIT-IV				
7.	a)	Summarize the frequency dependence of various types of polarizations with a neat graph.	6 Marks	L2	CO4	PO2
	b)	Define the terms: i) Dielectric material. ii) Dielectric constant. iii) Dielectric break down.	6 Marks	L1	CO4	PO1
		(OR)				
8.	a)	Define the terms magnetic field (H) and magnetic induction (B). Discuss on soft and hard magnetic materials.	7 Marks	L2	CO4	PO1
	b)	What is Bohr magnetron? How it related to magnetic moment of electron?	5 Marks	L1	CO4	PO1 PO2

UNIT-V

9.	a)	Is superconductors' exhibits diamagnetic nature? Justify. Outline applications of superconductors in various fields.	6 Marks	L2	CO5	PO1
	b)	Explain the BCS theory of superconductivity.	6 Marks	L2	CO5	PO1
		(OR)				
10.	a)	Describe any one method for synthesize nanomaterials.	6 Marks	L2	CO5	PO1
	b)	Discuss the various properties of nanomaterials.	6 Marks	L2	CO5	PO1

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Apply the Schrödinger wave equation to the electron present in the hydrogen atom.	8 Marks	L3	CO1	PO1
	b)	Outline the bonding and anti-bonding molecular orbitals.	4 Marks	L2	CO1	PO1
		(OR)				
2.		Write the main postulates of VSEPR Theory. How this theory explain the shapes of the molecules?	12 Marks	L 1	CO1	PO1 PO2
		UNIT-II				
3.		If a boiler is fed with water containing $MgCl_2$, $MgSO_4$, $CaSO_4$, Na_2CO_3, O_2, oil. Identify the various boiler troubles arise and explain how they can be avoided.	12 Marks	L3	CO2	PO1 PO2 PO6
		(OR)				
4.	a)	Discuss the impurities in water and their consequences.	7 Marks	L2	CO2	PO1 PO6
	b)	Calculate the temporary, permanent and total hardness of a water sample containing $Mg(HCO_3)_2$ = 73 mg/L, $Ca(HCO_3)_2$ = 162 mg/L, $MgCl_2$ = 95 mg/L, $CaSO_4$ = 136 mg/L.	5 Marks	L3	CO2	PO1 PO2
		UNIT-III				
5.	a)	Explain the factors influencing the electrode potential in terms of Nernst equation.	8 Marks	L2	CO3	PO1 PO2
	b)	Define primary cell. Discuss the construction and working principle of dry cell.	4 Marks	L1	CO3	PO1
		(OR)				
6.		Discuss the various factors affecting rate of corrosion.	12 Marks	L2	CO3	PO1
		UNIT-IV				
7.		Discuss the principle and working of a UV-Visible spectrometer with the help of a block diagram.	12 Marks	L2	CO4	PO1 PO5
		(OR)				
8.	a)	Explain different types of fundamental modes of vibrations.	6 Marks	L2	CO4	PO1
	b)	Write the principle and applications of Scanning Electron Microscope.	6 Marks	L1	CO4	PO1
		UNIT-V				
9.	a)	How fuels are classified? What are important characteristics of good fuel? Explain with suitable example.	6 Marks	L1	CO5	PO1
	b)	What do you understand with the knocking of a fuel? Report the ways to improve the anti-knocking characteristics of a fuel.	6 Marks	L1	CO5	PO1
		(OR)				
10.	a)	Explain the mechanism of lubrication appears in sewing machines and moving surfaces under very high pressure and speed.	8 Marks	L2	CO5	PO1 PO2
	b)	Define lubrication. Recall some major functions of lubricants.	4 Marks	L1	CO5	PO1 PO2

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the principle of single loop generator for producing sinusoidal voltage.	6 Marks	L2	CO1	PO2
	b)	A 4Ω resistor has a current $i=2.5\sin(500t)$mA. Find the voltage, power and energy over one cycle.	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	State Kirchhoff's laws and validate the law with a suitable example.	6 Marks	L1	CO1	PO1
	b)	Obtain the RMS and average values of a sinusoidal voltage of peak V_m and angular frequency ω rad/s.	6 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	With neat sketch, explain the operation of hydro power plant.	6 Marks	L1	CO2	PO1
	b)	Illustrate the significance of : i) Fuse. ii) Relay. iii) Most Economical power factor.	6 Marks	L1	CO2	PO1
		(OR)				
4.	a)	Elucidate the importance of Solar Power generation against the electric power generation through Hydel and Thermal.	6 Marks	L2	CO2	PO1
	b)	Exemplify the significance of power factor and enumerate the methods of improving it.	6 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	With neat sketch, demonstrate the working principle of single phase transformer.	6 Marks	L1	CO3	PO1
	b)	Explain the working principle of 3-phase induction motor and mention any one application of it.	6 Marks	L1	CO3	PO5
		(OR)				
6.	a)	Explain the constructional details of single phase capacitor start and run induction motor.	6 Marks	L1	CO3	PO1
	b)	Explain the constructional details of synchronous machine and mention any one application.	6 Marks	L1	CO3	PO5
		UNIT-IV				
7.		Explain the operation of a p-n junction diode in forward biased and reverse biased conditions. Draw its V-I characteristics.	12 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Distinguish between Half wave Rectifier and full wave rectifier.	6 Marks	L2	CO4	PO2
	b)	Explain the V-I characteristics of Zener diode and draw the waveforms.	6 Marks	L1	CO4	PO1

UNIT-V

9.	a)	Draw the block diagram of Op-amp and explain its operation in detail.	6 Marks	L1	CO5	PO1
	b)	In an inverting adder circuit, the input voltages are 0.3V, 0.5V and 0.1V while $R_1=R_2=R_3=1$ KΩ. If $R_f=10$ KΩ, calculate the output voltage.	6 Marks	L3	CO5	PO4
		(OR)				
10.	a)	Examine and derive an expression for V_0 of the differentiator circuit by using an Op-amp.	6 Marks	L2	CO5	PO2
	b)	In an integrator circuit, $R_iC_f=1$ Sec., and the input is a step voltage $V_{in}=2V$ for $0\leq t\leq 4$. Determine the output voltage and sketch it.	6 Marks	L3	CO5	PO4

I B.Tech I Semester (SVEC-19) Supplementary Examinations August – 2021

BASIC CIVIL AND MECHANICAL ENGINEERING

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

PART-A

UNIT-I

1.	a)	How civil engineering contributes to the development of society?	6 Marks	L2	CO1	PO1 PO6
	b)	What are requirements of good building bricks? State the important varieties of building bricks.	6 Marks	L2	CO1	PO1 PO8
		(OR)				
2.		The following staff reading were observed successively with a level the instrument having been moved after third and seventh readings 2.550, 1.600, 0.900, 3.000, 1.950, 1.500, 0.950, 0.750, 1.600, 1.300 the above readings in a page of a field. Calculate the RL of all the points by height of collimation method. The first reading was taken with a staff held on a bench mark of RL 80 m. Apply arithmetical check.	12 Marks	L4	CO1	PO1 PO2 PO5

UNIT-II

3.	a)	How will you apply the rain water harvesting system in residential building?	6 Marks	L4	CO1	PO1 PO7
	b)	Mention the types of bridges used for civil engineering construction.	6 Marks	L1	CO1	PO1
		(OR)				
4.	a)	Explain the types of foundation used in different sites with neat sketches of foundation.	6 Marks	L4	CO1	PO1 PO10
	b)	Illustrate the different types of brick masonry in civil engineering infrastructure with neat sketches.	6 Marks	L2	CO1	PO1 PO10

PART-B

UNIT-III

5.		Differentiate between single acting and double acting reciprocating pump.	12 Marks	L2	CO2	PO1
		(OR)				
6.		Describe the working principle of single acting reciprocating pump with neat sketch.	12 Marks	L2	CO2	PO1

UNIT-IV

7.	a)	Write the advantages and Disadvantages of chain drive over belt and rope drive.	6 Marks	L1	CO2	PO1
	b)	Compare cross belt drive and open belt drive on the basis of: i) Velocity ratio. ii) Direction of driven pulley. iii) Length of belt drives. iv) Application.	6 Marks	L2	CO2	PO1
		(OR)				

8.	a)	Write short notes on the following: i) Belt drive. ii) Chain drive. iii) Rope drive.	6 Marks	L1	CO2	PO1
	b)	The central distance two shaft is 4m having two pulleys with diameter having 500mm and 700mm respectively find the length of belt required – i) for open belt drive. ii) for cross belt drive.	6 Marks	L3	CO2	PO1 PO2

UNIT-V

9.	Give a comprehensive explanation of forging process. What are its limitations? Mention some of its applications.	12 Marks	L2	CO2	PO1
	(OR)				
10.	Compare and contrast between taper turning and thread cutting operations.	12 Marks	L2	CO2	PO1

CODE No.: 19BT10501 SVEC-19

PROGRAMMING FOR PROBLEM SOLVING

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Draw a flow chart to find sum of individual digits of a given number.	6 Marks	L3	CO1	PO2
	b)	Illustrate the concept of type casting in Python with examples.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	List and explain different types of literals.	6 Marks	L1	CO1	PO1
	b)	Explain about the top down design in proLem solving.	6 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Write a python script that will read an unspecified number of integers and will determine how many positive and negative values have been read. Your program ends when the input is 0.	6 Marks	L3	CO1	PO2
	b)	Display the following pattern using python script. 1 212 32123 4321234 543212345	6 Marks	L3	CO1	PO2
		(OR)				
4.	a)	List and explain selection statements used in python with examples.	6 Marks	L1	CO1	PO1
	b)	Write a python script to print GCD of two numbers.	6 Marks	L3	CO1	PO3
		UNIT-III				
5.	a)	Write a Python script that checks whether a given string is a palindrome or not. Ex: MADAM is a palindrome	6 Marks	L3	CO1	PO2
	b)	Write a python script to demonstrate following string methods : index(), find(), count(), split(), join().	6 Marks	L2	CO1	PO1
		(OR)				
6.	a)	Develop a python script to read employee details like eid, empname, branch, salary and sort records based on empname.	6 Marks	L3	CO1	PO3
	b)	List the applications of stacks and queues.	6 Marks	L2	CO1	PO1
		UNIT-IV				
7.	a)	Illustrate following file handling functions with an example program. i) open() ii) read() iii) readline() iv) readlines()	6 Marks	L2	CO2	PO1
	b)	Define scope and explain usage of global keyword.	6 Marks	L2	CO2	PO1
		(OR)				
8.	a)	Define function. Explain four different types of arguments used in functions.	6 Marks	L1	CO2	PO1
	b)	Explain functionality of the following functions. i) ones() ii) arrange() iii) logspace() iv) zeros()	6 Marks	L2	CO2	PO1

UNIT-V

9.	a)	Draw Histograms by considering continuous data.	6 Marks	L3	CO2	PO3
	b)	Write a python script to drop the missing data from the data frame.	6 Marks	L3	CO2	PO3
		(OR)				
10.	a)	Create a data frame. It contains students' subject wise marks. Add a new column name called total marks for the existing frame.	6 Marks	L3	CO2	PO3
	b)	Illustrate different techniques included in accessing data from data frame.	6 Marks	L3	CO2	PO2

CODE No.: 19BT1BS01 SVEC-19

DIFFERENTIAL EQUATIONS AND MULTIVARAIBLE CALCULUS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Solve the differential equation $(D^3 - 5D^2 + 8D - 4)y = e^{2x}$.	6 Marks	L3	CO1	PO1 PO2
	b)	Solve the differential equation $(D^3 - 7D^2 + 14D - 8)y = e^x Cos2x$	6 Marks	L3	CO1	PO1 PO2
		(OR)				
2.	a)	Apply the method of variation of parameters solve $(D^2 - 2D)y = e^x Sinx$.	6 Marks	L3	CO1	PO1 PO2
	b)	Change the differential equation $(x+1)^2 \frac{d^2y}{dx^2} - 3(x+1)\frac{dy}{dx} + 4y = x^2 + x + 1$ into linear equation with constant coefficients and find the general solution.	6 Marks	L2	CO1	PO1 PO2

UNIT-II

3.	a)	Construct the partial differential equation by eliminating the arbitrary function from $Z = f(x^2 + y^2) + x + y$.	6 Marks	L3	CO1	PO1 PO2
	b)	Find the complete solution of the partial differential equation $p^2 - q^2 = x - y$.	6 Marks	L1	CO1	PO1 PO2
		(OR)				
4.	a)	Solve the partial differential equation $r - 4s + 4t = e^{2x+y}$.	6 Marks	L3	CO1	PO1 PO2
	b)	Using method of separation of variables, solve $\frac{\partial u}{\partial x} = 4\frac{\partial u}{\partial y}$, *given that* $u(0,y) = 8e^{-3y}$.	6 Marks	L3	CO1	PO1 PO2

UNIT-III

5.	a)	Find $\frac{du}{dt}$; *if* $u = x^2y^3$, *where* $x = \log t$ *and* $y = e^t$.	6 Marks	L1	CO2	PO1
	b)	If $u = x^2 - y^2, v = 2xy$ where $x = r\cos\theta, y = r\,Sin\theta$, verify $\frac{\partial(u,v)}{\partial(r,\theta)} = 4r^3$ s.	6 Marks	L5	CO2	PO1 PO2
		(OR)				
6.	a)	Examine for maximum and minimum values of $Sinx + Siny + Sin(x+y)$.	6 Marks	L5	CO2	PO1 PO2
	b)	Calculate the minimum distance from the origin to the plane $x + 2y + 3z = 14$ using Lagrange's method of multipliers.	6 Marks	L3	CO2	PO1 PO2

UNIT-IV

7.	a)	Evaluate $\int\int xy\,dxdy$ over the positive quadrant of the circle $x^2 + y^2 = a^2$.	6 Marks	L5	CO2	PO1 PO2
	b)	Using change the order of integration evaluate $\int_0^a \int_{\frac{x^2}{a}}^{2a-x} xy^2\,dydx$.	6 Marks	L3	CO2	PO1 PO2
		(OR)				
8.	a)	Evaluate $\int_1^e \int_1^{\log y} \int_1^{e^x} (\log z)\,dzdxdy$.	6 Marks	L5	CO2	PO1
	b)	By changing into polar coordinates, Evaluate $\int_0^a \int_0^{\sqrt{a^2-y^2}} (x^2 + y^2)\,dxdy$.	6 Marks	L3	CO2	PO1 PO2

UNIT-V

9.	a)	Find the directional derivative of $f(x,y,z) = xy^3 + yz^3$ at the point (2,-1,1) in the direction of the vector $\vec{i} + 2\vec{j} + 2\vec{k}$.	6 Marks	L1	CO3	PO1
	b)	Compute the line integral $\int_C (y^2dx - x^2dy)$ about the triangle whose vertices are (1,0) (0,1) and (-1,0).	6 Marks	L3	CO3	PO1 PO2
		(OR)				
10.		Verify Stoke's theorem for $\vec{F} = (x^2 + y^2)\vec{i} - 2xy\vec{J}$ taken around the rectangle bounded by the lines $x = \pm a, y = 0, y = b$ ssw.	12 Marks	L5	CO3	PO1 PO2

ENGINEERING PHYSICS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Derive an expression for interference in thin films due to reflection.	8 Marks	L3	CO1	PO1 PO2
	b)	Distinguish between interference and diffraction.	4 Marks	L4	CO1	PO1
		(OR)				
2.	a)	Write a short note on Nicol's prism.	8 Marks	L1	CO1	PO1
	b)	Fraunhofer diffraction pattern is obtained with a slit of width 0.3mm and a light of wavelength, λ = 5860A^0. Calculate the angles at which the 1st dark band and the next bright band are formed.	4 Marks	L4	CO1	PO2
		UNIT-II				
3.	a)	Write Maxwell's equations in integral and differential forms. Explain their physical significance.	8 Marks	L3	CO2	PO2
	b)	Briefly explain about divergence of electric and magnetic fields.	4 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Explain various types of optical fibers.	8 Marks	L2	CO2	PO2
	b)	A step index fiber has a core of refractive index 1.5 and the numerical aperture of the fiber is 0.26. Calculate α_m and ϕ_m for the fiber if the medium surrounding the fiber is air.	4 Marks	L4	CO2	PO2
		UNIT-III				
5.	a)	Using the expression of electron concentration and hole concentration for an intrinsic semiconductor show that the intrinsic carrier density is independent of Fermi Level.	8 Marks	L3	CO3	PO1
	b)	Write short notes on Drift and Diffusion currents.	4 Marks	L1	CO3	PO1
		(OR)				
6.	a)	What is Hall effect? Derive the expression for Hall coefficient. Write its applications.	8 Marks	L3	CO3	PO1 PO2
	b)	What are direct and indirect band gap semiconductors?	4 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Derive an expression for internal field in dielectrics.	7 Marks	L2	CO4	PO1
	b)	Derive Clausius-Mosotti equation and write its physical significance.	5 Marks	L2	CO4	PO1 PO2
		(OR)				
8.	a)	Define the terms magnetic dipole moment and magnetization.	4 Marks	L2	CO4	PO1
	b)	Distinguish between dia, para and ferro magnetic materials.	8 Marks	L2	CO4	PO1
		UNIT-V				
9.	a)	What is superconductivity? Explain various types of superconductors.	8 Marks	L4	CO5	PO1
	b)	State and explain Meissner effect.	4 Marks	L1	CO5	PO1
		(OR)				
10.	a)	Explain how nano materials are prepared using PLD method.	7 Marks	L1	CO5	PO1
	b)	List the applications of nano materials.	5 Marks	L1	CO5	PO1

ENGINEERING CHEMISTRY

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Apply the Schrodinger wave equation to particle in a box.	12 Marks	L3	CO1	PO1 PO2
		(OR)				
2.	a)	How does the molecular orbital theory help to explain the paramagnetic character of oxygen and diamagnetic character of nitrogen?	8 Marks	L2	CO1	PO1 PO2
	b)	What do you understand by the term bonding and antibonding orbitals?	4 Marks	L2	CO1	PO1 PO2

UNIT-II

3.	a)	Define carbonate and non-carbonate hardness of water. Write the disadvantages of hard water.	6 Marks	L1	CO2	PO1 PO2
	b)	50ml of standard hard water containing 1mg of $CaCO_3$ per ml consumed 20ml of EDTA. 50ml of a water sample consumed 25ml of same EDTA solution, using eriochrome black-T indicator. Calculate the total hardness of water sample in p.p.m.	6 Marks	L3	CO2	PO1 PO2
		(OR)				
4.	a)	Write note on boiler corrosion and caustic-embrittlement.	6 Marks	L1	CO2	PO1 PO2
	b)	Give the specifications of potable water according to WHO guidelines.	6 Marks	L2	CO2	PO1 PO2

UNIT-III

5.	a)	What are the reference electrodes? Explain the construction and working of calomel electrode.	6 Marks	L1	CO3	PO1 PO2
	b)	Explain the working principle of H_2-O_2 fuel cell with reactions.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Discuss the various factors influencing the rate of corrosion.	6 Marks	L2	CO3	PO1
	b)	Explain how the corrosion can be minimized by cathodic protection.	6 Marks	L2	CO3	PO1

UNIT-IV

7.	a)	Discuss the instrumentation of UV-VIS Spectrometer with neat diagram.	8 Marks	L2	CO4	PO1 PO5
	b)	Explain bathochromic and hypsochromic shifts with suitable examples.	4 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Describe the various molecular vibrations in the IR Spectroscopy.	6 Marks	L2	CO4	PO1
	b)	Write the principle and applications of transmission electron microscope.	6 Marks	L1	CO4	PO1

UNIT-V

9.	a)	Define calorific value of a fuel. Distinguish between gross and net calorific values of a fuel.	4 Marks	L1	CO5	PO1
	b)	What is meant by cracking of petroleum? Write the advantages of catalytic cracking over thermal cracking.	8 Marks	L2	CO5	PO1
		(OR)				
10.	a)	Explain mechanism of fluid and boundary lubrication.	8 Marks	L2	CO5	PO1 PO2
	b)	Write the chief functions of lubricants.	4 Marks	L1	CO5	PO1 PO2

CODE No.: 19BT1HS01 SVEC-19

COMMUNICATIVE ENGLISH

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		"Non-verbal communication plays vital role in effectiveness of interaction." Justify the given statement.	12 Marks	L4	CO1	PO2, PO1, PO10
		(OR)				
2.	a)	Define and explain the various modes of effective communication.	6 Marks	L2	CO1	PO1, PO10
	b)	"Understanding different types of communication styles are vital for business communication". Evaluate this statement with suitable examples.	6 Marks	L2	CO1	PO1, PO10
		UNIT-II				
3.		"Barrier to effective listening is present at every factor of the listening process". Justify the following statement from your viewpoint.	12 Marks	L4	CO1	PO2, PO1, PO10
		(OR)				
4.	a)	"For successful implementation of instructions or briefs note-taking if an effective tool". Discuss the above statement in the context of listening for specifics.	6 Marks	L4	CO1	PO1, PO10
	b)	Write about the various types of listening. Give suitable examples.	6 Marks	L4	CO1	PO1, PO10
		UNIT-III				
5.		"Confidence, clarity and fluency pay a significant role in speeches and presentations." Justify the given statement with suitable tips to enhance.	12 Marks	L4	CO1	PO1, PO10
		(OR)				
6.	a)	Significance of planning, preparation and procedure for effective presentation in seminars, conferences etc.	6 Marks	L2	CO1	PO1, PO10
	b)	Write about the paralinguistic features of speaking.	6 Marks	L2	CO1	PO1, PO10
		UNIT-IV				
7.		Discuss briefly the SQ3R technique for constructive reading.	12 Marks	L2	CO1	PO5, PO1, PO2, PO10
		(OR)				

8.	a)	Discuss at length with suitable examples the important techniques for good comprehension of any type of reading	6 Marks	L2	CO1	PO1, PO10
	b)	**Identify the topic sentence and the key words in the topic sentence that the other sentences support in the paragraph given below.** Exercise is really good for one's physical and mental health. It is proven that aerobic exercise is good for the heart, which is very important to overall health. I used to run every day, but now I go to dance classes to get my aerobic exercise**.** Strength training is important for maintaining muscle mass and improving bone density. Both muscle mass and bone density can decrease as we age, so improving them through strength training is important. My grandmother broke a hip last year because her bones were so fragile. All kinds of exercise have been shown to relieve depression, anxiety, and stress.	6 Marks	L2	CO1	PO1, PO10

UNIT-V

9.		"Using the right words in the right context is one of the essential elements of effective writing". Illustrate.	12 Marks	L4	CO1	PO2, PO1, PO10

(OR)

10.	a)	Present your understanding of the various steps to compose a good essay.	6 Marks	L2	CO1	PO1, PO10
	b)	Define and explain precise writing and its uses with suitable examples.	6 Marks	L2	CO1	PO1, PO10

BASIC ELECTRICAL AND ELECTRONICS ENGINEERING

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	For the given circuit: i) Find the equivalent resistance across the supply. ii) If the voltage drop across 5Ω is 100V, find the supply voltage. iii) Find the power consumed by each resistor. 	6 Marks	L3	CO1	PO3
	b)	A coil having a resistance of 7 and an inductance of 31.8mH is connected to 230V, 50Hz supply. Calculate the: i) circuit current. ii) phase angle. iii) power factor. iv) power consumed. v) reactive power. vi) apparent power.	6 Marks	L3	CO1	PO2

(OR)

2.	a)	A voltage $v = 200 \sin \pi t$ is applied to a load having 200Ω in series with 638mH inductor. Estimate power consumed by the load and reactive power of load.	6 Marks	L3	CO1	PO2
	b)	Find the equivalent resistance across the terminals X and Y. 	6 Marks	L3	CO1	PO3

UNIT-II

3.	a)	Discuss in detail to improve the power factor of a given power system.	6 Marks	L2	CO2	PO1
	b)	Explain the block diagram of inverter with details.	6 Marks	L1	CO2	PO1

(OR)

4.	a)	List out the difference between MCB and MCCB.	6 Marks	L2	CO2	PO2
	b)	What is the importance of earthing and explain different types of earthing?	6 Marks	L2	CO2	PO4

UNIT-III

5.	a)	Explain about torque-slip characteristics in 3-Ø Induction motor.	6 Marks	L2	CO3	PO2
	b)	The primary of a 50Hz, step-down transformer has 480 turns and is fed from 6400V supply. Find: i) the peak value of the flux produced in the core. ii) the voltage across the secondary winding if it has 20 turns.	6 Marks	L3	CO3	PO3
		(OR)				
6.	a)	Explain the construction and working of synchronous machine.	6 Marks	L2	CO3	PO2
	b)	A 50Hz, 4-pole induction motor has an induced **emf** in the rotor with a frequency of 2 Hz. Calculate: i) synchronous speed. ii) slip. iii) speed of the motor.	6 Marks	L3	CO3	PO3

UNIT-IV

7.	a)	Draw and explain full-wave rectifier with relevant waveforms.	6 Marks	L2	CO4	PO1
	b)	Draw the circuit diagram for finding the CB characteristics of a Transistor.	6 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Compare and contrast Zener breakdown and Avalanche breakdown.	6 Marks	L2	CO4	PO4
	b)	A transistor has $I_B = 100\mu A$ and $I_C = 2\mu A$. Find: i) β of the transistor. ii) α of the transistor. iii) Emitter current I_E.	6 Marks	L3	CO4	PO3

UNIT-V

9.	a)	Explain the basic internal block diagram of a typical operational amplifier.	6 Marks	L1	CO5	PO1
	b)	Design a practical integrator circuit with a DC gain of 20 to integrate a square wave of 25kHz.	6 Marks	L3	CO5	PO3
		(OR)				
10.	a)	What are the two closed loop configurations of an Op-Amp? Obtain the gains in both the cases.	6 Marks	L2	CO5	PO1
	b)	An Op-Amp has a slew rate of 2V/μs. What is the maximum frequency of an output sinusoid of peak value 5V at which the distortion sets in due to the slew rate limitation?	6 Marks	L3	CO5	PO4

BASIC CIVIL AND MECHANICAL ENGINEERING

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

PART-A

UNIT-I

1.		Discuss the classifications of surveying based on: i) Instruments used. ii) Objectives of survey. iii) Methods employed.	12 Marks	L3	CO1	PO1 PO8
		(OR)				
2.	a)	Discuss how a civil engineer contributes to welfare of society.	4 Marks	L2	CO1	PO1 PO5
	b)	Define composite materials. List out various applications, advantages and limitations of composites.	8 Marks	L1	CO1	PO1

UNIT-II

3.	a)	What is foundation? State the requirements of good foundations.	6 Marks	L1	CO2	PO1
	b)	Briefly describe various types of stairs.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Describe with the help of a neat sketch, the method of taking a house connection for water supply.	6 Marks	L4	CO2	PO1 PO8
	b)	Compare merits and demerits of flat and pitched roofs.	6 Marks	L2	CO2	PO1

PART-B

UNIT-III

5.		Discuss the working principle of single acting reciprocating pump with the help of neat sketch.	12 Marks	L2	CO3	PO1 PO5
		(OR)				
6.	a)	List out major parts of an IC engine. Explain any four of them in detail.	8 Marks	L1	CO3	PO1
	b)	Compare merits and demerits of SI engines and CI engines.	4 Marks	L2	CO3	PO1

UNIT-IV

7.	a)	Explain initial tension.	4 Marks	L2	CO3	PO1
	b)	Write the advantages and disadvantages of rope drives.	8 Marks	L2	CO3	PO1
		(OR)				
8.	a)	Write the expression for the power transmitted by the belts.	4 Marks	L2	CO3	PO1
	b)	Name different types of belt drives. Explain any two belt drives with neat sketches.	8 Marks	L4	CO3	PO1 PO8

UNIT-V

9.	a)	Define welding. Explain the working principle and operation of Arc welding.	8 Marks	L2	CO4	PO1
	b)	Explain how forging improves the mechanical properties of components with neat sketch.	4 Marks	L4	CO4	PO1 PO8
		(OR)				
10.	a)	Define Casting and discuss the merits and demerits of casting process over other manufacturing methods.	8 Marks	L2	CO4	PO1
	b)	List out various operations that can be carried out on Lathe.	4 Marks	L1	CO4	PO1 PO8

PROGRAMMING FOR PROBLEM SOLVING

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Define algorithm and explain the building blocks of flow charts.	6 Marks	L1	CO1	PO1
	b)	What are fundamental data types in Python? Explain different operators with the help of a Python script.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Briefly explain about efficiency of algorithms.	6 Marks	L1	CO1	PO1
	b)	What is meant by type conversion? Explain different type conversions with help of a Python script.	6 Marks	L1	CO1	PO2
		UNIT-II				
3.	a)	Write a Python program for generating biggest of three numbers.	6 Marks	L2	CO1	PO2
	b)	Differentiate break and continue statements with suitable examples.	6 Marks	L1	CO1	PO1
		(OR)				
4.	a)	Write a Python script to reverse the given number.	6 Marks	L2	CO1	PO2
	b)	Write a Python script to display the sum of first ‘n’ natural numbers.	6 Marks	L2	CO1	PO2
		UNIT-III				
5.	a)	Define List and explain different operations that we can perform on List with the help of a program.	6 Marks	L1	CO1	PO1
	b)	Write a Python program to implement Queue.	6 Marks	L1	CO1	PO2
		(OR)				
6.	a)	Define Dictionary and write a Python script to illustrate Dictionary operations.	6 Marks	L2	CO1	PO2
	b)	Write the applications of Stacks and Queues.	6 Marks	L1	CO1	PO1
		UNIT-IV				
7.	a)	Write a Python program to implement basic arithmetic operations using functions.	6 Marks	L2	CO2	PO2
	b)	Write a Python script to read a file and display the total number of words present in that file.	6 Marks	L2	CO2	PO3
		(OR)				
8.	a)	Develop a Python program to find the maximum and minimum numbers present in a List using recursive function.	6 Marks	L2	CO2	PO2
	b)	Demonstrate the basic file operations with the help of a Python script.	6 Marks	L1	CO2	PO2
		UNIT-V				
9.	a)	Write a Python program to display bar plot and histogram for student details like age, weight and height.	6 Marks	L2	CO2	PO3
	b)	Explain insertion and deletion of selected rows and columns from a data frame with the help of an example.	6 Marks	L3	CO2	PO3
		(OR)				
10.	a)	Illustrate the use of loc( ) and iloc( ) with an example program.	6 Marks	L2	CO2	PO1
	b)	Load data from **csv** file to data frame and print head( ) and tail( ) of a data frame.	6 Marks	L3	CO2	PO2

I B.Tech I Semester (SVEC-19) Supplementary Examinations January - 2022

DIFFERENTIAL EQUATIONS AND MULTIVARAIBLE CALCULUS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Obtain the solution of linear differential equation of second order non homogeneous equation $\frac{d^2y}{dx^2} + \frac{dy}{dx} = x^2 + 2x + 4$.	6 Marks	L3	CO1	PO1 PO2
	b)	1. Find the general solution of the differential equation $\frac{d^2y}{dx^2} - 2\frac{dy}{dx} + 4y = e^x \cos x$.	6 Marks	L3	CO1	PO1 PO2
		(OR)				
2.	a)	2. Convert the given differential equation into linear differential equation with constant coefficients by using suitable substitution $x^2\frac{d^2y}{dx^2} - x\frac{dy}{dx} + y = \log x$.	6 Marks	L3	CO1	PO1 PO2
	b)	3. Solve by method of variation of parameters $\frac{d^2y}{dx^2} + y = \tan x$.	6 Marks	L3	CO1	PO1 PO2

UNIT-II

3.	a)	Form the partial differential equation of the following by eliminating the arbitrary functions from $z = f(x+ct) + g(x-ct)$.	6 Marks	L2	CO1	PO1 PO2
	b)	Apply Lagrange's method, solve the linear partial differential equation $x(y-z)p + y(z-x)q = z(x-y)$.	6 Marks	L3	CO1	PO1 PO2
		(OR)				
4.	a)	1. Obtain the solution of partial differential equation r-5s+6t = e^{4x+y}. Here r, s and t are usual notations.	6 Marks	L2	CO1	PO1
	b)	Using the method of separation of variables, solve $\frac{\partial u}{\partial x} = 5\frac{\partial u}{\partial y} + u$, *where* $u(x,0) = 6e^{-12x}$.	6 Marks	L3	CO1	PO1

UNIT-III

5.	a)	If u= sin (x^2+y^2), where $a^2x^2+b^2y^2=c^2$, find du/dx.	6 Marks	L1	CO2	PO1
	b)	Determine whether the following functions are functionally dependent or not. If functionally dependent find the relationship between them $u = \frac{x^2-y^2}{x^2+y^2}$, $v = \frac{2xy}{x^2+y^2}$.	6 Marks	L3	CO2	PO1
		(OR)				
6.	a)	Divide 24 into three parts such that the continued product of the first, square of second and cube of third is maximum.	6 Marks	L2	CO2	PO1

	b)	X) Find a point on the plane 3x+2y+z-12=0, which is nearest to the origin.	6 Marks	L3	CO2	PO1

UNIT-IV

7.	a)	b) Evaluate $\iint xy(x+y)dxdy$ over the region R bounded by $y = x^2$ and $y=x$.	6 Marks	L3	CO2	PO1
	b)	Evaluate $\int_0^a \int_0^{\sqrt{a^2-y^2}} \left(x^2+y^2\right) dydx$ by changing to polar coordinates.	6 Marks	L3	CO2	PO1

(OR)

8.	a)	Evaluate $\iiint_V dx\,dy\,dz$ where V is the finte region of space formed by the planes $x = 0, y = 0, z = 0$ and $2x + 3y + 4z = 12$.	6 Marks	L3	CO2	PO1 PO2
	b)	Convert the integral to polar coordinates, evaluate $\int_0^\infty \int_0^\infty e^{-(x^2+y^2)}\,dy\,dx$.	6 Marks	L3	CO2	PO1 PO2

UNIT-V

9.	a)	Find the directional derivative of $f(x,y,z) = xy^2 + yz^3$ at the point (2,-1,1) in the direction of vector I+2J+2K.	6 Marks	L2	CO3	PO1
	b)	Evaluate the line integral $\int_C \left[\left(x^2+xy\right)dx + \left(x^2+y^2\right)dy\right]$ where C is the square formed by the lines $y = \pm 1$ and $x = \pm 1$.	6 Marks	L3	CO3	PO1 PO2

(OR)

10.	a)	2. Apply Green's theorem to evaluate $\int_C (2x^2 - y^2)dx + (x^2+y^2)dy$ where C is the boundary of the area enclosed by x-axis and upper half of the circle $x^2 + y^2 = 4$.	6 Marks	L2	CO3	PO1 PO2
	b)	Using Stoke's theorem evaluate $\int_C [(x+y)dx + (2x-z)dy + (y+z)dz]$ where C is the boundary of the triangle with vertices $(2,0,0), (0,3,0)$ and $(0,0,6)$.	6 Marks	L2	CO3	PO1 PO2

I B.Tech I Semester (SVEC-19) Supplementary Examinations January – 2022

ENGINEERING PHYSICS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Obtain the conditions for constructive and destructive interference for a thin film of uniform thickness due to reflected light.	8 Marks	L2	CO1	PO1
	b)	Calculate the thickness of air film at 10^{th} dark ring in Newton's rings system viewed normally by a reflected light of wavelength 500 nm. The diameter of the 10^{th} dark ring is 2mm.	4 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Explain the principle, construction and working of Nicol prism with a neat diagram. Explain Nicol prism as analyser.	9 Marks	L2	CO1	PO1
	b)	A plane polarised light is incident on a quartz plate that is cut parallel to the axis. The minimum thickness of the plate for which the o- and e- ray recombine to form a plane polarised light is found to be 2.55×10^{-3} cm. If μ_o=1.54, calculate the value of μ_e, assuming that $\lambda=5 \times 10^{-5}$ cm.	3 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Demonstrate, with a schematic diagram the refractive index dependence on radial distance for a graded index optical fiber and list any three industrial applications of optical fiber.	9 Marks	L2	CO2	PO1, PO2
	b)	A silica optical fiber has a core refractive index of 1.50 and a cladding refractive index 1.47. Compute the critical angle at core-cladding interface, numerical aperture of the fiber and acceptance angle.	3 Marks	L3	CO2	PO2
		(OR)				
4.	a)	List the four Maxwell's equations and enumerate their physical significance.	8 Marks	L2	CO2	PO1
	b)	Discuss scalar and vector fields.	4 Marks	L1	CO2	PO2

UNIT-III

5.	a)	State Hall Effect. Obtain an expression for Hall coefficient for an extrinsic semiconductor.	8 Marks	L2	CO3	PO2
	b)	A copper strip 2 cm wide 1 mm thick is placed in a magnetic field with B = 1.5 wb/m^2. If a current of 200 A is set up within the strip, calculate Hall voltage that appears across the strip. Assume $R_H = 6 \times 10^{-7} m^3/C$.	4 Marks	L3	CO3	PO2
		(OR)				
6.	a)	Write any six differences between intrinsic and extrinsic semiconductors.	6 Marks	L1	CO3	PO1
	b)	Draw the energy band diagrams of conductors, semiconductors and insulators.	6 Marks	L2	CO3	PO1, PO2

UNIT-IV

7.	a)	Sketch B *Vs* H curve for a ferromagnetic material and explain its nature by indicating the points on the curve.	8 Marks	L2	CO4	PO1
	b)	The magnetization with in a bar of some metal alloy is 1.2 x 106 A/m at an H field of 200 A/m. Compute the following. (i) The magnetic susceptibility. (ii) Magnetic permeability. (iii) Magnetic flux density within the material. (iv) What type of magnetism would the material exhibit.	4 Marks	L3	CO4	PO1, PO2
		(OR)				
8.	a)	Discuss in detail on various types of polarizations by which a dielectric material can polarized.	8 Marks	L2	CO4	PO1
	b)	Explain piezoelectricity.	4 Marks	L1	CO4	PO2

UNIT-V

9.	a)	State and explain Meissner effect. Show that a superconductor in its superconducting state acts as a perfect diamagnet.	8 Marks	L2	CO5	PO1
	b)	If T_c is the critical temperature of a super conductor in absence of magnetic field then calculate the temperature at which the critical field $H_c = H_0/2$.	4 Marks	L3	CO5	PO1 PO2
		(OR)				
10.	a)	Explain different properties of naomaterials.	8 Marks	L2	CO5	PO1
	b)	List the applications of nanomaterials.	4 Marks	L1	CO5	PO1 PO2

ENGINEERING CHEMISTRY

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

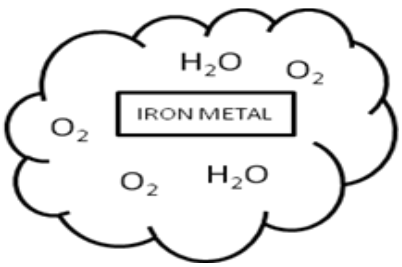
1.	a)	Discuss the postulates of VSEPR theory.	6 Marks	L2	CO1	PO1 PO2
	b)	Explain how VSEPR theory helpful to predicting the shapes of the molecules.	6 Marks	L2	CO1	PO1 PO2
		(OR)				
2.	a)	Explain Molecular Orbital Theory.	6 Marks	L2	CO1	PO1 PO2
	b)	Discuss the bonding in hetero nuclear diatomic molecule NO.	6 Marks	L2	CO1	PO1 PO2

UNIT-II

3.		Define desalination Process. Describe various methods available for desalination and compare them critically.	12 Marks	L2	CO2	PO1 PO6
		(OR)				
4.	a)	Three samples of water are collected from Chittor, Nellore and Kurnool. 100 mL of the water sample collected at Chittor requires 28 mL of 0.01 M EDTA solution on titration. 100 mL of the water sample collected at Nellore required 32 ml of 0.01 M EDTA solution on titration. 100 mL of the water sample collected at Kurnool requires 16 mL of 0.01 M EDTA solution on titration. Discuss the result and suggest the sample which can be directly used for drinking. (WHO standard: Hardness < 200 ppm of CaCO3).	8 Marks	L3	CO2	PO1 PO2
	b)	Discuss Various types of impurities associated with water.	4 Marks	L2	CO2	PO1 PO2

UNIT-III

5.	a)	Identify the type of battery commonly used in each of these consumer electronic products. Discuss the chemistry. i) Smart Phone. ii) Mp3 Player.	6 Marks	L3	CO3	PO1 PO2
	b)	Identify and explain in detail mechanism of the possible type of corrosion that Iron metal will undergo in the pictured environment.	6 Marks	L3	CO3	PO1 PO2



(OR)

6.	a)	Discuss the chemistry, construction and future applications of H_2-O_2 Fuel cell used in earlier space missions.	9 Marks	L2	CO3	PO1 PO2
	b)	Explain how corrosion can be considered as extractive metallurgy in reverse.	3 Marks	L2	CO3	PO1 PO2

UNIT-IV

7.		Discuss the principle and working of Infrared Spectrophotometer with neat diagram.	12 Marks	L2	CO4	PO1 PO5

(OR)

8.		Discuss various applications of UV-Visible and Infrared Spectroscopy.	12 Marks	L2	CO4	PO1 PO5

UNIT-V

9.		What is Synthetic Petrol? Discuss any one method for manufacturing of synthetic petrol.	12 Marks	L2	CO5	PO1, PO2

(OR)

10.	a)	Discuss the classification of Lubricants.	4 Marks	L2	CO5	PO1 PO2
	b)	Discuss any four properties of Lubricants.	8 Marks	L2	CO5	PO1 PO2

CODE No.: 19BT10201 SVEC-19

BASIC ELECTRICAL AND ELECTRONICS ENGINEERING
[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Calculate the equivalent capacitance if three capacitors of capacitances 2, 4, and 8 micro − Farads are connected in (i) Series (ii) Parallel.	6 Marks	L3	CO1	PO2
	b)	A current of (120-j50)A flows through a circuit when the applied voltage is (8+j12)V. Determine: i) Power factor. ii) Power consumed and reactive power.	6 Marks	L3	CO1	PO3
		(OR)				
2.	a)	Calculate the current through 20Ω resistor. 	6 Marks	L3	CO1	PO3
	b)	A voltage of $v = 141 \sin\{314t + \frac{\pi}{3}\}$ is applied to a resistor of 20Ω. Find the rms value of current and power dissipated.	6 Marks	L3	CO1	PO3

UNIT-II

3.	a)	Explain the operation of thermal power plant with basic layout.	6 Marks	L2	CO2	PO1
	b)	Explain the block diagram of UPS with details.	6 Marks	L1	CO2	PO1
		(OR)				
4.	a)	Explain in detail about RCCB and ELCB.	6 Marks	L2	CO2	PO1
	b)	Discuss in detail the electricity generated from solar panel with neat block diagram.	6 Marks	L2	CO2	PO2

UNIT-III

5.	a)	Explain the principle operation of 3-Ø Induction motor.	6 Marks	L2	CO3	PO1
	b)	Derive the e.m.f equation of a transformer.	6 Marks	L2	CO3	PO2
		(OR)				
6.	a)	Explain the construction and working of resistance start induction run motor.	6 Marks	L1	CO3	PO2
	b)	A 40KVA single phase transformer has 400 turns on primary and 100 turns on secondary the primary isconnected to 200V, 50Hz supply, Determine: i) The secondary voltage on open circuit. ii) The current flowing through the two windings on full load. iii)The maximum value of flux.	6 Marks	L3	CO3	PO3

UNIT-IV

7.	a)	Explain the working of PN diode in forward and reverse bias conditions.	6 Marks	L1	CO4	PO2
	b)	Compare CE, CB and CC configurations.	6 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Prove that the transistor acts an amplifier with suitable circuit diagram.	6 Marks	L2	CO4	PO4
	b)	How does the behaviour of a zener diode differ substantially from that of a normal (rectifying) diode?	6 Marks	L2	CO4	PO5

UNIT-V

9.	a)	List out the ideal characteristics of an operational amplifier and explain voltage transfer characteristics of an ideal op-amp.	6 Marks	L2	CO5	PO2
	b)	Design an op-amp differentiator circuit for the frequency of 1KHz and explain its frequency response.	6 Marks	L3	CO5	PO3
		(OR)				
10.	a)	Design an op-amp based circuit to produce an output $-(v_1 + 2v_2 + 3v_3)$, *where* v_1, v_2 *and* v_3 are the input voltages.	6 Marks	L3	CO5	PO4
	b)	With neat sketch, explain the operation of op-amp integrator circuit.	6 Marks	L2	CO5	PO1

BASIC CIVIL AND MECHANICAL ENGINEERING

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

PART-A

UNIT-I

1.	a)	What is Surveying? Explain how surveying helps in engineering applications.	4 Marks	L2	CO1	PO1 PO5
	b)	The following perpendicular offsets were taken at 10 meter intervals from a survey line to an irregular boundary line. 3.15m, 4.3m, 8.2m, 5.6m, 6.85m, 7.6m, 4.2m, 5.6m, 4.3m Calculate the area enclosed between the survey line, the irregular boundary line, and first and last offsets, by the application of: i) Average ordinate rule. ii) Trapezoidal rule. iii) Simpson's rule.	8 Marks	L4	CO1	PO1 PO2
		(OR)				
2.	a)	What are the requirements of good building stones?	6 Marks	L1	CO1	PO1
	b)	What do you understand by tensile, compressive and shear stresses? Explain.	6 Marks	L1	CO1	PO1

UNIT-II

3.	a)	What is the purpose of a bond in brick masonry? Explain the different types of bonds generally used and their applications.	6 Marks	L2	CO2	PO1 PO7
	b)	What are the different types of Highways and Railways? Explain.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Define Floor area, Carpet area, Plot area and Floor Space Index. What is the FSI for different types of buildings?	6 Marks	L1	CO2	PO1 PO6
	b)	Describe water supply and sanitary systems used in buildings.	6 Marks	L2	CO2	PO1 PO6

PART-B

UNIT-III

5.	a)	What is the function of an Internal Combustion Engine? Give a detailed classification of IC Engines.	6 Marks	L4	CO3	PO1
	b)	Describe the working of an Impulse steam turbine used in thermal power plants.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Differentiate between SI and CI engines.	6 Marks	L4	CO3	PO1
	b)	Describe the working of a Reciprocating Pump.	6 Marks	L2	CO3	PO1

UNIT-IV

7.	a)	Obtain an expression for the length of Open belt drive in terms of pulley diameters and distance between the two pulleys.	6 Marks	L3	CO3	PO1
	b)	The power is transmitted from a pulley 1m diameter running at 200 R.P.M to a pulley 2.25m diameter by means of a belt. Find the speed lost by the driven pulley as a result of creep, if the stress on the tight and slack side of the belt is 1.4 MPa and 0.5 MPa respectively. The Young's modulus for the material of the belt is 100 MPa.	6 Marks	L3	CO3	PO1 PO2

(OR)

8.	a)	Obtain an expression for the condition for transmission of maximum power by a belt drive.	6 Marks	L3	CO3	PO1
	b)	Two parallel shafts are to be connected by spur gearing. The approximate distance between the shafts is 600mm. if one shaft runs at 120 R.P.M and the other at 360 R.P.M, find the number of teeth on each wheel, if the module is 8mm. also determine the exact distance apart of the shafts.	6 Marks	L3	CO3	PO1 PO2

UNIT-V

9.	a)	Describe the process of 'Thread cutting' operation on a lathe machine with a sketch.	6 Marks	L2	CO4	PO1
	b)	Explain the factors that influence the quality of a Casting.	6 Marks	L2	CO4	PO1

(OR)

10.	a)	Write short notes on Grinding and Milling processes.	6 Marks	L2	CO4	PO1
	b)	Explain the process of Forging with the help of a sketch. What are the applications of Forging?	6 Marks	L2	CO4	PO1

PROGRAMMING FOR PROBLEM SOLVING

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Define Algorithm. Summarise the characteristics of a good algorithm.	6 Marks	L1	CO1	PO1
	b)	Explain about sep, end options used in print() with example.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Draw a flowchart for displaying the first n odd numbers.	6 Marks	L3	CO1	PO2
	b)	Evaluate the following expression according to operator precedence 4+int(3.75)+4*3+2**3**3//4.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Define suite and explain about the else suite with for statement.	6 Marks	L2	CO1	PO1
	b)	Write a Python script to find the factorial of a given number	6 Marks	L3	CO1	PO2
		(OR)				
4.	a)	Write a Python script to find the largest number among three numbers and display them in ascending order using if-else construct.	6 Marks	L3	CO1	PO2
	b)	Write a Python script to generate first 'N' Fibonacci numbers. **Note:** The Fibonacci numbers are 0, 1, 1, 2, 3, 5, 8, 13, 21, 34, … where each number is the sum of the preceding two.	6 Marks	L3	CO1	PO2
		UNIT-III				
5.	a)	Develop a python script to print diagonal elements sum in M*M list.	6 Marks	L3	CO1	PO2
	b)	Analyse string slicing. Illustrate how it is done in Python with example.	6 Marks	L2	CO1	PO2
		(OR)				
6.	a)	Define queue. Write a python script to implement queue operations.	6 Marks	L3	CO1	PO3
	b)	Demonstrate with code the various operations that can be performed on tuples.	6 Marks	L2	CO1	PO1
		UNIT-IV				
7.	a)	Write a python script for file reading and writing operations using format operator.	6 Marks	L3	CO2	PO3
	b)	Write a python function to swap the values of two variables.	6 Marks	L3	CO2	PO3
		(OR)				
8.	a)	Write a python script to remove all the occurrences of a given character from a text file, copy the resultant text into another text file. Find the total occurrences of the eliminated characters and display the count along with the contents of the text file on to the console.	6 Marks	L3	CO2	PO3
	b)	Explain functionality of the following functions. i) ones(). ii) arrange(). iii) logspace(). iv) zeros().	6 Marks	L1	CO2	PO1

UNIT-V

9.	a)	Write a python script to concatenate two data frames.	6 Marks	L3	CO2	PO2
	b)	Illustrate usage of loc() and iloc() with an example program.	6 Marks	L2	CO2	PO1
		(OR)				
10.	a)	Draw a scatter plots for knowing the relationship between two numerical variables.	6 Marks	L3	CO2	PO3
	b)	Load data from csv file to data frame and print head() and tail() of a data frame.	6 Marks	L3	CO2	PO2

UNIT-I

1.	a)	Find the general solution for the differential equation $(D^2 + 9)\, y = (x + 1)^2$.	6 Marks	L1	CO1	PO1 PO2
	b)	Solve the Legendre's form of linear differential equation $(x+2)^2\, y'' - (x + 2)\, y' + y = 3x + 4$.	6 Marks	L3	CO1	PO1 PO2
		(OR)				
2.		The circuit consists of an inductor of 1H, a resistor of 12Ω, a capacitor of 0.01F, and a generator having voltage given by E(t)=24sin10*t*. Determine the charge q and the current *i* at time *t* if $q=0$ and $i=0$ at $t=0$.	12 Marks	L3	CO1	PO1 PO2

UNIT-II

3.	a)	Solve the partial differential equation $\frac{y^2 z}{x}\, p + xzq = y^2$.	6 Marks	L3	CO1	PO1 PO2
	b)	Find the complete solution of the non-linear partial differential equation $z = p^2 + q^2$.	6 Marks	L1	CO1	PO1
		(OR)				
4.	a)	Solve the homogeneous linear partial differential equation $r - 2s + t = \sin(2x+3y)$.	6 Marks	L3	CO1	PO1 PO2
	b)	Applying method of separation of variables, solve $3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0$, where $u(x,0) = 4e^{-x}$.	6 Marks	L3	CO1	PO1 PO2

UNIT-III

5.	a)	Show that $\frac{1}{2}\frac{\partial u}{\partial x} + \frac{1}{3}\frac{\partial u}{\partial y} + \frac{1}{4}\frac{\partial u}{\partial z} = 0$, *where* $u = f(2x-3y, 3y-4z, 4z-2x)$.	6 Marks	L2	CO2	PO1
	b)	Examine whether the functions $u = e^x \sin y$, $v = e^x \cos y$ are functionally dependent or not. If so, establish a relation between them.	6 Marks	L4	CO2	PO1 PO2
		(OR)				
6.	a)	Determine maximum and minimum values of the function $\sin x + \sin y + \sin(x+y)$.	6 Marks	L3	CO2	PO1 PO2
	b)	Find the points on the surface $z^2 = xy + 1$ nearest to the origin.	6 Marks	L1	CO2	PO1 PO2

UNIT-IV

7.	a)	Evaluate the double integral $\int_0^4 \int_0^{x^2} e^{\frac{y}{x}} dydx.$	6 Marks	L5	CO2	PO1
	b)	Changing the order of integration, evaluate $\int_0^{4a} \int_{\frac{x^2}{4a}}^{2\sqrt{ax}} dydx.$	6 Marks	L2	CO2	PO1 PO2
		(OR)				
8.	a)	Evaluate the triple integral $\int_0^a \int_0^x \int_0^{x+y} e^{x+y+z}\, dxdydz$.	6 Marks	L5	CO2	PO1
	b)	Evaluate the integral $\int_0^1 \int_0^{\sqrt{1-x^2}} \int_0^{\sqrt{1-x^2-y^2}} \frac{dxdydz}{\sqrt{1-x^2-y^2-z^2}}$ by changing into spherical polar coordinates.	6 Marks	L2	CO2	PO1 PO2

UNIT-V

9.	a)	Find the directional derivative of the function $xy^2 + yz^2 + zx^2$ along the tangent to the curve $x = t,\ y = t^2,\ z = t^3$ at the point (1,1,1).	6 Marks	L1	CO3	PO1
	b)	Find the value of 'n' so that the vector function $r^n . \bar{r}$ is solenoidal.	6 Marks	L1	CO3	PO1
		(OR)				
10.		Verify Stoke's theorem for $\bar{F} = (2x - y)\,\bar{i} - yz^2\,\bar{j} - y^2z\,\bar{k}$ over the upper half surface of the sphere $x^2 + y^2 + z^2 = 1$ bounded by its projection on xy-plane.	12 Marks	L5	CO3	PO1 PO2

I B.Tech I Semester (SVEC-19) Supplementary Examinations, June 2022

ENGINEERING PHYSICS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	List the difference between interference and diffraction.	2 Marks	L1	CO1	PO1
	b)	Discuss in detail the Fraunhofer diffraction at a single slit.	10 Marks	L2	CO1	PO1 PO2
		(OR)				
2.	a)	Summarize the theory of Quarter wave plate and Half wave plate	4 Marks	L2	CO2	PO1
	b)	Describe the construction and working of a Nicol's Prism	8 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Discuss the divergence and curl of electric and magnetic fields.	4 Marks	L2	CO2	PO1
	b)	List the Maxwell's equations and derive an expression for the velocity of propagation of plane electromagnetic wave in a medium of dielectric constant ε and permeability μ .	8 Marks	L3	CO2	PO1 PO2
		(OR)				
4.		Define acceptance angle. Derive an expression for acceptance angle and numerical aperture of an optical fiber. Discuss any two losses in optical fibers.	12 Marks	L3	CO2	PO1 PO2
		UNIT-III				
5.		Derive the expression for intrinsic carrier concentration in an intrinsic semiconductor.	12 Marks	L3	CO3	PO2
		(OR)				
6.	a)	Explain construction and working mechanism of a semiconductor diode laser.	10 Marks	L2	CO3	PO1 PO2
	b)	Predict the colour of light emitted by a laser source made up of GaAs with band gap of 1.44 eV.	2 Marks	L3	CO3	PO2
		UNIT-IV				
7.	a)	Outline an expression for internal field of an atom in a dielectric material.	10 Marks	L2	CO4	PO2
	b)	List few applications of dielectrics.	2 Marks	L1	CO4	PO1
		(OR)				
8.	a)	Define the terms magnetic permeability (μ) and magnetic susceptibility (χ)	4 Marks	L1	CO4	PO1
	b)	Construct the B-H curve for a ferromagnetic material and identify the retentivity and the coercive field on the curve.	8 Marks	L3	CO4	PO1 PO2
		UNIT-V				
9.	a)	Describe the effect of temperature, magnetic field and electric current on a superconductor.	9 Marks	L2	CO5	PO2
	b)	Calculate the critical current which can flow through a long thin superconducting wire of diameter 1 mm. The critical magnetic field is 7.9×10^3 A/m.	3 Marks	L3	CO5	PO2
		(OR)				
10.	a)	Define nanomaterials? Why their properties are different from the properties of a bulk material?	8 Marks	L1	CO5	PO1
	b)	List the applications of nanomaterials in various fields.	4 Marks	L1	CO5	PO1

ENGINEERING CHEMISTRY

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		How does the Shr*ö*dinger's quantum mechanical model helps to determine the location of electrons around the nucleus in atoms?	12 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Describe the structure of H_2O and NH_3 molecule in terms of VSEPR theory. Explain the decrease in bond angle from NH_3 to H_2O.	5 Marks	L2	CO1	PO1 PO2
	b)	Predict the magnetic property of carbon monoxide molecule based on its energy level diagram.	7 Marks	L3	CO1	PO1 PO2
		UNIT-II				
3.		Describe the ion exchange process with a neat diagram. Ion exchange process is more advantageous than zeolite. Why?	12 Marks	L2	CO2	PO1 PO2
		(OR)				
4.	a)	Explain the importance of fluorides in water. Compare the merits and demerits of various methods of defluoridation.	7 Marks	L2	CO2	PO1 PO6
	b)	Define hardness. Calculate the hardness of water sample with 0.5 g of C**a**CO_3 dissolved in dil HCl and the solution was made upto 500 ml with distilled water. 50 mL of the solution required 48 ml of the EDTA solution for the titration. 50 ml of hard water sample required 15 ml of EDTA and after boiling and filtering required 10 ml of the EDTA solution.	5 Marks	L3	CO2	PO1 PO2
		UNIT-III				
5.	a)	Discuss the construction and working of H_2O_2 fuel cell and identify its advantages and limitations.	8 Marks	L2	CO3	PO1 PO2
	b)	Write the working principle of lead acid battery.	4 Marks	L1	CO3	PO1
		(OR)				
6.	a)	Identify two examples where differential aeration effect are seen and explain each with example.	6 Marks	L3	CO3	PO1
	b)	Mention different methods used for prevention of corrosion of metal and discuss any one method.	6 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	State Beer –Lamberts law and discuss various types of electronic transitions.	6 Marks	L2	CO4	PO1
	b)	Write the principle and applications of Transmission Electron Microscope.	6 Marks	L1	CO4	PO1
		(OR)				
8.		Discuss the principle and working of an IR spectrometer with the help of a block diagram.	12 Marks	L2	CO4	PO1 PO5

UNIT-V

9.		Define lubricant. Explain the properties of the lubricant and their significance.	12 Marks	L2	CO5	PO1
		(OR)				
10.	a)	Give the significance of octane number and cetane number and for which these are used. How these can be improved?	6 Marks	L1	CO5	PO1
	b)	Distinguish between solid, liquid and gaseous fuels.	6 Marks	L2	CO5	PO1

BASIC ELECTRICAL AND ELECTRONICS ENGINEERING
[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	State and verify Kirchhoff's voltage law for the given circuit. 	6 Marks	L3	CO1	PO2
	b)	Define the following terms and elaborate their importance. i) Real power. ii) Reactive Power. iii) Apparent Power.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	An inductance of 2 mH has a current $i = 5(1-e^{-5000t})$ A. Find the corresponding voltage and the maximum stored energy.	6 Marks	L3	CO1	PO2
	b)	With neat sketch, explain the construction and working of a single loop generator.	6 Marks	L1	CO1	PO1

UNIT-II

3.	a)	With neat sketch, explain the operation of hydro electric power plant.	6 Marks	L1	CO2	PO1
	b)	Demonstrate the working principle of MCB with suitable illustrations.	4 Marks	L1	CO2	PO1
	c)	Explain the significance of BEE standards.	2 Marks	L1	CO2	PO1
		(OR)				
4.	a)	With neat sketch explain the operation of an inverter.	6 Marks	L1	CO2	PO1
	b)	Mention the disadvantages of low power factor and suggest suitable methods to improve the power factor.	6 Marks	L2	CO2	PO1

UNIT-III

5.	a)	With neat sketch, demonstrate the working principle of single phase transformer.	6 Marks	L1	CO3	PO1
	b)	Explain the constructional details of 3-ph induction motor and mention its applications.	6 Marks	L1	CO3	PO5
		(OR)				
6.	a)	Explain the constructional details and working of single phase resistor start induction motor.	6 Marks	L1	CO3	PO1
	b)	Explain the working of synchronous machine and mention it's applications.	6 Marks	L1	CO3	PO5

UNIT-IV

7.		Draw the circuit of a full-wave rectifier without filter and derive the expressions for ripple factor, % regulation, efficiency and PIV.	12 Marks	L1	CO4	PO2

(OR)

8.	a)	Distinguish between Avalanche and Zener break downs.	6 Marks	L2	CO4	PO2
	b)	Explain the input and output characteristic of a transistor in common emitter configuration.	6 Marks	L1	CO4	PO1

UNIT-V

9.	a)	Discuss in detail about level translator and its significance in the circuits.	6 Marks	L1	CO5	PO1
	b)	Construct a circuit to realize $V=V_1-V_2+V_3$ using Op-amp.	6 Marks	L3	CO5	PO3

(OR)

10.	a)	Explain the working of a comparator using Op-amp and enumerate its limitations.	6 Marks	L1	CO5	PO1
	b)	Derive an expression for V_0 of the integrator circuit by using Op-amp.	6 Marks	L2	CO5	PO2

PROGRAMMING FOR PROBLEM SOLVING

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define algorithm, explain properties of an algorithm.	6 Marks	L1	CO1	PO1
	b)	Evaluate the following expression according to operator precedence 3+int(2.96)+4*2+3**2**2//3.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Draw a flow chart to reverse a given number.	6 Marks	L3	CO1	PO2
	b)	Explain about sep, end options used in print() with example.	6 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Define suite and explain about the else suite with for statement.	6 Marks	L2	CO1	PO1
	b)	Display the following pattern using python script. 1 12 123 1234 12345	6 Marks	L3	CO1	PO2
		(OR)				
4.	a)	Write a python script to find the largest number among three numbers and display them in ascending order using if-else construct.	6 Marks	L3	CO1	PO2
	b)	Develop a python script to print factors for a given integer number.	6 Marks	L3	CO1	PO2

UNIT-III

5.	a)	Develop a python script to print diagonal elements sum in M*M list.	6 Marks	L3	CO1	PO2
	b)	List any four string handling methods used in Python. Illustrate with an example program.	6 Marks	L3	CO1	PO2
		(OR)				
6.	a)	Define stack. Write a python script to implement stack operations.	6 Marks	L3	CO1	PO3
	b)	Specify the functionalities of the following functions. i) keys() ii) values() iii) items() iv) update()	6 Marks	L2	CO1	PO1

UNIT-IV

7.	a)	Develop a python script to implement Tower of Hanoi problem.	6 Marks	L3	CO2	PO3
	b)	Write a python script to remove all the occurrences of a given character from a text file, copy the resultant text into another text file. Find the total occurrences of the eliminated characters and display the count along with the contents of the text file on to the console.	6 Marks	L3	CO2	PO3
		(OR)				

8.	a)	Write a Python script that reads a line of integers, and then displays each integer, and the sum of all the integers.	6 Marks	L3	CO2	PO3
	b)	Explain functionality of the following functions. i) ones() ii) arrange() iii) logspace() iv) zeros()	6 Marks	L1	CO2	PO1

UNIT-V

9.	a)	Write a python script to concatenate two data frames.	6 Marks	L3	CO2	PO2
	b)	Illustrate usage of loc() and iloc() with an example program.	6 Marks	L2	CO2	PO1
		(OR)				
10.	a)	Draw a scatter plots for knowing the relationship between two numerical variables.	6 Marks	L3	CO2	PO3
	b)	Load data from csv file to data frame and print head() and tail() of a data frame.	6 Marks	L3	CO2	PO2

DIFFERENTIAL EQUATIONS AND MULTIVARIABLE CALCULUS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science), Computer Science and Business Systems, Computer Science and Design, Computer Science and Engineering (Artificial Intelligence and Machine Learning), Computer Science and Engineering (Internet of Things), Computer Science and Engineering (Cyber Security)]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Solve the differential equation $\frac{d^2y}{dx^2} - 2\frac{dy}{dx} + 2y = 3e^x \cos 2x.$	7 Marks	L3	CO1	PO1
	b)	Solve the following differential equation by the method of variation of parameters $\frac{d^2y}{dx^2} - 3\frac{dy}{dx} + 2y = e^{3x}$.	7 Marks	L3	CO1	PO2
		(OR)				
2.		Determine the charge and current on the capacitor in an *LRC* series circuit at t when *inductance* 1 H, *resistance* 10Ω, *capacitance* 0.04 F, $E(t) = \cos 3tV$, where $q(0)$ = 5 C, and $i(0)$ = 0 A.	14 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Construct the partial differential equation of all spheres whose Centre lie on Z-axis and given by Equation, $x^2 + y^2 + (z-a)^2 = b^2$ where **a** and **b** being constants.	7 Marks	L3	CO2	PO1
	b)	Obtain the solution of partial differential equation $x(y-z)p + y(z-x)q = z(x-y)$ using Lagrange's method.	7 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Using method of Separation of variables, find the solution of the partial differential equation $\frac{\partial u}{\partial x} = 4\frac{\partial u}{\partial y}$ *given that* $u(x,0) = 8e^{-3x}$.	7 Marks	L3	CO2	PO1
	b)	Solve the linear homogeneous partial differential equation $\frac{\partial^2 z}{\partial x^2} - \frac{\partial^2 z}{\partial x \partial y} = A\cos x \cos 2y.$	7 Marks	L3	CO2	PO2

UNIT-III

5.	a)	If $u = \sqrt{(1-y^2)} + \sqrt{(1-x^2)}$, $v = \sin^{-1}x + \sin^{-1}y$ then verify that **u** and ***v*** are functionally dependent or not.	7 Marks	L3	CO3	PO1
	b)	Applying Lagrange's undetermined multipliers to find the maximum value for $x^2 + y^2 + z^2$ subject to the condition $lx + my + nz = p$.	7 Marks	L3	CO3	PO1
		(OR)				
6.	a)	If $u = x^2 - 2y$, $v = x + y + z$, $w = x - 2y + 3z$. Determine $J\left(\frac{u,v,w}{x,y,z}\right)$.	7 Marks	L3	CO3	PO1
	b)	Apply partial derivatives to find the stationary points for the function $f(x,y) = x^2 + y^2 + 6x + 12$ and estimate at what points the function has maximum and minimum values.	7 Marks	L3	CO3	PO2

UNIT-IV

7.	a)	Evaluate $\int\int xy\,dx\,dy$ where R is the region lies in the positive quadrant of the circle $x^2 + y^2 = a^2$.	7 Marks	L5	CO4	PO2
	b)	Evaluate $\int_0^a \int_0^x \int_1^{x+y} e^{x+y+z}\,dx\,dy\,dz$.	7 Marks	L5	CO4	PO1
		(OR)				
8.	a)	Change the order of integration and hence evaluate $\int_0^{4a} \int_{x^2/4a}^{2\sqrt{ax}} dy\,dx$.	7 Marks	L4	CO4	PO1
	b)	Evaluate the integral $\int_0^4 \int_0^{\sqrt{4y-y^2}} x^2\,dx\,dy$ by converting to polar coordinates.	7 Marks	L5	CO4	PO2

UNIT-V

9.	a)	If, f = (2x+3y+az) **i**+ (bx+2y+3z) **j**+(2x+cy+3z) **k** is irrotational, find a, b, c.	7 Marks	L1	CO5	PO1
	b)	Determine the directional derivative of $\phi = xy + yz + zx$ at A in the direction of line AB where A= (1, 2, -1), B= (1, 2, 3).	7 Marks	L3	CO5	PO1
		(OR)				
10.		Verify Stoke's theorem to evaluate $\int_C \overline{F}.\,\overline{dr}$ where $\vec{F} = (x^2 + y^2)\vec{i} - 2xy\vec{j}$, where C is the boundary of the rectangle bounded by the lines x = ± a, y = 0, y = b.	14 Marks	L5	CO5	PO2

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Central Water Commission (CWC) of Tirupati section reports on underground water sample (in mg/L) at the proposed site for the construction of thermal power plant (300 MW) near Vijayawada is as follows: $Ca(HCO_3)_2$ = 220, $MgCl_2$ = 130, $CaSO_4$= 98, $Mg(HCO_3)_2$ = 56, $MgSO_4$ = 84, DO = 8 and Na_2CO_3 = 22. Discuss in detail the operational troubles suffer by the boiler if above sample of water is to be fed into 56.24 x 104 kg m^{-2} boiler.	10 Marks	L3	CO1	PO1 PO6
	b)	Explain the reasons for the formation of scales in boilers. Mention any three disadvantages of scales.	4 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Describe the principle, chemistry, and process of determination of hardness of a water sample by EDTA method.	8 Marks	L2	CO1	PO1
	b)	What are zeolites? Explain the zeolite process with relevant equations and mention the advantages and disadvantages of zeolite process.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Derive Schrodinger wave equation and explain the significance of ψ and ψ^2.	7 Marks	L2	CO2	PO1
	b)	Explain Quantum mechanical model of Hydrogen atom.	7 Marks	L2	CO2	PO1 PO2
		(OR)				
4.		Illustrate how the energies of a particle in a potential box are quantized.	14 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Describe electroplating. Apply the electroplating process to coat nickel over metal object and explain the chemistry taking place.	8 Marks	L3	CO3	PO1 PO2
	b)	Explain the chemistry involved in concentration cell corrosion.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Describe fuel cells and their significance. Explain the working, chemistry involved and applications of solid oxide fuel cell.	8 Marks	L2	CO3	PO1
	b)	What is reference electrode? Explain the construction, working and applications of calomel electrode.	6 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Demonstrate the principle, working and applications of IR spectrometer with a neat diagram.	8 Marks	L3	CO4	PO5
	b)	Explain different types of fundamental modes of vibrations.	6 Marks	L2	CO4	PO1

(OR)

8.		Discuss the principle and working of UV - Visible spectrometer with the help of a block diagram.	14 Marks	L2	CO4	PO1

UNIT-V

9.	a)	Interpret the functions of lubricants and discuss the mechanism involved in lubrication process.	8 Marks	L2	CO5	PO1
	b)	Classify various types of fuels with suitable examples.	6 Marks	L2	CO5	PO1

(OR)

10.	a)	Describe the cracking of petroleum. Explain how gasoline can be obtained making use of various catalytic cracking methods.	8 Marks	L2	CO5	PO1
	b)	Calculate the HCV and LCV of coal having the following compositions: carbon = 80%, hydrogen = 10%, nitrogen = 4%, Sulphur = 2%, ash = 4%, latent heat of steam = 587 kcal/kg.	6 Marks	L3	CO5	PO1

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Obtain the conditions for constructive and destructive interference in case of a thin parallel film observed in reflected light.	10 Marks	L3	CO1	PO2
	b)	A thin parallel film of refractive index 1.4 is illuminated with white light. Two consecutive dark bands are observed corresponding to wavelengths 459 nm and 450 nm when observed at an angle of 35^0. Determine the thickness of the film.	4 Marks	L1	CO1	PO2
		(OR)				
2.	a)	Discuss the Fraunhofer diffraction at a single slit. Explain the condition for principle maximum and minimum.	10 Marks	L2	CO1	PO1
	b)	Distinguish between interference and diffraction.	4 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Write the Maxwell equations in integral and differential form. Explain their physical significance.	8 Marks	L2	CO2	PO2
	b)	Explain the electromagnetic wave propagation through non conducting medium.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Define acceptance angle and numerical aperture of an optical fiber. Derive the expression for numerical aperture of an optical fiber.	10 Marks	L3	CO2	PO2
	b)	The numerical aperture of an optical fiber is 0.4. Refractive index of the core is 1.47. Determine the refractive index of the cladding.	4 Marks	L1	CO2	PO2
		UNIT-III				
5.		What are drift and diffusion currents? Derive the expressions for it.	14 Marks	L3	CO3	PO2
		(OR)				
6.	a)	Describe the semi conductor diode laser.	10 Marks	L3	CO3	PO2
	b)	Distinguish between direct and indirect band gap semiconductors.	4 Marks	L1	CO3	PO1
		UNIT-IV				
7.	a)	What is Lorentz field? Derive an expression for Lorentz field acting at the centre of the Lorentz cavity.	10 Marks	L3	CO4	PO2
	b)	What is electronic polarization and ionic polarization?	4 Marks	L1	CO4	PO1
		(OR)				
8.	a)	Distinguish between dia, para and ferro magnetic materials.	10 Marks	L1	CO4	PO1
	b)	What are soft and hard magnetic materials?	4 Marks	L2	CO4	PO1

UNIT-V

9.	a)	State and explain Meissner effect.	7 Marks	L1	CO5	PO1
	b)	Explain DC and AC Josephson effects.	7 Marks	L1	CO5	PO2
		(OR)				
10.	a)	Describe ball milling technique to synthesize nanomaterials.	7 Marks	L2	CO5	PO1
	b)	What are nanomaterials? Write its properties.	7 Marks	L1	CO5	PO1

I B.Tech I Semester (SVEC-20) Regular Examinations April – 2022

APPLIED PHYSICS

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What is the principle involved in optical fiber? Define it.	2 Marks	L1	CO1	PO1
	b)	Explain, how the optical fibers are classified.	12 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Write a note on optical fiber sensors.	7 Marks	L1	CO1	PO1
	b)	Explain the propagation of light through an optical fiber.	7 Marks	L1	CO1	PO1

UNIT-II

3.	a)	State and explain Sabine's formula for reverberation time.	6 Marks	L1	CO2	PO1
	b)	Define reverberation time and explain its significance.	8 Marks	L1	CO2	PO1
		(OR)				
4.	a)	Explain the production of ultrasonic waves with a neat sketch.	10 Marks	L2	CO2	PO1
	b)	Calculate the frequency of fundamental note emitted by a piezo-electric crystal with the following data: Vibrating length = 3mm; $Y = 8 \times 10^{10}$ Nm^{-2}; density of the crystal = 2.5×10^{3} kg/m^{3}.	4 Marks	L1	CO2	PO2

UNIT-III

5.		Derive the expressions for maximum height, time of flight and horizontal range in case of inclined projection.	14 Marks	L3	CO3	PO1
		(OR)				
6.	a)	Derive an expression for work-energy in case of translation motion.	10 Marks	L3	CO3	PO2
	b)	Briefly explain rectilinear translation.	4 Marks	L1	CO3	PO1

UNIT-IV

7.	a)	Briefly explain various modes of heat transfer with examples.	8 Marks	L2	CO4	PO1
	b)	Write a note on coefficient of thermal conductivity.	6 Marks	L1	CO4	PO1
		(OR)				
8.	a)	Develop an expression for thermal conductivity of materials connected in parallel.	7 Marks	L3	CO4	PO2
	b)	Develop an expression for thermal conductivity of materials connected in series.	7 Marks	L3	CO4	PO2

UNIT-V

9.	a)	Briefly explain the properties of metallic glasses.	10 Marks	L2	CO5	PO1
	b)	Write some applications of metallic glasses.	4 Marks	L1	CO5	PO1
		(OR)				
10.	a)	What are shape memory alloys? Classify them.	8 Marks	L1	CO5	PO2
	b)	Outline the applications of shape memory alloys.	6 Marks	L1	CO5	PO1

CODE No.: 20BT1HS01 SVEC-20

COMMUNICATIVE ENGLISH

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Data Science), Computer Science and Engineering (Artificial Intelligence), Computer Science and Business Systems, Computer Science and Engineering (Cyber Security), Computer Science and Engineering (Artificial Intelligence and Machine Learning)

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Write about proxemics of non verbal communication skills.	7 Marks	L2	CO1	PO1
	b)	Discuss the merits and demerits of Assertive communication with suitable examples.	7 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Distinguish between formal and informal communication with relevant examples.	7 Marks	L2	CO1	PO1
	b)	Explain briefly about the organizational barriers of communication.	7 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Explain the following with examples: i) Appreciative Listening. ii) Empathetic Listening.	7 Marks	L2	CO2	PO2
	b)	What are the traits of a good listener?	7 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Explain the barriers of effective listening.	7 Marks	L2	CO2	PO2
	b)	Write a brief note on listening for specific information.	7 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	Define task based speaking. Explain any five situations you need task based speaking.	7 Marks	L1	CO2	PO2
	b)	What is public speaking? Explain the strategies of effective presentation.	7 Marks	L1	CO2	PO1
		(OR)				
6.	a)	What is persuasive speaking? Write the characteristic features of persuasive speaking.	7 Marks	L2	CO2	PO2
	b)	Define symposium. Write the differences between conference and symposium.	7 Marks	L2	CO2	PO1
		UNIT-IV				
7.	a)	Write a brief note on: i) Intensive reading. ii) Extensive reading.	7 Marks	L1	CO3	PO1
	b)	Explain the seven strategies for reading comprehension questions.	7 Marks	L2	CO3	PO1
		(OR)				
8.	a)	Explain SQ3R technique in reading.	7 Marks	L2	CO3	PO2
	b)	Distinguish between skimming and scanning.	7 Marks	L2	CO3	PO2

UNIT-V

9.	a)	Write the steps we follow while writing an essay.	7 Marks	L2	CO3	PO2
	b)	Discuss the ways on how to overcome writer's block.	7 Marks	L2	CO3	PO1
		(OR)				
10.	a)	Explain the steps to effective précis writing.	7 Marks	L2	CO3	PO1
	b)	Clarify the concept of technical writing distinguished it from other kinds of writing.	7 Marks	L2	CO3	PO2

I B.Tech I Semester (SVEC-20) Regular Examinations April – 2022

ENGINEERING MECHANICS

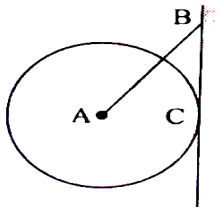
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

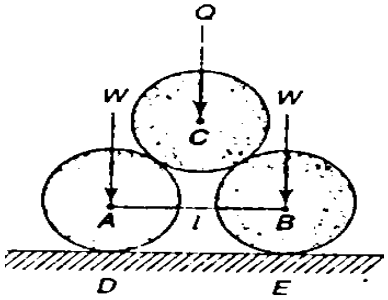
UNIT-I

1.	a)	State and prove Varignon's theorem.	7 Marks	L2	CO1	PO1
	b)	A sphere of radius ***5 cm***, and of weight ***100 N*** is supported on a smooth wall by a tie rod of ***length 13 cm***, as shown in figure. Find the tension in the tie rod and reaction at point of contact C.	7 Marks	L3	CO1	PO4



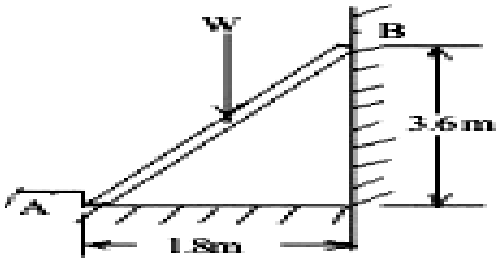
(OR)

2.		Two smooth circular cylinders, each of weight ***W = 445 N***, and radius ***r =152 mm*** are connected at their centres by a string AB of length ***l = 406 mm*** and rest up on a horizontal plane, supporting above them a third cylinder of weight ***Q = 890 N*** and radius ***r = 152 mm*** as shown in figure. Find the force in the string and reactions induced at the points of contact D and E.	14 Marks	L4	CO1	PO5



UNIT-II

3.	a)	Explain the following: i) Co-efficient of friction. ii) Angle of friction. iii) Angle of repose. iv) Cone of friction.	7 Marks	L1	CO2	PO1
	b)	A 750 N man stands on the middle rung of a 250N ladder as shown in figure. Assuming a smooth wall at B and stop at A to prevent slipping, find the reactions at A and B.	7 Marks	L3	CO2	PO4



(OR)

4.		A 7 meter long ladder rests against a vertical wall, with which it makes an angle of 45^0, and on floor. If a man, whose weight is one of half of that of the ladder, climbs it, at what distance along the ladder will he be, when the ladder is about to slip ? The coefficient of friction between wall and ladder is 0.3 and that between ladder and the floor is 0.5.	14 Marks	L4	CO2	PO6

UNIT-III

5.	a)	Determine centroid of area of semi-circle of radius 'R'.	7 Marks	L2	CO3	PO2
	b)	State and prove parallel axis theorem.	7 Marks	L2	CO3	PO2

(OR)

6.		A Find the moment of inertia about the centriodal axis parallel to AB of the plane area shown in figure. 	14 Marks	L3	CO3	PO5

UNIT-IV

7.	a)	Draw the stress strain diagram of a structural steel, explain various stages in detail.	7 Marks	L2	CO4	PO1
	b)	Derive the relation between the three elastic constants.	7 Marks	L2	CO4	PO2

(OR)

8.	a)	A round bar of 10 mm diameter is made of aluminum alloy with modulus of elasticity, 72 GPa. When the bar is stretched by axial forces P, its diameter decreases by 0.016mm. Find the magnitude of the load P.	7 Marks	L3	CO4	PO2
	b)	The following data refer to a mild steel specimen tested in a laboratory: Diameter of the specimen = 30 mm Length of the specimen = 250 mm Extension under a load of 15 kN = 0.055 mm Load at yield point = 125 kN Maximum load = 240 kN Length of the specimen after failure = 410 mm Neck diameter = 18 mm. Determine: i) Young's modulus. ii) Yield point. iii) Ultimate stress. iv) Percentage of elongation. v) Percentage reduction in area. vi) Safe stress adopting a factor of safety of 2.	7 Marks	L3	CO4	PO4

UNIT-V

9.	a)	Distinguish between: i) Thin cylinder and thick cylinder. ii) Hoop and longitudinal stress.	7 Marks	L2	CO5	PO2
	b)	A storage tank of internal diameter 280 mm is subjected to an internal pressure of 2.56 MPa. Find the thickness of the tank, if the hoop and longitudinal stress are 75 MPa and 45 MPa respectively.	7 Marks	L3	CO5	PO2

(OR)

10.		A shell 3.25 mm long and 1 m diameter, subjected to an internal pressure of 1.2 N/m². If the thickness of the shell is 10 mm determine the change in volume, find the circumferential and longitudinal stresses. Find also the maximum shear stress and changes in dimensions of the shell. Take E=200kN/m² and Poisson's ratio=0.3.	14 Marks	L4	CO5	PO4

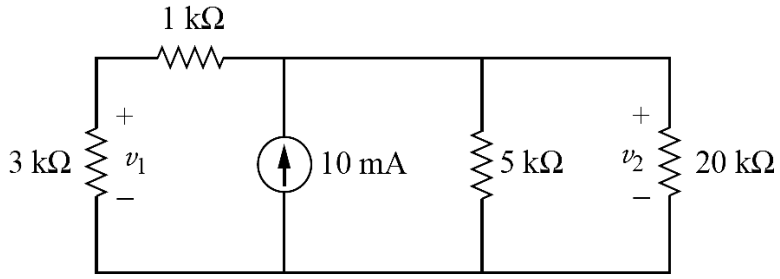
[Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Data Science), Computer Science and Engineering (Artificial Intelligence), Computer Science and Design, Computer Science and Engineering (Cyber Security), Computer Science and Engineering (Artificial Intelligence and Machine Learning), Computer Science and Engineering (Internet of Things)]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

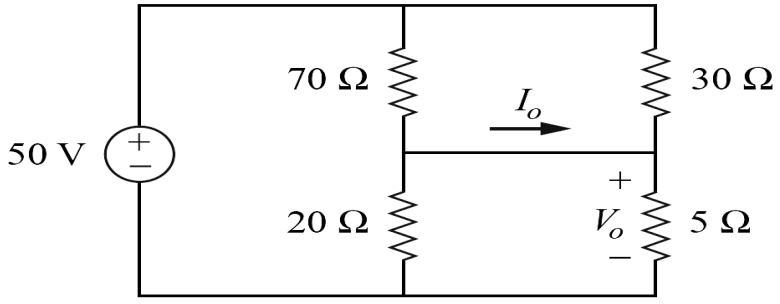
UNIT-I

1.	a)	Differentiate single phases and three phase supply with respect to advantages and disadvantages.	7 Marks	L2	CO1	PO2
	b)	For the circuit shown in fig., apply Kirchhoff's current law determine v_1 and v_2.	7 Marks	L3	CO1	PO1



(OR)

2.	a)	Explain the concepts of real, reactive powers.	6 Marks	L2	CO1	PO1
	b)	Compute V_o and I_o.	8 Marks	L3	CO1	PO2



UNIT-II

3.	a)	Draw the layout of Thermal power plant and briefly explain the function of major components.	7 Marks	L2	CO2	PO1
	b)	Explain the working of fuse and circuit breaker with necessary diagrams.	7 Marks	L1	CO2	PO8

(OR)

4.	a)	"Solar is the best option for future power requirements" – comment on it.	6 Marks	L3	CO2	PO1
	b)	What is the role of relay in electrical systems and how it works?	8 Marks	L1	CO2	PO7

UNIT-III

5.	a)	Describe the role of transformers in power transmission.	5 Marks	L3	CO3	PO1
	b)	Explain the working of permanent magnet DC motors.	6 Marks	L2	CO3	PO1
	c)	List the applications of stepper motors.	3 Marks	L1	CO3	PO6
		(OR)				
6.	a)	Derive expression for induced **emf** in a single phase transformer.	6 Marks	L3	CO3	PO1
	b)	Illustrate the constructional differences between permanent magnet DC motors and DC brushless motors.	8 Marks	L2	CO3	PO1

UNIT-IV

7.	a)	What is the difference between PN junction diode and zener diode? Explain Zener diode characteristics.	7 Marks	L1	CO4	PO1
	b)	Explain the need for biasing circuits for transistors. What are the different types of biasing circuits used for transistors represent their circuit diagrams?	7 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Draw the circuit diagram of half wave rectifier and explain its operation with necessary wave forms.	7 Marks	L2	CO4	PO1
	b)	Design a circuit with zener diode to act as a voltage regulator. List the applications where constant voltage needed.	7 Marks	L3	CO4	PO1

UNIT-V

9.	a)	Explain op amp AC and DC characteristics.	7 Marks	L1	CO4	PO6
	b)	Explain inverting amplifier with op amp circuit diagram.	7 Marks	L1	CO4	PO7
		(OR)				
10.	a)	Determine v_o in the op amp circuit shown in Fig.	7 Marks	L3	CO4	PO1

	b)	Explain circuit design and working of differential operational amplifier with necessary voltage equations.	7 Marks	L2	CO4	PO2

MATERIALS SCIENCE AND ENGINEERING

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain and differentiate Edge dislocation and Screw dislocation with a neat sketch.	7 Marks	L2	CO1	PO1 PO2
	b)	Explain the principle of bond formation in solids, with a suitable example.	7 Marks	L2	CO1	PO1 PO2
		(OR)				
2.		Draw a Fe-Fe_3C phase diagram and label all the phases. Discuss the structural transformation while cooling from liquid to solid.	14 Marks	L2	CO2	PO1 PO2
		UNIT-II				
3.	a)	Discuss the importance of heat treatment. Explain the important methods of heat treatment of steels.	7 Marks	L2	CO2	PO1 PO3
	b)	What is hardenability? Explain the Jominy end quench test used for determining the hardenability of steels.	7 Marks	L2	CO2	PO1 PO2
		(OR)				
4.	a)	Discuss the method of constructing isothermal diagrams.	7 Marks	L2	CO2	PO1 PO2
	b)	Draw a T-T-T diagram for hypo eutectoid steels. Write characteristics of Bainaite and Martensite.	7 Marks	L2	CO2	PO1 PO2
		UNIT-III				
5.	a)	Discuss the composition, properties, and application of the following cast Iron. i) Malleable cast Iron. ii) Spheroidal cast Iron.	10 Marks	L3	CO3	PO1 PO2 PO3
	b)	Give a note on Tool steels.	4 Marks	L2	CO3	PO1 PO2
		(OR)				
6.	a)	Explain the effect of alloy elements of Steel.	7 Marks	L2	CO3	PO1 PO2
	b)	State the properties and applications of Plain carbon steels.	7 Marks	L2	CO3	PO1 PO2
		UNIT-IV				
7.		Write a short note on light weight non-ferrous alloys and discuss the Magnesium and its alloys with respect to alloying and heat treatment.	14 Marks	L2	CO4	PO1 PO2
		(OR)				
8.		Enumerate the composition and applications of the following alloys. i) Cupro nickel. ii) Bronze. iii) Bearing alloy.	14 Marks	L2	CO4	PO1 PO3

UNIT-V

9.	a)	Classify Engineering ceramics and list properties and applications of any Two of them.	7 Marks	L2	CO5	PO1 PO2
	b)	Explain the following terms with respect to polymers. i) Mechanical behavior. ii) Thermal behavior.	7 Marks	L2	CO5	PO1 PO2
		(OR)				
10.	a)	List two applications of composites. Differentiate between particle reinforced and fiber-reinforce composites.	7 Marks	L2	CO5	PO1 PO2
	b)	What are the special properties of plastics that make them suitable for engineering applications?	7 Marks	L2	CO5	PO1 PO3

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		Discuss the classifications of surveying based on: i) Instruments used. ii) Objectives of survey. iii) Methods employed.	14 Marks	L2	CO1	PO1 PO8
		(OR)				
2.	a)	Discuss the geological and physical classification of rocks.	6 Marks	L2	CO1	PO1 PO5
	b)	Define Composite materials. List out various applications, advantages and limitations of composites.	8 Marks	L1	CO1	PO9
		UNIT-II				
3.	a)	What is foundation? State the requirements of a good foundation.	7 Marks	L1	CO2	PO1
	b)	Briefly describe various types of stairs.	7 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Mention different types of roofs and explain briefly.	7 Marks	L3	CO2	PO1 PO8
	b)	Compare merits and demerits of flat and pitched roofs.	7 Marks	L2	CO2	PO1
		UNIT-III				
5.		Discuss the working principle of single acting reciprocating pump with the help of neat sketch.	14 Marks	L2	CO3	PO1 PO5
		(OR)				
6.	a)	List out major parts of an IC engine. Explain any four of them in detail.	8 Marks	L1	CO3	PO1
	b)	Write short notes on specialized sub-disciplines in Mechanical Engineering.	6 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Explain centrifugal tension and initial tension in belt drives.	7 Marks	L2	CO3	PO1
	b)	Write the advantages and disadvantages of rope drives.	7 Marks	L2	CO3	PO1
		(OR)				
8.	a)	Write the expression for the power transmitted by the belts.	7 Marks	L2	CO3	PO1
	b)	Name different types of belt drives. Explain any two belt drives with neat sketches.	7 Marks	L4	CO3	PO1 PO8
		UNIT-V				
9.	a)	Define welding. Explain the working principle and operation of Arc welding.	8 Marks	L2	CO4	PO1
	b)	Explain how forging improves the mechanical properties of components with neat sketch.	6 Marks	L4	CO4	PO1 PO8
		(OR)				

10.	a)	Discuss the merits and demerits of casting over other manufacturing methods. Summarize the factors influencing the quality of finished casting.	10 Marks	L2	CO4	PO1
	b)	List out various operations that can be carried out on Lathe.	4 Marks	L1	CO4	PO1 PO8

PROGRAMMING FOR PROBLEM SOLVING

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Data Science), Computer Science and Engineering (Artificial Intelligence), Computer Science and Business Systems, Computer Science and Design, Computer Science and Engineering (Cyber Security), Computer Science and Engineering (Artificial Intelligence and Machine Learning), Computer Science and Engineering (Internet of Things)]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Write an algorithm, flowchart and C program to find the sum of numbers from '1 to n'.	7 Marks	L1	CO1	PO1
	b)	What is variable? Give the rules for variable declaration.	7 Marks	L2	CO1	PO1
		(OR)				
2.	a)	What are basic data types available in "C"? Write the significance of each data type.	7 Marks	L1	CO1	PO2
	b)	What is an expression? Evaluate the following expressions. i) 100 % 20 < = 20 – 5 + 100 % 10 – 20 = = 5 > = 1 != 20 ii) a + = b * = C - = 5 where a=3 b=5 and c=8.	7 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Explain about the working procedure of if–else ladder. Write a C program to display the largest of 3 integers using if-else ladder.	7 Marks	L2	CO1	PO1
	b)	Define an algorithm. Illustrate the implementation of algorithm with an example.	7 Marks	L2	CO2	PO3
		(OR)				
4.	a)	Define algorithm. Design an algorithm to check whether a number given by the user is positive or negative or zero.	7 Marks	L2	CO2	PO3
	b)	Explain the program verification for solving any given problem.	7 Marks	L2	CO2	PO5
		UNIT-III				
5.	a)	What is string? Write a C program that reads a sentence and prints the frequency of each of the vowels and total count of consonants.	7 Marks	L1	CO3	PO2
	b)	Write a program to find GCD and LCM of two numbers using concept of functions.	7 Marks	L3	CO3	PO3
		(OR)				
6.	a)	Write a program in C using functions to swap two numbers using global variables concept and call by reference concept.	7 Marks	L1	CO3	PO3
	b)	What is array? Explain the declaration and initialization of one dimensional and two dimensional array with an example.	7 Marks	L3	CO3	PO2
		UNIT-IV				
7.	a)	What is pointer? Explain how the pointer variable declared and initialized.	7 Marks	L2	CO4	PO2
	b)	Write a C program to read and display multiple strings using pointers.	7 Marks	L3	CO4	PO3

(OR)

8.	a)	Explain the concept of functions returning pointers with example.	7 Marks	L2	CO4	PO1
	b)	Write a C program to show that pointer of any data type occupies same space.	7 Marks	L3	CO4	PO3

UNIT-V

9.	a)	Explain the difference between array and structures with suitable example.	7 Marks	L1	CO5	PO1
	b)	Write a program to maintain a record of "n" employee detail using an array of structures with three fields (id, name, salary) and print the details of employees whose salary is above 10000.	7 Marks	L3	CO5	PO3

(OR)

10.	a)	List out the differences between unions, structures and arrays.	7 Marks	L1	CO5	PO2
	b)	Write a C program to count number of characters, spaces, lines, words of a file.	7 Marks	L3	CO5	PO3

I B.Tech I Semester (SVEC-20) Regular Examinations April – 2022

DISCRETE MATHEMATICAL STRUCTURES

[Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Show that: $P \vee (\sim P \wedge Q) \Leftrightarrow (P \vee Q)$.	7 Marks	L2	CO1	PO1
	b)	Show that $S \vee R$ is tautologicaly implied by $(P \vee Q) \wedge (P \rightarrow R) \wedge (Q \rightarrow S)$.	7 Marks	L3	CO1	PO1
		(OR)				
2.	a)	Prove (or) Disprove the validity of the following argument. Every living thing is a Plant or animal. Davids dog is alive and it is not a plant. All animals have hearts. Hence, David's dog has a heart.	7 Marks	L3	CO1	PO1
	b)	Show that $(x)(P(x) \vee Q(x)) \Rightarrow (x)P(x) \vee (\exists x)Q(x)$.	7 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Define POSET? Draw a POSET or Hasse diagram for the POSET **[D_1:|]** and determine all maximal and minimal elements and greatest and least elements if they exist. Specify the [**D_{12}:|]** POSET is lattice or not.	7 Marks	L4	CO3	PO2
	b)	What is a Equivalence relation? Let X={1,2,3,4} and R={(1,1), (1,4), (4,1), (4,4), (2,2), (2,3), (3,2),(3,3)}. Determine whether the relation R is equivalence or not and sketch its graph and find equivalence classes.	7 Marks	L3	CO2	PO2
		(OR)				
4.	a)	What is meant by a lattice? Check whether [D_{30}, |] is a lattice or not.	7 Marks	L4	CO3	PO2
	b)	Given $f(x)=x^3+1$, $g(x)=x^2$. Find $f^{-1}(x)$, $g^{-1}(x)$, fog(x).	7 Marks	L2	CO2	PO2

UNIT-III

5.	a)	Justify Whether given set 'S'. S={0,1,2,3,4,5} can be semi-group under binary operation $+_5$, i.e additive modulo 5.	7 Marks	L3	CO3	PO2
	b)	Show that in a group (G, .), if $(a.b)^2 = a^2 . b^2$ $\forall a,b \in G$ then (G, .) is abelian.	7 Marks	L3	CO3	PO2
		(OR)				
6.	a)	State and Prove Lagranges theorem.	7 Marks	L2	CO3	PO2
	b)	Define Monoid and Group. Give an example of Monoid which is not a group.	7 Marks	L2	CO3	PO2

UNIT-IV

7.	a)	There are 30 females and 35 males in the junior class while there are 25 females and 20 males in the senior class. In how many ways can a committee of 10 be chosen so that there are exactly 5 females 3 juniors on the committee?	7 Marks	L3	CO4	PO3
	b)	Solve the recurrence relation $F_n = F_{n-1} + F_{n-2}$, given $F_0 = F_1 = 1$.	7 Marks	L2	CO4	PO3

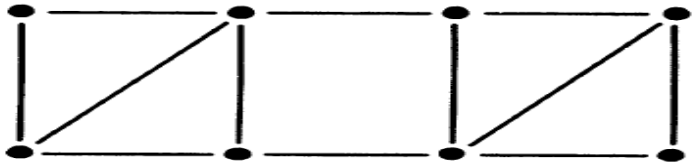
(OR)

8.	a)	How many different license plates are there (allowing repetitions): i) Involving 3 letters and 4 digits if the 3 letters must appear together either at the beginning or at the end of the plate. ii) Involving 1, 2, or 3 letters and1, 2, 3, or 4 digits if the letters must occur together.	7 Marks	L2	CO4	PO3
	b)	Solve the reccurence relation $a_n - 4\,a_{n-1} + 4\,a_{n-2} = 0$, given $a_1 = 1$, $a_2 = 1$.	7 Marks	L2	CO4	PO3

UNIT-V

9.	a)	What is meant by Isomorphism? Determine whether the following graphs G_1 and G_2 Isomorphic or not.	7 Marks	L3	CO5	PO3

	b)	Define the Hamiltonian Path and Hamiltonian Cycle. Determine whether the given graph is Hamiltonian or not.	7 Marks	L3	CO5	PO3



(OR)

10.	a)	Write the procedure to do Breadth first search.	7 Marks	L3	CO5	PO3
	b)	What is a planar graph and discuss Euler formula. Give an example of non-planar graph.	7 Marks	L2	CO5	PO3

FUNDAMENTALS OF BUSINESS INFORMATION SYSTEMS

[Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	How can computer-based information systems help an organization in managerial decision making?	7 Marks	L3	CO1	PO1
	b)	Discuss about the various qualities of information, knowledge and wisdom.	7 Marks	L4	CO1	PO1
		(OR)				
2.	a)	Explain, what are the different steps involved in acquiring and developing a business information system.	7 Marks	L3	CO1	PO1
	b)	Describe some of the major categories of business information system.	7 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Describe some of the major characteristics of microcomputers.	7 Marks	L2	CO2	PO2
	b)	Illustrate different built-in functions of processors in personal computers.	7 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Discuss the process of selecting input and out devices of a computer system.	7 Marks	L2	CO2	PO1
	b)	Write a short note on applications of internet tools.	7 Marks	L4	CO2	PO1
		UNIT-III				
5.	a)	Explain the limitations of database management systems.	7 Marks	L3	CO3	PO1
	b)	Compare and contrast OLAP and OLTP.	7 Marks	L1	CO3	PO1
		(OR)				
6.	a)	Describe the major components of business intelligence.	7 Marks	L2	CO3	PO1
	b)	Explain the importance of architecture data mining when an organization has existing data warehouse.	7 Marks	L3	CO3	PO1
		UNIT-IV				
7.	a)	Explain in detail Firewalls, its purpose and uses in Internet usage.	7 Marks	L3	CO4	PO2
	b)	What are: i) computer networks ii) network Components iii) network types?	7 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Explain various Internet Marketing Strategies to help business improvement.	7 Marks	L3	CO4	PO1
	b)	What are the applications of computer networks?	7 Marks	L1	CO4	PO1
		UNIT-V				
9.	a)	What is the importance of supply chain? What are the different processes in managing the supply chain?	7 Marks	L1	CO5	PO1
	b)	Explain the role of ERP system in procurement process.	7 Marks	L4	CO6	PO1
		(OR)				
10.	a)	Describe how can workflow software and groupware assist in re-engineering of an organisation.	7 Marks	L3	CO5	PO1
	b)	Discuss the implementation and maintenance of Enterprise systems.	7 Marks	L2	CO5	PO1

DIFFERENTIAL EQUATIONS AND MULTIVARIABLE CALCULUS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Structures), Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Solve the differential equation $\frac{d^2y}{dx^2} + \frac{dy}{dx} + y = x^3$.	7 Marks	L3	CO1	PO1
	b)	Solve the differential equation $\frac{d^3y}{dx} + y = \cos(2x-1)$.	7 Marks	L3	CO1	PO1
		(OR)				
2.	a)	Using the method of variation of parameters, solve $y''-y=\frac{2}{(1+e^x)}$.	7 Marks	L3	CO1	PO1
	b)	Find the general solution of the differential equation $(D^2+1)y = x\cos x..$	7 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Construct the partial differential equation by eliminating the arbitrary function ϕ *from* $\phi\ (x^2+y^2+z^2, x+y+z) = 0$.	7 Marks	L3	CO1	PO2
	b)	Find the general solution of the linear partial differential equation $(x^2-yz)\,p+(y^2-zx)\,q=z^2-xy.$	7 Marks	L1	CO1	PO2
		(OR)				
4.	a)	Solve the partial differential equation $(D^2+DD'-6D'^2)z = y\cos x$.	7 Marks	L3	CO1	PO1
	b)	Solve the partial differential equation $(2DD'+D'^2-3D')z = 3\cos(3x-2y).$	7 Marks	L3	CO1	PO2
		UNIT-III				
5.	a)	Determine $\frac{\partial(x,y,z)}{\partial(u,v,w)}$, when $x+y+z=u,\ y+z=uv,\ z=uvw.$	7 Marks	L3	CO2	PO1
	b)	Show that the functions $u=x+y+z,\ v=x^2+y^2+z^2,\ w=x^3+y^3+z^3-3xyz$ are functionally dependent and hence obtain the relation between them.	7 Marks	L3	CO2	PO2
		(OR)				

6.	a)	Examine the maxima and minima of the function $f(x,y) = x^3y^2(1-x-y)$.	7 Marks	L3	CO2	PO2
	b)	Using Lagrange's method of undetermined multipliers, calculate the maximum value of $x^2y^2z^2$ *when* $x+y+z=1$.	7 Marks	L3	CO2	PO1
		UNIT-IV				
7.	a)	Evaluate $\int\int_R xydxdy$, *where R* is the region bounded by the positive quadrant of the circle $x^2+y^2=a^2$.	7 Marks	L5	CO2	PO1
	b)	Applying the change of order of integration, evaluate $\int_0^1\int_x^{\sqrt{x}} xy\,dydx$.	7 Marks	L3	CO2	PO2
		(OR)				
8.	a)	Evaluate $\int_0^1\int_x^{\sqrt{1-x^2}}\int_0^{\sqrt{1-x^2}-y^2} xyz\,dzdydx$.	7 Marks	L5	CO2	PO1
	b)	By changing to polar coordinates, evaluate the double integral $\int_0^a\int_x^{\sqrt{a-y^2}}\left(x^2+y^2\right)dydx$.	7 Marks	L3	CO2	PO2
		UNIT-V				
9.	a)	Determine the directional derivative of the field $\phi = x^2yz + 4xz^2$ at the point (1,-2,1) in the direction of the normal to the surface $x\log z - y^2 = -4$ at the point (-1,2,1).	7 Marks	L3	CO2	PO1
	b)	Evaluate the line integral over a circular path $x^2+y^2=a^2, z=0$ for a vector field $\overline{F} = \sin y\,\overline{i} + x(1+\cos y)\,\overline{j}$.	7 Marks	L5	CO2	PO1
		(OR)				
10.		Verify Gauss divergence theorem for the field $\overline{F} = (x^2-yz)\,\overline{i} + (y^2-zx)\,\overline{j} + (z^2-xy)\,\overline{k}$ taken over a rectangular parallelepiped $0\le x\le a,\ 0\le y\le b,\ 0\le z\le c$.	14 Marks	L5	CO2	PO2

ENGINEERING CHEMISTRY

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe the ion exchange process with a neat diagram. Ion exchange process is more advantageous than zeolite process. Why?	10 Marks	L2	CO1	PO1
	b)	List any four specifications of potable water as per WHO and BIS standards.	4 Marks	L1	CO1	PO6
		(OR)				
2.	a)	Congratulations for running a project on 'drinking water supply by using brackish water' to your college successfully. Outline your action of plan behind the project success.	8 Marks	L2	CO1	PO1
	b)	A liter of standard hard water was prepared by dissolving 1 gram of $CaCO_3$ in distilled water. 50 mL of this water required 46 mL of EDTA solution while 50 mL of the given hard water sample consumed 20 mL of EDTA solution, while the same amount of hard water sample after boiling required 12 mL of EDTA solution. Calculate the carbonate and non-carbonate hardness of water.	6 Marks	L3	CO1	PO2
		UNIT-II				
3.		How can you apply Valence Shell Electron Pair Repulsion theory to predict the shapes of various molecules?	14 Marks	L3	CO2	PO2
		(OR)				
4.		Derive the Schrodinger wave equation and write its significance.	14 Marks	L3	CO2	PO1
		UNIT-III				
5.	a)	Explain the chemistry involved in concentration cell corrosion.	6 Marks	L2	CO3	PO1
	b)	Define electroplating. Explain electroplating of nickel over metal object.	8 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Describe the construction and working of lithium ion battery.	12 Marks	L2	CO3	PO1
	b)	Write the Nernst's equation for the electrode reaction: $M^{n+}(aq) + ne^- \rightarrow M(s)$	2 Marks	L1	CO3	PO1
		UNIT-IV				
7.		Discuss the principle and working of a UV-Visible spectrometer with the help of a block diagram.	14 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Write the principle and applications of Transmission Electron Microscope.	8 Marks	L1	CO4	PO1
	b)	Write the applications of IR spectroscopy.	6 Marks	L1	CO4	PO1

		UNIT-V				
9.	a)	Explain the mechanism of lubrication appears in sewing machines and moving surfaces under very high pressure and speed.	10 Marks	L2	CO5	PO1
	b)	Define lubrication. Recall four major functions of lubricants.	4 Marks	L1	CO5	PO1
		(OR)				
10.		Describe the Fischer-Tropsch method with a neat diagram and write the advantages, disadvantages of synthetic petrol.	14 Marks	L2	CO5	PO1

CODE No.: 20BT1BS03 SVEC-20

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Structures)]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	How Newton's rings are formed? Derive an expression for the wavelength of a monochromatic source using Newton's ring experiment.	10 Marks	L3	CO1	PO2
	b)	In a Newton's rings experiment the diameter of the 10^{th} ring was found to be 0.45cm and the 5^{th} ring was 0.24cm. The wavelength of light source is 5830 Å. Calculate the radius of curvature of given plano-convex lens.	4 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Discuss the Fraunhoffer diffraction at a single slit. Explain the condition for principal maximum and minimum.	10 Marks	L2	CO1	PO1
	b)	List the differences between polarized light and un-polarized light.	4 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Explain the Maxwell's equation in differential form and integral form and its significance.	9 Marks	L2	CO2	PO2
	b)	Outline the divergence and curl of a magnetic field.	5 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Explain the classification of an optical fibre on the basis of refractive index profile and modes of propagation with neat sketches.	10 Marks	L2	CO2	PO1
	b)	In an optical fibre, the material has refractive indices of core and cladding of 1.55 and 1.50 respectively. Calculate the acceptance angle and numerical aperture.	4 Marks	L3	CO2	PO2
		UNIT-III				
5.	a)	Summarize intrinsic semiconductors.	4 Marks	L2	CO3	PO1
	b)	Derive an expression for density of electrons in conduction band of intrinsic semiconductor.	10 Marks	L3	CO3	PO2
		(OR)				
6.	a)	Distinguish between direct and indirect band gap semiconductors.	5 Marks	L4	CO3	PO1
	b)	Describe the construction and working of LED with a neat diagram.	9 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Develop an expression for internal field experienced by an atom in a dielectric material.	11 Marks	L3	CO4	PO2
	b)	What is orientation Polarization?	3 Marks	L1	CO4	PO1
		(OR)				

8.	a)	Explain the origin of magnetic moment in an atom.	8 Marks	L2	CO4	PO1
	b)	Differentiate hard and soft magnetic materials.	6 Marks	L2	CO4	PO1
		UNIT-V				
9.	a)	Distinguish between Type-I and Type-II superconductors.	6 Marks	L4	CO5	PO1
	b)	Discuss the BCS theory of superconductivity.	8 Marks	L2	CO5	PO1
		(OR)				
10.	a)	What are nanomaterials? Why the properties of nanomaterials different from the properties of a bulk material?	7 Marks	L1	CO5	PO1
	b)	Explain the various properties of nanomaterials.	7 Marks	L2	CO5	PO1

CODE No.: 20BT1BS04 SVEC-20

APPLIED PHYSICS

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Outline the structure of an optical fiber. Derive an expression for acceptance angle of a fiber.	9 Marks	L2	CO1	PO1
	b)	Predict acceptance angle, numerical aperture and fractional change in refractive index of given optical fiber, if the refractive indices of the core and the cladding are 1.56 and 1.48 respectively.	5 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Classify the optical fibres based on refractive index profile and modes of propagation with a neat sketch.	9 Marks	L2	CO1	PO1
	b)	Summarize the double crucible technique to fabricate optical fiber.	5 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Define absorption coefficient. Derive an expression for absorption coefficient of a material.	7 Marks	L3	CO1	PO1
	b)	State the acoustic requirements of a good auditorium. Explain how these requirements can be achieved.	7 Marks	L2	CO1	PO1
		(OR)				
4.	a)	Define ultrasonics. Describe the working mechanism of Magnetostriction method for the production of ultrasonics.	8 Marks	L2	CO1	PO1
	b)	Explain any two industrial application of ultrasonics.	6 Marks	L2	CO1	PO1

UNIT-III

5.	a)	Derive an expression for maximum height and horizontal range of a projectile in inclined projection.	7 Marks	L2	CO2	PO2
	b)	Show that the path of a projectile is a parabola in a curvilinear motion.	7 Marks	L1	CO2	PO2
		(OR)				
6.	a)	Distinguish between rectilinear motion and curvilinear motion.	7 Marks	L4	CO2	PO1
	b)	Develop an expression for work energy equation for a body of weight W undergoing a translation motion.	7 Marks	L3	CO2	PO2

UNIT-IV

7.	a)	Define thermal conductivity and derive an expression for coefficient of thermal conductivity.	10 Marks	L3	CO2	PO2
	b)	The total area of glass window is 0.5m². Calculate how much heat is conducted per hour through the plane of thickness of glass 0.6cm. Inside and outside temperature are 23°C and 2°C respectively. Given that K for glass is 1 W/m°C	4 Marks	L3	CO2	PO2
		(OR)				
8.	a)	What is bad conductor of heat transfer? Discuss the Lees' disc method to find thermal conductivity of a bad conductor.	8 Marks	L2	CO2	PO1
	b)	Explain different modes of heat transfer and give their significance.	6 Marks	L2	CO2	PO1

UNIT-V

9.	a)	Discuss the mechanical, chemical and electrical properties of metallic glasses.	7 Marks	L2	CO3	PO1
	b)	Outline the application of metallic glasses.	7 Marks	L2	CO3	PO1
		(OR)				
10.	a)	What are the characteristics of shape memory alloys? Write their properties.	7 Marks	L1	CO3	PO1
	b)	What are the shape memory alloys and outline the properties of NiTi alloy?	7 Marks	L2	CO3	PO1

COMMUNICATIVE ENGLISH

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Structures), Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What is communication and explain the importance of communicating in English.	7 Marks	L2	CO1	PO1
	b)	"The four major skills (LSRW) are essential for effective communication". Discuss.	7 Marks	L2	CO2	PO2
		(OR)				
2.		"Words conceal but actions reveal". Analyze this statement in relation with Non-verbal communication.	14 Marks	L4	CO4	PO10
		UNIT-II				
3.	a)	"Listening involves a more sophisticated mental process than hearing". Explain.	7 Marks	L2	CO2	PO2
	b)	Discuss the possible reasons if a person has poor listening skills.	7 Marks	L2	CO2	PO2
		(OR)				
4.		Discuss barriers to listening and provide appropriate remedies to overcome.	14 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	"One should know how to overcome the stage fright and be confident to grow in academic and professional career". Illustrate.	7 Marks	L2	CO4	PO10
	b)	What is the significance of conference in developing analytical and questioning skills?	7 Marks	L1	CO4	PO10
		(OR)				
6.		Explain how paralinguistic features enhance the impact of our speech and make it live and dynamic.	14 Marks	L2	CO1	PO1
		UNIT-IV				
7.	a)	Explain intensive and extensive reading in detail.	7 Marks	L2	CO2	PO2
	b)	Discuss the importance of topic sentence and its role in analyzing the paragraph.	7 Marks	L2	CO2	PO2
		(OR)				
8.		Discuss SQ3R reading techniques.	14 Marks	L2	CO3	PO5
		UNIT-V				
9.	a)	Explain the characteristics of technical writing.	7 Marks	L2	CO2	PO2
	b)	"Technical writing must be non-discriminatory in all aspects". Discuss.	7 Marks	L2	CO2	PO2
		(OR)				
10.		Elucidate various elements of style in effective technical writing.	14 Marks	L2	CO3	PO5

ENGINEERING MECHANICS

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Determine the resultant of three forces acting at a point as shown in the Fig.1.	7 Marks	L4	CO1	PO1 PO2 PO6 PO10

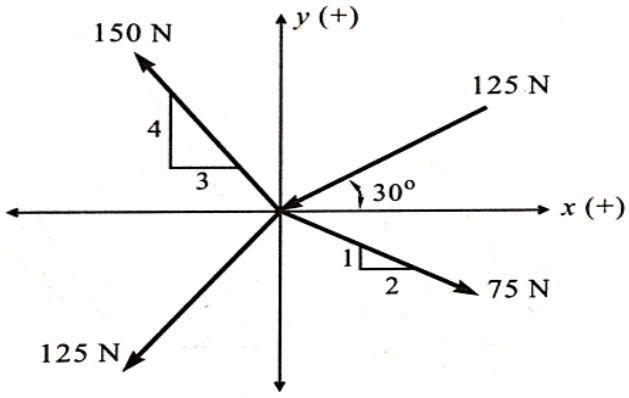

Fig.1

	b)	A circular roller of weight 1000 N and radius 20cm hangs by a tie AB = 40cm and rests against a smooth vertical wall at C as shown in the Fig.2. Determine the tension in the rod and reaction at point C.	7 Marks	L4	CO1	PO1 PO2 PO4 PO6 PO10

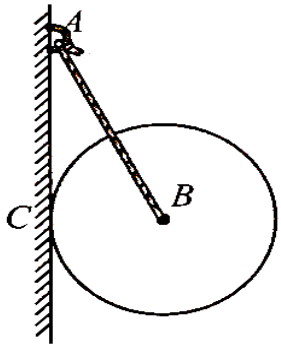

Fig.2

(OR)

2.	a)	Describe different types of beam with neat sketch.	4 Marks	L1	CO1	PO1 PO10
	b)	What kind of frame is the given truss? Determine the forces in all the members of a truss shown in Fig.3. using method of joints.	10 Marks	L4	CO1	PO1 PO2 PO4 PO5 PO6 PO10

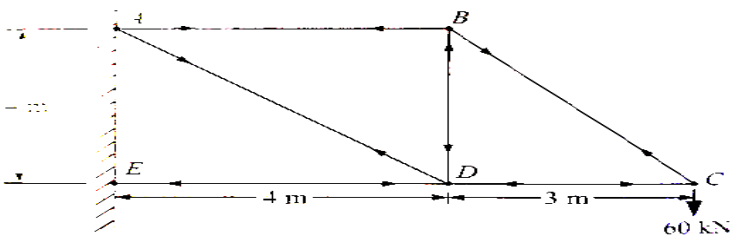

Fig.3

UNIT-II

3.	a)	Explain the laws of friction in detail.	7 Marks	L1	CO2	PO1 PO10
	b)	Determine the frictional force developed on the block shown in the Fig.4 when P = 40 N. The coefficient of friction between block and floor is 0.3.	7 Marks	L4	CO2	PO1 PO2 PO4 PO6 PO10

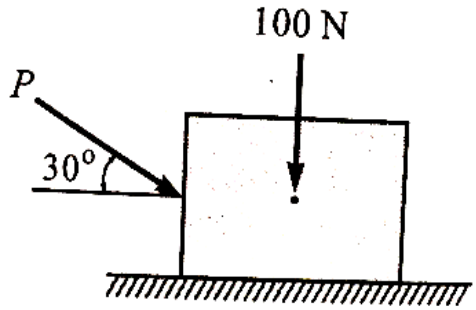

Fig.4

(OR)

4.		A block weighing 1000N rests over block B which weighs 2000N as shown in the Fig.5. Block A is tied to wall with a horizontal string. If the coefficient of friction between blocks A and B is 0.25 and between B and floor is 0.3, what should be the value of P to move the block B if: i) P is horizontal. ii) P acts at 30° upwards to horizontal.	14 Marks	L4	CO2	PO1 PO2 PO4 PO6 PO10

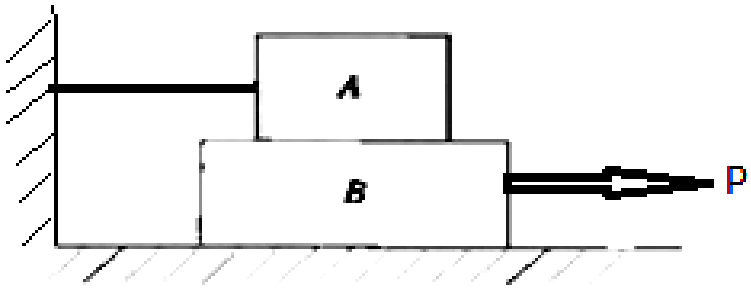

Fig.5

UNIT-III

5.	a)	State and prove the theorem of parallel axis.	4 Marks	L4	CO3	PO1 PO2 PO10
	b)	Find the centroid of the L section shown in below Fig.6.	10 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO10

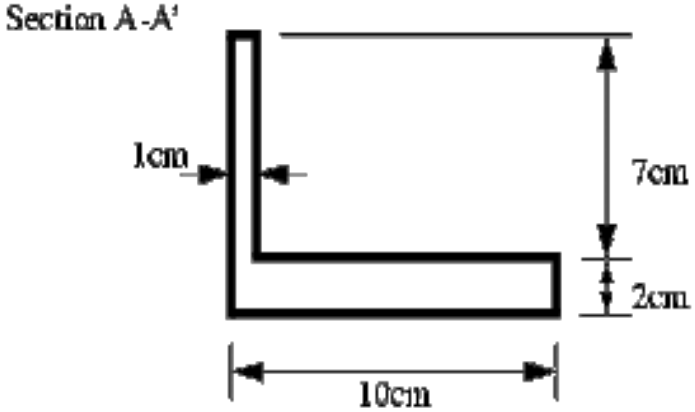

Fig.6

(OR)

6.		Determine the centre of gravity of the plane uniform lamina shown in Fig.7.  Fig.7	14 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO10
		UNIT-IV				
7.	a)	Describe the stress strain relationship for mild steel bar.	7 Marks	L1	CO4	PO1 PO10
	b)	A steel bar 60mm wide, 15mm thick and 350mm long is subjected to an axial pull of 90KN. Determine the changes in the length, width, thickness and the volume of the bar due to the pull applied. Take E = 2 x 10^5 N/mm^2 and μ = 0.32.	7 Marks	L4	CO4	PO1 PO2 PO4 PO5 PO6 PO10
		(OR)				
8.		In a tensile test, a test piece 25mm in diameter, 250mm gauge length, stretched 0.105mm under a pull of 70kN. In a torsion test, the same rod twisted 0.015 radian over a length of 250mm, when a torque of 450Nm was applied. Find the three elastic moduli and the Poison's ratio for the material of the test piece to identify the strength properties of the material.	14 Marks	L4	CO4	PO1 PO2 PO4 PO5 PO6 PO10
		UNIT-V				
9.		A boiler shell is to be made of 15mm thick plate having tensile stress of 120MN/m^2. If the efficiencies of the longitudinal and the circumferential joints are 70% and 30 % respectively, determine : i) Maximum permissible diameter of the shell for an internal pressure of 2 MN/m^2. ii) Permissible intensity of internal pressure if the shell diameter is 1.5m.	14 Marks	L6	CO5	PO1 PO2 PO3 PO4 PO5 PO6 PO10
		(OR)				
10.		A thick wall closed-end cylinder is made up of an aluminum alloy (E = 72 GPa, μ = 0.33), has inside diameter of 200mm and outside diameter of 800mm. The cylinder is subjected to internal fluid pressure of 150MPa. Determine the principal stresses and maximum shear stresses at a point on the inside surface of the cylinder. Also determine the increase in inside diameter due to fluid pressure.	14 Marks	L4	CO5	PO1 PO2 PO4 PO5 PO6 PO10

BASIC ELECTRICAL AND ELECTRONICS ENGINEERING

[Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Structures)]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	The voltage and current through circuit elements are $v = 100 \sin (314 t + 45°)$ volts $i = 10 \sin (314 t + 315°)$ amperes i) Identify the circuit elements. ii) Find the value of the elements. iii) Obtain an expression for power.	8 Marks	L2	CO1	PO2
	b)	Define the following terms i) Real power. ii) Reactive Power. iii) Apparent Power. iv) Power Factor.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Find an equivalent inductance of the network shown in fig. 	7 Marks	L2	CO1	PO1
	b)	State Kirchhoff's laws and validate the laws with a suitable example.	7 Marks	L2	CO1	PO1

UNIT-II

3.	a)	With neat sketch, explain the operation of hydro power plant. How does hydropower plant superior compared to a thermal power plant in terms of environmental prospect?	7 Marks	L2	CO2	PO7
	b)	Explain the operation of MCB with the help of relevant diagram.	4 Marks	L2	CO2	PO1
	c)	Explain the significance of Energy Efficiency ratio.	3 Marks	L2	CO2	PO8
		(OR)				
4.	a)	Mention the differences between MCB and MCCB.	7 Marks	L2	CO2	PO2
	b)	Mention the disadvantages of low power factor. Suggest suitable methods to improve the power factor.	4 Marks	L2	CO2	PO2
	c)	Explain the objective of BEE standard.	3 Marks	L2	CO2	PO8

UNIT-III

5.		Explain the principle of operation and constructional features of a three phase induction motor. Mention its applications.	14 Marks	L2	CO3	PO1
		(OR)				
6.	a)	With neat sketch, demonstrate the working principle of single phase transformer.	7 Marks	L2	CO3	PO1
	b)	Explain the constructional details and working of single phase resistor start induction motor.	7 Marks	L2	CO3	PO1

UNIT-IV

7.		Explain the operation of full-wave-rectifier without filter and derive the expressions for ripple factor, % regulation, efficiency and PIV.	14 Marks	L2	CO4	PO2

(OR)

8.	a)	Discuss the working of NPN and PNP transistor with a neat sketch.	7 Marks	L2	CO4	PO1
	b)	Explain the input and output characteristic of a transistor in Common Emitter configurations.	7 Marks	L2	CO4	PO1

UNIT-V

9.	a)	Draw the block diagram of operational amplifier and explain it in detail.	7 Marks	L2	CO4	PO1
	b)	What are the differences between the inverting and non-inverting terminals? What do you mean by the term "virtual ground"?	7 Marks	L2	CO4	PO2

(OR)

10.	a)	Explain the working of a summing amplifier using Op-Amp and derive its output voltage expression.	7 Marks	L2	CO4	PO1
	b)	Construct a circuit to realize $V_{out} = 5V_1 + 2V_2 - 3V_3$ using Op-Amp.	7 Marks	L3	CO4	PO2

CODE No.: 20BT10301 SVEC-20

MATERIAL SCIENCE AND ENGINEERING

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Classify point defects and explain it with neat sketches.	8 Marks	L2	CO1	PO1
	b)	Draw Iron-Iron-Carbide diagram neatly and explain the critical temperatures, phases and boundaries existing in it.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Define solid solution. Differentiate between Substitutional and Interstitial solid solutions with neat sketches. Also write Hume-Rothery's rule for formation of solid solutions.	7 Marks	L2	CO1	PO1 PO2
	b)	Write all invariant reactions in phase diagram and explain the eutectoid zone briefly with neat sketch.	7 Marks	L2	CO1	PO1 PO2 PO3
		UNIT-II				
3.	a)	"The normalized steel is found to be superior to that of annealed steel". Explain the reason behind this statement.	7 Marks	L3	CO1	PO1 PO2
	b)	List the objectives of heat treatment of metals.	7 Marks	L1	CO1	PO1
		(OR)				
4.	a)	Differentiate between Austempering and Martempering.	7 Marks	L1	CO1	PO2
	b)	Write the importance/objectives of continuous cooling transformation diagrams.	7 Marks	L2	CO1	PO1
		UNIT-III				
5.	a)	Describe the stainless steels with respect to composition, properties and applications.	7 Marks	L1	CO2	PO1 PO2
	b)	Give the classifications and applications of low alloy steels. Also give the specifications of steels.	7 Marks	L2	CO2	PO1
		(OR)				
6.		Give the composition, microstructure and applications of: i) Grey cast iron. ii) Malleable iron. iii) White cast iron.	14 Marks	L1	CO2	PO1 PO2 PO3
		UNIT-IV				
7.	a)	What alloys of copper are mainly used in engineering constructions? State their approximate compositions, properties and fields of use.	8 Marks	L3	CO2	PO1
	b)	List the properties and applications of Nickel based alloys.	6 Marks	L1	CO2	PO1
		(OR)				
8.	a)	Explain the composition, properties and uses of Tool steels.	7 Marks	L2	CO2	PO2
	b)	Write short notes on alloying metals for aluminium alloy.	7 Marks	L1	CO2	PO1
		UNIT-V				
9.	a)	What are the ceramic materials? State their outstanding properties.	7 Marks	L2	CO2	PO3
	b)	Differentiate between particle reinforced and fiber reinforced composites.	7 Marks	L2	CO2	PO3
		(OR)				
10.	a)	Mention advantages, limitations and applications of Metal matrix composites and Ceramic matrix composites.	8 Marks	L1	CO2	PO1 PO2
	b)	Explain classification, properties and applications of polymer	6 Marks	L1	CO2	PO1

matrix composites, state its effect on environment. PO7

BASIC CIVIL AND MECHANICAL ENGINEERING

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

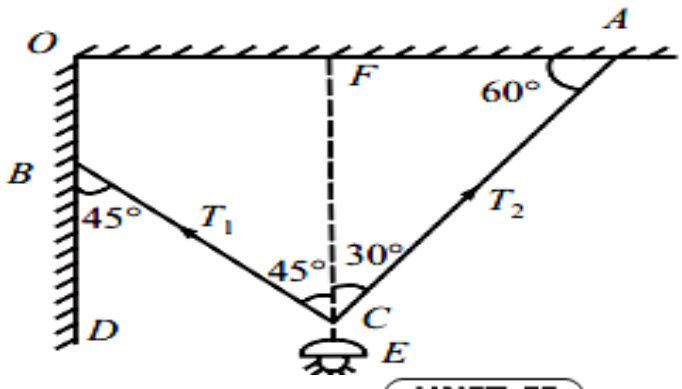
1.	a)	Briefly explain how Civil Engineering contributes for the welfare of society.	7 Marks	L1	CO1	PO1 PO6
	b)	The following observations were taken to a boundary from a chain line.	7 Marks	L4	CO1	PO1 PO2 PO5

Distance in m	0	10	20	30	40	50	60	70
Offset in m	2.4	3.6	4.2	4.8	4.4	3.8	2.8	1.2

Calculate the area enclosed between the chain line, the boundary line and the end offsets by:
i) Trapezoidal rule.
ii) Simpson's rule.

(OR)

2.	a)	Discuss the geological and physical classification of rocks.	6 Marks	L4	CO1	PO1 PO2
	b)	An electric light fixture weighing 15N hangs from a point C, by two strings AC and BC. The string AC is inclined at 60º to the horizontal and BC at 45º to the horizontal as shown in figure below. Determine the forces in the strings AC and BC using Lami's theorem.	8 Marks	L4	CO1	PO1 PO2 PO10



UNIT-II

3.	a)	What are the requirements of good foundation?	6 Marks	L2	CO1	PO1 PO8
	b)	Explain different types of bonds used in brick masonry with sketches.	8 Marks	L2	CO1	PO1 PO5 PO10

(OR)

4.	a)	Mention different types of roofs and explain briefly.	7 Marks	L2	CO1	PO1
	b)	What is rainwater harvesting? Explain about types of rainwater harvesting systems.	7 Marks	L4	CO1	PO1 PO5 PO7

UNIT-III

5.		Explain the working principle of 4 stroke petrol engine with neat sketch.	14 Marks	L2	CO2	PO1
		(OR)				
6.		Describe the working principle of centrifugal pump with neat sketch.	14 Marks	L2	CO2	PO1

UNIT-IV

7.	a)	Explain the different types of belt drives with neat sketches.	7 Marks	L2	CO2	PO1
	b)	Derive the expression for power transmitted by the belt drive.	7 Marks	L2	CO2	PO1 PO2
		(OR)				
8.	a)	List out various types of gears and write its applications.	7 Marks	L1	CO2	PO1
	b)	Derive the expression for power transmitted by the simple gear train.	7 Marks	L2	CO2	PO1 PO2

UNIT-V

9.		What are the advantages of casting process and mention its applications?	14 Marks	L2	CO2	PO1
		(OR)				
10.		Name the different types of machining processes on lathe machine with suitable examples.	14 Marks	L2	CO2	PO1

CODE No.: 20BT11201 SVEC-20

PROGRAMMING FOR PROBLEM SOLVING

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Structures), Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the structure of a C program with a neat diagram.	7 Marks	L2	CO1	PO1
	b)	Define Token. Discuss the tokens of the C language.	7 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Demonstrate the use of formatted input and output functions with a program.	7 Marks	L2	CO1	PO1
	b)	Write a C program that demonstrates a Type conversion process.	7 Marks	L3	CO1	PO3
		UNIT-II				
3.	a)	Explain the conditional statements of C language.	7 Marks	L2	CO1	PO1
	b)	Write a C program to find the largest among three given numbers.	7 Marks	L3	CO1	PO3
		(OR)				
4.	a)	Define Flowchart. Draw the flowchart that shows the addition of two numbers.	7 Marks	L2	CO2	PO3
	b)	Explain the problem solving aspects.	7 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Define an Array. Explain the declaration, initialization and accessing of Array elements with a suitable program.	7 Marks	L2	CO3	PO1
	b)	Write a C program to implement the addition of two matrices.	7 Marks	L3	CO3	PO3
		(OR)				
6.	a)	Write the syntax of a function and list its advantages. Explain call-by-value with a suitable example.	7 Marks	L2	CO3	PO1
	b)	Write a C program that demonstrates the scope of *auto* and *extern* variables.	7 Marks	L3	CO3	PO3
		UNIT-IV				
7.	a)	Compare ***void*** pointer and ***NULL*** pointer with a suitable program.	7 Marks	L2	CO3	PO2
	b)	Define call-by-address. Write a C program to swap the values of two variables using the call-by-address.	7 Marks	L3	CO3	PO3
		(OR)				
8.	a)	Explain the following with a suitable example: i) Pointer arithmetic. ii) Array of pointers.	7 Marks	L2	CO4	PO1
	b)	Write a C program to allocate the memory dynamically to an Array of length *N*. Write the necessary code to store and display *N* integer elements.	7 Marks	L3	CO4	PO3
		UNIT-V				

9.	a)	Explain the structure declaration, initialization and accessing the members of structure with a neat syntax.	7 Marks	L2	CO5	PO1
	b)	Write a C program to store and retrieve the details include name, roll-no, branch, section and phone-no of *N* students.	7 Marks	L3	CO5	PO3
		(OR)				
10.	a)	Compare and contrast Structure and Union.	7 Marks	L2	CO5	PO2
	b)	Write a C program that uses pointers to initialize the members of the structure.	7 Marks	L3	CO5	PO3

CODE No.: 20BT12901 SVEC-20

DISCRETE MATHEMATICAL STRUCTURES

[Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Using Truth Table show that $\left((P \vee Q) \wedge \sim (\sim P \wedge (\sim Q \vee \sim R))\right) \vee \left(\sim P \wedge Q\right) \vee \left(\sim P \wedge \sim R\right)$ is a tautology.	7 Marks	L4	CO1	PO2
	b)	Obtain principal conjunctive normal form for the formula Q∧(P∨~Q) without using Truth Table.	7 Marks	L3	CO1	PO4
		(OR)				
2.	a)	Are these premises $p \to r, q \to r, (p \vee q) \to r$ consistent? Justify the answer.	7 Marks	L2	CO1	PO1
	b)	Write the following statement in the symbolic form. "Mark is poor but happy" "Mark is rich or unhappy" "Mark is neither rich nor unhappy" "Mark is poor or he is both rich and unhappy"	7 Marks	L3	CO1	PO2
		UNIT-II				
3.	a)	Let X = {1, 2, 3} Y = {p, q} and Z = {a, b} Also: $f: X \to Y$ be f = {(1, p), (2, q), (3, q)} $g: Y \to Z$ be g = {(p, b), (q, p)} Find *fog*, *fof* , *gog* .	7 Marks	L2	CO2	PO1
	b)	Let S= {1,2,3,4,5,6,7,8,9,10} and the relation R on the set S is R = { (x , y) / x + y=10}. What are the properties of on R?	7 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Give an example for symmetric, ant symmetric, compatibility and transitive relations.	7 Marks	L3	CO2	PO2
	b)	Illustrate that (S, /) is a lattice under poset, where S = (1,2,3,6) and / is for divisibility.	7 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Let z be the set of integers and addition, multiplication are binary operations on set (+,*) i) Find whether (z, +) is monoid or not. ii) Find whether (z, +) is group or not.	7 Marks	L3	CO3	PO3
	b)	In a monoid, show that the set of all left invertible element form a sub monoid.	7 Marks	L3	CO3	PO4
		(OR)				
6.	a)	Let **f** be a homomorphism from a group G_1 to the group G_2 then show that if e_1 is the identity in G_1 and e_2 is the identity in G_2 then $f(e_1) = e_2$	7 Marks	L3	CO3	PO4
	b)	(G,*) is a group and (a, b)€G then show that $(a * b)^{-1} = b^{-1} * a^{-1}$.	7 Marks	L3	CO3	PO4

		UNIT-IV				
7.	a)	Compute the number of six letter combinations of the letter of English alphabet. If no letter is to appear in the combination more than 2 times.	7 Marks	L3	CO4	PO3
	b)	Find the coefficient of x^{23} and x^{32} for the function $(1 + x^5 + x^9)^{10}$.	7 Marks	L3	CO4	PO3
		(OR)				
8.	a)	How many ways are there for 10 red balls, 8 green balls and 6 blue balls to be in a line, so that at least 2 balls of same color must be placed side by side?	7 Marks	L3	CO4	PO3
	b)	Show that x-y is a factor of the polynomial $x^n - y^n$ where $n \geq 0$ using Mathematical induction	7 Marks	L3	CO4	PO4
		UNIT-V				
9.	a)	Define the following with an example. i) Connected Graph. ii) Connected component. iii) Complete Graph. iv) Sub Graph with an example for each.	7 Marks	L2	CO5	PO1
	b)	Show that the following graphs G and H are not isomorphic. 	7 Marks	L3	CO5	PO4
		(OR)				
10.	a)	How many paths of length four are there from *a* to *d* in the simple graph of G given below. 	7 Marks	L3	CO5	PO3
	b)	Draw the complete graph of *K*5 with vertices A, B, C, D, E. And also find sub graph of *K*5 with 4 vertices.	7 Marks	L3	CO5	PO1

FUNDAMENTALS OF BUSINESS INFORMATION SYSTEMS

[Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	"The survival of a large organization depends upon access to high-quality information". Justify this statement with relevant examples.	7 Marks	L2	CO1	PO2
	b)	Explain the levels of managerial decision making process.	7 Marks	L2	CO1	PO1
		(OR)				
2.	a)	How can computer-based information systems help an organization to achieve a strategic advantage over its competitors?	7 Marks	L3	CO1	PO1
	b)	Explain the reasons for the adoption of enterprise resource planning systems in organizations.	7 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Explain the component of computer system with neat diagram.	7 Marks	L3	CO2	PO1
	b)	Discuss about the reasons for the continued use of mainframe computers?	7 Marks	L4	CO2	PO2
		(OR)				
4.	a)	Illustrate different built-in functions of Spreadsheet program.	7 Marks	L2	CO2	PO2
	b)	Write a short note on applications of internet tools.	7 Marks	L4	CO2	PO1
		UNIT-III				
5.	a)	What is data mining and how can it bring benefits to a business organization?	7 Marks	L2	CO3	PO1
	b)	Compare and contrast OLAP and OLTP.	7 Marks	L2	CO3	PO2
		(OR)				
6.	a)	Explain the role of data marts when an organization has an existing data warehouse.	7 Marks	L3	CO3	PO1
	b)	What are the advantages of a real-time data warehouse?	7 Marks	L1	CO3	PO1
		UNIT-IV				
7.	a)	Describe the two main functions of an Internet Service Provider (ISP). How does ISP differ from applications service providers?	7 Marks	L3	CO4	PO2
	b)	Name the three ways in installing a local-area network which reduce costs. Explain how it is achieved.	7 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Explain the term 'electronic data interchange'. What is its relevance to companies now that the Internet is widely used for data exchange?	7 Marks	L2	CO4	PO1
	b)	Explain the purpose of a network operating system.	7 Marks	L1	CO4	PO1
		UNIT-V				
9.	a)	Compare and contrast different levels of integration in Supply Chain Management (SCM) with suitable example.	7 Marks	L4	CO6	PO2
	b)	How transaction processing systems are managed, given their mission-critical role in many organizations?	7 Marks	L4	CO5	PO2
		(OR)				
10.	a)	How workflow software and groupware assist in re-engineering of an organization?	7 Marks	L3	CO5	PO2
	b)	Discuss special precautions needed to be taken when using IT for managing human resources.	7 Marks	L2	CO6	PO1

DIFFERENTIAL EQUATIONS AND MULTIVARIABLE CALCULUS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Business Systems, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science)]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Find the general solution of differential equation $\frac{d^2y}{dx^2}+2\frac{dy}{dx}+2y=e^{-2x}+\cos 2x.$	7Marks	L1	CO1	PO1
	b)	Solve the differential equation $\frac{d^2y}{dx^2}-5\frac{dy}{dx}+6y=e^x\sin x.$	7 Marks	L3	CO1	PO1
		(OR)				
2.	a)	Solve the differential equation $\frac{d^2x}{dt^2}+x=t\cos 2t$ given $x=0,\frac{dx}{dt}=0$ at $t=0$.	7 Marks	L3	CO1	PO2
	b)	By applying the method of variation of parameters, solve the differential equation $\frac{d^2y}{dx^2}+a^2y=\sec ax.$	7 Marks	L3	CO1	PO1

UNIT-II

3.	a)	Form a partial differential equation by eliminating the arbitrary functions from $z=f(x-it)+g(x-it)$.	7 Marks	L3	CO1	PO2
	b)	Solve $x(z^2-y^2)\frac{\partial z}{\partial x}+y(x^2-z^2)\frac{\partial z}{\partial y}=z(y^2-x^2)$.	7 Marks	L3	CO1	PO1
		(OR)				
4.	a)	Analyze and solve the partial differential equation $\frac{\partial^2 z}{\partial x^2}-2\frac{\partial^2 z}{\partial x\partial y}+\frac{\partial^2 z}{\partial y^2}=\sin(2x+3y)$.	7 Marks	L3	CO1	PO2
	b)	Find the complete solution of the partial differential equation $\frac{\partial^2 z}{\partial x^2}+\frac{\partial^2 z}{\partial x\partial y}+\frac{\partial z}{\partial y}-z=e^{-x}$.	7 Marks	L5	CO1	PO2

UNIT-III

5.	a)	Show that the functions $u = xy + yz + zx, v = x^2 + y^2 + z^2$ and $w = x + y + z$ are functionally related. Find the relation between them.	7 Marks	L2	CO2	PO1
	b)	Apply partial derivative technique to find the stationary values for the function $x^2y^2 - 5x^2 - 8xy - 5y^2$ and decide at what points the function become maximum and minimum.	7 Marks	L1	CO2	PO2
		(OR)				
6.	a)	If $u = \frac{yz}{x}; v = \frac{zx}{y}; w = \frac{xy}{z}$, show that $\frac{\partial(u,v,w)}{\partial(x,y,z)} = 4$.	7 Marks	L2	CO2	PO1
	b)	By the technique of Lagrange's undetermined multipliers establish a minimum value for $x^2 + y^2 + z^2$ subject to the condition $xyz = a^3$.	7 Marks	L3	CO2	PO1

UNIT-IV

7.	a)	Evaluate $\int_0^5 \int_0^{x^2} x(x^2 + y^2)dxdy$.	7 Marks	L5	CO2	PO1
	b)	Change the order of integration in $\int_0^1 \int_{x^2}^{2-x} xydydx$ and hence evaluate the double integral.	7 Marks	L4	CO2	PO1
		(OR)				
8.	a)	Evaluate the integral, by the technique of transforming into polar coordinates. $\int_0^\infty \int_0^\infty e^{-(x^2+y^2)}dxdy$.	7 Marks	L5	CO2	PO2
	b)	Evaluate $\iint_R ydxdy$ where R is the region bounded by the parabolas $y^2 = 4x$ and $x^2 = 4y$.	7 Marks	L5	CO2	PO2

UNIT-V

9.	a)	Define the divergence of a vector point function and find $div\vec{f}$ where $\vec{f} = r^n\vec{r}$. Find **n** if it is solenoidal.	7 Marks	L1	CO3	PO1
	b)	Define directional derivative and find the directional derivative of $f = x^2 - y^2 + 2z^2$ at the point $P = (1,2,3)$ in the direction of the line PQ, where $Q = (5, 0, 4)$.	7 Marks	L1	CO3	PO1
		(OR)				
10.	a)	Define surface integral and evaluate $\int_S \vec{F} \cdot \vec{n}dS$ where $\vec{F} = z\vec{i} + x\vec{j} - 3y^2z\vec{k}$ and S is the surface $x^2 + y^2 = 16$ included in the first octant between $z = 0$ and $z = 5$.	7 Marks	L5	CO3	PO2
	b)	State Gauss divergence theorem and use it to evaluate $\iint (x\vec{i} + y\vec{j} + z^2\vec{k}).\vec{n}.dS$, where S is the surface bounded by the cone $x^2 + y^2 = z^2$ in the plane $z = 4$.	7 Marks	L3	CO3	PO2

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		Define hardness of water and explain the estimation of hardness of water by EDTA method.	14 Marks	L2	CO1	PO1
		(OR)				
2.	a)	What are the ion exchange resins? Discuss about the ion exchange process.	9 Marks	L2	CO1	PO1
	b)	Write the specifications of potable water as per BIS and WHO standards.	5 Marks	L1	CO1	PO6
		UNIT-II				
3.		Apply the Schrodinger wave equation to the particle in one dimensional box.	14 Marks	L3	CO2	PO1
		(OR)				
4.	a)	Discuss the main postulates of molecular orbital theory.	10 Marks	L2	CO2	PO1
	b)	Write the Schrodinger wave equation and give the significance of Ψ and Ψ^2.	4 Marks	L1	CO2	PO1
		UNIT-III				
5.		Define corrosion and discuss various factors influencing the rate of corrosion.	14 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Describe the construction of Lithium ion batteries and mention its real life applications.	7 Marks	L2	CO3	PO1
	b)	Explain construction and working of H_2-O_2 fuel cell and write their drawbacks and applications.	7 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Describe the various fundamental modes of molecular vibrations of IR spectroscopy.	8 Marks	L2	CO4	PO1
	b)	Recall the applications of TEM technique.	6 Marks	L1	CO4	PO1
		(OR)				
8.		State the Beer-lamberts law and explain the working of UV- spectrophotometer with block diagram.	14 Marks	L2	CO4	PO1
		UNIT-V				
9.	a)	Explain in detail about Fischer-Tropsch method for the manufacturing of synthetic petrol.	8 Marks	L2	CO5	PO1
	b)	Discuss the following properties of lubricants. i) Flash point and fire point. ii) Cloud point and pour point.	6 Marks	L2	CO5	PO1
		(OR)				
10.	a)	Discuss about the functions of lubricants and write a note on Solid lubricants.	8 Marks	L2	CO5	PO1
	b)	Calculate the Grass Calorific Value (GCV) and Net Calorific Value (NCV) of a sample of coal containing compositions 80% of Carbon; 7% of Hydrogen; 3.5% of Sulphur; 2.1% Nitrogen and 4.4% of ash.	6 Marks	L3	CO5	PO2

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science)]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the necessary theory to determine the wavelength of a monochromatic light using Newton's ring method.	10 Marks	L2	CO1	PO1
	b)	In a Newton's rings experiment the diameter of the 15^{th} ring was found to be 0.59 cm and the 5^{th} ring was 0.36 cm. The radius of curvature of plano-convex lens is 100 cm, then predict the wavelength of light.	4 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Describe the construction and working of a Nicol's Prism.	10 Marks	L2	CO1	PO2
	b)	The refractive indices of mica for ordinary and extraordinary rays are 1.586 and 1.592 with a wavelength of 5460 **Å**. Predict the thickness of mica sheet to act as a quarter wave plate.	4 Marks	L1	CO1	PO2
		UNIT-II				
3.	a)	Outline the divergence and curl of electric and magnetic fields.	6 Marks	L2	CO2	PO1
	b)	Recall the principle behind the functioning of optical fiber. Derive an expression for acceptance angle of an optical fibre.	8 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Using a block diagram, explain the optical fibre communication system.	10 Marks	L2	CO2	PO1
	b)	Summarise the applications of optical fibres.	4 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Recall the concept of intrinsic and extrinsic semiconductors.	4 Marks	L1	CO3	PO1
	b)	Derive an expression for density of electrons in a conduction band of an intrinsic semiconductor.	10 Marks	L3	CO3	PO2
		(OR)				
6.	a)	State Hall effect. Derive an expression for Hall coefficient. Mention its applications.	10 Marks	L3	CO3	PO1
	b)	The R_H of a specimen is 3.66×10^{-4} m^3c^{-1}. Its resistivity is $8.93 \times 10^{-3}\Omega m$. Calculatemobility ($\mu$) and concentration (n) of the charge carriers.	4 Marks	L3	CO3	PO2
		UNIT-IV				
7.	a)	Develop the theory and expression for internal field experienced by an atom in a dielectric material due to an external filed.	10 Marks	L3	CO4	PO2
	b)	List any four applications of dielectrics.	4 Marks	L1	CO4	PO1
		(OR)				
8.	a)	Extend the discussion on hysteresis of ferro-magnetic materials.	7 Marks	L2	CO4	PO1
	b)	Define magnetic moment. Explain the origin of magnetic moment at the atomic level.	7 Marks	L2	CO4	PO2

UNIT-V

9.	a)	Explain Meissner effect. How it is used to classify Type-I and Type-II superconductors?	10 Marks	L2	CO5	PO2
	b)	List any four applications of superconductors.	4 Marks	L1	CO5	PO1
		(OR)				
10.	a)	Discuss the Physical, Optical and Magnetic properties of nanomaterials.	7 Marks	L2	CO5	PO1
	b)	Describe the pulsed laser deposition technique to synthesize nanomaterials.	7 Marks	L2	CO5	PO2

I B.Tech I Semester (SVEC-20) Supplementary Examinations March – 2022

ENGINEERING MECHANICS

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	An eye bolt is being pulled from ground by three forces as shown in Fig.1. Determine the resultant.	7 Marks	L4	CO1	PO1 PO2 PO6 PO10

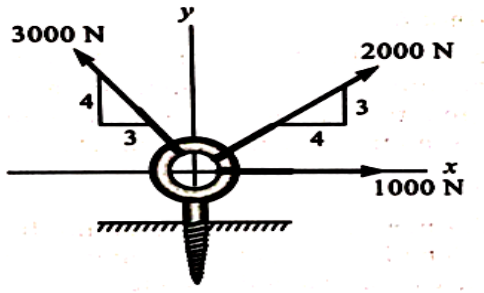

Fig.1

	b)	Calculate the reactions at the supports as shown in the given Fig.2.	7 Marks	L4	CO1	PO1 PO2 PO4 PO6 PO10

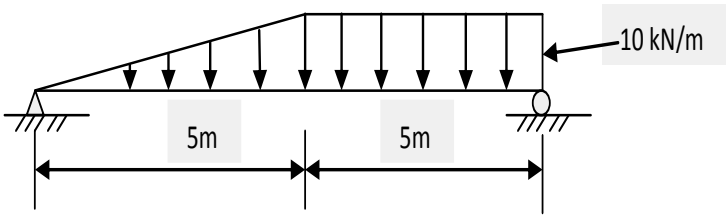

Fig.2

(OR)

2.	a)	Explain different of supports with neat sketch.	4 Marks	L1	CO1	PO1 PO10
	b)	What kind of frame is the given truss? Determine the forces in all the members of a truss shown in Fig.3. using method of joints.	10 Marks	L4	CO1	PO1 PO2 PO4 PO5 PO6 PO10

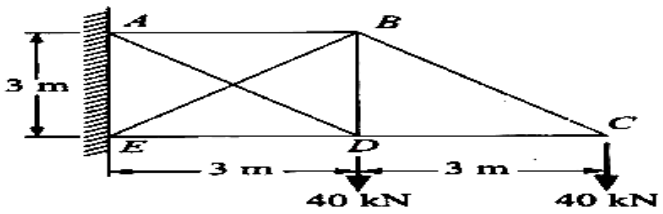

Fig.3

UNIT-II

3.	a)	Determine the frictional force developed on the block shown in the Fig.4. when P = 80 N. The coefficient of friction between block and floor is 0.3.	7 Marks	L4	CO2	PO1 PO2 PO4 PO6 PO10

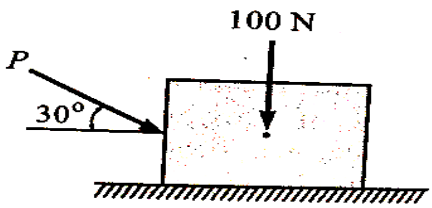

Fig.4

	b)	A block weighing 500 N just starts moving down a rough inclined plane when supported by a force of 200 N acting parallel to the plane in upward direction. The same block is on the verge of moving up the plane when pulled by a force of 300 N acting parallel to the plane. Find the inclination of the plane and the coefficient of friction between the inclined plane and the block.	7 Marks	L4	CO2	PO1 PO2 PO4 PO6 PO10

(OR)

4.	a)	A 100 N force acts as shown in the Fig.5. on a 300 N block placed on an inclined plane. The coefficient of friction between the block and plane is 0.25. Determine value of the friction force.	7 Marks	L4	CO2	PO1 PO2 PO4 PO6 PO10

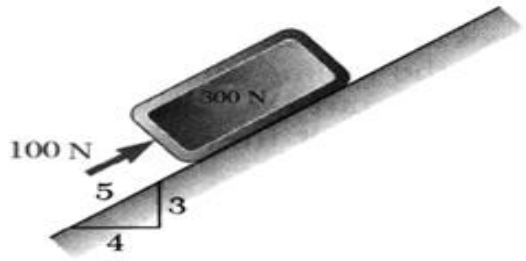

Fig.5

	b)	A ladder 4 m long and of 250 N weight is placed against a vertical wall in a position where its inclination to the vertical is 30^0. A man weighing 700 N climbs the ladder. At what position will he induce slipping? The co-efficient of friction for both the contact surfaces of the ladder with the wall and the floor is 0.2.	7 Marks	L4	CO2	PO1 PO2 PO4 PO6 PO10

UNIT-III

5.		For the composite area shown in the Fig.6, determine the position of the centroid.	14 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO10

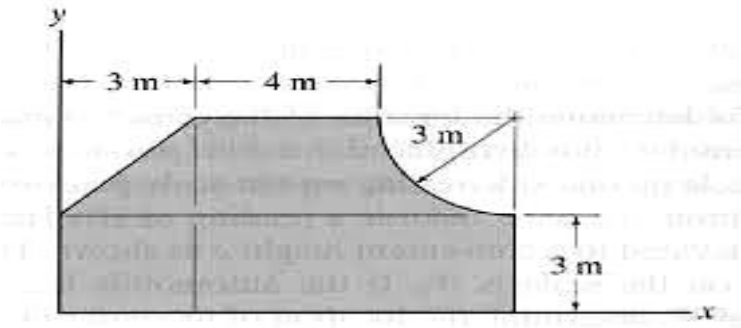

Fig.6

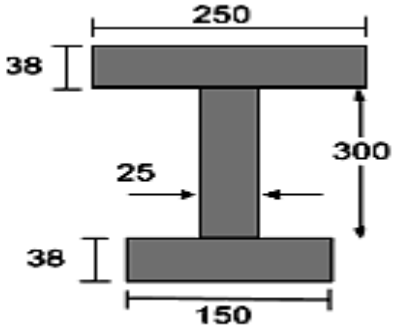
(OR)

6.		Determine the moment of inertia and the radius of gyration of the I - section shown in the Fig.7.	14 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO10



All dimensions are in mm.

Fig.7

UNIT-IV

7.	a)	State Poisson's Ratio. Obtain the volumetric strain of a rectangular bar and a cylindrical rod.	7 Marks	L4	CO4	PO1 PO2 PO10
	b)	A compound bar consist of a central steel strip 25 mm wide and 6.4 mm thick placed between two strips of brass each 25 mm wide and 't' mm thick. The strips are firmly fixed together to form a compound bar of rectangular section 20 mm wide and (2t + 6.4) mm thick. Determine i) The thickness of the brass strips which will make the apparent modulus of elasticity of compound bar 1.57×10^5 N/mm^2 and ii) the maximum axial pull the bar can then carry if the stress is not to exceed 157 N/mm^2, in either the brass or steel. Take the values of E for steel and brass as 2.07×10^5 N/mm^2 and 1.14×10^5 N/mm^2 respectively.	7 Marks	L4	CO4	PO1 PO2 PO4 PO5 PO6 PO10

(OR)

8.	a)	Derive the relationship between Modulus of Elasticity, Modulus of rigidity and Bulk Modulus.	10 Marks	L4	CO4	PO1 PO2 PO10
	b)	A 20 mm diameter brass rod was subjected to a tensile load of 40 kN. The extension of the rod was found to be 254 divisions in the length of 200 mm. If each division is equal to 0.001 mm, find the elastic modulus of brass to indentify the elastic property.	4 Marks	L4	CO4	PO1 PO2 PO4 PO5 PO6 PO10

UNIT-V

9.	a)	A cylindrical shell 4 m long which is closed at the ends has an internal diameter of 1 m and a wall thickness of 15 mm. Calculate the circumferential and the longitudinal stresses induced and also the change in dimension of the shell if it is subjected to an internal pressure of 1.5 MN/m^2.	7 Marks	L4	CO5	PO1 PO2 PO4 PO5 PO6 PO10
	b)	Calculate the thickness of the metal required for a cast iron main 800 mm in diameter for water at a pressure head of 100 m if the maximum permissible tensile stress is 20 MN/m^2 and weight of water is 10 kN/m^3.	7 Marks	L4	CO5	PO1 PO2 PO3 PO4 PO5 PO6 PO10

(OR)

10.		The external diameter of steel collar is 240 mm and internal diameter is decreased by 0.15 mm when shrunk on to a solid steel shaft of 150 mm diameter. Find : i) Radial pressure between the collar and the shaft. ii) Circumferential stress at the inner surface of the tube. iii) Reduction in diameter of the shaft. Take: E= 205 GN/m^2, and μ= 0.304.	14 Marks	L4	CO5	PO1 PO2 PO4 PO5 PO6 PO10

BASIC ELECTRICAL AND ELECTRONICS ENGINEERING

[Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science)]

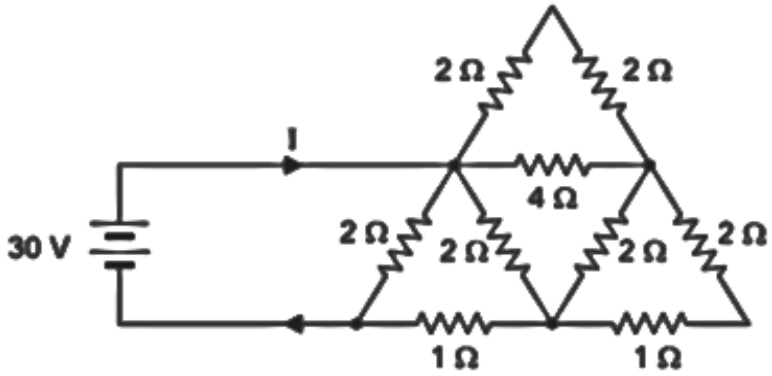
Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	State and verify kirchhoff's voltage law for the given circuit.	7 Marks	L2	CO1	PO2

	b)	Determine the current (I) delivered by the source in the network.	7 Marks	L2	CO1	PO2



(OR)

2.	a)	A sinusoidal voltage v = 50 sin ωt is applied to a circuit. The current in the circuit is given by i = 25 sin (ωt-60^{o}). Determine the circuit elements, apparent power, average power, reactive power and power factor.	7 Marks	L2	CO1	PO2
	b)	With neat sketch, explain how the single phase sinusoidal waveform is generated with relevant principles.	7 Marks	L2	CO1	PO1

UNIT-II

3.	a)	With neat sketch, explain the typical layout of electrical grid.	4 Marks	L2	CO2	PO1
	b)	Explain the significance of power factor and enumerate the methods of improving the power factor.	7 Marks	L2	CO2	PO1
	c)	What are the various BEE standards that have to be considered while manufacturing any electrical product?	3 Marks	L2	CO2	PO8

(OR)

4.	a)	With a neat sketch, explain the operation of thermal power plant in detail. Also, comment on the impact of thermal power plant operation on environment.	11 Marks	L2	CO2	PO7
	b)	Explain the significance of Energy Efficiency ratio which needs to be followed while rating an appliance.	3 Marks	L2	CO2	PO8
		UNIT-III				
5.	a)	Derive the **emf** equation of single phase transformer.	7 Marks	L2	CO3	PO1
	b)	Explain the construction of permanent magnet DC motor.	7 Marks	L2	CO3	PO1
		(OR)				
6.		Explain the constructional details and working of stepper motor. List the applications of stepper motor.	14 Marks	L2	CO3	PO1
		UNIT-IV				
7.		Explain the operation of a half-wave-rectifier without filter and derive the expressions for ripple factor, % regulation, Efficiency and PIV.	14 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Explain the V-I characteristics of Zener diode and draw the waveform.	7 Marks	L2	CO4	PO1
	b)	Describe the significance of the terms, ‘α’ and ‘β’. Establish a relation between them.	7 Marks	L2	CO4	PO1
		UNIT-V				
9.	a)	Discuss in detail about level translator and its significance in the circuits	7 Marks	L2	CO4	PO1
	b)	Construct a circuit to realize $V_{out} = V_1+V_2-V_3$ using Op-Amp.	7 Marks	L3	CO4	PO3
		(OR)				
10.	a)	Explain the working of a comparator using Op-Amp. What are its limitations?	7 Marks	L2	CO4	PO1
	b)	Explain why an Op-Amp is called operational amplifier. What mathematical operations can be performed using Op-Amp?	7 Marks	L2	CO4	PO2

MATERIAL SCIENCE AND ENGINEERING

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss briefly the following structures for metallic elements: i) Body centered cubic. ii) Face centered cubic. iii) Hexagon close-packed.	7 Marks	L1	CO1	PO1
	b)	Demonstrate the Edge and Screw dislocations with neat sketches.	7 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Draw Fe-Fe_3C phase diagram and explain the phase transformation reactions in the diagram.	8 Marks	L3	CO1	PO1 PO2
	b)	State Gibb's Phase rule. What is its importance?	6 Marks	L1	CO1	PO1

UNIT-II

3.	a)	Define annealing. Differentiate between full annealing and process annealing.	7 Marks	L1	CO1	PO1
	b)	Classify the various types of hardening treatments. Explain flame and induction hardening treatment.	7 Marks	L2	CO1	PO1 PO2
		(OR)				
4.	a)	Explain Time Temperature Transformation (TTT) diagram for eutectoid steel.	7 Marks	L2	CO1	PO1 PO2
	b)	Carburizing heat treatment is generally done on low carbon steels. Why?	7 Marks	L3	CO1	PO1 PO2

UNIT-III

5.	a)	List the properties and applications of Stainless and Tool steels.	7 Marks	L1	CO2	PO1
	b)	Draw the micro structure of plain carbon steels and write the applications of it.	7 Marks	L3	CO2	PO1 PO2
		(OR)				
6.	a)	What are different types of cast irons? Draw the micro structure of any two types of cast irons. Give composition and applications of each.	7 Marks	L2	CO2	PO1 PO2
	b)	Interpret the effect of alloying elements on properties of steels.	7 Marks	L2	CO2	PO1 PO2

UNIT-IV

7.	a)	State and describe some of the important properties of nonferrous metals and alloys.	7 Marks	L1	CO2	PO1
	b)	Differentiate between brasses and bronzes in view of properties and applications.	7 Marks	L3	CO2	PO1 PO2
		(OR)				
8.	a)	Explain the composition, properties and uses of Titanium alloys.	7 Marks	L2	CO2	PO1
	b)	What is aluminium? Explain the types, properties and uses of aluminium alloys in detail.	7 Marks	L1	CO2	PO1

UNIT-V

9.	a)	What are ceramics? How ceramics are classified? Write the advantages and applications of ceramics.	7 Marks	L1	CO2	PO2
	b)	Describe properties and applications of polymers.	7 Marks	L1	CO2	PO1
		(OR)				
10.	a)	Briefly explain various properties and applications of Fiber reinforced composites.	7 Marks	L2	CO2	PO1
	b)	Write short notes on Metal Matrix composites and Ceramic-matrix composites and write few words on its impact on environmental.	7 Marks	L1	CO2	PO1 PO7

BASIC CIVIL AND MECHANICAL ENGINEERING

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What is surveying? State its objectives and uses.	7 Marks	L1	CO1	PO1
	b)	The following staff readings were observed successively with a level. The instrument has been shifted after the second and fifth reading: 0.675, 1.230, 0.750, 2.565, 2.225, 1.935, 1.835, 3.220 The first reading was taken with staff held on benchmark of RL 100.000 m. Enter the readings in a page of level book and calculate the RL of all points. Apply arithmetic checks.	7 Marks	L4	CO1	PO1 PO2 PO10
		(OR)				
2.	a)	Describe the properties of good bricks.	7 Marks	L1	CO1	PO1 PO8
	b)	Briefly explain system of forces.	7 Marks	L1	CO1	PO1 PO10

UNIT-II

3.	a)	Distinguish between load bearing wall and partition wall.	7 Marks	L4	CO1	PO1 PO2
	b)	Define bearing capacity of soil and explain briefly about various types of settlement in soil.	7 Marks	L1	CO1	PO1 PO6
		(OR)				
4.	a)	What is rainwater harvesting? Explain about types of rainwater harvesting systems.	8 Marks	L2	CO1	PO1 PO5 PO7
	b)	Briefly explain the classification of dams.	6 Marks	L4	CO1	PO1 PO2

UNIT-III

5.		Explain the working principle of 2 stroke diesel engine with neat sketch.	14 Marks	L2	CO2	PO1
		(OR)				
6.		Describe the working principle of impulse turbine with neat sketch.	14 Marks	L2	CO2	PO1

UNIT-IV

7.		Derive the expression for length of the open belt drive.	14 Marks	L2	CO2	PO1 PO2
		(OR)				
8.	a)	Differentiate between gear drives and belt drives.	7 Marks	L1	CO2	PO1
	b)	Derive the expression for power transmitted by the simple gear train.	7 Marks	L2	CO2	PO1 PO2

UNIT-V

9.	Give an illustrative explanation of casting process. Summarize the factors influencing the quality of finished casting.	14 Marks	L2	CO2	PO1
	(OR)				
10.	Describe the process of turning and taper turning operations performed on a lathe.	14 Marks	L2	CO2	PO1

PROGRAMMING FOR PROBLEM SOLVING

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science), Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the data types in C language with example.	7 Marks	L2	CO1	PO1
	b)	Define unary operators. How many operands are associated with unary operator explain with suitable example?	7 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Explain Arithmetic, Logical, Relational and Conditional Operators with example.	7 Marks	L2	CO1	PO1
	b)	Write a C program to find the simple interest for the given amount, time and rate of interest.	7 Marks	L3	CO1	PO3
		UNIT-II				
3.	a)	Compare pre-test and post-test loops with an example.	7 Marks	L2	CO1	PO2
	b)	Write a C program to perform arithmetic operations using switch statement.	7 Marks	L3	CO1	PO3
		(OR)				
4.	a)	Define flowchart. Draw the flowchart to check whether a number given by the user is odd or even.	7 Marks	L2	CO2	PO3
	b)	Explain the top-down design technique for solving the given problem.	7 Marks	L2	CO2	PO5
		UNIT-III				
5.	a)	Write a C program to sort the given list of numbers.	7 Marks	L2	CO3	PO3
	b)	Write a C program to find the factorial of a given number. Define a separate function to find factorial.	7 Marks	L3	CO3	PO3
		(OR)				
6.	a)	Compare and contrast the storage classes.	7 Marks	L2	CO3	PO2
	b)	Write a C program to find a sub-string in a main string.	7 Marks	L3	CO3	PO3
		UNIT-IV				
7.	a)	Write a C Program to Add 'N' numbers using Pointers.	7 Marks	L2	CO3	PO3
	b)	Explain different types of dynamic memory allocation functions.	7 Marks	L3	CO3	PO1
		(OR)				
8.	a)	Write a C Program to Sort a list of Names using Array of Pointers.	7 Marks	L3	CO4	PO3
	b)	Differentiate Call by value and Call by Reference.	7 Marks	L2	CO4	PO2
		UNIT-V				
9.	a)	With an example, explain how to declare and access structure members.	7 Marks	L2	CO5	PO1
	b)	Write a C program to Read, Display, Add and Multiply two Complex Numbers. (Note: Represent Complex Number using Structure)	7 Marks	L3	CO5	PO3
		(OR)				
10.	a)	Compare unions with structure.	7 Marks	L2	CO5	PO2
	b)	State Self-Referential Structure. Explain with an example.	7 Marks	L2	CO5	PO1

DISCRETE MATHEMATICAL STRUCTURES

[Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Show that the following premises are inconsistent. i) If jack misses any classes through illness, then he fails high school. ii) If jack fails high school, then he is uneducated. iii) If jack reads a lot of books, then he is not uneducated. iv) Jack misses many classes through illness and reads a lot of books.	8 Marks	L2	CO1	PO1
	b)	Write the following statements in symbolic form. i) If either Jerry takes Calculus or Ken takes Sociology, then Larry will take English. ii) If it rains today, then I buy an umbrella.	6 Marks	L3	CO1	PO4

(OR)

2.	a)	Construct the truth tables for : i) $[((P \rightarrow Q) \rightarrow R) \rightarrow S]$ ii) $((P \vee Q) \wedge (\sim R)) \leftrightarrow Q$	7 Marks	L3	CO1	PO3
	b)	Construct PDNF for P→((P→Q)∧~(~Q∨~P)) without using the truth table.	7 Marks	L3	CO1	PO3

UNIT-II

3.	a)	Determine the value of ***fog, gof, f^{-1}og*** for the functions f and g: R → R (set of real numbers) defined by $f(x) = x^2 - 2$, $g(x) = x + 4$.	7 Marks	L3	CO2	PO3
	b)	Show that the relation "Greater than or equal to" is a partial ordering on the set of integers.	7 Marks	L4	CO2	PO2

(OR)

4.	a)	Design the Hasse diagram on the set S= {1, 2, 3, 5, 6, 10, 15, 30} and the relation ≤ be such that x ≤ y is x divides y.	7 Marks	L4	CO2	PO4
	b)	Let the relation on set X = {1, 2, 3, 4, 5, 6} be given by {(1, 2), (1, 3), (1, 6), (2, 3), (3, 5), (3, 6), (4, 5), (5, 6)}. Find the Maximum Compatibility Block with matrixand also draw the graph.	7 Marks	L4	CO2	PO3

UNIT-III

5.	a)	With an example, explain monoid homomorphism preserves the property of invertibility.	7 Marks	L2	CO3	PO1
	b)	Find whether (z, +) and (z, *) satisfies Semi-group or not where z be the set of integers and addition, multiplication (+, *) are binary operations.	7 Marks	L3	CO3	PO2

(OR)

6.	a)	Let G={1, -1, i, -i} which form a group under multiplication and I = group of all integers under addition. Prove that the mapping $f: I \rightarrow G$ such that $f(x) = i^x$ for all $x \in I$ is a homomorphism.	7 Marks	L4	CO3	PO2
	b)	Show that any group G is abelian, if $(ab)^2 = a^2b^2$ for all a, b € R.	7 Marks	L4	CO3	PO2

UNIT-IV

7.	a)	Find the general solution of the recurrence relation $\mathbf{a_n - 7a_{n-2} + 10_{n-4} = 0}$, for $n \geq 4$.	7 Marks	L3	CO4	PO4
	b)	Find the coefficient of x^{20} the function $\mathbf{(x^3 + x^4 + x^5 + \ldots..)^5}$.	7 Marks	L1	CO4	PO1
		(OR)				
8.	a)	How many 5 digit number can be composed of the digit in the number12334233.	7 Marks	L3	CO4	PO2
	b)	In how many ways a committee of 5 members can be formed from a group of 8 scientists, 6 psychologists and 4 philanthropists?	7 Marks	L3	CO4	PO2

UNIT-V

9.	a)	Prove that a complete graph K_n is planar if f $n \leq 4$.	7 Marks	L3	CO5	PO2
	b)	Explain Tree in detail with an example and list the properties and Applications of Trees.	7 Marks	L2	CO5	PO1
		(OR)				
10.	a)	Determine whether the following graphs are isomorphic.	7 Marks	L2	CO5	PO2

	b)	Prove that if a graph G has exactly two vertices of odd degree there is a path joining between these two vertices.	7 Marks	L4	CO5	PO2

ENGINEERING CHEMISTRY

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Four samples of water are collected at Naravari Palli (**NP**), Pullaiahgari Palli (**PP**), Kunchivari Palli (**KP**) and the other at Bandara Palli (**BP**). 100 ml of the each water sample collected at NP, PP, KP, and BP requires 28, 26, 20, 18 mL of EDTA solution on titrations respectively. 100 ml of SHW (0.28 gms of $CaCO_3$ per liter) requires 24 ml of EDTA solution on titration. Calculate and compare the degree of hardness and write the chemical reactions involved in titration.	8 Marks
	b)	Fluorides in water. Discuss effects on human Health and Nalgonda technique for deFluoridation of water.	6 Marks

(OR)

2	a)	Rishika want to investigate the reason for unforeseen explosion of Home boiler. After explosion the following deposits were found on analysis of boiler pieces. $CaSO_4$, $CaSiO_3$, $MgSiO_3$, Fe_2O_3, $Mg(OH)_2$, Na_2FeO_2, $CaCO_3$. Looking at the data Rishika, discussed about how boiler has suffered before explosion predicting the impurities present in water. Can you write the report discussing the attributes for explosion?	8 Marks
	b)	Write the chemistry of estimation of Water hardness by EDTA method? Discuss why PH = 10 is to be maintained.	6 Marks

UNIT-II

3	a)	Discuss the preparation, properties and uses of PTFE and PMMA Resin.	8 Marks
	b)	Explain engineering applications of conducting polymers.	6 Marks

(OR)

4	a)	Distinguish between thermo plastics and thermo sets.	7 Marks
	b)	Explain the conduction mechanism of polyaniline.	7 Marks

UNIT-III

5	a)	Discuss the synthesis of Biodiesel by Trans esterification method.	7 Marks
	b)	Enumerate advantages, disadvantages and important applications of Biodiesel.	7 Marks

(OR)

6	a)	Write informative notes on recent trends in Nano Technology and future trends of Green Chemistry.	10 Marks
	b)	Illustrate disadvantages of Nanomaterials.	4 Marks

UNIT-IV

7	a)	Distinguish Electrolytic cell and Electrochemical cell with neat diagrams and explain their in house and Industrial applications in your everyday life.	10 Marks
	b)	Explain the significance of the title of this outcome, “Energy from Electron Transfer.”	4 Marks

(OR)

8	a)	Using values from the table of standard reduction potentials, calculate the cell potentials, ∇G and log K under standard conditions of the following cells.
		i) $Al(s)/Al^{3+}(aq)//Ag^{+}(aq)/Ag(s)$
		ii) $Zn(s)/Zn^{2+}(aq)//Cr^{3+}(aq)/Cr(s)$
		iii) $Fe(s)/Fe^{2+}(aq)//Hg^{2+}(aq)/Hg(l)$
			6 Marks

	b)	Identify the type of battery that is truly the power behind everyday life. They start and power vehicles, back up uninterruptible operations like hospitals, railroad signals, weapons systems, and air traffic controls, and help electric utilities shift loads among grids. Explain the chemistry with neat diagram.	8 Marks

UNIT-V

9	a)	Analyze the possible means of rendering a metal cathodic to protect it from corrosion.	7 Marks
	b)	What is metallic corrosion? Pin holes on tin coated iron are more prone to corrosion of iron than those on zinc coated iron. Why?	7 Marks

(OR)

10	a)	How will you assess the situation and identify the type of corrosion from the physical manifestation of the corroded components / parts?	8 Marks
	b)	Discuss the functions of lubricants with suitable examples.	6 Marks

ENGINEERING PHYSICS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	With the help of suitable diagram, explain the principle, construction and working of an optical fiber as a wave guide.	10 Marks
	b)	In an optical fibre, the material has refractive indices of core and cladding of 1.6 and 1.3 respectively. What is the value of critical angle? Also calculate the acceptance angle and acceptance cone.	4 Marks
		(OR)	
2	a)	Classify the different types of optical fibers.	10 Marks
	b)	List the applications of optical fibers in various fields.	4 Marks

UNIT-II

3	a)	Explain the de-Broglie hypothesis of duality of material particles.	6 Marks
	b)	Derive time independent Schrodinger's wave equation for a free particle.	8 Marks
		(OR)	
4		Show that the energies of a particle in infinite potential box are quantized.	14 Marks

UNIT-III

5	a)	Explain direct and indirect band gap semiconducting materials.	6 Marks
	b)	What is the principle of LED? Describe the construction and working of LED.	8 Marks
		(OR)	
6	a)	Explain the **ac** frequency dependence of different polarizability in dielectrics.	5 Marks
	b)	Explain ionic and orientation polarization.	9 Marks

UNIT-IV

7	a)	Define: i) Super conductor. ii) Critical temperature. iii) Cooper pair.	4 Marks
	b)	Explain penetration depth in superconductivity. Write any five applications of superconductors.	10 Marks
		(OR)	
8	a)	Explain the BCS theory of superconductivity.	7 Marks
	b)	Explain Josephson effects and their applications.	7 Marks

UNIT-V

9	a)	Describe the principle factors which affect the properties of nanomaterials.	5 Marks
	b)	Explain in detail about the fabrication of nanomaterials by pulsed laser deposition.	9 Marks
		(OR)	
10	a)	Define nanomaterial. Give the classification of nanomaterials.	4 Marks
	b)	Discuss the synthesis of nanomaterial by using pulsed laser deposition method. List the applications of nanomaterials in various fields of science and technology.	10 Marks

TRANSFORMATION TECHNIQUES AND PARTIAL DIFFERENTIAL EQUATIONS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Obtain the Fourier expansion of $x \sin x$ as a cosine series in $(0, \pi)$ and hence show that $\frac{1}{1.3} - \frac{1}{3.5} + \frac{1}{5.7} - \ldots = \frac{1}{4}(\pi - 2)$. 14 Marks

(OR)

2 Expand $f(x) = \begin{cases} \frac{1}{4} - x, & if \quad 0 < x < \frac{1}{2} \\ x - \frac{3}{4}, & if \quad \frac{1}{2} < x < 1 \end{cases}$ as a Fourier series of sine terms. 14 Marks

UNIT-II

3 Show that inverse finite Fourier sine transform of $F_s(n) = \frac{1}{\pi}\left\{1 + \cos n\pi - 2\cos\frac{n\pi}{2}\right\}$ is $f(x) = \begin{cases} 1, & 0 < x < \pi/2 \\ -1, & \pi/2 < x < \pi \end{cases}$. 14 Marks

(OR)

4 Find the Fourier sine and cosine transforms of $f(x) = \frac{e^{-ax}}{x}$ and deduce that $\int_0^\infty \frac{e^{-ax} - e^{-bx}}{x} \sin sx dx = \tan^{-1}(s/a) - \tan^{-1}(s/b)$. 14 Marks

UNIT-III

5 a) Using convolution theorem, evaluate $L^{-1}\left(\frac{s}{(s^2 + a^2)^2}\right)$. 7 Marks

b) Using Laplace Transform method solve $(D^2 + 1)y = \sin t \sin 2t$, $t > 0$, if $y = 1$, $Dy = 0$ when $t = 0$. 7 Marks

(OR)

6 a) Find the inverse transform of (i) $\log\left(\frac{s+3}{s+4}\right)$ and (ii) $\cot^{-1} s$. 7 Marks

b) Solve by Laplace Transforms, $\frac{d^3y}{dx^3} + 2\frac{d^2y}{dx^2} - \frac{dy}{dx} - 2y = 0$, $y(0) = 1$, $y'(0) = y''(0) = 2$. 7 Marks

UNIT-IV

7 a) Write the initial value theorem and using it find u_1, u_2 from $U(z) = \frac{4z^2 + 5z + 14}{(z-1)^4}$. 7 Marks

b) Find by applying the properties of Z – transforms 7 Marks
(i) $Z\left[na^n\right]$ and (ii) $Z\left[n^2a^n\right]$.

(OR)

8 a) Apply shifting theorem, evaluate $Z\left[\cos(n+1)\theta\right]$. 7 Marks

b) Applying Z-transforms, solve the difference equation $\mathbf{u_{k+2} - 2u_{k+1} + 3u_k = 2^k}$ with $u_0 = 2$, $u_1 = 1$. 7 Marks

UNIT-V

9 The points of trisection of a tightly stretched string of length l with fixed ends are pulled aside through a distance d on opposite sides of the position of equilibrium and the string is released from rest. Construct a mathematical expression for the displacement of the string at any subsequent time and show that the midpoint of the string is always at rest. 14 Marks

(OR)

10 a) Solve the linear differential equation $\mathbf{(x^2 - yz)\,p + (y^2 - zx)\,q = z^2 - xy.}$ 7 Marks

b) Solve the equation $x^2\frac{\partial u}{\partial x} + y^2\frac{\partial u}{\partial y} = 0$ by applying method of separation of variables. 7 Marks

BUILDING MATERIALS AND CONSTRUCTION TECHNOLOGY

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Why you choose stone as a building material?	4 Marks
	b)	Analyze the characteristics of good stone.	5 Marks
	c)	List out the types of tests on stones.	5 Marks
		(OR)	
2	a)	Write down the tests on bricks and their purposes.	4 Marks
	b)	Define the term frog.	5 Marks
	c)	Summarize the names of bricks for special use.	5 Marks

UNIT-II

3		Illustrate the different kinds of lime available for use in construction works.	14 Marks
		(OR)	
4		Describe the preparation of lime mortar.	14 Marks

UNIT-III

5		Describe the types of hot rolled steel sections and cold formed steel sections.	14 Marks
		(OR)	
6		Associate the various uses of aluminum with respect to construction works.	14 Marks

UNIT-IV

7	a)	Define bearing capacity and safe bearing capacity of the soil. Sketch the following types of foundations and briefly discuss. i) Grillage Foundation. ii) RCC Raft Foundation.	7 Marks
	b)	List the classification of stone masonry with neat sketches. Show any four joints in stone masonry.	7 Marks
		(OR)	
8	a)	Write a short notes on: i) Cavity walls. ii) Partition walls.	7 Marks
	b)	Why brick masonry is preferred over stone masonry?	7 Marks

UNIT-V

9	a)	Explain briefly: i) Stucco plastering. ii) Lath plastering.	7 Marks
	b)	Illustrate the objectives of plastering. List the requirements of good plaster.	7 Marks
		(OR)	
10	a)	List the constituents of the paint and mention their specific function.	7 Marks
	b)	List the different alternative building materials and explain briefly any two of them.	7 Marks

ENGINEERING MECHANICS
[Civil Engineering, Mechanical Engineering]

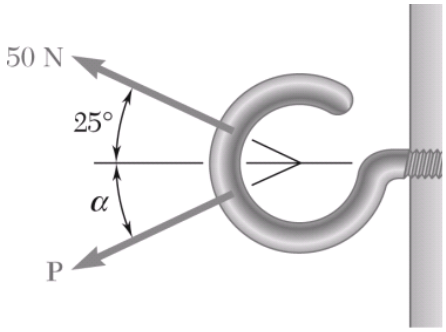
Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

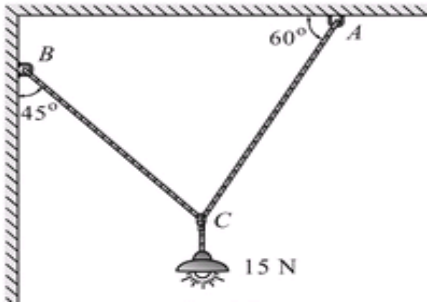
UNIT-I

1 a) If the maximum and minimum resultant forces of two forces acting on a particle are 40 kN and 10 kN respectively, then what would be the type of two forces? 3 Marks

b) Two forces are applied as shown to a hook support. Knowing that the magnitude of **P** is 35 N, determine the required angle α, if the resultant R of the two forces applied to the support is to be horizontal. 4 Marks



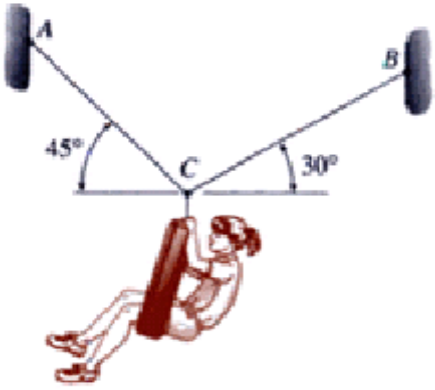
c) An electric light weighing 15N hangs from a point C by two strings AC and BC as shown in the figure, AC is inclined at 60^0 to the horizontal and BC at 45^0 to the vertical as shown. Find the forces in the strings AC and BC. 7 Marks



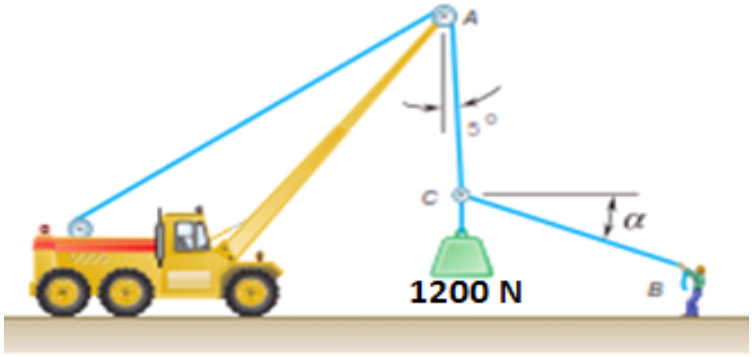
(OR)

2 a) State and explain Lami's theorem. 3 Marks

b) A girl is sitting in an old automobile tire which is suspended as shown. If the girl and the tire together have a mass of 60 kg, determine the tensions in the ropes AC and BC. 5 Marks



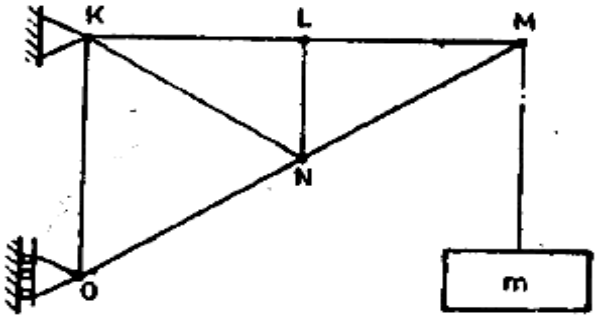
c) Knowing that $\alpha = 20^0$, determine the tension: 6 Marks
i) in cable AC, ii) in rope BC.



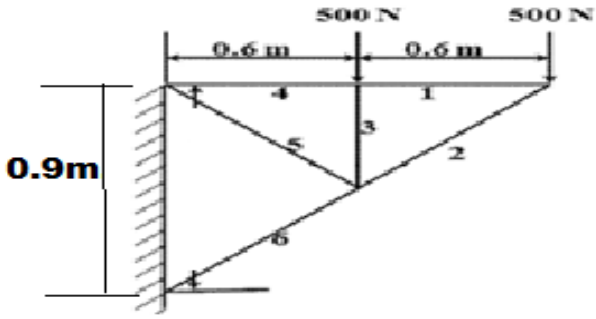
UNIT-II

3 a) What are the common types of supports used in two dimensions? Explain the support reactions with suitable sketches. 3 Marks

b) The figure shows a pin-jointed plane truss loaded at the point M by hanging a mass of 100 kg. Determine the load in members LN and NK of the truss. 4 Marks

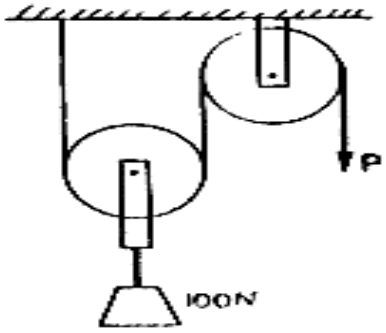


c) Determine the axial force in each bar of the plane truss loaded as shown in the figure. 7 Marks

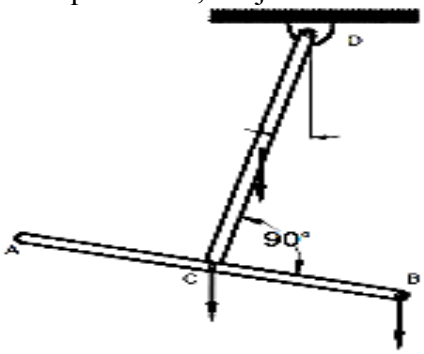


(OR)

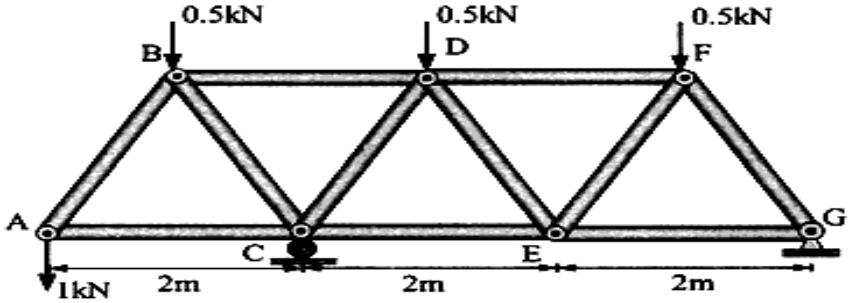
4 a) Using the principle of virtual work, determine the effort P required to hold the weight of 100N in equilibrium in a system of two frictionless pulleys of the same diameter as shown in figure. 3 Marks



b) A rigid **T** is made out of metal bars AB and CD as shown in figure each 1.4 m long and weigh 40 kg and 30 kg respectively. It is supported in to a vertical plane. Compute angle **α** for equilibrium, subjected to a load of 500N at B. 5 Marks

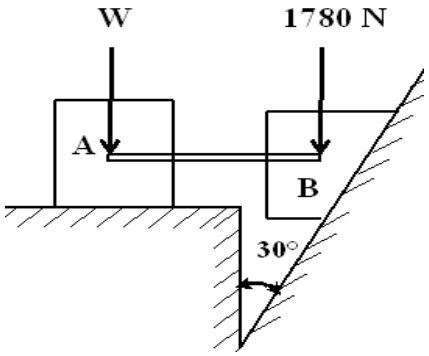


c) Using method of sections determine the forces in members BD and CD of the truss as shown in fig. All triangles are equilateral. 6 Marks

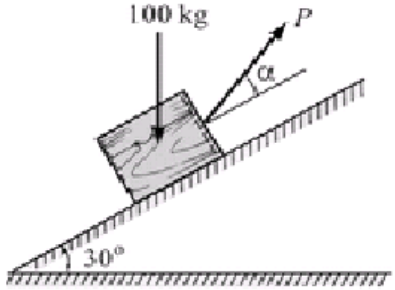


UNIT-III

5 a) Two blocks connected by a horizontal link AB are supported on two rough planes as shown in figure. The coefficient of friction for block A on the horizontal plane is μ=0.4. The angle of friction for block B on the inclined plane is φ=15°. What is the smallest weight W of block A for which equilibrium of the system can exist? 7 Marks

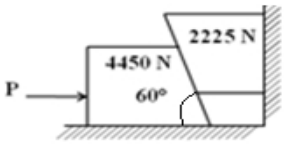


b) Determine the minimum value of force P required to cause motion of a 100 kg block to impend upon a 30° plane shown in figure. The coefficient of friction is 0.2. 7 Marks



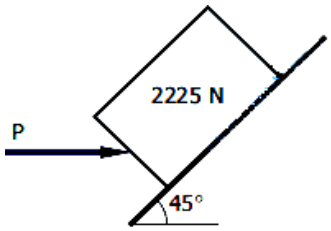
(OR)

6 a) Referring to the figure the coefficient of friction is as follows: 8 Marks
0.25 at the floor, 0.30 at the wall, 0.20 between the blocks. Find the minimum value of a horizontal force P applied to the lower block that will .hold the system in equilibrium.



b) The 2225 N block shown in figure P-507 is in contact with 45° incline. The coefficient of static friction is 0.25. Compute the value of the horizontal force P necessary to 6 Marks

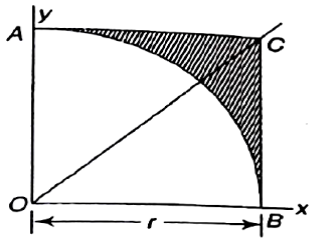
i) just start the block up the incline.
ii) just prevent motion down the incline.



UNIT-IV

7 a) Define the terms Polar Moment of Inertia with suitable sketch. 3 Marks

b) Calculate the polar moment of inertia about 'O' of the shaded area shown in the figure. 6 Marks

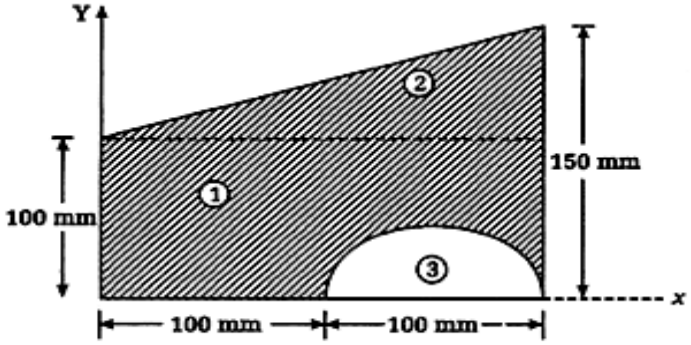


c) Explain the method of finding the centroids of composite area with suitable example. 5 Marks

(OR)

8 a) State the difference between centroid and center of gravity. 3 Marks

b) A semi-circular area is removed from the trapezium as shown in the figure. Determine the centroid of the remaining shaded area. (All dimensions in mm). 7 Marks



c) State and explain Pappus-Guldinus theorems for surface of revolution and volume of revolution. 4 Marks

UNIT-V

9 a) i) State impulse-momenutum priniciple. 4 Marks

ii) A bullet of mass1kg if fired with a velocity of ***u*** m/s from a gun of mass 10kg. Find the ratio of kinetic energies of bullet and gun.

b) A vehicle of mass 600 kg and moving with a velocity of 12 m/s strikes another vehicle of mass 400 kg, moving at 9 m/s in the same direction. Both the vehicles get coupled together due to impact. Find the common velocity with which the two vehicles will move. Also find the loss of kinetic energy due to impact. 3 Marks

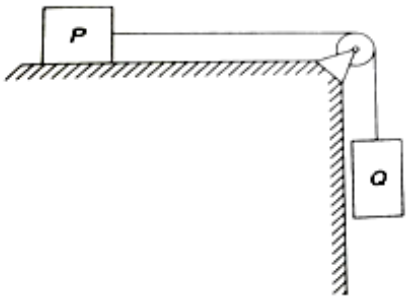
c) A car of mass 1500 kg is uniformly accelerated. Its speed increases from 50kmph to 75kmph after travelling a distance of 200m. The resistance to the motion of the car is 0.2% of the weight of the car. Determine (i) the maximum power required, (ii) the power required to maintain a constant speed of 75kmph. 7 Marks

(OR)

10 a) i) A car starts from rest with a constant acceleration of 4m/sec^2. Determine the distance travelled in the 7th second. 4 Marks

ii) A fly wheel of 550mm diameter is brought uniformly from rest to a speed of 350 r.p.m in 20 sec. Find velocity and acceleration of a point on its rim 3 seconds after starting from rest.

b) Two blocks of weights P and Q are connected by a flexible but inextensible cord and supported as shown in Fig. If the coefficient of friction between the block P and the horizontal surface is μ and all other friction is negligible, find (i) the acceleration of the system and (ii) the tensile force S in the cord. The following numerical data are given: P= 53.4N; Q=26.7N; μ=1/3. 5 Marks



c) A man weighing 712N stands in a boat so that he is 4.5m from a pier on the shore as shown in figure. He walks 2.4m in the boat toward the pier and then stops. How far from the pier will be at the end of this time? The boat weighs 890N, and there is assumed to be no friction between it and the water. 5 Marks

BASIC ELECTRICAL AND ELECTRONICS ENGINEERING
[Civil Engineering, Mechanical Engineering]

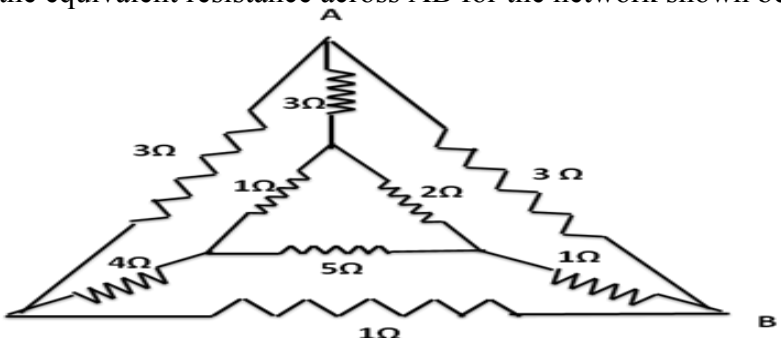
Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1 a) State and explain the Kirchhoff's laws with suitable examples. 7 Marks

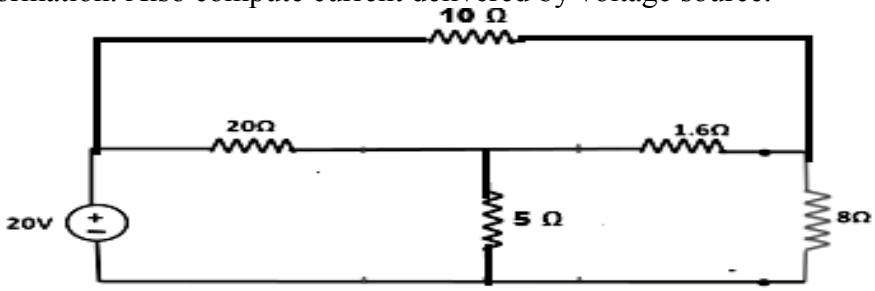
b) Compute the equivalent resistance across AB for the network shown below. 7 Marks



(OR)

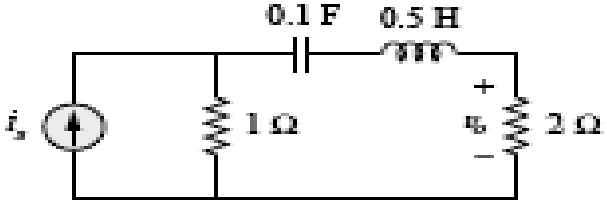
2 a) State and explain the terms node, loop, path with examples. 6 Marks

b) Compute the equivalent resistance across voltage source using star/delta transformation. Also compute current delivered by voltage source. 8 Marks

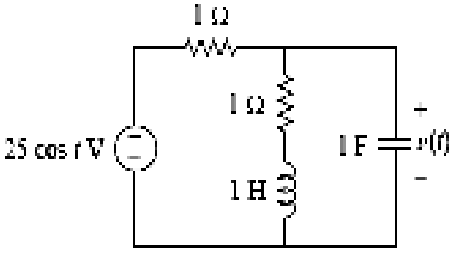


UNIT-II

3 a) If the voltage across 2 Ω resistor V_0 = -5 cos 2t, Compute the source current i_s. And also draw the phasor diagram representing source current and V_0. 7 Marks



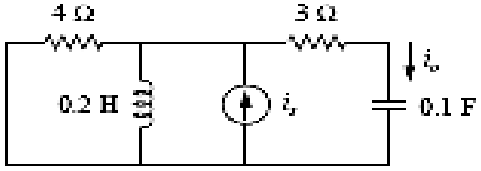
b) Compute the V(t), shown in figure below. 7 Marks



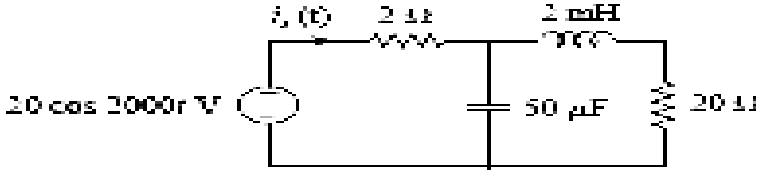
(OR)

4 a) If I_s = 20 sin (10t+15^0) A in the circuit shown in figure, compute the current 7 Marks

passing through capacitor i_0.



b) Compute the $I_s(t)$, circuit shown in figure below. Also compute the power delivered by voltage source. Represent the voltage and current relations in phasor diagram. 7 Marks



UNIT-III

5 a) Explain the construction of a single-phase transformer. 5 Marks

b) A transformer has 600 primary turns connected to a 1.5 kV supply. Determine the number of secondary turns for a 240 V output voltage, assuming no losses. 6 Marks

c) State the reason for transformer is rated in kVA not in KW. 3 Marks

(OR)

6 a) Explain how torque is developed in DC Motor. 5 Marks

b) Write the expression for the torque produced by DC Motor. 3 Marks

c) A 230V motor has an armature circuit resistance of 0.6 Ω. If the full load armature current is 30 A and no load armature current is 4 A, find the change in back E.M.F from no load to full load. 6 Marks

UNIT-IV

7 a) Define the transducer. 3 Marks

b) State and explain the basic requirements of transducer. 4 Marks

c) State and explain the principle operation of load cell. 7 Marks

(OR)

8 a) State the need for data acquisition system, explain the data acquisition system with the help of block diagram. 7 Marks

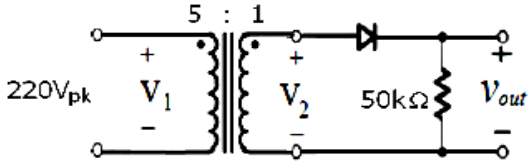
b) Explain the principle operation of LVDT with the help of neat sketch. 7 Marks

UNIT-V

9 a) Explain the diode acting as switch. 6 Marks

b) A 5:1 transformer is connected to a half wave rectifier circuit with a 50 kΩ load. 8 Marks

Find i) V_p; ii)I_p; iii) I_{dc}; iv) I_{ac}. In put voltage is 220 V_{pk}.



(OR)

10 a) State and explain the terms Peak Inverse Voltage (PIV), ripple factor, efficiency and regulation of full wave rectifier. 7 Marks

b) The circuit shown in figure had excited by sinusoidal waveform, compute the voltage across the load and current passing through 6.8 kΩ. Also draw the waveforms of V_L, I_L, V_D and I_D. Assume diode acting as ideal. 7 Marks

ELECTRONIC DEVICES AND CIRCUITS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Explain the operation of a p-n junction diode in forward biased and reverse biased condition. Draw its V-I characteristics. 14 Marks

(OR)

2 Draw the circuit of a half-wave-rectifier without filter and derive the expressions for ripple factor, % regulation, Efficiency and PIV. 14 Marks

UNIT-II

3 Define Early-effect; explain why it is called as base-width modulation. Discuss its consequences in transistors in detail. 14 Marks

(OR)

4 a) With reference to bipolar junction transistors, define the following terms and explain. 7 Marks
   i) Emitter efficiency.
   ii) Base Transportation factor.
   iii) Large signal current gain.

   b) How transistor acts as an amplifier? 7 Marks

UNIT-III

5 Draw the circuit diagram of CC amplifier using hybrid parameters and derive expressions for A_I, A_V, R_i, R_O. 14 Marks

(OR)

6 Draw the circuit diagram and small signal equivalent of CB amplifier using accurate h-parameter model. Derive expressions for A_V, A_I, R_i and R_0. 14 Marks

UNIT-IV

7 a) Explain the operation of FET with its characteristics and explain the different regions in transfer characteristics. 10 Marks

   b) Give the classifications of FETs and their application areas. 4 Marks

(OR)

8 With the help of neat sketches and characteristic curves, explain the construction and operation of a JFET and mark the regions of operation on the characteristics. 14 Marks

UNIT-V

9 Explain the tunneling phenomenon. Explain the characteristics of tunnel diode with the help of necessary energy band diagrams. 14 Marks

(OR)

10 Explain about : 14 Marks
   i) Varactor diode.
   ii) Schottky Barrier diode with necessary sketches.

BASIC ELECTRONIC DEVICES AND CIRCUITS

[Computer Science and Engineering, Information Technology and Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Determine the ripple factor of an L-section filter comprising a 10H choke and 8μF capacitor, used with a FWR. The DC voltage at the load is 50V. Assume the line frequency as 50Hz. 14 Marks

(OR)

2 A full wave rectifier circuit uses two silicon diodes with a forward resistance of 20Ω each. A DC voltmeter connected across the load of 1KΩ reads 55.4 volts. Calculate: 14 Marks

i) Irms.
ii) Average voltage across each diode.
iii) Ripple factor.
iv) Transformer secondary voltage rating.

UNIT-II

3 Design a self-bias circuit using silicon transistor to achieve a stability factor of 10, with the following specifications: 14 Marks

V_{CC} = 16V, V_{BE} = 0.7V, V_{CEQ} = 8V, I_{CQ}=4 mA and β= 50.

(OR)

4 a) If the base current in a transistor is 20μA when the emitter current is 6.4mA, what are the values of αdc and βdc? Also determine the collector current. 8 Marks

b) Draw the input and output characteristics of a transistor in common emitter configurations. 6 Marks

UNIT-III

5 a) A self biased p – channel JFET has a pinch – off voltage of V_P = 5 V and I_{DSS}=12 mA. The supply voltage is 12 V. Determine the values of R_D and R_S so that I_D = 5 mA and V_{DS} = 6V. 10 Marks

b) Sketch the drain characteristics of MOSFET for different values of V_{GS} and mark different regions of operation. 4 Marks

(OR)

6 a) In an n-channel FET, the effective channel width is 3 x 10^{-4}cm and the donor impurity concentration is 1015 electrons/cm^3. Find the pinch-off voltage. 8 Marks

b) Explain how a FET can be made to act as a switch. 6 Marks

UNIT-IV

7 Explain pierce crystal oscillator and derive the equation for oscillation. 14 Marks

(OR)

8 Explain with the relevant information, how the negative feedback improves stability, reduce noise and increase input impedance. 14 Marks

UNIT-V

9 Give the construction details of UJT and explain its operation with the help of equivalent circuits. 14 Marks

(OR)

10 What is the photo diode? Explain its principle of operation and applications in detail. 14 Marks

FOUNDATIONS OF DATA STRUCTURES

[Electrical and Electronics Engineering, Electronics and Communication Engineering and Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1	a)	Illustrate the operation of BUCKET-SORT on the array A = <79, 13, 16, 64, 39, 20, 89, 53, 71, 42> by specifying the algorithm. Prove that sorting n elements with integer keys in the range 1<= key<= m takes O(m + n) time using bucket sort.	7 Marks
	b)	Sort the sequence 8, 1, 4, 1, 5, 9, 2, 6, 5 by using Quick sort.	7 Marks
		(OR)	
2	a)	Design Shellsort routine using Shell's increments. Trace Shellsort after each pass for an array A = <81, 94, 11, 96, 12, 35, 17, 95, 28, 58, 41, 75, 15>	7 Marks
	b)	Trace the insertion sort algorithm with the given set of 6 numbers 44, 8, 74, 51, 32, 21 by Showing the passes and position moved. Derive the Worst case and Best case running time of Insertion Sort. What is the running time of insertion sort if all elements are equal?	7 Marks

UNIT-II

3	a)	What is a Stack? Explain any three operations performed on a Stack with required algorithms.	7 Marks
	b)	What is enqueue and dequeue? What are the applications of Queue? Explain.	7 Marks
		(OR)	
4	a)	Can you write a condition to check whether the stack is full or empty?	7 Marks
	b)	What is priority Queue? Explain.	7 Marks

UNIT-III

5	a)	Write the structure and enqueue( ) / insert( ) function and dequeue()/delete( ) function for a linked queue.	7 Marks
	b)	Explain the structure of a doubly linked list. Write an algorithm for inserting and deleting an element from doubly linked list. Illustrate the routines with examples.	7 Marks
		(OR)	
6	a)	Write functions to perform the operations of push( ), pop( ) and search() over Linked Stack	7 Marks
	b)	Differentiate singly linked list and circularly linked list.	7 Marks

UNIT-IV

7	a)	Show the result of inserting the following keys into an initially empty 2-3 tree: 3, 1, 4, 5, 9, 2, 6, 8, 7, 0.	7 Marks
	b)	Draw binary search trees of height 2, 3, 4, 5, and 6 on the set of keys {1, 4, 5, 10, 16, 17, 21}.	7 Marks
		(OR)	
8		Write routines to implement the basic binary search tree operations.	14 Marks

UNIT-V

9		Write the following C routines to implement Open Addressing Hash Table i) Initialization. ii) Find. iii) Insert. iv) Display.	14 Marks
		(OR)	
10	a)	Illustrate Connected Graph and Complete Graph. Give an example	7 Marks
	b)	Write a function to compute the hash values for a specific set of keys using the division/modulo method.	7 Marks

OBJECT ORIENTED PROGRAMMING THROUGH C++

[Computer Science and Engineering, Information Technology and Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1	a)	Define the 'this' pointer with an example. Indicate the steps involved in referring to members of the invoking object.	7 Marks
	b)	Explain objected oriented concepts that are supported by a C++ program clearly giving the reasons why they are supported through examples.	7 Marks
		(OR)	
2	a)	Define object oriented programming and explain feature of object oriented programming. How it is different than procedure oriented programming?	7 Marks
	b)	Write the general form of function. Explain the different types of argument passing techniques with example.	7 Marks

UNIT-II

3	a)	What is the difference between global and local variables?	7 Marks
	b)	Explain the execution that takes place when an object is passed to a function as Pointer.	7 Marks
		(OR)	
4	a)	When will the destructor of an object does not get called during function execution?	7 Marks
	b)	Explain how in line function differs from pre processor macro. Explain significant advantages of Inline function.	7 Marks

UNIT-III

5	a)	Write a C++ program using this pointer.	7 Marks
	b)	Explain about objects and L-values with examples.	7 Marks
		(OR)	
6		Explain the use of constant pointers and pointers to constant with an example.	14 Marks

UNIT-IV

7	a)	Write a program that assigns the memory using the copy constructors every time an object is created while at the same time initialization of the newly created object is undertaken using some other object of the same type.	7 Marks
	b)	What rules do you follow when inserters and extractors are overloaded with reference to a class in which they are defined?	7 Marks
		(OR)	
8	a)	What operators cannot be overloaded as friend operators' functions? Explain the reasons.	7 Marks
	b)	Discuss different ways using which one object can be assigned to another object of the same type.	7 Marks

UNIT-V

9	a)	How can define I/O specific to a class? Explain.	7 Marks
	b)	Is hiding different from encapsulation explain through an example.	7 Marks
		(OR)	
10	a)	In what way overloaded regular functions are different from overloaded template functions explain.	7 Marks
	b)	List different ways using which polymorphism is implemented within C++.	7 Marks

DIGITAL LOGIC DESIGN

[Computer Science and Engineering, Information Technology and Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1 Convert the following numbers from the given base to the other three bases indicated.
   i) Decimal 225.225 to binary and hexadecimal. 8 Marks
   ii) Octal 623.77 to decimal and hexadecimal. 6 Marks

(OR)

2 Convert the following numbers from the given base to the other three bases indicated.
   i) Binary 11010111.110 to decimal and octal. 6 Marks
   ii) Hexadecimal 2AC5.D to decimal and binary. 8 Marks

UNIT-II

3 a) Implement EX-OR using minimum number of NAND gates. 4 Marks
   b) Simplify the following Boolean function using K-map: 6 Marks
   $F(w, x, y, z) = \Sigma(0, 1, 2, 3, 7, 8, 10) + \Sigma(5, 6, 11, 15)$
   c) Obtain the simplified expression in sum of products for the given Boolean expression $F(x, y, z) = \Sigma(2, 3, 6, 7)$. 4 Marks

(OR)

4 Simplify the following expression using K-map and implement with two-level NAND gate circuit: $F = AB' + ABD + ABD' + A'C'D' + A'BC'$ 14 Marks

UNIT-III

5 a) Show that a full-subtractor can be constructed with two half-subtractors and an OR gate. 7 Marks
   b) A majority function is generated in a combinational circuit when the output is equal to 1, if the input variables have more 1's than 0's. The output is 0 otherwise. Design a 3 input majority function. 7 Marks

(OR)

6 a) Implement a full-adder using two half-adders and an OR gate. 7 Marks
   b) Design a combinational circuit with three inputs and one output. The output is equal to logic 1, when the binary value of the input is less than 3. The output is logic 0 otherwise. 7 Marks

UNIT-IV

7 a) Illustrate the functioning of an SR latch using two 2 input NOR gates. 7 Marks
   b) What is a characteristic equation? Obtain the characteristic equations for SR, JK, D and T flip-flops. 7 Marks

(OR)

8 a) Draw the circuit of JK flip-flop using NAND gates and explain its operation. 7 Marks
   b) What is the difference between an excitation table and a characteristic table? Give the excitation tables for SR, JK, T and D flip-flops. 7 Marks

UNIT-V

9 a) Differentiate between static RAM and Dynamic RAM. 6 Marks

b) Show how the PLA circuit would be programmed to implement the sum and carry outputs of a full-adder. 8 Marks

(OR)

10 Implement the following Boolean functions using PAL: 14 Marks

$F_1 = \Sigma m(0, 2, 5, 7, 8, 10, 12, 13)$; $F_2 = \Sigma m(0, 2, 6, 8, 9, 14, 15)$

ENGINEERING CHEMISTRY

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the desalination of water by reverse osmosis method.	7 Marks
	b)	Reverse osmosis is advantageous over ion exchange process" justify the statement.	7 Marks
		(OR)	
2	a)	Explain Nalgonda method used for Defluoridation of water and list out the merits and demerits of various deflouridation methods.	7 Marks
	b)	What is the threshold level of fluoride in ground water? Discuss the adverse effects of fluorides on human health.	7 Marks

UNIT-II

3	a)	Write a brief note on: i) Conductive element filled polymer. ii) Blended conducting polymers with example.	7 Marks
	b)	Write the engineering applications of conducting polymers.	7 Marks
		(OR)	
4		What are conducting polymers? Classify the conducting polymers with examples. Differentiate the merits and demerits of Metals and conducting polymers.	14 Marks

UNIT-III

5		Summarize the tools used in Green Chemistry with examples.	14 Marks
		(OR)	
6	a)	Explain the role of Green Chemistry in our everyday life.	7 Marks
	b)	Write the synthesis of bio-diesel using Trans-esterification method.	7 Marks

UNIT-IV

7		Discuss the working principle, construction and applications of solid oxide fuel cells. How it is advantageous over other fuel cells?	14 Marks
		(OR)	
8		Demonstrate the working principle involved in bio-fuel cell and write its applications.	14 Marks

UNIT-V

9		Distinguish between: i) Galvanic corrosion ii) Concentration cell corrosion and explain the mechanism involved in these corrosion.	14 Marks
		(OR)	
10	a)	What are the functions of lubricants?	6 Marks
	b)	What is galvanizing? Illustrate the Nickel electroplating.	8 Marks

ENGINEERING PHYSICS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Elaborate the absorption, spontaneous emission and stimulated emission.	6 Marks
	b)	Describe the characteristics of a laser.	8 Marks
		(OR)	
2	a)	What do you understand by population inversion? How it is achieved?	5 Marks
	b)	Derive the relation between the Einstein coefficients of absorption and emission of radiation.	9 Marks

UNIT-II

3	a)	Derive one dimensional Schrodinger's time independent wave equation and discuss the physical significance of wave function.	12 Marks
	b)	Determine the wavelength of an electron when a potential of 100 V is applied.	2 Marks
		(OR)	
4	a)	Formulate Eigen function and Eigen values for the particle in one dimensional potential box of length 'L'.	12 Marks
	b)	Find the energy of an electron in second energy level. (L = 3Å).	2 Marks

UNIT-III

5	a)	Derive the expression for electron concentration in an intrinsic semiconductor.	8 Marks
	b)	Explain construction and working of solar cell.	6 Marks
		(OR)	
6	a)	Explain intrinsic and extrinsic semiconductors.	6 Marks
	b)	Obtain an expression for the electrical conductivity in semiconductors.	8 Marks

UNIT-IV

7	a)	Define Reverberation time. Outline Sabine's mathematical relation for reverberation time of the Hall. Write any three basic requirements of an acoustically good hall	10 Marks
	b)	A hall has a volume of 5000 m^3, it is required to have reverberation time of 1.5 sec. What should be the total absorption in the hall?	4 Marks
		(OR)	
8	a)	Discuss the various factors affecting the architectural acoustics of a building and their remedies.	8 Marks
	b)	Define the following. i) Reverberation. ii) Reverberation time. iii) Absorption coefficient. iv) Echelon effect.	6 Marks

UNIT-V

9	a)	Explain X- ray diffraction and derive Bragg's law.	7 Marks
	b)	Explain with suitable diagram the powder diffraction to determine the crystal structure.	7 Marks
		(OR)	
10	a)	Define Miller indices. How are they obtained?	4 Marks
	b)	Explain Bragg's law in crystal planes. Lattice constant of copper is 0.38nm. Calculate the distance between (110) planes.	10 Marks

TRANSFORMATION TECHNIQUES AND PARTIAL DIFFERENTIAL EQUATIONS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Obtain Fourier series for the function $f(x) = \begin{cases} \pi x, & 0 \le x \le 1 \\ \pi (2 - x), & 1 \le x \le 2 \end{cases}$ and hence deduce that $\frac{1}{1^2} + \frac{1}{3^2} + \frac{1}{5^2} + \ldots = \frac{\pi^2}{8}$. 14 Marks

(OR)

2 Develop half range sine series for the function $f(x) = x$ range $0 < x < 2$. 14 Marks

UNIT-II

3 Find the Fourier transform of $e^{-a|x|}$ $(a > 0)$ and hence show that $\int_0^\infty \frac{\cos px}{a^2 + p^2} dp = \frac{\pi}{2a} e^{-a|x|}$. 14 Marks

(OR)

4 Find the finite sine transform of $f(x) = \begin{cases} -x, & x < c \\ \pi - x, & x > c \end{cases}$ where $0 \le c \le \pi$. 14 Marks

UNIT-III

5 a) Find $L^{-1}\left(\frac{1}{(s+2)^2 + 16}\right)$ and $L^{-1}\left(\frac{2s+3}{s^2 + 2s + 2}\right)$. 7 Marks

b) Using Laplace Transform, solve $\frac{d^2y}{dx^2} + 2\frac{dy}{dx} - 3y = \sin t$, $y(0) = y'(0) = 0$ when $t = 0$. 7 Marks

(OR)

6 State Convolution theorem of Laplace transform and applying it evaluate $L^{-1}\left(\frac{1}{s(s^2 + 2s + 2)}\right)$. 14 Marks

UNIT-IV

7 a) Define z – transform of f(n) and from the definition the Z-transform of $\left(\frac{1}{2}\right)^n + \left(\frac{1}{3}\right)^n$. 7 Marks

b) Show that $Z(\sin h\, n\theta) = \frac{z \sin h\theta}{z^2 - 2z \cos h\theta + 1}$. 7 Marks

(OR)

8 a) Find the inverse z – transform of $\frac{2z^2+3z}{(z+2)(z-4)}$. 7 Marks

b) Solve $\mathbf{u_{n+2}+4u_{n+1}+3u_n=3^n}$ with $\mathbf{u_0=0}$, $\mathbf{u_1=1}$ by using Z-transforms. 7 Marks

UNIT-V

9 a) Solve by the method of separation of variables $\frac{\partial u}{\partial x}=2\frac{\partial u}{\partial t}+u$, given $u(x,0)=6e^{-3x}$. 7 Marks

b) Establish an expression for the temperature distribution u(x,t) for the heat conduction equation $\frac{\partial^2 u}{\partial t^2}=c^2\frac{\partial^2 u}{\partial x^2}$ subject to the conditions $u(o,t)=0, u(l,t)=0, t>0$ and $u(x,0)=3\sin\left(\frac{\pi x}{l}\right), 0<x<l$. 7 Marks

(OR)

10 Given the wave equation $\frac{\partial^2 u}{\partial t^2}=c^2\frac{\partial^2 u}{\partial x^2}$, subject to the triangular deflection, $f(x)=\frac{2k}{l}x$ when $0<x<\frac{l}{2}=\frac{2k}{l}(l-x)$ when $\frac{l}{2}<x<l$. 14 Marks

Construct a formula for the displacement $u(x,t)$ at any point distance x from one end at time t.

ENGINEERING MECHANICS

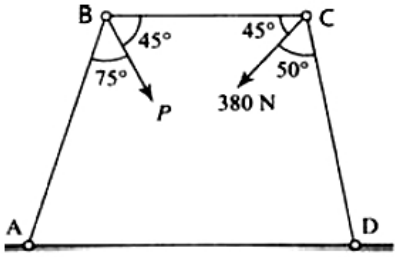
[Civil Engineering and Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

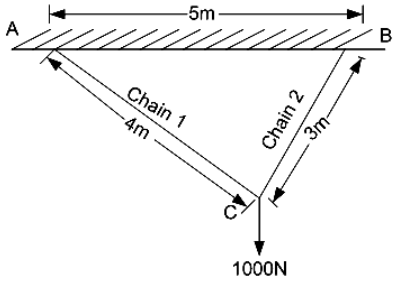
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) In the four bar mechanism ABCD, as shown in figure below, determine the force P for equilibrium. 7 Marks



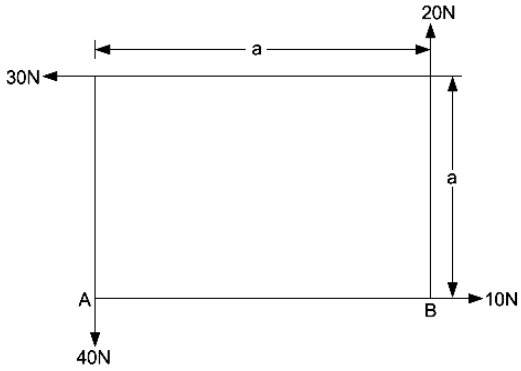
b) A weight of 1000 N is supported by two chains of lengths 4 m and 3 m as shown in figure. Determine the tension in each chain. 7 Marks



(OR)

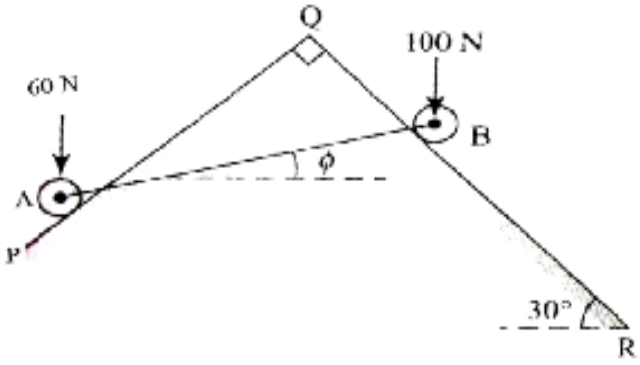
2 a) Forces 50 kN, 35 kN and 100 kN are concurrent at origin and are respectively directed through the points whose co-ordinates are M(3, 2, 4), N(4, -3, 6), P(-4, -2, 5) and Q (6, 3, -2). Determine the resultant of the system. 7 Marks

b) Four forces of magnitudes 10N, 20N, 30N and 40N are acting respectively along the four sides of a square ABCD as shown in Figure. Determine the magnitude, direction and position of the resultant force. 7 Marks



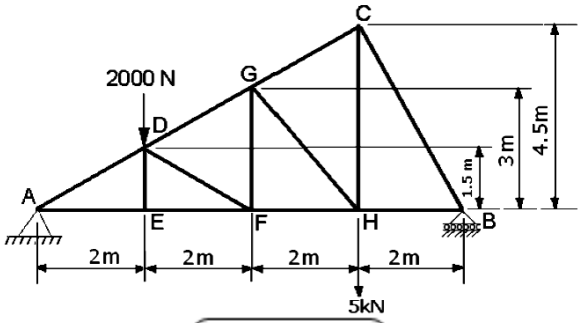
UNIT-II

3 Two spheres weighing 60 N and 100 N are connected by a flexible string AB and rest on two mutually perpendicular planes PQ and QR as shown in Figure. Find the tension in the string which passes freely through slots in smooth inclined planes PQ and QR using principle of virtual work. 14 Marks



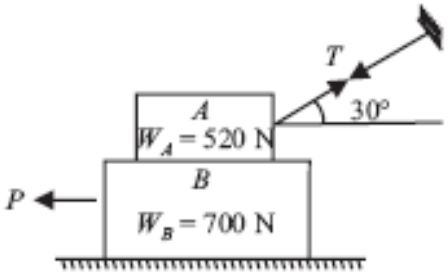
(OR)

4 Calculate the forces included in the members of the pin-jointed truss shown in figure. Show the values on a neat diagram of the truss. 14 Marks



UNIT-III

5 a) Block A of weight 520N rest on the horizontal top of block B having weight 700N as shown in figure. Block A is tied to a support C by a cable at 30º to the horizontal. Coefficient of friction is 0.4 for all contact surfaces. Determine the minimum value of the horizontal force P just to move the block B. Find also the tension in the cable. 7 Marks



b) Two equal bodies A and B of weight '**W**' each are placed on a rough inclined plane. The bodies are connected by a light string. If μA = 1/2 and μB = 1/3, show that the bodies will be both on the point of motion when the plane is inclined at $\tan^{-1}$ (5/12). 7 Marks

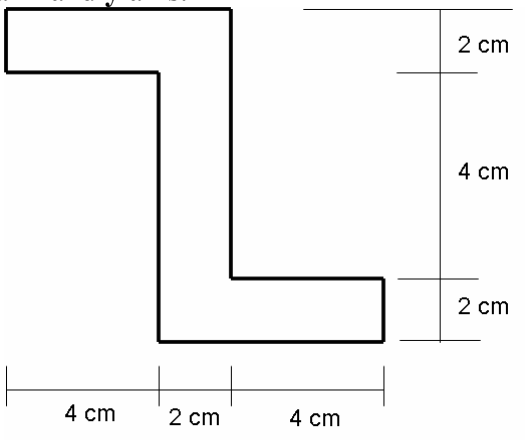
(OR)

6 a) A ladder 5 m long and of 250 N weight is placed against a vertical wall in a position where its inclination to the vertical is 30º. A man weighing 800 N climbs the ladder. At what position will he induce slipping. The co-efficient of friction for both the contact surfaces of the ladder viz. with the wall and the floor is 0.2. 7 Marks

b) A block weighing 100 N is resting on a rough plane inclined 20º to the horizontal. It is acted upon by a force of 50 N directed upward at angle of 14º above the plane. Determine the friction. If the block is about to move up the plane, determine the co-efficient of friction. 7 Marks

UNIT-IV

7 Calculate the moment of inertia of the composite section shown in figure with respect the centroidal **x** and **y** axis. 14 Marks



(OR)

8 a) Determine the coordinates of the centroid of the semicircular area whose radius is R. 7 Marks

b) Determine the coordinates of the centroid of a right triangle of base '**b**' and height '**h**'. 7 Marks

UNIT-V

9 a) A stone is dropped into a well with no initial velocity and 4.5 seconds later, the splash is heard. Then a second stone is thrown downward into the well with an initial velocity '**u**' and splash is heard 4 seconds later. If velocity of sound is constant at 336 m/s, determine the initial velocity of the second stone. 7 Marks

b) A bus starts from rest at point A and accelerates at the rate of 0.9 m/s^2 until it reaches a speed of 7.2 m/s. It then proceeds with the same speed until the brakes are applied. It comes to rest, at point B, 18 m beyond the point where the brakes are applied. Assuming uniform acceleration, determine the time required for the bus to travel from A to B. Distance between A and B is 90 m. 7 Marks

(OR)

10 a) A golfer hits a 46 gm ball with an initial velocity of 48 m/s at angle of 24º with the horizontal. Determine: 7 Marks

i) Initial KE of the ball.

ii) KE of the ball when it reaches its maximum height.

b) State and prove the Principle of conservation of momentum. 7 Marks

BASICS OF ELECTRICAL AND ELECTRONICS ENGINEERING

[Civil Engineering, Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Obtain the voltage V_{xy} in the circuit shown in Fig. 1.10. 7 Marks

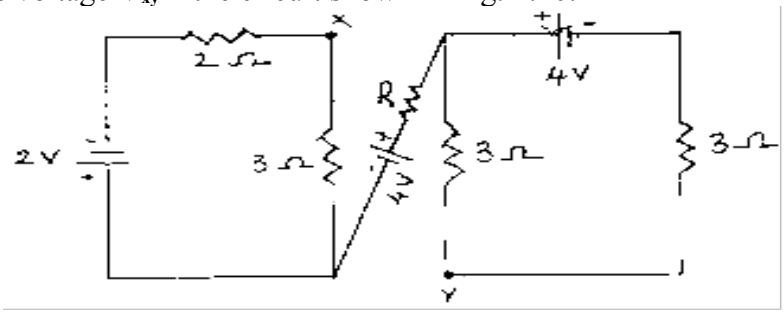

Fig. 1.10

b) In the circuit shown in Fig. 1.11, battery A has an emf of 110 V and internal resistance of 0.25 Ω. Determine the magnitude and direction of current in each battery and the total current taken from the supply. 7 Marks

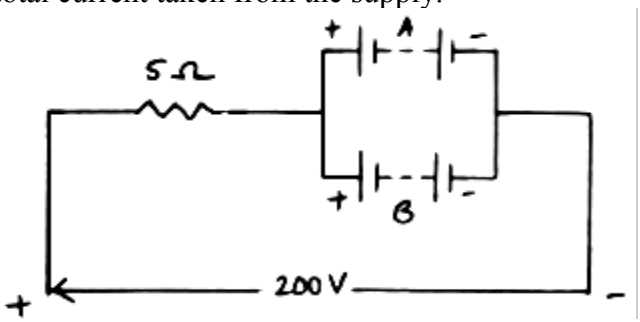

Fig. 1.11

(OR)

2 a) Find the resistance across the terminals X-Y and hence find the current in each branch of the circuit shown in Fig. 1.12. 7 Marks

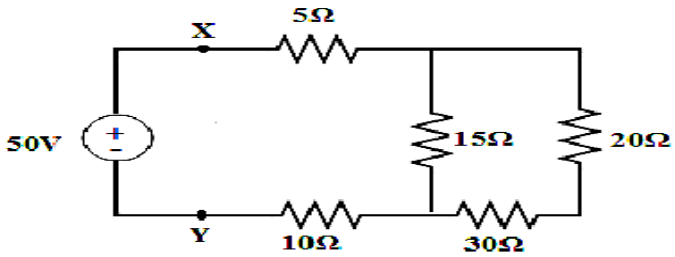

Fig. 1.12

b) Find the value of applied DC voltage for the network shown in Fig. 1.13. 7 Marks

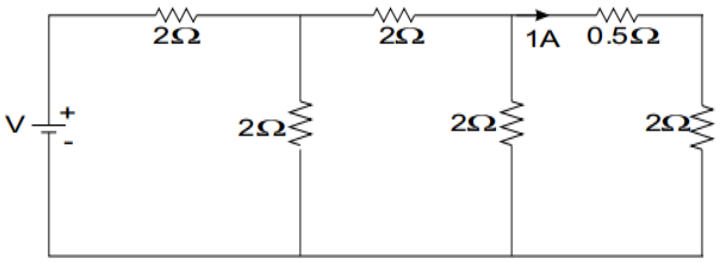

Fig. 1.13

UNIT-II

3		An ac generator with an internal impedance of (3+j2.4) Ω is connected to load impedance consisting of two impedances (12+j10) Ω & (16-j12) Ω in parallel. If the supply voltage is 100V, determine (i) the current in each branch(ii) the power in each branch(iii) the power factor of each branch (iv) the overall power factor and (v) the total power supplied. Sketch the complete phasor diagram.	14 Marks

(OR)

4	a)	Define reactive power, overall power and obtain expressions for them. Bring out their significance. Specify their units.	7 Marks
	b)	Two impedances Z_1=(50-j15)Ω and Z_2 = (15+j10)Ω are connected in series across a 200V, 50Hz supply. Find (i) Branch currents (ii) Total current (iii) Complex power and (iv) Total power.	7 Marks

UNIT-III

5		A 3-phase, 8 pole, 50Hz induction motor has a slip of 3% at full load. Find the synchronous speed and the frequency of rotor current at full load.	14 Marks

(OR)

6		A shunt generator delivers 50 kW at 250 V and runs at 400 r.p.m. The armature and field resistances are 0.02 Ω and 50 Ω respectively. Calculate the speed of the machine running as a shunt motor and taking 50 kW input at 250 V. Allow 1 V per brush for contact drop.	14 Marks

UNIT-IV

7		With neat sketch describe the various parts working principle of digital ammeter.	14 Marks

(OR)

8		Show that strain gauge factor is $G_f = 1+2\nu$.	14 Marks

UNIT-V

9	a)	Explain each term in a Diode current equation and draw V-I characteristics of p-n junction diode.	6 Marks
	b)	Derive the expressions for ripple factor, efficiency, TUF, percentage regulation of half wave rectifier.	8 Marks

(OR)

10	a)	Derive the expressions for ripple factor, efficiency, percentage regulation of bridge rectifier.	7 Marks
	b)	Design a filter for a full wave circuit with LC filter to provide an output voltage of 10 V with a load current of 200 mA and ripple factor of 0.02.	7 Marks

ELECTRONIC DEVICES AND CIRCUITS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) The reverse saturation current of a silicon p–n function diode at an operating temperature of 27^0C is 50nA. Estimate the dynamic forward and reverse resistances of the diode for applied voltages of 0.8 V and -0.4 V respectively. 8 Marks

b) Distinguish between drift and diffusion current in a semiconductor. State continuity equation. 6 Marks

(OR)

2 a) Determine the dynamic forward and reverse resistance of p-n junction silicon diode when the applied voltage is 0.25 V at T=3000K with give I_0=2 μA. 7 Marks

b) Explain the concept of diode capacitance. Derive expression for transition capacitance. 7 Marks

UNIT-II

3 What are the compensation techniques used for V_{BE} and I_{CO}? Explain with the help of suitable circuits. 14 Marks

(OR)

4 a) For an NPN transistor with α_N = 0.98, I_{CO} = 2μA and I_{EO} = 1.6μA connected in Common Emitter Configuration, determine the minimum base current for which the transistor enters into saturation region. V_{CC} and load resistance are given as 12 V and 4.0 KΩ respectively. 7 Marks

b) Determine the significance of operating point, DC and AC load lines to ensure active region operation of a BJT in CE amplifier application. 7 Marks

UNIT-III

5 The h-parameters of a transistor used in a CE circuit are h_{ie} = 1.0K, $h_{re} = 10 \times 10^{-4}$, h_{fe} = 50, $h_{oe} = 1 \times 10^{-4}$. The load resistance for the transistor is 1K in the collector circuit. Determine R_i, R_o, A_V and A_i in the amplifier stage (Assume Rs = 1000). 14 Marks

(OR)

6 Derive the expression for A_v, A_i, Input impedance and Output impedance of CE amplifier using exact and approximate models. 14 Marks

UNIT-IV

7 a) A Common Source FET amplifier circuit with un bypassed RS has the following circuit parameters: R_d = 15K, R_S = 0.5K, R_g = 1M, R_d = 5K, g_m= 5mS and V_{DD}=20 V. Determine A_V and R_O. 10 Marks

b) Derive the expression for trans conductance of MOSFET. 4 Marks

(OR)

8 a) The P-channel FET has a $|I_{DS}|$ = -12mA, |Vp|=5V, V_{GS} is 1.6 V. Determine I_D, g_m and g_{m0}. 7 Marks

b) Explain the significance of threshold voltage of a MOSFET. Discuss the methods to reduce threshold voltage, V_T. 7 Marks

UNIT-V

9 Explain Schottky diode with necessary sketches. 14 Marks

(OR)

10 Explain the operation of tunnel diode and draw its equivalent circuit. 14 Marks

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Derive the expression for the ripple factor of π-Section filter when used with a Half-wave-rectifier. Make necessary approximations. 14 Marks

(OR)

2 a) Explain the temperature dependence of VI characteristics of PN diode. 7 Marks

b) Find the value of D.C resistance and A.C resistance of a Germanium junction diode at 25^0 C with reverse saturation current, Io = 25μA and at an applied voltage of 0.2V across the diode. 7 Marks

UNIT-II

3 Draw the self bias circuit and obtain the expression for the stability factor. Discuss the advantages and disadvantages of self biasing. 14 Marks

(OR)

4 a) Define 'Thermal Runaway' in transistors. Derive the condition to prevent 'Thermal Runaway' in Bipolar Junction Transistors. 8 Marks

b) Draw the input and output characteristic of a transistor in common collector configurations. 6 Marks

UNIT-III

5 a) Explain the construction and operation of a P-channel MOSFET in enhancement and depletion modes with the help of static drain characteristics and transfer characteristics. 10 Marks

b) Draw the Drain V-I characteristics for p-channel JFET. 4 Marks

(OR)

6 Explain the principle of CS amplifier with the help of circuit diagram. Derive the expressions for A_V, input impedance and output Impedance. 14 Marks

UNIT-IV

7 a) Explain with circuit diagram a negative feedback amplifier and obtain expressions for its closed loop gain. 8 Marks

b) The gain of an amplifier is decreased to 1000 with negative feedback from its gain of 5000. Calculate the feedback factor and the amount of negative feedback in dB. 6 Marks

(OR)

8 a) Sketch the block diagram of a feedback amplifier and derive the expressions for gain (i) with positive feedback and (ii) with negative feedback. State the advantages of negative feedback. 10 Marks

b) An amplifier, without feedback, has a voltage gain of 400, lower cut-off frequency f_1 = 50 Hz, upper cut off frequency f_2 = 200 KHz and a distortion of 10%. Determine the amplifier voltage gain, lower cut-off frequency and upper cut-off frequency and distortion, when a negative feedback is applied with feedback ratio of 0.01. 4 Marks

UNIT-V

9	Sketch the static characteristics and firing characteristics of SCR and explain the shape of the curve.	14 Marks
	(OR)	
10	Explain how a variable capacitance can be built using a varactor diode.	14 Marks

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Define sorting and illustrate any two internal sorting algorithms in detail.	14 Marks

(OR)

2		Illustrate quick sort algorithm and identify the behavior of Quick sort when input is already sorted.	14 Marks

UNIT-II

3		Write a program to implement stack operations Using arrays.	14 Marks

(OR)

4		Construct the prefix and postfix form of the following given expression.	
		i) (A-B*C-D)/(E+F).	5 Marks
		ii) A+B*(C-D)/(P-R).	5 Marks
		iii) ((A+B)*C-(D-E) ^ (F+G)).	4 Marks

UNIT-III

5		Write a C program to create a single linked list and display the list in reverse order.	14 Marks

(OR)

6		Write a C program to perform following operation in a singly linked list. i) Create a list adding nodes at the front. ii) Delete a node at a given position.	14 Marks

UNIT-IV

7	a)	Give an algorithm for finding maximum element in binary tree.	7 Marks
	b)	Construct binary tree and identify the postorder from given inorder and preorder traversals. Inorder: D B E A F C Preorder: A B D E C F.	7 Marks

(OR)

8	a)	Explain the steps involved in converting the general tree to a binary tree, with an example.	7 Marks
	b)	Explain algorithms for binary tree traversals.	7 Marks

UNIT-V

9	a)	Define a graph and write about different types of graphs.	7 Marks
	b)	Explain in detail different ways of representing graphs.	7 Marks

(OR)

10		Describe in detail about depth first traversal of a graph with suitable example.	14 Marks

Answer One Question from each Unit

All questions carry equal marks

UNIT-I

1		List the features of reference variables. Give an example program.	14 Marks
		(OR)	
2	a)	Define data abstraction.	2 Marks
	b)	How data abstraction is implemented in C++. Explain with an example.	12 Marks

UNIT-II

3		How nested conditional and loop statements are executed in C++. Explain with a suitable example.	14 Marks
		(OR)	
4		Define **break**, **continue**, **goto** statements, and nested select statement with a suitable example programs.	14 Marks

UNIT-III

5		Explain the concept of multi-dimensional arrays in C++ with an example.	14 Marks
		(OR)	
6		Name any five string manipulation functions in C++ explain with a suitable example.	14 Marks

UNIT-IV

7		Explain how **new** and **delete** operators manage memory allocation / deallocation dynamically.	14 Marks
		(OR)	
8	a)	How does the compile interpret the operator overloading?	7 Marks
	b)	Write a C++ program to overload unary minus to change the sign of each of its data items of an object.	7 Marks

UNIT-V

9		Create a simple file using constructor function and open function.	14 Marks
		(OR)	
10		Explain different file handling functions in C++.	14 Marks

I B.Tech II Semester (SVEC-16) Supplementary Examinations January – 2022

DIGITAL LOGIC DESIGN

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Simplify the following Boolean expressions using the Boolean theorems. 14 Marks

i) (A+B+C) (B'+C) + (A+D) (A'+C)

ii) (A+B) (A+B') (A'+B)

(OR)

2 a) Discuss in brief about the basic theorems and properties of Boolean algebra. 8 Marks

b) Find the dual of the following functions. 6 Marks

i) (XY+Z)(Y+XZ) ii) (A'+B)(B'+C).

UNIT-II

3 A multiple output combinational logic circuit is defined by the following functions. Draw the schematic circuits for F_1 and F_2. 14 Marks

F_1 (A, B, C,D) = (A' • (A'D)')' • (A' + BC).

F_2 (A, B, C,D) = (A'D)'• (A' + BC).

Using K-Maps simplify F_1 and F_2 and draw the reduced diagram of that circuit.

(OR)

4 Obtain minimal SOP expression for the complement of the given expression: F(A, B, C) = Q (1, 2, 5, 7) And draw the circuit using NOR-gates. 14 Marks

UNIT-III

5 a) Define an encoder and design a circuit for 4-to-2 Bit Binary Encoder and 8-to-3 priority encoder. 7 Marks

b) Explain the basic operation of 4*1 Multiplexer. 7 Marks

(OR)

6 a) A combinational logic circuit is defined by the following Boolean functions. 7 Marks

F_1 = ABC + AC

F_2 = ABC + AB

F_3 = ABC + AB

Design the circuit with a decoder and external gates.

b) A combinational logic circuit is defined by the following Boolean functions. 7 Marks

F_1 =(ABC)' + AC

F_2 = A(BC)' + A'B

F_3 = AB'C + AB

Design the circuit with a decoder and external gate

UNIT-IV

7 a) Design a 4-bit register with parallel load using D flip-flops. 7 Marks

b) Explain the basic principles of Ripple Counter. 7 Marks

(OR)

8 a) What is a shift register? Explain about the following modes of operations in a four bit shift register (i) shift right (ii) shift left and (iii) bidirectional. 7 Marks

b) Distinguish between Ring and Johnson counters. Design and explain the operation of a decade Johnson counters. 7 Marks

UNIT-V

9 a) Draw and explain the block diagram of PAL. 7 Marks

b) Implement the following Boolean functions using PAL. 7 Marks

$w(A,B,C,D) = \Sigma m (0,2,6,7,8,9,12,13)$

$x(A,B,C,D) = \Sigma m (0,2,6,7,8,9,12,13,14)$

$y(A,B,C,D) = \Sigma m (2,3,8,9,10,12,13)$

$z(A,B,C,D) = \Sigma m (1,3,4,6,9,12,14)$.

(OR)

10 a) Explain the block diagram of a memory unit. Explain the read and write operation a RAM can perform. 8 Marks

b) i) How many 32K * 8 RAM chips are needed to provide a memory capacity of 256K bytes? 6 Marks

ii) How many lines of the address must be used to access 256K bytes? How many of these lines are connected to the address inputs of all chips?

iii) How many lines must be decoded for the chip select inputs? Specify the size of the decoder.

ENGINEERING CHEMISTRY

[Electrical and Electronics Engineering, Electronics and Communication Engineering and Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Three samples of water are collected from Bandara palli (**BP**), Naravari Palli (**NP**) and Sree Sainath Nagar (**SSN**). 100 **mL** of the water sample collected at **BP** requires 34 **mL** of 0.01 M EDTA solution on titration. 100 mL of the water sample collected at **NP** required 48 ml of 0.01 M EDTA solution on titration. 100 **mL** of the water sample collected at **SSN** requires 15 **mL** of 0.01 M EDTA solution on titration. Discuss the result and suggest the sample which can be directly used for drinking w.r.to only Hardness (WHO standard: Hardness < 200 ppm of $CaCO_3$).	10 Marks
	b)	Why hard water consumes lot of soap? Explain your answer with chemical reactions.	4 Marks
		(OR)	
2	a)	Give the specifications of "Water for Steam Generation". Explain scale and sludge formation, Boiler corrosion.	7 Marks
	b)	DISCUSS ion exchange process of water softening with neat DIAGRAM. Give the chemical reactions where ever is necessary.	7 Marks
		UNIT-II	
3	a)	Explain the role of chemistry in Engineering materials with suitable examples.	7 Marks
	b)	Explain the conduction mechanism of polyaniline and its uses.	7 Marks
		(OR)	
4	a)	Discuss the role of polymers as water softeners with one example.	7 Marks
	b)	Discuss the Properties and classification of Bio-degradable polymers.	7 Marks
		UNIT-III	
5	a)	Write notes on: Use of alternative feedstocks. Use of innocuous Reagents.	8 Marks
	b)	Write informative notes on Recent trends in NANO TECHNOLOGY.	6 Marks
		(OR)	
6	a)	Discuss the synthesis of Biodiesel by Trans esterification method.	7 Marks
	b)	"IONIC LIQUIDS"- explain their role in green synthesis.	7 Marks
		UNIT-IV	
7	a)	Based on the chemistry that takes place; explain with neat diagram why Pb-Acid battery is called "secondary storage battery."	8 Marks
	b)	Explain the difference between a rechargeable battery and one that must be discarded. Use a NiCad battery and a dry cell as examples.	6 Marks
		(OR)	
8	a)	Distinguish Electrolytic cell and Electrochemical cell with neat diagrams and Discuss their applications in Engineering setting.	10 Marks
	b)	Fuel cells were invented in 1839, but never developed into practical devices for producing electrical energy until the U.S. space program in the 1960s. What advantages did fuel cells have over previous power sources?	4 Marks

UNIT-V

9	a)	i) When a coating is plated onto a metal, two different metals are in contact with each other. Why doesn't galvanic corrosion occur at this interface?	4 Marks
		ii) Aluminium is used extensively as a construction metal. What are two important properties of Al that make it particularly desirable for construction purposes?	3 Marks
		iii) Explain how corrosion can be considered as extractive metallurgy in reverse.	3 Marks
	b)	Discuss any two factors influencing rate of corrosion with suitable example.	4 Marks

(OR)

10	a)	The diagram below shows a piece of iron which has a small depression in its surface that has partly filled with RUST. "Pitting" of the metal has occurred! Explain in detail the mechanism of further corrosion of the metal in this case.	7 Marks

	b)	Discuss in detail the classification and properties of Lubricants.	7 Marks

ENGINEERING PHYSICS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1	a)	Write characteristics of a LASER.	2 Marks
	b)	Describe the construction and working of a semi-conductor laser with neat diagram.	8 Marks
	c)	Differentiate optical fibers basing on refractive index.	4 Marks
		(OR)	
2	a)	Define population and population inversion.	2 Marks
	b)	Explain the construction and working of Nd:YAG LASER with a neat energy level diagram.	8 Marks
	c)	Describe the structure of an optical fiber.	4 Marks

UNIT-II

3	a)	Describe the potential energy of electron moving in one-dimensional lattice changes.	6 Marks
	b)	Explain the formation of energy bands in solids using electron potential energy versus inter atomic distance graph.	8 Marks
		(OR)	
4	a)	Identify reasons for good conductivity in conductors, insulating behaviour of bad conductors and intermediate electrical properties shown by semiconductors.	8 Marks
	b)	Define Fermi energy level, conduction band and valance band.	6 Marks

UNIT-III

5	a)	What are semiconductors? Distinguish between intrinsic and extrinsic semi-conductors.	6 Marks
	b)	Explain the mechanism of current flow in intrinsic semiconductor.	4 Marks
	c)	Describe the position of Fermi-energy level in intrinsic semiconductor.	4 Marks
		(OR)	
6	a)	Describe electrical conductivity of intrinsic, n-type, p-type semiconductors using bond model and respective figures.	8 Marks
	b)	Explain how donor impurities in semiconductors give rise to excess free electrons in n-type semiconductors with necessary band-diagram.	6 Marks

UNIT-IV

7	a)	Define Superconductivity. Mention the important property changes that occur in materials when they change from normal to superconducting state.	6 Marks
	b)	Describe type-I and type-II superconductors.	8 Marks
		(OR)	
8	a)	Define Meissner effect. Prove that Meissner effect and the disappearance of resistivity in a superconductor are mutually consistent.	8 Marks
	b)	Bring out the salient experimental features of superconductivity.	6 Marks

UNIT-V

9	a)	Write differences between crystalline and amorphous solids.	4 Marks
	b)	Write procedure of finding Miller Indices of a plane in a crystal.	4 Marks
	c)	Draw (132), (020) and (211) planes in a cubic crystal.	6 Marks

(OR)

10	a)	For a cubic crystal as values of the planar indices h, k, and l increases, does the distance between adjacent planes increases or decreases. Summarize the reason.	4 Marks
	b)	Mention wavelength range of X-rays and write their applications.	4 Marks
	c)	Write a short note on constructive and destructive interference of waves and write importance of Bragg's law of X-ray diffraction.	6 Marks

TRANSFORMATION TECHNIQUES AND PARTIAL DIFFERENTIAL EQUATIONS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1 Draw the graph for $f(x) = 0$ for $-\pi < x < 0$ $= \sin x$ for $0 < x < \pi$ and also express f(x) as a Fourier series. 14 Marks

(OR)

2 Expand the function $f(x) = x \sin x$ as a Fourier series in the interval $-\pi \le x \le \pi$. 14 Marks

UNIT-II

3 Solve the integral equation $\int_0^\infty f(\theta)\cos\alpha\,\theta\,d\theta = \begin{cases} 1-\alpha; & 0 \le \alpha \le 1 \\ 0; & \alpha > 1 \end{cases}$. Hence evaluate $\int_0^\infty \frac{\sin^2(t)}{t^2}dt$. 14 Marks

(OR)

4 Determine Fourier transform of $f(x) = e^{-a^2x^2}$ for a > 0, and hence show that $e^{-\frac{x^2}{2}}$ is self reciprocal with respect to Fourier transforms. 14 Marks

UNIT-III

5 Find 14 Marks

(i) $L^{-1}\left\{\frac{6s-4}{s^2-4s+20}\right\}$; (ii) $L^{-1}\left\{\frac{1-e^{-\pi s/2}}{1+s^2}\right\}$.

(OR)

6 Evaluate $L^{-1}\left\{\frac{s}{(s^2+1)^2}\right\}$ by convolution property. 14 Marks

UNIT-IV

7 Find inverse Z-transform of $\frac{2z}{(z-1)(z^2+1)}$. 14 Marks

(OR)

8 Determine the inverse Z-transform of $\frac{2(z^2-5z+6.5)}{(z-2)(z-3)^2}$, for 2<|z|<3. 14 Marks

UNIT-V

9 Solve the first order linear partial differential equation (y+z)p - (z+x) q =x-y. 14 Marks

(OR)

10 Form the partial differential equation, by eliminating the arbitrary constants from $2z = \frac{x^2}{a^2} + \frac{y^2}{b^2}$. 14 Marks

ENGINEERING MECHANICS

[Civil Engineering, Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

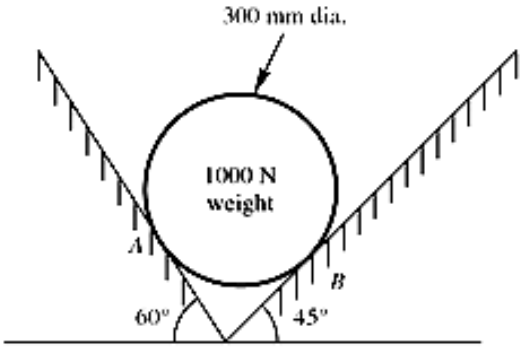
Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1 a) Explain different types of force systems with suitable examples. 4 Marks

b) forces A and B are acting at an angle θ. Their Two resultant 'R' will make an angle α with the force A. Determine the value of cos α. 3 Marks

c) A sphere of weight 1000 N rests in a V shaped groove, as shown in Fig. Determine the reactions exerted on the sides of the groove at A and B if all surfaces are perfectly smooth. 7 Marks



(OR)

2 a) Distinguish clearly between resolution of forces and composition of forces. 4 Marks

b) Two forces act at a point. The first force has x and y components of 3N and -5 N respectively. If the resultant of these forces falls on the x-axis and has a magnitude of -4 N then, find out the x and y components of the second force. 3 Marks

c) A body is acted upon by six forces as below. Find the resultant of magnitude and direction of these forces. 7 Marks

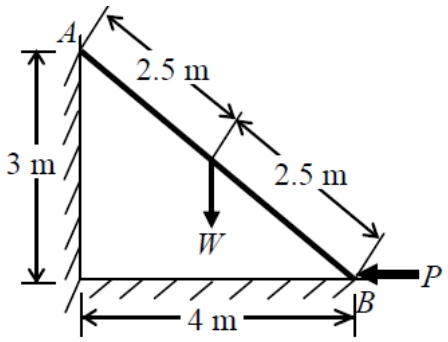
i) 50 N acting due East. ii) 100N 500 North of East.
iii) 75N 200 West of North. iv) 120N acting 300 south of West.
iv) 90N acting 250 West of South. vi) 80N acting 400 South of East.

All forces are acting from the point O.

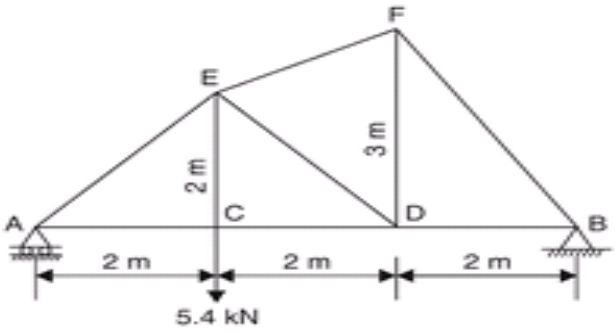
UNIT-II

3 a) Explain the concept of moment of a force about a point. For what condition the moment of a force will be zero. 3 Marks

b) A ladder AB of length 5 m and weight (W) 600 N is resting against a wall. Assuming frictionless contact at the floor (B) and the wall (A), find out the magnitude of the force P (in Newton) required to maintain equilibrium of the ladder. 4 Marks



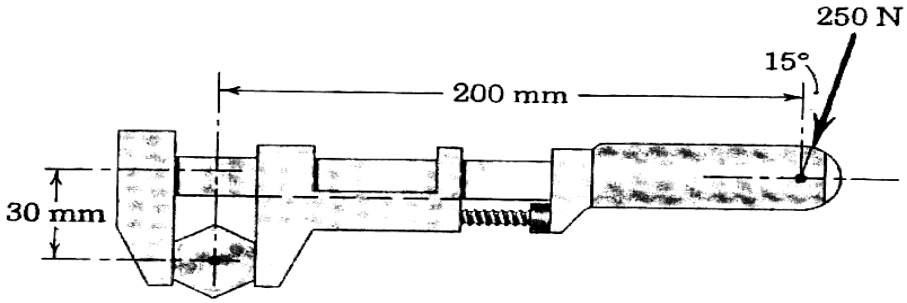
c) Find force in the members of the truss shown in fig. Use method of joints. 7 Marks



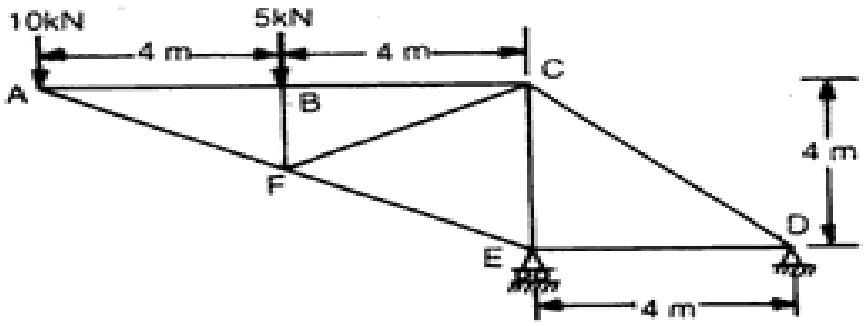
(OR)

4 a) Define truss and classify. State the assumptions involved in the analysis of a perfect truss. 3 Marks

b) Calculate the moment of the 250 *N* force on the handle of the monkey wrench about the centre of the bolt. 3 Marks

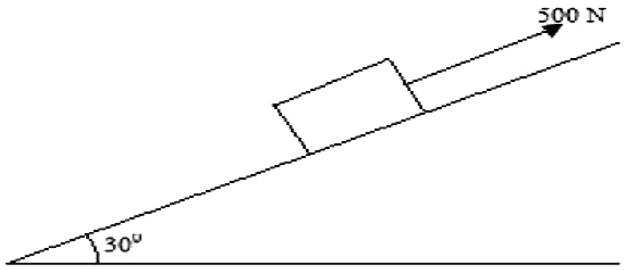


c) In the overhanging truss shown in fig. Determine the axial forces in all the members. 8 Marks



UNIT-III

5 a) The block shown in the given figure is kept in equilibrium and prevented from sliding down by applying a force of 500 N. The coefficient of friction is $\frac{\sqrt{3}}{5}$. Find weight of the block. 4 Marks

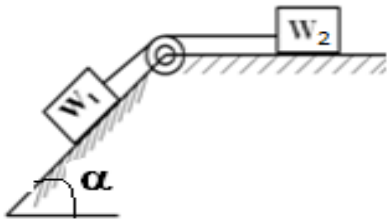


b) A ladder 5m long and 250N weight is placed against a vertical wall in a position where its inclination to the vertical is 30^{o}. A man weighing 800N climbs the ladder. At what position will he induce slipping? The coefficient of friction for both the contact surfaces of the ladder i.e., with the wall and the floor is 0.2. 7 Marks

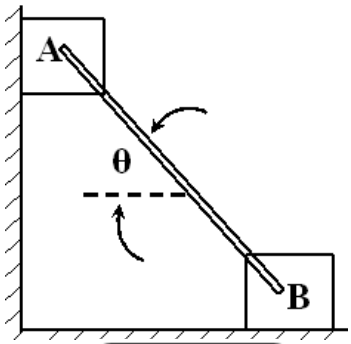
c) Explain angle of repose, relation between friction angle and angle of repose. 3 Marks

(OR)

6 a) Two rectangular blocks of weights W_1 and W_2 are connected by a flexible cord and rest up on a horizontal and an inclined plane, respectively, with the cord passing over a pulley as shown in Figure. In the particular case where $W_1=W_2$ and the coefficient of static friction μ is the same for all the contiguous surfaces, find the angle α of inclination of the inclined plane at which motion of the system will impend. Neglect friction in the pulley. 7 Marks



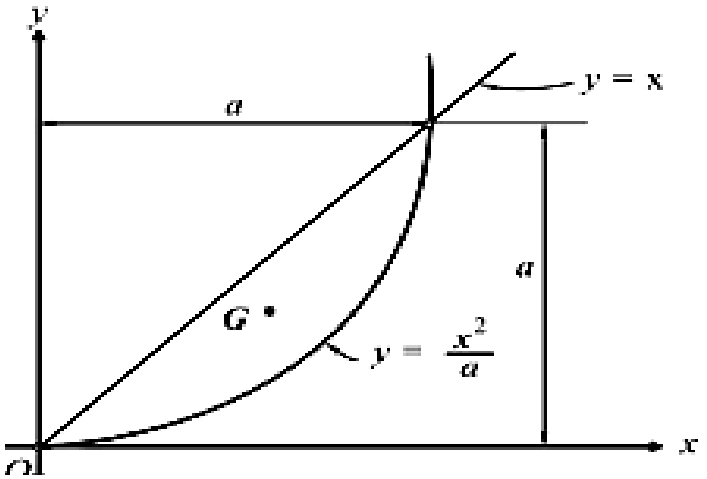
b) Two identical blocks A and B are connected by a rod and rest against vertical and horizontal planes, respectively, as shown in the figure. If sliding impends when $\theta=45°$, determine the coefficient of friction μ, assuming it to be same at both floor and wall. 7 Marks



UNIT-IV

7 a) The moment of inertia of a triangular section of base 'b' and height 'h' about an axis through its centre of gravity and parallel to the base is. 3 Marks

b) Determine the coordinates Xc and Yc of the centroid 'C' of the area between the parabola $y = x^2/a$ and the straight line $y = x$. 7 Marks



c) Find the Moment of Inertia of a rectangle having dimensions ***a*** and ***b*** with respect to a diagonal. 4 Marks

(OR)

8 a) What is the importance of radius of gyration? Explain with suitable sketch. 3 Marks

b) Find the Moment of Inertia of a square with sides of length "a" with respect to diagonal. 4 Marks

c) Find the Mass moment of inertia of a homogeneous triangular plate of mass ***m*** with respect to its base. 7 Marks

UNIT-V

9 a) i) What is the acceleration of a body of mass 'm' when it is sliding on a smooth plane and inclined at an angle θ to the horizontal?. 4 Marks

ii) Two bodies of masses 10 kg and 15 kg are hung from the ends of an extensible rope passing over a frictionless pulley. If masses of both the bodies are doubled, what about the acceleration of the system will be?

b) An elevator of gross weight W=4450N when stopping, moves with constant deceleration and from the constant velocity v = 1.8*m/s*, comes to rest in 2 *s*. Determine the force *P* transmitted during stopping to the floor of the elevator by the feet of a man weighing 765.5N. 3 Marks

c) A 667.5 N man sits in a 333.75N canoe and fire a rifle bullet horizontally directly over the bow of the canoe. Neglect friction of the water, find the velocity **v** with which the canoe will move after the shot if the rifle has a muzzle velocity of 660 m/s. 7 Marks

(OR)

10 a) i) The motion of a particle is given by x=t2+8t+4, y= t3+3t2+8t+4. Determine the initial velocity of the particle. 4 Marks

ii) If a stone falls past a window of 2.45 m height in half a second, find the height from which the stone fell.

b) A block of mass 5kg is thrust up a 30° inclined plane with an initial velocity of 4 m/sec. It travels a distance of 1.0m before it comes to rest. What is the force of friction acting on it? 3 Marks

c) To determine experimentally the coefficient of friction between two materials, a small block of weight W= 44.5N is projected with initial velocity V_o= 9m/s along a horizontal plane covered with the same material. If the block travels a total distance x= 13.5m before coming to rest, what is the coefficient of friction? 7 Marks

BASICS OF ELECTRICAL AND ELECTRONICS ENGINEERING

[Civil Engineering and Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

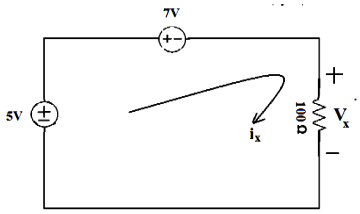
Answer One Question from each Unit

All questions carry equal marks

UNIT-I

1 a) Derive an expression for determining the equivalent inductance of two inductors L_1 and L_2 connected in series and parallel. 4 Marks

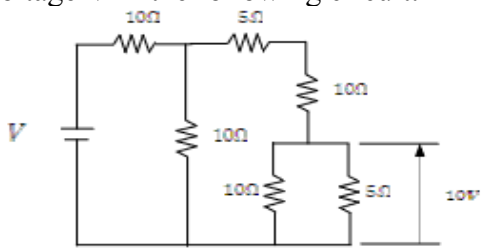
b) In the following circuit, find i_x 3 Marks



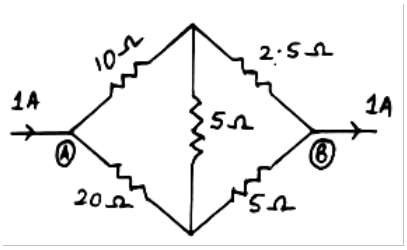
b) A 20V battery with an internal resistance of 5Ω is connected to a resistor of x ohms. If an additional 6Ω resistor is connected across the battery, find the value of x so that the external power supplied by the battery remains the same. 7 Marks

(OR)

2 a) Calculate the supply voltage V in the following circuit: 8 Marks



b) Find the equivalent resistance between A and B in the following circuit: 6 Marks



UNIT-II

3 When a coil connected to 200V, 50Hz supply takes a current of 10A and dissipates power 1200W. Find: 14 Marks

i) resistance ii) reactance

iii) real power iv) reactive power

v) apparent power and sketch the phasor diagram.

(OR)

4 A coil of 50Ω and 0.5H is connected across 200V, 50Hz supply. Find - 14 Marks

i) Inductive reactance ii) Circuit impedance
iii) Supply current iv) Power factor
v) Phase angle vi) Voltages across R and L and
vii) Active, reactive and overall (apparent) power.

Obtain expressions for voltage and current. Also sketch the complete phasor and vector diagrams.

UNIT-III

5 a) Explain the different types of DC generators and mention their applications. 7 Marks

b) A 4 pole, wave-wound DC generator has 50 slots and 24 conductors / slot. The flux/pole is 10mWb. Determine the induced **emf** in the armature if it is rotating at 600 rpm. 7 Marks

(OR)

6 a) A 4 pole, lap-wound DC generator has 100 slots and 12 conductors / slot. The flux/pole is 0.5Wb. Determine the induced **emf** in the armature if it is rotating at 1500 rpm. 7 Marks

b) Derive the torque equation of a DC motor. 7 Marks

UNIT-IV

7 Select suitable application for Hall effect transducer and describe the construction, principle of working. 14 Marks

(OR)

8 a) Explain the construction and working of a linear voltage differential transformer (LVDT). 7 Marks

b) How the magnitude and direction of the displacement of core of an LVDT is detected? Explain. 7 Marks

UNIT-V

9 a) Explain in detail about frequency response of CE amplifier. 7 Marks

b) Explain how transistor acts as an amplifier. 7 Marks

(OR)

10 Explain the principle and operation of full wave rectifier and also give the advantages and disadvantages of full wave rectifier. 14 Marks

ELECTRONIC DEVICES AND CIRCUITS

[Electrical and Electronics Engineering, Electronics and Communication Engineering and Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1	a)	Derive the expression for ripple factor of full wave rectifier with L-section Filter.	8 Marks
	b)	The voltage across a silicon diode at room temperature is 0.7 V when 2mA current flow through it. If the voltage increases to 0.75 V , calculate the diode current (assume V_T = 26mV).	6 Marks
		(OR)	
2	a)	A full wave rectifier has a centre-tap transformer of 100 – 0 – 100 volt and each one of the diodes is rated at Imax = 400mA and Iav = 150mA. Neglecting the voltage drop across the diodes, determine: i) the value of load resistor that gives the largest d.c. power output. ii) **d.c** load voltage and current.	7 Marks
	b)	Derive an expression for Diffusion capacitance.	7 Marks

UNIT-II

3	a)	Define stability factor. Derive an expression for the stability factor of a collector to base bias circuit.	7 Marks
	b)	What is thermal runaway? What is the condition for thermal stability? Explain.	7 Marks
		(OR)	
4	a)	Explain the basic construction, operation and common emitter characteristics of BJT and mention its applications.	7 Marks
	b)	In a silicon transistor circuit with a fixed bias, V_{CC} = 9V, R_C = 3KΩ, R_B= 8KΩ, β = 50, V_{BE} = 0.7V. Draw the **d.c** load line and determine operating point. What is stability Factor?	7 Marks

UNIT-III

5	a)	Explain the set-up for measurement of h-parameters.	4 Marks
	b)	Give the complete analysis of CC transistor amplifier circuit using h-parameters and derive expressions for the current gain, voltage gain, input impedance and output admittance.	10 Marks
		(OR)	
6	a)	The CC transistor amplifier circuit has the following specifications: *hic*= 1100Ω, *hrc* = 0.99, *hfc* = -51, *hoc* = 25 μA/V. If *RL* = 15 kΩ and *RS* = 1 kΩ, find various gains and input, output impedances	8 Marks
	b)	Compare AV, AI, Ri and Ro of CE, CB and CC configurations.	6 Marks

UNIT-IV

7	a)	Draw the small signal equivalent of FET amplifier in CD configuration and derive the equations for voltage gain, input, impedance and output impedance.	7 Marks
	b)	Compare and contrast BJT and FET.	7 Marks
		(OR)	

8	a)	Discuss the biasing methods for FETs.	6 Marks
	b)	Calculate the operating point of the self biased JFET having the supply voltage V_{DD} = 20 V, maximum value of drain current I_{DSS} = 10 mA and V_{GS} = - 3V at I_D = 4 mA. Also, determine the values of resistors R_D and R_S to obtain this bias condition.	8 Marks

UNIT-V

9		Explain the construction and working of Tunnel diode.	14 Marks

(OR)

10		Sketch and explain V-I characteristics of tunnel Diode. Indicate the negative resistance region.	14 Marks

[Computer Science and Engineering, Information Technology and Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1	a)	Derive the expression for total diode current components.	8 Marks
	b)	The reverse saturation current of a silicon P-N Junction diode at operating temperature of 27 degree C is 50nA. Compute the dynamic forward and reverse resistances of the diode for the applied voltage of 0.8V and -0.4V respectively.	6 Marks
		(OR)	
2	a)	Explain the operation of silicon P -N Junction diode and obtain the forward bias and reverse bias Volt-Ampere characteristics.	7 Marks
	b)	Derive the expression for Transition Capacitance.	7 Marks

UNIT-II

3	a)	With the help of input and output characteristics, explain the operation of BJT in Common Emitter Configuration.	10 Marks
	b)	Explain the construction of BJT.	4 Marks
		(OR)	
4	a)	Explain the concept of biasing for amplification and principle of amplification with a BJT.	10 Marks
	b)	Write the relation between Alpha, Beta and Gamma.	4 Marks

UNIT-III

5	a)	Explain the features of JFET and draw the drain characteristics.	8 Marks
	b)	How does MOSFET differs from JFET?	6 Marks
		(OR)	
6		Explain the construction and working of a JFET and draw the graph for drain and transfer characteristics.	14 Marks

UNIT-IV

7	a)	What do you understand by feedback in amplifiers? Explain the terms feedback factor and open loop gain.	10 Marks
	b)	What are the disadvantages of negative feedback?	4 Marks
		(OR)	
8	a)	Explain with circuit diagram a negative feedback amplifier and obtain expression for its closed loop gain.	10 Marks
	b)	When will a negative feedback amplifier circuit is unstable?	4 Marks

UNIT-V

9		Explain the principle of operation and characteristics of Tunnel diode.	14 Marks
		(OR)	
10		Explain the construction and working operation of UJT with neat sketches.	14 Marks

FOUNDATIONS OF DATA STRUCTURES

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Illustrate bucket sort algorithm with an example.	14 Marks
		(OR)	
2		Illustrate radix sort algorithm and sort the following numbers using radix sort. 77, 12, 8, 39, 27, 21, 44, 18, 6, 427, 117, 237, 5671 and 600.	14 Marks

UNIT-II

3		Convert the following infix expression to postfix using stack. ((A-(B+C))*D)$(E+F)	14 Marks
		(OR)	
4		Evaluate the given postfix expression 623+-382/+*2$3+.	14 Marks

UNIT-III

5	a)	Write and Explain dynamic memory management functions in detail.	10 Marks
	b)	List the applications of linked list.	4 Marks
		(OR)	
6		Explain circular linked list operations in detail.	14 Marks

UNIT-IV

7	a)	Give an algorithm for finding minimum element in binary tree.	9 Marks
	b)	Define full binary tree and complete binary tree with suitable example.	5 Marks
		(OR)	
8		Explain the operations of binary search tree in detail.	14 Marks

UNIT-V

9		Solve: Given input (371, 323, 173, 199, 344, 679, 989) and hash function h(x)=x mod 10, Show the resulting. i) Separate Chaining. ii) Closed hashing using linear probing, quadratic probing, and double hashing $h_2(x) = 7 - (x \bmod 7)$.	14 Marks
		(OR)	
10		Compare the following Open addressing methods: i) Linear Probing; ii) Quadratic Probing; iii) Double Hashing.	14 Marks

DIGITAL LOGIC DESIGN

[Computer Science and Engineering, Information Technology and Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Determine the value of base x if $(211)_x = (152)_8$.	7 Marks
	b)	Define a signed binary number. Compare 1's and 2's complement methods of representation of negative numbers.	7 Marks
		(OR)	
2	a)	Convert the given Gray code number to equivalent binary $(1001001011110010)_2$.	7 Marks
	b)	Convert $(\texttt{A0F9.0EB})_{16}$ to decimal, binary, octal number.	7 Marks

UNIT-II

3	a)	Explain two -level and multi-level realization.	7 Marks
	b)	Compute the canonical sum of products and product of sums of A'B+ABC+C'B'.	7 Marks
		(OR)	
4	a)	Design a circuit for the function F = Σ (2, 3, 5, 7, 10, 11, 12) using i) Minimum number of NAND gates and ii) Minimum number of NOR gates.	7 Marks
	b)	Simplify the Boolean expression f (A,B,C,D) = Σ m(0,1,3,4,8,9,15) + Q(2,6) using K- map method.	7 Marks

UNIT-III

5	a)	Draw and explain the operation of a multiplexer.	7 Marks
	b)	Design a priority encoder of 4-bit.	7 Marks
		(OR)	
6	a)	Explain the Magnitude comparator with logic diagrams.	7 Marks
	b)	Explain the Binary subtractors with Truth table.	7 Marks

UNIT-IV

7	a)	Compare the merits and demerits of ripple and synchronous counters.	7 Marks
	b)	Design a 4-bit ripple counter using T Flip-Flops.	7 Marks
		(OR)	
8	a)	Explain the circuit diagram of a S-R Flip-Flop using 2- input NOR gates.	7 Marks
	b)	Draw and explain 4-bit shift register with an example.	7 Marks

UNIT-V

9	a)	Draw and explain the block diagram of PAL.	7 Marks
	b)	Differentiate in detail about SRAM and DRAM.	7 Marks
		(OR)	
10		A combinational circuit is defined by the functions: F1 (A,B,C) = Σ(3,5,6,7) F2 (A,B,C) = Σ(0,2,4,7) Implement the circuit with a PLA having 3 - inputs, four product terms and two outputs.	14 Marks

ENGINEERING CHEMISTRY

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Can distilled water be equated to the one obtained from demineralization process in all its aspects? Explain your answer with all necessary chemical reactions involved.	7 Marks
	b)	DISCUSS deionization process of water softening with neat DIAGRAM. Give the chemical reactions where ever is necessary.	7 Marks

(OR)

2	a)	Central Water Commission (CWC) of Tirupati section reports on underground water sample (in mg/L) at the proposed site for the construction of thermal power plant (300 Mw) near Vijayawada is as follows: $Ca(HCO_3)_2$ = 220, $MgCl_2$ = 130, $CaSO_4$ = 98, $Mg(HCO_3)_2$ = 56, $MgSO_4$ = 84, DO = 8, NaCl = 4 and Na_2CO_3 = 22. Discuss in detail the operational troubles suffer by the boiler, if above sample of water is to be fed into 56.24×10^4 kg m^{-2} boiler.	8 Marks
	b)	Discuss the role of polymers in purification of water by using advanced methods.	6 Marks

UNIT-II

3	a)	Discuss the synthesis, properties and applications of poly carbonates.	7 Marks
	b)	Explain the mechanism of degradation and applications of Bio-degradable polymers.	7 Marks

(OR)

4	a)	What is self lubricating plastic? Give examples. Name some specific applications.	5 Marks
	b)	Discuss types of composites and their industrial applications.	9 Marks

UNIT-III

5	a)	What are the basic components of GREEN CHEMISTRY research? Discuss with the suitable examples.	7 Marks
	b)	Discuss the applications of Nanomaterials.	7 Marks

(OR)

6	a)	Explain wet chemical synthesis of Nanomaterials.	7 Marks
	b)	Discuss the applications of GREEN CHEMISTRY in science and technology.	7 Marks

UNIT-IV

7	a)	Describe the working principle, construction and chemistry of 1.5 V Zn – MnO_2 cell.	7 Marks
	b)	Explain why an electronic nose, in principle can measure (identify) a very large number of compounds (mixtures, smells etc) despite using a limited number of sensors.	7 Marks

(OR)

8	a)	Identify the type of battery commonly used in each of these consumer electronic products in olden days and today. Discuss their construction and Chemistry. Assume none uses solar cells. i) Digital Camera. ii) MP3 Player.	7 Marks
	b)	Discuss the role of chemical sensor in determination of PH of unknown solution.	7 Marks

UNIT-V

9	a)	Identify the factors involved in influencing corrosion in the given underground and marine structures and explain.	7 Marks
	b)	How will you assess the situation and select the lubricant? Also explain Mechanism of Lubrication.	7 Marks

(OR)

10	a)	A student, in replying to an examination question, writes: 'Corrosion of metal is due to electrical currents of electrochemical origin, Stop current stop corrosion'. Comment on the correctness or otherwise of this statement on the basis of your knowledge of electrochemistry.	10 Marks
	b)	Write the qualities of a good lubricant.	4 Marks

CODE No.: 16BT1BS02 SVEC-16

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

I B.Tech II Semester (SVEC-16) Supplementary Examinations March – 2021

ENGINEERING PHYSICS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1	a)	Describe an optical fiber communication system.	6 Marks
	b)	Determine the numerical aperture of a step index fibre when the core refractive index n_1 = 1.5 and the cladding refractive index n_2 = 1.48. Also find out the maximum angle for the entrance of light, if the fibre is placed in air.	4 Marks
	c)	Discuss any two applications of lasers in Medicine.	4 Marks
		(OR)	
2	a)	Explain the conditions required for achieving lasing action.	4 Marks
	b)	Discuss the construction and working of a four level laser system you know with the help of energy level diagram.	6 Marks
	c)	Summarize the advantages of optical fiber communication system over conventional system.	4 Marks

UNIT-II

3	a)	Explain variation of potential for an electron moving in a one-dimensional lattice.	6 Marks
	b)	Draw and explain band diagrams for conductors, insulators and semi-conductors.	6 Marks
	c)	Explain Fermi-energy level.	2 Marks
		(OR)	
4	a)	Write a short note on electron energy levels of an isolated atom and a solid material.	6 Marks
	b)	Explain the considerations that led de-Broglie to postulate matter waves.	8 Marks

UNIT-III

5	a)	Explain construction and working of the following with a sketch. i) LED. ii) Photo-Diode.	8 Marks
	b)	How a p-n junction formed? Explain p-n junction diode with the help of an energy band diagram.	6 Marks
		(OR)	
6	a)	What is an extrinsic semiconductor? How does impurities affect the electrical conductivity of a doped semiconductor? Write expression for conductivity of an n-type semiconductor.	10 Marks
	b)	Find the electrical conductivity of intrinsic silicon whose charge concentration is 1.5 x $10^{16}/m^3$ and the mobility of electron and hole are 0.13m^2/V-s and 0.05m^2/V-s respectively.	4 Marks

UNIT-IV

7	a)	Describe the requirements of an acoustically good hall.	6 Marks
	b)	Explain the parameters to judge the quality of acoustics of a room.	8 Marks
		(OR)	
8	a)	Write a short note on Absorption coefficient. Suggest a method for measuring absorption coefficient.	10 Marks
	b)	Suggest remedies to improve acoustics of buildings.	4 Marks

UNIT-V

9	a)	How is nano-world uniquely different?	6 Marks
	b)	Discuss the synthesis of nano materials by pulsed laser deposition method with appropriate figures. Discuss its advantages.	8 Marks

(OR)

10	a)	Discuss important concerns of material scientists in the Nano science.	6 Marks
	b)	Discuss the mechanical properties of nano materials. How can these be used in different applications?	8 Marks

TRANSFORMATION TECHNIQUES AND PARTIAL DIFFERENTIAL EQUATIONS

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1 Draw the graph of the triangular periodic signal defined by 14 Marks

$f(t) = \begin{cases} \pi t, & 0 \le t \le 1 \\ \pi(2-t), & 1 \le t \le 2 \end{cases}$ and f (t+2) =f(t).

Express the signal as series of sin and cosine terms.

(OR)

2 Represent the modified saw toothed wave form 14 Marks

$f(x) = 0$ for $-\pi < x \le 0$

$= x$ for $0 < x \le \pi$ as a Fourier series and hence evaluate

$1 + \frac{1}{3^2} + \frac{1}{5^2} + \text{- - - - - - -}$.

UNIT-II

3 Find the Fourier sine transform of e^{-ax}/x. 14 Marks

(OR)

4 Using Fourier integral representation show that $\int_0^\infty \frac{\omega \sin x\omega}{1+\omega^2} d\omega = \frac{\pi}{2} e^{-x}$ for $x > 0$. 14 Marks

UNIT-III

5 a) Find the Laplace transform of the square wave function $E(t)$ of period $T = 2$ defined as $E(t) = \begin{cases} 1, 0 \le t < 1 \\ 0, 1 \le t < 2 \end{cases}$. 8 Marks

b) Determine $L[\sin^2 t]$. 6 Marks

(OR)

6 Determine the Laplace transform of $\frac{\sin^2 t}{t}$. Also, evaluate the integral 14 Marks

$\int_0^\infty e^{-t} \frac{\sin^2 t}{t} dt$.

UNIT-IV

7 a) Evaluate $Z(n \cos n\theta)$. 6 Marks

b) If $U(z) = \frac{2z^2 + 3z + 12}{(z-1)^4}$, then determine $\mathbf{u_3}$. 8 Marks

(OR)

8 Using Z-transform, solve $u_{n+2} + 4u_{n+1} + 3u_n = 3^n$ with $u_0 = 0, u_1 = 1$. 14 Marks

UNIT-V

9 Find the differential equation whose general solution is given by u(x,t) = f(x-ct) + g(x+ct), where **f** and **g** are arbitrary twice differentiable functions. 14 Marks

(OR)

10 Solve $\frac{\partial^2 z}{\partial x^2} + z = 0$, given that when x = 0, $z = e^y$ and $\frac{\partial z}{\partial x} = 1$. 14 Marks

CODE No.: 16BT20101 SVEC-16

BUILDING MATERIALS AND CONSTRUCTION TECHNOLOGY
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1		Explain in detail about the manufacturing process of bricks.	14 Marks
		(OR)	
2	a)	Explain about the manufacturing methods of tile.	10 Marks
	b)	Write about the characteristics of a good tile.	4 Marks

UNIT-II

3		Explain about the physical tests of cement.	14 Marks
		(OR)	
4		Explain about the strength and chemical tests of cement.	14 Marks

UNIT-III

5	a)	Explain about the classification of rubber.	7 Marks
	b)	Explain about compounding and uses of rubber.	7 Marks
		(OR)	
6	a)	Explain about the constituents of plastics.	7 Marks
	b)	Write short notes about properties of plastic.	7 Marks

UNIT-IV

7	a)	Brief about different types of footings.	7 Marks
	b)	Distinguish between rubble and ashlar masonry.	7 Marks
		(OR)	
8		Discuss about different types of floors.	14 Marks

UNIT-V

9	a)	Describe in brief various types of shores.	7 Marks
	b)	Compare timber and steel scaffolding.	7 Marks
		(OR)	
10	a)	Explain about the methods of underpinning.	7 Marks
	b)	Explain about the component parts of scaffolding.	7 Marks

I B.Tech II Semester (SVEC-16) Supplementary Examinations March – 2021

ENGINEERING MECHANICS

[Civil Engineering, Mechanical Engineering]

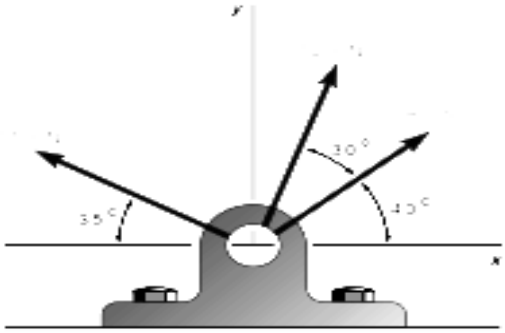
Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

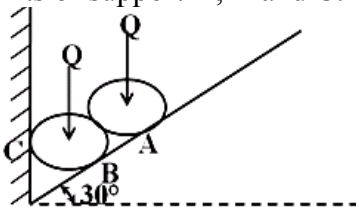
UNIT-I

1 a) Explain free body diagram with examples. 3 Marks

b) Determine the x and y components of each of the forces shown and also find the resultant of all these forces. 4 Marks



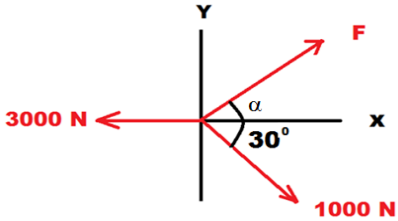
c) Two identical rollers each of weight Q = 445N are supported by an inclined plane and a vertical wall as shown in figure. Assuming smooth surfaces, find the reactions induced at the points of support A, B and C. 7 Marks



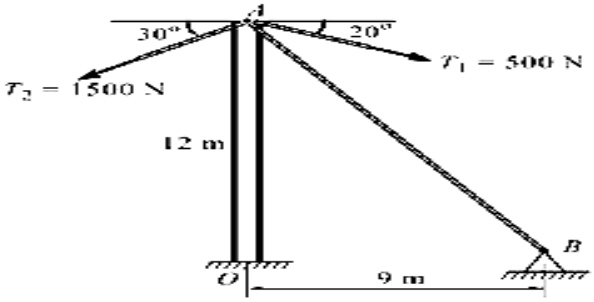
(OR)

2 a) Distinguish among the equilibrium, resultant and equilibrant. 3 Marks

b) The force system shown in fig. below has a resultant of 900 N pointing up along positive Y axis. Find the value of F and α required to give this resultant. 4 Marks



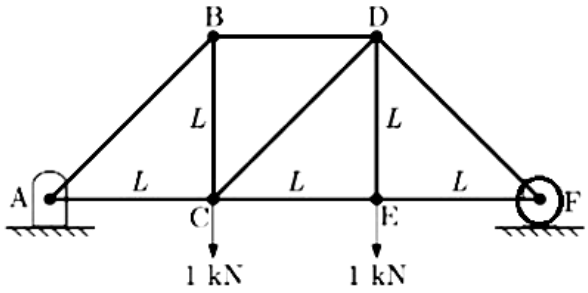
c) The top end of vertical boot is connected by two cables having tension T_1=500N and T_2=1500N as shown in figure. The third cable AB is used as a guy wire. Determine the tension in cable AB if resultant of the three concurrent forces acting at A is vertical. Also find the resultant. 7 Marks



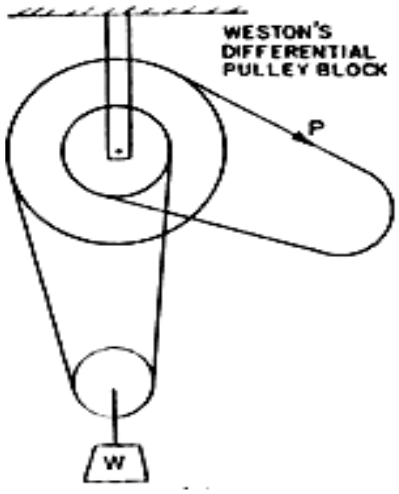
UNIT-II

3 a) Distinguish between moments and couple with suitable applications. 3 Marks

b) For the loading on truss as shown in the figure, find the force in member CD. 4 Marks



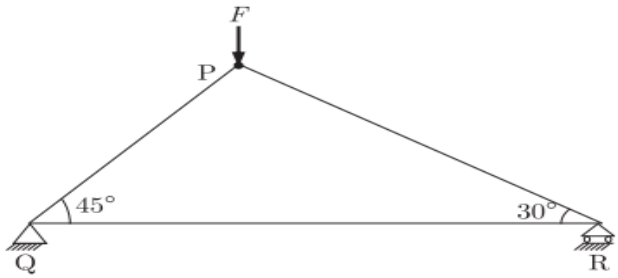
c) The diameters of the two steps of the pulley of a Weston's differential pulley block are 40cm and 30cm respectively. Determine the value of the effort required to lift a load of 4KN using the principle of virtual work. Neglect the frictional forces. 7 Marks



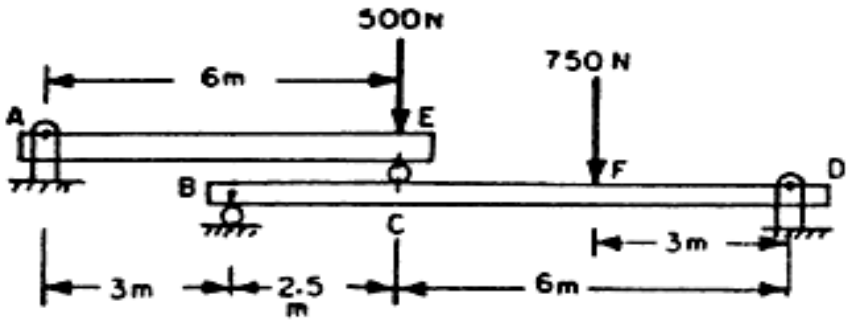
(OR)

4 a) Explain concept of virtual work with suitable example. 3 Marks

b) Consider a truss PQR loaded at P with a force F as shown in the figure. Find the tension in the member QR. 4 Marks

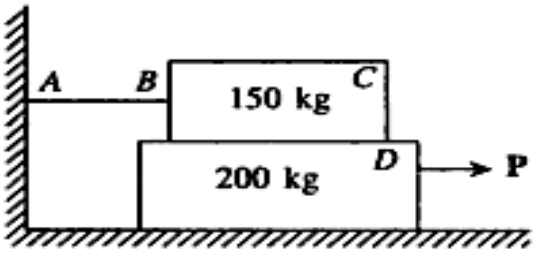


c) Determine the reactions at rollers B and C of the beam shown in figure using the method of virtual work. 7 Marks

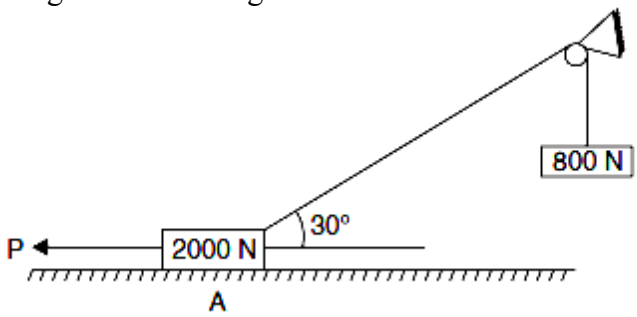


UNIT-III

5 a) If the coefficient of friction are known to be μ_s= 0.30 and μ_k= 0.25 between all surfaces of contact in figure, find the smallest force P required to start block D moving when (i) block C is restrained by cable AB as shown, and (ii) cable AB is removed. If P = 1500N, determine the resultant of the friction forces exerted on block D if block C is restrained as shown. 8 Marks

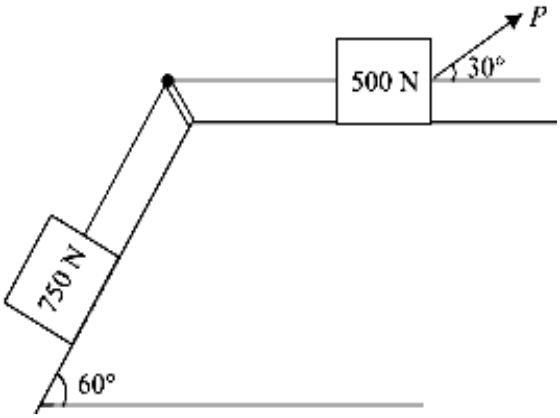


b) The block A shown in figure weighs 2000N. The cord attached to if passes over a frictionless pulley and supports a weight equal to 800N. The value of coefficient friction between A and the horizontal plane is 0.35. Determine the horizontal force P: (i) If the motion is impending towards the left. (ii) if the motion is impending towards the right. 6 Marks

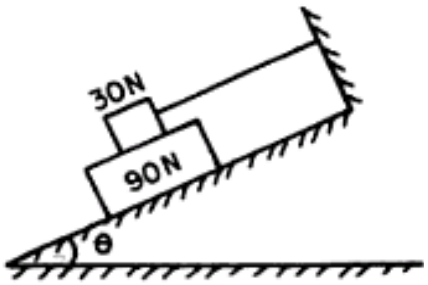


(OR)

6 a) What is the least value of P in the system shown in figure to cause the motion to impend? Assume the pulley is smooth and coefficient of friction between the other contact surfaces is 0.2. 7 Marks



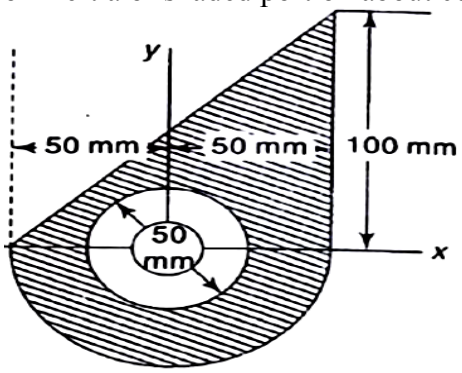
b) What should be the value of the angle θ in figure so that the motion of the 90 N block impends down the plane? The coefficient of friction μ for all the surfaces is 1/3. 7 Marks



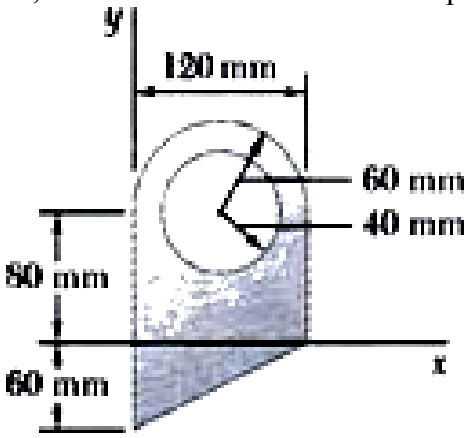
UNIT-IV

7 a) What are the centroidal coordinates of a quarter circular area placed in second quadrant of coordinate system? 3 Marks

b) Calculate the Moment of Inertia of shaded portion about centroidal x-axis. 7 Marks



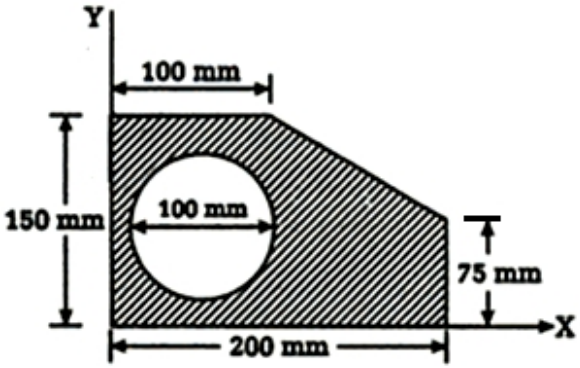
c) For the plane area shown, determine the centroid with respect to the x-axis. 4 Marks



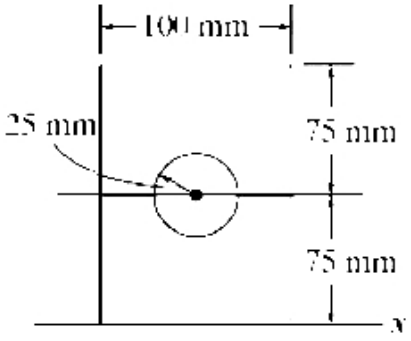
(OR)

8 a) Explain the concept of mass moment of inertia. What is the relation between area moment of inertia and mass moment of inertia? 3 Marks

b) Referring to the figure, determine the coordinates x_c and y_c of the center of a 100mm diameter, circular hole cut in a thin plate so that this point will be the centroid of the remaining shaded area. 7 Marks



c) Compute the moment of inertia of the composite area about the x-axis. 4 Marks



UNIT-V

9 a) i) State law of conservation of momentum. 4 Marks

ii) A pulley 2 m in diameter is keyed to a shaft which makes 240 r.p.m. Find the angular and linear velocities of a particle, on the periphery of the pulley.

b) A 10 gm bullet is shot horizontally in a wood block of mass 1 kg. The bullet gets embedded in the block and the block is displaced on a rough horizontal table (μ=0.2) through 1 m. What was the velocity of bullet? 3 Marks

c) A man of mass 75 kg and a boy of mass 25kg drive off the end of a boat of the mass 20kg so that their relative horizontal velocity with respect to the boat is 3m/s. If initially the boat is at rest find its final velocity if (i) the two dive off simultaneously (ii) the man dives first followed by the boy. 7 Marks

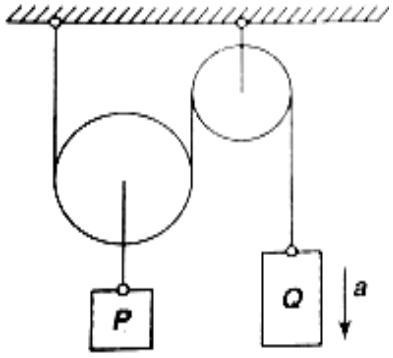
(OR)

10 a) **(i)** An elevator is required to lift a body of mass 65 kg. Find the acceleration of the elevator, which could cause a pressure of 800 N on the floor. 4 Marks

(ii) Anelevatorweighing100 kN attains an upward velocity of 4m/s in two seconds with uniform acceleration. What would be the tension in the cable?

b) The wheel of a small gyroscope is set spinning by pulling on a string wound around the shaft. Its moment of inertia is I=5562.5 kg-mm^2 and the diameter of the shaft on which the string is wound is 12.5mm. If 750mm of string is pulled off with a constant force of 53.4N, what angular velocity will be imparted to the wheel? 3 Marks

c) Two weights P and Q are connected by the arrangement shown in figure neglecting friction and the inertia of the pulleys and cord, find the acceleration ***a*** of the weight Q. Assume that P = 178N and Q = 133.5N. 7 Marks



SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

I B.Tech II Semester (SVEC-16) Supplementary Examinations March – 2021

BASIC ELECTRICAL AND ELECTRONICS ENGINEERING

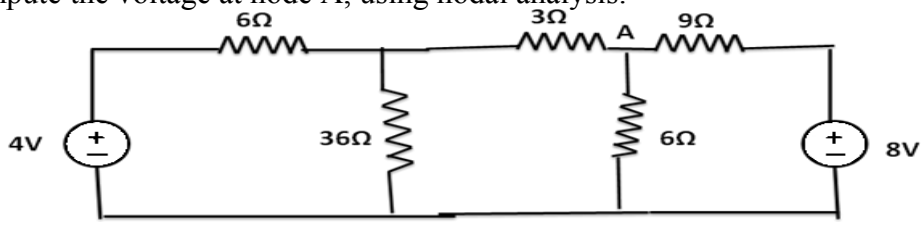
[Civil Engineering, Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

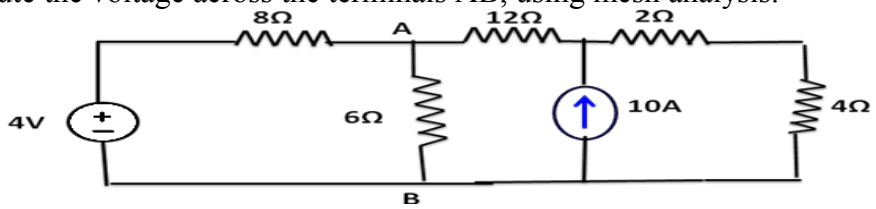
Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1 a) Compute the voltage at node A, using nodal analysis. 7 Marks

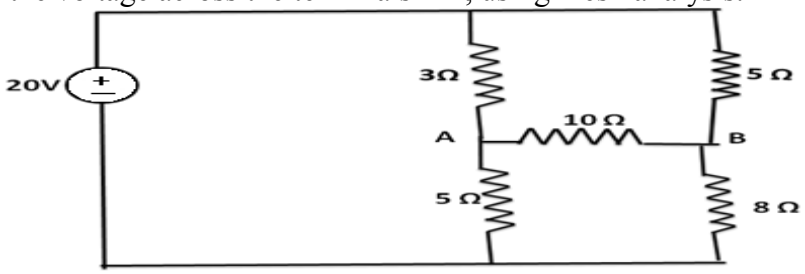


b) Compute the voltage across the terminals AB, using mesh analysis. 7 Marks

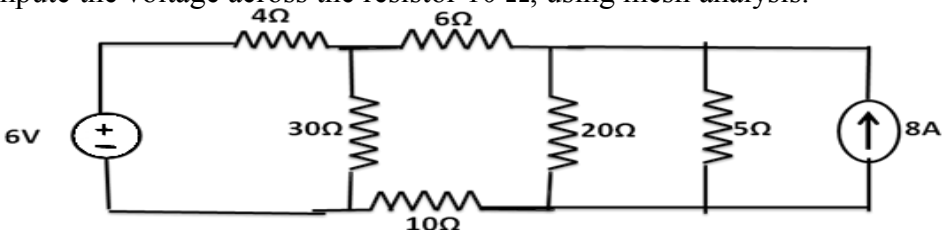


(OR)

2 a) Compute the voltage across the terminals AB, using mesh analysis. 7 Marks

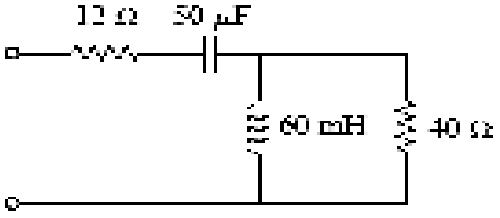


b) Compute the voltage across the resistor 10 Ω, using mesh analysis. 7 Marks

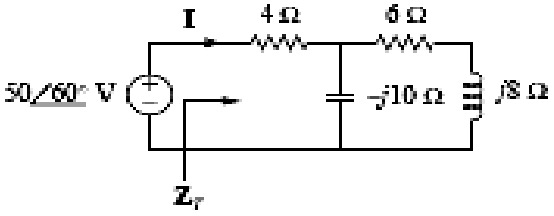


UNIT-II

3 a) Find the input impedance of the circuit, assume ω = 377 rad/sec. 7 Marks

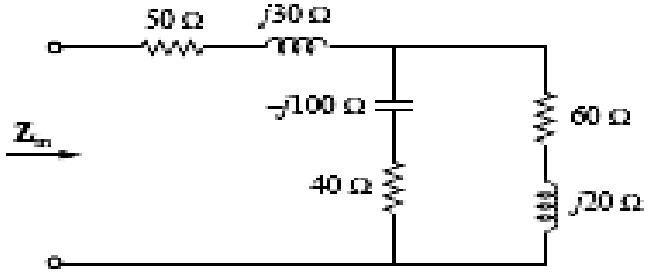


b) Find Z_f and I in the circuit shown below. 7 Marks

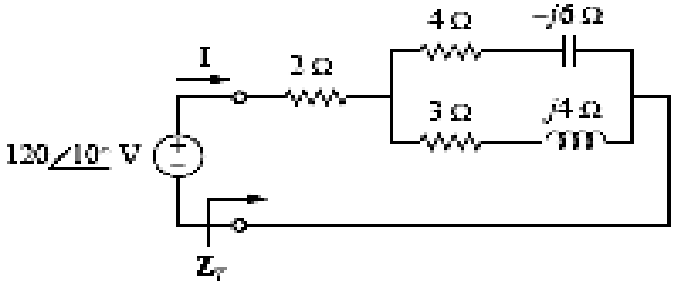


(OR)

4 a) Compute the Z_{in}, circuit shown below. 7 Marks



b) Determine the Z_f and I circuit shown below. 7 Marks



UNIT-III

5 a) State the applications of three phase induction motors. Also state the salient features of three phase induction motors. 7 Marks

b) A single-phase 800V/100V, 50Hz transformer has a maximum core flux density of 1.294 T and an effective cross-sectional area of $60\,cm^2$. Calculate the number of turns on the primary and secondary windings. 7 Marks

(OR)

6 a) Make use of Faraday's law derive the equation for the EMF induced in a DC machine. 5 Marks

b) State the applications of DC compound motors. 3 Marks

c) A 4–pole, 440V shunt motor takes 8A on no load, the no load speed being 750 R.P.M it has shunt field current of 1.5 A. Calculate the full load speed of the motor if it takes 100A at full load. Armature resistance is 0.25Ω. Neglect armature reaction. 6 Marks

UNIT-IV

7 a) Explain the operation of ammeter using block diagram. 7 Marks

b) State the instrument measures the thickness of conductor; explain the procedure to measure the same. 7 Marks

(OR)

8 a) State the difference between stain gauge and load cell. 7 Marks

b) State and explain the method of current measurement by passive method. 7 Marks

UNIT-V

9 a) How the transistor act as an amplifier? Explain. 7 Marks

b) Derive the current gain of common emitter configuration transistor amplifier using voltage divider biasing. 7 Marks

(OR)

10 a) State the difference between diode and transistor, as both are semiconducting switches. 7 Marks

b) State the need for amplifier in electronic circuits. Explain how a NPN Transistor act as amplifier. 7 Marks

ELECTRONIC DEVICES AND CIRCUITS

[Electrical and Electronics Engineering, Electronics and Communication Engineering and Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1 a) Compare the performance of inductor, L-section and $\tilde{\pi}$section filters. 7 Marks

b) In a full wave rectifier with capacitor filter, find out ripple factor, I_{dc} and load resistance if $C = 600\mu F$, $T = 20$ ms, $V_r = 1.2$V and $V_{dc} = 9V$. 7 Marks

(OR)

2 a) Explain the diode characteristics from diode equation. 7 Marks

b) Explain the effect of temperature on diode characteristics. 7 Marks

UNIT-II

3 a) Define stability factor and derive it for a transistor from general current equation. 7 Marks

b) What is thermal runaway? How to avoid it? 7 Marks

(OR)

4 a) Determine the quiescent current and collector to emitter voltage for a silicon transistor with β=50 in self biasing arrangement with the following component values V_{CC} = 20V, R_C = 2KΩ, R_E = 100Ω, R_1 = 100KΩ, R_2 = 5KΩ. Also find the stability factor. 8 Marks

b) Derive the expression for S' in self-bias arrangement. 6 Marks

UNIT-III

5 a) A CE amplifier is driven by a voltage source of internal resistance R_s=800Ω and the load impedance R_L = 1000Ω. The h-parameters are h_{ie}=1$k\Omega$, h_{re} 2 x 10^{-4},, h_{fe}=50 and h_{oe} = 25μA/V. Compute the current gain A_I, input resistance R_i, voltage gain A_V and output resistance R_o using exact analysis. 9 Marks

b) Determine the h-parameters for common emitter configuration from the characteristic curves. 5 Marks

(OR)

6 a) Give the approximate h-parameter conversion formulae for CC and CB configuration in terms of CE. 8 Marks

b) Explain how h-parameters are determined from transistor characteristics. 6 Marks

UNIT-IV

7 a) Draw the small signal equivalent of FET amplifier in CD configuration and derive the equations for voltage gain, input, impedance and output impedance. 8 Marks

b) Define g_m, r_d and μ and derive the relationship among them. 6 Marks

(OR)

8 a) Explain the construction features of an enhancement MOSFET with neat sketches. Also draw the drain characteristics. 8 Marks

b) In the common gate FET amplifier, R_D = 4 k Ω, R_S = 2 k Ω, $g_m = 2 \times 10^{-3}\ \Omega$, r_d = 40 k Ω. Calculate voltage gain, input impedance and output impedance. 6 Marks

UNIT-V

9 What is a varactor diode? Briefly explain the working of it with the help of V-I characteristics and circuit symbol equivalent. 14 Marks

(OR)

10 Draw the equivalent circuit and V-I characteristics of UJT and explain it. 14 Marks

[Computer Science and Engineering, Information Technology and Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1	a)	List out the merits and demerits of bridge type full wave rectifier over centre tapped type full wave rectifiers.	5 Marks
	b)	The secondary voltages of centre tapped transformer are given as 60V-0V-60V. The total resistance of secondary coil and forward diode resistance of each section of transformer secondary is 62 Ω. Compute the following for a load resistance for 1K Ω i) Average load current. ii) Percentage load regulation. iii) Rectifier efficiency.	5 Marks
	c)	What is Bleeder resistance in L Section Filter?	4 Marks
		(OR)	
2		Explain the operation of Tunnel Diode with neat sketches.	14 Marks

UNIT-II

3	a)	Taking the example of CE amplifier, explain the criterion for selection of a suitable operating point and factors affecting its stability hence define stability factor.	10 Marks
	b)	In a transistor determine the alpha if collector current is 4.9mA and emitter current is 5mA.	4 Marks
		(OR)	
4	a)	Explain the methods of stabilising Q point of atransistor.	10 Marks
	b)	A transistor has alpha=0.98. If emitter current of the transistor is 1mA. Determine the base current and gain factor beta.	4 Marks

UNIT-III

5	a)	Explain how the transfer characteristics of an Enhancement MOSFET differ from that of Depletion MOSFET.	10 Marks
	b)	Define rd ad Gm.	4 Marks
		(OR)	
6	a)	Draw the drain characteristics of depletion mode MOSFET. Explain different operating regions.	10 Marks
	b)	How does MOSFET differs from JFET?	4 Marks

UNIT-IV

7	a)	State and briefly explain Barkhausen criterion for oscillation.	8 Marks
	b)	Explain the main difference between an amplifier and an oscillator.	6 Marks
		(OR)	
8	a)	Draw the circuit of Hartley oscillator and explain its working. Derive the expression for frequency of oscillation and condition for starting of oscillation.	10 Marks
	b)	Determine the frequency of a Hartley oscillator if L_1=100 uH and L_2=1 mH, M=20 uH and C=20 pF.	4 Marks

UNIT-V

9 Explain the terms: 14 Marks

i) Peak point voltage.
ii) Valley point voltage of a UJT.
iii) Mention some of the application of UJT.

(OR)

10 a) Explain the two transistor analogy of an SCR. 10 Marks

b) Once the SCR is triggred, the gate looses its control. Explain. 4 Marks

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

I B.Tech II Semester (SVEC-16) Supplementary Examinations March – 2021

FOUNDATIONS OF DATA STRUCTURES

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1 a) Sort the sequence 80, 10, 40, 10, 50, 90, 20, 60, 50 by using 7 Marks
i) Merge sort.
ii) Quicksort, with the middle element as pivot and no cutoff (show all steps) Quicksort, with median-of-three pivot selection and a cutoff of 3.

b) Insertion Sort procedure uses a linear search to scan (backward) through the sorted subarray A [0 ... p - 1]. We can use a binary search instead to improve the overall worst-case running time of insertion sort to Θ(n log n). Write routines to implement it. 7 Marks

(OR)

2 a) Write about Radix sort and sort the following numbers using radix sort. 7 Marks
77, 12, 8, 39, 27, 21, 44, 18, 6, 427, 117, 237, 5671 and 600

b) Some of the sorting methods are not suited for use with linked lists. Which ones, and why not? Write linked list version of any sorting algorithm. 7 Marks

UNIT-II

3 a) Write down the algorithms to perform the operations on a stack and explain them. 7 Marks

b) How are priority queues implemented using a single queue. 7 Marks

(OR)

4 a) Construct the prefix and postfix form of the following given expression. 7 Marks
i) (A-B*C-D)/(E+F). ii) ((A+B)*C-(D-E)^(F+G)).
iii) A+B*(C-D)/(P-R).

b) Write an application program to maintain a list of items as a circular queue which is implemented using an array. Simulate insertion and deletion to the queue and display a graphical representation of queue after every operation 7 Marks

UNIT-III

5 a) What are the advantages of linked implementation of stack over array implementation? 7 Marks

b) Outline an algorithm to merge two ordered singly linked lists of integers into one ordered list. 7 Marks

(OR)

6 a) Write the peek()routine to implement stack ADT using Arrays. How does a stack implemented using a linked list differs from a stack implemented using an array? 7 Marks

b) Write the routines to implement linear queue using Linked lists which reads an integer and prints its digits in reverse order. 7 Marks

UNIT-IV

7 a) Create B-tree of order 4 (t = 2) created by inserting the following data arriving in sequence <92, 24, 6, 7, 11, 8, 22, 4, 5, 16, 19, 20, 78>. 7 Marks

b) Write a C function to insert an element into an AVL tree with single and double rotations. 7 Marks

(OR)

8 Write the insert ( ), delete ( ) and find ( ) routines for a binary search tree. What are the running times of your routines? Write an algorithm that counts the number of nodes in a binary tree. 14 Marks

UNIT-V

9 a) In a Graph, define path, closed path and simple path with an example 7 Marks

b) Draw the complete undirected graphs on one, two, three, four and five vertices. Prove that the number of edges in a n vertex complete graph is $n(n - 1)/2$. 7 Marks

(OR)

10 Show the result of inserting keys {89, 18, 49, 58, 69} into a open addressing table using the hash function h (k) = k mod 10 with the following collision resolution strategies. Outline the algorithm for inserting and deleting a key into a open addressing table. 14 Marks

i) $f_{(i)} = i$. ii) $f_{(i)} = i^2$. iii) $f_{(i)} = i*h_2(x)$.

Let the table have 10 slots and $h_2(x) = 7 - (x \bmod 7)$.

OBJECT ORIENTED PROGRAMMING THROUGH C++

[Computer Science and Engineering, Information Technology and Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1	a)	Compare and contrast C and C++ through 3 similarities and 3 dissimilarities citing the example.	7 Marks
	b)	What is inheritance? Are the private variables of parent class can be inherited into a child class? Explain with an example.	7 Marks

(OR)

2	a)	What is name space and what location in the C++ program are they defined?	7 Marks
	b)	In what way structures in C are different from structures in C++? Develop a structure in C++ that encapsulate attributes of an entity which is a "purchase order"	7 Marks

UNIT-II

3	a)	What is recursion? Write an application program to find factorial using recursion.	7 Marks
	b)	Explain about storage class in C++.	7 Marks

(OR)

4	a)	What is the difference between Void, Boolean and I/O functions?	7 Marks
	b)	Differentiate between data types and derived data types.	7 Marks

UNIT-III

5	a)	With an example, explain nested selection statements.	7 Marks
	b)	Write a program to copy string to other without using in-built function.	7 Marks

(OR)

6	a)	Differentiate between passing by reference and passing by constant reference.	7 Marks
	b)	Write a program to swap two numbers using pointers.	7 Marks

UNIT-IV

7	a)	"Template functions are implicitly overloaded". Justify.	7 Marks
	b)	How will you be able to take control when a system based exception occurs and avoid terminating your program when such exception takes place?	7 Marks

(OR)

8	a)	Explain the difference that exists in passing objects, pointers to the objects and references to the objects as function arguments.	7 Marks
	b)	What are the limitations of overloading an [ ] operator? Justify the uses of [ ] operator overloaded function.	7 Marks

UNIT-V

9	a)	What are polymorphic classes? Explain how polymorphism is implemented using such classes.	7 Marks
	b)	Explain the way dynamic polymorphism is implemented with the help of an example program (A pointer to a parent object can hold the object of either the parent or the child).	7 Marks

(OR)

10	a)	In what way member functions are different from manipulator functions which are meant for undertaking the formatted I/O? Show the difference through an example.	7 Marks
	b)	Explain the way ambiguities resolve in the Hydride Inherence.	7 Marks

DIGITAL LOGIC DESIGN

[Computer Science and Engineering, Information Technology and Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit.
All questions carry equal marks.

UNIT-I

1 a) Convert the following expressions into sum of products and product of sums: 8 Marks
i) $(AB + C)\,(B + C'D)\,(AB + C)(B + C'D)$
ii) $x' + x(x + y')(y + z')$

b) Verify that the following operations are commutative but not associative. 6 Marks
i) NAND. ii) NOR.

(OR)

2 Given the following Boolean function:
$F = xy'z + x'y'z + w'xy + wx'y + wxy$

a) Obtain the truth table of the function and draw the logic diagram using the original Boolean expression. 6 Marks

b) Simplify the function to minimum number of literals using principles of Boolean algebra. 4 Marks

c) Draw the logic diagram from the simplified expression and compare the total number of gates with the diagram of part (a) 4 Marks

UNIT-II

3 Simplify the following Boolean functions using K-maps:

a) $F(A, B, C, D) = \Sigma(2,3,10,11,12,13,14,15)$ 7 Marks

b) $F(A, B, C, D) = \Pi(0,1,2,3,4,6,12)$ 7 Marks

(OR)

4 Simplify the following Boolean functions using four-variable maps:

a) $F = \Sigma(0,1,2,4,5,7,11,15)$ 7 Marks

b) $F = \Sigma(0,2,4,5,6,7,8,10,13,15)$ 7 Marks

UNIT-III

5 What is the importance of a carry look ahead adder? Explain its operation for 4 bit addition with neat diagrams. 14 Marks

(OR)

6 a) Implement a full adder function using 4 x 1 multiplexers. 7 Marks

b) Illustrate the operation of 8 to 3 line encoder. 7 Marks

UNIT-IV

7 a) The content of a 4-bit register is initially 1101. The register is shifted six times to the right with the serial input being 101101. What is the content of the register after each shift? 4 Marks

b) Design a synchronous BCD counter with T flip-flops. 10 Marks

(OR)

8 a) Draw the circuit of 3 bit Johnson counter. Explain its operation by plotting the output waveforms. 7 Marks

b) Design a counter with the repeated binary sequence: 0, 1, 3, 7, 6, 4. Use T flip-flops and if the counter enters any invalid state, the next state must be 0. 7 Marks

UNIT-V

9 a) Compare PROM, EPROM, EEPROM. 6 Marks

b) Design a combinational circuit using a ROM. The circuit accepts a 3 bit number and generates an output binary number equal to the square of the input number. 8 Marks

(OR)

10 A combinational circuit is defined by the functions 14 Marks

$F_1(A, B, C) = \Sigma m(3, 5, 6, 7)$; $F_2(A, B, C) = \Sigma m(0, 2, 4, 7)$

Implement the circuit with a PLA having three inputs, four product terms and two outputs.

BIOLOGY FOR ENGINEERS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	How living organisms are classified? List out the different kingdoms by various scientists.	6 Marks	L1	CO1	PO1
	b)	Summarize cellular basis of life.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Define living organisms and how they are classified based on the carbon and energy resources.	6 Marks	L1	CO1	PO1
	b)	Compare the differences of Plant cell and Bacterial cell.	6 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Demonstrate the structure and functions of proteins.	4 Marks	L2	CO1	PO1
	b)	What is fermentation? Explain its process and industrial applications.	8 Marks	L2	CO2	PO3
		(OR)				
4.	a)	Explain the factors affecting enzyme reaction and its industrial applications.	7 Marks	L2	CO2	PO3
	b)	Show the structure and functions of DNA.	5 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Summarize Mendel's single gene disorders.	6 Marks	L2	CO2	PO1
	b)	What is Genetic code? Explain translation process with a neat diagram.	6 Marks	L1	CO2	PO1
		(OR)				
6.		Name the enzymes involved in Replication, Transcription and Translation and describe their mechanism with neat labeled diagram.	12 Marks	L1	CO2	PO1
		UNIT-IV				
7.	a)	Recall the concepts of recombinant DNA technology and explain the applications of cloning.	6 Marks	L1	CO3	PO1
	b)	How to generate transgenic microbes and plants? Give examples for both the transgenic organisms.	6 Marks	L1	CO3	PO6
		(OR)				
8.	a)	List the advantages and disadvantages of recombinant vaccines.	6 Marks	L1	CO3	PO6
	b)	Outline the role of biosensors and biochips.	6 Marks	L2	CO3	PO6
		UNIT-V				
9.	a)	Interpret the role of Neurons in the Neurotransmission.	6 Marks	L5	CO1	PO2
	b)	Define DNA Microarray and detail its applications.	6 Marks	L1	CO3	PO1
		(OR)				
10.		Label the human digestive system features with neat diagram and write their functions.	12 Marks	L1	CO1	PO1

ENGINEERING PHYSICS

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	How Newton's rings are formed? Derive an expression for the wavelength of source using Newton's ring experiment.	8 Marks	L3	CO1	PO2
	b)	In a Newton's rings experiment the diameter of the 15th ring was found to be 0.59cm and the 5th ring was 0.36cm. The radius of the plano-convex lens is 100cm, then calculate the wavelength of light.	4 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Summarize the theory of Quarter wave plate and Half wave plate.	6 Marks	L2	CO1	PO1
	b)	Describe the construction and working of a Nicol's Prism.	6 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Explain the physical significance of Maxwell's equations.	4 Marks	L2	CO2	PO1
	b)	Derive the free space electromagnetic wave equations and show that the velocity of the electromagnetic wave is $\frac{1}{\sqrt{\mu_0 \varepsilon_0}}$.	8 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Define acceptance angle. Derive an expression for acceptance angle and numerical aperture of an optical fiber.	8 Marks	L3	CO2	PO1 PO2
	b)	List the applications of optical fibers in various fields of engineering.	4 Marks	L1	CO2	PO1

UNIT-III

5.	a)	Explain the concepts of drift and diffusion in semiconductors.	6 Marks	L2	CO3	PO1
	b)	Derive an expression for drift and diffusion currents in semiconductors.	6 Marks	L3	CO3	PO2
		(OR)				
6.	a)	Explain construction and working mechanism of a semiconductor diode laser.	8 Marks	L2	CO3	PO1
	b)	Predict the color of light emitted by a laser source made up of GaAs with band gap of 1.44 eV.	4 Marks	L3	CO3	PO2

UNIT-IV

7.	a)	What is Piezoelectricity? Explain.	6 Marks	L2	CO4	PO1
	b)	Outline electronic, ionic and orientation polarizations.	6 Marks	L2	CO4	PO1
		(OR)				
8.	a)	State magnetic moment. Explain the origin of magnetic moment in an atom.	6 Marks	L2	CO4	PO2
	b)	Differentiate the hard and soft magnetic materials based on hysteresis.	6 Marks	L2	CO4	PO1

UNIT-V

9.	a)	Explain Meissner's effect. How is it used to classify Type-I and Type-II superconductors?	8 Marks	L2	CO5	PO1
	b)	List any four applications of superconductors.	4 Marks	L1	CO5	PO1
		(OR)				
10.	a)	Discuss the various properties of nanomaterials.	6 Marks	L2	CO5	PO1
	b)	Describe the pulsed laser deposition technique to synthesize nanomaterials.	6 Marks	L2	CO5	PO1

CODE No.: 19BT1BS04 SVEC-19

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What is Schrodinger wave equation and derive the expression for Schrodinger wave equation.	8 Marks	L3	CO1	PO1
	b)	Draw and explain the π molecular orbital representations of Butadiene.	4 Marks	L2	CO1	PO1
		(OR)				
2.	a)	N_2 molecule is more stable than O_2 molecule. How can you utilize the molecular orbital theory in supporting this statement?	8 Marks	L1	CO1	PO1
	b)	Identify the shape of SO_2, PCl_5, NH_3, SF_4 molecules using VSEPR theory.	4 Marks	L3	CO1	PO2

UNIT-II

3.	a)	A ground water sample has the following composition: $Ca(HCO_3)_2 = 16.2\ ppm$, $Mg(HCO_3)_2 = 14.6\ ppm$, $MgCl = 9.5\ ppm$, $MgSo_4 = 12.0\ ppm$, $CaSo_4 = 13.6\ ppm$. Calculate carbonate and non-carbonate hardness of water.	6 Marks	L3	CO2	PO2
	b)	What is meant by sterilization of water? Explain how sterilization of water is carried out by using chlorination.	6 Marks	L1	CO2	PO6
		(OR)				
4.		Describe the ion exchange process with a neat diagram. Ion exchange process is more advantageous than zeolite. Why?	12 Marks	L2	CO2	PO1

UNIT-III

5.	a)	Discuss the construction and working of $H_2.O_2$ fuel cell and identify its advantages and limitations.	8 Marks	L2	CO3	PO1
	b)	How can you protect the underground water pipes from corrosion?	4 Marks	L1	CO3	PO2
		(OR)				
6.	a)	Explain Differential aeration corrosion with examples.	8 Marks	L2	CO3	PO1
	b)	Calculate the standard electrode potential of zinc electrode dipped in 0.25M of $ZnSO_4$ at 25ºC ($E^o\ Zn/Zn^{2+} = 0.763V$).	4 Marks	L3	CO3	PO2

UNIT-IV

7.	a)	State Beer – Lamberts law and discuss various types of electronic transitions.	6 Marks	L2	CO4	PO1
	b)	Write the applications of IR spectroscopy.	6 Marks	L1	CO4	PO1
		(OR)				
8.	a)	Write the principle and applications of Scanning Electron Microscope.	6 Marks	L1	CO4	PO1
	b)	Define the terms auxochrome, chromophore and explain their significance.	6 Marks	L2	CO4	PO1

UNIT-V

9.	Define lubricant. Explain the properties of the lubricant and their significance.	12 Marks	L2	CO5	PO1
	(OR)				
10.	Describe the Bergius method with a neat diagram and write the advantages, disadvantages of synthetic petrol.	12 Marks	L2	CO5	PO1

TRANSFORMATION TECHNIQUES AND LINEAR ALGEBRA

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Find the Fourier series of the function $f(x) = x + x^2$ *in* $(0,3)$.	6 Marks	L1	CO1	PO1
	b)	Applying Fourier integral theorem, show that $e^{-x}\cos x = \frac{2}{\pi}\int_0^\infty \frac{\lambda^2+2}{\lambda^4+4}\cos\lambda x\, d\lambda$.	6 Marks	L3	CO1	PO2

(OR)

2.	a)	Find the half-range sine series of $f(x) = \begin{cases} \frac{1}{4} - x, & 0 < x < \frac{1}{2} \\ x - \frac{3}{4}, & \frac{1}{2} < x < 1 \end{cases}$ *in* $0 \le x \le 1$	6 Marks	L1	CO1	PO1
	b)	Find the Fourier cosine transform of $f(x) = e^{-ax}$, $a > 0$ and hence deduce the integral $\int_0^\infty \frac{\cos px}{a^2+p^2}dp$	6 Marks	L1	CO1	PO1

UNIT-II

3.	a)	Determine $L\{f(t)\}$ *where* $f(t) = t^2 e^{-3t}\sin 2t$.	6 Marks	L3	CO1	PO1
	b)	Find the Laplace transform of $\int_0^t \frac{1-e^{-t}}{t}dt$.	6 Marks	L1	CO1	PO1

(OR)

4.	a)	Applying Laplace transforms, evaluate $\int_0^\infty te^{-3t}\sin t\, dt$.	6 Marks	L3	CO1	PO2
	b)	Find the Laplace transformation of the rectified semi-wave function defined by $f(t) = \begin{cases} \sin\omega t, & 0 < t < \pi/\omega \\ 0, & \pi/\omega < t < 2\pi/\omega \end{cases}$.	6 Marks	L1	CO1	PO2

UNIT-III

5.	a)	Find the inverse Laplace transform of $\frac{s+2}{(s^2+4s+5)^2}$.	6 Marks	L1	CO1	PO1
	b)	Applying convolution theorem, evaluate $L^{-1}\left[\frac{s^2}{(s^2+a^2)(s^2+b^2)}\right]$.	6 Marks	L3	CO1	PO2

(OR)

6.		Apply Laplace transform technique to solve $(D^2 - 2D + 1)x = e^t$, *if* $x(0) = 2, x'(0) = -1$.	12 Marks	L3	CO1	PO2

UNIT-IV

7.		Show the sum of the Eigen values of the matrix $A = \begin{bmatrix} 7 & 2 & 2 \\ -6 & -1 & 2 \\ 6 & 2 & -1 \end{bmatrix}$ is equal to the trace of the matrix and product of the Eigen values equal to its determinant.	12 Marks	L2	CO2	PO1

(OR)

8.	a)	Solve the system of linear equations $5x + 3y + 7z = 4,\ 3x + 26y + 2z = 9,\ 7x + 2y + 10z = 5$.	6 Marks	L3	CO2	PO1
	b)	Change the quadratic form $3x^2 + 5y^2 + 3z^2 - 2xy + 2xz - 2yz$ to sum of squares form by an orthogonal transformation.	6 Marks	L2	CO2	PO1

UNIT-V

9.		Suppose $T: R^2 \to P_1$ is a linear transformation such that $T\begin{bmatrix} 1 \\ 1 \end{bmatrix} = 2 - 3x + x^2$ and $T\begin{bmatrix} 2 \\ 3 \end{bmatrix} = 1 - x^2$, then find $T\begin{bmatrix} -1 \\ 2 \end{bmatrix}$ and $T\begin{bmatrix} a \\ b \end{bmatrix}$, where P_2 is a vector space of polynomials of degree at most two over R.	12 Marks	L1	CO2	PO2

(OR)

10.	a)	Show that the set $\{1+x,\ x+x^2,\ 1+x^2\}$ forms a basis for the vector space P_2 of polynomials of atmost degree two over R.	8 Marks	L2	CO2	PO1
	b)	Find the Linear transformation $T: R^3 \to R$ defined by $T(1,1,1) = 3,\ T(0,1,-2) = 1,\ T(0,0,1) = 2$.	4 Marks	L1	CO2	PO1

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the terms: i) Total internal reflection. ii) Numerical Aperture. iii) V number.	8 Marks	L2	CO1	PO1
	b)	An optical fiber with 60 μm core diameter, carrying a light of wavelength 6000 Å and has refractive indices of core and cladding 1.55 and 1.50. Find the number of possible propagation modes (V number) through the fiber.	4 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Discuss the double crucible technique to fabricate optical fiber.	8 Marks	L2	CO1	PO1
	b)	Explain the principle and working of liquid level sensors.	4 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Summarize the classification of sound.	4 Marks	L2	CO1	PO1
	b)	Recall the Sabine's formula. Find the total absorption of sound in a hall of volume 1500m^3 and reverberation time of 0.5 s.	8 Marks	L1	CO1	PO2
		(OR)				
4.	a)	Explain principle, construction and working of magnetostriction method to produce ultrasonic waves.	8 Marks	L2	CO1	PO1
	b)	State various applications of ultrasonic waves.	4 Marks	L1	CO1	PO1
		UNIT-III				
5.	a)	Sketch the displacement-time curve, velocity-time curve and acceleration-time curve of a body in rectilinear motion.	6 Marks	L1	CO2	PO1
	b)	Derive an expression for maximum height and horizontal range of a projectile in inclined projection.	6 Marks	L3	CO2	PO2
		(OR)				
6.	a)	Derive an expression for the rotational moment of a wheel rotating about its own axis with an angular acceleration 'α'	6 Marks	L3	CO2	PO1 PO2
	b)	A flywheel of moment of inertia 5000kg m^2 having retardation 0.1 rad/s^2 loses its speed from 400 r.p.m to 300 r.p.m in 2 minutes. Calculate the change in its kinetic energy and angular moment.	6 Marks	L2	CO2	PO2
		UNIT-IV				
7.	a)	Define thermal conductivity and derive an expression for coefficient of thermal conductivity.	6 Marks	L1	CO2	PO1
	b)	Summarize the rectilinear flow of heat along a uniform bar.	6 Marks	L2	CO2	PO1
		(OR)				
8.		Elaborate the heat conduction through compound media in series and parallel.	12 Marks	L2	CO2	PO2
		UNIT-V				
9.	a)	Explain the preparation of metallic glasses by RF sputtering technique.	8 Marks	L2	CO3	PO1
	b)	List various applications of metallic glasses.	4 Marks	L1	CO3	PO2
		(OR)				
10.	a)	What are the shape memory alloys and outline the properties of NiTi alloy?	8 Marks	L1	CO3	PO1
	b)	List various applications of SMA.	4 Marks	L1	CO3	PO1

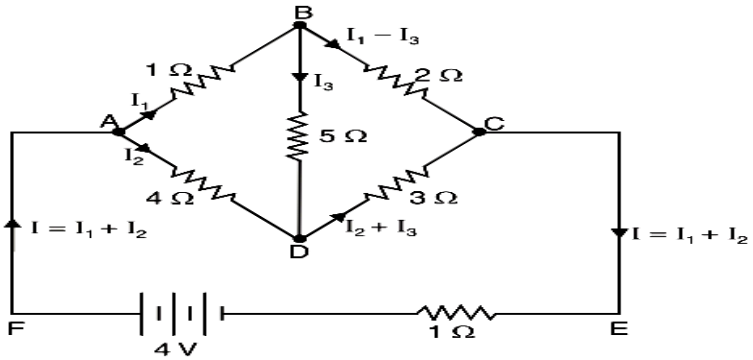
All questions carry equal marks

UNIT-I

1.	a)	With neat sketch, explain working principle of single loop generator.	6 Marks	L2	CO1	PO2
	b)	Derive the average, RMS value, Form Factor, Peak Factor for a sinusoidal waveform.	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	State and explain KVL and KCL with examples.	6 Marks	L1	CO1	PO1
	b)	Find the current in 5 ohm resistor.	6 Marks	L2	CO1	PO2



UNIT-II

3.	a)	With neat sketch, explain the working of various types of UPS.	6 Marks	L1	CO2	PO1
	b)	"The most economical power factor depends upon the relative costs of supply and power factor correction equipment but independent of the original power factor". Justify your answer with relative equations.	6 Marks	L1	CO2	PO1
		(OR)				
4.	a)	Sketch the typical layout and explain the operation of Hydro power plant.	6 Marks	L2	CO2	PO1
	b)	What are different types of circuit breaker? Explain any two of them with neat sketch.	6 Marks	L2	CO2	PO2

UNIT-III

5.	a)	3-φ 4-pole induction motor is supplied from 3φ 50Hz **ac** supply. Find : i) synchronous speed. ii) rotor speed when slip is 3%. iii) the rotor frequency when runs at 500 r.p.m.	6 Marks	L1	CO3	PO1
	b)	Explain the constructional details and operation of induction motor	6 Marks	L1	CO3	PO5
		(OR)				
6.	a)	Write a short notes on production of Rotating magnetic field	6 Marks	L1	CO3	PO1
	b)	With neat diagram, explain the working of a transformer.	6 Marks	L1	CO3	PO1

UNIT-IV

7.	a)	Draw and explain the circuit diagram of a full wave rectifier using four diodes and also sketch the waveforms.	6 Marks	L2	CO4	PO5
	b)	What is a zenerdiode? Distinguish between zener breakdown and avalanche breakdown.	6 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Explain the input and output characteristics of transistor in CC configuration with neat sketch.	6 Marks	L2	CO4	PO2
	b)	Explain the operation of p-n junction diode in forward and reverse biased condition.	6 Marks	L1	CO4	PO1

UNIT-V

9.	a)	With the help of a circuit diagram, show that the op-amp can be used as non-inverting adder.	6 Marks	L1	CO5	PO1
	b)	List the six characteristics of an ideal op-amp and explain in detail. Give the practical op-amp equivalent circuit.	6 Marks	L3	CO5	PO4
		(OR)				
10.	a)	With a neat circuit diagram, explain the operation of a op-amp differentiator and derive an expression for the output of a practical differentiator.	6 Marks	L2	CO5	PO2
	b)	Design a no inverting amplifier that has a voltage gain of 10 using an ideal op-amp. The input signal is in the range from -1 V to 1 V. Use 5 % tolerance discrete resistors for the feedback network.	6 Marks	L3	CO5	PO4

PROGRAMMING FOR PROBLEM SOLVING

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Illustrate the algorithms implementation with necessary examples.	6 Marks	L1	C01	PO1
	b)	How to handle input and output in python?	6 Marks	L2	C01	PO1
		(OR)				
2.	a)	Describe Arithmetic Operators, Assignment Operators in detail with examples.	6 Marks	L1	C02	PO1
	b)	Discuss about keywords and identifiers in python.	6 Marks	L2	C01	PO1
		UNIT-II				
3.	a)	What are the different loop control statements available in Python? Explain with suitable examples.	6 Marks	L2	C02	PO1
	b)	Write a Python program to check if a 3 digit number is Armstrong number or not.	6 Marks	L1	C02	PO2
		(OR)				
4.	a)	Discuss about Iterative Statements with example.	6 Marks	L1	C02	PO1
	b)	Input five integers (+ve and −ve). Write Python code to find the sum of negative numbers, positive numbers and print them.	6 Marks	L1	C02	PO2
		UNIT-III				
5.	a)	Write a python program to sort a given list.	6 Marks	L1	C02	PO2
	b)	Illustrate about any three string handling methods with examples.	6 Marks	L1	C02	PO1
		(OR)				
6.	a)	Write Python program to check for the presence of a key in the dictionary and find the sum all its values.	6 Marks	L2	C02	PO2
	b)	Write Python program to implement any three queue operations.	6 Marks	L2	C02	P02
		UNIT-IV				
7.	a)	Discuss about scope and life time of variables with necessary examples.	6 Marks	L2	C01	PO1
	b)	Elucidate any four built in functions in math module.	6 Marks	L1	C02	PO2
		(OR)				
8.	a)	Write a program to find factorial of given number using recursion.	6 Marks	L1	C02	PO2
	b)	Develop a python script to copy data from one file to other file.	6 Marks	L2	C01	PO3
		UNIT-V				
9.	a)	Consider a frame contains student marks information. Write a script to display student details whose marks <60.	6 Marks	L3	C02	PO3
	b)	Discuss about scatter plots in python.	6 Marks	L2	C02	PO1
		(OR)				
10.	a)	Write a python script to print information and frequency counts of data set.	6 Marks	L1	C02	PO2
	b)	Discuss about Histogram in python.	6 Marks	L2	C02	PO2

CIVIL ENGINEERING MATERIALS AND CONCRETE TECHNOLOGY

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the geological classification of stones with examples.	4 Marks	L4	CO1	PO1 PO2
	b)	List out various tools for blasting and describe them.	4 Marks	L2	CO1	PO1
	c)	Write about classification of bricks.	4 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Discuss manufacturing process of bricks.	6 Marks	L4	CO1	PO1
	b)	Write various characteristics of a good tile.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Draw the structure of a tree and mention their components.	6 Marks	L4	CO1	PO1
	b)	Explain any four defects in timber.	6 Marks	L4	CO1	PO1 PO2
		(OR)				
4.	a)	List out various building materials for low cost housing and explain any two of them with their merits and de-merits.	6 Marks	L2	CO1	PO1 PO2
	b)	Describe briefly about paints and varnishes.	6 Marks	L4	CO1	PO1
		UNIT-III				
5.	a)	Explain the manufacturing process of ordinary Portland cement.	6 Marks	L4	CO1	PO1 PO2
	b)	Enumerate various cements and discuss any two types of cements with their proprieties.	6 Marks	L2	CO1	PO1
		(OR)				
6.	a)	Explain the classification of aggregates and discuss the properties of aggregates.	6 Marks	L4	CO1	PO1 PO2
	b)	What do you mean by bulking of sand and describe how to find out the bulking of sand.	6 Marks	L4	CO1	PO1 PO2 PO5
		UNIT-IV				
7.	a)	Define workability and explain how to find out workability of fresh concrete in laboratory.	6 Marks	L4	CO1	PO1 PO2
	b)	Discuss about segregation and bleeding of concrete.	6 Marks	L4	CO1	PO1
		(OR)				
8.		Explain various Non-destructive tests to be conducted on hardened concrete with neat sketches.	12 Marks	L4	CO1	PO1 PO2
		UNIT-V				
9.	a)	Define Shrinkage and explain the various types of shrinkage.	6 Marks	L4	CO1	PO1
	b)	Explain various factors affecting creep of concrete.	6 Marks	L4	CO1	PO1 PO2
		(OR)				
10.		Describe the procedure for Mix design of concrete as per IS 10262-2009.	12 Marks	L4	CO2	PO1 PO2

ENGINEERING MECHANICS
[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

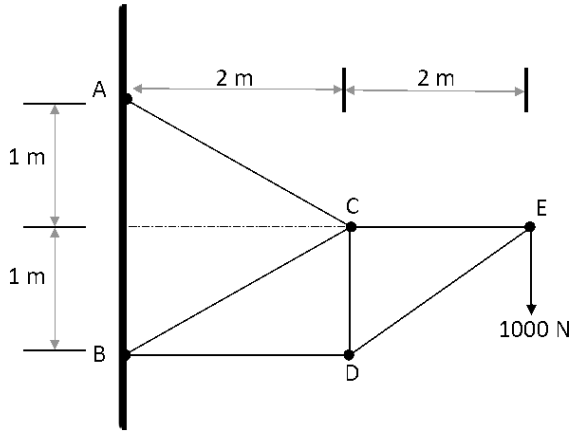
UNIT-I

1.	a)	Figure shows the connecting rod BA and crank AO. At the given position, the connecting rod exerts 2500N of force on crank pin at A. Resolve this force into vertical and horizontal components at A. Also resolve the given force at A along AO and perpendicular to AO. 	6 Marks	L3	CO1	PO1 PO2
	b)	Two smooth cylinders with diameters 250mm and 400mm respectively are kept in a groove with slanting surfaces making angles 60^0 and 30^0 as shown in the figure. Determine the reactions at contact points A, B and C. 	6 Marks	L4	CO1	PO1 PO2

(OR)

2.	a)	An electrical light weighing 15N hangs from a point C by the two strings AC and BC as shown in the figure. AC is inclined at 60^0 to the horizontal and BC at 45^0 to the vertical. Using Lami's theorem, find the forces in the strings AC and BC. Find the tension in each cable for the given figure. 	6 Marks	L4	CO1	PO1 PO2

	b)	A cantilever truss is loaded as shown in figure, find axial force in the members BC and CD.	6 Marks	L4	CO1	PO1 PO2



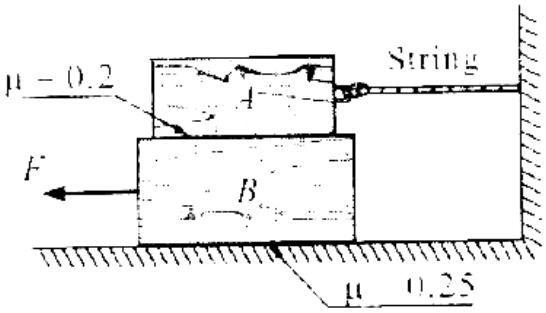
UNIT-II

3.	a)	Determine the necessary force P acting parallel to the plane to cause motion to impend as shown in the figure. Assume coefficient of friction as 0.25 and the pulley to be smooth.	8 Marks	L4	CO1	PO1 PO2

	b)	Discuss briefly about ladder friction and wedge friction.	4 Marks	L2	CO1	PO1 PO2

(OR)

4.	a)	Discuss briefly about angle of repose and cone of friction.	4 Marks	L2	CO1	PO1 PO2
	b)	In the given figure, weights of two blocks A and B are 100N and 150N respectively. Find the smallest value of the horizontal force F to just move the lower block B if : i) the block is restrained by a string. ii) when the string is removed.	8 Marks	L4	CO1	PO1 PO2

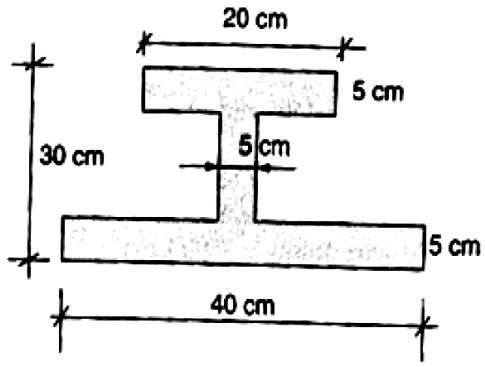


UNIT-III

5.	a)	Find the centroid of a quarter circular lines from basic principles.	6 Marks	L4	CO1	PO1 PO2
	b)	Derive the mass moment of inertia of a thin disc.	6 Marks	L4	CO1	PO1 PO2

(OR)

6.		Find the area moment of inertia about the centroidal axes for a given area shown in the figure.	12 Marks	L4	CO1	PO1 PO2



UNIT-IV

7.		A mild steel rod of 20mm diameter and 300mm long is enclosed centrally inside a hollow copper tube of external diameter 30mm and internal diameter of 25mm. The ends of the tube and rods are brazed together, and the composite bar is subjected to an axial pull of 40kN. If E for steel and copper is 200 GN/m^2 and 100 GN/m^2 respectively, find the stresses developed in the rod and tube. Also find the extension of the rod.	12 Marks	L4	CO1	PO1 PO2

(OR)

8.	a)	The safe stress, for a hollow steel column which carries an axial load of 2.2 x10^{3}kN is 120 MN/m^2. If the external diameter of the column is 25cm, determine the internal diameter.	6 Marks	L4	CO1	PO1 PO2
	b)	Find the modulus of elasticity for a rod, which tapers uniformly from 40mm to 25mm diameter in a length of 400mm. The rod is subjected to a load of 6 kN. Find the extension of the rod.	6 Marks	L4	CO1	PO1 PO2

UNIT-V

9.		A cylindrical shell 600mm diameter and 3m long, 10mm thick is subjected to 2.5MPa. E = 200GPa and μ = 0.25. Find: i) Change in length. ii) Change in diameter. iii) Change in volume. iv) Stresses. v) Strains.	12 Marks	L4	CO2	PO1 PO2

(OR)

10.	a)	A cylindrical vessel of 3mm thick, length and internal diameter of the vessel are 80cm and 30cm respectively. Determine the longitudinal and circumferential stresses in the cylindrical shell due to internal pressure of 1.5 N/mm^2. Take E = 2 x10^5 N/mm^2	5 Marks	L4	CO2	PO1 PO2
	b)	A thick pipe of 280mm external diameter and 200mm internal diameter is subjected to an internal pressure of 12MPa. What minimum external pressure can be applied so that the tensile stress in the metal shall not exceed 16MPa?	7 Marks	L4	CO2	PO1 PO2

ELECTRIC CIRCUITS

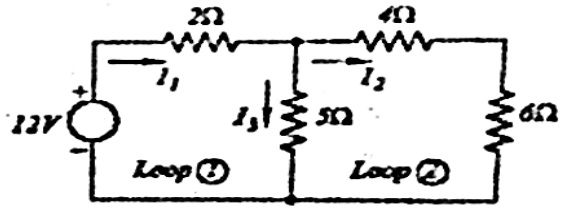
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

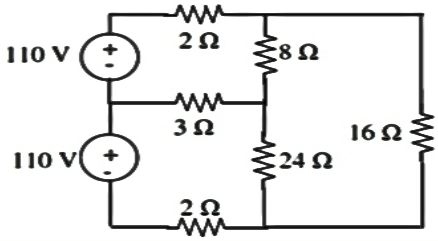
1.	a)	Explain clearly about Star-delta and delta-Star transformation.	6 Marks	L3	CO1	PO2
	b)	In the network shown below, find all branch currents and voltage drops across all resistors.	6 Marks	L3	CO1	PO3



(OR)

2.	a)	Find the value of V_a for the following circuit using KVL.	6 Marks	L3	CO1	PO3

	b)	Using nodal analysis find all branch currents for the following circuit.	6 Marks	L3	CO1	PO2



UNIT-II

3.	a)	Determine the effective value of the wave form shown in figure.	6 Marks	L3	CO1	PO2

	b)	An inductance of 0.5H, a resistance of 5Ω and a capacitance of 8μF are in series across a 220V ac supply. Calculate the frequency at which the current flowing through the circuit becomes maximum. Also, find bandwidth, half power frequencies and voltage across capacitance at resonance.	6 Marks	L1	CO2	PO1

(OR)

4.	a)	Find the form factor for the following waveform shown in figure below. 	6 Marks	L2	CO2	PO1
	b)	Elucidate measurement of power and power factor of a balanced 3 phase load with neat sketch using two watt meter method.	6 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Show that under the condition of maximum power transfer, the efficiency of the circuit is 50 %.	6 Marks	L2	CO3	PO1
	b)	State and explain Millman's theorem with suitable example.	6 Marks	L3	CO1	PO1
		(OR)				
6.	a)	Verify Superposition theorem for 4Ω resistor for the following circuit. 	6 Marks	L1	CO3	PO2
	b)	Describe the concept of duality and dual pairs. Also state the procedure followed to interchange between dual pairs.	6 Marks	L3	CO3	PO3
		UNIT-IV				
7.	a)	Two similar coils connected in series gave a total inductance of 600 mH and when one of the coil is reversed, the total inductance is 300 mH. Determine the mutual inductance between the coils and coefficient of coupling.	6 Marks	L1	CO4	PO2
	b)	Two inductively coupled coils have self inductances L1= 50 mH and L2= 200 mH. If the coefficient of coupling is 0.5, i) Find the value of mutual inductance between the coils. ii) What is the maximum possible mutual inductance?	6 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Discuss briefly about energy considerations in mutually coupled circuits.	6 Marks	L2	CO4	PO4
	b)	Derive the expression for equivalent inductance of two coil in parallel with i) Parallel aiding. ii) Parallel opposition.	6 Marks	L2	CO4	PO4
		UNIT-V				
9.	a)	What is a constant K low pass filter, derive its characteristics impedance.	6 Marks	L2	CO4	PO2
	b)	Explain the design procedure for a constant K low pass filter and its characteristics.	6 Marks	L3	CO4	PO3
		(OR)				
10.	a)	Derive the expression for characteristic impedance in a pass band filter.	6 Marks	L3	CO4	PO4
	b)	Derive necessary expressions for m-derived high pass filter.	6 Marks	L2	CO4	PO1

NETWORK ANALYSIS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

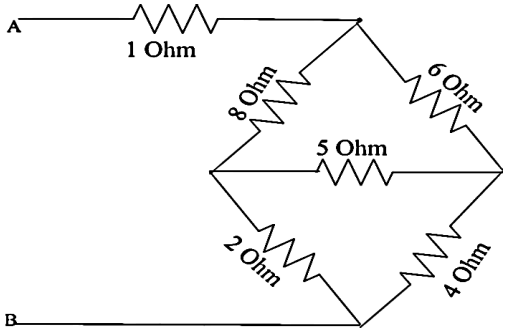
Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) With reference to the circuit shown in figure below, find : 6 Marks L3 CO1 PO2
   i) I_x if I_1=12mA. ii) I_1 if Ix=12mA.
   iii) I_x if I_2=15mA. iv) I_x if Is=60mA.

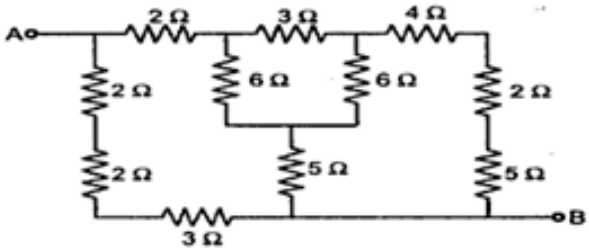
   b) Find equivalent resistance across terminals A-B for the circuit shown below. 6 Marks L3 CO1 PO2



(OR)

2. a) Determine the value of 'V' such that the current in (3+j4Ω) is zero. 6 Marks L4 CO1 PO2

   b) Find the effective resistance between points A and B for the given circuit. 6 Marks L3 CO1 PO2



UNIT-II

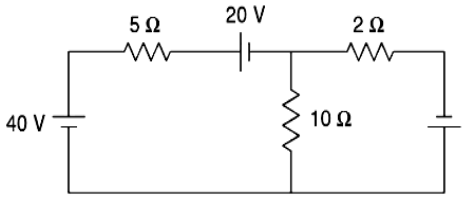
3.	a)	A two element series circuit is connected across AC source given by V=200√2Sin(314t+20º).The current in the circuit is found to be i=10√2 cos(314 t-25º).Determine the parameters of the circuit. Also determine the power factor, real power and reactive power taken by the circuit.	6 Marks	L3	CO2	PO2
	b)	Explain the sinusoidal response of series RL circuit.	6 Marks	L2	CO1	PO2
		(OR)				
4.	a)	Mention the properties of series resonant circuit.	4 Marks	L2	CO1	PO2
	b)	A series RLC circuit consists of 50Ω resistance, 0.2 H inductance and 10μF capacitance with applied voltage of 20V. Determine resonant frequency .Find Q- factor of the circuit .Compute the lower and upper frequency limits and the bandwidth of the circuit.	8 Marks	L3	CO2	PO2

UNIT-III

5.	a)	For the network shown below calculate the maximum power delivered to load resistance R_L.	8 Marks	L3	CO1	PO2

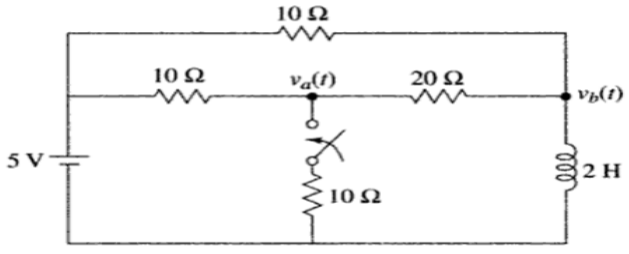
	b)	State and illustrate Millmann's theorem with an example.	4 Marks	L3	CO1	PO2
		(OR)				
6.	a)	Find the current through 2Ω resistor using Thevenin's theorem.	6 Marks	L3	CO1	PO2

	b)	Find the current through 2Ω resistor using super position theorem.	6 Marks	L3	CO1	PO2



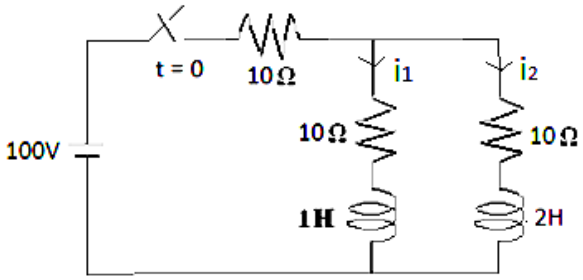
UNIT-IV

7.	a)	A series RL circuit with initial condition I_0 in the inductor is connected to a DC voltage V at t=0, Derive expression for the instantaneous current through the inductor for t >0.	6 Marks	L3	CO1	PO2
	b)	In the network shown in fig. a steady state is reached with the switch open.At t=0 ,the switch is closed .For the element values given , Determine the values of $V_a(0^-)$,$V_b(0^-)$,$V_a(0^+)$ and $V_b(0^+)$.	6 Marks	L3	CO2	PO2



(OR)

8.	a)	Obtain the DC response for a simple RL circuit with differential equations approach.	4 Marks	L2	CO1	PO2
	b)	In the circuit diagram shown in fig the switch S is closed at t=0 with the network previously unenergized. Use laplace transform method and evaluate $i_1(t)$.	8 Marks	L3	CO2	PO6



UNIT-V

9.	a)	Find the Y parameters for the network.	6 Marks	L3	CO1	PO2

	b)	Show that the overall Z-parameters for series connected two-port networks is simply the sum of Z matrices of the individual network.	6 Marks	L2	CO1	PO2

(OR)

10.	a)	Determine the Z- parameters of the T-network.	6 Marks	L3	CO1	PO2

	b)	Establish the relationship between Y and Z parameters..	6 Marks	L2	CO1	PO2

BASIC ENGINEERING MECHANICS

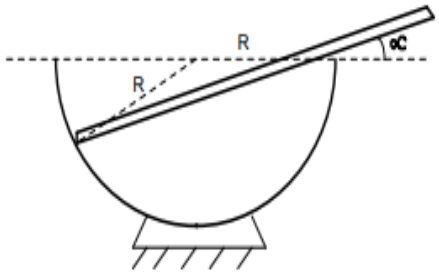
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

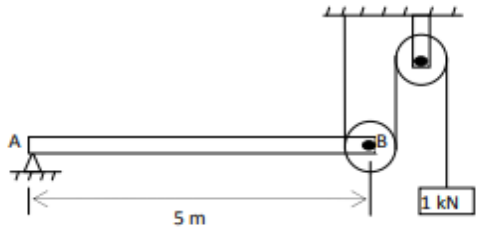
UNIT-I

1.	a)	Explain Lami's Theorem.	4 Marks	L2	CO1	PO1
	b)	Find the resultant of a system of concurrent, coplanar forces as F_1=(500N, 0^0) F_1=(300N, 45^0) F_1=(400N, 180^0) F_1= (200N, -150^0) F_1=(100N, -60^0) .	8 Marks	L2	CO1	PO1 PO2
		(OR)				
2.		If a rod of length 3R is placed horizontally in a hemispherical bowl of radius R, determine the angle α the rod will make with the horizontal for the rod to be in equilibrium. Neglect friction between the bowl and the rod and assume that the bowl does not rock.	12 Marks	L2	CO1	PO1 PO2



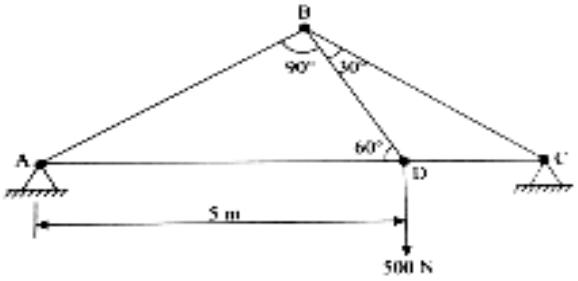
UNIT-II

3.	a)	State and prove Varignon's theorem.	4 Marks	L2	CO1	PO1
	b)	A beam hinged at A is supported in a horizontal position by a rope passing over a pulley arrangement as shown figure. The free end of the rope supports a load of 1500 N. The weight of the beam is 2 kN and that of pulley hinged at B is 400 N. Determine the tension in the rope, assuming the pulleys to be frictionless, and the reaction at A.	8 Marks	L2	CO1	PO1 PO2



(OR)

4.		A truss is loaded as shown in figure. Find the forces in members AB, BD and BC.	12 Marks	L2	CO1	PO1 PO2



UNIT-III

5.		The two blocks (A=30 N and B=50 N) are placed on the rough horizontal plane. Coefficient of friction between the block A and the plane is 0.3 and that between B and the plane is 0.2. Find the minimum value of the force P to just move the system. Also find the tension in the string. 	12 Marks	L2	CO1	PO1 PO2
		(OR)				
6.		Two blocks A and B are resting against a wall and the floor as shown in figure. Find the value of the horizontal force P applied to the lower block that will hold the system in equilibrium. Coefficients of frictions are 0.25 at the floor, 0.3 at the wall and 0.2 between the blocks. 	12 Marks	L2	CO1	PO1 PO2

UNIT-IV

7.	a)	Find the centroid for the shaded area shown. 	6 Marks	L3	CO2	PO1 PO2
	b)	State and prove Parallel Axis theorem.	6 Marks	L3	CO2	PO1
		(OR)				
8.		Find the moment of inertia of the plane area, about centriodal x and y-axis. 	12 Marks	L3	CO2	PO1 PO2

UNIT-V

9.	a)	An elevator of mass 2500kg is moving vertically downwards with a constant acceleration. Starting from rest, it travels a distance of 35m during an interval of 10 seconds. Find the cable tension during this time. Neglecting all other resistances to motion, what are the limits of cable tension?	10 Marks	L2	CO3	PO1 PO2
	b)	Define impulse-momentum principle.	2 Marks	L2	CO3	PO1

(OR)

10.	a)	Define the following terms: i) Periodic motion. ii) Fundamental mode of vibration. iii) Degree of freedom. iv) Simple harmonic motion.	6 Marks	L2	CO4	PO1
	b)	Calculate equivalent stiffness of the spring for the system shown below, which has spring stiffness of 3000 N/m.	6 Marks	L2	CO4	PO1 PO2

UNIT-I

1.	a)	Each of the following arithmetic operations is correct in at least one number system. Determine the possible bases of the numbers in each operation. i) 1234 + 5432 = 6666. ii) 41/3 = 13.	6 Marks	L2	CO1	PO1
	b)	Represent the following decimal numbers in Excess-3 code. i) 286 ii) 807 iii) 429.5	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Express the following functions in a sum of minterms. i) F = D(A' + B) + B'D ii) F = xy + x'y' + y'z	6 Marks	L2	CO1	PO1
	b)	Convert the following Gray codes to binary number. i) 10011. ii) 101110. iii) 100010110.	6 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Reduce the following expression using K-map and implement using NAND gates: $F = \sum m(9,10,12) + d(3,5,6,7,11,13,14,15)$	6 Marks	L3	CO1	PO2
	b)	Implement EX-NOR and NOR gates with minimum number of NAND gates only.	6 Marks	L2	CO1	PO1
		(OR)				
4.	a)	Obtain the minimal SOP expression for $F = \prod M(0,1,2,4,5,6,9,11,12,14,15)$	6 Marks	L3	CO1	PO2
	b)	Obtain the reduced expression $F = \sum m(2,4,6,8,10,12,15)$ using K-map and realize with NOR gates.	6 Marks	L3	CO1	PO2

UNIT-III

5.	a)	Design a combinational circuit with four inputs and four outputs. The output generates the 2's complement of the input binary number.	6 Marks	L4	CO2	PO4
	b)	Implement full adder with two half adders.	6 Marks	L4	CO2	PO2
		(OR)				
6.	a)	Construct 4 x 1 Multiplexer using two 2 x 1 Multiplexers.	6 Marks	L4	CO2	PO4
	b)	Design the 4-bit BCD adder using 4-bit binary adders and explain its operation.	6 Marks	L4	CO2	PO4

UNIT-IV

7.	a)	Illustrate the function of JK flip-flop using NAND gates in detail.	6 Marks	L4	CO2	PO1
	b)	Draw the logic diagram of mod 6 ripple counter using T flip-flops and explain its operation.	6 Marks	L4	CO2	PO2
		(OR)				
8.	a)	Design a MOD 8 parallel counter using T flip-flops.	6 Marks	L4	CO2	PO4
	b)	Describe the operation of SR flip-flop in detail.	6 Marks	L4	CO2	PO2

UNIT-V

9.	a)	Give the logic implementation of a 32 x 4 bit ROM using a decoder of a suitable size.	6 Marks	L4	CO2	PO2
	b)	Show how the PLA circuit would be programmed to implement the 3 bit binary to gray conversion.	6 Marks	L4	CO2	PO1
		(OR)				
10.	a)	Realize the following functions using PROM of size 8 x 3: $F_1 = \sum m(0,4,7)$; $F_2 = \sum m(1,3,6)$; $F_3 = \sum m(1,2,4,6)$	6 Marks	L4	CO2	PO2
	b)	Write the program table to implement a BCD to Excess-3 code conversion using a PLA.	6 Marks	L4	CO2	PO1

OBJECT ORIENTED PROGRAMMING THROUGH JAVA
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the following object oriented concepts. i) Abstraction. ii) Polymorphism.	6 Marks	L1	CO1	PO1
	b)	Explain the use of "this" keyword with an example.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Discuss about access control mechanism in Java.	6 Marks	L2	CO1	PO1
	b)	Differentiate Function Oriented Programming and Object Oriented Programming.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Explain the differences between String and String Buffer class with an example.	6 Marks	L2	CO1	PO1
	b)	Write about various ways of parameter passing mechanisms in Java with an example.	6 Marks	L3	CO1	PO1
		(OR)				
4.	a)	Explain constructor overloading with an example.	6 Marks	L2	CO1	PO5
	b)	What is the use of String Tokenizer? Discuss with an example.	6 Marks	L2	CO1	PO5
		UNIT-III				
5.	a)	What is user defined package? Explain the steps involved in creating the user defined package with an example.	6 Marks	L3	CO2	PO11
	b)	Illustrate the use of "super" and "Final" keyword in Java.	6 Marks	L1	CO2	PO2
		(OR)				
6.	a)	What is method binding? Explain with an example.	6 Marks	L1	CO2	PO2
	b)	Explain concept of multiple inheritance with suitable program.	6 Marks	L1	CO2	PO5
		UNIT-IV				
7.	a)	Discuss Inter thread communication with an example.	6 Marks	L2	CO2	PO5
	b)	Write a Java program to implement multithreading.	6 Marks	L3	CO2	PO6
		(OR)				
8.	a)	Demonstrate nested try and final statements in exception handling.	6 Marks	L2	CO2	PO11
	b)	Write a Java program to demonstrate Array Index Out of Bounds exception and divide by zero exception with an example.	6 Marks	L2	CO2	PO11
		UNIT-V				
9.	a)	Write a Java program to design calculator using AWT.	6 Marks	L3	CO3	PO11
	b)	Write the procedure to handle events using event Listeners.	6 Marks	L3	CO3	PO11
		(OR)				
10.	a)	Discuss about card and border layouts with suitable example.	6 Marks	L2	CO3	PO1
	b)	Write a Java program using the following: i) JTable ii) JTabbedPane.	6 Marks	L2	CO3	PO1

BIOLOGY FOR ENGINEERS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		Summarize the different types of taxonomy, uses and significance of molecular taxonomy. List out the different Molecular taxonomical methods.	12 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Compare the differences between Prokaryotes and Eukaryotes.	6 Marks	L2	CO1	PO2
	b)	How living organisms are classified based on the carbon and energy resources?	6 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Define bio-molecule. Explain the structures and functions of DNA.	6 Marks	L1	CO2	PO1
	b)	Classify carbohydrates with examples.	6 Marks	L2	CO1	PO2
		(OR)				
4.		What are enzymes? Describe its mechanism of action, factors affecting enzyme activity and industrial applications.	12 Marks	L1	CO1	PO1
		UNIT-III				
5.		Illustrate the mechanism and process of central dogma of molecular biology with a neat diagram of Replication, Transcription and Translation.	12 Marks	L2	CO2	PO1
		(OR)				
6.		Explain Mendel's Law of segregation and Law of Assortment with the help of Punnett's square.	12 Marks	L2	CO2	PO1
		UNIT-IV				
7.		Recall the definition of recombinant DNA technology and depict the general cloning methods and procedures.	12 Marks	L1	CO3	PO1
		(OR)				
8.	a)	Outline the role of biosensors and biochips.	6 Marks	L2	CO3	PO6
	b)	Relate the pros and cons of recombinant vaccines.	6 Marks	L2	CO3	PO6
		UNIT-V				
9.	a)	How will you solve the problem of two parents claiming a single baby as their own child with DNA finger printing?	6 Marks	L1	CO3	PO6
	b)	Demonstrate the role of EEG in medical diagnostics.	6 Marks	L2	CO3	PO6
		(OR)				
10.		List the contrast characteristic features of the human digestive system and Respiratory system with neat diagram.	12 Marks	L1	CO1	PO1

I B.Tech II Semester (SVEC-19) Supplementary Examinations January - 2022

ENGINEERING PHYSICS

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Discuss the phenomenon of interference in thin films. Obtain the conditions for maxima and minima.	9 Marks	L2	CO1	PO1
	b)	In Newton's ring experiment, the diameters of 4^{th} and 12^{th} dark rings are 0.4 cm and 0.7 cm respectively. Calculate the diameter of 20^{th} dark ring.	3 Marks	L3	CO1	PO2
		(OR)				
2.		Describe the theory of Fraunhofer diffraction due to a single slit and hence obtain the condition for primary and secondary maxima.	12 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Explain the physical significance of Maxwell's equations.	4 Marks	L2	CO2	PO1
	b)	Derive the free space electromagnetic wave equations and show that the velocity of the electromagnetic wave is $\frac{1}{\sqrt{\mu_0 \varepsilon_0}}$.	8 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Define critical angle. Derive an expression for acceptance angle and numerical aperture of an optical fibre.	9 Marks	L3	CO2	PO1
	b)	List any three losses in optical fibers.	3 Marks	L1	CO2	PO1
		UNIT-III				
5.	a)	Develop an expression for number of electrons per unit volume in conduction band of an intrinsic semiconductor.	8 Marks	L3	CO3	PO1 PO2
	b)	The Hall co-efficient of a silicon specimen was found to be $-7.35 \times 10^{-5} m^3/C$ at 300K. Determine the nature of the semiconductor. If the conductivity was found to be $200 \Omega^{-1} m^{-1}$, calculate the density and mobility of the charge carriers.	4 Marks	L3	CO3	PO2
		(OR)				
6.	a)	Classify solid materials based on energy band diagrams.	5 Marks	L2	CO3	PO1
	b)	Describe the formation and characteristics of p-n junction diode with suitable diagrams.	7 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Define Local field. Derive an expression for the local field inside a dielectric material.	8 Marks	L3	CO4	PO1 PO2
	b)	Discuss the frequency dependence of polarizability.	4 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Explain the origin of magnetic dipole moment due orbital and spin motion of an electron.	6 Marks	L2	CO4	PO1
	b)	Classify the magnetic materials using B-H curve.	6 Marks	L2	CO4	PO1

UNIT-V

9.	a)	Define terms critical temperature and critical field. Distinguish Type-I and Type-II superconductors.	8 Marks	L4	CO5	PO1
	b)	List any five applications of superconductors.	4 Marks	L1	CO5	PO1
		(OR)				
10.	a)	Using pulsed laser deposition technique, explain the synthesis of nano films.	8 Marks	L2	CO5	PO1
	b)	Identify any four applications of Nanomaterials.	4 Marks	L3	CO5	PO1

ENGINEERING CHEMISTRY

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Identify the magnetic behavior and bond order of carbon oxide molecule based on its energy level diagram.	6 Marks	L3	CO1	PO2
	b)	Derive the expression for Schrodinger wave equation.	6 Marks	L3	CO1	PO1
		(OR)				
2.		Discuss the postulates of molecular orbital theory.	12 Marks	L2	CO1	PO1
		UNIT-II				
3.		Central Water Commission of Tirupati section reports on underground water sample (in mg/L) at the proposed site for the construction of thermal power plant (300 MW) near Rangampet is as follows: $Ca(HCO_3)_2$ = 111, $CaSO_4$ = 198, $MgCl_2$ = 80, $Mg(HCO_3)_2$ = 56, $MgSO_4$ = 184, DO = 12 and Na_2CO_3 = 125. Predict the operation troubles suffered by the boiler and write their disadvantages, reactions and removal methods for the predicted boiler operation troubles.	12 Marks	L3	CO2	PO2
		(OR)				
4.		Explain the Nalgonda defluoridation method and mention the adverse effect of fluorides on human health.	12 Marks	L2	CO2	PO6
		UNIT-III				
5.	a)	Explain the how underground pipelines and cables can be protected from corrosion.	6 Marks	L2	CO3	PO2
	b)	Write a short note on construction and working of methanol-oxygen fuel cell with chemical reactions involved in it.	6 Marks	L1	CO3	PO1
		(OR)				
6.	a)	Describe the construction and working of lead acid battery with chemical reactions involved in it.	7 Marks	L2	CO3	PO1
	b)	Define electroplating and mention the conditions required for Ni electroplating.	5 Marks	L1	CO3	PO1
		UNIT-IV				
7.	a)	Write the applications of X-ray diffraction technique.	6 Marks	L1	CO4	PO1
	b)	Illustrate Bathochromic shift and Hypsochromicshift.	6 Marks	L2	CO4	PO1
		(OR)				
8.		Discuss the principle and working of an IR spectrometer with the help of a block diagram.	12 Marks	L2	CO4	PO1
		UNIT-V				
9.	a)	Describe the Fischer-Tropsch method with a neat diagram and write the advantages, disadvantages of synthetic petrol.	8 Marks	L2	CO5	PO1
	b)	Define flash point and fire point of a lubricant and explain their significance.	4 Marks	L1	CO5	PO1

(OR)

10.	a)	Define lubrication. Illustrate the mechanism of thin film and extreme pressure lubrication.	8 Marks	L2	CO5	PO1
	b)	A coal has following composition by weight C = 90%, O = 3%, S =0.5%, N = 0.5% and ash = 2.5%. Net calorific value of the coal was found to be 8490 kcal/kg. Calculate the high calorific value of coal.	4 Marks	L3	CO5	PO2

COMMUNICATIVE ENGLISH

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		Discuss the merits and demerits of assertive communication.	12 Marks	L4	CO1	PO2
		(OR)				
2.	a)	Explain communicative competence and the need for communicating in English at the work place.	6 Marks	L2	CO1	PO1
	b)	Explain in brief about verbal and non-verbal communication.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.		How can you overcome the barriers that affect the process of listening?	12 Marks	L4	CO1	PO2
		(OR)				
4.	a)	Differentiate listening from hearing with suitable examples.	6 Marks	L4	CO1	PO2
	b)	Identify different kinds of listening modes.	6 Marks	L3	CO1	PO5
		UNIT-III				
5.		"Conferences are useful in arriving at possible solutions to some problems". Discuss with suitable examples.	12 Marks	L2	CO1	PO1
		(OR)				
6.	a)	Discuss various steps for organizing a symposium.	6 Marks	L2	CO1	PO1
	b)	Persuasive techniques are used to motivate audience to be attentive. Discuss.	6 Marks	L2	CO1	PO5 PO10
		UNIT-IV				
7.		Discuss why you need to apply study skills in order to make the most of your comprehension.	12 Marks	L2	CO1	PO5 PO10
		(OR)				
8.	a)	Explain how you can use the understanding of discourse markers to develop ideas and relate them to one another.	6 Marks	L2	CO1	PO10
	b)	Discuss how you would apply the ways in which comprehension skills can be improved.	6 Marks	L3	CO1	PO5
		UNIT-V				
9.		Illustrate how would you categorize different types of essays depending on the purpose they fulfil.	12 Marks	L2	CO1	PO5 PO10
		(OR)				
10.	a)	Explain how would you achieve effective technical documentation by accentuating the positives and avoiding plagiarism.	6 Marks	L4	CO1	PO2
	b)	Discuss how can you compose coherent and meaningful paragraphs using cohesion and coherence.	6 Marks	L4	CO1	PO2

TRANSFORMATION TECHNIQUES AND LINEAR ALGEBRA

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Determine the Fourier series for the function $f(x) = x^2 - 2$ *in* $-2 \le x \le 2$.	4 Marks	L4	CO1	PO1
	b)	Find the Fourier transform of $f(x) = \begin{cases} a^2 - x^2, & if \ \|x\| < a \\ 0, & if \ \|x\| > a > 0 \end{cases}$ and hence deduce that $\int_0^\infty \frac{\sin x - \cos x}{x^3} dx = \frac{\pi}{4}$.	8 Marks	L1	CO1	PO1

(OR)

2.	a)	Establish half-range sine series for $f(x) = x^2$ *in* $0 < x < 4$.	6 Marks	L1	CO1	PO1
	b)	Find the Fourier cosine transform of e^{-ax}, $a > 0$ and hence deduce the integral $\int_0^\infty \frac{\cos px}{a^2 + p^2} dp$.	6 Marks	L1	CO1	PO1

UNIT-II

3.	a)	Find $L\{f(t)\}$, where *f(t)* is a periodic function of period 2π and it is given by $f(x) = \begin{cases} \sin t, & 0 < t < \pi \\ 0, & \pi < t < 2\pi \end{cases}$.	6 Marks	L1	CO1	PO1
	b)	Find the Laplace transform of the integral $\int_0^t \frac{e^t \sin t}{t} dt$.	6 Marks	L1	CO1	PO2

(OR)

4.	a)	Find the Laplace transform of *f(t)* where $f(t) = \begin{cases} e^t, & 0 < t < 5 \\ 3, & t > 5 \end{cases}$.	6 Marks	L1	CO1	PO1
	b)	Making use of Laplace transform, evaluate $\int_0^\infty te^{-t} \sin t dt$.	6 Marks	L3	CO1	PO2

UNIT-III

5.		By applying the technique of Laplace transforms, solve the differential equation $\frac{d^2y}{dt^2} + 2\frac{dy}{dt} + 5y = e^{-t} \sin t$, given that $y(0) = 0; y'(0) = 1$.	12 Marks	L3	CO1	PO2

(OR)

6.	a)	Find the inverse Laplace transform of $\log\left(\frac{s^2+4}{s^2+9}\right)$.	6 Marks	L1	CO1	PO1
	b)	Apply convolution theorem to evaluate $L^{-1}\left\{\frac{1}{(s-2)(s+2)^2}\right\}$.	6 Marks	L3	CO1	PO2

UNIT-IV

7.		Find an orthogonal matrix which diagonalizes $\begin{bmatrix} 1 & 0 & 0 \\ 0 & 3 & -1 \\ 0 & -1 & 3 \end{bmatrix}$ and hence write the diagonal matrix.	12 Marks	L1	CO2	PO1
		(OR)				
8.		Change the quadratic form $3x^2+2y^2+3z^2-2xy-2yz$ to canonical form by orthogonal transformation and also find its nature.	12 Marks	L2	CO2	PO2

UNIT-V

9.	a)	In the vector space P_2, of all polynomials of degree atmost two, determine whether the set $\{1+x+x^2, 1-x+3x^2, 1+3x-x^2\}$ is linearly independent or not.	6 Marks	L3	CO2	PO1
	b)	Let $T: R^2 \to P_2$, where P_2 is a polynomial function of degree two be a linear transformation such that $T\begin{bmatrix}1\\1\end{bmatrix} = 2-3x+x^2$ *and* $T\begin{bmatrix}2\\3\end{bmatrix} = 1-x^2$ *then find* $T\begin{bmatrix}-1\\2\end{bmatrix}$.	6 Marks	L1	CO2	PO2
		(OR)				
10.	a)	Show that the set $B=\{1+x, x+x^2, 1+x^2\}$ is a basis for the vector space P_2 of polynomials of atmost degree two over R.	6 Marks	L1	CO2	PO1
	b)	Find the Linear transformation $T: R^2 \to R^2$ such that $T(2,3) = (4,5)$, $T(1,0) = (0,0)$.	6 Marks	L1	CO2	PO1

APPLIED PHYSICS
[Civil Engineering, Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the differences between the step index fiber and graded index fibers.	8 Marks	L2	CO1	PO1
	b)	Calculate the numerical aperture and acceptance angle for an optical fiber with core and cladding refractive indices being 1.48 and 1.45 respectively.	4 Marks	L3	CO1	PO2
		(OR)				
2.	a)	What is an optical fiber? What is the principle involved in its working? Derive an expression for acceptance angle of an optical fiber and how it is related to numerical aperture.	9 Marks	L1	CO1	PO1
	b)	Mention the applications of optical fibers in various fields.	3 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Write a note on reverberation and reverberation time. Derive Sabine's mathematical relation for reverberation time.	9 Marks	L1	CO1	PO1
	b)	A hall with a volume of $1000m^3$ has a sound absorbing surface of area of $400m^2$. If the average absorption coefficient of the hall is 0.2 Sabin. What is the reverberation time of the hall?	3 Marks	L1	CO1	PO2
		(OR)				
4.	a)	Explain the production of ultrasonic waves using inverse piezoelectric method with a neat diagram.	8 Marks	L2	CO1	PO1
	b)	With a neat block diagram, explain sonogram.	4 Marks	L2	CO1	PO1
		UNIT-III				
5.	a)	Define the terms: Rectilinear motion and Curvilinear motion.	6 Marks	L1	CO2	PO1
	b)	Show that the area under the v-t curve and the area under the a-t curve represent displacement and the velocity of the moving body respectively.	6 Marks	L1	CO2	PO2
		(OR)				
6.	a)	Derive an expression for the centripetal acceleration of a body moving along a curved path of radius (r) with a uniform velocity (v).	6 Marks	L2	CO2	PO1 PO2
	b)	Define the terms: Time of flight and Trajectory in a projectile.	6 Marks	L1	CO2	PO1
		UNIT-IV				
7.	a)	Classify modes of heat transfer and explain them.	6 Marks	L2	CO2	PO1
	b)	Discuss the rectilinear motion of heat along a uniform bar.	6 Marks	L2	CO2	PO1
		(OR)				
8.	a)	Enumerate the thermal conductivity of poor conductor using Lee's disc method.	8 Marks	L2	CO2	PO1
	b)	Write the applications poor conductors.	4 Marks	L1	CO2	PO1

UNIT-V

9.	a)	Explain the preparation of metallic glasses by RF sputtering technique.	8 Marks	L2	CO3	PO1
	b)	Outline the application of metallic glasses.	4 Marks	L2	CO3	PO1
		(OR)				
10.	a)	What are shape memory alloys? Explain the characteristics of shape memory alloys. List the applications of shape memory alloys.	9 Marks	L2	CO3	PO1
	b)	List the application of composites.	3 Marks	L1	CO3	PO1

BASIC ELECTRICAL AND ELECTRONICS ENGINEERING

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	A sinusoidal voltage v = 50 sin **ωt** is applied to a series RL circuit. The current in the circuit is given by i = 25 sin (ωt -60º). Determine. i) apparent power ii) average power iii) reactive power and iv) power factor.	6 Marks	L2	CO1	PO1
	b)	With the help of neat sketch explain in detail the working of the single loop generator.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	State and verify Kirchhoff's voltage law for the given circuit. 	6 Marks	L3	CO1	PO2
	b)	Define RMS value and obtain the RMS and Average value of a sine wave having peak value of V_m and angular frequency **ω** rad/s.	6 Marks	L1	CO1	PO2

UNIT-II

3.	a)	Draw the typical layout of hydro power plant and explain its features.	6 Marks	L2	CO2	PO1
	b)	Summarize the necessity of earthing. With the help of neat sketch explain in detail the operation of pipe earthing.	6 Marks	L2	CO2	PO6
		(OR)				
4.	a)	With the help of neat sketch explain the operation of thermal power plant also mention its advantage and disadvantages.	6 Marks	L2	CO2	PO1
	b)	An industrial application demands high power factor. Suggest a suitable method to improve the low power factor.	6 Marks	L3	CO2	PO6

UNIT-III

5.	a)	Derive the expression for **e.m.f.** induced in a transformer in terms of frequency, maximum value of flux and number of turns on the windings.	6 Marks	L2	CO3	PO2
	b)	Derive the basic torque equation and explain the torque-slip characteristics of three phase induction motor.	6 Marks	L2	CO3	PO2

(OR)

6.	a)	Explain the constructional details of single phase capacitor start induction motor.	6 Marks	L2	CO3	PO1
	b)	Explain the constructional details of synchronous machine and mention it's applications.	6 Marks	L2	CO3	PO1

UNIT-IV

7.	a)	Explain the operation of a p-n junction diode in forward biased and reverse biased condition.	6 Marks	L1	CO4	PO1
	b)	Elucidate, how a Zener diode can be used as a voltage regulator.	6 Marks	L2	CO4	PO2

(OR)

8.		Draw the circuit of a half-wave-rectifier without filter and derive the expressions for ripple factor, % regulation, efficiency and PIV.	12 Marks	L1	CO4	PO1

UNIT-V

9.	a)	Construct an Adder using OP-AMP. Explain and analyze its operation.	6 Marks	L2	CO4	PO1
	b)	Comprehend the working of a comparator using op-amp. What are its limitations?	6 Marks	L2	CO4	PO1

(OR)

10.	a)	Examine and derive an expression for V_0 of the differentiator circuit by using op-amp.	6 Marks	L2	CO4	PO2
	b)	"OP-AMP can be used as an inverting amplifier". Explain.	6 Marks	L4	CO4	PO1

I B.Tech II Semester (SVEC-19) Supplementary Examinations, January 2022

PROGRAMMING FOR PROBLEM SOLVING

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define flow chart, explain various symbols used in flowchart design.	6 Marks	L1	CO1	PO1
	b)	Illustrate membership and identity operators in Python with an example for each.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Design an algorithm to print first **n** fibonacci terms.	6 Marks	L3	CO1	PO2
	b)	Write a python script to perform swapping of two numbers without using third variable.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Write the difference between **break** and **continue** statements with examples.	6 Marks	L2	CO1	PO1
	b)	Write a python program that takes an integer and forms a new integer which has the number of digits at the ten's place and the least significant digit in the one's place. For ex, 452 =>32.	6 Marks	L3	CO1	PO2
		(OR)				
4.	a)	Write a python program to check whether the given number (N) can be expressed as Power of Two (2) or not, for ex 8 can be expressed as 2^3.	6 Marks	L3	CO1	PO2
	b)	Display the following pattern using python script. ***** **** *** ** *	6 Marks	L3	CO1	PO2

UNIT-III

5.	a)	Write a python script to delete duplicate strings from a list of strings. (Insertion order should maintain after deleting duplicate string).	6 Marks	L3	CO1	PO3
	b)	Vamsi loves lucky numbers. Everybody knows that lucky numbers are positive integers whose decimal representation contains only the lucky digits 4 and 7. For example, numbers 47, 744, 4 are lucky and 5, 17, 467 are not. Write a python script to find whether the given number is Lucky or not.	6 Marks	L3	CO1	PO2
		(OR)				
6.	a)	Define queue. Write a python script to implement queue operations.	6 Marks	L3	CO1	PO3
	b)	Create a dictionary and display dictionary. Update any one key value and display the updated dictionary.	6 Marks	L3	CO1	PO2

UNIT-IV

7.	a)	Write a python script to count number of lines, words and characters present in a given file.	6 Marks	L3	CO2	PO3
	b)	Define recursion. Write a recursive function to calculate factorial of a given number.	6 Marks	L3	CO2	PO2
		(OR)				
8.	a)	Develop a python script to calculate GCD of given list of numbers.	6 Marks	L3	CO2	PO3
	b)	Explain functionality of the following properties. i) shape ii) ndim	6 Marks	L1	CO2	PO1

UNIT-V

9.	a)	Create a dictionary it contains student information, convert dictionary into pandas data frame.	6 Marks	L2	CO2	PO1
	b)	Consider data frame contains employee salary information. Write a python script to display employee details whose salary >30000.	6 Marks	L3	CO2	PO3
		(OR)				
10.	a)	Illustrate different ways of slicing operations used in selecting data from data frame.	6 Marks	L2	CO2	PO1
	b)	Draw bar plots by considering discrete data.	6 Marks	L3	CO2	PO3

CIVIL ENGINEERING MATERIALS AND CONCRETE TECHNOLOGY

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Mention the factors to be considered while deciding a quarry site.	6 Marks	L2	CO1	PO1
	b)	What precautions are exercised in storing explosives? When is it required to quarry stones by blasting?	6 Marks	L4	CO1	PO1 PO2
		(OR)				
2.	a)	Explain the tests required to determine the suitability of bricks for construction works.	6 Marks	L3	CO1	PO1 PO2
	b)	Explain the process of burning bricks in Hoffman's kiln with a neat sketch.	6 Marks	L2	CO1	PO1 PO2 PO5

UNIT-II

3.	a)	Describe the cross section of a tree.	6 Marks	L4	CO1	PO1
	b)	List and explain the various methods of seasoning of timber.	6 Marks	L3	CO1	PO1 PO2 PO5
		(OR)				
4.	a)	Enumerate the precautionary measures to reduce various defects in timber.	6 Marks	L4	CO1	PO1 PO2
	b)	Explain in detail about alternative materials for wood.	6 Marks	L2	CO1	PO1 PO2 PO5

UNIT-III

5.	a)	Discuss the role of various major compounds of cement and its hydrated products in the properties of cement.	6 Marks	L2	CO1	PO1 PO2
	b)	Differentiate between accelerators and retarders with suitable examples and also how you can determine dosage of admixtures.	6 Marks	L4	CO1	PO1 PO2
		(OR)				
6.	a)	Briefly describe the following tests on aggregates: i) Crushing test. ii) Impact test.	6 Marks	L2	CO1	PO1
	b)	What are super plasticizers? How are these helpful in modifying the properties of concrete?	6 Marks	L4	CO1	PO1 PO2

UNIT-IV

7.	a)	What is meant by workability? How is it tested in field and in laboratory?	6 Marks	L3	CO1	PO1 PO2
	b)	Briefly explain about ready mix concrete.	6 Marks	L2	CO1	PO1
		(OR)				
8.	a)	Why compaction is required to concrete? Explain compaction methods by vibration.	6 Marks	L4	CO1	PO1 PO2
	b)	Mention various non-destructive testing of concrete. Explain any two methods in brief.	6 Marks	L3	CO1	PO1 PO2 PO5

UNIT-V

9.	a)	Write short note on: i) Creep. ii) Shrinkage of concrete.	6 Marks	L2	CO1	PO1
	b)	Explain how will you determine the modulus of elasticity of concrete experimentally.	6 Marks	L4	CO1	PO1 PO2
		(OR)				
10.		Design a concrete mix of M30 grade. Take standard deviation of 5Mpa.The specific gravities of coarse aggregate and fine aggregate are 2.75 and 2.62 respectively. The bulk density of coarse aggregate is 1610 kg/m³ and fineness modulus of aggregate is 2.70. A slump of 60 mm is necessary The water absorption of coarse aggregate is 1% and free moisture in fine aggregate is 2%. Design the concrete mix using IS code method. Assume any missing data.	12 Marks	L6	CO2	PO1 PO2 PO3 PO8

CODE No.: 19BT20102 SVEC-19

ENGINEERING MECHANICS
[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain how the Parallelogram law can be used to obtain the resultant of more than two concurrent forces.	6 Marks	L4	CO1	PO1 PO2
	b)	What is a resultant force? What is meant by composition of forces, component of a force and resolution of a force? Can a force be resolved into non-perpendicular components? If so, how?	6 Marks	L4	CO1	PO1 PO2
		(OR)				
2.	a)	What is perfect frame and imperfect frame? Write the advantage of method of sections as compared to method of joints.	6 Marks	L4	CO1	PO1 PO2
	b)	Determine the forces in all the members of a truss shown in Fig.1 using method of joints.	6 Marks	L4	CO1	PO1 PO2

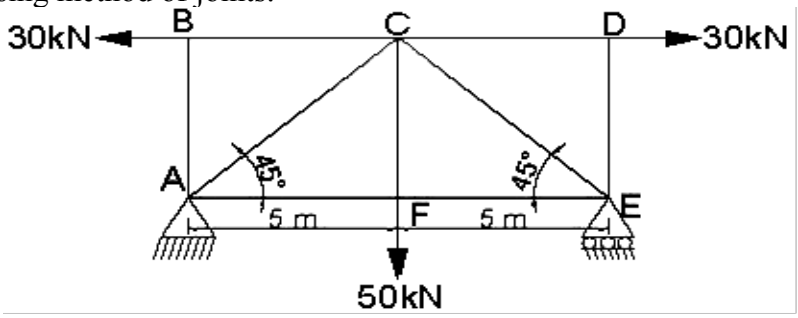

Fig.1

UNIT-II

3.		A block overlying a 100 wedge on a horizontal floor and leaning against a vertical wall and weighing 1500N is to be raised by applying a horizontal force to the wedge. Assuming the coefficient of friction to be 0.3, determine the minimum horizontal force to be applied to raise the block as shown in the Fig.2.	12 Marks	L4	CO1	PO1 PO2

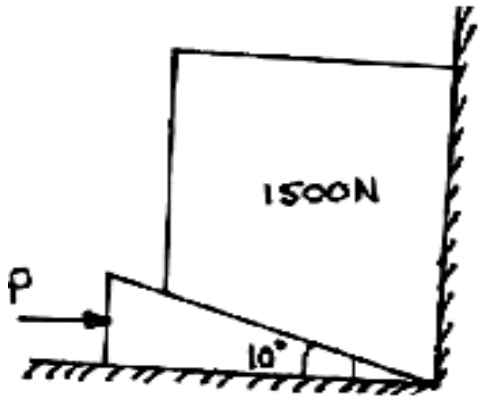

Fig.2

(OR)

4.	a)	Block A of weight 520N rest on the horizontal top of block B having weight 700N as shown in figure. Block A is tied to a support C by a cable at 30^0 to the horizontal. Coefficient of friction is 0.4 for all contact surfaces. Determine the minimum value of the horizontal force P just to move the block B. Find also the tension in the cable.	6 Marks	L4	CO1	PO1 PO2

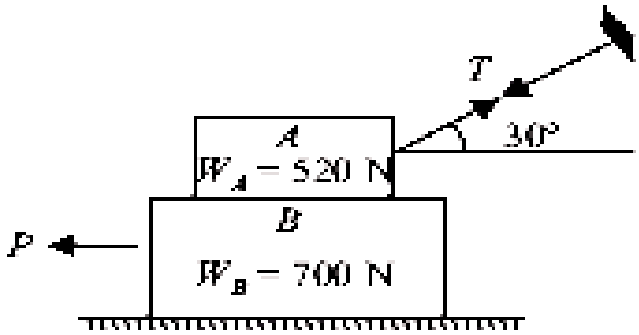

Fig.3

	b)	Two equal bodies A and B of weight `W' each are placed on a rough inclined plane. The bodies are connected by a light string. If μA = 1/2 and μB = 1/3, show that the bodies will be both on the point of motion when the plane is inclined at $\tan^{-1}$ (5/12).	6 Marks	L4	CO1	PO1 PO2

UNIT-III

5.		Find the area moment of inertia about the centroidal axes of the plane area shown in Fig.4. Also find the section modulus	12 Marks	L4	CO1	PO1 PO2

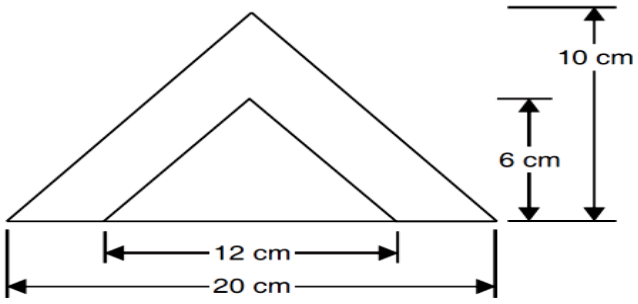

Fig.4

(OR)

6.		Find the area moment of inertia about the x and y axes of the plane area shown in Fig.5.	12 Marks	L4	CO1	PO1 PO2

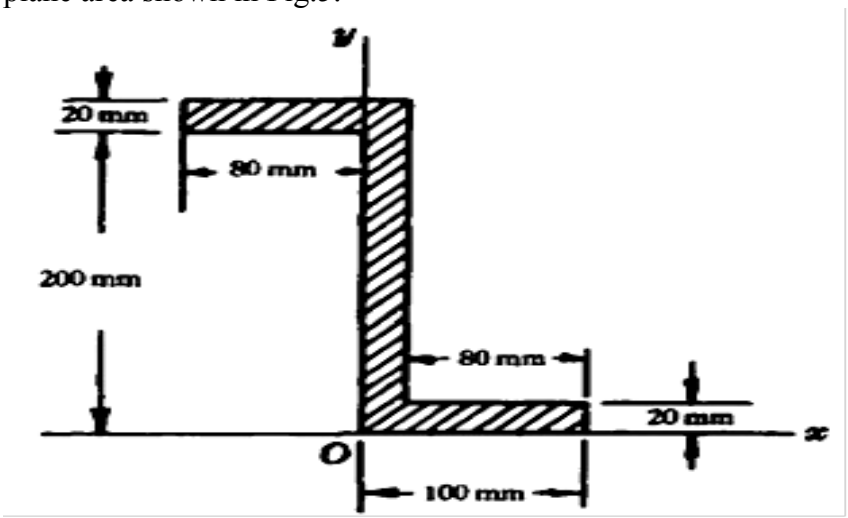

Fig.5

UNIT-IV

7.	a)	Derive the expression for the extension of the tapering rod with circular cross section.	6 Marks	L4	CO1	PO1 PO2
	b)	The following data refer to a mild steel specimen tested in a laboratory. Diameter of the specimen = 20 mm Length of the specimen = 250 mm Extension under a load of 10 kN = 0.035 mm Load at yield point = 120.15 kN Maximum load = 195.50 kN Length of the specimen under failure = 300 mm The neck diameter = 15.25 mm Determine Young's Modulus, Yield point, Ultimate stress, percentage of elongation and percentage reduction in area and safe stress adopting factor of safety of 2.	6 Marks	L4	CO1	PO1 PO2
		(OR)				
8.		Define resilience. Derive the maximum stress intensity on a member of length 'l' and uniform cross sectional area 'A' when a load of magnitude 'P' is applied gradually and suddenly on the member and identify the difference in these two cases.	12 Marks	L4	CO1	PO1 PO2

UNIT-V

9.	a)	Explain circumferential stress and longitudinal stress with neat sketch.	6 Marks	L4	CO1	PO1 PO2
	b)	Calculate the thickness of the metal required for a cast iron main 800 mm in diameter for water at a pressure head of 100 m if the maximum permissible tensile stress is 20 MN/m^2 and weight of water is 10 kN/m^3.	6 Marks	L6	CO2	PO1 PO2 PO3
		(OR)				
10.		A thick cylinder shell is of 300 mm internal diameter and has to withstand an internal pressure of 30MN/m^2. If permissible tensile stress of the shell is 150MN/m^2 and μ= 0.3, design the thickness of metal necessary for the cylinder on the basis of following criteria i) Maximum principal stress. ii) Maximum principal strain. iii) Maximum shear. iv) Maximum strain energy. Neglect the longitudinal direct stress.	12 Marks	L4	CO1	PO1 PO2

NETWORK ANALYSIS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

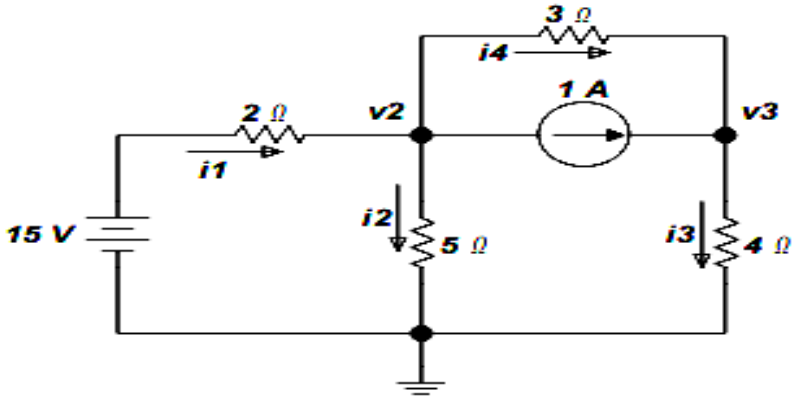
Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Reduce the network shown in figure, to a single loop network by successive source transformation, and obtain current in the 12 Ω resistor.	6 Marks	L4	CO1	PO2

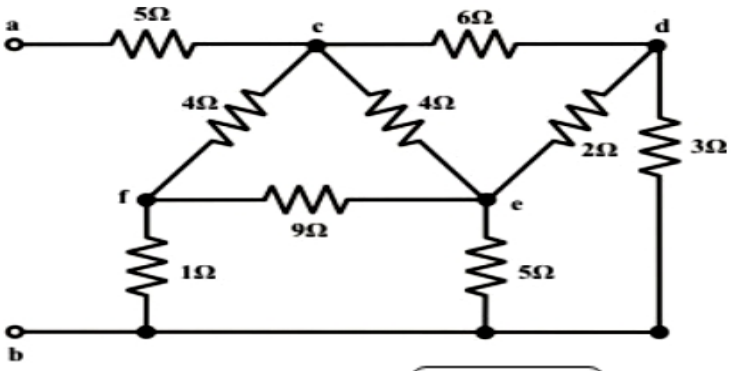
	b)	Obtain the current in the 4 Ω resistor of the circuit shown in figure.	6 Marks	L4	CO1	PO2



(OR)

2.	a)	Use nodal analysis to compute $v_0(t)$ of the circuit shown in figure.	6 Marks	L3	CO1	PO2

	b)	Find equivalent resistance between a and b terminals of the network shown in figure.	6 Marks	L4	CO1	PO2



UNIT-II

3.	a)	Derive bandwidth for a series RLC circuit as a function of resonant frequency.	6 Marks	L2	CO1	PO2
	b)	A series RLC circuit consists of resistance R = 20Ω, inductance, L=0.01H and capacitance, C = 0.04 μF. Calculate the frequency at resonance. If a 10 Volts ac voltage, with a frequency equal to the frequency of resonance is applied to this circuit, calculate the values of VC and VL across C and L respectively. Find the frequencies at which these voltages VC and VL are maximum?	6 Marks	L4	CO1	PO2

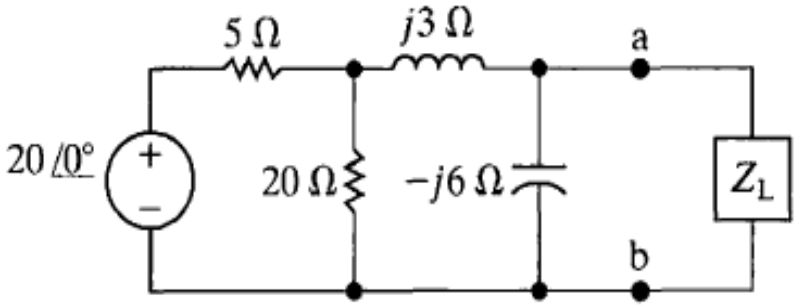
(OR)

4.	a)	A series circuit consisting of a 10 Ω resistor, a 100 μF capacitance and a 10 mH inductance is driven by a 50 Hz AC voltage source with a max. value of 100 volts. Calculate the equivalent impedance, current in the circuit, the power factor and power dissipated in the circuit. Also, draw the vector diagram.	6 Marks	L4	CO1	PO2
	b)	Design a series R-L-C circuit that resonates at 1.5kHz and consumes 50 W from a 50 V A.C source operating at the resonance frequency. The bandwidth is 0.75 kHz.	6 Marks	L3	CO2	PO3

UNIT-III

5.	a)	Verify reciprocity theorem for the circuit shown in figure.	6 Marks	L3	CO1	PO2

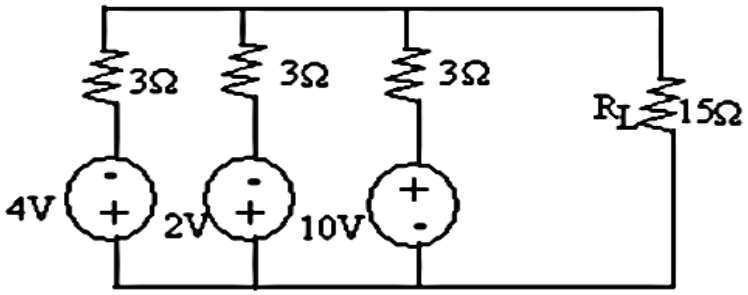
	b)	Determine the ZL of the circuit shown in figure, so that maximum power delivered to the load. Also find Pmax.	6 Marks	L3	CO1	PO2



(OR)

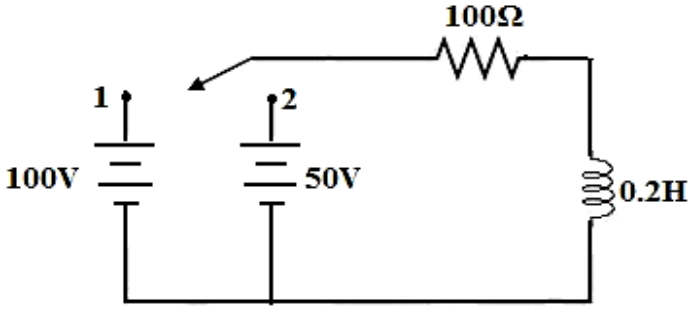
6.	a)	Find V_{TH}, R_{TH} of circuit shown in figure.	6 Marks	L4	CO1	PO2

	b)	Using Millman's theorem, find the current through 15 Ω resistor the circuit shown in figure.	6 Marks	L3	CO1	PO5



UNIT-IV

7.	a)	Derive the transient response of series R-L-C circuit, with DC excitation using Laplace transform obtain the response for a different damped cases.	4 Marks	L2	CO1	PO2
	b)	In the circuit shown in figure, the switch is closed on position i) at t=0 there by applying the 100 V source to the R-L branch, and at t=500 micro seconds, the switch is moved to position ii) Obtain the equations for the current in both intervals using Laplace transforms approach.	8 Marks	L4	CO1	PO2



(OR)

8.	a)	Derive the expression for transient current of series RC circuit with AC excitation and sketch the transient response.	6 Marks	L2	CO1	PO2
	b)	In designing a signal switching circuit, it was found that a 100 μF capacitor was needed for a time constant of 3 ms. What value resistor is necessary for the circuit?	6 Marks	L4	CO2	PO6

UNIT-V

9.	a)	Express h parameters in terms of ABCD parameters for a generalized network.	6 Marks	L2	CO1	PO1
	b)	Z-parameters for a two port network are given as Z_{11}=25, Z_{12}=Z_{21}=20, Z_{22}=50. Design an equivalent T-network.	6 Marks	L4	CO2	PO3

(OR)

10	a)	Prove that reciprocity condition for impedance parameters is	6 Marks	L2	CO1	PO2

. $Z_{12}=Z_{21}$, symmetry condition is $Z_{11}=Z_{22}$

b) Determine the ABCD parameters of the given network shown in figure. 6 Marks L4 CO1 PO2

BASIC ENGINEERING MECHANICS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	Two identical rollers each weighing 100N are supported by an inclined plane and a vertical wall as showing figure. Assuming smooth surfaces, find the reactions induced at the points of supports A,B,C and D. 	12 Marks	L2	CO1	PO1 PO2
	(OR)				
2.	Three cylinders are piled in a rectangular ditch as shown in figure. Neglecting friction determine the reaction between cylinder A and the vertical wall. Weights and radii of the cylinders are as given below.	12 Marks	L2	CO1	PO1 PO2

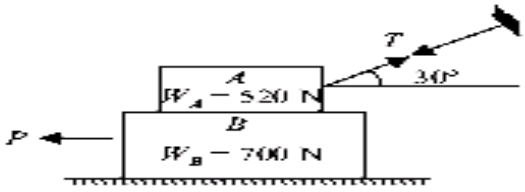
Cylinder	Radius	Weight
A	100mm	75N
B	150mm	200N
C	125mm	100N

UNIT-II

3.	Calculate reactions at A, B, C and D as shown in the given figure. 	12 Marks	L2	CO1	PO1 PO2
	(OR)				
4.	Determine the forces in all the members of a truss shown in figure using metyhod of joints. 	12 Marks	L2	CO1	PO1 PO2

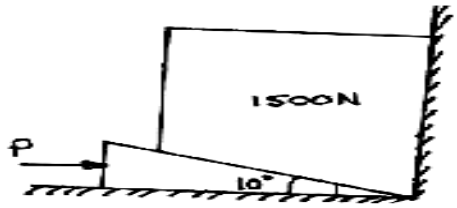
UNIT-III

5.	Block A of weight 520N rest on the horizontal top of block B having weight 700N as shown in figure. Block A is tied to a support C by a cable at 300 to the horizontal. Coefficient of friction is 0.4 for all contact surfaces. Determine the minimum value of the horizontal force P just to move the block B. Find also the tension in the cable.	12 Marks	L2	CO1	PO1 PO2



(OR)

6.		A block overlying a 100 wedge on a horizontal floor and leaning against a vertical wall and weighing 1500N is to be raised by applying a horizontal force to the wedge. Assuming the coefficient of friction to be 0.3, determine the minimum horizontal force to be applied to raise the block. As shown in the figure.	12 Marks	L2	CO1	PO1 PO2

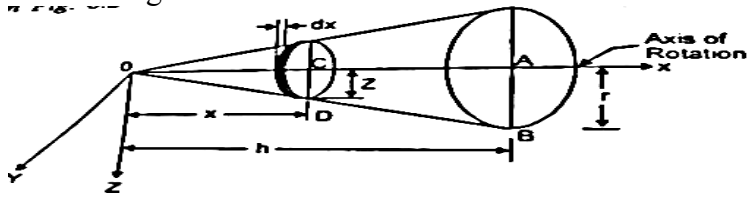


UNIT-IV

7.	a)	Brief about Axis of revolution and axis of symmetry.	6 Marks	L2	CO2	PO1
	b)	Derive the expressions to find centroid of a composite plane figure.	6 Marks	L2	CO2	PO1

(OR)

8.		Determine the mass moment of inertia of the right circular cone as shown in figure.	12 Marks	L3	CO2	PO1 PO2



UNIT-V

9.	a)	Derive the relation between angular velocity and linear velocity.	6 Marks	L2	CO3	PO1
	b)	A Body Weighing 196.2 N slides up a 60 degrees inclined plane under the action of applied force 400N acting parallel to the inclined plane. The coefficient of friction is equal to 0.2. The body moves from rest. Determine: i) Acceleration of the body. ii) Distance travelled by the body in 5 sec. iii) Work done by the body in 5 seconds.	6 Marks	L2	CO3	PO1 PO2

(OR)

10.	a)	Derive the equation for Time period of oscillation for the springs of stiffness's K_1 and K_2 which are connected in series and parallel	6 Marks	L2	CO4	PO1
	b)	A Weight of 50 N is suspended from a spring, vibrates vertically with a frequency of 1 Hertz and amplitude of 7.5 cm. Find the stiffness of spring and maximum velocity.	6 Marks	L2	CO4	PO1 PO2

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Discuss briefly the following structures for metallic elements: i) Body centered cubic. ii) Face centered cubic. iii) Hexagon close-packed.	6 Marks	L1	CO1	PO1
	b)	Demonstrate the Edge and Screw dislocations with neat sketches.	6 Marks	L3	CO1	PO1
		(OR)				
2.	a)	Draw Fe-Fe_3C phase diagram and explain the phase transformation reactions in the diagram.	8 Marks	L3	CO1	PO2
	b)	State Gibb's Phase rule. What is its importance?	4 Marks	L1	CO1	PO4
		UNIT-II				
3.	a)	Define annealing. Differentiate between full annealing and process annealing.	6 Marks	L1	CO1	PO1 PO7
	b)	Classify the various types of hardening treatments. Explain flame and induction hardening treatment.	6 Marks	L2	CO1	PO2 PO7
		(OR)				
4.	a)	Explain Time Temperature Transformation (TTT) diagram for eutectoid steel.	6 Marks	L2	CO1	PO2
	b)	"Carburizing heat treatment is generally done on low carbon steels". Why?	6 Marks	L3	CO1	PO3
		UNIT-III				
5.	a)	List the properties and applications of Hadfield manganese, Stainless and Tool steels.	6 Marks	L1	CO2	PO1
	b)	Draw the micro structure of plain carbon steels and write the applications of it.	6 Marks	L3	CO2	PO4
		(OR)				
6.	a)	What are different types of cast irons? Draw the micro structure of any two types of cast irons. Give composition and applications of each.	6 Marks	L4	CO2	PO2
	b)	Interpret the effect of alloying elements on properties of cast iron.	6 Marks	L2	CO2	PO3
		UNIT-IV				
7.	a)	State and describe some of the important properties of nonferrous metals and alloys.	6 Marks	L1	CO2	PO1
	b)	Differentiate between brasses and bronzes in view of properties and applications.	6 Marks	L2	CO2	PO3
		(OR)				
8.	a)	Explain the composition, properties and uses of Titanium alloys.	6 Marks	L2	CO2	PO1
	b)	Write short notes on refractory and precious metals.	6 Marks	L1	CO2	PO1
		UNIT-V				
9.	a)	What are ceramics? How ceramics are classified? Write the advantages and applications of ceramics.	6 Marks	L1	CO2	PO2
	b)	Write short notes on processing and recycling of polymers.	6 Marks	L1	CO2	PO1
		(OR)				
10.	a)	Briefly explain various properties and applications of Fiber reinforced composites.	6 Marks	L2	CO2	PO1
	b)	What is polymerization? Explain addition polymerization and condensation polymerization.	6 Marks	L1	CO2	PO1

DIGITAL LOGIC DESIGN

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Convert the following numbers with the indicated bases to decimal: i) $(4310)_5$ ii) $(198)_{12}$	6 Marks	L3	CO1	PO1
	b)	Explain any five properties of Boolean Algebra with example.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Simplify the following Boolean expressions to a minimum number of literals: i) $xy + x(wz+wz')$. ii) $xy' + y'z' + x'z'$.	6 Marks	L3	CO1	PO2
	b)	Compute dual of the following Boolean expressions. i) $AB+A(B+C)+B'(B+D)$. ii) $A+B+A'B'C$.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Simply the following Boolean Function using four-variable k-maps. $F A, B, C, D) = \Sigma (2,3,6,7,12,13,14)$	6 Marks	L4	CO1	PO2
	b)	Draw the logic diagram for the Boolean expression using AND, OR gates. $F = x (y'+ z) (x' + y + z')$	6 Marks	L4	CO1	PO3
		(OR)				
4.	a)	Obtain the truth table for the following functions and express each function in sum of minterms and product of max terms: i) $(xy + z) (y + xz)$ ii) $(A'+ B) (B'+ C)$ iii) $y'z+wxy'+wxz'+w'x'z$	6 Marks	L4	CO1	PO2
	b)	Minimize the expression using K-map and realize using only NAND gates. $F (A, B, C, D) = \sum (0, 1, 2, 9, 11)$ and don't care conditions $d (A, B, C, D) = (8, 10, 14, 15)$	6 Marks	L4	CO1	PO3

UNIT-III

5.	a)	Design a combinational circuit with four inputs and four outputs. The output generates the 2's complement of the input binary number.	6 Marks	L4	CO2	PO4
	b)	Define Multiplexer. Implement the following Boolean function using a suitable Multiplexer. F(A,B,C,D)=∑(0,1,3,4,8,9,15)	6 Marks	L4	CO2	PO5
		(OR)				
6.	a)	Design a 4-bit Magnitude comparator.	8 Marks	L4	CO2	PO3
	b)	Describe the function of an encoder and list its applications.	4 Marks	L2	CO2	PO1

UNIT-IV

7.	a)	Explain the circuit diagram of a S-R flip-flop using 2-input NOR gates.	6 Marks	L2	CO2	PO1
	b)	Draw a 3-bit parallel load register. Use D flip flops and explain its operation.	6 Marks	L2	CO2	PO1
		(OR)				
8.	a)	Design a 4-bit ripple counter using T flip-flops.	6 Marks	L4	CO2	PO3
	b)	Draw and explain 4-bit shift register with an example.	6 Marks	L2	CO2	PO1

UNIT-V

9.		Implement the following two Boolean functions with a PLA: $F_1(A, B, C) = \Sigma m(0, 1, 2, 4)$; $F_2(A, B, C) = \Sigma m(0, 5, 6, 7)$.	12 Marks	L4	CO2	PO4
		(OR)				
10.	a)	Explain in detail the addressing scheme of 1K x 16 memory with the help of a neat diagram.	9 Marks	L2	CO2	PO2
	b)	Compare SRAM and DRAM memories.	3 Marks	L4	CO2	PO2

I B.Tech II Semester (SVEC-19) Supplementary Examinations January - 2022

OBJECT ORIENTED PROGRAMMING THROUGH JAVA
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What is a class? Explain the syntax for declaring a class with an example.	6 Marks	L1	CO1	PO1
	b)	Explain the following : i) Byte code. ii) This keyword.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Write about any two non-access modifiers in Java.	4 Marks	L1	CO1	PO1
	b)	Construct a class Rectangle. The class has two attributes, length and width, each of which defaults to 0. It has methods that calculate the perimeter and area of the rectangle. It has set and get methods for both length and width. The set methods should verify that length and width are floating – point numbers larger than 0.0 and less than 20.0.	8 Marks	L3	CO1	PO3
		UNIT-II				
3.	a)	List categories of operators supported by JAVA.	4 Marks	L1	CO1	PO1
	b)	What is an array? Explain different ways of creating an array.	8 Marks	L1	CO1	PO1
		(OR)				
4.	a)	Write about wrapping and unwrapping.	6 Marks	L1	CO1	PO1
	b)	Classify different data types in Java.	6 Marks	L2	CO1	PO2
		UNIT-III				
5.	a)	Write a program to create an abstract class named Shape that contains an empty method named number of Sides ( ). Provide three classes named Trapezoid, Triangle and Hexagon such that each one of the classes extends the class Shape. Each one of the classes contains only the method number Of Sides ( ) that shows the number of sides in the given geometrical figures.	6 Marks	L2	CO2	PO2
	b)	Design a java program to demonstrate the concept of multithreading using Reader's-Writer's Problem.	6 Marks	L2	CO2	PO2
		(OR)				
6.	a)	Distinguish between class, abstract class and interfaces.	6 Marks	L2	CO2	PO2
	b)	With an example program, explain the usage of final keyword in inheritance.	6 Marks	L2	CO2	PO2
		UNIT-IV				
7.	a)	What is a package? Explain with a suitable example.	8 Marks	L1	CO2	PO1
	b)	Explain about Daemon Threads in Java.	4 Marks	L2	CO2	PO4
		(OR)				

8.	a)	Develop a java program to read 20 marks and store them in an array. Define your own exception named wrong mark exception. Throw and catch this type of exception when a mark is (<0 and >100).	6 Marks	L3	CO2	PO3
	b)	Write a program to create a class "Book" with name, id, author, publisher and quantity as instance variables and a constructor to initialize them. Create a Hash Set object of type Book and three Book instances b_1, b_2 and b_3. Add these instances into Hash Set and display them.	6 Marks	L2	CO2	PO2

UNIT-V

9.		Develop a program that creates a user interface to perform integer divisions. The user enters two numbers in the text fields Num1 and Num2. The division of Num1 and Num2 is displayed in the Result field when the Divide button is clicked. If Num1 or Num2 were not an integer, the program would throw a Number Format Exception. If Num2 were Zero, the program would throw an Arithmetic Exception Display the exception in a message dialog box.	12 Marks	L3	CO3	PO5

(OR)

10.	a)	What is an Event? Discuss about Window Event and Mouse Event.	6 Marks	L2	CO3	PO2
	b)	Explain about any three AWT Components.	6 Marks	L2	CO3	PO2

I B.Tech II Semester (SVEC-19) Supplementary Examinations June - 2022

BIOLOGY FOR ENGINEERS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		Define cell. Explain the differences between eukaryotes and prokaryotic organisms with neat labeled diagrams.	12 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Summarize the classification of living organisms and non living organisms based on the energy sources and carbon.	6 Marks	L2	CO1	PO1
	b)	Illustrate the classification of molecular taxonomy.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Define fermentation. Explain various examples of fermented products used in our day to day life.	6 Marks	L1	CO1	PO1
	b)	Define nucleic acids. Explain various types of nucleic acids and their structure.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Explain different types of enzymes and their applications.	6 Marks	L1	CO1	PO1
	b)	Brief about the structure and function of proteins.	6 Marks	L2	CO3	PO6
		UNIT-III				
5.	a)	Define genetics. Explain the Mendel's laws of independent assortment.	8 Marks	L2	CO1	PO1
	b)	Explain advantages and disadvantages of the universality of the genetic code to humans.	4 Marks	L2	CO2	PO1
		(OR)				
6.		Define DNA replication process. Compare the processes of DNA replication and transcription.	12 Marks	L2	CO3	PO6
		UNIT-IV				
7.	a)	Explain r-DNA technology.	8 Marks	L1	CO1	PO1
	b)	Define transgenic organisms. Explain transgenic animals with some examples.	4 Marks	L2	CO2	PO1
		(OR)				
8.	a)	Summarize the gene therapy and its applications.	6 Marks	L2	CO2	PO1
	b)	Explain the steps involved in cloning of DNA fragments.	6 Marks	L2	CO2	PO1
		UNIT-V				
9.		Explain the stages of action potential with a neat labeled diagram.	12 Marks	L2	CO1	PO1
		(OR)				
10.	a)	Define gene. Explain how gene and genome are related.	6 Marks	L2	CO3	PO6
	b)	Explain the differences between ECG and EEG.	6 Marks	L1	CO1	PO1

ENGINEERING PHYSICS
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the formation of Newton' rings. Determine the wavelength of sodium lightusing Newton's rings experiment.	8 Marks	L3	CO1	PO2
	b)	Newton's rings are observed in the reflected light of wavelength 5700 Aº. The diameter of tenth dark ring is 4 cm. Find the radius of curvature of the lens used.	4 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Discuss the Fraunhoffer diffraction. Deduce the conditions for maxima and minima for diffraction at a single slit.	8 Marks	L2	CO1	PO1
	b)	Write short notes on Nicol' prism.	4 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Explain divergence and curl of electric and magnetic fields.	6 Marks	L2	CO2	PO1
	b)	Write the four Maxwell's equations and explain their physical significance.	6 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Classify the optical fibers on the basis of refractive index profile and on the basis modes with neat diagrams.	8 Marks	L2	CO2	PO1
	b)	A fiber Cable has an acceptance angle 30º and a core refractive index of 1.6. Calculate the refractive index of Cladding.	4 Marks	L3	CO2	PO2
		UNIT-III				
5.	a)	Derive an expression for density of electrons in an intrinsic semiconductor.	6 Marks	L3	CO3	PO2
	b)	Explain intrinsic carrier concentration and how it is varying temperature.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	What is drift current? Derive an expression for drift current density and diffusion current density.	8 Marks	L3	CO3	PO2
	b)	Explain the working of photo diode.	4 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Define dielectric polarization.	2 Marks	L1	CO4	PO1
	b)	Derive an expression for Lorentz field in a dielectric material with neat diagram.	10 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Distinguish different types of magnetic materials.	6 Marks	L4	CO4	PO1
	b)	What is Hysteresis and construct B-H curve for a ferromagnetic material.	6 Marks	L3	CO4	PO2

UNIT-V

9.	a)	What is superconductivity? Distinguish Type-I and Type-II superconductors.	6 Marks	L4	CO5	PO1
	b)	Explain how BCS theory supports superconductivity in detail.	6 Marks	L2	CO5	PO1
		(OR)				
10.	a)	What is nanoscience? Why the properties of nanomaterials are different from the properties of bulk material?	6 Marks	L1	CO5	PO1
	b)	Write applications of nanomaterials in different fields.	6 Marks	L1	CO5	PO1

I B.Tech II Semester (SVEC-19) Supplementary Examinations June - 2022

ENGINEERING CHEMISTRY

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain Quantum mechanical model of Hydrogen atom.	7 Marks	L2	CO1	PO1 PO2
	b)	Explain π-molecular orbital's of butadiene.	5 Marks	L2	CO1	PO1 PO2
		(OR)				
2.	a)	The energies of a particle in a one dimensional box are quantized. Justify?	7 Marks	L2	CO1	PO1 PO2
	b)	Discuss the bonding in homo nuclear diatomic molecule O_2.	5 Marks	L2	CO1	PO1 PO2

UNIT-II

3.		Explain how Fluoride content in the water will effect on human health and discuss how to remove fluoride content from water by Nalgonda technique.	12 Marks	L2	CO2	PO1 PO6
		(OR)				
4.	a)	100 mL of Tirupati water sample consumed 22 mL of 0.01 M EDTA solution on titration by complexometry. The same water sample (100mL) after TREATMENT consumed 5 mL of 0.01 M EDTA solution. Identify and explain the external treatment with neat diagram by calculating hardness and residual hardness. [Hint: 1 ml 0.01 M EDTA = 1 ml 0.01 M $CaCO_3$].	8 Marks	L3	CO2	PO1 PO6
	b)	Discuss briefly any two internal conditioning methods.	4 Marks	L2	CO2	PO1

UNIT-III

5.	a)	Draw a fully labelled diagram showing how you could measure the E^0 value for the Cu^{2+}/Cu system using a standard hydrogen electrode. Your diagram should show all the essential conditions for the experiment. (The Cu^{2+}/Cu system means having Copper metal in contact with Cu^{2+}ions.).	7 Marks	L3	CO3	PO1 PO2
	b)	Illustrate with the aid of label diagrams that show how a DC Electrical power supply could be used to prevent or at least decrease the extent of corrosion of a steel underground pipeline used for carrying gases.	5 Marks	L3	CO3	PO1 PO2
		(OR)				
6.	a)	Discuss the discharging and charging process of Li-ion battery with neat diagram and chemical Reactions.	7 Marks	L2	CO3	PO1 PO2
	b)	Identify and explain in detail mechanism of the possible type of corrosion that Iron screw metal will undergo in the pictured environment.	5 Marks	L2	CO3	PO1 PO2

UNIT-IV

7.		Discuss the principle and working of UV-Visible Spectrotometer with the help of a block diagram.	12 Marks	L2	CO4	PO1 PO5
		(OR)				
8.		Discuss the principle and applications of TEM and XRD.	12 Marks	L2	CO4	PO1 PO5

UNIT-V

9.		Write a note on: i) Knocking agents. ii) Anti Knocking agents. iii) Octane number. iv) Cetane number.	12 Marks	L2	CO5	PO1 PO2
		(OR)				
10.	a)	Discuss the classification of fuels with suitable examples	7 Marks	L2	CO5	PO2
	b)	Define lubricant. Discuss any two properties of lubricants.	5 Marks	L3	CO5	PO1 PO2

CODE No.: 19BT2BS01 SVEC-19

TRANSFORMATION TECHNIQUES AND LINEAR ALGEBRA

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Classify the function f(x) = Sinx + Cosx +x^3 Sinhx as even, odd or neither.	4 Marks	L4	CO1	PO2
	b)	Obtain the Fourier series of the function f(x) =x^2, $-\pi \le x \le \pi$ hence deduce that $\frac{\pi^2}{6} = \frac{1}{1^2} + \frac{1}{2^2} + \frac{1}{3^2} + ...$	8 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Express f(x) = e^{-x} + e^{-2x}, x > 0 as a Fourier cosine integral.	4 Marks	L1	CO1	PO1
	b)	Find Fourier transform of $f(x) = \begin{cases} a - \lvert x \rvert & for \ \lvert x \rvert \le a \\ 0 & for \lvert x \rvert > a > 0 \end{cases}$	8 Marks	L1	CO1	PO1

UNIT-II

3.	a)	Evaluate $\int_0^\infty \frac{e^{-at} - e^{-bt}}{t} dt$ using Laplace transform.	6 Marks	L3	CO1	PO2
	b)	Define unit impulse function and find its Laplace transform.	6 Marks	L1	CO1	PO1
		(OR)				
4.	a)	Express the function $f(t) = \begin{cases} E, & a < t < b \\ 0, & t \ge b \end{cases}$ in terms of unit step function and hence find its Laplace transform.	6 Marks	L3	CO1	PO2
	b)	Find $L\ (t^2 e^t\ Si4t)$.	6 Marks	L1	CO1	PO1

UNIT-III

5.	a)	Solve y^{11}+ y = t, y^1 (0) = 1, y(π) = 0, by Laplace transforms.	8 Marks	L3	CO1	PO2
	b)	Find inverse Laplace transform of $\cot^{-1}\left(\frac{s}{2}\right)$.	4 Marks	L3	CO1	PO2
		(OR)				
6.	a)	Using convolution theorem find $L^{-1}\left(\frac{s}{(s^2+1)(s^2+4)}\right)$.	8 Marks	L1	CO1	PO1
	b)	Solve y^{11} + y = 0, y^1 (0) = -1, y(0) = 1, by Laplace transform method.	4 Marks	L1	CO1	PO1

UNIT-IV

7.		Find a real symmetric matrix of the following quadratic form $Q = x^2 + 3y^2 + 2z^2 + 2xy + 6yz$. Find the index and signature of Q.	12 Marks	L4	CO2	PO2

(OR)

8.		Find the eigen values and eigen vectors of the matrix. $\begin{bmatrix} -9 & 2 & 6 \\ 5 & 0 & -3 \\ -16 & 4 & 11 \end{bmatrix}$	12 Marks	L3	CO2	PO2

UNIT-V

9.	a)	Find a linear mapping $F: R^3 \to R^3$ whose image is generated by (1, 2, 3) and (4, 5, 6).	8 Marks	L3	CO2	PO2
	b)	State whether or not the following vectors in R^3 are linearly dependent. i) (1, -3, 7), (2, 0, -6), (3, -1, -1), (2, 4, -5). ii) (2, -3, 7), (0, 0, 0), (3, -1, -4).	4 Marks	L1	CO2	PO1

(OR)

10.	a)	Determine whether or not (1, 1, 2), (1, 2, 5) and (5, 3, 4) form a basis for the vector space R^3	8 Marks	L2	CO2	PO1
	b)	Show that the mapping $F: R^2 \to R^2$ defined by $F(x, y) = (x + y, x)$ is linear.	4 Marks	L1	CO2	PO1

BASIC ELECTRICAL AND ELECTRONICS ENGINEERING

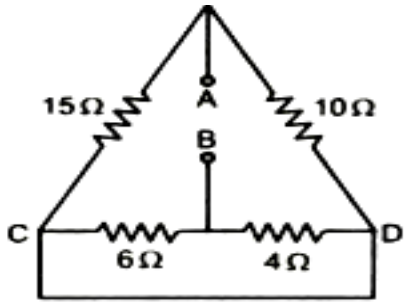
[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the generation of A.C Voltage using a single loop generator with a neat sketch.	8 Marks	L2	CO1	PO1
	b)	Determine the effective resistance between the terminals A & B.	4 Marks	L3	CO1	PO2



(OR)

2.	a)	Define real power, reactive power and apparent power. Give the relation between them with the help of a power triangle.	6 Marks	L2	CO1	PO2
	b)	A series circuit having a resistance of 10Ω, an inductance of 0.25H and capacitance is connected across a 100V, 50 Hz supply. If the circuit takes a current of 8A. Calculate: i) Impedance. ii) Capacitance. iii) Power factor.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	With a neat sketch, explain the operation of Thermal power plant.	6 Marks	L2	CO2	PO1
	b)	Discuss the basic operation of UPS with the help of a block diagram.	6 Marks	L2	CO2	PO7

(OR)

4.	a)	Sketch the typical layout and explain the operation of a Solar power plant	6 Marks	L2	CO2	PO1
	b)	What is the importance Earthing? Explain the pipe earthing with a neat diagram.	6 Marks	L1	CO2	PO1

UNIT-III

5.	a)	Briefly explain the constructional features of a 1-phase static device, which transforms one level of energy to other level of energy.	6 Marks	L2	CO3	PO6
	b)	Derive the torque equation and draw the slip-torque characteristics for a three-phase induction motor.	6 Marks	L2	CO3	PO1

(OR)

6.	a)	With a neat sketch, describe the construction and working of capacitor start and run single phase induction motor.	6 Marks	L2	CO3	PO1
	b)	Briefly explain the principle of operation and characteristics of a synchronous machine when acting as a motor.	6 Marks	L2	CO3	PO1

UNIT-IV

7.		Draw the Full wave Rectifier with necessary graphs and derive expression for its efficiency, ripple factor, TUF.	12 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Explain the operation of P-N junction diode and derive the expression for diode equation.	6 Marks	L2	CO4	PO2
	b)	Describe the CC configuration of BJT and its input and output characteristics briefly.	6 Marks	L2	CO4	PO4

UNIT-V

9.	a)	Explain how an op-amp can be used as a non-inverting adder with a neat circuit diagram.	6 Marks	L3	CO4	PO2
	b)	Describe how an op-amp can be used as a comparator with a neat circuit diagram.	6 Marks	L3	CO4	PO2
		(OR)				
10.	a)	Discuss the comparisons of op-amp with respect to AC and DC characteristics.	6 Marks	L3	CO4	PO2
	b)	Draw the circuit diagram of basic Integrator using op-amp and explain its operation.	6 Marks	L4	CO4	PO2

PROGRAMMING FOR PROBLEM SOLVING

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Describe the top-down design process in problem solving methods with an example.	6 Marks	L2	CO1	PO1
	b)	Illustrate the role play of different data types supported by python with proper syntax and explain its significance. Write a Python script to convert a given number (in days) to years, months and days, assumes that all months have 30 days and a year have 365 days.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	What are the building blocks of flowchart? Draw the flowchart for finding the greatest common divisor of given two numbers.	6 Marks	L2	CO1	PO1
	b)	Explain about relational operator, assignment operator and membership operators with examples.	6 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Explain various iteration statements with flowchart and example.	6 Marks	L2	CO1	PO1
	b)	Write a python script to perform mathematical operation as menu driven application.	6 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Read 10 students ages, count the number of students who are having eligibility to vote.	6 Marks	L3	CO2	PO2
	b)	Write a python script to convert given decimal number into Hexadecimal and binary format.	6 Marks	L3	CO2	PO2

UNIT-III

5.	a)	Define List. Explain different operations we can perform on the list with an example.	6 Marks	L2	CO1	PO1
	b)	Write a python Script to implement Stack Operations.	6 Marks	L3	CO2	PO2
		(OR)				
6.	a)	Explain different String Operations and String Methods with example.	6 Marks	L2	CO1	PO1
	b)	What is a Dictionary? Explain accessing, updating and deleting elements in a dictionary with suitable examples.	6 Marks	L2	CO1	PO1

UNIT-IV

7.	a)	List and explain the properties and functions in math, Date and Time.	6 Marks	L2	CO2	PO1
	b)	Write a Python script to copy the content of one file into another file.	6 Marks	L3	CO2	PO2
		(OR)				
8.	a)	Define user defined function *IsPresemt()*, which accepts two parameters first one is a list which contains the roll numbers of the students who are attended for exam and second one Ron of the student. Check whether the given rno is attended for exam or not.	6 Marks	L3	CO2	PO2

	b)	Write short notes on numpy functions.	6 Marks	L1	CO2	PO2

UNIT-V

9.	a)	Consider data frame contains list of employee salary per month. Write a Python Script to display whose employee salary greater than Five Lakh per Annum.	6 Marks	L3	CO2	PO3
	b)	Explain different steps involved to draw a Scatter Plot in python with an example.	6 Marks	L2	CO2	PO2

(OR)

10.	a)	Write a python script to load data from a CSV file into a Data Frame and perform basic operations on it.	6 Marks	L3	CO2	PO3
	b)	Explain the steps involved to Plot a Histogram in Python with an example.	6 Marks	L2	CO2	PO2

I B.Tech II Semester (SVEC-19) Supplementary Examinations June - 2022

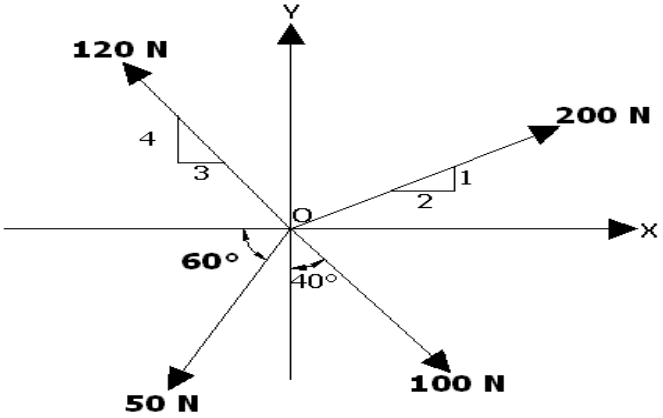
ENGINEERING MECHANICS
[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

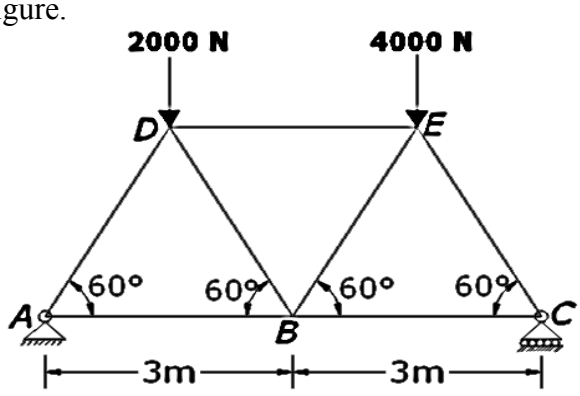
UNIT-I

1.	a)	Define moment of force about a point and show that the algebraic sum of the moments of two coplanar forces about a point is equal to the moment of their resultant about that point.	6 Marks	L4	CO1	PO1 PO2
	b)	A system of four forces acting on a body is shown in figure. Determine the resultant force and its direction.	6 Marks	L4	CO1	PO1 PO2



(OR)

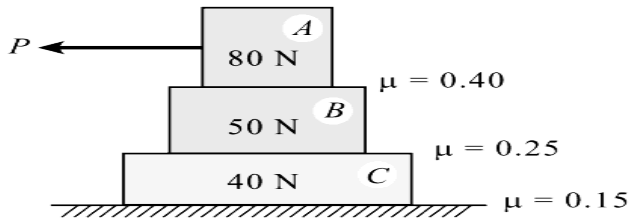
2.	a)	Explain how you will reduce the system of coplanar, non-concurrent forces to a force and a couple.	6 Marks	L4	CO1	PO1 PO2
	b)	Determine the axial forces induced in the members of a truss as shown in figure.	6 Marks	L4	CO1	PO1 PO2



UNIT-II

3.	a)	A uniform ladder of weight 800N and of length 7 m rests on a horizontal ground and leans against a smooth vertical wall. The angle made by the ladder with the horizontal is 60°. When a man of weight 600N stands on the ladder at a distance 4m from the top of the ladder, the ladder is at the point of sliding. Determine the coefficient of friction between the ladder and the floor.	6 Marks	L4	CO1	PO1 PO2

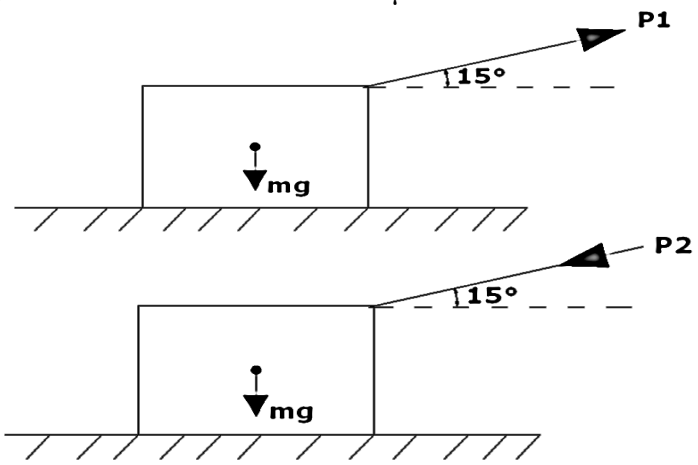
	b)	Three blocks are placed on the surface one above the other as shown in figure. The static coefficient of friction between the blocks and between block C and surface is also shown. Determine the maximum value of P that can be applied before any slipping takes place.	6 Marks	L4	CO1	PO1 PO2



(OR)

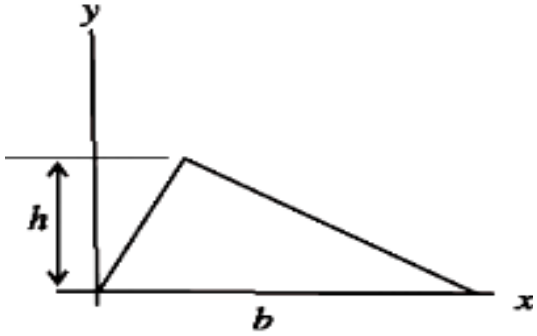
4.	a)	If the coefficient of static friction equals 0.3 for all surfaces of contact, determine the smallest value of force P necessary to raise the block A. Neglect the weight of the wedge B.	8 Marks	L4	CO1	PO1 PO2

	b)	A wooden block rests on a horizontal plane. Determine the force required to (i) pull it (ii) push it. Assume the mass of the block to be 5kg and the coefficient of friction μ= 0.4.	4 Marks	L4	CO1	PO1 PO2



UNIT-III

5.	a)	Derive an expression to determine the moment of inertia of a semi circle about its diametric base.	6 Marks	L4	CO1	PO1 PO2
	b)	Determine the y coordinate of the centroid of a uniform triangular lamina as shown in figure.	6 Marks	L4	CO1	PO1 PO2



(OR)

6.	a)	Find the mass moment of inertia of a solid cylinder of radius r, height h and mass m about centroidal x and y axes.	6 Marks	L4	CO1	PO1 PO2
	b)	State and explain Pappus and Guldinus theorems for surface of revolution and volume of revolution.	6 Marks	L4	CO1	PO1 PO2

UNIT-IV

7.	a)	Derive the relation among modulus of elasticity, modulus of rigidity and bulk modulus.	6 Marks	L4	CO1	PO1 PO2
	b)	A member ABCD is subjected to point loads P1, P2, P3 and P4 as shown in figure. Calculate the force P2 necessary equilibrium if P1 = 45 kN, P3 = 450 kN, P4 = 130 kN. Determine the total elongation of the member, assuming the modulus of elasticity as 2.1×10^5 N/mm². 	6 Marks	L4	CO1	PO1 PO2

(OR)

8.	a)	A steel bar is placed between two copper bars each having the same area and length as the steel bar is at 15°C. At this stage they are rigidly connected together at both the ends. When the temperature is raised to 315°C, the length of the bars increased by 1.5mm. Determine the original length and the final stresses in the bars. $E_s = 2.1 \times 10^5$ N/mm², $E_c = 1 \times 10^5$ N/mm². $\alpha_s = 0.000012$/°C. $\alpha_c = 0.0000175$/°C.	6 Marks	L4	CO1	PO1 PO2
	b)	A tensile load of 60 kN is gradually applied to a circular bar of 4cm diameter and 5cm long. If the value of $E = 2.0 \times 10^5$ N/mm², determine: i) stretch in the rod. ii) stress in the rod. iii) strain energy absorbed by the rod.	6 Marks	L4	CO1	PO1 PO2

UNIT-V

9.	a)	A cylindrical thin drum 80 cm in diameter and 3 m long has a shell thickness of 1 cm. If the drum is subjected to an internal pressure of 2.5 N/mm², determine i) change in diameter. ii) change in length. iii) change in volume. Take $E = 2 \times 10^5$ N/mm², Poisson's ratio = 0.25.	6 Marks	L6	CO2	PO1 PO2 PO3 PO6
	b)	Derive the equations for the circumferential and longitudinal stresses in a thin cylindrical shell.	6 Marks	L6	CO2	PO1 PO2 PO6

(OR)

10.		A compound cylinder is made by shrinking a cylinder of external diameter 200 mm and an internal diameter 160 mm over another cylinder of external diameter 160 mm and internal diameter 120 mm. The radial pressure at the junction after shrinking is 8 N/mm². Find the final stress set up across the section, when the compound cylinder is subjected to an internal fluid pressure of 60 N/mm².	12 Marks	L6	CO2	PO1 PO2 PO3 PO6

ELECTRIC CIRCUITS

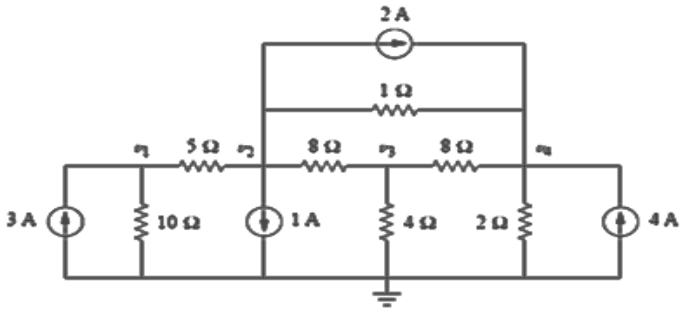
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

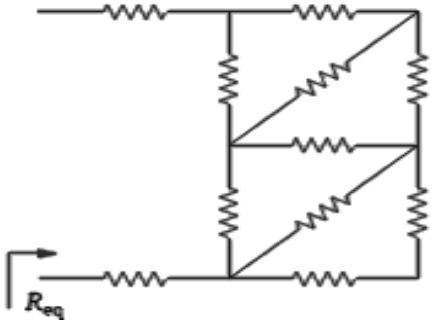
UNIT-I

1. Determine the node voltages of the circuit shown in figure. 12 Marks L3 CO1 PO2

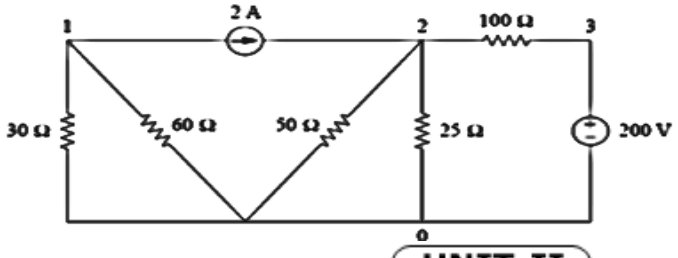


(OR)

2. a) Obtain the equivalent resistance R_{eq} of the circuit shown in figure all resistors have a value of 30 Ω. 6 Marks L3 CO1 PO2



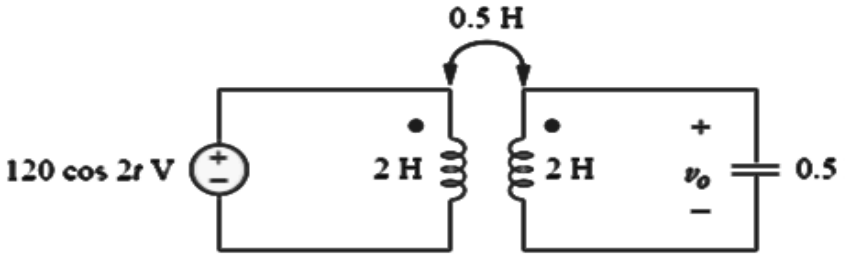
b) Determine the current through 25 Ω resistor using mesh analysis of the circuit shown in figure. 6 Marks L3 CO1 PO2



UNIT-II

3. a) Find impedance and $v(t)$ in the *RLC* circuit shown in figure. 6 Marks L3 CO1 PO2

	b)	A voltage V = 10 sinωt is applied to series RLC circuit. Under resonance condition the max voltage across capacitor is found to be 500 V, bandwidth is 400 rad/sec and the impedance at resonance is 100 ohms. Find the resonant frequency and circuit constants.	6 Marks	L3	CO1	PO3
		(OR)				
4.	a)	A Y-connected balanced three-phase generator with an impedance of (0.4+j0.3) Ω per phase is connected to a Y-connected balanced load with an impedance of (24+j19) Ω per phase. The line joining the generator and the load has an impedance of (0.6+j0.7) Ω per phase. Assuming a positive sequence for the source voltages and that Van = (120+j0) V find: i) the line voltages, ii) the line currents.	6 Marks	L3	CO1	PO2
	b)	Prove that $\tan\varphi = \sqrt{3}\left(\frac{W_2 - W_1}{W_2 + W_1}\right)$ in two wattmeter method.	6 Marks	L2	CO1	PO2
		UNIT-III				
5.	a)	Find i_0 of the circuit shown in figure using superposition theorem. 	6 Marks	L4	CO1	PO5
	b)	State and explain Millman's theorem with suitable example.	6 Marks	L3	CO1	PO1
		(OR)				
6.	a)	Obtain the Thevenin's equivalent circuit of the network shown in figure. 	6 Marks	L4	CO1	PO5
	b)	State and explain Reciprocity theorem with suitable example.	6 Marks	L2	CO1	PO1
		UNIT-IV				
7.	a)	Two coils connected in series-aiding fashion have a total inductance of 250 mH. When connected in a series-opposing configuration, the coils have a total inductance of 150 mH. If the inductance of one coil is three times the other, find and M. What is the coupling coefficient?	6 Marks	L2	CO1	PO2
	b)	Determine the mesh currents of the circuit shown in figure. 	6 Marks	L4	CO1	PO2
		(OR)				
8.	a)	Obtain v_0 of the circuit shown in figure.	6 Marks	L4	CO1	PO2



b) Two coils shown in figure have L_1=50mH, L_2=120mH and coefficient k=0.5. find $i_1(t)$and $v_2(t)$, given that $v_1(t) = 20\cos\omega t$ and $i_2(t) = 4\sin\omega t$, ω=2000 rad/s — 6 Marks | L4 | CO1 | PO2

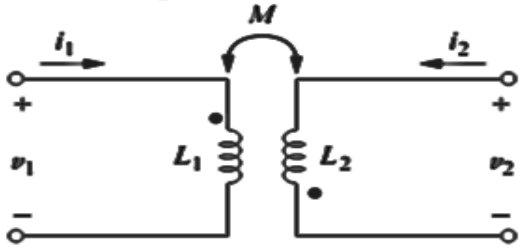


Fig. 4

UNIT-V

9. a) Enumerate the various characteristics that a filter should posses for implementation in signal processing circuits. — 6 Marks | L2 | CO1 | PO1

b) Design *k*-type band pass filter having a design impedance of 500 Ω and cut-off frequencies 1 kHz and 10 kHz. — 6 Marks | L4 | CO2 | PO3

(OR)

10. a) Derive the expressions for attenuation and phase shift in pass band and stop band for a symmetrical *T*-section high pass filter. — 6 Marks | L3 | CO2 | PO2

b) Design a constant-*k* filter to eliminate band of frequencies lying between 2000 Hz and 6000 Hz with a design impedance of 600 Ω. Also determine attenuation and phase shift 1 kHz and 4 kHz. — 6 Marks | L4 | CO2 | PO3

NETWORK ANALYSIS

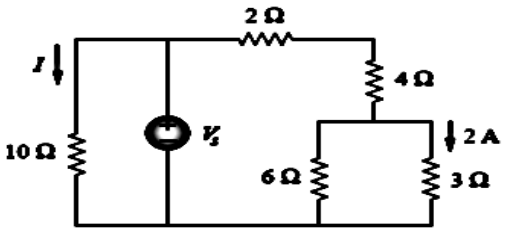
[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	State Ohms law and mention the limitations of the Law	4 Marks	L1	CO1	PO1
	b)	Find *I* and *Vs* in the circuit shown in figure, if the current through the 3 Ohm resistor is 2 A.	8 Marks	L4	CO1	PO2



(OR)

2.	a)	Explain how voltage source with a source resistance can be converted into an equivalent current source?	4 Marks	L2	CO1	PO2
	b)	An electric heater connected to a 120-V source consists of two identical 0.4 Ohm elements made of Nichrome wire. The elements provide low heat when connected in series and high heat when connected in parallel. Find the power at low and high heat settings.	8 Marks	L3	CO2	PO6

UNIT-II

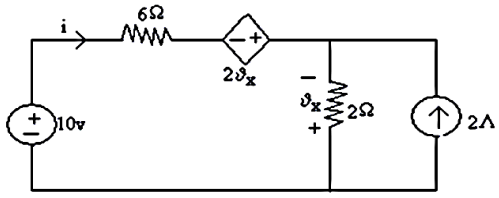
3.	a)	Draw the phasor representation of voltage and current for Resistor, inductor and capacitor with sinusoidal excitation.	4 Marks	L2	CO1	PO1
	b)	In an AC circuit source applied is *500 sin(100t)* across series combination of 10 ohms and 10 F, calculate source current flowing through circuit, form impedance and power triangle.	8 Marks	L4	CO1	PO2

(OR)

4.	a)	Draw the current loci for an RL Series circuit having constant reactance but variable resistance.	6 Marks	L2	CO1	PO2
	b)	A radio tuner having series RLC circuit is connected across a variable frequency supply and has R = 12 Ohms, L = 1 mH and C = 1000 PF. Calculate resonant frequency, cut-off frequencies and Q factor of the tuner.	6 Marks	L3	CO2	PO6

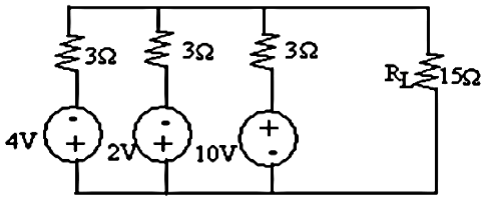
UNIT-III

5.	a)	State and explain Maximum power transfer theorem and derive the necessary conditions for maximum power transfer for a DC excitations.	6 Marks	L2	CO1	PO1
	b)	Find the current i in the circuit shown in figure using superposition theorem.	6 Marks	L3	CO1	PO2



(OR)

6.	a)	State and explain Millman's theorem.	4 Marks	L1	CO1	PO1
	b)	Find the current through load resistance RL and also find the voltage drop across load using Millman's theorem. as shown in figure.	8 Marks	L4	CO1	PO2



UNIT-IV

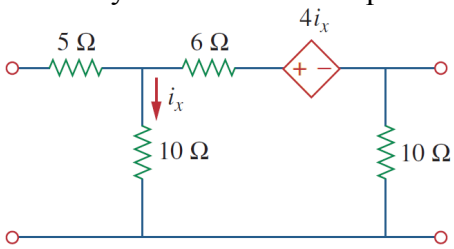
7.	a)	Distinguish between transient response and steady state response of a circuit.	4 Marks	L2	CO1	PO2
	b)	A series RC circuit with R = 50 ohms and C = 2 micro farad has a sinusoidal voltage source $V = 150\ Sin(500t\ \varphi+\pi/3)$ volts applied at a time when φ=0. Find the expression for the total current. Use Laplace transforms method.	8 Marks	L4	CO1	PO5

(OR)

8.	a)	Define a time constant and derive its expression for a RC circuit excited with DC.	4 Marks	L2	CO1	PO1
	b)	A series RLC circuit with R=2 ohms, L=1H and C= 1F has a sinusoidal voltage source $v(t) = 250Sin(500t)$ applied at time t=0. Determine the transient current i(t) using time domain approach. Assume zero initial conditions.	8 Marks	L4	CO2	PO2

UNIT-V

9.	a)	Express h parameters in terms of admittance parameters for a generalized network.	6 Marks	L2	CO1	PO1
	b)	Find the h parameters of the network in figure. Invistigate whether the netwok is symmetrical and reciprocal.	6 Marks	L4	CO1	PO4



(OR)

10.	a)	Define reciprocity and symmetry for a generalized two port network and derive the conditions for reciprocity and symmetry in terms of Z parameters.	6 Marks	L2	CO1	PO1
	b)	Determine the y parameters for the two-port shown in figure. Invistigate whether the netwok is symmetrical and reciprocal.	6 Marks	L4	CO1	PO4

BASIC ENGINEERING MECHANICS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	Four forces of magnitude 15KN, 25KN, 40KN and 60KN are acting at a point O as shown in Fig. The angles made by the above forces with X axis are 30, 60, 90 and 1200 respectively. Find magnitude and direction of the resultant force. 	12 Marks	L2	CO1	PO1 PO2

(OR)

2.	Two smooth spheres each of radius of 100mm and weighing 100N rest in a horizontal channel having vertical walls, the distance between which is 360mm.Find the reactions at the points A,B,C and D shown in fig. 	12 Marks	L2	CO1	PO1 PO2

UNIT-II

3.	Determine the forces in all the members of a truss shown in figure using metyhod of joints. 	12 Marks	L2	CO1	PO1 PO2

(OR)

4.	If the beam shown in below figure is hinged at A and simply supported at B, find the reactions at the supports. 	12 Marks	L2	CO1	PO1 PO2

UNIT-III

5.		Block A weighing 1000N and block B weighing 500N are connected by a flexible wire. The coefficient of friction between block A and the plane is 0.5. While that for block B and the plane is 0.2. Determine the value of inclination of the plane the system will have impending motion down the plane? 	12 Marks	L2	CO1	PO1 PO2

(OR)

6.		A uniform ladder of length 5m and weight 250N rests on a horizontal ground and leans against a rough vertical wall. The coefficient of static friction between ladder and the floor is 0.3 and between the ladder and vertical wall is 0.2. When a weight of 900 N is placed on the ladder at a distance of 2 m from the top of the ladder, the ladder is at the point of sliding. Determine: i) The angle made by the ladder with the horizontal. ii) Reactions at the foot and top of the ladder.	12 Marks	L2	CO1	PO1 PO2

UNIT-IV

7.	a)	State the methods of determining the centre of gravity?	4 Marks	L2	CO2	PO1 PO2
	b)	Find the centroid of the inverted T section shown in below figure. 	8 Marks	L2	CO2	PO1 PO2

(OR)

8.		Determine the centre of gravity of the plane uniform lamina shown in Fig. 	12 Marks	L3	CO2	PO1 PO2

UNIT-V

9.	a)	State the applications of Impulse and Momentum Equation.	6 Marks	L2	CO3	PO1
	b)	A gofer hits a 46 gm ball with an initial velocity of 48 m/s at angle of 240 with the horizontal. Determine the initial KE of the ball the KE of the ball when it reaches its maximum height.	6 Marks	L2	CO3	PO1 PO2

(OR)

10.	a)	Compare and contrast between Simple and Compound pendulums.	6 Marks	L2	CO4	PO1
	b)	A simple pendulum of amplitude 4° performs 24 oscillations in one minute. Find i) length of the pendulum. ii) maximum acceleration of the bob, iii) maximum linear velocity of the bob; and iv) maximum angular velocity of the bob.	6 Marks	L2	CO4	PO1 PO2

MATERIAL SCIENCE AND ENGINEERING
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Write the crystal defects in material structures.	6 Marks	L1	CO1	PO1
	b)	Difference between BCC and FCC crystal structures.	6 Marks	L2	CO1	PO2
		(OR)				
2.		State and explain Gibb's Phase rule and Hume Rothery rule with suitable examples.	12 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Explain the terms Annealing, Normalizing and Tempering.	6 Marks	L2	CO1	PO2
	b)	Explain Carburizing with neat sketch.	6 Marks	L2	CO1	PO2
		(OR)				
4.		Explain Isothermal transformation diagrams and continuous cooling transformation diagrams neatly.	12 Marks	L2	CO1	PO2
		UNIT-III				
5.	a)	Write classification and applications of steel.	6 Marks	L2	CO2	PO3
	b)	Write a note on stainless steel and tool steels.	6 Marks	L1	CO2	PO3
		(OR)				
6.		Draw the microstructures of nodular cast iron, mottled cast iron. Mention its applications and properties.	12 Marks	L3	CO2	PO4
		UNIT-IV				
7.		Write the structure, applications and properties of Nickel and its alloy, copper and its alloy.	12 Marks	L2	CO2	PO1
		(OR)				
8.	a)	Explain the properties of aluminum and its alloys.	6 Marks	L1	CO2	PO1
	b)	Explain about refractory and precious metals.	6 Marks	L1	CO2	PO1
		UNIT-V				
9.	a)	Write the differences between particles reinforced composites fiber reinforced composites.	6 Marks	L1	CO2	PO2
	b)	Write the characteristics of MMC material.	6 Marks	L1	CO2	PO2
		(OR)				
10.		Define polymerization reaction and explain the types of polymers in detail.	12 Marks	L2	CO2	PO1

DIGITAL LOGIC DESIGN

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Express the following numbers in decimal: i) $(10110.0101)_2$ ii) $(26.24)_8$	6 Marks	L3	CO1	PO1
	b)	Simplify using Boolean Algebra and implement the simplified expression using basic logic gates (AND, OR, NOT). i) $A + CD + (A + D')(C' + D)$. ii) $A'B(D' + CD) + B(A + A'CD)$.	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Given the 8-bit data word 11000100, generate the 12-bit composite word for the Hamming code that corrects single errors and detects double errors.	6 Marks	L3	CO1	PO1
	b)	Find the complement of the following expressions: i) $(BC' + A'D)(AB' + CD')$. ii) $(AB' + C)D' + E$.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Express the Boolean function $F=A+B'C$ in a sum of min-term form.	6 Marks	L4	CO1	PO2
	b)	Draw a logic diagram using only two-input NAND gates to implement the following expression: $(AB+A'B')(CD'+C'D)$.	6 Marks	L4	CO1	PO3
		(OR)				
4.	a)	Simplify the following Boolean expressions to a minimum number of literals: i) $xy + x(wz+wz')$ ii) $xy' + y'z' + x'z'$	6 Marks	L4	CO1	PO2
	b)	Simplify the following expression to sum-of-products and products-of-sums. $yzw' + xyz' + xzw$.	6 Marks	L4	CO1	PO2

UNIT-III

5.		Describe the operations performed by the following logic circuits with an example. i) Comparator ii) Decoder iii) Encoder	12 Marks	L2	CO2	PO1
		(OR)				
6.	a)	A Combinational logic circuit is defined by the following Boolean functions: F1 = ABC + AC F2 = ABC + AB F3= ABC + AB Design the circuit with a Decoder and external gates.	8 Marks	L4	CO2	PO4
	b)	Implement 64 × 1 Multiplexer with four 16 × 1 and one 4 ×1 Multiplexer.	4 Marks	L3	CO2	PO5

UNIT-IV

7.	a)	Describe the operation of the SR Latch using NAND gate with the help of truth table, transition table and the circuit.	6 Marks	L2	CO2	PO1
	b)	Design a 4-bit ripple counter using T Flip-Flops.	6 Marks	L4	CO2	PO3
		(OR)				
8.		Design a sequential circuit with two D-Flip A and B, 1 input x. when x=0, the state of the circuit remains same. When x=1, the circuit goes through the state transitions from 00 to 01 to 10 to 11 and back to 00. Show the state diagram, state tables, state transition maps and circuit diagram.	12 Marks	L4	CO2	PO3

UNIT-V

9.	a)	Write short notes on the following ROM variants: i) PROM ii) EPROM iii) EEPROM	6 Marks	L2	CO2	PO1
	b)	With a block diagram explain the functioning of a PAL.	6 Marks	L2	CO2	PO1
		(OR)				
10.		A combinational circuit is defined by the following Boolean functions : F1 (X, Y, Z) = $\sum$ (1, 2, 4, 6) and F2 (X, Y, Z) = $\sum$ (0, 1, 6, 7) Derive the PLA programming table and the PLA structure for the given functions.	12 Marks	L4	CO2	PO4

OBJECT ORIENTED PROGRAMMING THROUGH JAVA

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss about java Buzzwords.	6 Marks	L1	C01	PO1
	b)	What is Java Virtual Machine? How is it works?	6 Marks	L2	C01	PO1
		(OR)				
2.	a)	Explain the basic concepts of object oriented programming.	6 Marks	L1	C01	PO1
	b)	Discuss about Access control in java.	6 Marks	L2	C01	PO1

UNIT-II

3.	a)	Write short notes on type conversion in java with examples.	6 Marks	L2	C01	PO2
	b)	Explain in detail about method overloading and illustrate with an example.	6 Marks	L1	C02	PO2
		(OR)				
4.	a)	Illustrate about decision making statements in java.	6 Marks	L1	C01	PO3
	b)	Explain the following Java String class methods. i) concat() ii) chatAt() iii) substring()	6 Marks	L2	C02	PO2

UNIT-III

5.	a)	How multilevel inheritance is implemented in java? Demonstrate with an example.	6 Marks	L2	C02	PO4
	b)	Can we create object for an abstract class? Demonstrate with an example java program.	6 Marks	L2	C02	PO3
		(OR)				
6.	a)	What is an interface? Explain its implementation with suitable program.	6 Marks	L1	C02	PO2
	b)	How to define a package? How to access, import a package? Explain with examples.	6 Marks	L2	C02	PO3

UNIT-IV

7.	a)	How to handle multiple catch blocks for a nested try block? Explain with an example.	6 Marks	L2	C02	PO3
	b)	Write a program to explain thread priorities usage.	6 Marks	L2	C02	PO3
		(OR)				
8.	a)	With a program illustrate user defined exception handling.	6 Marks	L2	C02	PO3
	b)	Discuss about collection frame work hierarchy.	6 Marks	L2	C03	PO2

UNIT-V

9.	a)	What is the role of event listeners in event handling? List the Java event listeners.	6 Marks	L2	C03	PO3
	b)	How to pass parameters to applets? Illustrate with suitable example.	6 Marks	L3	C03	PO3
		(OR)				
10.	a)	With a neat diagram, explain the life cycle of Applet.	6 Marks	L2	C03	PO2
	b)	What is an adapter class? Explain its role in event handling.	6 Marks	L3	C03	PO3

BIOLOGY FOR ENGINEERS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Compare biological models and manmade systems.	6 Marks	L2	CO1	PO2
	b)	Explain prokaryotes and eukaryotes with neat diagrams.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Classify living organisms.	6 Marks	L2	CO1	PO2
	b)	Illustrate molecular taxonomy.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Summarize the industrial applications of enzymes.	6 Marks	L2	CO1	PO1
	b)	Explain the structure and functions of proteins.	6 Marks	L2	CO1	PO1
		(OR)				
4.	a)	Explain the importance of various biomolecules in the formation of living organisms.	7 Marks	L2	CO1	PO1
	b)	Define enzymes and describe their applications.	5 Marks	L1	CO1	PO5
		UNIT-III				
5.	a)	How Mendel laws are important in biology as Newton laws in physics? Explain.	6 Marks	L2	CO2	PO1
	b)	What is the process by which information is transferred from DNA to mRNA?	6 Marks	L1	CO2	PO1
		(OR)				
6.		Explain about translation and single gene disorders.	12 Marks	L2	CO2	PO1
		UNIT-IV				
7.	a)	Distinguish between Transgenic animals and cloned animals with suitable examples.	6 Marks	L4	CO3	PO1
	b)	How Biosensors and biochips are prepared? List their applications.	6 Marks	L4	CO3	PO6
		(OR)				
8.	a)	Explain major steps in the recombinant DNA technology and add a note on recombinant microbes.	8 Marks	L2	CO3	PO6
	b)	Identify merits and demerits of Transgenic plants.	4 Marks	L3	CO3	PO1
		UNIT-V				
9.	a)	What is neuron and synapse? Explain the process of Neurotransmission.	6 Marks	L2	CO1	PO1
	b)	Summarize the applications of DNA finger printing.	6 Marks	L2	CO3	PO6
		(OR)				
10.	a)	Compare different types of Genomics.	6 Marks	L2	CO1	PO1
	b)	Explain about DNA Microarray and its applications.	6 Marks	L2	CO3	PO6

ENGINEERING PHYSICS

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	List the difference between interference and diffraction.	2 Marks	L1	CO1	PO1
	b)	Discuss in detail the Fraunhofer diffraction at a single slit.	10 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Summarize the theory of Quarter wave plate and Half wave plate.	4 Marks	L2	CO1	PO1
	b)	Describe the construction and working of a Nicol's Prism.	8 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Explain the physical significance of gradient, divergence and curl.	4 Marks	L2	CO2	PO1
	b)	Identify the four Maxwell's field equations and explain their physical significance.	8 Marks	L3	CO2	PO1
		(OR)				
4.	a)	Recall the principle behind the functioning of optical fiber. Explain the differences between the step index fiber and graded index fiber.	9 Marks	L2	CO2	PO1
	b)	Calculate the numerical aperture and acceptance angle for an optical fiber with core and cladding refractive indices being 1.48 and 1.45 respectively.	3 Marks	L3	CO2	PO2
		UNIT-III				
5.	a)	Discuss the origin of energy band formation in solids.	5 Marks	L2	CO3	PO1
	b)	Classify the solids in to conductors, semiconductors and insulators based on the formation of energy bands.	7 Marks	L2	CO3	PO1
		(OR)				
6.	a)	State Hall effect. Derive an expression for Hall coefficient. Mention its applications.	10 Marks	L3	CO3	PO2
	b)	The R_H of a specimen is 3.66×10^{-4} m^3c^{-1}. Its resistivity is $8.93 \times 10^{-3}\Omega m$. Find μ and n.	2 Marks	L1	CO3	PO2
		UNIT-IV				
7.	a)	Define dielectric polarization.	2 Marks	L1	CO4	PO1
	b)	Outline an expression for internal field of an atom in a dielectric material.	10 Marks	L2	CO4	PO1 PO2
		(OR)				
8.	a)	State magnetic moment. Explain the origin of magnetic moment in an atom.	8 Marks	L2	CO4	PO2
	b)	Classify the magnetic materials and explain them.	4 Marks	L2	CO4	PO1
		UNIT-V				
9.	a)	Distinguish Type I and Type II superconductors.	4 Marks	L4	CO5	PO1
	b)	What are Cooper pairs? Outline the BCS theory of superconductivity.	8 Marks	L1	CO5	PO1
		(OR)				
10.	a)	Describe any one method for synthesize nanomaterials.	6 Marks	L2	CO5	PO1
	b)	List the applications of nanomaterials.	6 Marks	L1	CO5	PO1

ENGINEERING CHEMISTRY

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		Discuss the particle in one dimensional box using quantum mechanical concept and prove that electronic energy levels are quantized.	12 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Describe the structure of H_2O and NH_3 molecule in terms of VSEPR theory.	5 Marks	L2	CO1	PO1
	b)	Predict the magnetic property and bond order of carbon monoxide molecule based on its energy level diagram.	7 Marks	L3	CO1	PO2
		UNIT-II				
3.		Write the principle of EDTA method and describe the estimation of hardness of water by EDTA method.	12 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Calculate the hardness of water sample with 0.4g of $CaCO_3$ dissolved in dil. HCl and the solution was made up to 500 ml with distilled water. 50 ml of the solution required 35 ml of the EDTA solution for the titration. 50 ml of hard water sample required 25 ml of EDTA and after boiling and filtering required 15 ml of the EDTA solution.	6 Marks	L3	CO2	PO2
	b)	Discuss the adverse effects of fluorides on human health.	6 Marks	L3	CO2	PO 6
		UNIT-III				
5.	a)	Explain the construction and working of solid oxide fuel cell.	6 Marks	L2	CO3	PO1
	b)	Discuss different methods used for prevention of corrosion of metal and discuss any one method.	6 Marks	L1	CO3	PO2
		(OR)				
6.	a)	Why does corrosion occur in steel pipe connected to copper plumbing?	4 Marks	L1	CO3	PO1
	b)	Describe the construction and working of the lead acid battery with chemical equations.	8 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Explain different types of fundamental modes of vibrations.	6 Marks	L2	CO4	PO1
	b)	Write the principle and applications of Transmission Electron Microscope.	6 Marks	L1	CO4	PO1
		(OR)				
8.		Discuss the principle and working of UV - Visible spectrometer with the help of a block diagram.	12 Marks	L2	CO4	PO1

UNIT-V

9.		Discuss in detail about various mechanisms of lubrication.	12 Marks	L2	CO5	PO1
		(OR)				
10.	a)	What is meant by cracking of petroleum? Describe the fixed-bed catalytic cracking process with a neat diagram.	7 Marks	L2	CO5	PO1
	b)	Calculate the HCV and LCV of coal having the following compositions; carbon = 80%, hydrogen = 10%, nitrogen = 4%, sulphur = 2%, ash = 4%, latent heat of steam = 587 kcal/kg.	5 Marks	L3	CO5	PO2

TRANSFORMATION TECHNIQUES AND LINEAR ALGEBRA

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Find the Fourier series of the function $f(x) = x\sin x$ *in* $(-1,1)$.	6 Marks	L4	CO1	PO1
	b)	Establish Fourier sine transform for $f(x) = xe^{-ax}$.	6 Marks	L1	CO1	PO2

(OR)

2.		Show that $x = 1 - \frac{8}{\pi^2}\left[\frac{1}{1^2}\cos\frac{\pi x}{2} + \frac{1}{3^2}\cos\frac{3\pi x}{2} + \frac{1}{5^2}\cos\frac{5\pi x}{2} + \ldots\right]$ in the interval (0, 2).	12 Marks	L2	CO1	PO2

UNIT-II

3.	a)	Determine $L\{f(t)\}$ *where* $f(t) = t^2e^{-3t}\sin 2t$.	6 Marks	L3	CO1	PO1
	b)	Find the Laplace transform of $\int_0^t \frac{e^t \sin t}{t}\,dt$.	6 Marks	L1	CO1	PO1

(OR)

4.	a)	Making use of Laplace transform, evaluate $\int_0^\infty \frac{\cos at - \cos bt}{t}\,dt$.	6 Marks	L3	CO1	PO2
	b)	Evaluate $L\{t^2 e^{-3t}\sin 2t\}$.	6 Marks	L5	CO1	PO1

UNIT-III

5.	a)	Find the inverse Laplace transform of $\log\left(\frac{s+a}{s+b}\right)$.	6 Marks	L1	CO1	PO1
	b)	Evaluate $L^{-1}\left[\frac{1}{(s^2+a^2)^2}\right]$ using convolution theorem.	6 Marks	L3	CO1	PO2

(OR)

6.		Solve the differential equation $\frac{d^2x}{dt^2} - 4\frac{dx}{dt} - 12x = e^{3t}$, given that $x(0) = 1,\ x'(0) = -2$ by using Laplace transforms.	12 Marks	L3	CO1	PO2

UNIT-IV

7.	a)	Find the rank of matrix $A = \begin{pmatrix} 2 & -2 & 0 & 6 \\ 4 & 2 & 0 & 2 \\ 1 & -1 & 0 & 3 \\ 1 & -2 & 1 & 2 \end{pmatrix}$ by reducing it into echelon form.	6 Marks	L1	CO2	PO1
	b)	Determine the Eigen values and Eigen vectors of $B = 2A^2 - \frac{1}{2}A + 3I$, *where* $A = \begin{bmatrix} 8 & -4 \\ 2 & 2 \end{bmatrix}$.	6 Marks	L3	CO2	PO2

(OR)

8.	Find the orthogonal transformation which transforms the quadratic form $3x^2 + 3y^2 + 3z^2 + 2xy + 2xz - 2yz$ to canonical form and write the corresponding canonical form.	12 Marks	L1	CO2	PO2

UNIT-V

9.	a)	Check whether the set of vectors $\begin{bmatrix} 1 \\ -1 \\ 0 \end{bmatrix}, \begin{bmatrix} 0 \\ 1 \\ -1 \end{bmatrix}$ *and* $\begin{bmatrix} -1 \\ 0 \\ 1 \end{bmatrix}$ is linearly independent or not.	6 Marks	L2	CO2	PO1
	b)	Show that the transformation $T: R^2 \to R^3$ defined by $T\begin{bmatrix} x \\ y \end{bmatrix} = \begin{bmatrix} -y \\ x+2y \\ 3x-4y \end{bmatrix}$ is linear.	6 Marks	L2	CO2	PO1

(OR)

10.	a)	Show that the vectors $\begin{bmatrix} 1 \\ -1 \\ 3 \end{bmatrix}, \begin{bmatrix} -1 \\ 5 \\ 1 \end{bmatrix}$ *and* $\begin{bmatrix} 1 \\ -3 \\ 1 \end{bmatrix}$ form a basis of $R^3(R)$.	6 Marks	L2	CO2	PO1
	b)	Show that the linear transformation $T: R^2 \to P_1$ defined by $T\begin{bmatrix} a \\ b \end{bmatrix} = a + (a+b)x$ is one-to-one and onto, where P_1 is a vector space of all linear polynomial over real field.	6 Marks	L2	CO2	PO2

APPLIED PHYSICS
[Civil Engineering, Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Classify the optical fibres based on refractive index profile and modes of propagation with neat sketch.	9 Marks	L2	CO1	PO1
	b)	Calculate the fractional change in refractive indices and numerical aperture of a given optical fiber whose refractive indices are 1.49 and 1.45 respectively.	3 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Summarize the principle of optical fiber. Derive an expression for acceptance angle and numerical aperture of an optical fiber.	8 Marks	L2	CO1	PO2
	b)	What is a sensor? Explain the working mechanism of temperature sensor.	4 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Explain the reverberation time based on Sabine's formula.	7 Marks	L2	CO1	PO1
	b)	List the requirements of an acoustic good hall. Explain how these requirements can be achieved.	5 Marks	L1	CO1	PO1
		(OR)				
4.	a)	Define ultrasonics. Describe the Magnetostriction method for their production.	8 Marks	L2	CO1	PO1
	b)	Write the industrial application of ultrasonics.	4 Marks	L1	CO1	PO1
		UNIT-III				
5.	a)	Deduce expressions for time of flight and horizontal range of a projectile in inclined projection.	7 Marks	L2	CO2	PO2
	b)	Show that the path of a projectile is a parabola in an inclined projection on ground level.	5 Marks	L1	CO2	PO2
		(OR)				
6.	a)	Derive an expression for work energy equation for a body of weight W undergoing a translation motion.	8 Marks	L2	CO2	PO2
	b)	A body weighing 300 N is pushed up a 300 plane by a 400 N force acting parallel to the plane. If the initial velocity of the body is 1.5 m/s and the coefficient of kinetic friction is $\mu = 0.2$, what velocity will the body have after moving 6 m?	4 Marks	L1	CO2	PO2
		UNIT-IV				
7.		Explain rectilinear flow of heat conduction along a uniform bar.	12 Marks	L2	CO2	PO1
		(OR)				
8.	a)	Derive the equation for the heat conduction through compound media in series combination.	6 Marks	L3	CO2	PO2
	b)	Discuss the principle of Lee's disc method.	6 Marks	L2	CO2	PO1
		UNIT-V				
9.	a)	Explain any one method for preparation of metallic glasses.	6 Marks	L2	CO3	PO1
	b)	Discuss the mechanical, thermal and optical properties of metallic glasses.	6 Marks	L2	CO3	PO1
		(OR)				
10.	a)	List the different types of composites and give their applications.	7 Marks	L1	CO3	PO1
	b)	Write various applications of shape memory alloys.	5 Marks	L1	CO3	PO1

BASIC ELECTRICAL AND ELECTRONICS ENGINEERING

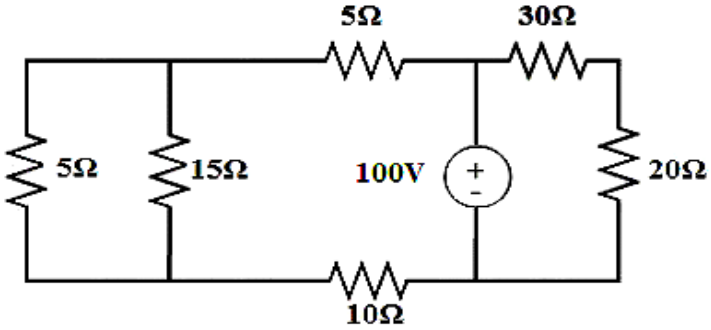
[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	With neat sketch, explain working principle of single loop generator.	8 Marks	L2	CO1	PO1
	b)	Find the current in each branch of the circuit shown in figure using current division method.	4 Marks	L3	CO1	PO2



(OR)

2.	a)	Find the total power dissipated in the circuit shown in the figure (All resistances are in ohms).	6 Marks	L3	CO1	PO2

	b)	A series combination of R=10Ω and L=20mH has a current i(t) = 5 cos(500t+100)A. Obtain the voltages v(t) and V, the phasor current I and sketch the phasor diagram.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Sketch the typical layout and explain the operation of Thermal power plant.	8 Marks	L2	CO2	PO1
	b)	With neat sketch, explain the working of various types of UPS.	4 Marks	L2	CO2	PO7

(OR)

4.	a)	Derive the expression for most economical power factor.	6 Marks	L3	CO2	PO2
	b)	Explain the process of plate earthing with neat sketch.	6 Marks	L2	CO2	PO1

UNIT-III

5.	a)	Explain the constructional details of 3-phase induction motor and mention it's applications.	6 Marks	L2	CO3	PO5
	b)	Suggest the suitable device which transforms the voltage with constant frequency and power. Derive the EMF equation of that device.	6 Marks	L2	CO3	PO1

(OR)

6.	a)	List the starting methods of single phase induction motors. Explain the characteristics and principle of operation of capacitor start capacitor run induction motor.	6 Marks	L2	CO3	PO1
	b)	Select a suitable machine which uses steam turbine as the prime mover. Explain its constructional features with neat sketch.	6 Marks	L2	CO3	PO6
		UNIT-IV				
7.	a)	Distinguish between Avalanche and Zener Break downs.	6 Marks	L4	CO4	PO2
	b)	Explain the input and output characteristic of a transistor in common Emitter configurations.	6 Marks	L2	CO4	PO2
		(OR)				
8.		With a neat sketch, explain the operation of a Half wave rectifier. Also, find the ripple factor and efficiency of this rectifier.	12 Marks	L2	CO4	PO1
		UNIT-V				
9.	a)	With the help of a circuit diagram, show that the op-amp can be used as non-inverting adder.	6 Marks	L3	CO4	PO2
	b)	Derive the expressions for the closed-loop gain of a non-inverting and inverting amplifiers using op-amp.	6 Marks	L2	CO4	PO2
		(OR)				
10.	a)	Discuss the inverting and non-inverting amplifier circuits of an op-amp in closed loop configuration. Derive the expressions for the closed-loop gain in these circuits.	6 Marks	L2	CO4	PO2
	b)	Examine and derive an expression for V_0 of the integrator circuit by using op-amp.	6 Marks	L4	CO4	PO2

PROGRAMMING FOR PROBLEM SOLVING

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define algorithm, explain properties of an algorithm.	6 Marks	L1	CO1	PO1
	b)	Evaluate the following expression according to operator precedence 4+int(3.78)+6*2/5+3**3**4//2.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Draw a flow chart to reverse a given number.	6 Marks	L3	CO1	PO2
	b)	Explain about sep, end options used in print() with example.	6 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Define suite and explain about the else suite with for statement.	6 Marks	L2	CO1	PO1
	b)	Display the following pattern using python script. 1 12 123 1234 12345	6 Marks	L3	CO1	PO2
		(OR)				
4.	a)	Write a python script to find the largest number among three numbers and display them in ascending order using if-else construct.	6 Marks	L3	CO1	PO2
	b)	Develop a python script to print factors for a given integer number.	6 Marks	L3	CO1	PO2

UNIT-III

5.	a)	Develop a python script to print diagonal elements sum in M*M list.	6 Marks	L3	CO1	PO2
	b)	List any four string handling methods used in Python. Illustrate with an example program.	6 Marks	L3	CO1	PO2
		(OR)				
6.	a)	Define stack. Write a python script to implement stack operations.	6 Marks	L3	CO1	PO3
	b)	Specify the functionalities of the following functions. i) keys(). ii) values(). iii) items(). iv) update().	6 Marks	L2	CO1	PO1

UNIT-IV

7.	a)	Develop a python script to implement Towers of Hanoi problem.	6 Marks	L3	CO2	PO3
	b)	Write a python script to remove all the occurrences of a given character from a text file, copy the resultant text into another text file. Find the total occurrences of the eliminated characters and display the count along with the contents of the text file on to the console.	6 Marks	L3	CO2	PO3
		(OR)				

8.	a)	Write a python script that reads a line of integers, and then displays each integer and the sum of all the integers.	6 Marks	L3	CO2	PO3
	b)	Explain functionality of the following functions. i) ones(). ii) arrange(). iii) logspace(). iv) zeros().	6 Marks	L1	CO2	PO1

UNIT-V

9.	a)	Write a python script to concatenate two data frames.	6 Marks	L3	CO2	PO2
	b)	Illustrate usage of loc() and iloc() with an example program.	6 Marks	L2	CO2	PO1
		(OR)				
10.	a)	Draw a scatter plots for knowing the relationship between two numerical variables.	6 Marks	L3	CO2	PO3
	b)	Load data from csv file to data frame and print head() and tail() of a data frame.	6 Marks	L3	CO2	PO2

CIVIL ENGINEERING MATERIALS AND CONCRETE TECHNOLOGY

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain physical and chemical classification of rocks.	6 Marks	L4	CO1	PO1 PO2
	b)	What is quarrying of stone? Explain methods of quarrying.	6 Marks	L3	CO1	PO1
		(OR)				
2.	a)	What are the constituents of good brick earth? Explain.	6 Marks	L2	CO1	PO1
	b)	How is clay tiles manufactured? Explain its properties and applications.	6 Marks	L1	CO1	PO1

UNIT-II

3.	a)	List and explain the various methods of seasoning of timber.	6 Marks	L3	CO1	PO1 PO2
	b)	Summarize the various causes of decay of wood work and how its preservation is ensured.	6 Marks	L4	CO1	PO1
		(OR)				
4.	a)	Explain different types of shakes in timber.	6 Marks	L2	CO1	PO1
	b)	Discuss the various materials used in low cost housing.	6 Marks	L3	CO1	PO1

UNIT-III

5.	a)	What are the various ingredients required for manufacturing cement? State their functions.	6 Marks	L2	CO1	PO1
	b)	List out various types chemical admixtures. How these admixtures are supporting to the environment?	6 Marks	L4	CO1	PO1 PO2 PO7
		(OR)				
6.	a)	Bring out the detailed classification of aggregates and physical properties of aggregates.	6 Marks	L1	CO1	PO1 PO2
	b)	Mention the different tests to be conducted on fine aggregate and explain about bulking of sand.	6 Marks	L3	CO1	PO1 PO2 PO5

UNIT-IV

7.	a)	Discuss the factors affecting the workability in fresh concrete.	6 Marks	L4	CO1	PO1
	b)	Distinguish Segregation and Bleeding in concrete in detail.	6 Marks	L2	CO1	PO1 PO2
		(OR)				
8.	a)	Calculate the Gel/space ratio and the theoretical strength of a sample of concrete made with 500gm of cement and 0.5w/c ratio, on full hydration and 60% hydration.	6 Marks	L6	CO1	PO1 PO2 PO8
	b)	Explain how you estimate the quality of concrete by using ultrasonic pulse velocity test.	6 Marks	L4	CO1	PO1 PO2

UNIT-V

9.	a)	Distinguish between modulus of elasticity and dynamic modulus of elasticity of concrete.	6 Marks	L4	CO1	PO1 PO2
	b)	Explain the various factors affecting shrinkage of concrete.	6 Marks	L2	CO1	PO1
		(OR)				
10.		Design a concrete mix of M25 grade for a roof slab. Take a standard deviation of 4 MPa. The specific gravities of coarse aggregate and fine aggregate are 2.67 and 2.73 respectively. The bulk density of coarse aggregate is 1620Kg/m^3 and fineness modulus of fine aggregate is 2.76. A slump of 50mm is necessary. The water absorption of coarse aggregate is 1% and free moisture in fine aggregate is 3%. Design the concrete mix using ACI method. Assume any missing data suitably.	12 Marks	L6	CO2	PO1 PO2 PO3 PO8

SREE VIDYANIKETHAN ENGINEERING COLLEGE

I B.Tech II Semester (SVEC-19) Supplementary Examinations March - 2021

ENGINEERING MECHANICS

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define the following with examples: Coplanar and Non-coplanar forces. Collinear and Non-collinear forces.	6 Marks	L4	CO1	PO1 PO2
	b)	The resultant of three forces is 60N as shown in Fig.1. Two of the three forces are also shown as 20N and 40N. Determine the third force.	6 Marks	L4	CO1	PO1 PO2

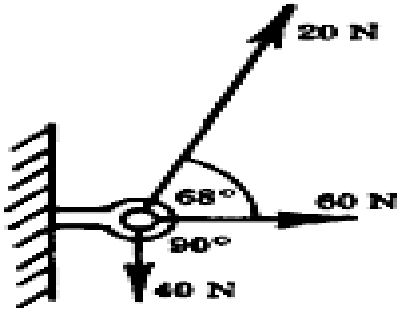

Fig.1

(OR)

2.		Two cylindrical identical rollers *A* and *B*, each of weight W = 500N are supported by an inclined plane and vertical wall and makes an angle of 30^0 with the horizontal as shown in Fig.2. Assuming all surfaces to be smooth, determine the reactions at A, B and C.	12 Marks	L4	CO1	PO1 PO2

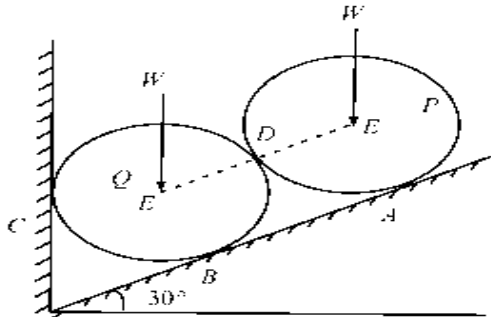

Fig.2

UNIT-II

3.	a)	A ladder 5m long and of 250N weight is placed against a vertical wall in a position where its inclination to the vertical is 300. A man weighing 800N climbs the ladder. At what position will he induce slipping? The co-efficient of friction for both the contact surfaces of the ladder viz. with the wall and the floor is 0.2.	6 Marks	L4	CO1	PO1 PO2
	b)	A block weighing 100N is resting on a rough plane inclined 20^0 to the horizontal. It is acted upon by a force of 50N directed upward at angle of 140 above the plane. Determine the friction. If the block is about to move up the plane, determine the co-efficient of friction.	6 Marks	L4	CO1	PO1 PO2

(OR)

4.		A person of mass 90 kg is standing on a ladder at point C, shown in Fig.3. The ladder rests on a rough horizontal floor at A and against a smooth vertical wall at B. If the ladder is just on the point of slipping find the coefficient of friction between the ladder and the floor. Neglect the weight of the ladder. Also find the reactions at A and B.	12 Marks	L4	CO1	PO1 PO2

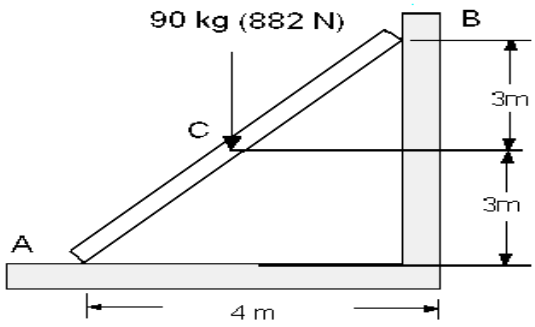

Fig.3

UNIT-III

5.	a)	Discuss the following terms with suitable examples: i) Centroid ii) Centre of mass iii) Centre of gravity iv) Radius of gyration	6 Marks	L4	CO1	PO1 PO2
	b)	Determine the centre of gravity of the plane uniform lamina shown in Fig.4.	6 Marks	L4	CO1	PO1 PO2

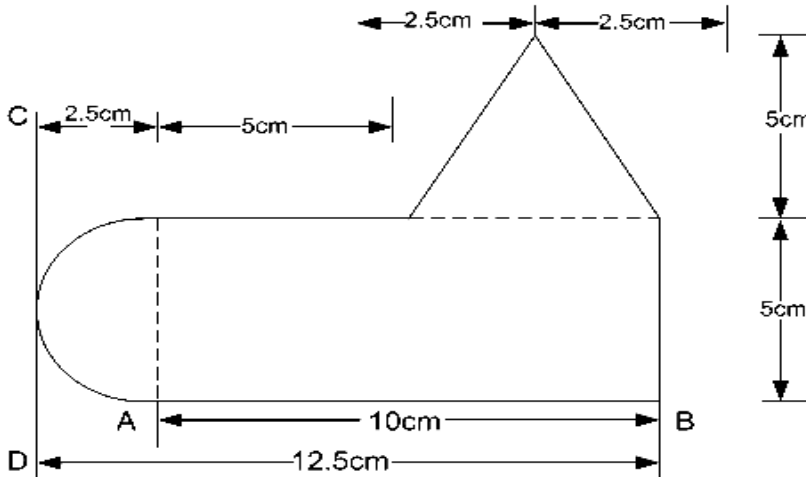

Fig.4

(OR)

6.	a)	State and prove the theorem of perpendicular axis.	6 Marks	L4	CO1	PO1 PO2
	b)	Determine centroid of shaded area as shown in given Fig.5.	6 Marks	L4	CO1	PO1 PO2

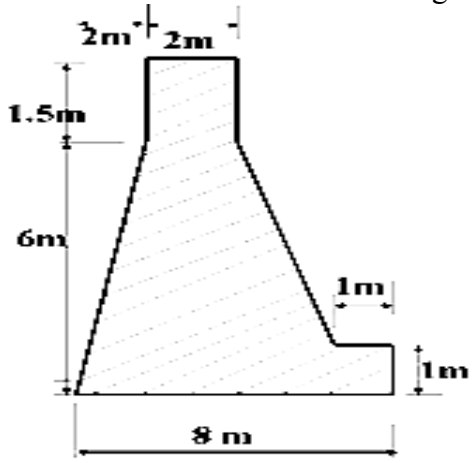

Fig.5

UNIT-IV

7.	a)	Describe the stress strain relationship for mild steel bar.	6 Marks	L4	CO1	PO1 PO2
	b)	A 2m long bar has a uniform diameter of 35mm for a length 1m from one end for the next 0.6m length, the diameter decreases uniformly to d. For the remaining 0.6m length, it has an uniform diameter of 'd' mm. When a load of 120kN is applied, the observed extension is 2.1mm, determine the diameter of the rod. Take E=2 x 10^5 N/mm^2.	6 Marks	L4	CO1	PO1 PO2
		(OR)				
8.		Derive the relationship between Modulus of Elasticity, Modulus of rigidity and Bulk Modulus.	12 Marks	L4	CO1	PO1 PO2

UNIT-V

9.		Derive the change in dimension of thin cylindrical shell due to an internal pressure.	12 Marks	L4	CO1	PO1 PO2
		(OR)				
10.	a)	A pipe of 200mm internal diameter and 50mm thickness carries a fluid at a pressure of 10MN/m^2. Calculate the maximum and minimum intensities of circumferential stress across the section.	6 Marks	L4	CO1	PO1 PO2
	b)	Calculate the thickness of metal necessary for a cylindrical shell of internal diameter 160mm to withstand an internal pressure of 25MN/m^2, if maximum permissible tensile stress is 125MN/m^2.	6 Marks	L6	CO2	PO1 PO2 PO3

ELECTRIC CIRCUITS

[Electrical and Electronics Engineering]

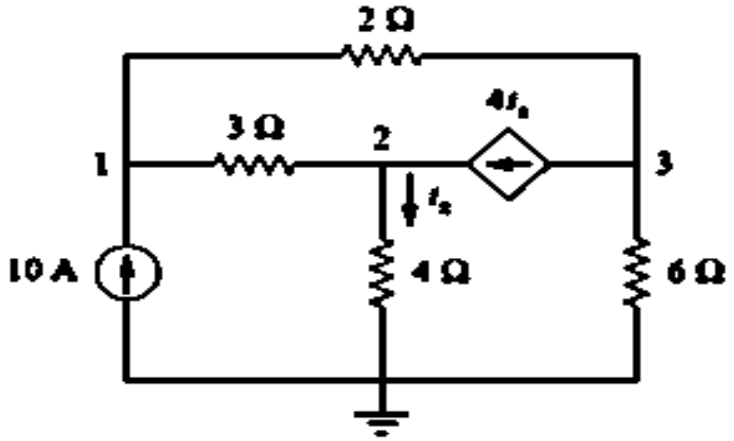
Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Find the value of the voltage source V_s that delivers 2 Amps current through the circuit as shown in figure.	6 Marks	L3	CO1	PO2

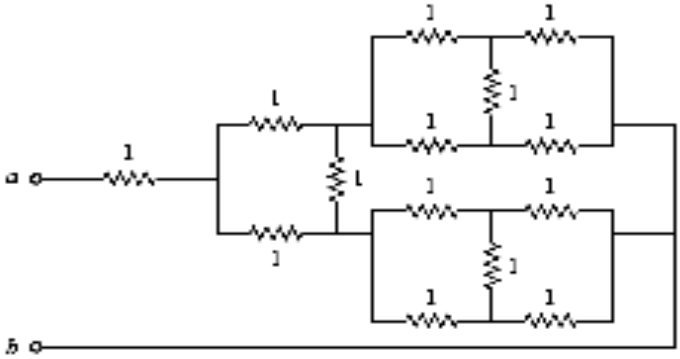
	b)	Find the voltages at the three non reference nodes in the circuit of figure	6 Marks	L4	CO1	PO2



(OR)

2.	a)	Using mesh analysis, find I_0 in the circuit shown in figure.	6 Marks	L4	CO1	PO2

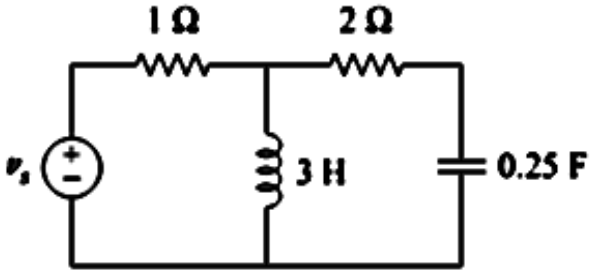
	b)	Find R_{ab} of the network shown in figure, Assume each element is 1Ω.	6 Marks	L3	CO1	PO2



UNIT-II

3.	a)	Determine the form factor of the wave form shown in figure.	6 Marks	L3	CO1	PO2

	b)	Assuming that $v_s = 16\cos(2t - 40^0)V$ in the circuit of shown in figure, find the average power delivered to each of the passive elements.	6 Marks	L3	CO2	PO2



(OR)

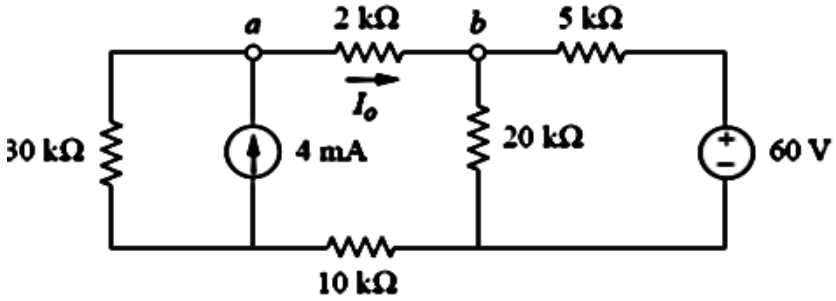
4.	a)	The unbalanced delta-load shown in figure is supplied by balanced line-to-line voltages of 240 V in the positive sequence. Find the line currents. Take V_{ab} as reference.	6 Marks	L3	CO1	PO2

	b)	Explain how a single wattmeter can be used to measure the reactive power with the help of circuit connection and derive the necessary equations.	6 Marks	L2	CO1	PO1

UNIT-III

5.	a)	Determine the maximum power delivered to the load in the circuit shown in figure, using maximum power transfer theorem.	6 Marks	L3	CO1	PO5

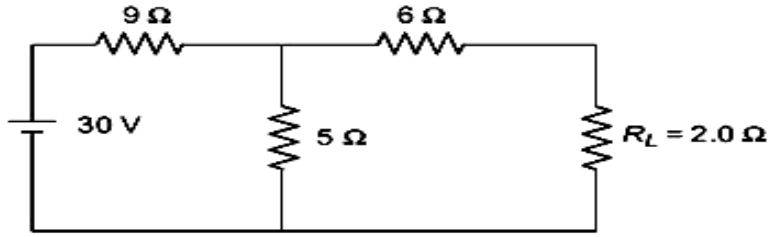
	b)	Consider the circuit in figure, an ammeter with internal resistance R_I is inserted between **a** and **b** to measure I_0. Determine the reading of the ammeter if: R_I=500Ω, 0Ω using Thevenin's theorem.	6 Marks	L4	CO1	PO5



(OR)

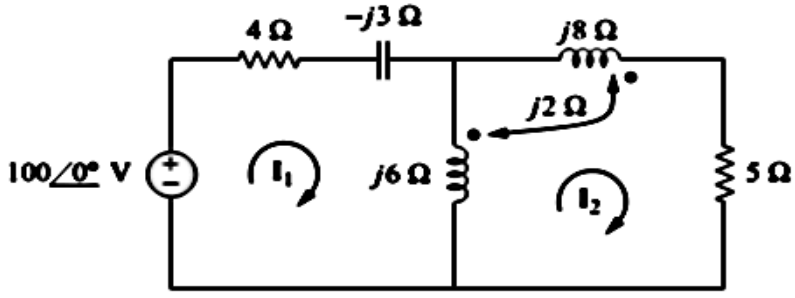
6.	a)	In the circuit shown below, find the voltage across the 20Ω resistor using Superposition Theorem.	6 Marks	L3	CO1	PO5

	b)	Calculate the change in current of the network given below using compensation theorem when load resistor changes to 10Ω.	6 Marks	L3	CO1	PO5



UNIT-IV

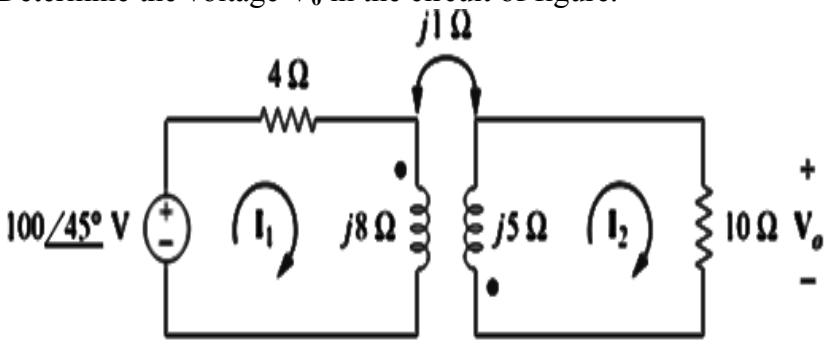
7.	a)	Derive the expressions for equivalent inductance of two coils in parallel with i)parallel aiding and ii) parallel opposition	6 Marks	L2	CO1	PO1
	b)	Calculate the mesh currents shown in figure.	6 Marks	L4	CO1	PO2



(OR)

8.	a)	For the coupled circuit shown in figure find the input impedance at the terminals a-b	6 Marks	L4	CO1	PO2

	b)	Determine the voltage V_0 in the circuit of figure.	6 Marks	L4	CO1	PO2



UNIT-V

9.	a)	Enumerate the various characteristics that a filter should posses for implementation in signal processing circuits.	6 Marks	L2	CO1	PO1
	b)	Design a π-section band pass filter having cut-off frequencies of 12 kHz and16 kHz for a load having an impedance of 600 Ω.	6 Marks	L4	CO2	PO3

(OR)

10.	a)	Define characteristic impedance and derive the characteristic impedance for a *T* and π networks. Also explain the nature of characteristic impedance in pass band and stop bands.	6 Marks	L3	CO1	PO2
	b)	Design m-derived high pass filter having a design impedance of R_0=500Ω and cut-off frequency of 5 kHz and m = 0.32. Also determine the frequency of infinite attenuation.	6 Marks	L4	CO2	PO3

NETWORK ANALYSIS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

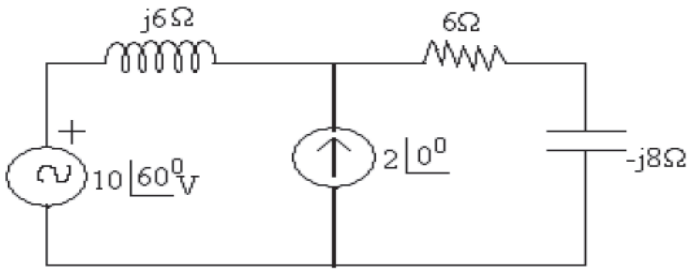
1.		In the circuit shown in figure, write three node equations for nodes A, B, and C with node D as the reference and find the node voltages. 	12 Marks	L4	CO1	PO2
		(OR)				
2.		Use nodal voltage method to find the voltages of nodes 'm' and 'n' and currents through j2Ω and –j2Ω reactance in the network shown below. 	12 Marks	L4	CO1	PO2

UNIT-II

3.	a)	Draw the current, impedance and admittance loci for an RC Series circuit having constant reactance but variable resistance.	6 Marks	L2	CO1	PO1
	b)	A TV tuner consists of a series RLC circuit consists of resistance R = 20, inductance, L = 0.01H and capacitance, C = 0.04 μF. Calculate the frequency at resonance. If a 10 Volts of frequency equal to the frequency of resonance is applied to this circuit, calculate the values of V_C and V_L across C and L respectively. Find the frequencies at which these voltages V_C and V_L are maximum.	6 Marks	L4	CO2	PO6
		(OR)				
4.	a)	Draw the phasor representation of voltage and current for Resistor, inductor and capacitor with sinusoidal excitation.	6 Marks	L2	CO1	PO1
	b)	A supply of 400V, 50Hz is applied to a series RC circuit. Find the value of C if the power absorbed by the resistor to be 500W at 150V. What is the energy stored in a capacitor?	6 Marks	L4	CO1	PO2

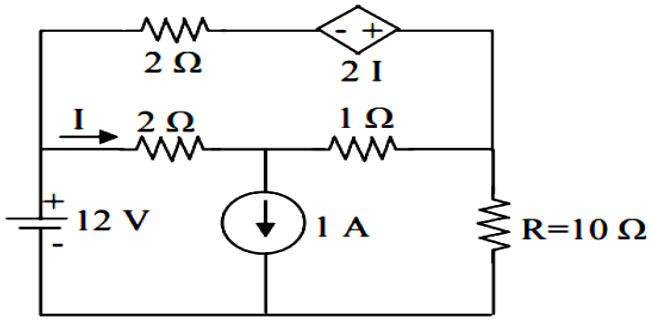
UNIT-III

5.		State Superposition theorem and find the current in the 6Ω resistor using Superposition theorem for the circuit shown below.	12 Marks	L3	CO1	PO5



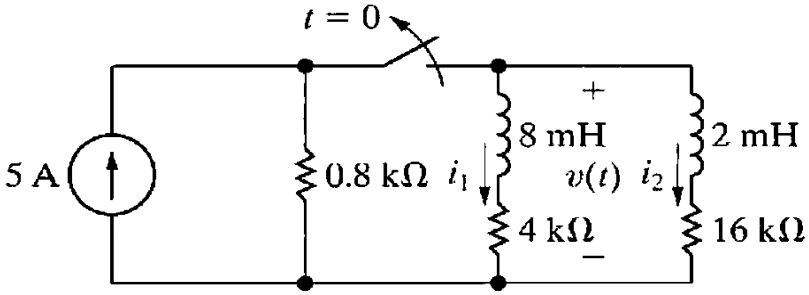
(OR)

6.		For the network shown in figure, determine the current through R=10Ω resistor using Thevenin's theorem and verify the result using Norton's theorem.	12 Marks	L3	CO1	PO2



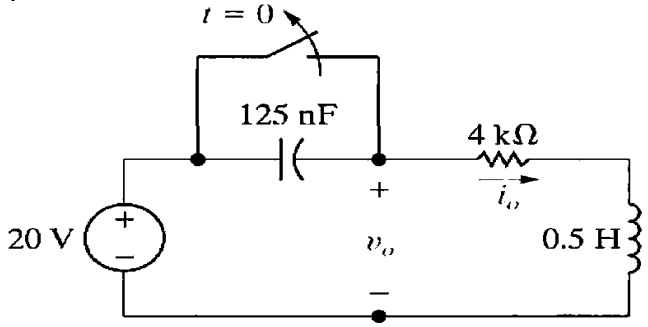
UNIT-IV

7.	a)	Explain the steady state and transient behavior of a capacitor.	4 Marks	L1	CO1	PO1
	b)	The switch in the circuit shown in figure has been closed for a long time. The switch opens at $t = 0$. Compute ***v(t), i_1(t)*** and ***i_2(t)***.	8 Marks	L4	CO1	PO2



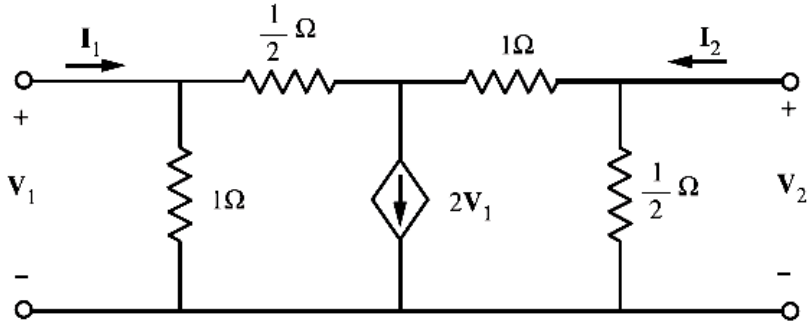
(OR)

8.	a)	Derive the transient response of series R-L-C circuit, with DC excitation using Laplace transform obtain the response for a critically damped case.	4 Marks	L2	CO1	PO5
	b)	The switch in the circuit in figure has been closed for a long time. At $t = 0$, the switch is opened find $v_0(t)$ and $i_0(t)$ for $t > 0$ using Laplace transformation method.	8 Marks	L4	CO2	PO5



UNIT-V

9.	a)	Define reciprocity and symmetry for a generalized two port network and derive the conditions for reciprocity and symmetry in terms of Y parameters.	6 Marks	L1	CO1	PO1
	b)	Find the y parameters for the two-port network shown in figure. Invistigate whether the netwok is symmetrical and reciprocal.	6 Marks	L4	CO1	PO4



(OR)

10.	a)	The Z parameters of a two port network are Z_{11}=6Ω, Z_{22}=4Ω, Z_{12} = Z_{21} = 3Ω. Compute ABCD Parameters and write the describing equations.	6 Marks	L4	CO1	PO2
	b)	Determine the impedance (Z) parameter of the given two port network shown in fig	6 Marks	L4	CO1	PO4

I B.Tech II Semester (SVEC-19) Supplementary Examinations March – 2021

BASIC ENGINEERING MECHANICS

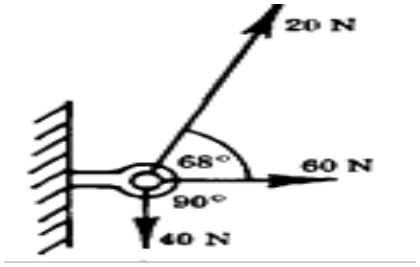
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

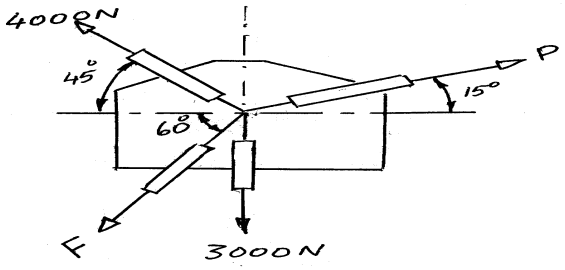
UNIT-I

1.	The resultant of three forces is 60N as shown in figure. Two of the three forces are also shown as 20N and 40 N. Determine the third force.	12 Marks	L2	CO1	PO1 PO2



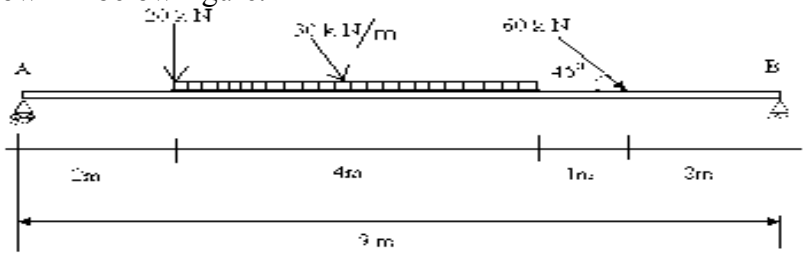
(OR)

2.	The forces on the gusset plate of a joint in a bridge truss act as shown in figure. Determine the magnitudes of the two forces P and F to maintain equilibrium of the joint.	12 Marks	L2	CO1	PO1 PO2



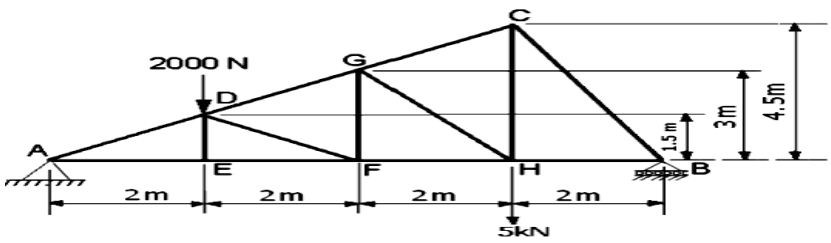
UNIT-II

3.	Find the reactions at the supports A and B of the loaded beam shown in below figure.	12 Marks	L2	CO1	PO1 PO2



(OR)

4.	Calculate the forces included in the members of the pin-jointed truss shown in figure. Show the values on a neat diagram of the truss.	12 Marks	L2	CO1	PO1 PO2



UNIT-III

5.		The coefficient of friction between a copper block A and an aluminum block B is 0.3, and between the block B and the floor is 0.2. The weight of block A is 30 N and of block B is 20 N as shown in given figure. What force P will cause the motion of block A to impend? 	12 Marks	L2	CO1	PO1 PO2
		(OR)				
6.		Determine the force P required to start the wedge shown in figure. The angle of friction for all surfaces in contact is 15°. 	12 Marks	L2	CO1	PO1 PO2

UNIT-IV

7.		A semicircular area is removed from a trapezium as shown in figure (dimensions in mm). Determine the centroid of the remaining area. 	12 Marks	L3	CO2	PO1 PO2
		(OR)				
8.	a)	Define Centre of Gravity and Centre of mass.	6 Marks	L3	CO2	PO1
	b)	Determine centroid of shaded area as shown in given figure. 	6 Marks	L3	CO2	PO1 PO2

UNIT-V

9.	a)	An elevator weighing 5000N is ascending with an acceleration of 3m/s². During this ascent, its operator whose weight is 700N is standing on the weighing pan placed on the floor. What is the weighing pan reading? What will be the total tension in the cables of elevator during this motion?	6 Marks	L2	CO3	PO1 PO2
	b)	Explain D'Alembert's principle with neat example.	6 Marks	L2	CO3	PO1
		(OR)				
10.	a)	Compare and contrast between Simple and Compound pendulums.	6 Marks	L2	CO4	PO1
	b)	A Weight of 50N is suspended from a spring, vibrates vertically with a frequency of 1 Hertz and amplitude of 7.5cm. Find the stiffness of spring and maximum velocity.	6 Marks	L2	CO4	PO1 PO2

MATERIAL SCIENCE AND ENGINEERING

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Discuss the primary and secondary bonding in materials.	6 Marks	L1	CO1	PO1
	b)	Explain interstitial and vacancy diffusions.	6 Marks	L2	CO1	PO2
		(OR)				
2.		Explain Iron-Iron carbide phase diagram in detail.	12 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Write short notes on Flame and Induction Hardening.	6 Marks	L1	CO1	PO1 PO7
	b)	Define annealing and recall the types of annealing.	6 Marks	L1	CO1	PO1 PO7
		(OR)				
4.		Describe TTT and CCT curves in detail.	12 Marks	L1	CO1	PO3
		UNIT-III				
5.	a)	Differentiate carbon steels and alloy steels.	6 Marks	L2	CO2	PO3
	b)	Write a note on Hadfield manganese steels and Stainless steels.	6 Marks	L1	CO2	PO2
		(OR)				
6.		Draw the microstructures of Grey cast iron and White cast iron; also mention its composition, properties and applications.	12 Marks	L3	CO2	PO4
		UNIT-IV				
7.	a)	Compare brass and bronze materials.	6 Marks	L2	CO2	PO3
	b)	List the properties and applications of copper.	6 Marks	L1	CO2	PO1
		(OR)				
8.		What is aluminum? Explain the types, properties and uses of aluminum alloys in detail.	12 Marks	L2	CO2	PO2
		UNIT-V				
9.	a)	Write a brief note on Metal-Matrix Composites (MMCs) and Ceramic-Matrix Composites (CMCs).	6 Marks	L1	CO2	PO2 PO7
	b)	Discuss on the characteristics and classification of polymers.	6 Marks	L1	CO2	PO3
		(OR)				
10.		Define polymerization reaction and explain the types of polymerization reaction in detail.	12 Marks	L2	CO2	PO1 PO7

DIGITAL LOGIC DESIGN

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Obtain complement of the Boolean Expression A′ B + A′BC′ + A′BCD.	6 Marks	L3	CO1	PO2
	b)	Convert the following numbers with the indicated bases to decimal: i) $(435)_8$ ii) $(345)_6$ iii) $(10110110)_2$	6 Marks	L3	CO1	PO1
		(OR)				
2.	a)	Each of the following arithmetic operations is correct in at least one number system. Determine the bases in each operation: i) 41/3 = 13 ii) 23 + 44 + 14 + 32 = 223	6 Marks	L3	CO1	PO1
	b)	Prove the following Boolean theorems: i) AB+A′C = (A+C)(A′+B) . ii) AB+A′C+BC = AB+A′C.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Simplify the following Boolean function using K-Map method. F (w, x, y, z) = Σ (0, 2, 4, 5, 6, 7, 8, 10, 13, 15).	6 Marks	L4	CO1	PO2
	b)	Implement AND, OR, NOT gates using Universal gates.	6 Marks	L3	CO1	PO2
		(OR)				
4.	a)	Find the minterms of the following Boolean expressions by first plotting each function ina map: $xy + yz + xy'z$.	6 Marks	L4	CO1	PO2
	b)	Minimize the expression using K-map and realize using only NOR gates. F (A, B, C, D) = Π (1, 4, 5, 11, 12, 14) and don't care conditions d (A, B, C, D) = (6, 7, 15)	6 Marks	L4	CO1	PO3

UNIT-III

5.	a)	With the help of a circuit diagram, explain the operation of series full adder and compare its performance with parallel adder.	6 Marks	L4	CO2	PO2
	b)	What is a multiplexer? Use a 4:1 multiplexer and a minimum number of external gates to realize the following Boolean function. F (w, x, y, z) = ∑ m (3, 4, 5, 7, 10, 14) + ∑ d (1, 6, 15)	6 Marks	L4	CO2	PO5
		(OR)				
6.	a)	Realize a full subtract or using MUX.	4 Marks	L4	CO2	PO4
	b)	Draw and explain 4-bit shift register with an example.	8 Marks	L2	CO2	PO1

UNIT-IV

7.	a)	Explain about the realization of SR flip-flop, JK flip-flop using D flip-flop.	6 Marks	L2	CO2	PO1
	b)	Design a 2-bit x 3-bit Binary Multiplier.	6 Marks	L4	CO2	PO3
		(OR)				

8.	a)	Design decade Johnson counter and explain its operation.	6 Marks	L4	CO2	PO3
	b)	Define excitation table. Explain D flip-flop and obtain the state equation, the state diagram, state table and excitation table of the same.	6 Marks	L2	CO2	PO1

UNIT-V

9.		A combinational circuit is defined by the functions F_1 (A, B, C) = Σ(3, 5, 6, 7) F_2 (A, B, C) = Σ(0, 2, 4, 7) Implement the circuit with a PLA having 3-inputs, four product terms and two outputs.	12 Marks	L4	CO2	PO4

(OR)

10	a)	Implement F (a, b, c, d) = Σ m(0, 1, 2, 3, 6, 9, 11) using PAL.	9 Marks	L4	CO2	PO4
.	b)	Write short notes on combinational PLDs.	3 Marks	L2	CO2	PO1

OBJECT ORIENTED PROGRAMMING THROUGH JAVA

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Differentiate between Procedural Oriented and Object Oriented Languages.	6 Marks	L2	CO1	PO1
	b)	Write about Garbage Collection in Java.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Illustrate the usage of this keyword using an example program.	6 Marks	L2	CO1	PO1
	b)	Explain about: i) class ii) object iii) constructor.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	Develop a java program to implement Towers of Hanoi problem.	6 Marks	L3	CO1	PO3
	b)	Analyze the concept of constructor overloading with an example program.	6 Marks	L2	CO2	PO2
		(OR)				
4.	a)	List and explain any four operators in java.	6 Marks	L1	CO1	PO1
	b)	Give the purpose of using the final keyword in java.	6 Marks	L1	CO1	PO1
		UNIT-III				
5.	a)	"Java supports reusability". Justify the statement.	6 Marks	L5	CO2	PO1
	b)	Write the process of creating and accessing a package.	6 Marks	L1	CO2	PO1
		(OR)				
6.	a)	Design a program to demonstrate multiple inheritance in java.	6 Marks	L3	CO2	PO4
	b)	Explain the following : i) Abstract class. ii) Final keyword with inheritance.	6 Marks	L1	CO2	PO1
		UNIT-IV				
7.	a)	Develop a java program for producer consumer problem to illustrate the concept of multithreading.	6 Marks	L3	CO2	PO4
	b)	What is Java Collections Framework? List out some benefits of Collection framework.	6 Marks	L1	CO2	PO1
		(OR)				
8.	a)	Difference between Thread and Process in Java. How to implement Thread in Java?	6 Marks	L2	CO2	PO2
	b)	Develop a java program to read 20 marks and store them in an array. Define your own exception named wrong mark exception. Throw and catch this type of exception when a mark is (<0 and >100).	6 Marks	L3	CO2	PO3
		UNIT-V				
9.	a)	What is an Event? Explain the role of Event handler in AWT.	6 Marks	L1	CO3	PO1
	b)	Design and develop an Applet to receive the value of the parameter message from the html file and display it on the webpage.	6 Marks	L3	CO3	PO5
		(OR)				
10.	a)	Construct an anonymous inner class for handling mouse entered events into an Applet.	6 Marks	L3	CO3	PO3
	b)	List and explain any three Swing GUI components.	6 Marks	L2	CO3	PO1

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What are zeolites? Explain the zeolite process. List the advantages and disadvantages of zeolite process.	10 Marks	L2	CO1	PO1
	b)	"Reverse osmosis is advantageous over ion-exchange process" for desalination of brackish water. Justify the statement.	4 Marks	L3	CO1	PO1
		(OR)				
2.	a)	What are boiler troubles? Why they are caused? How the boiler corrosion can be avoided?	8 Marks	L1	CO1	PO1
	b)	Define potable water. List any six WHO and BIS standards of portable water.	6 Marks	L1	CO1	PO6
		UNIT-II				
3.	a)	Derive Schrodinger wave equation and explain the significance of ψ and ψ^2.	7 Marks	L3	CO2	PO1
	b)	Construct molecular energy level diagram of O_2 molecule and predict its magnetic behavior and bond order.	7 Marks	L3	CO2	PO2
		(OR)				
4.		Explain the π-molecular orbital diagram of benzene and 1, 3-butadiene.	14 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Discuss the construction and working of Li-ion batteries with chemical reactions occurring during charging and discharging process and their applications.	8 Marks	L2	CO3	PO1
	b)	Define Reference electrode and write a brief note on Calomel electrode.	6 Marks	L1	CO3	PO1
		(OR)				
6.	a)	Explain how Impressed currant cathodic protection can provide protection against corrosion.	7 Marks	BL2	CO3	PO2
	b)	Discuss about galvanic corrosion with examples.	7 Marks	BL2	CO3	PO1
		UNIT-IV				
7.	a)	Write a short note on the following: i) Batho chromic shift. ii) Chromophore.	8 Marks	L1	CO4	PO1
	b)	Explain the basic principle of UV-Visible spectroscopy. What are the possible electronic transitions?	6 Marks	L2	CO4	PO1
		(OR)				
8.		Discuss the working principle and applications of Transmission Electron Microscope. List the differences between SEM and TEM.	14 Marks	L2	CO4	PO1

UNIT-V

9.	a)	What are the advantages of catalytic cracking process? Describe the fixed-bed catalytic cracking process with neat diagram.	8 Marks	L2	CO5	PO1
	b)	Calculate the HCV and NCV of coal sample containing 85% of carbon, 1.5% of sulphur, 0.6% of nitrogen, 8% of hydrogen and 8.4% of oxygen.	6 Marks	L3	CO5	PO2
		(OR)				
10.	a)	What are the different types of mechanisms of lubrication? Explain mechanism of thick and thin film lubrication.	8 Marks	L2	CO5	PO1
	b)	List out different functions of lubricants.	6 Marks	L1	CO5	PO1

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the necessary theory to determine the wavelength of a light using Newton's ring method.	10 Marks	L2	CO1	PO2
	b)	In a Newton's rings experiment the diameter of the 8^{th} ring was 0.35cm and the diameter of 18^{th} ring was 0.65cm. If the wavelength of light used is 6000 **Å** then find the radius of curvature of the plano-convex lens.	4 Marks	L1	CO1	PO2
		(OR)				
2.	a)	Describe the construction and working of a Nicol's Prism.	10 Marks	L2	CO1	PO2
	b)	The refractive indices of mica for ordinary and extraordinary rays are 1.586 and 1.592 with a wavelength of 5460 **Å**. Predict the thickness of mica sheet to act as a quarter wave plate.	4 Marks	L3	CO1	PO2
		UNIT-II				
3.	a)	Outline the divergence and curl of electric and magnetic fields.	6 Marks	L2	CO2	PO1
	b)	Identify the four Maxwell's field equations along with their physical significance.	8 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Using a block diagram, explain the optical fibre communication system.	10 Marks	L2	CO2	PO2
	b)	Outline the various applications of optical fibres.	4 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Recall the intrinsic and extrinsic semiconductors.	4 Marks	L1	CO3	PO1
	b)	Derive an expression for density of electrons in intrinsic semiconductors.	10 Marks	L3	CO3	PO2
		(OR)				
6.	a)	State Hall effect. Derive an expression for Hall coefficient. Mention its applications.	10 Marks	L3	CO3	PO2
	b)	Differentiate the direct and indirect band gap semiconductors.	4 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Develop the theory and expression for internal field experienced by an atom in a dielectric material.	10 Marks	L3	CO4	PO2
	b)	List any four applications of dielectric materials in various fields.	4 Marks	L1	CO4	PO1
		(OR)				
8.	a)	Extend the theory of hysteresis in ferro-magnetic materials.	7 Marks	L2	CO4	PO1
	b)	Distinguish between soft and hard magnetic materials.	7 Marks	L4	CO4	PO1
		UNIT-V				
9.	a)	Explain Meissner effect. How it is used to classify Type-I and Type-II superconductors?	10 Marks	L2	CO5	PO2
	b)	List any four applications of superconductors.	4 Marks	L1	CO5	PO1
		(OR)				
10.	a)	Discuss the physical, optical and magnetic properties of nonmaterial's.	7 Marks	L2	CO5	PO1
	b)	Describe the pulsed laser deposition technique to synthesize nonmaterial's.	7 Marks	L2	CO5	PO2

APPLIED PHYSICS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Classify the optical fibresbased on refractive index profile and modes of propagation with neat sketch.	10 Marks	L3	CO1	PO1
	b)	Calculate the angle of acceptance and critical angle of a given optical fiber whose refractive indices of core and cladding regions are 1.565 and 1.492 respectively.	4 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Discuss the double crucible technique to fabricate optical fiber.	8 Marks	L2	CO1	PO1
	b)	What is a sensor? Explain the constructions of displacement sensor.	6 Marks	L3	CO1	PO1
		UNIT-II				
3.	a)	Explain the following terms: Reverberation, Reverberation time and Absorption coefficient.	6 Marks	L2	CO2	PO1
	b)	List the requirements of an acoustic good hall. Explain how these requirements can be achieved.	8 Marks	L1	CO2	PO2
		(OR)				
4.	a)	Define ultrasonic sounds. Describe the piezoelectric method for their production.	10 Marks	L2	CO2	PO1
	b)	Recall the various methods to identify the ultrasonic sounds.	4 Marks	L3	CO2	PO1
		UNIT-III				
5.	a)	Sketch the displacement-time curve, velocity-time curve and acceleration-time curve of a body in rectilinear motion.	8 Marks	L2	CO3	PO1
	b)	Distinguish between rectilinear motion and curvilinear motion of a body.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Derive an expression for work-energy theorem for translation body.	8 Marks	L1	CO3	PO1
	b)	Summarize the following: Work, Power and energy with units.	6 Marks	L2	CO3	PO2
		UNIT-IV				
7.	a)	Discuss the rectilinear motion of heat along a uniform bar.	7 Marks	L2	CO4	PO1
	b)	Elaborate the terms conduction, convection and radiation.	7 Marks	L3	CO4	PO1
		(OR)				
8.	a)	Define thermal conductivity and derive an expression for coefficient of thermal conductivity.	7 Marks	L2	CO4	PO1
	b)	Derive the equation for the heat conduction through compound media in series combination.	7 Marks	L3	CO4	PO2
		UNIT-V				
9.	a)	Explain the preparation of metallic glasses by Radio Frequency sputtering technique.	10 Marks	L2	CO5	PO1
	b)	Write various applications of shape memory alloys.	4 Marks	L3	CO5	PO1
		(OR)				
10.	a)	What are the shape memory alloys and outline the properties of NiTi alloy.	7 Marks	L2	CO5	PO1
	b)	List the different types of composites and give their applications.	7 Marks	L1	CO5	PO1

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Discuss the role of Nonverbal communication in present generation.	7 Marks	L2	CO1	PO1
	b)	Explain different types of listening based on purpose and output.	7 Marks	L2	CO2	PO2
		(OR)				
2.		Discuss the methods of conveying messages verbally.	14 Marks	L 2	CO1	PO1
		UNIT-II				
3.		Analyze the correlation between listening and taking notes. Give a few tips for effective note-taking.	14 Marks	L4	CO2	PO2
		(OR)				
4.	a)	"Ears get better results than mouth." Discuss.	7 Marks	L2	CO2	PO2
	b)	The people around you probably feel that you don't pay attention to them when they talk to you, and they may feel that you don't understand them. Illustrate.	7 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	How do you deal with stage fright and narrate a personal experience?	7 Marks	L2	CO2	PO1
	b)	Which is more important – Content or Delivery? Differentiate.	7 Marks	L2	CO2	PO1
		(OR)				
6.		Even if you have good vocabulary and grammar, you are still in a cuff to speak in public. Discuss.	14 Marks	L2	CO2	PO2
		UNIT-IV				
7.		What is your reading comfort zone and how do you use SQ3R Reading technique?	14 Marks	L3	CO3	PO5
		(OR)				
8.	a)	Illustrate what logics would you suggest to identify the Topic Sentence in a paragraph.	7 Marks	L3	CO3	PO5
	b)	What skills are involved in critical reading? Explain briefly.	7 Marks	L2	CO3	PO5
		UNIT-V				
9.		"Technical writing creates bias based on race, nationality, culture or gender." Illustrate.	14 Marks	L2	CO3	PO2
		(OR)				
10.	a)	How can you develop your technical writing skills?	7 Marks	L1	CO3	PO1
	b)	What is Plagiarism? Give some suggestions to avoid it.	7 Marks	L1	CO3	PO1

TRANSFORMATION TECHNIQUES AND LINEAR ALGEBRA

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Computer Science and Engineering, Electronics and Instrumentation Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science), Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Examine, whether the function $f(x)=\|x\|\ in -\pi<x<\pi$ is even or odd and obtain Fourier series for the same.	5 Marks	L4	CO1	PO2
	b)	Find the Fourier transform of $f(x)=\begin{cases} a-\|x\|, & \|x\|<a \\ 0, & \|x\|>a>0 \end{cases}$ and hence find the value of the integral $\int_0^\infty \left(\frac{\sin t}{t}\right)^2 dt.$	9 Marks	L1	CO1	PO1

(OR)

2.	a)	Establish Fourier cosine series for the function $f(x)=\begin{cases} \cos x, & 0<x<\frac{\pi}{2} \\ 0, & \frac{\pi}{2}<x<\pi \end{cases}$.	7 Marks	L1	CO1	PO1
	b)	Find the Fourier cosine transform of $f(x)=e^{-x^2}$.	7 Marks	L1	CO1	PO1

UNIT-II

3.	a)	Applying Laplace transform, evaluate $\int_0^\infty \frac{e^{-t}-e^{-2t}}{t}\,dt.$	7 Marks	L3	CO2	PO2
	b)	Find $f(x)=e^{-x^2}$.	7 Marks	L1	CO2	PO1

(OR)

4.	a)	Determine Laplace transform of $t\sin at$ by using transformation of derivatives.	7 Marks	L3	CO2	PO2
	b)	Find the Laplace transform of $g(t)$, where $g(t)=\begin{cases} \cos\left(t-\frac{\pi}{3}\right), & if\ t>\frac{\pi}{3} \\ 0, & if\ t<\frac{\pi}{3} \end{cases}$.	7 Marks	L1	CO2	PO1

UNIT-III

5.		Solve the differential equation $(D^2+1)y=\sin t \sin 2t$, given that $y(0)=1,\ y'(0)=0$ using Laplace transforms.	14 Marks	L3	CO2	PO2

(OR)

6.	a)	Find $L^{-1}\left\{\frac{1}{(s^2+a^2)^2}\right\}$.	7 Marks	L1	CO2	PO1
	b)	Applying convolution theorem, evaluate $L^{-1}\left\{\frac{s^2}{(s^2+a^2)^2}\right\}$.	7 Marks	L5	CO2	PO2

UNIT-IV

7.		Identify the values of λ for which the system of equations $x+y+z=1,\ x+2y+4z=\lambda,\ x+4y+10z=\lambda^2$ is consistent and solve them completely.	14 Marks	L3	CO3	PO2

(OR)

8.	a)	Determine the characteristic roots of A and A^{-1} where $A=\begin{pmatrix}-2 & 2 & -3\\ 2 & 1 & -6\\ -1 & -2 & 0\end{pmatrix}$.	7 Marks	L3	CO3	PO2
	b)	Find the rank of the matrix $A=\begin{bmatrix}2 & 1 & 3 & 5\\ 4 & 2 & 1 & 3\\ 8 & 4 & 7 & 13\\ 8 & 4 & -3 & -1\end{bmatrix}$ by reducing it into echelon form.	7 Marks	L1	CO3	PO2

UNIT-V

9.	a)	Examine, whether the vectors $\begin{bmatrix}1\\-2\\1\end{bmatrix}, \begin{bmatrix}2\\1\\-1\end{bmatrix}$ *and* $\begin{bmatrix}7\\-4\\1\end{bmatrix}$ are linearly independent or not.	5 Marks	L4	CO2	PO2
	b)	Find the rank and nullity of the linear transformation $T:W\to P_2$ *by* $T\begin{bmatrix}a & b\\ b & c\end{bmatrix}=(a-b)+(b-c)x+(c-a)x^2$, where W is the vector space of all 2 x 2 symmetric matrices and P_2 be the vector space of all polynomials of degree at most 2 over real numbers.	9 Marks	L1	CO2	PO1

(OR)

10.	a)	Show that the set $\{(2,1,4),(1,-1,2),(3,1,-2)\}$ forms a basis of $R^3(R)$.	5 Marks	L2	CO4	PO1
	b)	Let P_n be the vector space of all polynomials of degree at most *n* over R. Determine the matrix of the linear transformation $T:P_2\to P_3$ defined by $T(p(x))=p(2x-1)$ with respect to the basis $B=\{1,x,x^2\}$, *where* $p(x)\in P_2$.	9 Marks	L3	CO4	PO2

BASIC ELECTRICAL AND ELECTRONICS ENGINEERING

[Civil Engineering, Computer Science and Business Systems]

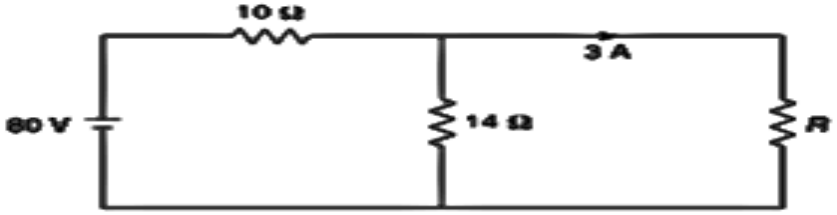
Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Determine the current flowing through 5Ω resistor shown in figure.	7 Marks	L3	CO1	PO2

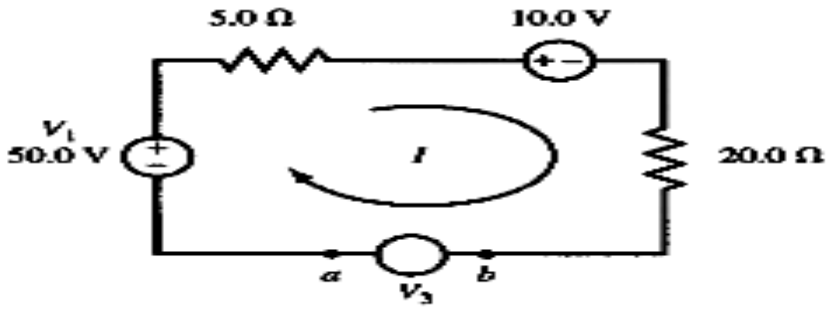
	b)	Determine the current delivered by the source and value of unknown resistance *R* for the given network.	7 Marks	L3	CO1	PO2



(OR)

2.	a)	The voltage drop across 15 Ω resistor is 30 V, having the polarity indicated. Find the value of *R* for the given circuit.	7 Marks	L3	CO1	PO2

	b)	Find V_3 and its polarity if the current *I* in the circuit of Fig is 0.40 A.	7 Marks	L3	CO1	PO2



UNIT-II

3.	a)	With the help of neat sketch, describe the operation of clean environmental method for sustainable energy generations also mention its advantage and disadvantages.	11 Marks	L2	CO2	PO7
	b)	Explain the objective and significance of BEE standard and norms which needs to be followed while rating an appliance.	3 Marks	L2	CO2	PO8
		(OR)				
4.	a)	Mention the difference between fuse and circuit breaker.	4 Marks	L2	CO2	PO2
	b)	With neat sketch, explain the operation of coal fired power plant. Also, discuss its impact on environment.	7 Marks	L2	CO2	PO7
	c)	Define Energy Efficiency Ratio. Also, mention the electrical products listed under mandatory labeling.	3 Marks	L2	CO2	PO8

UNIT-III

5.	a)	Explain the constructional features of a three phase induction motor.	7 Marks	L2	CO3	PO1
	b)	Derive the expression for EMF equation of single phase transformer.	7 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Explain the constructional details and working of single phase resistor start induction motor.	7 Marks	L2	CO3	PO1
	b)	Explain the constructional details of permanent magnet DC motor and mention any one application.	7 Marks	L2	CO3	PO1

UNIT-IV

7.	a)	Sketch the VI characteristics of PN junction diode.	7 Marks	L2	CO4	PO1
	b)	Explain how the zener diode acts as a voltage regulator.	7 Marks	L1	CO4	PO1
		(OR)				
8.	a)	With the help of circuit diagram, explain the operation of half wave rectifier.	7 Marks	L2	CO4	PO1
	b)	Explain the input and output characteristics of a transistor in Common Base configurations.	7 Marks	L2	CO4	PO1

UNIT-V

9.	a)	Derive the expression for output voltage in inverting and non-inverting amplifier.	7 Marks	L2	CO4	PO1
	b)	Construct a circuit to realize $V_{out} = 10V_1 + 20V_2 - 5V_3$ using Op-Amp.	7 Marks	L3	CO4	PO2
		(OR)				
10.	a)	Examine and derive an expression for V_0 of the integrator circuit by using Op-Amp.	7 Marks	L2	CO4	PO1
	b)	Draw the circuit symbol of Op-Amp. Explain what is meant by inverting input and non-inverting input.	7 Marks	L2	CO4	PO1

ELECTRICAL CIRCUITS

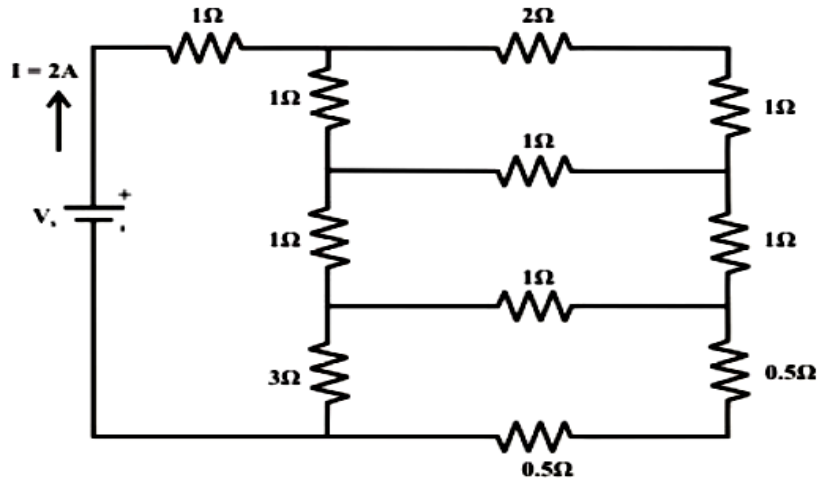
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

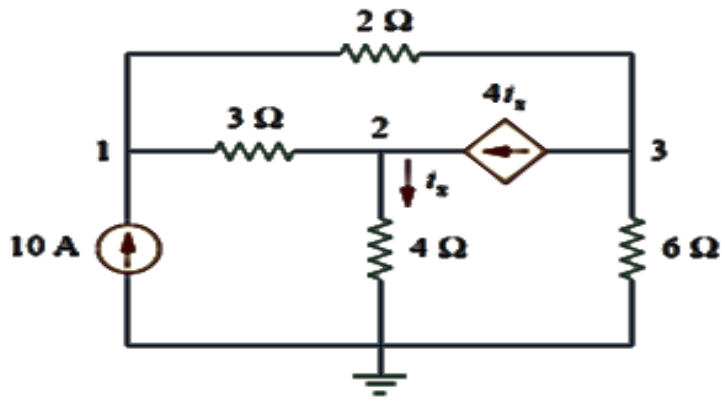
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) Find the value of the voltage source V_s that delivers 2 Amps current through the circuit as shown in figure. 7 Marks L3 CO1 PO2



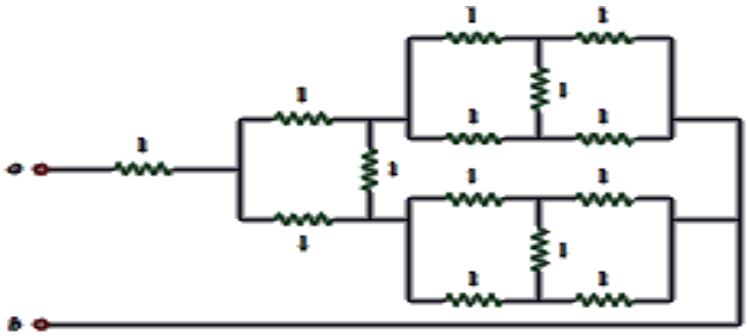
b) Find the voltages at the three non reference nodes in the circuit of figure. 7 Marks L4 CO1 PO2



(OR)

2. a) Using mesh analysis, find I_0 in the circuit shown in figure. 7 Marks L4 CO1 PO4

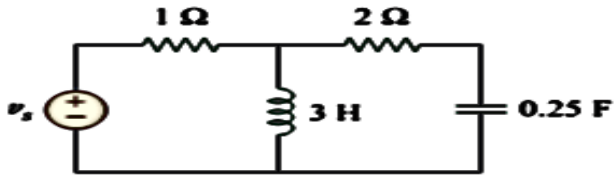
	b)	Find R_{ab} of the network shown in figure, Assume each element is 1Ω.	7 Marks	L3	CO1	PO2



UNIT-II

3.	a)	Determine the form factor of the wave form shown in figure.	7 Marks	L3	CO2	PO2

	b)	Assuming that $v_s = 16\cos(2t - 40^0)V$ in the circuit of shown in figure, find the average power delivered to each of the passive elements.	7 Marks	L3	CO2	PO2



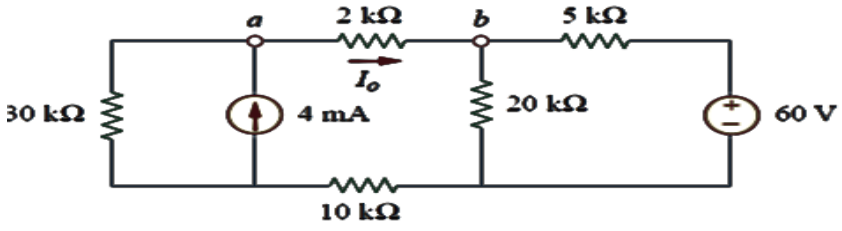
(OR)

4.	a)	Design an RLC series circuit with an impedance and quality factor at 107 rad/sec are (100+j0) Ω and 100 respectively.	7 Marks	L3	CO2	PO3
	b)	Design capacitance value if the value of L is 0.02 H of series RLC circuit has a bandwidth of 500 HZ and the quality factor is 15.	7 Marks	L3	CO2	PO3

UNIT-III

5.	a)	Determine the maximum power delivered to the load in the circuit shown in figure, using maximum power transfer theorem.	7 Marks	L3	CO3	PO5

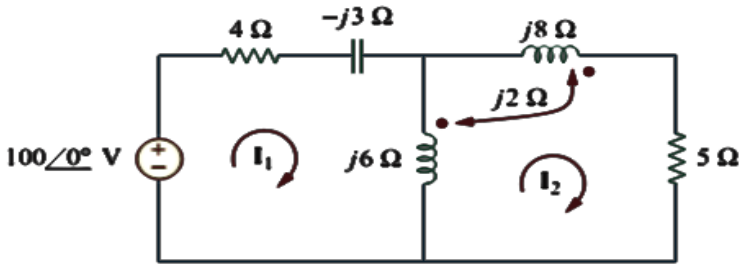
	b)	Consider the circuit in figure, an ammeter with internal resistance R_I is inserted between a and b to measure I0. Determine the reading of the ammeter if: R_I=500 Ω, 0 Ω using Thevenin's theorem.	7 Marks	L4	CO3	PO5



(OR)

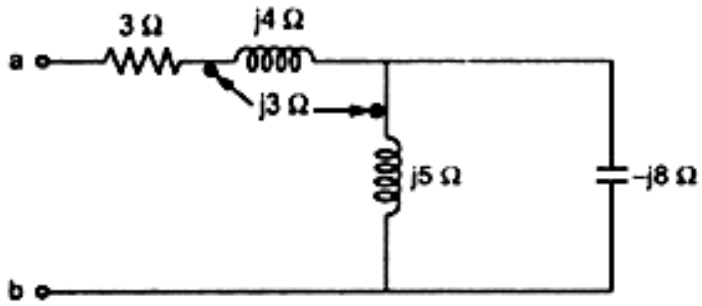
6.	a)	In the circuit shown below, find the voltage across the 20Ω resistor using Superposition Theorem. 	7 Marks	L3	CO3	PO5
	b)	Calculate the change in current of the network given below using compensation theorem when load resistor changes to 10 Ω. 	7 Marks	L3	CO3	PO5
		UNIT-IV				
7.	a)	The unbalanced delta-load shown in figure is supplied by balanced line-to-line voltages of 240 V in the positive sequence. Find the line currents. Take V_{ab} as reference. 	7 Marks	L3	CO4	PO2
	b)	Explain how a single wattmeter can be used to measure the reactive power with the help of circuit connection and derive the necessary equations.	7 Marks	L2	CO4	PO1
		(OR)				
8.	a)	A balanced delta-connected load of each phase impedance is $60\angle 30^0\ \Omega$ supplied with balanced delta-connected source has phase voltage $V_{ab} = 415\angle 30^0$ V. Find the line and phase currents.	7 Marks	L3	CO4	PO2
	b)	The two-wattmeter method produces wattmeter readings P_1 = 1560 W and P_2 = 2000 W when connected to a delta-connected load. If the line voltage is 220 V, calculate: i) The per-phase average power. ii) The per phase reactive power. iii) The power factor. iv) The phase impedance.	7 Marks	L3	CO4	PO2
		UNIT-V				
9.	a)	Derive the expressions for equivalent inductance of two coils in parallel with i) parallel aiding and ii) parallel opposition.	7 Marks	L2	CO5	PO1

b) Calculate the mesh currents shown in figure. 7 Marks L4 CO5 PO2



(OR)

10. a) For the coupled circuit shown in figure find the input impedance at the terminals ab 7 Marks L4 CO5 PO2



b) Determine the voltage V_0 in the circuit of figure. 7 Marks L4 CO5 PO2

NETWORK ANALYSIS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

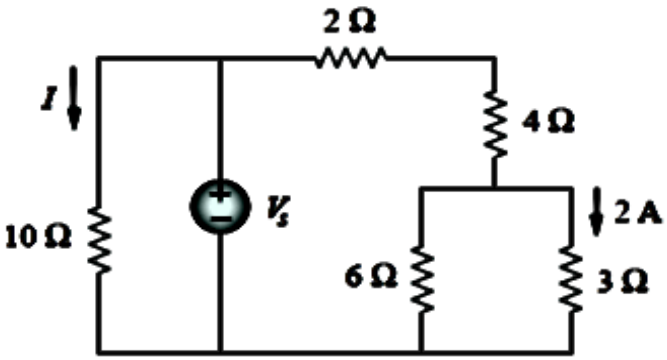
Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

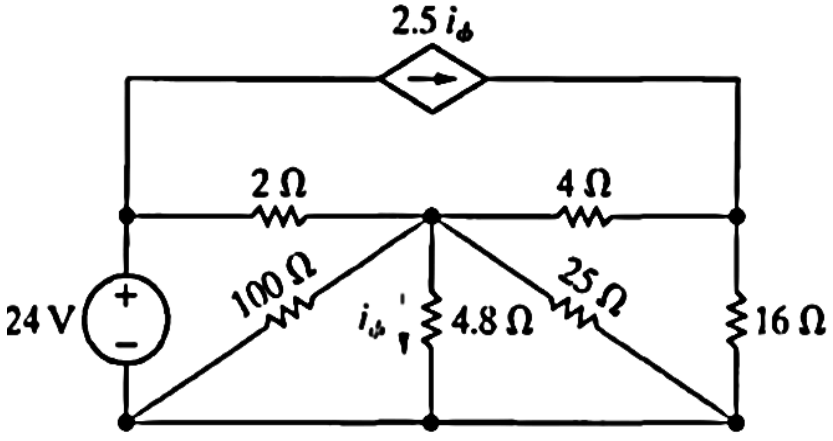
1.	a)	Determine the equivalent resistance between the terminals AB of the network shown in figure:	6 Marks	L2	CO1	PO2

	b)	Find *I* and *Vs* in the circuit shown in figure, if the current through the 3 Ohm resistor is 2 A.	8 Marks	L4	CO1	PO2



(OR)

2.	a)	Explain how voltage source with a source resistance can be converted into an equivalent current source.	6 Marks	L2	CO1	PO2
	b)	Determine thecurernt through 4.8 Ω resistance shown in figure using Nodal analysis.	8 Marks	L3	CO1	PO4



UNIT-II

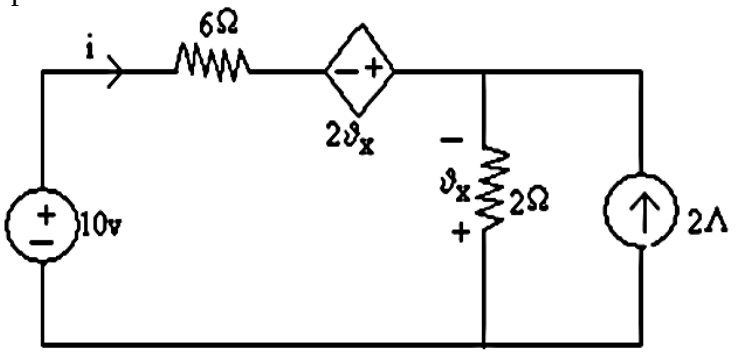
3.	a)	Draw the phasor representation of voltage and current for Resistor, inductor and capacitor with sinusoidal excitation.	6 Marks	L2	CO2	PO1
	b)	In an AC circuit source applied is *500sin(100t)* across series combination of 10Ω and 10 F, calculate source current flowing through circuit, form impedance and power triangle.	8 Marks	L4	CO2	PO2

(OR)

4.	a)	Draw the current loci for an RL Series circuit having constant reactance but variable resistance.	7 Marks	L2	CO2	PO2
	b)	A radio tuner having series RLC circuit is connected across a variable frequency supply and has R = 12 Ω, L = 1 mH and C = 1000 PF. Calculate resonant frequency, cut-off frequencies and Q factor of the tuner.	7 Marks	L3	CO2	PO6

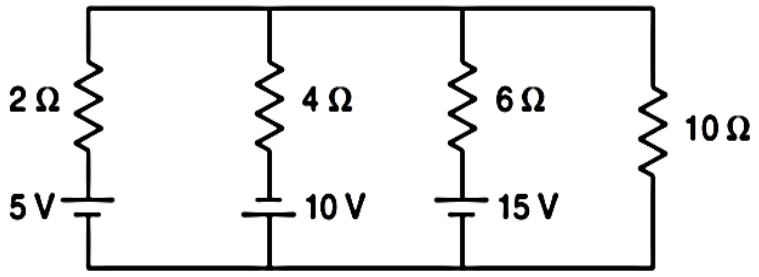
UNIT-III

5.	a)	State and explain Maximum power transfer theorem and derive the necessary conditions for maximum power transfer for a DC excitations.	7 Marks	L2	CO3	PO1
	b)	Find the current **i** in the circuit shown in figure using superposition theorem.	7 Marks	L3	CO3	PO5



(OR)

6.	a)	State and explain Millman's theorem.	6 Marks	L1	CO3	PO1
	b)	Find the current through load resistance 10Ω and also find the voltage drop across load using Millman's theorem. as shown in figure:	8 Marks	L3	CO3	PO5



UNIT-IV

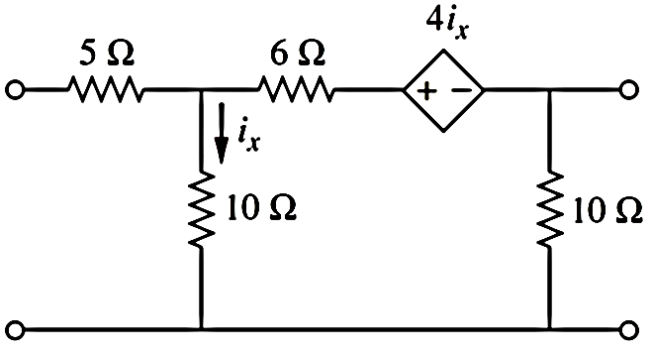
7.	a)	Distinguish between transient response and steady state response of a circuit.	6 Marks	L2	CO4	PO2
	b)	A series RC circuit with R = 50Ω and C = 2 micro farad has a sinusoidal voltage source *V = 150 Sin(500t φ+π/3)* volts applied at a time when φ=0. Find the expression for the total current. Use Laplace transforms method.	8 Marks	L3	CO4	PO5

(OR)

8.	a)	Define a time constant and derive its expression for a RC circuit excited with DC.	6 Marks	L2	CO4	PO1
	b)	A series RLC circuit with R=2 ohms, L=1H and C= 1F has a sinusoidal voltage source *v(t) = 250Sin(500t)* applied at time t=0. Determine the transient current i(t) using time domain approach. Assume zero initial conditions.	8 Marks	L3	CO4	PO2

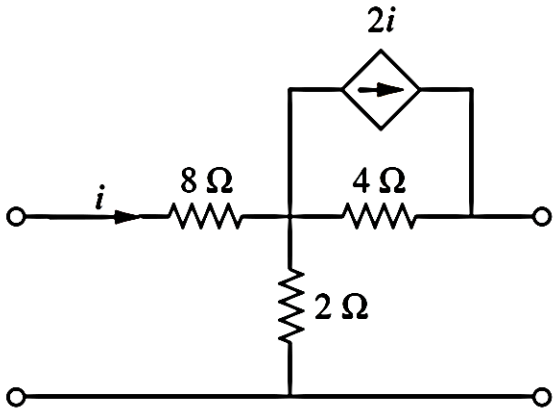
UNIT-V

9.	a)	Express *h* parameters in terms of admittance parameters for a generalized network.	7 Marks	L2	CO5	PO1
	b)	Find the *h* parameters of the network in figure. Invistigate whether the netwok is symmetrical and reciprocal.	7 Marks	L4	CO5	PO4



(OR)

10.	a)	Define reciprocity and symmetry for a generalized two port network and derive the conditions for reciprocity and symmetry in terms of Z parameters.	7 Marks	L2	CO5	PO1
	b)	Determine the y parameters for the two-port shown in figure. Invistigate whether the netwok is symmetrical and reciprocal.	7 Marks	L4	CO5	PO4



CODE No.: 20BT20301 **SVEC-20**

BASIC ENGINEERING MECHANICS

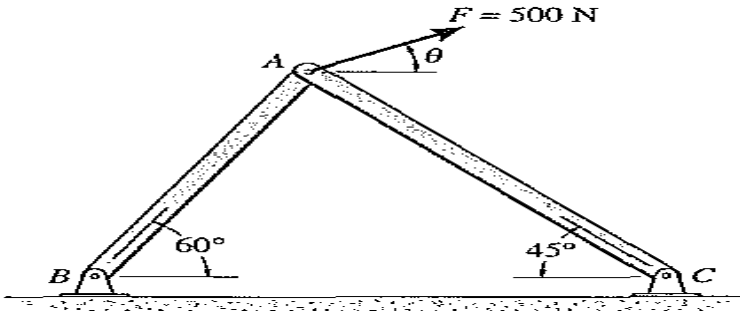
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

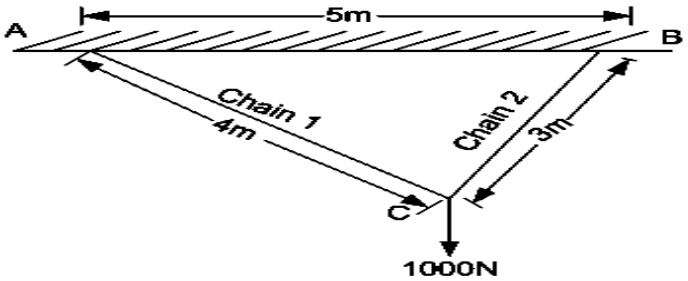
UNIT-I

1.	a)	Discuss the following terms with suitable examples: i) Coplanar forces. ii) Concurrent forces. iii) Parallel forces. iv) Non parallel forces.	7 Marks	L4	CO1	PO1
	b)	The 500N force acting on the frame is to be resolved into two components acting along the axis of the struts AB and AC as shown in Fig. If the component of force along AC is required to be 300 N, directed from A to C, determine the magnitude of force acting along AB and the angle q of the 500 N forces.	7 Marks	L4	CO1	PO1 PO2



(OR)

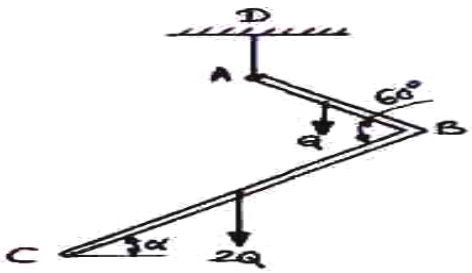
2.	a)	State and prove Lami's theorem.	7 Marks	L4	CO1	PO1
	b)	A weight of 1000 N is supported by two chains of lengths 4 m and 3 m as shown in Fig. Determine the tension in each chain.	7 Marks	L4	CO1	PO1 PO2



UNIT-II

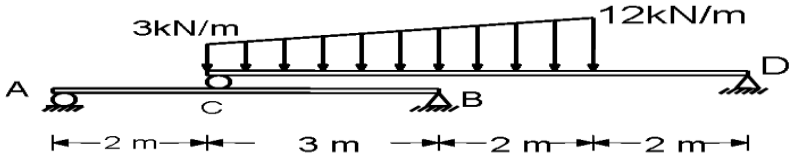
3.	a)	A beam AB of span 6m is hinged at A and supported on rollers at end B and carries load as shown in Fig. Determine the reactions at A and B.	7 Marks	L4	CO1	PO1 PO2

	b)	Two prismatic bars AB and BC of lengths 'L' and '2L' respectively are rigidly joined at B and suspended by string AD as shown in fig. Determine the position of equilibrium as defined by the angle 'α', that the bars will assume under the action of the weights 'Q' and '2Q'.	7 Marks	L4	CO1	PO1 PO2



(OR)

4.	a)	Bring out the differences among perfect, deficient and redundant trusses.	7 Marks	L4	CO1	PO1
	b)	Calculate reactions at A, B, C and D as shown in the given figure.	7 Marks	L4	CO1	PO1 PO2



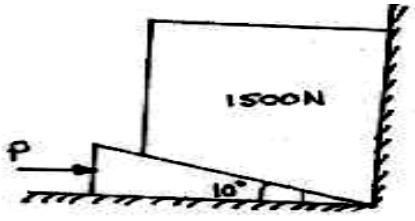
UNIT-III

5.	a)	Two blocks, connected by a horizontal link AB are supported on two rough planes as shown in figure. The coefficient for friction of block A on the horizontal plane is μ = 0.4. The angle of friction for block B on the inclined plane is μ =0.15. What is the smallest weight W of block A for which equilibrium of the system can exist?	10 Marks	L4	CO1	PO1 PO2

	b)	State the laws of dry friction.	4 Marks	L4	CO1	PO1

(OR)

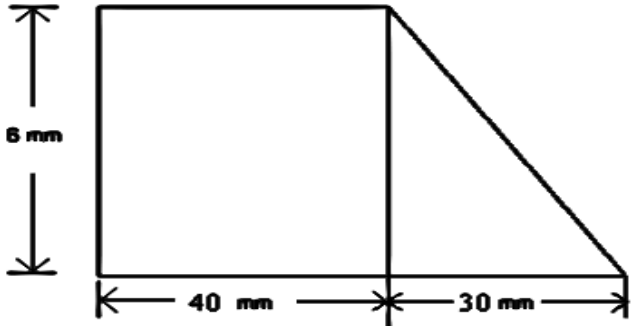
6.	a)	Explain the following terms: i) Friction. ii) Angle of friction. iii) Limiting friction. iv) Cone of friction.	7 Marks	L4	CO1	PO1
	b)	A block overlying a 100 wedge on a horizontal floor and leaning against a vertical wall and weighing 1500N is to be raised by applying a horizontal force to the wedge. Assuming the coefficient of friction to be 0.3, determine the minimum horizontal force to be applied to raise the block as shown in the Figure.	7 Marks	L4	CO1	PO1 PO2



UNIT-IV

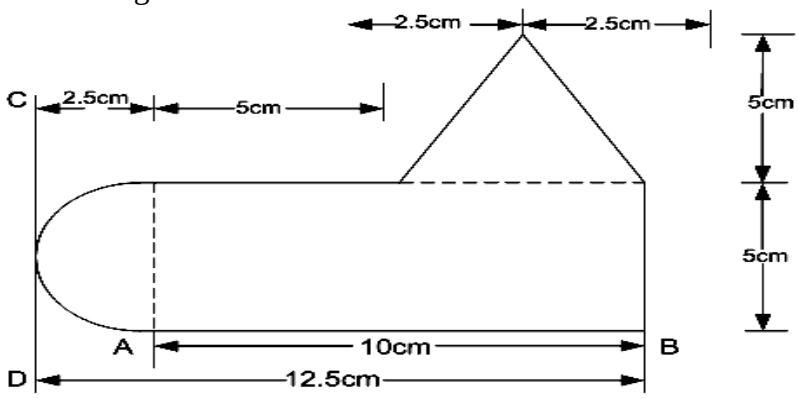
7.	a)	Find the area moment of inertia about the centroidal axes of the plane area shown in fig. Also find the section modulus.	7 Marks	L4	CO2	PO1 PO2

	b)	Find the centroid of the plane area shown in figure	7 Marks	L4	CO2	PO1 PO2



(OR)

8.	a)	State and prove theorems of Pappus–Guldinus.	7 Marks	L4	CO2	PO1
	b)	Determine the centre of gravity of the plane uniform lamina shown in Fig.	7 Marks	L4	CO2	PO1 PO2



UNIT-V

9.	a)	State and explain D'Alembert's principle.	7 Marks	L4	CO3	PO1
	b)	A lift carries a weight of 1000N and is moving with a uniform acceleration of 1.962 m/sec^2. Calculate the tension in the cables supporting the lift, when i) lift is moving upward, and ii) lift is moving downward.	7 Marks	L4	CO3	PO1 PO2

(OR)

10.	a)	A motor of mass 200 kg is supported by four springs, each having a constant of 150 kN/m. The unbalance of the rotor is equivalent to a mass of 30 g located 150 mm from the axis of rotation. Knowing that the motor is constrained to move vertically, determine: i) The speed in rpm at which resonance will occur. ii) The amplitude of the vibration of the motor at a speed of 1200 r.p.m.	7 Marks	L4	CO4	PO1 PO2
	b)	Find amplitude and time period of a particle moving with simple harmonic motion, which has a velocity of 9 m/s and 4 m/s at the distance of 2 m and 3 m respectively from the centre.	7 Marks	L4	CO4	PO1 PO2

CODE No.: 20BT20501 **SVEC-20**

DIGITAL LOGIC DESIGN

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science)]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Convert the following numbers with the indicated bases to decimal: i) $(4310)_8$. ii) $(19AF)_{16}$.	7 Marks	L3	CO1	PO1
	b)	Explain the properties of Boolean Algebra with example.	7 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Simplify the following Boolean expressions to a minimum number of literals: i) $xy + x(wz+wz')$. ii) $xy' + y'z' + x'z'$.	7 Marks	L3	CO1	PO2
	b)	Compute dual and complement of the following Boolean expressions. i) $AB+A(B+C)+B'(B+D)$ ii) $A+B+A'B'C$	7 Marks	L3	CO1	PO2
		UNIT-II				
3.	a)	Simply the following Boolean Function using four-variable k-maps. $F\ A, B, C, D) = \Sigma(2, 3, 6, 7, 12, 13, 14) + d(0, 1, 8)$	7 Marks	L4	CO2	PO2
	b)	Draw the logic diagram for the Boolean expression using AND, OR gates. $F = x\ (y'+ z)\ (x' + y + z')$	7 Marks	L4	CO2	PO3
		(OR)				
4.	a)	Obtain the truth table for the following functions and express each function in sum of minterms and product of max terms: i) $(xy + z)\ (y + xz)$. ii) $(A'+ B)\ (B'+ C)$. iii) $y'z+wxy'+wxz'+w'x'z$.	7 Marks	L4	CO2	PO2
	b)	Minimize the expression using K-map and realize using only NAND gates. $F\ (A, B, C, D) = \sum (0, 1, 2, 9, 11)$ and don't care conditions $d\ (A, B, C, D) = (8, 10, 14, 15)$	7 Marks	L4	CO2	PO3
		UNIT-III				
5.	a)	Design a combinational circuit that converts decimal to Gray code.	7 Marks	L4	CO3	PO3
	b)	Define Multiplexer. Implement the following Boolean function using a suitable Multiplexer. **F(A, B, C, D)=∑(0, 1, 3, 4, 8, 9, 15).**	7 Marks	L4	CO3	PO3
		(OR)				

6.	a)	Design a 4-bit Magnitude comparator.	9 Marks	L4	CO3	PO3
	b)	Describe the function of an encoder and list its applications.	5 Marks	L2	CO3	PO1

UNIT-IV

7.	a)	Explain the circuit diagram of a S-R flip-flop using 2-input NOR gates.	7 Marks	L2	CO3	PO1
	b)	Draw a 3-bit parallel load register. Use D flip flops and explain its operation.	7 Marks	L2	CO3	PO1

(OR)

8.	a)	Design a 4-bit ripple counter using T flip-flops.	7 Marks	L4	CO3	PO3
	b)	Draw and explain 4-bit shift register with an example.	7 Marks	L2	CO3	PO1

UNIT-V

9.		Implement the following two Boolean functions with a PLA: ***F1(A, B, C) = Σm(0, 1, 2, 4)*** ***F2(A, B, C) = Σm(0, 5, 6, 7)***	14 Marks	L4	CO4	PO3

(OR)

10.	a)	Explain in detail the addressing scheme of 1K x 16 memory with the help of a neat diagram.	10 Marks	L2	CO4	PO5
	b)	Compare SRAM and DRAM memories.	4 Marks	L4	CO4	PO2

CODE No.: 20BT20541 **SVEC-20**

PROGRAMMING IN C AND DATA STRUCTURES

[Civil Engineering, Electrical and Electronics Engineering, Mechanical Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What is the use of variable? Why they are needed?	7 Marks	L2	CO2	PO1
	b)	What are the various symbols used to construct a flow chart?	7 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Describe relational, logical and bitwise operators in detail with examples.	7 Marks	L2	CO2	PO1
	b)	Write an algorithm to accept two numbers, compute the sum and print the result.	7 Marks	L3	CO1	PO2
		UNIT-II				
3.	a)	Write a C program to evaluate whether the given year is leap year or not.	7 Marks	L3	CO2	PO3
	b)	Ramesh's basic salary is input through the keyboard. His dearness allowance is 40% of basic, house rent allowance is 20% of basic salary. Write a C program to calculate his gross salary.	7 Marks	L4	CO2	PO3
		(OR)				
4.	a)	When it is required to execute set of statements repeatedly, what is the C construct helping us to implement it? Explain for loop and while loop with example.	7 Marks	L2	CO2	PO1
	b)	The factorial of a positive number n is given by: factorial of n. (n!) = 1*2*3*4....n. write a C Program to find a factorial of a number using do…while construct.	7 Marks	L3	CO2	PO3
		UNIT-III				
5.	a)	Write a C program to display the 4th element and 7th element from a list of elements in an array.	7 Marks	L3	CO3	PO3
	b)	Write a program to retrieve a string from a set of strings.	7 Marks	L4	CO3	PO3
		(OR)				
6.	a)	Write a C program to sort the given array elements in Ascending order.	7 Marks	L4	CO3	PO3
	b)	Distinguish between the following: i) Actual and formal arguments. ii) Global and local variables. iii) Automatic and static variables.	7 Marks	L3	CO3	PO2
		UNIT-IV				
7.	a)	Write a C program to illustrate the use of indirection operator to access the value pointed by a pointer.	7 Marks	L2	CO3	PO1
	b)	Develop a C program to store the data of different types using Structures.	7 Marks	L3	CO3	PO2
		(OR)				

8.	a)	Develop a C program to store the address of a variable using Pointers.	7 Marks	L2	CO3	PO2
	b)	Explain the concept of linked list in detail with an example.	7 Marks	L2	CO3	PO1

UNIT-V

9.	a)	Write a C program to implement stack and its various operations.	7 Marks	L4	CO3	PO4
	b)	Construct the step by step procedure to sort the given list of elements using Bubble sort { 54, 26, 93, 17, 77, 3, 44, 55, 20}.	7 Marks	L3	CO4	PO2

(OR)

10.	a)	Write a program to implement Queue by using arrays.	7 Marks	L4	CO3	PO4
	b)	Differentiate between the Linear search and Binary search.	7 Marks	L3	CO4	PO2

OBJECT ORIENTED PROGRAMMING THROUGH JAVA

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science), Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Compare and contrast visibility controls and also compare with each of them.	7 Marks	L4	CO1	PO2
	b)	"Java is platform independent". Justify.	7 Marks	L4	CO1	PO1
		(OR)				
2.	a)	Discuss about Command Line Arguments with an example program.	7 Marks	L2	CO1	PO1
	b)	List and explain any three features of Object Oriented Programming.	7 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Explain the final keyword with all its usages with an example program.	7 Marks	L2	CO1	PO1
	b)	Write a program to find the factorial of a given number using a while loop.	7 Marks	L3	CO2	PO4
		(OR)				
4.	a)	Elaborate on Wrapper Classes.	7 Marks	L2	CO1	PO1
	b)	Design a program to demonstrate all the decision making statements.	7 Marks	L3	CO3	PO3
		UNIT-III				
5.	a)	Develop a java program to implement functional interfaces.	7 Marks	L3	CO3	PO3
	b)	Distinguish between abstract classes and interfaces.	7 Marks	L4	CO2	PO2
		(OR)				
6.	a)	Classify different types of Inheritance in Java.	7 Marks	L2	CO2	PO1
	b)	What is a package? Explain it with an example and also write how to import packages.	7 Marks	L2	CO2	PO2
		UNIT-IV				
7.	a)	Explain the steps in creating a thread using a runnable interface.	7 Marks	L2	CO4	PO4
	b)	Design a java program that demonstrates how a high-priority thread using sleep makes way for the lower-priority threads to execute.	7 Marks	L3	CO4	PO3
		(OR)				
8.	a)	Construct a user-defined exception named check Argument to check the number of arguments passed through command line. If the number of arguments is less than five, throw the check Argument exception else print the addition of all the five numbers.	7 Marks	L2	CO3	PO3
	b)	Design a java program to perform the following on an Array List: i) Add an element. ii) Remove an element. iii) Trace the Array List.	7 Marks	L3	CO2	PO3

UNIT-V

9.	a)	Give an overview of : i) JText Field. ii) JPassword Field.	7 Marks	L2	CO1	PO1
	b)	Develop a program that receives an integer in one text field, and computes its factorial value and returns it in another text field, when the button named "Compute" is clicked using Swing GUI Components.	7 Marks	L4	CO5	PO2
		(OR)				
10.	a)	Develop a program to illustrate the role of adapter classes in Event Handling.	7 Marks	L3	CO5	PO3
	b)	List and explain about Mouse Listener Interfaces.	7 Marks	L2	CO3	PO1

DATA STRUCTURES AND ALGORITHMS

[Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Differentiate between linear search and binary search mechanisms using an example.	8 Marks	L2	CO2	PO2
	b)	Explain the following with examples. i) Space Complexity. ii) Time complexity.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Analyse the performance of insertion sort algorithm by taking an example.	7 Marks	L2	CO2	PO2
	b)	Perform selection sort on the following elements by writing a suitable algorithm: 15, 6, 18, 7, 19, 25, 46, 59, 67, 39, 96, 1, 3.	7 Marks	L3	CO2	PO5
		UNIT-II				
3.	a)	A Company has N employees and it maintains each employee data with the following attributes like: emp_id, emp-dept, emp_sal, emp_mobileno. Use a menu driven Program to perform following operations on employee's data using Doubly Linked List (DLL). i) Create a DLL of N Employees Data by using end insertion. ii) Perform Insertion and Deletion at End of DLL. iii) Exit.	8 Marks	L3	CO3	PO6
	b)	What is a double linked list? Write an algorithm to: i) Insert an element. ii) Delete an element from a circular linked list.	6 Marks	L2	CO3	PO2
		(OR)				
4.	a)	Explain the operations of Single Linked Lists.	7 Marks	L2	CO3	PO2
	b)	What is a circular linked list? Give an algorithm to delete an element from a circular linked list.	7 Marks	L2	CO3	PO2
		UNIT-III				
5.	a)	Convert the following infix expression to postfix expression ((a + ((b ∧c) - d)) * (e - (a / c))). **Note: Assume ∧ as an exponentiation operator.**	7 Marks	L3	CO4	PO3
	b)	Write a program to check whether a string is palindrome or not using stacks.	7 Marks	L3	CO4	PO5
		(OR)				
6.	a)	Write a program to implement Queues using arrays that perform enqueue, dequeue and display operations.	8 Marks	L2	CO4	PO2
	b)	Name the major drawback of a linear queue. Explain how to overcome it.	6 Marks	L2	CO4	PO2
		UNIT-IV				
7.	a)	Describe the process of deleting a node from an AVL tree with proper illustrations.	7 Marks	L2	CO5	PO2
	b)	Create a Binary Search Tree for the data items {23,14, 44,12,18,4,52,16,20,96,9,1,13} and explain the in-order traversal of the BST along with a recursive algorithm.	7 Marks	L3	CO5	PO2

(OR)

8.	a)	Construct the binary tree for the following expression. (A*(B-C))/((D-E)*(F+G-H)). **(Note: ignore parentheses in constructing binary tree).**	7 Marks	L3	CO5	PO2
	b)	For the following Binary Tree, calculate the pre-order and post-order traversals.  	7 Marks	L3	CO5	PO2

UNIT-V

9.	a)	Demonstrate insertion operation in B-tree of order 3 by using the following keys. {23, 46, 57, 89, 3, 4, 67, 194, 45, 2, 8}.	8 Marks	L3	CO5	PO2
	b)	Discuss the following with reference to graphs. i) Directed graph. ii) Undirected graph. iii) Acyclic Graph.	6 Marks	L2	CO5	PO1

(OR)

10.	a)	Write a program to implement Breadth First Search algorithm.	7 Marks	L4	CO5	PO2
	b)	What is Hashing? Explain different Hash functions used in the construction of Hash tables.	7 Marks	L2	CO6	PO2

II B.Tech I Semester (SVEC10) Supplementary Examinations February – 2021

STRENGTH OF MATERIALS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer any FIVE questions
All questions carry equal marks

1. a) State and explain Hooke's law.
b) A metallic rod of 1 cm diameter, when tested under an axial pull of 10 kN was found to reduce its diameter by 0.0003 cm. The modulus of rigidity for the rod is 51 kN/mm^2. Find the Poisson's ratio, modulus of elasticity and Bulk Modulus.

2. A simply supported beam of 10m Length carries a uniformly distributed load throughout the beam length. The supports of the beam are 6m apart. Determine the position of the supports with respect to the ends so that the bending moment of the beam is least possible.

3. a) What are the assumptions made in the theory of simple bending?
b) Derive flexure formula of beams.

4. Determine the shear stress generated in a rectangular section of a beam which is subjected to a shear force F.

5. a) Derive an expression that governs the theory of pure torsion.
b) A hollow circular shaft of external diameter 50mm and wall thickness 5mm transmits a torque of 10kN-m. Find the maximum shear stress induced in the shaft.

6. A cantilever of 4m span length carries a load 40 kN at its free end. If the deflection at the free end is not to exceed 8mm, what must be the moment of inertia of the Cantilever section?

7. Show that when a thin walled spherical vessel of diameter 'd' and thickness 't' is subjected to an internal pressure 'p', the increase in volume is equal to $\frac{\pi p d^4}{8tE}(1-\nu)$.

8. A compound cylinder is made by shrinking a cylinder of external diameter 200mm and internal diameter of 160mm over another cylinder of external diameter 160mm and internal diameter 120mm. The radial pressure at the junction after shrinking is 8 N/mm^2. Find the final stresses set up across the section when the compound cylinder is subjected to an internal fluid pressure of 60 N/mm^2.

SPECIAL FUNCTIONS AND COMPLEX ANALYSIS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Define beta and gamma functions and establish a relationship between them. 7 Marks

b) State Bessels differential equation and its solution $J_n(x)$. Show that $J_{1/2}(x) = \sqrt{\frac{2}{\pi x}} \sin x$. 7 Marks

(OR)

2 a) Show that $2^{2n-1}\Gamma(n)\left(n+\frac{1}{2}\right) = \Gamma(2n)\sqrt{\pi}$. 7 Marks

b) Show that $J_{3/2}(x) = \sqrt{\frac{2}{\pi x}}\left(\frac{1}{x}\sin x - \cos x\right)$. 7 Marks

UNIT-II

3 a) Show that $\left(\frac{\partial^2}{\partial x^2} + \frac{\partial^2}{\partial y^2}\right)\log|f'(z)| = 0$, where $f(z)$ is analytic function. 7 Marks

b) Find the an analytic function $f(z) = u + iv$, given that $\boldsymbol{u - v = (x - y)(x^2 + 4xy + y^2)}$. 7 Marks

(OR)

4 a) Show that the function $f(z) = \sqrt{|xy|}$ is not analytic at the origin, although C-R equations are satisfied at that point. 7 Marks

b) Find the analytic function $\boldsymbol{f(z) = u + iv}$ **if** $\boldsymbol{u = a(1 + Cos\theta)}$. 7 Marks

UNIT-III

5 a) Evaluate $\int_0^{2+i} z^2\,dz$ along the imaginary axis to i and then horizontally to 2 + i. 7 Marks

b) Evaluate $\int_C \frac{z^3 + z^2 + 2z - 1}{(z-1)^3} dz$ *where C is* $|z| = 3$ using Cauchy's integral formula. 7 Marks

(OR)

6 a) State Cauchy's theorem and verify it for the function $f(z) = z^2 + 3z - 2i$ *inside the circle* $|z| = 1$. 7 Marks

b) Write the Laurent series expansion of $f(z) = \frac{z^2 - 1}{(z+2)(z+3)}$, *for* $|z| > 3$. 7 Marks

UNIT-IV

7 a) Determine the poles and corresponding residues for the function f(z)= $\frac{z^2}{(z-1)(z-2)^2}$. 7 Marks

b) By the method of residues, evaluate $\int_0^{2\pi} \frac{d\theta}{1-2a\sin\theta+a^2}$ 0 <a<1. 7 Marks

(OR)

8 a) Calculate the value of $\oint_c \frac{z-3}{z^2+2z+5}$ dz where C is the circle |z+1+i 1=2. 7 Marks

b) Evaluate $\int_0^{\infty} \frac{dx}{(x^2+1)^2}$. 7 Marks

UNIT-V

9 a) Find the image of the infinite strip $\frac{1}{4} \le y \le \frac{1}{2}$ under the transformation w=$\frac{1}{z}$. 7 Marks

b) Find the Bilinear Transformation which maps the points z = l-i-1 in to the points w = i, 0, - i. 7 Marks

(OR)

10 a) Show that the Bilinear Transformation maps circles to circles. 7 Marks

b) Discuss about the transformation *w = Cosz*. 7 Marks

PROBABILITY AND STATISTICS

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) In a certain college 25% of boys and 10% of girls are studying mathematics. The girls contribute 60% of the student body. (i) What is the probability that mathematics is being studied? (ii) If a student is selected at random and is found to be studying mathematics, find the probability that the student is a girl. 7 Marks

b) X is a continuous random variable with probability density function given by 7 Marks

$$f(x) = \begin{cases} kx, & 0 \le x \le 2 \\ 2x, & 2 \le x \le 4 \\ k(6-x), & 4 \le x \le 6 \end{cases}$$

Determine: i) *k.* ii) mean. iii) variance.

(OR)

2 a) Define the following and illustrate with example. 6 Marks
i) Probability. ii) Mutually exclusive events. iii) Conditional event.

b) A random variable X has the following probability function: 8 Marks

X	0	1	2	3	4	5	6	7	8
P(X)	k/45	k/15	k/9	k/5	2k/45	6k/45	7k/45	8k/45	4k/45

Determine: i) *k* ii) $P(X < 4)$ iii) $P(X > 1)$ (iv) $P(2 < X < 7)$

UNIT-II

3 a) Derive mean and variance of Binomial Distribution. 7 Marks

b) Samples of (n=6) items are drawn at random from the production process which is making 10% defectives, calculate the probabilities of 0,1,2,3,4,5 and 6 defectives in a sample. 7 Marks

(OR)

4 a) Derive the mean and variance of normal distribution. 7 Marks

b) If x is a Poisson variable such that $p(x = 1) = 24\ p(x = 3)$, find the probability $p(x=0)$. 7 Marks

UNIT-III

5 a) Altoona Tire Company sells its ATC-50 tires with a 50,000-mile tread-life warranty. Loorie Ackerman, a quality control engineer with the company, runs simulated road tests to monitor the life of the output from the ATC-50 production process. From each of the last 10 batches of 1,000 tires, she has tested 5 tires and recorded the following results, with $\overline{X}$ and R measured in thousands of miles: 7 Marks

Batch	1	2	3	4	5	6	7	8	9	10
$\overline{X}$	50.5	49.7	50.0	50.7	50.7	50.6	49.8	51.1	50.2	50.4
R	1.1	1.6	1.8	0.1	0.9	2.1	0.3	0.8	2.3	1.3

i) Use the data above to help Lorrie construct a $\overline{X}$ chart.
ii) Is the production process in-control? Explain.

b) Calculate coefficient of correlation from the following data. 7 Marks

x	12	9	8	10	11	13	7
y	14	8	6	9	11	12	3

(OR)

6 a) The numbers of defective washers in a workshop of 20 samples containing 500 washers are 25, 30, 32, 28, 35, 27, 28, 30, 33, 35, 38, 40, 21, 26, 24, 40, 29, 28, 26, 38. Calculate the values for central line and the control units for P-Chart. 7 Marks

b) Calculate Karl Pearson's correlation coefficient for the following paired data 7 Marks

x	28	41	40	38	35	33	40	32	36	33
y	23	34	33	34	30	26	28	31	36	38

What inference would you draw from the estimate?

UNIT-IV

7 a) A population consists of five numbers 12, 32,40,51,60. Consider all samples of size two which can be taken without replacement from this population. Estimate: 8 Marks

i) The population mean.
ii) The population Standard deviation.
iii) The mean of the sampling distribution of means.
iv) Standard deviation of the sampling distribution of means.

b) A sample of size 81 was taken whose variance is 20.25 and means 32. Construct 95%. Confidence interval for the mean. 6 Marks

(OR)

8 a) When a sample is taken from an infinite population discuss about the standard error of the mean if the sample size is decreased from 800 to 200. 7 Marks

b) A sample of 100 electric bulbs produced by a manufacturer A showed a mean life time of 1190hrs and a standard deviation of 90 hrs. Another sample of 75 bulbs produced by a manufacturer B showed a mean life of 1230hrs with a S.D of 120hrs. Test the significance of the difference between the means at 99% level. 7 Marks

UNIT-V

9 a) A random sample of 10 boys had the following IQS 70, 120, 110, 101, 88, 83, 95, 98, 107, 100 Does this data support the assumption of population IQ of 100 (Tabulated value2.262 at 5% L.O.S) 7 Marks

b) Two independent random sample each of 8 individuals provide the following data. Estimate the variance ration and test the significance. 7 Marks

Sample –I	63	64	65	65	66	66	67	68
Sample-II	69	66	67	67	66	68	69	69

(tabulated each 3.80 at 5% L. O.S)

(OR)

10 a) Two Horses A and B were Tested according to the time (in seconds) to run a particular track with the following results. 7 Marks

Horse(A)	28	30	32	33	33	29	34
Horse(B)	29	30	30	24	27	29	-

Test whether the two Horses have the same running capacity. (Tabulated value 2.20 at 5% L.O.S).

b) Fit a Poisson distribution to the following data and test – the goodness of fit at 5% leave of significance. 7 Marks

X	0	1	2	3	4	5	6	7
F	305	366	210	80	28	9	2	1

MECHANICS OF SOLIDS

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Find the force 'P' acting at C in the bar shown in Fig.1. Find the extension of the bar if $E = 2x10^5$ MPa. 7 Marks

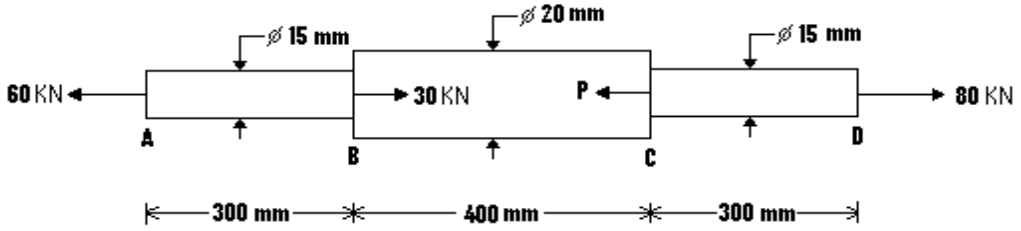

Fig.1.

b) A bar of 20 mm diameter is tested in tension. It is observed that when a load of 37.7 kN is applied, the extension measured over a gauge length of 200mm is 0.12mm and contraction in diameter is 0.0036mm. Find Poisson's ratio and Young's modulus. 7 Marks

(OR)

2 A round copper rod, 560mm long, has a diameter of 30mm over a length of 200mm, a diameter of 20mm over a length of 200mm and a diameter of 10mm over its remaining length. Determine the stresses in each section and elongation of the rod when it is subjected to a pull of 30 kN. Take E= 100kN/mm^2. 14 Marks

UNIT-II

3 Define the SF and BM at a section of a beam. Explain the utility of drawing SF and BM diagrams for a beam. Also obtain relationship between SF and BM. 14 Marks

(OR)

4 A simply supported beam of span 6 m carries a clockwise couple of 5 kN-m at 2m from left support and another anticlockwise couple of 10 kN-m at 4m from left support. The beam carries a UDL of intensity 2 kN/m between the couple. Sketch the SFD and BMD. 14 Marks

UNIT-III

5 Three steel, plates of width 300mm and thickness 10mm are welded together to form a channel section. What is the moment of resistance of the section if the allowable bending in compression is 60MPa and in tension is 80MPa? 14 Marks

(OR)

6 Sketch the variation of shear stress across the depth of an I section of depth 300mm, web thickness 10mm and flange size of 100mm x 10mm. The Flexural shear force action on the section is 200kN. 14 Marks

UNIT-IV

7 Derive Torsion equation and determine the power transmitted by a solid shaft of 120 mm diameter rotating at 100 r.p.m., if the maximum shear stress is not to exceed 80 Mpa. The maximum torque is 20% more than its mean value. 14 Marks

(OR)

8 A closely coiled helical spring of round steel wire 10 mm in diameter having complete turns with a mean diameter of 12 cm is subjected to an axial load of 200N. Determine: 14 Marks

i) The deflection of spring.
ii) Maximum shear stress in wire.
iii) Stiffness of the spring.

UNIT-V

9 A thin steel cylindrical shell of thickness 14 mm, 1 m diameter and 3.25 m long is carrying a fluid at a pressure of 1.6 N/mm^2. Find the change in dimensions of the cylinder. 14 Marks

(OR)

10 Derive lame's equations for the analysis of thick cylinders. Also sketch the variation of radial stress and hoop stress across the thickness of cylinder having internal radius 150mm and external radius 400mm subjected to an internal pressure of 8Mpa. 14 Marks

CODE No.:14BT30104 SVEC-14

Roll No. | | | | | | | | | | |

FLUID MECHANICS-I

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Explain the terms: (i) Dynamic viscosity. (ii) Kinematic viscosity. Give their dimensions. Calculate the density, specific weight and weight of one litre of petrol of specific gravity 0.7.	14 Marks
		(OR)	
2		Differentiate between: (i) Absolute and gauge pressure (ii) Simple manometer and differential manometer. A rectangular plane surface is 2m wide and 3m deep. It lies in vertical plane in water. Determine the total pressure and position of centre of pressure on the plane surface when its upper edge is horizontal and coincides with the water surface.	14 Marks

UNIT-II

3		Derive continuity equation for one dimensional flow and list out uses and limitations of flow net.	14 Marks
		(OR)	
4	a)	Define path line, streak line and the streamline. For what type of flow these lines are identical?	7 Marks
	b)	Define the Equation of Continuity. Derive the Continuity Equation for three dimensional flows from fundamentals by indicating the assumptions made where ever are required.	7 Marks

UNIT-III

5		Derive Darcy - Weisbach equation and a pipe line AB of diameter 300mm and of length 400m carries water at the rate of 50 lit / sec. The flow takes place from A to B where point B is 30m above A. Find the pressure at A if the pressure at B is 19.62 N/cm^2. Take f = 0.008.	14 Marks
		(OR)	
6		A weir 36m long is divided in to 12 equal bays by vertical posts, each 60cm wide. Determine the discharge over the weir if the head over the crest is 1.20m and velocity of approach is 2metres per second.	14 Marks

UNIT-IV

7		Describe the Reynolds's experiment with a neat sketch. Explain how would you distinguish between hydro dynamically smooth and rough boundaries.	14 Marks
		(OR)	
8		A laminar flow is taking place in a pipe of diameter 200mm. The maximum velocity is 1.5 m/s. Find the mean velocity and the radius at which this occurs. Also calculate the velocity at 4cm from the wall of the pipe.	14 Marks

UNIT-V

9		Explain the procedure for solving problem by Buckingham's π theorem in briefly.	14 Marks
		(OR)	
10		Explain the following . i) Geometric Similarity. ii) Kinematic Similarity. iii) Dynamic Similarity.	14 Marks

CODE No.:14BT30201 SVEC-14

Roll No. | | | | | | | | | | |

ELECTROMAGNETIC FIELDS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define electric field intensity. Explain in detail the different ways of obtaining elastic field.	7 Marks
	b)	Derive the expression for energy density in electric field.	7 Marks
		(OR)	
2	a)	State and explain Gauss law.	7 Marks
	b)	Two dipoles with dipole moments $-5a_z$ Rc/m and $9a_z$ Rc/m are located at points (0, 0, -2) and (0, 0, 3) respectively. Find the potential at the origin.	7 Marks

UNIT-II

3	a)	Derive the expression for EFI due to an Electric dipole.	7 Marks
	b)	Two point charges of 2 μC and -2 μC are located at (0, 0, 1) and (0, 0, -1) respectively, in free space. Find the potential at (0, 3, 4) m.	7 Marks
		(OR)	
4	a)	Derive the expression for Potential due to an Electric dipole.	7 Marks
	b)	Derive the expression for capacitance of a parallel plate capacitor without composite Dielectric material.	7 Marks

UNIT-III

5	a)	State and prove Biot-Savort's law.	7 Marks
	b)	Find the Magnetic Field intensity at Point P(2, 2, 3) caused by a current filament of 25 A in the $\mathbf{a_z}$ direction and extending from Z = 0 to Z = 6.	7 Marks
		(OR)	
6	a)	Write Maxwell's Fourth equation in Integral form and explain.	7 Marks
	b)	Obtain the expression for Magnetic Field Intensity due to infinitely long co-axial transmission line by applying Ampere's circuital Law.	7 Marks

UNIT-IV

7	a)	Explain the classification of magnetic materials.	7 Marks
	b)	Derive the expression for magnetic energy density in a magnetic field.	7 Marks
		(OR)	
8	a)	Calculate the self-inductance per unit length of an infinitely long solenoid.	7 Marks
	b)	Explain about the magnetic boundary conditions.	7 Marks

UNIT-V

9	a)	Explain the difference between induced, transformer and motional **emf**.	7 Marks
	b)	Write the point form of Maxwell's equations. Explain their significance.	7 Marks
		(OR)	
10	a)	Define displacement current. Derive the expression for displacement current density.	7 Marks
	b)	Write the integral form of Maxwell's equations. Explain their significance.	7 Marks

II B.Tech I Semester (SVEC14) Supplementary Examinations August – 2021

ELECTRIC CIRCUITS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Determine current I in the network shown in fig. 1. 7 Marks

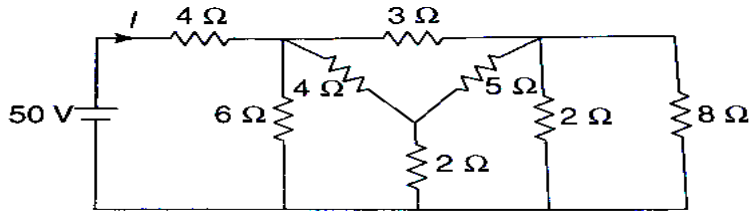

Fig.1

b) Determine the voltage drop across 5Ω resistor in fig. 2 using nodal analysis. 7 Marks

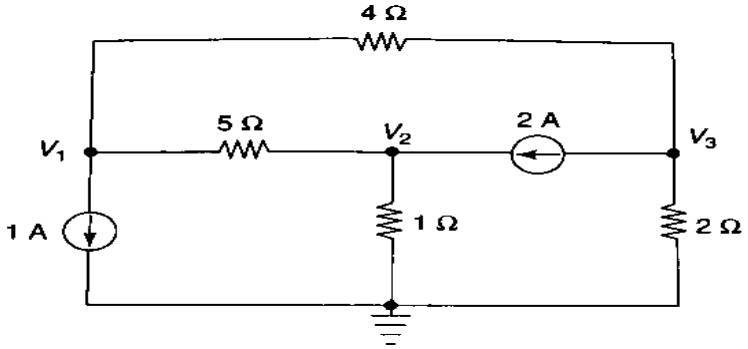

Fig. 2

(OR)

2 a) Determine the equivalent resistance between the terminals A and B for the network shown in fig. 3. 7 Marks

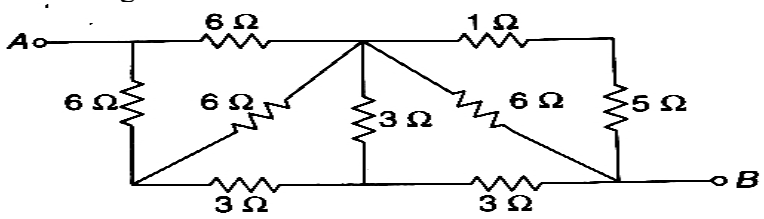

Fig. 3

b) List the steps involved in constructing the dual of a network. 7 Marks

UNIT-II

3 a) Analyze the behavior of a series RC circuit excited by a sinusoidal voltage source. 7 Marks

b) A series circuit consumes 2kW at 0.8 power factor lag when connected to 230 V, 50Hz supply. Calculate current, kVA , kVAR. 7 Marks

(OR)

4 a) Derive the resonant frequency of parallel combination of series RC and RL circuits. 8 Marks

b) Distinguish between series and parallel Resonance. 6 Marks

UNIT-III

5 a) Derive the relation between line and phase quantities in a three phase balanced star connection. 7 Marks

b) Three identical impedances of (3+j4)Ω are connected in delta. Find an equivalent star network such that the line current is the same when connected to the same supply. 7 Marks

(OR)

6 Explain the measurement of three phase power using two wattmeter methods with neat phasor diagram. 14 Marks

UNIT-IV

7 a) State and explain Faraday's law of Electromagnetic Induction. 6 Marks

b) Two coils A and B are wound on same ferromagnetic core. There are 300 turns on A and 2800 turns on B. A current of 4A through coil A produces a flux of 800μWb in the core. If this current is reversed in 20ms, find the average e.m.f induced in coils A and B. 8 Marks

(OR)

8 a) A steel ring of 25cm mean diameter and of circular section of 3cm in diameter has an air gap of 1.5mm length. It is wound uniformly with 700 turns of wire carrying a current of 2A. Calculate. 10 Marks

i) Magneto motive force.
ii) Flux density.
iii) magnetic flux.
iv) Relative permeability of steel ring.

b) Explain about series connection of coupled coils. 4 Marks

UNIT-V

9 a) State and explain maximum power transfer theorem with a suitable example. 7 Marks

b) Obtain the current in 2Ω resistor in the circuit of Fig.4 by using thevenin's theorem. 7 Marks

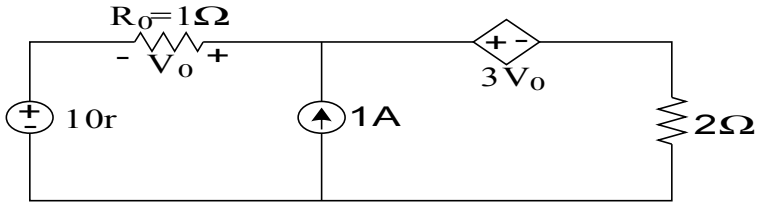

Fig.4

(OR)

10 a) State and explain superposition theorem with a suitable example. 7 Marks

b) For the circuit shown in Fig.5, if the resistance of 5Ω branch is increased to 6Ω, Determine the compensation source and verify the results. 7 Marks

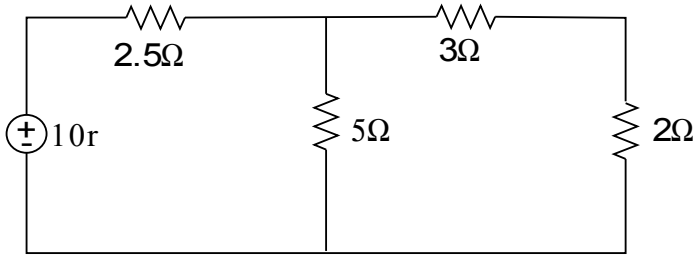

Fig.5

NETWORK ANALYSIS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Explain about series and parallel inductive and capacitive circuit. 8 Marks

b) The filament of a light in the circuit has a certain amount of resistance. The bulb operates with 120V and 0.8A of current, what is the resistance of its filament? 6 Marks

(OR)

2 a) State Kirchoffs voltage and current law with suitable examples. 4 Marks

b) Explain voltage division rule and current division rule with an example. 5 Marks

c) Find the current through branch a-b using mesh analysis shown Figure.1. 5 Marks

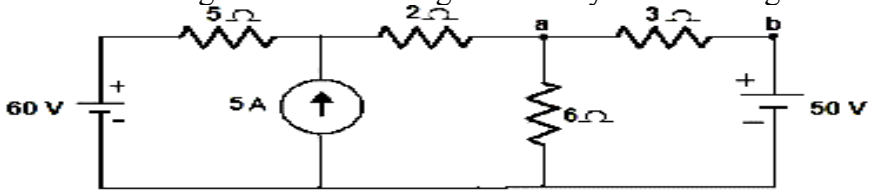

Figure.1

UNIT-II

3 a) Define resonance and explain the characteristics of series resonance. 7 Marks

b) Design a series R-L-C circuit that resonates at 1.5kHz and consumes 50W from a 50V A.C source operating at the resonance frequency. The bandwidth is 0.75 kHz. 7 Marks

(OR)

4 a) Distinguish between series and parallel Resonance circuits. 6 Marks

b) A non-alternating periodic waveform has been shown in Figure.2.Find its form factor. 8 Marks

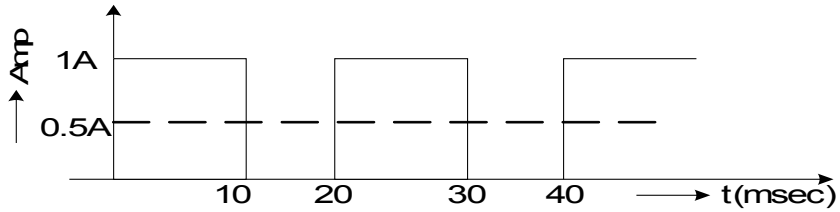

Figure.2

UNIT-III

5 a) Obtain the Transient response of RC series circuit for sinusoidal excitation. 7 Marks

b) A series RC circuit has R=20Ω and C=100μF. A voltage v = 200 Sin 314t is applied at t=2.14msec. Obtain an expression for current. Find the value of current after time 1 m sec from the switching instant. 7 Marks

(OR)

6 Explain and derive the expressions of Transient response of RLC series circuit with sinusoidal excitation. 14 Marks

UNIT-IV

7 a) Define port network and obtain the equations of an impedance parameters of two port network. 7 Marks

b) Derive the Z-parameter equations for lattice network. 7 Marks

(OR)

8 Find the Z and Y-parameters of the circuit shown in Figure.3 and check the condition for symmetry and reciprocity. 14 Marks

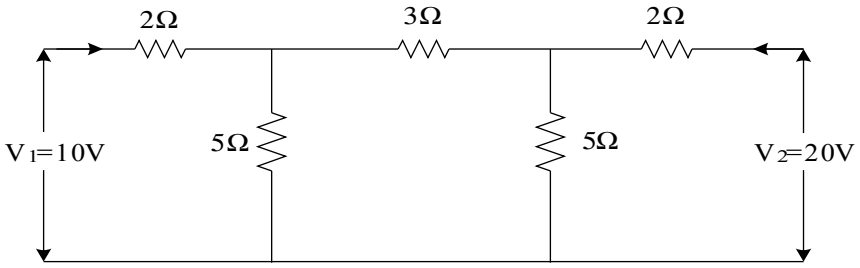

Figure.3

UNIT-V

9 a) State and explain maximum power transfer theorem and derive the condition for maximum power transfer in an AC circuits. 7 Marks

b) Using Norton's theorem, find current through 6Ω resistor shown in Figure.4. 7 Marks

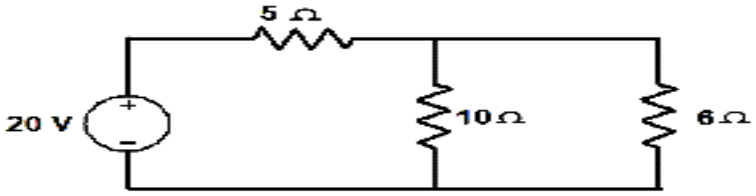

Figure.4

(OR)

10 a) State reciprocity theorem and explain with an example. 6 Marks

b) Find the voltage across the 20 Ω resistor by using superposition theorem for the circuit shown in Figure.5 8 Marks

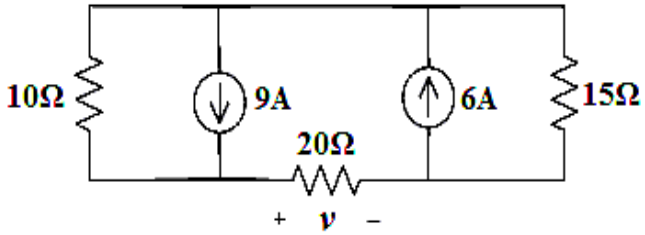

Figure.5

PROBABILITY AND STOCHASTIC PROCESSES
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define probability based on set theory and fundamental axioms.	7 Marks
	b)	Two boxes are selected randomly. The first box contains 2 black balls and 3 white balls. Second box contains 4 white and 6 black balls. What is the probability of drawing a white ball?	7 Marks

(OR)

2	a)	Define joint and conditional probabilities.	4 Marks
	b)	When are two events said to be collectively exhaustive? Explain with examples.	5 Marks
	c)	Estimate the probability of the card being either red or a king when one card is drawn from a deck of a regular 52 cards.	5 Marks

UNIT-II

3	a)	What is the Gaussian random variable? Explain the other distribution and density Examples.	8 Marks
	b)	Assume automobile arrivals at a gasoline station are Poisson and occur at an average rate of 50/h. The station has only one gasoline pump. If all the cars are assumed to require one minute to obtain fuel, what is the probability that a waiting line will occur at the pump?	6 Marks

(OR)

4	a)	Explain Conditional density and list the properties of conditional density.	6 Marks
	b)	The sample space for an experiment is S = {0, 1, 2, 5, 6}. List all the possible values of the following random variables; (i) X = 2s, (ii) X = $5s^2$ -1.	8 Marks

UNIT-III

5	a)	Explain the concept of "Expected value of a random variable" .	6 Marks
	b)	Explain with necessary equation about "Joint density "and list all the properties of the same.	8 Marks

(OR)

6	a)	Explain Central limit theorem in detail.	6 Marks
	b)	Discuss Moments about the Origin, Central moments, Variance and skew.	8 Marks

UNIT-IV

7	a)	Explain the meaning of "Mean - Ergodic processes "and Correlation -Ergodic processes.	6 Marks
	b)	Explain linear time invariant system and time invariant system transfer function.	8 Marks

(OR)

8	a)	Explain in detail about Poisson Random process and compare it with Gaussian random process.	6 Marks
	b)	What is the meaning of cross correlation function and list all the properties of cross correlation.	8 Marks

UNIT-V

9	a)	Define thermal noise and explain its relationship to the bandwidth and temperature.	7 Marks
	b)	An amplifier with gain = 30 dB and BN = 25 kHz is found to have T0 = 120 K. Find Te and Noise figure.	7 Marks

(OR)

10	a)	Derive the equation for Noise figure of Cascaded system in terms of individual Noise Figures.	7 Marks
	b)	State and prove any three properties of Narrow band Noise processes.	7 Marks

CODE No.:14BT30402 SVEC-14

Roll No. | | | | | | | | | | |

SEMICONDUCTOR DEVICES AND CIRCUITS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the V-I characteristics of PN diode and Zener diode. Also differentiate them.	7 Marks
	b)	Draw the circuit of a full wave rectifier circuit with L section filter and derive the expression for ripple factor.	7 Marks
		(OR)	
2	a)	Explain the formation of depletion region in an open circuited PN-junction. What is the significance of barrier potential across a PN-junction?	7 Marks
	b)	A HWR circuit is supplied from a 230-V, 50Hz supply with a step-down ratio of 3:1 to a resistive load of 10 kΩ. The diode forward resistance is 10Ω. Calculate maximum, average, RMS values of current, DC output voltage, efficiency of rectification and ripple factor.	7 Marks

UNIT-II

3	a)	Sketch the input and output characteristics of a transistor in CB configuration.	7 Marks
	b)	Explain how a transistor works as an amplifier.	7 Marks
		(OR)	
4	a)	Explain how you would locate the operating point using the load line.	7 Marks
	b)	Explain, with necessary circuit diagram, the collector to base bias arrangement and derive at an expression for its stability factor.	7 Marks

UNIT-III

5	a)	Define h-parameters. How do you determine h-parameters from transistor characteristics?	7 Marks
	b)	Draw the circuit diagram of CB amplifier circuit and its h-parameter equivalent circuit. List the characteristics of a CB amplifier.	7 Marks
		(OR)	
6	a)	Analyze the CC amplifier using approximate hybrid model.	8 Marks
	b)	Describe the simplified hybrid model.	6 Marks

UNIT-IV

7	a)	Explain the pinch-off voltage,V-I characteristics of JFET .	6 Marks
	b)	With neat diagram, explain the operation of MOSFET in Enhancement mode.	8 Marks
		(OR)	
8	a)	Explain the common drain amplifier and derive expression for gain of the amplifier.	8 Marks
	b)	Write the comparisons of BJT and JFET.	6 Marks

UNIT-V

9	a)	Explain the principle and operation of tunnel diode.	6 Marks
	b)	Explain the construction, operation, equivalent circuit V-I characteristics and application of UJT.	8 Marks
		(OR)	
10	a)	With neat diagram, explain about varactor diode.	6 Marks
	b)	Explain the construction, operation, V-I characteristics and application of SCR.	8 Marks

FOUNDATIONS OF ELECTRICAL ENGINEERING
[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain about various types of sources used in electrical circuit analysis.	7 Marks
	b)	Explain when the mesh analysis and super mesh analysis are used.	7 Marks
		(OR)	
2		State and prove Kirchhoff's laws.	14 Marks

UNIT-II

3	a)	Define the terms Admittance, Impedance, Conductance and Suceptance.	6 Marks
	b)	Show that in an AC circuit, current through purely capacitive circuit leads the applied voltage by 90^0.	8 Marks
		(OR)	
4	a)	Define the terms complex power, real power and reactive power.	7 Marks
	b)	Differentiate between form factor, peak factor and power factor.	7 Marks

UNIT-III

5	a)	Mention the applications of various types of DC generator.	7 Marks
	b)	Derive the expression for emf equation of a DC generator.	7 Marks
		(OR)	
6	a)	Derive torque equation of a DC motor from fundamentals.	7 Marks
	b)	Classify different types of DC generators with neat circuit diagram.	7 Marks

UNIT-IV

7	a)	Explain the working principle of AC servomotor.	7 Marks
	b)	Explain the working principle of stepper motor.	7 Marks
		(OR)	
8	a)	Explain AC servomotors in detail.	8 Marks
	b)	List out various types of losses occurred in electrical machines and explain.	6 Marks

UNIT-V

9	a)	Discuss about open loop systems with illustrations.	7 Marks
	b)	Discuss various time variant and time invariant systems with illustrations.	7 Marks
		(OR)	
10	a)	Write relations between force-voltage and force-current analogy.	7 Marks
	b)	Define signal flow graph and derive the transfer function using Mason's gain formula.	7 Marks

(An Autonomous Institution, Affiliated to JNTUA, Anantapur)

II B.Tech I Semester (SVEC14) Supplementary Examinations February – 2021

MATRICES AND NUMERICAL METHODS
[Civil Engineering, Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Test for consistency and then solve the system of equations 7 Marks
$\mathbf{x + 2y - z = 3,\ 3x - y + 2z = 1,\ 2x - 2y + 3z = 2,\ x - y + z = -1}$.

b) State Cayley - Hamilton theorem and using it find the inverse of the matrix 7 Marks
$\begin{bmatrix} 1 & 0 & 2 \\ 0 & 1 & 2 \\ 1 & 2 & 0 \end{bmatrix}$.

(OR)

2 a) Solve the system of equations 7 Marks
$\mathbf{3x + 2y + z = 0,\ 2x + 3z = 0,\ y + 3z = 0,\ x + 2y + 3z = 0.}$

b) Find the eigen values and the corresponding eigen vectors of the matrix 7 Marks
$\begin{bmatrix} 1 & 2 & 2 \\ 2 & 1 & -2 \\ 2 & -2 & 1 \end{bmatrix}$

UNIT-II

3 a) Using Newton-Raphson method find the root of the equation $\boldsymbol{x + \log_{10} x = 3.375}$, 7 Marks
correct to three decimal places.

b) From the following table of half-yearly premium for policies maturing at different ages, estimate the premium for policies maturing at age of 46. 7 Marks

Age	45	50	55	60	65
Premium (in rupees)	114.84	96.16	87.32	74.48	68.48

(OR)

4 a) By using bisection method, find an approximate root of the equation Sin x =1/x, 7 Marks
that lie between x=1 and x= 1.5(measured in radians), carry out computations up to 5 stages.

b) A curve passes through the points (1, -3), (3, 9),(4, 30) and (6,132). Find the slope 7 Marks
of the curve at x=2.

UNIT-III

5 a) 7 Marks
Estimate the value of $\frac{dy}{dx}$ *and* $\frac{d^2y}{dx^2}$ *at* $x =$ 4.0 at x = 4.0 from the following data.

x	1.5	2.0	2.5	3.0	3.5	4.0
y	3.375	7.0	13.625	24.0	38.875	59.0

b) Applying Rungekutta method, estimate y when x = 1.2 in steps of 0.1 given that 7 Marks
$\frac{dy}{dx} = x^2 + y^2,\ y(1) = 1.5$.

(OR)

6 a) The following table of values of x and y are given. Find $\frac{dy}{dx}$ when x =1 and x=6. 7 Marks

x :	0	1	2	3	4	5
y :	6.9897	7.4036	7.7815	8.1291	8.4510	8.7506

b) Using Runge-Kutta method of order four, compute y (2.5) for the equation $\frac{dy}{dx} = \frac{x+y}{x}, y(2) = 2.$ 7 Marks

UNIT-IV

7 a) Obtain the half range sine series for the function $f(x) = \frac{\pi x}{8}(\pi - x)$ in the range $0 \le x \le \pi$. 7 Marks

b) Find the Fourier cosine Transform of $e^{-\frac{x^2}{2}}$. 7 Marks

(OR)

8 a) Find the half range cosine series for the function $f(x) = \cos ax$ where α is not an integer in the range $0 < x < \pi$ 7 Marks

b) Using Fourier integral show that $e^{-x}\cos x = \frac{2}{\pi}\int_0^\infty \frac{\lambda^2+2}{\lambda^2+4}\cos \lambda x d\lambda$ 7 Marks

UNIT-V

9 a) Form the partial differential equation by eliminating arbitrary function from $xyz = f(x + y + z)$. 7 Marks

b) Solve by the method of separation of variables $\frac{\partial^2 u}{\partial x^2} = \frac{\partial u}{\partial y} + 2u$ satisfying u = 0 and $\frac{\partial u}{\partial x} = e^{2y}$, when x=0, for all y. 7 Marks

(OR)

10 a) Form the partial differential equation by eliminating the arbitrary functions f_1 and f_2 from **$z = f_1(y+2x)+f_2(y-3x)$.** 4 Marks

b) Solve one dimensional heat equation by the method of separation of variables $\frac{\partial u}{\partial t} = c^2 \frac{\partial^2 u}{\partial x^2}$. 10 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Anantapur)

II B.Tech I Semester (SVEC14) Supplementary Examinations February – 2021

SPECIAL FUNCTIONS AND COMPLEX ANALYSIS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Define Beta and Gamma functions and derive the relation between them. 7 Marks

b) Show that $\frac{d}{dx}\left[x^n J_n(x)\right] = x^n J_{n-1}(x)$. 7 Marks

(OR)

2 a) Evaluate $\int_0^1 x^3 \sqrt{1-x}\,dx$ using beta and gamma functions. 7 Marks

b) show that $\frac{d}{dx}\left[J_0(x)\right] = -J_1(x)$ 7 Marks

UNIT-II

3 a) Show that an analytic function of constant modulus is constant. 7 Marks

b) Determine the analytic function $f(z) = u + iv$ given that $3u + 2v = y^2 - x^2 + 16x$. 7 Marks

(OR)

4 a) If **f(z) = u +iv** is an analytic function , find f**(z) if u+ v** = $\frac{x}{x^2 + y^2}$ when f(1)=1. 7 Marks

b) Determine the analytic function whose real part is $e^x(x\cos y - y\sin y)$. 7 Marks

UNIT-III

5 a) Evaluate $\int_0^{1+i} (x - y + ix^2)$ dz along the real axis from z =0 to z = 1 and then along a line parallel to imaginary axis from z = 1 to z = 1 + i. 7 Marks

b) Use Cauchy's and integral formula to evaluate $\oint_c \frac{e^{2z}}{(z+1)^4}$ dz where c is the circle |z| = 2. 7 Marks

(OR)

6 a) Evaluate $\oint_c \frac{\cos \pi z^2}{z^2 - 1}$ dz around a rectangle with vertices $2 \pm i - 2 \pm i$. 7 Marks

b) Expand f(z) = $\frac{1}{z^2 - 3z + 2}$ in the region 7 Marks

(i) |z|>2 (ii) |Z| <1 (iii) 0<|Z-1|<| using Taylor's series

UNIT-IV

7 a) Evaluate $\int_C \frac{(2z+1)^2}{(4z^3 + z)} dz$ where C is the circle | z | = 1. 7 Marks

b) Evaluate $\int_{-\infty}^{\infty} \frac{x^2}{(x^2+1)(x^2+4)}\,dx$ using residue theorem. 7 Marks

(OR)

8 a) Determine the poles and corresponding residues for the function $f(z) = \frac{z^2 - 2z}{(z+1)^2(z^2+1)}$ 7 Marks

b) By the method of residues, evaluate $\int_0^{\pi} \frac{d\theta}{a + b\cos\theta} (a > b > 0)$. 7 Marks

UNIT-V

9 a) Under the transformation **w = 1/z,** find the image of the circle **| z - 2 i | = 2**. 7 Marks

b) Define a Bilinear transformation and evaluate a bilinear transformation which maps the points **1, i, -1** onto the points **i , 0 , - i** . 7 Marks

(OR)

10 a) Show that the bilinear transformation maps circles to circles. 7 Marks

b) Discuss about the transformation ***w = Cos z***. 7 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Anantapur)

II B.Tech I Semester (SVEC14) Supplementary Examinations February – 2021

PROBABILITY AND STATISTICS

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Define random variable, discrete random variable, continuous random variable and conditional probabilities. 7 Marks

b) If x and y are continues random variable, then prove that $E(X+Y)=E(X)+E(Y)$. 7 Marks

(OR)

2 a) State and prove the Baye's theorem. 7 Marks

b) In a class 2% of Boys and 3% of girls are having blue eyes. There are 30% girls in the class. If a student is selected and found that having blue eyes, what is the probability that the student is a girl. 7 Marks

UNIT-II

3 a) Derive the mean and variance of normal distribution. 7 Marks

b) If x is a Poisson variable such that $p(x = 1) = 24\ p(x = 3)$, find the probability $p(x=0)$. 7 Marks

(OR)

4 a) Derive mean and variance of Binomial Distribution. 7 Marks

b) Samples of (n=6) items are drawn at random from the production process which is making 10% defectives. Calculate the probabilities of 0,1,2,3,4,5 and 6 defectives in a sample. 7 Marks

UNIT-III

5 a) Obtain the rank correlation co- efficient for the following data. 7 Marks

X	68	64	75	50	64	80	75	40	55	64
Y	62	58	68	45	81	60	68	48	50	70

b) Derive angle between two Regression lines. 7 Marks

(OR)

6 a) Derive any three properties of Regression lines. 7 Marks

b) Find the correlation co-efficient between x and y variables. 7 Marks

X	9	11	14	15	17	19
Y	7	5	8	9	11	12

UNIT-IV

7 a) Explain Type-I, Type-II errors 7 Marks

b) In 64 randomly selected hours of production, the mean and the standard deviation of the number of acceptance pieces produced by an automatic stamping machine are1.038 and 0.146 At the 0.05 level of significance test whether the mean is greater than 1.000. 7 Marks

(OR)

8 a) Define the Hypothesis, null Hypothesis, alternative Hypothesis Level of significance with suitable example — 7 Marks

b) In a city 400 out of 600 were smokers. Does this information support the conclusion that the majority of men in this city are smokers? (z = 8.3 majority of people are smokers). — 7 Marks

UNIT-V

9 a) A random sample from a company's very extensive files shows that the orders for a certain kind of machinery were filled, respectively in 10, 12, 19, 14, 15, 18, 11 and 13 days. Use the level of significance a = 0.01 to test the claim that on the average such orders are filled in 10.5 days. Assume normality. — 7 Marks

b) The number of automobile accidents per week in a certain community are as follows: 12, 8, 20, 2, 14, 10, 15, 6, 9, 4. Are these frequencies in agreement with the belief that accident conditions were the same during this 10 week period. — 7 Marks

(OR)

10 a) The following tables give the number of aircraft accident that occurred during seven days of the week. Find whether the accidents are uniformly distributed over the week. — 7 Marks

Days	Mon	Tue	Wed	Thu	Fri	Sat
No.of accidents	14	18	12	11	15	14

b) Explain briefly significance between F-Test and T-Test — 7 Marks

CODE No.:14BT30102 SVEC-14

SREE VIDYANIKETHAN ENGINEERING COLLEGE

II B.Tech I Semester (SVEC14) Supplementary Examinations February – 2021

MECHANICS OF SOLIDS

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 What is strain energy and show that strain energy per unit volume is $f^2/2E$? What is Generalized Hooke's law? Write the governing equations. 14 Marks

(OR)

2 Derive relationship between E, N and K and also differentiate Resilience and Toughness. 14 Marks

UNIT-II

3 Define the SF and BM at a section of a beam. Explain the utility of drawing SF and BM diagrams for a beam. Also obtain relationship between SF and BM. 14 Marks

(OR)

4 A simply supported beam of span 6m carries a clockwise couple of 5kN-m at 2m from left support and another anticlockwise couple of 10kN-m at 4m from left support. The beam carries a UDL of intensity 2kN/m between the couple. Sketch the SFD and BMD. 14 Marks

UNIT-III

5 Three steel plates of width 300mm and thickness 10mm are welded together to form a channel section. What is the moment of resistance of the section if the allowable bending in compression is 60MPa and in tension is 80MPa? 14 Marks

(OR)

6 Sketch the variation of shear stress across the depth of I section of depth 300mm, web thickness 10mm and flange size of 100mm x 10mm. The Flexural shear force action on the section is 200kN. 14 Marks

UNIT-IV

7 Derive Torsion equation and determine the power transmitted by a solid shaft of 120mm diameter rotating at 100 r.p.m., if the maximum shear stress is not to exceed 80 Mpa. The maximum torque is 20% more than its mean value. 14 Marks

(OR)

8 It is required to design a closed coiled helical spring which shall deflect 1 mm under an axial load of 100N at a shear stress of 90Mpa. The spring is to be made of round wire having shear modulus of 0.8×10^5Mpa. The mean diameter of the coil is 10 times that of the coil wire. Find the diameter and length of the wire. 14 Marks

UNIT-V

9 A thick cylinder of steel having an internal diameter of 10cm and an external diameter of 20cm, is subjected to an internal pressure of 80Mpa and an external pressure of 10Mpa. Find the maximum normal and shearing stress in the cylinder and calculate the change of external diameter. Take E= 200Gpa. 14 Marks

(OR)

10 Determine the maximum stress induced in a cylindrical steel strut of length 1.4m and diameter 40mm. The strut is hinged at both its ends and subjected to an axial thrust of 30kN at its ends and a transverse point load of 2kN at the centre. Take $E = 2.08 \times 10^5$ N/mm^2. 14 Marks

II B.Tech I Semester (SVEC14) Supplementary Examinations February – 2021

FLUID MECHANICS-I
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Explain the terms i) Dynamic viscosity, ii) Kinematic viscosity. Give their dimensions. Calculate the density, specific weight and weight of one litre of petrol of specific gravity 0.7. 14 Marks

(OR)

2 State and prove the Pascal's law. Determine the total pressure on a circular plate of diameter 1.5m which is placed vertically in water in such a way that the centre of the plate is 3m below the free surface of water. Find the position of centre of pressure also. 14 Marks

UNIT-II

3 If for a two-dimensional potential flow, the velocity potential is given by: $\Phi = 4x\ (3y-4)$, determine the velocity at the point(2, 3). Also determine the value of stream function Ψ at the point (2, 3). 14 Marks

(OR)

4 A pipe 250m long has a slope of 1in 100 and tapers from 1.5m diameter at the higher end to 0.7m at the lower end. The quantity of water flowing is 700 lit/sec. If the pressure at the higher end is 60KPa, find the pressure at the lower end. 14 Marks

UNIT-III

5 List the various minor losses in pipes and derive an expression for the loss of head due to sudden enlargement. A horizontal venturimeter with inlet diameter 20cm and throat diameter 10cm is used to measure the flow of oil of sp.gr.0.8. The discharge of oil through venturimeter is 60 litres/s. Find the reading of the oil-mercury differential manometer. Take $C_d = 0.98$. 14 Marks

(OR)

6 Define an orifice and a mouthpiece. What is the difference between the two? Water is flowing in a rectangular channel 1 m wide and 0.75m deep. Find the discharge over a rectangular weir of crest length 60cm, if the head of water over the crest of weir is 20cm and water from channel flows over the weir. Take $C_d = 0.62$. Neglect end contractions. Take velocity of approach into consideration. 14 Marks

UNIT-IV

7 a) Determine i) the pressure gradient, ii) the shear stress at the two horizontal parallel plates and iii) the discharge per meter width for the laminar flow of oil with a maximum velocity of 2m/sec between two horizontal parallel fixed plates which are 100mm a part. Given $\mu = 2.4525$ N s/m^2. 7 Marks

b) Describe Reynold's experiment to demonstrate the two types of flow. 7 Marks

(OR)

8	a)	Prove that the velocity distribution of viscous flow between two parallel plates when both plates are fixed across a section parabolic in nature. Also prove that maximum velocity is equal to one and half times the average velocity.	7 Marks
	b)	Water is flowing between two large parallel plates which are 2m a part. Determine maximum velocity, pressure drop per unit length and shear stress at walls of the plate, if the average velocity is 0.4m/sec. Take viscosity of water as 0.01 poise.	7 Marks

UNIT-V

9	Discharge Q through a turbine is a function of the turbine speed n, head H, diameter D of the runner, density **ρ** and viscosity **μ** of the fluid and acceleration due to gravity **g**. Find an expression for Q.	14 Marks

(OR)

10	Explain Froude model law and A 1:64 model is constructed of an open channel in concrete which has Manning's N = 0.014. Find the value of N for the model.	14 Marks

ELECTROMAGNETIC FIELDS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	State and explain Gauss's Law.	7 Marks
	b)	Derive Maxwell's first equation as applied to the electrostatics using Gauss's Law	7 Marks

(OR)

2	a)	Define electric field intensity and electric flux density. Deduce the relation between them.	6 Marks
	b)	It is required to hold four equal point charges each in equilibrium at the corners of a square. Find the point charge which will do this if placed at the centroid of the square.	8 Marks

UNIT-II

3	a)	Derive the expression for EFI due to an Electric dipole.	7 Marks
	b)	Two point charges of 2μC and -2μC are located at (0,0,1) and (0,0,-1) respectively in free space. Find the potential at (0,3,4) m.	7 Marks

(OR)

4	a)	Derive the expression for Potential due to an Electric dipole.	7 Marks
	b)	Derive the expression for capacitance of a parallel plate capacitor without composite Dielectric material.	7 Marks

UNIT-III

5	a)	State and explain Ampere's circuital law in integral and differential forms.	7 Marks
	b)	Explain the concept of magnetic dipole and dipole moment.	7 Marks

(OR)

6	a)	Write Maxwell's Fourth equation in Integral form and explain.	7 Marks
	b)	Obtain the expression for Magnetic Field Intensity due to infinitely long co-axial transmission line by applying Ampere's circuital Law.	7 Marks

UNIT-IV

7	a)	Explain the classification of magnetic materials.	7 Marks
	b)	Derive the expression for magnetic energy density in a magnetic field.	7 Marks

(OR)

8	a)	Calculate the self-inductance per unit length of an infinitely long solenoid.	7 Marks
	b)	Explain about the magnetic boundary conditions.	7 Marks

UNIT-V

9	a)	Explain the concept of polarization.	7 Marks
	b)	Starting from Ampere's circuital law in differential form, derive the corresponding Maxwell's equation in vector differential form for time varying fields.	7 Marks

(OR)

10	a)	Explain the concept of reflection and refraction in magnetic materials.	7 Marks
	b)	State and explain about Faraday's law.	7 Marks

ELECTRICAL TECHNOLOGY
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the working principle of a DC generator.	6 Marks
	b)	Explain how to obtain the open circuit characteristic of a separately excited DC generator.	8 Marks

(OR)

2	a)	With a neat sketch, explain the operation of a three point starter.	7 Marks
	b)	Explain different types of losses in DC machines.	7 Marks

UNIT-II

3	a)	Derive an EMF equation of a single phase transformer with respect to phasor diagram.	8 Marks
	b)	A single phase (2000/200)V, 50Hz transformer has a net core area of 46cm^2 and a maximum density of 8 wb/m^2. Calculate the number of turns of primary and secondary windings.	6 Marks

(OR)

4	a)	Derive the EMF equation of a single phase transformer.	7 Marks
	b)	Explain the working principle of a single phase transformer.	7 Marks

UNIT-III

5	a)	Derive the relation between phase and line quantities in three phase Delta connection.	6 Marks
	b)	Three equal star connected inductors take 8KW at a power factor of 0.8 lagging, when connected across a 460V, three phase three wire supply. Find the circuit constants of the load per phase.	8 Marks

(OR)

6	a)	Define polyphase system and list out its advantages.	7 Marks
	b)	Derive the relation between phase and line voltages in a star connected system.	7 Marks

UNIT-IV

7		Explain the construction details and the principle of operation of a three phase Induction motor.	14 Marks

(OR)

8	a)	Explain the classification of three phase alternators.	7 Marks
	b)	Derive the EMF equation of an alternator.	7 Marks

UNIT-V

9	a)	"Single phase Induction motor is not self starting". Why?	7 Marks
	b)	Explain the principle of operation of split phase induction motor.	7 Marks

(OR)

10		Explain the construction and the principle of operation of stepper motor. Also give the applications of this motor.	14 Marks

NETWORK ANALYSIS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) State and explain Kirchhoff's law with suitable examples. 6 Marks

b) Find the voltage across 2Ω resistor in Fig.1b. 8 Marks

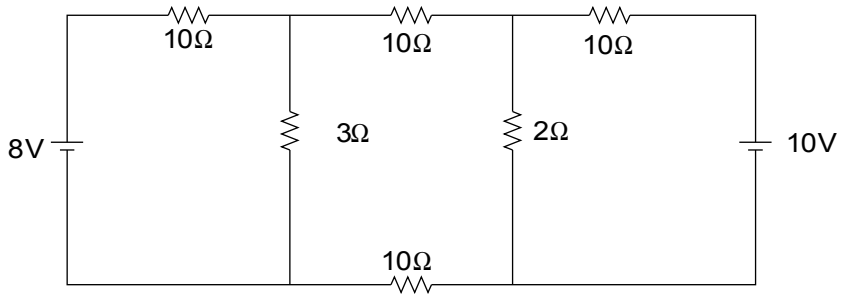

Fig.1b.

(OR)

2 a) Briefly explain about source transformation techniques. 7 Marks

b) Find the voltage across 10Ω resistor in Fig.2b as shown below. 7 Marks

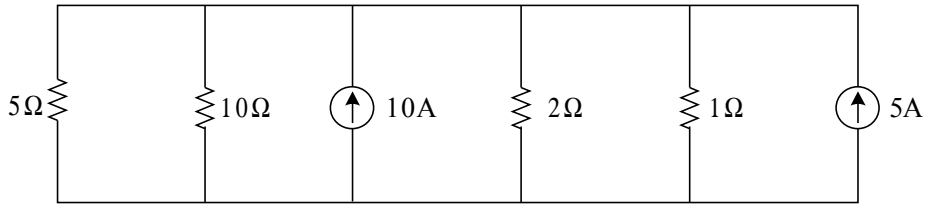

Fig.2b

UNIT-II

3 a) Define resonance and list out its implications. 6 Marks

b) What is locus diagram? Draw and explain current locus diagram for a series RL circuit, with fixed resistance by deriving necessary expressions. 8 Marks

(OR)

4 a) Define the following terms with respect to fundamental sinusoidal AC quantity. 8 Marks
i) Average value. ii) RMS value. iii) Instantaneous value. iv) Form factor.

b) Distinguish between RLC series and parallel resonance circuits. 6 Marks

UNIT-III

5 a) Derive the expressions of Transient response of RL series circuit with DC excitation. 7 Marks

b) Determine the voltage at the terminals of a coil having R = 10Ω and L = 15mH at the instant when the current is 10A and increasing at the rate of 5A/sec. Also find the stored energy in the inductor. 7 Marks

(OR)

6 Derive the expressions of Transient response of RC series circuit with sinusoidal excitation using Laplace transform approach. 14 Marks

UNIT-IV

7 a) Derive the relations of Y-parameters in terms of Z-parameters. 7 Marks

b) Explain about cascade connection of two port networks. 7 Marks

(OR)

8 Define image impedance. Derive the expressions of image impedances of the basic T-Network. 14 Marks

UNIT-V

9 a) State and explain maximum power transfer theorem with a suitable example. 7 Marks

b) Find the load resistance to receive maximum power from the source and also find the maximum power delivered to the load in the circuit shown in Fig.9b. 7 Marks

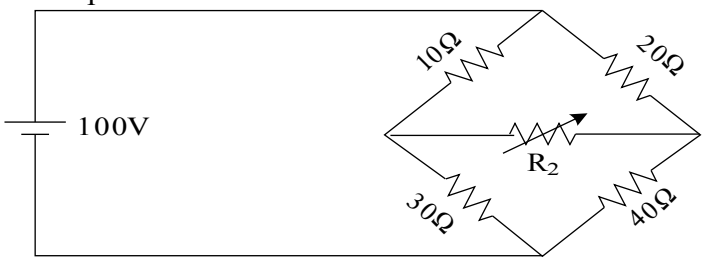

Fig. 9b.

(OR)

10 Obtain the thevenin equivalent for the bridge circuit shown in Fig.10. 14 Marks

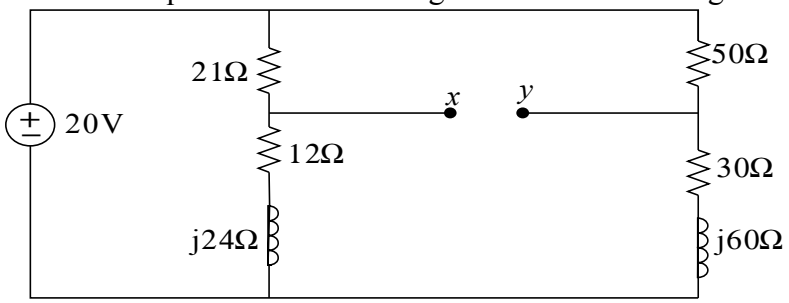

Fig.10.

THERMODYNAMICS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	How will you find out whether a given quantity is a thermodynamic property? How are these properties classified? Give examples of each type.	7 Marks
	b)	Explain: i) reversible process. ii) irreversible process. Write important criterion for a process to be reversible.	7 Marks

(OR)

2	a)	Define following: i) Thermo dynamic state. ii) Quasistatic process. iii) Cyclic and non cyclic process.	9 Marks
	b)	Show that the work and heat are path functions.	5 Marks

UNIT-II

3	a)	What is a steady flow process? Write the steady flow energy equation and explain the various terms in it.	7 Marks
	b)	Represent schematically heat engine, heat pump and refrigerator. Give their performance.	7 Marks

(OR)

4	a)	State and prove Carnot's theorem.	6 Marks
	b)	A heat engine is used to drive a heat pump. The heat transfers from the heat engine and from the heat pump are used to heat the water circulating through the radiators of a building. The efficiency of the heat engine is 27% and the COP of the heat pump is 4. Evaluate the ratio of the heat transfer to the circulating water to the heat transfer to the heat engine.	8 Marks

UNIT-III

5	a)	What is irreversibility? Show the gain of entropy in an irreversible process on T-s diagram in the case of steam turbine and compressor.	7 Marks
	b)	Define the term availability. Find an expression for the availability of a closed system.	7 Marks

(OR)

6	a)	Define available and unavailable energy.	4 Marks
	b)	Air enters the heater at 27^0C and leaves at 67^0C, the pressure being constant at 4 bar. The heat source is at 260^0C and the surroundings are at 15^0C. Treating air as a perfect gas find: i) the gain in availability of the air, ii) the effectiveness of the heater. Also calculate the loss due to irreversibilities.	10 Marks

UNIT-IV

7	a)	What are Maxwell relations? Derive them.	7 Marks
	b)	Describe the Mollier chart for steam with the help of a suitable diagram. What is the importance of this diagram in thermodynamic calculations?	7 Marks

(OR)

8	a)	Derive Tds equation when (i) T and V independent (ii) T and P independent.	8 Marks
	b)	Draw and explain phase equilibrium diagram for a pure substance on P-T coordinate. Also indicate different regions on the diagram.	6 Marks

UNIT-V

9	a)	Derive the expression from the air standard efficiency of the diesel cycle in terms of compression ratio, cut off ration and adiabatic index.	7 Marks
	b)	Explain the working principle of Otto cycle with the help of P-V and T-S diagrams.	7 Marks

(OR)

10		Derive an expression for the thermal efficiency of diesel cycle and draw P-V and T-S diagrams.	14 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

PROBABILITY AND STOCHASTIC PROCESSES

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define joint and conditional probabilities.	4 Marks
	b)	When are two events said to be collectively exhaustive? Explain with examples	5 Marks
	c)	Estimate the probability of the card being either red or a king when one card is drawn from a deck of a regular 52 cards	5 Marks

(OR)

2	a)	State and prove multiplication theorem of probability.	6 Marks
	b)	For any two events A and B in a sample space S, if B⊂A then prove that P(A/B)= 1.	8 Marks

UNIT-II

3	a)	State and prove any four properties of probability density function.	6 Marks
	b)	When two dice are thrown, calculate the expected value of the sum of number of points on them.	8 Marks

(OR)

4	a)	State four properties of conditional density function.	7 Marks
	b)	Find the MGF of a Binomial distribution and hence find mean and variance.	7 Marks

UNIT-III

5	a)	Find the skew for Gaussian distributed random variable.	7 Marks
	b)	Define conditional distribution and density function of two random variables X and Y.	7 Marks

(OR)

6	a)	Find the characteristic function for a random variable with density function $f_x(\omega) = x$ for $0 \leq x \leq 1$.	8 Marks
	b)	Define and explain the characteristic function.	6 Marks

UNIT-IV

7	a)	Explain about random processes.	6 Marks
	b)	State and prove mean Ergodic theorem.	8 Marks

(OR)

8	a)	Discuss about Gaussian Random Process and Poisson Random Process.	7 Marks
	b)	Discuss the auto correlation properties of a random process.	7 Marks

UNIT-V

9	a)	Classify noise and explain thermal noise in detail for stochastic processes.	7 Marks
	b)	Explain noise factor and noise figure.	7 Marks

(OR)

10	a)	Define the term interference and list several sources.	7 Marks
	b)	For an amplifier with an output signal power of 10W and an output noise power of 0.01W, determine the signal-to-noise power ratio	7 Marks

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the V-I characteristics of Diode of Diode under forward and reverse bias.	10 Marks
	b)	An **ac** voltage of peak value 20**.**7V is connected in series with a silicon diode and a load resistance of 490Ω. The forward resistance of the diode is 10Ω. Calculate: i) peak current through the diode ii) peak voltage output voltage. What will be these values if the diode is assumed to be ideal?	4 Marks

(OR)

2	a)	Discuss about the temperature dependence of V-I characteristics of PN diode	5 Marks
	b)	Distinguish between transition capacitance and diffusion capacitance of PN junction diode.	4 Marks
	c)	Compare and contrast half-wave and full-wave rectifiers. Mention any three applications of rectifier	5 Marks

UNIT-II

3	a)	Sketch and explain the common base input and output characteristics. How do you draw these curves experimentally?	10 Marks
	b)	Describe the Base-Width modulation.	4 Marks

(OR)

4	a)	Explain how you would locate the operating point using the load line.	7 Marks
	b)	Explain the collector to base bias arrangement and derive at an expression for its stability factor with necessary circuit diagram.	7 Marks

UNIT-III

5	a)	Define h-parameters. How do you determine h-parameters from transistor characteristics?	7 Marks
	b)	Draw the circuit diagram of CB amplifier circuit and its h-parameter equivalent circuit. List the characteristics of a CB amplifier.	7 Marks

(OR)

6	a)	Analyze the CC amplifier using approximate hybrid model.	8 Marks
	b)	Describe the simplified hybrid model.	6 Marks

UNIT-IV

7	a)	Draw the circuit diagram of common source amplifier and derive expression for gain of the amplifier.	7 Marks
	b)	With neat structure, explain the principle of operation of depletion MOSFET.	7 Marks

(OR)

8	a)	Explain the Drain and Transfer characteristics of a JFET.	7 Marks
	b)	With neat diagrams, explain the characteristics of MOSFET in enhancement mode.	7 Marks

UNIT-V

9	a)	Explain the working principle and characteristics of SCR.	7 Marks
	b)	Draw the equivalent circuit of UJT and explain the characteristics.	7 Marks

(OR)

10	a)	Write the applications of UJT.	6 Marks
	b)	Explain the operation of varactor diode.	8 Marks

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain about the characteristics of zener diode.	6 Marks
	b)	What are the specifications of p-n junction diode? Explain how reverse saturation current varies with temperature both in Si and Ge diodes.	8 Marks
		(OR)	
2	a)	Draw the block diagram of a regulated power supply and explain its operation.	7 Marks
	b)	Write the diode equation and discuss the effect of temperature on diode current.	7 Marks

UNIT-II

3	a)	Explain how transistor is used an amplifier.	7 Marks
	b)	Derive the relationship between α and β.	7 Marks
		(OR)	
4	a)	Derive an expression for the stability factor of a collector to base bias circuit.	7 Marks
	b)	Explain about measurement of h-parameters from transistor characteristics in CE configuration.	7 Marks

UNIT-III

5	a)	Explain the Drain and Transfer characteristics of a JFET.	7 Marks
	b)	With neat sketch, explain the characteristics of MOSFET in enhancement mode.	7 Marks
		(OR)	
6	a)	Draw the circuit diagram of common source amplifier and formulate the equation for gain of the amplifier.	7 Marks
	b)	With neat structure, explain the principle of operation of depletion MOSFET.	7 Marks

UNIT-IV

7	a)	With a neat sketch, explain the working of RC phase shift oscillator.	8 Marks
	b)	What is meant by feedback? What are the effects of negative feedback?	6 Marks
		(OR)	
8	a)	Explain in detail about the different feedback topologies.	6 Marks
	b)	Derive an expression for frequency of oscillation for RC phase shift oscillator.	8 Marks

UNIT-V

9	a)	Describe working principle of an SCR with V-I characteristics.	7 Marks
	b)	Compare and contrast between SCR and TRIAC.	7 Marks
		(OR)

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Convert the given Binary number 11011101 in: i) BCD ii) HEXADECIMAL iii) DECIMAL	7 Marks
	b)	What is a 2's complement? Explain it with an example.	7 Marks
		(OR)	
2	a)	What is canonical form? Explain different canonical forms with an example.	7 Marks
	b)	Draw the logic diagram for the given Boolean expression $F = A\overline{B} + \overline{C}D + ABC$.	7 Marks

UNIT-II

3	a)	What is Karnaugh map? Explain its concept with example	4 Marks
	b)	Simplify the Boolean Function $F(A,B,C,D) = \Pi\,(0,2,5,6,7,9,11,14)$ using karnaugh map.	10 Marks
		(OR)	
4	a)	Explain don't-care condition.	4 Marks
	b)	Implement AND, OR, NOT gates using Universal gates	6 Marks
	c)	Describe EX-OR function with an example.	4 Marks

UNIT-III

5		Construct a 8 x 1 multiplexer for the Boolean function F(A,B,C,D)=Σ(1,3,4,11,12,13,14,15).	14 Marks
		(OR)	
6	a)	Design a priority 4-bit priority Encoder circuit	8 Marks
	b)	Write the truth table for a full adder. Explain the operation of a binary adder-subtract or with a block diagram.	6 Marks

UNIT-IV

7	a)	Compare combinational circuit with sequential circuit.	7 Marks
	b)	What is Flip-Flop? Explain about J-K, D-Flip-Flop.	7 Marks
		(OR)	
8		Implement 4-bit Synchronous counter with a neat diagram.	14 Marks

UNIT-V

9	a)	Describe the functioning of SRAM and DRAM in detail.	7 Marks
	b)	Write short notes on Sequential Programmable Devices.	7 Marks
		(OR)	
10		With a block diagram, explain the functioning of a PAL.	14 Marks

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Show the following equivalence $P\rightarrow(Q \vee R) \Leftrightarrow (P\rightarrow Q) \vee (P\rightarrow R)$	7 Marks
	b)	Express the product of sum canonical form of the formula $(P \wedge Q) \vee (\neg P \vee Q \wedge R)$	7 Marks

(OR)

2	a)	Show that S∪R is tautologically implied by (P∪Q) ∩(P→R) ∩(Q→S).	7 Marks
	b)	Explain about free and bounded variables in detail in the context of predicate logic.	7 Marks

UNIT-II

3	a)	Define partial and total order of relations.	5 Marks
	b)	Design a Hasse diagram of {1, 2, 3, 6, 12} under the partial ordering relation 'divided'.	9 Marks

(OR)

4	a)	Show that f (x, y) = x y is a primitive recursive function.	7 Marks
	b)	Let X={1, 2, 3, 4, 5, 6, 7} and R={(x,y)/x-y is divisible by 3 } in X. Design an Equivalence Relation.	7 Marks

UNIT-III

5	a)	Define a semi group and a monoid. Give an example for a semi group but not monoid.	7 Marks
	b)	Prove that a Group in which every element has its own inverse, is abelian group.	7 Marks

(OR)

6	a)	**(G,*)** is a group and (a,b)€G then show that $(a * b)^{-1} = b^{-1} * a^{-1}$.	7 Marks
	b)	Every finite group of order "n" is isomorphic to a permutation group of degree 'n' prove it.	7 Marks

UNIT-IV

7	a)	In $(1 + x^5 + x^9)^{10}$ find the coefficient of x^{23} and x^{32}.	7 Marks
	b)	Compute the number of six letter combinations of the letter of English alphabet. If no letter is to appear in the combination more than 2 times.	7 Marks

(OR)

8	a)	Solve the Recurrence Relation $a_n - 9a_{n-1} - 26a_{n-2} - 24a_{n-3} = 0$ where $a_0=0$, $a_1=1$ and $a_2=10$.	7 Marks
	b)	How many ways can 5 day's be chosen from each of the 12 months of an ordinary year of 365 day's.	7 Marks

UNIT-V

9	a)	Show that the complete graph k_s is non planar.	7 Marks
	b)	Explain BFS algorithm with example.	7 Marks

(OR)

10	a)	State and prove Grin berg's theorem.	7 Marks
	b)	Show that the complete Bipartite graph of $k_{3,3}$ is non planar.	7 Marks

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Define beta and gamma functions and establish a relationship between them. 7 Marks

b) State Bessels differential equation and its solution $J_n(x)$. Show that $J_{1/2}(x) = \sqrt{\frac{2}{\pi x}} \sin x$. 7 Marks

(OR)

2 a) Show that $2^{2n-1}\Gamma(n)\left(n+\frac{1}{2}\right) = \Gamma(2n)\sqrt{\pi}$. 7 Marks

b) Show that $J_{3/2}(x) = \sqrt{\frac{2}{\pi x}}\left(\frac{1}{x}\sin x - \cos x\right)$. 7 Marks

UNIT-II

3 a) Show that $\left(\frac{\partial^2}{\partial x^2} + \frac{\partial^2}{\partial y^2}\right)\log|f'(z)| = 0$, where $f(z)$ is analytic function. 7 Marks

b) Find the an analytic function $f(z) = u + iv$, given that $u - v = (x - y)(x^2 + 4xy + y^2)$. 7 Marks

(OR)

4 a) Show that the function $f(z) = \sqrt{|xy|}$ is not analytic at the origin, although C-R equations are satisfied at that point. 7 Marks

b) Find the analytic function $f(z) = u + iv$ if $u = a(1 + Cos\theta)$. 7 Marks

UNIT-III

5 a) Evaluate $\int_0^{1+i} (x^2 - iy)\,dz$ along the path (i) y=x (ii) $y= x^2$. 7 Marks

b) Evaluate $\oint_c \frac{\cos \pi z^2}{(z-1)(z-2)}\,dz$ where c is the circle |z|=3 using Cauchy's integral Formula. 7 Marks

(OR)

6 a) Evaluate $\oint_c \frac{\sin \pi z^2 + \cos \pi z^2}{(z-1)(z-2)}\,dz$ where C is the circle |z| = 4. 7 Marks

b) Expand $\frac{1}{z^2 - 3z + 2}$ in the region (i) |z| < 1, (ii) | z|> 2 (iii) 1<|z|<2 using Taylor's series. 7 Marks

UNIT-IV

7 a) Determine the poles of the function and the corresponding residues $\frac{z+1}{z^2(z-2)}$. 7 Marks

b) Evaluate $\int_0^{2\pi} \frac{Sin3\theta}{5-3\cos\theta} d\theta$ using Residue theorem. 7 Marks

(OR)

8 a) Calculate the value of $\oint_c \frac{z-3}{z^2+2z+5}$ dz where C is the circle |z+1+i |=2. 7 Marks

b) Evaluate $\int_0^{\infty} \frac{dx}{\left(x^2+1\right)^2}$. 7 Marks

UNIT-V

9 a) Under the Transformation W = $\frac{1}{z}$ find the image of |z-2i|=2. 7 Marks

b) Find the Bilinear Transformation which maps the points z = 1, i, - 1 in to the points w =1,0,-i. 7 Marks

(OR)

10 a) Find the image of the following curve under the mapping w = 1/z. 7 Marks

b) Discuss the Transformation $w = e^z$. 7 Marks

PROBABILITY AND STATISTICS

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Define random variable, discrete random variable, continuous random variable and conditional probabilities. 7 Marks

b) If x and y are continues random variable, then prove that $E(X+Y)=E(X)+E(Y)$. 7 Marks

(OR)

2 a) If *x* and *y* are continuous random variable, then prove that $E(XY)=E(X)E(Y)$. 7 Marks

b) A Probability cure y = f (x) has a range from 0 to $\propto$ if f (x) = e^{-x}, find the mean, variance and the third moment. 7 Marks

UNIT-II

3 a) Derive mean and variance of Binomial Distribution. 7 Marks

b) Samples of (n=6) items are drawn at random from the production process which is making 10% defectives, Calculate the probabilities of 0,1,2,3,4,5 and 6 defectives in a sample. 7 Marks

(OR)

4 a) Derive the mean and variance of normal distribution. 7 Marks

b) If x is a Poisson variable such that $p(x = 1) = 24\ p(x = 3)$, find the probability $p(x=0)$. 7 Marks

UNIT-III

5 a) Explain briefly the following content. 7 Marks
i) Statistical quality control.
ii) Specification limits, X, R, P and np.

b) Calculation co-efficient of correlation between *x* and *y*. 7 Marks

x	9	8	7	6	5	4	3	2	1
y	15	16	14	13	11	12	10	8	9

(OR)

6 a) Obtain the rank correlation co- efficient for the following data. 7 Marks

X	68	64	75	50	64	80	75	40	55	64
Y	62	58	68	45	81	60	68	48	50	70

b) Derive angle between two Regression lines. 7 Marks

UNIT-IV

7 a) Define the following. 8 Marks
i) Sampling distribution. ii) Standard error.
iii) Errors in sampling. iv) Level of significance.

b) According to the norms established for a mechanical aptitude test, persons who are 18 years old have an average height of 73.2 with a standard deviation of 8.6. If 4 randomly selected persons of that age averaged 76.7, test the hypothesis m = 73.2 against the alternative hypothesis m > 73.2 at the 0.01 level of significance. 6 Marks

(OR)

8 a) A manufacturer claimed that atleast 95% of the equipment which he supplied to factory conformed to specifications. An examination of a sample of 200 pieces of equipment revealed that 18 were faulty. Test his claim at 5% level of significance. 7 Marks

b) Samples of students were drawn from two universities and from their weights in kilograms, mean and standard deviations are calculated and shown below. Make a large sample test to test the significance of the difference between the means. 7 Marks

	Mean	S.D.	Size of the sample
University A	55	10	400
University B	57	15	100

UNIT-V

9 a) Two horses A and B were tested according to the time (in seconds) to run a particular track with the following results. 7 Marks

Horse A	28	30	32	33	33	29	34
Horse B	29	30	30	24	27	29	-

Examine whether the two horses have the same running capacity.

b) Pumpkins were grown under two exponential conditions. Two random samples of 11 and 9 pumpkins show the sample standard deviations of their weights as 0.8 and 0.5 respectively. Assuming that the weight distributions are normal, test hypothesis that true variances are equal. 7 Marks

(OR)

10 a) A sample of 26 bulbs gives a mean life of 990 hours with a S.D of 20 hours. The manufacturer claims that the mean life of bulbs is 1000 hours. Examine whether the sample is up to the standard. 7 Marks

b) To compare two kinds of bumper guards, 6 of each kind were mounted on a car and then the car was run into a concrete wall. The following are the costs of repairs. 7 Marks

Guard 1	107	148	123	165	102	119
Guard 2	134	115	112	151	133	129

Use the 0.01 level of significance to determine whether the difference between two sample means is significant.

FLUID MECHANICS-I

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	Differentiate between: (i) Liquids and gases. (ii) Real fluids and ideal fluids. One litre of crude oil weighs 9.6N. Calculate its specific weight, density and specific gravity.	14 Marks

(OR)

2	State and Prove the Pascal's law. Determine the total pressure on a circular plate of diameter 1.5m which is placed vertically in water in such a way that the centre of the plate is 3m below the free surface of water. Find the position of centre of pressure also.	14 Marks

UNIT-II

3	The stream function in a two dimensional flow is $\psi = 3x-2y+5xy$. Verify whether the flow is irrotational. Determine the direction of stream line at a point (1, -2). Determine also the expression for the velocity potential.	14 Marks

(OR)

4	A pipe 250 m long has a slope of 1 in 100 and tapers from 1.5 m diameter at the higher end to 0.7 m at the lower end. The quantity of water flowing is 700 lit / sec. If the pressure at the higher end is 60KPa, find the pressure at the lower end.	14 Marks

UNIT-III

5	Derive an expression for loss of head due to sudden enlargement and find the head lost due to friction in a pipe of diameter 360 mm and length 60 m through which water is flowing at a velocity of 2.5 m/s using Darcy formula and Chezy's formula for which C=60. Assume kinematic viscosity as 0.01 stoke.	14 Marks

(OR)

6	Differentiate between notch and weir and A discharge of 0.06 cumec was measured over right angled notch. While measuring the head over the notch, an error of 1.5 mm was made. Determine the percentage error in the discharge, if coefficient of discharge of notch is 0.6.	14 Marks

UNIT-IV

7	Describe the Reynolds's experiment with a neat sketch. Explain how would you distinguish between hydro dynamically smooth and rough boundaries.	14 Marks

(OR)

8	A laminar flow is taking place in a pipe of diameter 200 mm. The maximum velocity is 1.5 m/s. Find the mean velocity and the radius at which this occurs. Also calculate the velocity at 4cm from the wall of the pipe.	14 Marks

UNIT-V

9	Explain the procedure for solving problem by Buckingham's π theorem in briefly.	14 Marks

(OR)

10	Explain the following. i) Geometric Similarity. ii) Kinematic Similarity. iii) Dynamic Similarity	14 Marks

CODE No.:14BT30202 SVEC-14

Roll No. | | | | | | | | | | |

DC MACHINES

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Discuss the principle of operation of DC machine as a motor and as a generator.	7 Marks
	b)	Derive the expression of EMF generated in case of generator from the first principles.	7 Marks

(OR)

2		With the help of sketches, describe the main construction and working principle of a DC generator.	14 Marks

UNIT-II

3	a)	Define the terms: back pitch, front pitch with reference to dc armature windings.	4 Marks
	b)	Draw the developed view of 24-slot, 2-pole lap connected armature winding clearly indicating position of brushes and commutator.	10 Marks

(OR)

4	a)	Derive EMF equation of a DC generator.	7 Marks
	b)	The lap wound armature of a 4-pole generator armature has 51-slots, each slot having 20 conductors. Compute the EMF generated in the machine when driven at 1500 r.p.m, if useful flux per pole is 0.01Wb.	4 Marks
	c)	Write significance of dummy coils used in a wave wound armature.	3 Marks

UNIT-III

5	a)	Write the reasons and remedial measures for failure of voltage build up in a self excited DC generator.	7 Marks
	b)	Define critical field resistance. Explain the procedure for determination of critical field resistance of DC shunt generator experimentally.	7 Marks

(OR)

6	a)	Why the parallel operation of series generators is unstable. What remedial measures are taken for its successful operation?	7 Marks
	b)	A shunt generator has an induced voltage of 254 V. When the machine is laded, the terminal voltage drops down to 240 V. Neglecting armature reaction, determine the load current, if the armature resistance is 0.04Ω, and the field circuit resistance is 24Ω.	7 Marks

UNIT-IV

7	a)	Discuss various speed control methods of DC series motor.	7 Marks
	b)	A 230 V DC shunt motor drives a load at 900 r.p.m drawing a current of 30 A. The resistance of armature is 0.4Ω. The torque of load is proportional to speed. Calculate the resistance to inserted into armature circuit to get 600 r.p.m	7 Marks

(OR)

8	a)	Draw the circuit diagram of Ward-Leonard method of speed control of DC motor and explain how speed can be controlled. Mention its applications	7 Marks
	b)	Two series motors run at 650 r.p.m and 750 r.p.m respectively when taking a current of 60 A from 600 V supply. Total resistance of each motor is 0.3Ω. If two motors are mechanically coupled and put in series across 600 V supply, at what speed the set will run when still taking a current of 60A?	7 Marks

UNIT-V

9 a) Explain the experimental procedure to conduct Hopkinson's test with help of circuit diagram. 7 Marks

b) Field's test on two mechanically coupled DC series machines gave the following data: 7 Marks

	Armature voltage (V)	Field winding drop (V)	Armature Current (A)
Motor	500	38	50
Generator	400	36	38

Resistance of each armature winding is 0.2Ω. Calculate efficiency of each machine at this load.

(OR)

10 a) Explain how different components of stray losses can be separated using an experiment. 7 Marks

b) Describe a suitable method of determining efficiency of DC series motor. 7 Marks

FOUNDATIONS OF ELECTRICAL ENGINEERING
[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define and explain about ideal and practical current, voltage sources.	6 Marks
	b)	Derive the relationship to express three delta connected resistances into equivalent star.	8 Marks

(OR)

2	a)	State and explain Ohms law. What are its limitations?	7 Marks
	b)	A capacitance of 40.0 μF has a voltage described as follows: for $0 > t > 2$ ms, $v = 35 \times 10^3 t$ (V). Determine i, p, and w at t = 1.5 ms.	7 Marks

UNIT-II

3	a)	Explain how average value and **rms** value can be determined for a given wave form.	7 Marks
	b)	A RL circuit with R=35Ω and L=0.3mH has a voltage v = 135 sin 270t (V). Find the power p and the **rms** power p_{rms} over one cycle.	7 Marks

(OR)

4	a)	Define the terms complex power, real power and reactive power.	7 Marks
	b)	Explain why **j** operator is used in circuit analysis.	7 Marks

UNIT-III

5	a)	Derive the mathematical expression for generated **e.m.f** of a DC generator.	8 Marks
	b)	In a particular DC machine if P=8, Z=400 N=300 r.p.m and Φ=100mWb. Calculate generated **e.m.f** for wave winding.	6 Marks

(OR)

6	a)	Explain different types of DC motor.	8 Marks
	b)	From the first principles calculate the torque developed by a 4 pole dc motor having 1150 lap connected conductors the armature current is 19 A and the flux per pole is 25 mWb.	6 Marks

UNIT-IV

7	a)	Explain the principle and operation of single phase transformer.	8 Marks
	b)	Draw the phasor diagram for the single phase transformer operating on NO-LOAD.	6 Marks

(OR)

8	a)	Explain the principle of operation of 3-phase Induction Motor.	8 Marks
	b)	Discuss about the principle operation of AC Servo Motor.	6 Marks

UNIT-V

9	a)	Differentiate between open loop and closed loop control systems.	7 Marks
	b)	Mention some examples for time variant and time invariant systems.	7 Marks

(OR)

10	a)	Explain the classification of control systems.	7 Marks
	b)	What is the effect of feedback on the output of the given control system?	7 Marks

MATERIALS SCIENCE AND METALLURGY
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Show that the packing efficiency of FCC and HCP unit cells are 74%.	7 Marks
	b)	Mark the planes (100), (110) and (111) in a cubic lattice. Mark all the directions that can exist on these planes and write the corresponding Miller indices of direction.	7 Marks

(OR)

2	a)	Define atomic packing factor. Calculate atomic packing factor for FCC.	7 Marks
	b)	Explain Henry's intercept method in grain size measurement.	7 Marks

UNIT-II

3	a)	Explain the terms: i) Eutectic. ii) Eutectoid.	7 Marks
	b)	Draw the schematic microstructures of slowly cooled eutectoid steel and hypo-eutectoid steel.	7 Marks

(OR)

4	a)	Differentiate between peritectic transformation and peritectoid transformation.	7 Marks
	b)	Explain effect of alloying elements on iron-iron carbon system.	7 Marks

UNIT-III

5	a)	Compose the following heat treatment process. i) Annealing. ii) Normalizing.	7 Marks
	b)	Compare and contrast any two surface hardening methods.	7 Marks

(OR)

6	a)	Explain about TTT diagrams.	7 Marks
	b)	Write about Cryogenic treatment of alloys.	7 Marks

UNIT-IV

7	a)	What are the common alloying elements other than carbon in alloy cast iron? Explain.	7 Marks
	b)	Describe the composition, properties and uses of Tool steels?	7 Marks

(OR)

8	a)	How you will classify cast iron? Explain structure and properties of each cast iron.	7 Marks
	b)	Explain briefly about super alloys.	7 Marks

UNIT-V

9	a)	Write the advantages and limitations of powder metallurgy.	6 Marks
	b)	Explain about Sintering process in detail.	8 Marks

(OR)

10	a)	Discuss about metal matrix composite.	7 Marks
	b)	State any five applications of polymer matrix composite.	7 Marks

PROBABILITY AND STOCHASTIC PROCESSES

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) A Supplier receives 1000 shirts from a textile company. The probability that a shirt is defective is 10^{-2}. Find the probability that there will be more than five shirts are defective. 7 Marks

b) State and prove Baye's theorem. 7 Marks

(OR)

2 a) When are two events said to be mutually exclusive? Explain with an example. 7 Marks

b) When two dice are thrown, calculate the probability of getting the sums of 10 or 11. 7 Marks

UNIT-II

3 a) State and prove any four properties of probability density function. 6 Marks

b) When two dice are thrown, calculate the expected value of the sum of number of points on them. 8 Marks

(OR)

4 a) Explain Conditional density and list the properties of conditional density. 6 Marks

b) The sample space for an experiment is S = {0, 1, 2, 5, 6}. List all the possible values of the following random variables; (i) X = 2s (ii) X = $5s^2$ -1. 8 Marks

UNIT-III

5 a) Find the characteristic function for a random variable with density function $f_X(\omega) = x$ for $0 \leq x \leq 1$. 8 Marks

b) Define and explain the characteristic function. 6 Marks

(OR)

6 a) Find the skew for Gaussian distributed random variable. 7 Marks

b) Define conditional distribution and density function of two random variables X and Y. 7 Marks

UNIT-IV

7 a) Explain about random processes. 6 Marks

b) State and prove mean Ergodic theorem. 8 Marks

(OR)

8 a) Explain in detail the Gaussian random Processes. 7 Marks

b) Discuss auto correlation function and its properties. 7 Marks

UNIT-V

9 a) Define the term interference and list several sources. 7 Marks

b) For an amplifier with an output signal power of 10W and an output noise power of 0.01W ,determine the signal-to-noise power ratio. 7 Marks

(OR)

10 a) Define the noise factor and noise figure and describe their significance. 5 Marks

b) For a non ideal amplifier and the following parameters, determine: 9 Marks

i) input signal-to-noise ratio (dB). ii) output signal-to-noise ratio (dB).
iii) Noise factor and noise figure.

Roll No. | | | | | | | | | | |

SEMICONDUCTOR DEVICES AND CIRCUITS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Mention five diode characteristic parameters usually mentioned in specification sheets and explain their significance.	4 Marks
	b)	Describe the breakdown mechanism s in Semiconductor diodes.	10 Marks
		(OR)	
2	a)	Draw the circuit diagram of FWR with inductor filter and explain the circuit operation.	7 Marks
	b)	A full wave rectified voltage of 18V peak is applied across 500mF capacitor filter. Calculate the ripple and DC voltages if the load makes a current of 100mA.	7 Marks

UNIT-II

3	a)	Describe the constructional features of a BJT. How do you distinguish the emitter and the collector regions? Draw the circuit symbols of PNP and NPN transistors and indicate the directions of currents.	8 Marks
	b)	Discuss the parameters related to the Transistor current components.	6 Marks
		(OR)	
4	a)	Explain about base-width modulation with relevant waveforms	7 Marks
	b)	Why transistor is considered as current control device? Explain.	7 Marks

UNIT-III

5	a)	Define h-parameters. How do you determine h-parameters from transistor characteristics?	7 Marks
	b)	Draw the circuit diagram of CB amplifier circuit and its h-parameter equivalent circuit. List the characteristics of a CB amplifier.	7 Marks
		(OR)	
6	a)	Find the expressions for voltage gain, current gain, Input impedance and output impedances of CC amplifier using simplified hybrid model.	7 Marks
	b)	Compare BJT and JFET with reference to the construction, working principle, performance and applications.	7 Marks

UNIT-IV

7	a)	Explain with neat diagram the structure and characteristics of Depletion MOSFET.	7 Marks
	b)	Explain how FET acts as Voltage Variable Resistor.	7 Marks
		(OR)	
8	a)	Draw the circuit diagram of common source amplifier and derive expression for gain of the amplifier.	7 Marks
	b)	With neat structure, explain the principle of operation of depletion MOSFET.	7 Marks

UNIT-V

9	a)	Explain the working principle and characteristics of SCR.	7 Marks
	b)	Draw the equivalent circuit of UJT and explain the characteristics.	7 Marks
		(OR)	
10	a)	Describe the construction and working of Varactor Diode.	7 Marks
	b)	Analyze the tunneling phenomenon in a Tunnel Diode using energy band diagrams.	7 Marks

MATRICES AND NUMERICAL METHODS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Test for consistency and then solve the system of equations $x + 2y - z = 3$, $3x - y + 2z = 1$, $2x - 2y + 3z = 2$, $x - y + z = -1$. 7 Marks

b) State Cayley - Hamilton theorem and using it find the inverse of the matrix 7 Marks

$$\begin{bmatrix} 1 & 0 & 2 \\ 0 & 1 & 2 \\ 1 & 2 & 0 \end{bmatrix}$$

(OR)

2 a) Discuss the solutions of the system of equations 7 Marks

$2x + 3ky + (3k + 4)z = 0;\ x + (k + 4)y + (4k + 2)z = 0;\ x + 2(k + 1)y + (3k + 4)z = 0$

for all possible real values of k.

b) Calculate the eigen values and eigen vectors of the matrix 7 Marks

$$\begin{bmatrix} 6 & -2 & 2 \\ -2 & 3 & -1 \\ 2 & -1 & 3 \end{bmatrix}$$

UNIT-II

3 a) Evaluate the real root that lies between 2 and 3 for the equation $x \log_{10} x = 1.2$ by bisection method. 7 Marks

b) Evaluate y(10), by lagranges interpolation formula, from the following table. 7 Marks

x	5	6	9	11
y	12	13	14	16

(OR)

4 a) Estimate a real root of the equation $e^x \sin x = 1$, using Regula – Falsi method. 7 Marks

b) Using the method of least squares calculate the values of a and b such that $y = ae^{bx}$ that fits the following data: 7 Marks

x	0.0	0.5	1.0	1.5	2.0	2.5
y	0.10	0.45	2.15	9.15	40.35	180.75

UNIT-III

5 a) Evaluate $\int_o^n o^z \sqrt{\cos\theta}\, d\theta$ using Simpson's 1/3 rule by dividing the range into six equal parts. 7 Marks

b) Given that $\frac{dy}{dx} = y - x$, $y(0) = 2$. Find $y(0.2)$ using Runge-Kutta method of order 4 taking h= 0.1 7 Marks

(OR)

6 a) Using Euler method, solve for y at x=2 from $dy/dx=3x^2+1$, and y=1 when x=0. Taking step size h=0.25. 7 Marks

b) From the following data, find the area bounded by the curve and the x-axis from x=7.47 to x=7.52. 7 Marks

x	7.47	7.48	7.49	7.50	7.51	7.52
y=f(x)	1.93	1.95	1.98	2.01	2.03	2.06

UNIT-IV

7 a) Obtain the Fourier series for $f(x) = \pi x$, in $0 \le x \le 2$. 7 Marks

b) Find the Fourier sine transform of $\frac{x}{a^2 + x^2}, x \ge 0$. 7 Marks

(OR)

8 a) Obtain the half –range sine and cosine series for e^x in $(0, \pi)$. 7 Marks

b) Find the Fourier integral representation of $f(x) = \begin{cases} 1 - x^2 & for \ |x| \le 1 \\ 0 & for \ |x| > 1 \end{cases}$ 7 Marks

UNIT-V

9 a) Form the partial differential equation by eliminating arbitrary function from $xyz = f(x + y + z)$. 7 Marks

b) Solve by the method of separation of variables $\frac{\partial^2 u}{\partial x^2} = \frac{\partial u}{\partial y} + 2u$ satisfying u = 0 and $\frac{\partial u}{\partial x} = e^{2y}$, when x=0, for all y. 7 Marks

(OR)

10 a) Form the partial differential equation by eliminating the arbitrary functions f_1 and f_2 from $z = x f_1(x + t) + f_2(x + t)$. 4 Marks

b) A tightly stretched string with fixed end points $x = 0$ and $x = 1$ is initially in a position given by $y = y_0 \sin^3(\pi x)$. If it is released from rest from this position, find the displacement $y(x, t)$, using variable separable method. 10 Marks

SPECIAL FUNCTIONS AND COMPLEX ANALYSIS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Define beta and gamma functions and show that $\beta(m,n) = \int_0^1 \frac{x^{m-1} + x^{n-1}}{(1+x)^{m+n}}\,dx$ 7 Marks

b) Show that $\frac{n}{x}J_n(x) - J_n'(x) = J_{n+1}(x)$ 7 Marks

(OR)

2 a) Evaluate $\int_0^1 x^3\sqrt{1-xdx}$ using beta and gamma functions. 7 Marks

b) show that $\frac{d}{dx}[J_0(x)] = -J_1(x)$ 7 Marks

UNIT-II

3 a) Define continuity of a function f(z) at the point z = z_0 and show that the function $f(z) = \frac{\bar{z}}{z}$ is not continuous at z = 0 7 Marks

b) Construct a most general analytic function with $v = e^x$ (xsin y + y cos y) as its imaginary part. 7 Marks

(OR)

4 a) Define an analytic function and show that the function $f(z) = e^{-z^{-4}}$, $z \neq 0$ and f(0)=0 is not analytic at z = 0, though C-R equations are satisfied at origin. 7 Marks

b) Define a harmonic function and show that the real and imaginary parts of an analytic functions are harmonic**.** 7 Marks

UNIT-III

5 a) Evaluate $\int_C (z^2 + 3z + 2)dz$ where c is the arc of the cycloid $x = a(\theta + Sin\theta)$, $y = a(1 - Cos\theta)$ between the points (0, 0) and ($a\pi$, 2a). 7 Marks

b) Show that $\int_C (z+1)dz = 0$ where c is the boundary of the square whose vertices at the points $z = 0$, $z = 1$, $z = 1+i$, $z = i$. 7 Marks

(OR)

6 a) Find the Laurent series of $\frac{7z-2}{(z+1)z(z-2)}$ in the annulus $1 < |z+1| < 3$. 7 Marks

b) Evaluate $\int_C \frac{\cos\pi z^2}{(z-1)(z-2)^3}dz$ where C is $|z| = 3$, by using Cauchy's integral formula. 7 Marks

UNIT-IV

7 a) Determine the poles of the function and the corresponding residues $\frac{z+1}{z^2(z-2)}$. 7 Marks

b) Evaluate $\int_0^{2\pi} \frac{Sin3\theta}{5-3\cos\theta} d\theta$ using Residue theorem. 7 Marks

(OR)

8 a) Evaluate $\int_C \frac{(2z+1)^2}{(4z^3+z)} dz$ where C is the circle $|z| = 1$. 7 Marks

b) Evaluate $\int_{-\infty}^{\infty} \frac{x^2}{(x^2+1)(x^2+4)} dx$ using residue theorem. 7 Marks

UNIT-V

9 a) If $w = \frac{1+iz}{1-iz}$, find the image of $|z| < 1$. 7 Marks

b) Find the bilinear transformation which maps the points (-1, 0, 1) in to the points $(0, i, 3i)$. Also find the fixed points of the transformation. 7 Marks

(OR)

10 a) Find the image of the circle $|z| = 2$ under the transformation $w = z + 3 + 2i$. 7 Marks

b) Discuss the transformation $w = \cos z$. 7 Marks

Roll No. | | | | | | | | | | |

MECHANICS OF SOLIDS
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Derive an expression for the elongation of a axially loaded bar for the following conditions: 14 Marks

i) Tapering bar having diameter D_1 at one end and D_2 at the other end.

ii) Rectangular tapering bar having depth D_1 at one end and D_2 at the other end with constant width B.

(OR)

2 Derive expression for the elongation of the following bars under its own weight. Density of the material is γ. 14 Marks

i) Prismatic bar. ii) Conical bar fixed at base.

UNIT-II

3 Define the SF and BM at a section of a beam. Explain the utility of drawing SF and BM diagrams for a beam. Also obtain relationship between SF and BM. 14 Marks

(OR)

4 A cantilever of 2m long is loaded with a UDL of 2kN/m which run over a length of 1.35m from the free end. It also carries a point load of 2.5kN at a distance of 0.25m from the free end. Draw the SF and BM diagrams for the cantilever. 14 Marks

UNIT-III

5 Three steel, plates of width 300mm and thickness 10mm are welded together to form a channel section. What is the moment of resistance of the section if the allowable bending in compression is 60MPa and in tension is 80MPa? 14 Marks

(OR)

6 Sketch the variation of shear stress across the depth of an I section of depth 300mm, web thickness 10mm and flange size of 100mm x 10mm. The Flexural shear force action on the section is 200kN. 14 Marks

UNIT-IV

7 Design the diameter of a steel shaft to transmit 150 kW power at 150 r.p.m. The maximum shear stress is limited to 60 MPa the angle of twist is limited to 2.5 degrees in its length of 3m. Rigidity modulus of steel is 80 GPa 14 Marks

(OR)

8 Derive Torsion equation and determine the power transmitted by a solid shaft of 120 mm diameter rotating at 100 r.p.m., if the maximum shear stress is not to exceed 80 Mpa. The maximum torque is 20% more than its mean value. 14 Marks

UNIT-V

9 A thin steel cylindrical shell of thickness 14mm, 1m diameter and 3.25m long is carrying a fluid at a pressure of 1.6N/mm². Find the change in dimensions of the cylinder. 14 Marks

(OR)

10 A steel cylinder of 350mm external diameter is to be shrunk over another cylinder of internal diameter 200mm. After shrinkage the diameter at the junction is 300mm and the radial pressure at the junction is 30N/mm². Find the original difference in radii at the junction. 14 Marks

FLUID MECHANICS-I

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Define the terms Specific weight, Capillarity, Viscosity and Specific volume and the specific gravity of a liquid is 3.0. What are its specific weight, specific mass and specific volume? 14 Marks

(OR)

2 State and Prove the Pascal's law. Determine the total pressure on a circular plate of diameter 1.5m which is placed vertically in water in such a way that the centre of the plate is 3m below the free surface of water. Find the position of centre of pressure also. 14 Marks

UNIT-II

3 Derive continuity equation for one dimensional flow and list out uses and limitations of flow net. 14 Marks

(OR)

4 250 litres/s of water is flowing in a pipe having a diameter of 300mm. If the pipe is bent by 135° (that is change from initial to final direction is 135°), find the magnitude and direction of the resultant force on the bend. The pressure of water flowing is 39.24 N/cm^2. 14 Marks

UNIT-III

5 A pipe of diameter 20cm and length 2000m connects two reservoirs, having difference in water levels as 20m. Determine the discharge through the pipe. If an additional pipe of diameter 20cm and length 1200m is attached to the last 1200m length of the existing pipe, find the increase in the discharge. Take f=0.015 and neglect minor losses. 14 Marks

(OR)

6 Determine the rate of low of water through a pipe of diameter 20cm and length 50m when one end of the pipe is connected to a tank and other end of the pipe is open to the atmosphere. The pipe is horizontal and the height of water in the tank is 4 m above the centre of the pipe. Consider all minor losses and take f = 0.009 in the formula $h_f = 4flv^2/2gD$. 14 Marks

UNIT-IV

7 Describe the Reynolds's experiment with a neat sketch. Explain how would you distinguish between hydro dynamically smooth and rough boundaries. 14 Marks

(OR)

8 A laminar flow is taking place in a pipe of diameter 200mm. The maximum velocity is 1.5m/s. Find the mean velocity and the radius at which this occurs. Also calculate the velocity at 4cm from the wall of the pipe. 14 Marks

UNIT-V

9 Discharge Q through a turbine is a function of the turbine speed n, head H, diameter D of the runner, density ρ and viscosity μ of the fluid and acceleration due to gravity g. Find an expression for Q. 14 Marks

(OR)

10 Explain Froude model law and A 1:64 model is constructed of an open channel in concrete which has Manning's N=0.014. Find the value of N for the model. 14 Marks

MATERIALS SCIENCE AND METALLURGY
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define atomic packing factor. Calculate atomic packing factor for FCC.	7 Marks
	b)	Explain Henry's intercept method in grain size measurement.	7 Marks
		(OR)	
2	a)	Why FCC metals are in general more ductile than BCC and HCP metals? Explain.	7 Marks
	b)	Explain primary and secondary bonding in materials.	7 Marks

UNIT-II

3	a)	Discuss about Allotropy of iron.	6 Marks
	b)	Write the effect of alloying elements on Iron-Iron carbon system.	8 Marks
		(OR)	
4	a)	Differentiate between peritectic transformation and peritectoid transformation.	9 Marks
	b)	Explain effect of alloying elements on iron-iron carbon system.	5 Marks

UNIT-III

5	a)	"Hardening of steel is always followed by tempering" Give reasons.	6 Marks
	b)	What is carburizing? Why is it done?	8 Marks
		(OR)	
6	a)	Explain about TTT diagrams.	8 Marks
	b)	Write about Cryogenic treatment of alloys.	6 Marks

UNIT-IV

7	a)	What are the common alloying elements other than carbon in low alloy steels? Explain.	7 Marks
	b)	What is brass? Describe the composition, properties and uses of important types of brasses.	7 Marks
		(OR)	
8	a)	Explain why titanium alloys are used in turbines.	7 Marks
	b)	List any five applications of aluminum alloys.	7 Marks

UNIT-V

9	a)	Write the advantages and limitations of powder metallurgy.	6 Marks
	b)	Explain about Sintering process in detail.	8 Marks
		(OR)	
10	a)	Discuss about metal matrix composite.	7 Marks
	b)	State any five applications of polymer matrix composite.	7 Marks

SEMICONDUCTOR DEVICES AND CIRCUITS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the V-I characteristics of PN diode and Zener diode. And differentiate them.	7 Marks
	b)	Draw the circuit of a full wave rectifier circuit with L section filter and derive the expression for ripple factor.	7 Marks
		(OR)	
2	a)	Mention five diode characteristic parameters usually mentioned in specification sheets and explain their significance.	4 Marks
	b)	Describe the breakdown mechanism s in Semiconductor diodes.	10 Marks

UNIT-II

3	a)	Explain about base-width modulation with relevant waveforms	5 Marks
	b)	Why transistor is considered as current control device? Explain.	5 Marks
	c)	What is the condition for thermal stability?	4 Marks
		(OR)	
4	a)	Sketch the input and output characteristics of a transistor in CB configuration.	7 Marks
	b)	Explain how a transistor works as an amplifier.	7 Marks

UNIT-III

5		Derive the expressions for voltage gain, current gain, Input impedance, output impedance, voltage gain with respect to source and current gain with respect to source for generalized transistor amplifier at low frequencies.	14 Marks
		(OR)	
6	a)	Analyse the CB amplifier using approximate hybrid model.	8 Marks
	b)	Write the concept of Millers theorem and mention applications.	6 Marks

UNIT-IV

7	a)	Explain the pinch-off voltage,V-I characteristics of JFET .	6 Marks
	b)	With neat diagram, explain the operation of MOSFET in Enhancement mode.	8 Marks
		(OR)	
8	a)	Explain the common drain amplifier and derive expression for gain of the amplifier.	8 Marks
	b)	Write the comparisons of BJT and JFET.	6 Marks

UNIT-V

9	a)	Explain the operation of tunnel diode and draw its equivalent circuit.	8 Marks
	b)	With neat diagram, explain about varactor diode.	6 Marks
		(OR)	
10	a)	Explain the working principle and characteristics of SCR.	7 Marks
	b)	Draw the equivalent circuit of UJT and explain the characteristics.	7 Marks

PROBABILITY DISTRIBUTIONS AND STATISTICAL METHODS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Let $F(x)$ be the distribution function of a random variable X given by CO4 7 Marks

$$F(x) = \begin{cases} cx^3, when\ 0 \le x < 3 \\ 1, when x \ge 3 \\ 0, when x < 0 \end{cases}$$

Determine i) probability density function. ii) value of c. iii) Mean.
iv) P(X>1) of a random variable X.

b) Let $f(x) = 3x^2$, when $0 \le x \le 1$ be the probability density function of a continuous variable X. By analyzing the functions, estimate the value of *'a'* and *'b'* such that CO2 7 Marks

(i) $P(X \le a) = P(X > a)$ (ii) $P(X > b) = 0.05$.

(OR)

2 a) A player tosses 3 fair coins. He wins Rs. 500, if 3 heads appear ; Rs. 300, if 2 heads appear ; Rs. 100 if 1 head occur. On the other hand, he loses Rs. 1500, if 3 tails occur. Calculate the expected gain of the player. CO4 7 Marks

b) Probability density function of random variable X is CO1 7 Marks

$$f(x) = \begin{cases} \frac{1}{2}\sin x, for\ 0 \le x \le \pi \\ 0, \quad elsewhere \end{cases}$$

Estimate the mean and median of the distribution and also find $P(0 \le X \le \frac{\pi}{2})$.

UNIT-II

3 a) Construct a binomial distribution and find expected frequencies to the following data CO3 7 Marks

X	0	1	2	3	4	5	6
f	13	25	52	58	32	16	4

b) Average number of accidents on any day on a national highway is 1.8. Determine the probability that the numbers of accidents is CO4 7 Marks

i) at least one. (ii) at most one.

(OR)

4 a) Calculate the probability that at most 5 defective components will be found in a lot of 200. Experience shows that 2 % of such components are defective. Also estimate the probability of more than five defective components. CO4 7 Marks

b) The marks obtained in statistics in a certain examination found to be normally distributed. If 15% of students got greater than or equal to 60 marks, 40 % of students got less than 30 marks, Estimate the mean and standard deviation. CO4 7 Marks

UNIT-III

5 The following are the figures of defectives in 22 lots each containing 2000 rubber belts 25, 430, 216, 341, 225, 322, 280, 306, 337, 305, 356, 402, 216, 264, 126, 409, 193, 326, 280, 389, 451, 420. Design control chart for the fraction defectives and comment on the state of control of the process. CO3 14 Marks

(OR)

6 Calculate the correlation coefficient and regression lines for the following data CO4 14 Marks

X	2	4	6	8	10	12	14
Y	4	2	5	10	4	11	12

UNIT-IV

7 a) In a sample of 500 from a village in Andhra Pradesh, 280 are found to be rice eaters and the rest are wheat eaters. Examine that both the articles are equally popular or not. Justify. CO2 7 Marks

b) A random sample of size 32 from a normal population having the mean 47.5 and the standard deviation 8.4. Examine whether the information support or refuse the claim, that the mean of the population is 42.5. CO2 7 Marks

(OR)

8 a) At a certain date in a large city 400 out of a random sample of 500 men were found to be smokers. After the heavy taxation on tobacco another sample of 600 men in the same city included 400 smokers. Examine whether decrease in the proportion of smokers significant. CO2 7 Marks

b) A sample of 500 members has a mean 2.5 cms and standard deviation 2.21 cms. By relevant statistical technique check whether the sample has drawn from the population with a mean 3 cms and standard deviation 2.21 cms. CO5 7 Marks

UNIT-V

9 a) A sample of 26 bulbs give a mean life of 990 hours with a standard deviation of 20 hours. The manufacturer claims that the mean life of bulbs is 1000 hours. Discuss whether the sample is up to the standard or not. CO2 7 Marks

b) The measurements of the output of two units have given the following results. Assuming that both samples have been obtained from the normal population at 10% significance level, test whether the two populations have the same variance. CO4 7 Marks

Unit-A	14.1	10.1	14.7	13.7	14.0
Unit-B	14	14.5	13.7	12.7	14.1

(OR)

10 4 coins were tossed 160 times and the following results were obtained. CO4 14 Marks

No. of Heads :	0	1	2	3	4
Observed frequencies:	17	52	54	31	6

Under the assumption that coins are unbiased, find the expected frequencies of 0,1,2,3, or 4 heads, and test the goodness of fit ($\alpha = 0.05$).

SPECIAL FUNCTIONS AND COMPLEX ANALYSIS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define gamma function and using it evaluate the value of $\Gamma\left(\frac{1}{2}\right)$.	CO1. CO4	7 Marks
	b)	Evaluate the integral $\int_0^{\pi/2} \sqrt{\tan\theta} + \sqrt{\cot\theta}$.	CO4	7 Marks
		(OR)		
2	a)	Show that $J_{-n}(x) = (-1)^n J_n(x)$ where n is a positive integer.	CO4	7 Marks
	b)	Establish the relation $x J_n'(x) = n J_n(x) - x J_{n+1}(x)$.	CO4	7 Marks

UNIT-II

3		Define an analytic function and construct an analytic function $f(z) = u + iv$ given that $u - v = (x - y)(x^2 + 4xy + y^2)$	CO1, CO3	14 Marks
		(OR)		
4		Applying Milne-Thomson Technique, construct an analytic function of the form $f(z) = u + iv$ whose imaginary part is $e^x(x\cos y - y\sin y)$.	CO3, CO5	14 Marks

UNIT-III

5		Write Cauchy's theorem and verify it for the function $f(z) = z + 1$over the boundary of the square with vertices $z = 0$, $z = 1$, $z = 1 + i$, $z = i$.	CO1, CO4	14 Marks
		(OR)		
6	a)	Construct a Taylor's series for $f(z) = \frac{e^z}{z(z+1)}$ about the point z = 2.	CO3	7 Marks
	b)	Evaluate contour integral $\int_c \frac{\sin\pi z^2 + \cos\pi z^2}{(z-1)(z-2)} dz$ where c is the circle | z | = 3 using Cauchy's Integral formula.	CO4	7 Marks

UNIT-IV

7	a)	Define pole of a function. Evaluate the product of poles of the function $f(z) = \frac{z^2}{(z-1)(z-2)^2}$ at $z = 1, 2$.	CO1, CO4	7 Marks
	b)	Show that $\int_0^{2\pi} \frac{d\theta}{2+\cos\theta} = \frac{2\pi}{\sqrt{3}}$ using complex variable technique.	CO5	7 Marks
		(OR)		
8	a)	Calculate the value of $\oint_c \frac{z-3}{z^2+2z+5} dz$ where C is the circle $\lvert z+1+i \rvert = 2$.	CO4	7 Marks
	b)	Evaluate the integral $\int_0^{\infty} \frac{dx}{(1+x^2)^2}$ by using the technique of finding residues.	CO5	7 Marks

UNIT-V

9	a)	Define a Bilinear transformation and show that Bilinear transformation preserves cross ratio of four points.	CO1, CO4	4 Marks
	b)	What is the difference between isogonal and conformal transformations and illustrate with an example.	CO4	6 Marks
	c)	Construct bilinear transformation whose invariant points are 1, i and which maps 0 onto –1.	CO3	4 Marks

(OR)

10	a)	On applying the transformation $w = 1/z$ show that the hyperbola $x^2 - y^2 = 1$, maps onto the lemniscate $\rho^2 = \cos 2\phi$.	CO4	7 Marks
	b)	Construct a bilinear the transformation which maps the points $-1, i, 1$ of the $z-$ plane onto $1, i, -1$ of the $w-$ plane respectively	CO3	7 Marks

UNIT-V

9 From the following Trail Balance of Shukla prepare Trading, Profit and Loss Account for the year ending 31st March, 2019 and Balance sheet as on the date. CO4, CO5, CO6 — 14 Marks

Particulars	Debit(Rs)	Credit(Rs)
Buildings	20,000	
Capital A/c		60,000
Purchases & Sales	10,000	30,000
Stock on 1-04-2018	5,000	
Debtors & Creditors	12,000	6,000
Drawings	4,000	
Sales returns & purchase Returns	2,000	500
Freight	2,500	
Office Salaries	8,000	
Wages	1,500	
Postage and Telegrams	1,000	
Machinery	15,000	
bills Receivable, Bills Payable	8,000	2,000
Advertisement	2,000	
Cash in hand	3,500	
Loose Tools	4,000	
Total	**98,500**	**98,500**

Adjustments:

i) Closing Stock was valued at Rs 6,000/-

ii) Depreciation Buildings by 10% and Loose Tools are evalued at Rs 3,500/-

(OR)

10 The trial balance of a firm on 31.12.2018 is as follows. Prepare final accounts of this firm. CO4, CO5, CO6 — 14 Marks

Particulars	Debit (Rs)	Credit (Rs)
Capital		1,00,000
Plant and Machinery	1,60,000	
Sales		354,000
Returns	2,000	1,500
Opening Stock	700	
Bank charges	150	
Sundry Debtors & Creditors	90,000	51,600
Furniture	60,000	
Wages	20,000	
Salaries	13,600	
Carriage inwards	1,500	
Carriage outwards	2,400	
bad debts provision		1,050
rent, rates, taxes	20,000	
Advertisements	4,000	
cash in hand	1,800	
cash at bank	12,000	
Purchases	1,20,000	

Adjustments:

i) Closing stock Rs.17,000/-

ii) Depreciate Pant 6% p.a

iii) Bad debts provision to be adjusted to Rs. 1,000/-

II B.Tech I Semester (SVEC-16) Supplementary Examinations August – 2021

CONSTRUCTION PLANNING AND PROJECT MANAGEMENT
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Prepare a generalized report on stages of planning by different agencies.	CO4	7 Marks
	b)	Bring out the importance of safety in construction projects.	CO6	7 Marks
		(OR)		
2	a)	Explain the need of 'labor legislation' in construction industry.	CO8	8 Marks
	b)	Define Organization and list out various types of organizations.	CO1	6 Marks

UNIT-II

3	a)	Describe concreting plant and equipment.	CO1	7 Marks
	b)	Enumerate the various types of material costs.	CO1	7 Marks
		(OR)		
4	a)	Explain the objectives of resource management in construction industry.	CO9	7 Marks
	b)	Explain the environmental problems associated with the hauling equipment.	CO7	7 Marks

UNIT-III

5	a)	Describe various phases of project management.	CO1	7 Marks
	b)	Distinguish between PERT and CPM networks and explain the circumstances under which one is preferred over the other.	CO2	7 Marks
		(OR)		
6	a)	How can milestone chart be developed into a network?	CO4	7 Marks
	b)	Draw the bar chart for 'finalization of designs and work order for a building project'.	CO4	7 Marks

Activity	Description	Time for completion (Weeks)
A	Site selection and survey	5
B	Design	7
C	Preparation of Drawings	4
D	Preparation of specifications and tender document	3
E	Tendering	5
F	Selection of contractor	1
G	Award of work order	1

UNIT-IV

7	a)	Define an event and activity. Differentiate clearly between the two.	CO1	6 Marks
	b)	Discuss various rules for providing dummies in a network and what are redundant dummies.	CO1	8 Marks
		(OR)		
8	a)	Write a note on development of networks.	CO1	8 Marks
	b)	Differentiate between activity oriented diagram and event oriented diagram.	CO2	6 Marks

UNIT-V

9 a) If the expected time along the critical path of a project is 27 weeks and the standard deviation along it is 6 weeks, determine the probability of completing the project within a) 21 weeks, b) 24 weeks, c) 36 weeks. CO2 6 Marks

b) The details of a network are given below where the duration is in days. CO2 8 Marks

Activity	t_o	t_m	t_p
1-2	2	5	8
1-3	1	4	7
2-3	0	0	0
2-4	2	4	6
2-6	5	7	12
3-4	3	5	10
3-5	3	6	9
4-5	7	6	10
4-6	2	5	8
5-6	2	4	6

Determine the critical path and project completion time.

(OR)

10 Determine the minimum cost and optimum duration for the following project. CO9 14 Marks

The data of each activity of network is given in the table. Indirect cost is Rs.4000/week.

Activity	Normal Time (Month)	Cost (Rs.)	Crash Time (Month)	Cost (Rs.)
0-1	3	5000	2	5500
1-3	14	10000	11	13000
1-2	7	6000	4	9000
2-3	9	11000	6	18000
3-4	4	9000	3	12000
4-5	3	6000	2	7800

FLUID MECHANICS AND HYDRAULIC MACHINERY

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define density, specific gravity, viscosity and vapour pressure. Calculate the specific weight, specific mass, specific volume and specific gravity of a liquid having a volume of $6m^3$ and weight of 44kN	CO1	7 Marks
	b)	Describe Newton's law of viscosity and a plate 0.05 mm distant from a fixed plate moves at 1.2 m/s and requires a force of 2.2 N/m^2 to maintain this speed. Find the viscosity of the fluid between the plates	CO2	7 Marks
		(OR)		
2	a)	A plate having an area of 0.6 sq.m is sliding down the inclined plane at 30 degrees to the horizontal with a velocity of 0.36 m/s. There is a cushion of fluid 1.8 mm thick between the plane and the plate. Find the viscosity of the fluid if the weight of the plate is 280 N. Also calculate kinematic viscosity.	CO2	7 Marks
	b)	A 400 mm diameter shaft is rotating at 200 r.p.m in a bearing of length 120 mm. If the thickness of oil film is 1.5 mm and the dynamic viscosity of the oil is 0.7 $N.s/m^2$, determine torque required to overcome friction in bearing and power utilized in overcoming viscous resistance.	CO2	7 Marks

UNIT-II

3	a)	Explain the description of fluid motion and list out types of fluid flows with an example.	CO1	8 Marks
	b)	Describe types of flow lines and velocity for a two dimensional flow field is given by $\mathbf{V = (3 + 2xy + 4t^2)\, i + (xy^2 + 3t)\, j}$. Find the velocity and acceleration at a point (1,2) after 2 sec.	CO2	6 Marks
		(OR)		
4	a)	Derive continuity equation in three dimensional forms in Cartesian system.	CO1	7 Marks
	b)	A pipe (1) 450 mm diameter branches into two pipes (2 and 3) of diameters 300mm and 200mm respectively. If the average velocity in 450mm diameter pipe is 3 m/s find discharge through 450mm diameter pipe and velocity in 200mm diameter pipe if the average velocity in 300mm pipe is 2.5 m/s.	CO2	7 Marks

UNIT-III

5	a)	Explain Reynolds's experiment with a neat sketch and list out the characteristics of laminar flow.	CO1	7 Marks
	b)	Derive an expression for flow of viscous fluid in circular pipes with assumptions.	CO1	7 Marks
		(OR)		
6	a)	An oil of viscosity 9 poise and specific gravity 0.9 is flowing through a horizontal pipe of 60 mm diameter. If the pressure drop in 100 m length of the pipe is 1800 kN/m^2, determine rate of flow of oil, centre line velocity, total frictional drag over 100 m length and power required to maintain the flow.	CO5	7 Marks
	b)	Define Couette flow and describe flow of viscous fluid between two parallel plates.	CO1	7 Marks

UNIT-IV

7	a)	List out types of channels and compare open channel flow and pipe flow. What is the purpose of providing bed slope in open channels?	CO1	7 Marks
	b)	Classify flows and define energy and momentum correction factors. Hydraulic jump forms at the downstream end of spillway causing 18 cumec discharges. If the depth before jump is 0.8 m, determine the depth after the jump and energy loss.	CO2	7 Marks

(OR)

8	a)	Discuss the distribution of velocity in an open channel flow. Which velocity is called relative velocity? How does an open channel flow differ from pressure flow?	CO1	7 Marks
	b)	A trapezoidal channel with base width 3m and side slope 2H: 1V carries a discharge of 10 cumec at a depth of 1.5m under uniform flow condition. The longitudinal slope of the channel is 0.001. Compute the average shear stress on the boundary and also compute the Manning's N value.	CO3	7 Marks

UNIT-V

9	a)	State Impulse Momentum Principle. Derive an expression for impact of jet of liquid on a fixed vertical plate. Find the force exerted by a 4cm diameter water jet directed against a flat plate held normal to the jet, if the jet is discharging 60 litres of water per second.	CO2	7 Marks
	b)	Derive an expression for impact of jet of liquid on an inclined plate moving in the direction of the jet of liquid. A jet of water 120mm in diameter and moving with a velocity of 25 m/s strikes normally on a flat plate. Determine the force exerted on the plate and the work done when the plate is stationary, the plate is moving with a velocity of 8 m/s in the direction of the jet, and the plate is moving with a velocity of 8 m/s towards the jet.	CO2	7 Marks

(OR)

10	a)	Derive an expression for impact of jet on a fixed curved plate. A jet of water 5 cm in diameter and moving with a velocity of 15 m/s impinges on a series of vanes moving with a velocity of 5 m/s. Determine force on the plates. Work done per second and Efficiency of the jet.	CO2	7 Marks
	b)	Obtain an expression for force exerted by the jet of water on a inclined plane which is at rest. Prove that the maximum efficiency is 50% when a jet of liquid strikes of plates fixed to the periphery of a wheel.	CO2	7 Marks

MECHANICS OF SOLIDS

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 A compound bar consist of a central steel strip 25 mm wide and 6.4 mm thick placed between two strips of brass each 25 mm wide and 't' mm thick. The strips are firmly fixed together to form a compound bar of rectangular section 20 mm wide and (2t + 6.4) mm thick. Determine CO5 14 Marks

i) The thickness of the brass strips which will make the apparent modulus of elasticity of compound bar 1.57×10^5 N/mm^2 and

ii) The maximum axial pull the bar can then carry if the stress is not to exceed 157 N/mm^2, in either the brass or steel.

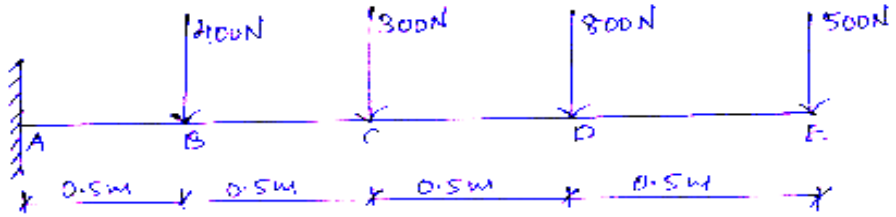
Take the values of E for steel and brass as 2.07×10^5 N/mm^2 and 1.14×10^5 N/mm^2 respectively.

(OR)

2 Define resilience. Derive the maximum stress intensity on a member of length 'l' and uniform cross sectional area 'A' when a load of magnitude 'P' is applied gradually and suddenly on the member and identify the difference in these two cases. CO1 14 Marks

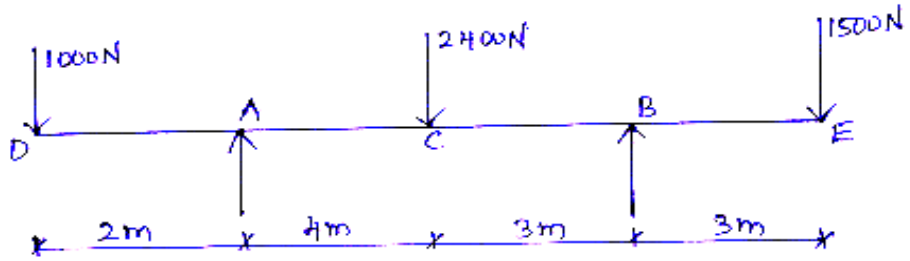
UNIT-II

3 Determine the maximum shear force and bending moment of a Cantilever beam shown in the figure and draw SFD and BMD. CO2 14 Marks



(OR)

4 Determine the maximum shear force and bending moment of a Cantilever beam shown in the figure and draw SFD and BMD. CO2 14 Marks



UNIT-III

5 a) Derive the maximum shear stress intensity for a solid circular section. CO1 10 Marks

b) A cast iron cantilever of length 2.5m fails when a load of 3kN applied at the free end. Determine the stress at failure if the section of the cantilever is of 40mm x 60mm. CO2 4 Marks

(OR)

6		A load of 75 kN is carried by a column of Cast iron. The external and internal diameters are 200mm and 18 mm respectively, if the eccentricity of the load is 35mm, find: i) The maximum and minimum stress intensities. ii) Upto what eccentricity there is no tensile stress in the column.	CO2	14 Marks

UNIT-IV

7	a)	A solid shaft of 200mm diameter has the same cross section area as that of the hollow shaft of the same material with inside diameter of 150mm. Find the ratio of the power transmitted by the two shafts at the same speed.	CO6	7 Marks
	b)	A solid shaft is 100mm in diameter. It transmits 110 kW at 200 r.p.m, find the maximum intensity of shear stress induced and the angle of twist for a length of 6m. C=$8x10^4$ N/mm^2.	CO1	7 Marks
		(OR)		
8	a)	A composite spring has two closed coiled springs connected in series; one spring has 12 coils of a mean diameter of 25mm and wire diameter 2.5mm. Find the wire diameter of the other spring, if it has 15 coils of mean diameter 40 mm. The stiffness of the composite spring is 1.5 kN/m. Determine the greatest load that can be carried by the composite spring and the corresponding extension if maximum stress is 250 MN/m^2. Take C= 80 GN/m^2.	CO4	7 Marks
	b)	A helical spring B is placed inside the coil of a second helical spring A, having the same number of coils and free axial length and of same material. The two springs are compressed by an axial load of 210 N which is shared between them. The mean coil diameters of A and B are 90mm and 60mm and the wire diameters are 12mm and 7mm respectively. Calculate the load taken and the maximum stress in each spring.	CO2	7 Marks

UNIT-V

9		A cylindrical shell 4m long which is closed at the ends has an internal diameter of 1m and a wall thickness of 15mm. Calculate the circumferential and the longitudinal stresses induced and also the change in dimension of the shell if it is subjected to an internal pressure of 1.5MN/m^2.	CO5	14 Marks
		(OR)		
10		The external diameter of steel collar is 240mm and internal diameter is decreased by 0.15mm when shrunk on to a solid steel shaft of 150mm diameter. Find : i) Radial pressure between the collar and the shaft. ii) Circumferential stress at the inner surface of the tube. iii) Reduction in diameter of the shaft. Take: E= 205 GN/m^2, and μ= 0.304.	CO6	14 Marks

SURVEYING
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) What are the sources of errors in chaining? What precautions would guard against them? CO6 6 Marks

b) The length of a Survey line was measured with a 20m chain and was found to be equal to 1200m. As a check the length was again measured with a 25m chain and was found to be 1212m. On comparing the 20m chain with the test gauge, it was found to be 1 decimeter too long. Find the actual length of the 25m chain used. CO2 8 Marks

(OR)

2 a) What are offsets? What are the types of offsets and method of taking offsets? CO1 10 Marks

b) The following perpendicular offsets were taken from a chain line to a hedge CO2 4 Marks

Chainage (m)	0	15	30	45	60	70	80	100	120	140
Offsets (m)	7.6	8.5	10.7	12.8	10.6	9.5	8.3	7.9	6.4	4.4

Calculate the area between the survey line, the hedge and the end offsets:
i) Trapezoidal rule. ii) Simpson's rule.

UNIT-II

3 a) State the advantages and disadvantages of plane table survey. CO1 6 Marks

b) The following staff readings were observed successively with a level. The instrument having been moved after second, fifth and eighth readings. 0.675, 1.230, 0.750, 2.565, 2.225, 1.935, 1.835, 3.220, 3.115, 2.875. The first staff reading was taken with a staff held on a bench mark of reduced level +100.00. Collect and enter the readings in the level book form and identify the reduced levels of all the points. CO4 8 Marks

(OR)

4 Explain the tracing paper method of solving the Three Point problem. What is the practical utility of the solution to Three Point problem in the field? CO1 14 Marks

UNIT-III

5 A closed traverse ABCDEA was run in the counter clockwise direction, and the following data were obtained. CO3 14 Marks

Line	Length (m)	Included angle
AB	186	Angle A = $118^0\ 20^1$
BC	164	Angle B = $82^0\ 10^1$
CD	303	Angle C = $130^0\ 00^1$
DE	162	Angle D = $73^0\ 44^1$
EA	240	Angle E = $128^0\ 36^1$

The bearing of AB was $24^0\ 30^1$. Determine the closing error, adjust it, and give the corrected consecutive coordinates.

(OR)

6	a)	Explain the procedure to measure a horizontal angle by repetition method using a theodolite.	CO1	6 Marks
	b)	Explain the temporary adjustments of Vernier transit theodolite with three screw head.	CO6	8 Marks

UNIT-IV

7		Explain the procedure to set out simple circular curve by Rankines method.	CO1	14 Marks

(OR)

8	a)	What are the elements of a simple circular curves?	CO1	6 Marks
	b)	Two straights of a road intersect at a chainage of 2550.5m having an angle of intersection of 110°. Find the various elements of a simple circular curve of 4° to be introduced between the straights.	CO3	8 Marks

UNIT-V

9	a)	What is Total Station? Illustrate its uses.	CO5	6 Marks
	b)	Explain working principles of EDM by phase difference method.	CO1	8 Marks

(OR)

10	a)	Write short notes on electronic theodolite.	CO5	6 Marks
	b)	Describe briefly the advantages of electronic theodolite.	CO1	8 Marks

DC MACHINES
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Illustrate various methods of excitation of DC machines with neat circuit diagrams and deduce the relationships between generated **emf** and terminal voltage.	CO1	7 Marks
	b)	A short compound wound DC generator supplies a load current of 150 A at 230 V. Calculate the **emf** generated, if the resistance of armature, series field and shunt field windings are 0.15Ω, 0.1Ω and 100Ω respectively. Assume the brush drop 1 Volt per brush.	CO4	7 Marks

(OR)

2	a)	Differentiate separately and self-excited DC generators.	CO1	3 Marks
	b)	Derive the condition for maximum efficiency of DC generator.	CO2	4 Marks
	c)	A short-shunt DC compound generator supplies 200A at 100V. The resistance of armature, series filed and shunt field windings are 0.04, 0.03 and 60Ω respectively. Find the **emf** generated. Also find the **emf** generated if same machine is connected as a long-shunt machine.	CO4	7 Marks

UNIT-II

3	a)	Derive the expressions for demagnetizing and cross-magnetizing ampere turns per pole in a DC machine with neat sketch.	CO2	8 Marks
	b)	A 6-pole, 148 A DC shunt generator has 480 conductors and is wave-wound. Its field current is 2A. Find the demagnetizing and cross-magnetizing ampere turns per pole at full load if (i) brushes are on GNA and (ii) brushes are shifted from GNA by 50 electrical degrees.	CO4	6 Marks

(OR)

4	a)	Discuss in detail the detrimental effects of armature reaction in DC machines.	CO1	7 Marks
	b)	With relevant illustrations explain the role of compensating winding in a DC machine.	CO1	7 Marks

UNIT-III

5 The magnetization curve of a DC shunt generator at 1500 r.p.m is as follows. CO1 14 Marks

I_f (A)	0	0.4	0.8	1.2	1.6	2.0	2.4	2.8	3.0
E_g (V)	6	60	120	172.5	202.5	221	231	237	240

For this generator, determine:

i) No-load **emf** for a total shunt field resistance of 100 Ω
ii) The critical field resistance at 1500 r.p.m and
iii) The magnetization curve at 1200 r.p.m and there from the open-circuit voltage for a field resistance of 100 Ω.

(OR)

6	a)	Parallel operation of DC series generators is not stable. Justify.	CO1	6 Marks
	b)	A DC series generator having an external characteristics which is a straight line through zero to 50 V at 200 A connected as a booster between station bus bar and a feeder of 0.3 Ω resistance. Calculate the voltage difference between the station bus bar and the far end of the feeder at a current of (i) 1200 A and (ii) 50 A	CO4	8 Marks

UNIT-IV

7	a)	Drive the expression for torque developed by a DC motor from fundamentals.	CO2	5 Marks
	b)	Select and describe the suitable speed control technique for DC shunt motor which is used to control the speed above rated value.	CO5	4 Marks
	c)	A shunt motor operating on 230 V takes an armature current of 6 A at no-load and runs at 1200 r.p.m. Take Ra = 0.25 Ω. Find the speed and the electromagnetic torque when the armature takes 36 A with the same flux.	CO4	5 Marks

(OR)

8	a)	DC shunt motor is suitable to drive agricultural pump set. Justify.	CO5	6 Marks
	b)	A 220 V shunt motor has an armature resistance of 0.5 Ω. The armature current at starting must not exceed 40 A. Design a 3-point starter with 6 sections and also calculate the values of the resistor steps to be used in this starter.	CO3	8 Marks

UNIT-V

9		A test on two coupled similar tramway motors, with their fields connected in series, gave the following results when one machine acted as a motor and the other as a generator. **Motor :** Armature current = 56 A; Armature voltage = 590 V; Voltage drop across field winding = 40 V **Generator :** Armature current = 44 A; Armature voltage = 400 V; Field voltage drop = 40 V; Resistance of each armature = 0.3 Ω Compute the efficiency of the motor and generator at this load.	CO4	14 Marks

(OR)

10	a)	Mention the advantages and disadvantages of no-load test.	CO1	3 Marks
	b)	Explain running down test for finding stray losses of DC machine.	CO1	5 Marks
	c)	In a retardation test on a separately-excited motor, the induced **emf** in the armature falls from 220 V to 190 V in 30 seconds on disconnecting the armature from the supply. The same fall takes place in 20 seconds if, immediately after disconnection, armature is connected to a resistance which takes 10 A (average) during this fall. Find stray losses of the motor.	CO4	6 Marks

ELECTROMAGNETIC FIELDS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the terms electric field intensity and electric flux density with necessary mathematical relations.	CO1	7 Marks
	b)	Find the total charge in a volume defined by six planes for which $1 \le x \le 2$, $2 \le y \le 3$ and $3 \le z \le 4$, if $\overline{D} = 4x\overline{a}_x + 3y^2\overline{a}_y + 2z^3\overline{a}_z \ C/m^3$.	CO3	7 Marks

(OR)

2	a)	Define potential gradient and obtain a relation between electric field intensity and potential.	CO1	7 Marks
	b)	Find the electric field intensity at the point (1, –2, 1) m given the potential $V = 3x^2y + 2yz^2 + 2xyz$.	CO3	7 Marks

UNIT-II

3	a)	Derive the expression for energy stored in a capacitor.	CO2	7 Marks
	b)	A capacitor consists of square shape metal plates of each 80cm side placed parallel and 3mm apart. The space between the plates is filled with a dielectric having a relative permittivity of 3. A potential difference of 300V is maintained between the plates. Calculate i) The capacitance. ii) Charge on the capacitor. iii) The electric flux density. iv) Energy stored in the capacitor.	CO3	7 Marks

(OR)

4	a)	Derive the expression for the relaxation time and show that the relaxation time is short for good conductors.	CO2	7 Marks
	b)	An electric dipole located at the origin in free space has a moment $\overline{p} = (4\overline{a}_x + 3\overline{a}_y + 3\overline{a}_z)nCm$. Determine i) Potential, V at point $Q(1, 2, 3)$. ii) Electric field intensity at $Q(4, 20^0, 0^0)$.	CO3	7 Marks

UNIT-III

5	a)	Define magnetic field intensity and magnetic flux density. Obtain the relation between them.	CO1	7 Marks
	b)	Derive the expression for magnetic field intensity. i) At the centre. ii) On the axis of circular conductor carrying 'I' amperes of current.	CO2	7 Marks

(OR)

6	a)	Explain how laws of electromagnetics can be applied in MRI machine.	CO5	7 Marks
	b)	A Toroid has 'N' turns and carries current of 'I' amperes. Determine magnetic field strength inside and outside the toroid.	CO5	7 Marks

UNIT-IV

7	a)	Define the terms dipole moment and magnetization and establish a relation between them.	CO1	7 Marks
	b)	Describe about the boundary conditions pertaining to the magnetic materials.	CO1	7 Marks

(OR)

8	a)	Derive the expression for force due to: i) A charged particle in magnetic field. ii) Differential current element.	CO2	7 Marks
	b)	If a point charge of 3 coulombs moves with a velocity of $\vec{u} = 7\overrightarrow{a_x} + 4\overrightarrow{a_y} - 6\overrightarrow{a_z}$ *m/s*, find the force exerted on the charge. i) If the electric field intensity is $\vec{E} = 12\overrightarrow{a_x} + 4\overrightarrow{a_y} - 6\overrightarrow{a_z}$ *V/m*. ii) If the flux density is $\vec{B} = 6\overrightarrow{a_x} + 5\overrightarrow{a_y} + 6\overrightarrow{a_z} wb/m^2$.	CO3	7 Marks

UNIT-V

9	a)	Write the Maxwell's equations in both point form and integral forms for free space and good conductor.	CO1	7 Marks
	b)	A parallel plate capacitor with plate area of $5cm^2$ and plate separation of 3mm has a voltage $50\sin 10^3 t$ Volts applied to its plate. Calculate displacement current density. Assume $\boldsymbol{\varepsilon = 2\varepsilon_0}$.	CO3	7 Marks
		(OR)		
10	a)	Given $\vec{B} = (0.5\overrightarrow{a_x} + 0.6\overrightarrow{a_y} - 0.3\overrightarrow{a_z})\cos(500t)$ Tesla and a filamentary loop with its corners at (2, 3, 0)*m*, (2, -3, 0)*m*, (-2, -3, 0)*m* and (-2, 3, 0)*m*. Find the emf developed in the loop.	CO3	7 Marks
	b)	Find the displacement current density within a parallel plate Capacitor where $\boldsymbol{\varepsilon = 100\varepsilon_0}$, $\boldsymbol{a = 0.01m^2}$, $\boldsymbol{d = 0.05mm}$ and the capacitor Voltage is $100\sin 200\pi t$ volts.	CO3	7 Marks

SIGNALS, SYSTEMS AND NETWORKS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

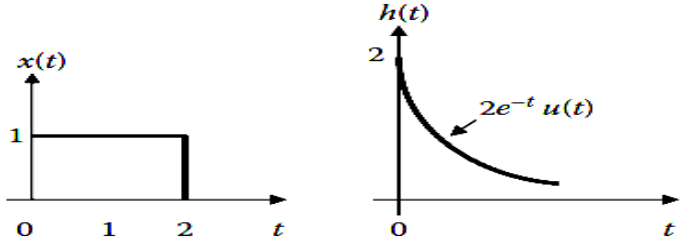
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain power and energy signal and enumerate the necessary conditions for the signal to be a power or energy signal.	CO1	7 Marks
	b)	Determine the total response of the system described by: $\frac{d^2y(t)}{dt^2} + \frac{dy(t)}{dt} + 0.21y(t) = \frac{dx(t)}{dt} + x(t); where x(t) = 0.2e^{-0.5t}u(t)$ With the initial conditions $y'(0) = -1; y(0) = 0.3$.	CO4	7 Marks

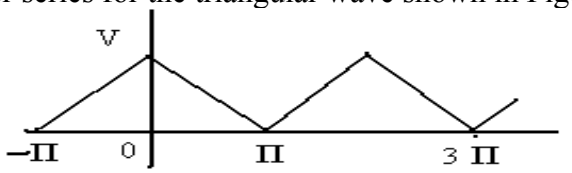
(OR)

2	a)	Define convolution of two continuous time signals.	CO1	6 Marks
	b)	Find the convolution of the two signals $x(t)$ and $h(t)$ in Figure.	CO4	8 Marks



UNIT-II

3	a)	Find the response of a system described by $\frac{dy(t)}{dt} + 2y(t) = x(t);$ using the Fourier transform. Where the input is defined as $x(t) = e^{-t}u(t)$.	CO5	7 Marks
	b)	Find the Fourier series for the triangular wave shown in Figure.	CO4	7 Marks

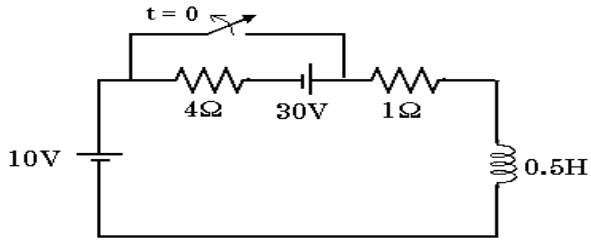


(OR)

4	a)	Find the Laplace transform of the following signals: $f(t) = (2t + 4)\,u(t)$ and $f(t) = (4 + 3e^{-2t})\,u(t)$.	CO5	7 Marks
	b)	A circuit has a transfer function $H(s) = \frac{s+4}{(s+1)(s+2)^2}$, determine the impulse response.	CO4	7 Marks

UNIT-III

5	a)	Explain the transient properties of a capacitor for DC and AC excitations.	CO1	6 Marks
	b)	In the circuit shown below, the switch is initially in closed position for a long time and opened at time t = 0. Find the current i(t)for t>0.	CO4	8 Marks

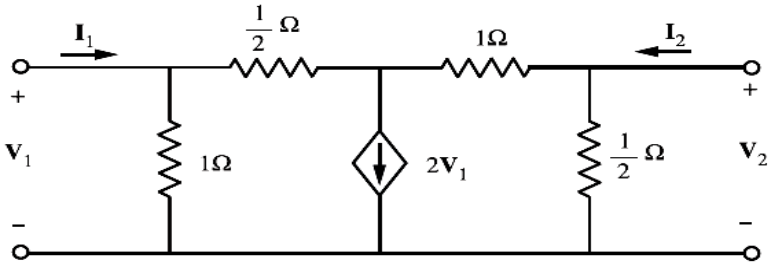


(OR)

6	a)	A DC voltage of 20V is applied at t=0 in a R-L circuit where R=5Ohmsand L=10H. Find the Time constant and the maximum value of stored energy during the transient.	CO4	7 Marks
	b)	A series RL circuit with R = 100 Ω and L = 10 mH has a Sinusoidal excitation V (t) = *250Sin500t.* Find the total current using differential equation method assuming that the capacitor is initially uncharged.	CO4	7 Marks

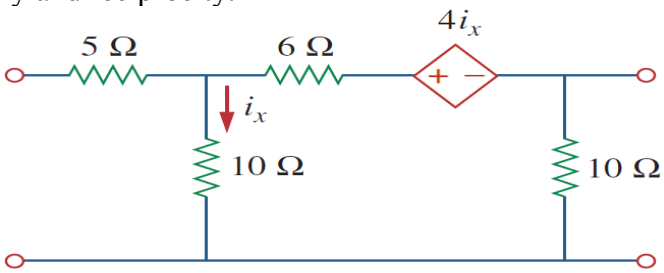
UNIT-IV

7	a)	Express hybrid parameters in terms of admittance parameters for a generalized network.	CO1	7 Marks
	b)	Find the y parameters for the two-port network shown in Figure. Invistigate the netwok for symmetry and reciprocity.	CO4	7 Marks



(OR)

8	a)	State the necessary conditions for a network function to be a driving point function.	CO1	6 Marks
	b)	Find the hybridparameters of the network in Figure. Invistigate the netwok for symmetry and reciprocity.	CO4	8 Marks



UNIT-V

9	a)	Analyze the nature of characteristic impedance in pass band and stop bands with relevant equations.	CO2	6 Marks
	b)	In a signal processing application, it is required to allow only the frequencies ranging between 12 kHz to 16 kHz which is connected to an load impedance of 600 Ω. Justify a suitable proto type filter circuit with proper components and their specifications.	CO6	8 Marks

(OR)

10	a)	Derive the design equations for a High pass T-section filter.	CO2	6 Marks
	b)	Design a constant *k* filter to eliminate band of frequencies lying between 2000Hz and 6000Hz with a design impedance of 600 Ω. Also determine attenuation and phase shift 1 kHz and 4 kHz.	CO3	8 Marks

ELECTRICAL TECHNOLOGY

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe the constructional details of DC machine.	CO1	10 Marks
	b)	A 4-pole wave connected DC generator having 60 slots on its armature with 6 conductors per slot, run at 750 r.p.m and generates an open circuit voltage of 230V. Find the useful flux per pole.	CO4	4 Marks
		(OR)		
2	a)	Derive the e.m.f equation of DC generator.	CO2	7 Marks
	b)	Explain the principle of operation of a DC generator.	CO1	7 Marks

UNIT-II

3	a)	List the applications of transformer.	CO6	4 Marks
	b)	Why Transformer is rated in kVA?	CO1	3 Marks
	c)	The primary and secondary windings of a 50 kVA, 6600/220V transformer have resistance of 7.8Ω and 0.0085Ω respectively. The transformer draws no-load current of 0.328A at p.f. of 0.3 lagging. Calculate the efficiency at full load, if the load operates at a p.f. of 0.8 lagging.	CO4	7 Marks
		(OR)		
4	a)	Identify a suitable test to obtain copper losses in a single phase transformer and explain the procedure and calculations in detail with a neat sketch.	CO5	7 Marks
	b)	A 40 kVA transformer has iron loss of 450 W and full load copper loss of 850 W. If the power factor of load is 0.8 lagging, calculate: i) Efficiency at full load. ii) The load at which maximum efficiency occurs. iii) The maximum efficiency.	CO4	7 Marks

UNIT-III

5	a)	Derive expressions of phase and line quantities in delta connected network.	CO2	7 Marks
	b)	A balanced star connected load is supplied from symmetrical three phase, 400V system. The current in phase is 30 A and lags behind phase voltage by 30^0. Find: i) The impedance in each phase. ii) The total power.	CO4	7 Marks
		(OR)		
6	a)	Prove that two wattmeters are enough to measure the total power of a three phase unbalanced system with a neat phasor diagram.	CO2	7 Marks
	b)	Three equal impedances each having a resistance and reactance of 25Ω and 40Ω respectively connected in delta to 400V, three phase, 50Hz supply system. Calculate: i) The line current. ii) Power factor. iii) Power consumed by the circuit.	CO4	7 Marks

UNIT-IV

7	a)	Explain the constructional features of an alternator.	CO1	7 Marks
	b)	A 12-pole, 3 phase alternator is coupled to an engine running at 500 r.p.m. The generator supplies an induction motor having a full load speed of 1440 r.p.m. Find the percentage slip and number of poles of this induction motor.	CO4	7 Marks

(OR)

8	a)	Discuss the constructional features of salient pole type alternator.	CO1	3 Marks
	b)	List out the applications of three phase induction motors.	CO6	4 Marks
	c)	An alternator on open-circuit generates 360V at 60Hz when the field current is 3.6A. Neglecting saturation, determine the open-circuit e.m.f when the frequency is 40Hz and the field current is 2.4 A.	CO4	7 Marks

UNIT-V

9	a)	Discuss about the double field revolving theory in single phase induction motor.	CO1	7 Marks
	b)	Why the starting torque of a capacitor start induction motor is better than that of a resistance start motor? Explain.	CO2	7 Marks

(OR)

10	a)	Explain the constructional details of permanent magnet stepper motor.	CO1	7 Marks
	b)	Explain the working of variable reluctance stepper motor and mention its applications.	CO1	7 Marks

KINEMATICS OF MACHINERY
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Explain Grashof's criterion and describe any two inversions of 4 bar chain with suitable sketches.	CO1	14 Marks

(OR)

2	a)	Classify and explain the types of Kinematic pairs	CO1	10 Marks
	b)	What is Grubler's criterion?	CO1	4 Marks

UNIT-II

3		In a slider crank mechanism, the crank OB is 30mm and the connecting rod BC is 120mm long. The crank rotates at 300 r.p.m clockwise and makes 60^0 from IDC. Find i) The velocity of piston C. ii) Angular velocity of connecting rod BC.	CO2	14 Marks

(OR)

4		In a four bar mechanism PQRS, PS is fixed link of length 120mm. Crank PQ is 45mm rotates at 200 r.p.m and an acceleration of 150 rad/sec^2 at an instant when crank makes an angle 45^0 to the horizontal. Both are clockwise in nature. The link QR is 90mm and link RS is 60mm. Find the acceleration of Q and R.	CO2	14 Marks

UNIT-III

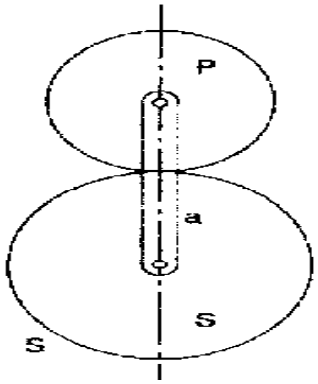
5		Sketch and explain any one type of exact straight line motion mechanism.	CO1	14 Marks

(OR)

6		Derive the condition for correct steering mechanism. Sketch and show the two main steering gears and discuss their relative advantages.	CO1	14 Marks

UNIT-IV

7		An epi-cyclic gear train consists of an arm 'a' and two gears P and S having 30 teeth and 50 teeth respectively. The arm rotates about the centre of the gear S at a speed of 120 r.p.m clock wise. Determine the speed of gear P for the following conditions: i) If gear S is fixed. ii) The gear S rotates at 180 r.p.m counter clockwise instead of being fixed.	CO4	14 Marks



(OR)

8	a)	Find an expression for the length of the path of contact between two mating spur gears.	CO3	6 Marks
	b)	Two mating involute spur gears have 28 and 45 teeth and a standard addendum of one module. Find the length of path of contact and length of arc of contact in terms of module when pressure angle is 20^0.	CO3	8 Marks

UNIT-V

9		A cam with 40 mm minimum radius is rotating clockwise at uniform speed of 1200 r.p.m. It has to operate a knife edge follower as defined below: i) Follower has to move outward through 30mm during 90^0 . of cam rotation with uniform velocity. ii) Dwell for the next 30^0. iii) Follower is to return to its starting position with SHM during next 120^0. iv) Follower is to dwell for remaining period. Draw the cam profile taking the line of action of the follower passing through the center of the cam. Determine the maximum velocity and acceleration of the follower during the return stroke.	CO5	14 Marks

(OR)

10		From the following data draw the cam profile in which the following moves with SHM during ascent and uniformly accelerated and decelerated motion during descent. The diameter of the roller follower is 30mm and lift is 40mm. Angle of ascent = 48^0, angle of descent= 60^0, angle of dwell between ascent and descent = 42^0, The least radius of the cam is 50mm and the distance between line of action of the follower and axis of cam = 20mm. If the cam rotates at 360 r.p.m CCW, find the maximum velocity and acceleration of the follower during ascent and descent.	CO6	14 Marks

MANUFACTURING TECHNOLOGY
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Write types of pattern allowances and sketch any two of them.	CO1	7 Marks
	b)	Explain the design considerations are needed to be followed in Gating system.	CO3	7 Marks
		(OR)		
2	a)	What are the specific advantages of match plate patterns? Explain how they are used for making mould.	CO5	7 Marks
	b)	Give various tests available for testing Moulding sand and explain permeability testing procedure with neat sketch.	CO2	7 Marks
		UNIT-II		
3	a)	What are the functions of gating and risering?	CO3	7 Marks
	b)	Describe the shell moulding process.	CO4	7 Marks
		(OR)		
4	a)	List out various casting defects and explain any one with neat sketch.	CO2	7 Marks
	b)	Write short notes on cleaning and finishing of castings.	CO5	7 Marks
		UNIT-III		
5	a)	Describe the principle of rolling. Write the various kinds of rolling mills along with their applications.	CO5	7 Marks
	b)	What is deep drawing operation? Explain with a neat sketch.	CO1	7 Marks
		(OR)		
6	a)	Briefly explain compound dies used in sheet metal operations.	CO4	7 Marks
	b)	With a neat sketch, explain the explosive forming.	CO5	7 Marks
		UNIT-IV		
7	a)	Sketch and explain the construction and working of resistance spot welding with its advantages and limitations.	CO5	7 Marks
	b)	List the non-destructive tests applied in welding and its advantages.	CO5	7 Marks
		(OR)		
8	a)	List out the welding defects and explain any two of it.	CO2	7 Marks
	b)	Discuss about Brazing with neat sketch.	CO4	7 Marks
		UNIT-V		
9	a)	Describe the working principle of blow molding process.	CO1	7 Marks
	b)	Describe different types of plastics with applications of each type.	CO1	7 Marks
		(OR)		
10	a)	Explain the principle of injection moulding process.	CO4	7 Marks
	b)	What are the additives to be mixed in processing plastics and explain the purpose of each?	CO5	7 Marks

STRENGTH OF MATERIALS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Write a short note on strain energy.	CO1	5 Marks
	b)	A rectangular block 350mm long, 100mm wide and 80mm thick is subjected to axial load as follows. 50kN tensile in the direction of length, 100kN compression in the direction of thickness and 60kN tensile in the direction of breadth. Determine the change in volume, Bulk modulus, modulus of rigidity. Take E=2 x 10^5 N/mm^2 and Poisson's ratio 0.25.	CO2	9 Marks

(OR)

2	a)	Draw the stress strain curve for brittle materials and explain the salient points on it.	CO6	6 Marks
	b)	Derive a relation for change in length of a uniformly varying circular bar subjected to an axial load 'P'.	CO1	8 Marks

UNIT-II

3		Draw the shear force and bending moment diagram for the overhanging beam carrying uniformly distributed load of 2kN/m over the entire length and a point load of 2kN as shown in Fig 1. Locate the point of contraflexure, if any.	CO6	14 Marks

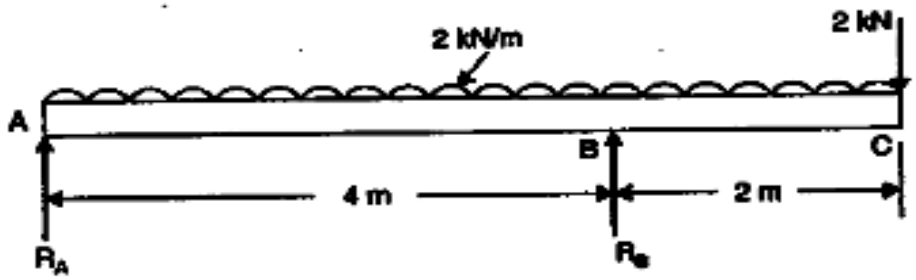

Fig.1

(OR)

4	a)	Draw the shear force and bending moment diagram for a cantilever beam of length 'L' carrying a uniformly distributed load of W kN/m over the entire span representing maximum values.	CO2	6 Marks
	b)	Draw the shear force and bending moment diagram for a cantilever simply supported beam loaded as shown in fig 2.	CO6	8 Marks

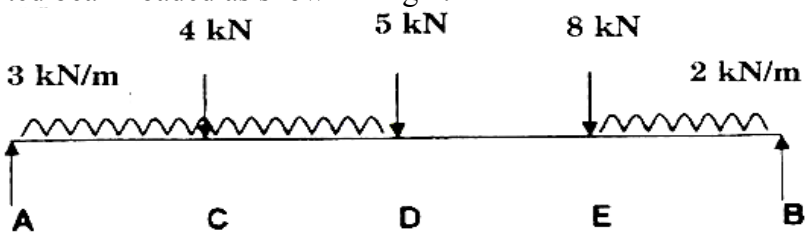

Fig.2

UNIT-III

5		The internal and external diameter of a hollow shaft is in the ration of 2:3. The hollow shaft is to transmit a 400 kW power at 120 r.p.m. The maximum expected toque is 15% greater than the mean value. If the shear stress is not to exceed 50 MPa, Fins section of the shaft which would satisfy the shear stress and twist conditions. Take G = 0.85 x 10^5 MPa.	CO3	14 Marks

(OR)

6	a)	Define 'simple bending' or 'pure bending'. List the assumptions made in the theory of simple bending.	CO1	4 Marks
	b)	A cast iron beam is of T-section of flange 100mm x 20mm and web 20mm x 80mm. The beam is simply supported on a span of 8m. The beam carries a uniformly distributed load of 1.5kN/m length over the entire span. Determine the maximum tensile and maximum compressive stresses.	CO3	10 Marks

UNIT-IV

7		A beam of length 6m is simply supported at its ends and carries two point loads of 48kN at a distance of 1m and 3m respectively from left end support. Find the deflection under each load, the maximum deflection and the point at which it occurs. Take E=2 x 10^5 MPa and I=85 x 10^6 mm^4.	CO5	14 Marks

(OR)

8		A beam of uniform rectangular section 200mm wide and 300mm deep is simply supported at its ends. It carries a uniformly distributed load of 9kN/m run over the entire span of 5m. If the value of E for the beam material is 1 x 10^4 N/mm^2, find: i) The slope at the supports. ii) Maximum deflection.	CO5	14 Marks

UNIT-V

9		A cylindrical shell 1m diameter and 3m length is subjected to an internal pressure of 2MPa. Calculate the maximum thickness if the stress should not exceed 50MPa. Find the change in diameter and volume of shell. Assume Poisson's ratio of 0.3 and Young's modulus of 200kN/mm^2.	CO3	14 Marks

(OR)

10	a)	Show that in thin cylindrical shells subjected to internal fluid pressure, the circumferential stress is twice the longitudinal stress.	CO2	4 Marks
	b)	Determine the maximum and minimum hoop stress across the section of a pipe of 400mm internal diameter and 100mm thick, when the pipe contains a fluid at a pressure of 8 N/mm^2.	CO4	10 Marks

CODE No.: 16BT30305 SVEC-16

THERMODYNAMICS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is meant by point and path function? Explain with one example each.	CO1	6 Marks
	b)	Define the following: i) Equilibrium and its types. ii) Define property, state, path and process of a system. iii) State Zeroth law of Thermodynamics. iv) Various thermodynamic processes.	CO1	8 Marks
		(OR)		
2	a)	What is meant by quasi static process and explain it with the neat sketch.	CO1	6 Marks
	b)	A fluid is confined in a cylinder by a spring loaded frictionless piston so that the pressure in the fluids is a linear function of the volume (p=a+bV). The internal energy of the fluid is given by the following equation U=34+3.15pV where U is in kJ, p is in kPa and V in cubic meter. If the fluid changes from an initial state of 170kPa, 0.03cubic meter to a final state of 400kPa , 0.06cubic meter, with no work other than that done on the piston, find the direction and magnitude of the work and heat transfer.	CO2	8 Marks

UNIT-II

3		Derive the steady flow energy equation with all the assumptions made and give the equations when it is applied to i) Boiler, ii) Condenser ii) Nozzle, iv)Turbine, v)Compressor	CO1	14 Marks
		(OR)		
4	a)	State the First Law of Thermodynamics and prove that for a non-flow process, it leads to the energy equation $Q = \Delta U + W$.	CO1	4 Marks
	b)	A reversible heat engine operating between reservoirs at 900K and 300K drives a reversible refrigerator operating between reservoirs at 300K and 250K. The heat engine receives 1800kJ heat from 900K reservoir. The net output from the combined engine refrigerator is 360kJ. Find the heat transferred to the refrigerator and the net heat rejected to the reservoir at 300K.	CO2	10 Marks

UNIT-III

5	a)	Discuss the concept of entropy and importance of T-s diagram.	CO3	4 Marks
	b)	An insulated 0.75 kg copper calorimeter can containing 0.2 kg water is in equilibrium at a temperature of 20°C. An experimenter now places 0.05 kg of ice at 0°C in the calorimeter and encloses the latter with a heat insulating shield. i) When all the ice has melted and equilibrium has been reached, what will be the temperature of water and the can? The specific heat of copper is 0.418 kJ/kg K and the latent heat of fusion of ice is 333 kJ/kg. ii) Compute the entropy increase of the universe resulting from the process. iii) What will be the minimum work needed by a stirrer to bring back the temperature of water to 20°C?	CO3	10 Marks

(OR)

6	a)	Derive expressions for entropy changes for a closed system in the following cases : i) Heating a gas at constant volume. ii) Heating a gas at constant pressure.	CO3	4 Marks
	b)	Air at 20°C and 1.05 bar occupies 0.025m³. The air is heated at constant volume until the pressure is 4.5 bar, and then cooled at constant pressure back to original temperature. Calculate : i) The net heat flow from the air. ii) The net entropy change. Sketch the process on T-s diagram	CO3	10 Marks

UNIT-IV

7	a)	Draw the phase change process for pure substance or steam formation and explain	CO1	4 Marks
	b)	A closed vessel of 0.2 cubic meter contains steam at 1 Mpa and temperature of 250 deg C. If the vessel is cooled so that pressure falls to 350kPa. Determine the final temperature, heat transfer and change in entropy during the process.	CO4	10 Marks

(OR)

8	a)	Write the following: i) Mole fraction and Mass fraction. ii) Gravimetric Analysis and Volumetric Analysis.	CO3	6 Marks
	b)	A vessel having a volume of 0.6 m³ contains 3.0 kg of liquid water and water vapour mixture in equilibrium at a pressure of 0.5 MPa. Calculate : i) Mass and volume of liquid. ii) Mass and volume of vapour.	CO4	8 Marks

UNIT-V

9	a)	Derive the expression to find the efficiency of air standard dual cycle with the help of p-v and t-s diagram.	CO4	4 Marks
	b)	An I.C. engine operating on the dual cycle (limited pressure cycle) the temperature of the working fluid (air) at the beginning of compression is 27°C. The ratio of the maximum and minimum pressures of the cycle is 70 and compression ratio is 15. The amounts of heat added at constant volume and at constant pressure are equal. Compute the air standard thermal efficiency of the cycle. State three main reasons why the actual thermal efficiency is different from the theoretical value. Take γ for air = 1.4.	CO5	10 Marks

(OR)

10	a)	Write the assumption in air standard cycles.	CO1	4 Marks
	b)	An engine with 200mm cylinder diameter and 300mm stroke works on theoretical Diesel cycle. The initial pressure and temperature of air used are 1 bar and 27°C. The cut-off is 8% of the stroke. Determine : i) Pressures and temperatures at all salient points. ii) Theoretical air standard efficiency. iii) Mean effective pressure. iv) Power of the engine if the working cycles per minute are 380. Assume that compression ratio is 15 and working fluid is air. Consider all conditions to be ideal.	CO5	10 Marks

ELECTRONIC CIRCUIT ANALYSIS AND DESIGN
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	List types of coupling schemes used in multistage amplifiers.	CO2	7 Marks
	b)	Apply cascading technique to construct a Direct coupled amplifier.	CO6	7 Marks
		(OR)		
2	a)	List the classification of BJT amplifiers.	CO2	7 Marks
	b)	Apply cascading concept to get large voltage gain and explain with block diagram.	CO6	7 Marks

UNIT-II

3	a)	Discuss Low and High frequency analysis of an Amplifier.	CO3	7 Marks
	b)	Apply Short circuit concept in a CE amplifier to derive Current gain equation.	CO6	7 Marks
		(OR)		
4	a)	Derive the expressions for hybrid Π conductances g_{ce}, $g_{bb'}$ and g_m of a transistor.	CO3	7 Marks
	b)	For a given CE amplifier with β=100, I_c=5mA, V_{ce}=10V, h_{ie}=800, h_{oe}=10^{-4} , r_e= 10^{-4}. Take f_T=50MHz and C_{ob}=3pF. Compute g_m and $g_{b'e}$.	CO4	7 Marks

UNIT-III

5	a)	Draw the RC phase shift oscillator circuit with BJT and explain its operation.	CO1	7 Marks
	b)	Select a Trans-conductance amplifier and prove its input and output impedances are very large compared to CE amplifier.	CO5	7 Marks
		(OR)		
6	a)	Select a Trans-Resistance amplifier and prove its input and output impedances are very large compared to CE amplifier.	CO5	7 Marks
	b)	Draw the Hartley oscillator with BJT, explain its operation and derive an expression for frequency of oscillations.	CO1	7 Marks

UNIT-IV

7	a)	Prove Class B power amplifier efficiency is 78.5%.	CO3	8 Marks
	b)	Write short notes on distortion occur in power amplifiers	CO1	6 Marks
		(OR)		
8	a)	A push pull amplifier utilizes a transformer whose primary has a total of 160 turns and whose secondary has 40 turns. It must be capable of delivering 40W to an 8 Ω load under maximum power conditions. What is the minimum possible value of V_{cc}?	CO4	7 Marks
	b)	Explain Class A series fed power amplifier with neat circuit diagram.	CO1	7 Marks

UNIT-V

9	a)	Design a single tuned amplifier for the following specifications. Centre frequency of 500 KHz and a Band width of 10KHz. Assume the transistor parameters g_m = 0.04S, h_{fe} = 100, $c_{b'e}$ = 1000pF, $C_{b'c}$ = 100pF. The bias network and input resistance are adjusted such that R_i = 4KΩ and R_L= 510Ω.	CO3	7 Marks
	b)	A class C amplifier has a base bias voltage of -5V and V_{cc} = 30 V. It is determined that a peak input voltage of 9.8V at 1MHz is required to derive the transistor to its saturation current of 1.8 A.	CO4	7 Marks
		(OR)		
10	a)	Write short notes on stability of Tuned Amplifiers.	CO1	7 Marks
	b)	Derive the expressions for Bandwidth and Q-factor of single tuned, capacitive coupled amplifiers. List the assumptions made for the derivation.	CO4	7 Marks

SIGNALS AND SYSTEMS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Bring out the relation between: i) Signum and step function. ii) Sinusoidal and exponential functions based on their properties.	CO2	7 Marks
	b)	Given a signal $x(t)$ $= t \quad 0 < t < 2$ $= 2 \quad t > 2\ t > 2$ $= 0 \quad$ elsewhere Plot the following signals x(2t), x(-t), x(t/2), 7x(-2t+3)	CO4	7 Marks

(OR)

2	a)	List out the properties of an LTI system.	CO2	6 Marks
	b)	What is the importance of convolution? Find the response of a system for the given sequences x(n)={1,0,-1,2,1} and h(n)={1,2,-1,2}.	CO4	8 Marks

UNIT-II

3	a)	What is the relationship between cosine and trigonometric representation of Fourier series?	CO1	6 Marks
	b)	Determine exponential Fourier series representation for the output of full wave rectifier with T=1sec.	CO3	8 Marks

(OR)

4	a)	What are the difference between Fourier series and Fourier transform?	CO1	4 Marks
	b)	Find the Fourier transform of the following. i) $x(t) = A \sin (2\pi fct) U(t)$. ii) $x(t) = A \text{ rect}(t / T) \cos (2\pi fct)$.	CO2	10 Marks

UNIT-III

5	a)	A filter has an input $x(t)=e^{-2t}u(t)$ and transfer function, $H(W)=1/(1+jw)$. Find ESD of the output.	CO3	8 Marks
	b)	Discuss about the properties of convolution.	CO1	6 Marks

(OR)

6	a)	Examine how convolution and correlation of a signal are related in the context of signal processing.	CO3	7 Marks
	b)	State and prove Parseval's theorem.	CO1	7 Marks

UNIT-IV

7	a)	find the Laplace transform of the following waveform	CO4	9 Marks

	b)	State and prove the time shifting and time integration property of Laplace transform	CO1	5 Marks

(OR)

8	a)	Obtain the Laplace Transform of a gate function and define ROC and with their conditions.	CO4	8 Marks
	b)	State and explain ROC Property of Laplace Transform if x(t) is two sided signal.	CO1	6 Marks

UNIT-V

9	a)	For the anlog signal x(t)= 3cos100πt which is to be transmitted into free space i) Determine minimum sampling rate to avoid alaising. ii) Suppose that the signal is sampled at a rate fs=200Hz, what is the discrete time signal obtained after sampling ? iii) Suppose the signal is sampled at a rate fs=75hz,what is the discrete time signal obtained after smapling ? iv) What is the frequency **0<f<fs/2** of a sinusoid that yeilds samples identical to those obtained in (iii) above compare them with the standard transmission values in frequency band?	CO5	10 Marks
	b)	Examine the conditions on pole location for stability.	CO2	4 Marks

(OR)

10	a)	The final value of a system whose input $\mathbf{x(t)=(2+e^{-3t})u(t)}$ is obviously x(α)=2. Show that the final value can be found with final value theorem	CO5	8 Marks
	b)	Obtain the relationship among the Fourier Transform, Laplace Transform and Z-Transform.	CO2	6 Marks

SWITCHING THEORY AND LOGIC DESIGN

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Determine the error bit location for the received information $(0100011)_2$using odd parity.	CO6	6 Marks
	b)	Express the Gray code equivalent for the binary numbers. i) $(110010101)_2$ (ii) $(101111001)_2$ iii) $(111010111)_2$ (iv) $(111111011)_2$.	CO4	8 Marks

(OR)

2	a)	Determine the error bit location for the received information $(0100011)_2$ using even parity.	CO6	6 Marks
	b)	Simplify the following Boolean function to minimum number of literals and convert them from Standard SOP to Standard POS and SPOS to SSOP respectively (i) F(A, B, C)= Σ (0, 2, 4, 6, 7, 9, 10, 12, 14), (ii) F(A, B, C) = π (1, 3, 4, 5, 7, 8, 10, 11, 15)	CO4	8 Marks

UNIT-II

3	a)	Simplify the Boolean function using K-map in SOP forms. F=∑m(0, 1, 2, 4, 7, 8, 12, 14, 15, 16, 17, 18, 20, 24, 28, 30, 31).	CO2	7 Marks
	b)	Minimize the criterion the following using K-map. F(A, B, C, D).= Σm (0, 1, 2, 3, 5, 6, 7, 8, 9, 10, 11, 13).	CO3	7 Marks

(OR)

4	a)	Minimize the following expression using tabular method. Y(w,x,y,z)=∑m(1,2,3,5,9,12,14,15)+ ∑d(4,8,11)	CO3	7 Marks
	b)	Simplify the following Boolean function using tabulation method. F(A,B,C,D)=Σm(3,4,5,7,8,9,12,13,14)	CO2	7 Marks

UNIT-III

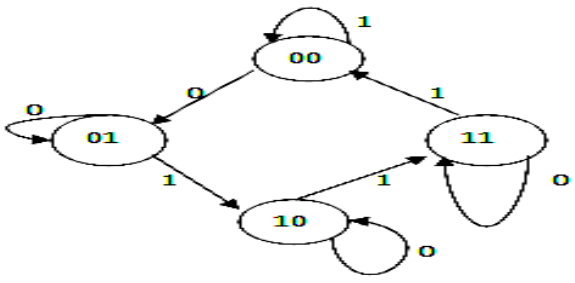
5	a)	Prepare 5-to-32 decoder using one 2-to-4 and four 3-to-8 decoders.	CO3	8 Marks
	b)	Mention its application along with the serial Transfer in 4-bit shift registers.	CO1	6 Marks

(OR)

6	a)	Construct a full adder using a suitable multiplexer.	CO3	7 Marks
	b)	Explain 4-line to 16-line decoder using 3-line to 8-line decoders.	CO1	7 Marks

UNIT-IV

7	a)	Describe race-around problem in JK Flip-flop. Explain how it is eliminated in Master slave JK Flip –Flop.	CO4	7 Marks
	b)	Design a Sequential circuit using JK Flip flop from the following state diagram	CO6	7 Marks



(OR)

8	a)	Convert SR Flip-Flop to D Flip-Flop.	CO2	7 Marks
	b)	Design a synchronous counter for 4—6—7—3—1—4 using JK flip-flop.	CO3	7 Marks

UNIT-V

9	a)	Realize the following functions using a 8 x 3 PROM $F_1=\Sigma m(0,4,7)$, $F_2=\Sigma m(1,3,6)$, $F_3=\Sigma m(1,2,4,6)$.	CO5	7 Marks
	b)	Design a combinational using a PROM. The circuit accepts 3-bit binary number and generates its equivalent gray code.	CO3	7 Marks

(OR)

10	a)	Derive the PAL programming table for the combinational circuit that squares a 3 bit number.	CO5	7 Marks
	b)	Explain in detail the different types of ROMS.	CO1	7 Marks

ANALOG ELECTRONIC CIRCUITS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Discuss CE short circuit current gain with relevant equations.	CO3	8 Marks
	b)	Define f_β f_T and f_α and state the relation between f_β and f_T.	CO1	6 Marks

OR)

2	a)	Derive the expressions for hybrid Π conductance g_{ce}, $g_{bb'}$ and gm of a transistor.	CO3	8 Marks
	b)	What is the use of hybrid parameters in small signal analysis?	CO1	6 Marks

UNIT-II

3	a)	What is feedback amplifies? Classify types of feedback amplifiers.	CO1	8 Marks
	b)	Implement Voltage-Shunt feedback concept for a CE amplifier and show $R_{if} = \frac{R_i}{1 + R_i\beta}$.	CO6	6 Marks

(OR)

4	a)	State and explain the Barkhausen's criterion for Oscillations.	CO1	6 Marks
	b)	Implement Audio frequency oscillator by using conventional passive components like R and C and derive its frequency of oscillations.	CO6	8 Marks

UNIT-III

5	a)	What are the advantages and disadvantages of a transformer coupled Class-A power amplifier?	CO1	7 Marks
	b)	Select a power amplifier to get an efficiency of 25%.explain it.	CO5	7 Marks

(OR)

6	a)	Select an appropriate technique to get Minimum distortion in power amplifiers, compromising with efficiency.	CO5	7 Marks
	b)	Explain the operation of a Class-A power amplifier and derive the expression for maximum efficiency.	CO1	7 Marks

UNIT-IV

7	a)	Evaluate upper 3-dB and Lower 3-dB frequencies for 1KHZ Square wave output from an amplifier with Rise time t_r=250ns and tilt=10%.	CO4	7 Marks
	b)	Discuss how positive peak clamper is different from negative peak clamper.	CO1	7 Marks

(OR)

8	a)	The input voltage of the two level clippers is varying linearly from 0 to 100v. Draw the output waveform and transfer characteristics.	CO4	7 Marks

	b)	Briefly explain about clamping circuit theorem and write its necessary condition.	CO1	7 Marks

UNIT-V

9	a)	List the applications of astable multivibrator.	CO2	7 Marks
	b)	Apply appropriate technique to convert voltage to frequency, using two transistors.	CO5	7 Marks

(OR)

10	a)	Apply appropriate technique to convert any signal to square signal, using two transistors and deduct necessary expressions.	CO5	8 Marks
	b)	List the applications of Bi-stable multi-vibrator.	CO2	6 Marks

COMPUTER ORGANIZATION

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw the flow chart for Booth's Multiplication. Show the steps for (+5) x (–3) using Booth's Multiplication Process.	CO1	7 Marks
	b)	Design a 4-bit binary incrementer circuit using four Half-Adder circuits.	CO3	7 Marks
		(OR)		
2	a)	Perform the following arithmetic operations in binary using 2's complement representation. Consider 8-bits for representing binary numbers. i) 6 + 13. ii) – 6 + 13. iii) 6 – 13. iv) – 6 –13.	CO5	7 Marks
	b)	What is register transfer logic language? Explain few RTL statements for branching with their actual functioning.	CO1	7 Marks

UNIT-II

3	a)	Differentiate Hardwired control with Micro-programmed control.	CO2	4 Marks
	b)	Suppose a machine encodes instructions in 32 bits according to the following format. Also, suppose the encoding must accommodate 164 op-codes, and 50 registers. i) What is the minimum number of bits required to represent the op-code field? ii) What is the minimum number of bits required to represent each of the register fields? iii) What is the greatest number of bits that are left for the immediate field?	CO4	10 Marks
		(OR)		
4	a)	Describe briefly about various addressing modes.	CO1	7 Marks
	b)	What are the phases of an Instruction Cycle? Draw the flow chart for initial configuration of an Instruction Cycle.	CO1	7 Marks

UNIT-III

5	a)	A DMA module is transferring the characters to memory using cycle stealing from a device transmitting at 9600 bps. The processor is fetching instructions at the rate of 1 MIPS. By how much will the processor be slowed down due to DMA activity?	CO4	7 Marks
	b)	Explain about peripheral devices and components in details.	CO1	7 Marks
		(OR)		
6	a)	It is necessary to transfer 256 words from a magnetic disk to a memory section starting from address 1230. The transfer is by means of DMA. i) Give the initial values that the CPU must transfer to the DMA Controller. ii) Give the step-by-step account of the actions taken during the input of the first 2 words.	CO4	7 Marks
	b)	Explain program interrupt and interrupt cycle.	CO1	7 Marks

UNIT-IV

7	a)	Compare and contrast various Read Only Memories (ROM).	CO2	7 Marks
	b)	A computer uses RAM chips of 1024 x 1 capacity.	CO3	7 Marks
		i) How many chips are needed and how should their address lines be connected to provide a memory capacity of 1024 bytes.		
		ii) How many chips are needed to provide a memory capacity of 16K Bytes.		
		iii) Design the logic circuit.		

(OR)

8	a)	Distinguish between synchronous and asynchronous DRAM.	CO2	7 Marks
	b)	Consider a machine with a byte addressable main memory of 2^{16} bytes and block size of 8 bytes. Assume that a direct mapped cache consisting of 32 lines is used with this machine.	CO4, CO5	7 Marks
		i) How is a 16-bit memory address divided into tag, line number, and byte number?		
		ii) Into what line would bytes with each of the following addresses be stored?		
		0001 0001 0001 1011		
		1100 0011 0011 0100		
		1101 0000 0001 1101		
		1010 1010 1010 1010		
		iii) Suppose the byte with address 0001 1010 0001 1010 is stored in the cache. What are the addresses of the other bytes stored along with it?		
		iv) How many total bytes of memory can be stored in the cache?		
		v) Why the tag is also stored in the cache?		

UNIT-V

9	a)	Consider 2 processors P_0 and P_1. Consider memory module with 8 words. Design a Binary Tree Multistage Switching Network to connect processors with memory using 2 x 2 switches.	CO3	7 Marks
	b)	A weather forecasting computation requires 250 billion floating-point operations. The problem is processed in a supercomputer that can perform 100 megaflops. How long will it take to do these calculations?	CO6	7 Marks

(OR)

10	a)	Explain the Serial Inter-processor Arbitration with a neat sketch.	CO1	7 Marks
	b)	It is necessary to design a pipeline for a fixed-point multiplier that multiplies two 8-bit binary integers. Each segment consists of a number of AND gates and a binary adder similar to an array multiplier.	CO4	7 Marks
		i) How many AND gates are there in each segment and what size of adder is needed?		
		ii) How many segments are there in the pipeline?		
		iii) If the propagation delay in each segment is 30ns, what is the average time that it takes to multiply two fixed-point numbers in the pipeline?

DATA STRUCTURES

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1		Define Single Linked List. How to create a single linked list and display the list in reverse order?	CO1	14 Marks
		(OR)		
2	a)	List the advantages of linked list over arrays.	CO1	7 Marks
	b)	Define Doubly linked list. With a neat diagram, show how an element is added and removed from front end of the list.	CO1	7 Marks
		UNIT-II		
3	a)	Define Stack. Write a procedure to implement stack operations using Linked Lists.	CO1	10 Marks
	b)	List the applications of Stack.	CO1	4 Marks
		(OR)		
4	a)	Define queue. Explain the operations of Queue using linked list with examples.	CO1	9 Marks
	b)	List the applications of Stack.	CO1	5 Marks
		UNIT-III		
5	a)	Give an algorithm for finding maximum element in binary tree.	CO3	7 Marks
	b)	Construct binary tree and identify the post-order from given in-order and preorder traversals. In-order : D B E A F C Pre-order: A B D E C F	CO3	7 Marks
		(OR)		
6		In a binary tree, how do you compute the number of leaf nodes? Explain the algorithm with suitable example.	CO3	14 Marks
		UNIT-IV		
7	a)	Define a graph and write about different types of graphs.	CO1	7 Marks
	b)	Explain in detail different ways of representing graphs.	CO1	7 Marks
		(OR)		
8		Describe in detail about depth first traversal of a graph with suitable example.	CO1	14 Marks
		UNIT-V		
9		Indicate whether you use an Array, Linked List or Hash Table to store data in each of the following cases. Justify your answer. i) A list of employee records need to be stored in a manner that is easy to find max or min in the list. ii) A data set contains many records with duplicate keys. Only thing needed is to keep the list in sorted order. iii) A library needs to maintain books by their ISBN number. Only thing important is finding them as soon as possible. iv) A data set needs to be maintained in order to find the median of the set quickly.	CO6	14 Marks
		(OR)		
10		Compare the following Open addressing methods. i) Linear Probing. ii) Quadratic Probing. iii) Double Hashing.	CO2	14 Marks

PYTHON PROGRAMMING

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Write in detail about Literals in Python.	CO1	9 Marks
	b)	Define an identifier, write an identifier rules.	CO1	5 Marks
		(OR)		
2	a)	Write a python script to perform basic arithmetic operations on two values.	CO5	8 Marks
	b)	Evaluate fallowing expressions according to operator precedence i) 4+8*2/2**2. ii) 2*3.5+1//2*3/2.	CO2	6 Marks

UNIT-II

3	a)	Explain while statement in python with example.	CO2	7 Marks
	b)	Write a python script to calculate sum of individual digits of a given number using while.	CO5	7 Marks
		(OR)		
4	a)	Explain the difference between the lists and tuples in python.	CO2	7 Marks
	b)	Write a python script to create a list and add n number of user-defined values to the list and display the same on to the console screen.	CO5	7 Marks

UNIT-III

5	a)	List out various String Methods used in Python.	CO1	7 Marks
	b)	Write a program segment that opens and reads a text file and displays how many lines of text are in the file.	CO3	7 Marks
		(OR)		
6		Determine how many digits a positive integer has by repeatedly dividing by 10 (without keeping the remainder) until the number is less than 10, consisting of only 1 digit. We add 1 to this value for each time we divided by 10. Here is the recursive algorithm: i) If n < 10 return 1. ii) Otherwise, return 1 + the number of digits in n/10 (ignoring the fractional part). Implement this recursive algorithm in Python and test it using a main function that calls this with the values 15, 105, and 15105. (HINT: Remember that if n is an integer, n/10 will be an integer without the fractional part.)	CO5	14 Marks

UNIT-IV

7	a)	Explain the fundamental features of turtle graphics.	CO1	7 Marks
	b)	Explain the fundamental concept of object oriented programming.	CO1	7 Marks
		(OR)		
8		Develop a simple program for bouncing ball using multiple turtles.	CO4	14 Marks

UNIT-V

9		How to reuse a GUI component with class? And explain about Attaching and Extending class components.	CO2	14 Marks
		(OR)		
10		Write a python script to develop a window by adding buttons and callbacks using tkinter and explain the procedure.	CO5	14 Marks

SENSORS AND TRANSDUCERS
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Define the term 'Units', 'Absolute Units', 'Fundamental Units' and 'Derived Units'. Cite suitable examples to support the need to follow ethical standards for measuring instruments.	CO6	14 Marks
		(OR)		
2		Differentiate between the deflection and null type of instruments giving suitable examples. Discuss about the selection of a transducer based on their accuracy, sensitivity and suitability for dynamic measurements.	CO4	14 Marks

UNIT-II

3	a)	Apply the different standard inputs for studying the dynamic response of a system. Define and sketch them.	CO2	7 Marks
	b)	An RC circuit consists of a capacitor of 1μF in series with a resistor of 5KΩ.A dc voltage of 50V is suddenly applied across the circuit. Calculate the value of the voltage after i) 5ms and ii) 25ms.	CO3	7 Marks
		(OR)		
4		Derive the transfer function of a thermal system when the heat input rate is suddenly increased from its steady conditions. Discuss the assumptions made.	CO2	14 Marks

UNIT-III

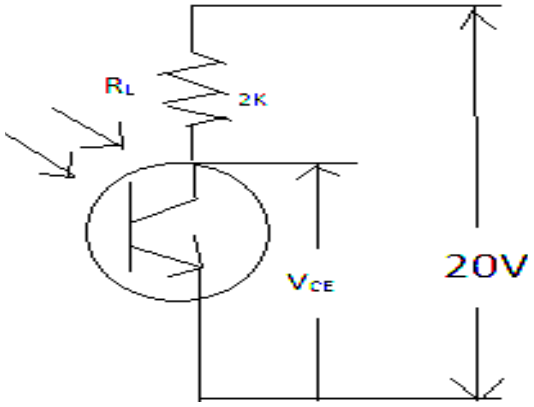
5		Describe the constructional details of a resistance potential divider and derive the expressions for its output voltage when connected across a meter of finite impedance.	CO1	14 Marks
		(OR)		
6		Explain with diagrams, the bonded and unbounded types of strain gauges. For bonded strain gauges, describe the materials used for base, and adhesive materials and also the materials used for leads.	CO1	14 Marks

UNIT-IV

7		Illustrate the process of chemical analysis of liquids in industries which use the principle of electrochemical sensing.	CO5	14 Marks
		(OR)		
8		Describe the construction, principle of working and applications of Hall Effect transducers.	CO1	14 Marks

UNIT-V

9	a)	Explain the principle of working, constructional details and applications of photo transistors.	CO1	7 Marks
	b)	A photo-transistor of circuit shown in figure with the characteristics has a supply voltage of 20V and a collector load resistance of 2KΩ. Determine the output voltage when the illumination level is: i) Zero. ii) 200 w/m² and iii) 400 w/m².	CO3	7 Marks



(OR)

10		Describe the basics of SMART (or) Intelligent sensors.	CO1	14 Marks

DISCRETE MATHEMATICAL STRUCTURES

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Find the truth table for the following: i) $(p \vee q) \wedge r$. ii) $(p \vee \sim q) \Rightarrow r$. iii) $(p \downarrow q) \wedge (p \downarrow r)$.	CO1	7 Marks
	b)	$((p \vee \sim q) \wedge (\sim p \vee \sim q)) \vee q$. Is a tautology or not? Justify.	CO1	7 Marks
		(OR)		
2	a)	Identify and explain the converse, inverse and contra positive of the following conditional statement. *"If the flood destroy my house or the fires destroy my house, then my insurance company will pay me".*	CO3	7 Marks
	b)	Write the Negation of the following statement: $\exists x \in R\ x > 3 \Rightarrow x^2 > 9$	CO1	7 Marks

UNIT-II

3	a)	Determine the value of $f^{-1}g(x)$ and $hf\,(g\,f^{-1})\,(hf(x))$ for the functions f, g and h: $R \rightarrow R$ be defined by (R is the set of real numbers, such that $f(x)=x+2$, $g(x) = (1+x^2)^{-1}$ and $h(x)=3$.	CO4	6 Marks
	b)	Examine the functions f and g both of which are from $N \rightarrow N$ to N given by $f(x, y) = x + y$ and $g(x, y) = xy$ are onto but not one-one.	CO2	8 Marks
		(OR)		
4	a)	Define lattice. Also, illustrate properties of lattices.	CO1	6 Marks
	b)	Determine that (S, /) is a lattice, where S=(1,2,3,6) and / is for divisibility prove that this is a distributive lattice.	CO4	8 Marks

UNIT-III

5	a)	Examine whether given set 'S,' S={0,1,2,3,4,5} can be semi group under binary operation Θ5 or not?	CO2	7 Marks
	b)	State and prove Lagrange's theorem.	CO1	7 Marks
		(OR)		
6	a)	Define Algebraic structure. List its properties.	CO1	6 Marks
	b)	Justify whether the set of positive integers N is a monoid with respect to the binary operation * defined as a*b=lcm(a,b), for all a,b belongs to N.	CO5	8 Marks

UNIT-IV

7	a)	In a Survey of 500 Television viewers of a sports channel Produced the following information: 285 watch cricket, 195 watch hockey, 115 watch football, 45 watch cricket and football, 70 watch cricket and hockey, 50 watch hockey and foot ball and 50 do not watch any of the three kinds of games. Determine: i) How many viewers in the survey watch all three kinds of games? ii) How many viewers watch exactly one of the sports ?	CO4	5 Marks
	b)	In How many ways can 6 men and 6 women be seated in a row? (i) if any person may sit next to any other. (ii) if men and women must occupy alternative seats.	CO4	4 Marks
	c)	Identify the Coefficient of X^{27} in the expansion of $(X^4+X^5+X^6+\text{-------})^5$.	CO3	5 Marks
		(OR)		

8	a)	Solve the Recurrence Relation $\mathbf{U_n+5U_{n-1}+5U_{n-2}=0,\ n>=0}$, where the initial conditions are $\mathbf{U_0=0}$ and $\mathbf{U_1=2\sqrt{5}}$.	CO4	7 Marks
	b)	If $\mathbf{a_n}$ is a solution of the recurrence relation $\mathbf{a_{n+1}=Ka_n}$ for $\mathbf{n>=0}$ and $\mathbf{a_3=153/49}$ and $\mathbf{a_5=1377/2401}$, what is K?	CO2	7 Marks

UNIT-V

9	a)	Determine whether the graphs G and H are isomorphic	CO2	7 Marks

	b)	Discuss Euler Circuit and Hamilton graph with an example.	CO5	7 Marks

(OR)

10	a)	Analyze Depth first Search algorithm with an example.	CO4	7 Marks
	b)	Define MST. Explain Kruskal's algorithm with an example.	CO3	7 Marks

OPERATING SYSTEMS

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	State and explain different operating system services.	CO1	7 Marks
	b)	Differentiate between sequential and batch processing.	CO1	7 Marks
		(OR)		
2	a)	What is meant by CPU Scheduling? Explain different scheduling algorithms with examples.	CO1	7 Marks
	b)	Write about Bootstrap program.	CO1	7 Marks

UNIT-II

3	a)	Illustrate peterson's solution to critical section problem.	CO2	7 Marks
	b)	Describe the mutual exclusion implementation with TestAndSet().	CO2	7 Marks
		(OR)		
4	a)	Mention some classical problems of synchronization. Explain any two of them in detail.	CO2	7 Marks
	b)	Elucidate different methods used to recover from deadlock.	CO2	7 Marks

UNIT-III

5	a)	Discuss paging with an example.	CO2	7 Marks
	b)	Consider the following page reference string 1, 2, 3, 5, 2, 3, 5, 7, 2, 3, 8, 6, 4, 3, 2, 2, 3, 6 Assuming there are three memory frames, how many page faults would occur in case of i) LRU ii) Optimal algorithm. Note that initially all frames are empty.	CO2	7 Marks
		(OR)		
6	a)	Write about the performance of demand paging.	CO2	7 Marks
	b)	What is Belady's Anomaly? Explain with an example.	CO2	7 Marks

UNIT-IV

7	a)	Explain with the help of necessary diagrams the file system and directory implementation.	CO3	7 Marks
	b)	Compare contiguous and linked allocation methods for disk space.	CO4	7 Marks
		(OR)		
8		With an illustrative example, distinguish between SSTF, FCFS, SCAN, C-SCAN, LOOK, C-LOOK disk scheduling algorithms.	CO1	14 Marks

UNIT-V

9	a)	Explain the goals and principles of protection.	CO5	7 Marks
	b)	What are access matrices? Explain its implementation.	CO5	7 Marks
		(OR)		
10		Write a short note on (i) Domain of protection (ii) Access Matrix.	CO5	14 Marks

❀ ❀ ❀

II B.Tech I Semester (SVEC-16) Supplementary Examinations August – 2021

JAVA PROGRAMMING
[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is byte code? What are instance variables?	CO1	7 Marks
	b)	List categories of operators supported by JAVA.	CO2	7 Marks
		(OR)		
2	a)	What is a class? Explain the syntax for declaring a class with an example.	CO1	4 Marks
	b)	Why does JAVA not support goto statements? What is the alternative way of defining goto statement behavior in Java?	CO1	5 Marks
	c)	Explain in detail about constructor overloading with an example.	CO1	5 Marks

UNIT-II

3	a)	Create an abstract class ***Accounts*** with the following details: Data members: i) Balance ii) AccountNumber iii) AccountHoldersName iv) Address Methods: i) Withdrawl() – abstract ii) Deposit()- abstract iii) Display() to show the balance of the account number Create a subclass of this class SavingsAccount and add the following details: Data members: i) RateofInterest Methods: i) calculateAmount() ii) display() t display rate of interest with new balance and full account holder details Create another subclass of the Account class, i.e. CurrentAccount with the following Data members: i) overdraftLimit Method: i) display() to show overdraft limit along with the full account holder details Create objects of these two classes and call their methods. Use appropriate constructors.	CO6	7 Marks
	b)	Design an interface to implement Stack ADT	CO3	7 Marks
		(OR)		
4	a)	How can we access an interface from another interface?	CO1	7 Marks
	b)	What is a package? Explain it with an example and also write how to import packages.	CO1	7 Marks

UNIT-III

5	a)	What are the Exception types? What is a finally block? When and how is it used? Give a suitable example.	CO1	7 Marks
	b)	Design a java program showing the actions form three threads. Use runnable interface to create the threads. Make sure that the main thread always executs last.	CO3	7 Marks

(OR)

6	a)	Create a user-defined exception named checkArgument to check the number of arguments passed through command line. If the number of arguments is less than five, throw the checkArgument exception, else print the addition of all the five numbers.	CO4	7 Marks
	b)	What is multitasking? Is multi threading a form of multitasking?	CO1	7 Marks

UNIT-IV

7		Design a Java applet with the following components Add four labels with Text only, image only, image and text with text displayed at top center, image only at right position. Add four buttons to the Applet - Buttonl with text "Try Me", Button2 with text in the right position. Button3 with the corn image and text in the left position and Button4 with grapes image. Whenever a button is clicked, display a message about the selection in a text field. Make this text field non-editable, so that user cannot change its content. Add keyboard mnemonic to button 3 so that the button can be selected by pressing Alt + C in the keyboard. Add a tooltip to button4, so that it will be displayed when mouse hovers over the button.	CO5	14 Marks

(OR)

8		Design a java program to perform the following using linked list. i) Remove a node form the list. ii) Insert a node at the end of the list. iii) Insert a node anywhere in the existing list. iv) Remove a node anywhere in the existing list.	CO3	14 Marks

UNIT-V

9	a)	What are servlets? What are the three methods that are central to the life cycle of a servlet?	CO1	7 Marks
	b)	Design a servlet which displays current system date and time.	CO3	7 Marks

(OR)

10	a)	Design a java program to implement Mouse and keyboard events.	CO1	12 Marks
	b)	What are the tasks of a servlet?	CO1	2 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

II B.Tech I Semester (SVEC-16) Supplementary Examinations February – 2021

PROBABILITY DISTRIBUTIONS AND STATISTICAL METHODS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Define continuous random variable and probability density function. CO1 4 Marks

b) If the probability density function of a random variable is given by CO4 10 Marks

$F(x) = x$ for $0 < x < 1$

$= 2 - x$ for $1 \le x \le 2$

$= 0$ elsewhere

Find the probabilities that this random variable will take on value

i) Between 0.2 and 0.8 ii) Between 0.6 and 1.2

iii) Greater than 1.8 iv) Between 0.4 and 1.6.

(OR)

2 a) Find k so that the following can serve as the probability density function CO4 7 Marks

$f(x) = kxe^{-4x^2}$ for $x < 0$

$= 0$ for $x \le 0$

b) A random variable X has the following probability function: CO4 7 Marks

X	0	1	2	3	4	5	6	7
P(X)	0	k	2k	2k	3k	k^2	$2k^2$	$7k^2+k$

i) Find k

ii) Evaluate $P(X < 6)$, $P(X \ge 6)$, $P(3 < X \le 6)$

UNIT-II

3 a) The sum and product of the mean and variance of a Binomial distribution are 25/3 and 50/3 respectively, find $P(X \ge 1)$. CO4, CO5 7 Marks

b) The mean and standard deviation of the marks obtained by 1000 students in an examination are respectively 34.4 and 16.5. Assuming the normality of the distribution, find the approximate number of students expected to obtain marks between 30 and 60. CO4 7 Marks

(OR)

4 a) If the probability of a bad reaction from a certain injection is 0.001, determine the chance that out of 2000 individuals more than two will get a bad reaction. CO4 7 Marks

b) If 20% of the memory chips made in a certain plant are defective, what are the probabilities that in a lot of 100 randomly chosen for inspection CO4 7 Marks

i) at most 15 will be defective.

ii) at least 10 will be defective.

UNIT-III

5 Construct the Mean and Range charts from the following data and comment on the process. CO2, CO3 14 Marks

Sample No.	1	2	3	4	5	6	7	8	9	10
Sample Mean	12.8	13.1	13.5	12.9	13.2	14.1	12.1	15.5	13.9	14.2
Sample Range	2.1	3.1	3.9	2.1	1.9	3.0	2.5	2.8	2.5	2.0

(OR)

6 a) Find the regression lines to the given data: CO1, CO2 7 Marks

X	16	21	26	23	28	24	17	22	21
Y	33	38	50	39	52	47	35	43	41

b) Find the rank correlation coefficient to the given data: CO1, CO2 7 Marks

X	68	64	75	50	64	80	75	40	55	64
Y	62	58	68	45	81	60	68	48	50	70

UNIT-IV

7 a) In 64 randomly selected hours of production, the mean and standard deviation of the number of acceptable pieces produced by automatic stamping machine are 1038 and 146 respectively. Does this enable us to reject the null hypothesis $\mu=1000$? Justify your answer. CO1, CO4 7 Marks

b) A manufacturer of bulbs claims that only 2% of his bulbs are defective. A random sample of 400 bulbs from his factory shows that 13 of them are defective. On the evidence of this sample, can we accept the manufacturer's claim? Justify your answer. CO2 7 Marks

(OR)

8 a) The means of two large samples of sizes 1000 and 2000 are 67.5 and 68 respectively. Test the equality of means of the two populations each with standard deviation 2.5. CO1, CO4 7 Marks

b) A machine put out 16 imperfect articles in a sample of 500. After the machine is overhauled, it puts out 3 imperfect articles in a batch of 100. Has the machine improved or not ? Justify your answer. CO2 7 Marks

UNIT-V

9 a) The mean weight loss of n=16 grinding balls after certain length of time in a mill slurry is 34.2 grams with a standard deviation of 0.68 grams. Construct a 99% confidence interval for the true mean loss of such grinding balls. CO4 7 Marks

b) The following random samples are measurements of heat producing capacity in millions of calories per ton of specimens of coal from two mines. Use 0.01 level of significance to test, whether the difference between the means of these two samples is significant? CO4 7 Marks

Mine 1	8260	8130	8350	8070	8340	------
Mine 2	7950	7890	7900	8140	7920	7840

(OR)

10 1072 college students were classified according to their intelligence and Economic conditions. Test whether intelligence is independent of Economic condition at 1% level of significance. CO4 14 Marks

Economic condition	Intelligence			
	Excellent	Good	Mediocre	Dull
Good	48	199	181	82
Not good	81	185	190	106

II B.Tech I Semester (SVEC-16) Supplementary Examinations February - 2021

SPECIAL FUNCTIONS AND COMPLEX ANALYSIS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Prove that $\Gamma\left(\frac{1}{2}\right) = \sqrt{\pi}$.	CO1	7 Marks
	b)	Prove that $\frac{\beta(m+1,n)}{m} = \frac{\beta(m,n+1)}{n} = \frac{\beta(m,n)}{m+n}$.	CO4	7 Marks
		(OR)		
2	a)	Prove that $J_{-\frac{1}{2}}(x) = \sqrt{\frac{2}{\pi x}}\cos x$.	CO4	7 Marks
	b)	Express $J_4(x)$ in terms of $J_0(x)$ and $J_1(x)$.	CO4	7 Marks

UNIT-II

3		Define continuity of f(z) at origin. Prove that the function defined by $f(z) = \frac{x^3(1+i) - y^3(1-i)}{x^2+y^2}(z \neq 0), f(0) = 0$ is continuous and the Cauchy Riemann equations are satisfied at the origin yet $f'(0)$ does not exist.	CO1 CO4	14 Marks
		(OR)		
4	a)	Show that polar form of Cauchy Riemann equations are $\frac{\partial u}{\partial r} = \frac{1}{r}\frac{\partial v}{\partial \theta}, \frac{\partial v}{\partial r} = -\frac{1}{r}\frac{\partial u}{\partial \theta}$. Hence deduce that $\frac{\partial^2 u}{\partial r^2} + \frac{1}{r}\frac{\partial u}{\partial r} + \frac{1}{r^2}\frac{\partial^2 u}{\partial \theta^2} = 0$.	CO1 CO4	7 Marks
	b)	If *f(z)* is ananalytic function of *z*, Prove that $\left(\frac{\partial^2}{\partial x^2} + \frac{\partial^2}{\partial y^2}\right)\left|Rf(z)\right|^2 = 2\left|f'(z)\right|^2$.	CO2	7 Marks

UNIT-III

5	a)	State and prove Cauchy's Integral formula.	CO4	7 Marks
	b)	Construct a series of positive and negative powers of $(z+1)$ for the $f(z) = \frac{7z-2}{(z+1)z(z-2)}$.	CO3	7 Marks
		(OR)		
6	a)	Evaluate $\oint_C \frac{\log z}{(z-1)^3}dz$ where C is $\left|z-1\right| = \frac{1}{2}$ using Cauchy's integral formula.	CO3 CO4	7 Marks
	b)	Construct Laurent's series about $z = 1$ for $f(z) = \frac{e^{2z}}{(z-1)^3}$. Analyze the series and identify the region of convergence	CO2 CO3	7 Marks

UNIT-IV

7	Define the singularity of a function. Determine the poles of the function $f(z) = \frac{z^3}{(z-1)^4(z-2)(z-3)}$ and the residue at each pole, Hence evaluate $\oint_C f(z)dz$, where C is the circle $\|z\| = 2.5$.	CO1 CO4	14 Marks
	(OR)		
8	Evaluate $\int_{-\infty}^{\infty} \frac{x^2}{(x^2+1)(x^2+4)} dx$ by complex variable technique.	CO5	14 Marks

UNIT-V

9	Find the bilinear transformation which maps the points $z = 1, i, -1$ onto the points $w = i, 0, -i$. Hence find (a) the image of $\|z\| < 1$, (b) the invariant points of this transformation.	CO1 CO4	14 Marks
	(OR)		
10	Discuss the transformation $w = e^z$.	CO3 CO4	14 Marks

CODE No.:16BT3HS02 SVEC-16

MANAGERIAL ECONOMICS AND PRINCIPLES OF ACCOUNTANCY

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	Discuss the nature of Managerial Economics and its role in Business decision making process.	CO1	14 Marks
	(OR)		
2	What is Law of Demand? State and explain the Law of Diminishing returns.	CO1	14 Marks

UNIT-II

3	What are the three stages of short run production function? Why does it not make any economic sense to produce in stage 1 or stage 2?	CO2	14 Marks
	(OR)		
4	Differentiate between: i) Explicit Cost ***Vs*** Implicit Cost. ii) Fixed Cost ***Vs*** Variable Cost. iii) Marginal Cost ***Vs*** Average Cost.	CO2	14 Marks

UNIT-III

5	Explain the various features of a Perfect Competitive Market. How is Price of a commodity determined under it?	CO1	14 Marks
	(OR)		
6	Discuss the Pricing strategies with suitable examples.	CO2	14 Marks

UNIT-IV

7	What are Accounting Concepts and Conventions? Name them and explain any two accounting concepts in detail.	CO1	14 Marks
	(OR)		
8	Write journal entries for the following transactions in the books of Mr. Prem Kumar. 2016 March 1 Started business with Rs. 4,00,000 in cash. March 3 Bought goods from Prasad Rs.3,27,100. March 6 Sold goods to Hariswaroop Rs.1,29,300. March 9 Cash sales Rs.37,200. March 12 Sold goods to Babulal Rs.63,100. March 15 Paid Prasad on account Rs.1,50,000. March 18 Paid Salary to manager Rs.50,000. March 31 Office rent paid to Land Lord Krishna Rs.40,000.	CO2	14 Marks

UNIT-V

9	Explain the distinction between Manual Accounting and Computerized Accounting. Elaborate the advantages and disadvantages of Computerized Accounting.	CO1	14 Marks
	(OR)		

10 From the following trail balance of Bikram, prepare Trading and Profit & Loss Account for the year ending 31st March 2016 and the Balance Sheet as on that date. CO2 14 Marks

Particulars	Dr. Rs.	Particulars	Cr. Rs.
Electricity	14,000	Interest	16,000
Land	3,56,000	Discounts	6,000
Wages	50,000	Sales	8,00,000
Opening Stock	20,000	Returns	10,000
Rent	24,000	Creditors	60,000
Office expenses	30,000	Capital	3,02,000
Building	4,00,000	Bills payable	15,000
Salaries	90,000		
Power, Gas and Water	30,000		
Returns	20,000		
Furniture	1,15,000		
Debtors	60,000		
Total	**12,09,000**	**Total**	**12,09,000**

Additional information:

i) Closing stock was valued at Rs.50,000.
ii) Provide depreciation @ 5% on buildings and 10% on furniture.
iii) Write off bad debts Rs.2,500.

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

II B.Tech I Semester (SVEC-16) Supplementary Examinations February – 2021

CONSTRUCTION PLANNING AND PROJECT MANAGEMENT
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the stages of planning by different agencies.	CO1	7 Marks
	b)	List out the salient features of workmen's compensation act of 1923.	CO8	7 Marks
		(OR)		
2	a)	Describe the labour legislation in India.	CO8	7 Marks
	b)	What are the basic concepts in the development of construction plans?	CO1	7 Marks

UNIT-II

3	a)	Write down the ABC classification of materials.	CO9	7 Marks
	b)	Differentiate resource smoothing and resource leveling.	CO9	7 Marks
		(OR)		
4	a)	Explain about: i) Concreting plant and equipment. ii) Earth compaction equipment. iii) Hoisting equipment.	CO5	7 Marks
	b)	Write a brief note on operation and maintenance of equipment.	CO5	7 Marks

UNIT-III

5	a)	What is bar chart and what are its shortcomings?	CO5	7 Marks
	b)	What is project management? What are the main causes of project failure?	CO1	7 Marks
		(OR)		
6	a)	Discuss the methods of scheduling bringing out their importance in projects.	CO1	7 Marks
	b)	Describe various phases of project management.	CO1	7 Marks

UNIT-IV

7	a)	What are the different types of networks? Write the advantages of network techniques over conventional techniques.	CO1	7 Marks
	b)	The following information applies to particular project. The expected times are given below.	CO3	7 Marks

Activity:	0-1	1-3	1-2	2-3	1-4	3-4	4-5
Duration:	3	16	6	8	10	5	3

Draw the network diagram and locate critical path.

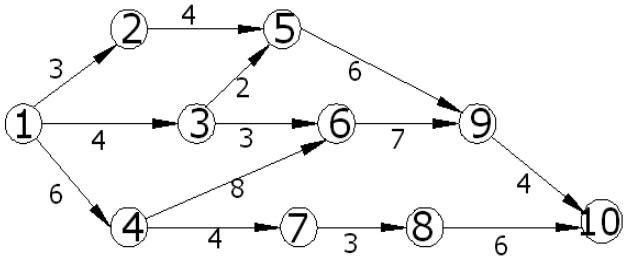
(OR)

8	a)	What is dummy? How and where should a dummy be used?	CO1	6 Marks
	b)	Illustrate Hierarchies in the development of network with an example.	CO4	8 Marks

UNIT-V

9	a)	How do you evaluate the probability of completion time for a project?	CO4	7 Marks
	b)	What do you mean by CPM? What are the time estimates used in CPM and explain their significance?	CO3	7 Marks
		(OR)		

10 a) Determine the Critical path for the network given below. CO2 7 Marks



b) Define "optimistic time estimate", "pessimistic time" and "most likely time estimate". CO2 7 Marks

CODE No.:16BT30102 SVEC-16

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

II B.Tech I Semester (SVEC-16) Supplementary Examinations February – 2021

FLUID MECHANICS AND HYDRAULIC MACHINERY

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define the following terms. i) Specific gravity. ii) Surface tension. iii) Pascal's Law.	CO1	6 Marks
	b)	A vertical cylinder of diameter 200mm rotates concentrically inside another cylinder of diameter 202mm. Both the cylinders are 250mm high. The space between the cylinders is filled with a liquid whose viscosity is unknown. Determine the viscosity of the fluid if a torque of 25N-m is required to rotate the inner cylinder at 150 r.p.m.	CO2	8 Marks
		(OR)		
2	a)	What is hydrostatic law? Differentiate gauge and absolute pressures.	CO1	6 Marks
	b)	A circular plane plate of diameter 3m lies in water in such a way that the plane makes an angel of 30^0 with the free water surface. Determine the total pressure and center of pressure when the upper edge is 2m below the free water surface.	CO2	8 Marks

UNIT-II

3	a)	Derive the continuity equation in differential form for three dimensional fluid flows.	CO1	7 Marks
	b)	An inclined pipe line carrying oil of specific gravity 0.85 changes in diameter from 300mm at section 1 to 600mm diameter at section 2 which is 4m at a higher level. If the pressures at section 1 and 2 are 100kN/m^2 and 60kN/m^2 respectively and discharge is 300 litres/sec., determine the loss of head between the two sections and direction of flow.	CO2	7 Marks
		(OR)		
4	a)	Define: i) Stream line. ii) Path line.	CO1	6 Marks
	b)	A swimming pool 12m long and 7m wide holds water to a depth of 2m. If the water is discharged through an opening of area 0.2m^2 at the bottom of the pool, find the time required to empty the tank. Take coefficient of discharge for the opening as 0.6.	CO5	8 Marks

UNIT-III

5	a)	Explain briefly: i) Hydraulic gradient line. ii) Total energy line. iii) Moody's chart.	CO1	6 Marks
	b)	Two reservoirs have difference of water levels of 6m. They are connected by pipe system which consists of a single pipe of 600mm diameter for the first 3000m and then two pipes in parallel, each of 300mm diameter and 3000m in length. Calculate the rate of flow. Assume friction factor as 0.04 for all pipes.	CO2	8 Marks
		(OR)		

6	a)	State Buckingham's π theorem and explain the method for dimensional analysis.	CO1	8 Marks
	b)	In 1:30 model of a spillway, the velocity and discharge are 1.5m/s and 2.0m^3/s. Find the corresponding velocity and discharge in the prototype.	CO4	6 Marks

UNIT-IV

7	a)	What is specific energy? Derive the expressions for critical velocity and critical depth in a rectangular channel.	CO1	7 Marks
	b)	A sluice gate discharges water into horizontal rectangular channel with a velocity of 10m/s and depth of flow of 1m. Determine the post jump depth and loss of head in the jump.	CO2	7 Marks

(OR)

8	a)	Derive the dynamic equation of gradually varied flow.	CO1	7 Marks
	b)	A 6m wide rectangular channel conveys 14m^3/s of water at a depth of 1.2m. Calculate: i) Specific energy of the flowing fluid. ii) Critical depth, critical velocity and minimum specific energy.	CO1	7 Marks

UNIT-V

9	a)	Explain the following: i) Specific speed of a turbine. ii) Net positive suction head of a centrifugal pump. iii) Governing of turbine.	CO1	6 Marks
	b)	Design a Francis turbine runner with the following data: Net head : 68 m Speed of the runner : 750 r.p.m Hydraulic efficiency : 94% Overall efficiency : 85% Flow ratio : 0.15 Breadth ratio : 0.1 Outer diameter of the runner is twice the inner diameter. Also assume 5% of the circumferential area of the runner to be occupied by the thickness of the vanes. Velocity of flow remains constant throughout and flow is radial at exit.	CO3	8 Marks

(OR)

10	a)	Write a short note on: i) Functions of a draft tube. ii) Performance characteristic curves of a turbine.	CO1	6 Marks
	b)	A three stage centrifugal pump has impellers 400mm in diameter and 20mm wide at outlet. The vanes are curved back at the outlet at 45^0 and reduce the circumferential area by 10%. The manometric efficiency is 90% and the overall efficiency is 80%. The pump is running at 1000 r.p.m and delivering 0.05m^3/s. Determine the head generated by the pump and shaft power required to run the pump.	CO2	8 Marks

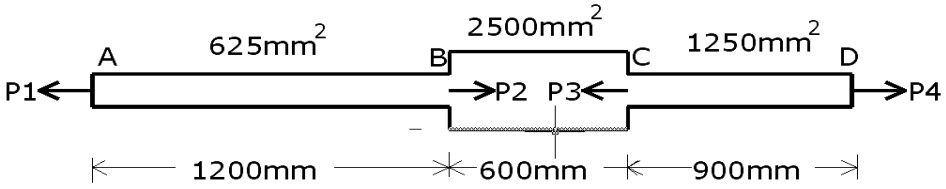
MECHANICS OF SOLIDS
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 A member ABCD is subjected to point loads P1, P2, P3 and P4 as shown in figure. Calculate the force P2 necessary for equilibrium if P1=45kN, P3=450kN and P4=130kN. Determine the total elongation of the member, assuming the modulus of elasticity as $2.1 \times 10^5 N/mm^2$ CO1 14 Marks



(OR)

2 A circular rod of 90mm diameter and 450mm long is subjected to a tensile force of 800kN. Determine the modulus of rigidity, bulk modulus and change in volume if Poisson's ratio = 0.3 and young modulus is $E = 2.1 \times 10^5 N/mm^2$. CO1 14 Marks

UNIT-II

3 A beam AB 5m long is simply supported at A and B. it is loaded with point loads of 20kN, 30kN and 20kN at distances of 1m, 3m and 4m respectively from the support A and a uniformly distributed load at the rate of 20kN/m over length of 2m, the beginning of the U.D.L. being at a distance of 2m from A. draw the bending moment and shear force diagrams. CO2 14 Marks

(OR)

4 a) Explain the relation between bending moment and shear force. CO2 6 Marks

b) A simply supported beam of span L is loaded with distributed load of intensity zero at the ends and **w** per unit length at the centre. Plot the shear force and bending moment diagrams. CO2 8 Marks

UNIT-III

5 Derive the basic bending equation for a beam of elastic material. State clearly the assumptions made in simple theory of bending. CO2 14 Marks

(OR)

6 A beam of triangular cross-section with base **b** and height **h**, is used with the base horizontal. Calculate the intensity of maximum shear stress and plot the variation of shear stress intensity along the section. CO2 14 Marks

UNIT-IV

7 State the assumptions and derive the torsion equation for a solid shaft subjected to a torque T. CO3 14 Marks

(OR)

8 In a hollow circular shaft of outer and inner diameters of 20cm and 10cm respectively, the shear stress is not to exceed $40N/mm^2$. Find the maximum torque which the shaft can safely transmit. CO3 14 Marks

UNIT-V

9	Find the ratio of thickness to internal diameter for a table subjected to internal pressure, when the pressure is $5/8^{th}$ of maximum permissible circumferential stress. Find the increase in internal diameter of such a tube 100mm internal diameter, when the internal pressure is $90N/mm^2$. Take E = 2 x $105N/mm^2$ and Poisson's ratio = 0.286.	CO5	14 Marks

(OR)

10	A cylindrical vessel whose ends are closed by means of rigid plane plates is made of steel plate 3mm thick. The internal length and diameter of vessel are 50cm and 25cm respectively. Determine the longitudinal and circumferential stress in the cylindrical vessel due to internal fluid pressure of 3Mpa. Also calculate increase in length, diameter and volume. Take (1/m = 0.5), E = 200Gpa.	CO4	14 Marks

SURVEYING
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	With a neat sketch, explain the working principles of optical square and cross staff and give a field usage description of optical square and cross staff.	CO1	14 Marks
	(OR)		
2	A 20-m tape was tested before starting the day's work and found to be 0.02m too short. At the end of the day it was tested again and found to be 0.06m too long. If the total length measured during the day was 1243.5m, find the true length.	CO4	14 Marks

UNIT-II

3	Explain two-point problem and the method of solution for plane table surveying and also explain the likely errors that may occur in plane table surveying.	CO2	14 Marks
	(OR)		
4	Explain the rise and fall method of reduction of levels.	CO2	14 Marks

UNIT-III

5	Explain the step by step procedure to measure the horizontal and vertical angles between two-point with the help of neat sketch.	CO2	14 Marks
	(OR)		
6	Derive the formula for distance and elevation in the tangential method with the help of neat sketch and explain the principle of stadia method.	CO4	14 Marks

UNIT-IV

7	A chain line was divided into eight sections of 12m each. Offsets were taken from the middle of each section to a boundary. The offsets were measured (in meters) as follows from the left end: 5.63, 6.84, 7.23, 6.95, 7.58, 5.97, 5.84 and 4.95. Find the area between the chain line and the boundary.	CO2	14 Marks
	(OR)		
8	Derive the expressions for the elements of compound curve and vertical curve with neat sketches.	CO4	14 Marks

UNIT-V

9	Briefly explain the fundamental quantities measured by total station. How they can be used to find the level and coordinates of observed station.	CO5	14 Marks
	(OR)		
10	Discuss briefly the preparations required for measurement with total station and list various input data to be given for distance measurement with total station.	CO6	14 Marks

DC MACHINES

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe the different methods of excitation of DC generators with suitable diagrams.	CO1	6 Marks
	b)	A 4-pole DC shunt generator with shunt field resistance of 100Ω and armature resistance of 1Ω has 378 wave connected conductors in its armature and the generator is driven at 1000 r.p.m. Calculate the power absorbed by the load.	CO4	8 Marks

(OR)

2	a)	Derive expression for maximum efficiency in DC generators.	CO2	6 Marks
	b)	A 10KW, 250V DC shunt generator has total rotational losses of 600W. Its armature and shunt field resistance are 0.5Ω and 125Ω respectively. Calculate the efficiency at rated load.	CO4	8 Marks

UNIT-II

3	a)	Develop an expression for the demagnetizing and cross magnetizing armature ampere-turns in a DC generator.	CO2	7 Marks
	b)	A 4-pole DC generator has an output of 120A at 400V, the wave connected armature has 980 conductors. The brushes are advanced by 3 degrees from the neutral axis. Find *(i)* AT*d* /pole, *(ii)* AT*c*/pole.	CO4	7 Marks

(OR)

4	a)	With neat diagrams, describe the phenomenon of armature reaction in a dc machine. Discuss its effects.	CO1	7 Marks
	b)	What is meant by reactance voltage and derive expression for reactance voltage.	CO2	7 Marks

UNIT-III

5	a)	Describe critical speed and critical resistance of a DC shunt generator and explain how to obtain these from the OCC curve.	CO1	7 Marks
	b)	Two shunt generators operating in parallel given a total output of 600A. One machine has an armature resistance of 0.2Ω and a generator voltage of 455V and the other an armature resistance of 0.025Ω and a generated voltage of 460V. Calculate the terminal voltage and the Kilowatt output of each machine. Neglect field currents.	CO4	7 Marks

(OR)

6	a)	Describe the parallel operation of two DC shunt generators. Why the generators with drooping characteristics are best suited?	CO1	6 Marks
	b)	A DC series generator having external characteristics which is a straight line through zero to 50V at 200A is connected as a booster between a station bus bar and a seeder of 0.3Ω resistances. Calculate the voltage different between the station bus bar and the far end the seeder at a current of (i) 200A and (ii) 50A.	CO4	8 Marks

UNIT-IV

7	a)	Derive the Torque Equation of DC motor.	CO2	6 Marks
	b)	A 6-pole DC shunt motor has a wave-connected armature with 87 slots, each slot containing six conductors. The flux per pole is 30mWb and the armature has a resistance of 0·10Ω. Calculate the speed when the motor is connected to a 250 V supply and taking an armature current of 80 A.	CO4	8 Marks

(OR)

8	a)	Draw and describe the mechanical characteristics of DC series and shunt motor.	CO1	6 Marks
	b)	A 230V, DC shunt motor, takes an armature current at 3.33A at rated voltage and at a no load speed of 1000 r.p.m. The resistances of the armature circuit and field circuit are 0.3Ω and 160Ω respectively. The line current at full load and rated voltage is 40A. Calculate at full load, the speed and the developed torque in case the armature reaction weakens the no load flux by 4%.	CO4	8 Marks

UNIT-V

9	a)	Describe Field Test for obtaining the efficiency of two similar DC series machines.	CO1	6 Marks
	b)	In a retardation test on a DC motor with its field normally excited, the speed fell from 1525 r.p.m to 1475 r.p.m in 25sec. With an average load of 1KW supplied by the armature. The same speed drop occurred in 20sec. Find out the moment of inertia of rotating parts in Kg m^2.	CO4	8 Marks

(OR)

10	a)	List the merits and demerits of Swinburne's test	CO1	4 Marks
	b)	The HOPKINSON'S test on two similar shunt machines give the following full data line voltage is 110volts, line current is 48amps, motor armature current is 230amps, field currents are 3amps and 3.5amps. Armature resistance of each is 0.035Ω. Calculate the efficiency of each machine assuming a brush contact drop of 1 volt per brush.	CO4	10 Marks

ELECTROMAGNETIC FIELDS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain Electric Field Intensity, Electric Flux Density and the relation between them.	CO1	5 Marks
	b)	A 2μC point charge is located at A(4,3,5) in free space. Find E_ρ, E_ϕ and E_z at P(8,12,2).	CO3	5 Marks
	c)	Calculate the work done in moving a 4C charge from B (1, 0, 0) to A(0, 2, 0) along the path y=2-2x, z=0 in the field E= : (i) 5 a_x V/m. (ii) 5x a_x V/m.	CO3	4 Marks
		(OR)		
2	a)	A circular disk of radius 'a' is uniformly charged with σ C/m^2. The disk lies on the z=0 plane with its axis along the z-axis. i) Show that at point *(0,0,h)*, $\vec{E} = \frac{\sigma}{2\varepsilon}\left\{1 - \frac{h}{\left[h^2 + a^2\right]^{1/2}}\right\}\vec{a}_z$. ii) From this, derive the $\vec{E}$ field due to an infinite sheet of charge on the *z=0* plane.	CO2	10 Marks
	b)	Derive the expression for potential Gradient.	CO2	4 Marks

UNIT-II

3	a)	Derive the expression for energy density in a static electric field.	CO1	4 Marks
	b)	Show that the tangential components are equal at the dielectric-dielectric interface. Also explore the analysis to derive relation between tangential components for insulated conductor.	CO4	10 Marks
		(OR)		
4	a)	Derive the expression for electric field and potential for the dipole.	CO1	7 Marks
	b)	Apply solution of Laplace's equation to derive the expression for capacitance of a coaxial cable.	CO4	7 Marks

UNIT-III

5	a)	Derive expression for H at any point in cylindrical system due to a filamentary conductor carrying a current I on z axis from **$-\infty < z < \infty$.**	CO5	6 Marks
	b)	Define magnetic field intensity and magnetic flux density. Give the relation between them.	CO2	5 Marks
	c)	Mention the significance of permeability.	CO2	3 Marks
		(OR)		
6	a)	Find the magnetic field intensity at a point on the axis, 5m from the centre of a circular coil of area $100cm^2$ and carrying a current of 50A.	CO3	8 Marks
	b)	Derive ∇ X H = J. Justify this equation is valid for static magnetic fields.	CO4	6 Marks

UNIT-IV

7	a)	Derive the expression for force and Torque on a closed loop carrying current in the magnetic field.	CO5	7 Marks
	b)	Derive the expressions for statically induced and dynamically induced EMF in case of electromagnetic fields	CO4	7 Marks
		(OR)		

8	a)	Evaluate the forces per unit length on two long, straight, parallel conductors if each carries a current of 10.0A in the same direction and the separation distance is 0.20m.	CO3	6 Marks
	b)	In a double layered perfect dielectric insulated current carrying cable, identify the changes in magnetic field parameters between the dielectrics.	CO4	8 Marks

UNIT-V

9	a)	State and explain Faradays laws of electromagnetic induction.	CO4	7 Marks
	b)	Explain inconsistency of Ampere's law.	CO4	7 Marks

(OR)

10	a)	Write Maxwell's equations for time varying EM fields in both differential and integral form.	CO2	8 Marks
	b)	A parallel plate capacitor with plate area of $10cm^2$ and plate separation of 6mm has a voltage $50\sin(10^3t)$ volts required to its plates. Determine the displacement current, assuming $\boldsymbol{\varepsilon} = 2\,\boldsymbol{\varepsilon_0}$	CO3	6 Marks

SIGNALS, SYSTEMS AND NETWORKS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Write about elementary continuous time signals in detail.	CO1	7 Marks
	b)	Determine whether the following systems are linear or not $dy(t)/dt + 3ty(t) = t2\,x(t)$ and $y(n) = 2x(n) + 1/x(n-1)$.	CO2	7 Marks
		(OR)		
2	a)	Find the impulse response of causal LTI systems described by the following differential equation. $\frac{d^2y(t)}{dt^2} + 5\frac{d\,y(t)}{dt} + 6y(t) = \frac{d^3x(t)}{dt^3} + 2\frac{d^2x(t)}{dt^2} + 3x(t)$.	CO4	7 Marks
	b)	Distinguish between the following. i. Continuous time signal and discrete time signal. ii. Unit step and Unit Ramp functions. iii. Periodic and Aperiodic Signals.	CO2	7 Marks

UNIT-II

3	a)	Find the Laplace Transform and ROC of the signal $(t) = e - a(t) + e - btu(t)$	CO2	7 Marks
	b)	Distinguish between Fourier series Analysis and Fourier Transforms.	CO2	7 Marks
		(OR)		
4	a)	Determine the Fourier Transform for double exponential pulse whose function is given by (t) = e – 2 | t |. Also draw its magnitude and phase spectra.	CO5	7 Marks
	b)	Determine the initial value and final value of signal x(t) whose Laplace Transform is, $X(s) = \frac{2s+5}{s(s+3)}$.	CO5	7 Marks

UNIT-III

5	a)	The switch has been in position a for long time At t = 0 it moves to position b. Calculate i(t) for t > 0.	CO5	7 Marks

	b)	Derive the expression for the transient response of series R-L-C circuit driven by sinusoidal forcing function.	CO2	7 Marks
		(OR)		

6	a)	The switch is closed for longer time. At t equal to 0 it is opened. Obtain the expression for $i_L(t)$ and $v(t)$ for $t > 0$.	CO4	7 Marks
				
	b)	Derive the expressions for natural and transient response of a series RL circuit excited by a DC voltage source and plot the responses as a function of line.	CO2	7 Marks

UNIT-IV

7	a)	Calculate the Y parameters for the two port network shown below.	CO4	7 Marks
				
	b)	Explain in detail about series and parallel connetion of 2 two port networks.	CO1	7 Marks

(OR)

8	a)	Find the Y parameters of the figure given below.	CO4	7 Marks
				
	b)	Convert z parameter into the h parameters.	CO2	7 Marks

UNIT-V

9	a)	Explain in detail constant K- Low pass filter and constant K- High pass filter.	CO2	7 Marks
	b)	Design m- derived LPF with a cut off frequency of 2K Hz and frequency of attenuation 2100Hz. Give design impedance is 400Ω.	CO3	7 Marks

(OR)

10	a)	Explain in detail m-derived T – Section and m-derived π – Section filter.	CO1	7 Marks
	b)	Design a constant K HPF for a cutoff frequency of 2KHz. Given R_o = 500Ω.	CO3	7 Marks

ELECTRICAL TECHNOLOGY

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive EMF equation of a DC generator.	CO2	7 Marks
	b)	A 1500KW, 550V, 16 pole separately excited DC generator runs at 1500 r.p.m. What must be the useful flux/pole if there are 2500 conductors in the armature is lap connected? The full load armature copper loss is given as 25KW.	CO4	7 Marks
		(OR)		
2	a)	Explain how a Swinburne's test is conducted on DC shunt machine.	CO5	7 Marks
	b)	A 240 V, 4 pole wave connected shunt motor gives 1119 KW when running at 1000 r.p.m and drawing an armature current of 50A. The shunt field resistance is 240Ω. The armature has 540 conductors. Armature resistance is 0.1Ω. Find i) Gross torque. ii) Shaft torque iii)Useful flux/pole. Take total brush voltage drop as 2V.	CO4	7 Marks

UNIT-II

3	a)	Explain the working of single phase transformer with the help of a phasor diagram.	CO1	7 Marks
	b)	A single phase working at unity pf has an efficiency of 90% at both half-full load and full load of 1 KW. Calculate its efficiency at 70% of full load.	CO4	7 Marks
		(OR)		
4	a)	Discuss with neat sketch the equivalent circuit of transformer on load.	CO2	7 Marks
	b)	The primary and secondary windings of 40KVA, 6600/250V single phase transformer have resistances of 10Ω and 0.02Ω respectively. Total leakage reactance of 35Ω referred to primary winding. Find full load regulation of power factor of 0.8 lag.	CO4	7 Marks

UNIT-III

5	a)	Derive relationship between voltages and currents in 3-phase star connected system.	CO2	7 Marks
	b)	Three coils of resistance 4Ω and reactance 3Ω are connected in delta across 400V, 50Hz supply. Find the current in each phase, line current in each phase, line current, real power and reactive power.	CO4	7 Marks
		(OR)		
6	a)	With the help of a circuit and phasor diagrams, show that the total power in a 3 phase, 3-wire star connected balanced load can be measured with the help of one wattmeter.	CO2	7 Marks
	b)	Discuss the advantages of a poly phase system.	CO1	7 Marks

UNIT-IV

7	a)	Derive an expression for the torque of an induction motor and obtain the condition for maximum torque.	CO2	7 Marks
	b)	A 3 phase induction motor has 2 poles and is connected to 400V, 50Hz supply. Calculate the actual rotor speed and rotor frequency when the slip is 4%.	CO4	7 Marks
		(OR)		

8	a)	Derive the EMF equation of an alternator	CO2	7 Marks
	b)	A 3 phase 10KVA, 400V, 50Hz alternator has per phase armature resistance and synchronous reactance of 0.5Ω and 2.5Ω respectively. Calculate generated emf corresponding to full load at unity power factor.	CO4	7 Marks

UNIT-V

9	a)	Discuss the different starting methods of single phase induction motor.	CO1	7 Marks
	b)	Discuss the applications of single phase induction motor.	CO6	7 Marks

(OR)

10	a)	Why a single phase induction motor is not self starting.	CO2	7 Marks
	b)	Explain about the constructional details of shaded pole motor.	CO1	7 Marks

UNIT-I

1	a)	Explain L-D process.	CO1	5 Marks
	b)	Explain the advantages of Vacuum Melting and give the description of any one such furnace.	CO2	9 Marks
		(OR)		
2		Explain Cupola furnace with neat sketch and indicate zones in it.	CO1	14 Marks

UNIT-II

3	a)	Discuss the allotropy of Iron.	CO4	4 Marks
	b)	Explains Iron–Carbon equilibrium diagram with a neat sketch.	CO4	10 Marks
		(OR)		
4	a)	What is Gibbs phase rule? Explain with an example.	CO4	6 Marks
	b)	Explain Lever rule with an example.	CO4	8 Marks

UNIT-III

5	a)	What is the purpose of Heat Treatment?	CO3	5 Marks
	b)	Write the differences between Annealing and Normalizing.	CO3	9 Marks
		(OR)		
6		Explain TTT diagram and discuss Bainite Transformation.	CO3	14 Marks

UNIT-IV

7		Explain: i) Carburizing. ii) Nitriding. iii) Cyaniding.	CO3	14 Marks
		(OR)		
8		Explain the TEM with a neat sketch.	CO5	14 Marks

UNIT-V

9		Explain the Production powders with neat sketches.	CO6	14 Marks
		(OR)		
10		What is Powder Metallurgy? Explain the process with a diagram. Mention the advantages of Powder Metallurgy over Stir Casting.	CO6	14 Marks

KINEMATICS OF MACHINERY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

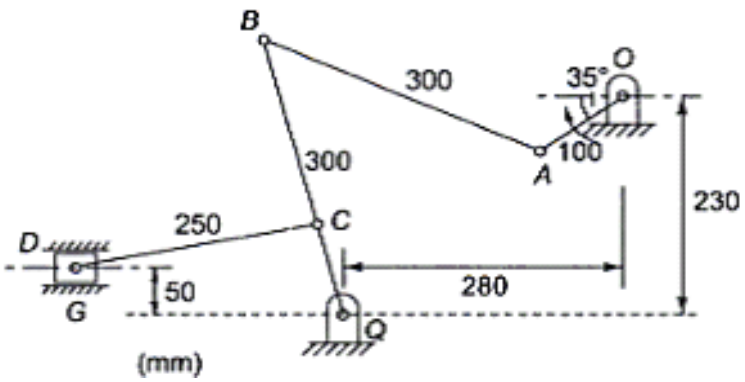
1	a)	What are quick-return mechanisms? Where are they used? Discuss the functioning of any one of them.	CO1	7 Marks
	b)	Distinguish between: i) Mechanism and Machine. ii) Analysis and Synthesis of mechanisms. iii) Kinematics and dynamics.	CO2	7 Marks

(OR)

2	a)	Explain Grubler's criterion for determining degree of freedom for mechanisms. Using Grubler's criterion for plane mechanism, prove that the minimum number of binary links in a constrained mechanism with simple hinges is four.	CO1	7 Marks
	b)	Identify the kinematic chains to which the following mechanisms belong: i) Steam engine mechanism. ii) Beam engine. iii) Whitworth quick return motion mechanism. iv) Elliptical trammels.	CO6	7 Marks

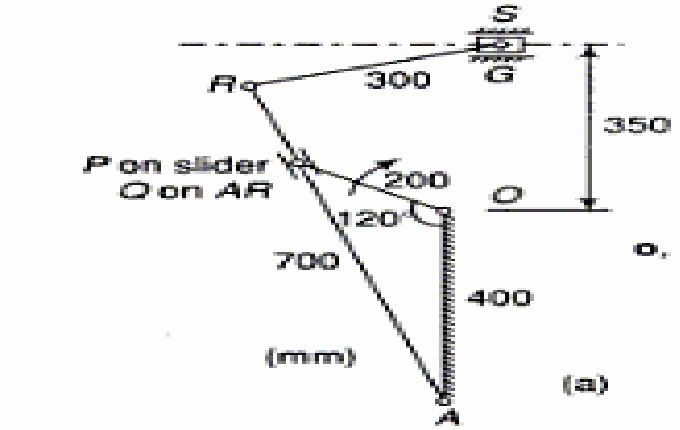
UNIT-II

3		The figure shows a mechanism in which OA=QC=100mm, AB = OB = 300mm and CD=250mm. The crank OA rotates at 150 r.p.m in the clockwise direction. Determine: i) Velocity of the slider at D. ii) Angular velocities of links QB and AB. iii) Rubbing velocity at the pin B which is 40mm in diameter.	CO2	14 Marks



(OR)

4	a)	Discuss the three types of instantaneous centres for a mechanism.	CO2	4 Marks
	b)	Various dimensions of Quick return mechanisms of slotted lever type are given OA=400mm, OP=200mm, AR=700mm, RS=300mm. For the configuration show determine the acceleration of cutting tool at S and angular acceleration of the link RS. The crank RP rotates at 210 r.p.m.	CO2	10 Marks



UNIT-III

5	a)	What are straight line mechanisms? Describe one type of exact straight line motion mechanism with the help of a sketch.	CO2	7 Marks
	b)	Two shafts with an included angle of 160° are connected by a Hooke's joint. The driving shaft runs at a uniform speed of 1500 r.p.m. The driven shaft carries a flywheel of mass 12kg and 100mm radius of gyration. Find the maximum angular acceleration of the driven shaft and the maximum torque required.	CO2	7 Marks

(OR)

6	a)	Describe the Watt's parallel mechanism for straight line motion and derive the condition under which the straight line is traced.	CO2	7 Marks
	b)	The angle between the axes of two shafts connected by Hooke's joint is 18°. Determine the angle turned through by the driving shaft when the velocity ratio is maximum and unity.	CO2	7 Marks

UNIT-IV

7	a)	Sketch two teeth of a gear and show the following. Face, flank, top land, bottom land, addendum, dedendum tooth thickness, space width, face width and circular pitch.	CO4	7 Marks
	b)	How can you deduce the advantages of involutes systems over cycloidal system?	CO4	7 Marks

(OR)

8	a)	What is the difference between a simple gear train and a compound gear train? Explain with the help of sketches.	CO4	7 Marks
	b)	An epicyclic gear consists of a pinion, a wheel of 40 teeth and an annulus with 84 internal teeth concentric with the wheel. The pinion gear with the wheel and the annulus. The arm that carries the axis of the pinion rotates at 100 r.p.m. If the annulus is fixed, find the speed of the wheel. If wheel is fixed, find the speed of annulus.	CO3	7 Marks

UNIT-V

9	a)	Draw the displacement, velocity and acceleration diagrams for a follower when it moves with uniform acceleration and retardation. Derive the expression for velocity and acceleration during outstroke and return stroke of the follower.	CO5	4 Marks
	b)	It is required to set out the profile of a cam with oscillating follower for the following motion : i) Follower to move outward through an angular displacement of 20° during 90° of cam rotation. ii) Follower to dwell for 45° of cam rotation. iii) Follower to return to its original position of zero displacement in 75° of cam rotation. iv) Follower to dwell for the remaining period of the revolution of the cam. The distance between the pivot centre and the follower roller centre is 70 mm and the roller diameter is 20 mm. The minimum radius of the cam corresponds to the starting position of the follower as given in (i). The location of the pivot point is 70 mm to the left and 60 mm above the axis of rotation of the cam. The motion of the follower is to take place with S.H.M. during out stroke and with uniform acceleration and retardation during return stroke.	CO5	10 Marks

(OR)

10		A cam rotating clockwise at a uniform speed of 1000 r.p.m. is required to give a roller follower the motion defined below : i) Follower to move outwards through 50mm during 120° of cam rotation. ii) Follower to dwell for next 60° of cam rotation. ii) Follower to return to its starting position during next 90° of cam rotation, iv) Follower to dwell for the rest of the cam rotation. The minimum radius of the cam is 50mm and the diameter of roller is 10mm. The line of stroke of the follower is off-set by 20mm from the axis of the cam shaft. If the displacement of the follower takes place with uniform and equal acceleration and retardation on both the outward and return strokes, draw profile of the cam and find the maximum velocity and acceleration during out stroke and return stroke.	CO6	14 Marks

	b)	State the application of sweep and skeleton pattern.	CO2	7 Marks
		(OR)		
2	a)	Discuss the various elements that comprise the gating system.	CO3	7 Marks
	b)	State the various methods for testing moulding sand.	CO3	7 Marks
		UNIT-II		
3	a)	Distinguish between permanent mould casting and die casting.	CO4	7 Marks
	b)	Describe the procedure of making castings by the investment casting process.	CO3	7 Marks
		(OR)		
4	a)	What are the methods of non-destructive testing used in foundries?	CO4	7 Marks
	b)	Explain casting defects with causes and their remedies.	CO4	7 Marks
		UNIT-III		
5	a)	Sketch and explain various types of rolling mills.	CO5	7 Marks
	b)	Discuss various types of extrusion processes with neat sketches.	CO5	7 Marks
		(OR)		
6	a)	Describe about progressive die and compound die.	CO4	7 Marks
	b)	Explain the explosive forming process with neat sketch.	CO5	7 Marks
		UNIT-IV		
7	a)	With the help of neat sketch, explain the working principle of submerged welding process and mention its applications.	CO1	7 Marks
	b)	With the help of neat sketch, explain the working principle of spot welding process.	CO1	7 Marks
		(OR)		
8	a)	What are the some of the important welding defects? Discuss briefly.	CO4	7 Marks
	b)	Compare the process of soldering and brazing.	CO1	7 Marks
		UNIT-V		
9	a)	What are the different types of plastics? Discuss briefly.	CO1	7 Marks
	b)	With the help of neat sketch, explain the injection moulding process.	CO4	7 Marks
		(OR)		
10	a)	Explain the various steps required to manufacture a plastic bottle using blow moulding process with neat sketch.	CO5	7 Marks
	b)	With the help of neat sketch, explain the process of transfer moulding.	CO5	7 Marks

II B.Tech I Semester (SVEC-16) Supplementary Examinations February – 2021

STRENGTH OF MATERIALS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

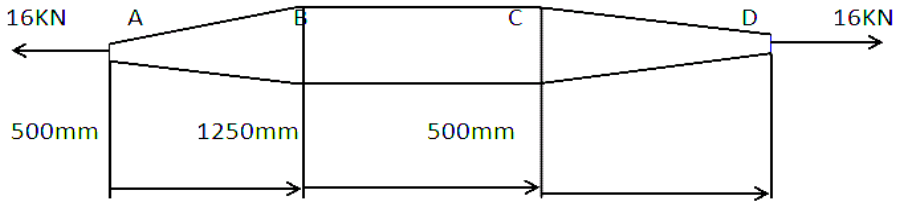
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw stress strain diagram for ductile material, marks the salient points and explain each of them in detail.	CO1	6 Marks
	b)	Three steel bars are made with cross sectional shape of circular with diameter 12mm, square of side 12mm and an equilateral triangle of side 12mm. They are subjected to a load of 40KN with length 2.5m and the poisson's ratio of 0.25. Determine the stress and strain in each member. Take E= 2 x 10^5 N/mm^2.	CO2	8 Marks

(OR)

2		Calculate the elongation of a copper bar of solid circular cross section with tapered ends when it is stretched by axial loads of magnitude 16kN (As shown in figure). The length of the end segments is 500mm and the length of the prismatic middle segment is 1250mm. The diameters at cross sections A, B, C and D are 12, 24, 24 and 12mm respectively and the modulus of elasticity is 120GPa.	CO3	14 Marks



UNIT-II

3		Draw the shear force and bending moment diagram for the beam shown in Fig. 1. Locate the point of contraflexure if any. Also find the point of maximum bending moment.	CO6	14 Marks

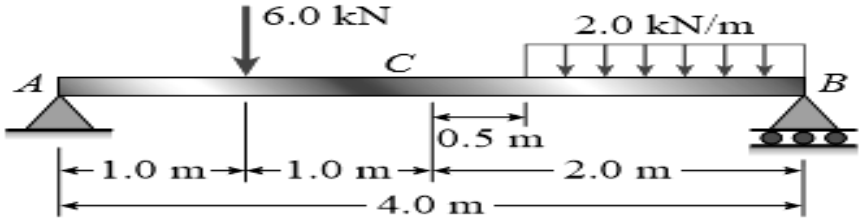


Fig. 1.

(OR)

4		A cantilever of length 6m carries two point loads of 2KN and 3KN at a distance of 1m and 6m from the fixed end respectively. It also carries a uniformly distributed load of 1KN/m over a length of 2m at a distance of 3m from the fixed end. In addition to that beam also carries a clockwise couple of 3KN-m at a distance of 4m from fixed end. Draw the shear force and bending moment diagram.	CO6	14 Marks

UNIT-III

5	a)	Derive torsion equation and define polar section modulus.	CO1	6 Marks
	b)	The steel axle of a large winch on an ocean liner is subjected to a torque of 1.65KN-m. What is the minimum required diameter $\mathbf{d_{min}}$, if the allowable shear stress is 48MPa and the allowable rate of twist is 0.75^0/m. Assume that the shear modulus of elasticity is 80 GPa.	CO2	8 Marks

(OR)

6		A Cast iron beam 20mm x 20mm in section and 100cm long is simply supported at the ends. It carries a point load W at the centre. The maximum stress induced is 120N/mm^2. What uniformly distributed load will break a cantilever of the same material 50mm wide, 100mm deep and 2m long.	CO3	14 Marks

UNIT-IV

7		Calculate the slope at ends and deflection at the middle of simply supported beam of span 'L' subjected to the following loads. i) When a concentrated load 'P' acts at the middle. ii) When a UDL of intensity 'w' per unit run act over entire span.	CO2	14 Marks

(OR)

8		A simply supported beam of 4m length and of uniform rectangular cross section 200mm wide and 350mm deep is loaded with a 50 KN load at its centre of beam. In addition to this it carries a uniformly distributed load of 30KN/m run over its entire length. Calculate i) Maximum slope and maximum deflection. ii) Slope and deflection at 3m from one end. Take E = 210GN/m^2.	CO4	14 Marks

UNIT-V

9		A cylindrical vessel whose ends are closed by means of rigid flange plates is made of steel plate 4mm thick. The length and internal diameter of the vessel are 100cm and 30cm respectively. Determine the longitudinal and hoop stresses in the cylindrical shell due to an internal fluid pressure of 2N/mm^2. Also calculate the increase in length, diameter and volume of the vessel. Take E = 2 x 10^5N/mm^2 and poisson's ratio of 0.3.	CO4	14 Marks

(OR)

10		Determine the maximum and minimum hoop stress across the section of a pipe of 400mm internal diameter and 100mm thick, when the pipe contains a fluid at a pressure of 8N/mm^2. Also sketch the radial pressure distribution and hoop stress distribution across the section.	CO5	14 Marks

II B.Tech I Semester (SVEC16) Supplementary Examinations February – 2021

THERMODYNAMICS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain in detail about Thermodynamic equilibrium.	CO1	6 Marks
	b)	Define Thermodynamic system and discuss different types of Thermodynamic systems with examples.	CO1	8 Marks
		(OR)		
2	a)	Define Thermodynamic definition of work and derive the expression for displacement work and state the conditions under which that equation is valid.	CO1	7 Marks
	b)	A gas undergoes a reversible-non flow process according to the relation P=(-3v+15) where v is the volume in m^3 and P is the pressure in bar. Determine the work done when the volume changes from 3 to $6m^3$.	CO2	7 Marks

UNIT-II

3	a)	State First law of thermodynamics applied to a closed system undergoing a cycle and for a process and deduce mathematical formulation for them.	CO1	7 Marks
	b)	A domestic refrigerator consumes 3.5 kWh of work during a period of its operation during which Its internal energy drops by 5500 kJ. Determine the direction and magnitude of heat interaction in the above period of operation.	CO2	7 Marks
		(OR)		
4	a)	State and prove that Kelvin Planck and Clausius statements are equivalent.	CO1	7 Marks
	b)	Air flows at the rate of 0.5kg/s through an air compressor entering at 7m/s velocity, 100kPa pressure and $0.95m^3/kg$ specific volume and leaving at 5m/s, 700kPa and $0.19m^3/kg$. The internal energy of the air leaving is 90kJ/kg greater than that of air entering. Cooling water in the compressor jacket absorbs heat from the air at the rate of 58 kW. i) Compute the rate of shaft work input to the air in Kw. ii) Find the ratio of inlet pipe diameter to the outlet pipe diameter.	CO3	7 Marks

UNIT-III

5	a)	Define Entropy and prove that Entropy is a property of a system.	CO4	7 Marks
	b)	$0.04m^3$ of nitrogen contained in a cylinder behind a piston is initially at 1.06 bar and 15C. The gas is compressed isothermally and reversibly until the pressure is 4.8 bar. Calculate: i) The change of entropy. ii) The heat flow. iii) The work done. Assume nitrogen to act as a perfect gas. Molecular weight of nitrogen=28.	CO4	7 Marks
		(OR)		
6	a)	Define Availability and Irreversibility.	CO4	4 Marks
	b)	A system at 500 K receives 7200 kJ/min from a source at 1000K. The temperature of atmosphere is 300K. Assuming that the temperature of system and source remains constant during heat transfer, find out: i) The entropy produced during heat transfer. ii) The decrease in available energy after heat transfer.	CO4	10 Marks

UNIT-IV

7	a)	Define the following terms as applied to pure substance steam. i) Sensible heat of water. (ii) Latent heat. iii) Dryness fraction of steam. (iv) Heat of superheat.	CO1	7 Marks
	b)	Find the internal energy and entropy of 1 kg of steam at 10 bar, when the condition of steam is: i) 0.85 dry. ii) Dry and saturated. iii) Superheated with degree of superheat being 50 C.	CO2	7 Marks

(OR)

8	a)	Derive an expression for entropy change of an ideal gas in different forms.	CO1	7 Marks
	b)	Show that for an ideal gas, the slope of the constant volume line on the T-s diagram is more than that of the constant pressure line.	CO4	7 Marks

UNIT-V

9	a)	Derive an expression for thermal efficiency of Diesel cycle.	CO4	7 Marks
	b)	An engine working on the Otto cycle has a clearance of 17% of stroke volume and initial pressure of 0.95 bar and temperature 30C. If the pressure at the end of the constant volume heating is 28 bar. Find: i) Air standard efficiency. ii) Maximum temperature in the cycle. iii) Ideal mean effective pressure.	CO5	7 Marks

(OR)

10	a)	Compare Otto, Diesel and Dual combustion cycles for the same compression ratio and heat rejected.	CO4	7 Marks
	b)	The swept volume of a diesel cycle engine working on dual cycle is $0.0053m^3$ and clearance volume is $0.00035m^3$. The maximum pressure is 65 bar. Fuel injection ends at 5 percent of the stroke. The temperature and pressure at the start of the compression are 80^0C and 0.9 bar. Determine the air standard efficiency of the cycle. Take $\gamma = 1.4$ for air.	CO5	7 Marks

II B.Tech I Semester (SVEC-16) Supplementary Examinations February – 2021

ELECTRONIC CIRCUIT ANALYSIS AND DESIGN

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

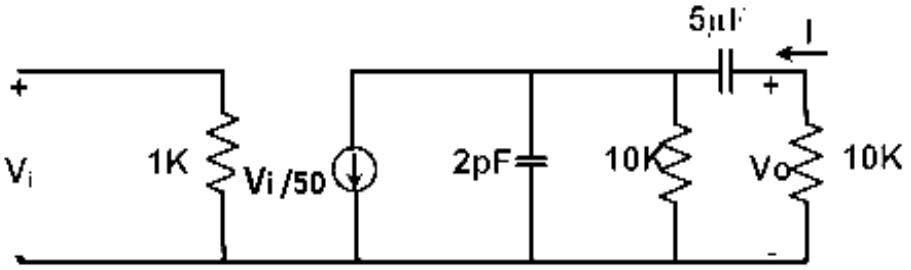
1	a)	Derive the voltage gain, current gain and input impedance expressions for CB amplifier using exact h-parameter model.	CO2	7 Marks
	b)	The h-parameters of the transistor used in CE amplifier are h_{fe} = 50, h_{ie}=1.1 KΩ, h_{re} = 2.5 x 10^{-4}, h_{oe} = 24 μA/V. Find out current gain and voltage gains with and without source resistance, input and output impedances, given that R_L= 10 KΩ and R_S= 1 KΩ.	CO4	7 Marks

(OR)

2	a)	What are the important characteristics of a cascade amplifier? Draw the circuit of CE-CC cascade amplifier and determine an expression for its voltage gain in terms of its circuit parameters.	CO2	7 Marks
	b)	With the help of a neat circuit diagram, analyze the working of a cascode amplifier	CO1	7 Marks

UNIT-II

3	a)	Derive the expression for the hybrid-π parameters $g_m, r_{b'e}, g_{ce}, r_{b'c}, r_{bb'}$ and diffusion capacitance.	CO2	8 Marks
	b)	An amplifier is represented by the following circuit shown, find the mid-band frequency gain. Lower and upper cutoff frequencies	CO4	6 Marks



(OR)

4	a)	Select one amplifier using FET which provides unity voltage gain and explain its behavior with necessary expressions.	CO5	6 Marks
	b)	Derive the expression for CE short circuit current gain and draw its frequency response.	CO2	8 Marks

UNIT-III

5	a)	Describe the following with respect to negative feedback i) Gain sensitivity. ii) Bandwidth extension. iii) Linearizing effect.	CO1	8 Marks
	b)	Apply current series feedback to the common emitter amplifier to increase the input resistance and output resistance.	CO6	6 Marks

(OR)

6	a)	Draw the circuit diagram of Colpitt's oscillator using BJT and derive the expression for frequency of oscillation.	CO2	6 Marks
	b)	Design the range of capacitor in a transistorized Hartley Oscillator the two inductances are 2mH and 20μH while the frequency is to be changed from 950 kHz to 2050 kHz.	CO3	4 Marks
	c)	Design the minimum value of h_{fe} in a transistor Colpitt's oscillator L=100μH, C_1=0.001μF, C_2=0.01μF for providing sustained oscillations.	CO3	4 Marks

UNIT-IV

7	a)	Design a class A power amplifier to obtain power efficiency of 50%	CO3	7 Marks
	b)	A single transistor is operating as an ideal class B amplifier with a 500 load. A **dc** meter in the collector circuit reads 10mA. How much signal power is delivered to the load?	CO4	7 Marks

(OR)

8	a)	What is Harmonic distortion in transistor amplifier circuits? Discuss second harmonic distortion.	CO1	7 Marks
	b)	Explain about heat sinks. Explain the term Thermal Resistance. Give the sketches of heat sinks.	CO1	7 Marks

UNIT-V

9	a)	The bandwidth for single tuned amplifier is 20kHz. Calculate the bandwidth if such three stages are cascaded. Also calculate for four stages.	CO4	4 Marks
	b)	The bandwidth for double tuned amplifier is 20kHz. Calculate the bandwidth if such three stages are cascaded.	CO4	3 Marks
	c)	Explain about Class-C tuned amplifier.	CO1	7 Marks

(OR)

10	a)	Apply your engineering skills to avoid the following problem in double tuned amplifier. "In double tuned amplifier alignment is difficult".	CO6	7 Marks
	b)	Select an appropriate tuned amplifier to obtain high overall gain and illustrate with an example.	CO5	7 Marks

II B.Tech I Semester (SVEC-16) Supplementary Examinations February – 2021

SIGNALS AND SYSTEMS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Illustrate the difference between analog, discrete and digital signals. Draw the graphical representation of : i) $u[-n-2]$. ii) $u[-n+2]$. iii) $u[n]-u[n-10]$.	CO2	7 Marks
	b)	Illustrate whether the following signals are periodic or aperiodic. If the signal is periodic find its fundamental period. i) $x(n) = 3\cos(10n + \pi/6)$ ii) $x(n) = e^{(j\pi n/2)}$.	CO4	7 Marks
		(OR)		
2	a)	A Continuous time signal is shown in figure. Sketch and label each of the following signals. i) $y_1(t) = x(t).\ u(1-t)$ ii) $y_2(t) = x(t)\ \{u(t) - u(t-1)\}$ 	CO2	7 Marks
	b)	Let $x(t) = e^{j2t}$ and $y(t) = e^{j\pi t}$, and consider their sum $z(t) = x(t) + y(t)$, and their product $w(t) = x(t)\,y(t)$. Determine if $z(t)$ and $w(t)$ are periodic, and if so, find their periods.	CO4	7 Marks

UNIT-II

3	a)	Find the Fourier Transform of the signal. $x(t) = x^1(t) * x^2(t)$ where, $x^1(t) = e^{-2t}\,u(t)$ and $x^2(t) = u(t)$.	CO4	7 Marks
	b)	State and prove any three properties of Fourier Series.	CO1	7 Marks
		(OR)		
4	a)	The given rectangular pulse is $x(t) = \begin{cases} 1, & \lvert t\rvert < T_1 \\ 0, & \lvert t\rvert > T_1 \end{cases}$. Find the Fourier transform.	CO3	7 Marks
	b)	What is an LTI system and Impulse response of a system? Explain briefly.	CO1	7 Marks

UNIT-III

5	a)	Differentiate convolution and correlation of signals with examples.	CO1	7 Marks
	b)	An excitation and impulse response of the system are given. Find the responses. $x(t) = u(t)$; $h(t) = 2u(t-1) - 2u(t-4)$	CO2	7 Marks
		(OR)		
6	a)	Explain Parseval's theorem and power density spectrum.	CO1	7 Marks
	b)	Discuss about detection of periodic signals in the presence of noise by correlation.	CO5	7 Marks

UNIT-IV

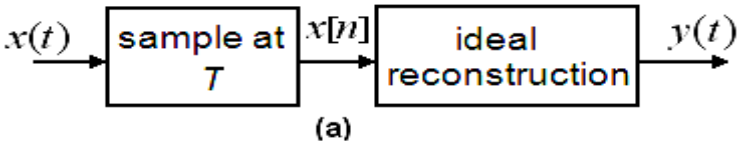
7	a)	A signal has Laplace transform $X(s) = \frac{s+2}{s^2+4s+5}$. Find Laplace transform $Y(s)$ of the signal $y(t) = tx(t)$.	CO4	7 Marks
	b)	For the following transform pair $L[x(t)] = \frac{2s}{s^2-2}$, determine the Laplace transform of $\boldsymbol{x(2t)}$.	CO4	7 Marks

(OR)

8	a)	Explain properties of ROC in Laplace transform.	CO1	7 Marks
	b)	Find the Laplace transform of $\boldsymbol{x(t) = t^2 e^{-2t} u(t)}$.	CO3	7 Marks

UNIT-V

9	a)	Consider the following sampling and reconstruction configuration: The output $y(t)$ of the ideal reconstruction can be found by sending the sampled signal $x_s(t) = x(t)p(t)$ through an ideal low pass filter shown in figure. Let $x(t) = 2 + \cos(50\pi t)$ and T = 0.01. Determine and sketch $\lvert X_s(\Omega)\rvert$ where $x_s(t) = x(t)p(t)$. Determine if aliasing occurs.	CO5	7 Marks



(a)

	b)	Build the concept of Sampling theorem with neat diagrams.	CO1	7 Marks

(OR)

10	a)	Find the z- transform of the following using ZT properties. i) $\boldsymbol{x[n]=n(1/3)^n u[n]}$ ii) $\boldsymbol{x[n] = (1/4)^{n+1} u[n-2]}$	CO4	7 Marks
	b)	Determine the inverse ZT of the sequence $X[z] = \frac{1-2z^{-1}}{1+\frac{1}{2}z^{-1}}$, if $x(n)$ is: i) Causal sequence. ii) Anti causal sequence.	CO4	7 Marks

SWITCHING THEORY AND LOGIC DESIGN

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Each of the following arithmetic operations is correct in at least one number system. Determine the bases in each operation: i) 41 / 3 = 13. ii) . $\sqrt{41} = 5$	CO1	6 Marks
	b)	Given the following Boolean function: $F = xy'z + x'y'z + w'xy + wx'y + wxy$ i) Obtain the truth table of the function. ii) Draw the logic diagram using the original Boolean expression.	CO1	8 Marks

(OR)

2	a)	Verify that the following operations are commutative but not associative. i) NAND. ii) NOR.	CO1	6 Marks
	b)	Expand and simplify the expressions using De Morgan's theorem: i) $F(A,B,C) = (A+B)'(ABC)'(A'C)'$. ii) $F(A,B,C) = [(AB+B'C)+(BC'+A'B)]'$.	CO1	8 Marks

UNIT-II

3	a)	Simplify the following Boolean expression and implement with NAND gates F=Σ(0, 1, 2, 4, 5, 7, 11, 15).	CO1	6 Marks
	b)	Convert the given expressions into sum of products and product of sums: i) $(AB+C)B+C'D)$. ii) $x'+x(x+y')(y+z')$.	CO1	8 Marks

(OR)

4	a)	Simplify the following Boolean function using Tabulation method. $F(A, B, C, D) = \Sigma(1, 3, 4, 5, 10, 11, 12, 13, 14,15)$.	CO1	8 Marks
	b)	Find the minimum product-of-sums form for the following function and implement the function using NOR gates only: $F = \Sigma(4, 5, 8, 9, 12, 13) + d(0, 3, 7, 10, 11)$.	CO1	6 Marks

UNIT-III

5	a)	Design the 4-bit BCD adder and illustrate its operation.	CO2	7 Marks
	b)	A combinational circuit is defined by the following functions: $F_1 = x'y' + xyz'; F_2 = x' + y; F_3 = xy + x'y'$ Design the circuit with a decoder and external OR gates.	CO2	7 Marks

(OR)

6	a)	Show that a full-subtractor can be constructed with two half-subtractors and an OR gate.	CO2	7 Marks
	b)	Implement a full adder function using 4 x 1 multiplexers.	CO2	7 Marks

UNIT-IV

7	a)	Illustrate the operation of MSJK flip-flop using NAND gates.	CO2	6 Marks
	b)	Design a synchronous BCD counter with JK flip-flops.	CO5	8 Marks

(OR)

8 a) Reduce the number of states in the following state table and tabulate the reduced state table. CO2 7 Marks

Present State	Next State		Output	
	$x = 0$	$x = 1$	$x = 0$	$x = 1$
a	f	b	0	0
b	d	c	0	0
c	f	e	0	0
d	g	a	1	0
e	d	c	0	0
f	f	b	1	1
g	g	h	0	1
h	g	a	1	0

b) The contents of a serial-in/serial-out shift register are DCBA = 0101, where A is the least significant digit of the register. A serial input 10011 is moved into the shift register from left to right, most significant bit first by five successive clock pulses. Draw time diagrams showing how the outputs of the four flip-flops vary with time during the period of the five clock pulses. CO2 7 Marks

UNIT-V

9 a) Implement the following Boolean function using PAL: CO3 6 Marks

$F_1 = \Sigma m(0, 2, 5, 7, 8, 10, 12, 13)$

b) Design an Excess-3 to BCD code converter using PROM. CO3 8 Marks

(OR)

10 a) Design a BCD-to-seven segment decoder using PLA. CO3 7 Marks

b) Give the logic implementation of a 32 x 4 bit ROM using a decoder. CO3 7 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

II B.Tech I Semester (SVEC16) Supplementary Examinations February – 2021

ANALOG ELECTRONIC CIRCUITS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive the expressions for A_I, A_V, R_i, and R_o for common emitter amplifier with unbypassed R_E.	CO1	8 Marks
	b)	Draw the high frequency hybrid-π model for a CE transistor and indicate typical values of circuit parameters.	CO1	6 Marks
		(OR)		
2	a)	Compare the three types of coupling methods used in multistage amplifiers.	CO1	6 Marks
	b)	Given the following transistor measurements made at I_C = 5mA, V_{CE} = 10V and at room temperature h_{fe} = 100, h_{ie} = 600Ω, A_{ie} = 10 at 10MHz, Ce = 3pF. Find f_β, f_T, C_e, $r_{b'e}$ and $r_{bb'}$.	CO4	8 Marks

UNIT-II

3	a)	Draw the circuit diagram of current series feedback amplifier and derive the expressions for voltage gain, output impedance and input impedance.	CO3	8 Marks
	b)	An amplifier has an open loop gain of 1000 and a feedback ratio of 0.04. If the open loop gain changes by 10% due to temperature, find the percentage change in gain of the amplifier with feedback.	CO1	6 Marks
		(OR)		
4	a)	Classify various oscillators based on output waveforms, circuit components, operating frequencies and feedback sued.	CO1	8 Marks
	b)	In a RC phase shift oscillator, the feedback network uses R = 6KΩ and C = 1500pF. The transistorized amplifier used, has a collector resistance of 18KΩ. Calculate the frequency of oscillations and minimum value of h_{fe} of the transistor.	CO2	6 Marks

UNIT-III

5	a)	How the even harmonics in push pull amplifier are are eliminated. Using five point method, derive an expression for the total harmonic distortion.	CO2	8 Marks
	b)	A transistor used in audio frequency amplifier, working in class A operation supplies 0.8W to 4KΩ load. The zero signal d.c. collector current is 31mA and the DC collector current with signal is 36mA. Determine the second harmonic distortion.	CO4	6 Marks
		(OR)		
6	a)	With a neat diagram, explain the principle of operation of class B push pull amplifier and obtain the maximum value of overall efficiency.	CO1	6 Marks
	b)	Design a class-B push pull amplifier to deliver 20 Watts to a load of 16Ω. Given $V_{CC} = V_m$ = 40Volts.	CO3	8 Marks

UNIT-IV

7	a)	Explain how a sinusoidal waveform is converted into a square wave using clipper circuit.	CO1	6 Marks
	b)	Sketch the response of the RC high pass circuit excited by an exponential input and derive the expression for output.	CO2	8 Marks
		(OR)		

8	a)	Draw the circuit diagram for a negative and positive voltage clamping circuits. Sketch the input and output waveforms and explain the operation.	CO2	8 Marks
	b)	State and prove the Clamping circuit theorem.	CO1	6 Marks

UNIT-V

9	a)	The fixed biased binary uses npn silicon transistor with $h_{fe} = 20$. Assume that $V_{CE} = 12V$, $V_{bb} = 3V$, $R_c = 1K\Omega$, $R_1 = 10K\Omega$, $R_2 = 20K\Omega$. Find the stable state current and voltages of $V_{CE(sat)} = 0$ and $V_{be(sat)} = 0$.	CO2	8 Marks
	b)	With the help of neat diagram, discuss the different methods of triggering a binary.	CO1	6 Marks

(OR)

10	a)	Draw the circuit diagram of self biased transistor binary and analyze the design.	CO1	8 Marks
	b)	Find the period and output frequency of an astable multivibrator with $R_1 = R_2 = 25K\Omega$ and $C_1 = C_2 = 0.4\mu F$	CO2	6 Marks

CODE No.: 16BT30501 SVEC-16

SREE VIDYANIKETHAN ENGINEERING COLLEGE

II B.Tech I Semester (SVEC-16) Supplementary Examinations February – 2021

COMPUTER ORGANIZATION

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw and explain the diagram for 4-bit arithmetic circuit with four full adders circuits with 4-bit adders and four multiplexers for choosing different operations.	CO3	8 Marks
	b)	Show the step by step multiplication process using Both algorithm for given multiplicand (+15) and multiplier (-13).	CO4	6 Marks
		(OR)		
2	a)	Design a digital circuit that performs the four logic operations of Ex-OR, Ex-NOR, NOR and NAND. Use two selection variables. Show the logic diagram for one typical stage.	CO3	6 Marks
	b)	Draw and explain floating addition and subtraction flowchart.	CO1	8 Marks

UNIT-II

3	a)	With a neat diagram, explain the design of control unit with microprogram sequencer.	CO1	6 Marks
	b)	Write a program to evaluate the arithmetic statement X=(A*B) + (C*D) using three/two/one/zero address instructions.	CO5	8 Marks
		(OR)		
4	a)	Draw and explain the flowchart for instruction cycle.	CO1	6 Marks
	b)	List and explain various addressing modes with an example.	CO5	8 Marks

UNIT-III

5	a)	With the help of block diagram, explain the concept of DMA controller.	CO1	5 Marks
	b)	Discuss about the various modes of data transfer with practical example.	CO2	9 Marks
		(OR)		
6	a)	Distinguish between isolated I/O and memory mapped I/O with an example.	CO2	6 Marks
	b)	Demonstrate the role of IOP with neat diagram. Give the steps involved in CPU-IOP communication.	CO4	8 Marks

UNIT-IV

7	a)	Compare SRAM and DRAM in detail.	CO2	7 Marks
	b)	How many memory chips are needed to construct 2M*16 memory system using 512k*8 static memory chips?	CO3	7 Marks
		(OR)		
8	a)	Write short notes on magnetic disk and optical disks	CO6	8 Marks
	b)	How many 128*8 RAM chips are needed to provide a memory capacity of 2048? And how many lines of the address bus must be used to access 2048 bytes of memory? How many of these lines will be common to all chips? How many lines must be decoded for the line select?	CO3	6 Marks

UNIT-V

9	a)	Consider the multiplication of two 40*40 matrices using a vector processor. i) How many product terms are there in each inner product and how many inner products must be evaluated? ii) How many multiply-add operations are needed to calculate the product matrix?	CO6	8 Marks
	b)	Distinguish between Arithmetic pipe line and Instruction pipe line	CO2	6 Marks
		(OR)		
10	a)	Discus the various interconnection structures with neat sketch.	CO1	10 Marks
	b)	Explain the serial arbitration with neat sketch.	CO1	4 Marks

CODE No.: 16BT30502 SVEC-16

DATA STRUCTURES

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Show how you identify the first and last node in the doubly circular linked list.	CO2	7 Marks
	b)	Write the advantages of using doubly linked list over singly linked list.	CO1	7 Marks
		(OR)		
2	a)	Explain and write a function to find the smallest and largest element of singly linked lists.	CO3	7 Marks
	b)	Construct an algorithm to perform polynomial addition.	CO4	7 Marks

UNIT-II

3		"Suppose we have a data representation for mapping two stacks into a one dimensional array, so that the elements of first stack are stored at odd index values and the elements of other stack are stored at even index values". Write an algorithm to add and delete elements from these stacks.	CO4	14 Marks
		(OR)		
4		Describe the linked implementation of queues with insertion, deletion operation.	CO1	14 Marks

UNIT-III

5		Compose in detail about AVL Tree and explain various rotations of AVL Trees maintaining balance factor while insertion and deletion takes place.	CO3	14 Marks
		(OR)		
6	a)	Explain the steps involved in converting the general tree to a binary tree with an example.	CO1	7 Marks
	b)	Write Explain algorithms for binary tree traversals.	CO1	7 Marks

UNIT-IV

7		Write about: i) Insertion. ii) Deletion operations in B-Trees.	CO2	14 Marks
		(OR)		
8		Explain in detail about the BFS with suitable example and write the BFS algorithm	CO1	14 Marks

UNIT-V

9		Construct step by step, how Merge sort sorts, for the following list of numbers {142, 543, 123, 65, 453, 879,572, 434} and explain in detail.	CO5	14 Marks
		(OR)		
10	a)	Define what is meant by collision resolution in Hashing.	CO1	7 Marks
	b)	Explain in detail any one strategy for dealing with it.	CO1	7 Marks

PYTHON PROGRAMMING

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is Moor's law? Explain.	CO1	5 Marks
	b)	Write a Python program that prompts the user for two floating-point values and display the result of the first number divided by the second with exactly six decimal places displayed.	CO5	9 Marks
		(OR)		
2	a)	Discuss in detail about Python data types.	CO1	10 Marks
	b)	Write about literals in Python.	CO1	4 Marks

UNIT-II

3	a)	Write in detail about control statement in Python	CO2	9 Marks
	b)	Write a Python program to add up all the even numbers between 10 and 100 using while loop.	CO5	5 Marks
		(OR)		
4	a)	Discuss in detail about dictionaries in Python.	CO2	7 Marks
	b)	Write a program in Python to sort the names in a given list.	CO5	7 Marks

UNIT-III

5	a)	Write about passing of arguments to functions with example.	CO2	7 Marks
	b)	What is a text file? Explain the operations of text files in Python.	CO1	7 Marks
		(OR)		
6	a)	Write in detail about string methods in Python.	CO1	7 Marks
	b)	How do you handle exceptions in Python? Explain.	CO2	7 Marks

UNIT-IV

7	a)	Define encapsulation, inheritance and polymorphism with illustrations.	CO1	9 Marks
	b)	Give a set of instructions that gets the default turtle and sets it to an actual turtle shape.	CO4	5 Marks
		(OR)		
8	a)	Write in detail about pen attributes for turtle graphics.	CO1	6 Marks
	b)	Develop a simple program to create a polygon shape and create an interest design with it.	CO4	8 Marks

UNIT-V

9	a)	Briefly explain about tkinter structure.	CO1	7 Marks
	b)	Write in detail about adding buttons with suitable example.	CO2	7 Marks
		(OR)		
10	a)	With suitable example, explain about reusable GUI components with classes.	CO3	7 Marks
	b)	Write a Python script to develop a window by adding check buttons and radio buttons.	CO5	7 Marks

SENSORS AND TRANSDUCERS

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

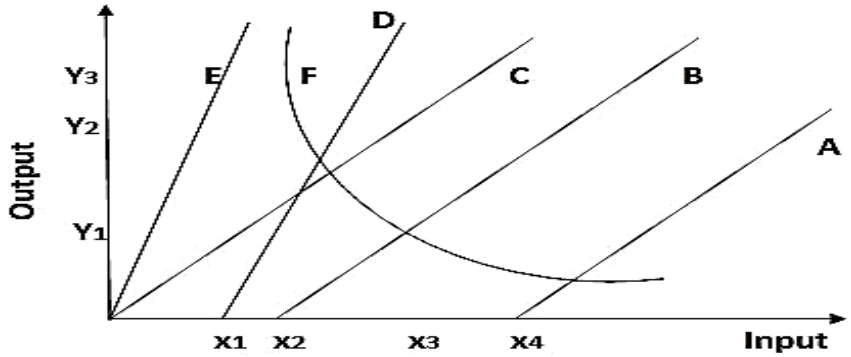
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Illustrate the different types of errors and discuss the causes of errors in measurement and how they can be minimized in detail.	CO6	8 Marks
	b)	Explain the significance of STANDARDS in measurements.	CO1	6 Marks
		(OR)		
2	a)	Why the calibration of instrument is necessary before measurement?	CO6	6 Marks
	b)	Select a suitable example for illustrating the generalized measurement system.	CO1	8 Marks

UNIT-II

3	a)	Classify various transducers and distinguish between active and passive type with any two examples.	CO2	8 Marks
	b)	Choose the best instrument among A, B, C, D, E, F. Comment on each instrument and justify the answer with valid reason.	CO4	6 Marks



(OR)

4	a)	List out any four dynamic characteristics of a measurement system and give their importance in the evaluation of the system.	CO1	7 Marks
	b)	List different types of standard inputs required in the validation process of a dynamic measurement system. Explain.	CO1	7 Marks

UNIT-III

5	a)	How can Resistive potensio meters be used for Linear and angular displacement measurements? Derive the expression for output.	CO3	8 Marks
	b)	Define the Gauge factor and classify the Strain gauges.	CO1	6 Marks
		(OR)		
6	a)	Explain the characteristic behavior of RTD and list out few applications.	CO1	7 Marks
	b)	"HOT WIRE Anemometers are well suitable for the Gas Flow Measurements". Justify mathematically with the neat sketch.	CO3	7 Marks

UNIT-IV

7	a)	Explain the construction and working principle of a LVDT as an inductive transducer. How to detect the magnitude and direction of the displacement of a core?	CO5	8 Marks
	b)	"LVDT " is a Passive Transducer-Justify. Explain the method of using LVDT for the Thickness measurements.	CO5	6 Marks
		(OR)		

8	a)	Differentiate Piezo electric and pyro electric effects and how they are used in various industrial applications.	CO4	7 Marks
	b)	List out the opto electronic transducers and explain any one circuitry operation along with the applications.	CO5	7 Marks

UNIT-V

9	a)	Differentiate Piezo electric and pyro electric effects and how they are used in various industrial applications.	CO3	7 Marks
	b)	List out the opto electronic transducers and explain any one circuitry operation along with the applications.	CO2	7 Marks

(OR)

10	a)	Define Micro Machining. Explain surface and bulk micro machining with neat sketch.	CO1	7 Marks
	b)	What is the function of Bio sensor and list out the biological parameters measured using Bio sensors.	CO1	7 Marks

CODE No.: 16BT31201 SVEC-16

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

II B.Tech I Semester (SVEC-16) Supplementary Examinations February – 2021

DISCRETE MATHEMATICAL STRUCTURES

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Show that: $P \vee (\sim P \wedge Q) \Leftrightarrow (P \vee Q)$.	CO1	7 Marks
	b)	Show that $S \vee R$ is tautologically implied by $(P \vee Q) \wedge (P \rightarrow R) \wedge (Q \rightarrow S)$.	CO2	7 Marks
		(OR)		
2	a)	State the converse, opposite and contrapositive for the implication: "If the triangle is equiangular, then it is equilateral"	CO1	7 Marks
	b)	Convert the following English statements to predicate logic notation: i) All Mokeys have tails. ii) No Mokey has a tail. iii) Some Monkeys have tails.	CO1	7 Marks

UNIT-II

3	a)	Show that if R, S are equivalence relations on set A the RUS need not be an equivalance relation	CO1	7 Marks
	b)	Let X={1, 2, 3, 6, 12, 18} and the relation | is x divides y. Draw the Hasse diagram of (X, |).	CO1	7 Marks
		(OR)		
4	a)	Show that the function $f(x) = x^2$ is not bijective function. Can we find its inverse?	CO1	7 Marks
	b)	Define Distributive Lattice. Check whether $(D_{20}, \|)$, where D_{20} is divisors of 20 and | represents the relation divides.	CO1	7 Marks

UNIT-III

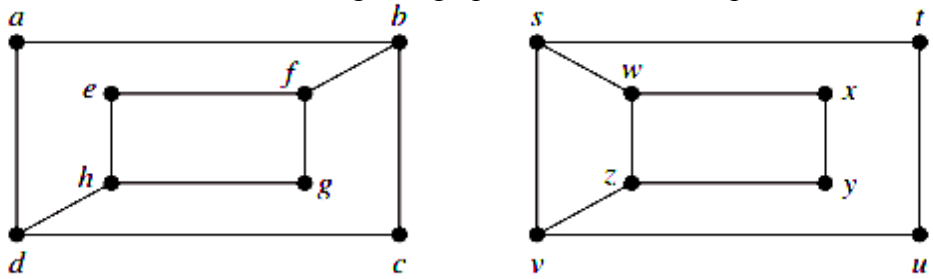
5	a)	Justify whether given set 'S'. S={0, 1, 2, 3, 4, 5} can be semigroup under binary operation $+_5$, i.e additive modulo 5.	CO5	7 Marks
	b)	Define Monoid and Group. Give an example of Monoid which is not an I group.	CO5	7 Marks
		(OR)		
6	a)	Show that in a group (G, .), if $(a.b)^2 = a^2 . b^2 \quad \forall a,b \in G$ then (G, .) is abelian.	CO5	7 Marks
	b)	State and Prove Lagranges theorem.	CO5	7 Marks

UNIT-IV

7	a)	Prove by using Mathematical Induction, $(x-y)$ divides $(x^n - y^n)$, $\forall n \geq 1$.	CO1	7 Marks
	b)	i) How many different license plates are there (allowing repetitions), that involve 1, 2 or 3 letters followed by 1, 2, 3 or 4 digits. ii) Involving 1, 2 or 3 letters and 1, 2, 3 or 4 digits if the letters must occur together.	CO5	7 Marks
		(OR)		
8	a)	Solve the Reccurence Relation $F_n = F_{n-1} + F_{n-2}$, $n \geq 2$ and $F_0 = F_1 = 1$.	CO1	7 Marks
	b)	Solve the Reccurence Relation $a_n - 6a_{n-1} + 8a_{n-2} = n.4^n$.	CO1	7 Marks

UNIT-V

9	a)	State and prove Euler formula on Planar graphs.	CO5	7 Marks
	b)	Check whether the following two graphs G, H are isomorphic.	CO4	7 Marks



G H

(OR)

10	a)	Write the algorithm for Breadth First Search. Explain with an example.	CO4	7 Marks
	b)	State Prims algorithm. Explain Prims algorithm with an example.	CO3	7 Marks

CODE No.: 16BT31501 SVEC-16

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

OPERATING SYSTEMS

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is system call? Explain various types of system calls.	CO1	9 Marks
	b)	Describe the elements of process control block.	CO1	5 Marks

(OR)

2	a)	Discuss the simple operating system structure.	CO1	7 Marks
	b)	Explain about single threaded and multi-threaded process models with suitable diagram.	CO1	7 Marks

UNIT-II

3	a)	What is critical section? Discuss the solution of the critical section problem.	CO2	6 Marks
	b)	Consider the table given below for a system, Resource – 3 types A–(10); B–(5); C–(7) i) Find the need matrix and the safety sequence. ii) Is the request from process P1 (0, 1, 2) can be granted immediately	CO2	8 Marks

Process	Allocation			Maximum			Available		
	A	B	C	A	B	C	A	B	C
P0	0	1	0	7	5	3	3	3	2
P1	2	0	0	3	2	2			
P2	3	0	2	9	0	2			
P3	2	1	1	2	2	2			
P4	0	0	2	4	3	3			

(OR)

4	a)	Define Semaphore. Explain the usage and implementation of semaphores.	CO2	7 Marks
	b)	Explain how deadlocks are prevented.	CO2	7 Marks

UNIT-III

5	a)	What is paging? Discuss the paging model of logical and physical memory.	CO2	7 Marks
	b)	What is the cause of thrashing? How thrashing can be eliminated?	CO2	7 Marks

(OR)

6	a)	Describe the hardware requirements to support the segmentation.	CO2	7 Marks
	b)	Illustrate the page replacement algorithms i) LRU ii) Optimal page replacement. Use the reference string 7, 0, 1, 2, 0, 3, 0, 4, 2, 3, 0, 3, 2, 1, 2, 0, 1, 7, 0, 1 for a memory with three frames.	CO2	7 Marks

UNIT-IV

7	a)	Describe the file system Architecture with diagram.	CO3	7 Marks
	b)	Explain various disk scheduling algorithms with suitable diagrams.	CO4	7 Marks

(OR)

8	a)	Discuss about various File Access methods.	CO3	7 Marks
	b)	Explain about swap space management.	CO4	7 Marks

UNIT-V

9	a)	What are the advantages and disadvantages of supporting memory mapped I/O to device control registers.	CO5	7 Marks
	b)	Explain different schemes for protection.	CO5	7 Marks
		(OR)		
10	a)	Discuss the principles of Protection.	CO5	6 Marks
	b)	What are the similarities and differences between access-matrix facility and the role based access control facility?	CO5	8 Marks

CODE No.: 16BT41202 SVEC-16

JAVA PROGRMMING

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	List and explain the Java buzzwords.	CO1	8 Marks
	b)	How "for each" is different from "for" loop? Write a program to calculate average of given 10 numbers using "for each" loop.	CO2	6 Marks
		(OR)		
2	a)	Discuss various control structures available in Java.	CO1	8 Marks
	b)	Why "Java is called platform independent language"? Justify.	CO1	6 Marks
		UNIT-II		
3		What are the advantages of inheritance? Explain various types of inheritances with suitable examples.	CO1	14 Marks
		(OR)		
4	a)	What is an interface? Demonstrate how interfaces can be extended.	CO2	8 Marks
	b)	Discuss the uses of "final" keyword with suitable examples.	CO2	6 Marks
		UNIT-III		
5	a)	Explain the concept of exception handling with suitable example.	CO2	8 Marks
	b)	Write a program to demonstrate user defined exceptions in Java.	CO2	6 Marks
		(OR)		
6	a)	Explain thread synchronization with an example.	CO3	6 Marks
	b)	What is multithreading? How we create multiple threads in Java?	CO3	8 Marks
		UNIT-IV		
7	a)	Discuss PriorityQueue class in Java.	CO4	6 Marks
	b)	Discuss briefly Java AWT controls.	CO4	8 Marks
		(OR)		
8	a)	Define an applet. Explain applet life cycle methods with the help of an example program.	CO4	6 Marks
	b)	Define an Event and explain its role in AWT event handling.	CO4	8 Marks
		UNIT-V		
9	a)	What is the role of event listeners in event handling? List the Java event listeners with suitable example.	CO5	8 Marks
	b)	Discuss briefly adapter classes in Java.	CO5	6 Marks
		(OR)		
10	a)	Write a program to display current web server date and time using GenericServlet with detailed deployment steps.	CO6	8 Marks
	b)	Explain Http Servlet Life–Cycle with neat sketch.	CO6	6 Marks

II B.Tech I Semester (SVEC-16) Supplementary Examinations February - 2021

LINUX PROGRAMMING

[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe the list of the programming languages available for Linux system.	CO1	7 Marks
	b)	Write a simple Linux program to enter the details of the student and display them.	CO3	7 Marks
		(OR)		
2	a)	Describe the characteristics of Unix programs and systems.	CO1	8 Marks
	b)	Write a short notes on the following: i) Text Editors. ii) The C Compiler.	CO1	6 Marks

UNIT-II

3	a)	Illustrate how inputs and outputs of Linux programs can be redirected.	CO5	7 Marks
	b)	Two numbers are entered through the keyboard. Write a shell script to find the value of one number raised to the power of another.	CO3	7 Marks
		(OR)		
4	a)	What is meant by Shell? Describe in detail the Shell environment with a neat sketch.	CO1	7 Marks
	b)	Write a shell script which gets executed the moment the user logs in. It should display the message “good morning”, “good afternoon”, “good evening” based on the time of login.	CO5	7 Marks

UNIT-III

5	a)	Analyze various systems calls for managing the files.	CO2	7 Marks
	b)	Discuss in detail various commands related to the directories with an examples.	CO1	7 Marks
		(OR)		
6	a)	Explain the following Standard I/O library commands: i) fopen. ii) fwrite. iii) fseek. iv) puts.	CO2	8 Marks
	b)	Write a shell script that accepts a file name, starting and ending line numbers as arguments and displays all the lines between the given line numbers.	CO4	6 Marks

UNIT-IV

7	a)	Illustrate the working principle of parent process and child process using fork system call.	CO6	7 Marks
	b)	Define signal and mention the different types of signal sources, illustrate the catching of signal with example.	CO1	7 Marks
		(OR)		
8	a)	Demonstrate the need for Zombie process with an example.	CO1	6 Marks
	b)	Write a program that accepts two small numbers as arguments and then sums the two in a child process. The sum should be returned by the child to the parent as its exit status and the parent should print the sum.	CO5	8 Marks

UNIT-V

9	a)	Define socket. Illustrate socket attributes and the process of creating a socket.	CO1	7 Marks
	b)	Does the FIFO pipe overcome the limitations of normal pipe? Justify your answer.	CO6	7 Marks

(OR)

10	a)	Define pipe. Create a named pipe using mknod with an example	CO4	6 Marks
	b)	Develop a C program to setup a two-way pipe between parent and child processes so that both can send and receive signals.	CO6	8 Marks

CODE No.: 16BT3BS01 SVEC-16

Roll No. | | | | | | | | | | |

SREE VIDYANIKETHAN ENGINEERING COLLEGE

II B.Tech I Semester (SVEC-16) Supplementary Examinations January - 2022

PROBABILITY DISTRIBUTIONS AND STATISTICAL METHODS

[Civil Engineering; Mechanical Engineering, Computer Science and Engineering; Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) A fair coin is tossed until a head or five tails occurs. Calculate the expected number of tosses of the coin? CO4 7 Marks

b) For the continuous probability function $f(x) = k\,x^2\,e^{-x}$ when $x \geq 0$. Determine (i) k. (ii) Mean of *X*. (iii) Variance of *X*. CO4 7 Marks

(OR)

2 a) For the following probability distribution CO4 7 Marks

X=x	*-3*	*6*	*9*
P(X=x)	*1/6*	*1/2*	*1/3*

Find (i) $E(X)$. (ii) $E(x^2)$. (iii) $E[2x+1)^2]$.

b) If X is a continuous random variable with p.d.f CO4 7 Marks

$$f(x) = \begin{cases} x^2, 0 \leq x \leq 1 \\ 0, \text{ elsewhere} \end{cases}$$

If $P(a \leq x \leq 1) = \frac{19}{81}$, estimate the value of '*a*'.

UNIT-II

3 a) In a large consignment of electric bulbs 10% are defective. A random sample of 20 is taken for inspection. Determine the probability that CO4 6 Marks

i) All are good bulbs.
ii) Almost there are three defective bulbs.
iii) Exactly there are three defective bulbs.

b) If X is normally distributed with mean 6 and S.D 2; CO4 8 Marks

Determine i) $P(0 < X < 12)$. ii) $P(X < 10)$. iii) $p(X \geq 10)$.

(OR)

4 a) In a binomial distribution consisting of 5 independent trials, probabilities of getting 1 and 2 successes are 0.4096 and 0.2048 respectively. Calculate the parameter 'p' of the distribution. CO4 7 Marks

b) Design a Poisson distribution function satisfying the data and also find the expected frequencies: CO3 7 Marks

X	0	1	2	3	4
f	109	65	22	3	1

UNIT-III

5 Price indices of cotton and wool are given below for the 12 months of a year. Write the equations of lines of regression between the indices CO4 14 Marks

X	78	77	85	88	87	82	81	77	76	83	97	93
Y	84	82	82	85	89	90	88	92	83	89	98	99

(OR)

6 a) During an examination of equal length of 10 cloths the following are the number of defects observed. 2, 3, 4, 0, 5, 6, 7, 4, 3, 2. Design a control chart for the number of defects and comment whether the process is under control or not. CO3 8 Marks

b) Define regression lines and regression coefficients. Write the relationship between correlation coefficient and regression coefficients. CO1 6 Marks

UNIT-IV

7 a) In a random sample of 100 packages shipped by air freight 13 had some damage. Construct 95% confidence interval for the true proportion of damage package. CO2 7 Marks

b) In a city A, 20% of a random sample of 900 school boys has a certain slight physical defect. In another city B, 18.5% of a random sample of 1600 school boys had the same defect. Analyze the difference between the proportions is significant at 0.05 level of significance or not. CO2 7 Marks

(OR)

8 a) From the following data on performance of two machines, test whether the means differ significantly from each by taking at 95% level of confidence. CO4 7 Marks

Machine-A : n = 50, mean = 21, SD=5

Machine -B: n = 60, mean = 22, SD=4.

b) In a big city 325 men out of 600 were found to be smokers. Does this information support the conclusion that the majority of the men in this city are smokers? Analyze the given information and conclude. CO2 7 Marks

UNIT-V

9 a) A machinist is expected to make engine parts with axle diameter of 1.75cm. A random sample of 10 parts shows a mean diameter 1.85cm with a S.D of 0.1 cm. on the basis of this sample, Examine that the work of the machinist is inferior or superior and justify your answer. CO2 7 Marks

b) In an investigation on the machine performance, the following results were obtained: CO4 7 Marks

	No. of units inspected	No. of defectives
Machine 1	375	17
Machine 2	450	22

Test whether there is any significance of two machines at $\alpha = 0.05$

(OR)

10 a) The average breaking strength of the steel rods is specified to be 18.5 thousand pounds. A sample of 14 rods was tested. The mean and standard deviation obtained were 17.85 and 1.955 respectively. Analyse whether the experiment is significant or not. Justify your answer. CO2 7 Marks

b) The time taken by workers in performing a job by method I and method II is given below: CO5 7 Marks

Method I	20	16	26	27	23	22	-
Method II	27	33	42	35	32	34	38

Using appropriate statistical technique analyse the data show that the variances of time distribution from population from which these samples are drawn do not differ significantly.

SPECIAL FUNCTIONS AND COMPLEX ANALYSIS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Express $\int_0^{\frac{\pi}{2}} \sqrt{\cot\theta}\, d\theta$ in terms of gamma function. CO1 CO4 7 Marks

b) Compute (i) $\beta(\frac{3}{2},\frac{1}{2})$ and (ii) $\Gamma(4.5)\,\Gamma(3.5)$. CO4 7 Marks

(OR)

2 a) Derive the relation $\frac{d}{dx}\left[x^n J_n(x)\right] = x^n J_{n-1}(x)$. CO4 7 Marks

b) Prove that $\int J_3(x)\,dx = c - J_2(x) - \frac{2}{x}J_1(x)$. CO4 7 Marks

UNIT-II

3 Test the continuity and Cauchy-Riemann equations at the origin of the function defined by $f(z) = \begin{cases} \frac{x^3(1+i) - y^3(1-i)}{x^2+y^2}, & z \neq 0, \\ 0, & z = 0. \end{cases}$ Also find $f'(0)$, if it exists. CO1 CO4 14 Marks

(OR)

4 a) Show that $U = \frac{1}{2}\log(x^2+y^2)$ harmonic and find its conjugate. CO1 7 Marks

b) In an electric field, the potential function is $\log(x^2+y^2)$, find the flux function and the complex potential function. CO4 7 Marks

UNIT-III

5 a) *Evaluate* $\int_C \frac{\sin^2 z}{(z-\pi/6)^3}dz$, where C is the circle |z|=1.5, using Cauchy's integral formula. CO4 7 Marks

b) Compute $\oint_C \mathrm{Re}\, z^2\, dz$ counterclockwise around the boundary of the square with vertices 0, i, 1+i, 1. CO3 7 Marks

(OR)

6 a) Expand $f(z) = \frac{1}{z^2(z-i)}$ as a Laurent's series about 'i' and hence determine the residue thereat. CO3 7 Marks

b) Integrate counterclockwise around the unit circle $\oint_C \frac{e^z \cos z}{(z-\frac{\pi}{4})^3}dz$. CO2 CO3 7 Marks

UNIT-IV

7	a)	Apply the calculus of residues, evaluate $\int_0^{2\pi} \frac{d\theta}{(5+4\cos\theta)}$.	CO1 CO4	7 Marks
	b)	Define the removable singularity, pole, essential singularity with examples.	CO5	7 Marks

(OR)

8		Find the residue of $f(z) = \frac{z^3}{(z-1)^4(z-2)(z-3)}dz$ at its poles and hence evaluate $\oint_C f(z)dz$, where C is the circle $\|z\| = 2.5$.	CO4	14 Marks

UNIT-V

9	a)	Show that the bilinear transformation $w = (2z+3)/(z-4)$ maps the circle $x^2 + y^2 - 4x = 0$ into the line $4u + 3 = 0$.	CO4	7 Marks
	b)	Obtain the bilinear transformation which maps the points z= ∞, i,0 into the points w = 0, i, ∞ respectively.	CO4	7 Marks

(OR)

10	a)	Determine the region of the w-plane into which the following regions are mapped by the transformation $w = z^2$: (i) first quadrant of Z-plane (ii) region bounded by $x = 1$, $y = 1$, $x + y = 1$.	CO4	7 Marks
	b)	Determine the fixed points of the transformation w= (5z+4)/ (z+5). Is the transformation parabolic? Justify.	CO4	7 Marks

II B.Tech I Semester (SVEC-16) Supplementary Examinations January – 2022

FLUID MECHANICS AND HYDRAULIC MACHINERY
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe any five significant properties of fluids.	CO1	7 Marks
	b)	A flat plate weighing 0.45 kN has a surface area 0.1 m^2. It slides down an inclined place at 30^0 to the horizontal, at a constant speed of 3 m/sec. If the inclined plane is lubricated with an oil of viscosity 0.1 N-S/m^2, find the thickness of the oil film.	CO2	7 Marks

(OR)

2	a)	Derive an equation for hydrostatic force and centre of pressure for a vertically immersed plane surface.	CO2	7 Marks
	b)	A metallic body is floating at the interface of mercury & water such that 40% of its volume is submerged in mercury and 60% in water. Determine specific gravity of a metallic body.	CO2	7 Marks

UNIT-II

	a)	Derive the continuity equation in three dimensions for steady incompressible fluid flow.	CO1	7 Marks
	b)	Define stream function and velocity potential. Show that following stream function $\psi = 6x - 4y + 7xy + 9$ represents an irrotational flow.	CO2	7 Marks

(OR)

4	a)	Define the Bernoulli's theorem and derive Bernoulli's equation by mentioning the assumptions made.	CO1	7 Marks
	b)	A 45^0 reducing bend is connected in a pipe line, the diameters at the inlet and outlet of the bend being 600 mm and 300 mm respectively, find the force exerted by water on the bend if the intensity of pressure at inlet to bend is 8.829 N/cm^2 and rate of flow of water is 600 liters/sec.	CO2	7 Marks

UNIT-III

5	a)	Explain the terms: i) Pipes in series. ii) Pipes in parallel. iii) Branching pipes.	CO1	7 Marks
	b)	Using Buckingham's theorem, show that the frictional torque 'T' of a disc of diameter 'D' rotating at a speed 'N' in a fluid of viscosity 'μ' and density 'ρ' in a turbulent flow is given by, $T = D^5N^2\rho\ \phi\ [\mu / D^2N\rho]$	CO4	7 Marks

(OR)

6	a)	What are the different laws on which models are designed for dynamic similarity? Where are they used?	CO4	7 Marks
	b)	A horizontal pipe line 40m long is connected to a water tank at one end and discharges freely into the atmosphere at the other end. For the first 25m of its length from the tank, the pipe is 15cm dia., and its dia. is suddenly enlarged to 30cm. The height of water in the tank is 8m above the centre of the pipe. Considering all losses of head which occur. Determine the rate of flow. Take f = 0.04 for both the section of the pipe and draw the HGL and TEL.	CO3	7 Marks

UNIT-IV

7	a)	Show that the length of the sloping side is equal to half of the top width for a most economical trapezoidal channel section.	CO5	7 Marks
	b)	Design a concrete lined channel to carry a discharge of 500 cumecs at a slope of 1 in 4000. The side slopes of the channel may be taken as 1:1. The manning's roughness coefficient for the lining is 0.014. Assume permissible velocity in the section as 2.5 m/s.	CO5	7 Marks

(OR)

8	a)	State and derive the dynamic equation for Gradually Varied Flow.	CO5	7 Marks
	b)	The depth of flow of water at a certain section of a rectangular channel of 2.0m wide is 0.3m. The discharge through the channel is 1.5m^3/s. Determine whether a hydraulic jump will occur, if so, find its height and loss of energy due to hydraulic jump.	CO5	7 Marks

UNIT-V

9	a)	Explain the principle and working of a Centrifugal Pump with a neat sketch.	CO3	7 Marks
	b)	A double jet Pelton turbine has a specific speed of 14 and is required to deliver 1000 kW. The water is supplied through a pipeline from a reservoir whose level is 400m above the nozzle. Assume 5% H for friction loss in the pipe, calculate, i) Speed in r.p.m., ii) Diameter of jet and iii) Mean diameter of bucket circle. Take Cv = 0.98; φ = 0.46; η_o = 85%.	CO3	7 Marks

(OR)

10	a)	Discuss the classification of turbines with examples.	CO1	7 Marks
	b)	A three stage Centrifugal pump has impellers 40 cm in diameter and 2 cm wide at outlet. The vanes are curved back at the outlet at 45^0 and reduce the circumferential area by 10%. The Manometric efficiency is 90% and the Overall efficiency is 80%, determine the head generated by the pump, when running at 1000 r.p.m., delivering 50 lt/sec. What should be the S.H.P.?	CO3	7 Marks

MECHANICS OF SOLIDS

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Derive the relation between modulus of elasticity, modulus of rigidity and Bulk modulus.	CO1	14 Marks
		(OR)		
2		A rod is 2m long at a temperature of 10^0C. Find the expansion of the rod, when the temperature is raised to 80^0C. If the expansion is prevented, find the stress induced in the material of the rod. Take E= 2.1 x 10^5N/mm² and α=0.000012 per degree centigrade.	CO2	14 Marks

UNIT-II

3	a)	Explain briefly about the types of : (i) Supports. (ii) Beams. (iii) Loads. (iv) Concept of shear force and bending moment.	CO2	7 Marks
	b)	A cantilever of length 2m carries a uniformly distributed load of 2kN/m length over the whole length and a point load of 3k at the free end. Draw the shear force and bending moment diagrams for the cantilever.	CO2	7 Marks
		(OR)		
4		A beam ABC 11m long is simply supported at A and B and has an overhang BC of 3m. It is loaded with U.D.L. of 4kN/m over the whole length. A concentrated load of 30kN is acting at 6m from A. calculate the reactions. Find the position and value of maximum bending moment and plot the bending moment and shear force diagrams.	CO2	14 Marks

UNIT-III

5		A cantilever of symmetrical I-section of flanges 30mm x 2.5mm and web of 45mm x 2mm, 2.5m long is subjected to a load of 250N at the free end. The load is acting 20^0 to the vertical axis. Determine the resulting bending stress at the top left and top right corners, on the fixed section of the cantilever.	CO4	14 Marks
		(OR)		
6		Prove that the maximum shear stress in a circular section of a beam is 4/3 times the average shear stress.	CO4	14 Marks

UNIT-IV

7	a)	Derive an equation for the deflection of a closely coiled helical spring.	CO3	6 Marks
	b)	Find the maximum permissible axial load for a closely coiled helical spring made out of 10mm square rod with 16 coils of 12cm mean diameter if the maximum shear stress is limited to 300N/mm², calculate also the deflection under load if N=0.84 x 10^5N/mm².	CO4	8 Marks
		(OR)		
8		A close-coiled helical spring is made out 10mm diameter steel rod. The coil consists of 10 complete turns with a mean diameter of 120mm. the spring carries an axial full of 200N. Find the maximum shear stress induced in the section of the rod. If C=80GN/m², find the deflection in the spring, the stiffness and strain energy stored in the spring.	CO5	14 Marks

UNIT-V

9	The internal and external radii of a thick cylinder are 200mm and 300mm respectively. The external pressure on the cylinder is 4N/mm². Find the internal pressure that can be applied if the maximum hoop stress is limited to 15N/mm². Sketch also the distribution of radial pressure and hoop stress across the wall section.	CO6	14 Marks
	(OR)		
10	Find the thickness of metal necessary for a steel cylindrical shell of internal diameter 150mm to withstand an internal pressure of 50N/mm². The maximum hoop stress in the section is not to exceed 150N/mm².	CO6	14 Marks

DC MACHINES
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain in detail the constructional features of a DC machine.	CO1	8 Marks
	b)	An 8–pole DC shunt generator with 778 wave connected armature conductors and running at 500 r.p.m supplies a load of 12.5Ω resistance at a terminal voltage of 250V.The armature resistance is 0.24Ω and the field resistance is 250Ω. Find the armature current, induced **emf**, flux per pole.	CO4	6 Marks
		(OR)		
2	a)	Explain the principle and operation of DC generator.	CO1	7 Marks
	b)	A shunt generator has a full load current of 196A at 220V. The stray losses are 720W and the shunt field coil resistance is 55Ω. If it has a full load efficiency 88%. Find the armature resistance, current corresponding to the maximum efficiency.	CO4	7 Marks

UNIT-II

3	a)	Briefly explain the concept of interpoles and compensating winding in a DC machine.	CO2	7 Marks
	b)	An 8–pole lap connected DC shunt generator delivers an output of 240A at 500V. The armature has 1408 conductors and 160 commutator segments. If the brushes are given a lead of 4 segments from no load neutral axis, estimate the cross magnetising AT/pole and demagnetising AT/pole.	CO4	7 Marks
		(OR)		
4		Explain the process of commutation, factors effecting ideal commutation; also derive the expression for reactance voltage.	CO1	14 Marks

UNIT-III

5	a)	Briefly explain the internal and external characteristics of DC shunt generator.	CO1	6 Marks
	b)	Two DC shunt generators with **emf's** of 120V, 115V, R_{a1}=0.05Ω and R_{a2}= 0.04Ω, R_{sh1}= 20Ω, R_{sh2}= 25Ω respectively are in parallel supplying a load of 25kW. How do they share a total load?	CO4	8 Marks
		(OR)		
6	a)	Explain the process of parallel operation of two shunt generators.	CO1	7 Marks
	b)	Explain the internal and external characteristics of DC compound generator.	CO1	7 Marks

UNIT-IV

7	a)	With a neat sketch, explain the operation of 3-point starter.	CO3	7 Marks
	b)	Explain the various method of speed control of DC series motors, analyse which method is having better control.	CO5	7 Marks
		(OR)		

8	a)	A 220V DC shunt motor runs at 760 r.p.m and takes a current of 48A. Find the resistance to be added to the field circuit to increase speed to 950 r.p.m and an armature current of 78A. Assume flux is proportional to field current. R_a=0.15Ω, R_{sh}= 240Ω respectively.	CO4	7 Marks
	b)	Explain the principle and operation of DC motor.	CO1	7 Marks

UNIT-V

9	a)	Explain the process of indirect method of testing of a DC shunt machine.	CO1	7 Marks
	b)	Shunt machines loaded for the Hopkinson's test take 15A at 200V from the supply. The motor armature Current is 100A and the shunt currents are 3A and 2.5A. If the armature resistance of each machine is 0.05Ω, calculate the efficiency of each machine for this load condition.	CO4	7 Marks

(OR)

10	a)	Explain the direct method of testing of DC machine; write its advantages and disadvantages.	CO1	7 Marks
	b)	Explain the Hopkinson's method of testing of DC machine.	CO1	7 Marks

ELECTROMAGNETIC FIELDS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	A straight line extending along z axis in a cylindrical coordinate system from $-\infty$ *to* ∞. Using Gauss's law, calculate the electric field intensity **E** at any and every point resulting from a uniform line charge density ρ_L.	CO4	7 Marks
	b)	Calculate the work done in moving a 4-C charge from B(1, 0, 0) to A(0, 2, 0) along the path y= $2-2x, z=0$ in the field E= $5x\mathbf{a}_x + 5y\mathbf{a}_y$ V/m.	CO3	7 Marks

(OR)

2	a)	A total charge of 40/3 nC is uniformly distributed in the form of circular disk of radius 2m. Find the potential due to this charge at a point on the axis, 2m from the disc. Compare this potential with that result if all of the charge is at the center of the disk.	CO4	7 Marks
	b)	Find the force on a point charge of 50μC at (0, 0, 5)m due to a charge of 500π μC that is uniformly distributed over the circular disk r $\leq$ 5m, z = 0m.	CO4	7 Marks

UNIT-II

3	a)	Derive an expression for energy density in electrostatic field.	CO1	6 Marks
	b)	Obtain an expression for the field and potential due to a small electric dipole oriented along z-axis.	CO4	8 Marks

(OR)

4	a)	Derive an expression for capacitance of a parallel plate capacitor.	CO1	6 Marks
	b)	Two extensive homogeneous isotropic dielectrics meet on plane z = 0. For z>0, ε_{r1}=4 and for z<0, ε_{r2}=3. A uniform electric field $\mathbf{E}_1$=5$\mathbf{a}_x$-2$\mathbf{a}_y$+3$\mathbf{a}_z$ kV/m exists for z≥0. Find: i) $\mathbf{E}_2$ for z≤0 ii) the angles E_1 and E_2 make with interface.	CO1	8 Marks

UNIT-III

5	a)	State Biot-Savart's law and write down the expressions for magnetic field due to various types of current distributions.	CO1	7 Marks
	b)	A circular loop located on $x^2+y^2=9$, z=0 carries direct current of 10A along $\mathbf{a}_\phi$. Determine **H** at (0, 0, 4) and (0, 0, -4).	CO1	7 Marks

(OR)

6	a)	Find the flux crossing the portion of the plane $\phi=\pi/4$ define by 0.01<r<0.05m and 0<z<2m. A current filament of 2.5A along the z-axis is in the $\mathbf{a}_z$ direction.	CO3	8 Marks
	b)	Explain nonexistence of magnetic monopole. Compare with divergence of **D**.	CO2	6 Marks

UNIT-IV

7	a)	Find the force on the particle of mass $1.7*10^{-27}$ kg and charge $1.6*10^{-19}$ C if it enters a field **B**=5mT with an initial speed of 83.5 km/s. assume $\mathbf{U}_0$and **B** are perpendicular.	CO4	7 Marks
	b)	Derive an expression for torque on a current loop in a magnetic field.	CO1	7 Marks

(OR)

8	a)	What are magnetic boundary conditions? Derive them at interface between two different magnetic materials with neat sketch.	CO1	7 Marks
	b)	Derive an expression for self-inductance of a toroidal coil of N turns and current I.	CO3	7 Marks

UNIT-V

9	a)	Give the importance of displacement current while resolving the inconsistency of Ampere's circuit law for time varying fields.	CO2	7 Marks
	b)	A 30cm by 40cm rectangular loop rotates at 130 rad/s in a magnetic field 0.06Wb/m^2 normal to the axis of rotation. If the loop has 50 turns, determine the induced voltage in the loop.	CO3	7 Marks

(OR)

10	a)	Derive Poynting theorem and Poynting vector.	CO5	8 Marks
	b)	State and explain in detail Faraday's law and Lenz's law.	CO2	6 Marks

SIGNALS, SYSTEMS AND NETWORKS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Determine whether the given system $y(t) = \sin(5t)x(t)$ is: i) Causal. ii) Time Invariant. iii) Linear.	CO1	7 Marks
	b)	Test whether the following signals are energy signals, power signal or neither i) $x(t) = e^{-at}u(t)$. ii) $x(t) = t\ u(t)$.	CO2	7 Marks

(OR)

2	a)	Show that if the two signals $f_1(t)$ and $f_2(t)$ are orthogonal over an interval t_1 and t_2, then energy of the signal [$f_1(t) + f_2(t)$] is equal to the sum of energies of $f_1(t)$ and $f_2(t)$.	CO4	7 Marks
	b)	Differentiate clearly even and odd signals.	CO2	7 Marks

UNIT-II

3	a)	Calculate the Laplace transform of periodic function.	CO2	7 Marks

	b)	Compare between Fourier transform and Laplace transform.	CO2	7 Marks

(OR)

4	a)	Find the Fourier transforms of the following function. (i) signum function. (ii) the sinc function sin(t)/t.	CO5	7 Marks
	b)	Calculate the inverse Laplace transform of (i) $\frac{6(s-1)}{s^4-1}$ (ii) $\frac{se^{-\pi s}}{s^2+1}$.	CO5	7 Marks

UNIT-III

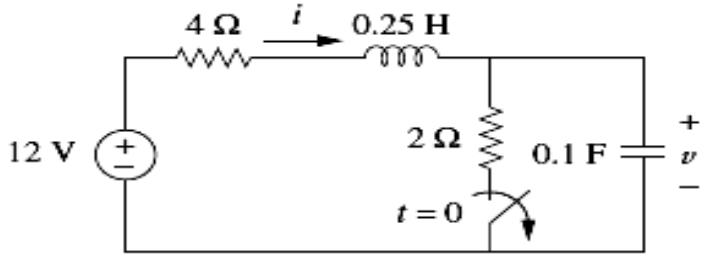
5	a)	Find i(t) in the circuit shown for t>0 .Assuming that switch has been closed for long time	CO5	7 Marks

	b)	Derive the expression for the transient response of series R-L-C circuit driven by unit step function.	CO2	7 Marks

(OR)

6 The switch in Figure has been closed for a long time. It is open at t=0. CO4 CO2 14 Marks

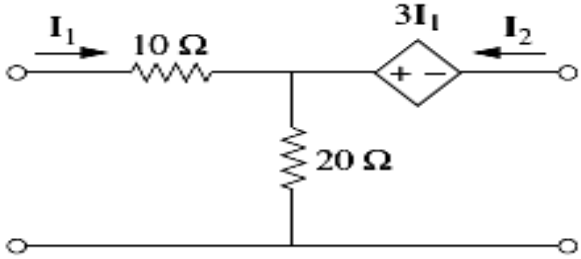
Find $(i)\ i(0^+), v(0^+)$. (ii) $\frac{di(0^+)}{dt}, \frac{dv(0^+)}{dt}$. (iii) $i(\infty), v(\infty)$.



UNIT-IV

7 a) Convert the ABCD parameter into h parameters. CO4 7 Marks

b) Find the transmission parameters of the given two port network CO1 7 Marks

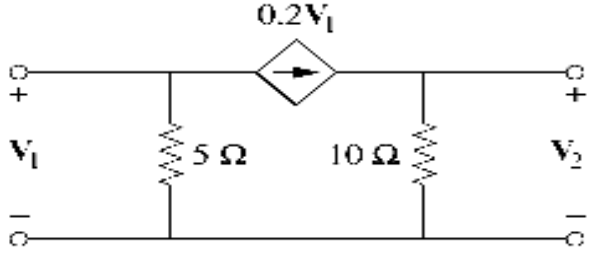


(OR)

8 a) Determine [y] and [T] of a two port network whose z parameters are CO4 7 Marks

$[z] = \begin{bmatrix} 6 & 4 \\ 4 & 6 \end{bmatrix}$.

b) Obtain the admidance parameter eqivalent circuit of the two port networn shown in below. CO2 7 Marks



UNIT-V

9 a) For a given symmetrical T-section attenuator, derive the design values of R_1 and R_2 and draw the network of the attenuator with the design value. CO2 7 Marks

b) Determine the characteristics impedance of a symmetrical π network. CO3 7 Marks

(OR)

10 a) Derive the expression for 'm' in a T network high pass filter. CO1 7 Marks

b) Design a π network of m-derived high pass filter having nominal characteristics impedance RO = 900Ω, cut off frequency fC = 2 kHz and infinite attenuation frequency f∞ = 1.8 kHz. CO3 7 Marks

ENGINEERING METALLURGY
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define Metallurgy and List out the Various ores of Metals.	CO2	7 Marks
	b)	Explain the Zones of Cupola.	CO1	7 Marks
		(OR)		
2		Explain the Melting of steel by using any Two Furnaces and discuss the Pros and Cons of the two processes.	CO1	14 Marks

UNIT-II

3	a)	Discuss the allotropy of Iron.	CO4	4 Marks
	b)	Explains Iron – Carbon Equilibrium Diagram with a neat sketch.	CO4	10 Marks
		(OR)		
4	a)	What are the Necessity of Alloying and Explain Hume Rothery Principles?	CO4	6 Marks
	b)	Explain: (i) Monotectic System. (ii) Peritectic System.	CO4	8 Marks

UNIT-III

5	a)	Explain Annealing process and state few differences between annealing and Normalizing.	CO3	8 Marks
	b)	What is: (i) Austempering (i) Martempering.	CO3	6 Marks
		(OR)		
6		Explain TTT Diagram and Discuss Pearlite Transformation.	CO3	14 Marks

UNIT-IV

7		Explain: (i) Flame Hardening. (ii) Nitriding. (iii) Cyaniding.	CO3	14 Marks
		(OR)		
8	a)	Explain the SEM with a Neat Sketch.	CO5	8 Marks
	b)	Explain the Purpose of XRD in Metallographic Study.	CO5	6 Marks

UNIT-V

9	a)	Explain the Sintering Process.	CO6	8 Marks
	b)	What are the necessity characteristics of powders?	CO6	6 Marks
		(OR)		
10		What is Powder Metallurgy? Explain the advantages disadvantages and applications of Powder Metallurgy over Stir Casting.	CO6	14 Marks

KINEMATICS OF MACHINERY
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

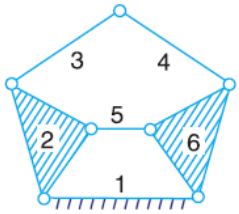
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

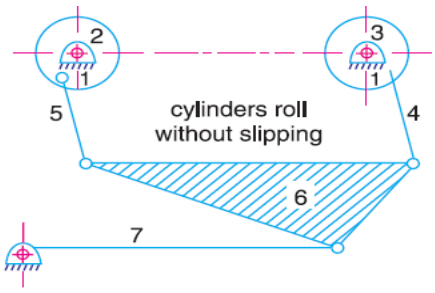
1	a)	Sketch and explain the various inversions of a slider crank chain.	CO1	7 Marks
	b)	Identify the kinematic chains to which the following mechanisms belong: i) Steam engine mechanism. ii) Beam engine. iii) Whitworth quick return motion mechanism. iv) Elliptical trammels.	CO1	7 Marks

(OR)

2	Determine the mobility (degrees of freedom) of the mechanism shown in Fig(a) and (b) using Kutzbach mobility criterion and classify them.	CO2	14 Marks



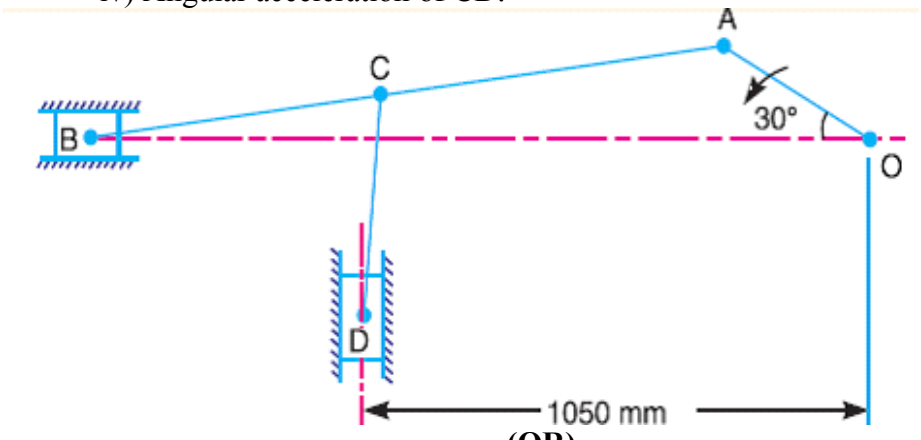
(a)



(b)

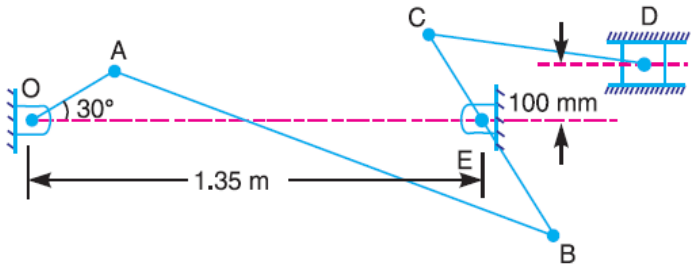
UNIT-II

3	In the mechanism, as shown in fig, the crank OA rotates at 20 r.p.m. anticlockwise and gives motion to the sliding blocks B and D. The dimensions of the various links are OA = 300 mm; AB = 1200 mm; BC= 450 mm and CD = 450 mm. For the given configuration, determine: i) Velocities of sliding at B and D. ii) Angular velocity of CD. iii) Linear acceleration of D. iv) Angular acceleration of CD.	CO2	14 Marks



(OR)

4	a)	What do you understand by the instantaneous centre of rotation (centro) in kinematic of machines? Answer briefly.	CO1	4 Marks
	b)	A mechanism, as shown in fig, has the following dimensions: OA=200mm; AB=1.5m; BC=600mm; CD=500mm and BE=400mm. Locate all the instantaneous centres. If crank OA rotates uniformly at 120 r.p.m. clockwise, find: i) The velocity of B, C and D. ii) The angular velocity of the links AB, BC and CD.	CO2	10 Marks



UNIT-III

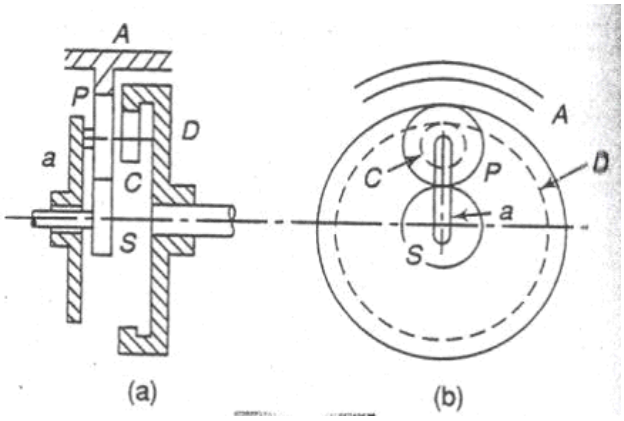
5	a)	What is the condition for correct steering? Sketch and show the two main types of steering gears and discuss their relative advantages.	CO2	7 Marks
	b)	The driving shaft of a Hooke's joint runs at a uniform speed of 240 r.p.m. and the angle α between the shafts is 20°. The driven shaft with attached masses has a mass of 55 kg at a radius of gyration of 150 mm. i) If a steady torque of 200 N-m resists rotation of the driven shaft, find the torque required at the driving shaft, when θ = 45°. ii) At what value of 'α'will the total fluctuation of speed of the driven shaft be limited to 24 r.p.m?	CO2	7 Marks

(OR)

6	a)	Sketch a pantograph, explain its working and show that it can be used to reproduce to an enlarged scale a given figure.	CO2	7 Marks
	b)	Two shafts are connected by a universal joint. The driving shaft rotates at a uniform speed of 1200 r.p.m. Determine the greatest permissible angle between the shaft axes so that the total fluctuation of speed does not exceed 100 r.p.m. Also calculate the maximum and minimum speeds of the driven shaft.	CO2	7 Marks

UNIT-IV

7	a)	What is a reverted gear train? Where is it used?	CO2	7 Marks
	b)	In a reduction gear shown in figure the input S has 24 teeth. P and C constitute a compound planet having 30 and 18 teeth respectively. If all the gears are of the same pitch, find the ratio of the reduction gear. Assume A to be fixed.	CO2	7 Marks



(OR)

8	a)	Define arc of contact and deduce the expression to find its magnitude.	CO2	7 Marks
	b)	A pinion has 24 teeth and drives a gear with 64 teeth. The teeth are of involute type with 20^0 pressure angle. The addendum and the module are 8mm and 10mm respectively. Determine path of contact, arc of contact and the contact ration.	CO2	7 Marks

UNIT-V

9		A cam is to give the following motion to a knife-edged follower: i) Outstroke during 60° of cam rotation. ii) Dwell for the next 30° of cam rotation. iii) Return stroke during next 60° of cam rotation. iv) Dwell for the remaining 210° of cam rotation. The stroke of the follower is 40 mm and the minimum radius of the cam is 50 mm. The follower moves with uniform velocity during both the outstroke and return strokes. Draw the profile of the cam when (a) the axis of the follower passes through the axis of the cam shaft, and (b) the axis of the follower is offset by 20 mm from the axis of the cam shaft.	CO2	14 Marks

(OR)

10		A cam drives a flat reciprocating follower in the following manner: During first 120° rotation of the cam, follower moves outwards through a distance of 20 mm with simple harmonic motion. The follower dwells during next 30° of cam rotation. During next 120° of cam rotation, the follower moves inwards with simple harmonic motion. The follower dwells for the next 90° of cam rotation. The minimum radius of the cam is 25 mm. Draw the profile of the cam.	CO2	14 Marks

MANUFACTURING TECHNOLOGY
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Describe the different types of patterns used in modern foundry.	CO2	7 Marks
	b)	Briefly explain the allowance provided on a pattern.	CO2	7 Marks
		(OR)		
2	a)	Enumerate the various types of moulding machines used in foundry.	CO2	7 Marks
	b)	Define a core. Explain various types of cores used in moulding practice.	CO3	7 Marks
		UNIT-II		
3	a)	With the help of neat sketch, explain the process of investment casting.	CO3	7 Marks
	b)	With the help of neat sketch, explain the Die casting.	CO3	7 Marks
		(OR)		
4	a)	Explain the inspection and testing methods used in foundry.	CO4	7 Marks
	b)	Explain various casting defects.	CO4	7 Marks
		UNIT-III		
5	a)	Distinguish between hot working and cold working.	CO5	7 Marks
	b)	Discuss various types of rolling mills with neat sketch.	CO5	7 Marks
		(OR)		
6	a)	Describe the various types of dies used in sheet metal operations.	CO4	7 Marks
	b)	Explain the Electro-hydraulic forming process with neat sketch.	CO4	7 Marks
		UNIT-IV		
7	a)	Explain the types of gas welding flames and under what conditions they are used.	CO1	7 Marks
	b)	Bring out the difference between TIG and MIG welding.	CO1	7 Marks
		(OR)		
8	a)	With the help of neat sketch, explain the thermit welding process.	CO1	7 Marks
	b)	Sketch the different types of weld defects and mention how they occur.	CO4	7 Marks
		UNIT-V		
9	a)	Describe briefly the principle of blow moulding process.	CO5	8 Marks
	b)	What are the advantages and applications of transfer moulding?	CO4	6 Marks
		(OR)		
10	a)	Describe the principle of calendaring process with the help of neat sketch.	CO5	8 Marks
	b)	Differentiate between direct extrusion and indirect extrusion.	CO4	6 Marks

STRENGTH OF MATERIALS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define three Elastic constants and derive the relation between the three elastic constants.	CO1	8 Marks
	b)	A polyethylene bar having diameter d_1= 70mm is placed inside a steel tube having inner diameter d_2 = 70.2mm. The polyethylene bar is then compressed by an axial force P. At what value of the force P the space between polyethylene bar and the steel tube be closed. (For polyethylene, assume E= 1.4 Gpa and Poisson's ratio =0.4.	CO2	6 Marks

(OR)

2		Two vertical rods one of steel and other of copper are each rigidly fixed at the top and 50cm apart. Diameters and lengths of each rod are 2cm and 4m respectively. A cross bar fixed to the rods at the lower ends carries a load of 5000N such that the cross bar remains horizontal even after loading. Find the stress in each rod and the position of the load on the bar. Take E for steel = 2 x 10^5N/mm^2 and E for copper = 1 x 10^5N/mm^2.	CO5	14 Marks

UNIT-II

3		Draw the shear force and bending moment diagram for the beam shown in Fig. 1. Locate the point of contraflexure, if any. Also find the point of maximum bending moment.	CO6	14 Marks

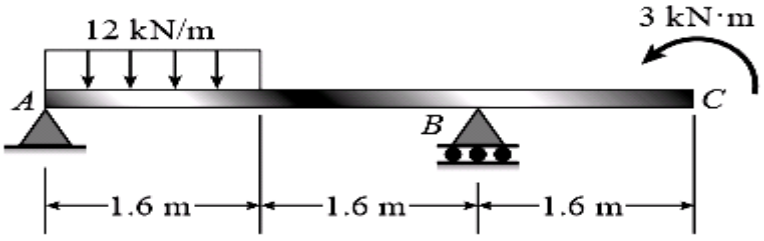

Fig.1

(OR)

4		Draw the shear force and bending moment diagram for the beam shown in Fig. 2	CO6	14 Marks

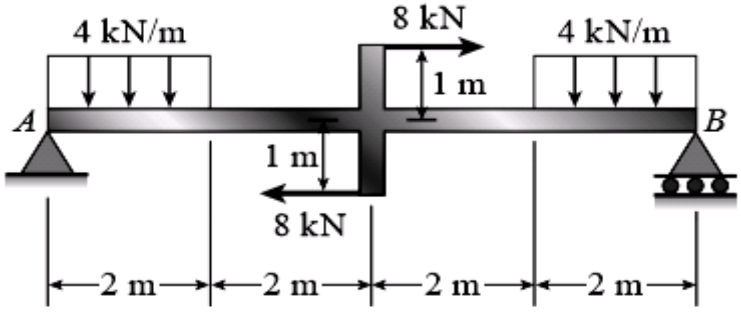

Fig.2

UNIT-III

5	a)	Define torsional rigidity and write the limitations of torsion equation.	CO1	6 Marks
	b)	A copper rod of length L is to be twisted by torques T until the angle of rotation between the ends of rod is 3^0. i) If the length L = 460mm and allowable shear strain in copper is 0.0006 rad, what is the maximum possible diameter of the rod. ii) If the rod diameter is 12.5mm, what is the minimum permissible length of the rod.	CO2	8 Marks

(OR)

6	a)	Define pure bending and write the assumptions in deriving bending equation.	CO1	6 Marks
	a)	A seesaw weighing 45N/m of length is occupied by two children each weighing 400N. The centre of gravity of each child is 2.5m from the fulcrum. The board is 6m long 200mm wide and 40mm thick. What is the maximum bending stress in the board?	CO3	8 Marks

UNIT-IV

7		Calculate the slope at ends and deflection at the middle of over hang beam of length 'L' between supports and over hang on both sides by length L/3 subjected to the following loads. i) When a concentrated load 'P' acts at the ends. ii) When a UDL of intensity 'w' per unit run act over entire span.	CO4	14 Marks

(OR)

8		Anoil pipe of 5m length and of uniform circular cross section 20mm diameter is simply supported at the ends. A man weighs100KN load stands at centre of it. In addition to this it carries oil with full of pipe having density 800 Kg/m^3 run over its entire length. Calculate: i) Maximum slope and maximum deflection of pipe. ii) Slope and deflection at 3m from one end. Take E for pipe = 210 GN/m^2.	CO4	14 Marks

UNIT-V

9		A thin cylindrical vessel is made of steel plate 6mm thick. The length and internal diameter of the vessel are 150cm and 36cm respectively. Determine the longitudinal and circumferential stresses in the cylindrical shell due to an internal fluid pressure of 4N/mm^2. Also calculate the increase in length, diameter and volume of the vessel. Take E = 2 x 10^5N/mm^2 and poisson's ratio of 0.27.	CO3	14 Marks

(OR)

10		Determine the maximum and minimum hoop stress across the section of a pipe of 600mm internal diameter and 150mm thick, when the pipe contains a fluid at a pressure of 10N/mm^2. Also sketch the radial pressure distribution and hoop stress distribution across the section.	CO6	14 Marks

THERMODYNAMICS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is meant by Quasistatic process? Explain such a process in detail with the help of a neat sketch.	CO1	4 Marks
	b)	State Zeroth law of Thermodynamics and explain how it forms the basis for temperature measurement.	CO1	6 Marks
	c)	Discuss about Point functions and Path functions with suitable examples.	CO1	4 Marks

(OR)

2	a)	Prove that for polytropic process heat transfer is given by, $Q = \frac{k-n}{k-1} x W$, Where W is work transfer; k is adiabatic index and n is polytropic index.	CO1	6 Marks
	b)	Air at 1.02 bar, 22^0C, initially occupying a cylinder volume of 0.015 m^3, is compressed reversibly and adiabatically by a piston to a pressure of 6.8 bar. Calculate: i) The final temperature. ii) The final volume. iii) The work done.	CO2	8 Marks

UNIT-II

3	a)	Derive SFEE as applied to a flow process and state the assumptions made in deriving this equation.	CO1	7 Marks
	b)	A stream of gases at 7.5 bar, 750 C and 140 m/s is passed through a turbine of a jet engine. The stream comes out the turbine at 2 bar, 550 C and 280 m/s. The process may be assumed adiabatic. The enthalpies at the entry and exit of the turbine are 950 kJ/kg and 650 kJ/kg of gas respectively. Determine the capacity of the turbine if the gas flow is 300 kg/min.	CO2	7 Marks

(OR)

4	a)	State and prove Carnot's theorem.	CO1	7 Marks
	b)	Using an engine of 30 % thermal efficiency to drive a refrigerator having a COP of 5, what is the heat input into the engine for each MJ removed from the cold body by the refrigerator? If this system is used as a heat pump, how many MJ of heat would be available for heating for each MJ of heat input in the engine?	CO3	7 Marks

UNIT-III

5	a)	State and Prove Clausius Inequality.	CO4	7 Marks
	b)	A mass of 'm' of fluid at temperature T_1 is mixed with an equal mass of same fluid at T_2. Prove that the resultant change of entropy in the universe is $2mc \ln\left(T_1 + \frac{T_2}{2}\right) / (T_1 T_2)^{1/2}$ and prove that it is always positive.	CO4	7 Marks

(OR)

6	a)	How does useful work differ from reversible work? Give the expression for reversible work in a steady flow process under a given environment.	CO4	6 Marks
	b)	Air expands through a turbine from 500 kPa, 520 C to 100 kPa 300 C. During expansion 10 kJ/kg of heat is lost to the surroundings which is at 98 kPa, 20 C. Neglecting the K.E and P.E changes, determine per kg of air i) The decrease in availability. ii) The maximum work. iii) The irreversibility. For air, take C_p = 1.005 kJ/kg K, and the p, v and T relation as TdS=dU + pdV	CO4	8 Marks

UNIT-IV

7	a)	Briefly explain the formation of steam with the help of P-v , T-Q and T-v diagrams.	CO1	6 Marks
	b)	Steam at 10 bar and 300 C is expanded isentropically to 2 bars. Find change in entropy, change in enthalpy, and change in internal energy of steam per kg of steam.	CO2	8 Marks

(OR)

8	a)	What is an Ideal gas? Explain the equation of state applied to perfect gas.	CO1	4 Marks
	b)	A large insulated vessel is divided into two chambers, one containing 5 kg of dry saturated steam at 0.2 MPa and the other 10 kg of steam, 0.8 quality at 0.5 MPa. If the partition between the chambers is removed and the steam is mixed thoroughly and allowed to settle, find the final pressure, steam quality, and entropy change in the process.	CO2	10 Marks

UNIT-V

9	a)	Derive an expression for thermal efficiency of Dual combustion cycle.	CO4	7 Marks
	b)	Two engines are to operate on Otto and Diesel cycles with the following data: Maximum temperature = 1500 K, exhaust temperature = 700 K. ambient conditions = 1bar and 300 K. Compare the compression ratios, maximum pressures and efficiencies of the two engines.	CO5	7 Marks

(OR)

10	a)	Show that the thermal efficiency of Joule cycle depends only on pressure ratio r_p.	CO4	7 Marks
	b)	The following data refers to a Diesel cycle: Compression ratio = 16:1; Heat added = 2500 kJ/kg Lowest pressure in the cycle = 1 bar; Lowest temperature in the cycle = 27° C Determine: i) Mean effective pressure. ii) Salient point temperatures. iii) Thermal efficiency.	CO5	7 Marks

ELECTRONIC CIRCUIT ANALYSIS AND DESIGN

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	For a CE amplifier, if a load R_L = 1KΩ is connect and h_{ie} = 1KΩ, $h_{re} = 2x10^{-4}$, h_{oe} = 25μA/V then calculate A_V, A_I, and R_i using exact analysis.	CO2	8 Marks
	b)	Discuss the effect of emitter by pass capacitor on low frequency response of BJT amplifiers.	CO1	6 Marks
		(OR)		
2	a)	Discuss the effects of cascading amplifiers.	CO1	4 Marks
	b)	Draw the circuit of 2-stage RC coupled amplifier and derive the gain at lower cut-off frequency with the help of h-parameter equivalent circuit.	CO2	10 Marks

UNIT-II

3	a)	Derive the expressions for feedback conductance and base spreading resistance of CE amplifier at high frequencies using hybrid-π model.	CO2	8 Marks
	b)	Draw the Emitter Follower circuit diagram and its high frequency equivalent circuit.	CO1	6 Marks
		(OR)		
4	a)	Discuss how capacitive elements affect the high frequency response of a JFET amplifier.	CO2	6 Marks
	b)	Draw the circuit diagram of small signal equivalent circuit at high frequencies of CS amplifier and derive the expressions for voltage gain, input impedance and input capacitance.	CO1	8 Marks

UNIT-III

5	a)	Discuss the effect of negative feedback on the various characteristics of the amplifier.	CO1	6 Marks
	b)	An amplifier has voltage gain with feedback is 100. If the gain without feedback changes by 20% and the gain with feedback should not vary more than 2%. Determine the values of open loop gain A and feedback ratio β.	CO4	8 Marks
		(OR)		
6	a)	In Hartley oscillator, L_2 = 0.4mH, C = 0.004μF. If the frequency of oscillator is 120KHz, find the value of L_1 and the minimum gain required of oscillation.	CO4	6 Marks
	b)	Draw and explain the circuit of the Wien Bridge oscillator. Derive the expressions for its frequency of oscillations and the minimum gain required for the system to oscillate.	CO2	8 Marks

UNIT-IV

7	a)	Draw the circuit of a complementary symmetry push-pull amplifier and explain its operation. Derive an expression for maximum power output.	CO1	10 Marks
	b)	Calculate the effective load resistance looking into the primary of a 10:1 transformer connected to an output load of 32Ω.	CO4	4 Marks
		(OR)		

8	a)	Draw the circuit of series fed class A power amplifier and explain its operation. Derive an expression for conversion efficiency.	CO2	8 Marks
	b)	Explain the classification of power amplifiers based on period of conduction.	CO1	6 Marks

UNIT-V

9	a)	What is a tuned amplifier? Explain the classification of tuned amplifiers.	CO1	6 Marks
	b)	What is the importance of Stagger tuning? Explain briefly about stagger tuned amplifier.	CO1	8 Marks

(OR)

10	a)	Draw the equivalent circuit of inductively coupled single tuned amplifier and derive the expression for voltage gain.	CO2	8 Marks
	b)	Draw the circuit of a Class-C tuned amplifier and explain its operation.	CO1	6 Marks

SIGNALS AND SYSTEMS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) The system that follow have input x(t) and output Y(t) determine whether it is: CO1 10 Marks

i) memory less. ii) Stable. iii) Causal.
iv)Linear. v) Time – invariant.

$$y(t) = \int_{-\alpha}^{2t} x(\tau)\,d\tau$$

b) Explain why impulse, unit step, ramp are called singularity functions. CO2 4 Marks

(OR)

2 a) Sketch the following signals CO1 6 Marks

i) $x(t) = \text{sgn}(\sin\frac{\pi}{T}t)$; ii) $x(t) = u\left(\sin\frac{\pi}{T}t\right) - u\left(-\sin\frac{\pi}{T}t\right)$.

b) Suppose that $x(t)=\begin{cases}1, & 0 \le t \le 1\\ 0, & \text{else where}\end{cases}$ and h(t)=x(t/α), where 0< α ≤ 1. CO2 8 Marks

i) Determine and sketch y(t)=x(t) *h(t) using Graphical convolution.

ii) *If* $\frac{d}{dt}y(t)$ Contains only three discontinuities, what is the value of α?

UNIT-II

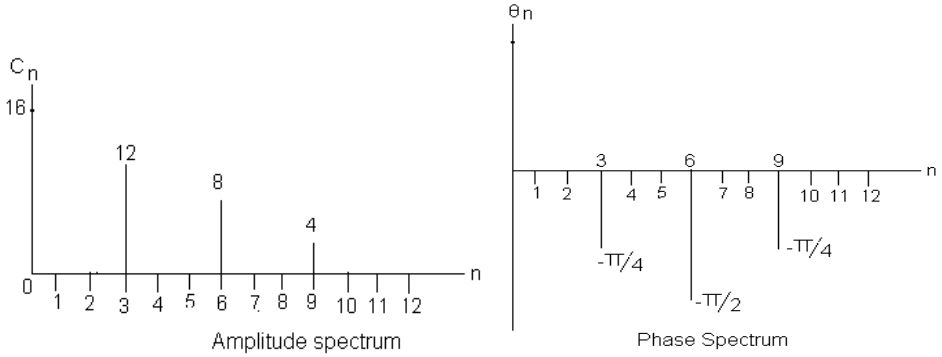
3 a) Show that for half-wave symmetry ic, $x(t)=-x\left(t \pm \frac{T}{2}\right)$; CO4 8 Marks

$a_o = 0$; $a_n=b_n=0$ for n even

$$a_n = \frac{4}{T}\int_0^{T/2} x(t)\cos(n\omega_0 t)\,dt \quad \text{n odd}$$

$$b_n = \frac{4}{T}\int_0^{T/2} x(t)\sin(n\omega_0 t)\,dt \quad \text{n odd}$$

b) The trigonometric Fourier spectra (line spectra) of a certain periodic signal x(t) are shown below. By inspecting these spectra, sketch the corresponding exponential Fourier spectra and verify your results analytically. CO5 6 Marks



(OR)

4	a)	Find the Fourier transform of the following signals using Fourier Transform properties. i) $g(t) = A\,rect\left(\frac{t}{T}\right)\cos(\omega_c t)$; ii) $g(t) = \left(\frac{1}{1+jt}\right)$.	CO5	8 Marks
	b)	Find the total area under the function $x(t) = 10\,\text{sinC}\left(\frac{t+4}{7}\right)$ using Fourier Transform properties.	CO5	6 Marks

UNIT-III

5	a)	State and prove Parseval's Energy theorem.	CO1	8 Marks
	b)	Find and sketch the autocorrelation function $R_{XX}(\tau)$ for $x(t) = e^{-at}\,u(t)$ for, $a > 0$.	CO4	6 Marks
		(OR)		
6	a)	State and prove the auto correlation properties.	CO1	7 Marks
	b)	Show that cross correlation and cross power spectral density forms a Fourier transform pair.	CO4	7 Marks

UNIT-IV

7	a)	A causal and stable LTI system S has the frequency response $H(\omega) = \frac{4+j\omega}{6-\omega^2+5j\omega}$ i) Determine a differential equation relating the input $x(t)$ and output $y(t)$ of S. ii) Determine the impulse response $h(t)$ of S. iii) What is the output of S when the input is $x(t)=e^{-4t}\,u(t)-te^{-4t}\,u(t)$.	CO5	10 Marks
	b)	Use the convolution property of the Laplace transform to determine $y(t)=e^{at}\,u(t) * e^{bt}\,u(t)$.	CO4	4 Marks
		(OR)		
8	a)	Find the inverse Laplace transform of $H(S) = \frac{4S^2+15S+8}{(S+2)^2(S-1)}$ assuming that (i) $h(t)$ is Causal and (ii) The Fourier transform of $h(t)$ exists ic; $h(t)$ is absolutely integrable.	CO4	7 Marks
	b)	Determine the Laplace Transform of the signal $g(t) = \frac{1}{t}\sin(\omega t)\,u(t)$ using unilateral Laplace Transform.	CO5	7 Marks

UNIT-V

9	a)	Determine the Z-transform of the sequence and mention its ROC. i) $g(n) = n\,a^n\,u(n)$; ii) $g(n) = \lvert n\rvert\,a^{\lvert n\rvert}$	CO5	8 Marks
	b)	A signal $x(t) = \cos(200\pi t) + 2\cos(320\pi t)$ is ideally sampled at $f_s = 300$Hz. If the sampled signal is passed through an ideal low-pass filter with a gain $\frac{1}{f_s}$ and cut off frequency of 250Hz, what frequency components will appear in the output?	CO4	6 Marks
		(OR)		
10		Determine the inverse Z-transform of $X(z) = \frac{1}{1-1.5z^{-1}+0.5z^{-2}}$ it i) ROC $\lvert z\rvert > 1$. ii) ROC $\lvert z\rvert < 0.5$. iii) ROC $0.5 < \lvert z\rvert < 1$.	CO5	14 Marks

SWITCHING THEORY AND LOGIC DESIGN

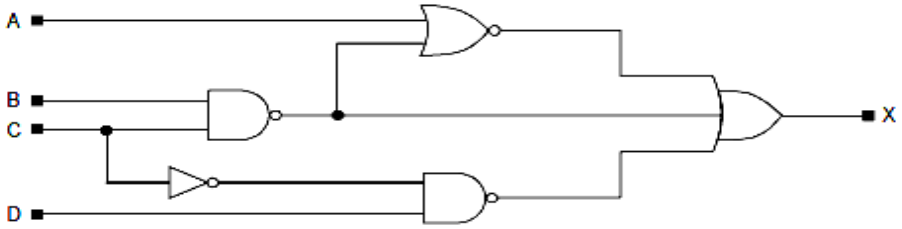
[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Convert the following numbers the three bases indicated. i) Decimal 225 to binary, octal and hexadecimal. ii) Octal 623 to decimal, binary and hexadecimal.	CO1	6 Marks
	b)	Write the logic expression and simplify it as much as possible and draw a logic diagram that implements the simplified expression.	CO1	8 Marks



(OR)

2	a)	Verify that the following operations are commutative and associative. i) *AND* . ii) *EX-OR.*	CO1	6 Marks
	b)	Find the complement of the following expressions: i) $xy' + x'y$. ii) $(AB' + C)D' + E$.	CO1	8 Marks

UNIT-II

3	a)	Simplify the following Boolean functions using K-maps. $F(A, B, C, D, E) = \Sigma(0, 2, 3, 4, 5, 6, 7, 11, 15, 16, 18, 19, 23, 27, 31)$.	CO5	8 Marks
	b)	Find the minimised product-of-sums expression for $F(A, B, C, D) = \Sigma(5, 7, 9, 10, 11) + \Sigma(2, 13, 15)$	CO5	6 Marks

(OR)

4	a)	Minimize using K-maps and realize using NAND gates. $F(A,B,C,D,E) = \Pi(6, 9, 11, 13,1 4, 17, 20, 25, 28, 29, 30)$	CO5	8 Marks
	b)	Realize EX-NOR using minimum number of NOR gates.	CO2	6 Marks

UNIT-III

5	a)	A majority function is generated in a combinational circuit when the output is equal to 1 if the input variables have more 1's than 0's. The output is 0 otherwise. Design a 3 input majority function.	CO3	6 Marks
	b)	Describe the working of a code converter that does binary to gray code conversion. The converter has 3 input lines.	CO2	8 Marks

(OR)

6	a)	Design a combinational circuit with four inputs and four outputs. The output generates the 2's complement of the input binary number.	CO3	8 Marks
	b)	Implement a full subtractor function using 4 x 1 multiplexers.	CO2	6 Marks

UNIT-IV

7	a)	What is a characteristic equation? Obtain the characteristic equations for SR, JK, D and T flip-flops.	CO2	6 Marks
	b)	Construct a BCD ripple counter using JK flip-flops.	CO5	8 Marks

(OR)

8	a)	Illustrate the operation of a 4 bit parallel-in serial-out shift register.	CO1	8 Marks
	b)	Draw the state diagram and state table of SR flip-flop.	CO2	6 Marks

UNIT-V

9	a)	Implement a full adder using PAL.	CO3	7 Marks
	b)	Implement the following two Boolean functions with a PLA: $F_1(A,B,C) = \Sigma m(0, 1, 2, 4)$; $F_2(A, B, C) = \Sigma m(0, 5, 6, 7)$.	CO3	7 Marks
		(OR)		
10	a)	Show how the PLA circuit would be programmed to implement the 3 bit binary to gray conversion?	CO3	8 Marks
	b)	Illustrate about various types of ROM.	CO1	6 Marks

ANALOG ELECTRONIC CIRCUITS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw the circuit of an emitter follower and derive the expressions for A_I, A_V, R_i, and R_o in terms of CE parameters.	CO2	10 Marks
	b)	An amplifier has three identical noninteracting cascaded stages. Each stage has lower and upper 3-dB frequencies of 25Hz and 120KHz. Calculate the lower and upper 3-dB frequencies of overall cascaded amplifier.	CO1	4 Marks

(OR)

2	a)	Obtain the expression for short circuit current gain of a CE amplifier as a function of frequency.	CO2	8 Marks
	b)	For a BJT amplifier, the following values are known: operating temperature T = 300°K, I_{CQ} = 2mA, $r_{bb'}$ = 100Ω, $r_{b'e}$ = 1000Ω, $r_{b'c}$ =2MΩ, r_{ce} = 80KΩ, $C_{b'e}$ = 200pF, $C_{b'c}$ = 3pF, f_T = 50MHz. Obtain the h parameters if K = 1.381×10^{-23} J/°K and q = 1.6×10^{-19}C.	CO3	6 Marks

UNIT-II

3	a)	Classify the amplifier based on feedback topology and give their block diagrams. How the input and output impedance are affected in each case?	CO1	8 Marks
	b)	An amplifier requires an input signal of 60mV to produce a certain output. With a negative feedback to get the same output, the required input signal is 0.5V. The voltage gain with feedback is 90. Find the open loop gain and feedback factor.	CO3	6 Marks

(OR)

4	a)	In a Hartley oscillator, L_1 = 15mH and C = 50pF. Calculate L_2 for a frequency of 168 KHz. The mutual inductance between L_1 and L_2 is 5μH. Also find the required gain of the transistor to be used for the oscillations.	CO3	6 Marks
	b)	Draw the circuit diagram of Hartley oscillator and explain the principle of operation. Derive an expression for the frequency of oscillations.	CO2	8 Marks

UNIT-III

5	a)	Draw the circuit of transformer coupled class A power amplifier and explain its operation. Derive an expression for conversion efficiency.	CO2	8 Marks
	b)	In a class B power amplifier $V_{CE,min}$ = 2V and V_{CC} = 15V. Find the collector circuit efficiency.	CO3	6 Marks

(OR)

6	a)	Compare the parameters of class A, class B, class AB, class C and class D power amplifiers.	CO1	6 Marks
	b)	Draw the push pull power amplifier circuit. Derive the expression for the output current in push pull amplifier with base current as $I_B = I_{bm}$ Sinωt.	CO2	8 Marks

UNIT-IV

7	a)	Explain in detail how a low pass RC circuits act as an integrator.	CO1	6 Marks
	b)	Derive the relation between rise time and RC time constant of a low pass RC circuit excited by a pulse input signal.	CO2	8 Marks

(OR)

8	a)	Explain the principle of clamping. What is the need for a shunt resistance R in parallel with the diode in the basic clamping circuit?	CO2	8 Marks
	b)	Draw the circuit diagram of a double clipping circuit using diodes to clip at two different reference levels and draw its transfer characteristics and explain its operation.	CO1	6 Marks

UNIT-V

9	a)	What is an astable multivibrator? With the help of neat circuit diagram, explain how the astable multivibrator can be modified as voltage-to-frequency convertor.	CO1	6 Marks
	b)	A Schmitt trigger circuit has the following component values $R_1=R_2=20K\Omega$, $R_{c1} = R_{c2} = 5K\Omega$ and $R_e = 2K\Omega$. The supply voltage is 15V. If npn silicon transistors are used with $h_{fe} = 100$, find the UTP and LTP.	CO4	8 Marks

(OR)

10	a)	Draw the circuit diagram of collector-coupled monostable multivibrator and derive an expression for the gate width.	CO1	6 Marks
	b)	Determine the values of capacitors to be used in an astable multivibrator to provide a train of pulse width 2μs with a repetitive rate of 100KHz, if $R_1 = R_2 = 20K\Omega$	CO2	8 Marks

II B.Tech I Semester (SVEC-16) Supplementary Examinations January – 2022

COMPUTER ORGANIZATION

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Why register transfer language is needed and give the examples for some micro operations?	CO2	7 Marks
	b)	Give different symbolic representations that we use in the register transfer micro operations.	CO2	7 Marks
		(OR)		
2	a)	i) Design a block diagram that implements the following statements x+yz: AR ← AR+BR. Where AR and BR are 2 n-bit registers and x,y and z are control variables. Include the logic gates for the control functions. ii) Construct a logic block using 4-bit adder and 2:1 Mux with the following register transfer statements for two 4-bit registers R_1 and R_2. xT: $R_1 \leftarrow R_1+R_2$. x'T:$R_1 \leftarrow R_2$.	CO3	10 Marks
	b)	Summarize the memory transfer related micro operations with relevant examples.	CO3	4 Marks

UNIT-II

3	a)	Paraphrase different types of arithmetic micro operations and mention the applications of logic micro operations.	CO1	7 Marks
	b)	List out different basic computer registers and explain them related to the operation that they perform.	CO1	7 Marks
		(OR)		
4	a)	In the design of basic computer explain the role of flags and common bus system	CO4	7 Marks
	b)	Design the accumulator logic and explain the operations that are going to be performed in this logic	CO4	7 Marks

UNIT-III

5	a)	What are the advantages and disadvantages of hard wired and micro programmed control?	CO1	7 Marks
	b)	Demonstrate the concept of mapping from instruction code to microinstruction address with an example.	CO1	7 Marks
		(OR)		
6	a)	Describe the concept of decoding of micro-operation fields with respect to design of control unit.	CO5	7 Marks
	b)	Compare horizontal microcode with vertical microcode. State the advantage of micro-programmed control unit.	CO5	7 Marks

UNIT-IV

7	a)	Multiply the (-9) with (-13) using Booth's algorithm. Give each step.	CO6	7 Marks
	b)	Explain Addition and Subtraction with Signed-Magnitude Data and also show its Hardware Implementation.	CO6	7 Marks

(OR)

8	a)	Explain the Hardware Algorithm for multiply operation using flowchart.	CO4	7 Marks
	b)	Discuss the Data manipulation Instructions of CPU.	CO4	7 Marks

UNIT-V

9	a)	i) What is polling? Explain in detail. ii) What is daisy chaining? Explain.	CO1	10 Marks
	b)	Explain 4 x 4 FIFO buffer with neat circuit diagram.	CO1	4 Marks

(OR)

10	a)	Describe in words and by means of a block diagram how multiple matched words can be read out from an associative memory.	CO2	7 Marks
	b)	Demonstrate working of 8089 IOP with block diagram.	CO2	7 Marks

CODE No.: 16BT30503 SVEC-16

Roll No. | | | | | | | | | | |

PYTHON PROGRAMMING

[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Apply the Type Conversion and write a python script to calculate the Temperature by using the type conversion concept.	CO5	7 Marks
	b)	Explain the concept of arithmetic operations and operators in detail.	CO1	4 Marks
	c)	List the Keywords and other identifiers in Python.	CO1	3 Marks
		(OR)		
2	a)	Define Computer Algorithm and Computer Software.	CO1	4 Marks
	b)	Explain the importance of Computational Problem Solving.	CO1	6 Marks
	c)	Write the short note on the Python Programming Language.	CO1	4 Marks
		UNIT-II		
3	a)	Explain in detail the Boolean Expressions (Conditions) with respective examples.	CO1	10 Marks
	b)	Differentiate between Selection Control and Iterative Control.	CO2	4 Marks
		(OR)		
4	a)	What is Set Data Type in Python with an example?	CO2	6 Marks
	b)	Illustrate the 'if' and 'elif' statements with respective examples.	CO2	8 Marks
		UNIT-III		
5	a)	List the various string methods used in Python programming.	CO1	7 Marks
	b)	Explain the recursion with an example.	CO3	4 Marks
	c)	Define the concept of Program Routine.	CO1	3 Marks
		(OR)		
6	a)	Explain the concept of using text files in Python and illustrate with example.	CO3	7 Marks
	b)	What is Exception Handling? Write the syntax for five (05) exception handlings that are handled in Python.	CO2	7 Marks
		UNIT-IV		
7	a)	Explain the Turtle Graphics. Write the steps involved in creating a Turtle Graphics Window.	CO1	7 Marks
	b)	Describe the fundamental concepts of Object Oriented Programming.	CO1	7 Marks
		(OR)		
8		Apply the concept of Inheritance to the real time example and illustrate in Python script for all the Inheritance types.	CO3	14 Marks
		UNIT-V		
9		Write a program in python to develop a window using any three GUI Components you are desired in GUI Programming.	CO5	14 Marks
		(OR)		
10	a)	Write a program with check buttons and Radio buttons to develop in a window using GUI Components.	CO5	8 Marks
	b)	Explore on the concept of Bound method and Callable Class object in GUI Programming.	CO2	6 Marks

SENSORS AND TRANSDUCERS

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe various elements of generalized measurement system with a neat block diagram.	CO1	7 Marks
	b)	Discuss various types of errors clearly with the help of examples.	CO1	7 Marks
		(OR)		
2		Explain in detail about resistance, current and inductance standards.	CO6	14 Marks

UNIT-II

3	a)	Define the terms: i) Accuracy. ii) Threshold. iii) Hysteresis. iv) Fidelity.	CO1	8 Marks
	b)	A 41/2 digit voltmeter is used for voltage measurement. Find its resolution. How would 12.75V be displayed on 10V range?	CO3	6 Marks
		(OR)		
4		Derive the equations for time response of a second order under damped system when subjected to unit step input. Also compare overdamped, underdamped and critically damped systems.	CO1	14 Marks

UNIT-III

5	a)	Distinguish between bonded and unbonded strain gauges.	CO1	9 Marks
	b)	A thermistor has β=3140K and the resistance at 27^0C is 1050Ω. The thermistor is used for temperature measurement and resistance measured is as 2330Ω. Find the measured temperature.	CO3	5 Marks
		(OR)		
6		Explain how by using a differential arrangement, a capacitive transducer which works on the principle of variation of capacitance with displacement between two plates, the response can be made linear.	CO2	14 Marks

UNIT-IV

7	a)	Identify the passive transducer which works on mutual inductance for measurement of linear displacement. Explain its working with a neat sketch and draw its characteristics indicating residual voltage.	CO4	7 Marks
	b)	Apply the principle of Hall Effect for the measurement of magnetic flux density.	CO5	7 Marks
		(OR)		
8	a)	Define pyroelectric effect. Discuss any one application of pyroelectric sensor.	CO5	7 Marks
	b)	Describe the working principle of electrochemical sensors with necessary sketches.	CO1	7 Marks

UNIT-V

9	a)	Explain with a sketch the working of an encoder that gives 4–bit digital output proportional to linear displacement.	CO1	8 Marks
	b)	Distinguish between intrinsic and extrinsic fiber optic sensors.	CO1	6 Marks
		(OR)		
10	a)	What is a smart sensor? Explain the configuration of a smart sensor with a neat sketch. List out its advantages.	CO1	7 Marks
	b)	Discuss in detail about the fabrication technique used for micro sensors.	CO1	7 Marks

DISCRETE MATHEMATICAL STRUCTURES

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Find the Truth Table for the following: i) {(p^q)V(~p^r)} v (q^r) ii) [(pVq) ^ (~r)] ↔ (q→r)	CO1	7 Marks
	b)	[(P →Q) ^ (R →S) ^ (PVR)] → (QVS) is a Tautology or not? Justify.	CO5	7 Marks
		(OR)		
2	a)	Identify whether the following arguments are valid or invalid: r → s p → q r V p ——— s V q	CO3	7 Marks
	b)	Identify and explain the converse, inverse and contrapositive of the following conditional statement "if the flood destroy my house or the fires destroy my house, then my insurance company will pay me".	CO1	7 Marks

UNIT-II

3	a)	Prove R is an equivalence relation. Let N be the set of natural numbers, that is, N = {1,2,3……..}. Define a relation R in N as follows: R = {(x,y)| x,y ϵ N and x + y is even}.	CO4	7 Marks
	b)	Decide whether each of the relations on { 0, 1, 2 } is reflexive, symmetric, transitive or a combination of these and which are equivalence relations.	CO2	7 Marks
		(OR)		
4	a)	Give some examples of inverse function and composition function.	CO1	7 Marks
	b)	Prove that weather it is lattice or not [$_{D12}$:/]	CO4	7 Marks

UNIT-III

5	a)	State and prove Lagrange's Theorem.	CO2	7 Marks
	b)	Differentiate Homomorphism and Isomorphism with an example.	CO1	7 Marks
		(OR)		
6	a)	If **a** and **b** are the elements of a group(G,*) Show that $(a*b)^{-1} = b^{-1}*a^{-1}$	CO1	7 Marks
	b)	Define Algebraic Structure. List its properties.	CO5	7 Marks

UNIT-IV

7	a)	i) How many different license plates are there that involve 1, 2 (or) 3 letters followed by 1, 2, 3 or 4 digits.	CO4	4 Marks
		ii) Each user on a computer system has a password, which is six to eight characters long, where each character is an uppercase letter or a digit. Each password must contain at least one digit. How many possible passwords are there?	CO4	3 Marks
	b)	Prove that for all Integers $n \geq 4$, $3^n > n^3$. Solve by using Mathematical Induction.	CO4	7 Marks
		(OR)		

8 a) Solve the Recurrence Relation CO4 7 Marks

$a_n-9a_{n-1}+27a_{n-2}-27a_{n-3} = 0$ for $n \geq 3$, where the initial conditions are $a_0=1$, $a_1=2$, $a_2=3$

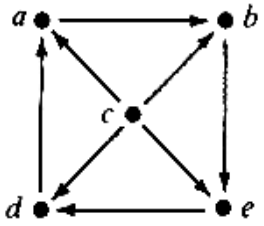
b) i) Find the Coefficient of X^{16} in $(1+X^4+X^8)^{10}$. CO2 7 Marks

ii) Find the Coefficient of X^9 in $(1+x^3+x^8)^{10}$.

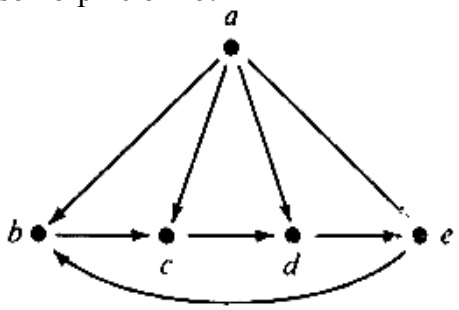
UNIT-V

9 a) Differentiate Eluers Path and Hamiltonian Path with an example. CO2 7 Marks

b) Determine whether Two Graphs are Isomorphic or not CO5 7 Marks



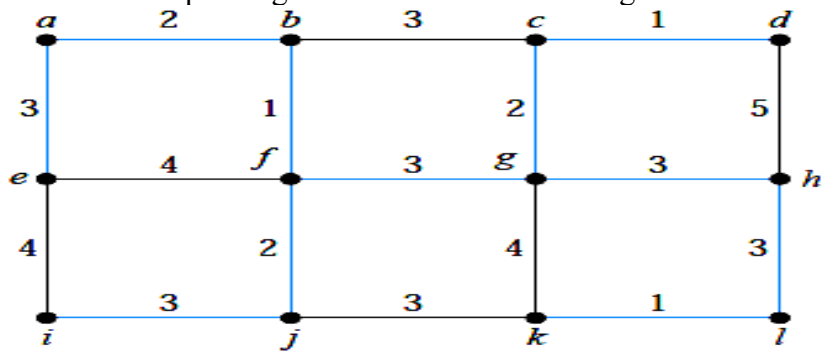
(a)



(b)

(OR)

10 a) Find the Minimal Spanning Tree for the Kruskal's Algorithm CO4 7 Marks



b) Explain the following with an examples. CO3 7 Marks

i) Bipartite Graph.

ii) Four Colour Problem.

iii) Planar Graph.

OPERATING SYSTEMS

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain briefly about the services of the operating system that are provided to the user's program.	CO1	5 Marks
	b)	What is IPC? Explain in detail about Inter process communication models.	CO1	9 Marks
		(OR)		
2	a)	Explain the Time-shared Operating system.	CO1	7 Marks
	b)	Compute Average waiting time, Turn around Times for the given scheduling algorithm **s** using gantt chart. i) FCFS. ii) SJF (Pre-emptive).	CO6	7 Marks

Process	Arrival time	Burst time
P1	0	7
P2	2	4
P3	4	1
P4	5	4

UNIT-II

3	a)	Explain perterson's solution to the critical section problem.	CO2	7 Marks
	b)	What is a deadlock? Discuss in detail about Deadlock Recovery.	CO3	7 Marks
		(OR)		
4	a)	What is bounded buffer problem? Give the solution using semaphores.	CO2	7 Marks
	b)	What are the necessary conditions for deadlock? Explain in detail.	CO2	7 Marks

UNIT-III

5	a)	Discuss the hierarchical paging structure.	CO2	7 Marks
	b)	What is demand paging? Discuss the hardware support required to support for demand paging.	CO2	7 Marks
		(OR)		
6	a)	Explain swapping of two processes using a disk as a backing store.	CO2	7 Marks
	b)	Describe operating system fetch policy for virtual memory.	CO2	7 Marks

UNIT-IV

7	a)	Explain in detail about the file attributes and it's operations.	CO3	6 Marks
	b)	Compare SCAN and C-SCAN disk scheduling algorithms with an example.	CO1	8 Marks
		(OR)		
8	a)	Discuss the indexed file allocation method with an example.	CO3	7 Marks
	b)	Explain file free space management approaches.	CO4	7 Marks

UNIT-V

9	a)	Explain in detail about kernel I/O subsystem.	CO5	7 Marks
	b)	What are the main goals of protection?	CO5	7 Marks
		(OR)		
10	a)	Explain the performance aspects of I/O hardware and software.	CO5	7 Marks
	b)	Discuss about revocation of access rights.	CO5	7 Marks

LINUX PROGRAMMING

[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is Unix? Explain characteristics of typical Unix programs and systems.	CO1	7 Marks
	b)	Write the steps in creating and running a C program that prints out "Hello SreeVidyaNikethan" in a Unix/Linux environment.	CO2	7 Marks
		(OR)		
2	a)	What is GNU project and Free Software Foundation?	CO1	8 Marks
	b)	List out the major software from the GNU project distributed under the GPL.	CO1	6 Marks

UNIT-II

3	a)	What is a shell in Linux environment? Explain.	CO2	7 Marks
	b)	Describe the purpose of using shell programming.	CO1	7 Marks
		(OR)		
4	a)	How pipes can be used to connect two processes in Linux? Give examples.	CO3	6 Marks
	b)	Explain variables in shell programming. How they differ from other programming environments?	CO3	8 Marks

UNIT-III

5	a)	Outline the directory structure in Linux file system.	CO5	6 Marks
	b)	What is a system call in Linux? List and explain low level system calls to access device drivers.	CO5	8 Marks
		(OR)		
6	a)	What is difference between system calls and function calls? Why function calls are efficient? Explain.	CO4	7 Marks
	b)	Explain file permissions. What are factors that affect file permissions?	CO4	7 Marks

UNIT-IV

7	a)	What is a process? Describe Linux process structure.	CO1	8 Marks
	b)	How to start a new process using system library functions? Explain.	CO1	6 Marks
		(OR)		
8	a)	What is the difference between a process and thread? What is the purpose of using threads?	CO6	7 Marks
	b)	Illustrate the process of duplicating a process and its purpose.	CO6	7 Marks

UNIT-V

9	a)	What are named pipes? How to create and use named pipes?	CO5	8 Marks
	b)	How to implement simple client/server using FIFO for process synchronization and bidirectional data flow.	CO5	6 Marks
		(OR)		
10	a)	What is a socket? Explain socket connections between server process and client process using examples.	CO1	7 Marks
	b)	How to create a socket? Explain using an example.	CO4	7 Marks

PROBABILITY DISTRIBUTIONS AND STATISTICAL METHODS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science Systems Engineering]

Max. Marks: 70

Time: 3 hours

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Define random variable, Discrete distribution function, variance of discrete distribution function, cumulative distribution function of continuous random variable. CO1 7 Marks

b) For continuous random variable whose p.d.f. is given by CO4 7 Marks

$$f(x) = \begin{cases} k(1-x^2) \text{ for } 0 < x < 1 \\ 0 \quad \text{otherwise} \end{cases},$$

Find (i) K (ii) mean (iii) Variance (iv) $P(1 < X < 2)$.

(OR)

2 a) For the random variable X has the following probability function CO5 7 Marks

X	4	5	6	8
P(X)	0.1	0.3	0.4	0.2

Determine (i) Expectation (ii) standard deviation.

b) A continuous random variable X has the distribution function CO4 7 Marks

$$F(x) = \begin{cases} 0 \quad \text{for } x \le 3 \\ 1 - \frac{9}{x^2} \text{ for } x > 3 \end{cases}, \text{ find } (i) \text{ P } (X < 8) \ (ii) \text{ P } (5 < X < 7).$$

UNIT-II

3 a) The mean and variance of binomial distribution are 4 and $\frac{4}{3}$ respectively. Find P($X \ge 1$). CO4, CO5 7 Marks

b) In a normal distribution 31% of the items are under 45 and 8% are over 64. Find the mean and variance of the distribution. CO4 7 Marks

(OR)

4 a) If a random variable X has passion distribution such that P(X = 1). $\frac{3}{2}$ =P(X= 3). Find (*i*) P ($X \ge 1$) (*ii*) P ($X \le 3$) (*iii*) P ($2 \le X \le 5$). CO4 7 Marks

b) The mean height of students in a class is 158cm with standard deviation of 20cms. Find how many students heights lie between 150cms and 170cms. If there are 100 students in a class. CO4 7 Marks

UNIT-III

5 A machine is set to deliver packets of given weight. 10 samples of size 5 each were recorded. Below the given the relevant data. CO3 14 Marks

Sample No.	1	2	3	4	5	6	7	8	9	10
Mean	15	17	15	18	17	14	18	15	17	16
Range	7	7	4	9	8	7	12	4	11	5

Construct the mean and range charts for the data given and draw the conclusions.

(OR)

6 Determine the coefficient of correlation for the following data. CO2, CO5 14 Marks

Fertiliser	15	18	20	24	30	35	40	50
Productivity	85	93	95	105	120	130	150	160

UNIT-IV

7 a) The mean life time of a sample of 100 light tubes produced by a company is found to be 1560hrs with population standard deviation of 90hrs. Test the hypothesis that the mean life time of the tubes produced by the company is 1580hrs. CO2 7 Marks

b) 20 people were attacked by a disease and only 18 survived. Examine whether you reject the hypothesis that the survival rate if attacked by this disease is 85% in favour of the hypothesis that is more at 5% level. CO2, CO4 7 Marks

(OR)

8 a) In two large populations, there are 30% and 25% respectively are good in English speaking people. Is this difference likely to be hidden in samples of 1200 and 900 respectively from the two populations? CO2, CO5 7 Marks

b) Explain briefly about: CO1 7 Marks

i) Critical region.
ii) Type I and Type II errors.
iii) Degrees of freedom.

UNIT-V

9 a) A random sample of size 16 values from a normal population should a mean of 53 and a sum of squares of deviations from the mean equals to 150. Check whether the sample is taken from the population having mean 56. Find 95% confidence limits of the mean of the population. CO4 7 Marks

b) Two Cars A and B were tested according to the speed to run a particular distance with the following results. CO4 7 Marks

Car A	28	30	32	33	33	29	34
Car B	29	30	30	24	27	29	---

Test 0.01 level of significance whether the two cars have same running capacity.

(OR)

10 The following random samples are measurements of the heat producing capacity (in million of calories per ton) of specimens of coal from two mines. CO4 14 Marks

MINE I	8260	8130	8350	8070	8340	
MINE II	7950	7890	7900	8140	7920	7840

Test 0.02 level of significance; whether it is reasonable to assume that the variances of the two populations sampled are equal.

II B.Tech I Semester (SVEC16) Supplementary Examinations July – 2022

SPECIAL FUNCTIONS AND COMPLEX ANALYSIS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Define Beta and Gamma functions. Derive the relation between them and applying it show that $\Gamma\left(\frac{1}{2}\right) = \sqrt{\pi}$.	CO1	14 Marks
		(OR)		
2	a)	Prove that $\frac{d}{dx}[xJ_1(x)] = xJ_0(x)$.	CO4	7 Marks
	b)	Estimate the integral $\int J_0(x)J_1(x)\,dx$.	CO4	7 Marks

UNIT-II

3		Make use of Milne-Thomson method to construct an analytic function $f(z) = u + iv$ if $v = \frac{2\sin x \sin y}{\cos 2x + \cosh 2y}$.	CO4	14 Marks
		(OR)		
4		Write the necessary and sufficient conditions for analyticity and show that the function $f(z) = \sqrt{\lvert xy \rvert}$ is not analytic at the origin although Cauchy-Riemann equations are satisfied at the origin.	CO1, CO4	14 Marks

UNIT-III

5		Analyzing the function $\frac{7z-2}{(z+1)(z)(z-2)}$, identify the regions in which the function can be expanded in Laurent series and expand it about point $z = -1$.	CO2	14 Marks
		(OR)		
6	a)	Construct a Taylor's series for $f(z) = \frac{e^z}{z(z+1)}$ about the point $z = 2$.	CO3	7 Marks
	b)	Write Cauchy's Integral formula and applying it, evaluate $\int_C \frac{z^2-1}{z^2+1}dz$ where $c: \lvert z-i \rvert = 1$.	CO1, CO4	7 Marks

UNIT-IV

7		By using complex variable technique, evaluate $\int_{-\infty}^{\infty} \frac{x^2}{(x^2+1)(x^2+4)}dx$.	CO5, CO4	14 Marks
		(OR)		
8		By the technique of complex variables, show that $\int_0^{\infty} \frac{\cos mx}{(x^2+a^2)^2}dx = \frac{\pi}{4a^3}(1+ma)e^{-ma}$ $(a > 0)$.	CO5, CO1, CO4	14 Marks

UNIT-V

9	a)	Define a conformal transformation and Identify the points at which the transformation $w = \cosh z$ is not conformal.	CO1	7 Marks
	b)	Find the image of the ring shaped region $1 < \|z\| < 2$ under the transformation $w = 2iz + 1$.	CO4	7 Marks

(OR)

10	a)	Establish an image for the triangular region with vertices (0, 0) (1, 0) and (0, 1) under the transformation $w = (1 - i)\, z + 3$ and identify the shape of the image region.	CO4	7 Marks
	b)	Find a bilinear transformation which maps the points –1, 0, 1 onto the points 1, 0, 1 respectively.	CO3	7 Marks

II B.Tech I Semester (SVEC16) Supplementary Examinations July – 2022

MANAGERIAL ECONOMICS AND PRINCIPLES OF ACCOUNTANCY
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	"Nature of the product largely determines the quantity demanded."Justify.	CO1 CO3	14 Marks

(OR)

2	Discuss various survey methods of demand forecasting with suitable examples.	CO2 CO3	14 Marks

UNIT-II

3	Critically examine the importance of cost concepts in general and short-run costs specifically.	CO2 CO3	14 Marks

(OR)

4	Compute BEP and Margin of Safety during period II from the given data.	CO4	14 Marks

Particulars	Period I	Period II
Sales(Rs.)	2,00,000	3,00,000
Profit(Rs.)	20,000	40,000

UNIT-III

5	"Is monopoly socially desirable market scenario?"Comment.	CO1 CO2	14 Marks

(OR)

6	Write a short note on: i) Market Penetration. ii) Market Skimming. iii) Cross Subsidization	CO1	14 Marks

UNIT-IV

7	For the following transactions pass necessary Journal entries in the books of Charishma for the month of October 2016. Oct. 1 Charishma commenced a business with Cash Rs. 26,000/- B/R Rs.14,000/- Motor Vehicles Rs. 40,000/- B/P Rs. 10,000/- Creditors Rs.20,000/- Oct. 5 Bought goods from Kali Rs.36,400/- Oct. 9 Cash paid to Kali Rs.36,000/- in full settlement of his account. Oct. 16 Sold goods to Neelima Rs. 44,600/- Oct. 25 Cash received from Neelima Rs.44,000/- in full settlement of her account. Oct. 31 Salaries paid through cheque Rs.16,800/-	CO2 CO5 CO6	14 Marks

(OR)

8	For the following transactions pass necessary journal entries in the books of Jeevan. 2015 Sep. 1 Jeevan commenced a business with Rs. 15, 00,000/- Sep. 6 Bought goods from Sheetal Agencies for cash Rs.1,00,000/- Sep. 17 Bought goods by Surya Rs. 48,000/- Sep. 21 Commission received Rs. 3,000/- Sep 28 Surya returned goods Rs.1,000/- Sep. 30 Goods worth Rs. 20,000/- gifted to brother.	CO2 CO3 CO6	14 Marks

UNIT-V

9 A Book keeper has submitted to you the following Trail Balance: CO4 CO5 CO6 14 Marks

Particulars	Debit (Rs)	Credit (Rs)
Capital		7,610
Cash in hand	30	
Purchases	8,990	
Sales		11,060
Cash at Bank	885	
Fixtures and Fittings	225	
Free hold Premises	1,500	
Lighting and Heating	65	
Bills Receivable	825	
Returns inwards	30	
Salaries	1,075	
Creditors		1,950
Debtors	5,700	
Stock on January 1-2011	3,000	
Printing	225	
Bills Payable		1,875
Rates, taxes and insurance	190	
Discounts receive		445
Discounts allowed	200	
Total	**22,940**	**22,940**

Stock on 31st Dec 2011 was valued at Rs. 1,800/-.

You are required to prepare Trading and Profit & Loss Account for the year ended Dec 31, 2011.

(OR)

10 From the following balances of accounts in the books of M/s Kavitha, prepare Trading, profit and loss account for the year ending March 31, 2018 and also Prepare balance sheet as on that date taking into account the following CO4 CO5 CO6 14 Marks

Particulars	Amount	Particulars	Amount
capital	450,000	Salaries	75,000
Sales	1,000,000	Commission (Dr)	15,000
Purchases	400,000	Interest (Dr)	10,000
Sales Returns	10,000	Gas, Water and Power	30,000
Purchases returns	15,000	Loan form HARS	50,000
creditors	200,000	Bills Receivable	120,000
Debtors	300,000	Bills Payable	25,000
Opening Stock	90,000	Electricity	16,000
Machinery	600,000	wages	14,000
Furniture	100,000	Commission (cr)	40,000

Adjustments:

i) Closing stock Rs.2,00,000/-

ii) Charge depreciation @ 10% on machinery@ 15 % on furniture.

II B.Tech I Semester (SVEC16) Supplementary Examinations July – 2022

FLUID MECHANICS AND HYDRAULIC MACHINERY
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Two large fixed parallel planes are 12mm apart. The space between the surfaces is filled with oil of viscosity 0.972N.s/m². A flat thin plate 0.25sq.m area moves through the oil at a velocity of 0.3m/s. Calculate the drag force i) when the plate is equidistant from both planes and ii) when the thin plate is at a distance of 4mm from one of the plane surfaces.	CO2	7 Marks
	b)	Derive an expression to determine the capillary rise or fall of liquid and if the surface tension at air-water interface is 0.069N/m, what is the pressure difference between inside and outside of an air bubble of diameter 0.009mm.	CO1	7 Marks

(OR)

2	a)	Define hydrostatic law and prove that the pressure intensity at any point of liquid at rest is the same in all directions.	CO1	7 Marks
	b)	Discuss the relationship between absolute pressure, atmospheric pressure and gauge pressure. Given that barometric reading is 760mm of mercury, intensity of pressure is 40kPa. Express the intensity of pressure in S.I units, both gauge and absolute.	CO2	7 Marks

UNIT-II

3	a)	Define velocity potential function and the velocity potential function for a two dimensional flow is $\varphi = x(2y - 1)$. At a point (4, 5) determine the velocity and the value of stream function.	CO2	7 Marks
	b)	State and prove Bernoulli's theorem with limitations.	CO2	7 Marks

(OR)

4	a)	Water flows in a circular pile. At one section the diameter is 0.3m, the static pressure is 260kPa gauge, the velocity is 3m/s and the elevation is 10m above ground level. The elevation at a section downstream is 0m and the pipe diameter is 0.15m. Find the gauge pressure at the downstream section neglecting all losses.	CO5	7 Marks
	b)	A 6m long pipe is inclined at an angle of 20 degrees with the horizontal. The smaller section of the pipe which is at a lower level is of 100mm diameter and the larger section of the pipe is of 300mm diameter. If the pipe is uniformly tapering and the velocity of water at the smaller section is 1.8 m/s, determine the difference of pressures between the two sections.	CO5	7 Marks

UNIT-III

5	a)	Two parallel plates kept 100mm apart have laminar flow of oil between them with a maximum velocity of 1.5m/s. Calculate discharge per meter width, shear stress at the plates, difference in pressure between two points 20m apart and velocity gradient at the plates.	CO2	7 Marks
	b)	Derive an expression for loss head due to friction and list out types of losses.	CO2	7 Marks

(OR)

6	a)	In a pipe of diameter 350mm and length 75m is flowing at a velocity of 2.8m/s. Find the head lost due to friction using Darcy Weisbach formula and Chezy's formula for which C= 55.	CO4	7 Marks
	b)	The diameter of a horizontal pipe which is 300mm is suddenly enlarged to 600mm. The rate of flow of water through this pipe is 0.4 cumec. If the intensity of pressure in the smaller pipe is 125kN/m^2, determine loss of head due to sudden enlargement, intensity of pressure in the larger pipe and power lost due to enlargement.	CO2	7 Marks

UNIT-IV

7	a)	Derive an expression to determine the velocity of flow using Chezy's formula. Calculate the dimensions of the rectangular cross section of an open channel which requires minimum area to convey 10 cumec. The slope being 1 in 1500. Take Manning's N = 0.013	CO2	7 Marks
	b)	Obtain the conditions required for most economical rectangular section. A power canal of trapezoidal section has to be excavated through hard clay at least cost. Determine the dimensions of the channel given, discharge equal to 14 cumec, bed slope 1/2500 and Manning's N = 0.02	CO3	7 Marks

(OR)

8	a)	Derive the necessary conditions required for most economical trapezoidal section. A V shaped open channel of included angle 90 degrees conveys a discharge of 0.05 cumec when the depth of flow at the center is 0.225m. Assuming C = 50 in the Chezy's equation, calculate the slope of the channel.	CO3	7 Marks
	b)	Derive the conditions for maximum discharge and maximum velocity of a circular channel to be most economical. The rate of flow of water through a circular channel of diameter 60cm is 150 litres/sec. Find the slope of the bed of the channel for maximum velocity.	CO3	7 Marks

UNIT-V

9	a)	Classify turbines. Explain work done and efficiency of a Pelton wheel with a neat sketch. A Pelton wheel is receiving water from a penstock with a given head of 510m. One third of the head is lost in friction in the penstock. The rate of flow through the nozzle fitted at the end of the penstock is 2.2 cumec. The angle of deflection of th jet is 165 degrees. Determine power given by water of the runner and hydraulic efficiency of the Pelton wheel. Assume coefficient of velocity as 1.00 and speed ratio as 0.45	CO2	7 Marks
	b)	What are the design aspects of Pelton wheel? A Pelton wheel produces 8000 kW under a head of 130m at a speed of 200 r.p.m. The coefficient of velocity of the nozzle is 0.98, hydraulic efficiency is 87%. Speed ratio is 0.45 and jet diameter is one tenth of the wheel diameter. Find the discharge, diameter of the wheel, diameter and number of jets required and the specific speed. The mechanical efficiency is 75%.	CO3	7 Marks

(OR)

10	a)	Describe Francis turbine components with a neat sketch. The following data is given for a Francis turbine. Net head = 80m, speed = 700 r.p.m, shaft power = 300kW, overall efficiency = 80%, hydraulic efficiency = 90%, flow ratio = 0.2 and breadth ratio = 0.1. The thicknesses of vanes occupy 4% of circumferential area of the runner, velocity of flow is constant at inlet and outlet and discharge is radial at outlet. Determine diameters of runner at inlet and outlet, width of wheel at inlet, guide blade angle and runner vane angles at inlet and outlet.	CO2	7 Marks
	b)	An inward flow reaction turbine has outer and inner diameters of 1m and 0.5m respectively. The breadth at inlet is 15cm and the velocity of flow at inlet and outlet remains to be 3m/s. The wheel runs at a speed of 192 r.p.m. If the guide blades make an angle of 10 degrees to the wheel tangent, find the absolute velocity of water at inlet of the runner, velocity of whirl at inlet, relative velocity at inlet, the runner blade angles, width of runner at outlet and mass of water flowing through the runner per second.	CO2	7 Marks

II B.Tech I Semester (SVEC16) Supplementary Examinations July – 2022

MECHANICS OF SOLIDS

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	The following data refer to a mild steel specimen tested in a laboratory. Diameter of the specimen= 20mm Length of the specimen= 250mm Extension under a load of 10 kN= 0.035mm Load at yield point= 120.15 kN Maximum load= 195.50 kN Length of the specimen under failure= 300mm The neck diameter = 15.25mm Determine Young's Modulus, Yield point, Ultimate stress, percentage of elongation and percentage reduction in area.	CO2	7 Marks
	b)	Describe the stress strain relationship for mild steel bar.	CO1	7 Marks
		(OR)		
2	a)	A rod of steel is 20m long at a temperature of 20°C. Find the free expansion of the rod when the temperature rises to 65°C. Find the temperature stress produced i) When the expansion of the rod is prevented ii) When the rod is permitted to expand by 5.8 mm. Take $\alpha = 12 \times 10^{-6}$ per °C and $E = 2 \times 10^{5}$ N/mm²	CO2	7 Marks
	b)	State Poisson's Ratio. Obtain the volumetric strain of a rectangular bar and a cylindrical rod.	CO1	7 Marks

UNIT-II

3		Define point of contraflexure. Determine the maximum shear force and bending moment of a simply supported beam carrying a uniformly distributed load of **w** per unit run over the whole span. Draw SFD and BMD	CO2	14 Marks
		(OR)		
4	a)	Determine the maximum shear force and bending moment of a cantilever beam carrying a uniformly distributed load of w per unit run over the whole span	CO2	10 Marks
	b)	A simply supported beam of 8m span has a central point load of 20kN. Determine the maximum shear force and bending moment. Draw shear force diagram and bending moment diagram	CO2	4 Marks

UNIT-III

5		Derive the maximum shear stress intensity for an I-section	CO1	14 Marks
		(OR)		
6		A masonry chimney having a shape of the frustum of a cone is 25m high. The external diameter at the top and the internal diameter at the bottom is 2m. The chimney is 0.5m thick at the base. If the weight of the chimney is 1800kN, find the uniform horizontal wind pressure that may act per unit projected area of the chimney in order tension at the base may be just avoided	CO5	14 Marks

UNIT-IV

7		What are the assumptions in the theory of pure torsion? Derive the equation of torsion.	CO1	14 Marks

(OR)

8	a)	A closed coil helical spring has mean diameter of 75mm and spring constant of 80kN/m. It has 8 coils. What is the suitable diameter of spring wire if maximum shear stress is not to exceed 250MN/m²? Modulus of rigidity of the spring wire material is 80GN/m². What is the maximum axial load the spring can carry?	CO3	7 Marks
	b)	A helical coil spring is made of round steel wire 6.35mm in diameter. The mean radius of the helix is 31.75mm; number of complete turns is 12. The spring is close coiled. If C=84.36 GN/m², then find: i) The pull required to extend the spring by 25.4 mm and ii) The stress in the wire.	CO4	7 Marks

UNIT-V

9	a)	Explain circumferential stress and longitudinal stress with neat sketch.	CO1	7 Marks
	b)	Calculate the thickness of the metal required for a cast iron main 800 mm in diameter for water at a pressure head of 100m if the maximum permissible tensile stress is 20 MN/m² and weight of water is 10 kN/m³.	CO2	7 Marks

(OR)

10		A thick cylinder shell is of 300mm internal diameter and has to withstand an internal pressure of 30MN/m². If permissible tensile stress of the shell is 150MN/m² and μ= 0.3, calculate the thickness of metal necessary for the cylinder on the basis of following criteria. i) Maximum principal stress. ii) Maximum principal strain. iii) Maximum shear. iv) Maximum strain energy. Neglect the longitudinal direct stress.	CO4	14 Marks

ELECTROMAGNETIC FIELDS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	State and explain Coulomb's law in vector form.	CO1	7 Marks
	b)	Determine the electric field intensity produced by a point charge distribution at P(1, 1, 1) caused by four identical 3nC point charges located at A(1, 1, 0), B(-1, 1, 0), C(-1, -1, 0) and D(1, -1, 0).	CO3	7 Marks

(OR)

2	a)	Using Gauss's law, obtain the expression for electric field intensity due to an infinite sheet of charge.	CO4	7 Marks
	b)	An electrostatic field is given by $\bar{E} = -8xy\bar{a}_x - 4x^2\bar{a}_y + \bar{a}_z V/m$. A. charge of 6C is to be moved from B (1, 8, 5) to A (2, 18, 6). Find the work done in each of the following cases. i) The path selected is $y = 3x^2 + z,\ z = x + 4$. ii) The straight line from B to A. Show that work done remains same and is independent of the path selected.	CO3	7 Marks

UNIT-II

3	a)	Derive the expressions for potential and electric field intensity due to a dipole.	CO2	7 Marks
	b)	For the current density $\bar{J} = 10z\sin^2\phi\bar{a}_\rho\ A/m^2$, determine the current through the cylindrical surface $\rho = 2,\ 1 \le z \le 5m$.	CO3	7 Marks

(OR)

4	a)	Explain in detail about polarization effects induced in dielectric due to electric field.	CO1	7 Marks
	b)	The electric field intensity in polystyrene (ε_r=2.55) filling the space between the plates of a parallel plate capacitor is 10kV/m. The distance between the plates is 1.5 mm. Calculate: i) Electric flux density. ii) Polarization. iii) The surface charge density of free charge on the plates. iv) The surface density of polarization charge. v) The potential difference between the plates.	CO3	7 Marks

UNIT-III

5	a)	State and explain Biot-Savart's Law.	CO1	7 Marks
	b)	Determine the current density associated with the magnetic field: $H = 4r\overrightarrow{a_r} + 5\overrightarrow{a_\theta} + \cos\theta\ \overrightarrow{a_\varphi}\ A/m$.	CO3	7 Marks

(OR)

6	a)	State and prove Ampere's circuital law in point form.	CO1	7 Marks
	b)	Given magnetic field strength, $H = \frac{y^2 z}{x}\overrightarrow{a_x} + \frac{0.5y^2z^2}{x^2}\overrightarrow{a_z} A/m$, find the current crossing the square surface at $y = 2m$ bounded by $x = z = 1m$ and $x = z = 2m$.	CO3	7 Marks

UNIT-IV

7	a)	Obtain an expression for force between two differential current elements carrying currents I_1 and I_2.	CO2	7 Marks
	b)	A rectangular coil carrying a current of 5A is placed in the magnetic field $\vec{B} = 0.3(\overrightarrow{a_x} + \overrightarrow{a_y})T$. The coil is lying in the y-z plane and has dimensions 0.8m x 0.4m. Find the torque developed by the coil.	CO3	7 Marks

(OR)

8	a)	Obtain the expression for torque on a current loop placed in a magnetic field.	CO2	7 Marks
	b)	Derive an expression for force per meter length between two straight long parallel current carrying conductors situated in space, separated by a distance 'd' m carrying a steady current of 'I' amperes in the opposite direction. Comment on the nature of force existed in between them.	CO2	7 Marks

UNIT-V

9	a)	State and explain Poynting Theorem.	CO1	7 Marks
	b)	Explain the following with practical examples. i) Motional EMF. ii) Transformer EMF.	CO1	7 Marks

(OR)

10		Write Maxwell's equations for static fields. Explain how they are modified for time varying electric and magnetic fields.	CO1	14 Marks

Roll No. | | | | | | | | | | |

SIGNALS, SYSTEMS AND NETWORKS

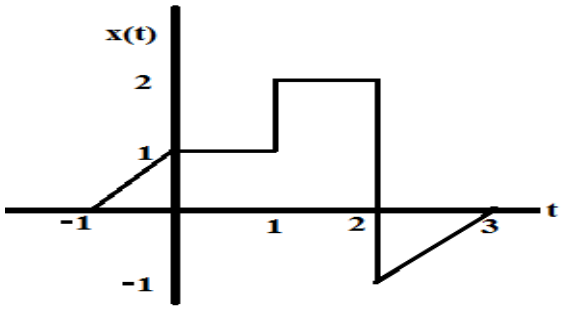
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Investigate whether the following system defined by its impulse response is casual and stable. $h(t) = e^{-3t}u(t-1)$	CO2	7 Marks
	b)	A continuous time signal shown in the Figure, sketch the signal $y(t) = \{x(t) + x(2-t)\}$	CO4	7 Marks



(OR)

2	a)	Verify whether the following system is stable and time invariant. $y(t) = 3\frac{dx(t)}{dt} + 7x(t)$.	CO2	7 Marks
	b)	A system is defined by the differential equation $\frac{d^2y(t)}{dt} + 3\frac{dy(t)}{dt} + 2y(t) = \frac{dx(t)}{dt}$ with initial conditions $y(0) = -1$ and $\left.\frac{dy(t)}{dt}\right\|_{t=0} = 2$ for the input $x(t) = 2e^{-2t}\ u(t)$. Determine the complete response $y(t)$.	CO4	7 Marks

UNIT-II

3	a)	State and prove the frequency shifting and time differentiation properties of Laplace transforms.	CO1	7 Marks
	b)	Obtain the inverse Laplace transforms of the following function $y(s) = \frac{3}{s^2(s+2)(s+3)}$.	CO4	7 Marks

(OR)

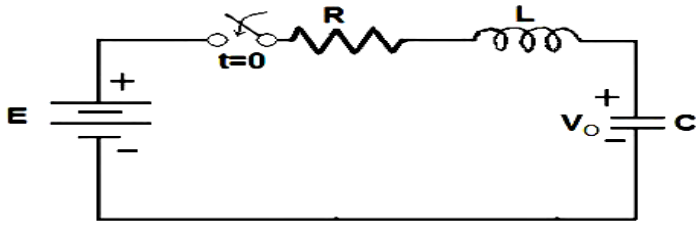
4	a)	Find the energy dissipated by 1 Ohm resistor with $i(t) = 10e^{-2\|t\|}\ A$ in the time and frequency domains using Fourier transforms.	CO5	7 Marks
	b)	Find the Fourier transform of the signal shown in the Figure	CO4	7 Marks

UNIT-III

5	a)	A DC series RLC circuit consists of R=20 Ω, L=0.05 H and C=20 μF with a 100V constant source when the switch is closed at t=0. Find the current transient.	CO4	7 Marks
	b)	In a series RL circuit, the application of a DC voltage results in a current of 0.741 times the final steady state value of current after 1 sec. However, after the current has reached its final value, the source is short circuited. What would be the value of current after one second?	CO4	7 Marks

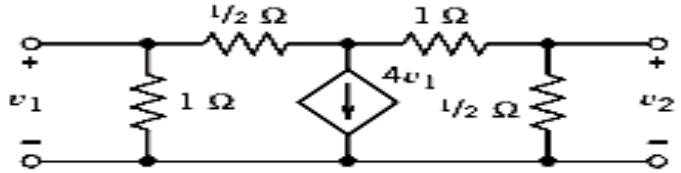
(OR)

6	a)	Explain the transient properties of a capacitor for DC and AC excitations.	CO1	6 Marks
	b)	A step voltage $V(t)$ = 100 u(t) is applied to a series RLC circuit with L = 10H, R=2 Ohm and C= 5F. The initial current in the circuit is zero but there is an initial voltage of 50V on the capacitor in a direction which opposes the applied source. Find the expression for the current in the circuit.	CO4	8 Marks



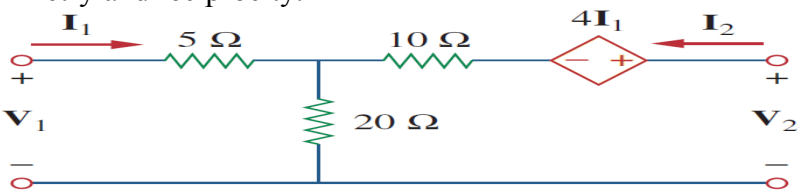
UNIT-IV

7	a)	Define reciprocity and symmetry for a generalized two port network and derive the conditions for reciprocity and symmetry in terms of ABCD parameters.	CO1	6 Marks
	b)	Determine the hybrid parameters for the network shown in Figure. Invistigate the netwok for symmetry and reciprocity.	CO4	8 Marks



(OR)

8	a)	Express hybrid parameters in terms of ABCD parameters for a generalized network.	CO1	6 Marks
	b)	Compute the z parameters of the circuit in Figure. Invistigate the netwok for symmetry and reciprocity.	CO4	8 Marks



UNIT-V

9	a)	Define image impedance and derive its expression for a prototype T networks.	CO2	7 Marks
	b)	A k type Filter circuit is required for a signal analysis purpose, which stops the frequencies ranging between 1 kHz to 10 kHz only and should drive a load of 500 Ω. Justify a suitable filter circuit with proper components and their specifications.	CO6	7 Marks

(OR)

10	a)	Derive the expressions for attenuation and phase shift in pass band and stop band for a symmetrical T section high pass filter.	CO2	7 Marks
	b)	Design an m derived T section low pass filter having cut-off frequency of f_c = 8 kHz, design impedance Ro=600 Ohms and frequency of infinite attenuation f_{inf}=10 kHz.	CO3	7 Marks

ELECTRICAL TECHNOLOGY

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the necessity of starter.	CO1	4 Marks
	b)	A 15 kW DC shunt motor has armature and field winding resistance of 0.25Ω and 200Ω respectively. It draws a no-load current of 10 A at a speed of 1200 r.p.m, when connected across a 300 V source. Calculate the speed of the motor at full load. Assume there is no change in flux from no load to full load.	CO4	10 Marks
		(OR)		
2	a)	Mention the applications of DC motors.	CO1	4 Marks
	b)	Derive the expression for torque equation of a DC motor.	CO2	5 Marks
	c)	A 4 pole, lap-wound DC generator has 100 slots and 12 conductors / slot. The flux/pole is 0.5 Wb. Determine the induced e.m.f in the armature if it is rotating at a speed of 1500 r.p.m.	CO4	5 Marks

UNIT-II

3	a)	Define voltage regulation. Derive the expression for voltage regulation of single phase transformer.	CO2	7 Marks
	b)	A 30 kVA single phase transformer has an iron loss of 457 watts and copper loss of 125 watts when delivering half of the full load. At what percentage of full load will the transformer have maximum efficiency?	CO4	7 Marks
		(OR)		
4	a)	Select suitable tests to develop the equivalent circuit of single phase transformer.	CO5	8 Marks
	b)	In a 100 kVA transformer, the iron loss is 1.2 kW and full load copper loss is 2 kW. If the load p.f. is 0.8 lagging, find the efficiency at full load and half of the load.	CO4	6 Marks

UNIT-III

5	a)	Derive expressions of phase and line quantities in delta connected network.	CO2	7 Marks
	b)	Three non reactive resistors of 5Ω, 10Ω and 20Ω are connected to RYB phases of a 440V balanced system. Determine the current and power in each phase, total real power and reactive power.	CO4	7 Marks
		(OR)		
6	a)	Explain how power factor can be calculated by using two wattmeter methods.	CO2	7 Marks
	b)	Calculate the total power input and reading of two wattmeters connected to measure power in a three phase balanced load, if the reactive power input is 15 kVAR and the power factor is 0.8.	CO4	7 Marks

UNIT-IV

7	a)	How alternators are classified? Explain.	CO1	3 Marks
	b)	Derive the e.m.f equation of an alternator.	CO2	5 Marks
	c)	A 3-phase, 16-pole alternator has a star-connected winding with 144 slots and 10 conductors per slot. The flux per pole is 0.03Wb, sinusoidally distributed and the speed is 375 r.p.m. Find the frequency, speed and the phase and line e.m.f. Assume full-pitched coil.	CO4	6 Marks

(OR)

8	a)	Why toque-slip characteristic of a 3-phase Induction motor is rectangular hyperbola? Justify.	CO2	10 Marks
	b)	Compare the slipring and squirrel cage induction motors.	CO1	4 Marks

UNIT-V

9	a)	Why single phase induction motor not self starting? Suggest the means to make it a self starting one.	CO1	7 Marks
	b)	Illustrate the working of split phase induction motor with a phasor diagram.	CO1	7 Marks

(OR)

10	a)	Explain the constructional details of variable reluctance stepper motor.	CO1	7 Marks
	b)	Explain the working of permanent magnet stepper motor and mention its applications.	CO1	7 Marks

ENGINEERING METALLURGY
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	List out the various ores of metals.	CO1	5 Marks
	b)	Analyse the process of steel making in L-D process.	CO2	9 Marks
		(OR)		
2		Discuss in detail the working principle of blast furnace.	CO4	14 Marks

UNIT-II

3		What are the different invariant reactions in binary systems? Explain them with neat diagrams.	CO2	14 Marks
		(OR)		
4		Explain in detail the Hume Rothery rules.	CO3	14 Marks

UNIT-III

5	a)	Write the differences between Annealing and Normalizing.	CO3	8 Marks
	b)	Write the purpose of Tempering.	CO3	6 Marks
		(OR)		
6		Explain about TTT Diagram.	CO3	14 Marks

UNIT-IV

7		Explain the following. i) Nitriding. ii) Cyaniding.	CO3	14 Marks
		(OR)		
8		Explain about Scanning Electron Microscope with neat sketch.	CO5	14 Marks

UNIT-V

9	a)	Explain Sintering process.	CO4	7 Marks
	b)	Describe the applications of powder metallurgy.	CO4	7 Marks
		(OR)		
10		Discuss the various methods of producing metal powders and write the limitations of powder metallurgy.	CO6	14 Marks

STRENGTH OF MATERIALS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive the relationship between Modulus of Elasticity, Modulus of Rigidity and Bulk Modulus from first principles.	CO1	7 Marks
	b)	A short reinforced cement concrete column 600mm x 600mm has eight steel rods of diameter 25mm as reinforcement. Find the stresses in steel and concrete, and elastic shortening of column if E = 200000N/mm² for steel and 10000N/mm² for concrete. Load in column is 3000kN and length 3 meters.	CO2	7 Marks

(OR)

2		Rails are laid such that there is no stress in them at 24^{0}C. If the rails are 32m long, determine i) The stress in the rails at 80^{0}C, when there is no allowance for expansion. ii) The stress in the rails at 80^{0}C, when there is an allowance for expansion of 8 mm per rail. iii) The maximum temperature for no stress in the rails when expansion allowance is 8mm Take coefficient of linear expansion is 11 x 10^{-6}/^{o}C and E=205GPa.	CO2	14 Marks

UNIT-II

3		Fig.1 shows vertical forces 20kN, 40kN and UDL of 20kN/m in 3m lengths. Draw the shear force and bending moment diagrams.	CO6	14 Marks

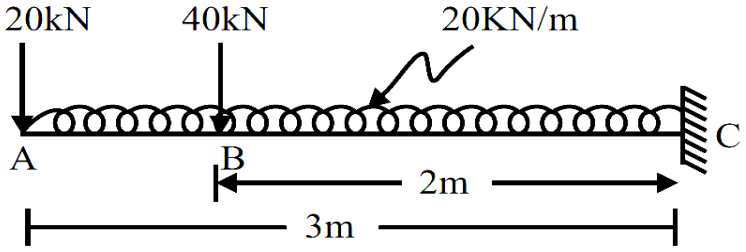

Fig. 1

(OR)

4	a)	Draw the SFD and BMD for the beam shown in the Fig.2.	CO6	7 Marks

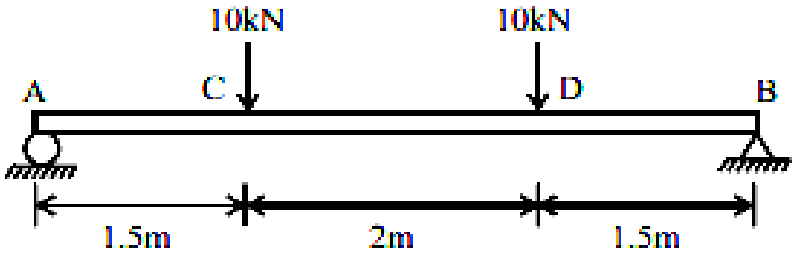

Fig.2

	b)	Derive the relation between shear force, bending moment and rate of loading at a section of a beam.	CO1	7 Marks

UNIT-III

5		A timber beam of rectangular section is to support a load of 20kN uniformly distributed over a span of 3.6 m when beam is simply supported. If the depth of the section is to be twice the breadth and the stress in the timber is not to exceed 7N/mm^2, find the dimensions of the cross section. How would you modify the cross section of the beam, if it carries a concentrated load of 20kN placed at the center with the same ratio of breadth to depth.	CO3	14 Marks

(OR)

6	a)	Derive the expression for shear stress at any point (or in a fibre) in the cross-section of a beam.	CO1	9 Marks
	b)	An equilateral triangular cross section beam with base 250mm is subjected to a shear force of 150kN. Draw the shear stress distribution across the section and also determine the average shear stress.	CO4	5 Marks

UNIT-IV

7		A beam AB of 5 m span is simply supported at ends A and B. C is a point on the beam at a distance of 4m from A. The beam has a moment of inertia of 80 x 10^{6}mm^4 for the length AC and 20 x 10^{6}mm^4 for the length CB. The beam is loaded with a point load of 6 kN at C. Determine the slope at A, deflection at the mid span and maximum deflection. E = 205 GPa.	CO4	14 Marks

(OR)

8	a)	Explain in brief about principal planes and principal stresses.	CO1	6 Marks
	b)	The principal stresses at a point in a bar are 50 MPa tensile and 30 MPa compressive. Calculate the normal stress, shear stress and the resultant stress on a plane inclined at 50^0 to the axis of the major principal stress. Also find the maximum shear stress at the point.	CO5	8 Marks

UNIT-V

9		A thin cylindrical shell of inside diameter 1.5m is made of 10mm thick steel plate. It is of 4m length and is closed at its both ends. The shell is subjected to an internal fluid pressure of 2 MPa. Find the change in length, final length, the change in diameter, the final diameter, the change in volume and the final volume of the cylinder. The modulus of elasticity of steel is 210 GPa and the Poisson's ratio is 0.30.	CO3	14 Marks

(OR)

10		State the assumptions of Lame's theory of thick cylinders. Also derive the equations for radial pressure and hoop stress at any point in case of a thick cylinder.	CO1	14 Marks

THERMODYNAMICS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is the concept of continuum? How will you define density using this concept?	CO1	7 Marks
	b)	To a closed system 150 kJ of work is supplied. If the initial volume is 0.6 m^3 and pressure of the system changes as p = 8 – 4V, where p is in bar and V is in m^3, determine the final volume and pressure of the system.	CO2	7 Marks
		(OR)		
2	a)	Define Path function and point function.	CO1	6 Marks
	b)	A mass of gas is compressed in a quasi-static process from 80 kPa, 0.1m^3 to 0.4 MPa, 0.03m^3. Assuming that the pressure and volume are related by pv^n = constant, find the work done by the gas system.	CO2	8 Marks

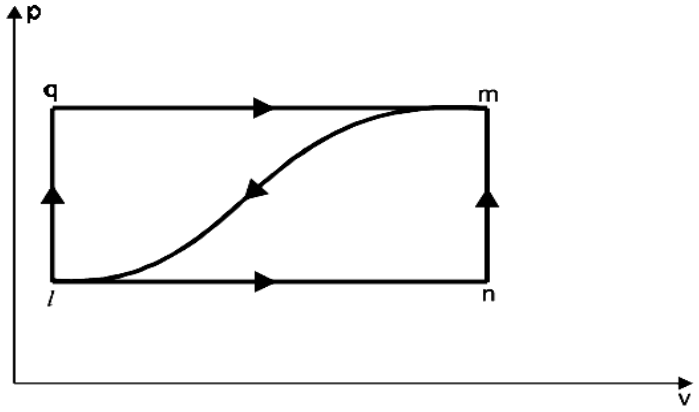
UNIT-II

3	a)	A heat engine is used to drive a heat pump. The heat transfers from the heat engine and from the heat pump are used to heat the water circulating through the radiators of a building. The efficiency of the heat engine is 27% and the COP of the heat pump is 4. Evaluate the ratio of the heat transfer to the circulating water to the heat transfer to the heat engine	CO2	10 Marks
	b)	What is Perpetual motion machine of the first kind?	CO1	4 Marks
		(OR)		
4	a)	Define enthalpy. How is it related to internal energy	CO1	4 Marks
	b)	When a system is taken from state l to state m, in Fig., along path lqm, 168 kJ of heat flows into the system, and the system does 64 kJ of work:	CO2	10 Marks

i) How much will be the heat that flows into the system along path lnm if the work done is 21 kJ?

ii) When the system is returned from m to l along the curved path, the work done on the system is 42 kJ? Does the system absorb or liberate heat, and how much of the heat is absorbed or liberated?

iii) If Ul = 0 and Un = 84 kJ, find the heat absorbed in the processes ln and nm.



UNIT-III

5	a)	Bring out the concept of entropy and importance of T-s diagram.	CO1	4 Marks
	b)	One kg of ice at -50^{0}C is exposed to the atmosphere which is at 200C. The ice melts and comes into thermal equilibrium with the atmosphere. i) Determine the entropy increase of the universe. ii) What is the minimum amount of work necessary to convert the water back into ice at -5 ^{0}C? Cp of ice is 2.093kJ/kg K and the latent heat of fusion of ice is 333.3kJ/kg.	CO3	10 Marks

(OR)

6	a)	State and prove Clausius inequality.	CO1	4 Marks
	b)	An economizer, a gas-to-water finned tube heat exchanger, receives 67.5kg/s of gas, cp = 1.0046 kJ/kg K, and 51.1 kg/s of water, cp = 4.186 kJ/kg K. The water rises in temperature from 402 to 469 K, where the gas falls in temperature from 682 K to 470 K. There are no changes of kinetic energy and $p0$ = 1.03 bar and $T0$ = 289 K. Determine: i) Rate of change of availability of the water. ii) The rate of change of availability of the gas. iii) The rate of entropy generation.	CO4	10 Marks

UNIT-IV

7	a)	Define dryness fraction (or) what is the quality of steam?	CO1	4 Marks
	b)	A sample of steam from a boiler drum at 3 MPa is put through a throttling calorimeter in which the pressure and temperature are found to be 0.1MPa, 120°C. Find the quality of the sample taken from the boiler.	CO4	10 Marks

(OR)

8	a)	Draw the T-S diagram for pure substance and explain.	CO1	4 Marks
	b)	A vessel having a capacity of 0.05m^3 contains a mixture of saturated water and saturated steam at a temperature of 245°C. The mass of the liquid present is 10 kg. Find the following : i) The pressure. ii) The mass. iii) The specific volume. iv) The specific enthalpy, v) The specific entropy. vi) The specific internal energy.	CO4	10 Marks

UNIT-V

9	a)	Compare with the help of P-V and T-S diagram air standard Otto, Diesel and Dual cycles with respect to: i) Same compression ratio and same heat input. ii) Same maximum pressure and same heat input.	CO1	6 Marks
	b)	A Diesel engine has a compression ratio of 14 and cut-off takes place at 6% of the stroke. Find the air standard efficiency.	CO5	8 Marks

(OR)

10	a)	Draw the P-V and T-S diagram of Stirling, Atikinson and Erricson cycle.	CO1	6 Marks
	b)	A perfect gas undergoes a cycle which consists of the following processes taken in order: i) Heat rejection at constant pressure. ii) Adiabatic compression from 1 bar and 270C to 4 bars. iii) Heat addition at constant volume to a final pressure of 16 bars. iv) Adiabatic expansion to 1 bar. Calculate: i) Work done/kg of gas; ii) Efficiency of the cycle. Take: cp = 0.92kJ/kg.K, cv= 0.75 Kj/kg	CO5	8 Marks

ELECTRONIC CIRCUIT ANALYSIS AND DESIGN

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain CE amplifier with neat circuit diagram	CO1	7 Marks
	b)	What are the transistors configurations need to select to configure a Cascode Amplifier? Explain.	CO3	7 Marks
		(OR)		
2	a)	Derive expressions for overall voltage gain of a two-stage RC coupled amplifier.	CO3	8 Marks
	b)	Select a BJT amplifier among CE, CB and CC, explain its operation.	CO5	6 Marks

UNIT-II

3	a)	Explain how hybrid-Π parameters vary with Ic, Vce and Temperature.	CO1	7 Marks
	b)	A transistor amplifier in CE configuration is operating at high frequency with the following specifications: f_T = 6 MHz, g_m= 0.04 mhos, hfe= 50, rbb_0= 100Ω, Rs = 500Ω, CC = 10pF, R_L= 100Ω. Compute the voltage gain, upper 3dB cut off frequency and gain bandwidth product.	CO4	7 Marks
		(OR)		
4	a)	Explain about emitter follower at high frequencies.	CO1	7 Marks
	b)	Three identical non-interacting amplifier stages have an overall gain of 0.3 dB down at 20 kHz compared to mid band gain. Calculate the uppercut-off frequencies of the individual stages.	CO4	7 Marks

UNIT-III

5	a)	State and explain the Barkhausen's criterion for Oscillations.	CO1	7 Marks
	b)	Draw the Colpitts oscillator with BJT, explain its operation and derive an expression for frequency of oscillations	CO3	7 Marks
		(OR)		
6	a)	Derive the expression voltage gain of current series feedback amplifier	CO3	7 Marks
	b)	Draw the equivalent circuit of a Quartz Crystal.	CO1	7 Marks

UNIT-IV

7	a)	State the merits of push pull configuration? Describe the operation of class B transformer coupled push pull amplifier.	CO1	7 Marks
	b)	Derive an expression for Total Power Dissipation in a Power Amplifier.	CO2	7 Marks
		(OR)		
8	a)	What are the drawbacks of transformer coupled power amplifiers?	CO1	7 Marks
	b)	Derive the expression for maximum conversion efficiency for a simple series fed Class A power amplifier.	CO2	7 Marks

UNIT-V

9	a)	Why two tuned circuits are used in double tuned amplifier? Explain clearly.	CO1	7 Marks
	b)	Apply tuned amplifiers in the radio frequency range applications for tuning ratio frequency.	CO6	7 Marks
		(OR)		
10	a)	What is the effect of cascading single tuned amplifiers on bandwidth?	CO1	7 Marks
	b)	Apply transformer coupling to construct double tuned amplifier. Explain briefly about double tuned amplifier.	CO6	7 Marks

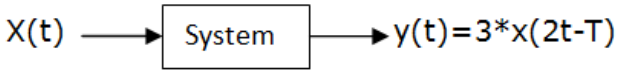
SIGNALS AND SYSTEMS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	List the following properties of systems. i) Stability. ii) Linearity. iii) Causality.	CO1	7 Marks
	b)	Sketch r(t)+r(t-1)+r(t-2)+r(t-3).	CO2	7 Marks
		(OR)		
2	a)	Sketch the bounded and unbounded signals and check whether system $h(t)=e^{3t}$ is stable or not	CO1	7 Marks
	b)	Consider the system below	CO2	7 Marks



If the signal x(t) has an energy E then what is the energy of y(t) signal.

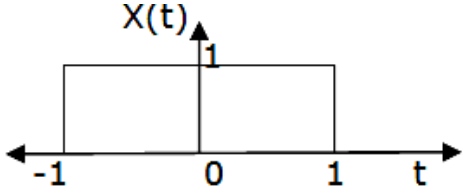
UNIT-II

3	a)	Find the trigonometric Fourier series of the waveform as shown in the figure.	CO4	10 Marks

	b)	Examine the conditions required for existence of Fourier transform.	CO2	4 Marks
		(OR)		
4	a)	Find out the Fourier Transform of the Cosine wave x(t) = A Cos (2πfct) u(t). Hence plot its amplitude spectrum	CO4	8 Marks
	b)	Summarize the types of distortions in linear systems and examine how should be the amplitude of distortion less system.	CO2	6 Marks

UNIT-III

5	a)	Determine the energy spectral density of gate function with an amplitude A and pulse width τ.	CO4	7 Marks
	b)	Using appropriate method find the convolution of the rectangular pulse given below with itself.	CO5	7 Marks



(OR)

6	a)	Find the step response of the system whose impulse response is given by: $h(t)=e^{-3t}u(t) - e^{-2t}u(t)$	CO4	7 Marks
	b)	By applying appropriate technique find the response y(t) of an LTI system whose input and impulse response is given by: $x(t)=3\cos 2t$ for all t. $h(t) = e^{-\lvert t\rvert}\begin{cases} e^{t} & t < 0 \\ e^{-t} & t \geq 0 \end{cases}$	CO5	7 Marks

UNIT-IV

7	a)	Explain the significance of Laplace transform in designing real time systems to meet human requirements	CO6	7 Marks
	b)	Find Laplace Transform of the signal $X(t)=e^{-b\lvert t\rvert}$	CO3	7 Marks
		(OR)		
8	a)	Explain how laplace transform is useful to analyse the stability of systems in s domain.	CO6	7 Marks
	b)	Using convolution theorem for laplace transform find $y(t)=x_1(t)*x_2(t)$ where $x_1(t)=e^{-3t}u(t)$ and $x_2(t)=u(t-2)$	CO3	7 Marks

UNIT-V

9	a)	Given a signal $x(t) = 3\cos(50\pi t) \cdot 10\sin(300\pi t) \cdot \cos(100\pi t)$. Find the Nyquist rate for this signal.	CO4	9 Marks
	b)	What is aliasing and anti aliasing? What are the causes to it and how it can be eliminated?	CO3	5 Marks
		(OR)		
10	a)	Find the Z-transform of $x[n] = (1/2)^n u[n] + (1/3)^n u[-n-1]$.	CO4	8 Marks
	b)	Derive the Convolution theorem and scaling property of Z-transform.	CO1	6 Marks

SWITCHING THEORY AND LOGIC DESIGN

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the properties of EX-OR gate.	CO1	7 Marks
	b)	Realize the Boolean expression [[(A+B) C]' D] using NAND gate.	CO3	7 Marks
		(OR)		
2	a)	Explain about Boolean Laws and Theorems.	CO1	7 Marks
	b)	Express the binary word 1011 in terms of seven bit even parity hamming code.	CO3	7 Marks

UNIT-II

3	a)	Obtain the expression for the function "F" with minimum number of literals using tabulation method. F(A, B, C, D, E) =∑m(1, 4, 6, 10, 20, 22, 24, 26).	CO4	10 Marks
	b)	Reduce the following function using K-map F(A, B, C, D, E) = ∑m (1, 4, 6, 10).	CO5	4 Marks
		(OR)		
4	a)	Reduce the following function using K-map F(A, B, C, D) = ΠM(0, 2, 3, 8, 9, 12, 13, 15).	CO5	7 Marks
	b)	Obtain the simplified expression in sum of products F(A, B, C, D)= Σm(1, 2, 4, 11, 12, 13) +d (0, 3, 6, 10).	CO4	7 Marks

UNIT-III

5	a)	Explain 1-line to 8-line de-multiplexer with an example.	CO1	7 Marks
	b)	Distinguish between an encoder and decoder.	CO2	7 Marks
		(OR)		
6	a)	Explain 1-line to 4-line de-multiplexer with an example.	CO1	7 Marks
	b)	Implement the following function with a MUX**:** F(A, B, C)=∑*m*(1, 3, 5, 6).	CO2	7 Marks

UNIT-IV

7	a)	Draw the truth and excitation tables for all flip flops.	CO6	7 Marks
	b)	Design Mod-10 Counter using T Flip-Flops.	CO3	7 Marks
		(OR)		
8	a)	Design a sequential circuit with two D flip-flops A and B. and one input X. when X=0, the state of the circuit remains the same. When X=1, the circuit goes through the state transition from 00 to 11 to 11 to 10 back to 00.and repeats?	CO6	7 Marks
	b)	Design of a synchronous BCD up counter using T Flip-Flop.	CO3	7 Marks

UNIT-V

9	a)	Distinguish between PROM ,PLA and PAL.	CO1	7 Marks
	b)	Implement the following Boolean functions using PLA. W(A,B,C,D) = Σm(0, 2, 6, 7, 8, 9, 12, 13), X(A,B,C,D) = Σm(0, 2, 6, 7, 8, 9, 12, 13, 14).	CO2	7 Marks
		(OR)		
10	a)	Distinguish between Moore and Mealy machine.	CO1	7 Marks
	b)	Design a combinational circuit using a PROM. The circuit accepts a 3-bit binary number and generates its equivalentXS-3 code.	CO6	7 Marks

ANALOG ELECTRONIC CIRCUITS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Implement different types of coupling methods in multistage amplifiers. And explain their Frequency response.	CO6	8 Marks
	b)	With the help of circuit diagram and its ac equivalent circuit develop expression for the overall input impedance of emitter follower circuit.	CO3	6 Marks
		OR)		
2	a)	Draw and explain the CE Hybrid - Pi model.	CO2	7 Marks
	b)	Apply cascading concept to get high voltage gain.	CO6	7 Marks
		UNIT-II		
3	a)	Give the two Barkhausen conditions required in order for sinusoidal oscillations to be sustained.	CO1	8 Marks
	b)	Compare Hartley and Colpitts oscillator.	CO2	6 Marks
		(OR)		
4	a)	Define Piezoelectric effect. Draw an ac equivalent circuit of a Crystal.	CO1	6 Marks
	b)	Compare RC and LC oscillators.	CO2	8 Marks
		UNIT-III		
5	a)	A push pull amplifier utilizes a transformer whose primary has a total of 160 turns and whose secondary has 40 turns. It must be capable of delivering 40W to an 8 Ω load under maximum power conditions	CO4	7 Marks
	b)	What is cross over distortion? How can it be eliminated in case of a transformer coupled class- B push pull power amplifier? Explain with a neat circuit diagram.	CO1	7 Marks
		(OR)		
6	a)	A class-B push pull power amplifier drives a load of 16Ω connected to the secondary of an ideal transformer. If the number of turns on the primary is 200 and that on the secondary is 50, calculate the maximum power output, dc power input, efficiency and maximum power dissipated per transistor if the supply voltage is 25Volts.	CO4	8 Marks
	b)	What are the drawbacks of transformer coupled power amplifiers?	CO1	6 Marks
		UNIT-IV		
7	a)	Discuss the operation of a low-pass circuit when it is excited by a sinusoidal signal.	CO1	7 Marks
	b)	Design a two independent level clipper for a sine wave of 10V(P-P). Assume (VR1 = 5v, VR2 = 3v).	CO3	7 Marks
		(OR)		
8	a)	Design a two independent level clipper for a sine wave of 20 V(P-P). Assume (VR1 = -VR2).	CO3	7 Marks
	b)	Define the term Rise time with necessary expression.	CO1	7 Marks

UNIT-V

9	a)	List the applications of astable multivibrator.	CO2	7 Marks
	b)	Apply appropriate technique to convert voltage to frequency, using two transistors.	CO5	7 Marks

(OR)

10	a)	Apply appropriate technique to convert any signal to square signal, using two transistors and deduct necessary expressions.	CO5	8 Marks
	b)	List the applications of Bi-stable multi-vibrator.	CO2	6 Marks

COMPUTER ORGANIZATION

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain about sign magnitude and 2's complement approaches for representing the fixed-point numbers. Why 2's complement representation is preferable?	CO1	7 Marks
	b)	The following register transfer statements specify a memory. Analyze the memory operation in each case. i) R2 ← M[AR]. ii) M[AR] ← R3. iii) R5 ← M[R5].	CO2	7 Marks
		(OR)		
2	a)	What are the different types of Shift operations? Design a 4-bit combinational circuit shifter.	CO1, CO3	7 Marks
	b)	Design a 4-bit Binary Adder-Subtractor circuit.	CO3	7 Marks

UNIT-II

3	a)	Define Control memory. Describe the micro programmed control organization with the help of a diagram.	CO1	7 Marks
	b)	List the three types of Basic computer instructions and specify their respective formats in detail.	CO1	7 Marks
		(OR)		
4	a)	How do you map a computer instruction to a microinstruction address? Explain.	CO1	7 Marks
	b)	Use the mapping procedure, find the microinstruction address for the following operation codes i) 0010. ii) 1011.	CO2	7 Marks

UNIT-III

5	a)	Explain the use of DMA controllers in a computer system with a neat diagram.	CO1	7 Marks
	b)	Design parallel priority interrupt hardware for a system with eight interrupt sources.	CO3	7 Marks
		(OR)		
6	a)	Differentiate between Isolated I/O and Memory Mapped I/O techniques.	CO2	7 Marks
	b)	Explain in detail the CPU-IOP Communication process with the help of a neat diagram.	CO1	7 Marks

UNIT-IV

7	a)	Explain how SIMMs and DIMMs provide for future extension of memory in computer systems.	CO6	7 Marks
	b)	Consider a cache of 128 blocks of 16 words each, for a total of 2048 (2K) words. Assume that the main memory is addressable y a 16-bit address. The main memory has 64K words, viewed as 4K blocks of 16 words each. Assuming direct mapping function, how many bits are there in the main memory address. How many bits does TAG, SET and WORD fields constitute of?	CO2, CO5	7 Marks
		(OR)		

8	a)	Explain the Optical Disk Technologies in detail.	CO1	7 Marks
	b)	Compare SDRAM and DDR-SDRAM.	CO2	7 Marks

UNIT-V

9	a)	Distinguish between tightly coupled multiprocessors and loosely coupled multiprocessors.	CO2	7 Marks
	b)	Consider 8 processors P0 and P7. Consider memory module with 8 words. Design Omega Switching Network to connect processors with memory using 2x2 switches.	CO2, CO5	7 Marks

(OR)

10	a)	Explain pipelining concept in detail.	CO1	7 Marks
	b)	Write short notes on shared memory multiprocessors.	CO1	7 Marks

CODE No.: 16BT30503 SVEC-16

PYTHON PROGRAMMING
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Elaborate how input can be accepted by the user and display the output on the console screen.	CO4	7 Marks
	b)	Outline the operator precedence and associativity in evaluating the expression.	CO3	7 Marks
		(OR)		
2		List Operators in python, explain with an examples.	CO1	14 Marks
		UNIT-II		
3		Write a python script to print fallowing pattern. 5 5 4 5 4 3 5 4 3 2 5 4 3 2 1	CO2	14 Marks
		(OR)		
4	a)	What is a Dictionary? Summarize Dictionary types in Python.	CO1	7 Marks
	b)	Explain Set data types in Python.	CO1	7 Marks
		UNIT-III		
5	a)	List out various String Methods used in Python.	CO1	7 Marks
	b)	Implement Towers of Hanoi problem using Recursion.	CO3	7 Marks
		(OR)		
6	a)	Implement a Python code that determines how many times a given letter occurs in a given string using Recursion.	CO4	7 Marks
	b)	Write a program segment that: i) Opens and reads a text file. ii) Copy data to other file.	CO6	7 Marks
		UNIT-IV		
7		Explain encapsulation, inheritance and polymorphism.	CO1	14 Marks
		(OR)		
8		Develop a simple program for bouncing ball using multiple turtles.	CO4	14 Marks
		UNIT-V		
9		How to reuse a GUI component with class. And explain about Attaching and Extending class components.	CO2	14 Marks
		(OR)		
10	a)	List and explain the uses of Lambda.	CO2	7 Marks
	b)	Compare and contrast between radio buttons with check boxes in GUI programming of python.	CO2	7 Marks

II B.Tech I Semester (SVEC16) Supplementary Examinations July – 2022

DISCRETE MATHEMATICAL STRUCTURES
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Determine symbolic form and establish the validity of the following arguments. " If I get my Christmas bonus AND my friends are free , I will take a road trip with my friends. If my friends don't find a job after Christmas, Then they will be free. I got my Christmas bonus and my friends did NOT find a job after Christmas." Therefore I will take a road trip with my friends.	CO4	7 Marks
	b)	Construct the converse, inverse and contrapositive of the statement: "If the flood destroy my house or the fires destroy my house, then my insurance company will pay me".	CO3	7 Marks

(OR)

2	a)	What is the correct conclusion for the following: Given the following statements as premises, all referring to an arbitrary meal: If he takes coffee, he does not drink milk. He eats crackers only if he drinks milk. He does not take soup unless he eats crackers. At noon today, he had coffee. Whether he took soup at noon today?	CO1	7 Marks
	b)	Organize the following statement in symbolic form using quantifiers: i) All students have taken a course in mathematics. ii) Some students are intelligent, but not hardworking.	CO3	7 Marks

UNIT-II

3	a)	Show that the function f and g both of which are from N to N given by $f(x,y) = x + y$ and $g(x, y)=XY$ are onto but not one-one.	CO1	7 Marks
	b)	Define Lattice. List all its properties.	CO1	7 Marks

(OR)

4	a)	Show that a relation R defined on the set of real numbers as (a, b) R (c, d) if $a^2 + b^2 = c^2 + d^2$. Show that R is an equivalence relation.	CO1	7 Marks
	b)	What do mean by Hasse diagram. Illustrate it with an example.	CO1	7 Marks

UNIT-III

5	a)	Distinguish between semi group and subgroup with example.	CO2	7 Marks
	b)	Demonstrate Lagrange's theorem with an example.	CO1	7 Marks

(OR)

6	a)	Define a group. Let S = {0, 1, 2, 3, 4, 5, 6, 7} and * denote "multiplication modulo 8 i.e. x mod y, y mod 8 .	CO1	7 Marks
	b)	Show that the additive group Z_4 is isomorphic to the multiplicative groups of non zero element of Z_5.	CO2	7 Marks

UNIT-IV

7	a)	Determine the generating function of the following numeric function. $a_n = 2^n$, if n is even $= -2^n$, if n is odd	CO4	7 Marks
	b)	Solve $a_n - 2\,a_{n-1} - 3\,a_{n-2} = 0$, n$\in$ N, with initial conditions $a_0 = 3$, $a_1 = 1$.	CO3	7 Marks

(OR)

8	a)	Find the number of ways that 9 students can be seated in the room so that there is at least one student in each of the five rows.	CO1	7 Marks
	b)	Solve $a_{n+2} - 2\,a_{n+1} + a_n = 2^n$ with initial conditions $a_0 = 2$, $a_1 = 1$.	CO3	4 Marks
	c)	Find the recurrence relation with initial condition for the following: 2, 10, 50, 250, …….	CO1	3 Marks

UNIT-V

9	a)	Prove that the chromatic number of a tree is always 2 and chromatic polynomial is $\lambda(\lambda-1)^{n-1}$.	CO4	7 Marks
	b)	What do you mean by graph isomorphism, show it by an example.	CO1	7 Marks

(OR)

10	a)	Prove these are equivalent. i) A graph G is 2-colorable. ii) G is bipartite.	CO4	7 Marks
	b)	Prove that if the graph has **n** vertices and vertex '**u**' is connected to vertex '**w**' then there exist a path from **u** to **w** of length no more than **n**.	CO4	7 Marks

OPERATING SYSTEMS

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain process states with state transition diagram.	CO1	7 Marks
	b)	With a neat sketch, explain about Process Control Block (PCB).	CO1	7 Marks
		(OR)		
2	a)	Define an operating system. What is system's viewpoint of an operating system?	CO1	7 Marks
	b)	Explain the dual mode operation of an operating system.	CO1	7 Marks

UNIT-II

3		Consider a system containing m resources of the same type being shared by n processes. Resources can be requested and released by processes only one at a time. Show that the system is deadlock free if the following two conditions hold: i) The maximum need of each process is between 1 and *m* resources ii) The sum of all maximum needs is less than *m* * *n*.	CO3	14 Marks
		(OR)		
4	a)	What do you mean by a binary semaphore and counting semaphore?	CO2	7 Marks
	b)	Explain the implementation of wait( ) and signal( ) semaphore operations.	CO2	7 Marks

UNIT-III

5	a)	Distinguish between page table and inverted page table with appropriate examples.	CO2	7 Marks
	b)	Explain the benefits of a virtual memory system.	CO2	7 Marks
		(OR)		
6	a)	For the following page reference calculate the page faults that occur using LFU and MFU for 3 and 4 page frames respectively 0, 4, 3, 2, 4, 0, 3, 5, 1, 3, 2, 1, 5.	CO2	7 Marks
	b)	What are the contents of a page table? Explain how a page table relates pages and frames.	CO2	7 Marks

UNIT-IV

7	a)	Discuss the most common schemes for defining the logical structure of a directory.	CO2	7 Marks
	b)	Explain about tertiary storage structure.	CO2	7 Marks
		(OR)		
8	a)	List the various layers of a file system.	CO1	7 Marks
	b)	What are the various disk scheduling algorithms? Explain any two of the disk scheduling algorithms.	CO1	7 Marks

UNIT-V

9	a)	Was the lifecycle of an I/O request does not require many CPU cycles? Justify.	CO5	7 Marks
	b)	Explain about revocation of access rights.	CO5	7 Marks
		(OR)		
10	a)	Explain about Transforming I/O Requests to Hardware Operations.	CO5	7 Marks
	b)	Explain the need of I/O protection.	CO5	7 Marks

LINUX PROGRAMMING
[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Write a linux program to display environment variable.	CO3	7 Marks
	b)	Compare getopt and getopt-long system calls.	CO2	7 Marks
		(OR)		
2	a)	Construct a program to access environment variables using putenv and getenv function.	CO3	7 Marks
	b)	Explain how linux operating system provides more security than any other.	CO1	7 Marks
		UNIT-II		
3	a)	Explain control structures of shell programming with suitable examples.	CO1	10 Marks
	b)	Write short notes on shell script arguments.	CO3	4 Marks
		(OR)		
4	a)	Illustrate with example the process of creation and execution of shell script.	CO5	7 Marks
	b)	Write a short note on **I/O Redirection** operators.	CO3	7 Marks
		UNIT-III		
5	a)	Write a shell program the first 128 bytes of the standard input to standard output.	CO3	7 Marks
	b)	Differentiate the system calls unlink, link and symlink.	CO2	7 Marks
		(OR)		
6	a)	Write a shell program to copy the contents from one file to another file character by character.	CO3	6 Marks
	b)	Discuss the system calls: i) chmod. ii) chown. iii) mkdir and rmdir. iv) chdir and getcwd.	CO1	8 Marks
		UNIT-IV		
7	a)	Discuss wait and sleep command with example.	CO1	7 Marks
	b)	Illustrate the need for sigaction function. Give example.	CO5	7 Marks
		(OR)		
8	a)	Discuss the advantages and drawbacks of using threads.	CO1	4 Marks
	b)	Develop linux based application using threads.	CO6	10 Marks
		UNIT-V		
9	a)	Define pipe and specify the usage of popen and pclose commands.	CO1	7 Marks
	b)	Develop a program that sends output to an external program.	CO3	7 Marks
		(OR)		
10	a)	Design a program that reads all the data from pipe.	CO4	4 Marks
	b)	Illustrate with example the usage of pipes across fork.	CO5	10 Marks

NUMERICAL METHODS, PROBABILITY AND STATISTICS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) Find the positive root of the equation $2x - \log_{10} x = 7$, by Regula-Falsi method. — 6 Marks L3 CO1 PO1

   b) Find the root of the equation x sin **x + cos x = 0** using Newton-Raphson method. — 6 Marks L3 CO1 PO2

(OR)

2. a) Apply Newton's forward formula, find the value of $f(1.6)$, if — 6 Marks L3 CO1 PO2

x	1	1.4	1.8	2.2
f(x)	3.49	4.82	5.96	6.5

   b) Apply Lagrange's interpolation formula to find the value of y when x = 9, if the following values of x and y are given: — 6 Marks L3 CO1 PO1

x	5	7	11	13	17
y	150	392	1452	2366	5202

UNIT-II

3. a) Find the first and second derivatives at $x = 1.1$ if — 6 Marks L1 CO1 PO2

x	1.0	1.2	1.4	1.6	1.8	2.0
f(x)	0	0.128	0.544	1.296	2.432	4.000

   b) Evaluate $\int_0^6 \frac{1}{1+x^2}\,dx$ by using Simpson's $\frac{3}{8}$ rule. — 6 Marks L3 CO1 PO1

(OR)

4. a) Apply the Taylor's series method, solve $\frac{dy}{dx} = x - y^2,\ y(0) = 1\ at\ x = 0.1\ and\ x = 0.2$. — 6 Marks L3 CO1 PO1

   b) Apply the fourth order R-K method, solve $\frac{dy}{dx} = xy,\ y(0) = 1\ at\ x = 0.2\ (take\ h = 0.2)$. — 6 Marks L3 CO1 PO1

UNIT-III

5. a) For the discrete probability distribution — 6 Marks L1 CO2 PO2

x	**0**	**1**	**2**	**3**	**4**	**5**	**6**
P(x)	**0**	**2k**	**2k**	**3k**	**k^2**	**$2k^2$**	**$7k^2+k$**

Find the value of k, mean and variance.

   b) Suppose a continuous random variable X has the probability density function $f(x) = \begin{cases} k(1 - x^2), when\ 0 < x < 1 \\ 0,\ else\ where \end{cases}$ then find the value of k, mean and variance of the distribution. — 6 Marks L2 CO2 PO1

(OR)

6.	a)	The discrete random variable denotes the number of heads in a single toss of 3 fair coins. Determine $P(x < 3)$ and $P(1 < x < 3)$.	6 Marks	L1	CO2	PO1
	b)	Find the constant k such that $f(x) = \begin{cases} kx^2, when\ 0 \le x \le 3 \\ 0, \ else\ where \end{cases}$ is a probability function and find $P(1 \le x \le 2)$.	6 Marks	L2	CO2	PO1

UNIT-IV

7.	a)	30% of the items from a factory are defective. Find the probability that in a sample of 8 chosen at random. i) one is defective. ii) at least five are defective.	6 Marks	L1	CO2	PO2
	b)	A certain area of the eastern United States is, on average, hit by 6 hurricanes a year. Find the probability that in a given year that area will be hit by fewer than 4 hurricanes and anywhere from 6 to 8 hurricanes.	6 Marks	L2	CO2	PO1

(OR)

8.	a)	In a Photographic process, the time to process 8 X 10 prints from a memory card may be looked upon as a random variable having the normal distribution with a mean of 10.28 seconds and a standard deviation of 0.12 second. Find the probability that it will take: i) Anywhere from 10.00 to 10.50 seconds to process one of the prints, ii) At least 10.20 seconds to process one of the prints.	6 Marks	L3	CO2	PO2
	b)	Suppose that a study of a certain computer system reveals that the response time, in seconds, has an exponential distribution with a mean of 3 seconds. i) What is the probability that response time exceeds 5 seconds? ii) What is the probability that response time is less than 10 seconds?	6 Marks	L2	CO2	PO1

UNIT-V

9.	a)	A sample of 400 items are taken from a population whose standard deviation is 10. The mean of the sample is 40. Test whether the sample has come from a population with mean 38. Also calculate 95% confidence interval for the population.	6 Marks	L3	CO2	PO4
	b)	In a big city 325 men out of 600 men were found to be smokers. Does this information support the conclusion that the majority of men in this city are smokers?	6 Marks	L3	CO2	PO4

(OR)

10.	a)	A random sample of six steel beams has a compressive strength of 58,392 p.s.i (pounds per square inch) with a standard deviation of 648 p.s.i. Use this information and the level of significance 0.05 to test whether the true average compressive strength of the steel from which this sample came is 58,000 p.s.i. Assume normality.	6 Marks	L3	CO2	PO4
	b)	1000 students at college level were graded according to their I.Q and the economic conditions of their home. Use Chi-square test to find out whether there is any association between condition at home and I.Q at 0.05 level of significance.	6 Marks	L3	CO2	PO4

Economic condition	High	Low
Rich	460	140
Poor	240	160

SPECIAL FUNCTIONS AND COMPLEX ANALYSIS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define gamma function and express $\int_0^\infty x^{p-1}\ e^{-kx}\ dx\ (k>0)$ in terms of gamma function.	6 Marks	L1	CO1	PO1
	b)	Prove that $\beta\left(m,\frac{1}{2}\right) = 2^{2m-1}\beta\ (m,m)$.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Show that $\int_a^b (x-a)^{m-1}(b-x)^{n-1}\ dx = (b-a)^{m+n-1}\beta\ (m,n)$.	6 Marks	L2	CO1	PO1
	b)	Prove that $\int_0^1 x^3\left(1-\sqrt{x}\right)^5\ dx = 2\beta\ (8,6)$.	6 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Express $\mathbf{J_5(x)}$ in terms of $\mathbf{J_0(x)}$ and $\mathbf{J_1(x)}$.	6 Marks	L3	CO1	PO1
	b)	Show that $\mathbf{(n+1)\ P_{n+1}(x) = (2n+1)\ x\ P_n(x) - n\ P_{n-1}(x)}$.	6 Marks	L2	CO1	PO1
		(OR)				
4.	a)	Show that $J_{\frac{1}{2}}(x) = \sqrt{\frac{2}{\pi x}}\ \sin x$.	6 Marks	L2	CO2	PO2
	b)	Prove that $P_n\ (x) = \frac{1}{2^n\ n!}\ \frac{d^n}{dx^n}\left(x^2-1\right)^n$.	6 Marks	L2	CO1	PO1

UNIT-III

5.	a)	Define analytic function and construct the analytic function $f(z) = u + iv$ where $u = e^{x^2-y^2}\cos 2xy$.	6 Marks	L3	CO3	PO2
	b)	Discuss the transformation $W = \sqrt{z}$. Is it Conformal at the Origin?	6 Marks	L2	CO2	PO1
		(OR)				
6.	a)	Find the analytic function f(z) = u + iv if $2u + v = e^x\ (\cos y - \sin y)$.	6 Marks	L3	CO2	PO2
	b)	Find the bilinear transformation which maps the points **z = 1 , i , -1** on to the points **w = i , 0,-i.**	6 Marks	L2	CO2	PO2

UNIT-IV

7.		Write Cauchy's integral formula and evaluate $\int_C \frac{Sin^2 z}{\left(z-\frac{\pi}{6}\right)^3}\ dz$ where C is the Circle |z| = 1.	12 Marks	L2	CO2	PO2
		(OR)				

8.	a)	Evaluate f (2) and f (3) where $f(a) = \int_C \frac{2z^2 - z - 2}{z - a}\, dz$ and C is the Circle |z| = 2.5.	6 Marks	L3	CO2	PO2
	b)	Expand $f(z) = \frac{z-1}{z+1}$ in Taylor's series about the Point z =1 .	6 Marks	L2	CO2	PO1

UNIT-V

9.	a)	Write Residue theorem and evaluate $\int_C \frac{1-2z}{z(z-1)(z-2)}\, dz$ where C is the circle |z| =1.5 by Residue theorem.	6 Marks	L2	CO2	PO1
	b)	Evaluate $\int_0^\infty \frac{\cos ax}{x^2+1}\, dx$ by applying Calculus of Residues.	6 Marks	L3	CO2	PO2

(OR)

10.		By Integrating around a Unit circle, evaluate $\int_0^{2\pi} \frac{\cos 3\theta}{5 - 4\cos\theta}\, d\theta$.	12 Marks	L3	CO2	PO2

CODE No.:19BT10501 SVEC19 (RA)

PROGRAMMING FOR PROBLEM SOLVING

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Write a short notes on : i) Implicit line joining. ii) Explicit line joining.	6 Marks	L1	CO1	PO1
	b)	Define variable. Explain identifier rules.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Design an algorithm to print first N Fibonacci terms.	6 Marks	L3	CO1	PO2
	b)	Write a python script to perform swapping of two numbers without using third variable.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Read 10 students ages, count the number of students who are having eligibility to vote.	6 Marks	L3	CO2	PO2
	b)	Write a python script to convert given decimal number into Hexadecimal and binary format.	6 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Write the difference between break and continue statements with examples.	6 Marks	L2	CO1	PO1
	b)	Write a python program that takes an integer and forms a new integer which has the number of digits at the ten's place and the least significant digit in the one's place. For ex, 452 → 32.	6 Marks	L3	CO1	PO2

UNIT-III

5.	a)	Compose a python script to perform matrix multiplication.	6 Marks	L3	CO1	PO2
	b)	Write a python script to count the number of vowels, consonants and so on Expected Output: Enter a line of string: adfslkj34 34lkj34334lk Vowels: 1 Consonants: 11 Digits: 9 White spaces: 1	6 Marks	L3	CO1	PO3
		(OR)				
6.	a)	Define List. Explain different operations we can perform on the list with an example.	6 Marks	L2	CO1	PO1
	b)	Write a python script to implement Stack Operations.	6 Marks	L3	CO2	PO2

UNIT-IV

7.	a)	Illustrate following file handling functions with an example program. i) open( ) ii) read( ) iii) readline( ) iv) readlines( )	6 Marks	L2	CO2	PO1
	b)	Define scope and explain usage of global keyword.	6 Marks	L2	CO2	PO1
		(OR)				

8.	a)	Write a program to find factorial of given number using recursion.	6 Marks	L1	C02	PO2
	b)	Develop a python script to copy data from one file to other file.	6 Marks	L2	C01	PO3

UNIT-V

9.	a)	Create a data frame. It contains students' subject wise marks. Add a new column name called total marks for the existing frame.	6 Marks	L3	CO2	PO3
	b)	Illustrate different techniques included in accessing data from data frame.	6 Marks	L3	CO2	PO2

(OR)

10.	a)	Consider data frame contains student marks information. Write a python script to display student details whose marks <60.	6 Marks	L3	CO2	PO3
	b)	Write a python script to print information and frequency counts of a data set.	6 Marks	L3	CO2	PO2

CONSTRUCTION PLANNING AND PROJECT MANAGEMENT

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	List the classification of Stone Masonry.	6 Marks	L1	CO1	PO1
	b)	Explain about Random Rubble Masonry in detail.	6 Marks	L3	CO1	PO1 PO5
		(OR)				
2.	a)	Illustrate different types of spread footings.	6 Marks	L3	CO1	PO1 PO2
	b)	Define Arches. Write about different types of Arches.	6 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Briefly explain different types of paints used in building construction.	6 Marks	L3	CO2	PO1 PO5
	b)	What is termite proofing? Which substance is used as termite proofing?	6 Marks	L1	CO2	PO1
		(OR)				
4.	a)	Write about scaffoldings and list out different types of scaffolding.	6 Marks	L1	CO2	PO1
	b)	Discuss about the latest trends in construction equipment and list out reasons why selection of construction equipment is very important.	6 Marks	L3	CO2	PO1 PO5
		UNIT-III				
5.	a)	List out the factors must be considered for selection of construction equipment.	6 Marks	L2	CO3	PO1 PO6 PO8
	b)	Describe different types of Excavation equipment.	6 Marks	L2	CO3	PO1 PO2
		(OR)				
6.	a)	Explain about divisional organization structure in detail with an example structure.	6 Marks	L3	CO3	PO1 PO5
	b)	Write about the cost of owing the construction equipment and cost of operating the construction equipment.	6 Marks	L1	CO3	PO1
		UNIT-IV				
7.	a)	Explain about different network techniques in construction project management.	6 Marks	L3	CO4	PO1 PO5
	b)	What is a Work Breakdown Structure? How many types of Work Breakdown Structures are there?	6 Marks	L1	CO4	PO1
		(OR)				

8. a)

Time-Estimates (in weeks)			
Activity	**Preceding Activity**	**Most optimistic time (a)**	**Most likely time (m)**
A	None	2	4
B	None	10	12
C	A	8	9
D	A	10	15
E	A	7	7.5
F	B, C	9	9
G	D	3	3.5
H	E, F, G	5	5

8 Marks L5 CO4 PO1 PO2 PO5 PO11

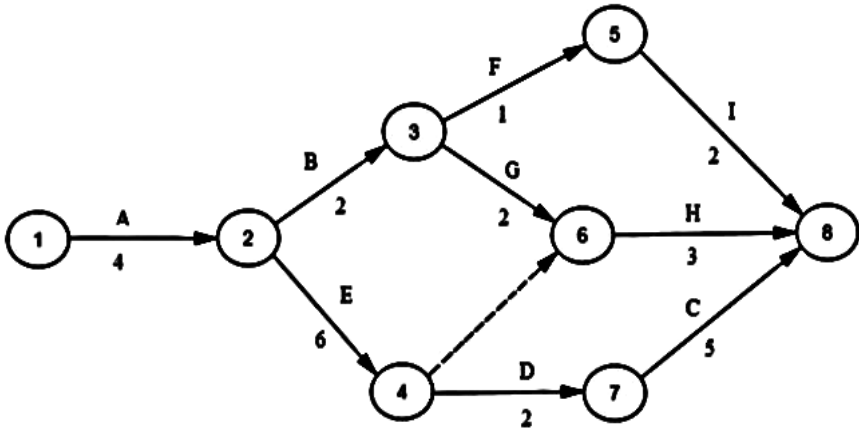
Draw the PERT network for the project.

b) Explain Bar charts or Gantt chart technique in project management. 4 Marks L3 CO4 PO1 PO5

UNIT-V

9. a) Differentiate CPM and PERT methods. 6 Marks L3 CO5 PO1 PO5

b) Determine the total float, free float for the following network diagram and find out the critical path. 6 Marks L5 CO5 PO1 PO2 PO5



(OR)

10. a) Define and formulate the EST, EFT, LST and LFT. 6 Marks L1 CO5 PO1

b) Determine the total float, free float for the following network diagram and find out the critical path. 6 Marks L5 CO5 PO1 PO5 PO11

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

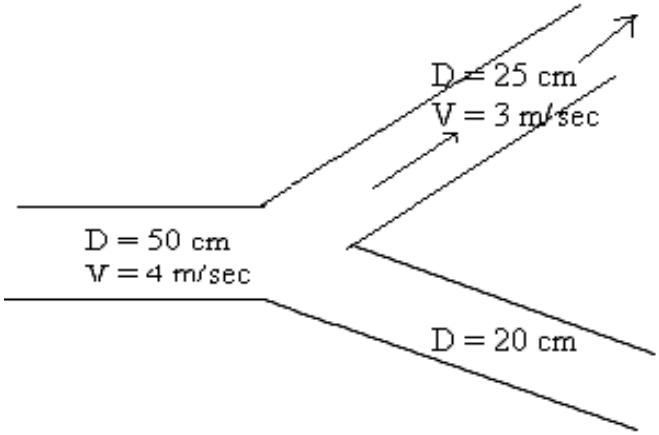
1.	a)	Determine the intensity of shear of an oil having viscosity = 1 poise. The oil is used for lubricating the clearance between a shaft diameter 10cm and its journal bearing. The clearance is 1.5mm and the shaft rotates at 150 r.p.m.	6 Marks	L4	CO1	PO1 PO4 PO5 PO10
	b)	Calculate the density, specific weight and weight of one litre of Petrol of specific gravity = 0.7.	6 Marks	L3	CO1	PO1 PO2 PO5 PO10

(OR)

2.	a)	A plate (2m x 2m), 0.25mm distant apart from a fixed plate moves at 40cm/s and requires a force of 1 N. Determine the dynamic viscosity of the fluid in between the plates.	6 Marks	L3	CO1	PO1 PO2 PO4 PO10
	b)	A Hydraulic press has a Ram of 30cm diameter and a Plunger of 4.5cm diameter. Find the weight lifted by the Hydraulic press when the force applied at the Plunger is 500 N.	6 Marks	L3	CO2	PO1 PO4 PO5 PO10

UNIT-II

3.	a)	A stream function is given by $\Psi = 5x - 6y$. Calculate the velocity components and also magnitude and direction of the resultant velocity at any point.	6 Marks	L3	CO2	PO1 PO2 PO4 PO10
	b)	A pipe 50cm in diameter branches into two pipes of diameters 25cm and 20cm respectively as shown in figure. If the average velocity in 50cm diameter pipe is 4m/sec, find (i) Discharge through 50cm diameter pipe and (ii) Velocity in 20cm diameter pipe if the average velocity in 25cm pipe is 3m/sec.	6 Marks	L3	CO3	PO1 PO4 PO5 PO10



(OR)

4.	a)	The velocity vector in a fluid flow is given $V = 4x^3\,\bar{i} - 10x^2 y\,\bar{j} + 2t\,\bar{k}$. Find the velocity and acceleration of a fluid particle at (2, 1, 3) at time t = 1.	6 Marks	L4	CO2	PO1 PO2 PO5 PO10
	b)	Derive Force exerted by a flowing fluid on a pipe-bend using Impulse- momentum equation.	6 Marks	L3	CO3	PO1 PO2
		UNIT-III				
5.	a)	In a 100mm diameter horizontal pipe a Venturimeter of 0.5 contraction ration has been fixed. The head of water on the Venturimeter when there is no flow is 3m (gauge). Find the rate of flow for which the throat pressure will be 2m of water absolute. Take C_d is 0.97 and atmospheric pressure head = 10.3m of water.	6 Marks	L4	CO3	PO1 PO4 PO5 PO10
	b)	A pitot-tube is inserted in a pipe of 300mm diameter. The static pressure in pipe is 100mm of mercury (vacuum). The stagnation pressure at the centre of the pipe, recorded by the Pitot tube is 0.981 N/cm^2. Calculate the rate of flow of water through pipe, if the mean velocity of flow is 0.85 times the central velocity. Take C_v - 0.98.	6 Marks	L4	CO3	PO1 PO2 PO5 PO10
		(OR)				
6.	a)	A rectangular notch 400mm long is used for measuring a discharge of 30 lit/sec. An error of 1.5mm was made, while measuring the head over the notch. Calculate the percentage error in the discharge assuming co-coefficient of discharge as 0.60.	6 Marks	L4	CO4	PO1 PO2 PO4 PO10
	b)	Water flows through a 100mm diameter pipe with a velocity of 0.015m/sec. If the kinematic viscosity of water is 1.13×10^{-6} m^2/sec, find the friction factor of the pipe material.	6 Marks	L4	CO4	PO1 PO2 PO5 PO10
		UNIT-IV				
7.	a)	Describe Reynold's experiment and mention features of Laminar flow.	6 Marks	L2	CO5	PO1 PO2
	b)	Calculate the pressure gradient along flow, average velocity and discharge of an oil of viscosity 0.02Ns/m^2 flowing between two stationary parallel plates 1m wide maintained 10 mm apart. The velocity midway between the plates is 3m/sec.	6 Marks	L4	CO5	PO1 PO2 PO4 PO5 PO10
		(OR)				
8.	a)	Derive an expression for Hagen Poiseuille formula.	6 Marks	L3	CO5	PO1 PO2
	b)	A Crude Oil of viscosity 0.97 poise and relative density 0.9 is flowing through a horizontal circular pipe of diameter 100mm and of length 10m. Calculate the difference of pressure at the two ends of the pipe, if 100 kg of oil is collected in a tank in 30 seconds.	6 Marks	L4	CO5	PO1 PO2 PO4 PO5 PO10

UNIT-V

9.	a)	A model of 1.0m wide and 5.5m long rectangular weir is to be built over a river. The average depth of water in the river is 4m. The model which has a scale ratio of 1:36 was tested for velocity of flow of 0.5m/s in the laboratory. It was found that the force acting on the model was 2.5N and the height of the standing wave was 40mm. Determine prototype of corresponding speed and force acting.	6 Marks	L4	CO6	PO1 PO2 PO4 PO10
	b)	A 1.0m log model of a ship is towed at a speed of 81cm/s in a towing tank 64m long does this correspond to find out the speed of the ship.	6 Marks	L4	CO6	PO1 PO2 PO5 PO10
		(OR)				
10.		The resisting force of a supersonic plane during flight can be considered as dependent on the length of the aircraft L, velocity V, viscosity μ, mass density ρ, bulk modulus K. Express the fundamental relationship between resisting force and these variables.	12 Marks	L4	CO6	PO1 PO2 PO4 PO5 PO10

MECHANICS OF SOLIDS

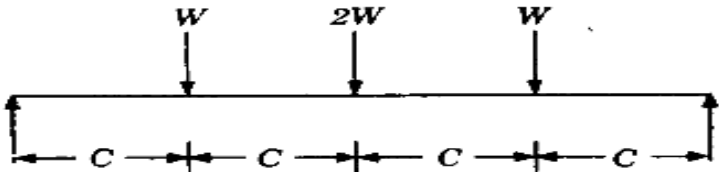
[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

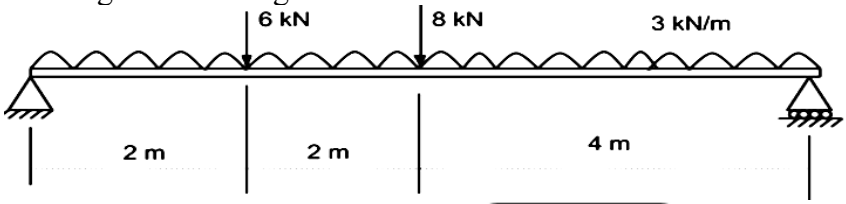
UNIT-I

1.	a)	Analyze a simply supported beam with uniformly varying load with maximum intensity at the mid span, draw the Shear force and Bending moment diagrams and also find the maximum Bending moment.	5 Marks	L4	CO1	PO1 PO2 PO5
	b)	i) Differentiate the following types of supports and draw the diagrams along with the un-known reactions at each support. A) Hinge support. B) Roller support. C) Fixed support.	7 Marks	L4	CO1	PO1 PO2 PO4 PO5
		ii) A simply supported beam is loaded as shown in the below figure. Analyze the beam and find the maximum shear force in the beam.				



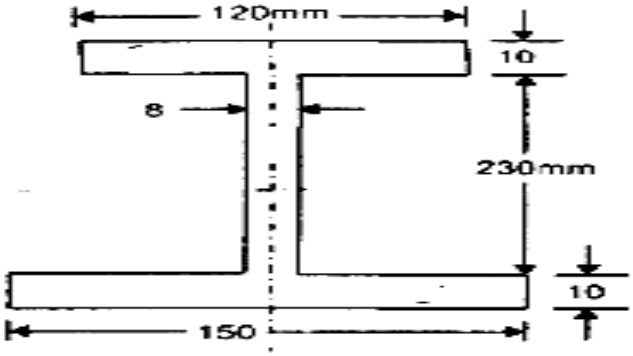
(OR)

2.	a)	A cantilever beam 5m long carries concentrated loads of 30kN, 40kN and 50 KN at distances of 1.5m, 3m and 4.5m from the fixed end. In addition to this the beam carries a uniformly distributed load of 10kN/m over the entire length of the beam. Analyze the beam and draw the Shear Force diagram and Bending moment diagram.	6 Marks	L4	CO1	PO1 PO2 PO5
	b)	Analyze the given beam and draw the Shear Force diagram and Bending moment diagram for the beam shown below .	6 Marks	L4	CO1	PO1 PO2 PO5



UNIT-II

3.		The cross-section of an I-beam is shown in the figure. The Shear force at the section is 50kN. Analyze the beam and calculate Shear stress distribution diagram. All dimensions are in 'mm'.	12 Marks	L4	CO1	PO1 PO2 PO4 PO5



(OR)

4.	a)	Determine the ratio of the maximum shear stress to the average shear stress of a rectangular section having width "b" and depth "d".	6 Marks	L4	CO2	PO1 PO2 PO4
	b)	A laminated wood beam 10cm wide and 15cm deep is made up of three 5cm x 10cm wide planks glued together to resist longitudinal shear. The beam is simply supported over a span of 2m. If the allowable shearing stress in the glued joint is 0.45MN/m^2, find the safe concentrated load that the beam may carry at its centre.	6 Marks	L5	CO2	PO1 PO2 PO4 PO6 PO10

UNIT-III

5.	a)	Derive torsional equation for a circular shaft with neat sketch.	6 Marks	L4	CO3	PO1 PO2 PO4
	b)	A steel shaft 'A' of diameter 'd' and length 'l' is subjected to a torque 'T' Another shaft 'B' made of aluminium of the same diameter 'd' and length 0.5l is also subjected to the same torque 'T'. The shear modulus of steel is 2.5 times the shear modulus of aluminium. The shear stress in the steel shaft is 100MPa. Find the shear stress in the aluminium shaft.	6 Marks	L4	CO3	PO1 PO2 PO4 PO5

(OR)

6.		A closed coil helical spring has mean diameter of 75mm and spring constant of 90kN/m. The spring consists of 8 coils. Determine the suitable diameter of spring wire if maximum shear stress is not exceeded 250MN/m^2. Modulus of rigidity of the spring wire material is 80GN/m^2. What is the maximum axial load the spring can carry?	12 Marks	L4	CO3	PO1 PO2 PO5 PO10

UNIT-IV

7.	a)	State of stress at a point in a material is as shown in the figure. Determine: i) Principal stresses. ii) Maximum shear stress. iii) Plane of maximum shear stress. iv) The resultant stress on the plane of maximum shear stress.  	6 Marks	L4	CO4	PO1 PO2 PO5 PO10
	b)	Discuss briefly the equations for normal stresses, max shear stress for a Bi-axial stress acting on an inclined plane of a 2D block element.	6 Marks	L4	CO4	PO1 PO2 PO5 PO10

(OR)

8.	a)	Explain briefly Maximum Principal Strain theory	6 Marks	L4	CO5	PO1 PO2 PO3 PO10
	b)	At a point in a stressed material, the three principal stresses are 90N/mm^2 (tensile), 60N/mm^2 (tensile) and 30N/mm^2 (compressive). Find the factor of safety if the yield stress is 230N/mm^2 and $\nu = 0.3$ by the principal stress, shear stress and principal strain theories.	6 Marks	L4	CO5	PO1 PO2 PO3
		UNIT-V				
9.	a)	Define Eccentrically loaded columns and also define core/kern of a column.	6 Marks	L4	CO6	PO1 PO2 PO5
	b)	Derive the expression for crippling load of a column when both the ends of the column are hinged.	6 Marks	L4	CO6	PO1 PO2 PO5
		(OR)				
10.	a)	Compare the ratio of the strength of a solid steel column to that of a hollow of the same cross section areas. Assume the internal diameter of the hollow column to be three-fourths of the external diameter. Both the columns have the same length and are pinned at the ends.	6 Marks	L4	CO6	PO1 PO2 PO3 PO10
	b)	A column is of rectangular shape of size 300mm x 200mm carries Compressive load of 25kN. Factor of safety is 3 and E = 2.1 x 10^{5}N/mm^2. Determine the length of the column whose one end is hinged and the other end is free.	6 Marks	L4	CO6	PO1 PO2 PO3 PO10

SURVEYING
[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What are the sources of error in chaining? What precautions would you take to guard against them?	5 Marks	L4	CO1	PO1 PO2 PO5
	b)	Below are the bearings observed in a traverse survey conducted with a prismatic compass at a place where local attraction was suspected.	7 Marks	L4	CO1	PO1 PO2 PO4 PO5

Line	F.B	B.B
AB	$191^0 45^1$	$13^0 0^1$
BC	$39^0 30^1$	$222^0 30^1$
CD	$22^0 15^1$	$200^0 30^1$
DE	$242^0 45^1$	$62^0 45^1$
EA	$330^0 15^1$	$147^0 45^1$

At what stations do you suspect local attraction? Find the corrected bearings of the lines and also calculate the included angles.

(OR)

2.	a)	Discuss in detail about two methods of ranging.	7 Marks	L4	CO1	PO1 PO2 PO5
	b)	Discuss how you would overcome the chaining problem if there are obstacles on the chain line. Assuming that: i) Chaining around the obstacle is possible. ii) Chaining around the obstacle is not possible.	5 Marks	L4	CO1	PO1 PO2 PO5

UNIT-II

3.	a)	The following consecutive readings were taken with a dumpy level, the instrument having been moved after the second, fourth and eighth readings: 0.875, 1.235, 2.310, 1.385, 2.930, 3.125, 4.125, 0.210, 1.875, 2.030, 3.765 The first reading was taken with the staff held upon a benchmark of elevation 132.135. Tabulate the page of field book and calculate the levels of the points	7 Marks	L4	CO2	PO1 PO2 PO4
	b)	Describe about the uses of contours with the help of neat sketches.	5 Marks	L4	CO2	PO1 PO2 PO4

(OR)

4.	a)	Discuss about the characteristics of contours with the help of neat sketches.	6 Marks	L4	CO2	PO1 PO2 PO4
	b)	Explain about any two methods of contouring with sketches.	6 Marks	L4	CO2	PO1 PO2 PO4

UNIT-III

5.	a)	Demonstrate the procedure of measuring horizontal angle by repetition method.	6 Marks	L4	CO3	PO1 PO2 PO4
	b)	The constant for an instrument is 1200 and the value of additive constant is 0.4 meters. Calculate the distance from the instrument to the staff when the micrometer readings are 6.362 and 6.458 the staff intercept is 2.5m and the line of sight is inclined at $+6^{0}30'$, the staff being held vertically.	6 Marks	L4	CO3	PO1 PO2 PO4 PO5
		(OR)				
6.	a)	Explain the principle of tangential method of tachometric survey.	6 Marks	L4	CO3	PO1 PO2 PO5 PO10
	b)	Draw a neat sketch of a vernier theodolite and explain the functions of the various parts.	6 Marks	L4	CO3	PO1 PO2 PO4

UNIT-IV

7.	a)	The following perpendicular offsets were taken at 10m intervals from a survey line to an irregular boundary line. 2.30, 3.75, 4.50, 6.75, 5.25, 7.30, 8.95, 8.25, 5.55m. Calculate the area included between the survey line, the irregular boundary line and the first and last offsets by: i) Average-ordinate rule. ii) Trapezoidal rule.	6 Marks	L4	CO4	PO1 PO2 PO5 PO10
	b)	A railway embankment 500m long is 9m wide at the formation level and has the side slope 2 to 1. The ground levels at every 100m along the centre line are as under.	6 Marks	L4	CO4	PO1 PO2 PO5 PO10

Chainage in meters	0	100	200	300	400	500
Level in meters	107.8	106.3	110.5	111.0	110.7	112.2

The formation level at zero chainage is 110.5m and the embankment has a rising gradient of 1.2m in 100. The ground is level across the centre line. Calculate the Volume of earthwork
i) Trapezoidal rule. ii) Prismoidal formula.

(OR)

8.		Explain in detail about any two methods of setting of simple curves with sketches.	12 Marks	L4	CO5	PO1 PO2 PO5

UNIT-V

9.	a)	What are the precautions to be considered while using a total station?	6 Marks	L4	CO6	PO1 PO2 PO5
	b)	Write a note on interior drone surveying and exterior drone surveying.	6 Marks	L4	CO6	PO1 PO2 PO5
		(OR)				
10.	a)	Discuss about the good practices in using total station.	6 Marks	L4	CO6	PO1 PO2 PO5
	b)	Explain the principles of EDM with an example.	6 Marks	L4	CO6	PO1 PO2 PO5

CODE No.: 19BT30201 SVEC-19

ELECTRICAL MACHINES-I

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the constructional features of a DC machine with the help of neat sketch.	6 Marks	L1	CO1	PO1
	b)	An 8 pole, DC shunt generator with 770 wave connected armature conductors and running at 500 r.p.m supplied a load of 12.5Ω resistance at a terminal voltage of 250V. Armature resistance is 0.24Ω and field resistance is 250Ω. Find armature current and induced EMF. Also find the flux per pole.	6 Marks	L3	CO1	PO4
		(OR)				
2.	a)	Derive the EMF equation of a DC generator.	6 Marks	L2	CO1	PO1
	b)	A compound generator delivers a load current of 50A at 500V. The resistances are R_a=0.05Ω, R_{se}= 0.064Ω and R_{ah}= 250Ω. The brush contact drop is 1 volt/brush. Find the induced EMF and Armature current when the machine connected as: i) long shunt. ii) short shunt.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	What is armature reaction? Describe the effects of armature reaction on the operation of DC machine and how the armature reaction is minimized.	6 Marks	L4	CO1	PO1
	b)	A 4 pole lap wound generator having 480 armature conductors. Supplies a current of 150A. If the brushes are given a lead of 10^0. Calculate demagnetizing amperes turns/pole and cross magnetising ampere turns/pole.	6 Marks	L3	CO1	PO1
		(OR)				
4.	a)	What is commutation? Explain the methods of improving commutation.	6 Marks	L4	CO1	PO3
	b)	What are the conditions for voltage build up of a dc shunt generator?	6 Marks	L2	CO2	PO2

UNIT-III

5.	a)	Explain the Speed-Current, Torque-Current and Speed-Torque characteristics of a DC shunt and series motors.	6 Marks	L1	CO3	PO3
	b)	A 250V shunt motor has an R_a =0.2 Ω and R_{sh} = 250 Ω. The motor draws 25A runs at 1000 r.p.m. Calculate the speed when the line current is 50A, if armature reaction weakens the field by 3%. Determine the torque in both cases.	6 Marks	L3	CO3	PO2
		(OR)				
6.	a)	Derive torque equation of a DC motor from first principles.	6 Marks	L1	CO3	PO1
	b)	A 4 pole series motor has 944 wave connected armature conductors. At a certain load flux per pole is 34.6mwb and the total mechanical torque developed is 209N-m. Calculate the line current taken by the motor and speed at which it will run with an applied voltage of 500V. Total armature resistance is 3Ω.	6 Marks	L3	CO3	PO2

UNIT-IV

7.	a)	Draw the phasor diagram of loads for single phase transformer.	6 Marks	L2	CO4	PO2
	b)	Derive the EMF equation of a single phase transformer.	6 Marks	L1	CO4	PO1

(OR)

8.	a)	Explain clearly how to perform the OC test on single phase transformer. Write the formulae.	6 Marks	L3	CO4	PO4
	b)	A 15KVA, 2200/220V, 50Hz transformer gave the following results. OC test (L.V side): V =220V, I=2.742A, P=185W. SC test (H.V side): V =112V, I=6.3A, P=197W. Compute the efficiency at full load 0.8 p.f lead.	6 Marks	L3	CO4	PO2

UNIT-V

9.	a)	Give the merits and demerits of star delta connected three phase transformers. Explain the function.	6 Marks	L2	CO4	PO1
	b)	Explain about the Scott connection with neat sketch.	6 Marks	L3	CO4	PO2

(OR)

10.	a)	Give the merits and demerits of delta connected three phase transformers. Explain the function.	6 Marks	L2	CO4	PO1
	b)	Illustrate the various types of three phase transformers connections.	6 Marks	L1	CO4	PO1

ELECTROMAGNETIC FIELDS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	State and explain Gauss's law and derive point form of Gauss's law also calculate **E** due to infinite surface charge distribution	6 Marks	L2	CO1	PO2
	b)	A Uniform volume charge density of $80\mu C/m^3$ is present throughout the region 8mm < r < 10mm. Let $\rho_v = 0$ for 0 < r < 8mm. i) Find the total charge inside the spherical surface r = 10 mm. ii) Find D_r at r = 10mm.	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Derive an expression for Electric field intensity (**E**) due to infinite line charge distribution.	6 Marks	L2	CO1	PO1
	b)	Find electric field intensity at a point ($\mathbf{r}$, θ, ϕ), where r>>d, due to two pint charges Q and –Q are located at (0, d/2, 0) and (0, -d/2, 0).	6 Marks	L3	CO1	PO2
		UNIT-II				
3.	a)	Why are there no free charge in the interior or a good conductor under static condition? Explain.	5 Marks	L2	CO1	PO2
	b)	Assume that two homogeneous isotropic dielectric media with dielectric constants $\varepsilon_{r1} = 3$ and $\varepsilon_{r2} = 2$ are separated by the xy-plane. At a common point $\mathbf{E_1}=\mathbf{a_x}-5\mathbf{a_y}-4\mathbf{a_z}$. Find E_2, D_2, α_1 and α_2.	7 Marks	L3	CO1	PO2
		(OR)				
4.	a)	Write the capacitance formula for a parallel-plate capacitor of area S whose plates are separated by a medium of dielectric constant ε and thickness **d**.	6 Marks	L2	CO1	PO1
	b)	What are the boundary conditions for electrostatic fields at an interface between a conductor and a dielectric with permittivity ε.	6 Marks	L2	CO1	PO1
		UNIT-III				
5.	a)	An infinitely long straight, solid, nonmagnetic conductor with a circular cross section of radius **b** carries a steady current **I**. Determine the magnetic flux density both inside and outside the conductor.	6 Marks	L2	CO2	PO2
	b)	Which postulate of magnetostatics denies the existence of isolated magnetic charges? Explain.	6 Marks	L1	CO2	PO2
		(OR)				
6.	a)	Find the magnetic flux density at a point on the axis of a circular loop of radius **b** that carries a direct current **I**.	6 Marks	L2	CO2	PO2
	b)	A thin ring of radius 5cm is placed on plane z = 1cm so that its centre is at (0, 0, 1)cm. If the ring carries 50mA along $\mathbf{a_\phi}$, find **H** at (0, 0, -1)cm.	6 Marks	L2	CO2	PO2

UNIT-IV

7.	a)	A conducting filamentary triangle joins A (3, 1, 1), B (5, 4, 2) and C (1, 2, 4). The segment AB carries a current of 0.2 A in the $\mathbf{a_{AB}}$ direction. In the presence of magnetic field $B = 0.2a_x - 0.1a_y + 0.3a_z T$. i) i) Find the force on segment BC. ii) ii) Find the torque on the loop about an origin at A.	6 Marks	L2	CO2	PO2
	b)	Derive the expression for torque on a current loop placed in a magnetic field.	6 Marks	L2	CO2	PO2
		(OR)				
8.	a)	Write a short note on Scalar magnetic potential and its properties.	5 Marks	L2	CO2	PO2
	b)	A rectangular loop carrying current I_2 is placed parallel to an infinitely long filamentary wire carrying current I_1 as shown below. Show that the force experienced by the loop is given by $F = -\frac{\mu_0 I_1 I_2 b}{2\pi}\left[\frac{1}{\rho_0} - \frac{1}{\rho_0 + a}\right] a_\rho N$	7 Marks	L2	CO2	PO4

UNIT-V

9.	a)	State and explain Maxwell's equations in differential and integral form for time varying fields.	6 Marks	L2	CO3	PO2
	b)	State and explain poynting theorem.	6 Marks	L2	CO3	PO2
		(OR)				
10.	a)	In free space $E = 20\cos(\omega t - 50_x)a_y V/m$, find i) J_d ii) H iii) ω	6 Marks	L2	CO3	PO4
	b)	State and explain faraday's laws of electromagnetic induction.	6 Marks	L2	CO3	PO2

CODE No.: 19BT30203 SVEC-19

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

II B.Tech I Semester (SVEC-19) Regular Examinations February – 2021

SIGNALS AND NETWORKS

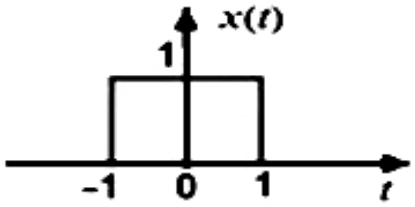
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Illustrate whether the following signals are periodic or aperiodic. If the signal is periodic find its fundamental period. i) $x(n) = 3\cos(10n + \pi/6)$ ii) $x(n) = e^{(j\pi n/2)}$	6 Marks	L3	CO1	PO2
	b)	Consider the following signal and sketch for the given $x(-2t+1)$.	6 Marks	L3	CO1	PO2

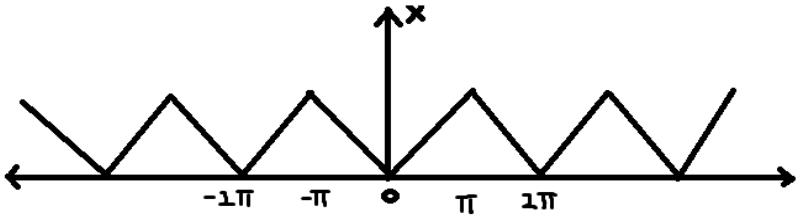


(OR)

2.	a)	Distinguish between Energy and Power signals.	4 Marks	L2	CO1	PO1
	b)	Determine and sketch $y(t) = x(t) + x(2-t)$ where $x(t) = u(t+2) - u(t-1)$. Express *y(t)* in terms of step functions.	8 Marks	L3	CO1	PO2

UNIT-II

3.	a)	State any four properties of fourier series .	4 Marks	L1	CO2	PO1
	b)	Find the fourier series expansion for the waveform shown in figure.	8 Marks	L3	CO2	PO2



The waveform is $x(t) = \begin{cases} -\frac{At}{\pi} & for\ -\pi \le t \le 0 \\ \frac{At}{\pi} & for\ 0 \le t \le \pi \end{cases}$

(OR)

4.	a)	Check the following signals $\cos n\omega_0 t$ *and* $\cos m\omega_0 t$ are Orthogonal or not.	4 Marks	L2	CO2	PO2
	b)	The given rectangular pulse is $x(t) = \begin{cases} 1, & \lvert t\rvert < T_1 \\ 0, & \lvert t\rvert < T_1 \end{cases}$. Find the fourier transform .	8 Marks	L3	CO2	PO2

UNIT-III

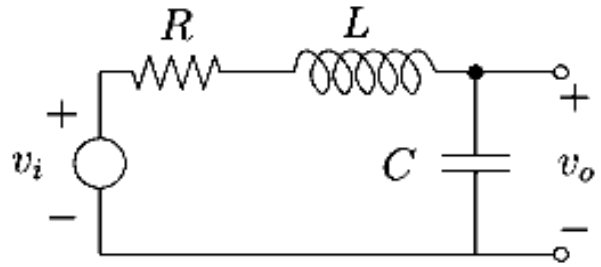
5.	a)	Find the Laplace transform and ROC of the signal $-e^{-at}u(-t)$.	6 Marks	L3	CO2	PO5
	b)	Find the inverse Laplace transform of the $X(s) = \frac{2s+1}{(s+1)(s^2+2s+2)}$.	6 Marks	L3	CO2	PO5

(OR)

6.	a)	Find the z- transform of $x[n] = (2)^n u[n] + \left(\frac{1}{3}\right)^{-n} u[-n]$.	6 Marks	L3	CO2	PO5
	b)	Determine the Inverse ZT, for the following ZT $X[z] = \frac{2-\frac{3}{2}z^{-1}}{1-\frac{3}{2}z^{-1}+\frac{1}{2}z^{-2}}$ *for ROC* $\lvert z\rvert > 1$.	6 Marks	L3	CO2	PO2

UNIT-IV

7.	a)	An electrical circuit shown below has $R = 1K\Omega$, $L = 1\mu H$, $C = 1\mu F$.	6 Marks	L3	CO3	PO2

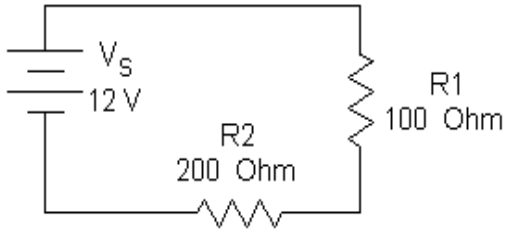


i) Find the system equation (ODE) which relates $v_i(t)$ *with* $v_0(t)$.
ii) Determine transfer function H(s).
iii) Draw magnitude response $\|H(j\omega)\|$.

	b)	A signal $v_i(t) = 10\cos(1000\pi t)$ *Volts* is applied to the circuit shown in 7(a). Comment whether the signal is passed or stopped by the circuit.	6 Marks	L3	CO3	PO5

(OR)

8.	a)	Differentiate RL and RC circuits	4 Marks	L2	CO3	PO1
	b)	For the electrical network shown below, answer the following	8 Marks	L3	CO3	PO2



i) Find the impulse response function for this network.
ii) Determine the frequency response function.
iii) Sketch the magnitude and the phase response.

Assume that the output is taken across the 100ohm resistor.

UNIT-V

9.	a)	For the given 2-port network, find the value of transfer impedance z_{21} in ohms	6 Marks	L3	CO4	PO2

	b)	Write short notes on Z,Y,T and h parameters.	6 Marks	L2	CO4	PO1

(OR)

10.	a)	Write short notes on Transfer function and Driving point function.	6 Marks	L3	CO4	PO2
	b)	Explain transmission (ABCD) parameters in detail.	6 Marks	L1	CO4	PO1

II B.Tech I Semester (SVEC-19) Regular Examinations February – 2021

ENGINEERING THERMODYNAMICS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What is meant by thermodynamic equilibrium? Explain the concept of macroscopic and microscopic view point as applied to study of thermodynamics.	6 Marks	L2	CO1	PO1
	b)	A gas undergoes a reversible non-flow process according to P = (-3V+15) where V is the volume in m^3 and P is the Pressure in bar. Determine the work done when the volume changes from 3 to 6 m^3.	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Show that internal energy is a property of the system.	6 Marks	L2	CO1	PO2
	b)	A steam turbine operates under steady flow conditions receiving steam at the following state: Pressure 15 bar, internal energy 2700 kJ/kg, specific volume 0.17 m^3/kg and velocity 100 m/s. The exhaust of steam from the turbine is at 0.1 bar with internal energy 2175 kJ/kg, specific volume 15 m^3/kg and velocity 300 m/s. The intake is 3 m above the exhaust. The turbine develops 35 kW and heat loss over the surface of turbine is 20 kJ/kg. Determine the steam flow rate through the turbine.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Explain Kelvin Planck and Clausius statements and their equivalence.	6 Marks	L1	CO1	PO1
	b)	A reversible heat engine operates between 875 K and 310 K and drives a reversible refrigerator operating between 310 K and 255 K. The engine receives 2000 kJ of heat and the net work output from the arrangement equals 350 kJ. Make calculations for the cooling effect.	6 Marks	L3	CO1	PO2
		(OR)				
4.	a)	What is Clausius inequality? Explain the entropy principle.	6 Marks	L2	CO1	PO1
	b)	A lump of steel of mass 8 kg at 1000 K is dropped in 80 kg of oil at 300 K. Make calculations for the entropy change of steel, the oil and the universe. Take specific heats of steel and oil as 0.5 kJ/kg.K and 3.5 kJ/kg.K respectively.	6 Marks	L3	CO1	PO2

UNIT-III

5.	a)	Define dryness fraction and explain the process of steam generation (change of phase of water) at constant pressure. Show the various stages on P-v and T-s diagrams.	6 Marks	L2	CO2	PO2
	b)	Wet steam at 20 bar pressure and 0.9 dryness fraction is heated reversibly at constant pressure to a temperature of 300^0C. Make calculations for the work done, heat supplied and changes in internal energy and entropy.	6 Marks	L3	CO2	PO2
		(OR)				

6.	a)	Derive the first and second Tds equations and set up the expression for the difference in heat capacities $\mathbf{c_p}$ and $\mathbf{c_v}$. State the significance of this expression.	12 Marks	L3	CO1	PO2
		UNIT-IV				
7.	a)	Define the characteristic gas constant. How does it differ from universal gas constant. Write units for these constants.	6Marks	L1	CO3	PO2
	b)	Explain Law of corresponding states and compressibility factor.	6 Marks	L2	CO3	PO2
		(OR)				
8.	a)	Derive expression for gas constant and molecular mass of the gas mixture.	6Marks	L2	CO3	PO1
	b)	Determine the gas constant, density and partial pressures of the components of a gas mixture consisting of 10 mass fractions of air and 1 mass fractions of lighting gas. Take density of lighting gas 0.5 kg/m^3 at 101325 N/m^2 pressure and 273 K temperature.	6Marks	L3	CO3	PO2
		UNIT-V				
9.	a)	Derive an expression for the thermal efficiency of Otto cycle with aid of P-v and T-s diagrams.	6 Marks	L3	CO4	PO2
	b)	The swept volume of a diesel engine working on dual cycle is 0.0053 m^3 and clearance volume is 0.00035 m^3. The maximum pressure is 65 bar. Fuel injection ends at 5 per cent of the stroke. The temperature and pressure at the start of the compression are 80^0C and 0.9 bar. Determine the air standard efficiency of the cycle. Take γ for air = 1.4.	6 Marks	L3	CO4	PO2
		(OR)				
10.	a)	Explain the working of stirling and ericsson cycles with the aid of P-v and T-s diagrams.	6 Marks	L3	CO4	PO2
	b)	In an air standard otto cycle engine, the temperature at the end of compression stroke is 650 K and the maximum cycle temperature is 2400 kJ/kg. If the engine delivers 700 kJ/kg of network, find the thermal efficiency and compression ratio of the engine.	6 Marks	L3	CO4	PO2

II B.Tech I Semester (SVEC-19) Regular Examinations February – 2021

KINEMATICS OF MACHINERY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

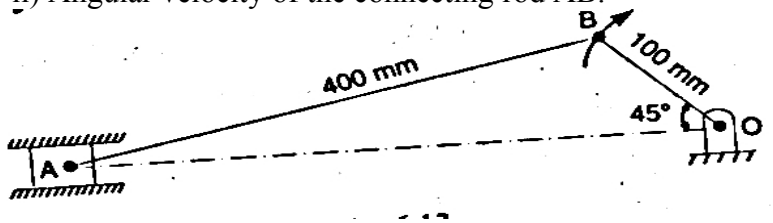
Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the different types of kinematic pairs with examples.	6 Marks	L2	CO1	PO1
	b)	Explain any two inversions of a single slider crank chain with neat sketch.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Define kinematic link. Describe types of links with example.	6 Marks	L2	CO1	PO1
	b)	Explain the terms: i) Degree of freedom. ii) Lower pair. iii) Higher pair.	6 Marks	L2	CO1	PO1
		UNIT-II				
3.		Describe the different approximate straight line motion mechanisms with the help of a neat sketch.	12 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Explain the Ackerman steering gear mechanism with neat sketch.	6 Marks	L2	CO3	PO1
	b)	Derive an expression for the ratio of angular velocities of the shafts of a Hooke's joint.	6 Marks	L3	CO3	PO1, PO2
		UNIT-III				
5.	a)	Derive an expression for the length of path of contact in a pair of meshed spur gears.	6 Marks	L4	CO4	PO1, PO2
	b)	A pinion having 30 teeth drives a gear having 80 teeth. The profile of the gear is Involute with 20^0 pressure angle, 12mm module and 10mm addendum. Find the length of path of contact, arc of contact and the contact ratio.	6 Marks	L4	CO4	PO1, PO2, PO3
		(OR)				
6.	a)	Explain the types of gear trains with neat sketch.	6 Marks	L2	CO4	PO1,
	b)	In an epicyclic gear train, an arm carries two gears A and B having 40 and 50 teeth respectively. If the arm rotates at 200 r.p.m. in the anticlockwise direction about the centre of the gear A which is fixed, determine the speed of gear B? If the gear A instead of being fixed, makes 400 r.p.m. in the clockwise direction, what will be the speed of gear B?	6 Marks	L4	CO4	PO1, PO2, PO3
		UNIT-IV				
7.		Draw the profile of a cam operating a knife-edged follower having a lift of 30mm. The follower moves outwards with SHM during 150^0 of cam rotation and followed by dwell for 60^0. The follower descends for the next 100^0 rotation of the cam with uniform velocity, again followed by a dwell period. The cam rotates at a uniform velocity of 120 r.p.m and has a least radius of 20mm. What will be the maximum velocity and acceleration of the follower during the outstroke and return stroke?	12 Marks	L3	CO5	PO1, PO2, PO3
		(OR)				

8.		A cam, with a minimum radius of 25mm, rotating clockwise at a uniform speed is to be designed to give a roller follower, at the end of a valve rod, motion described below : i) To raise the valve through 50mm during 120^0 rotation of the cam. ii) To keep the valve fully raised through next 30^0. iii) To lower the valve during next 60^0. iv) To keep the valve closed during rest of the revolution. The diameter of the roller is 20mm and the diameter of the cam shaft is 25mm. Draw the profile of the cam when line of the stroke is offset 15mm from the axis of the cam shaft. The displacement of the valve, while being raised and lowered, is to take place with simple harmonic motion. Determine the maximum velocity and acceleration of the valve rod when the cam shaft rotates at 100 r.p.m.	12 Marks	L3	CO5	PO1, PO2, PO3

UNIT-V

9.	a)	Explain the types of Instantaneous centres with neat sketch	6 Marks	L2	CO6	PO1,
	b)	Locate all the instantaneous centres of the slider crank mechanism as shown in fig. The lengths of crank OB and connecting rod AB are 100mm and 400mm respectively. If the crank rotates clockwise with an angular velocity of 15 rad/s, find: i) Velocity of the slider A ii) Angular velocity of the connecting rod AB.	6 Marks	L4	CO6	PO1, PO2, PO3



(OR)

10.		A mechanism of a crank and slotted lever quick return motion is shown in fig. If the crank rotates counter clockwise at 150 r.p.m, determine for the configuration shown, the velocity and acceleration of the ram D. Also determine the angular acceleration of the slotted lever. Crank AB = 150mm, Slotted arm OC = 700mm and link CD = 200mm.	12 Marks	L4	CO6	PO1, PO2, PO3

MANUFACTURING TECHNOLOGY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	List types of pattern allowances and explain any two allowances with neat sketches.	6 Marks	L1	CO1	PO1
	b)	Explore design of gating system with neat sketch.	6 Marks	L2	CO1	PO1 PO2 PO3
		(OR)				
2.	a)	Explain working of blast furnace with neat diagram.	8 Marks	L2	CO1	PO1
	b)	Define pattern and explain any two types of patterns with neat sketches.	4 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Explain the working principle of shell moulding with neat sketch.	6 Marks	L2	CO2	PO1
	b)	Discuss differences between cold die casting and hot die casting methods.	6 Marks	L1	CO2	PO1
		(OR)				
4.	a)	Elaborate the working of permanent mould casting with neat diagram.	6 Marks	L2	CO2	PO1
	b)	Write advantages, disadvantages and applications of centrifugal casting process.	6 Marks	L1	CO2	PO1
		UNIT-III				
5.	a)	Explain direct extrusion process with neat sketch.	6 Marks	L2	CO3	PO1
	b)	Explain working of electro hydraulic forming with neat sketch.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Discuss the working principle of wire drawing with neat sketch.	6 Marks	L2	CO3	PO1
	b)	Elaborate explosive forming working with neat sketch.	6 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Write difference between TIG and MIG welding processes.	6 Marks	L1	CO4	PO1
	b)	Elaborate the working of spot resistance welding process with neat sketch.	6 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Discuss working of laser beam welding process with neat sketch.	6 Marks	L2	CO4	PO1
	b)	Discuss destructive and non destructive testing of welds.	6 Marks	L1	CO4	PO1
		UNIT-V				
9.	a)	Explain working principle of blow moulding process with neat diagram.	6 Marks	L2	CO5	PO1
	b)	Write difference between thermoforming and thermosetting plastics.	6 Marks	L1	CO5	PO1
		(OR)				
10.	a)	List out various types of additives in plastics and write advantages and disadvantages of additives.	6 Marks	L1	CO5	PO1
	b)	Explain working of compression moulding process with neat diagram.	6 Marks	L2	CO5	PO1

STRENGTH OF MATERIALS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Draw and explain the stress-strain curve for a ductile material. How the curve is different for a brittle material?	6 Marks	L2	CO1	PO1 PO2 PO3 PO4
	b)	A solid uniform metal bar of diameter **D** and length **L** is hanging vertically from its upper end. Obtain the total elongation of the bar due to its own weight, if γ is the density and **E** is the Young's modulus of the material of the bar.	6 Marks	L3	CO1	PO1 PO2 PO3 PO4

(OR)

2.	a)	A steel rod ABCD **4.5m** long and **25mm** in diameter is subjected to the forces as shown in figure. If the value of the young's modulus for the steel is **200GPa**, determine its deformation. 	6 Marks	L4	CO1	PO1 PO2 PO3 PO4
	b)	A reinforced concrete column **300mm x 300mm** has four reinforcing bars of **20mm** diameter one in each corner. When the column is loaded with **600kN** weight, find the stresses developed in the concrete and steel. Take $\mathbf{E_s / E_c = 15.}$	6 Marks	L4	CO1	PO1 PO2 PO3 PO4

UNIT-II

3.	a)	Explain the important relations between loading, shear force and bending moment at a point or between two sections of a beam.	4 Marks	L2	CO2	PO1 PO2 PO3 PO4 PO6 PO7
	b)	A cantilever **1.5m** long is loaded with a uniformly distributed load of **2kN/m** and a point load of **3kN** as shown in figure. Draw the shear force and bending moment diagrams for the cantilever. 	8 Marks	L4	CO2	PO1 PO2 PO3 PO4 PO6 PO7

(OR)

4.	a)	A simply supported beam **AB**, **6m** long is loaded as shown in figure. Construct the shear force and bending moment diagrams for the beam and find the position and value of maximum bending moment. 	4 Marks	L4	CO2	PO1 PO2 PO3 PO4 PO6 PO7
	b)	Define shear force and bending moment in beams and explain the sign convention used.	8 Marks	L2	CO2	PO1 PO2 PO3 PO4 PO6 PO7

UNIT-III

5.	a)	List any **6** assumptions used in theory of bending.	4 Marks	L1	CO2	PO1 PO2 PO3 PO4 PO6 PO7
	b)	Determine the maximum uniformly distributed load, a simply supported **40cm** deep and **20cm** wide timber beam can carry over a span of **4m**. The maximum permissible bending stress for the timber is **2N/mm^2**.	8 Marks	L4	CO2	PO1 PO2 PO3 PO4 PO6 PO7

(OR)

6.	a)	Derive the bending equation and explain how to find the position of neutral axis.	6 Marks	L5	CO2	PO1 PO2 PO3 PO4 PO6 PO7
	b)	A hollow steel pipe is of **150mm** external diameter and **100mm** internal diameter. If the stresses in tension and compression do not exceed **150N/mm^2** then what longest length of it can be supported freely at its ends? Unit weight of steel is **78kN/m^3**.	6 Marks	L4	CO2	PO1 PO2 PO3 PO4 PO6 PO7

UNIT-IV

7.	a)	Obtain relation for the Moment of resistance by a circular shaft subjected to a torque **T**.	4 Marks	L3	CO3	PO1 PO2 PO3 PO4 PO6
	b)	A solid shaft of **10cm** diameter transmits **74kW** at **150 rev/min**. Calculate (i) the torque on the shaft, (ii) the maximum shear stress developed, (iii) the angle of twist in length of **1.50m** and (iv) the shear stress at a radius of **3cm**. Take **C = 8MN/cm^2**	8 Marks	L4	CO3	PO1 PO2 PO3 PO4 PO6

(OR)

8.	a)	A short cast iron column of cross sectional area **4cm^2** carries an axial compressive load of **250kN**. For a plane inclined at **60^0** with the direction of the load, calculate the normal, the tangential and the resultant stresses and also the maximum shear stress and the obliquity of the resultant stress.	8 Marks	L4	CO3	PO1 PO2 PO3 PO4 PO6
	b)	Explain in detail the method of finding principal stresses using Mohr's circle for biaxial stresses.	4 Marks	L3	CO3	PO1 PO2 PO3 PO4 PO6

UNIT-V

9.	a)	Obtain a relation between curvature, slope and deflection of a beam.	4 Marks	L2	CO4	PO1 PO2 PO3 PO4
	b)	A simply supported beam **AB** of span of **5m** is carrying a point load of **30kN** at a distance **3.75m** from the left end **A**. Calculate the slopes at **A** and **B** and deflection under the load. Take **EI = 26 x 10^{12} N-mm^2**	8 Marks	L4	CO4	PO1 PO2 PO3 PO4

(OR)

10.		A horizontal steel girder having uniform cross section is **14m** long and is simply supported at its ends. It carries two concentrated loads as shown in figure. Using Macaulay's method, calculate the deflections of the beam under the loads **C** and **D**. Take **E = 200, GPa** and **I = 160 x 10^6 mm^4**	12 Marks	L4	CO4	PO1 PO2 PO3 PO4

II B.Tech I Semester (SVEC-19) Regular Examinations February – 2021

ELECTROMAGNETIC FIELDS AND TRANSMISSION LINES

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Derive an expression for the continuity equation and explain its significance.	6 Marks	L1	CO1	PO1
	b)	Point charges of 30 nC each are located at A(2, 0, 0), B(-2, 0, 0), C(0, 2, 0) and D(0, -2, 0) in free space. Find the total force on the charge at A.	6 Marks	L3	CO1	PO1
		(OR)				
2.	a)	Determine magnetic field intensity about an infinitely long straight current carrying filament and also sketch the resulting magnetic flux lines.	6 Marks	L2	CO1	PO2
	b)	The point charge Q = 18 nC has a velocity of 5 x 10^6 m/s in the direction $0.6\hat{a}_x + 0.75\hat{a}_y + 0.3\hat{a}_z$. Calculate the force exerted on the charge by the field $\bar{B} = \left(-3\hat{a}_x + 4\hat{a}_y + 6\hat{a}_z\right) mT$.	6 Marks	L3	CO1	PO1

UNIT-II

3.	a)	State and prove Maxwell's four equations for time varying fields.	6 Marks	L1	CO2	PO2
	b)	In a medium of conduction current density given by $\mathbf{J} = 6\cos(\omega t - 10z)\ \mathbf{a}_y + \sin(\omega t - 10z)\ \mathbf{a}_z$ mA/m^2, find the volume charge density.	6 Marks	L3	CO2	PO1
		(OR)				
4.	a)	Determine the boundary conditions for electrostatic fields at a conductor – dielectric interface.	6 Marks	L1	CO2	PO2
	b)	Derive boundary conditions for magnetostatic fields.	6 Marks	L1	CO2	PO2

UNIT-III

5.	a)	Derive expression for resultant fields due to oblique incidence of an EM wave on a perfect conductor.	6 Marks	L1	CO3	PO2
	b)	If there is a magnetic field represented by $B = 2\sin(\omega t - \beta x)\ \mathbf{a}_x + 2y\cos(\omega t - \beta x)\ \mathbf{a}_y$ in a medium where ρ_v=0, σ=0, J=0, find the electric field. Assume ε_r = 1 and μ_r=1.	6 Marks	L4	CO3	PO2
		(OR)				
6.	a)	Show that the ratio of E and H in a uniform plane wave is approximately equal to 377Ω.	6 Marks	L1	CO3	PO2
	b)	Discuss in detail the various ways in which a plane wave can be polarized.	6 Marks	L2	CO3	PO2

UNIT-IV

7.	a)	Starting from the equivalent circuit, derive the transmission line equation for V and I in terms of the source parameters and prove that $Z_o^2 = Z_{sc}\, Z_{oc}$	6 Marks	L2	CO4	PO2
	b)	Find the input impedance of a 75Ω lossless transmission line of length 0.2λ, if it is terminated in a short circuit.	6 Marks	L3	CO4	PO2
		(OR)				

8.	a)	Derive an expression for the relation between reflection coefficient, load and characteristic impedance.	6 Marks	L1	CO4	PO2
	b)	A lossy line which has $R = 2.5\ \Omega$ /m, $L = 1.0$ mH/m, $C = 1$ pF/m, and $G = 0$ operates at $f = 1.5$ GHz. Find the attenuation constant of the line.	6 Marks	L3	CO4	PO1

UNIT-V

9.	a)	List out the various applications of a Smith chart.	6 Marks	L1	CO4	PO1
	b)	A lossless transmission line is terminated in a load impedance of $30 - j\ 25\Omega$. Find the phase constant and the reflection coefficient of a line of length 50m. Characteristic impedance $z_0 = 50\ \Omega$. Wavelength on the line = 0.40m.	6 Marks	L3	CO4	PO2

(OR)

10.	a)	Explain how single stub matching is carried out using a Smith chart.	6 Marks	L2	CO4	PO2
	b)	Find the input impedance of a 75Ω lossless transmission line of length 0.2λ. if it is terminated in an open circuit using Stub matching.	6 Marks	L4	CO4	PO3

ELECTRONIC DEVICES AND CIRCUITS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define the time constant τ of an RC high-pass filter. What is the physical significance of this parameter? When do we treat a transient to have reached its steady state value?	6 Marks	L1	CO1	PO1
	b)	Define rise time t_r of an RC low-pass filter and show that $t_r = 2.2RC$.	6 Marks	L3	CO1	PO1
		(OR)				
2.	a)	Draw the transfer characteristics and explain the operation of a two way clipper.	6 Marks	L2	CO1	PO1
	b)	A symmetrical square wave whose peak to peak amplitude is 2V and whose average value is zero is applied to an RC integrating circuit. The time constant equals the half period of the square wave. Find the peak to peak value of the output amplitude.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	What is biasing? Explain the need of it. List out different biasing techniques.	6 Marks	L2	CO2	PO1
	b)	An n-p-n transistor with $\beta = 50$ is used in a common emitter circuit with $V_{CC} = 10V$ and $R_C = 2K$. The bias is obtained by connecting a 100K resistance from collector to base. Assume $V_{BE} = 0$. Find: i) Quiescent point. ii) Stability factor S.	6 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Differentiate bias stabilization and compensation techniques.	6 Marks	L4	CO2	PO1
	b)	Discuss the operation of thermistor compensation.	6 Marks	L2	CO2	PO1

UNIT-III

5.	a)	Why Hybrid parameters are called so? Define them.	6 Marks	L1	CO3	PO1
	b)	Draw the ac equivalent of a CE amplifier with fixed bias using h–parameter model and derive the equations for input impedance, output impedance, voltage gain and current gain.	6 Marks	L3	CO3	PO3
		(OR)				
6.	a)	Derive the equations for voltage gain, current gain, input impedance and output admittance for a BJT using low frequency h – parameter model for CE configuration.	6 Marks	L3	CO3	PO3
	b)	A CE amplifier is drawn by a voltage source of internal resistance $R_s = 1000\Omega$ and the load impedance is a resistance $R_L = 1200\Omega$. The h-parameters are $h_{ie} = 1.2K\Omega$, $h_{re} = 0.0002$, $h_{fe} = 60$ and $h_{oe} = 25\mu A/V$. Compute the current gain A_I, input resistance R_i, Voltage gain A_V and output resistance R_o using approximate analysis.	6 Marks	L3	CO3	PO2

UNIT-IV

7.	a)	Sketch and explain the drain and transfer characteristics of JFET in detail.	6 Marks	L3	CO4	PO1
	b)	Explain the construction and operation of p-channel EMOSFET with the help of static drain characteristics and transfer characteristics.	6 Marks	L2	CO4	PO1
		(OR)				
8.	a)	With the help of neat sketch, explain voltage divider biasing of JFET.	6 Marks	L2	CO4	PO1
	b)	Draw the circuit diagram of common drain amplifier and derive the expression for voltage gain and input resistance.	6 Marks	L3	CO4	PO1

UNIT-V

9.	a)	With a neat sketch, explain the principal of operation of tunnel diode.	6 Marks	L3	CO5	PO1
	b)	Explain the working principle of DIAC and list the applications.	6 Marks	L2	CO5	PO1
		(OR)				
10.	a)	Describe the working of UJT as relaxation oscillator.	6 Marks	L2	CO5	PO1
	b)	Explain the working of varactor diode and list its applications.	6 Marks	L2	CO5	PO1

SIGNALS AND SYSTEMS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

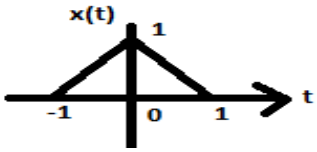
1.	a)	Illustrate the following classifications of continuous time sequences with examples. i) Static and Dynamic systems. ii) Time variant verses and Time in-variant systems.	6 Marks	L1	CO1	PO2
	b)	Given a signal. $x(t) = t+2 \quad -2 < t < 2$ $= 0 \quad$ otherwise. Plot the following signals x(2t), x(-t), x(t/2), 2 x(-2t+3).	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Test whether the following signals are periodic signals or aperiodic signals. In case of periodic signals, determine the fundamental frequencies. i) $x(t) = 2\sin(2/3)t + 3\cos(2\pi/5)t$. ii) $x(t) = 4\cos(3\pi t+\pi/2) + 2\sin(8\pi t+\pi/2)$.	6 Marks	L2	CO1	PO2
	b)	Find the energy of a rectangular pulse having unit height and unit width centered at origin. Suppose now this signal is shifted right side (or left side) by 1 unit. Find the new signals energy and power. Is there any change in the value of energy calculated? Give the reasons.	6 Marks	L3	CO1	PO2

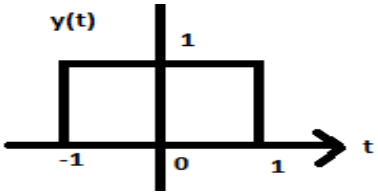
UNIT-II

3.	a)	i) State and prove the Time Reversal property of Fourier Transform ii) Using that property find *x(t) = u(t) + u(-t)*	6 Marks	L1	CO2	PO1
	b)	Find the Fourier Transform of $x(t) = e^{-at}u(t)$.	6 Marks	L2	CO2	PO1
		(OR)				
4.		State and prove convolution property in Fourier Transform.	12 Marks	L2	CO2	PO2

UNIT-III

5.	a)	State and prove Parsevals's theorem. Explain its physical significance.	6 Marks	L1	CO3	PO1
	b)	A filter has an input $x(t) = e^{-2t}u(t)$ and Transfer function $H(w) = \frac{1}{1+jw}$ and find the ESD of the output.	6 Marks	L1	CO3	PO1
		(OR)				
6.	a)	Fine the relation between convolution and correlation with examples.	6 Marks	L1	CO3	PO1
	b)	Fine the cross correlation between unit triangular and unit gate pulse.	6 Marks	L1	CO3	PO5





UNIT-IV

7.	a)	The step response of an LTI system is found to be $2e^{-3t}u(t)$ i) Find the impulse response h(t) of the system. ii) Find the response of the system when the input is $e^{-t}u(t)$.	6 Marks	L3	CO4	PO2
	b)	Find the Laplace Transform of the signal $x(t) = e^{-2t}u(-t) + e^{-3t}u(-t)$ and also find its ROC.	6 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Using properties of Laplace Transform find: i) $x(t) = te^{-t}u(t)$. ii) $x(t) = e^{-2t}\cos(2\pi 100t)u(t)$.	6 Marks	L2	CO4	PO2
	b)	Find the inverse Laplace Transform of the following : $X(S) = \frac{S+1}{(S+1)(S+1)+4}$.	6 Marks	L1	CO4	PO1

UNIT-V

9.	a)	State and prove Sampling theorem.	6 Marks	L1	CO5	PO1
	b)	An amplifier with Gain = 30dB and Bandwidth = 25KHZ is found to have T = 120K. Noise figure = 2. Find output noise.	6 Marks	L3	CO5	PO4
		(OR)				
10.	a)	Explain the reconstruction of a signal from its samples using interpolation technique.	6 Marks	L2	CO5	PO2
	b)	List out different types of Noises.	6 Marks	L3	CO5	PO4

CODE No.: 19BT30404 SVEC-19

SWITCHING THEORY AND LOGIC DESIGN

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Express the function $F = A + \overline{B}C$ in canonical SOP and POS.	6 Marks	L2	CO1	PO1
	b)	List the first 16 numbers in base 12; use the letters A and B to represent the last two digits. Convert the number $(456)_{12}$ to base 8	6 Marks	L3	CO1	PO3
		(OR)				
2.	a)	Generate even parity hamming code for the data word 10011010.	4 Marks	L4	CO1	PO4
	b)	i) Simplify the given Boolean expression $f = ABC + \overline{A}\,\overline{B}\,C + A\overline{B} + AB\overline{C} + \overline{A}\overline{B}\overline{C}$.	8 Marks	L2	CO1	PO2
		ii) Perform the subtraction using 10^{th} complements. i) $(1000)_{10}$-$(756)_{10}$. ii) $(10)_{10} - (100)_{10}$.				
		UNIT-II				
3.	a)	Implement the following function in multi-level NAND $F = ABC + ABC + ABD + ABD$.	6 Marks	L3	CO1	PO2
	b)	Obtain the simplified expression in POS, implement with NOR gates $F(w,x,y,z) = \sum_m (1, 2, 4, 11, 12, 13) + \sum_d (0, 3, 6, 10)$.	6 Marks	L4	CO1	PO4
		(OR)				
4.	a)	Determine essential prime implicates given Boolean expression using tabulation method $F = ACD + BCD + BCD + ACD$.	6 Marks	L3	CO1	PO2
	b)	Simplify the expression in SOP $F(w,x,y,z) = \sum_m (0, 3, 4, 5, 7) + \sum_d (8, 9, 10, 11, 12, 13, 14, 15)$.	6 Marks	L4	CO1	PO4
		UNIT-III				
5.	a)	Implementing the logic function using a multiplexer 2^{N-1} input line, where N is the number of variables in the function $F(A, B, C, D) = \sum_m (4, 5, 6, 7, 8, 13, 14, 15)$.	6 Marks	L3	CO1	PO4
	b)	Define encoder. Design Octal to Binary encoder.	6 Marks	L4	CO2	PO2
		(OR)				
6.	a)	Design a BCD to Decimal Adder Combinational circuit.	6 Marks	L2	CO2	PO1
	b)	Construct 5 to 32 decoder using one 2 to 4 decoder and four 3 to 8 decoders.	6 Marks	L4	CO2	PO2
		UNIT-IV				
7.	a)	Convert JK Flip Flop to T Flip Flop.	6 Marks	L3	CO2	PO3
	b)	Design a Universal Shift Register and explain the operation with neat diagram.	6 Marks	L3	CO1	PO6
		(OR)				
8.	a)	Design 3 Bit UP/Down Synchronous counter using T Flip Flop.	6 Marks	L3	CO2	PO6
	b)	Design a 5 Bit Ring counter and explain the operation.	6 Marks	L3	CO2	PO6

UNIT-V

9.	a)	A combinational circuit is defined by the function $F_1(A, B, C) = \sum_m (3, 5, 6, 7)$ $F_2=\sum_m (0, 2, 4,7)$. Implement the circuit with PLA having 3 inputs, 4 product terms and two outputs.	6 Marks	L3	CO3	PO2
	b)	Realize a Logic function using $F (A, B, C) = \Sigma_m (2, 4, 5, 6)$ using Hazard Free logic gate network.	6 Marks	L2	CO3	PO7
		(OR)				
10.	a)	Distinguish the following. i) PROM. ii) PAL. iii) PLA.	6 Marks	L1	CO4	PO2
	b)	Implement the following function using PROM $F_1(A, B, C) = \sum_m (0, 1, 2)$ $F_2=\sum_m (4, 5, 6, 7)$.	6 Marks	L3	CO3	PO2

COMPUTER GRAPHICS

[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Compare and contrast raster scan systems and random scan systems.	6 Marks	L4	CO1	PO1
	b)	Write an algorithm to draw a line using Bresenhams approach.	6 Marks	L1	CO2	PO2
		(OR)				
2.	a)	Illustrate the working of a CRT with neat sketch.	6 Marks	L2	CO1	PO1
	b)	Discuss in detail input devices.	6 Marks	L1	CO1	PO1
		UNIT-II				
3.	a)	Differentiate boundary fill algorithm and flood fill algorithm.	6 Marks	L4	CO2	PO2
	b)	What is the use of homogeneous coordinates in transformations? Explain in detail.	6 Marks	L2	CO3	PO2
		(OR)				
4.	a)	Derive a transformation matrix to rotate an object with respect to a given point.	6 Marks	L3	CO3	PO3
	b)	Explain in detail composite transformations.	6 Marks	L2	CO3	PO1
		UNIT-III				
5.	a)	Discuss in detail window-to-viewport coordinate transformation.	6 Marks	L2	CO3	PO1
	b)	Apply Cohen-Sutherland line clipping algorithm for the line having end points A(-1, 5) and B(3, 8) against window coordinates (-3, 1) and (2, 6).	6 Marks	L3	CO3	PO3
		(OR)				
6.	a)	What is a polygon surfaces? Explain in detail.	6 Marks	L1	CO3	PO1
	b)	Explain the properties of Bezier curves.	6 Marks	L2	CO3	PO2
		UNIT-IV				
7.	a)	Discuss in detail basic 3D transformations.	6 Marks	L1	CO3	PO1
	b)	Illustrate 3D viewing pipeline.	6 Marks	L1	CO3	PO1
		(OR)				
8.	a)	Differentiate parallel projection and perspective projection.	6 Marks	L4	CO3	PO2
	b)	Write a short note on clipping in 3D.	6 Marks	L2	CO3	PO1
		UNIT-V				
9.	a)	What is an illumination model? Discuss in detail.	6 Marks	L2	CO4	PO2
	b)	Explain Back-face detection with an example.	6 Marks	L2	CO4	PO2
		(OR)				
10.	a)	Discuss in detail Scan-line method.	6 Marks	L2	CO4	PO2
	b)	What is surface rendering? Explain Gouraud shading method.	6 Marks	L2	CO4	PO2

COMPUTER ORGANIZATION

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	i) Identify possible values of x and y, if 73_x (in base-x system) is equal to 54_y (in base y number system). ii) An electronic device which converts one form of data into another form under the control of a program. To design such electronic device, what are the functional blocks required? Discuss with a neat sketch.	6 Marks	L1	CO1	PO2
	b)	Provide significance of distinct number systems. Identify why binary number system is more suitable for digital computers with respective to other number systems. And convert $(4675)_{16}$, $(A467B89)_{16}$, $(5371)_8$ and $(7856)_{10}$ to binary numbers.	6 Marks	L2	CO1	PO2
		(OR)				
2.		The instruction at address 021 in the basic computer has I = 0; an opcode of AND instruction address part is 083 the memory word at address 083 contains operand B8F2 and content of AC is A937. Determine the contents of PC, AR, DR, AC and IR. Repeat the problem 6 more times for all memory reference instructions.	12 Marks	L4	CO2	PO2
		UNIT-II				
3.	a)	What is a program status word? If the last operation performed on a computer with an 8-bit word was an addition in which the two operands were 00010110 and 01100011, what would be the value of the following flags? i) Carry. ii) Zero. iii) Overflow. iv) Sign. v) Even Parity.	5 Marks	L2	CO3	PO1
	b)	Briefly discuss the basic instruction cycle of processor.	7 Marks	L2	CO2	PO1
		(OR)				
4.	a)	The following transfer statements specify a memory. Explain the memory operation in each case. i) R1←M[AR] ii) M[AR]←R4 iii) R1←M[R3]	3 Marks	L3	CO3	PO2
	b)	What is DMA? Explain DMA transfer methods.	9 Marks	L2	CO2	PO1

UNIT-III

5.	a)	What are the different types of I/O subsystems? Report the flow chart of the I/O subsystem that is driven by interrupts.	6 Marks	L2	CO2	PO1
	b)	A System uses a control memory of 1024 words of 32 bits each. Micro Instruction has three fields. The Micro operation field has 16 bits. i) How many bits are there in branch address field and select field. ii) If there are 16 status bits in the system, how many bits of branch logic are used to select a status bit? iii) How many bits are left to select an input for the multiplexers?	6 Marks	L3	CO4	PO3

(OR)

6.	a)	What happens in the daisy-chain priority interrupt when device 1 requests an interrupt after device 2 has sent an interrupt request to the CPU but before the CPU responds with the interrupt acknowledge? Explain with relevant diagrams.	6 Marks	L2	CO3	PO2
	b)	Explain how communication between CPU and IOP takes place with flowchart.	6 Marks	L2	CO2	PO1

UNIT-IV

7.	a)	What is Hit ratio in cache memory and explain about Direct mapping in cache?	6 Marks	L2	CO3	PO1
	b)	How many bits will be for tag, index, block and word field of address format?	6 Marks	L3	CO2	PO1

(OR)

8.		Discuss the strobe control method for Asynchronous data transfer between source unit and destination unit.	12 Marks	L2	CO3	PO2

UNIT-V

9.	a)	Illustrate the terms arithmetic pipeline and instruction pipeline and write short notes on them.	6 Marks	L2	CO3	PO1
	b)	Explain about Hardware Performance issues.	6 Marks	L2	CO3	PO1

(OR)

10.	a)	Discuss about Inter-processor arbitration.	6 Marks	L2	CO2	PO2
	b)	Explain design issues of instruction pipeline.	6 Marks	L2	CO2	PO1

CODE No.: 19BT30503 SVEC-19

DATA STRUCTURES

[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define time complexity. Discuss the O (Big oh) notation with an example.	4 Marks	L2	CO1	PO2
	b)	Define a singly linked list. Write a program to perform merging of two sorted linked lists.	8 Marks	L3	CO1	PO3
		(OR)				
2.	a)	Compare and contrast the arrays and linked lists.	4 Marks	L2	CO1	PO2
	b)	List the advantages of circular linked lists over singly linked lists. Explain how the insertion and deletion operations are performed at the specified position of the circular linked list.	8 Marks	L1	CO1	PO2

UNIT-II

3.	a)	Define a stack. Explain the implementation of the stack using linked lists.	8 Marks	L3	CO1	PO3
	b)	Convert the given infix expression to postfix ((A+B)*C) / D-E*F+G.	4 Marks	L4	CO4	PO2
		(OR)				
4.	a)	How circular queue is advantageous over linear queue? Write its implementation.	6 Marks	L3	CO1	PO3
	b)	Discuss the priority queues in detail with an example.	6 Marks	L2	CO1	PO2

UNIT-III

5.	a)	A binary tree has seven nodes. The Preorder and Postorder traversals of the tree are given below. Can you draw the tree? Justify. Preorder: GFDABEC. Postorder : ABDCEFG.	6 Marks	L2	CO2	PO1
	b)	Define the red-black tree. Write about how we implement red-black trees.	6 Marks	L3	CO2	PO3
		(OR)				
6.	a)	Explain binary tree traversals with an example.	6 Marks	L2	CO4	PO1
	b)	Write an algorithm to insert a node in a Binary Search Tree.	6 Marks	L3	CO2	PO3

UNIT-IV

7.	a)	Construct the step by step procedure to sort the given list of elements using Quick Sort { 54,26,93,17,77,3,44,55,20}.	8 Marks	L3	CO3	PO2
	b)	Write an algorithm for Linear Search and analyze its time complexity.	4 Marks	L4	CO3	PO2
		(OR)				
8.	a)	Describe the insertion sort algorithm and trace the steps of insertion sort for sorting the list - 12, 19, 33, 26, 29, 35, 22, 37. Find the total number of comparisons made.	6 Marks	L3	CO3	PO2
	b)	Write an algorithm for binary search. Illustrate the search process to find an element 15, if the list of numbers given are: 5, 15, 23, 39, 46, 57, 61, 77, 89.	6 Marks	L2	CO3	PO2

UNIT-V

9.	a)	Describe in detail about breadth-first traversal of a graph with a suitable example.	6 Marks	L2	CO4	PO1
	b)	Construct and discuss any two collision avoiding techniques.	6 Marks	L3	CO2	PO3
		(OR)				
10.	a)	Define the spanning tree. Illustrate the steps for finding minimum spanning tree for the given graph with an example.	6 Marks	L2	CO2	PO1
	b)	Solve**:** Given the input (322, 134, 141, 969, 1979, 611, 6172, 4199) and hash function h(x) = x mod 10, show the resulting. i) Separate Chaining, ii) Closed hashing using linear probing and double hashing h2(x) = 8-(x mod 8).	6 Marks	L4	CO2	PO3

CODE No.: 19BT31001 SVEC-19

SREE VIDYANIKETHAN ENGINEERING COLLEGE

II B.Tech I Semester (SVEC-19) Regular Examinations February – 2021

ELECTRICAL AND ELECTRONICS MEASUREMENTS

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Define damping and discuss the types of damping used in analog meters.	6 Marks	L1	CO1	PO1
	b)	List out different errors in PMMC and state the advantages and disadvantages of it.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Derive the Torque equation of Moving Iron Instruments.	6 Marks	L2	CO1	PO3
	b)	Design a multi-range ammeter for the ranges 10mA, 50mA and 75mA using a D'Arsonval movement having an internal coil resistance of 50Ω at a maximum current of 1mA.	6 Marks	L4	CO2	PO4
		UNIT-II				
3.	a)	Classify Ohmmeters and discuss in detail any one of it.	6 Marks	L2	CO1	PO5
	b)	Design a shunt type ohmmeter for which the basic D'Arsonval movement with 10 mA and internal resistance of 5Ω. The battery **emf** is 3V. It is desires to modify the circuit by adding appropriate shunt resistances across the movement, so that instrument indicates 0.5Ω at the midpoint on its scale. Calculate value of shunt resistance and value of limiting resistor R_L.	6 Marks	L3	CO1	PO2
		(OR)				
4.	a)	Classify the types of AC potentiometer and discuss their applications.	6 Marks	L2	CO2	PO2
	b)	Demonstrate how multimeter can measure voltage and current.	6 Marks	L1	CO2	PO8
		UNIT-III				
5.	a)	Explain the construction and working principle of Electrodynamometer wattmeter.	6 Marks	L1	CO1	PO1
	b)	Discuss in detail about Polyphase energy meter.	6 Marks	L2	CO2	PO5
		(OR)				
6.		In a dynamometer wattmeter the moving coil has 500 turns of mean diameter of 30mm, estimate the torque if the axes of the field and moving coils are at 60^0 and 90^0 when the density in the field coils is 15×10^{-3} Wb/m^2, the current in moving coil is 0.05 A and the power factor is 0.866.	12 Marks	L1	CO1	PO1
		UNIT-IV				
7.	a)	Explain the significance of balance condition in the Wheatstone Bridge and derive the expression.	6 Marks	L2	CO3	PO2
	b)	Discuss in detail about the operation of Q-meter.	6 Marks	L2	CO3	PO2
		(OR)				
8.	a)	Design a bridge used for measurement of low value inductance and derive its balance equation.	6 Marks	L6	CO3	PO1
	b)	Interpret about the sources and detectors used in bridge circuits.	6 Marks	L1	CO3	PO1

UNIT-V

9.	a)	Discuss in detail about Frequency synthesizer.	6 Marks	L4	CO4	PO1
	b)	With a neat sketch, explain the operation of digital frequency meter.	6 Marks	L2	CO4	PO1
		(OR)				
10.	a)	With a neat sketch, explain the block diagram of Universal Time Counter.	6 Marks	L2	CO4	PO1
	b)	Analyze how universal counter can be used to measure time and ratio.	6 Marks	L4	CO4	PO1

CODE No.: 19BT31002 SVEC-19

TRANSDUCERS IN INSTRUMENTATION

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain the generalized measurement system with a neat block diagram.	6 Marks	L2	CO1	PO1
	b)	What are the different errors encountered in measurements? Explain with suitable examples.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Define and explain briefly the dynamic characteristics of transducers.	6 Marks	L2	CO1	PO2
	b)	The observations of resistance made in an experiment are 100.4Ω, 99.2Ω, 101.1Ω, 100.5Ω, 99.8Ω, 102.0Ω, 99.9Ω, 101.7Ω, 100.8Ω, 101.2Ω. Calculate the arithmetic mean, standard deviation and variance.	6 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	Derive the expression of Gauge Factor of strain gauge.	6 Marks	L2	CO2	PO1
	b)	Discuss any one societal application of ultrasonic sensors.	6 Marks	L2	CO2	PO6
		(OR)				
4.	a)	Explain the working principle of Hall effect with an example.	6 Marks	L2	CO2	PO1
	b)	Outline the principles of capacitive sensors with neat sketches.	6 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Identify suitable temperature sensor for very high temperature measurement applications.	6 Marks	L2	CO3	PO5
	b)	Analyze various performance characteristics of different temperature sensors.	6 Marks	L4	CO3	PO2
		(OR)				
6.	a)	Elucidate the laws of thermocouple and explain clearly about cold junction compensation.	6 Marks	L2	CO3	PO2
	b)	The typical value of Beta for a thermistor around 25^0C is 4000K. Find the corresponding resistance–temperature coefficient for a thermistor.	6 Marks	L3	CO3	PO2
		UNIT-IV				
7.	a)	Identify and explain a suitable load cell for industrial applications.	6 Marks	L2	CO4	PO3
	b)	Analyze the various velocity and acceleration sensors.	6 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Explain the working principle of electromagnetic type velocity measurement.	6 Marks	L2	CO4	PO1
	b)	Outline the digital methods for torque measurement.	6 Marks	L2	CO4	PO2
		UNIT-V				
9.	a)	Explain the working principle of SAW sensor.	6 Marks	L2	CO2	PO1
	b)	Select suitable sensor for vibration measurement in industrial applications.	6 Marks	L2	CO4	PO2
		(OR)				
10.	a)	Demonstrate the working of various types of gyroscopes.	6 Marks	L2	CO2	PO1
	b)	Compare incremental and absolute encoders.	6 Marks	L2	CO2	PO2

CODE No.: 19BT31201 SVEC-19

DISCRETE MATHEMATICAL STRUCTURES

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What is a tautology? Prove **[(p∧~q)→r] → [p → (q ∨ r)]** is a tautology.	6 Marks	L2	CO1	PO2
	b)	Give a contradiction proof that the square root of 2 is not a rational.	6 Marks	L4	CO1	PO1
		(OR)				
2.	a)	Prove (or) disprove the validity of the following argument. Every living thing is a plant or animal. Davids dog is alive and it is not a plant. All animals have hearts. Hence, David's dog has a heart.	6 Marks	L3	CO1	PO2
	b)	Obtain the PDNF of **: P→((P→Q) ∧ ~(~Q ∨ P))**	6 Marks		CO1	PO2
		UNIT-II				
3.	a)	What is a Equivalence relation? Let X={1,2,3,4} and R={(1,1), (1,4), (4,1), (4,4), (2,2), (2,3), (3,2), (3,3)} Determine whether the relation R is equivalence or not.	6 Marks	L2	CO2	PO1
	b)	Draw the Hasse – diagram for the post [D_{32};/]. Where '/' is the divisibility relation. Determine this poset is lattice or not.	6 Marks	L4	CO2	PO2
		(OR)				
4.	a)	Discuss in detail properties of Binary relations.	6 Marks	L2	CO2	PO4
	b)	Let A={1,2,3,4,5,6}, Construct pictorial descriptions of the relation R on A for the following cases: i) R = {(j, k) | j is a multiple of k}. ii) R = {(j, k) | j / k is a prime }.	6 Marks	L3	CO2	PO2
		UNIT-III				
5.	a)	Explain the general properties of Algebraic System.	6 Marks	L2	CO3	PO4
	b)	Discuss the Homomorphism with suitable examples.	6 Marks	L2	CO3	PO4
		(OR)				
6.	a)	Examine whether given set P={0,1,2,3,4,5,6,8) can be semi group under binary operation θ_6 or not.	6 Marks	L3	CO3	PO4
	b)	Discuss in detail Isomorphism with suitable examples.	6 Marks	L2	CO3	PO4
		UNIT-IV				
7.	a)	State and explain Pigeon – hole principle and its applications.	6 Marks	L2	CO4	PO2
	b)	Find the coefficient of X^{25} in $(X^2+X^3+X^4+X^5+X^6)^7$.	6 Marks	L5	CO4	PO2
		(OR)				
8.	a)	In how many ways can the committee of 5 teachers and 4 students be chosen from 9 teachers and 15 students be formed if teacher A refuses to serve if student B is on the committee?	6 Marks	L4	CO4	PO2
	b)	Solve the recurrence relation: $a_n + a_{n-1} - 6a_{n-2} = 0$ where $a_0 = -1$, $a_1 = 8$.	6 Marks	L3	CO4	PO2

UNIT-V

9.	a)	Show that a complete graph K_n is planar iff $n \leq 4$. (Using Euler's)	6 Marks	L4	CO5	PO2
	b)	Define the Euler Path and determine whether the graph (G_1) is Euler circuit or not?	6 Marks	L3	CO5	PO2

(G_1)

(OR)

10	a)	Discuss Prim's spanning tree algorithm with suitable example.	6 Marks	L2	CO5	PO2
	b)	Discuss the difference between DFS and BFS with suitable examples.	6 Marks	L2	CO5	PO2

CODE No.: 19BT31202 SVEC-19

SOFTWRE ENGINEERING

[Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What are the phases of software development? Explain in detail.	6 Marks	L1	CO1	PO1
	b)	List the major phases in the waterfall model and the spiral model. Where is the spiral model beneficial? Justify your answer.	6 Marks	L3	CO1	PO1
		(OR)				
2.	a)	What is a prototype model? Under what circumstances is it beneficial to construct a prototype model? Give reasons.	6 Marks	L1	CO1	PO1
	b)	Analyze about the Agile process model and the Scrum process model.	6 Marks	L2	CO1	PO2
		UNIT-II				
3.	a)	What is a software requirement? Explain the process of determining the requirements.	6 Marks	L1	CO2	PO1
	b)	Define Requirement Engineering. Categorize seven distinct tasks to fulfill the needs of the project.	6 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Discuss briefly the unified process that is used in designing object-oriented software.	6 Marks	L1	CO2	PO1
	b)	What is SRS? Explain the need for SRS and also list the five desirable characteristics of a good SRS document.	6 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Discuss the various OO design issues in software engineering.	6 Marks	L1	CO2	PO1
	b)	Explain briefly about the software architecture style and architecture pattern.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	What are cohesion and coupling and what is their purpose in software reconstruction? Elucidate.	6 Marks	L1	CO3	PO2
	b)	Write short notes on: i) Modularity. ii) Reusability. iii) Data dictionary.	6 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	What are the various testing strategies for software testing? Describe them briefly.	6 Marks	L1	CO4	PO2
	b)	Write short notes on the following with suitable examples. i) Graph-Based testing methods. ii) Equivalence Partitioning.	6 Marks	L1	CO4	PO3
		(OR)				
8.	a)	Differentiate between function-oriented and size-oriented metrics	6 Marks	L2	CO3	PO2
	b)	What is cyclomatic complexity? Explain how to construct a flow graph for a program (Fibonacci series) and compute cyclomatic complexity with an example.	6 Marks	L3	CO3	PO3

UNIT-V

9.	a)	List the major risks in a software project. What are the methods to reduce the risk of cost and schedule overruns? Give reasons.	6 Marks	L3	CO5	PO2
	b)	Discuss the role of RMMM in the software development process.	6 Marks	L1	CO5	PO1
		(OR)				
10.	a)	Write short notes on Quality function deployment in software quality assurance.	6 Marks	L1	CO5	PO1
	b)	Distinguish between forward and reverse engineering.	6 Marks	L2	CO5	PO2

CODE No.: 19BT31501 SVEC-19

DATA STRUCTURES AND ALGORITHMS

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Apply the Insertion Sort algorithm on following elements: 445, 3, 657, 10, 27, 35, 290, 55, 35, 310.	6 Marks	L3	CO2	PO5
	b)	Describe the importance of Performance analysis with suitable examples. i) Space Complexity. ii) Time Complexity.	6 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Explain the Radix sort algorithm with a detailed example.	6 Marks	L2	CO2	PO2
	b)	Differentiate between the Linear search and Binary search.	6 Marks	L3	CO2	PO5
		UNIT-II				
3.	a)	Write a program how to implement the Double Linked List concepts of Insertion and deletion.	6 Marks	L2	CO3	PO1
	b)	Explain the concept of circular linked list in detail with an example.	6 Marks	L3	CO3	PO3
		(OR)				
4.	a)	Write a program to implement and compare of two single linked lists i.e list1 and list2.	6 Marks	L6	CO3	PO3
	b)	Differentiate between Double Linked List and Circular Linked List.	6 Marks	L3	CO4	PO2
		UNIT-III				
5.	a)	Write a program to implement stacks using Linked List, Mention any three applications of stacks.	6 Marks	L3	CO4	PO5
	b)	Convert the following infix expression to postfix expression (a +b * (c / d)) / ((e + f)* (g - h)).	6 Marks	L3	CO4	PO3
		(OR)				
6.	a)	Write a program to implement Queues by using arrays. Mention any three applications of Queues.	6 Marks	L2	CO4	PO2
	b)	List out the operations of Circular Queue, Priority Queue and Deque in detail.	6 Marks	L3	CO4	PO5
		UNIT-IV				
7.	a)	Explain in detail the representation of Binary Tree and terminologies of Binary Tree.	6 Marks	L3	CO5	PO5
	b)	Mention the concept of insertion operation on Binary Search Tree with a neat example.	6 Marks	L2	CO5	PO3
		(OR)				
8.	a)	Describe the importance of AVL trees and explain with suitable examples the insertion and deletion operations.	6 Marks	L6	CO5	PO5
	b)	Analyze the importance of implementation of Heap Trees and its applications in detail.	6 Marks	L3	CO5	PO2

UNIT-V

9.	a)	Explain the concept of B+ Tree and demonstrate the insertion operation in B+tree in detail.	6 Marks	L3	CO5	PO5
	b)	Differentiate between the Graphs and Trees in detail.	6 Marks	L2	CO5	PO3
		(OR)				
10.	a)	Write a program to implement Depth First Search algorithm and its complexity analysis.	6 Marks	L2	CO5	PO2
	b)	Mention the Hash Table Structure and its applications in detail.	6 Marks	L3	CO5	PO5

CODE No.: 19BT31502 SVEC-19

OPERATING SYSTEMS

[Computer Science and Engineering, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define Operating System. List the objectives of an operating system.	4 Marks	L1	CO1	PO1
	b)	Define a Thread. Give the benefits of multithreading. What resources are used when a thread is created? How do they differ from those used when a process is created?	8 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Summarize Round Robin scheduling algorithm with a suitable example.	6 Marks	L2	CO1	PO5
	b)	Describe IPC. Explain in detail the inter process communication models.	6 Marks	L1	CO1	PO4

UNIT-II

3.	a)	Illustrate Critical Section problem. Give the conditions that a solution to the critical section problem must satisfy.	6 Marks	L4	CO2	PO2
	b)	Explain semaphore. List the types of semaphores and show that, if the wait( ) and signal( ) semaphore operations are not executed atomically, then mutual exclusion may be violated.	6 Marks	L4	CO2	PO4
		(OR)				
4.	a)	Explain the Resource-Allocation-Graph algorithm for deadlock avoidance.	6 Marks	L4	CO2	PO2
	b)	Define Monitor. Give the schematic view of the basic monitor.	6 Marks	L1	CO2	PO2

UNIT-III

5.	a)	Define Thrashing. What is the cause of Thrashing? How does the system detect Thrashing? What can the system do to eliminate this problem?	6 Marks	L1	CO3	PO2
	b)	Identify various issues involved in selecting appropriate disk scheduling algorithm.	6 Marks	L2	CO3	PO2
		(OR)				
6.	a)	Consider the following page reference string: 1, 2, 3, 4, 2, 1, 5, 6, 2, 1, 2, 3, 7, 6, 3, 2, 1, 2, 3, 6. How many page faults would occur for the optimal page replacement algorithm, assuming three frames and all frames are initially empty?	8 Marks	L3	CO3	PO3
	b)	Explain how demand paging affects the performance of a computer system.	4 Marks	L4	CO3	PO2

UNIT-IV

7.	a)	Explain various file access methods with suitable examples.	6 Marks	L4	CO4	PO2
	b)	List out various algorithms in directory implementation.	6 Marks	L1	CO4	PO2
		(OR)				
8.	a)	Explain the three allocation methods in file system implementation. Illustrate with proper diagram.	8 Marks	L4	CO4	PO2
	b)	Define Kernel I/O Subsystem.	4 Marks	L1	CO4	PO2

UNIT-V

9.	a)	Explain principles and domain of protection.	6 Marks	L4	CO5	PO2
	b)	How access controls can be used on files within a file system	6 Marks	L4	CO5	PO2
		(OR)				
10.	a)	Define program threats. List out well-known program threats.	6 Marks	L1	CO5	PO2
	b)	Define system threats. List out well-known system threats.	6 Marks	L1	CO5	PO2

CODE No.: 19BT31503 SVEC-19

SYSTEM PROGRAMMING

[Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Write short notes on Hard links and Symbolic links.	6 Marks	L2	CO1	PO1
	b)	Explain the standard file permissions and security mechanism in Linux.	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Explain the process tree in Linux and define what is Zombie Process.	6 Marks	L3	CO1	PO2
	b)	Briefly define the permissions of New Files in Linux.	6 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Write the snippet for opens the file for writing in append mode, writes the given string to the associated stream, and then closes the stream.	6 Marks	L2	CO2	PO1
	b)	Write a sample program using buffered I/O to define the structure and writes the content of the structure to standard output.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Explain ftrylockfile( ), flockfile( ) functions with syntax.	6 Marks	L3	CO2	PO2
	b)	Standard I/O implements three types of user buffering and provides developers with an interface for controlling the type and size of the buffer. Explain these three buffering techniques.	6 Marks	L2	CO2	PO1

UNIT-III

5.	a)	Explain how the Scatter/gather I/O advantages over linear I/O methods.	6 Marks	L2	CO3	PO1
	b)	Write snippets for creating a New Epoll Instance and Controlling Epoll.	6 Marks	L2	CO3	PO2
		(OR)				
6.	a)	Explain the functions readv( ) and writev( ) with examples.	6 Marks	L2	CO3	PO1
	b)	Write a simple example program that uses mmap( ) to print a file chosen by the user to standard output.	6 Marks	L2	CO3	PO3

UNIT-IV

7.	a)	Justify the role of a device driver is providing mechanism, not policy.	6 Marks	L2	CO4	PO2
	b)	Explain the kernel's role in designing unix system.	6 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Briefly describe the split view of kernel with neat diagram.	6 Marks	L2	CO4	PO1
	b)	Write the differences between a kernel module and an application.	6 Marks	L2	CO4	PO2

UNIT-V

9.	a)	What are the steps for Design of scull?	6 Marks	L2	CO5	PO1
	b)	Explain the two most important data structure used in device drivers.	6 Marks	L2	CO5	PO2
		(OR)				
10.	a)	Explain debugging by watching by using simple code snippets.	6 Marks	L2	CO5	PO2
	b)	Explain the kdb Kernel Debugger tool with example.	6 Marks	L2	CO5	PO2

NUMERICAL METHODS, PROBABILITY AND STATISTICS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) Using method of false position, find an approximate root for the equation $x \log_{10} x = 1.2$. 6 Marks L3 CO1 PO1

   b) Find a root correct to three decimal places for $x^4 - x = 10$ using Newton- Raphson method by predicting an approximation root. 6 Marks L3 CO1 PO2

(OR)

2. a) Choose the appropriate interpolation formula and estimate the value of $e^{1.75}$ from the following data. 6 Marks L3 CO1 PO2

x	1.7	1.8	1.9	2.0
$y = e^x$	5.474	6.050	6.686	7.389

   b) Find the parabola passing through the points (0, 1), (1, 3) and (3, 55) using Lagrange's interpolation formula. 6 Marks L1 CO1 PO1

UNIT-II

3. a) Find first and second derivatives of the function tabulated below at the point x = 1.6. 6 Marks L 1 CO1 PO2

x	1.0	1.1	1.2	1.3	1.4	1.5	1.6
y	7.989	8.403	8.781	9.129	9.451	9.750	10.031

   b) Using Simpson's $\frac{1}{3}$ rule to find $\int_{0.6}^{2} e^{-x^2}\,dx$ by taking seven ordinates. 6 Marks L 3 CO1 PO1

(OR)

4. a) Calculate the values of y at x = 0.1 and x = 0.2 given that $y' = xy^2 - 1$, $y(0) = 1$ by using Taylor's series method. 6 Marks L 3 CO1 PO1

   b) Apply the fourth order Runge-Kutta method to find y(0.2), given that $y' = x + y^2$, $y(0) = 1$ *taking* $h = 0.1$. 6 Marks L 3 CO1 PO1

UNIT-III

5. a) A random variable X has the following probability function. 6 Marks L1 CO2 PO1

$X = x$	0	1	2	3	4	5	6	7
P($X = x$)	**0**	K	$2k$	$2k$	$3k$	k^2	$2k^2$	$7k^2+k$

   Find:

   i) k. ii) P(X < 6). iii) P(0 < X < 5).

   b) A continuous random variable X has the probability density function $f(x) = kx^2e^{-x}$ *when* $x \geq 0$, find the value of K and obtain the mean and variance of X. 6 Marks L1 CO2 PO1

(OR)

6.	a)	A player tosses 3 fair coins. He wins Rs.500 if 3 heads appear, Rs. 300 if 2 heads appear, Rs. 100 if 1 head occurs. On the other hand, he loses Rs. 1500 if 3 tails occur. Find the expected gain of the player.	6 Marks	L1	CO2	PO2
	b)	Show that: i) $V(X + k) = V(X)$. ii) $V(kX) = k^2V(X)$. where X is a continuous random variable and k is a constant.	6 Marks	L1	CO2	PO1

UNIT-IV

7.	a)	20% of items produced from a factory are defective. Applying statistical technique, find the probability that in a sample of 5 chosen at random i) None is defective. ii) One is defective. iii) P(1< X <4).	6 Marks	L1	CO2	PO2
	b)	Fit a Poisson distribution for the following data and find the expected frequencies.	6 Marks	L1	CO2	PO1

x	0	1	2	3	4	5
$f(x)$	42	33	14	6	4	1

(OR)

8.	a)	In a Normal distribution, 31% of the items are under 45 and 8% are over 64. Find the mean and standard deviation of the distribution.	6 Marks	L1	CO2	PO2
	b)	A random variable X has a uniform distribution over (-3, 3), find k *for which* $P(X > k) = \frac{1}{3}$. Also compute $P(X < 2)$ and $P[\lvert X - 2\rvert < 2]$.	6 Marks	L1	CO2	PO1

UNIT-V

9.	a)	In two large populations, there are 30% and 25% respectively of fair haired people. Test whether this difference likely to hidden in samples of 1200 and 900 respectively from the two populations.	6 Marks	L4	CO2	PO4
	b)	A sample of 900 members has a mean of 3.4 *cms* and standard deviation of 2.61*cms*. Test whether the sample has come from a population with mean 3.25 *cms* and standard deviation of 2.61*cms*.	6 Marks	L4	CO2	PO4

(OR)

10.	a)	A mechanist is making engine parts with axle diameters of 0.7 *inch*. A random sample of 10 parts shows a mean diameter of 0.742 *inch* with a standard deviation of 0.04 *inch*. Using suitable testing of hypothesis, to test whether the work is meeting the specification.	6 Marks	L3	CO2	PO4
	b)	1000 students at college level were graded according to their IQ and the economic conditions at their home. Using Chi-Square test, find whether there is any association between condition at home and IQ ($\alpha = 0.05$).	6 Marks	L3	CO2	PO4

Economic Condition	IQ	
	High	Low
Rich	460	140
Poor	240	160

SPECIAL FUNCTIONS AND COMPLEX ANALYSIS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define Beta and Gamma functions and evaluate $\int_0^1 \frac{x^2}{\sqrt{1-x^4}}dx$ x $\int_0^1 \frac{1}{\sqrt{1-x^4}}dx$.	6 Marks	L2	CO1	PO1
	b)	Show that $\Gamma(n)\Gamma(1-n)=\frac{\pi}{\sin n\pi}$ and hence deduce the values of $\Gamma\left(\frac{1}{2}\right)$ *and* $\Gamma\left(\frac{1}{4}\right)\Gamma\left(\frac{3}{4}\right)$.	6 Marks	L2	CO1	PO1

(OR)

2.		Evaluate the integrals i) $\int_0^1 x^7(1-x)^5\,dx$. ii) $\int_0^{\pi/2} \sin^{7/2}\theta\ \cos^{3/2}\theta\ d\theta$. by using beta and gamma functions.	12 Marks	L3	CO1	PO1

UNIT-II

3.	a)	Establish the relation $\frac{d}{dx}\left[x^n J_n(x)\right] = x^n J_{n-1}(x)$.	6 Marks	L2	CO1	PO2
	b)	Define Legendre polynomial $P_n(x)$ and hence or otherwise establish the relation $P_n(x) = \frac{1}{2^n n!}\frac{d^n}{dx^n}(x^2-1)^n$.	6 Marks	L2	CO1	PO1

(OR)

4.		Evaluate $J_{1/2}(x)$ *and* $J_{-1/2}(x)$ in terms of sin x and cos x and hence show that $\left[J_{1/2}(x)\right]^2 + \left[J_{-1/2}(x)\right]^2 = \frac{2}{\pi x}$.	12 Marks	L3	CO1	PO2

UNIT-III

5.	a)	Show that $\left[\frac{\partial^2}{\partial x^2}+\frac{\partial^2}{\partial y^2}\right]\left\|f(z)\right\|^2 = 4\left\|f'(z)\right\|^2$, if $f(z)$ is a regular function of z.	6 Marks	L2	CO2	PO1
	b)	On applying the transformation $w = 1/z$ show that the image of the hyperbola $x^2 - y^2 = 1$ is the lemniscate $\rho^2 = \cos 2\phi$.	6 Marks	L3	CO2	PO2

(OR)

6.	a)	Construct an analytic function $f(z) = u + iv$ if $u - v = \frac{\cos x + \sin x - e^{-y}}{2\cos x - e^{y} - e^{-y}}$ and $f\left(\frac{\pi}{2}\right) = 0$.	6 Marks	L3	CO2	PO2
	b)	Determine the linear fractional transformation that maps $z_1 = 0, z_2 = 1, z_3 = \infty$ onto $w_1 = -1, w_2 = -i, w_3 = 1$ respectively.	6 Marks	L2	CO2	PO2

UNIT-IV

7.		Write Cauchy's theorem and verify it for the function $f(z) = z + 1$ over the boundary of the square with vertices $z = 0$, $z = 1$, $z = 1 + i$, $z = i$.	12 Marks	L2	CO2	PO2

(OR)

8.	a)	Evaluate contour integral $\int_C \frac{\log z}{(z-1)^3} dz$ *where* $c: \lvert z - 1 \rvert = 1/2$ using Cauchy's Integral formula.	6 Marks	L3	CO2	PO2
	b)	Express $f(z) = e^z$ as a Taylor's series expansion about z = 1 and z =3.	6 Marks	L2	CO2	PO1

UNIT-V

9.	a)	Evaluate the product of residues at the poles of the function $f(z) = \frac{z^2}{(z-1)(z-2)^2}$ at $z = 1, 2$.	6 Marks	L2	CO2	PO1
	b)	Define residue of f(z) at pole $z = a$ of order m. Applying the calculus of residues, show that $\int_0^{\infty} \frac{1}{1 + x^6} dx = \frac{\pi}{3}$.	6 Marks	L3	CO2	PO2

(OR)

10.		Evaluate $\int_0^{2\pi} \frac{\cos 2\theta}{1 - 2a\cos\theta + a^2} d\theta$ *where* $(a^2 < 1)$ by identifying appropriate technique of complex variables.	12 Marks	L3	CO2	PO2

II B.Tech I Semester (SVEC-19) Supplementary Examinations January – 2022

FLUID MECHANICS

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	The velocity distribution for flow over a flat plate is given by $u = 32y - y^{3/2}$, where u is the point velocity in meter per second at a distance y meter above the plate. Determine the shear stress at y = 0, 0.1 and 0.2m. Assume dynamic viscosity 5 poise.	6 Marks	L3	CO1	PO1 PO2 PO4 PO5 PO10
	b)	A liquid has a mass density of 1550 kg/m^3. Calculate its specific weight, specific gravity and specific volume.	6 Marks	L3	CO1	PO1 PO2 PO4 PO5

(OR)

2.	a)	A vertical cylinder of 20 cm diameter is rotating at 110 r.p.m in another cylinder of diameter 20.1cm concentrically. The space between the cylinders is filled with oil. If the torque required rotating the cylinder is 11.5 Nm. Find the viscosity of the oil used if the length of the cylinder is 90mm.	6 Marks	L4	CO1	PO1 PO2 PO5 PO10
	b)	An open tank contains water upto a depth of 3m and above it an oil of specific gravity 0.92 for a depth of 1m. Find the pressure intensity: i) at interface of the two liquids. ii) at the bottom of the tank.	6 Marks	L3	CO2	PO1 PO2 PO5 PO10

UNIT-II

3.	a)	In a fluid the velocity is given by $\mathbf{V= (3x+2y)i + (2z+3x^2)j + (2t - 3z)K}$. Determine: i) The velocity components u, v and w at any point in the fluid field. ii) The speed at time t = 2s at point (0, 0, 2). Also classify the velocity field as steady or unsteady flow.	6 Marks	L4	CO2	PO1 PO2 PO5 PO10
	b)	 Oil flows through a pipeline which contracts from 45cm diameter at A to 30cm diameter at B and then branches into two pipes C and D. The diameter of the pipe C is 15cm and diameter of the pipe D is 20cm. If the velocity at A is 1.8 m/sec and that at D is 3.6 m/sec Determine i) Velocity at section B. ii) Discharge at D. iii) Discharge at C. iv) Velocity at C.	6 Marks	L3	CO3	PO1 PO2 PO4 PO10

(OR)

4.	a)	A fluid flow is given by: $\left(V = xy^2 i - 2yz^2 j - \left(zy^2 \frac{2z^3}{3} \right) k \right)$. Prove that it is a case of possible steady incompressible fluid flow. Calculate the velocity and acceleration at the point (1, 2, 3).	6 Marks	L4	CO2	PO1 PO4 PO5 PO10
	b)	A 300mm diameter pipe carries water under a head of 20m with a velocity of 3.5 m/s. If the axis of the pipe turns through 45^0, find the magnitude and direction of the resultant force at the bend.	6 Marks	L4	CO3	PO1 PO2 PO5 PO10

UNIT-III

5.	a)	Water flows through a triangular right-angled weir first and over a rectangular weir of 1m width. The co-efficient of discharge of triangular and rectangular weirs are 0.6 and 0.7 receptively. If the depth of water over the triangular weir is 360 mm, find the depth of water over the rectangular weir.	6 Marks	L4	CO4	PO1 PO2 PO4 PO10
	b)	A submarine is fitted with a pitot-tube, moves horizontally in sea. The axis of the submarine is 15m below the surface of water. The pitot-tube is fixed in front of the submarine along its axis. The pitot-tube is connected with U-tube differential manometer containing mercury, the reading of which is found to be 170mm. Find the speed of submarine. Take C_v = 0.98 and specific gravity of sea water as 1.026.	6 Marks	L4	CO4	PO1 PO2 PO4 PO5 PO10

(OR)

6.	a)	Three pipes of same lengths 400m, 200m, 300m and of diameter 400mm, 200mm and 300mm respectively are connected series. The ends of the compound pipe are connected two tanks, whose water surface levels are maintained at a difference of 16m. Determine the rate of flow of water through the pipe f is 0. 005.	6 Marks	L3	CO4	PO1 PO2 PO4 PO5 PO10
	b)	Compare the discharge of 200mm and 300mm dia pipes of head loss due to friction in each pipe is the same. The pipes are of same length. Co-efficient of friction for both the pipes are equal.	6 Marks	L3	CO4	PO1 PO2 PO4 PO5 PO10

UNIT-IV

7.	a)	Derive an expression for flow of Viscous fluid through circular pipe.	6 Marks	L3	CO5	PO1 PO2
	b)	An oil of viscosity 0.1Ns/m² and relative density 0.9 is flowing through a circular pipe of diameter 50mm and length 300m. The rate of flow of fluid through the pipe is 3.5 litres/sec. Find the pressure drop in a length of 300m and also the shear stress at the pipe wall.	6 Marks	L4	CO5	PO1 PO2 PO4 PO5 PO10

(OR)

8.	a)	Describe in detail flow of viscous fluid between two parallel plates.	6 Marks	L2	CO5	PO1 PO2
	b)	Water flows between two large parallel plates at a distance of 1.6mm apart. Determine the maximum velocity, pressure drop per unit length and shear stress at the walls of the plates if the average velocity is 0.2m/sec. The viscosity of water is 0.01 poise.	6 Marks	L4	CO5	PO1 PO2 PO4 PO5 PO10

UNIT-V

9.	a)	In a 1 in 40 model of spillway velocity and discharge are 2 m/s and 2.5 m^3/s. Compute the corresponding velocity and discharge in prototype.	6 Marks	L3	CO6	PO1 PO2 PO5 PO10
	b)	A laboratory model of a river is built to geometric scale of 1:100. The fluid used in the model is oil of mass density 900 kg/m^3. The highest flood in the river is 10000m^3/s. Find out the corresponding discharge in the model.	6 Marks	L2	CO6	PO1 PO2 PO4 PO10
		(OR)				
10.		Using dimensional analysis, derive an expression for thrust P developed by a propeller assuming that it depends on angular velocity **ω**, speed of advance V, diameter D, dynamic viscosity **μ**, mass density **ρ**, elasticity of the fluid medium which can be denoted by speed of sound in the medium C.	12 Marks	L4	CO6	PO1 PO2 PO4 PO5 PO10

MECHANICS OF SOLIDS
[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Draw shear force and bending moment diagram for the beam shown in Fig.1 .  Fig. 1	12 Marks	L4	CO1	PO1 PO2 PO4 PO10
		(OR)				
2.		Draw the shear force and bending moment diagram for the beam shown in Fig. 2.  Fig. 2	12 Marks	L4	CO1	PO1 PO2 PO4 PO10

UNIT-II

3.	a)	Define neutral axis. Show that neutral axis passes through centroid of the section.	6 Marks	L6	CO2	PO1 PO2 PO3 PO4 PO6 PO10
	b)	Derive the shear stress distribution across a rectangular section. Show the maximum value.	6 Marks	L6	CO2	PO1 PO2 PO3 PO4 PO6 PO10
		(OR)				
4.		The tension flange of 'I' section is 240mm x 40mm, Where as the compression flange is 120mm x 20 mm. The web is 300mm deep and 20mm thick. If the girder is used as simply supported beam of 8m span. Determine the load per m run if the allowable stress is 90N/mm^2 in compressions and 30N/mm^2 in tension. Also sketch the stress distribution shows the corresponding values.	12 Marks	L6	CO2	PO1 PO2 PO3 PO4 PO6 PO10

UNIT-III

5.		A closely-coiled helical spring has 20 turns of wire diameter 25mm. The mean radius of coils is 100mm. Find the maximum shear stress and elongation of the spring under an axial load of 2kN. G = 85GPa.	12 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO6
		(OR)				
6.		A solid shaft is required to transmit 120kW power at 200 r.p.m. Find the suitable diameter of the shaft if the maximum torque transmitted in each revolution exceeds the mean by 20%. Take allowable shear stress as 70N/mm^2 for the material of the shaft.	12 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO6

UNIT-IV

7.		At a point within a body subjected to two mutually perpendicular directions the stresses are 120N/mm^2 tensile and 80N/mm^2 compressive. Each of the above stresses is accompanied by a shear stress of 60N/mm^2. Determine the normal, shear and resultant stresses on an oblique plane inclined at an angle of 45^0 with the axis of minor tensile stress.	12 Marks	L4	CO5	PO1 PO2 PO6 PO10
		(OR)				
8.	a)	Explain maximum principal stress theory.	6 Marks	L4	CO5	PO1 PO2 PO6 PO10
	b)	At a point in a stressed material the principle stresses are 90N/mm^2 (tensile), 60N/mm^2 (tensile) and 30N/mm^2 (compressive). Find the factor of safety according to maximum shear stress theory. If the yield stress is 230N/mm^2.	6 Marks	L4	CO5	PO1 PO2 PO6 PO10

UNIT-V

9.	a)	Define slenderness ratio. State the limitations of Euler's formula.	6 Marks	L4	CO6	PO1 PO2 PO4 PO6
	b)	Differentiate between short and long column. Derive the Euler's formula when one end of the column is fixed and the other end is hinged.	6 Marks	L4	CO6	PO1 PO2 PO4 PO6
		(OR)				
10.		Determine the crippling load for a I-section girder 45cm x 25cm x 3cm and a length of 6m, which is used as a strut with both ends fixed. Take Young's modulus of the material of the girder as 2.1 x 10^5 N/mm^2.	12 Marks	L4	CO6	PO1 PO2 PO4 PO6

SURVEYING

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What are the objectives and principles of plane surveying?	5 Marks	L2	CO1	PO1
	b)	A survey line ABC cuts the banks of a river at B and C, and to determine the distance BC, a line BE, 60 m long was set out roughly parallel to the river. A point D was then found in CE produced and middle point F of DB determined. EF was then produced to G, making FG equal to EF, and DG produced to cut the survey line H. GH and HB were found to be 40 and 80 meters long respectively. Find the distance from B to C.	7 Marks	L3	CO1	PO2
		(OR)				
2.	a)	What is local attraction? How is it detected and eliminated?	5 Marks	L2	CO1	PO1
	b)	The following fore bearings and back bearings were observed in traversing with a compass	7 Marks	L3	CO1	PO2

Line	FB	BB
PQ	S 37°30′ E	N 37°30′ W
QR	S 43°15′ W	N 44°15′ E
RS	N 73°00′ W	S 72°15′ E
ST	N 12°45′ E	S 13°15′ W
TP	N 60°00′ E	S 59°00′ W

Calculate the interior angles and correct them for observational errors.

UNIT-II

3.	a)	What is orientation? Explain the different methods of orientation of a plane table?	6 Marks	L2	CO1	PO1
	b)	Explain the permanent adjustments of leveling?	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Eight readings were taken with a level in a sequence as follows 1.585, 1.315, 2.305, 1.225, 1.325, 1.065, 1.815 and 2.325. The follow level was shifted after the third and sixth readings. The second change point was a bench mark of elevation 186.975. Find the reduced levels of the remaining stations. Use the rise and fall method.	7 Marks	L3	CO2	PO2
	b)	Define contour and contour interval. Discuss various characteristics of contours.	5 Marks	L2	CO2	PO1

UNIT-III

5.	a)	How do you measure horizontal angles by repetition method?	6 Marks	L2	CO3	PO1
	b)	For the following traverse , compute the length CD, so that A,D and E may be in one straight line	6 Marks	L3	CO3	PO2

Line	Length in meters	Bearing
AB	110	83°12’
BC	165	30°42’
CD	?	346°6’
DE	212	16°18’

(OR)

6.	a)	A tachometer is set up at an intermediate point on a traverse course PQ and the following observations are made on a vertically held staff: **Staff station** | **Vertical angle** | **Staff intercept** | **Axial hair readings** P | + 8°36′ | 2.350 | 2.105 Q | + 6°6′ | 2.055 | 1.895 The instrument is fitted with an analectic lens and the constant is 100. Compute the length of PQ and reduced level of Q, that of P being 321.50 m.	7 Marks	L3	CO3	PO2
	b)	What are the different methods employed in tachometric survey? Describe the method most commonly used.	5 Marks	L2	CO3	PO1

UNIT-IV

7.	a)	A railway embankment of length 500 m width at formation level 9 m, and side slopes 2:1 is to be constructed. The round levels every 100 m along the centerline are **Distance (m) : 0 100 200 300 400 500** **Ground level (m) : 107.8 106.3 110.5 111.0 110.7 112.2** The embankment has a rising gradient of 1.2 m per 100 m and the formation level is 110.5 m at zero distance. Calculate the volume of earth work. Assuming the round to the level across the centre line.	7 Marks	L3	CO4	PO2
	b)	Write about any three methods for calculating areas.	5 Marks	L2	CO4	PO1

(OR)

8.	a)	Explain Rankine's method of setting out circular curve?	6 Marks	L2	CO5	PO2
	b)	Two tangents intersect at chainage 1,250 m. The angle of intersection is 150°. Calculate all data necessary for setting out a simple curve of radius 250 m, by deflection angle method. The peg interval may be taken as 20 m.	6 Marks	L4	CO5	PO3

UNIT-V

9.	a)	What is total station? Illustrate its uses.	6 Marks	L2	CO6	PO1 PO12
	b)	Explain the working principle of electronic distance measurement instruments?	6 Marks	L2	CO6	PO1 PO12

(OR)

10.	a)	Discuss the benefits of drone surveying.	6 Marks	L2	CO6	PO1 PO12
	b)	How do you calculate length, area and stock pile volume from drone surveying?	6 Marks	L2	CO6	PO1 PO12

SIGNALS AND NETWORKS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Determine whether the following signal is periodic signal or aperiodic signal. In the case of periodic signal, determine the fundamental period $x(t) = 3\sin\left(3\pi t + \frac{\pi}{2}\right) + 4\sin\left(8\pi t + \frac{\pi}{2}\right)$	4 Marks	L3	CO1	PO2
	b)	Determine and sketch the even and odd parts of the given signals shown below. 	8 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Determine the power and energy for each of the following signal i) $x(t) = e^{-at}, a > 0, for\ t \geq 0$ and zero otherwise. ii) $x(t) = u(t)$.	6 Marks	L3	CO1	PO2
	b)	A Continuous time signal is shown in figure.  Sketch and label each of the following signals. i) $y_1(t) = x(t)\,u(1-t)$. ii) $y_2(t) = x(t)\{u(t) - u(t-1)\}$.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Explain Gibbs phenomenon for a periodic signal.	4 Marks	L1	CO2	PO1
	b)	Find the Fourier series and plot the frequency spectrum for the full wave rectified sine wave having amplitude of 'A'.	8 Marks	L3	CO2	PO2
		(OR)				
4.	a)	State any four properties of fourier transform.	4 Marks	L1	CO2	PO1
	b)	Find the Fourier Transform of the signal $x(t) = x_1(t) * x_2(t)$ where $x_1(t) = e^{-2t}u(t)$ *and* $x_2(t) = u(t)$.	8 Marks	L3	CO2	PO5

UNIT-III

5.	a)	Find the Laplace transform of the signal $x(t) = e^{-2t}\sin(2t)u(t)$.	6 Marks	L3	CO2	PO5
	b)	Find the inverse Laplace transform of $X(s) = \frac{2}{(s+4)(s-1)}$, if the ROC is $\mathrm{Re}(s) < -4$.	6 Marks	L3	CO2	PO5
		(OR)				
6.	a)	Find the z- transform of $x[n] = n\left(\frac{1}{3}\right)^n u[n]$.	6 Marks	L3	CO2	PO5
	b)	Determine the inverse ZT of the sequence $X[z] = \frac{1-2z^{-1}}{1+\frac{1}{2}z^{-1}}$, if	6 Marks	L3	CO2	PO5

x(n) is causal sequence.

UNIT-IV

7.	a)	An electrical circuit shown below has $R = 1K\Omega$, $L = 1\mu H$, $C = 1\mu F$  i) Find the system equation (ODE) which relates $v_i(t)$ with $v_o(t)$. ii) Determine transfer function H(s). iii) Draw magnitude response $\|H(j\omega)\|$.	6 Marks	L3	CO3	PO2
	b)	A 1kHz square wave is applied to the circuit shown in 7a. Discuss whether the output signal $v_o(t)$ is a square wave or a sine wave.	6 Marks	L3	CO3	PO5
		(OR)				
8.	a)	Find the Impulse response and Step response described by the differential equation is $\frac{dy(t)}{dt} + 5y(t) = x(t)$.	6 Marks	L3	CO3	PO2
	b)	A series RLC circuit has a resonance frequency of 1 KHZ and a quality factor Q=100. If each R, L and C is doubled from its original value then find the new Q-factor of the circuit.	6 Marks	L3	CO3	PO5
		UNIT-V				
9.	a)	Determine the input impedence in terms of network parameters and terminated impedance.	6 Marks	L2	CO4	PO2
	b)	The z-parameters of the two port network shown in the figure are Z11=40Ω, Z12=60Ω, Z21=80Ω and Z22=100Ω. Calculate the average power delivered to RL=20Ω. 	6 Marks	L3	CO4	PO5
		(OR)				
10	a)	In the two-port network shown below, calculate the h11 parameter whenV2=0 (where h11=V_1/I_1)	6 Marks	L3	CO4	PO2
	b)	Derive short circuit admittance (Y) parameters for a two port network. 	6 Marks	L1	CO4	PO1

ENGINEERING THERMODYNAMICS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Discuss the sign conventions for work and heat transfer.	4 Marks	L1	CO1	PO1
	b)	A gas expands from an initial state, where the pressure is 340 kPa and the volume is 0.0425m^3 to final pressure is 136 kPa. The relationship between the pressure and volume of the gas is PV^2 = constant. Determine the work for the process.	8 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Differentiate macroscopic and microscopic viewpoints.	4 Marks	L2	CO1	PO1
	b)	A mass of gas is compressed in a quasi-static process from 80 kPa, 0.1m^3 to 0.4 MPa, 0.03m^3. Assuming that the pressure and volume are related by pV^n=constant, find the work done by the gas system.	8 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Name the four processes that make up the Carnot cycle with flow chart.	4 Marks	L1	CO1	PO1
	b)	A gas undergoes a thermodynamic cycle consisting of the following processes: i) Process 1–2: Constant pressure p = 1.4 bar, V_1 = 0.028m^3, W_{12} = 10.5 Kj. ii) Process 2–3: Compression with pV = constant, $U_3 = U_2$. iii) Process 3–1: Constant volume, $U_1 - U_3 = -26.4$ kJ. There are no significant changes in KE and PE. i) Sketch the cycle on a PV diagram. ii) Calculate the network for the cycle in kJ. iii) Calculate the heat transfer for process 1–2. iv) Show that cycle $\sum_{\text{Cycle}} Q = \sum_{\text{Cycle}} W$	8 Marks	L3	CO1	PO2
		(OR)				
4.	a)	State and explain the Clausius statement of second law of thermodynamics.	4 Marks	L2	CO1	PO1
	b)	Two kg of water at 90ºC are mixed adiabatically with 3.5 kg of water at 20ºC in a constant pressure of 1 atmosphere. Find the increase in the entropy of the total mass of water due to the mixing process (Cp of water = 4.187 kJ/kg K).	8 Marks	L3	CO1	PO2

UNIT-III

5.	a)	Draw the phase change process for pure substance or steam formation and explain.	4 Marks	L2	CO2	PO1
	b)	Air flows steadily at the rate of 0.4 kg/s through an air compressor, entering at 6 m/s with a pressure of 1 bar and a specific volume of 0.85 m^3/kg, and leaving at 4.5 m/s with a pressure of 6.9 bar and a specific volume of 0.16 m^3/kg. The internal energy of the air leaving is 88 kJ/kg, which is greater than that of the air entering. Cooling water in a jacket surrounding the cylinder absorbs heat from the air at the rate of 59 W. Calculate the power required to drive the compressor and the inlet and outlet	8 Marks	L3	CO2	PO2

cross-sectional areas.

(OR)

6.	a)	Write Helmholtz function and Gibbs function.	4 Marks	L1	CO2	PO1
	b)	An adiabatic vessel contains 3 kg of water at 27ºC. By Paddle-wheel work transfer, the temperature of water is increased to 32ºC. Find the entropy change of the universe, If Cp of water = 4.187 kJ/kg K.	8 Marks	L3	CO2	PO2

UNIT-IV

7.	a)	Explain the combustion analysis of hydrogen.	4 Marks	L2	CO3	PO1
	b)	Percentage volumetric analysis of a sample of flue gases of a coal-fired boiler gave CO_2=10.4, CO=0.2, O_2=7.8, N_2=81.6 (by difference). Gravimetric percentage analysis of coal was C=78, H_2=6, O_2=3 and incombustibles=13. Estimate: i) Weight of flue gases per kg of fuel. ii) Weight of excess air per kg of fuel.	8 Marks	L3	CO3	PO2

(OR)

8.	a)	The volume analysis of fuel gas is CO_2 = 14%, O_2 = 8%, and N_2=78%. Convert this volume analysis to mass analysis.	4 Marks	L3	CO3	PO2
	b)	In a boiler, the coal having 88% C, 3.8% H_2, 2.2% O_2 and remaining ash is burnt in the furnace. It is found that CO_2 going with flue gases constitute to be 12% and temperature of flue gases is 260°C. The flue gas sample is analyzed using Orsat apparatus at room temperature. Determine the percentage of CO_2 that would be there for complete combustion of fuel.	8 Marks	L3	CO3	PO2

UNIT-V

9.	a)	Explain the working of Spark Ignition (SI) engine.	4 Marks	L2	CO4	PO1
	b)	In an air-standard Otto cycle, the compression ratio is 10. The condition at the beginning of the compression process is 100 kPa and 27ºC. Heat added at constant volume is 1500 kJ/kg, while 700 kJ/kg of heat is rejected during the other constant volume process in the cycle. Specific gas constant for air = 0.287 kJ/kg K. Determine mean effective pressure of the cycle.	8 Marks	L3	CO4	PO2

(OR)

10.	a)	Show that efficiency of the Otto cycle depends only on compression ratio.	4 Marks	L2	CO4	PO1
	b)	In an air standard Diesel cycle, the compression ratio is 15, and at the beginning of isentropic compression, the temperature is 15ºC and the pressure is 0.15 MPa. Heat is added until the temperature at the end of the constant pressure process is 1400ºC. Calculate: i) the cut-off ratio. ii) the cycle efficiency.	8 Marks	L3	CO4	PO2

KINEMATICS OF MACHINERY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain how the velocities of a slider and the connecting rod are obtained in a slider crank mechanism.	6 Marks	L2	CO1	PO1
	b)	Distinguish between: i) Mechanism and Machine. ii) Kinematics and Dynamics. iii) Analysis and Synthesis of mechanisms.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Explain the terms: i) Lower pair. ii) Higher pair. iii) Kinematic chain. iv) Inversion.	4 Marks	L2	CO1	PO1
	b)	The lengths of various links of a mechanisms shown in fig are as follows: OA=150mm, CD=125mm, AC=600mm, BD=500mm, CQ=QD=145mm, OQ=625mm The crank OA rotates at 60 rpm in the counter clockwise direction. Determine the velocity of the slider B and the angular velocity of the link BD when the crank has turned an angle of 45^0 with the vertical. 	8 Marks	L3	CO1	PO1

UNIT-II

3.	a)	Show that in Watt's straight line motion mechanism, the tracing point P on the coupler divides it in the ratio of the length of the oscillating links which are connected by it.	6 Marks	L3	CO3	PO1 PO2
	b)	Explain, through a Polar velocity diagram of Hook's Joint, the variation in the speed of the driven shaft with change in the speed of driving shaft and mark the salient features on the diagram.	6 Marks	L2	CO3	PO1, PO2
		(OR)				
4.	a)	List the advantages and disadvantages of Davis steering gear.	3 Marks	L1	CO4	PO1 PO2
	b)	What condition is to be satisfied by the Davis steering gear-whenever the vehicle is taking a turn - for any radius of curvature of the path of the vehicle? Derive the expression of this condition.	4 Marks	L2	CO4	PO1 PO2
	c)	Draw a neat sketch of the Peaucellier straight line motion mechanism, and prove that it produces an exact straight line motion.	5 Marks	L4	CO4	PO1 PO2

UNIT-III

5.	a)	What is the difference between a simple gear train and a compound gear train? Explain with the help of sketches.	4 Marks	L3	CO5	PO1 PO2 PO3
	b)	An epicyclic gear consists of three gears A, B and C as shown in Fig. The gear A has 72 internal teeth and gear C has 32 external teeth. The gear B meshes with both A and C and is carried on an arm EF which rotates about the centre of A at 18 r.p.m. If the gear A is fixed, determine the speed of gears B and C. 	8 Marks	L4	CO5	PO1 PO2 PO3

(OR)

6.		A pinion of 20 involute teeth and 125 mm pitch circle diameter drives a rack. The addendum of both pinion and rack is 6.25 mm. What is the least pressure angle which can be used to avoid interference? With this pressure angle, find the length of the arc of contact and the minimum number of teeth in contact at a time.	12 Marks	L4	CO5	PO1 PO2 PO3

UNIT-IV

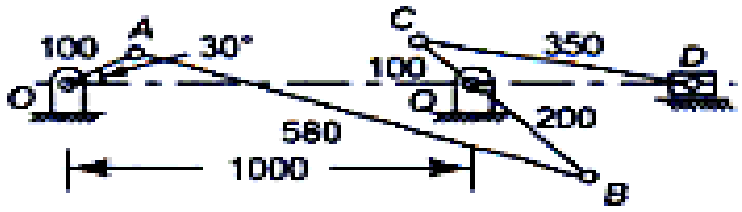
7.	a)	Deduce expressions for the velocity and acceleration of the follower when it moves with simple harmonic motion	5 Marks	L3	CO6	PO1 PO2 PO3
	b)	A cam operating an oscillating roller follower with minimum radius of cam=44mm, Diameter of roller=14mm, Length of the follower arm=40mm, Distance of fulcrum centre from cam centre=50mm, Angle of ascent=750, Angle of descent =1050, Angle of dwell for follower in the highest position=600, Angle of oscillation of follower=280. Draw the profile of the cam if the ascent and descent both take place with SHM.	7 Marks	L4	CO6	PO1 PO2 PO3

(OR)

8.	a)	Explain with sketches the different types of cams and followers.	4 Marks	L2	CO6	PO1 PO2 PO3
	b)	A cam is to give the following motion to a knife-edged follower : 1. Outstroke during 60° of cam rotation ; 2. Dwell for the next 30° of cam rotation ; 3. Return stroke during next 60° of cam rotation, and 4. Dwell for the remaining 210° of cam rotation. The stroke of the follower is 40 mm and the minimum radius of the cam is 50 mm. The follower moves with uniform velocity during both the outstroke and return strokes. Draw the profile of the cam when i) the axis of the follower passes through the axis of the cam shaft, and ii) the axis of the follower is offset by 20 mm from the axis of the cam shaft.	8 Marks	L3	CO6	PO1 PO2 PO3

UNIT-V

9.	Locate all the instantaneous centers of the mechanism as shown in figure. The dimensions of the links are OA=100mm, AB=580mm, BC=300mm, QC=100mm and CD=350mm. The crank OA rotates clockwise at 150 r.p.m. For the position when the crank OA makes an angle of 300 with the horizontal. Determine the i) Linear velocities of the pivot points B, C and D ii) Angular velocities of the links AB, BC and CD.	12 Marks	L3	CO2	PO1 PO2 PO3



(OR)

10.	PQRS is a four bar chain with link PS fixed. The lengths of the links are PQ = 62.5 mm ; QR = 175 mm ; RS = 112.5 mm ; and PS = 200 mm. The crank PQ rotates at 10 rad/s clockwise. Draw the velocity and acceleration diagram when angle QPS = 60° and Q and R lie on the same side of PS. Find the angular velocity and angular acceleration of links QR and RS.	12 Marks	L4	CO2	PO1 PO2 PO3

II B.Tech I Semester (SVEC-19) Supplementary Examinations January – 2022

STRENGTH OF MATERIALS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

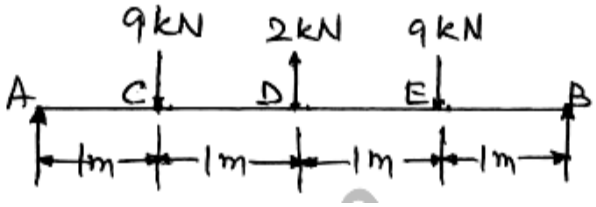
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Determine the Poisson's ratio and bulk modulus of a material, for which Young's modulus is 1.2×10^5 N/mm² and modulus of rigidity is 4.8×10^4 N/mm².	4 Marks	L1	CO1	PO1
	b)	An axial pulls of 40 kN is acting on a bar consisting of three sections of length 30 cm, 25 cm and 20 cm and diameters 2 cm, 4 cm, 5 cm respectively, if E = 2×10^5 N/mm² determine i) Stress in each section. ii) Total extension of the bar.	8 Marks	L3	CO1	PO3
		(OR)				
2.	a)	A steel bar is 4m long and it's both ends are firmly fixed to two walls. The original temperature of the bar is 40°C. If the bar is cooled to 25°C, determine the thermal stress and strain in the bar. Assume Young's modulus of steel 200kN/mm² and co-efficient of linear expansion 12×10^{-6} per °C.	6 Marks	L1	CO1	PO1
	b)	A hollow steel cylinder of 300mm length, 150mm inside diameter and 3mm uniform wall thickness is filled with concrete and compressed between two rigid parallel plates at the ends by a load 600 kN. Find the compressive stress in each material and the total shortening of the cylinder if the Young's modulus of steel = 2×10^5 N/mm² and Young's modulus of concrete = 2×10^4 N/mm².	6 Marks	L3	CO1	PO3

UNIT-II

3.	a)	Explain the concept of shear force and bending moment.	4 Marks	L1	CO2	PO1
	b)	Draw the shear force and bending moment diagrams for the beam shown below.	8 Marks	L2	CO2	PO3



(OR)

4.		A cantilever is subjected to a download load of 3000N at its free end and an upward vertical force of 12000 N at the middle. The cantilever is 12m long and supports a uniformly distributed load of 1000N per meter run. Draw the B.M. and S.F. diagrams.	12 Marks	L3	CO2	PO3

UNIT-III

5.	a)	Two principal stresses at a point in a bar are 200 N/mm² (tensile) and 100 N/mm² (compressive). Determine the resultant stress in the magnitude and direction on a plane inclined at 60° to the axis of the major principal stress. Also determine the maximum intensity of the shear stress.	6 Marks	L1	CO3	PO1
	b)	What assumptions are made in the theory of the simple bending?	6 Marks	L2	CO3	PO3

(OR)

6.	a)	A straight cylindrical bar is 16mm diameter and 1.2m long. When freely supported at its two ends horizontally under a concentrated load of 90N at centre develops some bending stress for a central deflection of 5mm. Find this bending stress developed. What load is required to buckle it when loaded vertically?	5 Marks	L1	CO3	PO1
	b)	Two wooden planks 150mm x 50mm each are connected to form a T-section of a beam. If a moment of 3.4kN-m is applied around the horizontal neutral axis, inducing tension below the neutral axis, find the stresses in extreme fibres of the cross-section.	7 Marks	L2	CO3	PO3

UNIT-IV

7.	a)	Derive the torsion equation, explain its assumptions and compare strengths of solid and hollow shafts.	6 Marks	L2	CO4	PO2
	b)	Determine the diameters of a hollow shaft transmitting 300 kW at 250 r.p.m. The maximum shear stress in the shaft should not exceed 30MPa. Assume the ratio of inner to outer diameter (di/do) = 0.75 and modulus of rigidity (C) = 100 GPa.	6 Marks	L3	CO4	PO3

(OR)

8.	a)	Explain in brief about principal planes and principal stresses.	5 Marks	L2	CO4	PO2
	b)	Find the principal stresses, maximum shear stress and all the angles of an element y = 180MPa and T_{xy} = 80MPa (CCW) both analytically σ_x = –120MPa, σsubjected to and graphically.	7 Marks	L3	CO4	PO3

UNIT-V

9.	a)	Find the deflection of a simply supported beam with a central point load by Moment Area Method.	6 Marks	L1	CO5	PO2
	b)	A Cantilever of length '2a' is carrying 'W' load at free end and 'W' load at the centre. Using Moment Area method, determine the slope and deflection at the free end.	6 Marks	L2	CO5	PO3

(OR)

10.		What is Macaulay's method? Derive an expression for deflection at any section of a simply supported beam with eccentric point load, using Macaulay's method.	12 Marks	L3	CO5	PO2

ELECTRONIC DEVICES AND CIRCUITS

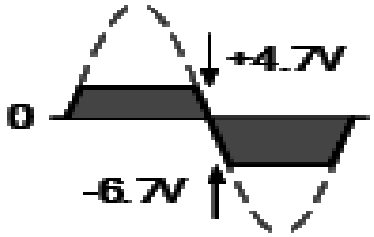
[Electrical and Electronics Engineering, Electronics and Communication Engineering, Computer Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Design a clipper circuit to generate the wave form shown below.	6 Marks	L1	CO1	PO1



Assume $V_{in\ p\text{-}p}$ =30V and the diode is non-ideal and V_{th}=0.7V.

	b)	Realize a low pass filter having cut-off frequency of 1KHz. Derive an expression for the output at steady state condition when the circuit excited by a unit step.	6 Marks	L2	CO1	PO2

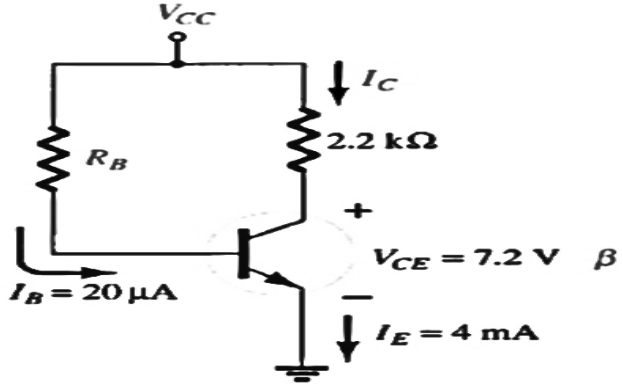
(OR)

2.	a)	Sketch the out waveform of the circuit show below for a give sinusoidal input of 10V peak, V=3V and assume the diode in non-ideal and having a threshold voltage of 0.7V.	6 Marks	L1	CO1	PO1

	b)	Explain the operation of a negative clamper circuit with neat sketch. Condition: Assume the diode is non-ideal.	6 Marks	L3	CO1	PO4

UNIT-II

3.	a)	For a voltage divider biasing circuit, calculate the values of R_C, R_1, and R_2. V_{CC} = 12V. The quiescent values are I_C=2mA, and V_{CE}=6V. Assume β=100, V_{BE}=0.7V and R_E=200Ω	6 Marks	L1	CO2	PO1
	b)		6 Marks	L2	CO2	PO4



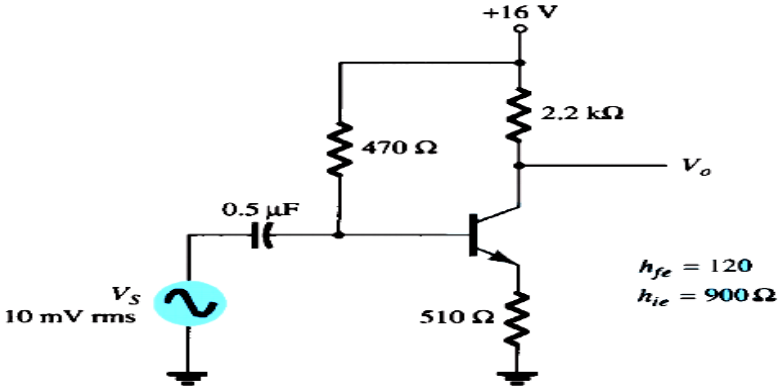
Determine I_C, V_{CC}, β and R_B

(OR)

4.	a)	For a fixed bias circuit derive the expressions for S, S' and S''	6 Marks	L3	CO2	PO3
	b)	Explain the concept of negative feedback in collector to base bias with emitter resistor.	6 Marks	L2	CO2	PO2

UNIT-III

5.		Calculate the small signal voltage gain, input and output impedances of amplifier configuration shown below.	12 Marks	L4	CO3	PO2



(OR)

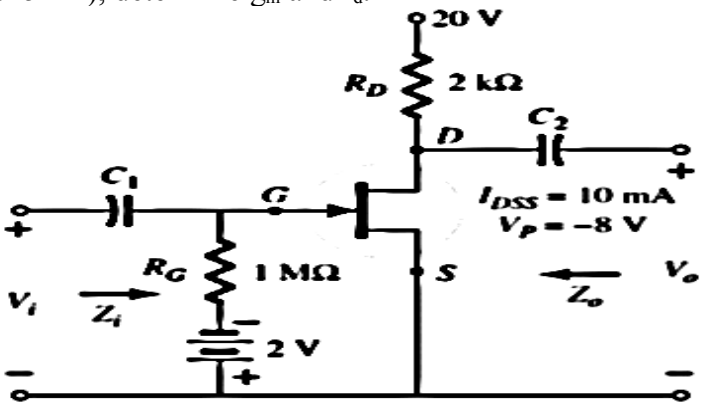
6.	a)	Draw the *h*-parameter model of a CB configuration.	6 Marks	L2	CO3	PO1
	b)	Explain the advantages of *h*-parameter model over R_e model of a transistor.	6 Marks	L3	CO3	PO1

UNIT-IV

7.	a)	Explain the enhancement mode operation of a *n*MOSFET with neat sketchs.	6 Marks	L2	CO4	PO4
	b)	Derive the drain current expression of MOSFET and also derive the expression when the MOSFET operating in saturation.	6 Marks	L2	CO4	PO2

(OR)

8.	a)	For a given I_{DSS} of 10mA and V_P = -5V draw the transfer characteristics of a JFET.	6 Marks	L2	CO4	PO1
	b)	For a fixed bias shown below having an operating point of (-3V, 6.625mA), determine g_m and r_d.	6 Marks	L2	CO4	PO2



UNIT-V

9.	a)	Explain the operation of tunnel diode using energy band diagram.	6 Marks	L3	CO5	PO1
	b)	Draw the construction of a DIAC and explain the various modes of operation.	6 Marks	L2	CO5	PO2

(OR)

10.	a)	Explain operation of a varactor diode and draw the C-V characteristics.	6 Marks	L2	CO5	PO1
	b)	Explain the working of SCR and draw the I-V characteristics.	6 Marks	L3	CO5	PO4

SIGNALS AND SYSTEMS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Given a signal $x(t) = \begin{cases} 1; & 0 < t < 2; \\ 0: & otherwise \end{cases}$ Plot the following signals x(-t), x(3t), x(t/3), 5x(-2t+3)	6 Marks	L3	CO1	PO2
	b)	Why the unit step signal u(t) is neither even nor odd? Determine the even and odd parts of u(t).	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Check whether the following system is Static or dynamic, Linear or Non-linear, Causal or Non-causal, Time invariant or time-variant. $y(n) = \log_{10}\lvert x(n)\rvert$.	6 Marks	L6	CO1	PO2
	b)	Prove that $x(t) * \delta(t - t_0) = x(t - t_0)$.	6 Marks	L4	CO1	PO2

UNIT-II

3.	a)	Discuss the concept of exponential Fourier series and derive the Expressions for coefficients. Also discuss the concept of line spectrum.	6 Marks	L2	CO2	PO3
	b)	Determine the Fourier Transform of: i) $f_1(t) = e^{-at}\cos(bt)$. ii) $f_2(t) = t\cos(at)$.	6 Marks	L3	CO2	PO2
		(OR)				
4.	a)	Expand the following periodic function f(t) over the interval (-4, 4) by a complex Fourier Series $f(t) = \begin{cases} 1; & -2 < t < 2; \\ 0: & otherwise \end{cases}$	6 Marks	L3	CO2	PO2
	b)	State and prove any three properties of Fourier Transform.	6 Marks	L2	CO2	PO1

UNIT-III

5.	a)	Explain the method of detection of periodic signals in the presence of noise by correlation.	6 Marks	L2	CO3	PO1
	b)	Determine the cross correlation between the two sequences x(n) = {1,0,01} and h(n) = { 4,3,2,1}	6 Marks	L3	CO3	PO2
		(OR)				
6.	a)	A filter has an input $x(t) = e^{-2t}u(t)$ and the transfer function, $H(w) = \frac{1}{1 + jw}$. Find Energy Spectral Density of the output.	6 Marks	L3	CO3	PO4
	b)	State and prove the relation between convolution and correlation.	6 Marks	L2	CO3	PO3

UNIT-IV

7.	a)	Find the inverse Laplace Transform of $X(s) = \frac{2}{(s+4)(s-1)}$, if the Region of Convergence is: i) $\mathrm{Re}(s) > 1$. ii) $\mathrm{Re}(s) < -4$.	6 Marks	L3	CO4	PO2
	b)	Define Region of convergence and state its properties.	6 Marks	L1	CO4	PO1
		(OR)				

8.	a)	Find the inverse Laplace Transform of $X(s) = \frac{1}{(s+5)(s-1)}$ if the Region of Convergence is $-5 < \mathrm{Re}(s) < -1$.	6 Marks	L3	CO4	PO2
	b)	State and prove any three properties of Laplace transform.	6 Marks	L2	CO4	PO1

UNIT-V

9.	a)	Define Nyquist rate. Compare the merits and demerits of performing sampling using impulse, Natural and Flat-top sampling techniques.	6 Marks	L4	CO4	PO4
	b)	Discuss the effect of aliasing due to under sampling.	6 Marks	L2	CO4	PO4

(OR)

10.	a)	A signal $x(t) = \sin c(150\pi t)$ is sampled at a rate of i) 100 Hz ii) 200Hz iii) 300 Hz. For each of these three cases, explain if you can recover the signal x(t) from the sampled signal.	6 Marks	L3	CO4	PO2
	b)	Discuss the process of reconstructing the signal from its samples.	6 Marks	L2	CO4	PO4

SWITCHING THEORY AND LOGIC DESIGN

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Perform the following in BCD. i) 679.6+536.8. ii) 206.7-147.8.	6 Marks	L3	CO1	PO2
	b)	Explain about Error detection and correction codes.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Subtract the following decimal numbers using the 12-bit 2's complement methods. i)52-17. ii) 46-84. iii) 63.75-17.5.	6 Marks	L3	CO1	PO4
	b)	List out the binary codes in Number Systems.	6 Marks	L4	CO1	PO1

UNIT-II

3.	a)	Give the Minimized Expression for $F=\Sigma_{wxyz}(1,3,4,5,9,11,12,13,14,15)$ using K-Maps and indicate the Prime Implicants.	6 Marks	L3	CO1	PO1
	b)	Derive the Boolean expressions for T_1 through T_4. Evaluate the outputs F_1 and F_2 as a function of the four inputs. **CO 1** **(2M)** 	6 Marks	L5	CO1	PO2
		(OR)				
4.	a)	Express the following function as a sum of minterms and as a product of maxterms : $F(A, B, C, D) = B'D + A'D + BD$.	6 Marks	L4	CO1	PO3
	b)	Simplify the following Boolean function F, together with the don't-care conditions d , and then express the simplified function in sum-of-minterms form: $F(A, B, C, D) = \sum(0, 6, 8, 13, 14) + d(2,4, 10)$.	6 Marks	L4	CO1	PO4

UNIT-III

5.	a)	Design and explain the Carry look ahead adder.	6 Marks	L6	CO2	PO1
	b)	Design and explain 3X8 Decoder.	6 Marks	L6	CO2	PO2
		(OR)				
6.	a)	Design a magnitude comparator with necessary equations.	6 Marks	L6	CO2	PO4

	b)	Draw the circuit of Binary Adder-Subtractor and explain its operation.	6 Marks	L4	CO2	PO4

UNIT-IV

7.	a)	Convert JK flip flop to T flip flop.	6 Marks	L3	CO2	PO3
	b)	How the JK-Flip Flops used as divide-by-2 devices? Explain with the help of the timing diagram, by taking 3 numbers of JK-Flip Flops connected to divide the input frequency.	6 Marks	L4	CO2	PO1
		(OR)				
8.	a)	Explain state machine synthesis using transition lists.	6 Marks	L2	CO3	PO3
	b)	Differentiate between Ring counter and Johnson Counter with examples.	6 Marks	L4	CO2	PO6

UNIT-V

9.	a)	Explain the difference between synchronous and asynchronous sequential circuits.	6 Marks	L2	CO3	PO1
	b)	Explain the difference between stable and unstable states.	6 Marks	L2	CO3	PO2
		(OR)				
10.	a)	Explain about different hazards in combinational circuits.	6 Marks	L1	CO4	PO4
	b)	Distinguish between ROM, PLA and PAL.	6 Marks	L4	CO4	PO4

CODE No.: 19BT30501 SVEC-19

[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.		Explain in detail about the following: i) Raster-Scan Displays. ii) Random-Scan Displays. iii) Color CRT Monitors.	12 Marks	L1	CO1	PO1
		(OR)				
2.	a)	List out the operations of Graphic Monitors and Workstations.	4 Marks	L1	CO1	PO1
	b)	Summarize the various steps involved in Midpoint Circle algorithm and explain it with an example.	8 Marks	L2	CO2	PO2
		UNIT-II				
3.	a)	Define Affine Transformation and write a short note on it.	4 Marks	L1	CO2	PO1
	b)	Explain in detail about Transformations between coordinate systems with suitable example.	8 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Write a pseudo code for filling color in an object using Boundary fill algorithm to fill an 8 connected region.	6 Marks	L1	CO2	PO1
	b)	Explain in detail about various components of Composite Transformations.	6 Marks	L1	CO2	PO1
		UNIT-III				
5.	a)	Explain in detail about the following with suitable examples related to polygon surfaces. i) Polygon Tables. ii) Plane Equations. iii) Polygon Meshes.	6 Marks	L2	CO3	PO2
	b)	Explain in detail about BEZIER CURVES with a suitable example program that illustrates a method for generating Bezier curves.	6 Marks	L2	CO3	PO2
		(OR)				
6.	a)	Explain in detail about the following related to quadradic surfaces. i) Sphere. ii) Ellipsoid. iii) Torus	6 Marks	L2	CO3	PO2
	b)	Define spline curve and illustrate the differences between interpolation and approximation splines.	6 Marks	L2	CO3	PO2
		UNIT-IV				
7.	a)	Explain in detail about parallel projection with suitable example.	8 Marks	L2	CO3	PO2
	b)	Illustrate in brief about three-dimensional viewing functions.	4 Marks	L2	CO3	PO1
		(OR)				
8.	a)	Explain in detail about perspective projection with suitable example.	7 Marks	L2	CO3	PO2
	b)	Illustrate in brief about composite transformations with an example.	5 Marks	L2	CO3	PO2

UNIT-V

9.	a)	List out the two basic techniques for anti-aliasing in ray-tracing algorithms with suitable example for each.	5 Marks	L2	CO4	PO2
	b)	Explain in detail about Distributed Ray Tracing sampling method.	7 Marks	L2	CO4	PO2

(OR)

10.	a)	Define Phong Shading and explain in detail about Fast Phong Shading	6 Marks	L2	CO4	PO2
	b)	Explain in detail about Gouraud Shading in detail with a suitable example.	6 Marks	L2	CO4	PO2

		UNIT-I				
1.	a)	Explain about IEEE floating point representation and perform addition of two floating numbers.	6 Marks	L2	CO1	PO1
	b)	Explain the One stage of Arithmetic logic shift unit with neat sketch.	6 Marks	L2	CO3	PO3
		(OR)				
2.	a)	Formulate the hardware and draw the flowchart for Booth's Multiplication. Solve (-9) x (-13) by applying Booth's Multiplication algorithm.	9 Marks	L3	CO1	PO3
	b)	Draw the block diagram of 4-bit arithmetic circuit and explain the functionality and show in tabular form.	3 Marks	L2	CO2	PO1
		UNIT-II				
3.	a)	Explain various registers that are connected to a common bus in a basic computer with neat diagram.	6 Marks	L2	CO2	PO2
	b)	Discuss Control unit of basic computer with neat sketch.	6 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Explain various CPU organizations and evaluate the expression X = (A+B) * (C+D) in: i) Three address instructions. ii) Two address instructions. iii) One address instructions. iv) Zero address instructions.	6 Marks	L2	CO2	PO1
	b)	Explain about basic instruction cycle. Explain are the different phases of instruction cycle with neat diagrams and draw the flow chart.	6 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Explain the design of control unit with micro program sequencer with neat diagram.	6 Marks	L2	CO2	PO1
	b)	Explain Priority interrupt Daisy chaining priority with neat sketch.	6 Marks	L2	CO4	PO2
		(OR)				
6.	a)	Differentiate between hardwired control and micro programmed control.	6 Marks	L4	CO2	PO2
	b)	Explain PCI physical and logical architecture.	6 Marks	L2	CO2	PO1
		UNIT-IV				
7.	a)	Explain different Read only memories.	6 Marks	L2	CO3	PO3
	b)	What for cache memory is used? Explain three types of mapping procedures of cache memory organization.	6 Marks	L2	CO2	PO1
		(OR)				

8.	a)	Compare and contrast Synchronous and Asynchronous DRAMS.	6 Marks	L4	CO4	PO2
	b)	Briefly explain Non volatile Solid state memory Technologies	6 Marks	L2	CO2	PO1

UNIT-V

9.	a)	Discuss about Flynn's classification of parallel processor systems.	6 Marks	L2	CO2	PO2
	b)	Explain Inter-processor arbitration	6 Marks	L2	CO2	PO1

(OR)

10.	a)	Describe Hardware performance issues of multi core computers.	6 Marks	L2	CO2	PO1
	b)	Discuss features of Intel core i7-990X.	6 Marks	L2	CO4	PO2

DATA STRUCTURES

[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Describe in detail about Polynomial manipulation in linked list.	6 Marks	L1	CO1	PO1
	b)	What is a linked list? Describe the suitable routine segments for any four operations.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Given a list 100, 200, 300, 400, generalize the steps and write routine to delete a node from the beginning of the linked list, deletion of last node in a list and deletion of middle node in a list.	6 Marks	L5	CO4	PO3
	b)	Examine a doubly linked list with neat diagram.	6 Marks	L3	CO1	PO2
		UNIT-II				
3.	a)	Develop an algorithm for deleting an element in a double ended queue.	6 Marks	L6	CO1	PO3
	b)	Write algorithm to check if the parenthesized arithmetic expression contains balanced parenthesis and to convert such expression to postfix form and evaluate it. Illustrate with example.	6 Marks	L2	CO1	PO2
		(OR)				
4.	a)	Give an algorithm to convert an infix expression to a postfix expression using stack with suitable example.	6 Marks	L2	CO1	PO1
	b)	Illustrate the application of stack with an example.	6 Marks	L3	CO1	PO1
		UNIT-III				
5.	a)	Illustrate the steps in the construction of a heap of records with the following key values:12, 33, 67, 8, 7, 80, 5, 23.	6 Marks	L3	CO4	PO1
	b)	Write an algorithm for preorder, inorder and postorder traversal of a binary tree.	6 Marks	L1	CO2	PO1
		(OR)				
6.	a)	Create a binary search tree using the following data elements 45, 39, 56, 12, 34, 78, 32, 10, 89, 54, 67, 81.	6 Marks	L5	CO4	PO3
	b)	Construct B Tree of order m=5 for the following keys. 1, 12, 8, 2, 25, 5, 14, 28, 17, 7, 52, 16, 48, 68, 3, 26, 29, 53, 55, 45.	6 Marks	L6	CO4	PO3
		UNIT-IV				
7.	a)	Compare working of binary search and linear search technique with example.	6 Marks	L2	CO3	PO2
	b)	Using binary search, search the number 26 from the list of numbers and give the steps. 10, 7, 17, 26, 32, 92.	6 Marks	L6	CO4	PO3
		(OR)				
8.	a)	Select the best sorting method out of the following - insertion sort, quick sort and merge sort and give justification.	6 Marks	L5	CO3	PO2
	b)	Sort the given integers and Show the intermediate results using shellsort: 39, 9, 81, 45, 90, 27, 72, 18.	6 Marks	L3	CO4	PO3

UNIT-V

9.	a)	List the different types of hashing techniques. Explain them in detail with an example.	6 Marks	L1	CO3	PO1
	b)	Assess the minimum number spanning tree possible for a complete graph with **n** vertices.	6 Marks	L5	CO2	PO2
		(OR)				
10.	a)	Illustrate Kruskal's algorithm to find the minimum spanning tree of a graph.	6 Marks	L3	CO2	PO1
	b)	Explain weakly connected graph and strongly connected graph with example.	6 Marks	L5	CO2	PO1

CODE No.: 19BT31201 SVEC-19

II B.Tech I Semester (SVEC-19) Supplementary Examinations January – 2022

DISCRETE MATHEMATICAL STRUCTURES

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Construct a truth table for $[(p \vee q) \wedge (\sim r)] \leftrightarrow q$.	6 Marks	L2	CO1	PO1
	b)	Determine whether the following inference is valid or faulty. If the inference is valid, provide some evidence which will confirm its validity. If the inference is faulty, provide a combination of truth values that indicate a fallacy. "If today is Ramu's birthday, then today is October 21. Today is October 21. Hence, today is Ramu's birthday."	6 Marks	L4	CO1	PO4
		(OR)				
2.	a)	Verify that the following argument is valid by translating in to symbols and using truth tables to check for tautologies. "If Raghu is a mathematician, then he is ambitious. If Raghu is early riser, then he does not like eat meal. If Raghu is ambitious, then he is an early riser. Hence, if Raghu is a mathematician, then he does not like eat meal."	6 Marks	L3	CO1	PO4
	b)	Find the disjunctive normal form of $\sim (p \vee q) \leftrightarrow (p \wedge q)$.	6 Marks	L2	CO1	PO1

UNIT-II

3.	a)	If the relations R and S are both reflexive, show that $R \cup S$ and $R \cap S$ are also reflexive.	6 Marks	L3	CO2	PO1
	b)	Determine that the poset ({1, 3, 6, 9, 12}, /) is a lattice and also prove that it is a distributive lattice.	6 Marks	L3	CO2	PO1
		(OR)				
4.	a)	Define lattice. Illustrate properties of lattices.	6 Marks	L2	CO2	PO1
	b)	Draw a poset diagram for the poset (A, /), where A = {2, 3, 4, 9, 12, 18}.	6 Marks	L2	CO2	PO1

UNIT-III

5.	a)	Examine whether a semi group with more than idempotent can be a group or not. Justify your answer by giving an example.	6 Marks	L3	CO3	PO2
	b)	If N is the set of positive integers and * denotes the least common multiple on N, show that (N, *) is a commutative semi group. Find the identity element of *.	6 Marks	L3	CO3	PO1
		(OR)				

6.	a)	Define the following: i) group. ii) sub group. iii) semi group. iv) monoid.	6 Marks	L1	CO3	PO1
	b)	If S = NxN is the set of ordered pairs of positive integers and * is an operation on S defined by (a, b)*(c, d) = (a + c, b + d), then show that (S, ∗) is semi group. If f: (S, ∗) → (Z, +) is defined by f(a, b) = a – b, then prove that f is homomorphism.	6 Marks	L2	CO3	PO3

UNIT-IV

7.	a)	There are 250 students in an engineering college of these 188 have taken a course in Fortran, 100 have taken a course in C and 35 have taken a course in Java. Further 88 have taken courses in both Fortran and C, 23 have taken courses in both C and Java, and 29 have taken courses in both Fortran and Java. If 19 of these students have taken all the three courses, how many of these 250 students have not taken a course in any of these programming languages?	6 Marks	L3	CO4	PO2
	b)	How many bit strings of length 10 have i) exactly three 0's? ii) at least three 1's? iii) an odd number of 0's?	6 Marks	L3	CO4	PO1

(OR)

8.	a)	Identify the coefficient of x^{14} in $(1 + x + x^2 + x^3 + x^4 + \ldots + x^8)^{10}$.	6 Marks	L4	CO4	PO2
	b)	Solve the recurrence relation $u_n + 7\ u_n\text{-}1 + 8\ u_n\text{-}2 = 0$ for $n \geq 2$, $u_0 = 1$, $u_1 = -2$.	6 Marks	L4	CO4	PO2

UNIT-V

9.	a)	Determine whether the following graphs are isomorphic.	6 Marks	L4	CO5	PO3

	b)	Prove that a tree with n vertices has exactly n – 1 edges.	6 Marks	L2	CO5	PO1

(OR)

10	a)	Illustrate Depth-First search algorithm with an example.	6 Marks	L2	CO5	PO1
·	b)	Define spanning tree. Draw all the spanning trees of the following graph.	6 Marks	L2	CO5	PO4

NUMERICAL METHODS, PROBABILITY AND STATISTICS
[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) Find the root of the equation $2x - \log_{10} x = 7$, which lies between 3.5 and 4 by Regula –Falsi method. — 6 Marks L1 CO1 PO1

   b) Using the technique of Lagrange's interpolation, express the function $f(x) = \frac{3x^2 + x + 1}{(x-1)(x-2)(x-3)}$ as a sum of partial fractions. — 6 Marks L3 CO1 PO2

(OR)

2. a) Derive a recurrence formula for the reciprocal of a natural number N by Newton-Raphson method and hence find the reciprocal of 18. — 6 Marks L3 CO1 PO1

   b) State Newton's backward interpolation formula and using it evaluate cos73° from the following data — 6 Marks L1 CO1 PO1

x°	10	20	30	40	50	60	70	80
Cos x°	0.9848	0.9397	0.866	0.766	0.6428	0.500	0.342	0.1737

UNIT-II

3. a) The following data gives corresponding values of pressure(p) and specific volume(v) of superheated system. — 6 Marks L5 CO1 PO2

v	2	4	6	8	10
p	10.5	42.7	25.3	16.7	13

evaluate the rate of change of pressure with respect to volume when $v = 2$.

   b) State Simpson's $\frac{1}{3}$ rule and applying it evaluate $\int_0^{\frac{\pi}{2}} \sqrt{\sin\theta}\, d\theta$ for taking six subintervals. — 6 Marks L1 CO1 PO1

(OR)

4. a) Using Simpson's $\frac{3}{8}$ rule evaluate $\int_0^6 \frac{dx}{1+x^2}$ by dividing the range into six equal parts. — 6 Marks L3 CO1 PO1

   b) Find $y(0.1)$ using Taylor's series method given that $\frac{dy}{dx} = xy + 1$ *and* $y(0) = 1$. — 6 Marks L1 CO1 PO2

UNIT-III

5. a) A random variable X has the following probability function — 6 Marks L1 CO2 PO1

$X=x$	0	1	3	4	5	6	7
$P(X=x)$	0	k	$2k$	$2k$	$3k$	k^2	$7k^2+k$

Find: i) k ii) $P(X < 6)$ iii) $P(0 < X < 5)$.

b) A continuous random variable X has a probability density function given by $f(x) = \begin{cases} kxe^{-\lambda x}, & x \geq 0, \lambda > 0 \\ 0, & otherwise \end{cases}$ Determine the value of k and obtain the mean and variance of X. — 6 Marks L3 CO2 PO1

(OR)

6. a) A die is tossed thrice. A success is getting 1 or 6 on a toss. Find the mean and variance of the number of successes. — 6 Marks L1 CO2 PO2

b) If X is a continuous random variable with probability density function is given by $f(x) = \begin{cases} x^2, & 0 \leq x \leq 1 \\ 0, & otherwise \end{cases}$ — 6 Marks L5 CO2 PO1

if $P(a \leq x \leq 1) = \frac{19}{81}$ then estimate the value of a.

UNIT-IV

7. a) In eight throws of a die 5 or 6 is considered a success. Find the mean number of success and the standard deviation. — 6 Marks L1 CO2 PO1

b) A hospital switch board receives an average of 4 emergency calls in a 10 minute interval. Applying appropriate probability techniques, estimate the probability that — 6 Marks L3 CO2 PO2

i) there are at most 2 emergency calls in a 10 minute interval.

ii) there are exactly 3 emergency calls in a10 minute interval.

(OR)

8. a) If two cards are drawn from a pack of 52 cards which are diamonds, using Poisson distribution find the probability of getting two diamonds at least 3 times in 51 consecutive trials of two cards drawing each time. — 6 Marks L3 CO2 PO1

b) Suppose the weights of 800 male students are normally distributed with mean 140 pounds and standard deviation 10 pounds. Find the number of students whose weights are — 6 Marks L1 CO2 PO1

i) between 138 and 148 pounds.

ii) more than 152 pounds.

UNIT-V

9. a) Explain briefly about : — 6 Marks L2 CO2 PO1

i) critical region. ii) level of significance.

iii) degrees of freedom.

b) The time taken by workers in performing a job by method I and method II is given below: — 6 Marks L3 CO2 PO4

Method I	20	16	26	27	23	22	-
Method II	27	33	42	35	32	34	38

Using appropriate statistical technique analyse the data show that the variances of time distribution from population from which these samples are drawn do not differ significantly.

(OR)

10.	a)	In a random sample of 100 packages shipped by air freight 13 had some damage. Construct 95% confidence interval for the true proportion of damage package.	6 Marks	L3	CO2	PO1
	b)	A random sample of 6 steel beams has a mean compressive strength of 58392 *psi* with a standard deviation of 648 *psi*. Use this information at level of significance ($\alpha = 0.05$) to test whether the true average compressive strength of the steel from which this sample came is 58,000 *psi*. Assume normally.	6 Marks	L4	CO2	PO4

SPECIAL FUNCTIONS AND COMPLEX ANALYSIS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Show that $\Gamma(n)\Gamma(1-n)=\frac{\pi}{\sin n\pi}$ and hence evaluate $\Gamma\left(\frac{1}{4}\right)\Gamma\left(\frac{3}{4}\right)$.	12 Marks	L1	CO1	PO1
		(OR)				
2.		Define Beta and Gamma functions and express $\int_0^1 x^m(\log x)^n\,dx$ in terms of gamma function, where n is a positive integer and m > – 1.	12 Marks	L2	CO1	PO1

UNIT-II

3.	a)	State Generating function for Legendre polynomial $P_n(x)$ and show that $P_3(x)=\frac{1}{2}(5x^3-3x)$.	6 Marks	L2	CO1	PO2
	b)	State and prove the orthogonality formula for Bessel function $J_n(x)$.	6 Marks	L1	CO1	PO1
		(OR)				
4.	a)	Establish the recurrence relation $(2n+1)\,xP_n(x)=(n+1)P_{n+1}(x)+nP_{n-1}(x), n\geq 1$.	6 Marks	L2	CO1	PO2
	b)	Identify a suitable relation between $J_{n-1}(x), J_n(x)$ *and* $J_{n+1}(x)$ and hence rewrite $J_4(x)$ in terms of $J_0(x)$ *and* $J_1(x)$.	6 Marks	L2	CO1	PO2

UNIT-III

5.		Separate the real and imaginary parts of log z and find ρ such that $f(z)=\frac{1}{2}\log(x^2+y^2)+i\tan^{-1}\left(\frac{px}{y}\right)$ is analytic.	12 Marks	L3	CO2	PO1
		(OR)				
6.	a)	Define fixed point of a bilinear transformation and find the fixed points of the transformation $w=\frac{2i-6z}{iz-3}$.	6 Marks	L2	CO2	PO1
	b)	Making use of the transformation $w=z+3+2i$, establish the image for the circle $\lvert z\rvert=2$.	6 Marks	L3	CO2	PO2

UNIT-IV

7.	a)	Evaluate the integral $\int_C \frac{\sin\pi z^2 + \cos\pi z^2}{(z-1)(z-2)}dz$ where C is the circle $\|z\| = 3$ using Cauchy's Integral formula.	6 Marks	L2	CO2	PO2
	b)	Construct a series containing positive and negative powers of (z -1) for the function $f(z) = \frac{z}{(z-1)(z-3)}$.	6 Marks	L3	CO2	PO2
		(OR)				
8.	a)	Determine the value of $f(2)$ if $f(a) = \int_C \frac{(2z^2 - z - 2)}{(z-a)}dz$ where c is the circle $\|z\| = 2.5$ using Cauchy's Integral formula.	6 Marks	L2	CO2	PO1
	b)	Establish Laurent's series for $f(z) = \frac{1}{z^2 - 3z + 2}$ in the region $0 < \|z-1\| < 1$.	6 Marks	L2	CO2	PO2

UNIT-V

9.		Define the residue and find the poles and corresponding residues of the function $f(z) = \frac{z^2 - 2z}{(1+z)^2(z^2+1)}$.	12 Marks	L2	CO2	PO1
		(OR)				
10.		Show that $\int_0^{2\pi} \frac{\cos 2\theta}{1 - 2a\cos\theta + a^2}d\theta = \frac{2\pi a^2}{1-a^2}$ $(a^2 < 1)$ by complex variable technique.	12 Marks	L3	CO2	PO2

FLUID MECHANICS

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	List the different types of fluid properties. Explain any five properties.	6 Marks	L2	CO1	PO1 PO10
	b)	Calculate the specific weight, specific mass, specific volume and specific gravity of a liquid having a volume of 8 m^3 and weight of 48 kN.	6 Marks	L4	CO1	PO1 PO2
		(OR)				
2.	a)	What are manometers? Explain briefly the following with neat sketch: i) Piezometer ii) U-tube manometer	6 Marks	L2	CO1	PO1 PO10
	b)	A simple manometer (U-tube) containing mercury is connected to a pipe in which an oil of specific gravity 0.8 is flowing. The pressure in the pipe is vacuum. The other end of the manometer is open to atmosphere. Find the vacuum pressure in pipe, if the difference of mercury level in the two limbs is 200 mm and height of oil in the left-limb from the center of the pipe is 150 mm below.	6 Marks	L4	CO1	PO1 PO2 PO5 PO10
		UNIT-II				
3.	a)	Differentiate between the Eulerian and Lagrangian methods of representing fluid flow. Write the expressions for convective and local accelerations.	6 Marks	L4	CO2	PO1 PO2 PO5
	b)	Determine the missing component of velocity distribution $\mathbf{u = 2x^2 + 2xy}$, $\mathbf{v = 2yz^2 + 3z^2}$, $\mathbf{w = ?}$, such that they satisfy continuity equation.	6 Marks	L4	CO2	PO1 PO2
		(OR)				
4.	a)	Derive Euler's equation of motion with a neat sketch.	6 Marks	L4	CO2	PO1 PO2 PO5 PO10
	b)	The water is flowing through a pipe having diameters 200 mm and 100 mm at sections 1 and 2 respectively. The rate of flow through the pipe is 35 liters/s. The section 1 is 6 m above datum and section 2 is 4 m above datum. If the pressure at section 1 is 400 kN/m^2, find the intensity of pressure at section 2.	6 Marks	L4	CO2	PO1 PO2 PO4 PO10
		UNIT-III				
5.	a)	List the various types of losses and explain briefly.	6 Marks	L2	CO3	PO1 PO10
	b)	In a pipe of diameter 350 mm and length 75 m water is flowing at a velocity of 2·8 m/s. Find the head lost due to friction using: i) Darcy-Weisbach formula; ii) Chezy's formula for which C = 55.	6 Marks	L4	CO3	PO1 PO2 PO4 PO5

						PO10
		(OR)				
6.	a)	Describe venturimeter and find an expression for measuring discharge of fluid through a pipe with this device.	6 Marks	L4	CO3	PO1 PO2 PO5 PO10
	b)	In an 80 mm diameter pipeline an oil of specific gravity 0·8 is flowing at the rate of 0·0125 m^3/s. A sudden expansion takes place into a second pipeline of such diameter that maximum pressure rise is obtained. Find: i) Loss of energy in sudden expansion, ii) Differential gauge length indicated by an oil-mercury manometer connected between the two pipes.	6 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO10
		UNIT-IV				
7.	a)	Define Couette flow and describe flow of viscous fluid between two parallel plates.	6 Marks	L2	CO5	PO1 PO10
	b)	Two parallel plates kept 100 mm apart have laminar flow of oil between them with a maximum velocity of 1.5 m/s. Calculate discharge per meter width, shear stress at the plates, difference in pressure between two points 20 m apart and velocity gradient at the plates.	6 Marks	L4	CO5	PO1 PO2 PO4
		(OR)				
8.	a)	Obtain an expression for velocity distribution in turbulent flow for smooth pipes and rough pipes.	6 Marks	L4	CO5	PO1 PO2 PO4
	b)	The velocities of water through a pipe of diameter 10 cm are 4 m/s and 3.5 m/s at the center of the pipe and 2 cm from the pipe center respectively. Determine the wall shearing stress in the pipe for turbulent flow.	6 Marks	L4	CO5	PO1 PO2 PO4
		UNIT-V				
9.	a)	Define dimensional analysis and explain the principle of dimensional homogeneity. Describe the procedure for obtaining the relationship between dependent and independent variables using Rayleigh's method.	6 Marks	L3	CO6	PO1 PO5
	b)	Derive the relationship for drag force on a smooth sphere of diameter D immersed in a liquid of mass density ρ and dynamic viscosity μ and moving with a velocity V using Rayleigh's method.	6 Marks	L4	CO6	PO1 PO2 PO5
		(OR)				
10.		Explain Froude model law. A 1:64 model is constructed of an open channel in concrete which has Manning's N =0.014. Find the value of N for the model.	12 Marks	L4	CO6	PO1 PO2 PO4 PO5

MECHANICS OF SOLIDS

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	A simply supported beam of span 6m has overhang on both sides with the left overhang spanning 1.5m and the right overhang spanning 2m. A uniformly distributed load of intensity 3kN/m acts throughout in the central span and overhangs. Also, a point load of intensity 5kN acts at the mid span of simply supported beam. Determine the shear force and bending moment at the salient points. Draw SFD and BMD.	12 Marks	L4	CO1	PO1 PO2 PO4 PO10
		(OR)				
2.	a)	Determine the maximum shear force and bending moment of a cantilever beam of span 'l' carrying a uniformly distributed load of w per unit run over a distance of 'a' from the fixed end where a<l. Draw SFD and BMD.	6 Marks	L4	CO1	PO1 PO2 PO4 PO10
	b)	A simply supported beam of 8m span has a central point load of 15kN. Determine the maximum shear force and bending moment. Draw shear force diagram and bending moment diagram.	6 Marks	L4	CO1	PO1 PO2 PO4 PO10
		UNIT-II				
3.	a)	Derive the relation between average shear stress and the maximum shear stress for a rectangular section and draw the shear stress distribution diagram.	4 Marks	L4	CO2	PO1 PO2 PO4 PO10
	b)	A timber beam 150mm x 250mm in cross section is simply supported at its ends and has a span of 3.5m. The maximum safe allowable stress in bending is 7500kN/m^2. Find the maximum safe U.D.L. which the beam can carry. What is the maximum shear stress in the beam for the U.D.L. calculated?	8 Marks	L6	CO2	PO1 PO2 PO4 PO6 PO10
		(OR)				
4.		A cylindrical chimney, 22m high, of uniform circular cross section has 4m external diameter and 2m internal diameter. The intensity of horizontal wind pressure is 1.2kN/m^2. Find the maximum and minimum normal stress intensities at the section, if the specific weight of masonry is 22kN/m^3.	12 Marks	L4	CO3	PO1 PO2 PO6 PO10
		UNIT-III				
5.	a)	What are the assumptions in the theory of pure torsion? Derive the equation of torsion.	6 Marks	L4	CO4	PO1 PO2
	b)	Determine the diameter of the shaft which will transmit 120kW at 160m r.p.m if the shear strength in the shaft is limited to 75N/mm^2. Find also the length of the shaft, if the twist must not exceed 1° over the entire length. Take C=8x10^4 N/mm^2.	6 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO6

(OR)

6.	a)	An open coiled helical spring consist of 12 coils each of mean diameter 60mm, the wire forming the coil being 6mm in diameter. Each coil makes an angle of 30° with the plane perpendicular to the axis of spring. i) Determine the load required to elongate the spring by 25mm and the bending and the shear stress caused by the load. ii) Calculate the axial twist that would cause a bending stress of 50MN/m² in the coils. Take E=200GN/m² and C= 82GN/m².	8 Marks	L4	CO4	PO1 PO2 PO4 PO6
	b)	A closely coiled helical spring is to carry a load of 500N. Its mean coil diameter is to be 10 times that of the wire diameter. Calculate these diameters if the maximum shear stress in the material of the spring are to be 80MN/m².	4 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO6

UNIT-IV

7.	a)	Derive the expression for the stresses acting in an inclined plane due to the forces acting in only one direction.	6 Marks	L4	CO5	PO1 PO2 PO10
	b)	At a point in a strained material the normal stresses on two planes at right angles are 80N/mm² and 60N/mm² and both are tensile. Find graphically, the resultant intensity of stress on a plane inclined at 45° to the axis of maximum stress.	6 Marks	L4	CO5	PO1 PO2 PO6 PO10

(OR)

8.	a)	Explain in detail about Maximum Shear Stress theory.	6 Marks	L2	CO2	PO1
	b)	In a metallic body the principal stresses are +35MN/m² and -95MN/m², the third principal stress being zero. The elastic limit stress in simple tension as well as in simple compression is equal and is 220 MN/m². Find the factor of safety based on the elastic limit, if the criterion of the failure for the material is the maximum principal stress theory.	6 Marks	L6	CO2	PO1 PO2 PO6 PO10

UNIT-V

9.	a)	What are limitations due to which Euler's formula is of little practical use? Derive the Euler's formula when one end is fixed and other is free.	6 Marks	L4	CO6	PO1 PO2
	b)	A solid round bar 60mm in diameter and 2.5m long is used as a strut. One end of the strut is fixed, while the other end is hinged. Find the safe compressive load for this strut, using Euler's formula. Assume E = 200GN/m³ and the factor of safety = 3.	6 Marks	L4	CO6	PO1 PO2 PO5 PO6

(OR)

10.		A hollow cylindrical cast iron column is 4m long with both ends fixed. Determine the minimum diameter of the column, if it has to carry a safe load of 250kN with a factor of safety as 5. Take the internal diameter as 0.8 times the external diameter. Take a= 1/1600 in Rankine's formula and stress as 550MN/m².	12 Marks	L4	CO6	PO1 PO2 PO5 PO6

SURVEYING

[Civil Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What are the principles of surveying? How do surveying influences the society, environment and sustainability?	6 Marks	L2	CO1	PO1 PO6 PO7 PO8
	b)	List out the tape corrections. Explain them in detail.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Differentiate between: i) Declination and Dip. ii) Fore bearing and Back bearing.	4 Marks	L4	CO1	PO1 PO2
	b)	The bearings of the lines of a traverse are given below. Correct the bearings for local attraction, if any, find the included angles.	8 Marks	L4	CO1	PO1 PO2 PO4 PO5

Line	Fore bearing	Back bearing
AB	S $36^0$15’ E	N $36^0$15’ W
BC	S $44^0$30’ W	N $45^0$30’ E
CD	N $71^0$45’ W	S $71^0$00’ E
DE	N $14^0$00’ E	S $14^0$30’ W
EA	N $61^0$15’ E	S $61^0$00’ W

UNIT-II

3.	a)	Discuss the radiation method of plane table surveying.	5 Marks	L3	CO1	PO1 PO5 PO10
	b)	Following readings were observed successively with a leveling instrument: 0.583, 1.010, 1.735, 3.295, 3.775, 0.350, 1.795, 2.575, 3.375, 3.895, 1.745, 0.635 and 1.605 m. The instrument was shifted after fourth and tenth readings. Design a page of level book and determine the reduced levels of various points by using rise and fall method, if RL of first point is 130.00 m.	7 Marks	L4	CO2	PO1 PO2 PO4
		(OR)				
4.	a)	How would you account for the following corrections in trigonometric leveling? i) Corrections due to refraction. ii) Correction due to curvature of earth.	6 Marks	L4	CO2	PO1 PO2
	b)	Write a short note on: i) Contour interval. ii) Horizontal equivalent. iii) Contour gradient.	6 Marks	L3	CO2	PO1

UNIT-III

5.	a)	List out the methods for measuring horizontal angle and explain any one method in detail.	4 Marks	L2	CO3	PO1 PO5
	b)	Calculate latitudes, departures, closing error and also adjust the traverse by Bowditch rule.	8 Marks	L4	CO3	PO1 PO2 PO4 PO5 PO8

Line	Length (m)	WCB
AB	89.31	$45^0$10’
BC	219.76	$72^0$05’
CD	151.18	$161^0$52’
DA	159.10	$228^0$43’
EA	232.26	$300^0$42’

(OR)

6.	a)	What are the constants of a tacheometer and how are they determined?	5 Marks	L2	CO3	PO1
	b)	The observations were made on the top A of a flag AB on a hill from two instrument stations P and Q, 100m apart, the stations P and Q being in the line with A. The angles of elevation of A at P and Q were $30^0$05’ and $17^0$52’ respectively. The staff reading upon the BM (RL = 311.29 m) were 2.690 and 3.815 respectively, when the instrument was at P and Q, the telescope being horizontal. Determine the elevation of the foot B of the flag if AB is 3.5 m.	7 Marks	L4	CO3	PO1 PO2 PO4 PO10

UNIT-IV

7.	a)	The following offsets were taken from a chain line to a hedge at regular intervals of 5.0 m: 2.72, 3.46, 6.80, 4.86, 3.35, 2.50 and 1.60 m. Determine the area included between the chain line and the hedge by using: i) Mid-ordinate rule. ii) Trapezoidal rule. iii) Simpson’s rule.	6 Marks	L4	CO4	PO1 PO2 PO5
	b)	Derive an expression for the area of two-level section for cutting.	6 Marks	L4	CO4	PO1 PO2

(OR)

8.	a)	Define “Degree of curve” by arc definition and chord definition.	4 Marks	L2	CO5	PO1
	b)	Derive an expression for Rankine’s deflection angle and explain the setting out a simple curve by Rankine’s deflection angle method.	8 Marks	L6	CO5	PO1 PO3 PO5

UNIT-V

9.	a)	What is the working principle of total station? Write down the applications of total station.	6 Marks	L2	CO6	PO1 PO5
	b)	How to determine the remote height of a point using total station?	6 Marks	L4	CO6	PO1 PO2 PO5

(OR)

10.	a)	Differentiate between interior drone surveying and exterior drone surveying.	6 Marks	L4	CO6	PO1 PO2 PO5
	b)	Explain the procedure for the calculation of stockpile volume in drone surveying.	6 Marks	L4	CO6	PO1 PO2 PO5

ELECTROMAGNETIC FIELDS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	State and prove Gauss Law in point form.	6 Marks	L2	CO1	PO1
	b)	Find the total charge in a volume defined by the six planes for which $1 \le x \le 2$, $2 \le y \le 3$ and $3 \le z \le 4$, if $\overline{D} = 3x\overline{a}_x + 2y^2\overline{a}_y + z^3\overline{a}_z C/m^2$.	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Derive the expression for electric field intensity due to an infinite line charge.	6 Marks	L3	CO1	PO1
	b)	An electrostatic field is given by $\overline{E} = 8xy\overline{a}_x + 4x^2\overline{a}_y + 2\overline{a}_z \ V/m$. A charge of 6C is to be moved from B (1, 8, 5) to A (2, 18, 6). Find the work done in each of the following cases, i) The path selected is $y = 3x^2 + z,\ z = x + 4$. ii) The straight line from B to A. Show that work done remains same and is independent of the path selected.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Derive the expressions for potential and electric field intensity due to a dipole.	6 Marks	L2	CO1	PO1
	b)	A capacitor consists of square shape metal plates of each 80cm side, placed parallel and 3mm apart. The space between the plates is filled with a dielectric having a relative permittivity of 3. A potential difference of 300 V is maintained between the plates. Calculate i) the capacitance ii) charge on the capacitor iii) the electric flux density iv) energy stored in the capacitor.	6 Marks	L3	CO1	PO2
		(OR)				
4.	a)	Explain the boundary conditions between conductor and free space for electric fields.	6 Marks	L2	CO1	PO1
	b)	For the current density $\overline{J} = 10z\sin^2\phi\ \overline{a}_\rho \ A/m^2$, determine the current through the cylindrical surface $\rho = 2$, $1 \le z \le 5$ m.	6 Marks	L3	CO1	PO2

UNIT-III

5.	a)	Using Ampere's circuital Law, obtain an expression for magnetic field intensity due to an infinite sheet of current carrying conductor.	8 Marks	L3	CO2	PO5
	b)	Derive an expression for vector magnetic potential.	4 Marks	L3	CO2	PO1
		(OR)				
6.		Derive Maxwell's III and IV equations, and elucidate the significance of their point and integral form.	12 Marks	L3	CO2	PO1

UNIT-IV

7.	a)	Derive the Lorentz force equation.	6 Marks	L3	CO2	PO1
	b)	A point charge of Q = -1.2C has velocity of $\vec{v} = 5\vec{a}_x + 2\vec{a}_y - 3\vec{a}_z \, m/s$. Find the magnitude of the force exerted on the charge, i) if the electric field intensity is $\vec{E} = -18\vec{a}_x + 5\vec{a}_y - 10\vec{a}_z \, V/m$. ii) if the flux density is $\vec{B} = -4\vec{a}_x + 4\vec{a}_y + 3\vec{a}_z \, wb/m^2$.	6 Marks	L3	CO2	PO2

(OR)

8.	a)	Derive an expression for self-inductance of a solenoid.	6 Marks	L3	CO2	PO1
	b)	A solenoid of 500 turns has a length of 50cm and the radius of 10cm. A steel rod of circular cross-section is fitted in the solenoid coaxially. Relative permeability of steel is 3000. A DC current of 10 A is passed through solenoid. Compute inductance of the system, energy stored in the system and mean flux density inside the solenoid.	6 Marks	L3	CO2	PO2

UNIT-V

9.		State and explain the differential and integral forms of Maxwell's equations for time varying fields.	12 Marks	L2	CO3	PO1

(OR)

10.	a)	Differentiate between transformer EMF and Generator EMF	6 Marks	L2	CO3	PO1
	b)	A lossy dielectric has μ_r = 1.5, ε_r = 1, σ = 2 x 10^{-8}S/m and $\vec{E} = 100 \sin \omega t \, \vec{a}_z \, V/m$. i) Determine at what frequency the conduction and displacement currents are equal. ii) Calculate instantaneous displacement current density at that frequency.	6 Marks	L3	CO3	PO2

SIGNALS AND NETWORKS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 60**

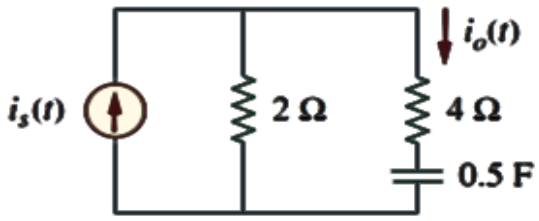
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Verify whether the following system is stable or unstable whose impulse response is: $h(t) = 2e^{-3t}\cos t\,u(t)$.	6 Marks	L3	CO1	PO2
	b)	Find the odd and even component of the signal defined by $x[n] = \{3,2,1,4,5\}$, consider the origin at third element.	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Investigate the periodicity of the signal and determine the period of the signal defined by $x(t) = 0.1e^{-j\frac{2\pi}{3}n} + 0.3\sin\pi n$.	6 Marks	L4	CO1	PO2
	b)	Investigate whether the signal $x(t) = u(t) - u(t-1)$ is energy signal or power signal.	6 Marks	L4	CO1	PO2

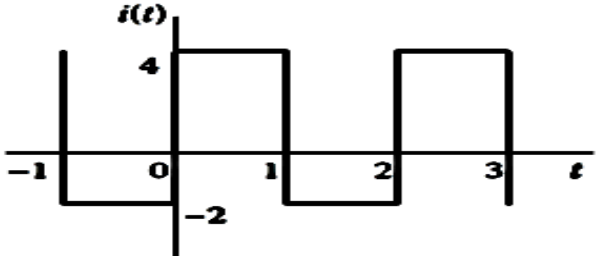
UNIT-II

3.	a)	Find the inverse Fourier transforms of the following function: $F(w) = \frac{10jw}{(-jw+2)(jw+3)}$.	4 Marks	L3	CO2	PO5
	b)	Using the Fourier transform method, find $i_o(t)$ shown in the figure if $i_s(t) = 10\sin 2t$ A.	8 Marks	L3	CO2	PO5



(OR)

4.	a)	Find the inverse Fourier transforms of the following function: $F(w) = \frac{jw}{-w^2 + j5w + 6}$.	4 Marks	L3	CO2	PO5
	b)	The periodic current waveform in Figure is applied across a 2 kΩ resistor. Find the percentage of the total average power dissipation caused by the DC component.	8 Marks	L3	CO2	PO2



UNIT-III

5.	a)	For the circuit in figure, find $H(s) = V_o(s)/V_s(s)$. Assume zero initial conditions.	6 Marks	L3	CO2	PO2

	b)	Find the time domain initial and final values of the following z-domain function: $X(z) = \dfrac{z^2}{(z-1)(z-0.2)}$.	6 Marks	L3	CO2	PO2

(OR)

6.	a)	Obtain the inverse Laplace transforms of the function: $X(s) = \dfrac{3}{s^2(s+3)(s+2)}$.	6 Marks	L3	CO2	PO2
	b)	Using z-transforms, determine the response of a system for an input $x[n] = 0.2^n u[n]$, if the impulse response of the system is $h[n] = 0.4^n u[n]$.	6 Marks	L3	CO2	PO5

UNIT-IV

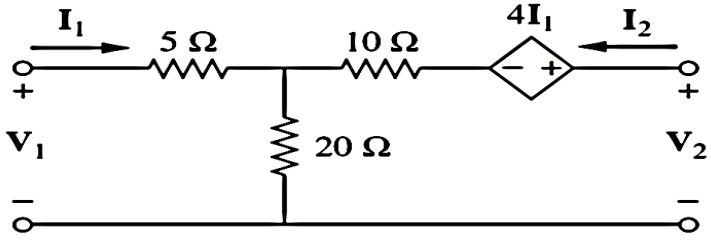
7.	a)	Explain the transient properties of a capacitor for DC and AC excitations.	4 Marks	L2	CO3	PO1
	b)	A series RC circuit with R = 100Ω and C = 25 micro farads has a sinusoidal excitation $V(t)$ = 200 sin 500t. Find the expression for the current using Laplace method assuming that the capacitor is initially unchargeds.	8 Marks	L3	CO3	PO5

(OR)

8.	a)	Explain why the current in a pure inductance cannot change in zero time.	4 Marks	L2	CO3	PO1
	b)	The coil of a certain relay is operated by a 12-V battery. If the coil has a resistance of 150Ω and an inductance of 30 mH and the current needed to pull in is 50 mA, calculate the relay delay time and its response.	8 Marks	L3	CO3	PO2

UNIT-V

9.	a)	Y-parameters for a two port network are given as Y_{11} = 0.75, $Y_{12} = Y_{21}$ = -0.25, Y_{22} = 0.8. Design an equivalent π-network.	6 Marks	L4	CO4	PO3
	b)	Compute the z parameters of the circuit in figure and invistigate whether the netwok is symmetrical and reciprocal.	6 Marks	L4	CO4	PO4



(OR)

10.	a)	Define reciprocity and symmetry for a generalized two port network and derive the conditions for reciprocity and symmetry in terms of impedance parameters.	4 Marks	L3	CO4	PO1
	b)	Obtain the admittance parameter equivalent circuit of the two-port in figure and invistigate whether the netwok is symmetrical and reciprocal.	8 Marks	L3	CO4	PO4

ENGINEERING THERMODYNAMICS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What is meant by point and path function? Explain with one example each.	6 Marks	L2	CO1	PO1
	b)	To a closed system 150kJ of work is supplied. If the initial volume is 0.6m^3 and pressure of the system changes as p = 8 – 4V, where p is in bar and V is in m^3, determine the final volume and pressure of the system.	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Discuss the First Law of Thermodynamics applied to a process in a closed.	6 Marks	L2	CO1	PO2
	b)	Two streams of air, one at 1 bar, 27^{0}C and velocity of 30 m/s and the other at bar, 227^{0}C and velocity of 50 m/s mix in equal proportion in a chamber from which heat at the rate of 100 kJ/kg is removed. The mixture is then passed through an adiabatic nozzle. Find the velocity of the stream issuing out of the nozzle. The temperature of the air leaving the nozzle is 27^{0}C and its Cp = 1.005 kJ/kgK .	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	State and prove Carnot's theorem.	6 Marks	L1	CO1	PO1
	b)	A heat engine drives a heat pump. The heat delivered by the heat engine as well as by the pump is used to heat the water circulating through the heat radiators of a building. The efficiency of the heat engine is 27% and the coefficient of performance of heat pump is 4. Calculate the ratio of heat transferred to the circulating water to the heat taken by the heat Engine.	6 Marks	L3	CO1	PO2
		(OR)				
4.	a)	Discus the concept of principle entropy increases.	6 Marks	L2	CO1	PO1
	b)	1 kg of ice at -10^{0}C is exposed to the atmosphere which is at 25^{0}C. The ice melts and comes in contact with the atmosphere. i) Determine the entropy increase of the universe, ii) What is the minimum amount of work necessary to convert the water back into ice at 10^{0}C? Cp of ice is 2.093 kJ/kgK and the latent heat of fusion of ice is 333 kJ/kg.	6 Marks	L3	CO1	PO2

UNIT-III

5.	a)	Draw the phase change process for pure substance or steam formation and explain	6 Marks	L2	CO2	PO2
	b)	A closed vessel of 0.2 cubic meter contains steam at 1 Mpa and temperature of 250 deg C. If the vessel is cooled so that pressure falls to 350kPa, determine the final temperature, heat transfer and change in entropy during the process.	6 Marks	L3	CO2	PO2
		(OR)				

6.		Derive the Maxwell relations and explain their importance in thermodynamics.	12 Marks	L3	CO1	PO2

UNIT-IV

7.		What is compressibility factor? What does it signify? What is its value for an ideal gas at critical point?	12 Marks	L1	CO3	PO2

(OR)

8.	a)	Explain the Dalon's law of partial pressures for mixture of gases.	6 Marks	L2	CO3	PO1
	b)	Following is the gravimetric analysis of air: Oxygen-23.14%, Nitogen-75.53%, Argon-1.28%, Carbon dioxide-0.05% Calculate analysis by volume and the partial pressure of each constituent when total pressure is 1bar.	6 Marks	L3	CO3	PO2

UNIT-V

9.	a)	Derive an expression for the thermal efficiency of Otto Cycle and draw P-V and T- S diagrams.	6 Marks	L3	CO4	PO2
	b)	The swept volume of a diesel engine working on dual cycle is 0.0053m^3 and clearance volume is 0.00035m^3. The maximum pressure is 65 bar. Fuel injection ends at 5 per cent of the stroke. The temperature and pressure at the start of the compression are 80°C and 0.9 bar. Determine the air standard efficiency of the cycle. Take γ for air = 1.4.	6 Marks	L3	CO4	PO2

(OR)

10.	a)	Derive an expression for the thermal efficiency of stirling cycle and draw P-V and T- S diagrams.	6 Marks	L3	CO4	PO2
	b)	The efficiency of an Otto cycle is 60% and γ=1.5. What is the compression ratio?	6 Marks	L3	CO4	PO2

KINEMATICS OF MACHINERY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

	UNIT-I				
1.	Write notes on complete and incomplete constraints in lower and higher pairs, illustrating your answer with neat sketches.	12 Marks	L2	CO1	PO1
	(OR)				
2.	Sketch and describe the working of two different types of quick return mechanisms. Give examples of their applications.	12 Marks	L2	CO1	PO1
	UNIT-II				
3.	Give a neat sketch of the straight line motion 'Hart mechanism.' Prove that it produces an exact straight line motion.	12 Marks	L3	CO2	PO1 PO2
	(OR)				
4.	What is the condition for correct steering? Sketch and show the two main types of steering gears and discuss their relative advantages.	12 Marks	L3	CO3	PO1 PO2
	UNIT-III				
5.	Derive an expression for the length of the arc of contact in a pair of meshed spur gears.	12 Marks	L4	CO4	PO1 PO3
	(OR)				
6.	In an epicyclic gear train, an arm carries two gears A and B having 36 and 45 teeth respectively. If the arm rotates at 150 r.p.m. in the anticlockwise direction about the centre of the gear A which is fixed, determine the speed of gear B. If the gear A instead of being fixed, makes 300 r.p.m. in the clockwise direction, what will be the speed of gear B ? 	12 Marks	L4	CO4	PO1 PO2 PO3
	UNIT-IV				
7.	A cam is to be designed for knife edge follower with the following data: i) Cam lift =40 mm during 90^0 of cam rotation with SHM. ii) Dwell for next 30^0 iii) During the next 60^0 of cam rotation, the follower returns to its original position with uniform acceleration iv) Dwell during the remaining 180^0. Draw the profile of the cam when the line of stroke is offset by 20 mm from the axis of the cam shaft. The radius of the base circle of the cam is 40 mm. Determine the maximum velocity and acceleration of the follower during its ascent and descent, if the cam rotates at 240 r.p.m.	12 Marks	L3	CO6	PO1 PO2 PO3

(OR)

8.	A cam rotating clockwise at a uniform speed of 1000 r.p.m. is required to give a roller follower the motion defined below : i) Follower to move outwards through 50 mm during 120^0 of cam rotation, ii) Follower to dwell for next 60^0 of cam rotation, iii) Follower to return to its starting position during next 90^0 of cam rotation, iv) Follower to dwell for the rest of the cam rotation. The minimum radius of the cam is 50 mm and the diameter of roller is 10 mm. The line of stroke of the follower is off-set by 20 mm from the axis of the cam shaft. If the displacement of the follower takes place with uniform and equal acceleration and retardation on both the outward and return strokes, draw profile of the cam and find the maximum velocity and acceleration during out stroke and return stroke.	12 Marks	L3	CO5	PO1 PO2 PO3

UNIT-V

9.	A mechanism, as shown in Fig. 6.31, has the following dimensions: O_1A = 60 mm; A B = 180 mm ; O_2 B = 100 mm ; O_2 C = 180 mm and CD = 270 mm. The crank O_1 A rotates clockwise at a uniform speed of 120 r.p.m. The block D moves in vertical guides. Find, by instantaneous centre method, the velocity of D and the angular velocity of CD.	12 Marks	L4	CO6	PO1 PO2 PO3

(OR)

10.	Locate all the instantaneous centres of the slider crank mechanism as shown in Fig. The lengths of crank OB and connecting rod AB are 100 mm and 400 mm respectively. If the crank rotates clockwise with an angular velocity of 10 rad/s, find: i) Velocity of the slider A, and ii) Angular velocity of the connecting rod AB.  	12 Marks	L4	CO6	PO1 PO2 PO3

MANUFACTURING TECHNOLOGY
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Elucidate the design considerations needed to be followed in Gating system.	6 Marks	L2	CO1	PO1 PO2 PO3
	b)	List types of gates and sketch any four of them.	6 Marks	L2	CO1	PO1 PO2
		(OR)				
2.	a)	Explain the purpose of chaplets and chillers used in casting process.	6 Marks	L2	CO1	PO1 PO2
	b)	List the types of cores. What are the advantages and applications of sand core?	6 Marks	L2	CO1	PO1
		UNIT-II				
3.	a)	What are the limitations of sand casting over special casting processes?	6 Marks	L2	CO2	PO1
	b)	Describe the lost wax process.	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	List out various casting defects and explain any two with neat sketch.	6 Marks	L2	CO2	PO1 PO2
	b)	Write short notes on true centrifugal casting process with neat sketch.	6 Marks	L2	CO2	PO1
		UNIT-III				
5.	a)	Describe the principle of extrusion process. Compare both direct and indirect extrusion process with respect to mechanical properties.	6 Marks	L2	CO3	PO1 PO2
	b)	What is drawing process? Explain deep drawing process with a neat sketch.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Explain explosive forming process.	6 Marks	L2	CO3	1,4,7
	b)	Explain the magnetic pulse forming process with a neat sketch.	6 Marks	L2	CO3	PO1 PO4 PO7
		UNIT-IV				
7.	a)	Explain the construction and working of laser beam welding with its advantages and limitations.	6 Marks	L2	CO4	PO1 PO2
	b)	List the welding defects with cause and remedies.	6 Marks	L1	CO4	PO1 PO2
		(OR)				
8.	a)	List out the non-destructive tests and explain any one of it.	6 Marks	L1	CO4	PO1
	b)	Discuss about brazing with neat sketch.	6 Marks	L2	CO4	PO1

UNIT-V

9.	a)	Describe the working principle of blow molding process.	6 Marks	L2	CO5	PO1 PO7
	b)	Describe properties of plastics.	6 Marks	L2	CO5	PO1
		(OR)				
10.	a)	Explain the principle of compression molding process.	6 Marks	L2	CO5	PO1 PO2
	b)	What are the additives to be mixed in processing plastics? Explain the purpose of each.	6 Marks	L2	CO5	PO1 PO2

STRENGTH OF MATERIALS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Establish the relation between bulk modulus and modulus of rigidity.	4 Marks	L3	CO1	PO1 PO2
	b)	An assembly of a steel bar of 70 mm diameter enclosed in an aluminium tube of 80 mm internal diameter and 120 mm external diameter is compressed between two rigid parallel plates by a force of 400 kN. The length of the assembly is 1 m. Determine the stresses in the tube and the bar if the young's moduli of elasticity of steel and aluminium are 200 GPa and 80 GPa respectively.	8 Marks	L3	CO1	PO1 PO2 PO3

(OR)

2.	a)	Sketch the stress-strain curve for a ductile material and label all the salient points with brief explanation.	6 Marks	L2	CO1	PO1 PO2
	b)	An axial pull of 40 kN is applied on a steel bar of diameter 12mm and length 2.5m. Calculate the change in length, diameter and volume of the bar if the Poisson's ratio is 0.25. Also find the work done in stretching the bar. Take $E = 2 \times 10^5$ N/mm².	6 Marks	L2	CO1	PO1 PO2

UNIT-II

3.		A simply supported beam of length 10m carries the uniformly distributed load and two point loads as shown Fig.1. Draw the shear force and bending moment diagrams for the beam. Also calculate the maximum bending moment.	12 Marks	L4	CO2	PO1 PO2 PO3

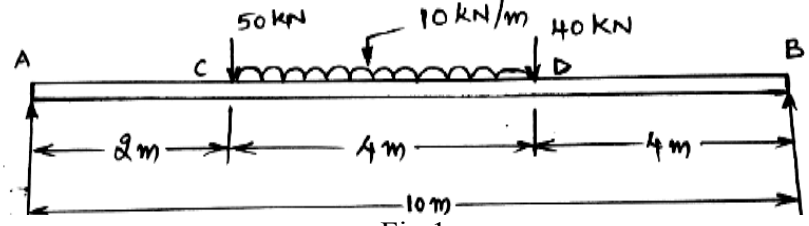

Fig.1

(OR)

4.	a)	Define bending moment, shear force and point of contra flexure.	4 Marks	L1	CO2	PO1 PO2
	b)	Draw shear force and bending moment diagrams for the Cantilever of 1.5 m long which carries a UDl of 3kN for entire span, and another load 1.5kN at a distance of 0.5 m from the free end.	8 Marks	L3	CO2	PO1 PO2 PO3 PO4

UNIT-III

5.	a)	Mention the assumptions made in bending equation.	4 Marks	L1	CO2	PO1 PO2
	b)	A beam of spam L meters simply supported at the ends, carries a central load W. The beam section has an overall depth of the 290mm and a vertical Web 250mm and 10mm. If the maximum shear stress is to be 45N/mm². When the maximum bending stress is 150N/mm². Calculate the value of the centrally applied.	8 Marks	L3	CO2	PO1 PO2 PO3

(OR)

6.	a)	Derive the relation to find the shear stress distribution in a beam with I cross section.	6 Marks	L3	CO2	PO1 PO2
	b)	A steel beam of 'T' section is 500 mm deep. Flange is 200mm wide and 50mm thick. The web is 15mm thick. The beam is subjected to a shear force of 300kN. Determine the shear stress distribution for the beam section. Also sketch the shear stress distribution.	6 Marks	L3	CO2	PO1 PO2

UNIT-IV

7.	a)	Derive the torsion equation from basics.	4 Marks	L3	CO3	PO1 PO2
	b)	A shaft transmits 300kW power at 120 r.p.m. Determine the necessary diameter of solid circular shaft and the necessary diameter of hollow circular section, the inside diameter being 2/3 of the external diameter. The allowable shear stress is 70N/mm^2. Taking the density at material as 77N/m^3, calculate the percentage saving in the shaft if hollow shaft is used.	8 Marks	L3	CO3	PO1 PO2

(OR)

8.		For a given loading conditions the state of stress in the wall of a cylinder is expressed as follows: i) 85 MN/m^2 tensile. ii) 25 MN/m^2 tensile at right angles to (a) iii) Shear stresses of 60 MN/m^2 on the planes on which the stresses Calculate the principal stresses and the planes on which they act. What would be the effect on these results if owing to a change of loading: i) becomes compressive while stresses. ii) remain unchanged.	12 Marks	L4	CO3	PO1 PO2 PO3

UNIT-V

9.	a)	Derive the expression for the slope and deflection of a cantilever beam of length L, carrying a point load W at the free end by double integration method.	6 Marks	L3	CO4	PO1 PO2
	b)	A Simply supported beam of span 6m loaded point load of 12kN at its centre, in addition to the UDL of 6kN/m for the whole span. Find slopes at the supports and maximum deflection. Use double integration method.	6 Marks	L3	CO4	PO1 PO2 PO3

(OR)

10.	a)	Find an expression for the slope at the supports of a simply supported beam, carrying a point load at the centre.	6 Marks	L3	CO4	PO1 PO2
	b)	A cantilever of length 3m carries a uniformly distributed load of 15kN/m over a length of 2m from the free end. If I =10^8mm^{4}and E=2 x 10^5 N/mm^2, find: i) Slope at the free end. ii) Deflection at the free end.	6 Marks	L3	CO4	PO1 PO2 PO3

ELECTROMAGNETIC FIELDS AND TRANSMISSION LINES
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	State Coulomb's law. Develop the vector expression for Force due to N number of Charges.	6 Marks	L1	CO1	PO2
	b)	A circular loop located on $x^2 + y^2 = 9$, $z = 0$ carries a direct current of 10 A along a$. Determine H at (0, 0, 4) and (0, 0, -4).	6 Marks	L4	CO1	PO4
		(OR)				
2.	a)	State Biot-savart's Law. Formulate an expression for Straight Filamentary Conductor of finite length.	6 Marks	L1	CO1	PO2
	b)	A point charge of 30nC is located at the origin while plane y=3 carries charge 10nC/m^2. Find D at (0, 4, 3).	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Explain Faraday's Law for Time Varying Fields.	6 Marks	L2	CO2	PO1
	b)	A conducting circular loop of radius 20cm lies in the z=0 plane in a magnetic field B = 10cos377t a_z mWb/m^2. Find a valid solution for induced voltage in the loop.	6 Marks	L3	CO2	PO4
		(OR)				
4.	a)	Develop the Maxwell's equation for time varying fields that relates space varying electric field and time varying magnetic field.	6 Marks	L3	CO2	PO3
	b)	Identify the magnetic boundary conditions as the conditions that H (or B) field must satisfy at the boundary between two different media.	6 Marks	L2	CO2	PO2

UNIT-III

5.	a)	A uniform plane wave propagating in a medium has $E = 2e^{-\alpha z} \sin(10^8 t - \beta z)\, a_y$ V/m. If the medium is characterized by $\varepsilon_r=1$, $\mu_r=20$, and $\sigma=3$mhos/m, interpret α, β, and H.	6 Marks	L4	CO3	PO4
	b)	Illustrate different types of polarizations with the necessary expressions.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Develop the Wave Equations for Dielectric and Conducting Medium.	6 Marks	L2	CO3	PO3
	b)	Illustrate the reflection by a perfect conductor at normal incidence for parallel polarization. Formulate the expressions for fields.	6 Marks	L2	CO3	PO2

UNIT-IV

7.	a)	Write the mathematical expressions for attenuation constant (α), phase constant (β), phase velocity (v_p) and intrinsic impedance (η).	6 Marks	L1	CO4	PO1
	b)	In a lossless medium for which $\eta=60\prod$, $\mu_r=1$, and $H = -0.1 \cos(\omega t - z)\, a_x + 0.5 \sin(\omega t - z) a_y$ A/m. Interpret ε_r, ω, and E.	6 Marks	L3	CO4	PO4

(OR)

8.	a)	Develop the condition for distortion less and Minimum Attenuation.	6 Marks	L2	CO4	PO3
	b)	A lossless transmission line of length 100m has an inductance of 28 μ H and capacitance of 20 nF. Formulate the: i) Propagation velocity. ii) Phase constant at an operating frequency of 100 KHz.	6 Marks	L3	CO4	PO4

UNIT-V

9.	a)	Devise an expression for the input impedance of a loss less line. Derive Z_{SC} and Z_{OC} and sketch their variations.	6 Marks	L2	CO4	PO2
	b)	A 75Ω is terminated by a load of 120+80Ω. Design the maximum and minimum impedances on the line.	6 Marks	L4	CO4	PO3

(OR)

10.	a)	Identify the expression for the input impedance of a transmission line of length L.	6 Marks	L2	CO4	PO2
	b)	A loss less Line of 300Ω is terminated by a load of Z_R. If the VSWR at 200MHz is 4.48, and the first V_{min} is located at 6 cm from the load. Interpret the values of reflection coefficient and Z_R.	6 Marks	L3	CO4	PO4

ELETRONIC DEVICES AND CIRCUITS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

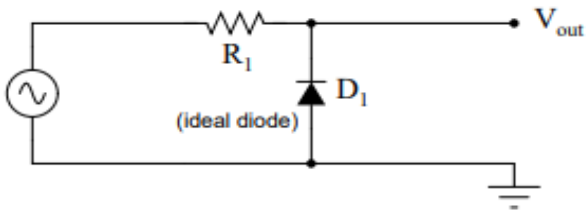
UNIT-I

1.	a)	Develop a clipper circuit which produces the following output and assume the input applied voltage is 30VP-P, VR1 = 5V, VR2 = -5V and assume Diode is Ideal.	6 Marks	L2	CO1	PO2

	b)	Prove that a low pass circuit acts as an integrator. Derive an expression for the output voltage levels under steady state conditions of a low pass circuit excited by a ramp input.	6 Marks	L2	CO1	PO2

(OR)

2.	a)	Predict how the operation of this clipper circuit will be affected as a result of the following faults. Consider each fault independently.	6 Marks	L2	CO1	PO2



i) Diode D1 fails open
ii) Diode D1 fails shorted. For each of these conditions, explain why the resulting effects will occur.

	b)	A 10 kHz symmetrical square wave whose peak to peak amplitude is 2V is impressed upon a high pass circuit whose lower 3dB frequency is 5Hz. Calculate and sketch the output waveform in particular what is the peak to peak amplitude.	6 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Explain collector to base bias of CE amplifier with neat sketch and derive expression for S.	6 Marks	L1	CO2	PO2
	b)	Discuss the need for biasing a transistor and illustrate the DC load line analysis of BJT.	6 Marks	L2	CO2	PO1

(OR)

4.	a)	Design a base bias circuit with n-p-n transistor when the operating point is at I_C=1mA, V_{CE}=24V, β=60, $V_{CE(Sat)}$=0V, $I_{C(cut\ off)}$=0mA and V_{CC}=36V.	6 Marks	L4	CO2	PO3
	b)	Derive the expression for stability factor for voltage divider bias of a transistor circuit.	6 Marks	L2	CO2	PO2

UNIT-III

5.		Give the complete analysis of CE transistor amplifier circuit using h-parameters and derive expressions for the current gain, voltage gain, input impedance and output admittance.	12 Marks	L4	CO3	PO2

(OR)

6.	a)	Analyze CB amplifier with exact and approximate analysis.	6 Marks	L4	CO3	PO2
	b)	Discuss the advantages of H-parameter analysis.	6 Marks	L1	CO3	PO1

UNIT-IV

7.		Explain the construction, operation and the characteristics of N-Channel JFET with the help of neat diagrams and also compare it with BJT.	12 Marks	L1	CO4	PO1

(OR)

8.	a)	For a common source amplifier as shown in the figure, operating point is defined by $V_{GSQ=}$ -2.5V, V_p= -6V & I_{DQ}=2.5mA with I_{DSS}=8mA. Calculate g_m, r_d ,Z_i , Z_o & Voltage gain A_v.	6 Marks	L4	CO4	PO2

	b)	With the help of neat diagram, explain the voltage divider biasing method for FET.	6 Marks	L1	CO4	PO1

UNIT-V

9.	a)	Explain the operation and characteristics of varactor diode with neat diagram.	6 Marks	L1	CO5	PO1
	b)	For a certain UJT Relaxation oscillator, the resistance is 10KΩ, the capacitance is 0.1 μF. The valley potential is 1.5V when V_{BB}=20V. Assuming diode cut-in voltage of 0.7V and standoff ratio as 0.6, calculate the frequency of oscillations.	6 Marks	L3	CO5	PO2

(OR)

10.	a)	Explain the various modes of operation of a TRIAC	6 Marks	L1	CO5	PO1
	b)	Explain the operation of the SCR using two transistor analogy.	6 Marks	L2	CO5	PO1

SIGNALS AND SYSTEMS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

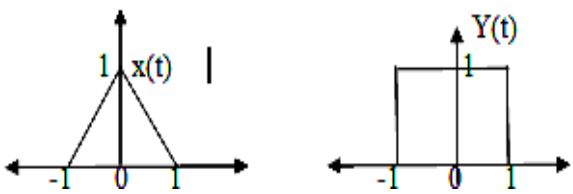
1.	a)	Discuss the importance of impulse signal as test signal for testing of various electronic equipments to ensure the safety and security of environment.	6 Marks	L2	CO1	PO2
	b)	Given a signal $x(t) = t \quad 0 < t < 2$ $= 2 \quad t > 2 \; t > 2$ $= 0 \quad$ elsewhere Plot the following signals x(2t), x(-t), x(t/2), 7x(-2t+3)	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	What is the importance of convolution? Find the response of a system for the given sequences x(n) = {1, 0, -1, 2, 1} and h(n) = {1, 2, -1, 2}	6 Marks	L1	CO1	PO1
	b)	Sketch the bounded and unbounded signals and check whether system $h(t)=e^{3t}$ is stable or not.	6 Marks	L2	CO1	PO2

UNIT-II

3.	a)	Examine the conditions required for existence of Fourier transform.	6 Marks	L1	CO2	PO1
	b)	What are the Dirichlet conditions? Derive the formulae for Fourier Coefficients.	6 Marks	L1	CO2	PO1
		(OR)				
4.	a)	Explain how input and output signals are related to impulse response of LTI system.	6 Marks	L2	CO2	PO1
	b)	Find the Fourier transform of the following: i) x(t) = A sin (2πfct) U(t) ii) x(t) = A rect(t / T) cos (2πfct)	6 Marks	L2	CO2	PO2

UNIT-III

5.	a)	A filter has an input $x(t)=e^{-2t}u(t)$ and transfer function, H(W)=1/(1+jw). Find ESD of the output.	6 Marks	L1	CO3	PO1
	b)	Find the cross correlation between unit triangular and unit gate pulse as follows:	6 Marks	L1	CO3	PO5



(OR)

6.	a)	State and prove Parseval's theorem.	6 Marks	L1	CO3	PO1
	b)	Find auto correlation, power, RMS value and sketch the PSD for the signal x(t)=(A+sin100t)cos200t.	6 Marks	L1	CO3	PO5

UNIT-IV

7.	a)	Determine x(t) and ROC for the function $X(s)=\frac{(s+1)(s+1)}{s^2-s-1}$ $\mathrm{Re}\{s\}\geq\frac{1}{2}$	6 Marks	L2	CO4	PO1
	b)	Obtain the Laplace Transform of a gate function and define ROC and with their conditions.	6 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Explain how laplace transform is useful to analyse the stability of systems in s domain.	6 Marks	L2	CO4	PO2
	b)	Using convolution theorem for laplace transform find $y(t) = x_1(t)*x_2(t)$ where $x_1(t) = e^{-3t}u(t)$ and $x_2(t) = u(t-2)$.	6 Marks	L1	CO4	PO1

UNIT-V

9.	a)	List different types of noise.	6 Marks	L1	CO5	PO1
	b)	An amplifier with gain=30dB and Bandwidth=25kHz is found to have T=120K. Noise Figure =2 Find T_e and output noise power.	6 Marks	L3	CO5	PO4
		(OR)				
10.	a)	What is aliasing and anti aliasing? What are the causes to it and how it can be eliminated?	6 Marks	L2	CO5	PO2
	b)	Explain the following sampling techniques. i) Natural sampling. ii) Flat top sampling.	6 Marks	L3	CO5	PO4

SWITCHING THEORY AND LOGIC DESIGN

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Perform the subtraction with the following unsigned binary numbers by taking the 2's complement of the subtrahend. i)11010-10000 ii)11010-1101 iii)100-11000 iv)1010100-1010100	8Marks	L3	CO1	PO2
	b)	List out the binary codes in Number Systems.	4Marks	L1	CO1	PO1
		(OR)				
2.	a)	Assume that the even parity hamming code is $(0100111)_2$ is transmitted and that $(0100011)_2$ is received. The receiver does not know what is transmitted. Determine the bit location where error has occurred in the code received.	7Marks	L4	CO1	PO4
	b)	Express the complements of the following expressions i) B'C'D+(B+C+D)'+B'C'D'E ii) (ABC)'(A+B+C)'	5Marks	L2	CO1	PO3
		UNIT-II				
3.		Simplify the following function using Tabular method. F (A, B, C, D) = Σm(0, 1, 2, 3, 4, 10, 11, 12)+d (0, 3, 6, 10).	12Marks	L3	CO1	PO2
		(OR)				
4.	a)	Implement the following function with either NAND or NOR gates. **F=w'x'z+wxz+x'y'z+wxyz'**	6Marks	L3	CO1	PO3
	b)	Obtain the simplified expression in sum of products F(A, B, C, D)= Σm(1, 2, 4, 11, 12, 13)+d (0, 3, 6, 10).	6Marks	L4	CO1	PO4
		UNIT-III				
5.	a)	Draw and explain decimal adder.	6Marks	L2	CO2	PO1
	b)	Distinguish between an encoder and decoder.	6Marks	L4	CO2	PO2
		(OR)				
6.		Implement the following Boolean function using 4:1 Mux: F(A, B, C, D)=∑m(0, 1, 3, 4, 8, 9, 14) .	12Marks	L3	CO1	PO4
		UNIT-IV				
7.	a)	Convert SR Flip-Flop to D Flip-Flop	6Marks	L3	CO2	PO3
	b)	Describe race-around problem in JK Flip-flop? Explain how it is eliminated in Master slave JK Flip –Flop.	6Marks	L2	CO2	PO1
		(OR)				
8.		Design Mod-10 Counter using T Flip-Flops.	12 Marks	L3	CO2	PO6

UNIT-V

9.	a)	Write a programmable table to implement a BCD to Ex-3 code conversion using a PAL.	6 Marks	L3	CO3	PO2
	b)	Distinguish between PROM, PLA and PAL.	6 Marks	L2	CO4	PO4

(OR)

10.		A sequential circuit has one input and one output and shown in table:3: Design the sequential circuit with JK flip-flop	12 Marks	L3	CO3	PO7

Table.3

Present State		Next State		output	
		X=0	X=1	X=0	X=1
A	B	AB	AB	Y	Y
0	0	00	10	0	0
0	1	11	00	0	0
1	0	10	01	1	1
1	1	00	10	1	0

COMPUTER GRAPHICS

[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain about graphics monitors and workstations.	6 Marks	L2	CO1	PO1
	b)	Compare and Contrast DDA algorithm and Bresenham's algorithm.	6 Marks	L3	CO2	PO2
		(OR)				
2.	a)	Illustrate clearly the midpoint circle drawing algorithm.	6 Marks	L2	CO2	PO1
	b)	Given a circle radius **r** = 10, demonstrate the midpolnt circle algorithm by determining positions along the circle octant in the first quadrant upto $x = 0$ to $x = y$.	6 Marks	L3	CO2	PO3
		UNIT-II				
3.	a)	Explain the flood fill algorithm with a sample polygon.	6 Marks	L2	CO2	PO1
	b)	Find the transformation matrix that transforms the given square ABCD to half its size with centre still remaining at the same position. The coordinates of the square are A(1, 1), B(3, 1), C(3, 3), D(1, 3) and centre at (2, 2). Also find the resultant coordinates of square.	6 Marks	L3	CO3	PO2
		(OR)				
4.	a)	Illustrate clearly about translation and scaling transformations with examples.	6 Marks	L2	CO3	PO1
	b)	Apply the shearing transformation to square with A(0, 0), B(1, 0), C(1, 1), D(0, 1) as shear parameter value of 0.5 relative to the line yref = -1.	6 Marks	L3	CO3	PO2
		UNIT-III				
5.	a)	Explain clearly Window-to -viewport coordinate transformation.	6 Marks	L2	CO3	PO1
	b)	Write the cohen-sutherland line clipping algoritmm.	6 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Explain the properties of Bezier curve.	6 Marks	L2	CO3	PO1
	b)	Construct the Bezier curve of order 3 and with polygon vertices A(1, 1), B(2, 3), C(4, 3) and D(6, 4).	6 Marks	L3	CO3	PO2
		UNIT-IV				
7.	a)	Illustrate clearly about Reflection 3D Transformation with an example.	6 Marks	L3	CO3	PO2
	b)	Compute the new line points on 3D Scaling of a line A(1, 1, 1), B(2, 2, 2) with S(3, 3, 3).	6 Marks	L3	CO3	PO2
		(OR)				
8.	a)	Illustrate about perspective projection of an object to the view plane.	6 Marks	L2	CO3	PO1
	b)	Explain 3D clipping with a diagram.	6 Marks	L2	CO3	PO1
		UNIT-V				
9.	a)	Illustrate classification visible surface detection method.	6 Marks	L2	CO4	PO1
	b)	Explain Gouraud shading method.	6 Marks	L2	CO4	PO1
		(OR)				
10	a)	Differentiate between depth buffer method with scan line method.	6 Marks	L3	CO4	PO2

. b) Illustrate BSP tree visible surface detection method. 6 Marks L2 CO4 PO1

COMPUTER ORGANIZATION

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Perform the following arithmetic operations in binary using 2's complement representation. i) $(+12)_{10} + (-13)_{10}$. ii) $(-12)_{10} + (-13)_{10}$. iii) $(-6)_{10} - (+13)_{10}$	6Marks	L3	CO1	PO2
	b)	Draw flowchart and explain Booth's algorithm for multiplication of signed 2's complement numbers.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Design a 4-bit combinational circuit which performs bitwise OR, AND, XOR, NOT logical operations.	8 Marks	L4	CO3	PO3
	b)	Draw the flowchart and discuss in detail the binary subtraction of 2's complement numbers.	4 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Explain about the register and immediate addressing modes with examples.	6 Marks	L2	CO2	PO1
	b)	What is a machine instruction format? What are the generic fields in a machine instruction format?	6 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Design the common bus system that connects all the basic computer registers and memory. Analyze how the data is transferred.	8 Marks	L4	CO3	PO3
	b)	Draw and explain the flowchart for basic instruction cycle.	4 Marks	L2	CO2	PO1

UNIT-III

5.	a)	Differentiate between Isolated I/O and Memory Mapped I/O techniques.	6 Marks	L2	CO2	PO2
	b)	A DMA module is transferring characters to main memory from an external device transmitting at 9600 bits per second (bps).The processor can fetch instructions at the rate of 1 MIPS. By how much will the processor be slowed down due to the DMA activity?	6 Marks	L3	CO4	PO1
		(OR)				

6.	a)	Define the following: i) Micro Operation. ii) Control Word. iii) Control memory. iv) Micro Program. v) Micro Instruction.	6 Marks	L2	CO2	PO1
	b)	What is the purpose of I/O interface? Explain various commands issued to I/O interface.	6 Marks	L2	CO2	PO1

UNIT-IV

7.	a)	Design a 4M x 1 memory system using 1M x 1 RAM chips.	6 Marks	L4	CO3	PO3
	b)	Discuss in detail the nonvolatile solid-state memory technologies.	6 Marks	L2	CO4	PO1

(OR)

8.	a)	Explain fully associative cache mapping technique with a neat sketch.	6 Marks	L3	CO2	PO1
	b)	How many 128 x 8 RAM chips are needed to provide a memory capacity of 2048 bytes? And how many lines of the address bus must be used to access 2048 bytes of memory? How many of these lines will be common to all chips? How many lines must be decoded for the line select?	6 Marks	L3	CO2	PO2

UNIT-V

9.	a)	Compare the SIMD array processors and attached array processors.	6 Marks	L3	CO2	PO2
	b)	What are the different types of pipeline conflicts? Discuss in detail the resource conflicts and possible solutions.	6 Marks	L3	CO2	PO1

(OR)

10.	a)	How does vector processors provide advantage over scalar processors? How does vectorizing benefit matrix multiplication?	6 Marks	L3	CO4	PO1
	b)	Discuss in detail the Flynn's Classification of computers.	6 Marks	L2	CO2	PO1

DATA STRUCTURES

[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	List the applications of linked list.	4 Marks	L1	CO1	PO1
	b)	Explain circular linked list operations in detail.	8 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Define header node/start node in a list with an example.	4 Marks	L1	CO1	PO1
	b)	Write the implementation of addition of two polynomials.	8 Marks	L3	CO1	PO3
		UNIT-II				
3.	a)	Write a program to implement stack operations Using arrays.	6 Marks	L3	CO1	PO3
	b)	Evaluate the given postfix expression 623+-382/+*2$3+.	6 Marks	L2	CO1	PO2
		(OR)				
4.	a)	Write a program to implement queue operations Using arrays.	6 Marks	L3	CO1	PO3
	b)	Illustrate how to convert an infix expression to postfix expression using stack with an example.	6 Marks	L2	CO1	PO2
		UNIT-III				
5.	a)	Define red-black tree and its properties.	4 Marks	L1	CO2	PO1
	b)	Explain algorithms for binary tree traversals.	8 Marks	L3	CO2	PO2
		(OR)				
6.	a)	Give an algorithm for finding minimum element in binary search tree.	4 Marks	L2	CO2	PO2
	b)	Construct AVL tree by inserting the following data sequentially. 45, 32, 70, 67, 21, 85, 92, 40 and explain steps involved in detail.	8 Marks	L3	CO2	PO2
		UNIT-IV				
7.		Define sorting and illustrate any two internal sorting algorithms in detail.	12 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Explain Java code for binary search with an example.	8 Marks	L2	CO3	PO2
	b)	Discuss about divide and conquer approach.	4 Marks	L1	CO3	PO1
		UNIT-V				
9.	a)	Explain in detail different ways of representing graphs.	6 Marks	L2	CO2	PO2
	b)	How do you pick a good hash function?	6 Marks	L2	CO2	PO2
		(OR)				
10.	a)	Define Minimum Spanning Tree (MST) and how we can get MST from the given graph.	6 Marks	L2	CO2	PO2
	b)	How do we deal with collisions?	6 Marks	L1	CO2	PO1

II B.Tech I Semester (SVEC19) Supplementary Examinations July – 2022

DISCRETE MATHEMATIC STRUCTURES
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Utilize truth table, verify that the proposition $(P \wedge Q) \wedge \neg (P \vee Q)$ is a contradiction.	6 Marks	L3	CO1	PO1
	b)	Show that the following premises are inconsistent: i) If Jack misses many classes through illness, then he fails high school. ii) If Jack fails high school, then he is uneducated. iii) If Jack reads a lot of books then he is not uneducated. iv) Jack misses many classes through illness and reads a lot of book.	6 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Examine whether the conclusion C follows logically from the premises H_1 and H_2. i) $H_1: P \rightarrow Q$, $H_2 \neg (P \wedge Q)$, C: $\neg P$. ii) $H_1: \neg P$, $H_2: P \leftrightarrow Q$, C: $\neg (P \wedge Q)$. iii) $H_1: P \rightarrow Q$, $H_2: \neg P$, C:Q. iv) $H_1: \neg Q$, $H_2: P \rightarrow Q$. C: $\neg P$.	6 Marks	L4	CO1	PO2
	b)	Discuss in detail about Automatic Theorem and show that (S V R) is tautologically implied by $(P \vee Q) \wedge (P \rightarrow R) \wedge (Q \rightarrow S)$.	6 Marks	L6	CO1	PO2

UNIT-II

3.	a)	Identify which elements have complements and which do not have complements if 45 *D* denotes the set of all divisors of 45, under divisibility ordering.	6 Marks	L3	CO2	PO2
	b)	Show that $(X, \leq)$ is a chain , where $X = \{1, 2, 3, 4, 6, 12\}$ and $\leq$ is the usual less than or equal to relation.	6 Marks	L1	CO2	PO2
		(OR)				
4.	a)	Analyze Compatibility Relation with an Example.	6 Marks	L4	CO2	PO2
	b)	Find the Maximum Compatibility Block in the Given Relation. X= {(ball, bed, dog, let, egg)} and the relation is given as R= {(x, y) / x, y $\in$ X $\wedge$ x R y if x and y Contains some common Letter.	6 Marks	L1	CO2	PO2

UNIT-III

5.	a)	Discuss the properties of transitive closure of a binary relation.	6 Marks	L6	CO3	PO1
	b)	Show that $(xy)^{-1} = y^{-1}x^{-1}$, where x and y are elements of group G.	6 Marks	L1	CO3	PO2
		(OR)				

6.	a)	Illustrate groups with examples.	6 Marks	L2	CO3	PO1
	b)	List properties of binary relations with examples.	6 Marks	L1	CO3	PO1
		UNIT-IV				
7.	a)	Discuss multinomial theorem in detail.	6 Marks	L6	CO4	PO1
	b)	Solve the recurrence relation $a_n = 6a_{n-1} - 9a_{n-2}$ with initial conditions $a_0 = 4$ and $a_1 = 6$.	6 Marks	L6	CO4	PO2
		(OR)				
8.	a)	How many ways can 3 novels and 2 biographies can be arranged in a shell if There are 5 novels and 4 biographies?	6 Marks	L1	CO4	PO2
	b)	Solve the recurrence relation $a_n = 3a_{n-1} + 2^n$ with initial condition $a_0 = 2$.	6 Marks	L6	CO4	PO2
		UNIT-V				
9.	a)	Show that if a plane graph is self-dual, then E = 2 V – 2.	6 Marks	L1	CO5	PO3
	b)	Discuss graph coloring problem with required examples.	6 Marks	L6	CO5	PO1
		(OR)				
10.	a)	Analyze the bipartite graph with suitable examples.	6 Marks	L4	CO5	PO2
	b)	Explain BFS with an example.	6 Marks	L1	CO5	PO1

OPERATING SYSTEMS

[Computer Science and Engineering, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 60**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What are the services provided by Operating Systems?	4 Marks	L2	CO1	PO1
	b)	Write short notes on: i) Multilevel Queue Scheduling. ii) Multilevel Feedback Queue Scheduling.	8 Marks	L2	CO1	PO2
		(OR)				
2.	a)	What is Inter process Communication? Explain the issues related to logical implementation of communication in message passing systems.	7 Marks	L2	CO1	PO2
	b)	Classify different multithreading models.	5 Marks	L2	CO1	PO2

UNIT-II

3.	a)	Using semaphores, explain how mutual exclusion is achieved for the producer and consumer processes in Bounded Buffer Problem.	7 Marks	L4	CO2	PO5
	b)	Give the syntax and specify the need of monitors. Discuss the ways of resuming a process in a monitor.	5 Marks	L2	CO2	PO2
		(OR)				
4.	a)	With illustrations, explain the way of deadlock detection in a system having several instances of a resource type.	6 Marks	L2	CO3	PO2
	b)	Write short notes on: i) Resource Allocation graph. ii) Issues that arise by Resource pre-emption in Deadlock Recovery.	6 Marks	L2	CO3	PO2

UNIT-III

5.	a)	Give the detailed description about the hardware implementation of a page table with translation Look-Aside Buffer.	5 Marks	L2	CO4	PO2
	b)	Consider the following page reference string: 1, 2, 3, 4, 2, 1, 5, 6, 2, 1, 2, 3, 7, 6, 3, 2, 1, 2, 3, 6 How many page faults would occur for the optimal page replacement algorithm, assuming three frames and all frames are initially empty.	7 Marks	L3	CO4	PO3
		(OR)				
6.		Consider a swapping system in which memory consists of the following hole sizes in memory order: 12 KB, 4 KB, 24 KB, 15 KB, 9 KB, 7 KB, 10 KB and 11 KB. Determine which hole is taken for successive segment requests of: i) 14 KB ii) 8 KB iii) 5 KB for first fit, best fit, and worst fit approaches.	12 Marks	L3	CO4	PO3

UNIT-IV

7.	a)	Discuss about the linear list and hash table data structures to implement a directory.	6 Marks	L2	CO5	PO2
	b)	Write in detail about file attributes, operations, types and structures.	6 Marks	L2	CO5	PO1
		(OR)				
8.	a)	Illustrate the three allocation methods in file system implementation with proper diagrams.	6 Marks	L2	CO5	PO2
	b)	Explain the data structures supported by kernel I/O subsystem.	6 Marks	L2	CO6	PO2

UNIT-V

9.	a)	What is access matrix? Justify how the access matrix can be implemented effectively.	7 Marks	L4	CO6	PO4
	b)	Discuss the goals and principles of protection in a modern computer system.	5 Marks	L1	CO6	PO1
		(OR)				
10.	a)	Analyze why simple password protection is the most common authentication scheme in use today and discuss the weakness inherent in the password protection scheme.	6 Marks	L4	CO6	PO4
	b)	Explain the terms ‘WORMS’ and ‘VIRUSES’ with reference to system threats.	6 Marks	L2	CO6	PO2

NUMERICAL METHODS, PROBABILITY AND STATISTICS

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science), Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1. a) Using the method of Regula Falsi, find an appropriate root for the equation $x^3 - 4x + 1 = 0$ correct up to 2 decimal places. — 7 Marks L3 CO1 PO1

   b) Find the root of the equation by Newton Raphson's method. $\mathbf{f(x) = x^3 - 3x - 5 = 0}$ correct up to 2 decimal places. — 7 Marks L3 CO1 PO1

(OR)

2. a) Find the solution using Newton's Forward Difference formula and estimate the value of x = 1895. — 7 Marks L1 CO1 PO1

X	1891	1901	1911	1921	1931
f(x)	46	66	81	93	101

   b) Find the solution using Lagrange's interpolation and estimate the value of x = 2.7. — 7 Marks L1 CO1 PO1

x	2.0	2.5	3.0
f(x)	0.69315	0.91629	1.09861

UNIT-II

3. a) Compute $f'(x)$ *and* $f''(x)$ at x = 23 by using Newton backward numerical differentiation formula from the following table. — 7 Marks L1 CO2 PO1

X	14	16	18	20	22	24
f(x) = $\sqrt{x}$	3.746	4.000	4.243	4.472	4.690	4.899

   b) Evaluate $\int_0^1 \sqrt{1+x^3}\,dx$ taking h = 0.10 by using Simpshon's 1/3 and 3/8 method. — 7 Marks L1 CO2 PO1

(OR)

4. a) Solve $y' = y^2 + x, y(0) = 1$ using Taylor's series method compute y(0.2) taking h=0.2 correct to 4 decimal places. — 7 Marks L2 CO2 PO2

   b) Apply R-K method to solve $y' = x + y, y(0) = 1, h = 0.2.$ and find y(0.2). — 7 Marks L2 CO2 PO2

UNIT-III

5. a) If a discrete random variable x has the following probability function, find the value of i) k; ii) E(x) and iii) Var(x). — 7 Marks L1 CO3 PO1

x	3	2	1	0	-1	-2	-3
P(x)	0.1	0.2	3k	k	2k	0	0.1

   b) The time to failure in thousands of hours of an important piece of electronic equipment used in a manufactured DVD player has the density function. $f(x) = \begin{cases} 2.e^{-2x}; & x > 0 \\ 0; & otherwise \end{cases}$ Find E(X) and Var(X). — 7 Marks L1 CO3 PO1

(OR)

6.	a)	Two cards are drawn successively with replacement from a well shuffled pack of 52 cards. Find the expected value for the number of aces.	7 Marks	L1	CO3	PO1
	b)	If X and Y are independent random variables, then show that $V(X + Y) = V(X) + V(Y)$.	7 Marks	L1	CO3	PO1

UNIT-IV

7.	a)	The mean and variance of binomial variate x with parameters 'n' and 'p' are 16 and 8. Find: i) $P(x=4)$ ii) $P(x\geq 3)$.	7 Marks	L2	CO4	PO2
	b)	The number of incidents at a nuclear power plant has a Poisson distribution with a mean of 4 incidents per year in one year. Find the probability that there will be i) no more than 2 incidents ii) exactly 6 incidents in a one year period.	7 Marks	L2	CO4	PO2

(OR)

8.	a)	Body Mass Index (BMI) in a population of 60 year old men in whom BMI is normally distributed and has a mean value is 29 and a standard deviation is 6. Find the probability that BMI is i) more than 28, ii) in between 29.5 to 32.4, iii) less than 30.	7 Marks	L2	CO4	PO2
	b)	Customers experiencing technical difficulty with their internet cable hookup may call for technical support. It takes the technician between 90 seconds and 14 minutes to resolve the problem. The distribution of this support time follows the uniform distribution. i) What are the values for **a** and **b** in minutes? ii) What is the mean time to resolve the problem? iii) What percent of the problems take more than 5 minutes to resolve?	7 Marks	L2	CO4	PO2

UNIT-V

9.	a)	10 specimens of copper wires drawn from a large lot have the following breaking strength: 578, 572, 570, 568, 572, 571, 570, 572, 596, and 548. Test whether the mean breaking strength of the lot may be taken be 578kg. Assume 0.05 level.	7 Marks	L3	CO5	PO3
	b)	An investigation of relative merits of two kinds of flash lights batteries showed that a random sample of 100 batteries of brand A tested on the average 36.5 hrs with a S.D of 1.8 hrs while a random sample of 80 batteries of brand B tested on the average 36.8 hrs with a S.D of 1.5 hrs. Test the claim at 5% level.	7 Marks	L3	CO5	PO3

(OR)

10.	a)	In a sample of 600 students of a certain college 400 are found to use dot pens. In another college, from a sample of 900 students 450 were found to use dot pens. Test whether the two colleges are significantly different with respect to the habit of using dot pens.	7 Marks	L4	CO5	PO3
	b)	A large electronics firm that hires many workers with disabilities wants to determine whether their disabilities affect such workers performance. Use the 0.05 level of significance to decide on the basis of the sample data shown in the following table whether it is reasonable to maintain that the disabilities have no effect on the workers performance.	7 Marks	L4	CO5	PO3

	performance		
	Low	Average	high
Deaf	16	49	24
disability	29	93	28

SPECIAL FUNCTIONS AND COMPLEX ANALYSIS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks:70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define Beta function and applying it show that $\frac{\beta(m+1,n)}{m}=\frac{\beta(m,n+1)}{n}=\frac{\beta(m,n)}{m+n}$.	7 Marks	L1	CO1	PO1
	b)	Prove that 1.3.5.7 ……..(2n -1) $\sqrt{\pi}=2^n\Gamma(n+\frac{1}{2})$.	7 Marks	L5	CO1	PO1
		(OR)				
2.	a)	Prove that $\int_0^1 \frac{x^2}{\sqrt{1-x^4}}dx \times \int_0^1 \frac{dx}{\sqrt{1+x^4}}=\frac{\pi}{4\sqrt{2}}$.	7 Marks	L5	CO1	PO1
	b)	Show that $\beta\left(m,\frac{1}{2}\right)=2^{2m-1}\beta(m,m)$.	7 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Prove that $J_{-\frac{1}{2}}(x)=\sqrt{\frac{2}{\pi x}}\cos x$.	7 Marks	L5	CO2	PO2
	b)	Demonstrate $f(x)=x^4+3x^3-x^2+5x-2$ in terms of Legendre polynomials.	7 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Demonstrate $J_5(x)$ in terms of $J_0(x)$ and $J_1(x)$.	7 Marks	L2	CO2	PO2
	b)	Prove the recurrence relation $(n+1)P_{n+1}(x)=(2n+1)xP_n(x)-nP_{n-1}(x)$.	7 Marks	L5	CO2	PO2

UNIT-III

5.	a)	Define analytic function and show that the function $f(z)=\sqrt{\lvert xy\rvert}$ is not analytic at the origin even though Cauchy Riemann equations are satisfied thereof.	7 Marks	L1	CO3	PO2
	b)	Construct the bilinear transformation which maps the points 1, *i*, -1 to 2, *i*, -2.	7 Marks	L3	CO4	PO2
		(OR)				
6.	a)	Construct an analytic function whose real part is $e^x\left[(x^2-y^2)\cos y-2xy\sin y\right]$.	7 Marks	L3	CO3	PO2
	b)	Discuss the transformation $w=e^z$.	7 Marks	L5	CO4	PO2

UNIT-IV

7.	a)	Evaluate $\int_C \frac{\sin^2 z}{(z-\pi/6)^3} dz$ where C is the circle $\lvert z\rvert = 1$.	7 Marks	L4	CO5	PO2
	b)	Expand $f(z) = \frac{1}{(z-1)(z-2)}$ in the region (i) $\lvert z\rvert < 1$, (ii) $1 < \lvert z\rvert < 2$ (iii) $0 < \lvert z-1\rvert < 1$.	7 Marks	L2	CO5	PO1
		(OR)				
8.		State Cauchy's theorem and verify it for e^{iz} along the boundary of the triangle with the vertices of the point 1+*i*, -1+*i* and -1-*i*.	14 Marks	L1	CO5	PO2

UNIT-V

9.	a)	Define pole and residue. Find the poles and corresponding residues of $f(z) = \frac{\sin z}{z\cos z}$.	7 Marks	L1	CO5	PO1
	b)	Evaluate $\int_C \tan z\, dz$ where C is the circle $\lvert z\rvert = 2$ By applying theory of residues.	7 Marks	L5	CO5	PO2
		(OR)				
10.		Show that $\int_0^\infty \frac{dx}{x^6+1} = \frac{\pi}{3}$ by complex variable technique.	14 Marks	L2	CO5	PO5

CODE No.: 20BT12901 **SVEC-20**

DISCRETE MATHEMATICAL STRUCTURES

[Computer Science and Engineering, Information Technology, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science)]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Determine the following premises is valid or invalid : ~ r → (s→ ~t) ~ r v w ~ p →s w _____ t → p	7 Marks	L4	CO1	PO1
	b)	Check the following argument inconsistency or consistency using rules of inference. Every living thing is a Plant or animal. Ratna's dog is alive and it is not a plant. All animals have hearts. Hence, Ratna's dog has a heart.	7 Marks	L4	CO1	PO2
		(OR)				
2.	a)	Prove the following one tautology or not: $\sim(p \vee q) \vee [(\sim p) \wedge q] \vee p$ (Using truth table).	7 Marks	L3	CO1	PO6
	b)	Give a contradiction proof that the square root of 2 is not a rational.	7 Marks	L3	CO1	PO1

UNIT-II

3.	a)	Define POSET. Draw a POSET or Hasse diagram for the POSET $[D_{12};/]$ and determine all maximal and minimal elements and greatest and least elements if they exist. Specify the $[D_{12};/]$ POSET is lattice or not.	7 Marks	L4	CO2	PO1
	b)	Let R be the relation in the natural numbers N = {1,2,3..} defined by "x + 2y = 10", that is, let R = {(x,y)|x∈N, x+2y = 10}. Find. i) The domain and range of R. ii) R^{-1} .	7 Marks	L4	CO2	PO8
		(OR)				
4.	a)	If f:A→B and g:B→C are both one-to-one correspondences, prove that gof is also a one-to-one correspondence.	7 Marks	L3	CO2	PO1
	b)	If $f(x)= x^3+1$ and f(x) is a bijective function find the inverse of the function.	7 Marks	L3	CO2	PO6

UNIT-III

5.	a)	Discuss the Homomorphism with suitable examples.	7 Marks	L2	CO3	PO1
	b)	Show that every cyclic graph is abelian group.	7 Marks	L2	CO3	PO1
		(OR)				
6.	a)	A = {2,4,8}. Determine that $(A,+_6)$ is a subgroup of $(Z_6, +_6)$.	7 Marks	L3	CO3	PO6
	b)	Explain Algebraic system general properties with suitable examples.	7 Marks	L2	CO3	PO2

UNIT-IV

7.	a)	Prove by using Mathematical Induction, for each integer n > 1, n^{th} Fibonacci number F_n is less than $(7/4)^n$.	7 Marks	L4	CO4	PO8
	b)	How many different license plates are there (allowing repetitions) : that involve 1, 2, or 3 letters followed by 1, 2, 3, or 4 digits?	7 Marks	L3	CO4	PO6
		(OR)				
8.	a)	Solve the following recurrence relations: $\mathbf{a_n-7a_{n-1}+ 16a_{n-2}-12a_{n-3}=0}$ where $\mathbf{a_0=1, a_1=4, a_2=8}$ (using generating functions method).	7 Marks	L4	CO4	PO1
	b)	Find the coefficient of X^{25} in $\mathbf{(X^2+X^3+X^4+X^5+X^6)^7}$.	7 Marks	L4	CO4	PO2

UNIT-V

9.	a)	Find the Chromatic – Number for the i) $K_{3,3}$ ii) $K_{4,4}$ iii) $K_{n,n}$?	7 Marks	L3	CO5	PO1
	b)	Show that A complete graph K_n is planar iff $n \leq 4$. (Using Euler's)	7 Marks	L4	CO5	PO8
		(OR)				
10.	a)	What is meant by Isomorphism? Determine whether the following graphs G1 and G2 Isomorphic or not.	7 Marks	L3	CO5	PO6

(G1) **(G2)**

	b)	Discuss Prim's spanning tree algorithm with suitable examples.	7 Marks	L2	CO5	PO2

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	How to measure the performance analysis of an Algorithm?	7 Marks	L2	CO1	PO2
	b)	What are the guidelines for asymptotic Analysis?	7 Marks	L2	CO2	PO2
		(OR)				
2.	a)	Sort the following list of elements using Selection sort 15, 28, 46, 10, 35, 54, 5, 17	7 Marks	L3	CO2	PO5
	b)	Explain the Shell sort with an example.	7 Marks	L3	CO2	PO2
		UNIT-II				
3.	a)	What are the applications of linked list?	7 Marks	L2	CO3	PO2
	b)	What is doubly linked list? Write an algorithm to traverse doubly linked list.	7 Marks	L2	CO3	PO2
		(OR)				
4.	a)	What is circular linked list? Explain the various operations in a circular linked list.	7 Marks	L3	CO3	PO3
	b)	Write an algorithm to insert and delete an element at random place in single linked list.	7 Marks	L3	CO3	PO2
		UNIT-III				
5.	a)	Write an algorithm or program to implement Stack using linked list.	7 Marks	L2	CO4	PO2
	b)	What are the applications of Stacks?	7 Marks	L2	CO4	PO2
		(OR)				
6.	a)	Illustrate applications of Queues and write an algorithm or program to implement Queue using linked list.	7 Marks	L2	CO4	PO2
	b)	Convert the following infix expression to postfix expression using stack a+b*c+(d*e+f)*g.	7 Marks	L3	CO4	PO2
		UNIT-IV				
7.	a)	What is Complete binary tree? Write and explain all properties of complete binary trees with suitable examples.	7 Marks	L3	CO5	PO5
	b)	Construct Complete binary tree by inserting following elements 12, 6, 7, 22, 9, 14, 8, 65 and then delete elements 6 and 14.	7 Marks	L2	CO5	PO1
		(OR)				
8.	a)	Construct Binary search trees by inserting the following elements 33, 6, 7, 4, 12, 7, 9, 3, 55, 2, 46 and then delete 55 and 33.	7 Marks	L3	CO5	PO6
	b)	Write an algorithm or program to traverse Binary tree using In-order traversal technique.	7 Marks	L2	CO5	PO2
		UNIT-V				
9.	a)	Why hashing is so powerful compared to other techniques? Explain static hashing with suitable example.	7 Marks	L2	CO5	PO2
	b)	What is the motivation for Dynamic Hashing? Explain Dynamic hashing with suitable example.	7 Marks	L3	CO5	PO2
		(OR)				

10.	Find the depth first traversal and breadth first traversal for the following graph. Assume the source vertex is Z and also write the algorithm of both. 	14 Marks	L3	CO6	PO2

CODE No.: 20BT30101 **SVEC-20**

CONSTRUCTION, PLANNING AND PROJECT MANAGEMENT

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Compare English bonds and Flemish bonds.	7 Marks	L4	CO1	PO1 PO5 PO10
	b)	Explain any three types of foundation with sketches.	7 Marks	L2	CO1	PO1 PO2 PO5
		(OR)				
2.	a)	Draw the Queen post truss and mention the parts.	8 Marks	L3	CO1	PO1 PO3 PO5
	b)	Explain any two flooring types.	6 Marks	L2	CO1	PO1 PO2 PO5
		UNIT-II				
3.	a)	Define damp proofing and describe the importance of damp proofing in construction.	8 Marks	L1	CO2	PO1 PO5 PO12
	b)	Briefly explain the constituents of paint.	6 Marks	L2	CO2	PO1 PO5 PO12
		(OR)				
4.	a)	Write short notes on: i) Shoring. ii) Scaffolding. iii) Form work. v) Varnish.	8 Marks	L2	CO2	PO1 PO5 PO10
	b)	Explain horizontal and vertical shoring with neat sketches.	6 Marks	L2	CO2	PO1 PO5 PO10
		UNIT-III				
5.	a)	Discuss about the necessary precautions need to be followed for safety in the construction site.	7 Marks	L2	CO3	PO1 PO5 PO9 PO11
	b)	Discuss about the types, merits and demerits of different types of organization.	7 Marks	L2	CO3	PO1 PO7 PO9 PO11
		(OR)				
6.	a)	Enumerate factors affecting cost owning and operating the equipment.	7 Marks	L2	CO3	PO1 PO5 PO8
	b)	Write down the steps involved in the ABC classification of materials for better resource management.	7 Marks	L1	CO3	PO1 PO2 PO6 PO11

UNIT-IV

7.	a)	Explain why planning is necessary in project management. Describe various steps in it.	7 Marks	L2	CO4	PO1 PO2 PO5 PO11
	b)	What is decision making? And explain its role in project management.	7 Marks	L2	CO4	PO1 PO2 PO3 PO9 PO11

(OR)

8.	a)	What is dummy activity? And discuss various rules for providing dummies in a network.	6 Marks	L2	CO4	PO1 PO2 PO3 PO11
	b)	A project consists of 8 activities A, B, C, D, E, F, G and H with their times of completion as follows:	8 Marks	L6	CO4	PO1 PO2 PO3 PO4

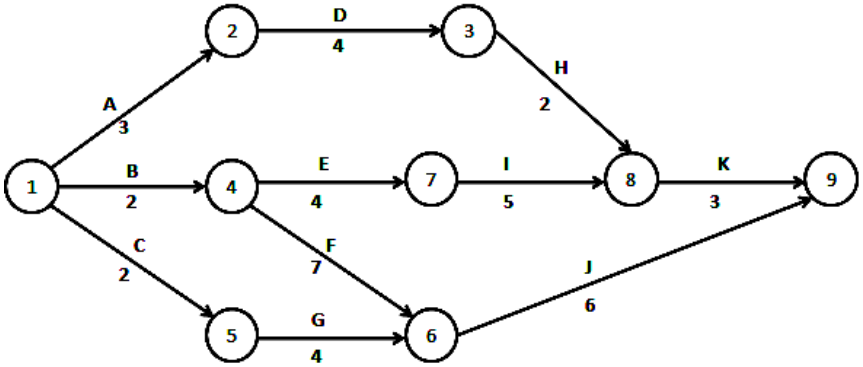
Activity	A	B	C	D	E	F	G	H
Duration (weeks)	2	4	2	4	6	4	5	4

The precedence relationships are as follows:
A and B can be performed in parallel, C and D cannot start until A is complete, E cannot start until half the work of activity C is complete., F can start only after activity D is complete, G succeeds C, H is the last activity which should succeed E.

i) Draw bar chart.
ii) What is the total time of completion of the project?

UNIT-V

9.		For a given network, calculate. i) Earliest and latest activity time for each activity. ii) Total float, free float, independent float and interfering float. iii) Determine critical path.	14 Marks	L6	CO5	PO1 PO2 PO3 PO4 PO5 PO11



(OR)

10.	a)	What is resource leveling? Illustrate with an example.	7 Marks	L2	CO5	PO1 PO2 PO4 PO10 PO11
	b)	Distinguish between crashing for optimum cost and crashing for optimum resources.	7 Marks	L4	CO5	PO1 PO2 PO10 PO11

FLUID MECHANICS AND HYDRAULIC MACHINERY

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Explain Newton's law of Viscosity and differentiate dynamic viscosity from kinematic viscosity.	7 Marks	L3	CO1	PO1 PO2
	b)	Pipes A and B are carrying water at a pressures of 100kN/m^2 and 200kN/m^2 respectively. Pipe B is located 2m above pipe A. Find the deflection of mercury in mercury U-tube differential manometer when both the limbs are connected to both the pipes.	7 Marks	L3	CO1	PO1 PO2 PO4 PO10
		(OR)				
2.	a)	Define density, specific gravity, viscosity and vapour pressure. Calculate the specific weight, specific mass, specific volume and specific gravity of a liquid having a volume of 6m^3 and weight of 44kN.	7 Marks	L2	CO1	PO1 PO2
	b)	Describe Newton's law of viscosity and a plate 0.05 mm distant from a fixed plate moves at 1.2 m/s and requires a force of 2.2 N/m^2 to maintain this speed. Find the viscosity of the fluid between the plates.	7 Marks	L3	CO1	PO1 PO2 PO4 PO10
		UNIT-II				
3.	a)	Explain the description of fluid motion and list out types of fluid flows with an example.	8 Marks	L2	CO2	PO1
	b)	Describe types of flow lines and velocity for a two dimensional flow field is given by V = (3 + 2xy +4t^2) i + (xy^2 + 3t) j. Find the velocity and acceleration at a point (1, 2) after 2 sec.	6 Marks	L2	CO2	PO1 PO2 PO4
		(OR)				
4.	a)	Derive the discharge equation of a triangular notch.	6 Marks	L2	CO2	PO1 PO2 PO4 PO10
	b)	200 lit/s of water is flowing in a pipe having a diameter of 300mm. If the pipe is bent by 600, find the magnitude and direction of the resultant force on the bend. The pressure of the water flowing is 400kN/m^2. Take specific weight of water as 9.81kN/m^3.	8 Marks	L3	CO2	PO1 PO2 PO3 PO4 PO10
		UNIT-III				
5.	a)	Two reservoirs are connected by two pipes of same length laid in parallel. The diameters of the pipes are 100mm and 300mm respectively. If the discharge through 100mm diameter pipe is 0.01m^3/s, what will be the discharge through 300mm pipe? Assume that friction factor is same for both pipes.	8 Marks	L4	CO3	PO1 PO2 PO3 PO4 PO10
	b)	In a pipe of Length 75m is flowing at a velocity of 2.8m/s. Design the diameter of the pipe using Darcy Weisbach formula. Consider the head loss in the pipe =3m, coefficient of friction = 0.004.	6 Marks	L2	CO3	PO1 PO2 PO3 PO4 PO5

(OR)

6.	a)	An oil of viscosity 9 poise and specific gravity 0.9 is flowing through a horizontal pipe of 60 mm diameter. If the pressure drop in 100 m length of the pipe is 1800 kN/m^2, determine rate of flow of oil, centre line velocity, total frictional drag over 100 m length and power required to maintain the flow.	7 Marks	L4	CO3	PO1 PO2 PO4 PO10
	b)	Define Couette flow and describe flow of viscous fluid between two parallel plates.	7 Marks	L2	CO4	PO1 PO2 PO10

UNIT-IV

7.	a)	List out types of channels and compare open channel flow and pipe flow. What is the purpose of providing bed slope in open channels?	7 Marks	L2	CO5	PO1 PO2 PO10
	b)	Classify flows and define energy and momentum correction factors. Hydraulic jump forms at the downstream end of spillway causing 18 cumec discharges. If the depth before jump is 0.8 m, determine the depth after the jump and energy loss.	7 Marks	L2	CO5	PO1 PO2 PO10

(OR)

8.	a)	Prove that for a trapezoidal channel of most economical section: i) Half of the top width = one of the length of side slopes. ii) Hydraulic mean depth = half of depth of flow.	7 Marks	L2	CO5	PO1 PO2 PO5
	b)	Find the pre-jump depth in a rectangular channel of bed width 5m when the rate of water is 10m^3/s having Froude Number after the jump is 0.8. Also find i) Loss of energy ii) % loss of energy.	7 Marks	L2	CO5	PO1 PO2 PO5

UNIT-V

9.	a)	State Impulse Momentum principle. Derive an expression for impact of jet of liquid on a fixed vertical plate. Find the force exerted by a 4cm diameter water jet directed against a flat plate held normal to the jet, if the jet is discharging 60 litres of water per second.	7 Marks	L3	CO6	PO1 PO2 PO5
	b)	Derive an expression for impact of jet of liquid on an inclined plate moving in the direction of the jet of liquid. A jet of water 120mm in diameter and moving with a velocity of 25 m/s strikes normally on a flat plate. Determine the force exerted on the plate and the work done when the plate is stationary, the plate is moving with a velocity of 8 m/s in the direction of the jet, and the plate is moving with a velocity of 8 m/s towards the jet.	7 Marks	L4	CO6	PO1 PO2 PO3 PO4 PO10

(OR)

10.	a)	Derive an expression for impact of jet on a fixed curved plate. A jet of water 5 cm in diameter and moving with a velocity of 15 m/s impinges on a series of vanes moving with a velocity of 5 m/s. Determine force on the plates. Work done per second and Efficiency of the jet.	7 Marks	L4	CO6	PO1 PO2 PO10
	b)	Obtain an expression for force exerted by the jet of water on a inclined plane which is at rest. Prove that the maximum efficiency is 50% when a jet of liquid strikes of plates fixed to the periphery of a wheel.	7 Marks	L4	CO6	PO1 PO2 PO10

MECHANICS OF SOLIDS

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.		Draw the shear force and bending moment diagram for the overhanging load as shown in the figure below. And also locate the point of contra flexure. 	14 Marks	L4	CO1	PO1 PO2 PO4 PO10
		(OR)				
2.	a)	A cantilever beam of 2 m long carries a uniformly distributed load of 1.5 kN/m over a length of 1.6 m from the free end. Draws shear force and bending moment diagrams for the beam.	7 Marks	L4	CO1	PO1 PO2 PO4 PO10
	b)	A simply supported beam 6 m long is carrying a uniformly distributed load of 5 kN/m over a length of 3 m from the right end. Draw shear force and bending moment diagrams for the beam and also calculate the maximum bending moment on the beam.	7 Marks	L4	CO1	PO1 PO2 PO4 PO10
		UNIT-II				
3.	a)	State the assumptions made in deriving bending equation and derive the bending equation.	6 Marks	L4	CO2	PO1 PO2 PO3 PO4 PO6 PO10
	b)	Derive the relation between average shear stress and the maximum shear stress for a rectangular section and draw the shear distribution diagram.	8 Marks	L4	CO2	PO1 PO2 PO3 PO4 PO6 PO10
		(OR)				
4.		A square chimney 24 m high, has an opening of 1.25m x 1.25m inside. The external dimensions are 2.5m x 2.5m. The horizontal intensity of wind pressure is 1.3 kN/m^3 and the specific weight of masonry is 22 kN/m^3. Calculate the maximum and minimum stress intensities at the base of the chimney.	14 Marks	L4	CO3	PO1 PO2 PO6 PO10
		UNIT-III				
5.	a)	Derive the torsion equation for a circular shaft of dimeter ‘d’ subjected to torque ‘T’.	7 Marks	L4	CO4	PO1 PO2 PO3 PO4 PO6

	b)	Find the torque that can be transmitted by a thin tube 6 cm mean diameter and wall thickness 1 mm, the permissible stress is 6000 N/cm^2.	7 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO6
		(OR)				
6.		A close coiled helical spring is made of a round wire having 'n' turns and the mean coil radius R is 5 times the wire diameter. Show that the stiffness of the spring = 2.05 R/n. If the above spring is to support a load of 1.2 kN with 120 mm compression. Calculate mean radius of the coil and number of turns assuming G = 8200N/mm^2 and permissible shear stress, λ allowable = 250 N/mm^2.	14 Marks	L6	CO4	PO1 PO2 PO3 PO4 PO6
		UNIT-IV				
7.		At a point in a strained material there are tensile stresses of 120 MPa and 60 MPa at right angles to one another along with a state of simple shear of 30 MPa. Draw Mohr's circle of stresses and determine the principal stresses and find the position of planes on which they act. Find also the maximum shear stress.	14 Marks	L4	CO5	PO1 PO2 PO6 PO10
		(OR)				
8.	a)	Write a short note on maximum shear stress theory.	5 Marks	L4	CO5	PO1 PO2 PO6 PO10
	b)	A certain steel has proportionality limit of 280 N/mm^2 in simple tension. Under a certain three-dimensional stress system, the principal stresses are 120 N/mm^2 tensile, 60 N/mm^2 tensile, and 30 N/mm^2 compressive. Calculate the factor of safety according to (i) maximum principal stress theory, (ii) maximum shear stress theory, (iii) total strain energy theory (iv) shear strain energy theory and (v) maximum strain theory. (1/m = 0.3).	9 Marks	L4	CO5	PO1 PO2 PO6 PO10
		UNIT-V				
9.	a)	Derive the expression for Euler's buckling load for column when one end is fixed and other is free.	7 Marks	L4	CO6	PO1 PO2 PO5 PO6
	b)	Calculate the safe compressive load on a hollow cast iron column one end rigidly fixed and other pin-jointed, 150mm outer and 100mm inner diameter, 10m long. Use Euler's formula with a factor of safety of 5 and take young's modulus as 95GN/m^2.	7 Marks	L4	CO6	PO1 PO2 PO5 PO6
		(OR)				
10.	a)	Write the limitations of the Euler's formula and give Rankine's formula for critical load on columns.	6 Marks	L4	CO6	PO1 PO2 PO5 PO6
	b)	A hollow cast iron column whose outside diameter is 200mm has a thickness of 20mm. It is 4.5m long and is fixed at both ends. Calculate the safe load by Rankine formula using a factor of safety of 4. Calculate the slenderness ratio and the ratio of Euler's and Rankine's critical load. Take σ_c = 567 MN/m^2, E = 90 GN/m^2 and a = 1/1600.	8 Marks	L4	CO6	PO1 PO2 PO5 PO6

SURVEYING

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	What are the principles of surveying?. Explain any two of them briefly.	8 Marks	L1	CO1	PO1 PO2
	b)	Write the different types of chains and their specifications.	6 Marks	L2	CO1	PO1 PO2 PO3 PO5

(OR)

2.	a)	If the observed bearing are as under determine the correct bearings and included angles.	8 Marks	L3	CO1	PO1 PO2 PO4

line	F.B	B.B
AB	$150^0 30'$	$329^0 45'$
BC	78^0	$256^0 30'$
CD	$42^0 30'$	$223^0 45'$
DE	$315^0 45'$	$134^0 15'$
EA	$220^0 15'$	$40^0 15'$

	b)	Differentiate between prismatic and surveyor's compass.	6 Marks	L2	CO1	PO1 PO2 PO4 PO6

UNIT-II

3.	a)	What are the methods of plane tabling? Explain any one of them in detail.	9 Marks	L2	CO1	PO1 PO2 PO6 PO10
	b)	What are the advantages and disadvantages of plane table surveying?	5 Marks	L2	CO1	PO1 PO2

(OR)

4.	a)	Define contouring. Explain the characteristics of contours.	7 Marks	L2	CO2	PO1 PO2 PO4 PO6 PO10
	b)	The following notes refer to reciprocal levels. Determine: i) The true R.L of Q. ii) The combined correction for curvature and refraction.	7 Marks	L5	CO2	PO1 PO2 PO4 PO6 PO10

Instrument at	Staff readings on		Remarks
	P	Q	
P	1.678	2.536	PQ= 1020m
Q	0.649	1.432	R.L of P =120.386

UNIT-III

5.	a)	Explain the procedure to measure a horizontal and vertical angle using Theodolite.	10 Marks	L4	CO3	PO1 PO2 PO6 PO8
	b)	Explain briefly about the temporary adjustments of theodolite.	4 Marks	L4	CO3	PO1 PO2 PO6 PO8
		(OR)				
6.	a)	The following observations were taken with a tacheometer at the station P to a staff at Q held normal to the line of sight, staff readings are 1.45, 1.915, 2.380m, angle of depression is 15^0 30'and R.L of P is 201.45m. The height of trunnion axis above the peg at P = 1.315m. Determine the horizontal distance between P and Q, and the R.L of Q. take k=100 and C=0.0	7 Marks	L5	CO3	PO1 PO2 PO5 PO6
	b)	Derive an expression for principle of stadia method.	7 Marks	L2	CO3	PO1 PO3 PO5 PO6

UNIT-IV

7.		The two tangents meet at an angle of 70^0 with a chainage of 1190.56m. The radius of curve is 300m. Take peg interval as 20m. Calculate the necessary data for the simple circular curve by using tangential angle method.	14 Marks	L6	CO5	PO1 PO2 PO5 PO6
		(OR)				
8.	a)	A railway embankment is 16m wide with side slopes 2 to 1. Assume the ground to be level in direction transverse to the centre line. Calculate the volume contained in a length of 100m, the centre height at 20m intervals being in m: 2.0, 4.5, 4.0, 3.5, 2.5, 1.5, use trapezoidal rule and Simpsons rule.	8 Marks	L5	CO4	PO1 PO2 PO4 PO5 PO6
	b)	What do you mean by degree of curve and establish the relation between radius and degree of curve?	6 Marks	L4	CO5	PO1 PO2 PO3 PO5

UNIT-V

9.	a)	What is total station? Illustrates its uses.	7 Marks	L1	CO6	PO1 PO2 PO3 PO5
	b)	What is meant by GPS? Write the applications of GPS.	7 Marks	L1	CO6	PO1 PO2 PO5 PO6
		(OR)				
10.	a)	Explain the working principle of drone surveying.	7 Marks	L2	CO6	PO1 PO2 PO3 PO5 PO10
	b)	Explain the procedure involved in calculation of length and area in drone surveying.	7 Marks	L2	CO6	PO1 PO2 PO4 PO5

ELECTROMAGNETIC FIELDS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	State and explain Coulomb's law also calculate E due to infinite line charge distribution.	7 Marks	L1	CO1	PO1 PO2
	b)	A point charge of 10C is located at (1, 1, 2) in free space, while a charge of 1C is at (4, 1, 3). Find the coordinated of the point at which a point charge experience no force.	7 Marks	L3	CO1	PO1 PO2
		(OR)				
2.	a)	If a sphere of radius 'a' has a charge density $\rho_v = kr^3$ then find **D** and ▼. **D** as a function of radius 'r' and sketch the result. Assume k constant.	7 Marks	L3	CO1	PO1 PO2
	b)	Find the stored energy in a system of four identical charges Q=4 nC at the corners of a square of 1 m on a side.	7 Marks	L2	CO1	PO1 PO2

UNIT-II

3.	a)	Derive an expression for electric field intensity due to an electric dipole.	7 Marks	L2	CO1	PO1 PO2
	b)	Find the total current in outward direction from a cube of 1m, with one corner at the origin and edges parallel to the coordinate axes if, $\vec{J} = 2x^2\vec{a}_x + 2xy^3\vec{a}_y + 2xy^3\vec{a}_z \ A/m^2$.	7 Marks	L3	CO1	PO1 PO2
		(OR)				
4.	a)	Explain and derive the boundary conditions for a conductor –free space interface.	7 Marks	L2	CO1	PO1 PO2
	b)	A parallel plate capacitor with a separation of 1 cm has 29 kV applied, when air was the dielectric used. Assume that the dielectric strength of air as 30 kV/cm. A thin piece of glass with ϵ_r=6.5 with a dielectric strength of 290 kV/cm with thickness 0.2 cm is inserted. Find whether glass will break or not.	7 Marks	L3	CO1	PO1 PO2

UNIT-III

5.	a)	Using Biot-Savart's law, derive the expression for H due to conductor of finite length.	7 Marks	L2	CO2	PO1 PO2
	b)	In a cylindrical region 0 < r <0.5m, the current density is **J**=4.5 $e^{-2r}\mathbf{a_z}$ A/m^2 and **J**=0 elsewhere. Use Ampere's law to find **H**.	7 Marks	L3	CO2	PO1 PO2
		(OR)				
6.	a)	Find the flux passing the portion of the plane $\phi = \pi/4$ defined by 0.01< r < 0.05 m and 0 < z < 2 m. A current filament of 2.5A is along the z axis in the $\vec{a}_z$ direction, in free space.	7 Marks	L3	CO2	PO1 PO2
	b)	Using amperes circuital law, find **H** and **B** inside a long straight non magnetic conductor of radius 8 mm carrying a current density of 50kA/m^2.	7 Marks	L3	CO2	PO1 PO2

UNIT-IV

7.	a)	Two long parallel wires separated 2 m apart carry currents of 50 A and 100 A respectively in the same direction. Determine the magnitude and direction of the force between them per unit length.	7 Marks	L3	CO3	PO1 PO2
	b)	Find inductance per unit length of a coaxial cable if radius of inner and outer conductors is 1 mm and 3 mm respectively. Assume relative permeability unity.	7 Marks	L3	CO3	PO1 PO2
		(OR)				
8.	a)	Derive an expression for torque produced on a rectangular current loop if placed in a magnetic filed **B**. Show that $\vec{T} = \vec{m}\ X\ \vec{B}$ also holds for the system.	7 Marks	L2	CO3	PO1 PO2
	b)	A coil of 500 turns is wound on a closed iron ring of mean radius 10 cm and cross sectional area of 3 cm^2. Find the self inductance of the winding if the relative permittivity of iron is 800.	7 Marks	L3	CO3	PO1 PO2

UNIT-V

9.	a)	Derive the expression for one of the Maxwell's equation $\nabla x\ \vec{E} = \frac{-\partial \vec{B}}{\partial t}$.	7 Marks	L2	CO4	PO1 PO2
	b)	Show that the ratio of the amplitude of the conduction current and displacement current density is $\sigma/\omega\in$ for the applied field $E = E_{max} \cos\omega t$. Where $\in$ = permittivity of medium.	7 Marks	L3	CO4	PO1 PO2
		(OR)				
10.	a)	Explain the following terms: i) Motional EMF. ii) Static EMF.	7 Marks	L1	CO4	PO1 PO2
	b)	State and prove the Poynting theorem.	7 Marks	L2	CO4	PO1 PO2

ELECTRICAL MACHINES - I

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain each part of DC generator with neat sketch.	8 Marks	L2	CO1	PO1
	b)	Compare lap and wave winding.	6 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Derive **emf** equation of DC generator.	7 Marks	L2	CO1	PO1
	b)	A 4-pole DC shunt generator with shunt field resistance of 100Ω and armature resistance of 1Ω has 378 wave connected conductors in its armature and the generator is driven at 1000 r.p.m. Calculate the power absorbed by the load.	7 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Explain the process of commutation in DC generators with the help of diagrams.	8 Marks	L2	CO2	PO1
	b)	A four pole DC generator supplies a current of 100A at full load. It has wave wound armature with 722 conductors. If the brush lead is 8 degrees, calculate the armature demagnetizing and cross magnetizing ampere turns per pole.	6 Marks	L3	CO2	PO4
		(OR)				
4.	a)	What is self-excitation? What are the conditions for building up of voltage in dc shunt generator?	7 Marks	L2	CO2	PO2
	b)	Discuss the internal and external characteristics of DC shunt generator.	7 Marks	L2	CO2	PO2

UNIT-III

5.	a)	Derive the torque equation of a DC motor.	7 Marks	L2	CO3	PO2
	b)	The armature resistance of a DC shunt motor is 0.5Ω. It draws 20A from 220V mains and is running at a speed of 770 r.p.m. Determine induced **emf** and electromagnetic torque.	7 Marks	L3	CO3	PO4
		(OR)				
6.	a)	Explain why a starter is required to start a DC motor and describe three point starter with neat diagram.	7 Marks	L2	CO3	PO2
	b)	A DC shunt motor runs at 1000 r.p.m on 220V supply. Its armature and field resistances are 0.5Ω and 110Ω respectively and the total current taken from the supply is 26A. It is desired to reduce the speed to 750 r.p.m keeping the armature and field currents same. What resistance should be added in the armature circuit?	7 Marks	L3	CO3	PO4

UNIT-IV

7.	a)	Discuss the operation of single phase transformer with neat diagram.	6 Marks	L2	CO4	PO1
	b)	A 6600/440V single phase 600 KVA transformer has 1200 primary turns. Find i) Transformation ratio ii) Secondary turns iii) Voltage / turn iv) Secondary current when it supplies a load of 400 kW at 0.8 p.f. lagging.	8 Marks	L3	CO4	PO2

(OR)

8.	a)	List the losses, which occur in a loaded transformer. Deduce the relationship between losses for maximum efficiency.	6 Marks	L2	CO4	PO7
	b)	A 600kVA, distribution transformer has copper and iron losses of 5.6 kW and 3.2kW respectively on full load. The transformer is loaded as shown below. **Loading (kW) Power factor(lag) No. of hours** i) 500KW, 0.9 pf (Lag), 8hours. ii) 400KW, 0.8 pf (lag), 10 hours. iii) 50KW, 0.75 pf (lag), 4hours. iv) No load – 02hours. Calculate the all day efficiency.	8 Marks	L3	CO4	PO4

UNIT-V

9.	a)	Discuss the construction of three phase core type and shell type transformers with the help of diagrams.	7 Marks	L2	CO4	PO1
	b)	Three number of single phase *ideal* transformers, each of rating. 20kVA, 400V / 200V, 50Hz is connected in delta/star fashion to supply a balanced three phase 20 kW, 0.8 power factor load at 200V (line to line). Draw a circuit diagram for this. Calculate: i) What line to line voltage should be applied to the primary side? ii) Calculate the line and phase currents on the secondary and primary sides and indicate them on the diagram.	7 Marks	L3	CO4	PO4

(OR)

10.	a)	Explain with necessary diagrams how 3-phase supply is converted to 2-phase by scott connection.	7 Marks	L2	CO4	PO2
	b)	Explain the working of an on load tap changer with the help neat diagram.	7 Marks	L2	CO4	PO2

SIGNALS AND NETWORKS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Test whether the following systems are causal or non-causal systems. i) $y(n) = x(n) + x^2(n-1)$. (ii) $y(n) = x(2n)$.	8 Marks	L3	CO1	PO2
	b)	Sketch $y(t) = r(t) + r(t-1) + r(t-2) + r(t-3)$ where $r(t)$ is a unit ramp signal.	6 Marks	L3	CO1	PO2
		(OR)				
2.	a)	Investigate whether the signal given by $x(t) = nu(t)$ is a power or energy signal?	6 Marks	L3	CO1	PO2
	b)	Determine if the system described by the following input-output equations is linear or non-linear. i) $y(n) = x(n) + \frac{1}{x(n-1)}$. (ii) $y(n) = x(2n)$.	8 Marks	L3	CO1	PO2

UNIT-II

3.	a)	Distinguish between Fourier series and Fourier transforms	5 Marks	L2	CO2	PO1
	b)	Determine the Fourier series expansion for the waveform shown below. 	9 Marks	L3	CO2	PO5
		(OR)				
4.	a)	Obtain the trigonometric Fourier series for the periodic waveform shown below. 	9 Marks	L3	CO2	PO5
	b)	Find the Fourier transform of the function $\cos\omega_o t$.	5 Marks	L3	CO2	PO5

UNIT-III

5.	a)	Find the Laplace transform of the periodic signal shown below. 	7 Marks	L3	CO2	PO5
	b)	Find the inverse Z-transform of $X(z) = \frac{Z+1}{z^2 - \frac{7}{12}z + \frac{1}{12}}$.	7 Marks	L3	CO2	PO5
		(OR)				

6.	a)	Explain initial and final value theorems.	6 Marks	L3	CO2	PO5
	b)	Determine the frequency response of the system described by the difference equation $y(n) + 0.75y(n-1) = x(n) - 2x(n-1)$.	8 Marks	L3	CO2	PO5

UNIT-IV

7.	a)	In the initially relaxed RL circuit shown in the figure below, the sinusoidal source $e(t) = 100\sin(500t)$ volts is applied at time t=0. Determine resultant transient current for time t > 0. 	7 Marks	L3	CO3	PO5
	b)	A series RLC circuit comprises of $R=30\Omega$, $L=0.6H$ *and* $C=2\mu$ is excited by a constant voltage source of 50 volts. Obtain the expression for the current. (Assume that the circuit is relaxed initially).	7 Marks	L3	CO3	PO5

(OR)

8.	a)	Discuss the transient response of series RL circuit with **dc** excitation. Calculate circuit current and element voltages.	7 Marks	L3	CO3	PO5
	b)	A time-dependent voltage *V(t)* is applied to a series connection of RLC network. Find s-domain impedance and current. Assume initial condition of the voltage in inductor and current in capacitor to be zero. Draw the t-domain and s-domain circuits.	7 Marks	L3	CO3	PO5

UNIT-V

9.	a)	Obtain the relationship between ABCD and Y parameters.	7 Marks	L2	CO4	PO2
	b)	If the currents i_1 and i_2 are entering at port 1 and port 2 respectively of a two-port network and the equations are given below: $l_1 = 0.7V_1 - 0.8V_2, \quad l_2 = 0.5V_1 + 2V_2$ Find Y and Z parameters of the network.	7 Marks	L3	CO4	PO4

(OR)

10.	a)	Write short notes on Z, Y, T and h parameters.	7 Marks	L2	CO4	PO2
	b)	Find the Z- parameters of the network shown in the figure below. 	7 Marks	L3	CO4	PO4

ENGINEERING THERMODYNAMICS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Define system and explain the different types of thermodynamic systems.	7 Marks	L2	CO1	PO1
	b)	A system of volume 'v' contains a man m of gas at pressure 'p' and temperature's' the microscopic properties of the system obey the following relationship $[p + a/v^2][v-b]=mRT$, where a, b, R are constants obtain an expression for the displacement work done by the system. During a constant temperature expansion from volume v_1 to v_2.	7 Marks	L3	CO1	PO1 PO2
		(OR)				
2.	a)	Write S.F.E.E equation for steam turbine.	7 Marks	L2	CO1	PO1
	b)	A gas flow steadily through a rotary compressor the gas enter the compressor at a temperature of 16^0c a pressure of 100Kpa and entropy of 391.2Kj/Kg the gas leaves the compressor at a temperature of 245^0c a pressure of 0.6Mpa and enthalpy of 534.5Kj/Kg there is no heat transfer (i) evaluate external work done per unit mass of gas assuming velocities are neglected (ii) evaluate external work done per unit mass of gas when the gas voltage entry is 80m/s and exit is 160m/s.	7 Marks	L3	CO1	PO1 PO3

UNIT-II

3.	a)	Define the terms i) available energy ii) unavailable energy and write the relation between them and also define PMM2.	7 Marks	L2	CO1	PO1
	b)	Two reversible heat engines A and B are arranged in series, A rejecting heat directly to B. engine A receives 200kJ at a temperature of 421^oC from a hot temperature reservoir while Engine B is communication with Cold sink temperature of 4.4^oC. if the work output of A is thrice that of B find the intermediate temperature between A & B and also efficiency of engines A & B.	7 Marks	L3	CO1	PO1 PO3
		(OR)				
4.	a)	Stat and prove carrot theorem.	7 Marks	L2	CO1	PO1
	b)	Two kg of water at 80^oC are mixed adiabatically with 3kg of water at 30^oC in a constant pressure process of 1atmosphere. Find the increase in entropy of the total mass of water due to mixing process. Take specific of water is 4.187kJ/kg-K.	7 Marks	L3	CO1	PO1 PO3

UNIT-III

5.	a)	Illustrate with a neat sketch P-V and T-S diagrams of a Pure substance.	7 Marks	L2	CO2	PO1 PO3 PO10
	b)	Calculate the internal energy per kg of super heated steam at a pressure of 5 bar and a temperature of 200°C. Also find the change in internal energy, if the steam expanded to 1 bar and dryness fraction is 0.75.	7 Marks	L3	CO2	PO1 PO2

(OR)

6.	a)	Using Maxwell relations obtain the expression for difference of specific heats at constant pressure and constant volume in terms of the derivatives of the properties and hence obtain its expression for an ideal gas.	7 Marks	L2	CO2	PO1 PO2
	b)	Explicate the terms Dry bulb temperature Wet bulb temperature psycho meter and adiabatic saturation temperature.	7 Marks	L2	CO2	PO1 PO10

UNIT-IV

7.	a)	State and explain Daltons law of partial pressure	7 Marks	L2	CO3	PO1 PO2
	b)	0.5kg of helium and 0.5kg of nitrogen are mixed at 20°C and a total pressure of 100KPa. Find total volume of the mixture, partial volume of the mixture, partial pressure of the component, mole fraction of the component specific heats of the mixtures gas constant of the mixtures.	7 Marks	L3	CO3	PO1

(OR)

8.	a)	Distinguish between Universal Gas constant and Characteristic Gas constant. Also define Mole fraction and mass fraction.	7 Marks	L2	CO3	PO1 PO2
	b)	A gaseous mixture consists of 1 kg of oxygen and 2 kg of nitrogen at a pressure of 150 kPa and a temperature of 20°C. Determine the changes in internal energy, enthalpy and entropy of the mixture when the mixture is heated to a temperature of 100°C (i) at constant volume and (ii) at constant pressure.	7 Marks	L3	CO3	PO2

UNIT-V

9.	a)	Illustrate with a neat sketch various operations of S.I. Engine on P-V diagram.	7 Marks	L2	CO4	PO1
	b)	In an air standard diesel cycle the compression ratio is 15, compression begins at 0.1MPa, 40°C the heat is added is 1.675MJ/Kg. find the maximum temperature of the cycle, cut off ratio and thermal efficiency.	7 Marks	L3	CO4	PO1 PO2 PO6

(OR)

10.	a)	Draw the PV and TS diagram of dual cycle and mentioned the processes.	7 Marks	L2	CO4	PO1
	b)	Derive an expression for thermal efficiency of Otto cycle.	7 Marks	L3	CO4	PO1 PO2

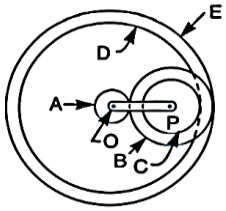
KINEMATICS OF MACHINERY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Classify Kinematic pairs based on type of relative motion, contact and closure and explain them by giving examples for each one of them.	9 Marks	L2	CO1	PO1
	b)	What is a machine? Giving example, differentiate between a machine and a structure.	5 Marks	L2	CO1	PO1
		(OR)				
2.		Sketch and explain the various inversions of a slider crank chain.	14 Marks	L2	CO1	PO1
		UNIT-II				
3.		What are straight line mechanisms? Describe ant two type of exact straight line motion mechanism with the help of a sketch.	14 Marks	L2	CO2	PO1 PO2
		(OR)				
4.	a)	Explain the difference between the Ackerman and Davis steering gear.	4 Marks	L2	CO2	PO1 PO2
	b)	Two shafts with an included angle of 160° are connected by a Hooke's joint. The driving shaft runs at a uniform speed of 1500 r.p.m. The driven shaft carries a flywheel of mass 12 kg and 100 mm radius of gyration. Find the maximum angular acceleration of the driven shaft and the maximum torque required.	10 Marks	L3	CO3	PO1 PO2
		UNIT-III				
5.		The following data relate to a pair of 20° involute gears in mesh: Module = 6 mm, Number of teeth on pinion = 17, Number of teeth on gear = 49; Addenda on pinion and gear wheel = 1 module. Find : (a). The number of pairs of teeth in contact ; (b). The angle turned through by the pinion and the gear wheel when one pair of teeth is in contact, and (c). The ratio of sliding to rolling motion when the tip of a tooth on the larger wheel (i) is just making contact, (ii) is just leaving contact with its mating tooth, and (iii) is at the pitch point.	14 Marks	L4	CO4	PO1 PO2 PO3
		(OR)				
6.		Figure below shows diagrammatically a compound epicyclic gear train. Wheels A, D and E are free to rotate independently on spindle O, while B and C are compound and rotate together on spindle P, on the end of arm OP. All the teeth on different wheels have the same module. A has 12 teeth, B has 30 teeth and C has 14 teeth cut externally. Find the number of teeth on wheels D and E which are cut internally. If the wheel A is driven clockwise at 1 r.p.s. while D is driven counter clockwise at 5 r.p.s., determine the magnitude and direction of the angular velocities of arm OP and wheel E.	14 Marks	L4	CO4	PO1 PO2 PO3



UNIT-IV

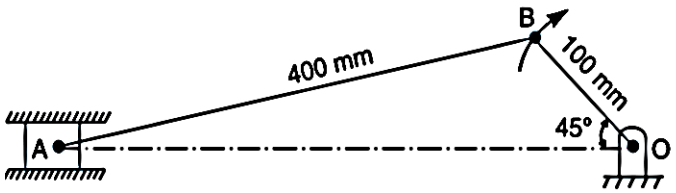
7.	a)	Define the terms Base circle, Pressure angle, Pitch point, Pich circle, Prime circle and Lift or Stroke used in Cam design.	8 Marks	L2	CO4	PO1 PO2 PO3
	b)	Classify of Cams and explain them.	6 Marks	L2	CO4	PO1 PO2 PO3

(OR)

8.	A cam, with a minimum radius of 50 mm, rotating clockwise at a uniform speed, is required to give a knife edge follower the motion as described below: (a). To move outwards through 40 mm during 100° rotation of the cam; (b). To dwell for next 80° ; (c). To return to its starting position during next 90°, and (d). To dwell for the rest period of a revolution i.e. 90°. Draw the profile of the cam (i) when the line of stroke of the follower passes through the centre of the cam shaft, and (ii) when the line of stroke of the follower is off-set by 15 mm. The displacement of the follower is to take place with uniform acceleration and uniform retardation. Determine the maximum velocity and acceleration of the follower when the cam shaft rotates at 900 r.p.m. Draw the displacement, velocity and acceleration diagrams for one complete revolution of the cam.	14 Marks	L3	CO5	PO1 PO2 PO3 PO10

UNIT-V

9.	Locate all the instantaneous centres of the slider crank mechanism as shown in figure below. The lengths of crank OB and connecting rod AB are 100 mm and 400 mm respectively. If the crank rotates clockwise with an angular velocity of 10 rad/s, find: (a). Velocity of the slider A, and (b). Angular velocity of the connecting rod AB.	14 Marks	L4	CO6	PO1 PO2 PO3 PO10



(OR)

10.	The dimensions and configuration of the four bar mechanism, shown in figure are as follows : P_1A = 300 mm; P_2B = 360 mm; AB = 360 mm, and P_1P_2 = 600 mm. The angle AP_1P_2 = 60°. The crank P_1A has an angular velocity of 10 rad/s and an angular acceleration of 30 rad/s^2 , both clockwise. Determine the angular velocities and angular accelerations of P_2B, and AB and the velocity and acceleration of the joint B.	14 Marks	L4	CO6	PO1 PO2 PO3 PO10

MANUFACTURING TECHNOLOGY
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	List and explain the considerations for selecting pattern materials.	7 Marks	L1	CO1	PO1
	b)	Define gating ratio. Illustrate the steps involved in designing a gating system.	7 Marks	L2	CO1	PO2
		(OR)				
2.	a)	What are the common allowances provided on patterns? Why and how they are provided? Give suitable examples.	7 Marks	L1	CO1	PO1
	b)	Calculate the optimum pouring time for a casting whose mass is 20kg and having an average section thickness of 15mm. The materials of the casting are grey cast iron and steel. Take the fluidity of iron as 711.2mm.	7 Marks	L2	CO1	PO3
		UNIT-II				
3.	a)	Describe centrifugal casting process and to what work piece configuration it is best suited.	7 Marks	L2	CO2	PO1
	b)	Mention the classification of casting defects and their causes and remedies.	7 Marks	L1	CO2	PO3
		(OR)				
4.	a)	What is Investment casting? What is the main material used for making an Investment Pattern? What are the methods of applying the Investment material to the pattern?	7 Marks	L2	CO2	PO1
	b)	Write short notes on cleaning and finishing of castings.	7 Marks	L1	CO2	PO2
		UNIT-III				
5.	a)	Describe the principles of hot and cold working processes. Compare them.	7 Marks	L1	CO3	PO4
	b)	Summarize the Magnetic pulse forming process with a neat sketch.	7 Marks	L2	CO3	PO2
		(OR)				
6.	a)	Explain how Forging improves the mechanical properties of the components.	7 Marks	L2	CO3	PO3
	b)	Briefly explain about the progressive dies used in sheet metal operations.	7 Marks	L1	CO3	PO4
		UNIT-IV				
7.	a)	Discuss the method of resistance welding. What are its advantages and disadvantages?	7 Marks	L1	CO4	PO3
	b)	Explain Oxy– Acetylene Gas cutting in detail.	7 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Explain briefly the problems faced in Submerged Arc Welding in Horizontal and Vertical Welding Positions.	7 Marks	L2	CO4	PO2
	b)	Explain about destructive and nondestructive testing of welds.	7 Marks	L2	CO4	PO1

UNIT-V

9.	a)	Describe the working principle of Injection moulding process.	7 Marks	L2	CO5	PO2
	b)	Differentiate between thermoplastics and thermosetting resins with relevant examples.	7 Marks	L1	CO5	PO3
		(OR)				
10.	a)	Describe the working principle of blow moulding process.	7 Marks	L2	CO5	PO2
	b)	Write short notes on calendaring.	7 Marks	L1	CO5	PO3

CODE No.: 20BT30304 **SVEC-20**

STRENGTH OF MATERIALS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	State Hooke's Law.	2 Marks	L1	CO1	PO1
	b)	A steel bar is loaded as shown in figure. Find the change in length of bar Take. E = 200GN/m^2 Diameters of AB = 20mm, BC = 40mm and CD = 20mm. Load at B= 60 KN and C= 50 KN. 	12 Marks	L3	CO1	PO1 PO2

(OR)

2.	a)	A rod 200 cm long and diameter 3.0 cm is subjected to an axial pull of 30 kN. If the Young's modulus of the material of the tube rod is 2x10^5 N/mm^2, determine: i) stress. ii) strain. iii) the elongation of the rod.	7 Marks	L3	CO1	PO1 PO2
	b)	In a hollow circular shaft of outer and inner diameters of 20 cm and 10 cm respectively, the shear stress is not to exceed 40 N/mm^2. Calculate the maximum torque which the shaft can safely transmit.	7 Marks	L3	CO1	PO1 PO2

UNIT-II

3.	a)	Explain Point of contra flexure.	4 Marks	L1	CO2	PO2 PO3
	b)	A simply supported wooden beam of span 1.5m, having cross section 100m wide and 250mm deep carries a concentrated load of W at the centre. If the allowable bending stress is 10N/mm^2 and shear stress is 1.5 N/mm^2. i) Calculate maximum bending moment and shear force. ii) Determine the safe load W.	10 Marks	L3	CO2	PO2 PO3

(OR)

4.		Draw the shear force and bending moment diagrams for the simply supported beam loaded as shown in the figure. 	14 Marks	L3	CO2	PO1 PO2

UNIT-III

5.		Determine the maximum tensile and compressive bending stresses in a cantilever beam of 2m span, subjected to an uniformly distributed load of 10kN/m, throughout the length. The cross section of the beam is as shown in the figure. 	14 Marks	L3	CO2	PO1 PO5
		(OR)				
6.	a)	Discuss how you determine section modulus of channels.	4 Marks	L1	CO2	PO1 PO5
	b)	A T-section beam of flange 200mm x 20mm and web 250mm x 25mm is subjected to a bending moment of 30KN-m. Draw the bending stress distribution across the section. Calculate the position of the neutral Axis.	10 Marks	L3	CO2	PO1 PO2

UNIT-IV

7.	a)	Demonstrate Mohr's circle construction.	6 Marks	L2	CO3	PO1 PO5
	b)	An elemental cube is subjected to tensile stresses of 60 N/mm^2 and 20 N/mm^2 acting on two mutually perpendicular planes and a shear stress of 20 N/mm^2 on these planes. Draw the Mohr's circle of stresses and hence or otherwise determine the magnitudes and directions of principal stresses and also the greatest shear stress.	8 Marks	L3	CO3	PO1 PO5
		(OR)				
8.	a)	Two shafts of same material and same lengths are subjected to some torque, if the first shaft is of a solid circular section and the second shaft is of hollow circular section whose internal diameter is 0.7 times outside diameter and the maximum shear stress developed in each shaft is same; compare the weights of the shafts.	7 Marks	L3	CO3	PO1 PO2
	b)	In a hollow circular shaft of outer and inner diameters of 20 cm and 10 cm respectively, the shear stress is not to exceed 40 N/mm^2. Calculate the maximum torque which the shaft can safely transmit.	7 Marks	L3	CO3	PO1 PO2 PO5

UNIT-V

9.	a)	Explain Macaulay's methods.	4 Marks	L2	CO4	PO1 PO2
	b)	A simply supported beam of length 8m is subjected to a single force 50KN at a distance '5m' from one of the supports. i) Calculate the deflection under the load. ii) Calculate slope under the load.	10 Marks	L3	CO4	PO1 PO2
		(OR)				
10.	a)	Explain how to determine slope and deflection of simply supported beam subjected uniformly varying loads using Moment area method.	6 Marks	L2	CO4	PO1 PO2
	b)	A cantilever of length 2 metres carries a uniformly distributed load of 2500 N per metre for a length of 1.25 metres from the fixed end and a point load of 1000 N at the free end. If the section is	8 Marks	L2	CO4	PO1 PO2 PO5

rectangular 120 mm side and 240 mm deep, i) find the deflection at the free end. Take E=1000 N/mm^2. ii) find the slope at the free end.

ELECTROMAGNETIC FIELDS AND TRANSMISSION LINES

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Develop the relations between Electric field intensity and Electric potential.	7 Marks	L3	CO1	PO1
	b)	Point charges 5 nC and -2 nC are located at (2, 0, 4) and (-3, 0, 5) respectively. i) Determine the force on a 1 nC point charge located at (1, -3, 7). ii) Determine the electric Field E at (1, -3, 7).	7 Marks	L4	CO1	PO2
		(OR)				
2.	a)	Derive the expression for the force between two finite current carrying loops.	7 Marks	L1	CO1	PO1
	b)	A current sheet = 8 x A/m lies in z = 10 m plane and current filament is located at y = 0, z = 9 m. Determine I in current filament if = 0 at P (3, 0, 1) m.	7 Marks	L4	CO1	PO2

UNIT-II

3.	a)	Express Maxwell equations for time varying fields in both differential and integral forms and make their word statements	7 Marks	L2	CO2	PO3
	b)	Let $\mu = 10^{-5}$ H/m, $\varepsilon = 4x10^{-9}$ F/m, $\sigma = 0$, and $\rho v = 0$. Determine k so that the following pair satisfy Maxwell's equations $D = 6\,ax - 2y\,ay + 2z\,az\ nC/m^2$, $H = kx\,ax + 10y\,ay - 25\,az A/m$.	7 Marks	L6	CO2	PO2
		(OR)				
4.	a)	Explain the application note on Material with high dielectric constant.	7 Marks	L4	CO2	PO2
	b)	Develop the expression for Relaxation time.	7 Marks	L4	CO2	PO2

UNIT-III

5.	a)	Discuss the electromagnetic wave propagation in a lossless dielctric medium.	7 Marks	L2	CO3	PO1
	b)	A 30 GHz radar signal may be represented as a uniform plane wave in a sufficiently small region. Calculate the wavelength in cm and the attenuation in dB per foot if the wave is propagating in a non magnetic material for which $\varepsilon_r = 1$ and $\sigma = 0$.	7 Marks	L3	CO3	PO1
		(OR)				
6.	a)	Obtain the wave equation for a conducting medium.	7 Marks	L2	CO3	PO1
	b)	The magnetic field **H** of a plane wave has a magnitude of 9 mA/m in a medium defined by $\varepsilon_r = 3$, $\mu_r = 2$. Determine the average power flow.	7 Marks	L3	CO3	PO1

UNIT-IV

7.	a)	Derive the relation between Primary and secondary constants of a transmission line.	7 Marks	L2	CO4	PO1
	b)	A transmission line in which no distortion is present has the following parameters Zo=50Ω, $\alpha = 0.02m^{-1}$,v= $0.6v_0$. Determine R.L, G, C and wavelength at 0.1 GHz.	7 Marks	L4	CO4	PO4
		(OR)				
8.	a)	Derive the expressions for voltage, current and input impedance of an infinite line.	7 Marks	L2	CO4	PO1
	b)	A lossless transmission line used in a TV receiver has a capacitance of 50pF/m and an inductance of 200 nH/m. Evaluate the characteristic impedance for section of a line 10 m long and 500 m long.	7 Marks	L4	CO4	PO1

UNIT-V

9.	a)	Explain in detail about single stub tuner.	7 Marks	L2	CO4	PO1
	b)	Determine the input impedance of λ/8 line when it is terminated with a short circuit and also open circuit.	7 Marks	L3	CO4	PO4
		(OR)				
10.	a)	Demonstrate the procedure of finding first voltage minimum and first voltage maximum using smith chart.	7 Marks	L2	CO4	PO2
	b)	Design a stub to match a transmission line which is connected to a load impedance of 400-j350 Ω. The characteristic impedance of the line is 200 Ω. The operating frequency is 15 MHz.	7 Marks	L3	CO4	PO4

ELECTRONIC DEVICES AND CIRCUITS

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Sketch the output response of a low pass RC circuit excited by step and exponential waveforms for different time constants.	7 Marks	L2	CO1	PO2
	b)	A symmetrical square wave of peak-peak amplitude 10V and frequency 10KHz is applied to a High pass RC circuit. Sketch the input and output waveforms to scale and derive the necessary output voltage expressions.	7 Marks	L3	CO1	PO2
		(OR)				
2.	a)	With the help of neat circuit diagram, explain the working of positive clamping circuit.	7 Marks	L2	CO1	PO2
	b)	A rectangular wave whose peak to peak value is 1v extends ±0.5v with respect to ground. The duration of the positive section is 0.1 sec and of the negative section 0.2 sec. If this waveform is impressed upon an RC differentiating circuit whose time constant is 0.2 sec, what are steady state maximum and minimum values of output waveform?	7 Marks	L3	CO1	PO2
		UNIT-II				
3.	a)	A Germanium transistor is used in a voltage divider biasing circuit with V_{cc}=16V, R_c=1.5kΩ and β=50. The operating point desired is V_{CE}=8V and I_c=4mA. If a stability factor=10 is desired, calculate the values of R_1, R_2 and R_E of the circuit.	7 Marks	L3	CO2	PO2
	b)	Explain thermal runway and stabilization techniques.	7 Marks	L1	CO2	PO1
		(OR)				
4.	a)	Describe the circuit of self based CE amplifier using diode compensation for I_{CO}.	7 Marks	L2	CO2	PO2
	b)	Explain thermistor bias compensation technique.	7 Marks	L1	CO2	PO1
		UNIT-III				
5.	a)	Derive the expression for A_v, A_I, R_i and R_o of a transistor amplifier in CE configuration using low frequency h-parameter model.	7 Marks	L2	CO2	PO2
	b)	For a CE amplifier, if a load R_L = 1kΩ is connected and h_{ie}=1kΩ, h_{re}=2 x 10^{-4}, h_{fe}=50, h_{oe}=25μA/V, then calculate A_I, A_V and R_i	7 Marks	L3	CO2	PO2
		(OR)				
6.	a)	Compare transistor amplifiers in CE, CB and CC configurations in terms of A_V, A_I, R_i and R_o	7 Marks	L2	CO2	PO1
	b)	Draw the common emitter amplifier with an emitter resistance and derive the expressions for A_v, A_I, and R_i using simplified CE hybrid model.	7 Marks	L1	CO2	PO2

UNIT-IV

7.	a)	Compare JFET and BJT.	7 Marks	L2	CO2	PO1
	b)	Draw and explain drain characteristics of enhancement MOSFET.	7 Marks	L1	CO2	PO2
		(OR)				
8.	a)	Define R_d, g_m and μ of JFET & derive the relation between them.	7 Marks	L2	CO2	PO1
	b)	JFET amplified with voltage divider biasing circuit have V_{DD}=24V, V_p=-2V, I_{DSS}=4mA, R_D=910Ω, R_s=3kΩ, R_1=12MΩ, R_2=8.57MΩ. Find the drain current at the operating point.	7 Marks	L3	CO2	PO2

UNIT-V

9.	a)	Explain the working of SCR with neat diagrams.	7 Marks	L2	CO2	PO1
	b)	Draw the circuit of UJT relaxation oscillator. Explain the working of oscillator with neat voltage waveforms.	7 Marks	L1	CO2	PO1
		(OR)				
10.	a)	What is tunnelling and explain the effect of tunnelling on VI characteristics of Tunnel diode.	7 Marks	L1	CO2	PO2
	b)	Explain the operation DIAC with the help of its structure and characteristics.	7 Marks	L2	CO2	PO2

II B.Tech I Semester (SVEC-20) Regular Examinations March – 2022

SIGNALS AND SYSTEMS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Sketch the following signals: i) $x_1(t) = u(t) - 2u(t-1) + u(t-2)$. ii) $x_2(t) = u(t+2) - u(t-2)$. iii) $x_3(t) = r(t) - r(t-1) - r(t-3) + r(t-4)$.	7 Marks	L3	CO1	PO2
	b)	Identify the following systems whether time invariant, linear and causal systems: i) $y(t) = \int_{-\infty}^{2t} x(\tau)\,d\tau$. ii) $y(t) = \frac{d}{dt}\,x(t)$.	7 Marks	L4	CO1	PO2
		(OR)				
2.	a)	Why the unit step signal u(t) is neither even nor odd? Determine the even and odd parts of u(t).	7 Marks	L3	CO1	PO2
	b)	Prove that $x(t) * \delta(t-t_0) = x(t-t_0)$.	7 Marks	L2	CO1	PO2

UNIT-II

3.	a)	Expand the following periodic function f(t) over the interval (-2, 2) by a complex Fourier Series $f(t) = \begin{cases} 2; & -1 < t < 1; \\ 0; & Otherwise; \end{cases}$	7 Marks	L3	CO2	PO2
	b)	Discuss the following properties of Fourier transform: i) Convolution in time domain. ii) Duality Property.	7 Marks	L2	CO2	PO1
		(OR)				
4.	a)	Find the trigonometric Fourier series of half-wave rectified signal and draw the amplitude and phase spectrum.	7 Marks	L3	CO2	PO2
	b)	The Fourier transform of $x(t)$ *is* $X(w) = \frac{6}{4+jw}$. Find the Fourier transform of the signal given by $f(t) = e^{-j3t}\,x(t-2)$.	7 Marks	L4	CO2	PO2

UNIT-III

5.	a)	If the impulse response of the system $h(t) = \delta(t+2) + 2\delta(t+1)$ and the input signal $x(t) = \begin{cases} t+1; & 0 \le t \le 1 \\ 2-t; & 1 \le t \le 2 \\ 0; & elsewhere \end{cases}$. Find the output of the system.	7 Marks	L4	CO3	PO2
	b)	Explain the method of detection of periodic signals in the presence of noise by correlation.	7 Marks	L2	CO3	PO1
		(OR)				

6.	a)	Discuss the properties of Auto correlation function for energy signals.	7 Marks	L2	CO3	PO1
	b)	Determine the correlation of the signals $x(t) = e^{-2t}\,u(t)$ *and* $y(t) = e^{-3t}\,u(t)$.	7 Marks	L4	CO3	PO2

UNIT-IV

7.	a)	Describe reconstruction of sampled signal with the help of interpolation equation. Describe zero order hold and first order hold systems. Describe the practical problems in reconstruction of signals.	7 Marks	L2	CO4	PO1
	b)	State and prove sampling theorem and discuss the effects of aliasing.	7 Marks	L2	CO4	PO1

(OR)

8.	a)	A signal $x(t) = \sin c(300\pi t)$ is sampled at a rate of : i) 200Hz. ii) 400Hz. iii) 600Hz. For each of these three cases, explain if you can recover the signal x(t) from the sampled signal.	7 Marks	L4	CO4	PO2
	b)	Describe the various types of sampling techniques and derive the expression for the flat-top sampled signal.	7 Marks	L2	CO4	PO1

UNIT-V

9.	a)	Check whether the following LTI systems are stable and causal. i) $H(s) = \dfrac{1}{s^2 - s - 6}$; if ROC is Re($s$) < - 2. ii) $H(s) = \dfrac{1}{s^2 - s - 6}$; if ROC is -2 < Re ($s$) < 3.	7 Marks	L3	CO5	PO2
	b)	Discuss the following properties of unilateral Laplace transform: i) Differentiation in time domain. ii) Integration in time domain.	7 Marks	L2	CO5	PO1

(OR)

10.	a)	Determine the initial and final value of *x[n]* for a given below Z transform $X(z) = \dfrac{2z\left(z - \dfrac{5}{12}\right)}{\left(z - \dfrac{1}{2}\right)\left(z - \dfrac{1}{3}\right)}$; $ROC : \lvert z \rvert > \dfrac{1}{2}$.	7 Marks	L4	CO5	PO2
	b)	Determine the inverse Z-Transform of $X(z) = \dfrac{3}{z-2}$; $ROC : \lvert z \rvert > 2$.	7 Marks	L4	CO5	PO2

SWITCHING THEORY AND LOGIC DESIGN

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Perform 2's Complements subtraction between 11110-01110.	7 Marks	L2	CO1	PO1
	b)	Reduce the expression A+B[AC+(B+C')D].	7 Marks	L2	CO1	PO6
		(OR)				
2.	a)	Represent (2DB.48)16 in decimal, binary and octal numbers.	7 Marks	L3	CO1	PO1
	b)	Perform the following addition using excess-3 code. i) 156+323. ii) 5644+245.	7 Marks	L3	CO1	PO1
		UNIT-II				
3.	a)	Simplify the Boolean function using K-map: F (A, B, C, D) = ∑m (0, 2, 4, 6, 11, 13, 15).	7 Marks	L2	CO1	PO1
	b)	Obtain the optimized Boolean function using K-map for F =∏ M (0, 1, 3, 6, 7, 9, 12, 14, 15).	7 Marks	L2	CO1	PO5
		(OR)				
4.	a)	Minimize the following expression using K-map and implement with suitable gates: F = π M(1, 4, 5, 6, 7, 9, 10, 12, 15).	7 Marks	L2	CO2	PO1
	b)	Minimize the Boolean function using K-map: F =∑ m (1, 2, 5, 6, 8, 9, 11, 13, 14).	7 Marks	L2	CO2	PO5
		UNIT-III				
5.	a)	Construct a full adder using two half adders.	7 Marks	L1	CO3	PO1
	b)	Implement a logic circuit that compares the magnitude of two binary numbers A1A0 and B1B0. Use an appropriate decoder and OR gates to implement.	7 Marks	L2	CO3	PO6
		(OR)				
6.	a)	What is decoder? Construct 3*8 decoder using logic gates and truth tables.	7 Marks	L2	CO3	PO1
	b)	Design a 1 x 4 Demultiplexer using logic gates.	7 Marks	L3	CO3	PO5
		UNIT-IV				
7.	a)	Illustrate the working of SR flip-flop using NAND gates.	7 Marks	L1	CO4	PO1
	b)	Explain the working of universal shift register with neat diagram.	7 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Draw and illustrate the operation of a 3-bit ripple UP counter using JK flip-flops.	7 Marks	L2	CO4	PO1
	b)	Sketch the logic circuit for MOD-5 Asynchronous counter.	7 Marks	L2	CO4	PO5
		UNIT-V				
9.	a)	Obtain the realization of 3 bit even parity generator using a PROM.	7 Marks	L1	CO5	PO1
	b)	Implement the function F=X'Y+YZ'+XZ using PLA.	7 Marks	L2	CO5	PO3
		(OR)				
10.	a)	Design a PLA based logic circuit for F = A'C+AC'+BC and G = A'BC'+AB+AC.	7 Marks	L2	CO5	PO5
	b)	Realize the operation of 3-bit Binary to Gray code converter using PAL.	7 Marks	L3	CO5	PO5

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Convert the following decimal numbers to the binary 1231; 673; and 1998.	7 Marks	L3	CO1	PO1
	b)	Describe fixed point representation with examples.	7 Marks	L2	CO1	PO1
		(OR)				
2.		Classify various categories of micro operations and explain each one with examples.	14 Marks	L4	CO3	PO3
		UNIT-II				
3.	a)	Describe any four addressing modes with examples.	7 Marks	L2	CO2	PO1
	b)	Discuss computer instruction in detail.	7 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Explain various phases of instruction cycle.	7 Marks	L2	CO2	PO2
	b)	Demonstrate interrupt cycle with relevant figure.	7 Marks	L2	CO2	PO2
		UNIT-III				
5.	a)	Illustrate micro programmed control organization with figure.	7 Marks	L3	CO2	PO1
	b)	Describe address sequencing in detail.	7 Marks	L2	CO2	PO1
		(OR)				
6.	a)	Explain various modes of data transfer to and from peripherals.	7 Marks	L2	CO4	PO1
	b)	Discuss daisy chaining priority interrupt with figure.	7 Marks	L2	CO4	PO2
		UNIT-IV				
7.	a)	Analyze synchronous and asynchronous DRAMs.	7 Marks	L4	CO4	PO1
	b)	Discuss Read only memories in detail.	7 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Explain mapping functions of cache memories.	7 Marks	L2	CO2	PO1
	b)	Describe nonvolatile solid state memory technologies.	7 Marks	L2	CO2	PO2
		UNIT-V				
9.		Illustrate attached array processor and SIMD array processor in detail.	14 Marks	L3	CO4	PO1
		(OR)				
10.	a)	Discuss interconnection structures in detail.	7 Marks	L2	CO4	PO1
	b)	Describe hardware and software performance issues of multicore computers.	7 Marks	L2	CO4	PO2

DATA STRUCTURES

[Computer Science and Engineering, Information Technology, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science)]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	What is Data Structure and applications of Data Structures in Real time Computations.	7 Marks	L2	CO1	PO1 PO2
	b)	Discuss about Non-linear Data Structure in detail.	7 Marks	L2	CO1	PO1 PO2
		(OR)				
2.	a)	What is asymptotic time complexity and evaluate the process to add an element in the linked list.	7 Marks	L2	CO1	PO1 PO2
	b)	Explain Sorting process and operations involved in Linked list with example.	7 Marks	L3	CO1	PO1 PO2
		UNIT-II				
3.	a)	Showcase the Stack for evaluating arithmetic operations.	7 Marks	L2	CO1	PO1 PO2 PO3
	b)	Differentiate Circular Queues and Doubly ended Queues with example.	7 Marks	L3	CO4	PO1 PO2 PO3
		(OR)				
4.	a)	Discuss the advantages of Heap over Stack with detail operations.	7 Marks	L3	CO1	PO1 PO2 PO3
	b)	Explain the parsing of arithmetic expression for the following (A-B)*[C/(D+E)+F] with example.	7 Marks	L3	CO1	PO1 PO2 PO3
		UNIT-III				
5.	a)	Explain how binary search tree works with an example.	7 Marks	L2	CO2	PO1 PO2 PO3
	b)	Explain the complexity of AVL Tree in the context of Space, Search, insert and delete operations.	7 Marks	L2	CO2	PO1 PO2 PO3
		(OR)				
6.	a)	Explain the process of finding maximum and minimum element in binary tree without using recursion procedure.	7 Marks	L2	CO4	PO1 PO2 PO3
	b)	Differentiate AVL and Red Black tree related to Balance factor, Insertion, Deletion, and Faster lookup.	7 Marks	L3	CO2	PO1 PO2 PO3

UNIT-IV

7.	a)	Explain sequential search algorithm process for the following list of elements in array70, 40, 30, 11, 57, 41, 25, 14, 52. The search element k = 41.	7 Marks	L3	CO3	PO1 PO2
	b)	Explain Bubble sort algorithm for the given elements [5, 1, 4, 2, 8] and showcase the operations in Three Pass.	7 Marks	L3	CO3	PO1 PO2
		(OR)				
8.	a)	Explain the time and space complexity of shell shot algorithm in detail.	7 Marks	L2	CO3	PO1 PO2
	b)	Explain the time and space complexity of Quick sort algorithm in detail.	7 Marks	L2	CO3	PO1 PO2

UNIT-V

9.	a)	Differentiate Direct Graph and Un-Directed weighted Graph with examples.	7 Marks	L4	CO4	PO1 PO2
	b)	Point out the Pros and Cons of Breadth first search and Depth first search.	7 Marks	L3	CO2	PO1 PO2
		(OR)				
10.	a)	Define Hash function. Write a procedure in search and insertion of element through separate chaining.	7 Marks	L3	CO2	PO1 PO2
	b)	Explain Hashing efficiency and differentiate Random and Non-Random Keys.	7 Marks	L2	CO2	PO1 PO2

PYTHON PROGRAMMING

[Computer Science and Engineering, Computer Science and Engineering (Artificial Intelligence), Computer Science and Engineering (Data Science)]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	Summarize various operators, built-in functions and standard library modules that deal with Python's numeric type.	7 Marks	L2	CO1	PO1
	b)	Explain about keywords used in Python.	7 Marks	L2	CO1	PO1
		(OR)				
2.	a)	What are different applications of Python? Give examples.	7 Marks	L2	CO1	PO1
	b)	Construct a simple program in python to print greatest number in given three numbers.	7 Marks	L3	CO1	PO1
		UNIT-II				
3.	a)	What is iterative control statement? Write a Python program to print all prime numbers less than 256 using while statement.	7 Marks	L2	CO2	PO2
	b)	Develop a Python program that interchanges the first and last characters of a given string.	7 Marks	L3	CO2	PO4
		(OR)				
4.	a)	Construct a python script to print fallowing pattern. 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	7 Marks	L3	CO2	PO2
	b)	Write a Python program that prints multiplication table of a given number.	7 Marks	L3	CO2	PO1
		UNIT-III				
5.	a)	Develop a Python program that counts the number of occurrences of a letter in a string, using dictionaries.	7 Marks	L3	CO3	PO4
	b)	Explain briefly about Sequence in python. Write operations with suitable examples.	7 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Provide a comparison between lists, tuples, dictionaries and sets and explain with example.	7 Marks	L2	CO3	PO1
	b)	Discuss in detail about Quantifiers in regular expressions.	7 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	Write about different types of arguments in a function provide suitable examples.	7 Marks	L3	CO4	PO3
	b)	Construct a program to open and read a text file and displays how many lines and paragraphs in the given file.	7 Marks	L3	CO4	PO2
		(OR)				
8.	a)	Develop a Python program to open a file and check what are the access permissions acquired by that file using OS module.	7 Marks	L3	CO4	PO3
	b)	Construct a Python program to implement towers of Hanoi problem.	7 Marks	L3	CO4	PO2

UNIT-V

9.	a)	Develop a python program to call data member and function using classes and objects.	7 Marks	L3	CO5	PO4
	b)	Differentiate between compile-time and run-time polymorphism.	7 Marks	L2	CO5	PO1

(OR)

10.	a)	Write about Errors and Exception Handling in Python programming.	7 Marks	L2	CO5	PO1
	b)	How to handle an exception using try except block? Explain with the help of a program.	7 Marks	L2	CO5	PO1

ELECTRICAL AND ELECTRONIC MEASUREMENTS

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain the working of the PMMC instrument with a labeled sketch.	7 Marks	L2	CO1	PO1
	b)	Write about multi-range voltmeters and multi-range ammeters in detail.	7 Marks	L1	CO1	PO2
		(OR)				
2.	a)	Describe the procedure used to extend the range of the DC ammeter and DC voltmeter using shunts and multipliers.	7 Marks	L1	CO1	PO1
	b)	With the help of a neat sketch, explain the working of a true RMS voltmeter.	7 Marks	L2	CO1	PO2

UNIT-II

3.	a)	What are the problems associated with an ac potentiometer? Describe the working of any one ac potentiometer with a neat sketch.	7 Marks	L1	CO2	PO2
	b)	A coordinate type potentiometer is used for the determination of a coil and the results obtained are: Voltage across a 1.0Ω resistor in series with the coil is +0.238V on in-phase dial and -0.085V on quadratic dial. The voltage across a 10:1 potential divider used with the coil is +0.3375V on in-phase dial and +0.232V on the quadratic dial. Calculate the resistance and reactance of the coil.	7 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Draw the circuit diagram of a Crompton's potentiometer and explain its working. Describe the steps used when measuring an unknown resistance.	7 Marks	L2	CO2	PO2
	b)	Explain the term standardization of a potentiometer. Describe the procedure of standardization of dc and ac potentiometers.	7 Marks	L1	CO2	PO2

UNIT-III

5.	a)	Derive the equation for average power over a cycle. Prove that it can be measured by an electrodynamometer type of wattmeter.	7 Marks	L2	CO3	PO2
	b)	Describe the working of a single-phase induction type energy meter. Show that the total number of revolutions made by its disc during a particular time is proportional to the energy consumed.	7 Marks	L1	CO3	PO1
		(OR)				
6.	a)	A dynamometer-type wattmeter with its voltage coil connected across the load side of the instrument reads 250 watts. If the load voltage be 200 volts, what power is being taken by load? The voltage coil branch has a resistance of 2000Ω.	7 Marks	L2	CO3	PO2
	b)	Describe the working of a single-phase electro dynamic power factor meter. Compare its working with a moving iron type power factor meter.	7 Marks	L1	CO3	PO1

UNIT-IV

7.	a)	What are the different difficulties encountered in the measurement of high resistance? Explain how these difficulties are overcome.	7 Marks	L1	CO4	PO1
	b)	Describe the working of Kelvin double bridge for measurement of low resistance. Derive the equations for balance condition.	7 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Describe how an unknown capacitance can be measured with the help of D'Sauty's bridge. What are the limitations of this bridge and how are they overcome by using modified D'Sauty's bridge?	7 Marks	L2	CO4	PO2
	b)	The four arms of a Wheatstone bridge are as follows: AB=100 Ω; BC=1000 Ω; CD=4000 Ω; and DA=400 Ω. The galvanometer has a resistance of 100 Ω, a sensitivity of 100 mm/μA, and is connected across AC. A source of 4Vd.c is connected across BD. Calculate the current through the galvanometer and its deflection if the resistance of arm DA is changed from 400 Ω to 401 Ω.	7 Marks	L3	CO4	PO2

UNIT-V

9.	a)	Draw and explain the simplified composite circuit for the digital frequency meter.	7 Marks	L2	CO5	PO1
	b)	What is the purpose of a universal counter-timer? Explain.	7 Marks	L1	CO5	PO2
		(OR)				
10.	a)	Draw and explain the frequency synthesizer with a neat sketch.	7 Marks	L2	CO5	PO2
	b)	Explain the basic circuit of the digital frequency meter with a neat block diagram.	7 Marks	L1	CO5	PO1

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Outline the desirable static characteristics of transducers.	7 Marks	L2	CO1	PO1
	b)	Discuss the generalized measurement system with a neat sketch.	7 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Explain the dynamic characteristics of transducers	7 Marks	L2	CO1	PO2
	b)	The following 10 observations were recorded when measuring voltage. 7.92, 8.03, 8.10, 7.95, 8.01, 7.98, 7.95, 8.07, 7.94, 7.97 volts. Calculate Arithmetic mean, Standard deviation and Variance.	7 Marks	L3	CO1	PO3

UNIT-II

3.	a)	Explain the working principle and applications of the Hall effect transducers.	7 Marks	L2	CO2	PO1
	b)	Illustrate the construction and working of Bonded and unbounded strain gauges.	7 Marks	L4	CO2	PO2
		(OR)				
4.	a)	Derive the strain and gauge factor of strain gauges.	7 Marks	L3	CO2	PO2
	b)	Outline the principle of different capacitive transducers with neat diagrams.	7 Marks	L2	CO2	PO2

UNIT-III

5.	a)	Explain the construction and working principle of RTD.	7 Marks	L2	CO3	PO1
	b)	Discuss the different types of IC temperature sensors with neat sketches.	7 Marks	L2	CO3	PO2
		(OR)				
6.	a)	Explain any one type of pyrometer with necessary diagrams.	7 Marks	L2	CO3	PO2
	b)	Identify a suitable temperature measuring device with positive temperature co-efficient and explain its working principle.	7 Marks	L3	CO3	PO3

UNIT-IV

7.	a)	Compare the performance of Stroboscope with other velocity measuring techniques.	7 Marks	L4	CO4	PO4
	b)	Outline different techniques for measurement of torque.	7 Marks	L2	CO4	PO2
		(OR)				
8.	a)	Discuss the working of principle of piezoelectric accelerometer.	7 Marks	L2	CO4	PO1
	b)	Identify suitable load cell for measurement of force that is non-contact type. Justify sensor selection.	7 Marks	L3	CO4	PO5

UNIT-V

9.	a)	Identify suitable encoder for measurement of position with detailed explanation.	7 Marks	L3	CO5	PO3
	b)	Outline the principle of Smart sensor with neat diagram.	7 Marks	L2	CO5	PO2
		(OR)				
10.	a)	Explain the principle and working of SAW sensor with neat sketch.	7 Marks	L2	CO5	PO1
	b)	Discuss different vibration sensors with necessary diagrams.	7 Marks	L2	CO5	PO2

SOFTWARE ENGINEERING

[Information Technology, Computer Science and Systems Engineering, Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I				
1.	a)	List out various characteristics of Software and explain in detail.	7 Marks	L2	CO1	PO2
	b)	Discuss in detail, various phases of the Unified process.	7 Marks	L1	CO1	PO1
		(OR)				
2.	a)	Explain briefly the different categories of computer software available today. And also describe the recent challenges faced by it.	7 Marks	L2	CO1	PO2
	b)	With help of a diagram, discuss in detail the water fall model. Give certain reasons for its failure.	7 Marks	L1	CO1	PO3
		UNIT-II				
3.	a)	Discuss in detail the non-functional requirements of software.	7 Marks	L1	CO2	PO2
	b)	Define Software verification and validation and write short notes about user requirements.	7 Marks	L2	CO2	PO2
		(OR)				
4.	a)	Explain the requirement engineering process with help of a diagram.	7 Marks	L1	CO2	PO2
	b)	Illustrate the requirement elicitation and analysis process with neat sketch.	7 Marks	L2	CO2	PO3
		UNIT-III				
5.	a)	Give few characteristics of Good Design.	7 Marks	L1	CO3	PO3
	b)	Define software architecture. Describe its importance.	7 Marks	L2	CO3	PO1
		(OR)				
6.	a)	Explain Data Flow architecture style with diagram.	7 Marks	L1	CO3	PO2
	b)	Write short notes on software measurement. And list out software metrics.	7 Marks	L2	CO3	PO1
		UNIT-IV				
7.	a)	List out the Strategic Issues of Software testing.	7 Marks	L1	CO4	PO1
	b)	Compare and Contrast White Box and Black Box Testing.	7 Marks	L2	CO4	PO1
		(OR)				
8.	a)	Sketch how testing strategy is represented in spiral model and explain.	7 Marks	L2	CO4	PO1
	b)	Explain in detail Basis path testing in White Box Testing Technique.	7 Marks	L1	CO4	PO1
		UNIT-V				
9.	a)	List out and illustrate, what types of risks are likely to encounter during software development.	7 Marks	L2	CO5	PO2
	b)	Explain Business Process Reengineering (BPR) model activities in detail.	7 Marks	L1	CO5	PO2
		(OR)				
10.	a)	Write a short note on Risk Refinement.	7 Marks	L2	CO5	PO6
	b)	What is Formal Technical Reviews? Discuss in detail about Formal Technical Review (FTR) performed by Software Engineers.	7 Marks	L1	CO5	PO2

OPERATING SYSTEMS

[Computer Science and Systems Engineering, Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain different services of an Operating System.	7 Marks	L2	CO1	PO1
	b)	Explain in detail about context switching.	7 Marks	L2	CO1	PO1
		(OR)				
2.	a)	Consider the set of processes that arrive at time 0 with the length of the CPU burst time given in milliseconds.	7 Marks	L3	CO1	PO2

Process	Burst Time
P1	4
P2	6
P3	5
P4	8
P5	3

Draw the Ganttchart using FCFS and Round Robin scheduling algorithm. Calculate the average waiting time in both cases. (Take time quantum = 4ms).
Analyze which of the algorithms result in minimum average waiting time.

	b)	Does preemptive scheduling give same performance as non-preemptive scheduling algorithm? Compare their performance by assuming at least 5 processes arrived at different time intervals.	7 Marks	L3	CO1	PO1

UNIT-II

3.	a)	Discuss how Peterson's solution can address the critical section problem.	7 Marks	L2	CO2	PO2
	b)	What is semaphore? Explain its implementation as wait and signal for providing process synchronization.	7 Marks	L2	CO2	PO3
		(OR)				
4.	a)	Define Deadlock. What are the necessary and sufficient conditions needed to be satisfied for deadlock to occur?	7 Marks	L2	CO2	PO2
	b)	Write and explain the solution for Reader-Writer classical synchronization problem using monitors.	7 Marks	L4	CO2	PO2

UNIT-III

5.	a)	Discuss Paging with an example.	7 Marks	L2	CO3	PO2
	b)	Consider the following page reference string 1, 2, 3, 4, 5, 2, 6, 7, 3, 2, 4, 1, 7, 1, 4, 3, 2, 3, 4, 7, 1. Compare the number of page faults with frame sizes 3, 4 and 5 with any replacement algorithm.	7 Marks	L4	CO3	PO2
		(OR)				
6.	a)	What is Belady's Anomaly? Explain with an example.	7 Marks	L2	CO3	PO2
	b)	Define Virtual Memory. Explain the process of converting virtual addresses to physical addresses with a neat diagram.	7 Marks	L2	CO3	PO2

UNIT-IV

7.	a)	Discuss the different file allocation methods with suitable example.	7 Marks	L2	CO2	PO2
	b)	A disk drive has 200 cylinders, numbered 0 to 199. The drive is currently serving a request at cylinder 53. The queue of pending requests, in FIFO order, is 98, 183, 37, 122, 14, 124, 65, 67. Starting from the current head position, what is the total distance (in cylinders) that the disk arm moves to satisfy all the pending requests for each of the following disk-scheduling algorithms? i) SCAN. ii) LOOK. iii) C-SCAN.	7 Marks	L4	CO2	PO2
		(OR)				
8.	a)	Compare and contrast free space management and swap space management.	7 Marks	L4	CO4	PO2
	b)	Explain DMA and Memory mapped I/O	7 Marks	L2	CO4	PO2

UNIT-V

9.	a)	Explain access matrices along with its implementation.	7 Marks	L2	CO1	PO2
	b)	Explain the process of revocation of access rights.	7 Marks	L2	CO5	PO2
		(OR)				
10.	a)	Compare Symmetric and Asymmetric Encryption.	7 Marks	L 4	CO6	PO2
	b)	Explain System and Network Threats.	7 Marks	L 2	CO6	PO2

CODE No.: 20BT31501 **SVEC-20**

OPERATING SYSTEMS

[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Differentiate multiprogramming and time sharing.	7 Marks	L4	CO1	PO1
	b)	State and explain different operating system services.	7 Marks	L2	CO1	PO1

(OR)

2.	a)	Consider the following set of processes with the length of CPU burst time in milliseconds. The processes are arrive at time 0. What is the turnaround time and waiting time of each process for Round Robin scheduling with time quantum 3 and for FCFS?	9 Marks	L3	CO1	PO4

Process	Burst Time
P1	6
P2	8
P3	5
P4	2
P5	9

	b)	Discuss multithreading models.	5 Marks	L2	CO1	PO1

UNIT-II

3.	a)	Discuss various approaches to solve the critical section problem.	7 Marks	L2	CO2	PO2
	b)	Explain Dining Philosopher's problem and its solution using the concept of semaphores.	7 Marks	L2	CO2	PO2

(OR)

4.	a)	Illustrate how semaphore acts as a synchronization tool. CO2 PO2.	5 Marks	L2	CO2	PO2
	b)	Consider the current state of the system with 4 processes and 3 resource types. There are 3 units of type A, 2 units of type B and 2 units of type C still available. Detect whether the system is in a safe state or not.	9 Marks	L3	CO3	PO4

Process	Allocation			Request		
P1	A	B	C	A	B	C
P2	0	0	1	10	4	2
P3	3	2	0	3	0	0
P4	2	1	1	1	2	2
P5	1	1	2	8	2	2

UNIT-III

5.	a)	A disk has 200 tracks (numbered 0 through 199). The R/W head is currently servicing at cylinder 120. The queue of pending requests is in order: 30, 70, 115, 110, 80, 20 and 25. Starting from the current head position, what is the total distance travelled (in cylinders) by the disk arm to satisfy the requests using algorithms SSTF, FCFS, LOOK and SCAN. (Illustrate with figure in each case).	9 Marks	L3	CO4	PO2
	b)	Explain about Thrashing in detail.	5 Marks	L2	CO4	PO1

(OR)

6.	a)	Explain basic steps in handling a page fault with neat diagram.	7 Marks	L2	CO4	PO2
	b)	What is Demand paging? How to implement it?	7 Marks	L1	CO4	PO2

UNIT-IV

7.	a)	What are the attributes of a File? Write different operations that can be performed on a File.	7 Marks	L1	CO5	PO1
	b)	Explain the file system and directory implementation with the help of necessary diagrams.	7 Marks	L2	CO5	PO2

(OR)

8.	a)	Discuss Kernel I/O subsystem.	7 Marks	L2	CO6	PO1
	b)	What are the directories? List different types of directory structures with an example. List their advantages and disadvantages.	7 Marks	L1	CO6	PO1

UNIT-V

9.	a)	What are access matrices? Explain its implementation.	7 Marks	L2	CO6	PO1
	b)	Write about Access control.	7 Marks	L1	CO6	PO1

(OR)

10.	a)	Write about Symmetric and Asymmetric encryption.	7 Marks	L1	CO6	PO1
	b)	Explain Firewalling to protect Systems and Networks.	7 Marks	L2	CO6	PO1

DESIGN AND ANALYSIS OF ALGORTIHMS

[Computer Science and Business Systems]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Distinguish between Recursive algorithm and Non-Recursive algorithm with an example.	7 Marks	L2	CO1	PO2
	b)	State the Masters theorem for solving recurrence relation. Apply the Masters theorem to solve the following recurrence relation: $T(n) = 9T(n/3) + n$.	7 Marks	L2	CO1	PO2
		(OR)				
2.	a)	Design an algorithm to perform Binary search and compute its running time complexity.	7 Marks	L2	CO1	PO2

	b)	Explain the space and time complexity of the following algorithm.
		Algorithm Sample(n)
		{a = 0;
		for (i = 0; i <n; i++)
		{
		for (j = n; j > i; j--)
		{
		a = a + i + j;
		}
		}
		}
			7 Marks	L2	CO1	PO2

UNIT-II

3.		Sort the following elements 62, 71, 88, 93, 12, 14, 56, 75, 89, 23, 55, 12, 66, 87, 54, 11, 33, 42, 77 and 7 using merge sort. Show the order of elements after completion of final pass.	14 Marks	L2	CO2	PO3
		(OR)				
4.		Generally matrix multiplication is possible in O(n^3) Multiply the following matrices in less than O(n^3). Consider the following matrices and explain step by step procedure to find the multiplication. A=[1 1 1 1, 1 1 1 1, 1 1 1 1, 1 1 1 1] and B=[1 0 0 0, 0 1 0 0, 0 0 1 0, 0 0 0 1]	14 Marks	L3	CO3	PO2

UNIT-III

5.	a)	Solve the optimal binary search tree for the following words, where the frequency of occurrence is in parentheses: be (0.28), for(0.29), I(0.33), he(0.32), of(0.19).	10 Marks	L2	CO3	PO3
	b)	Dynamic Programming is a bottom up approach. Justify your answer with suitable example.	4 Marks	L2	CO3	PO1
		(OR)				

6.	a)	Apply Dynamic Programming to find the minimum cost tour for TSP.	8 Marks	L2	CO3	PO2

	b)	State the principal of Optimality, compare and contrast Greedy and Dynamic programming methods.	6 Marks	L2	CO2	PO2

UNIT-IV

7.	a)	Demonstrate greedy method to solve single source shortest path for the following graph (source vertex is 0) .	10 Marks	L2	CO3	PO2

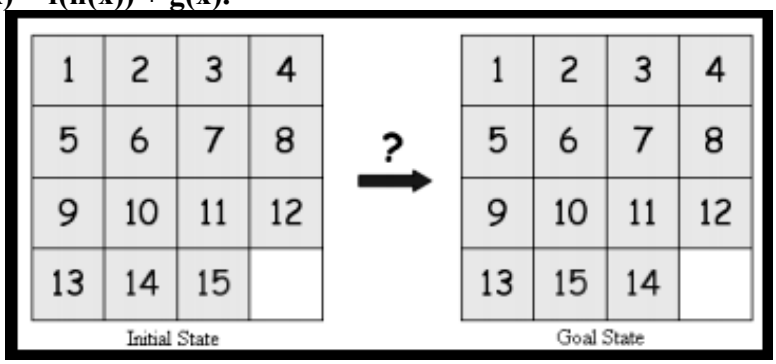
	b)	State and explain the approach of Job sequencing with deadlines using Greedy Approach.	4 Marks	L2	CO3	PO1

(OR)

8.		Solve the following instance of 0/1 knapsack problem using Backtracking when P={40, 30, 50, 10} W={2, 5, 10, 5} and m=16.	14 Marks	L3	CO3	PO2

UNIT-V

9.		Check whether the goal state is achieved from initial state given below using LC branch and bound method by using **$\hat{c}(x) = f(h(x)) + \hat{g}(x)$.**	14 Marks	L3	CO3	PO3



(OR)

10.	a)	Identify the differences between deterministic and non deterministic algorithm with an example.	10 Marks	L3	CO4	PO2
	b)	Explain about satisfiability in NP Problems.	4 Marks	L2	CO4	PO1

KINEMATICS OF MACHINERY

[Mechanical Engineering]

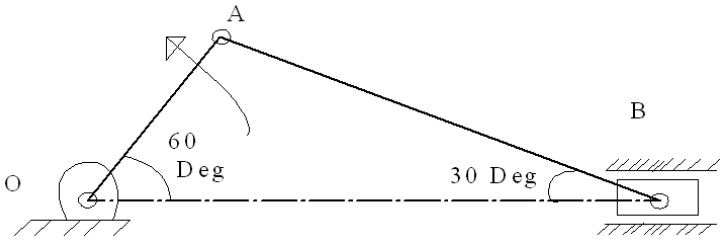
Time: 3 hours **Max. Marks: 70**

Answer any FIVE questions
All questions carry equal marks

1. a) What is meant by inversion of a mechanism? Describe with the help of suitable sketches the inversion of four bar mechanism.
b) How is the mechanism of higher pair can be replaced by the mechanism of lower pair?

2. a) Derive an expression for the ratio of shaft velocities for hooks joint and draw the polar diagram depicting the salient features of driven shaft speed.
b) Define any one of the approximate straight line motion mechanism with example.

3. For the configuration of a slider crank mechanism shown in fig, find
i) The acceleration of slider at B, ii) The angular acceleration of link AB
The crank rotates at 20rad/sec counterclockwise
Given: OA = 480mm; AB=1600mm;AE=450mm



4. Derive an expression for the ratio of shafts velocities for Hooke's joint and draw the polar diagram depicting the salient features of driven shaft speed.

5. A Cam is to be designed for a roller follower with the following data:
i) Cam lift =40mm during 90 deg of cam rotation with SHM
ii) Dwell for the next 30deg
iii) During the next 60deg of cam rotation, the follower returns to its original position with SHM
iv) Dwell during remaining 180deg

Draw the profile of the cam when the line of stroke of the follower passes through the axis of the cam shaft .The radius of the base circle of the cam is 40mm.Determine the maximum velocity and acceleration of the follower during its ascent and descent , if the cam rotates at 240rpm.

6. a) Define : i) Addendum ii) Total Depth
b) State and prove the fundamental Law of gearing with neat sketch?

7. a) Derive an expression for centrifugal tension in belt drive.
b) A leather belt is required to transmit 8 kW from a pulley 1.5 m diameter running at 240 rpm. The angle of contact is 160^0C and the coefficient of friction between belt and pulley is 0.25. The safe working stress for the belt is 1.5 MPa, and density of the belt material is 1000 kg/m^3 determine the width of the belt if its thickness is 10 mm. The effect of centrifugal tension is to be taken into account?

8. a) What is an epicyclic gear train? In what manner does it differ from a simple or compound gear train?

b) A compound gear train consists of six gears. The number of teeth on each gear is as follows:

Gear	A	B	C	D	E	F
No. of teeth	60	40	50	25	30	24

Determine i) speed of the output shaft ii) output torque iii) holding torque.

II B.Tech II Semester (SVEC14) Supplementary Examinations August – 2021

STRUCTURAL ANALYSIS - I
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Derive the expressions for finding out principal stresses, principal planes and maximum shear stress of a shaft under both B.M and Torque. 14 Marks

(OR)

2 At a point in material under stress, the intensity of the resultant stress on a certain plane is 60 Mpa(Tensile) inclined at 30° to the normal of that plane. The stress on a plane at right angles to this has a normal tensile component of intensity 40 Mpa(Tensile). Find: 14 Marks

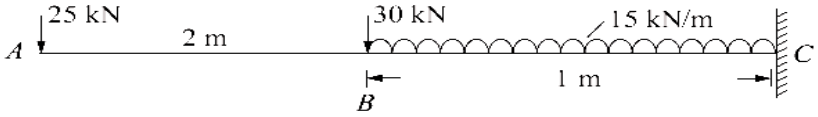
i) The Principal planes and Principal stresses.
ii) The planes of maximum Shear and its magnitude.
iii) Resultant stress on the plane on which 40 MPa stress is acting.

UNIT-II

3 A cantilever beam of length 7m, carries a point load at a distance of 4m from the fixed end. Find the deflection and slope under the point load and at the free end using Macaulay's method. Take E = 2.1×10^5 MPa and I = 86×10^6 mm^4. 14 Marks

(OR)

4 Compute the maximum slope and deflection for the beam shown in figure, using Moment-Area method. *EI*=16,000 kNm^2. 14 Marks



UNIT-III

5 What are the assumptions made in the Euler's theory? Derive the critical load formula for a long column with both the ends as fixed. 14 Marks

(OR)

6 A 5m long circular column having fixed ends has 240mm external diameter and 20mm thickness. The column carries a load of 160 kN at an eccentricity of 25mm from its longitudinal axis. Determine (i) stresses in the extreme fibres of the cross-section and (ii) maximum eccentricity so as to have no tension anywhere in its cross section. The modulus of elasticity of the material is 82 GPa. 14 Marks

UNIT-IV

7 A fixed beam ABC carries a u.d.l of 5kN/m over the entire span and a point load of 5kN at B. If AB= BC=2m and EI = 2000 kN-m^2, find the fixing moments and the maximum deflection. Also draw the S.F and B.M diagrams. 14 Marks

(OR)

8 A continuous beam ABC is simply supported at A, B and C. It carries a central point load of 10 kN on the span AB and a central clockwise moment of 10 kN.m at midspan of BC. If AB = 4m and BC = 6m, draw the S.F and B.M diagrams. 14 Marks

UNIT-V

9	a)	Derive an expression for Distortional strain energy per unit volume in terms three principal stresses.	7 Marks
	b)	Design the diameter of a circular shaft subjected to combined bending and twisting with bending moment of 10kN.m and twisting moment of 28kN.m. The safe stress in direct tension is 250MPa and μ=0.3.	7 Marks

(OR)

10	a)	What is Shear centre? Write the short note on Shear centre.	7 Marks
	b)	A channel section has flanges of size 10cm x 10cm and web size of 2cm x 14cm. Determine the shear centre of the channel section.	7 Marks

CODE No.:14BT40104 SVEC-14

Roll No. | | | | | | | | | | |

II B.Tech II Semester (SVEC14) Supplementary Examinations August - 2021

FLUID MECHANICS - II

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) A flat plate 1.5mx1.5m moves at 45 kmph in stationary air of specific weight 11.3N/m^3. If the coefficients of drag and lift are 0.15 and 0.75 respectively, find lift force, drag force and resultant force. 7 Marks

b) Define displacement, momentum and energy thicknesses. 7 Marks

(OR)

2 Find the displacement thickness, the momentum thickness and energy thickness for the velocity distribution in the boundary layer given by $u/U=2(y/\delta) - (y/\delta)^2$. 14 Marks

UNIT-II

3 Derive the conditions for the rectangular channel of the best section and find the critical depth and critical velocity of the water flowing through a rectangular channel of width 5m, when discharge is 15 m^3/s. 14 Marks

(OR)

4 Explain the concept of hydraulic jump with a neat sketch and hydraulic jump forms at the downstream end of spillway causing 18 cumec discharges. If the depth before jump is 0.8 m, determine the depth after the jump and energy loss. 14 Marks

UNIT-III

5 Obtain an expression for the force exerted by a jet of water on an inclined fixed plate in the direction of the jet and a jet of water of diameter 50mm moving with a velocity of 40m/s, strikes a curved fixed symmetrical plane at the centre. Find the force exerted by the jet of water in the direction of the jet, if the jet is defected through an angle of 120° at the outlet of the curved plate. 14 Marks

(OR)

6 a) Derive the expression for force exerted by a jet on a stationary vertical plate. 7 Marks

b) Water is flowing through a pipe at the end of which a nozzle is fitted. The diameter of the nozzle is 120mm and the head of water at the centre nozzle is 100m. Find the force exerted by the jet of water on a fixed vertical plate. The co-efficient of velocity is given as 0.95. 7 Marks

UNIT-IV

7 Explain with a neat sketch of different components of a hydro power plant and a Pelton wheel has to design to develop 750 kw working under a head of 250m running at 800 r.p.m with overall efficiency of 85%. Take speed ratio as 0.45, coefficient of velocity 0.98, jet diameter to wheel diameter is 1/10. 14 Marks

(OR)

8 Give the classification of hydro power plants. 14 Marks

UNIT-V

9 a) What are all the losses that occur during the operation of a centrifugal pump? 7 Marks

b) Expand and explain the term NPSH. 7 Marks

(OR)

10 Explain with neat sketches the working procedures of : 14 Marks
i) Jet pump ii) Airlift pump.

ELECTRICAL AND ELECTRONIC MEASUREMENTS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the Static characteristics of instruments.	7 Marks
	b)	A voltmeter is accurate to 98% of its full-scale reading. i) If a voltmeter read 200V on 500V range, what is the absolute error? ii) What is the percentage error reading of part (i)?	7 Marks

(OR)

2	a)	Explain the construction and working of D'Arsonaval Galvanometer.	7 Marks
	b)	Explain the essential operating forces that occur on MI and MC type instruments.	7 Marks

UNIT-II

3	a)	Explain measurement of reactive power in three phase balanced and un-balanced loads.	7 Marks
	b)	Explain working principle of LPF Wattmeter.	7 Marks

(OR)

4	a)	Describe the constructional details of an Electrodynamometer type wattmeter and derive the expression for torque when the instrument is used on a.c.	7 Marks
	b)	Explain working principle of single phase energy meter with diagram.	7 Marks

UNIT-III

5	a)	Briefly describe CT and PT with diagrams.	7 Marks
	b)	Draw the equivalent circuit and phasor diagram of a current transformer and derive the expression for ratio and phase angle errors.	7 Marks

(OR)

6	a)	Briefly describe single phase Electro dynamo meter type power factor meter.	7 Marks
	b)	Explain the disadvantages of shunts and multipliers when used for extension of range. Explain how instrument transformers are a better substitute for shunts and multipliers especially for high range values.	7 Marks

UNIT-IV

7	a)	Explain the suitable bridge used for the measurement of high resistance.	7 Marks
	b)	Writ a short notes on Megger and Q-meter.	7 Marks

(OR)

8	a)	Derive the equations of balance for an Anderson's bridge. Draw the phasor diagram for conditions under balance.	8 Marks
	b)	Derive the equations of balance for Schering bridge. Draw the phasor diagram for under balance condition.	6 Marks

UNIT-V

9	a)	Explain the Lissajous Patterns for the measurement of Phase and Frequency.	8 Marks
	b)	List the Applications of Oscilloscopes.	6 Marks

(OR)

10		Write short notes on the following: i) Digital frequency meter. ii) Dual slope digital volt meter.	14 Marks

TRANSFORMERS AND INDUCTION MACHINES
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	With relevant phasor diagrams, explain the operation of a single phase transformer operating on lagging and leading power factor loads.	8 Marks
	b)	Classify various types of transformers and explain them in brief.	6 Marks
		(OR)	
2	a)	Derive the EMF equation of a transformer. Hence derive transformation ratio.	7 Marks
	b)	Discuss the effect of variations of frequency and voltage on iron loss. How will you minimize the hysteresis and eddy current loss that occur in a practical transformer?	7 Marks

UNIT-II

3		With neat diagram, explain the various tests conducted on transformer to obtain its equivalent circuit. Derive all related equations.	14 Marks
		(OR)	
4	a)	Draw the vector diagrams of transformer at load with lagging and leading power factors.	6 Marks
	b)	Calculate the voltage regulation for a 200/400 V, 4 kVA transformer at full load and pf. 0.8 lagging with following test data: OC test: 200 V, 0.8 A, 70 W (LV side) SC test: 20 V, 10 A, 60 W (HV side)	8 Marks

UNIT-III

5	a)	What are the various three-phase transformer connections? Explain the star-star and star-delta connections with neat diagrams.	8 Marks
	b)	What is meant by Scott connection of transformers? Explain its significance and applications.	6 Marks
		(OR)	
6	a)	A three phase transformer has 400 turns on the primary and 40 turns on the secondary. The supply voltage is 3300V. Find the secondary voltage on no load when the windings are connected in (i) star-delta (ii) delta-star.	8 Marks
	b)	Explain the desirable conditions for the parallel operation of 3-phase transformers.	6 Marks

UNIT-IV

7	a)	Show that a three phase winding when excited by a three phase supply establishes a rotating magnetic field.	7 Marks
	b)	The full load power input to a 3-phase induction motor is 50Kw and the slip is 3%. Neglecting stator losses, calculate the full load **cu** losses and total mechanical power developed.	7 Marks
		(OR)	
8	a)	Compare slip-ring and squirrel-cage induction motor.	4 Marks
	b)	Explain air-gap power, internal mechanical power developed and shaft power. Deduce a relationship between them.	6 Marks
	c)	Derive the expression for maximum torque of three phase induction motor.	4 Marks

UNIT-V

9		Explain any two methods of speed control of a squirrel cage induction motor.	14 Marks
		(OR)	
10	a)	Explain auto transformer starting method of 3-phase induction motor.	7 Marks
	b)	The power input to a 3-phase induction motor is 60 KW. The stator losses are 1 KW. Find the mechanical power developed, and the rotor copper loss per phase if the motor is running with a slip of 3%.	7 Marks

(An Autonomous Institution, Affiliated to JNTUA, Anantapur)

II B.Tech II Semester (SVEC14) Supplementary Examinations August – 2021

ANALOG COMMUNICATIONS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Discuss the need for modulation.	6 Marks
	b)	An AM signal is of form: **$S(t)=10(1+0.5\cos 2000\pi t + 0.5\cos 4000\pi t)\cos(2\pi 10^6 t)$.** Sketch the amplitude spectrum and find Average power and Modulation Index.	8 Marks
		(OR)	
2	a)	Explain the generation of the AM signal with switching modulator.	7 Marks
	b)	With neat block diagram, explain principle and operation of Costas loop.	7 Marks

UNIT-II

3	a)	Compare various AM techniques with respect to transmitter power and band width.	6 Marks
	b)	Explain the generation of SSB wave using phase discriminator method.	8 Marks
		(OR)	
4	a)	Explain how VSB signal can be demodulated by envelop detector.	8 Marks
	b)	Why do you prefer VSB modulation scheme in TV signals.	6 Marks

UNIT-III

5	a)	Prove that narrow band FM offers no improvement in SNR over AM.	8 Marks
	b)	Evaluate the bandwidth requirement for the transmission of FM signal having a frequency deviation 75 KHz and an audio bandwidth of 10KHz.	6 Marks
		(OR)	
6	a)	Explain the detection of FM wave using balanced frequency discriminator	8 Marks
	b)	A single tone FM signal is given by **$x(t)=10\cos(16\pi 10^6 t+20\cos 2\pi 10^3 t)$ V**. Determine the modulation index, frequency deviation, BW and power associated.	6 Marks

UNIT-IV

7	a)	With a neat diagram, explain the operation of a Super heterodyne receiver.	7 Marks
	b)	Define the terms. i) Selectivity ii) Sensitivity with respect to a receiver. Also describe the notion of image frequency.	7 Marks
		(OR)	
8	a)	Write short notes on Preemphasis and Deemphasis in FM Modulation systems.	7 Marks
	b)	Derive the SNR in coherent detection and envelope detection of AM signals.	7 Marks

UNIT-V

9	a)	Explain the generation and demodulation of PPM with the help of block diagram and hence discuss its spectral characteristics.	8 Marks
	b)	What are the differences between PAM, PWM and PPM.	6 Marks
		(OR)	
10	a)	Differentiate different types of Pulse Modulation schemes.	7 Marks
	b)	Explain the generation and detection of PAM signals with neat schematics.	7 Marks

ELECTRONIC CIRCUIT ANALYSIS AND DESIGN

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What do you mean by a multistage amplifier? Explain it briefly.	6 Marks
	b)	Draw the circuit diagram of a Darlington emitter follower and derive the expressions for its voltage gain and input resistance.	8 Marks
		(OR)	
2	a)	State the various methods of cascading transistor amplifiers.	7 Marks
	b)	With the help of a suitable circuit diagram, explain the working of a RC coupled amplifier	7 Marks

UNIT-II

3	a)	Explain the frequency response of amplifier at low and high frequencies.	7 Marks
	b)	Define F_T, $F\alpha$ and F_β and find relation between F_T and F_β.	7 Marks
		(OR)	
4	a)	Derive the expression for the voltage gain of a common drain FET amplifier.	7 Marks
	b)	Sketch the small signal high frequency circuit of CS amplifier and derive the expression for voltage gain.	7 Marks

UNIT-III

5	a)	With a neat sketch, explain the working of RC phase shift oscillator.	6 Marks
	b)	Draw the circuit diagram of a voltage series feedback amplifier and derive expressions for voltage gain with and without feedback.	8 Marks
		(OR)	
6	a)	Explain in detail about the different feedback topologies.	8 Marks
	b)	A transistor Colpitt's oscillator uses a tank circuit with L = 30mH, C_1 = 200PF and C_2 = 200PF. What is the frequency of oscillators?	6 Marks

UNIT-IV

7	a)	In what way the design features of power transistors different from small signal transistors?	7 Marks
	b)	What reasons will you assign for higher conversion efficiency of Class B-amplifier as compared to Class A -amplifier?	7 Marks
		(OR)	
8	a)	What do you understand by cross-over distortion? How can it be eliminated in Class B-operation?	6 Marks
	b)	Derive an expression for the efficiency of class A - power amplifiers.	8 Marks

UNIT-V

9	a)	Explain the working of a single-tuned amplifier.	6 Marks
	b)	Derive an expression for the resonance frequency of a parallel resonant circuit	8 Marks
		(OR)	
10	a)	Explain the working of a double-tuned amplifier.	7 Marks
	b)	Explain in brief, the function of the tank circuit in a tuned-voltage amplifier.	7 Marks

SIGNALS AND SYSTEMS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) A discrete-time system **s** described by the following input-output relation $y(n) = x^2(n)$. Is this system (i) static or dynamic and (ii) linear or non-linear? 7 Marks

b) Find the step response of an LTI system whose unit impulse response is given by $h(n) = (0.5)^n u(n)$. 7 Marks

(OR)

2 a) Find the convolution sum of sequences x(n) and $y(n)$ for n = 0, 3, 5 *and* 10 if $x(n) = (3/4)^n\, u(n)$ and $y(n) = u(n)$. 7 Marks

b) For what range of values of the parameter α are the systems defined by the following difference equations stable? $y(n) - a^2\, y(n-2) = x(n-3)$ 7 Marks

UNIT-II

3 a) Find Fourier Transform of the function $x(t) = e^{-3t}[u(t+2) - u(t-3)]$. 5 Marks

b) Prove frequency and time shifting properties of Fourier Transform. 9 Marks

(OR)

4 State and prove following properties of Fourier Transforms. 14 Marks

i) Convolution property. ii) Time shifting property.
iii) Differentiation property. iv) Integration property.

UNIT-III

5 a) Find the Auto-Correlation of f(t) = cos ($\omega_0 t$) and sketch. 7 Marks

b) Derive the relation between PSDs of input and output for an LTI system 7 Marks

(OR)

6 a) State and prove sampling theorem for band limited signals using analytical approach 8 Marks

b) Determine the Nyquist sampling rate and Nyquist sampling interval for the signals (i) sinc(100nt) . (ii) sinc(100nt) + sinc(50nt). 6 Marks

UNIT-IV

7 a) Find Laplace transforms and sketches their ROC of : 7 Marks

(i) x(t) = u(t-5). (ii) $x(t) = e^{j\omega t}u(t)$.

b) State and prove the following properties of Laplace transform. 7 Marks

(i) Convolution property. (ii) Time differentiation.

(OR)

8 a) Solve the second-order linear differential equation $\mathbf{y''(t) + 5y'(t) + 6y(t) = x(t)}$ with initial conditions $\mathbf{y(0) = 2, y'(0) = 1}$, and $\mathbf{x(t) = e^{-t}\, u(t).}$ 7 Marks

b) Find the inverse Laplace transform of $\mathbf{X(s) = (-5s-7)/(s+1)(s-1)(s+2)}$ 7 Marks

UNIT-V

9 a) Determine the z-transform of $x(n) = a^n u(n) - b^n u(-n-1)$ and find ROC. 7 Marks

b) The output y[n] of a discrete-time LTI system is found to be $2\,(1/3)^n\, u[n]$ when the input $x[n]$ is $u[n]$. Find the impulse response $h[n]$ of the system. 7 Marks

(OR)

10 a) Explain geometric evaluation of Fourier Transform from pole-zero plot. 7 Marks

b) Determine the signal x(n) whose z-transform is given by: 7 Marks

$X(z) = \log(1 - 1\, az^{-1};\ |z| > |a|$

SWITCHING THEORY AND LOGIC DESIGN

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain Canonical and Standard forms with suitable examples.	6 Marks
	b)	Implement the INVERTER gate, OR gate and AND gate using: i) NAND gate. ii) NOR gate.	8 Marks
		(OR)	
2	a)	Explain basic laws of Boolean algebra with examples.	7 Marks
	b)	Simplify the expression **Z= AB'C' + AB'C + ABC** using Boolean laws.	7 Marks

UNIT-II

3	a)	Simplify following using K map **X= A'B+A'B'C+ABC'+AB'C'.**	7 Marks
	b)	Convert SOP to equivalent POS **A'B'C+A'BC+AB'C+ABC.**	7 Marks
		(OR)	
4	a)	Obtain the simplified expression in SOP form using K-map for the following Boolean function and draw logic circuit. $F(A, B, C, D) = \sum m(0,1,4,6,8,9,10,12) + \sum d(3,7,13,14,15)$	8 Marks
	b)	Show that the dual of the exclusive -OR is also its complement.	6 Marks

UNIT-III

5	a)	Design a combinational circuit for 4-bit Adder/Subtractor.	6 Marks
	b)	Design a BCD to Excess-3 code converter.	8 Marks
		(OR)	
6	a)	Implement a full adder circuit using 4x1 multiplexers	6 Marks
	b)	Explain about Encoder and Priority Encoder.	8 Marks

UNIT-IV

7	a)	Convert SR flip-flop to JK flip-flop.	7 Marks
	b)	Explain the operation of D flip-flop with logic diagram and truth table.	7 Marks
		(OR)	
8	a)	Design a decade asynchronous counter with timing diagrams.	8 Marks
	b)	Explain 4 bit Ring and Twisted ring counter with their truth tables.	6 Marks

UNIT-V

9	a)	Describe the design procedure for asynchronous sequential circuits.	6 Marks
	b)	Find a circuit that has no static hazards and the Boolean function $F(A, B, C, D) = \sum m(1, 3, 5, 7, 8, 9, 14, 15)$.	8 Marks
		(OR)	
10	a)	Explain the operation of debounce circuit with neat circuit diagram.	7 Marks
	b)	Find a circuit that has no static hazards and implements the Boolean function $F(A,B,C,D) = \sum(0,2,6\ 7,8,10,12)$.	7 Marks

ANALOG ELECTRONIC CIRCUITS

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Synthesize A_I, A_V R_I and R_O for a single stage CE amplifier with un by passed emitter resistance, R_S=1KΩ, R_1=50KΩ, R_2=2KΩ, R_C=1KΩ, R_E=270Ω and R_L=1.2KΩ. The h-parameters given are h_{ie}=1100Ω and h_{fe}=50. 14 Marks

(OR)

2 Estimate g_m, $g_{b'e}$, c_e and ω_β for a transistor at I_C=1mA and V_{CE}=10V. The datasheet shows the values as C_C=3PF, h_{fe}=200, ω_T=500rad/sec. Formulate the expressions used. 14 Marks

UNIT-II

3 a) Draw the circuit diagram of voltage shunt feedback amplifier and derive expressions for voltage gain and feedback factor. 10 Marks

b) Explain the concept of feedback as applied to electronic amplifier circuit. What are the advantages and disadvantages of positive and negative feedback? 4 Marks

(OR)

4 a) Show that the gain of Wien bridge oscillator using BJT amplifier must be at least 3 for the oscillations to occur. 10 Marks

b) Explain the concept of feedback in oscillators. 4 Marks

UNIT-III

5 a) Derive the conversion efficiency of a Class-B amplifier. 7 Marks

b) Compute the effective load resistance R_L seen looking into the primary of 8**:**1 transformer connected to the output load of 20Ω. 7 Marks

(OR)

6 a) Distinguish between Class-A, Class-B and Class-AB amplifiers with neat diagrams. 7 Marks

b) Describe the second harmonic distortion in power amplifiers. 7 Marks

UNIT-IV

7 a) Explain how clipping at two independent levels can be achieved. 8 Marks

b) Explain positive peak voltage limiters below reference level. 6 Marks

(OR)

8 a) With relevant diagrams, explain various switching times of a transistor. 8 Marks

b) Design a transistor switch with the following specifications. 6 Marks
V_{CC}=10V; V_{BB}=6V; I_C(sat)=8mA; h_{FE}(min)=30.

UNIT-V

9 Draw the circuit diagram for Schmitt trigger and explain its operation. What are the applications of the above circuit? Derive the expressions for UTP and LTP. 14 Marks

(OR)

10 Describe Monostable multivibrator. Explain with the help of a neat circuit diagram the principle of operation of collector coupled monostable multivibrator, and derive an expression for gate width. Draw the waveforms at collector and base of both transistors. 14 Marks

DATA COMMUNICATIONS
[Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Write short notes on complex signals.	7 Marks
	b)	Describe relation between bit rate, bandwidth and baud for 16-PSK.	7 Marks
		(OR)	
2	a)	With a neat sketch, explain the components of a communication net work.	5 Marks
	b)	Define noise. Explain about Electrical noise and Signal to noise ratio.	9 Marks

UNIT-II

3	a)	Write short notes on plenum cables and coaxial transmission lines.	7 Marks
	b)	Discuss in detail about the classification of transmission lines and also list out the differences between STP and UTP transmission lines.	7 Marks
		(OR)	
4	a)	Write short nodes of different modes present in optical fibers.	7 Marks
	b)	List out advantages of optical fiber cables.	7 Marks

UNIT-III

5	a)	Explain single channel simplex PCM transmission system.	8 Marks
	b)	Estimate the line speed for a T1 digital carrier system.	6 Marks
		(OR)	
6	a)	With neat sketch, explain various digital line encoding formats.	7 Marks
	b)	Explain how statistical TDM is different from conventional TDM.	7 Marks

UNIT-IV

7	a)	Explain in detail about basic telephone call procedures.	7 Marks
	b)	Explain about working of caller ID when it is used.	7 Marks
		(OR)	
8	a)	Describe processes of C-message noise weighting and give its significance.	7 Marks
	b)	Discuss in detail about the conditions that are addressed by facility parameters.	7 Marks

UNIT-V

9	a)	Explain Cellular concept. Define Frequency Reuse mechanism and explain Cell Splitting with net sketches.	8 Marks
	b)	Write about different Hand-off mechanisms.	6 Marks
		(OR)	
10	a)	Explain in detail about cellular telephone network components.	7 Marks
	b)	Briefly describe AMPS cellular telephone system.	7 Marks

OBJECT ORIENTED PROGRAMMING
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the difference between Procedure Oriented Programming and Object Oriented Programming with the help of suitable programs/code.	7 Marks
	b)	Write short notes on OOP concepts.	7 Marks
		(OR)	
2	a)	Explain the concept of Constructor with the help of suitable Java Program.	7 Marks
	b)	Explain the difference between a function in C Program and method in Java Program.	7 Marks

UNIT-II

3	a)	Write short note on the Costs and Substitutability of Inheritance.	7 Marks
	b)	Explain the Key word 'final' with suitable Java Program.	7 Marks
		(OR)	
4	a)	Explain the process of defining, creating and accessing a Package.	7 Marks
	b)	Discuss about CLASSPATH with the help of suitable Java Code.	7 Marks

UNIT-III

5	a)	Write a Java program to change the priority of a thread.	7 Marks
	b)	Explain the need for synchronizing threads. Demonstrate with a suitable program.	7 Marks
		(OR)	
6	a)	Explain the terms: "final", "finally", "finalize".	6 Marks
	b)	What is an exception? How exception can be handled in Java in different ways?	8 Marks

UNIT-IV

7	a)	Explain the life cycle of an Applet.	7 Marks
	b)	Write a Java program using Applets to display the cursor position by handling mouse events.	7 Marks
		(OR)	
8	a)	Explain the two ways of executing an Applet.	7 Marks
	b)	Design an Applet to play and stop music files.	7 Marks

UNIT-V

9	a)	Explain the life cycle of a servlet and the methods involved form its creation to destruction.	7 Marks
	b)	Write a program to connect to a database and retrieve all the data.	7 Marks
		(OR)	
10	a)	Write a sample source code structure of a servlet to print Hello World.	7 Marks
	b)	Explain different types of JDBC drivers.	7 Marks

CONTROL SYSTEMS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

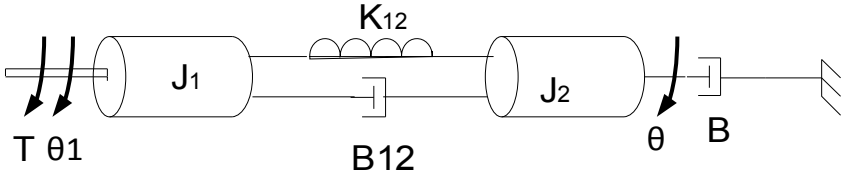
Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) What are the effects of feedback on Sensitivity and external noise? 7 Marks

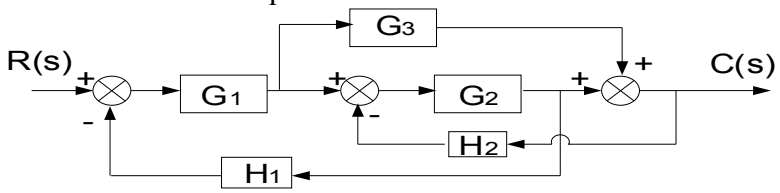
b) For the mechanical system, draw the electrical analogous circuits based on Torque-Voltage and Torque-Current analogy along their equations. 7 Marks



(OR)

2 a) Develop the block diagram for armature controlled DC motor. 7 Marks

b) Determine the overall transfer function for the system shown in the figure using block diagram reduction technique. 7 Marks



UNIT-II

3 a) Find K_p, K_v and K_a for the open-loop transfer function of a unity feedback system given by $G(s) = \frac{10}{s(0.1s+1)}$. 4 Marks

b) Derive the expressions for under damped second order system with unit step input. 10 Marks

(OR)

4 a) Discus the effect of P, PI, PD on control system characteristics. 6 Marks

b) Find the steady state error as a function of time for the unity feedback system G(s)= 100/s(1+0.1s), for the input r(t)=1+2t+(t^2/2). 8 Marks

UNIT-III

5 a) Determine the range of values of K such that the characteristic equation s^3 **+ 3(*K*+1)s^2 + (7*K*+5)*s*+(4*K*+7) = 0** has roots more negative than *s* = –1. 7 Marks

b) Explain about the effects of adding zeroes to G(s)H(s) on the root loci. 7 Marks

(OR)

6 a) Sketch the root locus plot of a unity feedback system with an open loop transfer function G(s) = $\frac{K}{s(s+2)(s+4)}$. 8 Marks

b) Discuss the effect of addition of poles and zeros to the open loop transfer function. 6 Marks

UNIT-IV

7 Sketch the bode plot of the system with open loop transfer function **$G(s)=1/s^2(1+s)(1+2s)$**, Find gain margin and phase margin of the system. 14 Marks

(OR)

8 a) State and explain Nyquist stability criterion to determine the stability of a system. 6 Marks

b) Sketch the polar plot and determine gain margin and phase margin for open loop transfer function of unity feedback system **$G(s) = 1/s(s+2)(s+4)$**. 8 Marks

UNIT-V

9 a) Define the terms State variable and state transition matrix. 6 Marks

b) Obtain the state space representation in Phase variable and Jordan form for the system whose transfer function is given by $T(s)=(s+1)/s(s+4)(s+5)$. 8 Marks

(OR)

10 a) Obtain state variable representation of a armature controlled DC motor. 6 Marks

b) Convert the given system matrix into diagonal form. 8 Marks

$$A=\begin{bmatrix} 0 & 1 & 0 \\ 0 & 0 & 1 \\ -6 & -11 & -6 \end{bmatrix}$$

FLUID MECHANICS - II
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	A circular disc 3m in diameter is held normal to a 15m/s wind having specific weight of 11.8N/m^3. If the drag coefficient is 0.4 find the power required to hold it.	6 Marks
	b)	Define drag and lift forces.	4 Marks
	c)	What is Magnus effect?	4 Marks

(OR)

2		What is meant by separation of boundary layer and how do you control the same.	14 Marks

UNIT-II

3	a)	Derive dynamic equation for gradually varied flow.	7 Marks
	b)	When does a hydraulic jump occurs? Also give its applications.	7 Marks

(OR)

4		Define specific energy. And explain specific energy curve.	14 Marks

UNIT-III

5		Derive an expression for force exerted on a stationary flat plate held inclined to the jet and find the force exerted by the jet on a flat stationary plate having 75mm diameter issues with a velocity of 30 m/s.	14 Marks

(OR)

6		Show that the efficiency of a free jet striking normally on a series of flat plates mounted on the periphery of a wheel can never exceed 50%.	14 Marks

UNIT-IV

7		A Pelton wheel produces 8000kw under a head of 130 m at a speed of 200 r.p.m. The coefficient of velocity is 0.98, hydraulic efficiency is 87%, speed ratio is 0.45 and jet diameter is one tenth of the wheel diameter. Find the discharge, diameter of the wheel, diameter and number of jets required and the specific speed. The mechanical efficiency is 75%.	14 Marks

(OR)

8		Give the classification of hydro power plants.	14 Marks

UNIT-V

9		Define the various heads and efficiencies of a centrifugal pump and derive an expression for the specific speed of a centrifugal pump.	14 Marks

(OR)

10		Explain with a neat sketch of different components of hydropower plant and write the procedure to calculate discharge using mass curve.	14 Marks

KINEMATICS OF MACHINERY

[MECHANICAL ENGINEERING]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) What do you mean by constrained motion? What are the different types of constrained motions? Explain each type with examples and with neat sketches. 8 Marks

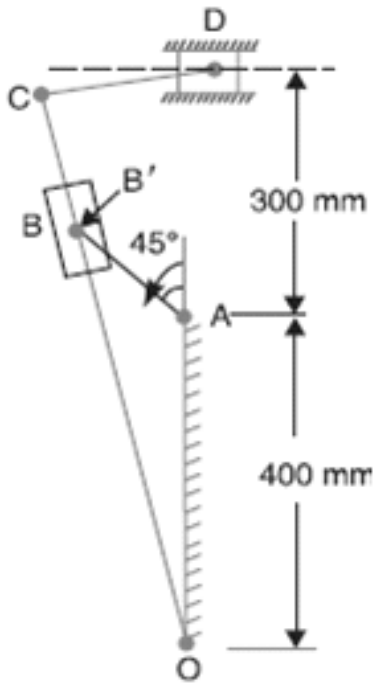
b) Define the following terms: link, kinematic pair, kinematic chain and mechanism. 6 Marks

(OR)

2 What do you mean by inversion of mechanism? Explain with sketches all inversions of single slider crank chain. 14 Marks

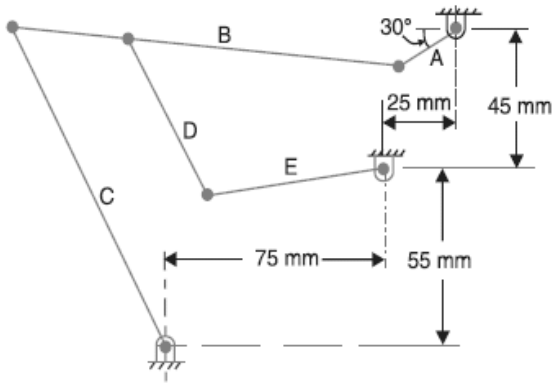
UNIT-II

3 A mechanism of a crank and slotted lever quick return motion is shown in figure. If the crank rotates counter clockwise at 120 r.p.m., determine for the configuration shown, the velocity and acceleration of the ram D. Also determine the angular acceleration of the slotted lever. 14 Marks
Crank, AB = 150 mm ; Slotted arm, OC = 700 mm and link CD = 200 mm.



(OR)

4 In the mechanism shown in figure. find the instantaneous centres of the links B, C and D. If the link A rotates clockwise at 10 rad/s, find the angular velocity of link E. The lengths of various links are as follows:Link A = 25 mm ; Link B = Link C= 100 mm ; Link D = Link E = 50 mm. The link D is hinged to linkB at 25 mm from the left hand end of link B. 14 Marks



UNIT-III

5 a) Show thatPaucellier mechanism can be used to trace a straight line. 7 Marks

b) What is Scott-Russel Mechanism? What is its limitation? How is it modified? 7 Marks

(OR)

6 A double universal joint is used to connect two shafts in the same plane. The intermediate shaft is inclined at an angle of 20˚to the driving shaft as well as the driven shaft. Find the maximum and minimum speed of the intermediate shaft and the driven shaft if the driving shaft has a constant speed of 500 rpm. 14 Marks

UNIT-IV

7 Draw the profile of a cam to raise a valve with harmonic motion through 40 mm in 1/3 of revolution, keep it fully raised through 1/12 revolution, and to lower it with harmonic motion in 1/6 revolution. The valve remains closed during the rest of the revolution. The diameter of the roller is 20 mm and minimum radius of the cam is to be 25 mm. The diameter of the cam shaft is 25 mm. The axis of the valve rod passes through the axis of the cam shaft. Assume the cam shaft to rotate with a uniform velocity. 14 Marks

(OR)

8 Draw the profile of a cam to give the following motion to the reciprocating follower with a flat or mushroom contact surface: 14 Marks

a) Follower to move outward through a distance of 30 mm during 120^0 of cam rotation

b) Follower to dwell for 30^0 of cam rotation

c) Follower to return to its initial position during 120^0 of cam rotation

d) Follower to dwell for the remaining 90^0 of cam rotation.

The minimum radius of cam is 25 mm and the flat face of the follower is at right angles to the line of stroke of the follower. The outward and return strokes of the follower are take place with uniform acceleration and retardation motion.

UNIT-V

9 a) Derive an expression for length of path of contact. 7 Marks

b) Two gear wheels mesh externally to give a velocity ratio of 3:1. The teeth are of involute form; module = 6mm. Addendum = one module; pressure angle = 20˚. The pinion rotates at 90rpm. 7 Marks

Find i) Number of teeth on each wheel to avoid interference
ii) The length of path of contact.

(OR)

10 a) What is an epicyclic gear train? In what manner does it differ from a simple of compound gear train? 6 Marks

b) A compound gear train consists of six gears. The number of teeth on each gear is as follows: 8 Marks

Gear	A	B	C	D	E	F
No.of teeth	60	40	50	25	30	24

Determine i) Speed of the output shaft
ii) Output torque
iii) Holding torque

ELECTRONIC CIRCUIT ANALYSIS AND DESIGN

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive the expression for the bandwidth of multistage amplifier.	6 Marks
	b)	Explain the principle of operation of direct coupled amplifier and mention its advantages.	8 Marks
		(OR)	
2	a)	With the help of a neat circuit diagram, describe the working of a cascode amplifier.	7 Marks
	b)	Discuss the different types of coupling schemes used in multistage amplifiers.	7 Marks

UNIT-II

3	a)	Explain the frequency response of amplifier at low and high frequencies.	7 Marks
	b)	Define F_T , F_α and F_β and find relation between F_T and F_β.	7 Marks
		(OR)	
4	a)	Derive equations for the voltage gain, input admittance, input capacitance and output resistance for common source amplifier.	7 Marks
	b)	Explain FET small signal model.	7 Marks

UNIT-III

5	a)	Explain in detail about the different feedback topologies.	8 Marks
	b)	A transistor Colpitt's oscillator uses a tank circuit with L = 30mH, C_1 = 200PF and C_2 = 200PF. What is the frequency of oscillators?	6 Marks
		(OR)	
6	a)	Draw the circuit diagram of a current series feedback and derive expressions for output resistance and input resistance.	7 Marks
	b)	Show that Voltage shunt feedback amplifier trans resistance gain, R_i , R_0 are decreased by a factor (1+Aβ) with feedback.	7 Marks

UNIT-IV

7	a)	With The help of a neat diagram, explain the operation of a complementary symmetry configured class B power amplifier.	9 Marks
	b)	Compare series fed and Transformer coupled class A amplifier.	5 Marks
		(OR)	
8	a)	Show that how even harmonics cancel out and overall distortion is reduced in a push pull configuration.	8 Marks
	b)	List the advantages of complementary-symmetry configuration over push pull configuration.	6 Marks

UNIT-V

9	a)	Explain the operation of a Double tuned amplifier.	8 Marks
	b)	Explain the advantages of double tuned circuit over single tuned circuit.	6 Marks
		(OR)	
10	a)	Why parallel resonance circuits are used in tuned amplifiers? Explain.	6 Marks
	b)	Draw the equivalent circuit of capacitance coupled single tuned amplifier and derive the equation for voltage gain.	8 Marks

CODE No.:14BT40403 SVEC-14

Roll No. | | | | | | | | | | |

ELECTROMAGNETIC THEORY AND TRANSMISSION LINES

[ELECTRONICS AND COMMUNICATION ENGINEERING]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain Gauss law and its application with one example.	7 Marks
	b)	Derive expression for the electric field for symmetrical charge distributions	7 Marks
		(OR)	
2	a)	Explain about Electric potential and give the relation between E and V.	5 Marks
	b)	Given that $D=z\rho\cos^2\phi\ a_z\ C/m^2$, calculate the charge density at $(1,0^0,3)$ and the total charge enclosed by the cylinder of radius 1m with $-2<z<2m$.	9 Marks

UNIT-II

3	a)	State and explain Biot-Savart's law.	7 Marks
	b)	Derive expression for magnetic field intensity at any point on the axis of circular coil carrying current.	7 Marks
		(OR)	
4	a)	Explain about the magnetic vector potential and derive its expression.	7 Marks
	b)	State and explain Ampere's circuital law with applications.	7 Marks

UNIT-III

5	a)	What is the inconsistency in Ampere's Law? How it is rectified by Maxwell?	7 Marks
	b)	Write Maxwell's equations in integral form and differential form for time varying fields.	7 Marks
		(OR)	
6	a)	Explain the concept of displacement current.	7 Marks
	b)	State and prove electrostatic boundary conditions.	7 Marks

UNIT-IV

7	a)	Define uniform plane wave? Give the relation between E and H in a uniform plane wave?	7 Marks
	b)	When the amplitude of the magnetic field in a plane wave is 2 A/m: (a) Determine the magnitude of the electric field for the plane wave in free space (b) Determine the magnitude of the electric field when the wave Propagates in a medium which is characterized by $\sigma=0$, $\mu=\mu_0$.	7 Marks
		(OR)	
8	a)	Derive expression for reflection and transmission coefficients of an EM wave when it is incident normally on a dielectric.	7 Marks
	b)	Explain the significances of Poynting theorem and Poynting vector.	7 Marks

UNIT-V

9	a)	Definite following terms and explain their physical significance. i) Attenuation constant ii) Characteristic impedance iii) Phase constant iv) velocity	7 Marks

b) At 8 MHz the characteristic impedance of transmission line is (40-j2) and the propagation constant is (0.01+j0.18) per meter. Find the primary constants. 7 Marks

(OR)

10 a) Derive the characteristic impedance of a transmission line in terms of its line constants 7 Marks

b) Sketch the voltage and current distribution along matched, open and short circuited transmission lines. 7 Marks

SIGNALS AND SYSTEMS

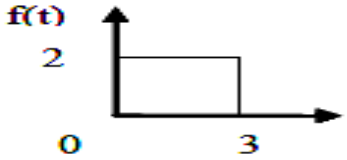
[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Sketch the even and odd parts of the signal shown below. 8 Marks



b) Find convolution of sequences x[n] = 2^n and h[n] = u[n]. 6 Marks

(OR)

2 Classify the Systems and explain them with examples. 14 Marks

UNIT-II

3 a) Consider full rectified sine have with peak amplitude '1' and time period is '1' expand this function in terms of exponential Fourier series. Also sketch the spectrum. 7 Marks

b) Derive the relation between Trigonometric and exponential Fourier series coefficients. 7 Marks

(OR)

4 a) State and prove Parseval's power theorem. 7 Marks

b) Find the Fourier transform of f (t) = Cos π t; **-½ ≤ t ≤ ½** and f (t) = 0; otherwise. 7 Marks

UNIT-III

5 a) Find the auto-correlation of the signal $x(t) = A\cos(w_0 t+\theta)$. 7 Marks

b) Write all the properties of power spectral density. 7 Marks

(OR)

6 a) What is the relation between correlation and filtering? 5 Marks

b) What is aliasing? What causes it and how can it be reduced? 5 Marks

c) How to reconstruct a signal from its samples using interpolation? 4 Marks

UNIT-IV

7 State and prove initial value and final value theorem of Laplace transform. 14 Marks

(OR)

8 a) Find the Laplace transform and Sketch the ROC of the Signal $x(t) = e^{-b|t|}$. 7 Marks

b) Determine inverse Laplace Transform of $F(s) = \frac{1}{(s-1)(s-2)(s-3)}$ if ROC is Re{S} < - 3. 7 Marks

UNIT-V

9 a) State and prove the convolution theorem of *Z* transform. 7 Marks

b) Find the *Z* transform of $x(n) = [a^n \cos w_0 n]u(n)$. 7 Marks

(OR)

10 State and prove initial value and final value theorem of Z-transform . 14 Marks

SWITCHING THEORY AND LOGIC DESIGN

[Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Convert the following. i) $(11011.1011)_2$ to decimal. ii) $(3FA8.2C)_{16}$ to equivalent binary representation. iii) $(7562.45)_{10}$ to Octal.	6 Marks
	b)	i) Subtract 1100110 and 1100001 using 2's complement form. ii) Explain the construction of Hamming code for 1010 message bits.	8 Marks
		(OR)	
2	a)	What is self complementing code? What are the advantages of this? Illustrate with an example code.	6 Marks
	b)	Perform the division in binary. 1011111 ÷ 101	4 Marks
	c)	Express the following numbers in decimal i) $(10110.0101)_2$ ii) $(16.5)_{16}$ iii) $(26.24)_8$ iv) $(12.34)_6$	4 Marks

UNIT-II

3	a)	Draw the multi level NOR circuit for the following. (AB'+CD')E+BC(A+B).	7 Marks
	b)	Simplify the Boolean function using tabular method. F(A,B,C,D) = ∑(0,1,2,8,10,11,14,15)+d(3,5).	7 Marks
		(OR)	
4	a)	Simplify the Boolean function and obtain its realization using only NAND gates: F(A,B,C,D= ∑(0,1,3,4,6,9,11)+d(2,5)	7 Marks
	b)	Assume propagation delay of EX OR gate is 20ns and OR & And gate is 10ns, and then find the propagation delay 4 bit parallel adder.	7 Marks

UNIT-III

5	a)	What is meant by binary parallel adder and design a 4 bit Carry look ahead adder.	7 Marks
	b)	Implement the following function with multiplexer F(x,y,z) = ∑m(0,2,6,7).	7 Marks
		(OR)	
6	a)	Construct a 16 x 1 Multiplexer using 4 x 1 Multiplexers.	6 Marks
	b)	Design 4 bit binary to gray code converter.	8 Marks

UNIT-IV

7		Design a synchronous 3-bit UP-DOWN counter using JK flip-flop	14 Marks
		(OR)	
8	a)	Compare combinational and sequential circuits	4 Marks
	b)	What is race around condition? How it is eliminated using master-slave JK flip-flop.	10 Marks

UNIT-V

9	a)	Describe the design procedure for asynchronous sequential circuits.	6 Marks
	b)	Find a circuit that has no static hazards and the Boolean function. F(*A, B, C, D*) = ∑*m*(1, 3, 5, 7, 8, 9, 14, 15).	8 Marks
		(OR)	
10		Explain in detail procedure of asynchronous circuit design with an example.	14 Marks

OBJECT ORIENTED PROGRAMMING
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Write a Java Program that demonstrates the scope and life time of variables.	7 Marks
	b)	What is Access Control? Explain with suitable Java Program.	7 Marks
		(OR)	
2	a)	Explain the concept of Constructor with the help of suitable Java Program.	7 Marks
	b)	Explain the difference between a function in C Program and method in Java Program.	7 Marks

UNIT-II

3	a)	Differentiate Method Overloading and Method Overriding with the help of suitable Java Programs.	7 Marks
	b)	Explain the concept of Inheritance with the help of Base class and Sub class.	7 Marks
		(OR)	
4	a)	Explain different forms of Inheritance with examples.	7 Marks
	b)	Discuss about the benefits of Inheritance with suitable examples.	7 Marks

UNIT-III

5	a)	Write a Java program to change the priority of a thread.	7 Marks
	b)	Explain the need for synchronizing threads. Demonstrate with a suitable program.	7 Marks
		(OR)	
6	a)	Explain the terms: "final", "finally", "finalize".	6 Marks
	b)	What is an exception? How exception can be handled in Java in different ways?	8 Marks

UNIT-IV

7	a)	Design an Applet to draw a smiley on the panel. Get the dimensions for the smiley from the user through the textboxes.	7 Marks
	b)	Write an Applet program to display the banner for different names when executed.	7 Marks
		(OR)	
8	a)	Explain the methods of an Applet Skeleton in detail.	7 Marks
	b)	Create an Applet to control and resize the image from min to max dimension on click of a mouse.	7 Marks

UNIT-V

9	a)	Describe the Architecture of a Servlet. Explain with an example.	7 Marks
	b)	Write a java program to execute read and select queries in JDBC.	7 Marks
		(OR)	
10	a)	Describe how Exceptions are handled in servlets.	7 Marks
	b)	Write a Java program to connect with Database.	7 Marks

CONTROL SYSTEMS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

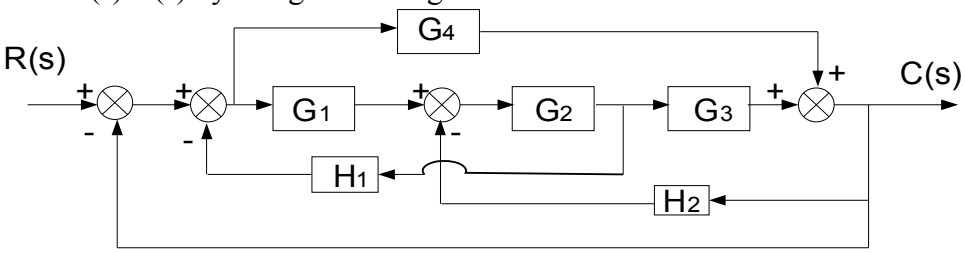
Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

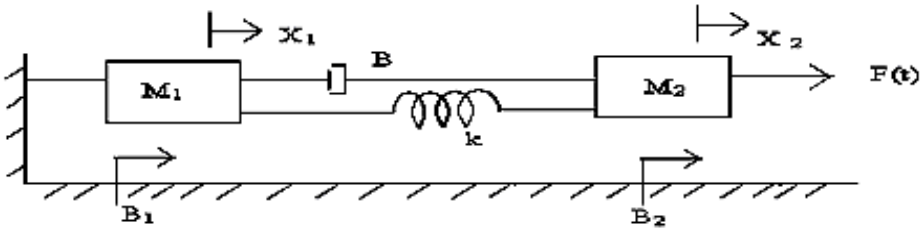
1 a) Write the advantages and disadvantages of open-loop and closed-loop control systems. 7 Marks

b) Draw the signal flow graph for the given block diagram. Obtain the transfer function C(s)/R(s) by using mason's gain formula. 7 Marks



(OR)

2 a) Determine the transfer function $\frac{X_2(S)}{F(S)}$. 7 Marks



b) Derive the transfer function of AC servomotor. 7 Marks

UNIT-II

3 a) A unity feedback system is characterized by a open loop transfer function G(s)=K/s(s+10). Determine the gain K so that the system will have a damping ratio of 0.5. For this value of K determine settling time, peak overshoot, and time to peak overshoot for unit step input. 8 Marks

b) Find all steady state errors for open loop transfer function with unity feedback given by G(s)= 10/s(0.1s+1). 6 Marks

(OR)

4 a) Discus the effect of P, PI, PD on control system characteristics. 6 Marks

b) Find the steady state error as a function of time for the unity feedback system G(s)= 100/s(1+0.1s), for the input r(t)=1+2t+(t^2/2). 8 Marks

UNIT-III

5 a) Determine the stability of the system represented by the characteristic equations $s^5 + s^4 + 3^3 + 9s^2 + 16s + 10 = 0$, also determine the number of roots on the right half s-plane. 7 Marks

b) Discus the effect of addition poles and zeros to open loop transfer function. 7 Marks

(OR)

6 A feedback control system has an open loop transfer function G(s). $H(s) = K/s(s+3)(s^2+2s+2)$. Find the root locus as K varies from 0 to ∞. 14 Marks

UNIT-IV

7 A unity feedback system has an open loop transfer function $G(s) = \frac{4s+1}{s^2(s+1)(1+2s)}$. 14 Marks

Sketch the Nyquist plot and determine whether the closed loop system stable or not.

(OR)

8 The open loop transfer function of a unity feedback system is given by $\frac{10(s+3)}{s(s+2)(s^2+4s+100)}$ draw the bode plot, find the gain margin and phase margin and comment on stability by bode plot. 14 Marks

UNIT-V

9 a) Define the terms State variable and state transition matrix. 6 Marks

b) Obtain the state space representation in Phase variable and Jordan form for the system whose transfer function is given by T(s)=(s+1)/s(s+4)(s+5). 8 Marks

(OR)

10 a) Obtain state variable representation of a armature controlled DC motor. 6 Marks

b) What are the advantages of state variable analysis? Also write the properties of state transition matrix. 8 Marks

FLUID MECHANICS - II
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Define boundary layer thickness and calculate displacement thickness, momentum thickness, shape factor and energy thickness for the velocity distribution of turbulent boundary layer. 14 Marks

(OR)

2 What is meant by separation of boundary layer and how do you control the same. 14 Marks

UNIT-II

3 a) Derive dynamic equation for gradually varied flow. 7 Marks

b) When does a hydraulic jump occurs? Also give its applications. 7 Marks

(OR)

4 A trapezoidal channel with side slopes of 1 to 1 has to be designed to convey $12m^3/s$ at a velocity of 2.5m/s so that the amount of concrete lining for the bed and sides is the minimum. Calculate the area of lining required for one metre length of canal. 14 Marks

UNIT-III

5 A jet of water of 60 mm diameter strikes a curved vane at its centre with a velocity of 18 m/s. The curved vane is moving with a velocity of 6 m/s in the direction of the jet. The jet is deflected through an angle of 165 degrees. Assuming the plate is smooth find thrust on the plate in the direction of jet, power of the jet and efficiency of the jet. 14 Marks

(OR)

6 Derive an expression for force exerted by the jet on the moving plate and find the force on the plate, work done and efficiency of the jet having a diameter 60mm delivers a stream of water at 24 m/s perpendicular to a plate that moves away from the jet at 6 m/s. 14 Marks

UNIT-IV

7 Explain with a neat sketch of different components of a hydro power plant and a Pelton wheel has to design to develop 750kw working under a head of 250m running at 800 r.p.m with overall efficiency of 85%. Take speed ratio as 0.45, coefficient of velocity 0.98, jet diameter to wheel diameter is 1/10. 14 Marks

(OR)

8 Give the classification of hydro power plants. 14 Marks

UNIT-V

9 Obtain an expression for the work done by the impeller of a centrifugal pump on water and explain the various efficiencies of a centrifugal pump. 14 Marks

(OR)

10 a) What are all the losses that occur during the operation of a centrifugal pump? 7 Marks

b) Expand and explain the term NPSH. 7 Marks

KINEMATICS OF MACHINERY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define and explain the terms: mechanism, machine, link and kinematic pair.	6 Marks
	b)	What do you understand by degrees of freedom? For a plane mechanism derive an expression for degrees of freedom.	8 Marks
		(OR)	
2		What do you mean by inversion of mechanism? Explain with sketches all inversions of quadric cycle chain.	14 Marks

UNIT-II

3		The crank and connecting rod of a horizontal steam engine are 0.5m and 2m long respectively. The crank makes 180 r.p.m. in the clockwise direction. When it has turned 45^{o} from the inner dead centre position, determine (i) velocity of piston (ii) Angular velocity of connecting rod (iii) velocity of point E on the connecting rod 1.5m from the gudgeon pin.	14 Marks
		(OR)	
4		A link AB of four-bar linkage ABCD revolves uniformly at 120 r.p.m in a clockwise direction. The link AD is fixed. Find the angular acceleration of links BC and CD. Given : AB = 75mm, BC = 175mm, CD = 150mm, DA = 100mm and angle BAD = 90^{0}.	14 Marks

UNIT-III

5	a)	List out various mechanisms used to draw exact straight lines.	7 Marks
	b)	Discuss with a neat sketch of the straight line motion Hart mechanism Prove that it produces an exact straight line motion.	7 Marks
		(OR)	
6	a)	Explain condition for correct steering with neat sketch.	7 Marks
	b)	Describe the working of Ackerman steering gear with neat sketch.	7 Marks

UNIT-IV

7	a)	What is a displacement diagram? Why is it necessary to draw it before drawing a cam profile?	4 Marks
	b)	Derive the relations for velocity and acceleration for a convex cam with a roller follower.	10 Marks
		(OR)	
8		From the following data draw the profile of a cam in which the follower moves with simple harmonic motion during ascent while it moves with uniformly accelerated and decelerated motion during descent: Least radius of cam = 50mm, Angle of ascent = 48^{0}, Angle of dwell between ascent and descent = 42^{0}, Angle of descent = 60^{0}, the lift of follower = 40mm, diameter of roller 20mm, distance between line of action of follower and axis of cam = 20mm. If the cam rotates at 360 r.p.m clockwise, find the maximum velocity and acceleration of the follower during descent.	14 Marks

UNIT-V

9 a) State and prove the law of gearing. 8 Marks

b) Show that the involute curves as the profiles of mating gears satisfy the law of gearing. 6 Marks

(OR)

10 a) What do you understand by 'gear train'? Discuss the various types of gear trains. 4 Marks

b) In an epicyclic gear train, an annular wheel A having 54 teeth meshes with a planet wheel B which gears with a sun wheel C, the wheels A and C being rotates about the axis of the wheels A and C. If the wheel A makes 20 r.p.m in a clockwise sense and the arm rotates at 100 r.p.m in the anticlockwise direction and the wheel C has 24 teeth, determine the speed and direction of rotation of wheel C. 10 Marks

THERMAL ENGINEERING - I

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What are the important basic components of an IC engine? Explain them briefly.	7 Marks
	b)	Give the comparison of air-standard and fuel-air cycles.	7 Marks
		(OR)	
2	a)	Draw the cross-section of a Spark-Ignition engine to show different components of it and explain their functions.	7 Marks
	b)	Explain how the actual cycles for IC engines differ from air-standard cycles.	7 Marks

UNIT-II

3	a)	Explain the phenomenon of knock in SI engines.	7 Marks
	b)	What are the different types of combustion chambers used in CI engines? Explain with the help of simple diagrams.	7 Marks
		(OR)	
4	a)	Discuss the factors that influence the flame speed in an engine cylinder.	7 Marks
	b)	Discuss the important qualities of fuels used in SI and CI engines.	7 Marks

UNIT-III

5	The following readings were taken during the test of a single- cylinder four stroke oil engine: Cylinder diameter = 250mm, Stroke length = 400mm, Gross m.e.p =7 bar, Pumping m.e.p = 0.5 bar, Engine speed = 250 r.p.m, Net load on brake = 1080 N, Effective diameter of the brake = 1.5m , Fuel used per hour = 10 kg , C.V of fuel = 44300kJ/kg. Calculate: i) Indicated power. ii) Brake power. iii) Mechanical efficiency. iv) Indicated thermal efficiency.	14 Marks
	(OR)	
6	With neat sketch, explain the measurement of Indicated horse power and Brake power.	14 Marks

UNIT-IV

7	What are the advantages of variable compression ratio engine? And discus the important design of VCR engine and comment on their salient points.	14 Marks
	(OR)	
8	Describe with neat sketches the working principle of wankel combustion engine and discus the application of wankle engine.	14 Marks

UNIT-V

9	a)	Describe with a neat sketch the construction and working of single stage single acting reciprocating air compressor.	7 Marks
	b)	What do you mean by multi stage compressor? State its advantages.	7 Marks
		(OR)	
10	a)	Explain the working principle of an axial flow compressor. Give its advantages and applications.	7 Marks
	b)	Discuss the effect of inter-cooling in multi-stage compressors.	7 Marks

II B.Tech II Semester (SVEC14) Supplementary Examinations July – 2022

ELECTRONIC CIRCUIT ANALYSIS AND DESIGN

[Electrical and Electronics Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive the expression for the bandwidth of multistage amplifier.	6 Marks
	b)	Explain the Principle of operation of direct coupled amplifier and mention its advantages.	8 Marks

(OR)

2	a)	With the help of a neat circuit diagram, describe the working of a cascode amplifier.	7 Marks
	b)	Discuss the different types of coupling schemes used in multistage amplifiers.	7 Marks

UNIT-II

3	a)	Draw a small signal low-frequency model of a FET and explain its various elements.	8 Marks
	b)	Draw the frequency response of an amplifier and explain the reason for different for the different slopes in the response.	6 Marks

(OR)

4	a)	Draw the high frequency equivalent circuit for a FET amplifier. Derive the values of all the parameters.	9 Marks
	b)	Define h_{fe}, h_{oe}, h_{re}, h_{ie} of a CE transistor.	5 Marks

UNIT-III

5	a)	With a neat sketch, explain the working of RC phase shift oscillator.	6 Marks
	b)	Draw the circuit diagram of a voltage series feedback amplifier and derive expressions for voltage gain with and without feedback.	8 Marks

(OR)

6	a)	Derive the expressions for voltage gain, input impedance and output impedance of a voltage shunt feedback Amplifier.	8 Marks
	b)	Explain the effect of negative feedback on amplifier bandwidth.	6 Marks

UNIT-IV

7	a)	Show that how even harmonics cancel out and overall distortion is reduced in a push pull configuration.	8 Marks
	b)	Compare series fed and Transformer coupled Class A power amplifiers.	6 Marks

(OR)

8	a)	State the merits of using push pull configuration? Describe the operation of class B push pull amplifier and show how even harmonics are eliminated.	7 Marks
	b)	Design a class B power amplifier to obtain the maximum conversion efficiency is 78.5%.	7 Marks

UNIT-V

9		Describe the following briefly: i) Stagger Tuned Amplifiers. ii) Heat Sinks for tuned power amplifiers.	14 Marks

(OR)

10	a)	Why two tuned circuits are used in double tuned amplifier? Explain clearly.	7 Marks
	b)	Why parallel resonance circuits are used in tuned amplifiers? Explain.	7 Marks

ELECTROMAGNETIC THEORY AND TRANSMISSION LINES

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	State Coulomb's law and define various types of charge distributions.	7 Marks
	b)	Derive an expression for electric field due to an electric dipole.	7 Marks
		(OR)	
2	a)	Derive the expression for the energy stored in an electrostatic field.	7 Marks
	b)	Derive the expression for the capacitance of a coaxial cable.	7 Marks

UNIT-II

3	a)	Prove that isolated magnetic charge does not exist.	7 Marks
	b)	Derive the expression for force between two current elements.	7 Marks
		(OR)	
4	a)	Distinguish between scalar and vector magnetic potential.	7 Marks
	b)	Explain about magnetic energy.	7 Marks

UNIT-III

5	a)	What is the inconsistency in Ampere's Law? How it is rectified by Maxwell?	7 Marks
	b)	Explain how the concept of displacement current was introduced by Maxwell to account for the production of magnetic fields in the empty space.	7 Marks
		(OR)	
6	a)	Derive Maxwell's equations for time varying fields.	7 Marks
	b)	If $\vec{E}$ of an electromagnetic wave in free space is given by $\vec{E} = 2\cos\omega\,(t - z/\upsilon_0)\,\overrightarrow{ay}\,V/m$, find the magnetic field, $\vec{H}$.	7 Marks

UNIT-IV

7	a)	Derive Uniform plane wave equation.	7 Marks
	b)	Derive the general solution of Uniform plane wave equation.	7 Marks
		(OR)	
8	a)	Derive expression for reflection and transmission coefficients of an EM wave when it is incident normally onto a dielectric.	7 Marks
	b)	Define complex poynting vector and explain how to obtain average power.	7 Marks

UNIT-V

9	a)	Derive the equation for the input impedance of a transmission line.	7 Marks
	b)	Write short notes on reflection coefficient, standing wave ratio and transmission coefficient.	7 Marks
		(OR)	
10	a)	Explain the principle of impedance matching with quarter wave transformer.	7 Marks
	b)	A low transmission line of 100Ω characteristic impedance is connected to a load of 400Ω. Calculate the reflection coefficient and standing wave ratio. Derive the relationships used.	7 Marks

SIGNALS AND SYSTEMS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the concept of Unit Impulse and Unit Step functions.	6 Marks
	b)	Explain how the signals and systems are classified.	8 Marks
		(OR)	
2	a)	Find convolution of two signals. $x(t) = 1,\ 0<t<T$ and $h(t) = t,\ 0<t<2T$; $= 0$, otherwise; $= 0$, otherwise	9 Marks
	b)	List the properties of Causal, Stable and Linear Time-Invariant Systems.	5 Marks

UNIT-II

3	a)	What is exponential fourier spectrum? Explain with necessary equations.	7 Marks
	b)	State the properties of Fourier series.	7 Marks
		(OR)	
4	a)	Find the Fourier transform of $f(t) = \cos \pi t$; $-\frac{1}{2} \le t \le \frac{1}{2}$ and $f(t) = 0$ otherwise.	8 Marks
	b)	Prove frequency and time shifting properties of Fourier Transform.	6 Marks

UNIT-III

5	a)	Determine the relation between convolution and correlation.	7 Marks
	b)	Explain the concept of filtering and how is it useful in the extraction of signal from noise.	7 Marks
		(OR)	
6	a)	Explain briefly reconstruction of signal from its samples.	8 Marks
	b)	Derive the relation between correlation and power spectral density.	6 Marks

UNIT-IV

7	a)	Derive the relation between Laplace transform and Fourier transform of signal.	7 Marks
	b)	Find the initial and final values of signal $X(t)$ whose Laplace transform is $X(s) = (7s + 10) / [s(s + 2)]$	7 Marks
		(OR)	
8	a)	Describe the ROC of the signal $x(t) = e^{-b\|t\|}$ For $b > 0$ and $b \le 0$	7 Marks
	b)	Find the inverse Laplace transform of $X(s) = (-5s-7) / (s+1)(s-1)(s+2)$	7 Marks

UNIT-V

9	a)	State and Prove the convolution theorem of Z transform.	7 Marks
	b)	Find the Z transform of $x(n) = [a^n \cos w_0 n]u(n)$.	7 Marks
		(OR)	
10		State and prove initial value and final value theorem of Z-transform .	14 Marks

II B.Tech II Semester (SVEC14) Supplementary Examinations March – 2021

STRUCTURAL ANALYSIS - I

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 Derive the expression for stresses on an inclined plane of block subjected to normal stress and shear stress along the two planes at right angles. 14 Marks

(OR)

2 The stress on two perpendicular planes through a point are 60 N/mm^2 (tension), 40 N/mm^2 (compression) and 30 N/mm^2 (shear). Find the stress components and the resultant of stresses on a plane at 60 deg to that of the tensile stress. 14 Marks

UNIT-II

3 A cantilever beam of length 7m, carries a point load at a distance of 4m from the fixed end. Find the deflection and slope under the point load and at the free end using Macaulay's method. Take E = 2.1 x 10^5 MPa and I = 86 x 10^6 mm^4. 14 Marks

(OR)

4 A simply supported rectangular R.C beam is of length 3m and cross section 100mm x 200mm. It carries a point load of 20kN at a distance of 1m from the left support. Find the maximum slope and maximum deflection under the point load. Take E = 1 x 10^4 N/mm^2. 14 Marks

UNIT-III

5 What are the assumptions made in the Euler's theory? Derive the Euler's critical load formula for long column with both ends hinged. 14 Marks

(OR)

6 A hollow cylinder cast iron column is 4m long with both ends fixed. Determine the minimum diameter of the column if it has to carry a safe load of 250kN with a factor of safety 5. Take the internal diameter as 0.8 times the external diameter, take a=1/1600 and σ_c=550MN/m^2. 14 Marks

UNIT-IV

7 A fixed beam AB of length 5m is carrying a point load of 20kN at C. Find the fixed end moments if AC= 2m and CB= 3m. Draw the S.F and B.M diagrams. If EI= 2400 kN-m^2, find the location and magnitude of maximum deflection and deflection at C. 14 Marks

(OR)

8 A continuous beam ABC is simply supported at A, B and C and having AB = 5m, BC= 3m. The span AB carries a point load of 4 kN at 2m away from the support A. The span BC is carrying a **u.d.l** of 2 kN/m. Find the reactions and bending moments at supports A, B and C. Also draw the S.F and B.M diagrams. 14 Marks

UNIT-V

9 A beam of rectangular section 180mm wide and 260mm deep is used over a simply supported span of 6.6m to support two concentrated loads of 8 kN each at 3m from either support. The plane of loads makes an angle of 34^0 with the vertical plane of symmetry. Find the direction of the neutral axis and the maximum bending stresses in the beam. 14 Marks

(OR)

10 14 Marks

A solid circular shaft is subjected to a bending moment of 70 kN/m and a torque of 30 kN/m. Design the diameter of the shaft according to:

i) The Maximum Principal Stress Theory
ii) The Maximum Shear Stress Theory and
iii) The Maximum Distortion Energy Theory.

Take Poisson's ratio = 0.29, the stress at elastic limit of the material is 255 MPa and the factor of safety=2.75.

II B.Tech II Semester (SVEC14) Supplementary Examinations March – 2021

FLUID MECHANICS - II
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	A flat plate 2m x 2m is immersed in water flowing with a velocity of 5m/s. Find the forces of drag and lift as 0.05 and 0.2 respectively	7 Marks
	b)	What is Von Karman momentum integral equation and where can it be applied.	7 Marks
		(OR)	
2		Give the characteristics of boundary layer along a thin flat plate.	14 Marks

UNIT-II

3	a)	Derive dynamic equation for gradually varied flow.	7 Marks
	b)	When does a hydraulic jump occurs? Also give its applications.	7 Marks
		(OR)	
4		A trapezoidal channel with side slopes of 1 to 1 has to be designed to convey $12m^3/s$ at a velocity of 2.5m/s, so that the amount of concrete lining for the bed and sides is the minimum. Calculate the area of lining required for one metre length of canal.	14 Marks

UNIT-III

5		Obtain an expression for the force exerted by jet of water on a stationary curved plate in the direction of the jet when the jet strikes the curved plate at the centre and a jet of water of diameter 10cm strikes a flat plate normally with a velocity of 15m/s. The plate is moving with a velocity of 6m/s in the direction of the jet and away from the jet. Find: i) the force exerted by the jet on the plate. ii) work done by the jet on the plate per second.	14 Marks
		(OR)	
6		A jet of water having velocity of 20m/s strikes a curved vane, which is moving with a velocity of 10m/s. The jet makes an angle of 20^0 with the direction of motion of vane at inlet and leaves at an angle of 130^0 to the direction of motion of vane at outlet. Calculate: i) Vane angles, so that the water enters and leaves the vane without shock. ii) Work done per second per unit weight of water striking (or work done per unit weight of water striking) the vane per second.	14 Marks

UNIT-IV

7	a)	Under what headings the turbines can be classified.	7 Marks
	b)	A pelton wheel has to be designed for the following data: Power to be developed = 6000kW; Net head available = 300m; Speed = 550 r.p.m.; Ratio of jet diameter to wheel diameter = 1/10; overall efficiency = 85%. Find the number of jets, diameter of the jet, diameter of the wheel and the quantity of water required.	7 Marks
		(OR)	
8		Give the classification of hydro power plants.	14 Marks

UNIT-V

9	a)	Water is to be pumped out of a deep well under a total head of 95m. A number of identical pumps of design speed 1000 r.p.m. and specific speed 900 r.p.m. with a rated capacity of 150 litres/second are available. How many pumps will be needed and how should they be connected?	7 Marks
	b)	When do you go for multi stage pumps?	7 Marks

(OR)

10		Explain different components of hydropower plant and write the procedure to calculate discharge using mass curve with a neat sketch.	14 Marks

TRANSFORMERS AND INDUCTION MACHINES
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive the EMF equation of a single phase transformer and explain the no-load condition of a single phase transformer with phasor diagram.	7 Marks
	b)	Define Voltage regulation of a transformer. Derive the approximate voltage drop equation for lagging loads.	7 Marks

(OR)

2	a)	Draw and explain the phasor diagram of a transformer for inductive and capacitive loads.	7 Marks
	b)	The efficiency of 1000KVA, 11KV/220V, 50Hz, 1-φ transformer is 98.5% at half full load at 0.8 p.f leading and 98.8% at full load UPF. Determine: i) Iron losses. ii) Full load copper losses. iii) Find maximum efficiency KVA at UPF.	7 Marks

UNIT-II

3	a)	Explain how Sumpner's test is conducted on a pair of transformers with a neat diagram.	7 Marks
	b)	Two single phase transformers with equal turns have impedance of (0.5+j3)Ω and (0.6+j10)Ω with respect to the secondary. If they operate in parallel, determine how they will share total load of 100KW at 0.8 power factor lagging.	7 Marks

(OR)

4	a)	Explain how OC and SC tests are conducted on a single phase transformer with neat diagram.	7 Marks
	b)	Explain the operating principle of auto transformer and derive an expression for the saving in copper when compared to an ordinary transformer.	7 Marks

UNIT-III

5	a)	Explain the Scott connection with neat diagrams.	7 Marks
	b)	Describe four possible ways of connections of 3-phase transformers with relevant relations amongst voltages and currents on both HV and LV sides.	7 Marks

(OR)

6	a)	A 3-phase transformer has 400 turns on the primary and 40 turns on the secondary. The supply voltage is 3300V. Find the secondary voltage on no load when the windings are connected in (i) star-delta (ii) delta-star.	8 Marks
	b)	Explain the desirable conditions for the parallel operation of 3-phase transformers.	6 Marks

UNIT-IV

7	a)	Show that a 3-phase winding when excited by a three phase supply establishes a rotating magnetic field.	7 Marks
	b)	The full load power input to a 3-phase induction motor is 50Kw and the slip is 3%. Neglecting stator losses, calculate the full load cu losses and total mechanical power developed.	7 Marks

(OR)

8	a)	Draw the speed (vs.) torque curves of slip ring induction motor whose rotor resistance is externally changed such that $R_3 > R_2 > R_1$.	6 Marks
	b)	A 3-phase 4kW, 400V, 50Hz, 4 Pole induction motor runs at 1440 RPM at rated load condition. Compute its efficiency at rated load condition, where the rotational losses are 400 W and stator copper loss is equal to rotor copper loss.	8 Marks

UNIT-V

9		What is circle diagram? Explain the step by step procedure of drawing the circle diagram from the test data of a 3-phase induction motor and how to calculate its performance under different load conditions.	14 Marks

(OR)

10	a)	Explain auto transformer starting method of 3-phase induction motor.	7 Marks
	b)	The power input to a 3-phase induction motor is 60 KW. The stator losses are 1 KW. Find the mechanical power developed and the rotor copper loss per phase if the motor is running with a slip of 3%.	7 Marks

ANALOG COMMUNICATIONS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe the detection of AM waves using square-law detector and envelope detector with neat diagrams.	7 Marks
	b)	Explain the generation and detection of DSB-SC Signals.	7 Marks
		(OR)	
2	a)	Describe the generation of AM signals with Square Law modulator.	8 Marks
	b)	A 1000 KHz carrier is simultaneously AM modulated with 300Hz, 800Hz and 2 KHz audio sine waves. What will be frequencies present in the output?	6 Marks

UNIT-II

3	a)	Derive the time domain band-pass representation of SSB signal.	7 Marks
	b)	Discuss the application of VSB modulation scheme to transmit TV signal.	7 Marks
		(OR)	
4	a)	Derive the time-domain and frequency domain representation of an SSB signal.	7 Marks
	b)	Explain the generation of SSB signals using frequency discrimination method.	7 Marks

UNIT-III

5	a)	Explain the notion of instantaneous frequency. Derive the instantaneous frequency of phase modulated and frequency modulated signals.	7 Marks
	b)	Derive the bandwidth and power of a NBFM and WBFM signal.	7 Marks
		(OR)	
6	a)	Derive the mathematical model of a PLL and explain its use in demodulating FM waveforms with a neat diagram.	7 Marks
	b)	Distinguish between angle modulation and amplitude modulation systems.	7 Marks

UNIT-IV

7	a)	With the aid of the block diagram, explain the function of super heterodyne receiver.	8 Marks
	b)	Discuss the advantages and disadvantages of TRF receiver.	6 Marks
		(OR)	
8		Demonstrate the scheme to study the noise performance of FM systems.	14 Marks

UNIT-V

9	a)	Draw the wave forms of PAM, PPM and PWM signals for sinusoidal modulating signal.	7 Marks
	b)	Compare merits and demerits of TDM and FDM multiplexing schemes.	7 Marks
		(OR)	
10	a)	Describe generation and detection of PAM signals with neat schematics.	8 Marks
	b)	Discuss various applications of pulse modulation schemes.	6 Marks

ELECTRONIC CIRCUIT ANALYSIS AND DESIGN

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain with suitable circuit diagram, the operation of transformer coupled transistorized amplifier.	8 Marks
	b)	Explain the essential difference between the RC coupled and direct coupled amplifier.	6 Marks
		(OR)	
2	a)	Give the equation of overall upper and lower cut off frequencies of multistage amplifiers.	10 Marks
	b)	Why capacitive coupling is used to connect a signal source to an amplifier?	4 Marks

UNIT-II

3		In a single stage RC coupled CE amplifier, explain the effect of bypass and coupling capacitor on frequency response with necessary analysis.	14 Marks
		(OR)	
4	a)	Sketch the circuit of a CS amplifier. Derive the expression for A_V at low frequencies. What is the maximum value of A_V?	7 Marks
	b)	Analyze the performance of common drain FET Amplifier at high frequencies.	7 Marks

UNIT-III

5	a)	What is meant by feedback? What are the effects of negative feedback?	7 Marks
	b)	In an RC phase shift oscillator if $R_1 = R_2 = R_3 = 80$ KΩ and $C_1 = C_2 = C_3 = 10$PF. The value of $R_C = 2$ KΩ. Find the frequency of oscillation.	7 Marks
		(OR)	
6	a)	Derive an expression for frequency of oscillation for RC phase shift oscillator.	9 Marks
	b)	Write a short note on crystal oscillator.	5 Marks

UNIT-IV

7	a)	Draw the circuit for a push-pull amplifier and discuss its working.	7 Marks
	b)	Derive an expression for the efficiency of class B - power amplifiers.	7 Marks
		(OR)	
8	a)	Draw the circuit for commonly used class A - amplifier. If the amplifier draws 10W of dc power, what is the maximum ac power available to the load?	7 Marks
	b)	What is the basis for the classification of power amplifiers? Mention different types of power amplifiers?	7 Marks

UNIT-V

9	a)	What is a tuned voltage amplifier? Explain it briefly.	6 Marks
	b)	A parallel resonant circuit has a band width of 15 KHz and Q-factor of 120. What is the resonant frequency of the circuit?	8 Marks
		(OR)	
10	a)	Explain the working of a double-tuned amplifier.	7 Marks
	b)	Explain in brief, the function of the tank circuit in a tuned-voltage amplifier.	7 Marks

ELECTROMAGNETIC THEORY AND TRANSMISSION LINES

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	State and explain Coulomb's law.	7 Marks
	b)	Derive the boundary conditions for the tangential and normal components of electric fields at the boundary between two perfect dielectrics.	7 Marks
		(OR)	
2	a)	Find out capacitance for the coaxial cable.	7 Marks
	b)	Explain about continuity equation.	7 Marks

UNIT-II

3	a)	Explain Ampere's circuital law and its application with one example.	7 Marks
	b)	Illustrate two Maxwell's equations in magneto statics.	7 Marks
		(OR)	
4	a)	Derive the expression for the energy density in a Magnetic field.	7 Marks
	b)	If the magnetic field, $\vec{H} = 100\sin\theta\ \vec{a_\vartheta}\ A/m$ in spherical coordinates, determine $\vec{J}$ at (10, π/2, 0).	7 Marks

UNIT-III

5	a)	What is the inconsistency in Ampere's Law? How it is rectified by Maxwell?	7 Marks
	b)	Explain how the concept of displacement current was introduced by Maxwell to account for the production of magnetic fields in the empty space.	7 Marks
		(OR)	
6	a)	Express Maxwell's equations in differential form and their corresponding word statements.	7 Marks
	b)	An electric field in a medium which is source free is given by $\vec{E} = 1.5\cos(10^8 t = \beta\ z)\vec{ax}\ V/m$. Obtain $\vec{B}, \vec{H}$ and $\vec{D}$. Assume $\in_r$=1, μ_r=1 and σ = 0.	7 Marks

UNIT-IV

7	a)	Derive wave equations in free space.	7 Marks
	b)	Derive the relation between $\vec{E}$ and $\vec{H}$ in uniform plane wave.	7 Marks
		(OR)	
8	a)	Differentiate Conductors and Dielectrics. Obtain the wave propagation characteristics in good dielectrics.	7 Marks
	b)	Prove $\vec{P} = \vec{E} \times \vec{H}$.	7 Marks

UNIT-V

9	a)	Explain how transmission lines can be used as circuit elements.	7 Marks
	b)	Discuss about single stub matching.	7 Marks
		(OR)	
10	a)	Derive the expression for the characteristic impedance of a Lossless line.	7 Marks
	b)	Write short notes on reflection coefficient, standing wave ratio and transmission coefficient.	7 Marks

SIGNALS AND SYSTEMS

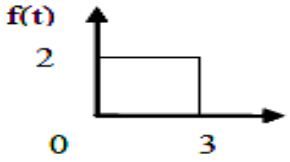
[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) Sketch the even and odd parts of the signal shown below. 8 Marks



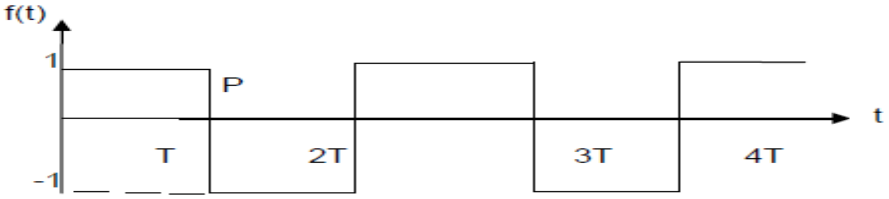
b) Find convolution of sequences x[n] = 2^n and h[n] = u[n]. 6 Marks

(OR)

2 Classify the Systems and explain them with examples. 14 Marks

UNIT-II

3 a) Find out the exponential Fourier series and plot the magnitude and phase spectrum for the rectangular pulse train shown below. 9 Marks



b) What is exponential Fourier spectrum? Explain with necessary equations. 5 Marks

(OR)

4 a) Find Fourier Transform of the function $x(t) = e^{-3t}[u(t+2) - u(t-3)]$. 5 Marks

b) Prove frequency and time shifting properties of Fourier Transform. 9 Marks

UNIT-III

5 a) Find the auto-correlation function and the energy spectral density of the signal $x(t) = e^{-t}u(t)$. 7 Marks

b) Derive the relation between auto-correlation and power spectral density. 7 Marks

(OR)

6 a) Explain briefly reconstruction of signal from its samples. 8 Marks

b) Derive the relation between correlation and power spectral density. 6 Marks

UNIT-IV

7 a) State and prove the final value theorem of Laplace transform. 7 Marks

b) Find the inverse Laplace Transform of 7 Marks

$$X(s) = \frac{-3}{(s+1)(s-1)}; \quad \text{ROC: } -2 < \sigma < 1.$$

(OR)

8 a) A certain function $f(t)$ is known to have a transform $F(s) = \frac{6s^2 + 8s - 5}{s(2s^2 + 6s + 5)}$. Find $f(0+)$ and $f(\infty)$. 7 Marks

b) Find the inverse Laplace Transform of $X(s) = \frac{s^2e^{-2s} + 2e^{-3s}}{s^2 + 4s + 3}$. 7 Marks

UNIT-V

9 a) Find the Z-transform of the sequence x(n)= $(1/4)^n$ cos (π n/3) u(n) and sketch the ROC. 7 Marks

b) Evaluate inverse Z-transform of X(Z)= [Z(Z-1)] / [$(Z+1)^3$(Z+2)]; ROC;|Z|>2. 7 Marks

(OR)

10 a) State and prove the final value theorem of Z-transform. 7 Marks

b) Determine the Z-transform and its ROC for the signal: $x(n) = (1/5)^n u(-n)$. 7 Marks

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Perform the subtraction of decimal 9137-2345 using 9's complement method? Express the result in 8421, 2421 and excess-3 codes.	7 Marks
	b)	Briefly explain the Non-Weighted code binary number system.	7 Marks
		(OR)	
2	a)	Explain basic laws of Boolean algebra with examples.	7 Marks
	b)	Simplify the expression Z= AB'C' + AB'C + ABC using Boolean laws.	7 Marks

UNIT-II

3		Obtain the minimal SOP and POS of the following functions using K- Maps: i) $F_1(A, B, C, D) = \sum_m(1, 3, 7, 11, 15) + \sum_d(0, 2, 5)$ ii) $F_2(A, B, C, D) = \Pi_m(4, 5, 6, 7, 8, 12) + \Pi_d(1, 2, 3, 9, 11, 14)$	14 Marks
		(OR)	
4		Simplify the following Boolean function using Quine Mc'Clusky method: $F(A, B, C, D) = \sum_m(0, 1, 6, 7, 8, 9, 13, 14, 15)$.	14 Marks

UNIT-III

5	a)	Design a BCD to excess-3 code converter.	8 Marks
	b)	Explain the operation of 4-bit carry look ahead adder.	6 Marks
		(OR)	
6	a)	Design and implement a 4-bit BCD to decimal decoder.	8 Marks
	b)	Use a multiplexer having three data select inputs to implement the logic function: $F = \sum_m(0, 1, 2, 3, 4, 10, 11, 14, 15)$	6 Marks

UNIT-IV

7	a)	Explain the operation of parallel shift register with parallel load using neat logic diagram.	7 Marks
	b)	Explain Universal counter with neat diagram.	7 Marks
		(OR)	
8	a)	Compare combinational and sequential circuits	4 Marks
	b)	What is race around condition? How it is eliminated using master-slave JK flip-flop?	10 Marks

UNIT-V

9	a)	Describe the design procedure for asynchronous sequential circuits.	6 Marks
	b)	Find a circuit that has no static hazards and the Boolean function: $F(A, B, C, D) = \sum_m(1, 3, 5, 7, 8, 9, 14, 15)$	8 Marks
		(OR)	
10	a)	Explain the operation of debounce circuit with neat circuit diagram.	7 Marks
	b)	Find a circuit that has no static hazards and implements the Boolean function $F(A, B, C, D) = \sum(0, 2, 6, 7, 8, 10, 12)$	7 Marks

ANALOG ELECTRONIC CIRCUITS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw the circuit diagram and frequency response of an RC coupled amplifier. Further explain the role of coupling and bypass capacitors.	7 Marks
	b)	Draw the circuit diagram and equivalent high frequency model of emitter follower.	7 Marks
		(OR)	
2	a)	Derive the current gain of a CE amplifier with resistive load at high frequencies.	7 Marks
	b)	Derive the gain and input impedance of a CE amplifier with emitter resistance.	7 Marks

UNIT-II

3	a)	Describe the general characteristics of negative feedback amplifiers.	7 Marks
	b)	Explain the Barkhausein criteria for sustained oscillations.	7 Marks
		(OR)	
4	a)	Derive the effect of negative feedback on the output impedance in different feedback topologies.	7 Marks
	b)	Draw the circuit diagram of Colpitts oscillator and derive the expression for the frequency of oscillations.	7 Marks

UNIT-III

5	a)	Derive the conversion efficiency of a Class-B amplifier.	7 Marks
	b)	Compute the effective load resistance R_L seen looking into the primary of 8**:**1 transformer connected to the output load of 20Ω.	7 Marks
		(OR)	
6	a)	Distinguish between Class-A, Class-B and Class-AB amplifiers with neat diagrams.	7 Marks
	b)	Describe the second harmonic distortion in power amplifiers.	7 Marks

UNIT-IV

7	a)	Explain how clipping at two independent levels can be achieved.	8 Marks
	b)	Explain positive peak voltage limiters below reference level.	6 Marks
		(OR)	
8	a)	Draw the circuit diagram of a DC restorer (clamping circuits) and explain its operation with neat diagrams.	7 Marks
	b)	Explain the operation of transistor as a switch with neat diagrams and waveforms.	7 Marks

UNIT-V

9		Draw the circuit diagram for Schmitt trigger and explain its operation. Give the applications of the above circuit. Derive the expressions for UTP and LTP.	14 Marks
		(OR)	
10	a)	Explain how a Schmitt trigger can be used as a comparator and as a squaring circuit.	8 Marks
	b)	Summarize your understanding on hysteresis and explain how hysteresis can be eliminated in a Schmitt trigger.	6 Marks

DATABASE MANAGEMENT SYSTEMS

[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe the characteristics of database system.	8 Marks
	b)	Explain in detail about the three-schema architecture of DBMS.	6 Marks
		(OR)	
2	a)	Explain about various constraints used in ER-model.	6 Marks
	b)	Discuss in detail about various attributes used in E-R model with suitable examples.	8 Marks

UNIT-II

3		Explain in detail about various key constraints used in database system.	14 Marks
		(OR)	
4	a)	Explain different relational algebraic operations with example.	8 Marks
	b)	Write short notes on: i) DDL. ii) DML. iii) Database Schema.	6 Marks

UNIT-III

5	a)	What is meant by SQL? Explain about nested queries and NULL values in SQL.	7 Marks
	b)	Discuss about complex integrity constraints in SQL.	7 Marks
		(OR)	
6		Explain in detail about all functional dependencies based normal forms with suitable examples.	14 Marks

UNIT-IV

7	a)	List the ACID properties. Explain usefulness of each.	7 Marks
	b)	Discuss about multiple granularity.	7 Marks
		(OR)	
8	a)	Describe the concepts serializability and recoverability.	7 Marks
	b)	What is the time stamp based protocols? Explain any one of them.	7 Marks

UNIT-V

9	a)	Describe difference methods of defining indexes on multiple keys.	8 Marks
	b)	Explain in detail about external hashing techniques.	6 Marks
		(OR)	
10	a)	By considering example, show how to reduce access time with primary index.	7 Marks
	b)	Explain about B tree with suitable examples.	7 Marks

OBJECT ORIENTED PROGRAMMING
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What are the different data types and their ranges in Java?	7 Marks
	b)	Write a Java program to find the biggest number present in the given array of *n* numbers.	7 Marks
		(OR)	
2	a)	Explain the OOP paradigm.	7 Marks
	b)	Write a Java program to accept five command line arguments and perform sorting in increasing order and display them.	7 Marks

UNIT-II

3	a)	List the similarities and differences of classes and interfaces.	7 Marks
	b)	Write a java program using inheritance that gets the properties of a person and extends to faculty and student and display the details accordingly.	7 Marks
		(OR)	
4	a)	Why subclass reference variables cannot refer to a super class object? Comment.	7 Marks
	b)	Design a interface queue with the following methods. i) enqueue and dequeue ii) qfull and qempty.	7 Marks

UNIT-III

5	a)	Explain the process of creating threads with suitable examples.	7 Marks
	b)	Write short note on synchronization of threads.	7 Marks
		(OR)	
6	a)	Define package. Create a simple package and describe its usage.	7 Marks
	b)	Explain logging in java with all its levels.	7 Marks

UNIT-IV

7	a)	Explain the life cycle of an Applet.	7 Marks
	b)	Design an Applet to display the status of a checkbox on click of a button.	7 Marks
		(OR)	
8	a)	Explain about Scroll pane and dialogs List Panel AWTs with the help of suitable Java program.	7 Marks
	b)	Write short note on Lay out Mangers.	7 Marks

UNIT-V

9	a)	Explain the steps and Java methods involved in establishing database connectivity.	7 Marks
	b)	Write a servlet program to demonstrate parameter passing from HTML script using post method.	7 Marks
		(OR)	
10	a)	Explain about different types of JDBC drivers.	7 Marks
	b)	Explain the process of creation and compiling of Servlet Source Code.	7 Marks

CONTROL SYSTEMS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

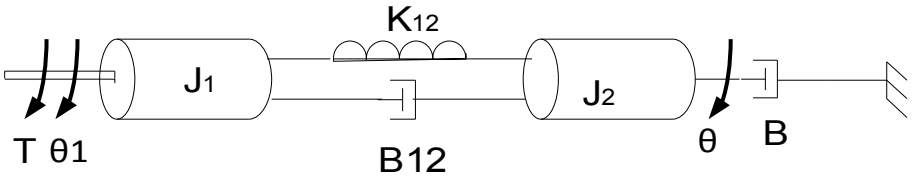
Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) What are the effects of feedback on sensitivity and external noise? 7 Marks

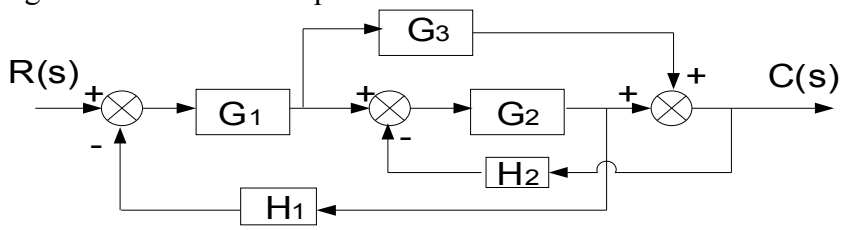
b) For the mechanical system, draw the electrical analogous circuits based on Torque-Voltage and Torque-Current analogy along their equations. 7 Marks



(OR)

2 a) Develop the block diagram for armature controlled DC motor. 7 Marks

b) Determine the overall transfer function for the system shown in the figure using block diagram reduction technique. 7 Marks



UNIT-II

3 a) Draw the second order system step response and indicate all time domain specifications. 6 Marks

b) A unity feedback system is characterized by the open loop transfer function G(s)=1000(s+1)/(s+10)(s+50). Determine the steady state error for unit-step, unit-ramp and unit acceleration inputs. Also determine the damping ratio and natural frequency of dominant roots. 8 Marks

(OR)

4 a) Discus the effect of P, PI, PD on control system characteristics. 6 Marks

b) Find the steady state error as a function of time for the feedback system G(s) = 100/s(1+0.1s), H(s) = 5/(s+4) for the input r(t) = 1+2t+(t^2/2). 8 Marks

UNIT-III

5 a) Determine the stability of the control system with characteristics equation $s^3 + 2s^4 + 2s^3 + 4s^2 + s + 2 = 0$ using Routh Hurwitz Criterion. 7 Marks

b) Determine the range of values of K such that the characteristic equation $s^3 + 3(K + 1)\, s^2 + (7K + 5)\, s + (4K + 7) = 0$ has roots more negative than $s = -1$. 7 Marks

(OR)

6 Sketch the root locus diagram for the following open loop transfer function: $\frac{K}{S(S+4)(S^2+4S+20)}$. 14 Marks

UNIT-IV

7 Sketch the bode plots showing the magnitude in dB and phase angle in degrees of G(s)=10/s(1+0.5s)(1+0.02s). Determine the gain cross over frequency, phase cross over frequency and margins. 14 Marks

(OR)

8 a) State and explain Nyquist stability criterion to determine the stability of a system. 7 Marks

b) What are compensating network? Explain about lead, lag networks. 7 Marks

UNIT-V

9 a) Define the terms State variable and State transition matrix. 6 Marks

b) Obtain the state space representation in Phase variable and Jordan form for the system whose transfer function is given by T(s) = (s+1)/s(s+4)(s+5). 8 Marks

(OR)

10 a) Find the Eigen value and Eigen vectors of the system represented with state space matrix A. Also derive diagonal matrix for the system. $A = \begin{bmatrix} 1 & 0 & 2 \\ 0 & 2 & 1 \\ 0 & 0 & 3 \end{bmatrix}$ 7 Marks

b) What are the advantages of state variable analysis? Also write the properties of state transition matrix. 7 Marks

ENVIRONMENTAL STUDIES

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Explain the need for public awareness about the environment and its degradation.	CO1	7 Marks
	b)	What do you mean by forest resource? Explain the direct and indirect benefits of forests.	CO2	7 Marks
		(OR)		
2	a)	Analysis the environmental effects of extracting and using mineral resources.	CO2	7 Marks
	b)	Discuss the reasons for land degradation and suggest the steps to control it.	CO3	7 Marks
		UNIT-II		
3	a)	What is ecological pyramid? Explain various types of ecological pyramids.	CO2	7 Marks
	b)	What is meant by bio-diversity and explain the three major components of bio-diversity?	CO1	7 Marks
		(OR)		
4	a)	Analyze the flow of energy through various components of the eco system.	CO2	7 Marks
	b)	Analyze the types and characteristics features of a forest ecosystem.	CO2	7 Marks
		UNIT-III		
5		Define solid waste management. Give classification of solid waste and discuss the health effects of solid waste pollution.	CO1	14 Marks
		(OR)		
6		What is meant my thermal pollution? Describe the control measures can be taken for controlling thermal pollution.	CO3	14 Marks
		UNIT-IV		
7		What do you meant by sustainable development? What are the major solutions to attain sustainability?	CO7	14 Marks
		(OR)		
8	a)	How the problems can be solved related to Nuclear accidents.	CO4	4 Marks
	b)	What are the provisions for the constitution of central and state boards under the water Act?	CO8	10 Marks
		UNIT-V		
9	a)	Discuss the reasons of high population growth in India.	CO2	4 Marks
	b)	What actions and strategies can be taken to prevent rapid growth of population? Explain.	CO1	10 Marks
		(OR)		
10		Write a report based on the visit in an industrial area.	CO9	14 Marks

ELECTRONIC CIRCUIT ANALYSIS AND DESIGN
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw the h-parameter equivalent circuit of CE amplifier and derive the expressions for A_v, A_i, R_i, R_o.	CO2	7 Marks
	b)	Explain the operation of Bootstrapped Darlington Circuit with neat diagram.	CO1	7 Marks
		(OR)		
2	a)	Draw the h-parameter equivalent circuit of CC amplifier and derive the expressions for A_v, A_i, R_i, R_o.	CO2	8 Marks
	b)	Explain the operation of two stage Transformer coupled amplifier with neat diagram.	CO1	6 Marks

UNIT-II

3	a)	Explain the effect of coupling and bypass capacitors at high frequencies.	CO6	6 Marks
	b)	Derive the expressions for voltage gain and input admittance for common source amplifier at high frequencies.	CO2	8 Marks
		(OR)		
4	a)	Short circuit CE current gain of a transistor is 25 at a frequency of 2MHZ. If f_β = 200KHZ, calculate (i) f_T (ii) h_{fe} (iii) Find the $\|A_I\|$ at frequency of 10MHZ and 100 MHZ.	CO4	6 Marks
	b)	Derive the expressions for voltage gain, output resistance of common drain amplifier at high frequencies.	CO2	8 Marks

UNIT-III

5	a)	Write the advantages of negative feedback in amplifiers. Why negative feedback is not used in oscillators.	CO5	8 Marks
	b)	In a transistorized Hartley oscillator, two conductances are 2mH and 20μH, while the frequency is to be changed from 950KHZ to 2050KHZ. Calculate the range over which the capacitor is to be varied.	CO3	6 Marks
		(OR)		
6	a)	Draw the wein bridge oscillator and explain its operation and derive an expression for frequency of oscillations.	CO1	8 Marks
	b)	Calculate the gain, input resistance, output resistance of voltage series feedback amplifier having A=300, R_i=1.5KΩ, R_o=50KΩ and β=1/20.	CO4	6 Marks

UNIT-IV

7	a)	Explain the advantages of push-pull amplifiers. Derive an expression for the efficiency of a class-B push pull amplifier.	CO3	7 Marks
	b)	Explain the operation of class-B push pull amplifier with a neat diagram and derive the expression for efficiency.	CO1	7 Marks
		(OR)		

8	a)	Explain the classifications of power amplifiers based on the period of conduction.	CO1	4 Marks
	b)	A single stage class–A amplifier has V_{CC} = 20 volts, V_{CEQ} = 10 volts, I_{CQ} = 600mA and collector load resistor R_L =16Ω. The AC output current varies by ± 300mA with AC input signal. Determine: i) The power supplied by the source to the amplifier circuit. ii) DC power consumed by the load resistor. iii) AC power developed across the load resistor. iv) DC power delivered to the transistor. v) DC power wasted in transistor collector. vi) Overall efficiency. vii) Collector efficiency.	CO4	10 Marks

UNIT-V

9	a)	Explain the working of single tuned amplifier with a neat diagram. Draw the frequency response of single tuned amplifier.	CO1	8 Marks
	b)	With a neat circuit diagram, explain the operation of class-C tuned amplifier.	CO1	6 Marks

(OR)

10	a)	With a neat diagram, explain working of stagger tuned amplifier with its frequency response.	CO1	8 Marks
	b)	A single tuned RF amplifier uses a transistor with an output resistance of 50KΩ, output capacitance of 15PF and input resistance of next stage is 20kΩ. The tuned circuit consists of 47PF capacitance in parallel with series combinations of 1μH inductance and 2Ω resistance. Calculate: i) Resonant frequency. ii) Effective quality factor. iii) Bandwidth of the circuit.	CO4	6 Marks

SIGNALS AND SYSTEMS
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks.

UNIT-I

1	a)	Write the properties of Dirac-delta function.	CO1	6 Marks
	b)	Show that if the two signals $f_1(t)$ and $f_2(t)$ Are orthogonal over an interval t_1 and t_2, then energy of signal $[f_1(t) + f_2(t)]$ is equal to the sum of energies of $f_1(t)$ and $f_2(t)$.	CO2	8 Marks
		(OR)		
2	a)	What are the three elementary operations in block diagram representation of continous time system?	CO2	6 Marks
	b)	Determine whether the system is linear, time invariant, causal and memory less. $y(t) = \frac{1}{2}\int_{-\infty}^{t} x(z)dz$	CO2	8 Marks

UNIT-II

3	a)	Find the exponential fourier series of the waveform and also draw the frequency spectrum. $x(t)$= A for $0 \le t \le \pi$ -A for $\pi \le t \le 2\pi$	CO4	8 Marks
	b)	Represent the function e^t over the interval $0 \le t \le 1$ by using trigonometric fourier series.	CO1	6 Marks
		(OR)		
4	a)	Define fourier transform and state any four properties.	CO1	6 Marks
	b)	Find the fourier transform of signum function and unit step function.	CO4	8 Marks

UNIT-III

5	a)	If x(t) = Sin ω_0t, find (i) $R(\tau)$; (ii) *ESD*.	CO1	7 Marks
	b)	Verify Parseval's theorem for the energy signal $x(t) = e^{-4t}\,u(t)$.	CO4	7 Marks
		(OR)		
6	a)	Convolve the following signals $x[n] = u[n] - u[n-3]$ $h[n] = (0.5)^n\,u[n]$	CO1	7 Marks
	b)	Find the output voltage of the RC lowpass filter shown in figure for an input voltage of $t.e^{-t/RC}$.	CO5	7 Marks

UNIT-IV

7	a)	Obtain the relationship between laplace and fourier transforms.	CO1	7 Marks
	b)	Find the laplace transform and region of convergence for the following signals. i) $x(t) = e^{-5t}\,u(t-1)$ ii) $x(t) = e^t \sin 2t$.	CO4	7 Marks
		(OR)		
8	a)	Find the step response of the series R-L-C Circuit.	CO5	8 Marks
	b)	Discuss partial fraction method of finding inverse laplace transform.	CO1	6 Marks

UNIT-V

9	a)	State and prove sampling theorem for band pass signals.	CO1	7 Marks
	b)	Discuss the process of reconstructing the analog signal from its samples.	CO2	7 Marks
		(OR)		
10	a)	State and prove time shifting and time reversal property of Z-transform.	CO1	8 Marks
	b)	Find the Z – transform of $\boldsymbol{x[n] = a^n\, u[n] - b^n\, u[-n-1]}$ and specify its ROC.	CO4	6 Marks

SWITCHING THEORY AND LOGIC DESIGN

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Perform the following operations by using 2's complement method i).63-35. ii) -82-44. iii) 55+(-18).	CO1	6 Marks
	b)	Carry out the following conversions. Decimal 328.95 to binary, octal and Hexadecimal.	CO1	6 Marks
	c)	Determine the value of base if, $(225)_X = (175)_8$.	CO1	2 Marks
		(OR)		
2	a)	Simplify the given Boolean functions using basic Boolean theorems. i) $F = \overline{X} + XY + X\overline{Z} + \overline{YZ}$ ii) $F = (X\overline{Y} + \overline{W}Z)(W\overline{X} + Y\overline{Z})$ iii) $F = Y\overline{Z}(\overline{XY} + Y\overline{Z})$	CO5	6 Marks
	b)	Obtain the dual and compliment of the following functions. i) $F = (A\overline{B} + C)\overline{D} + E$ ii) $F = (\overline{X + Y + Z}) + XYZ.$	CO5	4 Marks
	c)	Construct Hamming code for BCD 0110 and BCD 0111. Use even parity.	CO4	4 Marks

UNIT-II

3	a)	For the function given below. f =WXY+X$\overline{Y}$Z+WX$\overline{Y}$ i) Express 'f' in standard SOP form. ii) Simplify using K-map. iii) Realize 'f' using NAND gates only.	CO1	7 Marks
	b)	For the function given below, obtain the simplified expression in product of sum form using k-maps i) F(A, B, C, D) = ΣM (0, 2, 4, 6, 8, 9, 10, 11, 12, 14). ii) F(A, B, C) = $\overline{AC} + \overline{BC} + ABC$.	CO1	7 Marks
		(OR)		
4	a)	Simplify the Boolean expression F=$\Sigma_{w,x,y,z}$ 1,3,7,11,15 + d(0,2,5) using K-map and indicate the prime implicants.	CO1	7 Marks
	b)	Obtain the minimal expression for f=Σm(1,2,3,5,6,7,8,9,12,13,15) using tabulation method.	CO1	7 Marks

UNIT-III

5	a)	Design a full-subtractor using 3:8 decoders.	CO2	4 Marks
	b)	Implement the following function using 4:1 MUX $f(A, B, C, D)$ = Σm(2, 4, 5, 7, 10, 14)	CO5	5 Marks
	c)	Design an 16:1 multiplexer using NOR gates only.	CO2	5 Marks
		(OR)		
6	a)	Design a BCD to excess-3 code converter circuit.	CO4	7 Marks
	b)	Implement full subtractor using two half subtractors and justify the answer.	CO2	7 Marks

UNIT-IV

7	a)	Design and implement Mod-8 synchronous counter using T- flip-flops.	CO2	7 Marks
	b)	Draw the logical diagram of a 4-bit shift register. Explain how shift-left and shift-right operations are performed with relevant output waveforms.	CO6	7 Marks

(OR)

8	a)	With a suitable example, explain Moore and Mealy circuits.	CO3	4 Marks
	b)	Design a sequence generator to generate the sequence $0 \rightarrow 2 \rightarrow 3 \rightarrow 4 \rightarrow 1$ and avoid the lockout condition using J-K flip-flops.	CO4	10 Marks

UNIT-V

9	a)	Realize the following functions using PAL and draw the logic diagram using PAL $Y_1 (P, Q, R, S) = \Sigma m(3,5,6,7,8,11,13,14,15)$ $Y_3 (P, Q, R, S) = \Sigma m(0,1,5,6,8,9,11,13,14)$	CO2	7 Marks
	b)	Design and implement 4-bit Binary to Graycode convertor using a suitable PLA.	CO2	7 Marks

(OR)

10	a)	Explain the PAL with neat sketch.	CO2	4 Marks
	b)	Implement the following two Boolean functions with PLA $F_1 (A,B,C) = \Sigma_m (0,1,2,4,)$ $F_2 (A,B,C,) = \Sigma_m (0,5,6,7)$ $F_3 (A,B,C,) = \Sigma_m (1,3,5,6).$	CO2	10 Marks

CONCRETE TECHNOLOGY
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	Explain about the use, mechanism and influences on the properties fresh and hardened concrete of the following items. Also explain their influence on the durability of concrete. i) Tricalcium Aluminate. ii) Tricalcium Silicate. iii) Heat of Hydration. iv) Gel-Space Ratio.	CO1	14 Marks
	(OR)		
2	Explain in detail the influences of following aspects on the concretes: i) Interfacial Transition Zone. ii) Explain difference between angular aggregates and rounded aggregates. iii) Effect of maximum size of aggregate. iv) Explain the uses of Zone-1 and Zone-4 fine aggregates.	CO1	14 Marks

UNIT-II

3	Explain the following properties of fresh concretes: i) w/c ratio. ii) Bleeding. iii) Segregation. iv) Plastic Shrinkage.	CO2	14 Marks
	(OR)		
4	Explain the following properties of hardened concretes: i) Porosity and Permeability. ii) Interfacial Transition Zone (ITZ. iii) Honey combing. iv) Factors affecting the strength of the concrete.	CO2	14 Marks

UNIT-III

5	Explain in detail about the following NDT tests on concrete. i) Ultrasonic Pulse Velocity Test. ii) Rebound Hammer Test. iii) Core Drilling. iv) Cut and Pull Out Test (CAPO).	CO5	14 Marks
	(OR)		
6	Explain in detail the following item: i) Modulus of Elasticity of the concrete. ii) Dynamic Modulus of the concrete. iii) Poisson's Ratio. iv) Drying Shrinkage of the concrete.	CO1	14 Marks

UNIT-IV

7 Design a concrete mix using 30 percent fly ash as part replacement of cement (assume in case, if any data is not given): CO3 14 Marks

Requirements:

i) Characteristic Strength: 30MPa,
ii) Actual Standard Deviation: 4.5MPa,
iii) Type of Cement: OPC 53 Grade,
iv) Maximum Size of Aggregate: 20mm,
v) Minimum Cement Content: 320kg/m_3,
vi) Maximum w/c Ratio: 0.45,
vii) Workability: 100mm(Slump),
viii) Exposure Condition: Severe (forRCC),
ix) Minimum Grade Required for the Given Exposure Condition: M30
x) Method of Placing: Pumping,
xi) Degree of Supervision: Good,
xii) Type of Aggregate: Crushed Angular,
xiii) Maximum Cement Content(OPC): 450kg/m_3
xiv) Chemical Admixture Used: Super Plasticizer

Test data for materials:

i) Specific Gravity of Cement: 3.15,
ii) Specific Gravity of Fly Ash: 2.13,
iii) Specific Gravity of Coarse Aggregate: 2.74,
iv) Specific Gravity of Fine Aggregate: 2.64,
v) Water absorption of Coarse Aggregate: 0.4 percent,
vi) Water absorption of Fine Aggregate: 0.8 percent,
vii) Total moisture content in Coarse Aggregate: 2.8 percent,
viii) Total moisture content in Fine Aggregate: 4.6 percent,
ix) Fine Aggregate: Conforming to Grading Zone-1 of IS:383

Maximum Water Content per Cubic Meter of Concrete for Nominal Maximum Size of Aggregate and Volume of Coarse Aggregate per Unit Volume of Total Aggregate for Different Zones of Fine Aggregate

#	Nominal Max Size of Aggregate(mm)	Maximum Water Content (kg)	Volume of Coarse Aggregate per Unit Volume of Total Aggregate for			
			Zone-4	Zone-3	Zone-2	Zone-1
1.	10	208	0.50	0.48	0.46	0.44
2.	20	186	0.66	0.64	0.62	0.60
3.	40	165	075	0.73	0.71	0.69

(OR)

8	Design a concrete mix for non-air entrained concrete for the construction of pavements, using Rounded Aggregate and using ACI method. The data for the mix design is as given below: i) Required Cylindrical Strength: 40MPa, ii) Required Workability: 25mm (slump), iii) Maximum Size of Aggregate: 37.5mm iv) Water Reducing Admixture will be used. v) Durability Criteria: Structure is exposed to Sea Water vi) Dry Rodded Bulk Density of Concrete: 1650 kg/m^3 vii) Fineness Modulus of Fine Aggregate: 2.4 viii) Specific Gravity of Cement: 3.15, ix) Specific Gravity of Coarse Aggregate: 2.74, x) Specific Gravity of Fine Aggregate: 2.64, xi) Water absorption of Coarse Aggregate: 0.4 percent, xii) Water absorption of Fine Aggregate: 0.8 percent, xiii) Total moisture content in Coarse Aggregate: 2.8 percent, xiv) Total moisture content in Fine Aggregate: 4.6 percent,	CO3	14 Marks

UNIT-V

9	Write short notes on following items: i) Cellular Light Weight concreting, ii) High Strength concretes, iii) Self-Compacting concretes. iv) Light Weight Aggregate concretes,	CO1	14 Marks

(OR)

10	Write short notes on following items: i) Heavy Weight Aggregate concretes. ii) High Volume Fly Ash concretes. iii) Geo Polymer concretes. iv) Pervious concretes.	CO1	14 Marks

STRUCTURAL ANALYSIS - I

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

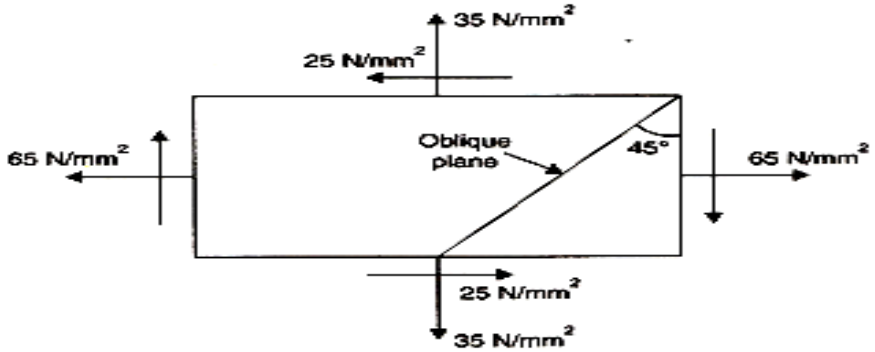
UNIT-I

1	a)	Direct tensile stresses of 120 MPa and 70 MPa act on a body on mutually perpendicular planes. What is the magnitude of shearing stress that can be applied so that the major principal stress at the point does not exceed 135 MPa? Determine the value of minor principal stress and the maximum shear stress.	CO1	7 Marks
	b)	The magnitude of normal stress on two mutually perpendicular planes, at a point in an elastic body are 60 MPa (compressive) and 80 MPa (tensile) respectively. Find the magnitudes of shearing stresses on these planes if the magnitude of one of the principal stresses is 100 MPa (tensile). Find also the magnitude of the other principal stress at this point.	CO1	7 Marks

(OR)

2	a)	A point in a strained material is subjected to the stresses as shown in figure. Locate the principal planes and evaluate the principal stresses.	CO2	6 Marks

	b)	A point in a strained material is subjected to stress shown in figure. Using Mohr's circle method, determine the normal and tangential stresses across the oblique plane. Check the answer analytically.	CO2	8 Marks

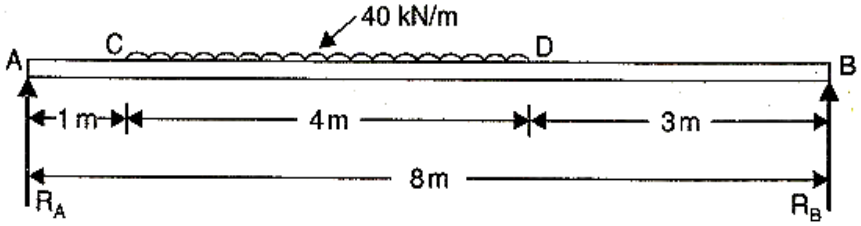


UNIT-II

3	a)	Derive the slope at supports and deflection at centre for a simply supported beam carrying uniformly distributed load of w per unit length over the entire span "L".	CO1	7 Marks
	b)	A cantilever of length L is loaded with uniformly varying load of intensity zero at the free end and w/unit length at the fixed end. Derive an expression for the deflection at any point. Find also the slope and deflection of the free end.	CO2	7 Marks

(OR)

4		A beam of length 8m is simply supported at is ends. It carries a uniformly distributed load of 40kN/m as shown in figure below. Determine: i) Deflection at D. ii) Maximum deflection. iii) Slope at end A. Take E = $2x10^5 N/mm^2$ and I = $4.3x10^8 mm^4$.	CO4	14 Marks



UNIT-III

5		What is the value of Euler's buckling load for an axially loaded pin-ended (hinged at both ends) strut of length 'l' and flexural rigidity 'EI'? What would be order of Euler's buckling load carrying capacity of a similar strut but fixed at both ends in terms of the load carrying capacity of the earlier one.	CO1	14 Marks

(OR)

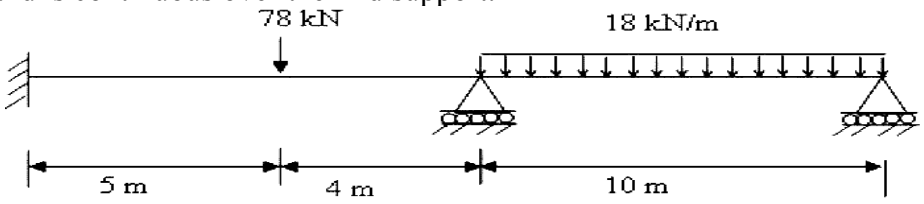
6		Euler's critical load for a column with both ends hinged is found as 40 kN. What would be the change in the critical load if both ends are fixed and one end fixed, and other end is hinged?	CO5	14 Marks

UNIT-IV

7		Analyze a propped cantilever beam AB of span "L" carrying a Uniformly Distributed Load (UDL) on entire span with magnitude of w. Draw the shear force and bending moment diagrams.	CO2	14 Marks

(OR)

8		Draw the bending moment and shear force diagrams of a beam shown in the Figure which is simply supported at one end and fixed at another end and is continuous over the mid support.	CO6	14 Marks



UNIT-V

9	a)	Explain in detail about maximum shear strain energy theory.	CO1	7 Marks
	b)	A bolt of 12mm diameter is subjected to an axial pull of 10kN and a shear force of 7.5 kN. Determine the factor of safety against failure based on maximum principal stress and maximum shear stress theories, if the yield strength of the material is 400 MPa, and Poisson's ratio is 0.3.	CO5	7 Marks

(OR)

10		A simply supported beam of a rectangular section 50mm wide and 70mm deep is subjected to an inclined load P at the mid span. The inclination of the load is 30^0 to the vertical. If the length of the simply supported beam is 4m and is maximum stress due to bending is not exceed $210MN/m^2$, Determine the value of P.	CO3	14 Marks

WATER SUPPLY ENGINEERING
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Give reasons for the following: i) The quality of water obtained from rivers is not reliable. ii) The underground waters are generally clear and free from impurities iii) The level of water table is variable iv) Some springs discharge hot water v) The shallow wells are not suitable for public water supply.	CO1	10 Marks
	b)	What are sources of temperature increase in water bodies? What are the impacts of elevated temperatures?	CO1	4 Marks
		(OR)		
2	a)	What are the most common constituents of alkalinity? What are their sources and impact?	CO7	7 Marks
	b)	Define Chemical Oxygen Demand (COD) and Total Organic Carbon (TOC). Discuss how these and other tests are used to quantify non-biodegradable organics in water.	CO7	7 Marks

UNIT-II

3	a)	Distinguish between the following: i) Graphical method and comparative method. ii) Present population and estimated population. iii) Continuous supply system and intermittent supply system.	CO3	6 Marks
	b)	What is the principle of centrifugal pump? Explain its component parts.	CO1	8 Marks
		(OR)		
4	a)	What is meant by the term population? What are the various methods which are adopted to estimate population of each successive future decade?	CO4	7 Marks
	b)	What do you mean by logistic curve? How can its equation be framed?	CO4	7 Marks

UNIT-III

5	a)	Compare the characteristics of Slow sand filter and Rapid sand filter in detail.	CO1	8 Marks
	b)	Explain clearly the difference between chlorination and chloramination.	CO1	6 Marks
		(OR)		
6	a)	Design a rapid sand filter unit for 4.5 MLD with all its principal components.	CO3	12 Marks
	b)	What is the action of coagulants when added to raw waters?	CO1	2 Marks

UNIT-IV

7	a)	How are refractory organics removed from water and waste water?	CO1	7 Marks
	b)	What are the factors influence against effective disinfection?	CO1	7 Marks
		(OR)		

8	a)	Describe the various lay-outs of distribution network in a water supply system and state their advantages and disadvantages.	CO6	7 Marks
	b)	How is the capacity of a distribution reservoir determined? Give an example	CO6	7 Marks

UNIT-V

9		Enumerate and describe various tests to detect the wastage of water.	CO5	14 Marks

(OR)

10		Explain the designing aspects of water supply piping in a building.	CO6	14 Marks

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

II B.Tech II Semester (SVEC-16) Supplementary Examinations August – 2021

ELECTRICAL MEASUREMENTS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain in detail the different types of errors in measuring instruments.	CO1	7 Marks
	b)	Describe the construction and working of a permanent magnetic moving coil instruments.	CO1	7 Marks
		(OR)		
2	a)	The resistance of a moving voltmeter is 11k Ω. The moving coil has 100 turns and is 40mm long and 30mm wide. The flux density in the air gap is 0.05 Wb/m^2. Determine the deflection produced by 220 volts if the spring control gives a defection of 1^0 for a torque of 20×10^{-7} N-m.	CO4	7 Marks
	b)	Explain the working of attraction type and repulsion type moving iron instruments with neat diagrams.	CO1	7 Marks

UNIT-II

3	a)	Explain the special features incorporated in an electrodynamometer type of wattmeter so that it can be used for low power factor applications.	CO3	7 Marks
	b)	The power input to a 3-phase induction motor is read by two watt meters. The readings are 920W and 300W. Calculate the power factor of the motor.	CO4	7 Marks
		(OR)		
4	a)	Explain the lag adjustment devices of single phase energy meter.	CO2	7 Marks
	b)	A 5A, 230V meter on full load unity power factor test makes 60 revolutions in 360 seconds. If the normal disc speed is 520 revolutions per kWh, find the percentage error.	CO4	7 Marks

UNIT-III

5		Derive expression for actual transformation ratio, ratio error and phase angle error of a P.T.	CO2	14 Marks
		(OR)		
6	a)	Explain the single phase EDM type power factor meter with neat sketch.	CO1	7 Marks
	b)	Explain the characteristics of current transformer.	CO1	7 Marks

UNIT-IV

7		Describe the working of Schering Bridge. Derive the expressions for capacitance, dissipation factor and its applications.	CO2	14 Marks
		(OR)		
8	a)	A bridge is balanced at 1,000Hz and has the following constants: AB, 0.2Mf pure capacitance; BC, 500Ω pure resistance; CD, unknown; DA, R=300Ω parallel with C = 0.1μF. Find the R and C or L constants of arm CD, considered as a series circuit.	CO6	7 Marks
	b)	Explain Anderson's bridge with phase diagram and derive its balance equations.	CO2	7 Marks

UNIT-V

9	a)	Write the difference between the DC and AC potentiometers.	CO1	7 Marks
	b)	Explain the polar type AC potentiometer.	CO1	7 Marks
		(OR)		
10	a)	Explain the block diagram of a general purpose oscilloscope and also describe about the observation of waveform on CRO.	CO1	7 Marks
	b)	Explain the ramp type digital voltmeter.	CO1	7 Marks

TRANSFORMERS AND INDUCTION MACHINES

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the importance of V/f ratio in the operation of transformer.	CO2	8 Marks
	b)	Derive the expression for induced **emf** in a transformer.	CO1	6 Marks
		(OR)		
2	a)	Draw the exact equivalent circuit of a transformer and describe briefly the various parameters involved in it.	CO2	8 Marks
	b)	Explain suitable test to determine full load copper loss of a single phase transformer.	CO1	6 Marks

UNIT-II

3	a)	List the necessary conditions to be satisfied for parallel operation of two transformers.	CO2	5 Marks
	b)	Two transformers operating in parallel have equal voltage ratios. The magnitude of their equivalent leakage impedances are equal, but their reactance to resistance ratios are 3 and 1. Find the ratio of full load kVA delivered to the sum of their individual kVA ratings.	CO4	9 Marks
		(OR)		
4	a)	Describe the procedure of sumpner's test to determine the efficiency of transformer. Mention the limitations of this test.	CO1	8 Marks
	b)	A 10kVA 2500/250V single phase two winding transformer is used as an auto transformer to raise the supply voltage of 2500V to an output voltage of 2625V. The LV winding of the two winding transformer consists of two equal parts of 125V each. If both parts of low voltage winding are used, determine: i) auto transformer kVA output. ii) kVA transformed and conducted.	CO4	6 Marks

UNIT-III

5	a)	Explain suitable technique to obtain two phase supply from three phase supply using single phase transformers.	CO5	10 Marks
	b)	Mention few applications of on load tap changing transformers.	CO6	4 Marks
		(OR)		
6		A three phase transformer is used to step down the voltage of a three phase 11kV feeder line. Per phase turns ratio is 12. For a primary line current of 20A, Calculate the secondary line voltage, line current and output kVA for the following connections. i) Star – Delta ii) Star – Star. Neglect losses.	CO4	14 Marks

UNIT-IV

7	a)	Show that the magnitude of resultant flux remains constant throughout the air gap of three phase induction motor.	CO1	7 Marks
	b)	Compare the constructional features of squirrel cage and slip ring induction motor.	CO1	7 Marks
		(OR)		

8	a)	Derive the expression for developed torque in a three phase induction motor and find the condition for maximum torque.	CO1	7 Marks
	b)	The rotor of a three phase induction motor has 0.04Ω resistance per phase and 0.2Ω standstill reactance per phase. What external resistance is required in the rotor circuit in order to get half of the maximum torque at starting? Neglect stator impedance.	CO4	7 Marks

UNIT-V

9	a)	Describe the procedure of no load and blocked rotor test of three phase induction motor.	CO2	7 Marks
	b)	Blocked rotor test on a three phase 40kW, 400V, 50Hz 6 pole star connected induction motor gave the following data: 200V, 110A, power factor = 0.4. Determine the starting torque for a three phase voltage of 380V at 45Hz. Neglect magnetizing current and assume equal stator and rotor ohmic losses.	CO4	7 Marks

(OR)

10	a)	List various starting methods of three phase induction motors. Explain any one method in detail.	CO1	8 Marks
	b)	Explain the principle of operation of induction generator.	CO1	6 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

II B.Tech II Semester (SVEC-16) Supplementary Examinations August – 2021

DESIGN OF MACHINE ELEMENTS-I

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

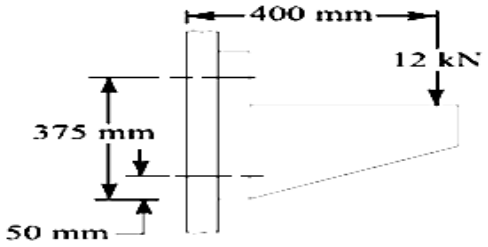
1	a)	What are the basic requirements of a machine element?	CO1	7 Marks
	b)	What are the general considerations in designing a machine component?	CO1	7 Marks
		(OR)		
2	a)	What do you understand by preferred numbers? What is their significance in design?	CO1	7 Marks
	b)	The principal stresses induced at a point in a machine component made of steel 50C4 are as follows. (S_{yt} = 460 Mpa). σ_1 = 200 *MPa*, σ_2 = 150 *MPa*, σ_3 = 0. Calculate factor of safety using maximum shear stress theory and distortion energy theory.	CO2	7 Marks

UNIT-II

3	a)	What are the factors to be considered while designing machine parts to avoid fatigue failure?	CO1	4 Marks
	b)	A machine component is subjected to a flexural stress which fluctuates between +300MN/m^2 and –150MN/m^2. Determine the value of minimum ultimate strength according to Gerber relation and Soderberg relation. Take yield strength = 0.55 Ultimate strength; Endurance strength = 0.5 Ultimate strength and factor of safety =2.	CO2	10 Marks
		(OR)		
4		A steel rod is subjected to a completely reversed axial load of 180kN. Find the diameter of the rod for a factor of safety of 2. Neglect column action. The material has an ultimate tensile strength of 1070 MPa and yield strength of 910 MPa. The endurance limit in reversed bending may be assumed to be one-half of the ultimate tensile strength. Other correction factors may be taken as follows: For axial loading = 0.7; For machined surface = 0.8; For size = 0.85; For stress concentration=1.0.	CO3	14 Marks

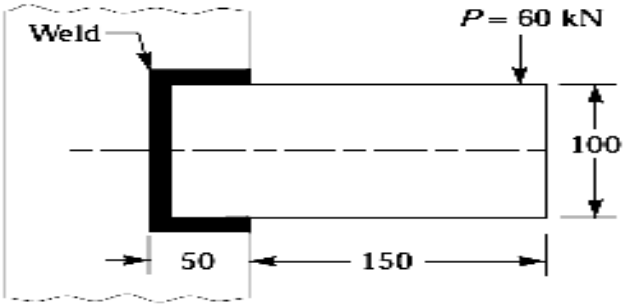
UNIT-III

5	a)	Explain the method of determining the size of bolt when the bracket carries an eccentric load perpendicular to the axis of the bolt.	CO1	4 Marks
	b)	For supporting the travelling crane in a workshop, the brackets are fixed on steel columns as shown in Figure-1. The maximum load that comes on the bracket is 12 KN acting vertically at a distance of 400mm from the face of the column. The vertical face of the bracket is secured to a column by four bolts, in two rows (two in each row) at a distance of 50mm from the lower edge of the bracket. Determine the size of the bolts, if the permissible value of the tensile stress for the bolt material is 84 MPa.	CO3	10 Marks



(OR)

6	a)	What is reinforcement in weld? What are its advantages and disadvantages?	CO1	4 Marks
	b)	A rectangular steel plate is welded as a cantilever to a vertical column and supports a single concentrated load P, as shown in Figure2. Determine the weld size, if shear stress in the same is not to exceed 140 MPa. (Dimensions are in mm).	CO4	10 Marks



UNIT-IV

7		A mild steel shaft transmits 15 kW at 210 r.p.m. It is supported on two bearings 750mm apart and has two gears keyed to it. The pinion having 24 teeth of 6mm module is located 100mm to the left of the right hand bearing and delivers the power horizontally to the right. The gear having 80 teeth of 6mm module is located 15mm to the right of the left hand bearing and receives power in a vertical direction from below. Assuming an allowable working shear stress as 53 MPa, and a combined shock and fatigue factor of 1.5 in bending as well as in torsion, determine the diameter of the shaft.	CO3	14 Marks

(OR)

8		Design and draw a protective type of cast iron flange coupling for a steel shaft transmitting 15 kW at 200 r.p.m. and having an allowable shear stress of 40 MPa. The working stress in the bolts should not exceed 30 MPa. Assume that the same material is used for shaft and key and that the crushing stress is twice the value of its shear stress. The maximum torque is 25% greater than the full load torque. The shear stress for cast iron is 14 MPa.	CO5	14 Marks

UNIT-V

9		Two rods made of plain carbon steel 40C8 (S_{yt}= 380 MPa) are to be connected by means of a cotter joint. The diameter of each rod is 50mm and the cotter is made from a steel plate of 15mm thickness. Calculate the dimensions of the socket end making following assumptions. i) The yield strength in compression is twice of the tensile yield strength. ii) The yield strength in shear is 50% of the tensile yield strength. Factor of safety= 6	CO3	14 Marks

(OR)

10		Design a knuckle joint to transmit 150 kN. The design stresses may be taken as 75 MPa in tension, 60 MPa in shear and 150 MPa in compression.	CO4	14 Marks

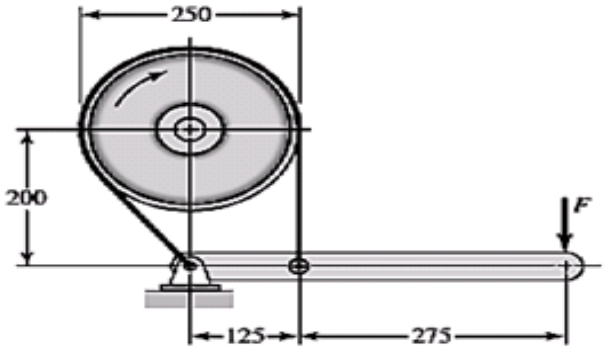
DYNAMICS OF MACHINERY
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Briefly explain about any two types of clutches with neat diagram.	CO1	4 Marks
	b)	The brake shown in figure has a coefficient of friction of 0.3 and is to operate using a maximum force of F of 400N. If the band width is 50 mm, find the band tensions and the braking torque.	CO2	10 Marks



(OR)

2	a)	What is self-energizing and self-locking brake? Explain.	CO1	6 Marks
	b)	An engine developing 30KW at 1250 r.p.m is fitted with a cone clutch. The cone face has an angle of 12.5^0. The mean diameter is 400mm, and coefficient of friction is 0.3. The normal pressure shouldn't exceed 0.08Mpa. Find inner and outer radius of clutch plate.	CO2	8 Marks

UNIT-II

3	a)	Draw the turning moment diagrams for Four stroke cycle I.C engine, neglecting the effect of inertia of the connecting rod.	CO1	5 Marks
	b)	A ship is propelled by a turbine rotor of mass 500 kg and has a speed of 2400 r.p.m. The rotor has a radius of gyration of 0.5m and rotates in clock wise when viewed from the stern. Determine the gyroscopic couple and its effect if, i) The ship runs at a speed of 28 km/hr. It steers to the left in a curve of 60 m radius. ii) The ship pitches 5^0 above and 5^0 below the horizontal position, with a time period of 20 seconds. iii) The ship rolls with an angular velocity of 0.04 rad/sec.	CO3	9 Marks

(OR)

4	a)	Discuss briefly about the stability of 2 – wheel drive, when it is taking a turn by considering weight of the vehicle, effect of centrifugal and gyroscopic couples.	CO1	4 Marks
	b)	Find the maximum and minimum speeds of a flywheel of mass 3250 kg and radius of gyration 1.8 m, when the fluctuation of energy is 112kN-m. The mean speed of the engine is 240 r.p.m.	CO3	10 Marks

UNIT-III

5	a)	Explain in detail about the functioning of centrifugal governor with neat sketch	CO1	4 Marks
	b)	All the links of the porter governor are 178mm long and are hinged at a distance of 38mm from the axis of rotation. The mass of the each ball is 1.15 kg and mass of the sleeve is 20 kg. The governor begins to rise at 280 r.p.m when the upper links are at 30^0 to the vertical. Assuming that friction is constant, determine the range of the speed if the upper arms make an angle of 45^0 to the vertical.	CO3	10 Marks

(OR)

6		A spring loaded Hartnell governor has arms of equal length. The mass rotates in a circle of 130mm diameter when the sleeve is in the mid position and the ball arms are vertical. The equilibrium speed for the position is 450 r.p.m, by neglecting the friction. The maximum sleeve movement is to be 25mm and maximum variation of speed by taking into consideration of friction to be 5% of the mid position of the speed. The mass of the sleeve is 4 kg and friction may be considered as 30N. The power of the governor must be sufficient to overcome the friction by one percent change of speed either way at the mid position. By neglecting the obliquity of the arms, determine: i) The mass of each ball. ii) The spring stiffness and. iii) The initial compression of the spring.	CO2	14 Marks

UNIT-IV

7		The firing order of a two-stroke-cycle six cylinder engine is 1–5–3–6–2–4. The adjacent cylinder center lines are 75cm apart. Each cylinder has a connecting rod 120cm long and a stroke 45cm. The mass of reciprocating parts in each cylinder is 200 kg. Determine the magnitudes of primary, secondary unbalanced forces and couples when the engine runs at 250 r.p.m.	CO4	14 Marks

(OR)

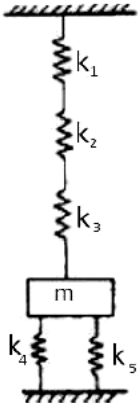
8	a)	Discuss in detail about the balancing V – twin Engine	CO1	4 Marks
	b)	Four masses A, B, C and D are completely balanced. Masses C and D make angles 90^0 and 195^0 respectively with that of mass B in the counter clock wise direction. The masses at B, C and D are 25kg, 40kg and 35kg respectively. The radii of rotation of masses A, B, C and D are 150mm, 200mm, 100mm and 180mm respectively. Planes B and C are 250mm apart. Determine: i) Mass at A and its angular position. ii) Distances of all the planes.	CO4	10 Marks

UNIT-V

9		A weight of 55N suspended by a spring of 1 N/mm is forced to vibrate by a harmonic force of 9 N. C = 77 N-sec/m. Determine: i) The resonant frequency. ii) The amplitude of mass at resonance. iii) The peak amplitude frequency. iv) The amplitude at the peak amplitude frequency.	CO5	14 Marks

(OR)

10 a) Determine the mass of the system, if K_1= 2000N/m, K_2= 1500 N/m, K_3=3000 N/m, K_4= K_5= 500 N/m and natural frequency is 10 Hz. CO1 4 Marks



b) A mass of 2 kg is supported on an isolator having a spring scale of 2940N/m and viscous damping. If the amplitude of free vibration of the mass falls to one half of its original value in 1.5 seconds, determine the damping coefficient of the isolator. CO5 10 Marks

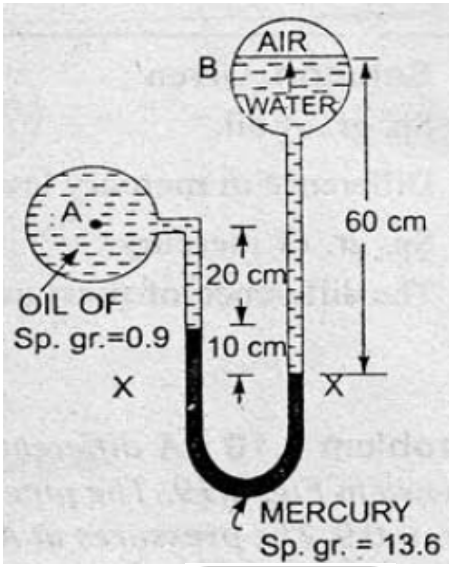
FLUID MECHANICS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the properties of fluids. 3 liter petrol weighs 21N. Calculate: i) specific weight. ii) density. iii) specific volume. iv) specific gravity.	CO1	7 Marks
	b)	A U-tube differential manometer connects two pressure pipes A and B. Pipe A contains carbon tetrachloride having a specific gravity 1.594 under a pressure of 11.772 N/ cm^2 and Pipe B contains oil of specific gravity 0.9 under a pressure of 12 N/cm^2. The pipe a lies 2.5m above pipe B. Find the difference of pressure measured by mercury as fluid filling U-tube.	CO2	7 Marks
		(OR)		
2	a)	Will you state pascal's law in your own words? What is the pressure, in meters of oil (Sp.gr. 0.8), equivalent to 80m of water?	CO1	7 Marks
	b)	A differential manometer connected at the two points A and B as shown in figure. At B air pressure is 9.81 N/cm^2 (Abs), find the absolute pressure at A.	CO2	7 Marks



UNIT-II

3	a)	Define steady, non-steady, uniform, non-uniform flows. The stream function for a two-dimensional flow is given by $\psi = 3xy$, calculate the velocity at the point P (2, 3). Find the velocity potential function Φ.	CO2	7 Marks
	b)	Water flows in a circular pipe. At one section, the diameter is 0.3m, the static pressure is 260 Kpa gauge, the velocity is 3m/s and the elevation is 10m above ground level. The elevation at a section downstream is 0m, and the pipe diameter is 0.15m. Find the gauge pressure at the downstream section. Frictional effects may be neglected. Assume density of water to be 999 kg/m^3	CO2	7 Marks
		(OR)		

4	a)	If the expression for stream function is described by $\psi = x^3 - 3xy^2$, indicate whether the flow is rotational or irrotational. If the flow is irrotational, determine the expression for velocity potential function.	CO2	7 Marks
	b)	A pitot-tube is inserted in a pipe of 300mm diameter. The static pressure in pipe is 100mm of mercury (vacuum). The stagnation pressure at the centre of the pipe, recorded by the pitot tube id 0.85N/cm^2. Calculate the rate of flow of water through pipe. If the mean velocity of flow is 0.85 times the central velocity. Take $C_v = 0.98$.	CO4	7 Marks

UNIT-III

5	a)	Derive Darcy-Weisbach formula for calculating loss of head due to friction in a pipe. Water flows through a pipe of diameter 300mm with a velocity of 5m/s. If the co-efficient of friction is given by $f = 0.015 + \frac{0.08}{\text{Re}^{0.3}}$ where Re is the Reynolds number, estimate the head lost due to friction for a length of 10m. Take kinematic viscosity of water as 0.01 stoke.	CO2	7 Marks
	b)	A 75mm diameter water jet having a velocity of 12m/s impinges on a plane. Smooth plate at an angle of 60^0 to the normal to the plate. What will be the impact when (i) the plate is stationary, and (ii) the plate is moving in the direction of the jet at 6m/s? Estimate the work done per unit time by the jet on the plate in each case. Take the density of water as 998 kg/m^3.	CO3	7 Marks

(OR)

6	a)	Derive an expression for the head loss due to sudden enlargement in pipe flow water flows through a pipe line whose diameter various from 25cm to 15cm in a length of 10m. If the Darcy-Weisbach friction factor is assumed constant at 0.018 for the whole pipe, estimate the head loss in friction when the pipe is flowing full with a discharge of 0.06m^3/sec.	CO4	7 Marks
	b)	A jet strikes tangentially a smooth curved vane moving in the same direction as the jet, and the jet gets reversed in the direction. Show that the maximum efficiency is slightly less than 60 %.	CO3	7 Marks

UNIT-IV

7	a)	Show that when runner blade angle at inlet of a Francis turbine is 90^0 and the velocity of flow is constant, the hydraulic efficiency is given by 2/ (2+tan^2 α), Where α is the vane angle.	CO5	7 Marks
	b)	Describe the following terms related to hydraulic turbines. i) Water hammer. ii) Cavitation. iii) Surge Tank. iv) Geometric similarity.	CO3	7 Marks

(OR)

8	a)	A Kaplan turbine operating under a net head of 20 m develops 16 MW with an overall efficiency of 80 %. The diameter of the runner is 4.2m, while the hub diameter is 2m and dimensionless specific speed is 3 rad. If the hydraulic efficiency is 90 %, estimate the inlet and exit angles of the runner blades at the mean blade radius if the flow leaving the runner is purely axial.	CO6	7 Marks
	b)	At a project site, the head available is 160m of water at a flow rate of 0.005m^3/s. Select and design a suitable turbine to generate power, assuming the required coefficients with justification and stating all the relevant parameters.	CO3	7 Marks

UNIT-V

9	a)	Explain the working principle of a single stage centrifugal pump with a neat sketch and also explain briefly mechanical and overall efficiencies of a centrifugal pump.	CO3	7 Marks
	b)	Describe construction and working principle of double acting reciprocating pump.	CO3	7 Marks

(OR)

10	a)	Derive an expression for the work done by the impeller of a centrifugal pump on liquid per second per unit weight of lquid. Explain briefly manometric and volumetric efficiencies of a centrifugal pump.	CO3	7 Marks
	b)	Distinguish between Reciprocating and centrifugal pumps. Explain Slip and function of air vessels?	CO3	7 Marks

MACHINE TOOLS AND MODERN MACHINING PROCESSES
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw a neat sketch of single point cutting tool indicating its complete geometry on it.	CO3	7 Marks
	b)	Discuss briefly about the following Tool Materials. i) High speed steels. ii) Cemented Carbides.	CO1	7 Marks
		(OR)		
2		Draw a Merchant's Circle diagram and derive expressions to show relationships among the different forces acting on the cutting tool and different parameters involved in metal cutting.	CO4	14 Marks

UNIT-II

3	a)	List the various work holding devices in lathe. Discuss in detail.	CO1	7 Marks
	b)	Explain the working of Engine Lathe with a neat sketch.	CO1	7 Marks
		(OR)		
4	a)	Discuss about different methods of Taper Turning.	CO1	7 Marks
	b)	Explain the working of Multi Spindle Automatic Lathe.	CO1	7 Marks

UNIT-III

5	a)	Explain the specifications and operations performed on a Slotting Machine.	CO1	7 Marks
	b)	Distinguish between Shaper and Planer.	CO2	7 Marks
		(OR)		
6	a)	Design a twist drill to perform drilling operation on regular work piece.	CO3	7 Marks
	b)	Explain the working principle of Jig Boring machine.	CO1	7 Marks

UNIT-IV

7	a)	Explain the working of Cylindrical grinding machine with a neat sketch.	CO1	7 Marks
	b)	Analyze the need for Truing of grinding wheels.	CO2	7 Marks
		(OR)		
8	a)	Classify Milling machines in detail.	CO1	7 Marks
	b)	List and explain types of milling cutters with neat sketches.	CO1	7 Marks

UNIT-V

9	a)	Analyze the importance of chip less machining process in future.	CO4	7 Marks
	b)	Explain the principle involved in Electron Beam Machining.	CO5	7 Marks
		(OR)		
10	a)	Explain the principle involved in Electro Discharge Machining with a neat sketch.	CO5	7 Marks
	b)	State the advantages of Plasma Arc Machining and its applications.	CO5	7 Marks

THERMAL ENGINEERING - I
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the working of 4 stroke CI engine with the help of simplified sketches.	CO1	7 Marks
	b)	Distinguish between 4 stroke and 2 stroke engines.	CO2	7 Marks
		(OR)		
2	a)	Classify IC engines based on cylinder arrangement.	CO1	7 Marks
	b)	Explain briefly about: i) Heat loss. (ii) Time loss. (iii) Blow down loss factors.	CO4	7 Marks

UNIT-II

3	a)	What is meant by flame front propagation and discuss the factors affecting flame speed.	CO4	7 Marks
	b)	What is meant by detonation as applied to SI engines and discuss the factors affecting detonation.	CO2	7 Marks
		(OR)		
4	a)	Briefly explain the combustion phenomena in CI engines.	CO2	7 Marks
	b)	Discuss the factors to be considered for selecting CI engine fuel and explain about its rating.	CO2	7 Marks

UNIT-III

5	a)	What is the difference between Indicated power and Brake power and discuss different efficiencies used in the performance of IC engines..	CO2	7 Marks
	b)	A 2-stroke CI engine develops a brake power of 3.72kW. Its frictional power is 0.75 kW. Its fuel consumption is 1.8 kg/hr and works with an air fuel ratio of 20:1. The heating value of fuel is 40000 kJ/kg. Calculate: i) Indicated Power. ii) Mechanical Efficiency. iii) Air consumption per hour. iv) Indicated Thermal Efficiency. v) Brake Thermal Efficiency.	CO3	7 Marks
		(OR)		
6		A load test on a 2-stroke engine gave the following results: Speed – 450 r.p.m. Brake load = 500N, IMEP = 30 x 10^4 N/m^2, Fuel consumption = 5.5 kg/hr. Cooling water flow rate = 7 kg/min, rise in temperature of cooling water = 40°C,.Ambient temperature = 25°C, Barometric pressure = 1 bar, Air to fuel ratio by weight = 30, temperature of exhaust gases = 355°C, mean specific heat of exhaust gases = 1.05 kJ/kg K, calorific value of fuel used = 42,500 kJ/kg, bore and stroke = 22cm and 27cm respectively. No. of cylinders = 1, and brake drum dia = 1.5 m. Calculate. i) volumetric efficiency based on inlet condition, ii) mechanical efficiency, iii) heat balance sheet on hour basis.	CO3	14 Marks

UNIT-IV

7	a)	Classify the fuels and discuss their relative merits and demerits.	CO5	7 Marks
	b)	What is meant by Chemically correct air fuel mixture and derive the value of stoichiometric air fuel ratio value for Octane (C_8H_{18}) fuel.	CO4	7 Marks
		(OR)		

8	a)	Distinguish between Higher and Lower Calorific values and discuss any one method for determination of calorific value of a given solid/liquid fuel.	CO2	7 Marks
	b)	The percentage weight analysis of a fuel supplied to an IC engine is as follows: C=85%, H_2 = 15%, The air fuel ratio 13.5:1. If all the carbon is burnt either to CO or CO_2 and if there is no free oxygen in the exhaust gases, calculate volumetric analysis of the dry products of combustion.	CO5	7 Marks

UNIT-V

9	a)	Classify the compressors.	CO1	7 Marks
	b)	Explain the working of single stage reciprocating compressor with the help of P-V and T-s diagrams.	CO1	7 Marks

(OR)

10	a)	Compare Centrifugal and Axial flow compressors.	CO2	7 Marks
	b)	A single stage double-acting air compressor is required to deliver 14m^3 of air per minute measured at 1.013 bar and 15 C. The delivery pressure is 7 bar and the speed 300r.p.m. Take the clearance volume as 5% of the swept volume with the compression and expansion index of n = 1.3 Calculate: i) Swept volume of the cylinder. ii) The delivery temperature. iii) Indicated.	CO2	7 Marks

ANALOG COMMUNICATIONS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is the major drawback in Amplitude Modulation (AM)? Explain, how we overcome that drawback by using DSB-SC.	CO1	4 Marks
	b)	An AM signal $S(t)=20(1+0.9\cos(2\pi \times 10^4 \times t))\cos(2\pi \times 10^6 \times t)$ is transmitted into free space using an antenna whose resistance is 5Ω. Sketch the spectrum of AM signal and calculate Bandwidth, Power Radiated and Modulation Efficiency.	CO4	6 Marks
	c)	Discuss how a message signal recovered from a DSB-SC wave using Coherent Detector.	CO1	4 Marks
		(OR)		
2	a)	Discuss how an envelope detector extracts original message signal from an AM signal.	CO1	6 Marks
	b)	An AM transmitter radiates 50W, when the carrier is modulated by a sinusoidal signal with modulation index of 0.707: i) Determine the modulation efficiency, Carrier Power , Sideband Power. ii) Determine the Peak Amplitude of the carrier before modulation and after modulation.	CO4	8 Marks

UNIT-II

3	a)	Explain the indirect method of generating WBFM signal.	CO1	4 Marks
	b)	Consider an angle modulated signal $S(t) = 8\cos[8\pi 10^6 t + 2\sin(8\pi 10^3 t)]$. Find the following: i) Carrier frequency. ii) Modulating signal frequency. iii) Instantaneous frequency at time: 0.5ms., and 1ms. iv) Maximum phase deviation. v) Maximum frequency deviation.	CO4	10 Marks
		(OR)		
4	a)	Consider an FM signal $f(t) = \cos[2\pi f_c t+\beta_1\sin(2\pi f_1 t)+\beta_2\sin(2\pi f_2 t)$. Find the maximum frequency deviation of the FM signal.	CO4	5 Marks
	b)	Discuss how frequency discrimination method is useful to extract message signal from FM signal.	CO1	7 Marks
	c)	Write any two differences between NBFM and WBFM.	CO1	2 Marks

UNIT-III

5		Estimate Signal to Noise ratio of a DSB-SC system.	CO2	14 Marks
		(OR)		
6		Discuss about the following. i) FM capture Effect. ii) Pre- Emphasis. iii) De-Emphasis.	CO2	14 Marks

UNIT-IV

7	a)	Discuss about Super heterodyne AM receiver with neat block diagram.	CO3	10 Marks
	b)	Compare low level and high level AM transmitters.	CO6	4 Marks

(OR)

8	a)	Discuss about the following parameters. i) Selectivity. ii) Sensitivity. iii) Fidelity.	CO3	6 Marks
	b)	Explain the importance of AGC in Super heterodyne receiver.	CO6	5 Marks
	c)	What are major problem encountered in Tuned Radio Frequency Receiver?	CO3	3 Marks

UNIT-V

9	a)	Explain the Generation and of PAM signal with neat waveforms.	CO1	8 Marks
	b)	Discuss about Time Division Multiplexing with neat block diagram.	CO2	6 Marks

(OR)

10	a)	Explain the generation and detection of PPM signal.	CO1	8 Marks
	b)	Compare TDM and FDM.	CO2	6 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

II B.Tech II Semester (SVEC-16) Supplementary Examinations August - 2021

DIGITAL IC APPLICATIONS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the terms transition time and propagation delay with reference to CMOS logic.	CO1	7 Marks
	b)	Draw the circuit diagram, functional table and logic symbol of CMOS OR gate and explain its operation.	CO2	7 Marks
		(OR)		
2	a)	Explain the following terms with reference to TTL gate. i) Logic Levels. ii) D.C noise margin. iii) Low-state unit load. iv) High-state fan-out.	CO5	8 Marks
	b)	List out the difference between TTL, ECL and CMOS logic family.	CO6	6 Marks

UNIT-II

3	a)	Explain the following syntax with examples: i) Procedure. ii) Task. iii) Function.	CO2	9 Marks
	b)	What do you understand by gate level modeling? Explain briefly.	CO1	5 Marks
		(OR)		
4	a)	Explain verilog HDL data type.	CO4	7 Marks
	b)	Discuss different logical operators used in verilog HDL.	CO2	7 Marks

UNIT-III

5	a)	Design a 16 x 1 multiplexer using two 74 x 151 multiplexer and one 74 x 139 decoder.	CO3	8 Marks
	b)	Design a function F = ABC + (A+B+C)' by using 74 x 138 and explain its operation.	CO4	6 Marks
		(OR)		
6	a)	Write Verilog HDL program in behavioural model for 74 x 139 IC.	CO3	5 Marks
	b)	Design a 74 x 181 arithmetic and logic unit. Write a program in data flow modelling.	CO4	9 Marks

UNIT-IV

7		Design an 8-bit universal parallel-in serial out shift register with a control input. Shift left operation with control input 1 and shift-right operation with control input 0 is to be performed.	CO4	14 Marks
		(OR)		
8	a)	Explain the operation of 4-bit ring counter and draw its logic diagram.	CO2	6 Marks
	b)	Explain the operation of a 4 bit synchronous binary counter with the required diagram and waveforms.	CO2	8 Marks

UNIT-V

9	a)	List out few comparisons of SRAM verses DRAM along with advantages and disadvantages.	CO5	8 Marks
	b)	Explain architecture model of FPGA.	CO2	6 Marks
		(OR)		
10	a)	Explain the necessity of two-dimensional decoding mechanism in memories. Draw MOS transistor memory cell in ROM and explain the operation.	CO5	7 Marks
	b)	Explain the operation of synchronous SRAM with the help of internal architecture.	CO2	7 Marks

ELECTROMAGNETIC THEORY AND TRANSMISSION LINES

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Analyse mathematically the *direction* and *magnitude* of E in terms of the potential V and hence deduce that E = - grad V.	CO1	7 Marks
	b)	The potential field at the point $\boldsymbol{P(r, \theta, \varphi)}$ **is** $\boldsymbol{V = (10/r^2)\ \sin\theta \cos\varphi}$. Evaluate the value of electric flux density D at $\boldsymbol{(2, \pi/2, 0)}$.	CO4	7 Marks
		(OR)		
2	a)	An infinitely long straight filament carrying a direct current $\boldsymbol{I}$ is placed along z-axis. Apply Biot-Savart's law to calculate the value of magnetic field intensity H at the point (ρ, φ, z).	CO1	7 Marks
	b)	An infinitely long filamentary conductor, which carries a current $\boldsymbol{I}$ = 5.0 A, is placed parallel to the y-axis at x = 2m and z = – 2m. Calculate the magnetic field intensity H at (0, 0, 0).	CO4	7 Marks

UNIT-II

3	a)	In a material for which σ = 5.0 S/m and ϵ_r = 1, the electric field intensity is E = 250 sin $10^{10}t$ (V/m). Calculate the *conduction* and *displacement* current densities, and the frequency at which both have equal magnitudes.	CO2	7 Marks
	b)	Develop the Maxwell's equation, $\nabla \times E = -\frac{\partial B}{\partial t}$ from Faraday's law of electromagnetic induction.	CO1	7 Marks
		(OR)		
4	a)	Develop the boundary conditions on *tangential* and *normal components* of time varying electric field E, across the interface between two media with constants μ_1, ϵ_1 and μ_2, ϵ_2.	CO1	7 Marks
	b)	Derive the Maxwell's equations in integral form, from differential form for time harmonic fields, and describe the physical meaning of integral forms.	CO2	7 Marks

UNIT-III

5	a)	Define *polarization* of a wave, and describe mathematically *linear*, *elliptical* and *circular* polarizations with illustrating diagrams.	CO6	7 Marks
	b)	Derive the expressions for α and β in terms of the constants of the medium μ, ϵ and σ for a *uniform plane wave* propagating in a lossy conducting medium.	CO5	7 Marks
		(OR)		
6	a)	What is Poynting vector? Prove Poynting theorem from first principles.	CO5	7 Marks
	b)	Derive the expressions for α, β, v_p and η for the wave propagating in a good dielectric medium.	CO6	7 Marks

UNIT-IV

7	a)	Obtain the equations for attenuation and phase constants of a transmission line in terms of R, L, C and G.	CO3	7 Marks
	b)	Derive the condition for distortion less line and hence justify how the *frequency* and *phase* distortions can be eliminated on a transmission line at low frequency.	CO2	7 Marks
		(OR)		

8	a)	The constants of a transmission line are R=6 Ω/km, L=2.2 mH/km G=0.25x10^{-3}mho/km, C=0.005μf/km. Find the attenuation constant, phase shift constant at 1000Hz.	CO3	7 Marks
	b)	Define propagation constant. Obtain the expressions for the wavelength and velocity of propagation of voltage and current waves a transmission line.	CO2	7 Marks

UNIT-V

9	a)	Discuss the concept of Single stub matching.	CO1	7 Marks
	b)	Define VSWR. Deduce the relation between VSWR and reflection coefficient.	CO4	7 Marks

(OR)

10	a)	The characteristic impedance of a certain line is $710\angle 14^{o}\,\Omega$ and propagation constant of 0.007+j0.028 per km. the line is terminated in a 300Ω resistor. Calculate the input impedance of the line if its length is 100 km.	CO1	7 Marks
	b)	A single stub is to match a 40Ω line to a load of 200-j100Ω. The wavelength is 3.0 meters. Determine the shortest distance from the load to the stub location and the proper length of the short-circuited stub.	CO4	7 Marks

LINEAR IC APPLICATIONS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the AC characteristics of an Op-amp.	CO1	7 Marks
	b)	For an Op-amp, CMRR=10dB, difference mode gain A_d=100. The output voltage changes by 20v in 4μsec. Calculate i) Common Mode Gain (A_c); ii) Slew Rate.	CO4	7 Marks
		(OR)		
2	a)	Why a level translator is needed in an Op-amp circuit? Explain different level translator circuits.	CO1	6 Marks
	b)	Why Compensation technique is implemented in an Op-amp? Explain the concept of Pole-Zero Compensation technique.	CO2	8 Marks

UNIT-II

3	a)	Derive the relationship between input and output of an Inverting amplifier using 741 Op-amp in both ideal and practical conditions.	CO2	7 Marks
	b)	Explain the operation of Full wave rectifier using 741 Op-amp.	CO2	7 Marks
		(OR)		
4	a)	Explain how log operations are performed by using 741 Op-amp.	CO1	7 Marks
	b)	Design a Triangular Wave generator for the following specifications: V_0=10V_{P-P} and f_0= 1 KHz.	CO4	7 Marks

UNIT-III

5	a)	Explain how an IC voltage regulator works.	CO1	7 Marks
	b)	Explain the working of Series Op-amp regulator.	CO1	7 Marks
		(OR)		
6	a)	Why the Narrow Band Pass filter is called as notch filter? Explain.	CO1	7 Marks
	b)	Design a first order Low Pass Butterworth filter with a cut-off frequency of 3 KHz and pass band gain of 3.	CO4	7 Marks

UNIT-IV

7	a)	How can pulse width modulation be achieved using 555 timer?	CO5	6 Marks
	b)	Design an astable multivibrator to generate a: i) 50% duty cycle. ii) 70% duty cycle.	CO4	8 Marks
		(OR)		
8	a)	A PLL has free running frequency f_C = 400 KHz low pass filter bandwidth of 10 KHz. If an input signal frequency applied is 500 KHz, will the loop acquire lock? Find the VCO output frequency.	CO4	9 Marks
	b)	Explain the role of low pass filter in PLL.	CO1	5 Marks

UNIT-V

9	a)	Determine the full scale voltage and resolution of 4-bit DAC for V_{REF}=12V and 2R=R=10 KΩ.	CO4	6 Marks
	b)	LSB of a 9-bit DAC is represented by 19.6mV. If an input of all zero bits is represented by 0V. i) Find the output of DAC for an input, 101101101 and 011011011. ii) What is the Full Scale Reading (FSR) of this DAC?	CO4	8 Marks
		(OR)		
10	a)	Explain the operation of Dual Slope ADC with a neat sketch.	CO1	7 Marks
	b)	A dual slope ADC uses a 16-bit counter and a 4 MHz clock rate. The maximum input voltage is +10V. The maximum integrator output voltage should be -8V when the counter has cycled through 2^n counts. The capacitor used in the integrator is 0.1μF. Find the value of the resistor R of the integrator. If the analog signal voltage is +4.129 V, find the equivalent digital number.	CO4	7 Marks

PROBABILITY AND STOCHASTIC PROCESS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define Baye's theorem and prove the theorem.	CO1	7 Marks
	b)	There are 4 candidates for the office of the highway commissioner. The respective probabilities that they will be selected are 0.3, 0.2, 0.4 and 0.1 and the probabilities for a project approval are 0.35, 0.85, 0.45 and 0.15, depending on which of the four candidates are selected. What is the probability of the project getting approved?	CO3	7 Marks
		(OR)		
2	a)	In a certain group of engineer's 60% have insufficient background of information theory, 50% have inadequate knowledge of probability and 80 % are in either one or both of two adequate categories. What is the percentage of people who have adequate knowledge of probability among those who have a sufficient background of information theory?	CO3	7 Marks
	b)	Explain statistical independence of events. If A_1 and A_2 are statistically independent, then prove that $\bar{A}_2$ is independent of A_1.	CO1	7 Marks

UNIT-II

3	a)	The density function of a random variable X is given by $f(x) = \begin{cases} 2e^{-2x}; 0 \le x, \infty \\ 0; \quad otherwise \end{cases}$. Find (i) E(X). (ii) E(4X-1). (iii) $E(X^2)$. (iv) $E((X-1)^2)$.	CO3	8 Marks
	b)	Prove that a linear transformation of Gaussian random variable produces Gaussian random variable?	CO2	6 Marks
		(OR)		
4	a)	Define probability distribution function. Consider the experiment of tossing four fair coins. The random variable X is associated with number of tails showing. Compute and sketch the cumulative distribution function of X.	CO2	7 Marks
	b)	Define uniform density function and deduce mean, mean square value and variance for it.	CO2	7 Marks

UNIT-III

5	a)	Given $f_{XY}(x,y) = u(x)u(y)xe^{-x(y+1)}$ then find the marginal density functions of X and Y and conditional density functions.	CO2	7 Marks
	b)	Random variables X and Y have respective density functions $f(x) = \frac{1}{a}[u(x) - u(x-a)]$ $f_Y(y) = bu(y)e^{-by}$ a > 0, b > 0. Find the density function of W = X + Y, if X and Y are stastically independent.	CO2	7 Marks
		(OR)		

6	a)	Let X and Y have joint density function. $f_{XY}(x,y) = \left\{ \begin{array}{l} x+y; 0 \le x \le 1, 0 \le 1 \\ 0; \textit{for any other values} \end{array} \right\}$. Find the conditional expectation of X given Y and Y given X.	CO2	7 Marks
	b)	Gaussian random variables X_1 and X_2 for which $\overline{X_1} = 2, \overline{X_2} = -1, \sigma^2_{X_1} = 9, \sigma^2_{X_2} = 4$ and $C_{X_1X_2} = -3$ are transformed to new random variables Y_1 and Y_2 according to $Y_1 = -X_1 + X_2$ and $Y_2 = 0\,2X_1 - 3X_2$. Find $C_{Y_1Y_2}$ and $\rho_{Y_1Y_2}$.	CO3	7 Marks
		UNIT-IV		
7	a)	Define a Kth order stationary random processes. When, it will become strict sense stationary random processes.	CO2	7 Marks
	b)	The autocorrelation function of a stationary process is $R_{xx}(\tau) = 25 + \frac{4}{1+6\tau^2}$ then find the mean and variance of the process.	CO3	7 Marks
		(OR)		
8	a)	Define auto correlation function and write its properties.	CO2	7 Marks
	b)	Explain Gaussian random processes.	CO2	7 Marks
		UNIT-V		
9	a)	Define noise and classify different types of noise and explain them briefly.	CO4	7 Marks
	b)	Develop the expression for noise voltage when resistors are connected in series and parallel modes.	CO4	7 Marks
		(OR)		
10		Develop the expression for Noise Figure and Noise Temperature for cascaded stages of N amplifiers.	CO4	14 Marks

PULSE AND DIGITAL CIRCUITS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

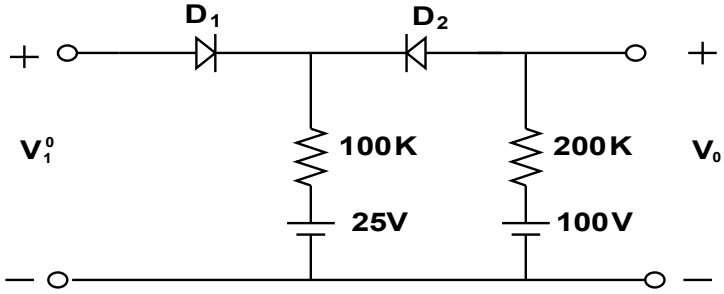
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Find and sketch the steady state response of RC high pass filter for sinusoidal input.	CO1	7 Marks
	b)	What is the need of compensating the attenuator?	CO1	7 Marks
		(OR)		
2	a)	An ideal 1μsec pulse is fed to an amplifier. Calculate and plot the output waveform under the following conditions: the upper 3 db frequency is i) 10 MHz. (ii) 1 MHz.	CO1	7 Marks
	b)	Derive the expression for percentage of tilt when an RC high pass filter is excited by a square wave?	CO2	7 Marks

UNIT-II

3	a)	What are the limitations of diode as a shunt element in clipping circuits?	CO3	7 Marks
	b)	Explain the operation of a comparator circuit.	CO2	7 Marks
		(OR)		
4	a)	What is the effect of diode forward and reverse resistances on the operation of a clipping circuit?	CO3	7 Marks
	b)	The input voltage v_i to the two level clippers varies linearly from 0 to 150V. Sketch the output voltage v_o to the same time scale as the input voltage. Assume ideal diodes.	CO2	7 Marks



UNIT-III

5		Derive the expressions for UTP and LTP of a Schmitt trigger circuit.	CO4	14 Marks
		(OR)		
6	a)	Explain the method of symmetrical triggering of the binary.	CO3	7 Marks
	b)	Derive the expression for pulse width of a monostable multivibrator.	CO3	7 Marks

UNIT-IV

7	a)	Derive the expression $e_s = 8e_d = 2e_t$ with respect to sweep circuits.	CO3	7 Marks
	b)	Derive the expression for frequency of oscillations in UJT relaxation oscillator.	CO3	7 Marks
		(OR)		
8	a)	How to apply Miller principle to generate sweep voltage?	CO5	7 Marks
	b)	What is linearity correction through adjustment of driving waveform?	CO4	7 Marks

UNIT-V

9	a)	Explain the operation of sampling gate.	CO1	7 Marks
	b)	Compare the performances of unidirectional and bidirectional sampling gates in all respects.	CO1	7 Marks
		(OR)		
10	a)	What are the applications of sampling gates?	CO1	7 Marks
	b)	Draw the circuit diagram of CMOS NAND gate and explain its operation.	CO1	7 Marks

COMPUTER GRAPHICS
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Differentiate random scan and raster scan methods.	CO1	4 Marks
	b)	Using midpoint circle algorithm, generate points on the circle with center (5, 5) and radius 5 units.	CO3	10 Marks
		(OR)		
2	a)	Apply the Bresenham's algorithm to turn up pixels along the line segment determined by points (20, 10) and (30, 18).	CO3	10 Marks
	b)	Explain Flat-panel displays with neat diagram.	CO1	4 Marks
		UNIT-II		
3	a)	Explain 2-D scaling and shear transformations with examples.	CO2	7 Marks
	b)	Write a boundary-fill procedure to fill an 8-connected region.	CO4	7 Marks
		(OR)		
4	a)	Develop flood fill algorithm to fill the interior of any specified area.	CO4	7 Marks
	b)	Determine a sequence of basic transformations that are equivalent to the y-direction shearing matrix.	CO2	7 Marks
		UNIT-III		
5	a)	Determine the equation of the Bezier curve for five control points. Evaluate the point at u = 0.5 where **u** is the normalized parameter.	CO6	8 Marks
	b)	Write a procedure to implement Cohen-Sutherland line clipping algorithm.	CO3	6 Marks
		(OR)		
6	a)	Illustrate Sutherland Hodgeman Polygon clipping algorithm with a neat example.	CO1	8 Marks
	b)	Enumerate the properties of BSpline and Beizer Curves.	CO1	6 Marks
		UNIT-IV		
7	a)	Prove that two successive rotations about any one of the coordinate axes in 3D is commutative.	CO2	8 Marks
	b)	Write short notes on 3D clipping.	CO2	6 Marks
		(OR)		
8	a)	Explain 3D Translation and Shearing Transformations with an example	CO1	8 Marks
	b)	Differentiate parallel projection and perspective projections.	CO1	6 Marks
		UNIT-V		
9	a)	Implement the depth-buffer method to display the visible surfaces of a given polyhedron.	CO5	8 Marks
	b)	Explain Phong shading technique with an example.	CO1	6 Marks
		(OR)		
10	a)	Explain any two backface detection methods with examples	CO1	8 Marks
	b)	Compare and Contrast Gouraud Shading and Phong shading	CO2	6 Marks

DATABASE MANAGEMENT SYSTEMS
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Compare data models? Explain network, hierarchical and relational model in detail.	CO1	7 Marks
	b)	Analyze the responsibilities of DBA and database designers.	CO1	7 Marks
		(OR)		
2	a)	Describe in detail about Entity integrity and Referential Integrity in detail.	CO1	7 Marks
	b)	Consider an E-R diagram for a car-insurance company whose customers own one or more cars each. Each car has associated with it zero to any number of recorded accidents. State any assumptions you make.	CO3	7 Marks

UNIT-II

3	a)	Discuss the various update operation on relation and types of integrity constraints that must be checked for each update operation.	CO3	7 Marks
	b)	What is role of participation? When is it necessary to use role names in description or relation types?	CO3	7 Marks
		(OR)		
4	a)	Explain the integrity constraints supported by SQL.	CO5	7 Marks
	b)	What is relational algebra? Discuss the various operations of relational algebra.	CO2	7 Marks

UNIT-III

5	a)	Give a detailed description about query processing and optimization.	CO4	7 Marks
	b)	Write short notes on the following: i) Order by clause and LIKE operator. ii) Set operators.	CO3	7 Marks
		(OR)		
6	a)	Differentiate functional dependency and multi valued dependency with example.	CO1	7 Marks
	b)	Explain 4NF and 5NF with an example.	CO2	7 Marks

UNIT-IV

7	a)	Explain time stamp based protocols for Concurrency Control.	CO5	7 Marks
	b)	What are the different types of lockings? In multiple-granularity locking, what is the difference between implicit and explicit locking?	CO4	7 Marks
		(OR)		
8	a)	Distinguish serial schedule and serializable schedule. Give relevant example.	CO3	7 Marks
	b)	What are checkpoints? Explain the purpose of checkpoints mechanism. How often should check points be performed?	CO3	7 Marks

UNIT-V

9	a)	What is the difference between conflict serializability and view serializability? Explain in detail with an example.	CO4	7 Marks
	b)	Briefly discuss ACID property with an example.	CO4	7 Marks
		(OR)		
10	a)	Define B+ Tree file organization in detail.	CO5	7 Marks
	b)	Identify a B+ tree to insert the following key elements (order of the tree is 3) 5,3,4,9,7,15,14,21,22,23.	CO5	7 Marks

❀ ❀ ❀

INDUSTRIAL INSTRUMENTATION - I
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Give three different units of force and summarize different force sensing mechanisms.	CO2	7 Marks
	b)	Elaborate on the working principle of torque measurement based on Relative angular twist.	CO1	7 Marks
		(OR)		
2		Explain the following. i) Hydrostatic. ii) Analysis and selection of torque sensors.	CO2	14 Marks
		UNIT-II		
3	a)	Define relative acceleration. Explain the construction of piezoelectric type accelerometer in detail.	CO2	7 Marks
	b)	Elaborate on the principle of gyroscope and explain three axis gyro.	CO2	7 Marks
		(OR)		
4	a)	Identify an appropriate sensor for measurement of velocity which consume very little power and explain in detail.	CO4	7 Marks
	b)	Explain the principle and operation of tachogenerators.	CO2	7 Marks
		UNIT-III		
5	a)	What is absolute pressure? With neat sketch, explain momentum transfer gauge.	CO2	7 Marks
	b)	Elaborate on manometer and its types.	CO2	7 Marks
		(OR)		
6	a)	With neat sketch, explain Mcleod gauge and Knudsen gauge.	CO2	7 Marks
	b)	Analyze the requirements for selection of pressure sensors.	CO3	7 Marks
		UNIT-IV		
7	a)	List the merits and demerits of thermopile and thermocouple. With neat sketch, explain them in detail.	CO4	7 Marks
	b)	Elaborate on thermocouple burnout detection and high temperature measurement methods.	CO2	7 Marks
		(OR)		
8	a)	Analyze 2-wire, 3-wire and 4-wire lead resistance methods.	CO1	7 Marks
	b)	Explain thermoelectric effects and thermocouple laws.	CO2	7 Marks
		UNIT-V		
9	a)	Analyze different temperature sensors.	CO2	7 Marks
	b)	Explain about fiber optic thermometer with neat sketch.	CO1	7 Marks
		(OR)		
10	a)	Explain about calibration and simulation for temperature sensors.	CO1	7 Marks
	b)	Elaborate on Johnson noise thermometer.	CO2	7 Marks

LINEAR AND DIGITAL ICS

[Electrical and Electronics Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive the expression for gain of an op-amp to be used as Inverting Amplifier and Non-Inverting amplifier with negative feedback.	CO1	7 Marks
	b)	For 741 op-amp, the parameters given are: i) I_{CQ} = 10μA; ii) C_c =33pf. The input voltage V_{pp}=12V. Estimate the slew rate and maximum possible frequency of input voltage that can be applied to get undistorted output.	CO1	7 Marks
		(OR)		
2	a)	Discuss the concept of active load to improve the CMRR.	CO1	8 Marks
	b)	Calculate the operating points of the differential amplifier with R_C = 3.9 Kohms, R_E=3.3 Kohms, V_{CC} = 9V and $-V_{EE}$ = -9V.	CO4	6 Marks

UNIT-II

3	a)	Why practical integrator is needed over ideal integrator? Justify.	CO2	7 Marks
	b)	Design the practical differentiator circuit that will differentiate an input signal with f_{max}=150Hz.	CO3	7 Marks
		(OR)		
4	a)	Design a band pass filter for f_L=100Hz and f_h=1KHz. Also calculate the quality factor.	CO3	6 Marks
	b)	Discuss the characteristics and limitations of op-amp comparator and give basic differences between comparator and Schmitt trigger.	CO6	8 Marks

UNIT-III

5	a)	List out the performance parameters of DAC and describe the operation of Binary weighted resistors DAC and R/2R ladder DAC.	CO6	7 Marks
	b)	List out the features of 555 timer and derive the expression for frequency in Astable configuration. Design 555 timer for a square wave generator with 50% duty cycle.	CO5	7 Marks
		(OR)		
6	a)	Indicate the importance of Sample and Hold Circuit. Give the applications of Sample and Hold Circuit.	CO5	5 Marks
	b)	Elaborate the functioning of a successive approximation A/D converter.	CO1	9 Marks

UNIT-IV

7	a)	Discuss about CMOS steady state and dynamic electrical behavior.	CO1	7 Marks
	b)	List out some of the user defined primitives in Verilog HDL.	CO6	7 Marks
		(OR)		
8	a)	Elaborate the importance of CMOS technology and discuss about CMOS logic families.	CO2	7 Marks
	b)	Distinguish Behavioral and structural modelling in Verilog HDL.	CO2	7 Marks

UNIT-V

9	a)	Design 8:1 multiplexer with 4:1 multiplexers and 2:1 multiplexer.	CO3	7 Marks
	b)	Develop Verilog code for 3-bit up counter.	CO4	7 Marks
		(OR)		
10	a)	Design 8-bit adder using 74 x 283 IC's and give the operation in detail.	CO5	7 Marks
	b)	Develop HDL code for 16:4 encoders.	CO4	7 Marks

COMPUTER ARCHITECTURE AND ORGANIZATION
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the basic operational concepts of 8085 microprocessor.	CO1	7 Marks
	b)	Explain the functional units of a computer with neat sketch.	CO1	7 Marks
		(OR)		
2	a)	What is a DRAM? Explain the types of DRAM's with suitable diagrams.	CO3	7 Marks
	b)	Analyze the memory hierarchy in terms of speed, size and cost.	CO1	7 Marks

UNIT-II

3		Draw the pin diagram of 8085 and explain the function of each pin in detail.	CO1	14 Marks
		(OR)		
4		Explain 8085 data transfer instructions with a suitable example.	CO2	14 Marks

UNIT-III

5	a)	What is meant by addressing mode? Explain the different types of addressing modes.	CO1	7 Marks
	b)	Differentiate between software and hardware interrupts.	CO1	7 Marks
		(OR)		
6	a)	Write an 8085 program to arrange an array of data in descending order.	CO3	7 Marks
	b)	Distinguish between the memories mapped I/O and peripheral I/O.	CO4	7 Marks

UNIT-IV

7		Design a bus system for four registers using multiplexers.	CO3	14 Marks
		(OR)		
8	a)	Design a 4 bit combinational circuit for shifting bits to the right or to the left.	CO3	7 Marks
	b)	Compare RISC and CISC processors.	CO2	7 Marks

UNIT-V

9		What are the pipeline conflicts that cause the instruction pipeline to deviate from its normal operation?	CO1	14 Marks
		(OR)		
10		Develop an algorithm to perform addition and subtraction operation explains with an example.	CO5	14 Marks

DESIGN AND ANALYSIS OF ALGORITHMS
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What are asymptotic notations? Describe the notations in detail with suitable examples.	CO1	7 Marks
	b)	Design an algorithm to find the solution for Towers of Hanoi problem using recursion.	CO3	7 Marks
		(OR)		
2	a)	Describe performance of algorithms with respect to Time and Space complexities.	CO2	7 Marks
	b)	Illustrate the specifications in writing algorithms.	CO1	7 Marks

UNIT-II

3	a)	What are Bi-connected components? Give example.	CO1	7 Marks
	b)	Write the algorithms for Union and Find.	CO2	7 Marks
		(OR)		
4	a)	Describe DFS algorithm with suitable example.	CO2	7 Marks
	b)	Describe BFS algorithm with suitable example.	CO2	7 Marks

UNIT-III

5	a)	Derive time complexity of Strassen's matrix multiplication	CO4	4 Marks
	b)	Given three objects with profits $(P_1,P_2,P_3)=(25,24,15)$ and weights $(W_1,W_2,W_3)=(18,15,10)$. Find a greedy solution to place the objects in a bag of capacity 20 and earn maximum profit. Also write the algorithm.	CO1	10 Marks
		(OR)		
6	a)	Write the control abstraction for divide and conquer	CO4	4 Marks
	b)	Sort the following elements using merge sort algorithm. Also write the algorithm with Tree calls representation.	CO4	10 Marks

41	11	3	9	16	2	10	14	8	7

UNIT-IV

7	a)	State **n** queens problem. Solve the problem using backtracking. Also mention the algorithm steps in solving the problem.	CO5	7 Marks
	b)	Write an algorithm for Optimal binary search tree.	CO5	7 Marks
		(OR)		
8	a)	What is dynamic programming? Explain.	CO5	4 Marks
	b)	Solve the following Travelling Salesman Problem (TSP) by the method of dynamic programming. Here 1, 2, 3, 4 represents different cities and each cell value is the distance between corresponding two cities. Also explain the procedure of TSP.	CO1, CO5	10 Marks

	1	2	3	4
1	0	10	15	20
2	5	0	9	10
3	6	13	0	12
4	8	8	9	0

UNIT-V

9	a)	Define and give examples for E-node, Live node and Dead nodes.	CO1	4 Marks
	b)	Solve 15 puzzle problems using state space tree.	CO1	10 Marks
		(OR)		
10	a)	Write the differences between back tracking and branch and bound techniques using example.	CO1	7 Marks
	b)	Give the examples for NP-hard and NP-complete problems. Also Justify your selection.	CO1	7 Marks

JAVA PROGRAMMING

[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	List and explain Java buzzwords. Which factors are making Java famous language?	CO1	10 Marks
	b)	Write about garbage collections.	CO1	4 Marks
		(OR)		
2	a)	Explain control structures in Java with examples.	CO1	7 Marks
	b)	Differentiate method overloading with method overriding with examples.	CO2	7 Marks

UNIT-II

3	a)	What do you mean by static class and static method? Can we make an instance of an abstract class? Justify your answer with an example.	CO3	6 Marks
	b)	Describe how to implement the concept of multiple inheritances with example.	CO3	8 Marks
		(OR)		
4	a)	How to create packages and use them in java?	CO1	7 Marks
	b)	Explain Defining, extending, implementing interfaces with example.	CO2	7 Marks

UNIT-III

5	a)	What is thread synchronization? Discuss with an example.	CO2	8 Marks
	b)	What is the use of finally block? Explain.	CO2	6 Marks
		(OR)		
6	a)	What is the difference between process and thread?	CO1	6 Marks
	b)	What is an error? Explain different types of errors in Java.	CO2	8 Marks

UNIT-IV

7	a)	Explain applet life cycle with neat diagram.	CO4	8 Marks
	b)	Differentiate between swing components and AWT components.	CO4	6 Marks
		(OR)		
8	a)	Discuss the applet structure and compare it with application structure.	CO4	7 Marks
	b)	What is an Event? Explain the role of Event handler in AWT.	CO4	7 Marks

UNIT-V

9	a)	Explain delegation event model in detail.	CO5	7 Marks
	b)	What is a java servlet? Explain with a neat illustration the life cycle of a servlet.	CO5	7 Marks
		(OR)		
10	a)	List and explain the different situations in which the Action Event is generated. Develop the event handler for the Action Event.	CO5	9 Marks
	b)	Explain the procedure to deploy a Servlet in Tomcat Server.	CO5	5 Marks

SOFTWARE ENGINEERING
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the spiral model. What is the task region in the spiral model? How does the customer wins by getting the system or product that satisfy the majority of the customer's needs and the developer wins by working to realistic and achievable budgets and deadline?	CO1	7 Marks
	b)	What are the major differences between system engineering and software engineering? State explains the stages that distinguish the two.	CO1	7 Marks
		(OR)		
2	a)	Explain the Evolutionary and Incremental Model. What are the advantages and disadvantages?	CO1	7 Marks
	b)	Give at least FIVE reasons for prototyping is problematic.	CO1	7 Marks

UNIT-II

3	a)	What is the prototyping technique? How prototype models are prepared for a software process? Discuss.	CO2	7 Marks
	b)	Draw a DFD and CFD of a test monitoring system for Gas Turbine.	CO2	7 Marks
		(OR)		
4	a)	What is requirement engineering? State its process and explain requirements elicitation problem.	CO2	7 Marks
	b)	Why the customer interaction is a difficult process? Explain one formal procedure used for customer interaction.	CO2	7 Marks

UNIT-III

5	a)	Briefly explain the use of global variables in context of coupling cohesion.	CO3	7 Marks
	b)	What is transform mapping? Explain the process with an illustration. What is its strength and weakness.	CO3	7 Marks
		(OR)		
6	a)	What are the benefits of horizontal partitioning?	CO3	7 Marks
	b)	Describe the golden rules for interface design.	CO3	7 Marks

UNIT-IV

7	a)	How the RST condition is verified in black box testing? Explain with example.	CO4	7 Marks
	b)	What are the attributes of a good test? Explain the test case design.	CO4	7 Marks
		(OR)		
8	a)	Explain the testing objectives and its principles.	CO4	7 Marks
	b)	Explain automated testing tools. How test cases are generated? Discuss when to stop testing. What is performance testing? Describe.	CO4	7 Marks

UNIT-V

9	a)	Explain in detail about Process Improvement.	CO6	7 Marks
	b)	Explain in detail business process reengineering.	CO6	7 Marks
		(OR)		
10	a)	Propose RMMM plan for Staff inefficiency risk while developing a software project.	CO6	7 Marks
	b)	What are all the formulas for cyclomatic complexity? Calculate cyclomatic Complexity for greatest of three numbers.	CO4	7 Marks

THEORY OF COMPUTATION

[Information Technology, Computer Science and Systems Engineering]

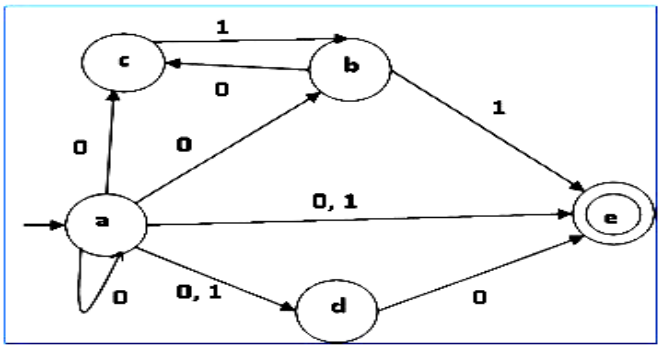
Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) What are the differences between DFA and NDFA? CO1 7 Marks

b) Let us consider the NDFA shown in the figure below. Find its equivalent DFA. CO1 7 Marks



(OR)

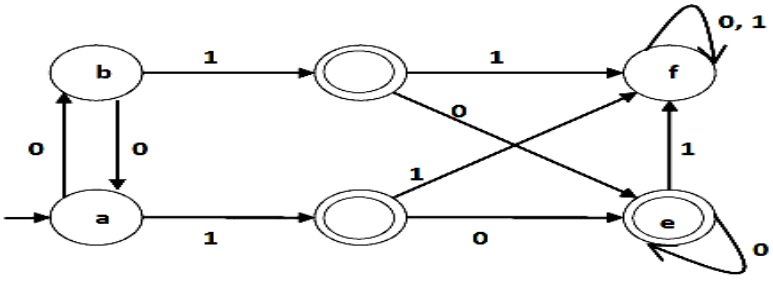
2 a) Define the closure properties of NFA. CO1 7 Marks

b) Conversion from Mealy to Moore Machine for the following table. CO2 7 Marks

	Input = 0		Input = 1	
Present State	Next State	Output	Next State	Output
q_0	q_1	0	q_2	0
q_1	q_1	0	q_2	1
q_2	q_1	1	q_2	0

UNIT-II

3 a) State and explain DFA Minimization using Myphill-Nerode theorem with the following example CO2 7 Marks

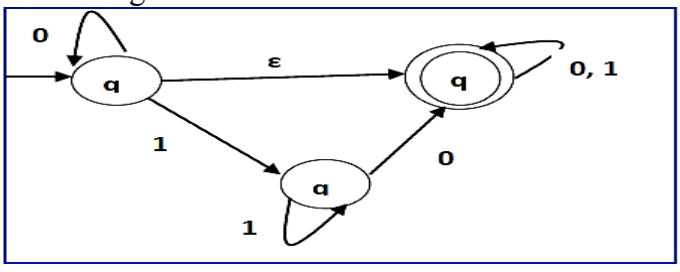


b) Explain the properties of Regular Sets. CO2 7 Marks

(OR)

4 a) Prove that $\mathbf{L = \{a^i b^i \mid i \geq 0\}}$ is not regular. CO2 7 Marks

b) Convert the following NFA-ε to NFA without Null move. CO2 7 Marks



UNIT-III

5	a)	Define context-free grammar. Explain with example.	CO3	7 Marks
	b)	Remove unit production from the following.	CO3	7 Marks
		$S \rightarrow XY,\ X \rightarrow a,\ Y \rightarrow Z \mid b,\ Z \rightarrow M,\ M \rightarrow N,\ N \rightarrow a$		
		(OR)		
6	a)	Find out whether the language $\mathbf{L = \{x^n y^n z^n \mid n \geq 1\}}$ is context free or not. Using Pumping lemma theorem.	CO3	7 Marks
	b)	Convert the following CFG into CNF	CO3	7 Marks
		$S \rightarrow XY \mid Xn \mid p \quad X \rightarrow mX \mid m \quad Y \rightarrow Xn \mid o$		

UNIT-IV

7	a)	Explain the basic structure of PDA.	CO4	7 Marks
	b)	Construct a PDA that accepts $\mathbf{L = \{0^n\ 1^n \mid n \geq 0\}}$	CO4	7 Marks
		(OR)		
8	a)	Write an algorithm to find PDA corresponding to a given CFG.	CO4	7 Marks
	b)	Design a top-down parser for the expression **"x+y*z"** for the grammar G with the following production rules.	CO4	7 Marks
		P: $S \rightarrow S+X \mid X,\ X \rightarrow X*Y \mid Y,\ Y \rightarrow (S) \mid id$		

UNIT-V

9	a)	Explain the model of Turing Machine (TM).	CO5	7 Marks
	b)	Design a TM to recognize all strings consisting of an odd number of α's.	CO5	7 Marks
		(OR)		
10	a)	Explain the concept of Multi-tape Turing Machines.	CO5	7 Marks
	b)	Explain Semi-Infinite Tape Turing Machine with neat sketch.	CO5	7 Marks

II B.Tech II Semester (SVEC-16) Supplementary Examinations August – 2021

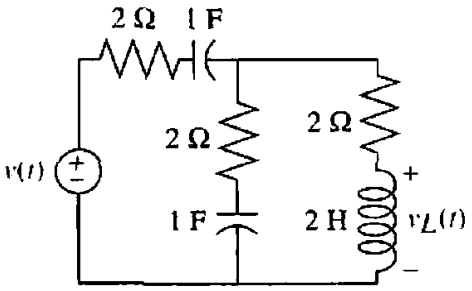
CONTROL SYSTEMS
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

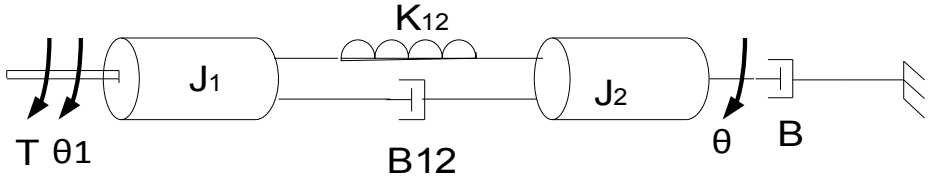
UNIT-I

1	a)	Discuss the effect of feedback on Gain, Stability, Sensitivity and Noise.	CO1	7 Marks
	b)	Derive the transfer function of following electrical network. Take input as $V(t)$ and output is current through the inductor.	CO4	7 Marks



(OR)

2		For the mechanical system, draw the electrical analogous circuits based on Torque-Voltage and Torque-Current analogy along their equations.	CO4	14 Marks



UNIT-II

3		The transfer function of a unity feedback system $G(S)H(S) = \frac{k}{s(s+2)(s+4)}$. Sketch the root locus and determine: i) The value of k to have 40 % overshoot for unit step input. ii) Value of K_V corresponding to value of K as obtained in (i). iii) Value of settling time t_s.	CO2	14 Marks

(OR)

4		Determine the resonant frequency W_r, resonant peak M_r, time to reach first overshoot, settling time and band width for the system whose transfer function is given by $\frac{C(s)}{R(s)} = \frac{5}{S^2+2S+5}$.	CO4	14 Marks

UNIT-III

5		A unity feedback system has an open loop transfer function $G(S) = \frac{60}{(S+1)(S+2)(S+5)}$. Sketch Nyquist plot for the system and determine whether the closed loop system is stable or not.	CO5	14 Marks

(OR)

6		Sketch the bode plot for system $G(S)H(S) = \frac{5(1+2S)}{(1+4S)(1+0.25S)}$ and comment on its stability.	CO5	14 Marks

UNIT-IV

7	a)	What are the types of controllers? Mention the effect of P, PID on controllers.	CO1	7 Marks
	b)	Explain the effect of the P controller on time response characteristics.	CO1	7 Marks

(OR)

8		A unity feed back system has an open-loop transfer function of $G(S) = \frac{4}{S(2S+1)}$. It is desired to obtain a phase margin of 40^0 without sacrificing the K_V of the system. Design a suitable lag-network and compute the value of network components assuming any suitable impedance level.	CO3	14 Marks

UNIT-V

9	a)	Explain the concept of controllability and observability.	CO1	7 Marks
	b)	The transfer function of a control system is given by $\frac{Y(s)}{U(s)} = \frac{S+2}{S^3+9S^2+26S+24}$. Check for controllability and observability.	CO2	7 Marks

(OR)

10		A system is characterized by the following state space equations.	CO4	14 Marks

$$\begin{bmatrix} \dot{X}_1 \\ \dot{X}_2 \end{bmatrix} = \begin{bmatrix} -3 & 1 \\ -2 & 0 \end{bmatrix} \begin{bmatrix} X_1 \\ X_2 \end{bmatrix} + \begin{bmatrix} 0 \\ 1 \end{bmatrix} u; t > 0$$

$$y = \begin{bmatrix} 1 & 0 \end{bmatrix} \begin{bmatrix} X_1 \\ X_2 \end{bmatrix}$$

i) Find the transfer function of the system.
ii) Compute the state transition matrix.
iii) Solve the state equation for the unit step input under zero initial conditions.

ELECTRONIC CIRCUIT ANALYSIS AND DESIGN

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Apply cascoding concept to get large voltage gain.	CO6	7 Marks
	b)	Draw the single stage CE amplifier with an Emitter Resistance and explain the function of each component in it.	CO1	7 Marks
		(OR)		
2	a)	Apply cascading technique to construct a Direct coupled amplifier.	CO6	7 Marks
	b)	Derive expressions for Current gain, Voltage gain and Input Resistance and Output Resistance of Darlington amplifier.	CO3	7 Marks

UNIT-II

3	a)	Derive the expressions of Gain Bandwidth product for voltage and current.	CO3	7 Marks
	b)	A Transistor in CE configuration has the following parameters h_{fe}=210 and h_{ie}=4kΩ at I_c =2mA, with f_T =70MHz and $C_{b'c}$ =10pF. Determine r_{bb}', g_m, $r_{b'e}$, and $C_{b'e}$ at room temperature.	CO4	7 Marks
		(OR)		
4	a)	Prove that: i) $\mathbf{h_{ie}=r_{bb'}+r_{b'e}}$ ii) $\mathbf{g_{ce}= h_{oe}- g_m h_{re}}$	CO3	7 Marks
	b)	Write short notes on Frequency effects in Multistage Amplifiers.	CO1	7 Marks

UNIT-III

5	a)	Apply Voltage series feedback concept in a Emitter follower.	CO6	7 Marks
	b)	Select a RC phase shift Oscillator to get low frequency sign wave and derive the expression for the frequency of oscillations.	CO5	7 Marks
		(OR)		
6	a)	A Crystal oscillator has the following parameters. C**s** = 0**.**045pF, L=0**.**30H, C**p** = 2**.**0pF and R = 6**.**5KΩ. Find the series resonant frequency and Q - factor of the crystal.	CO4	7 Marks
	b)	Select a two Stage CE amplifier circuit and explain current-shunt feedback concept.	CO5	7 Marks

UNIT-IV

7	a)	Calculate the Output power and efficiency for a single ended class A power amplifier is coupled to an 10Ω load, using a transformer with a turn ratio of 8**:**2 with a 40V supply the transistor is biased to have a quiescent collector current of 200mA for a sinusoidal signal applied to the base, the collector voltage varies between a maximum of 5V and maximum of 80V.	CO4	7 Marks
	b)	Compare in between power amplifiers and small signal voltage amplifiers.	CO2	7 Marks
		(OR)		
8	a)	Derive an expression for maximum efficiency for Class - B complementary symmetry power amplifier	CO2	7 Marks
	b)	A class - B push pull power amplifier drives a load of 10Ω connected to the secondary of an ideal transformer. If the number of turns on the primary is 100 and that on the secondary is 20, calculate the maximum power output, dc power input, efficiency and maximum power dissipated per transistor if the supply voltage is 25Volts.	CO4	7 Marks

UNIT-V

9	a)	Obtain the expression for expression for Gain and Bandwidth in terms of effective Q – factor for capacitive coupled single tuned amplifier.	CO2	6 Marks
	b)	What are tuned amplifiers? How it is classified? Explain its operation.	CO1	8 Marks
		(OR)		
10	a)	Explain the class - C tuned amplifier and derive its efficiency equation.	CO1	7 Marks
	b)	Compare in between double tuned and single tuned amplifiers.	CO2	7 Marks

SIGNALS AND SYSTEMS
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Bring out the relation between: i) Signum and step function. ii) Sinusoidal and exponential functions based on their properties.	CO2	8 Marks
	b)	Express the Impulse function in terms of sampling function and explain its significance	CO4	6 Marks
		(OR)		
2	a)	List out the properties of an LTI system.	CO2	6 Marks
	b)	Evaluate the following integrals $\int_0^5 \delta(t)\sin(2\pi t)dt$ *and* $\int_{-\alpha}^{\alpha} e^{-\alpha t^2}\delta(t-10)dt$	CO4	8 Marks

UNIT-II

3	a)	What is the relationship between cosine and trigonometric representation of Fourier series?	CO1	6 Marks
	b)	Consider full rectified sine wave with peak amplitude ‘’ and time period is ‘’; expand this function in terms of exponential Fourier series. Also sketch the spectrum.	CO3	8 Marks
		(OR)		
4	a)	State and prove: i) Parseval’s relation. ii) Auto correlation property.	CO1	4 Marks
	b)	Consider a stable LTI System characterized by the differential equation $x(t) = \frac{dy(t)}{dt} + 2y(t)$. Find its impulse response.	CO2	10 Marks

UNIT-III

5	a)	A filter has an input $\mathbf{x(t)=e^{-2t}u(t)}$ and transfer fun ction, H(W)=1/(1+jw). Find ESD of the output.	CO1	8 Marks
	b)	The auto correlations function of an a periodic signal is: $R(t) = e^{\frac{-t^2}{2\sigma}}$ determine the PSD.	CO3	6 Marks
		(OR)		
6	a)	Examine how convolution and correlation of a signal are related in the context of signal processing.	CO3	7 Marks
	b)	Find the power, rms value and sketch the PSD for the following signal. x(t) = (A+sin 100t) cos200t.	CO1	7 Marks

UNIT-IV

7	a)	Obtain the Laplace Transform of a gate function and define ROC and with their conditions.	CO4	8 Marks
	b)	State and prove time-differentiation property and time integration property of one-sided Laplace transform	CO1	6 Marks
		(OR)		

8	a)	Find the Laplace transform of the following waveform 	CO4	9 Marks
	b)	State and explain ROC Property of Laplace Transform if x(t) is two sided signal.	CO1	5 Marks

UNIT-V

9	a)	A signal g(t) = Cos(200πt) + 2Cos(280πt) is sampled at a sampling frequency of 300 Hz. If the sampled signal is transmitted through an ideal LPF with cut-off frequency of 250 Hz, what frequency component will present in the output?	CO5	10 Marks
	b)	Mention and compare different types of sampling techniques with neat waveforms.	CO2	4 Marks

(OR)

10	a)	Prove that the final value of x[n] for $X(z) = \frac{z^2}{(z-1)(z-0.2)}$ is 1.25 and its initial value is unity.	CO5	8 Marks
	b)	Obtain the relationship among the Fourier Transform, Laplace Transform and Z-Transform.	CO2	6 Marks

SWITCHING THEORY AND LOGIC DESIGN

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw the logic diagram using AOI Logic to realize the following expressions i) $A \oplus B \oplus C$ ii) $A \odot B \odot C$	CO3	7 Marks
	b)	Assume that the even parity hamming code is $(0100111)_2$ is transmitted and that $(0100011)_2$ is received explain the process of identifying the error.	CO2	7 Marks
		(OR)		
2	a)	Minimize the following boolean expression to a minimum number of literals. i) (x'y'+z)'+z+xy+wz to three literals. ii) (A'+C)(A'+C')(A'+B+C'D).	CO3	7 Marks
	b)	Find the complement and the dual of the function given below $F=[(xy)'x][(xy)'y]$	CO5	7 Marks

UNIT-II

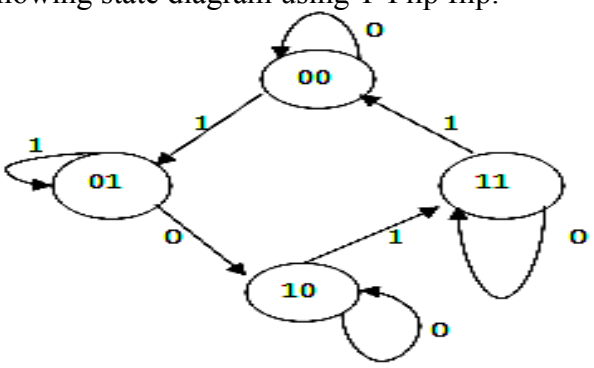
3	a)	Simplify the following function using K-map method. F (A, B, C, D) = Σm(0,1,2,3,4,10,11,12)+d (0, 3, 6, 10).	CO5	7 Marks
	b)	Minimize the following expression using K-map and realize using NAND gates. F = Σm(1, 2, 3, 8, 9, 10, 11, 15)	CO3	7 Marks
		(OR)		
4	a)	Simplify the following function using Tabular Method. F (X, Y, Z, W) = Σm(0,1,2,3,4,11,12).	CO5	7 Marks
	b)	Minimize the following expression using K-Map Y(w,x,y,z)=∑m(1,2,3,5,9,12)	CO3	7 Marks

UNIT-III

5	a)	Construct a 16 x 1 Mux by using 4 x 1 Mux.	CO6	7 Marks
	b)	Realize the function "F" using MUX F(P,Q,R,S)= ∑m (0,1,3,4,8,9,15).	CO3	7 Marks
		(OR)		
6	a)	Draw the BCD to seven segment display decoders.	CO6	8 Marks
	b)	Design a 16-line to 1-line multiplexer using 2-line to 1-line multiplexer.	CO3	6 Marks

UNIT-IV

7	a)	Explain the working of Master/Slave JK FF.	CO1	7 Marks
	b)	Reduce the following state diagram using T-Flip flip.	CO5	7 Marks



(OR)

8	a)	Differentiate between Asynchronous and Synchronous Counter.	CO1	7 Marks
	b)	Show that, how ring counter will act as a johnson counter.	CO4	7 Marks

UNIT-V

9	a)	Reduce the following sequential circuit using D-flip-flop for the following state table1:	CO2	7 Marks

Table:1

Present state	Next state		Output(Z)	
	X=1	X=0	X=1	X=0
Q_1	Q_2	Q_1	0	0
Q_2	Q_3	Q_1	0	0
Q_3	Q_4	Q_5	0	0
Q_4	Q_4	Q_1	0	0
Q_5	Q_2	Q_1	1	0

	b)	Apply 2-bit binary input to PROM and generate square of the binary input.	CO4	7 Marks

(OR)

10	a)	Reduce the following sequential circuit using T-flip-flop considering the following table	CO2	7 Marks

Table.3

Present State		**Next State**		**output**	
		X=0	**X=1**	**X=0**	**X=1**
A	B	AB	AB	Y	Y
0	0	00	10	0	0
0	1	11	00	0	0
1	0	10	01	1	1
1	1	00	10	1	0

	b)	Obtain capabilities and limitations of finite state machines with aid of neat sketches.	CO4	7 Marks

STRUCTURAL ANALYSIS-I
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

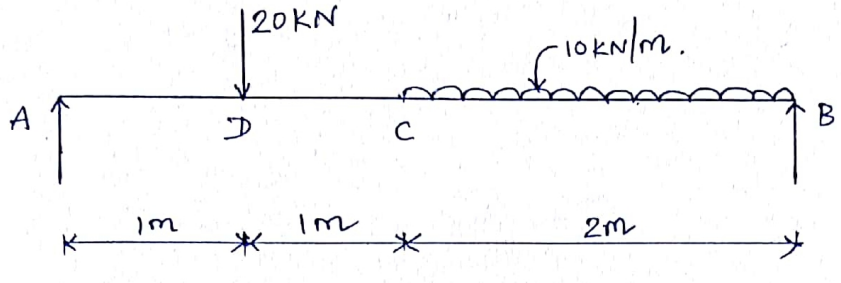
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive the expression for the stresses acting in an inclined plane due to the forces acting in only one direction.	CO1	6 Marks
	b)	At a point in a strained material the normal stresses on two planes at right angles are 80N/mm² and 60N/mm² and both are tensile. Find the resultant intensity of stress on a plane inclined at 45° to the axis of maximum stress.	CO2	8 Marks
		(OR)		
2	a)	At a point in a strained material the normal stresses on two planes at right angles are 100N/mm² and 50N/mm² and both are compressive. Find the resultant intensity of stress on a plane inclined at 60° to the axis of maximum stress.	CO2	4 Marks
	b)	At a point in a strained material the resultant intensity of stress across a plane is 56.56N/mm² in tensile inclined at 45° to its normal. The normal component of the intensity across planes at right angles is 20N/mm² compressive. Find the position of principal planes and stresses across them. Also determine the value of maximum shear at that point.	CO2	10 Marks

UNIT-II

3	a)	Derive the relation between slope, deflection and radius of curvature.	CO1	8 Marks
	b)	A cantilever beam 1.5m long having cross sectional dimensions as 100mm x 150mm carries a uniformly distributed load of 5kN/m throughout. Determine the slope and deflection at the free end.	CO2	6 Marks
		(OR)		
4		A beam AB of span 4 meters is simply supported at the ends and is loaded as shown in the figure. Determine: i) Deflection at C. ii) Maximum Deflection. iii) Slope at end A. Take E= 200 x 10^6 kN/m² and I= 20 x 10^{-6} m⁴.	CO4	14 Marks



UNIT-III

5		List out the assumptions made in Euler's theory. Derive the Euler's formula when both ends of the column are hinged.	CO1	14 Marks
		(OR)		

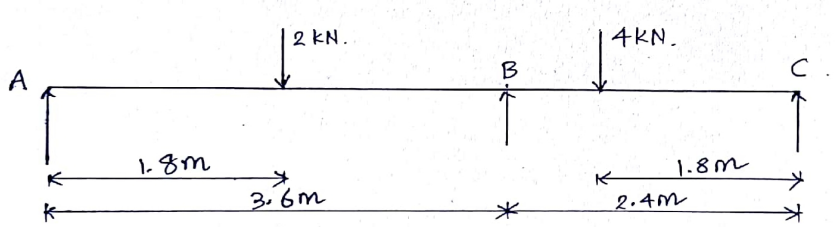
6		Compare the crippling loads given by Rankine's and Euler's formulae for tubular strut 2.25 m long having outer and inner diameters of 37.5 mm and 32.5 mm loaded through pin-joint at both ends. Take yield stress as 315 MN/m^2; a = 1/7500; and E = 200 GN/m^2. If elastic limit for the material is taken as 200 MN/m^2, then for what length of the strut does the Euler formula cease to apply?	CO5	14 Marks

UNIT-IV

7		Analyze a fixed beam AB of span 'l' carrying a point load W at the mid-span. Draw the shear force and bending moment diagrams.	CO2	14 Marks

(OR)

8		Draw the bending moment and shear force diagrams of a beam shown in the figure which is simply supported at the supports A and C and is continuous over the support B. Assume EI is constant.	CO6	14 Marks



UNIT-V

9	a)	Explain in detail about Maximum Shear Stress theory.	CO1	7 Marks
	b)	In a metallic body the principal stresses are +35 MN/m^2 and -95 MN/m^2, the third principal stress being zero. The elastic limit stress in simple tension as well as in simple compression is equal and is 220 MN/m^2. Find the factor of safety based on the elastic limit, if the criterion of the failure for the material is the maximum principal stress theory.	CO5	7 Marks

(OR)

10		A cantilever of a rectangular section 40 mm wide and 60mm deep is subjected to an inclined load P at the free end. The inclination of the load is 25° to the vertical. If the length of the cantilevers is 2m and the maximum stress due to bending is not to exceed 200 MN/m^2, determine the value of P.	CO3	14 Marks

ELECTRICAL MEASUREMENTS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define measurement and explain the classification of measuring instruments.	CO1	6 Marks
	b)	Describe the various operating forces required for proper operation of analog indicating instruments and write its importance.	CO1	8 Marks
		(OR)		
2	a)	Three Resistors have the following ratings: R_1=37±5%, R_2=75±3%, R_3=50±5%. Determine the magnitude and limiting error in Ohm and percentage error of the resistance when three resistors are connected in series.	CO4	7 Marks
	b)	Design a universal or ayrton shunt to provide an ammeter with current range of 1A, 5A and 10A. A basic meter with an internal resistance of 50Ω and full scale deflection current of 1mA is to be used.	CO3	7 Marks

UNIT-II

3		Describe the constructional details of the Electrodynamometer type wattmeter with a neat sketch and also derive the torque equation.	CO2	14 Marks
		(OR)		
4	a)	Explain the sources of errors and compensation in single phase induction type energy meter.	CO1	7 Marks
	b)	A 230 V, single phase, watt hour meter has a constant load of 4 A passing through it for 6 hours at unity power factor. If the meter disc makes 2208 revolutions during this period. Determine: i) The meter constant in revolutions per kWh. ii) Evaluate the power factor of the load if the number of revolutions made by the meter are 1472 when operating at 230V and 5 A for 4 hours.	CO4	7 Marks

UNIT-III

5		Draw the equivalent circuit and phasor diagram of a current transformer and derive the expressions for ratio and phase angle errors.	CO2	14 Marks
		(OR)		
6	a)	Describe in detail about the construction and working principle of single phase EDM type power factor meter.	CO1	9 Marks
	b)	A 1000/5A, 50Hz current transformer has secondary burden of 1.5Ω (non-inductive). Calculate the flux in the core and the ratio error at rated condition of the current transformer. Assume iron loss in the core to be 1.5 Watts. Neglect leakage flux and magnetizing current.	CO4	5 Marks

UNIT-IV

7	a)	Describe the method of measurement of medium resistance using wheatsone bridge.	CO1	7 Marks
	b)	The four arms of a Wheatstone bridge are as follows. AB = 100Ω; BC = 1000Ω; CD = 4000 Ω; DA = 400 Ω. The galvanometer has a resistance of 100 Ω, and sensitivity of 100mm/μA and it is connected across AC. A source of 4V D.C is connected across BD. Calculate the current through the galvanometer and its deflection if the resistance of arm DA is changed from 400Ω to 401Ω.	CO4	7 Marks

(OR)

8	a)	Derive the expression for unknown induction by balancing Maxwell inductance bridge and draw the phasor diagram, advantages and disadvantages of the bridge.	CO2	8 Marks
	b)	An Owen's bridge is used to measure the properties of a sample of sheet steel at 2 kHz. At balance, arm *AB* is test specimen; arm *BC* is R_3=100Ω; arm *CD* is C_4 = 0.1μF and arm *DA* is R_2 = 834Ω in series with C = 0.124 μF. Determine the effective impedance of the specimen under test conditions.	CO6	6 Marks

UNIT-V

9	a)	Explain the term "Standardization" of a potentiometer. Describe the procedure for Standardization of a D.C potentiometer.	CO1	7 Marks
	b)	A basic slide wire potentiometer has a working battery voltage of 3.0 V with negligible internal resistance. The resistance of slide wire is 400 Ω and its length is 200 cm. A 200 cm scale is placed along the slide wire. The slide wire has 1 mm scale divisions and it is possible to read up to 1/5 of a division. The instrument is standardized with 1.018 V standard cell with sliding contact at the 101.8 cm mark on scale. Compute: i) working current. ii) the resistance of series rheostat. iii) the measurement range. iv) the resolution of instrument.	CO4	7 Marks

(OR)

10	a)	Describe in detail about the function of different parts of CRT with neat sketch.	CO1	7 Marks
	b)	Describe in detail about the ramp type digital voltmeters with neat sketch.	CO1	7 Marks

GENERATION OF ELECTRIC POWER
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Write the advantages and disadvantages of steam power plant over other plants.	CO2	7 Marks
	b)	Classify different types of turbines used in thermal power stations.	CO1	7 Marks
		(OR)		
2	a)	List some factors which should be considered for site selection of hydro plants.	CO5	6 Marks
	b)	Classify different types of hydro electric power stations.	CO1	8 Marks

UNIT-II

3	a)	Discuss some environmental regulations to be followed for erecting nuclear power generating plants.	CO8	6 Marks
	b)	Explain the energy cycle for a simple-cycle gas turbine with the help of neat diagram.	CO1	8 Marks
		(OR)		
4	a)	Explain the process of chain reaction due to fission and fusion.	CO1	9 Marks
	b)	Briefly discuss with a neat diagram about: i) fuel. ii) moderator. iii) reflector. iv) control rods. v) shield in nuclear power plant.	CO1	5 Marks

UNIT-III

5	a)	Enlist the applications of renewable energy sources.	CO1	6 Marks
	b)	Define the following. i) solar cell. ii) PV module. iii) PV array. iv) short circuit current. v) open circuit voltage. vi) fin factor. vii) solar cell efficiency. viii) peak watt.	CO1	8 Marks
		(OR)		
6	a)	Describe the principle of fuel cells. Discuss the choice of fuel cells required with relative advantages and disadvantages.	CO6	7 Marks
	b)	What are the different types of wind mills used in wind turbine power plants? Discuss the impact of wind power plants on environment.	CO7	7 Marks

UNIT-IV

7	a)	Deduce the relation between load factor and loss factor for the following cases. i) Off peak load is zero. ii) Existing of very short peak value. iii) Load is steady.	CO2	8 Marks
	b)	A distribution transformer costs Rs 2,00,000 and has a useful life of 20 years. If the salvage value is Rs 10,000 and rate of annual compound interest is 8%, then calculate the amount to be saved annually for replacement of the transformer at the end of 20 years by sinking fund method.	CO4	6 Marks
		(OR)		

8	a)	What is the significance of depreciation in the economics of power generation?	CO1	6 Marks
	b)	Explain: i) two part tariff. ii) three part tariff. iii) power factor tariff.	CO1	8 Marks

UNIT-V

9	a)	Define power factor and explain its importance and discuss its disadvantages of low power factor.	CO1	7 Marks
	b)	Show that the economical limit to which the power factor of a load can be raised is independent of the original value of power factor when the tariff consists of a fixed charge per kVA of maximum demand plus a flat rate per kWh.	CO2	7 Marks

(OR)

10	a)	Write short notes on the following : i) Design of capacitor bank for power factor improvement. ii) Importance of p.f. improvement. iii) Economics of p.f. improvement.	CO3	7 Marks
	b)	Explain the principle of cogeneration and mention how the cogeneration can be implemented for generating electricity.	CO1	7 Marks

TRANSFORMERS AND INDUCTION MACHINES

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	"Voltage regulation of a transformer varies with power factor". Justify the statement.	CO2	6 Marks
	b)	A 20 kVA 2500/500V single phase transformer has winding impedance of 8+j17 Ω and 0.3+j0.7 Ω on HV side and LV side respectively. Find the voltage regulation and secondary terminal voltage at full load for a p.f. of (i) 0.8 lagging and (ii) 0.8 leading	CO4	8 Marks
		(OR)		
2	a)	Derive an expression for computing the per unit voltage regulation of a transformer both for lagging and leading power factors.	CO1	6 Marks
	b)	A 3300/230V single phase transformer has an equivalent resistance of 0.015 p.u. and an equivalent reactance of 0.04 p.u. Find the secondary terminal voltage at full load and 0.8 p.f. lag, for a voltage of 3300V.	CO4	8 Marks

UNIT-II

3	a)	State the essential and desirable conditions which should be satisfied for parallel operation of two single phase transformers.	CO1	6 Marks
	b)	Two single-phase transformers in parallel supply a load of 500 amperes at 0.8 p.f. lagging and at 400 volts. Their equivalent impedances referred to secondary windings are (2+j3) ohms and (2.5+j5) ohms. Compute the current and kVA supplied by each transformer and the corresponding power factors.	CO4	8 Marks
		(OR)		
4	a)	Prove that in an auto-transformer, the power transfer from primary circuit to the secondary circuit is partly by induction and partly by conduction.	CO2	6 Marks
	b)	A 11000/2200 V, 100 kVA, 1-phase two-winding transformer is to be used as an auto-transformer by connecting the two windings in series. Obtain the possible values of voltage ratios and kVA outputs.	CO4	8 Marks

UNIT-III

5		Give the equivalent circuit and applications of 3-winding transformer. Explain how the parameters can be determined experimentally.	CO1	14 Marks
		(OR)		
6		Why the tap changing transformers are required? Also discuss the function and principle of operation of no-load and on-load tap changing transformers with neat diagrams.	CO1	14 Marks

UNIT-IV

7	a)	Explain how the rotating magnetic field is produced in a 3-phase induction motor.	CO1	7 Marks
	b)	A 3-phase induction motor is wound for 4-poles and is supplied from 50Hz system. Calculate the synchronous speed, the rotor speed when slip is 4% and rotor frequency when motor runs at 600 r.p.m.	CO4	7 Marks
		(OR)		

8	a)	Compare a single-cage induction motor with a double-cage inductor motor of same rating.	CO1	6 Marks
	b)	Derive the relationship between the torques developed by outer and inner cages of a double-cage induction motor.	CO2	8 Marks

UNIT-V

9	a)	Explain the speed control method of 3-phase induction motor by varying the supply frequency.	CO5	7 Marks
	b)	A 50 Hz, 440 V, 3-phase, 4-pole induction motor develops half the rated torque at 1490 r.p.m. With the applied voltage remaining at rated value, what would be its frequency, if the motor has to develop the same torque at 1600 r.p.m? Neglect stator and rotor winding resistances and leakage reactances and iron losses.	CO4	7 Marks

(OR)

10	a)	A 3-phase induction motor is used in railway traction application. It is used for motoring, braking and generating. With the help of torque-slip characteristics explain the above said modes of operation of a 3-phase induction motor	CO6	8 Marks
	b)	Find the ratio of starting current to full load current for a 10kW, 400V, 3-phase induction motor with a star - delta starter if the full load efficiency is 0.86, the full load power factor is 0.8 and short circuit current is 30A at 100V.	CO2	6 Marks

DESIGN OF MACHINE ELEMENTS - I
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Enumerate the various manufacturing methods of machine parts which a designer should know.	CO1	7 Marks
	b)	What are the factors to be considered for the selection of materials for the design of machine elements?	CO1	7 Marks
		(OR)		
2		The following results were obtained in a tensile test on a mild steel specimen of original diameter 20 mm and gauge length 40 mm. Load at limit of proportionality = 80 kN Extension at 80 kN load = 0.048 mm Load at yield point = 85 kN Maximum load = 150 kN When the two parts were fitted together after being broken, the length between gauge lengths was found to be 55.6 mm and the diameter at the neck was 15.8 mm. Calculate Young's modulus, yield stress, ultimate tensile stress, percentage elongation and percentage reduction in area.	CO3	14 Marks

UNIT-II

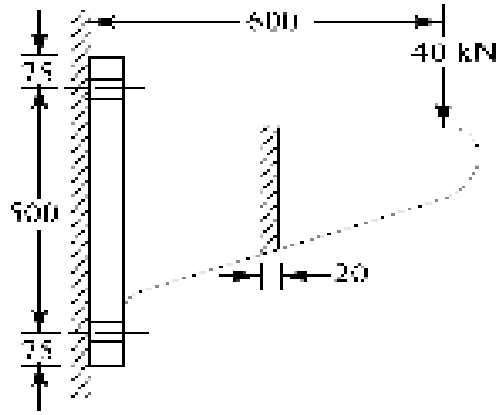
3	a)	What is meant by endurance strength of a material? How do the size and surface condition of a component and type of load and affect such strength?	CO1	4 Marks
	b)	A circular bar of 500mm length is supported freely at its two ends. It is acted upon by a central concentrated cyclic load having a minimum value of 20kN and maximum value of 50kN. Determine the dia. of bar by taking a factor of safety of 1.5, size effect of 0.85, surface finish factor of 0.9. The material properties of bar are given by ultimate strength of 650 MPa, yield strength of 500 MPa and endurance strength of 350 MPa.	CO5	10 Marks
		(OR)		
4	a)	Formulate Goodman's equation and state its application to different types of loading.	CO2	6 Marks
	b)	A 50mm diameter shaft is made from carbon steel having ultimate tensile strength of 630 MPa. It is subjected to a torque which fluctuates between 2000 N-m to 800 N-m. Using Soderberg method, calculate the factor of safety. Assume suitable values for any other data needed.	CO4	8 Marks

UNIT-III

5	a)	Discuss on bolts of uniform strength giving examples of practical applications of such bolts.	CO1	7 Marks
	b)	A plate 100 mm wide and 12.5 mm thick is to be welded to another plate by means of parallel fillet welds. The plates are subjected to a load of 50 kN. Find the length of the weld so that the maximum stress does not exceed 56 MPa. Consider the joint first under static loading and then under fatigue loading.	CO4	7 Marks

(OR)

6 A wall bracket, as shown in figure is fixed to a wall by means of four bolts. CO4 14 Marks



All dimensions in mm.

Find the size of the bolts and the width of bracket. The safe stress in tension for the bolt and bracket may be assumed as 70 MPa.

UNIT-IV

7 a) A steel spindle transmits 4 kW at 800 r.p.m. The angular deflection should not exceed 0.25° per metre of the spindle. If the modulus of rigidity for the material of the spindle is 84 GPa, find the diameter of the spindle and the shear stress induced in the spindle. CO3 7 Marks

b) A solid shaft is transmitting 1 MW at 240 r.p.m. Determine the diameter of the shaft if the maximum torque transmitted exceeds the mean torque by 20%. Take the maximum allowable shear stress as 60 MPa. CO3 7 Marks

(OR)

8 Design and draw a protective type of cast iron flange coupling for a steel shaft transmitting 15 kW at 200 r.p.m and having an allowable shear stress of 40 MPa. The working stress in the bolts should not exceed 30 MPa. Assume that the same material is used for shaft and key and that the crushing stress is twice the value of its shear stress. The maximum torque is 25% greater than the full load torque. The shear stress for cast iron is 14 MPa. CO4 14 Marks

UNIT-V

9 Design a sleeve and cotter joint to resist a tensile load of 50 kN. All parts of the joint are made of the same material with the following allowable stresses: σ_t =50 MPa; ζ =70 MPa ; and σ_c=125 MPa. CO6 14 Marks

(OR)

10 Design a cotter joint to connect piston rod to the crosshead of a double acting steam engine. The diameter of the cylinder is 300 mm and the steam pressure is 1 N/mm^2. The allowable stresses for the material of cotter and piston rod are as follows:
σ_t=50 MPa; ζ=40 MPa; and σ_c=84 MPa CO4 14 Marks

DYNAMICS OF MACHINERY
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		A centrifugal clutch is to transmit 15 kW at 900 r.p.m. The shoes are four in number. The speed at which the engagement begins is $3/4^{th}$ of the running speed. The inside radius of the pulley rim is 150 mm and the centre of gravity of the shoe lies at 120 mm from the centre of the spider. The shoes are lined with Ferrodo for which the coefficient of friction may be taken as 0.25. Determine : i) Mass of the shoes. ii) Size of the shoes, if angle subtended by the shoes at the centre of the spider is 60^{o} and the pressure exerted on the shoes is $0.1N/mm^{2}$.	CO2	14 Marks

(OR)

2	a)	Classify Dynamometers and explain any one Dynamometer with a neat sketch.	CO1	6 Marks
	b)	In a band and block brake, the band is lined with 14 blocks, each of which subtends an angle of 20° at the drum centre. One end of the band is attached to the fulcrum of the brake lever and the other to a pin 150 mm from the fulcrum. Find the force required at the end of the lever 1 metre long from the fulcrum to give a torque of 4 kN-m. The diameter of the brake drum is 1 metre and the coefficient of friction between the blocks and the drum is 0.25.	CO2	8 Marks

UNIT-II

3	a)	What do you understand by gyroscopic couple? Derive a formula for its magnitude.	CO1	7 Marks
	b)	An aeroplane makes a complete half circle of 50 metres radius, towards left, when flying at 200 km per hr. The rotary engine and the propeller of the plane has a mass of 400 kg and a radius of gyration of 0.3 m. The engine rotates at 2400 r.p.m. clockwise when viewed from the rear. Find the gyroscopic couple on the aircraft and state its effect on it.	CO3	7 Marks

(OR)

4	a)	Define Coefficient of Fluctuation of Energy and Coefficient of Fluctuation of Speed	CO1	4 Marks
	b)	The flywheel of a steam engine has a radius of gyration of 1 m and mass 2500 kg. The starting torque of the steam engine is 1500 N-m and may be assumed constant. Determine: i) the angular acceleration of the flywheel. ii) the kinetic energy of the flywheel after 10 seconds from the start. Discuss in detail various attribute charts.	CO3	10 Marks

UNIT-III

5	a)	Explain the terms and derive expressions for 'effort' and 'power' of a Porter governor.	CO1	7 Marks
	b)	A loaded Porter governor has four links each 250 mm long, two revolving masses each of 3 kg and a central dead weight of mass 20 kg. All the links are attached to respective sleeves at radial distances of 40 mm from the axis of rotation. The masses revolve at a radius of 150 mm at minimum speed and at a radius of 200 mm at maximum speed. Determine the range of speed.	CO2	7 Marks

(OR)

6		In a Hartnell governor, the lengths of ball and sleeve arms of a bell crank lever are 120 mm and 100 mm respectively. The distance of the fulcrum of the bell crank lever from the governor axis is 140 mm. Each governor ball has a mass of 4 kg. The governor runs at a mean speed of 300 r.p.m. with the ball arms vertical and sleeve arms horizontal. For an increase of speed of 4 per cent, the sleeve moves 10 mm upwards. Neglecting friction, find : i) the minimum equilibrium speed if the total sleeve movement is limited to 20 mm. ii) the spring stiffness. iii) the sensitiveness of the governor. iv) the spring stiffness if the governor is to be isochronous at 300 r.p.m.	CO2	14 Marks

UNIT-IV

7	a)	Explain clearly the terms 'static balancing' and 'dynamic balancing'. State the necessary conditions to achieve them.	CO1	7 Marks
	b)	Four masses m_1 , m_2 , m_3 and m_4 are 200 kg, 300 kg, 240 kg and 260 kg respectively. The corresponding radii of rotation are 0.2 m, 0.15 m, 0.25 m and 0.3 m respectively and the angles between successive masses are 45°, 75° and 135°. Find the position and magnitude of the balance mass required, if its radius of rotation is 0.2 m.	CO4	7 Marks

(OR)

8		The following data refer to two cylinder locomotive with cranks at 90°: Reciprocating mass per cylinder = 300 kg; Crank radius = 0.3 m; Driving wheel diameter = 1.8 m; Distance between cylinder centre lines = 0.65 m; Distance between the driving wheel central planes = 1.55 m. Determine : i) the fraction of the reciprocating masses to be balanced, if the hammer blow is not to exceed 46 kN at 96.5 km. p.h.; ii) the variation in tractive effort ; and the maximum swaying couple.	CO4	14 Marks

UNIT-V

9	a)	Explain the term 'Logarithmic decrement' as applied to damped vibrations.	CO1	6 Marks
	b)	The following data are given for a vibratory system with viscous damping: Mass = 2.5 kg ; spring constant = 3 N/mm and the amplitude decreases to 0.25 of the initial value after five consecutive cycles. Determine the damping coefficient of the damper in the system.	CO5	8 Marks

(OR)

10	a)	Describe the method of finding the natural frequency of torsional vibration for three rotar system.	CO1	6 Marks
	b)	A shaft of length 1.5 m is 0.095 in in diameter for the first 0.6 m of its length, 0.06 m in diameter for the next 0.5 m of the length and 0.05 m in diameter for the remaining 0.4 m of its length. The shaft carries two rotors at two ends. The mass moment of inertia of the first rotor is 650 kg m^2 where as of the second is 212 kgm^2. Determine the natural frequency of free torsional vibration of the system. The modulus of rigidity of shaft material may be taken as 80 GN/m^2.	CO5	8 Marks

FLUID MECHANICS

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		An inverted U-tube manometer is connected to two horizontal pipes A and B through which water is flowing. The vertical distance between the axes of these pipes is 30 cm. When an oil of sp. gravity 0.8 is used as a gauge fluid, the vertical heights of the columns in the two limbs of the inverted manometer are found to be same and equal to 35 cm. Determine the difference of pressure between the pipes.	CO3	14 Marks
		(OR)		
2		Define the surface tension. Prove that the relation between surface tension and pressure inside the droplet of liquid in excess of outside pressure	CO1	14 Marks

UNIT-II

3		A 45º reducing bend is connected in a pipe line, the diameter at inlet and outlet of the bend being 600 mm and 300 mm respectively. Find the force exerted by the water on the bend if the intensity of the pressure at inlet to bend is 8.829 N/cm² and rate of flow of water is 600 litres/s.	CO5	14 Marks
		(OR)		
4		Explain the following fluid patterns. i) Path line ii) stream line iii) Streak line iv) stream tube.	CO1	14 Marks

UNIT-III

5	a)	Derive an expression for head loss through pipes due to friction.	CO5	7 Marks
	b)	An old water supply distribution pipe of 250 mm diameter of a city is to be replaced by two parallel pipes of smaller equal diameter having equal lengths and identical friction factor values. Find out the new diameter required.	CO6	7 Marks
		(OR)		
6		A jet of water diameter 7.5 cm strikes a curved plate at its centre with a velocity of 20 m/s. the curved plate is moving with a velocity of 8 m/s in the direction of the jet. The jet is deflected through an angle of 165º.assuming the plate smooth. Find: i) Force exerted on the plate in the direction of jet. ii) Power of the jet. iii) Efficiency of the jet.	CO4	14 Marks

UNIT-IV

7		Describe briefly the function of various main components of Francis turbine with neat sketches.	CO1	14 Marks
		(OR)		
8		What do you understand by the characteristic curves of a turbine? Explain the important types of characteristic curves.	CO1	14 Marks

UNIT-V

9	a)	Draw and discuss the operating characteristics of a centrifugal pump.	CO1	7 Marks
	b)	A centrifugal pump is to discharge 0.118 m^3/ sec at a speed of 1450 rpm against a head of 25m. The impeller diameter at outlet is 250 mm and its width at outlet is 50mm and manometric efficiency is 75%. Determine vane angle at outer periphery of the impeller.	CO2	7 Marks

(OR)

10	a)	Define air vessel. Describe the function of the air vessel for reciprocating pumps.	CO1	7 Marks
	b)	How will you classify the reciprocating pumps?	CO1	7 Marks

MACHINE TOOLS AND MODERN MACHINING PROCESSES
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Design a single point cutting tool and explain the nomenclature with a neat sketch.	CO3	7 Marks
	b)	Discuss the positive, negative and zero rake angles with the help of diagrams.	CO1	7 Marks
		(OR)		
2		Derive merchant circle theory for obtaining the relations between various forces and angles during turning operation with assumptions.	CO4	14 Marks
		UNIT-II		
3	a)	Explain the working principle of lathe with a neat diagram.	CO1	7 Marks
	b)	List the various tool holding device in lathe. Discuss in detail.	CO1	7 Marks
		(OR)		
4	a)	Analyze the similarities and differences of Capstan and Turret Lathe.	CO2	7 Marks
	b)	Classify Automatic Lathes in detail.	CO1	7 Marks
		UNIT-III		
5	a)	Explain the working principle and principal parts of Shaper with a neat diagram.	CO1	7 Marks
	b)	Distinguish between shaper and planer.	CO2	7 Marks
		(OR)		
6	a)	Design a twist drill and label the important features.	CO3	7 Marks
	b)	Write a short note on counter boring, counter sinking, trepanning operations in drilling.	CO1	7 Marks
		UNIT-IV		
7	a)	Explain the various surface Grinding processes with the help of a neat sketch.	CO1	7 Marks
	b)	Analyze the need for balancing of grinding wheels.	CO2	7 Marks
		(OR)		
8	a)	Give a brief classification of milling machines.	CO1	7 Marks
	b)	Define indexing. Explain about simple indexing.	CO1	7 Marks
		UNIT-V		
9	a)	Analyze the necessity to go for Modern machining processes.	CO4	7 Marks
	b)	Classify Modern machining processes.	CO5	7 Marks
		(OR)		
10	a)	Explain the principle involved in USM.	CO5	7 Marks
	b)	State the advantages of ultrasonic machining and its applications.	CO5	7 Marks

THERMAL ENGINEERING-I
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define the terms and mention the units in which they are normally measured: i) Bore. ii) Stroke. iii) Displacement volume. iv) Compression ratio.	CO1	8 Marks
	b)	What is meant by TDC and BDC? Draw the suitable sketch and mark the two dead centres.	CO1	6 Marks

(OR)

2	a)	Explain the effect of disassociation on maximum temperature and brake power and brake power. How does the presence of CO affect dissociation?	CO2	8 Marks
	b)	Mention the various simplified assumptions used in fuel-air cycle analysis.	CO1	6 Marks

UNIT-II

3	a)	Compare the phenomenon of knock in SI engine with CI engine knock.	CO2	7 Marks
	b)	What are homogeneous and heterogeneous mixtures? In which engines these mixtures are used? Explain.	CO1	7 Marks

(OR)

4	a)	Explain the effect of various engine variables on SI engine knock.	CO2	7 Marks
	b)	List the various types of combustion chambers used in SI engines and explain in detail.	CO1	7 Marks

UNIT-III

5	a)	List the various methods used available for finding the frictional power of an engine and explain the method of finding the friction power by using motoring test.	CO1	7 Marks
	b)	A four - stroke, four cylinder gasoline engine has a bore of 60mm and a stroke of 100mm. On test it develops a torque of 66.5 Nm when running at 3000 r.p.m. If the Clearance volume in each cylinder is 60cc the relative efficiency with respect to brake Thermal efficiency is 0.5 and the calorific value of the fuel is 42MJ/kg, determine the fuel consumption in kg/h and the brake mean effective pressure.	CO4	7 Marks

(OR)

6	a)	Define the terms: i) Brake Thermal Efficiency. ii) Mechanical Efficiency. iii) Volumetric Efficiency. iv) Indicated Thermal Efficiency.	CO1	7 Marks
	b)	A four - stroke gas engine has a bore of 20cm and stroke of 30cm and runs at 300 r.p.m firing every cycle. If air-fuel ratio is 4:1 by volume and volumetric efficiency on NTP basis is 80%, determine the volume of gas used per minute. If the calorific value of gas is 8MJ/m^3 at NTP and the brake thermal efficiency is 25%, determine brake power of the engine.	CO3	7 Marks

UNIT-IV

7	a)	What is adiabatic flame temperature?	CO1	4 Marks
	b)	The analysis of the dry exhaust from an internal combustion engine is as follows: Carbon dioxide (CO_2) =15%, carbon monoxide (CO) = 3%, Methane (CH_4) = 3%, Hydrogen(H_2) = 1%, Oxygen (O_2) = 2% and Nitrogen (N_2) = 76%. Calculate the proportions by mass of carbon in hydrogen in the fuel, assuming it to be a pure hydrocarbon.	CO5	10 Marks

(OR)

8	a)	What is enthalpy of formation?	CO1	4 Marks
	b)	Orsat analysis of the products of combustion of a hydrocarbon fuel of known composition is as follows: Carbon dioxide (CO_2) =18%, carbon monoxide (CO) = 0.5%, Oxygen (O_2) = 6.3% and Nitrogen (N_2) = 85.2%. Determine the following: i) Air –fuel ratio. ii) Percentage of theoretical air required for combustion.	CO5	10 Marks

UNIT-V

9	a)	What are different types of rotary compressors and explain briefly the working of any two rotary compressors?	CO1	7 Marks
	b)	A compressor compresses air 100 kPa to 700 kPa. The clearance volume is 2.13 liters and compression and expansion are polytrophic with n=1.3 for each. If the volumetric efficiency of compressor be 85 %, determine the swept volume and the diameter of the cylinder. Assume a stroke length of 30 mm.	CO2	7 Marks

(OR)

10	a)	Explain the effect of inter cooling in a multi stage reciprocating compressor.	CO1	7 Marks
	b)	Estimate the minimum work required to compress 2 kg of air from 1 bar 330K to 18 bar in two stages if the law of compression is $PV^{1.25}$ = constant and inter cooling is perfect.	CO2	7 Marks

ANALOG COMMUNICATIONS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive the time domain expression of VSB modulated wave s(t) containing a vestige of upper side band.	CO5	8 Marks
	b)	Find the percentage of power saved in SSB when compared with AM system.	CO1	6 Marks
		(OR)		
2	a)	With a neat block diagram, explain the working of FDM technique.	CO8	9 Marks
	b)	Discuss the appropriate amplitude modulation technique which requires modulated band width equal to the twice of message signal band width and more power consumption.	CO6	5 Marks

UNIT-II

3	a)	Derive the expression for NBFM if message is m(t) and carrier is $A_c Cos\omega_c t$. Draw the corresponding phasor diagram of NBFM and compare it with AM wave	CO2	8 Marks
	b)	An FM wave is defined by s(t)=10 cos(2+sin (6Πt). Find the instantaneous frequency of s(t).	CO4	6 Marks
		(OR)		
4	a)	What is Carson's rule? Show that it applies both to narrow band and wide band FM.	CO2	8 Marks
	b)	Calculate for An angle-modulated signal has the form: $u(t)=100\cos[2\pi f_c t+4\sin 2\pi f_m t]$ Where f_c=10MHz and f_m=1000Hz. i) Assuming that this is an FM signal, determine the modulation index and the transmitted signal bandwidth. ii) Assuming that this is an PM signal, determine the modulation index and the transmitted signal bandwidth.	CO4	6 Marks

UNIT-III

5	a)	Discuss the role of pre-emphasis and de-emphasis in the improvement of noise immunity in FM.	CO1	8 Marks
	b)	Prove that the figure of merit of AM system for single stone modulation with 100% modulation is 1/3.	CO3	6 Marks
		(OR)		
6	a)	Explain the noise performance in SSB - SC receiver and prove its S/N ratio is unity.	CO2	8 Marks
	b)	The noise figure of an amplifier is 5dB and its input S/N ratio is 55dB. Find the output S/N ratio.	CO3	6 Marks

UNIT-IV

7	a)	Determine the modulation index and maximum deviation of a single tone FM signal represented by $v(t)=12 \text{ Cos } (8 \times 10^8 t+6 \sin (1250t)$	CO4	8 Marks
	b)	In a broadcast super heterodyne receiver tuning at 1400 kHz having no RF amplifier, the loaded Q of the antenna coupling circuit is 100, By Considering standard IF frequency determine the Image frequency and its rejection ratio.	CO6	6 Marks
		(OR)		

8	a)	In a superhetrodyne receiver with no RF section, the 'Q' of the antenna coupling circuit is found to be 110. Calculate the image frequency and its rejection ratio at 1100 kHz.	CO6	9 Marks
	b)	An FM radio link has a frequency deviation of 25 kHz. The modulating frequency is 5 kHz. Calculate the bandwidth needed for the link. What will be the bandwidth if the deviation is reduced to 10 kHz?	CO4	5 Marks

UNIT-V

9	a)	Discuss the performance analysis of pulse modulation schemes.	CO1	6 Marks
	b)	Draw the wave forms of pulse modulations and explain briefly.	CO1	8 Marks

(OR)

10	a)	List out the applications of pulse Modulation techniques	CO1	7 Marks
	b)	For a pulse amplitude modulated transmission of voice signal having maximum frequency equal to f_m=4kHz, calculate the transmission bandwidth. It is given that the sampling frequency f_s=10 kHz and the pulse duration t=0.1T_s.	CO4	7 Marks

All questions carry equal marks

		UNIT-I		
1	a)	Sketch the circuit diagram of 2-inout LS TTL NAND gate and explain.	CO1	7 Marks
	b)	Compare CMOS, TTL and ECL with reference to logic levels, DC Noise margin, propagation delay and fan-out.	CO2	7 Marks
		(OR)		
2	a)	Expand HC, HCT, VHC and VHCT in connection with CMOS family.	CO1	7 Marks
	b)	Suggest a method to estimate sinking current for low output and sourcing current for high output of CMOS gate.	CO2	7 Marks
		UNIT-II		
3	a)	Suggest alternative forms of representing blocks in structural design model of Verilog HDL with an example.	CO5	7 Marks
	b)	Discuss the role of simulation and synthesis.	CO1	7 Marks
		(OR)		
4	a)	Identify the alternate representations of conditional and looping statements.	CO5	7 Marks
	b)	List and explain operators used in verilog HDL.	CO1	7 Marks
		UNIT-III		
5	a)	Design the function F = ABC + (A+B+C)' by using 74 x 138 and explain its operation.	CO4	7 Marks
	b)	Design a full adder using two half adders. Write VHDL data flow program for the same.	CO3	7 Marks
		(OR)		
6	a)	Design a 32 x 1 mux using 74 x 138 and 74 x 151 ICs.	CO4	7 Marks
	b)	Design 16 x 1 multiplexer by using 2 x 1 multiplexer and explain its operation.	CO3	7 Marks
		UNIT-IV		
7	a)	Illustrate the operation of 4-bit ring counter.	CO1	7 Marks
	b)	Design self correcting 4 bit, 4-state ring counter with single circulating 1.	CO6	7 Marks
		(OR)		
8	a)	Illustrate the structure of synchronous system design and its operations performed during one clock cycle.	CO1	7 Marks
	b)	Design a 4 bit,8 states Johnson counter using IC 74 x 194. Show how the same counter can be modified as a self correcting Johnson counter.	CO6	7 Marks
		UNIT-V		
9	a)	Assess the waveforms of DRAM and SDRAM.	CO2	7 Marks
	b)	Compare between PROM, PLA and PAL.	CO2	7 Marks
		(OR)		
10	a)	Appraise the operation of SRAM with a bidirectional data bus.	CO2	7 Marks
	b)	Design an 8 x 4 diode ROM using 74 x 138 for the following data starting from the first location. 1, 4, 9, B, A, 0, F, C.	CO3	7 Marks

ELECTROMAGNETIC THEORY AND TRANSMISION LINES
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	State Coulomb's law. Develop the vector expression for Force due to N number of Charges.	CO1	7 Marks
	b)	A point charge of 30nC is located at the origin while plane y=3 carries charge 10nC/m^2. Find D at (0, 4, 3).	CO4	7 Marks
		(OR)		
2	a)	In a cylindrical conductor of radius 2mm, the current density varies with distance from the axis according to J = $10^3 e^{-400r}$ A/m^2. Find the total current I.	CO4	7 Marks
	b)	Define Electric Potential. Relate E and V.	CO1	7 Marks

UNIT-II

3	a)	Explain Faraday's Law for Time Varying Fields.	CO1	7 Marks
	b)	A conducting circular loop of radius 20cm lies in the z=0 plane in a magnetic field B = 10 cos 377t a_z mWb/m^2. Calculate the induced voltage in the loop.	CO2	7 Marks
		(OR)		
4	a)	Derive the magnetic boundary conditions as the conditions that H (or B) field must satisfy at the boundary between two different media.	CO2	7 Marks
	b)	Justify Lenz's Law for Magnetic Fields.	CO1	7 Marks

UNIT-III

5	a)	Derive the Wave Equations for Dielectric and Conducting Medium.	CO5	7 Marks
	b)	Suggest a method to categorize good conductors and good dielectrics.	CO6	7 Marks
		(OR)		
6	a)	Define Skin Effect and Skin Depth. Relate Skin depth and Frequency.	CO5	7 Marks
	b)	A plane wave propagating through a medium with ε_r=8, μ_r = 2 has E = 0.5 $e^{-z/3}$ sin(10^8t - βz) a_x V/m. Determine: i) β. ii) The loss tangent. iii) Wave impedance. iv) Wave velocity. v) H field.	CO6	7 Marks

UNIT-IV

7	a)	Develop the basic Transmission Line Equations and derive the secondary constants of transmission lines using them.	CO2	8 Marks
	b)	Derive the voltage and current equations for transmission lines.	CO3	6 Marks
		(OR)		
8	a)	Design a transmission line for a characteristic impedance of 50Ω. Assume R=6Ω/Km and G=0.25x10^{-3} mhos/Km.	CO3	6 Marks
	b)	Analyze the variations in phase and group velocities for distortionless lines.	CO2	8 Marks

UNIT-V

9	a)	Explain the principle of stub matching. List the types of stub matching used in practice.	CO1	8 Marks
	b)	The VSWR measured on UHF transmission line at a frequency of 300MHz found to be 2. If the distance between load and voltage minimum is 0.8m, solve the normalized load impedance.	CO4	6 Marks

(OR)

10	a)	Identify and summarize the various methods for impedance matching.	CO1	8 Marks
	b)	A generator of 1V, 1KHz supplies power to a 100 km transmission line terminated in a 200Ω resistance. The line parameters are R= 10 Ω/km, L=3.8 mH/km, G=1μ mho/km and C=0.0085 μf/km. Calculate the input impedance and reflection coefficient.	CO4	6 Marks

LINEAR IC APPLICATIONS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw and explain the operation of dual input balanced output differential amplifier.	CO1	7 Marks
	b)	Derive the voltage gain of a dual input balanced output differential amplifier.	CO2	7 Marks
		(OR)		
2	a)	Explain the operation of differential amplifier with neat circuit diagram.	CO1	7 Marks
	b)	For a differential amplifier R_c=1 kΩ, R_{in}=1 kΩ, h_{fe}=1 kΩ and R_E=2 kΩ neglecting h_{oe}. Calculate the difference mode gain and common mode gain. Also calculate CMRR in dB. The amplifier is a dual input balanced differential amplifier.	CO2	7 Marks

UNIT-II

3	a)	In an inverting adder circuit, the input voltages ate 0.3 V, 0.5 V, 0.1 V while R_1=R_2=R_3=1 kΩ, If R_f = 10 kΩ . Calculate the output voltage.	CO3	7 Marks
	b)	Construct a circuit to realize $V_{out} = 10v_1 + 20v_2 - 5v_3$.	CO4	7 Marks
		(OR)		
4	a)	In an integrator circuit, $R_i C_f$ = 1 sec, and the input is a step input V_{in} = 2V for $0 \le t \le 4$. Determine the output voltage and sketch it.	CO4	7 Marks
	b)	How can a multiplier and divider circuit be constructed with log and antilog amplifiers?	CO3	7 Marks

UNIT-III

5	a)	Design a LPF with cutoff frequency f_c = 1 KHz, R_0 = 600Ω.	CO3	7 Marks
	b)	Distinguish between passive and active filter.	CO1	7 Marks
		(OR)		
6	a)	Design a wide band pass filter having f_l = 400 Hz, f_h = 2KHz and pass band gain of four. Determine the Q of the filter.	CO3	7 Marks
	b)	Explain how an all pass filter can be realized.	CO1	7 Marks

UNIT-IV

7	a)	Explain the following terms with respect to PLL: i) Free running state ii) Lock in range iii) Capture range iv) Pull in time	CO1	7 Marks
	b)	Operate 555 timer as monostable multivibrator. Derive the expression of time delay of a monostable multivibrator using 555 timer.	CO5	7 Marks
		(OR)		
8	a)	Realize a monostable multivibrator using 555 timer to obtain pulse of width of 0.1 msec. Draw the circuit diagram with its waveforms.	CO5	7 Marks
	b)	Explain the application of PLL as frequency translator.	CO1	7 Marks

UNIT-V

9	a)	For the R-2R ladder 4 bit type DAC, Find the output voltage and resolution if digital input is 1111. assume $V_R = 10v$ and $R = 10K = Rf$	CO4	7 Marks
	b)	Explain the operation of flash type ADC.	CO1	7 Marks
		(OR)		
10	a)	Explain the operation of a R-2R ladder DAC and mention its applications.	CO1	7 Marks
	b)	Describe the transfer characteristic of a Digital to Analog convertor.	CO1	7 Marks

PROBABILITY AND STOCHASTIC PROCESS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define probability based on set theory and fundamental axioms.	CO1	6 Marks
	b)	An experiment consists of tossing two dice. i) Find the sample space S. ii) Find the event A that the sum of the dots on the dice equals 7. iii) Find the event B that the sum of the dots on the dice is greater than **10.** iv) Find the event C that the sum of the dots on the dice is greater than **12.**	CO3	8 Marks

(OR)

2	a)	Define Joint Probability and Conditional Probability	CO1	6 Marks
	b)	In a box there are 100 resistances having resistance and tolerance shown in below table. If a resistor is chosen with same likelihood of being chosen for the three events, A as "draw a 47 ohm resistor', B as "draw a resistor with5% tolerance", C as "draw a 100 ohm resistor". i) Calculate joint probabilities. ii) Conditional probabilities.	CO3	8 Marks

Resistance (ohm)	Tolerance		
	5%	10%	Total
22	10	14	24
47	28	16	44
100	24	8	32
Total	62	38	100

Number of resistor in a box having given resistance and tolerance.

UNIT-II

3	a)	Determine whether the following is a valid distribution function. $F_x(x) = 1- \exp(-x/2)$ for x=0 and 0 elsewhere.	CO2	7 Marks
	b)	State and prove chebchev's inequality.	CO4	7 Marks

(OR)

4	a)	Find the expected value of the function $g(X) = X^2$ where X is a random variable defined by the density. $F_x(x) = ae^{-ax}U(x)$. Where a is a constant and U(x) is a unit step function.	CO2	7 Marks
	b)	Binary data are transmitted over a noisy communication channel in block of 16 binary digits. The probability that a received digit is in error as a result of channel noise is 0.01. Assume that the errors occurring in various digit positions within a block are independent. i) Find the mean and the variance of the number of errors per block. ii) Find the probability that the number of errors per block is greater than or equal to 4.	CO4	7 Marks

UNIT-III

5	a)	Define a Random Variable V and W by V=X+aY W= X-aY Where a is real number X and Y random variables, determine a in terms of X and Y such V and W are orthogonal.	CO2	7 Marks
	b)	Gaussian Random Variables X and Y have first and second order moments $m_{10} = -1.1$, $m_{20} = 1.16$, $m_{01} = 1.5$, $m_{20} = 2.89$, $R_{xy} = 1.724$. i) Find the C_{xy}, ρ . ii) Write expression for Jointly Gaussian Density function.	CO3	7 Marks

(OR)

6	a)	Explain the Linear Transformation of Gaussian Random Variables.	CO1	7 Marks
	b)	Two Gaussian Random Variables X_1 and X_2 have zero means and variances 4 and 9. Their Covariance is equal to 3. If X_1 and X_2 are linearly transformed to new variables Y_1 and Y_2 according to: $Y_1 = X_1 - 2X_2$ $Y_2 = 3X_1 + 4X_2$ Find : (i) Mean. (ii) Variances. (iii) Covariance of Y_1 and Y_2.	CO2	7 Marks

UNIT-IV

7		A random process is defined by x(t) =A where A is a continuous random variable uniformly distributed on (0,1) and t represents time. Find i) E [x (t)]. ii) R_{xx} [t; t + τ]. iii) Is the process stationary?	CO2	14 Marks

(OR)

8		Let two random processes X(t) and Y(t) be defined by X(t) = A cos ω_0t+B sin ω_0t ; Y(t) = B cos ω_0t - A sin ω_0t where A and B are random variables and ω_0 is a constant. Assume A and B are uncorrelated, zero mean random variables with same variance. Show that X(t) and Y(t) are jointly stationary.	CO3	14 Marks

UNIT-V

9	a)	Mention the differences between correlated and uncorrelated noise.	CO1	7 Marks
	b)	Obtain expression for Noise figure in terms of Equivalent noise temperature for an amplifier.	CO3	7 Marks

(OR)

10	a)	Discuss the following terms: i) Noise factor. ii) Noise Figure equivalent noise temperature.	CO1	7 Marks
	b)	Derive the expression for thermal noise voltage.	CO3	7 Marks

PULSE AND DIGITAL CIRCUITS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	How to implement an integrator with RC low pass filter?	CO2	7 Marks
	b)	Derive the expression for output from a ringing circuit.	CO2	7 Marks
		(OR)		
2.	a)	Obtain the response of RC High Pass Circuit for a square wave input for different Time Constants and evaluate %Tilt.	CO1	8 Marks
	b)	Justify how a Low-pass RC circuit acts as an Integrator.	CO2	6 Marks

UNIT-II

3.	a)	Design a diode clamper circuit to clamp the positive peak of the input signal at zero level. The frequency of input signal is 500Hz. (Assume R_f=100Ω, R_r=150KΩ and Let RC=20T).	CO3	8 Marks
	b)	Apply appropriate control signals to synchronize input and output signals of a clamping circuit.	CO5	6 Marks
		(OR)		
4.	a)	What are the limitations of diode as a shunt element in clipping circuits?	CO3	7 Marks
	b)	Explain the operation of a comparator circuit.	CO2	7 Marks

UNIT-III

5.	a)	Derive the expression for frequency oscillations of an astable multivibrator.	CO4	7 Marks
	b)	Explain indetail about turn-on and turn-off times in a transistor switch.	CO3	7 Marks
		(OR)		
6.	a)	Design a collector-coupled monostable multivibrator with a gate width of 5ms using n-p-n silicon transistors.	CO3	8 Marks
	b)	With the help of neat diagrams, discuss the different methods of triggering a binary.	CO1	6 Marks

UNIT-IV

7.	a)	How to generate sweep voltage using Bootstrap principle?	CO3	7 Marks
	b)	Explain in detail about the operation of current sweep circuit.	CO5	7 Marks
		(OR)		
8.	a)	Explain the basic principles of Bootstrap Time-base generator.	CO1	6 Marks
	b)	Explain the principle and working of a Transistor Current Time-Base generator.	CO1	8 Marks

UNIT-V

9.	a)	Implement NOR gate using CMOS logic.	CO1	7 Marks
	b)	Explain the operation of TTL logic family.	CO1	7 Marks
		(OR)		
10.	a)	Draw and explain the operation of Bidirectional sampling gate.	CO1	7 Marks
	b)	Draw and explain the operation of ECL NOR/OR circuit.	CO1	7 Marks

COMPUTER GRAPHICS
[Computer Science and Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Define Horizontal and Vertical tracing.	CO1	4 Marks
	b)	Evaluate Midpoint ellipse algorithm with the parameters $r_x = 8$ and $r_y = 6$ and the initial point is (7, 3).	CO6	10 Marks
		(OR)		
2	a)	Explain the architecture of a Random-scan system with a graphics controller.	CO1	10 Marks
	b)	Explain Graphics monitors and Workstations.	CO1	4 Marks
		UNIT-II		
3	a)	Write the basic 2-Dimensional Transformation principles in detail.	CO3	8 Marks
	b)	Describe basic transformations between the Co-ordinate systems.	CO1	6 Marks
		(OR)		
4	a)	Develop Boundary-fill algorithm to fill the specified area.	CO4	8 Marks
	b)	Discuss the failure of Boundary fill algorithm to fill the specified area with a suitable example.	CO2	6 Marks
		UNIT-III		
5	a)	Describe 2-Dimensional viewing co-ordinate Reference frame.	CO1	4 Marks
	b)	Explain 2-Dimensional Viewing functions in detail.	CO1	10 Marks
		(OR)		
6	a)	Write short notes on spline specifications.	CO3	7 Marks
	b)	Write an algorithm to display three dimensional cubic Bezier curve, given a set of four control points in the XY plane.	CO3	7 Marks
		UNIT-IV		
7	a)	Explain various Coordinate systems in 3-Dimensional Viewing.	CO1	8 Marks
	b)	Differentiate Oblique and Orthographic parallel projections.	CO2	6 Marks
		(OR)		
8	a)	Write a routine to reflect an object about an arbitrarily selected plane.	CO3	7 Marks
	b)	Show a method to rotate a 3-Dimensional object above an axis that is not parallel to the coordinate axis with a neat block diagram and derive the transformation matrix for the same.	CO5	7 Marks
		UNIT-V		
9	a)	Write short note on BSP-tree method.	CO3	7 Marks
	b)	Explain procedure for Area subdivision method.	CO1	7 Marks
		(OR)		
10	a)	Describe procedure for Octree methods.	CO1	7 Marks
	b)	Explain Gouraud and Phong Shading along with their advantages and disadvantages.	CO1	7 Marks

DATABASE MANAGEMENT SYSTEMS
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain DDL and DML commands in detail with examples.	CO5	7 Marks
	b)	What are the various responsibilities of a DBA? Explain.	CO2	7 Marks
		(OR)		
2	a)	Describe about relationships and relationship sets.	CO1	7 Marks
	b)	What is the purpose of Database Systems? Explain.	CO3	7 Marks

UNIT-II

3	a)	Consider the following relational schema Employee(empno, name, office, age) Books(isbn, title, author, publisher) Loan(empno, isbn, data) Write the following queries in relational algebra. i) Find the names of employees who have borrowed a book published by McGraw-Hill. ii) Find the names of employees who have borrowed all books published by McGraw-Hill. iii) Find the names of employees who have borrowed more than five different books published by McGraw-Hill. iv) For each publisher, find the names of employees who have borrowed.	CO4	7 Marks
	b)	Discuss about relational algebra with suitable example.	CO1	7 Marks
		(OR)		
4	a)	Describe the properties of a relational algebra.	CO2	7 Marks
	b)	What is a view? How views are implemented?	CO5	7 Marks

UNIT-III

5	a)	Explain about correlated nested queries with examples.	CO5	7 Marks
	b)	Illustrate redundancy and the problems that it can cause.	CO2	7 Marks
		(OR)		
6	a)	Compare and contrast BCNF with 3NF.	CO2	7 Marks
	b)	Describe properties of decompositions.	CO1	7 Marks

UNIT-IV

7	a)	Describe validation based locking protocol.	CO1	7 Marks
	b)	Discuss in detail Multiple Granularity.	CO3	7 Marks
		(OR)		
8	a)	What is a transaction? In what way it differs from an ordinary program?	CO2	7 Marks
	b)	What is Atomicity? Explain about implementation of Atomicity.	CO5	7 Marks

UNIT-V

9	a)	Illustrate deletion of an element in B+ trees with an example.	CO4	7 Marks
	b)	Explain about Primary and Secondary Indexes.	CO1	7 Marks
		(OR)		
10	a)	Differentiate between clustered and unclustered indexes.	CO2	7 Marks
	b)	What is the purpose of indexing? How this can be done by B+ tree? Explain.	CO1	7 Marks

LINEAR AND DIGITAL ICS

[Common to Electrical and Electronics Engineering; Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw the pin diagram and schematic symbol of a typical OP-AMP IC741 and explain the function of each pin.	CO2	5 Marks
	b)	Identify the basic types of linear IC packages and briefly explain the characteristics of each.	CO5	4 Marks
	c)	State two types of integrated circuits classified according to their mode of operation and briefly explain the significance of each.	CO1	5 Marks
		(OR)		
2	a)	Draw the equivalent circuit diagram of non-inverting amplifier and derive the expression for input impedance.	CO2	7 Marks
	b)	Design a digital circuit to implement an inverting amplifier with an input resistance of 10KΩ and a gain of-5.	CO3	7 Marks

UNIT-II

3	a)	Write a short note on the following applications of operational amplifier. i) AC Amplifier ii) Antilog amplifier	CO1	6 Marks
	b)	Apply a suitable modeling techniques and design an analog IC to differentiate an input signal that varies in frequency from 10Hz to about 1KHz. Draw its output waveform if $\sin 2\pi \times 1000t$ signal is applied.	CO5	8 Marks
		(OR)		
4	a)	Determine the order of the Butterworth low-pass filter so that is to provide 40dB attenuation at W/Wh=2.	CO4	7 Marks
	b)	Determine the output voltage and sketch the integrator circuit, R_i =10 k**Ω** C_F = 0.02 μ**F**, and the input is a step input V_{in}=2V for $0 \leq t \leq 4$.	CO4	7 Marks

UNIT-III

5	a)	Design a monostable multivibrator using 555 timer to produce a pulse width of 100 m sec.	CO6	7 Marks
	b)	Explain the operation of a successive approximation type Analog to Digital converter.	CO2	7 Marks
		(OR)		
6	a)	Give the functional block diagram of NE 565 PLL (DIP) and for the given component values. C1 = 390 pF, C2 = 680 pF and R1 = 10k**Ω**, V_{cc} = ±6V. Find; i) The free running frequency ii) The lock range and capture range Where C1 is the capacitor connected between pin number 9 and −VCC , C2 is the capacitor connected between +VCC and output pin 7, and R1 is connected between pin number 8 and +VCC.	CO4	7 Marks
	b)	Apply appropriate modeling techniques and design an 555 IC timer to implement Astable multivibrator to operate at 10 KHz with 40% duty cycle.	CO5	7 Marks

UNIT-IV

7	a)	Assess the CMOS dynamic electrical characteristics.	CO2	7 Marks
	b)	Design a suitable digital circuit to perform CMOS NAND gate and verify the Boolean function.	CO5	7 Marks

(OR)

8	a)	Define and summarize structural design. Appraise the use of structural design elements in Verilog HDL.	CO2	10 Marks
	b)	Draw the circuit diagram of basic CMOS gate and explain the operation.	CO2	4 Marks

UNIT-V

9	a)	Implement suitable design technique for a 16-bit comparator using 74x85 ICs?	CO5	7 Marks
	b)	Develop a verilog program for a MOD 10 counter.	CO6	7 Marks

(OR)

10	a)	Develop a Verilog program for a 8-bit serial-in and parallel-out shift register in behavioral model.	CO6	7 Marks
	b)	Design a suitable digital circuit to detect the prime number of a 5-bit input, write a structural Verilog program for the design.	CO5	7 Marks

CODE No.: 16BT41041 SVEC-16

Roll No. | | | | | | | | | | |

COMPUTER ARCHITECTURE AND ORGANIZATION

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain about single bus structure and list the advantages and disadvantages.	CO1	7 Marks
	b)	Write the expression for assessment of performance of a computer. On what factors does the performance of a computer depend? Explain the means of improving the performance of a computer.	CO2	7 Marks
		(OR)		
2	a)	Illustrate the data storage mechanism in a magnetic disk.	CO1	7 Marks
	b)	Analyze the working of static RAM cell.	CO2	7 Marks

UNIT-II

3	a)	Explain the flag register of 8085 microprocessor. What are the contents of Flag register after the execution of the instruction SUB D. Let the registers be A = 3BH and D = 69H.	CO1	6 Marks
	b)	Discuss about the following instructions of 8085 microprocessor. i) LDA. ii) MVI. iii) CALL. iv) RAR.	CO2	8 Marks
		(OR)		
4	a)	Describe the control and status signals of 8085 microprocessor.	CO1	7 Marks
	b)	Discuss the logical instructions of 8085 microprocessor. Give their applications in real time.	CO3	7 Marks

UNIT-III

5	a)	Classify the interrupts of 8085 microprocessor.	CO1	7 Marks
	b)	Write an 8085 program to perform multiplication of two bytes by successive addition and store the result in memory.	CO5	7 Marks
		(OR)		
6	a)	Discuss the interrupt handling mechanism of an 8085 microprocessor.	CO1	7 Marks
	b)	Differentiate between maskable and non-maskable interrupts. Give their applications.	CO2	7 Marks

UNIT-IV

7	a)	Design a digital circuit that performs the four logic operations of AND, OR, NOT, XOR. Use two selection variables. Show the logic diagram of one typical stage.	CO3	7 Marks
	b)	List and briefly explain the registers of a basic computer.	CO1	7 Marks
		(OR)		
8	a)	Design a bus line with three state buffers.	CO3	7 Marks
	b)	What is Micro-operation? Briefly explain the arithmetic micro-operations.	CO1	7 Marks

UNIT-V

9	a)	With a suitable example, demonstrate the signed 2's complement addition and subtraction. Implement it with minimal hardware.	CO6	7 Marks
	b)	Discuss Out-of-order execution of a program.	CO1	7 Marks
		(OR)		
10		Design a microprogram sequencer for control memory. Derive the truth table for the input logic circuit.	CO3	14 Marks

DESIGN AND ANALYSIS OF ALGORITHMS

[Common to Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

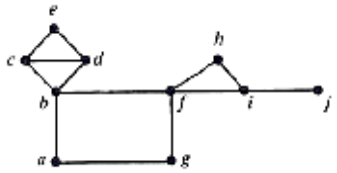
1	a)	Design an algorithm to check whether given number is even or odd.	CO5	6 Marks
	b)	Predict the space complexity and time complexity for the above algorithm.	CO5	8 Marks

(OR)

2	a)	Solve the recurrence relation and give a Big-Oh bound for each of them $T(n) = 49\ T(n/25) + n^{3/2} \log n$.	CO5	7 Marks
	b)	Prove $3n^3 + 2n^2 = O(n^3)$.	CO4	7 Marks

UNIT-II

3	a)	Outline an algorithm for obtaining bi-connected components.	CO1	7 Marks
	b)	Identify the bi-connected components in the following graph	CO3	7 Marks



(OR)

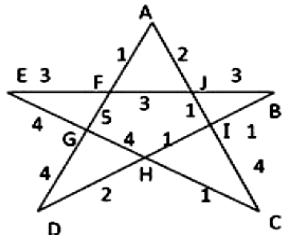
4	a)	Explain the following with an example: i) Spanning Tree ii) Connected components iii) Strongly connected components.	CO1	7 Marks
	b)	Find a necessary and sufficient condition for the root of a DFS for a connected graph to be an articulation point. Prove it.	CO4	7 Marks

UNIT-III

5	a)	Explain Strassen's matrix multiplication in detail with an example.	CO1	9 Marks
	b)	Distinguish between merge sort and quick sort.	CO2	5 Marks

(OR)

6	a)	Outline an algorithm for Prim's algorithm.	CO1	7 Marks
	b)	Apply Traveling Salesman Problem to the graph given below.	CO3	7 Marks



UNIT-IV

7	a)	Estimate the minimum no. of operations required for the following chain matrix multiplication using dynamic programming. A(30,40) * B(40,5) * C(5,15) * D(15,6).	CO5	9 Marks
	b)	Distinguish between Dynamic Knapsack and Greedy method Knapsack problem.	CO2	5 Marks

(OR)

8	a)	Explain in detail about Hamiltonian cycles.	CO1	7 Marks
	b)	Outline an algorithm to solve n-queen problem.	CO1	7 Marks

UNIT-V

9		Design the state space tree using LCKNAP for the knapsack instances: N=5; (p1,p2,…p5)=(10, 15, 6, 8, 4); (w1,w2,…w5)=(4, 6, 3, 4, 2) and M=12.	CO5	14 Marks

(OR)

10	a)	Outline an algorithm to solve the Knapsack problem with the Branch and Bound.	CO1	7 Marks
	b)	Explain the principles of LIFO Branch and Bound.	CO1	7 Marks

CODE No.: 16BT41202 SVEC-16

II B.Tech II Semester (SVEC16) Supplementary Examinations January – 2022

JAVA PROGRAMMING

[Computer Science and Engineering, Information Technology]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What are all the characteristic features of Java Programming language?	CO1	6 Marks
	b)	Compare and contrast visibility controls and also compare with each of them.	CO2	8 Marks
		(OR)		
2	a)	"Java is platform independent". Justify?	CO4	6 Marks
	b)	Compare and Contrast Java with C. Explain Constructors with examples.	CO2	8 Marks

UNIT-II

3	a)	Explain the importance of inheritance with the help of an example.	CO1	5 Marks
	b)	What are packages? What are the benefits of creating programs using packaging?	CO1	5 Marks
	c)	How to create an interface? Distinguish between abstract classes and interfaces.	CO1, CO2	4 Marks
		(OR)		
4	a)	How is multiple inheritance achieved in Java?	CO1	3 Marks
	b)	Develop a Library interface which has drawbook(), returnbook() (with fine), checkstatus() and reservebook() methods. All the methods tagged with public.	CO6	11 Marks

UNIT-III

5	a)	Differentiate between exceptions , runtime errors and compile time errors	CO2	4 Marks
	b)	Difference between Thread and Process in Java. How to implement Thread in Java?	CO2	5 Marks
	c)	Develop a java program to read 20 marks and store them in an array. Define your own exception named wrongmark exception. Throw and catch this type of exception when a mark is (<0 and >100).	CO3	5 Marks
		(OR)		
6	a)	When to use Runnable *vs* Thread in Java? Difference between start() and run() method of Thread class.	CO2	4 Marks
	b)	Differentiate throw and throws keyword in Java. Can the same exception been declared to be thrown many times by the method. Eg: public void sample() throws IOException, SQLException	CO1	5 Marks
	c)	Develop a java program for producer consumer problem to illustrate the concept of multithreading.	CO3	5 Marks

UNIT-IV

7	a)	What is an Event? Explain the role of Event handler in AWT.	CO1	5 Marks
	b)	Design and develop an Applet to receive the value of the parameter message from the html file and display it on the webpage.	CO3	9 Marks
		(OR)		
8	a)	What is Java Collections Framework? List out some benefits of Collections framework.	CO1	6 Marks
	b)	Create an anonymous inner class for handling mouse entered event into an Applet.	CO5	8 Marks

UNIT-V

9	a)	List and explain the different situations in which the Action Event is generated. Develop the event handler for the Action Event.	CO2, CO4	10 Marks
	b)	Explain the life cycle methods of a servlet.	CO4	4 Marks
		(OR)		
10	a)	Create a servlet to store the user's browsing preferences like color in a cookie and should be displayed in the color	CO5	4 Marks
	b)	List and explain the different situations in which the Action Event is generated. Develop the event handler for the Action Event.	CO2, CO4	10 Marks

SOFTWARE ENGINEERING
[Computer Science and Engineering, Information Technology Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Illustrate and explain Evolutionary Models.	CO1	14 Marks
		(OR)		
2	a)	Demonstrate Software Process framework with five framework Activities.	CO2	7 Marks
	b)	Explain Waterfall Model with a neat sketch.	CO1	7 Marks

UNIT-II

3	a)	Examine how mathematical notations can be used to express a functional requirement in it and explain with examples.	CO2	7 Marks
	b)	Outline the Requirement Elicitation and Analysis process with a neat sketch.	CO1	7 Marks
		(OR)		
4		Design a sequence diagram that models the data processing involved when a customer withdraws cash from the bank ATM machine.	CO3	14 Marks

UNIT-III

5		List different types of architectural styles exist in software and explain in detail.	CO1	14 Marks
		(OR)		
6		Compare all types of metrics in the Software Measurements.	CO6	14 Marks

UNIT-IV

7		Explain the steps involved in Debugging process with a neat sketch and discuss all the Strategies involved in the Debugging Process.	CO5	14 Marks
		(OR)		
8	a)	Compare and contrast three types of testing involved in Control Structure Testing.	CO1	10 Marks
	b)	Explain: i) Verification and validation. ii) Organizing for Software Testing.	CO4	4 Marks

UNIT-V

9	a)	Explain about Defect Amplification Model.	CO1	7 Marks
	b)	Discuss the steps involved in Business Process Reengineering model with a neat sketch.	CO6	7 Marks
		(OR)		
10	a)	Define SQA. List and explain SQA Activities.	CO1	8 Marks
	b)	Explain different types of risks involved in Software Risks.	CO4, CO6	6 Marks

THEORY OF COMPUTATION

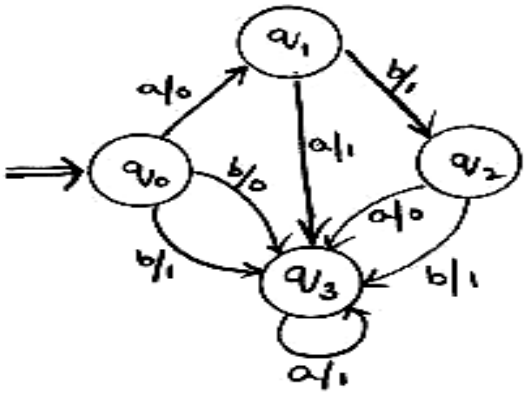
[Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define the following terms, with an example for each. i) String. ii) Alphabet. iii) Problem. iv) Language.	CO1	8 Marks
	b)	Construct Moore machine for the following Melay machine.	CO3	6 Marks



(OR)

2	a)	Construct DFA equivalent to the following Finite automation.	CO3	8 Marks

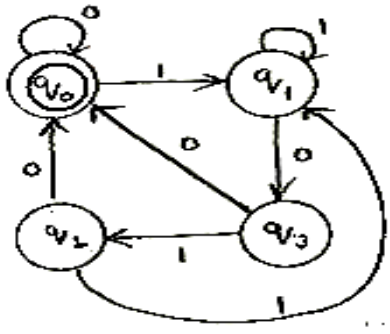
	b)	Draw the NFA accepting the set of all strings whose second symbol from last is 1.	CO3	6 Marks

UNIT-II

3	a)	Construct a Finite Automata equivalence to the regular expression (0+1)*(00+11)(0+1)*.	CO3	8 Marks
	b)	Write a regular expression to denote a language L which accepts all the strings which begin or end with either 00 or 11.	CO3	6 Marks

(OR)

4	a)	Write a regular expression for the language over the set Σ={a,b} in which total number of a's are divisible by 3	CO3	6 Marks
	b)	Consider the FA given; construct a regular expression that is accepted by it.	CO3	8 Marks



UNIT-III

5	a)	For the following Finite State automata construct an equivalent grammar.	CO5	10 Marks

	b)	Define the following. i) Derivation. ii) Parse tree.	CO1	4 Marks

(OR)

6	a)	Find the language generated by the grammar : S→0S1 | 0A | 0 |1B | 1 A→0A | 0 B→1B | 1	CO1	6 Marks
	b)	Discuss in detail about ambiguous grammar and removing ambiguity from grammar.	CO2	8 Marks

UNIT-IV

7	a)	Design PDA for the language $L=\{wcw^R \mid w \in \{0,1\}^*\}$.	CO3	10 Marks
	b)	If L is a context free language then prove that there exists a PDA M such that L = N(M).	CO2	4 Marks

(OR)

8	a)	Obtain a PDA to accept the language $\{L = a^n b^{2n} \mid n \geq 1\}$.	CO3	12 Marks
	b)	Prove that acceptance by empty stack and by final state is equivalent.	CO2	2 Marks

UNIT-V

9		Design a Turing machine which recognizes palindrome over alphabet {0,1}.	CO4	14 Marks

(OR)

10		Explain in detail about Universal Turing machine.	CO1	14 Marks

ELECTRONIC CIRCUIT ANALYSIS AND DESIGN

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What is the basis for the classification of amplifier and also discuss about different amplifiers?	CO1	7 Marks
	b)	Derive the expression for voltage gain of the common emitter amplifier with eimmer resistor.	CO1	7 Marks
		(OR)		
2	a)	What is the effect of cascading on the overall bandwidth?	CO4	7 Marks
	b)	Why the frequency response of cascode amplifier is better in comparison to cascade configuration?	CO4	7 Marks

UNIT-II

3	a)	What is the effect of coupling capacitor on the frequency response of an amplifier?	CO4	7 Marks
	b)	Derive the expression for common emitter short circuit gain as a function of frequency.	CO2	7 Marks
		(OR)		
4	a)	Draw the hybrid-π model of the BJT and explain its components.	CO1	7 Marks
	b)	Derive the expression for frequency range over which hybrid-π model is valid.	CO1	7 Marks

UNIT-III

5	a)	Derive the expression for transfer gain, input and output impedances of voltage shunt feedback amplifier.	CO3	7 Marks
	b)	Compare RC and LC oscillators in all respects.	CO3	7 Marks
		(OR)		
6		Derive the expression for frequency of oscillations of RC phase shift oscillator using FET and also get the magnitude condition.	CO3	14 Marks

UNIT-IV

7	a)	Compare series fed and transformer coupled power amplifier in all respects.	CO2	7 Marks
	b)	What is harmonic distortion and derive the expression for total harmonic distortion?	CO2	7 Marks
		(OR)		
8	a)	Draw the circuit diagram of complementary symmetry push pull amplifier and explain its operation.	CO2	7 Marks
	b)	Derive the expression for maximum efficiency of class B push-pull amplifier.	CO2	7 Marks

UNIT-V

9	a)	Draw the circuit diagram of single tuned amplifier and explain its operation.	CO1	7 Marks
	b)	What are the causes of instabilities in tuned amplifiers?	CO1	7 Marks
		(OR)		
10		Derive the expression for bandwidth of double tuned amplier.	CO1	14 Marks

SIGNALS AND SYSTEMS
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Show that a composite signal is periodic if the ratio of their fundamental periods is rational.	CO4	6 Marks
	b)	Test whether the following signals are Energy signals or Power signals i) $x(t) = A \sin(w_0 t + \theta)$; ii) $x(t) = e^{j\left(3t+\frac{\pi}{2}\right)}$; iii) $x(t) = u(t)$.	CO4	8 Marks
		(OR)		
2	a)	Derive the condition for BIBO stability of an LTI system.	CO3	6 Marks
	b)	Check whether the following systems are: i) Linear or non-linear. ii) Static or Dynamic. *a*) $y(t) = x^2(t)$; *b*) $y(t) = e^{x(t)}$; *c*) $y(n) = 2x(n) + 4$.	CO3	8 Marks

UNIT-II

3	a)	Obtain the Trigonometrical Fourier series for the waveform as shown in figure below.	CO2	8 Marks

	b)	Write short notes on Complex Fourier Spectrum.	CO2	6 Marks
		(OR)		
4	a)	Find the Fourier transform of the following signals. i) $x(t) = t\, e^{-at}\, u(t)$; ii) $x(t) = \cos w_0 t\, u(t)$	CO2	8 Marks
	b)	Prove Parseval's Energy theorem using Fourier Transform.	CO2	6 Marks

UNIT-III

5	a)	State and prove the properties of Auto Correlation function.	CO1	7 Marks
	b)	Find Auto Correlation function and Energy Spectral Density of $x(t) = e^{-at}\, u(t)$	CO4	7 Marks
		(OR)		
6	a)	Show that periodic signal masked by noise can be obtained by using auto correlation.	CO1	7 Marks
	b)	Verify Parseval's theorem for the Energy signal $x(t) = e^{-4t}\, u(t)$.	CO4	7 Marks

UNIT-IV

7	a)	Find the inverse Laplace Transform of $X(s) = \dfrac{1}{(s+1)(s+2)(s+3)}$ for i) ROC: $Re(s) < -3$; ii) $Re(s)$: $-3 < Re(s) < -2$.	CO3	7 Marks
	b)	Explain how Laplace transform is useful in finding Causality and Stability of system in s-domain.	CO3	7 Marks
		(OR)		

8	a)	State and prove the following properties of Laplace Transform. i) Time Reversal; ii) Frequency Shift; iii) Final value theorem.	CO2	7 Marks
	b)	Given the transfer function $H(s) = \frac{s+3}{s^2+6s+8}$, find impulse response and step response of the system.	CO5	7 Marks

UNIT-V

9	a)	Determine the Nyquist rate and Nyquist interval for i) $x(t) = \text{sinc}^2(100\pi t)$ ii) $x(t) = \text{sinc}(80\pi t)\ \text{sinc}(120\pi t)$ iii) $x(t) = 1 + \cos(2000\pi t) + \sin(4000\pi t)$	CO1	8 Marks
	b)	Explain about the effect of under sampling.	CO1	6 Marks

(OR)

10	a)	Find inverse Z-transform of for $X(z) = \frac{1}{1-1.8z^{-1}+0.8z^{-1}}$ for ROC i) $0.8 < \lvert z \rvert < 1$ and ii) $\lvert z \rvert < 0.8$.	CO3	7 Marks
	b)	A causal LTI system is described by difference equation $y(n) = y(n-1) + y(n-2) + x(n) + 2x(n-1)$ Find system function and impulse response of the system.	CO5	7 Marks

SWITCHING THEORY AND LOGIC DESIGN

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Subtract the following binary numbers using 2's complement. i) 10110 – 1011. ii) 1100.10 – 111.01.	CO1	6 Marks
	b)	Express the following functions in a sum of minterms. i) $F = D(A' + B) + B'D$. ii) $F = y'z + wxy' + wxz' + w'x'z$.	CO1	8 Marks
		(OR)		
2	a)	The message below was coded in Hamming code and transmitted through a noisy channel. Decode the message assuming that a single bit error has occurred in the following code words. Assume even parity. i) 1011001 ii) 1100011.	CO1	8 Marks
	b)	Draw the logic diagram corresponding to the following Boolean expressions without simplifying them: i) $BC' + AB + ACD$. ii) $(A + B)(C + D)(A' + B + D)$.	CO4	6 Marks

UNIT-II

3	a)	Obtain the minimal expression $F = \Sigma_m (0, 1, 4, 6, 8, 9, 11) + d(2, 7, 13)$ using K-map.	CO5	6 Marks
	b)	Obtain the minimal expression $F = \Sigma_m (0, 2, 3, 6, 7, 8, 10, 11, 12, 15)$ using tabulation method.	CO5	8 Marks
		(OR)		
4	a)	Simplify the following Boolean functions using K-map: $F = A'B'CE' + A'B'C'D' + B'D'E' + B'CD' + CDE' + BDE'$.	CO5	8 Marks
	b)	Show that NAND is functionally complete.	CO2	6 Marks

UNIT-III

5	a)	Show that a full-subtractor can be constructed with two half-subtractors and an OR gate.	CO3	7 Marks
	b)	Implement the following Boolean function with a 8 x 1multiplexer. $F(A, B, C, D) = \Sigma_m (0, 3, 5, 6, 8, 9, 14, 15)$	CO2	7 Marks
		(OR)		
6	a)	Design a combinational circuit with four inputs that represent a decimal digit in *BCD* and four outputs that produce the 9's complement of the input digit.	CO3	7 Marks
	b)	A combinational circuit is defined by the following functions: $F_1 = x'y' + xyz'$; $F_2 = x' + y$; $F_3 = xy + x'y'$ Design the circuit with a decoder and OR gates.	CO2	7 Marks

UNIT-IV

7	a)	What is race around problem in JK flip-flops? Explain a method of eliminating this problem.	CO2	6 Marks
	b)	Draw the logic diagram of mod 6 ripple counter using T flip-flops and explain its operation with the help of timing waveforms.	CO5	8 Marks
		(OR)		
8	a)	Draw and explain a 4-bit bidirectional shift register with parallel load.	CO1	8 Marks
	b)	Convert T and JK flip-flops to D flip-flop.	CO2	6 Marks

UNIT-V

9	a)	Show how the PLA circuit would be programmed to implement the sum and carry outputs of a full-adder.	CO3	7 Marks
	b)	Implement the following Boolean functions using PAL: $F_1 = \Sigma_m (0, 2, 5, 7, 8, 10, 12, 13)$; $F_2 = \Sigma_m (0, 2, 6, 8, 9, 14, 15)$.	CO3	7 Marks

(OR)

10	a)	With the help of neat diagram, explain the operation of PAL.	CO3	6 Marks
	b)	Realize the following functions using PROM of size 8 x 3: $F_1 = \Sigma_m (0, 4, 7)$; $F_2 = \Sigma_m (1, 3, 6)$; $F_3 = \Sigma_m (1, 2, 4, 6)$	CO1	8 Marks

STRUCTURAL ANALYSIS - I
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		At a certain point on a body the stresses are 90MPa tensile in horizontal direction and 200MPa compressive in vertical direction and a clockwise shear stress of 50MPa.determine orientation of the principal planes, principal stresses, maximum shear stress and state of stress on an element 30 degrees counter clockwise from the current position.	CO2	14 Marks
		(OR)		
2	a)	Explain in detail about principal stress and principal strain conditions with neat sketches.	CO1	7 Marks
	b)	Derive the expression for the stresses acting in an inclined plane due to the forces acting in two mutually perpendicular directions.	CO1	7 Marks

UNIT-II

3		The span of a simply supported beam is 5m and it carries a point load of 50KN at its mid span. The moment of inertia for the left half of the beam is 3I and that for the right half is I. If I=20000cm^4 and E=2 x 10^{4}KN/cm^2, determine the slope at supports and deflection the centre.	CO2	14 Marks
		(OR)		
4	a)	Derive the governing differential equation for deflection of elastic beams.	CO4	7 Marks
	b)	A cantilever of length 'l' carrying a distributed load whose intensity varies uniformly from zero at the free end to 'w' per unit run at the fixed end. Using double integration method, find slope and deflection at the free end.	CO4	7 Marks

UNIT-III

5	a)	Derive Euler's formula for critical load of a column, when one end is fixed and other is hinged.	CO1	7 Marks
	b)	A hollow cast-iron column whose outside diameter is 200mm has a thickness of 20mm.it is 4m long and is fixed at both ends. Calculate the safe load by Rankine's formula using a factor of safety of 4. Calculate the slenderness ratio and the ration of Euler's and Rankine's critical loads. For cast-iron ultimate compressive stress=550MPa, α = 1/1600 and E=94GPa.	CO5	7 Marks
		(OR)		
6	a)	Write the assumptions and limitations of Euler's formula.	CO1	7 Marks
	b)	A steel bar of rectangular section 38mm x 44mm fixed at each end is subjected to axial compression. The bar is 2.25m long. Determine the buckling load and the corresponding axial stress using Euler's formula. Determine the minimum length for which Euler's equation may be used to determine the buckling load, if the proportional limit of the material is 200 N/mm^2,Take E=2 x 10^5 N/mm^2.	CO5	7 Marks

UNIT-IV

7		A three span continues beam having fixed supports at the both ends and roller supports at the middle is having spans 10m, 8.5m and 12m carries a UDL of 8KN/m on span AB, two point loads of 35KN each at equal distances on span CD and a concentric moment of 6.5KN-m in the middle of span BC. Calculate support reactions and draw SFD, BMD.	CO6	14 Marks

(OR)

8		Draw the bending moment and shear force diagrams of a propped cantilever beam of span 8m subjected to UDL of 12 KN/m for the entire span and subjected to a point load 7KN at the propped end.	CO6	14 Marks

UNIT-V

9	a)	Explain about maximum principal stress theory and maximum principal strain theory in detail.	CO3	7 Marks
	b)	In a metallic body the principal stresses are +42MN/m² and -73 MN/m², the third principal stress being zero. The elastic stress in simple tension as well as in simple compression is equal and is 180 MN/m². Find the factor safety based on the elastic limit, if the criterion of the failure for the material is the maximum principal stress theory.	CO5	7 Marks

(OR)

10		A cantilever of a rectangular section 28mm wide and 46mm deep is subjected to an inclined load P at the free end. The inclination of the load is 44 degrees to the vertical. if the length of the cantilevers is 2.72m and the maximum stress due to bending is not to exceed 168MN/m², determine the value of P.	CO3	14 Marks

DESIGN OF MACHINE ELEMENTS-I
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What are the steps involved in the design of machine elements? Explain in detail.	CO1	8 Marks
	b)	Explain about preferred numbers and their significance.	CO1	6 Marks
		(OR)		
2	a)	Why factor of safety is necessary in the design of mechanical components? Discuss the important factors influencing the selection of factor of safety.	CO1	6 Marks
	b)	The load on a bolt consists of an axial pull of 10 kN together with a transverse shear force of 5 kN. Find the diameter of bolt required according to: i) Maximum principal stress theory. ii) Maximum shear stress theory. iii) Maximum strain energy theory. iv) Maximum distortion energy theory. Take permissible tensile stress at elastic limit = 100 MPa and Poisson's ratio = 0.3.	CO2	8 Marks

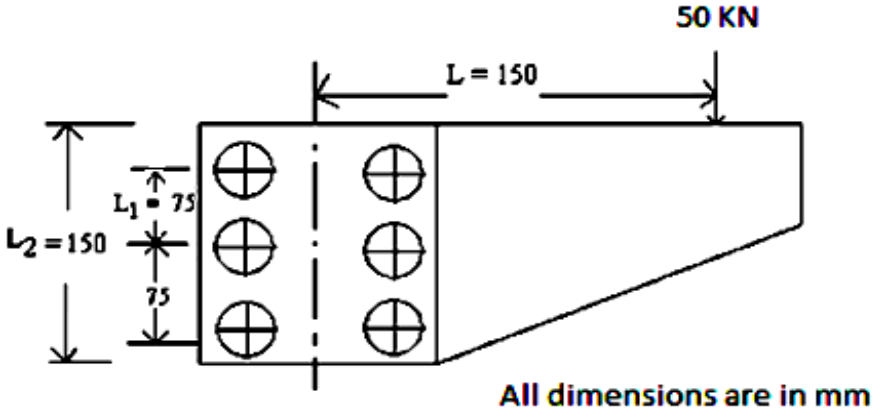
UNIT-II

3	a)	What is meant by endurance strength of a material? How does the size, surface condition of a component and type of load affect such strength?	CO1	6 Marks
	b)	A forged steel bar, 50 mm in diameter, is subjected to a reversed bending stress of 250 N/mm^2. The bar is made of steel 40C8 (σ_{ut} = 600 N/mm^2). The corrected endurance limit of the bar is 100 N/mm^2. Calculate the life of the bar for a reliability of 90%.	CO4	8 Marks
		(OR)		
4	a)	Explain about Soderberg and Goodman criterion for fatigue failure.	CO1	6 Marks
	b)	A machine component is subjected to fluctuating stress varies from 60 to 120 N/mm^2. The corrected endurance limit stress for the machine component is 280 N/mm^2. The ultimate tensile strength and yield strength of material are 600 and 450 N/mm^2 respectively. Find the factor of safety using i) Soderberg line. ii) Goodman line. Also, find the factor of safety against static failure.	CO2	8 Marks

UNIT-III

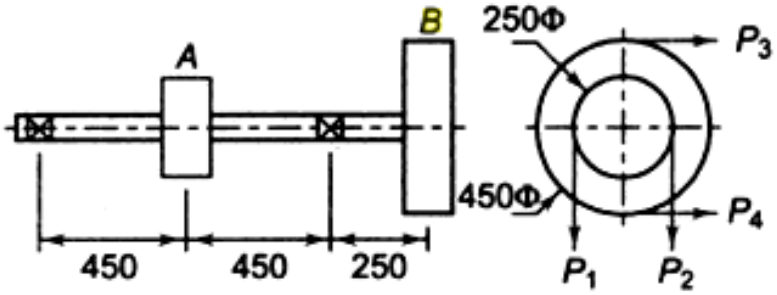
5	a)	What is an eccentric loaded welded joint? Discuss the procedure for designing such a joint.	CO1	8 Marks
	b)	Two steel plates 120 mm wide and 10 mm thick are joined by means of double transverse fillet welds. The maximum tensile stress for the plates and the welding materials should not exceed 110 N/mm^2. Find the required length of the weld, if the strength of the weld is equal to the strength of the plates.	CO4	6 Marks
		(OR)		

6 A bracket size as shown in figure is bolted to a column by 6 bolts of equal size. It carries a load of 50 kN at a distance of 150 mm from the centre of column. If the maximum stress in the bolts is to be limited to 150 MPa, determine the diameter of bolt. CO4 14 Marks



UNIT-IV

7 A line shaft supporting two pulleys A and B is shown in figure. Power is supplied to the shaft by means of a vertical belt on the pulley A, which is then transmitted to the pulley B carrying a horizontal belt. The ratio of belt tension on tight and loose sides is 3:1. The limiting value of tension in the belts is 2.7 kN. The shaft is made of plain carbon steel 40C8 (σ_{ut} = 650 N/mm^2 and σ_{yt} = 380 N/mm^2). The pulleys are keyed to the shaft. Determine the diameter of the shaft according to the ASME code if K_b = 1.5 and K_t = 1.0. CO6 14 Marks



(OR)

8 a) Discuss the design procedure for unprotected flange coupling with a neat sketch. CO3 8 Marks

b) Explain different types of keys with sketches and state their applications. CO1 6 Marks

UNIT-V

9 It is required to design a knuckle joint to connect circular shafts subjected to an axial force of 50 kN. The rods are coaxial and a small amount of angular movement between their axes is permissible. Design the joint and specify the dimensions of its components. The allowable tensile, compressive and shear stress in the rod and pin material is limited to 80 MPa, 100 MPa and 40 MPa respectively. CO3 14 Marks

(OR)

10 a) What is a cotter joint? State the applications of cotter joint. CO1 3 Marks

b) Describe in detail the design procedure of socket and spigot cotter joint. CO3 11 Marks

DYNAMICS OF MACHINERY
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

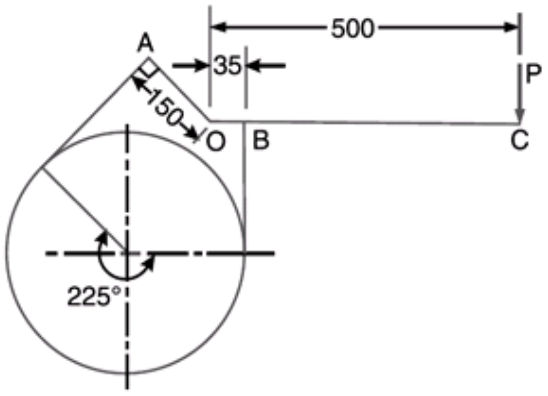
Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Though cone clutches provide high frictional torque. Yet they have not obsolete. Why?	CO1	6 Marks
	b)	Describe with a neat sketch a centrifugal clutch and deduce an equation for the total torque transmitted.	CO2	8 Marks

(OR)

2	a)	What are various types of brakes, describe briefly?	CO1	6 Marks
	b)	A differential band brake, as shown in Figure 1 has an angle of contact of 225°. The band has a compressed woven lining and bears against a cast iron drum of 350mm diameter. The brake is to sustain a torque of 350 N-m and the coefficient of friction between the band and the drum is 0.3. Find : i) The necessary force (P) for the clockwise and anticlockwise rotation of the drum; and ii) The value of 'OA' for the brake to be self locking, when the drum rotates clockwise.	CO2	8 Marks



All dimensions in mm.

Figure 1

UNIT-II

3	a)	Define Gyroscopic Couple and explain the Effect of Gyroscopic Couple on an Aeroplane in each case with neat sketches.	CO1	7 Marks
	b)	An aeroplane flying at 240 km/hr turns towards the left and completes a quarter circle of 60 m radius. The mass of the rotary engine and the propeller of the plane is 450 kg with a radius of gyration of 320 mm. The engine speed is 2000 r.p.m clockwise when viewed from the rear. Determine the gyroscopic couple on the aircraft and state its effect. In what way is the effect changed when the: i) aeroplane turns towards right. ii) engine rotates clockwise when viewed from the front (nose end) and the aeroplane turns (i) leftand (ii) right .	CO3	7 Marks

(OR)

4	a)	What is the function of a flywheel? How does it differ from that of a governor?	CO1	4 Marks
	b)	The equation of the turning moment curve of a three crank engine is (5000+1500sin3θ) N-m, where θ is the crank angle in radians. The moment of inertia of the flywheel is 1000 kg-m² and the mean speed is 300 r.p.m. Calculate the maximum fluctuation of the speed of the flywheel in percentage when (i) the resisting torque is constant, and (ii) the resisting torque is (5000 + 600sinθ) N-m.	CO3	10 Marks

UNIT-III

5	a)	State and explain the following terms relating to governors : i) Stability ii) effort of a governor iii) Power of a governor. iv) Sensitiveness v) Isochronism and vi) Hunting.	CO1	6 Marks
	b)	A spring loaded governor of the Hartnell type has arms of equal length. The masses rotate in a circle of 130 mm diameter when the sleeve is in the mid position and the ball arms are vertical. The equilibrium speed for this position is 450 r.p.m., neglecting friction. The maximum sleeve movement is to be 25 mm and the maximum variation of speed taking in account the friction to be 5 per cent of the mid position speed. The mass of the sleeve is 4 kg and the friction may be considered equivalent to 30 N at the sleeve. The power of the governor must be sufficient to overcome the friction by one per cent change of speed either way at mid-position. Determine, neglecting obliquity effect of arms; i) The value of each rotating mass. ii) The spring stiffness in N/mm. iii) The initial compression of spring.	CO2	8 Marks

(OR)

6		The upper arms of a Porter governor has lengths 350 mm and are pivoted on the axis of rotation. The lower arms has lengths 300 mm and are attached to the sleeve at a distance of 40 mm from the axis. Each ball has a mass of 4 kg and mass on the sleeve is 45 kg. Determine the equilibrium speed for a radius of rotation of 200 mm and find also the effort and power of the governor for 1 per cent speed change.	CO2	14 Marks

UNIT-IV

7	a)	Describe the method of balancing of different masses revolving in the same plane.	CO1	4 Marks
	b)	A, B, C and D are four masses carried by a rotating shaft at radii 100, 125, 200 and 150 mm respectively. The planes in which the masses revolve are spaced 600 mm apart and the mass of B, C and D are 10 kg, 5 kg, and 4 kg respectively. Find the required mass A and the relative angular settings of the four masses so that the shaft shall be in complete balance.	CO4	10 Marks

(OR)

8	a)	What are in-line engines? How are they balanced? It is possible to balance them completely?	CO1	4 Marks
	b)	The reciprocating mass per cylinder in a 60° V-twin engine is 1.5 kg. The stroke and connecting rod length are 100 mm and 250 mm respectively. If the engine runs at 2500 r.p.m., determine the maximum and minimum values of the primary and secondary forces. Also find out the crank position corresponding these values.	CO4	10 Marks

UNIT-V

9 a) Derive the natural frequency of oscillation of the cylinder when it is displaced slightly from its equilibrium position in a circular surface of radius 'R'. The mass of cylinder is 'm' and radius 'r' is rolling without slipping in circular surface — CO1 — 7 Marks

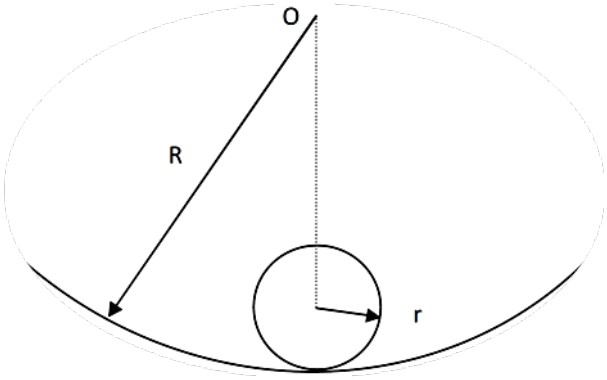


Figure-2

b) A machine having a mass of 100 Kg and supported on spring of total stiffness 7.84x105 N/m has an unbalanced rotating element which results in a disturbing force of 392 N at a speed of 3000 r.p.m. Assuming the damping factor as 0.2. Then determine: i) The amplitude of motion due to unbalance ii) Transmissibility and iii) the Transmitted force to the foundation. — CO5 — 7 Marks

(OR)

10 a) Define the terms transmissibility and vibration Isolation. — CO1 — 4 Marks

b) A torsional system is shown in figure 3. Find the frequencies of torsional vibrations and the positions of the nodes. Also find the amplitudes of vibrations. G=84 x 10^9 N/m² — CO5 — 10 Marks

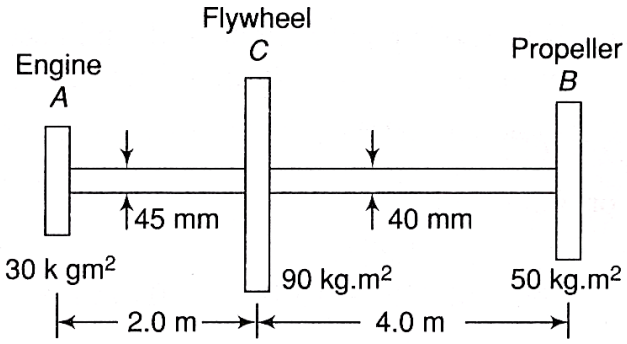

Figure.3

FLUID MECHANICS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	A Derive an expressions for capillary fall and rise.	CO1	7 Marks
	b)	The space between two square flat parallel plates is filled with oil. Each side of the plate is 60cm. The thickness of the oil film is 12.5mm. The upper plate, which moves at 2.5 meter per sec requires a force of 98.1N to maintain the speed. Determine: i) The dynamic viscosity of the oil in poise. ii) The kinematic viscosity of the oil in stokes if the specific gravity of the oil is 0.95.	CO2	7 Marks

(OR)

2		A Differential manometer is connected at the two points A and B of two pipes as shown in Fig (a). The pipe A contains a liquid of sp. gr. = 1.5 while pipe B containsa liquid of sp. gr. = 0.9. The pressures at A and B are 1 kgf/cm² and 1.80 kgf/cm² respectively. Find the difference in mercury level in the differential manometer.	CO4	14 Marks

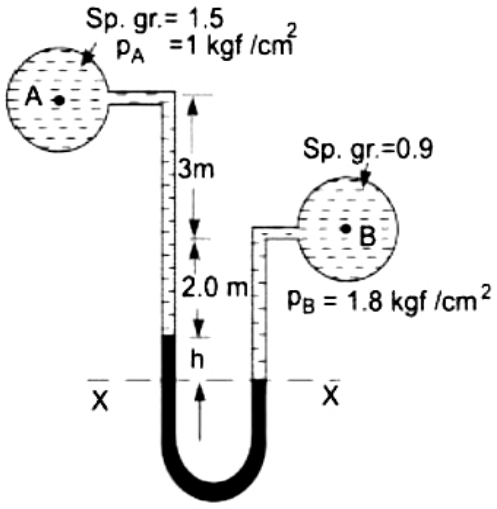

Fig. (a)

UNIT-II

3		What is an orificemeter? Derive an expression for the discharge through orificemeter.	CO3	14 Marks

(OR)

4		A 250 liters/s of water is flowing in a pipe having a diameter of 300 mm. If the pipe is bent by 135° (that is change from initial to find direction is 135°), find the magnitude and direction of the resultant force on the bend. The pressure of water flowing is 39.24 N/cm².	CO4	14 Marks

UNIT-III

5		Three pipes of 400mm, 300mm and 200mm diameters have lengths of 400m, 200m, and 300m respectively. They are connected in series to make a compound pipe. The ends of this compound pipe are connected with two tanks whose difference of water levels is 20m. If co-efficient of friction for these pipes is same and equal to 0.005, determine the discharge through the compound pipe neglecting first the minor losses and then including them.	CO3	14 Marks

(OR)

6		Derive an expression for the force and work done by the jet on unsymmetrical moving curved plate when jet strikes tangentially at one of its tip and also draw velocity triangles.	CO2	14 Marks

UNIT-IV

7	a)	Define the term 'Governing of a turbine'. Describe with a neat sketch the working of an oil pressure governor.	CO4	7 Marks
	b)	Derive an expression for the specific speed of a turbine.	CO6	7 Marks

(OR)

8		A pelton wheel is to be designed for the following specifications. Power = 735.75kw S.P.Head = 200m , Speed = 800 r.p.m, Overall efficiency = 0.86 and jet diameter is not exceed one-tenth the wheel diameter. Determine: i) Wheel diameter. ii) The number of jets required. iii) Diameter of the jet. Take C_v =0.98 and speed ratio=045.	CO5	14 Marks

UNIT-V

9		Derive an expression for the work done by an impeller of a centrifugal pump with sketch.	CO3	14 Marks

(OR)

10		What is a reciprocating pump? Describe the principle and working of a double acting reciprocating pump with neat sketch and also derive workdone/sec.	CO6	14 Marks

MACHINE TOOLS AND MODERN MACHINING PROCESSES
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1	a)	Describe the nomenclature of single point cutting tool in ASA system.	CO6	7 Marks
	b)	What are the functions of a coolant?	CO6	7 Marks
		(OR)		
2	a)	Discuss the important cutting tool materials.	CO2	7 Marks
	b)	Derive the relation for shear plane angle from fundamentals.	CO4	7 Marks
		UNIT-II		
3	a)	Explain any seven important lathe operations briefly.	CO1	7 Marks
	b)	Describe the construction and working of capstan lathe.	CO1	7 Marks
		(OR)		
4	a)	Explain the principle of thread cutting in lathe.	CO1	7 Marks
	b)	Discuss about multi spindle automatic lathe and give its applications.	CO1	7 Marks
		UNIT-III		
5	a)	Give the classification of planning machines.	CO1	7 Marks
	b)	Explain the different operations that can be carried out on drilling machine.	CO1	7 Marks
		(OR)		
6	a)	Explain how machining time is calculated in shaper.	CO4	7 Marks
	b)	Explain the nomenclature of twist drill using a neat sketch.	CO3	7 Marks
		UNIT-IV		
7	a)	Explain the following terms of grinding wheel. i) Loading; ii) Glazing; iii) Turning; iv) Dressing.	CO1	7 Marks
	b)	Describe the principle of operation and main components of surface grinder.	CO1	7 Marks
		(OR)		
8	a)	Give the classification of milling machines in detail.	CO1	7 Marks
	b)	Explain any five important milling operations.	CO1	7 Marks
		UNIT-V		
9		Explain the principle of operation, applications and advantages of USM.	CO6	14 Marks
		(OR)		
10		Describe the Electron beam machining process in detail.	CO6	14 Marks

ANALOG COMMUNICATIONS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	The signal m(t) = 2cos(400πt) + sin(800πt) modulate a carrier 2 cos(2x10^{6}t). The modulation index is m=0.6. Find out the power in the carrier and sideband components of the modulated signal.	CO5	7 Marks
	b)	Explain the generation methods of DSBSC.	CO1	7 Marks
		(OR)		
2	a)	A SSB signal is generated by modulating an 800-kHz carrier by the signal m(t) = cos(2000πt) + 2sin(2000πt). The amplitude of the carriers Ac= 100. i) Determine the (time domain) expression for the lower sideband of the SSB AM signal ii) Determine the magnitude spectrum of the lower sideband SSB signal.	CO1	7 Marks
	b)	Derive the expression for time domain description of VSB Modulated wave.	CO1	7 Marks

UNIT-II

3	a)	Describe the spectral analysis of Frequency modulation. Compare the phasor diagram of narrow band FM signal and AM signal and discuss about the similarities and differences of the two signals.	CO5	7 Marks
	b)	With a neat sketch, explain the generation of FM wave using direct method.	CO1	7 Marks
		(OR)		
4	a)	A carrier at 200 MHz is frequency modulated by a sine wave signal at a frequency of 15 kHz. The peak carrier deviation is (±) 50 kHz. i) What is the value of the modulation index, m? ii) Approximately what total bandwidth is needed to transmit the signal.? iii) Draw a sketch to show the general idea of the spectrum of the FM sidebands for the modulated carrier. Indicate (and give a value for) the spacing between sidebands in frequency.	CO5	6 Marks
	b)	With the relevant expressions explain the demodulation of FM signals using frequency discrimination method.	CO1	8 Marks

UNIT-III

5	a)	In envelope detection, AM signal at the input to ED, has the modulation index 0.5 with the carrier amplitude of 2 V.m(t) is a tone signal of frequency 5 kHz and f_c >> 5kHz. If the (two-sided) noise PSD at the detector input is 10^{-8} watts/Hz, what is the expected $(SNR)_o$ of this scheme? By how many dB, this scheme is inferior to DSB-SC?	CO2	7 Marks
	b)	Derive the figure of merit of SSB.	CO2	7 Marks
		(OR)		
6	a)	Draw the FM receiver model and determine the SNR of the FM System.	CO2	9 Marks
	b)	With a neat phasor diagram, explain the threshold effect in AM system.	CO2	5 Marks

UNIT-IV

7	a)	Draw the block diagram of AM transmitter using low level modulation. Explain the significance of each block.	CO3	7 Marks
	b)	Explain the Tuned Radio Frequency (TRF) and also give the advantages and disadvantages of TRF receivers.	CO3	7 Marks

(OR)

8	a)	Draw the block diagrams of a super heterodyne receiver and explain the function of each block. With neat diagram, explain the general process of frequency changing in a super heterodyne receiver.	CO3	7 Marks
	b)	With a neat block diagram, explain FM receiver.	CO3	7 Marks

UNIT-V

9	a)	Explain the generation and detection of PAM and also give its applications.	CO1	8 Marks
	b)	Compare Digital pulse transmission as compared to analog transmission.	CO1	6 Marks

(OR)

10	a)	Compare PAM, PWM, PPM modulation schemes.	CO1	7 Marks
	b)	With a neat sketch, explain Time division multiplexing.	CO1	7 Marks

		UNIT-I		
1	a)	Explain the following. i) Noise margin. ii) Transition time with respect to CMOS logic.	CO5	7 Marks
	b)	List out the characteristics of Emitter coupled logic.	CO5	7 Marks
		(OR)		
2	a)	Draw the CMOS Circuit for NAND gate with the help of function table.	CO1	8 Marks
	b)	Briefly list out the differences between ECL, TTL and CMOS logic family.	CO5	6 Marks
		UNIT-II		
3	a)	Define simulation. Explain about Gate level simulation and behavioral simulation.	CO4	7 Marks
	b)	Explain various types of delays in VHDL.	CO6	7 Marks
		(OR)		
4	a)	Explain the Operation of 74 x 138 decoder.	CO2	6 Marks
	b)	Explain the structure of various LOOP statements in VHDL, with examples.	CO4	8 Marks
		UNIT-III		
5	a)	Give the logic diagram of 74 x 139. Explain with the help of truth table using device design a 3to 8 decoder and provide the truth table.	CO2	8 Marks
	b)	Explain how a JK flip-flop can be constructed using a T flip- flop.	CO4	6 Marks
		(OR)		
6	a)	Develop a VHDL code for 2 x 4 demultiplexer of 74 x 139 IC.	CO3	6 Marks
	b)	Sketch the symbol and logic diagram of 74 x 280 IC.	CO2	8 Marks
		UNIT-IV		
7	a)	Explain about the logic behind Dual priority encoder.	CO1	6 Marks
	b)	Design a 4-bit LFSR counter using 74 x 194.List out the sequence that the initial state is 1110.	CO4	8 Marks
		(OR)		
8		Design and develop a verilog code for ring counter using 74 x 169 IC.	CO4	14 Marks
		UNIT-V		
9	a)	With a neat diagram, neatly explain about the internal structure of SRAM.	CO1	7 Marks
	b)	Write a short note on synchronous DRAM.	CO1	7 Marks
		(OR)		
10	a)	Mention any two applications of FPGA.	CO1	7 Marks
	b)	Distinguish between SRAM and ROM.	CO1	7 Marks

ELECTROMAGNETIC THEORY AND TRANSMISSION LINES

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Deduce the conditions on *tangential* and *normal* components of E at a point on the surface of a conductor placed in free space, and hence show that the surface of a conductor is an *equipotential* surface.	CO1	7 Marks
	b)	A circular ring placed along $y^2 + z^2 = 4$, $x = 0$ carries a uniform charge of 5 μC/m. Calculate the electric flux density D at the point $P(3, 0, 0)$.	CO4	7 Marks
		(OR)		
2	a)	A uniform sheet of surface current K = K_y a_y is placed in $z = 0$ plane. Apply Ampere's circuital law to show that the magnetic field intensity H at any point (x, y, z) is 1/2 K x a_N, where a_N is the unit vector along the out ward normal direction to the sheet.	CO1	7 Marks
	b)	A conductor 4m long lies along the y – axis, with a current of 10 Amp, a_y indirection. Find the force on the conductor if the field in the region is B=0.05 web/m^2.	CO4	7 Marks

UNIT-II

3	a)	Verify whether the fields, E = 2 sin(x) sin(t) a_y V/m and H = $\frac{2}{\mu_0}$ cos(x) cos(t) a_z A/m, satisfy the Maxwell's equations in free space.	CO1	7 Marks
	b)	Derive the Maxwell's equations in integral form, from differential form for static fields, and describe the physical meaning of integral forms.	CO2	7 Marks
		(OR)		
4	a)	The region *1*, defined by $x < 0$, is free space while region *2*, $x > 0$ is a dielectric material for which $\epsilon_{r2} = 2.4$. If $D_1 = 3a_x - 4a_y + 6a_z$ C/m^2, calculate the direction and magnitude of E_2.	CO2	7 Marks
	b)	Derive *equation of continuity* for time varying fields.	CO1	7 Marks

UNIT-III

5	a)	Obtain the condition required to separate good conductors from good dielectrics, and derive the propagation characteristics of a uniform plane wave propagating in a good dielectric medium.	CO5	7 Marks
	b)	Obtain the relation between E and H fields of a uniform plane wave, and show that the direction of E x H is along the direction of propagation of the wave.	CO6	7 Marks
		(OR)		
6	a)	Derive the wave equations for E and H in conducting medium and express the wave equations in phasor notation.	CO5	7 Marks
	b)	Derive the expressions for α, β, v_p and η for the wave propagating in a good conducting medium and hence deduce the expression for skin depth δ.	CO6	7 Marks

UNIT-IV

7	a)	Develop the differential equations governing the voltage and current at a point on a uniform transmission line.	CO3	7 Marks
	b)	Prove that a line of finite length terminated by its characteristic impedance Zo is equivalent to a line of an infinite length.	CO2	7 Marks

(OR)

8	a)	An open wire telephone line has R=10 ohm/km, L=0.0037 H/km, C=0.0083 x 10^{-6} F/km and G=0.4 x 10^{-6} mhos/km. Determine its Z_o, α, and β at 1000 Hz.	CO3	7 Marks
	b)	Discus the significance of attenuation and Phase shift constants.	CO2	7 Marks

UNIT-V

9	a)	Discuss the significance of λ/4 and λ/8 lines.	CO1	7 Marks
	b)	Discuss mathematically the formation of standing waves on a dissipation less line and hence compare the formation of nodes and antinodes in open and short circuit lines.	CO4	7 Marks

(OR)

10	a)	A lossless transmission line in air having a characteristic impedance of 300Ω is terminated in unknown impedance .The first voltage minimum is located at 15 cm from the load. The standing wave ratio is 3.3. Calculate the wavelength and terminated impedance.	CO1	7 Marks
	b)	A 75Ω lossless transmission line is to be matched with a 100+j80Ω load using single stub. Calculate the stub length and its distance from the load corresponding to the frequency of 30MHz using smith chart.	CO4	7 Marks

LINEAR IC APPLICATIONS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain about DC and AC analysis of Dual input and Balanced Output Configuration of Differential Amplifier.	CO2	7 Marks
	b)	Elaborate the significance of CMRR in the differential amplifier and give methods for improving this factor.	CO2	7 Marks
		(OR)		
2	a)	Explain the AC Characteristics of Op-Amp.	CO2	7 Marks
	b)	Calculate the operating points of the differential amplifier with R_C = 3.9 Kohms, R_E=3.3 Kohms, V_{CC} = 9V and $-V_{EE}$ = -9V.	CO2	7 Marks

UNIT-II

3	a)	Explain about log and anti - log Amplifiers.	CO3	7 Marks
	b)	Explain the operation of Triangular wave Generator circuit.	CO3	7 Marks
		(OR)		
4	a)	Discuss the characteristics and limitations of op amp comparator and give basic differences between comparator and Schmitt trigger.	CO3	7 Marks
	b)	Describe the operation of Monostable Multivibrator using 741.	CO3	7 Marks

UNIT-III

5	a)	Write a short note on differences between fixed and adjustable voltage regulators.	CO4	7 Marks
	b)	Explain about 723 General Purpose regulators.	CO4	7 Marks
		(OR)		
6	a)	Derive the cut-off frequencies for Low Pass Filter, High Pass Filter of First order.	CO4	7 Marks
	b)	Design a Band rejection filter with F_L=150Hz, F_h=10KHz. Assume the A_v=2. And also calculate Q.	CO4	7 Marks

UNIT-IV

7	a)	Explain the operation of Astable Mode of 555 and derive the expression of Duty cycle.	CO5	7 Marks
	b)	Write a short note Application of Monostable multivibrator.	CO5	7 Marks
		(OR)		
8	a)	Mention the importance VCO and derive the expression for frequency.	CO5	7 Marks
	b)	Design 555 timer for a square wave generator with 50% duty cycle.	CO5	7 Marks

UNIT-V

9	a)	Explain about binary weighted DAC and calculate resolution for a 3 bit DAC with 5v as Vo.	CO1	7 Marks
	b)	Write about the specifications of DAC and calculate Vo for 4bit DAC with resolution of 0.15v.	CO1	7 Marks
		(OR)		
10	a)	Elaborate the functioning of a Flash A/D converter.	CO1	7 Marks
	b)	Elaborate the concept of Monolithic DAC.	CO1	7 Marks

II B.Tech II Semester (SVEC-16) Supplementary Examinations July - 2022

PROBABILITY AND STOCHASTIC PROCESS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 a) If a mass function is given by CO1 8 Marks

$$P(x) = \begin{cases} Ax & ; x = 1,2,.....50 \\ A(100 - x) & ; x = 51,52....100 \\ 0 & ; \text{otherwise} \end{cases}$$

i) Find A that makes the function a p.m.f and sketch its graph.
ii) Find $P(x > 50)$, $P(x < 50)$, $P(25 < x < 75)$ and $P(x$ – as odd number)
iii) (*a*) If the events indicated in (*b*) are *A,B,C,D* respectively find $P(A/B)$; $P(A/C)$; $P(A/D)$;$P(C/D)$.

b) State and prove Total probability and Bayes' theorem CO1 6 Marks

(OR)

2 a) A company producing electric relays has three manufacturing plants producing 50, 30 and 20 percent respectively of its product. Suppose the probabilities that a relay manufactured by these plants is defective are 0.02, 0.05 and 0.01 respectively. CO1 7 Marks

i) If a relay is selected at random from the output of the company, what is the probability that it is defective?
ii) If a relay selected at random is found to be defective, what is the probability that it was manufactured by plant 2?

b) Let two honest coins, marked 1 and 2, be tossed together. The four possible outcomes are *T*1*T*2, *T*1*H*2, *H*1*T*2, *H*1*H*2. (*T*1 indicates toss of coin 1resulting in tails; similarly *T*2 etc.) We shall treat that all these outcomes are equally likely; that is the probability of occurrence of any of these four outcomes is 1/4. (Treating each of these outcomes as an event, we find that these events are mutually exclusive and exhaustive). Let the event *A* be 'not *H*1*H*2 ' and *B* be the event 'match'. (Match comprises the two outcomes *T*1*T*2, *H*1*H*2). Find $P(B|A)$. Are *A* and *B* independent. CO1 7 Marks

UNIT-II

3 a) $Y = g(X) = X + a$, where '*a*' is a constant. Let us find $f_Y(y)$. CO2 7 Marks

b) The CDF of the random variable *X* is given by CO1 7 Marks

$$F_X(x) = \begin{cases} 0 & x < 0 \\ x + \frac{1}{2} & 0 \le x \le \frac{1}{2} \\ 1 & x > \frac{1}{2} \end{cases}$$

i) Draw the graph of the CDF.
ii) Compute P(X > ¼).

(OR)

4 Find the expected value and variance of the random variable *K* the following **pmf** . CO2 14 Marks

$$pk(k) = \frac{\lambda^k}{k!} e^{-\lambda} \qquad k = 0, 1, 2,....$$

UNIT-III

5	a)	Given two random variables X and Y with the joint CDF$FXY(x, y)$ and marginal CDFs $FX(x)$ and $FY(y)$, respectively, compute the joint probability that X is greater than a and Y is greater than b.	CO2	6 Marks
	b)	The joint PMF of two random variables X and Y is given by where k is a constant. $$PXY(x,y) = \begin{cases} k(2x+y) & x = 1,2; y = 1,2 \\ 0 & otherwise \end{cases}$$ i) What is the value of k? ii) Find the marginal PMFs of X and Y. iii) Are X and Y independent?	CO2	8 Marks

(OR)

6	a)	The joint PDF of the random variables X and Y is defined as follows: $$f_{XY}(x,y) = \begin{cases} 25e^{-5y} & 0 < x < 0.2, y > 0 \\ 0 & otherwise \end{cases}$$ i) Find the marginal PDFs of X and Y. ii) What is the covariance of X and Y?	CO2	7 Marks
	b)	State and prove central limit theorem.	CO1	7 Marks

UNIT-IV

7	a)	A random process has sample functions of the form $X(t) = A\cos(wt+\Theta)$ where w is constant, A is a random variable that has a magnitude of +1 and −1with equal probability, and _ is a random variable that is uniformly distributed between 0 and 2π. Assume that the random variables A and _ are independent.	CO3	7 Marks
	b)	State and prove the properties of cross correlation.	CO3	7 Marks

(OR)

8	a)	A random process has the autocorrelation function $R_{XY}(\tau) = \frac{4\tau^2 + 6}{\tau^2 + 1}$. Find the mean-square value, the mean value and the variance of the process.	CO3	7 Marks
	b)	Two random processes $X(t)$ and $Y(t)$ are defined as follows: $X(t) = A\cos(wt + \Theta)$ $Y(t) = B\sin(wt + \Theta)$ Where A, B, and w are constants and _ is a random variable that is uniformly distributed between 0 and 2_. Find the cross correlation function of $X(t)$ and $Y(t)$.	CO3	7 Marks

UNIT-V

9	a)	Obtain the expression for noise figure in terms of equivalent noise temperature for an amplifier.	CO3	7 Marks
	b)	Explain Shot noise, thermal noise.	CO1	7 Marks

(OR)

10	a)	Derive the expression for thermal noise voltage.	CO3	7 Marks
	b)	Classify noise and explain.	CO1	7 Marks

PULSE AND DIGITAL CIRCUITS

[Electronics and Communication Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1.	a)	Explain in detail about Ringing Circuit with a neat sketch.	CO1	6 Marks
	b)	Justify why sinusoidal signals are not suitable for linear wave shaping.	CO2	8 Marks
		(OR)		
2.	a)	Explain in detail about attenuators.	CO1	7 Marks
	b)	Describe how a Compensated Attenuator improves the unsatisfactory response of a simple Attenuator.	CO2	7 Marks

UNIT-II

3.	a)	For the circuit shown in figure an input voltage V_i linearly from 0 to 150V is applied. Sketch the output waveform V_0 to the same time scale. Assume ideal diodes.	CO3	8 Marks

	b)	What is meant by a **dc** restoration circuit and explain?	CO1	6 Marks
		(OR)		
4.	a)	Considering a practical clamping circuit, Asses the generation of spikes with tilt in the forward and in the reverse directions.	CO6	6 Marks
	b)	Discuss in detail about Diode Comparator with neat sketches.	CO1	8 Marks

UNIT-III

5.	a)	Calculate pulse width period and frequency of output of an astablemultivibrator, if $R_1 = R_2 = 10K\Omega$ and $C_1 = C_2 = 0.01\mu F$.	CO4	6 Marks
	b)	Classify Multivibrators and explain the types of triggering.	CO1	8 Marks
		(OR)		
6.	a)	Derive the expressions for UTP and LTP for Schmitt trigger circuit with equivalent circuit diagrams and waveforms.	CO2	8 Marks
	b)	Find the ratio V_{CC}/V, if a voltage-to-frequency converter generates oscillations of frequency twice of that when $V=V_{CC}$.	CO5	6 Marks

UNIT-IV

7.	a)	How to apply Miller principle to generate sweep voltage?	CO5	7 Marks
	b)	What is linearity correction through adjustment of driving waveform?	CO4	7 Marks
		(OR)		
8.	a)	Derive the expression for slope error in Bootstrap sweep circuit.	CO2	7 Marks
	b)	Identify appropriate circuit to generate linear Sweep waveform which can be used in Cathode ray oscilloscope.	CO6	7 Marks

UNIT-V

9.	a)	Draw the circuit diagram of Diode-transistor logic NAND gate and explain its operation.	CO1	6 Marks
	b)	Realize OR gate using diodes and transistors.	CO2	8 Marks
		(OR)		
10.	a)	What are the applications of sampling gates?	CO1	7 Marks
	b)	Draw the circuit diagram of CMOS NAND gate and explain its operation.	CO1	7 Marks

DATABASE MANAGEMENT SYSTEMS
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the purpose of database system. What are the advantages of it.	CO1	8 Marks
	b)	Draw and Explain the three level architecture of database system.	CO1	6 Marks
		(OR)		
2	a)	Compare the specialization and generalization.	CO2	6 Marks
	b)	With an example describe various attributes used in ER Model.	CO2	8 Marks

UNIT-II

3	a)	Discuss in detail about various concepts used in ER-model.	CO2	6 Marks
	b)	What is a view? How views are implemented?	CO2	8 Marks
		(OR)		
4	a)	Differentiate Relational Algebra, Relational Calculus and SQL.	CO1	6 Marks
	b)	Differentiate Tuple Relational Calculus and Domain Relational Calculus.	CO2	8 Marks

UNIT-III

5	a)	Write the basic structure of SQL. Explain about the data types used in SQL.	CO1	8 Marks
	b)	What is a group function? List and explain how to use group functions in SQL with appropriate examples.	CO5	6 Marks
		(OR)		
6	a)	Why the functional dependency is needed? Write Armstrong inference rules of functional dependencies.	CO2	6 Marks
	b)	Explain in detail about various normal forms with examples.	CO2	8 Marks

UNIT-IV

7	a)	Describe the properties of a transaction. Explain about transaction states with a neat sketch.	CO2	8 Marks
	b)	Explain in detail about Serializability and Recoverability used in scheduling of transactions.	CO2	6 Marks
		(OR)		
8	a)	What is a time-stamp? Write and explain the steps of basic time-stamp ordering protocol.	CO3	7 Marks
	b)	Explain validation concurrency control mechanism.	CO1	7 Marks

UNIT-V

9	a)	What is an index structure? Explain how to use hash table as an index structure for a database.	CO1	8 Marks
	b)	When does a collision occur in hashing? Illustrate various collision resolution techniques.	CO3	6 Marks
		(OR)		
10	a)	Discuss in detail about B tree index files.	CO1	7 Marks
	b)	Explain B+ tree implementation with examples. Explain its advantages over B tree.	CO2	7 Marks

INDUSTRIAL INSTRUMENTATION - I
[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

		UNIT-I		
1		Explain with figures how to measure force with different load cells.	CO1	14 Marks
		(OR)		
2	a)	Explain how to measure the torque with load cell method.	CO1	6 Marks
	b)	What is significance of stain gauge to measure the torque?	CO2	8 Marks
		UNIT-II		
3	a)	Draw and explain variable reluctance type accelerometer.	CO2	8 Marks
	b)	With a neat diagram, explain the construction and working of stroboscope.	CO1	6 Marks
		(OR)		
4	a)	Explain how to measure the velocity with tachometer.	CO4	6 Marks
	b)	Write a short note on Gyroscope.	CO1	8 Marks
		UNIT-III		
5	a)	Explain about elastic transducers.	CO1	7 Marks
	b)	With a neat diagram, explain the construction and working of capacitive transducer.	CO3	7 Marks
		(OR)		
6	a)	Explain about sound level meter.	CO1	7 Marks
	b)	What is the need of mono meter? Explain the types.	CO2	7 Marks
		UNIT-IV		
7	a)	Explain in detail about RTD and its characteristics.	CO1	7 Marks
	b)	What is the difference between 3 lead methods and 4 lead methods?	CO3	7 Marks
		(OR)		
8	a)	What is thermistor? Explain types.	CO1	8 Marks
	b)	Explain thermo couple junctions and different types of reference junctions used.	CO4	6 Marks
		UNIT-V		
9	a)	Explain a suitable method to measure the radiation.	CO3	7 Marks
	b)	Explain construction and working Johnson noise thermometer.	CO2	7 Marks
		(OR)		
10	a)	Explain in detail about thermography.	CO3	8 Marks
	b)	Write short note on Pyrometric cones.	CO1	6 Marks

LINEAR AND DIGITAL ICS

[Electrical and Electronics Engineering, Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the concept of level translator in detail.	CO1	6 Marks
	b)	With suitable diagrams, neatly explain about the compensation techniques used for non ideal DC characteristics of an Op-Amp.	CO1	8 Marks
		(OR)		
2	a)	Discuss briefly about external frequency compensation techniques of an Op-Amp.	CO2	8 Marks
	b)	For an OP-AMP, PSRR is 70dB, CMRR is 10^5, and differential mode gain is 10^5. The Output voltage changes by 10V in 2 μsec. Calculate: i) Numerical value of PSRR. ii) Common mode gain. iii) Slew rate.	CO4	6 Marks

UNIT-II

3	a)	List out the limitations of Op-Amp as a comparator.	CO3	7 Marks
	b)	Draw the frequency response curve of a differentiator. How is it modified when a small resistor is connected in series with the capacitor?	CO2	7 Marks
		(OR)		
4	a)	What are the features of an instrumentation amplifier?	CO1	6 Marks
	b)	Explain the operation of the instrumentation amplifier using a transducer bridge. Also derive an expression for output voltage.	CO1	8 Marks

UNIT-III

5	a)	What do you mean by sampling? Explain the basic circuit for sample and Hold circuit.	CO1	8 Marks
	b)	Design a 555 Astable multivibrator to operate at 10 kHz with 70% duty cycle.	CO4	6 Marks
		(OR)		
6	a)	Draw the circuit diagram of PLL AM detector and explain its operation.	CO2	6 Marks
	b)	Derive an expression for frequency of oscillations of RC Phase Shift Oscillator using an Op-Amp.	CO2	8 Marks

UNIT-IV

7	a)	List out different logic families of CMOS logic and explain each one in detail.	CO1	6 Marks
	b)	Explain how different levels of digital circuit modeling can be done using HDL.	CO5	8 Marks
		(OR)		
8	a)	Explain the concept of CMOS dynamic electrical behavior in detail.	CO1	6 Marks
	b)	What are the different objects and data types available in HDL? Explain.	CO1	8 Marks

UNIT-V

9	a)	Explain the operation of 74 x 163 IC using state table.	CO2	7 Marks
	b)	Distinguish between the synchronous and asynchronous counters in detail.	CO2	7 Marks
		(OR)		
10	a)	Design a 32 to 1 multiplexer using four 74 x 151 multiplexers and 74 x 139 decoder.	CO2	7 Marks
	b)	Design a conversion circuit to convert T flip flop to JK flip flop.	CO3	7 Marks

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw and explain the different types of 8085 microprocessor.	CO1	7 Marks
	b)	Explain the different types of buses in 8085 microprocessor.	CO1	7 Marks
		(OR)		
2	a)	Describe the structure of SRAM cell.	CO3	4 Marks
	b)	Explain various mapping techniques associated with cache memories.	CO3	10 Marks

UNIT-II

3		Draw and explain the 8085 architecture.	CO1	14 Marks
		(OR)		
4		Explain 8085 arithmetic and logical instructions with suitable examples.	CO2	14 Marks

UNIT-III

5	a)	Write the need for addressing modes. Explain various addressing modes supported by a general purpose CPU.	CO1	7 Marks
	b)	Differentiate between various interrupts.	CO1	7 Marks
		(OR)		
6	a)	Write an 8085 program to arrange an array of data in ascending order.	CO3	7 Marks
	b)	Explain the need for an input interface.	CO4	7 Marks

UNIT-IV

7		Design a bus system for four registers using multiplexers.	CO3	14 Marks
		(OR)		
8	a)	Design a 4 bit sequential circuit for shifting bits to the left or to the right.	CO3	6 Marks
	b)	Differentiate between RISC and CISC processors.	CO2	8 Marks

UNIT-V

9		Develop an algorithm to perform multiplication operation with an example.	CO5	14 Marks
		(OR)		
10		Illustrate with an example an instruction pipeline.	CO1	14 Marks

DESIGN AND ANALYSIS OF ALGORITHMS
[Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define algorithm. Describe the criteria to be satisfied by an algorithm.	CO1	5 Marks
	b)	Write notes on asymptotic notations of algorithms.	CO1	9 Marks
		(OR)		
2		Present both recursive and iterative algorithms that compute factorial of a number. Also, determine the time complexities using step count method.	CO2, CO3	14 Marks

UNIT-II

3	a)	Present and describe the simple union and weighted union algorithms for disjoint sets.	CO2	8 Marks
	b)	Illustrate DFS algorithm.	CO1	6 Marks
		(OR)		
4		Write short notes on the following: i) Find operation of disjoint sets. ii) Connected components. iii) Spanning Tree.	CO1	14 Marks

UNIT-III

5	a)	Elucidate Quick Sort algorithm.	CO1, CO4	8 Marks
	b)	Derive the best case, average case and worst case time complexities of quick sort using substitution method.	CO2	6 Marks
		(OR)		
6	a)	Find the Minimum Cost Spanning tree of the following graph using greedy approach.	CO1	7 Marks

	b)	State Job sequencing with deadlines problem. Illustrate how to solve it using greedy approach.	CO1	7 Marks

UNIT-IV

7		What is an Optimal Binary Search Tree? By means of an example, describe how to construct it.	CO1	14 Marks

(OR)

8	a)	By considering appropriate example, illustrate the dynamic programming solution of matrix chain multiplication problem.	CO1	7 Marks
	b)	Present and explain the algorithm that finds Hamiltonian cycles in a given graph.	CO1, CO3	7 Marks

UNIT-V

9	a)	Discuss various methodologies of Branch and Bound technique.	CO1	7 Marks
	b)	Explain how the travelling salesperson problem is solved by using FIFO Branch and Bound.	CO1	7 Marks

(OR)

10		Solve the following knapsack instance using Least Cost Branch and Bound: $n = 5$, $(p1, p2, ..., p5) = (10, 15, 6, 8, 4)$, $(w1, w2, ..., w5) = (4, 6, 3, 4, 2)$, and $m = 12$.	CO1	14 Marks

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	List and explain the java buzzwords	CO1	5 Marks
	b)	Explain iteration statements in java with examples	CO1	5 Marks
	c)	What is the difference between class and interface?	CO2	4 Marks
		(OR)		
2	a)	Explain method overloading with example.	CO2	7 Marks
	b)	Explain about final classes, final methods and final variables.	CO2	7 Marks

UNIT-II

3	a)	Explain about the abstract class with example.	CO1	7 Marks
	b)	Explain the importance of inheritance with the help of an example.	CO3	7 Marks
		(OR)		
4	a)	What is interface? Write a program to demonstrate how interfaces can be executed.	CO2	8 Marks
	b)	Explain about user defined packages and write a java program to create a user defined packages.	CO1	6 Marks

UNIT-III

5	a)	Create a try block that is likely to generate three types of exception and incorporate necessary catch blocks to catch and handle them.	CO2	7 Marks
	b)	List out various built-in exception handlers.	CO2	7 Marks
		(OR)		
6	a)	Explain how threads with different priorities execute in environment which supports priorities and which doesn't support priorities.	CO2	5 Marks
	b)	What are the functions available in java related to priority?	CO2	5 Marks
	c)	Develop a java program for producer consumer problem to illustrate the concept of multithreading?	CO3	4 Marks

UNIT-IV

7	a)	What is java collections framework? List out some benefits of collections framework.	CO1	7 Marks
	b)	Explain ArrayList and HashSet standard collection classes with an example.	CO1	7 Marks
		(OR)		
8	a)	Draw an Applet life cycle diagram and explain the methods in it.	CO4	8 Marks
	b)	Develop a java Applet program to explain parameter passing technique with an example.	CO4	6 Marks

THEORY OF COMPUTATION

[Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Prove that a language L is accepted by some €-NFA if and only if L is accepted by some DFA.	CO1	7 Marks
	b)	Compute the €-closure of each state for the given NFA with € transitions and convert it to DFA.	CO5	7 Marks

δ	€	a	b
→ p	{r}	{q}	{p, r}
q	Φ	{p}	Φ
*r	{p, q}	{r}	{p}

(OR)

2	a)	Design a Mealy machine which counts the occurrence of substring '*aab*' in a given input string.	CO3	7 Marks
	b)	Design a DFA to accept odd number of a's and even number of b's, where Σ={a,b}. Show the acceptance of a string with an example	CO3	7 Marks

UNIT-II

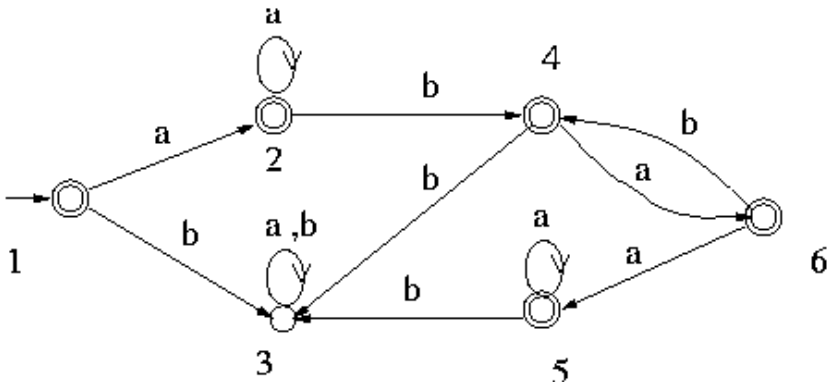
3	a)	Apply State Elimination Technique to convert the following DFA to a regular expression.	CO5	8 Marks

δ	0	1
→* *p*	s	p
q	p	s
r	r	q
s	q	r

	b)	List and explain the closure properties of regular languages.	CO1	6 Marks

(OR)

4	a)	Construct a DFA that accepts all strings corresponding to the regular expression 1*01(0 + 11)*.	CO3	6 Marks
	b)	Minimize the following automata.	CO5	8 Marks



UNIT-III

5	a)	Convert the following grammar into GNF. $S \rightarrow AA \mid a$ $A \rightarrow SS \mid b$	CO3	10 Marks
	b)	Remove useless symbol from the given grammar. $S \rightarrow aAa$ $A \rightarrow bBB$ $B \rightarrow ab$ $C \rightarrow aB.$	CO3	4 Marks

(OR)

6	a)	Construct context –free grammar for the following language $L = \{a^n b^m c^m d^n \mid m, n \geq 1\}$.	CO3	7 Marks
	b)	Prove that the following grammar is ambiguous $S \rightarrow a \mid abSb \mid aAb$ $A \rightarrow bS \mid aAAb$	CO3	7 Marks

UNIT-IV

7	a)	Construct a PDA that recognizes the language $L = \{a^m cb^m \mid m \geq 1\}$ by empty stack and final state.	CO3	10 Marks
	b)	Analyze the PDA acceptance method "From empty Stack to final state"	CO2	4 Marks

(OR)

8	a)	Construct an equivalent PDA for the language Context Free Grammar $S \rightarrow aAB \mid bBA$ $A \rightarrow bS \mid a$ $B \rightarrow aS \mid b$ Show an ID for the string '*abbaaabbbbab*' for the PDA generated with stack description.	CO3	12 Marks
	b)	Define the instantaneous description of a PDA.	CO1	2 Marks

UNIT-V

9	a)	Design a Turing Machine M to implement the function 'Addition' using the subroutine 'copy'.	CO4	10 Marks
	b)	What are Universal Turing Machines?	CO1	4 Marks

(OR)

10	a)	With a neat sketch, explain Turing Machines with semi-infinite tapes.	CO1	4 Marks
	b)	Design a Turing Machine over $\Sigma = \{a, b, c\}$ to accept the language $L=\{a^n b^n c^n \mid n > 0\}$.	CO6	10 Marks

ENVIRONMENTAL STUDIES

[Civil Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Computer Science and Systems Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	What are the objectives and guiding principles of environmental studies?	CO1	7 Marks
	b)	Analyze the various types of land degradation with its causes and solutions.	CO2	7 Marks
		(OR)		
2	a)	Analyze the environmental impact of deforestation.	CO2	7 Marks
	b)	What are the world's food problems and what can we do help solve the world's food problems?	CO3	7 Marks

UNIT-II

3	a)	Analysis the impacts do human activities have on population communities and ecosystem.	CO2	7 Marks
	b)	What are the mega biodiversity centers in the world and hotspots in India?	CO1	7 Marks
		(OR)		
4		Analysis an aquarium as an eco system. Identify the major abiotic and biotic factors. List the members of the producer, primary consumer, secondary consumer and decomposer tropic levels.	CO2	14 Marks

UNIT-III

5	a)	List the five primary and secondary air pollutants and commonly released into the atmosphere and their sources.	CO1	7 Marks
	b)	How is water pollution related to agricultural activities? Why is this growing concern?	CO5	7 Marks
		(OR)		
6	a)	How do you measure noise? What are its?	CO1	3 Marks
	b)	What is frequency and magnitude of noise?	CO1	7 Marks
	c)	What are the various noise controlling measures?	CO1	4 Marks

UNIT-IV

7		Give a case study of Environmental sustainable development.	CO9	14 Marks
		(OR)		
8	a)	How the problems can be solved related to global warming?	CO4	4 Marks
	b)	Discuss the constitution, duties and powers the wild life advisory board under the provisions of the wild life protection Act 1972	CO8	10 Marks

UNIT-V

9	a)	State the impact behind the increased population growth in the less developed nations compared with developed nations noticed.	CO2	7 Marks
	b)	Explain the role of information technology in human health.	CO1	7 Marks
		(OR)		
10		Write a report based on the visit in an industrial area.	CO9	14 Marks

ELECTRONIC CIRCUIT ANALYSIS AND DESIGN

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Draw the circuit of CC amplifier and explain its working using h-model approximation analysis.	CO2	7 Marks
	b)	Explain the operation of CB amplifier.	CO3	7 Marks
		(OR)		
2	a)	Differentiate different types of coupling schemes in multistage amplifiers.	CO2	5 Marks
	b)	Derive the expression for voltage gain of a two-stage RC coupled CE amplifier at mid frequency range.	CO4	9 Marks

UNIT-II

3	a)	Derive the expression for A_v, R_i, R_o of common drain amplifier at high frequencies.	CO3	8 Marks
	b)	Draw the hybrid π model and explain $\mathbf{g_m}$ and $\mathbf{r_{b'e}}$.	CO4	6 Marks
		(OR)		
4	a)	Derive the expression for CE current gain with resistive load.	CO3	8 Marks
	b)	Short circuit current gain of a transistor is 25 at a frequency of 2MHz. If f_β = 200kHz, calculate: i) $\mathbf{f_T}$. ii) hfe. iii) |Ai| at a frequency of10MHz. iv) |Ai| at a frequency of 100MHz.	CO4	6 Marks

UNIT-III

5	a)	Enumerate the effects of negative feedback on the various characteristics of the amplifier with suitable derivations.	CO5	9 Marks
	b)	An amplifier has a voltage gain of 200, before negative feedback is applied. When negative feedback is applied, the nominal gain changes by 10%. Find the percentage change in the overall gain.	CO4	5 Marks
		(OR)		
6	a)	Derive the expression for frequency of oscillations and the minimum gain required for sustained oscillations of the RC phase shift oscillator with neat diagram.	CO3	10 Marks
	b)	An Hartley oscillator is designed with L_1=20μH, L_2=02mH and a variable capacitance. Determine the range of capacitance value, if the frequency is varied between 950 to 2050kHz.	CO4	4 Marks

UNIT-IV

7	a)	Analyze the working of series fed class A power amplifier and derive the equation for efficiency.	CO6	10 Marks
	b)	For transformer, the load connected to the secondary has an impedance of 8Ω. Its reflected impedance on primary is observed to be 648Ω. Calculate the turn ratio.	CO4	4 Marks
		(OR)		
8	a)	Explain the working of complementary symmetry class-B push-pull power amplifier and derive the equation for efficiency.	CO3	8 Marks
	b)	Write short notes on thermal stability and heat sinks.	CO2	6 Marks

UNIT-V

9	a)	Draw and explain the working of double tuned amplifier.	CO2	8 Marks
	b)	The bandwidth for double tuned amplifier is 10kHz. Calculate the bandwidth if such three stages are cascaded.	CO5	6 Marks

(OR)

10		Explain the frequency response of stagger pair and derive the expression for the gain of stagger tuned amplifier.	CO5	14 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

SIGNALS AND SYSTEMS

[Electronics and Instrumentation Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define and sketch the following elementary continuous time signals. i) Unit impulse signal. ii) Exponential. iii) unit step function.	CO3	7 Marks
	b)	Check the system $y(t) = \cos[x(t)]$ is linear, Time invariant and stable.	CO4	7 Marks
		(OR)		
2	a)	Define the following properties for a continuous time system. i) Causal or non causal. ii) Time variant or time invariant. iii) Linear or non linear. iv) Stable or unstable.	CO3	7 Marks
	b)	Test whether the signal is periodic or Not. If so find the fundamental Period. i) $x(t) = e^{j\,10t}$. ii) $x(t) = \cos(\pi/3t) + \sin(\pi/5t)$.	CO4	7 Marks

UNIT-II

3	a)	Explain about complex Fourier spectrum.	CO3	7 Marks
	b)	Find the Fourier transform of x(t) = u(2t), where u(t) is the unit step function.	CO2	7 Marks
		(OR)		
4	a)	State any four properties of Fourier series.	CO2	7 Marks
	b)	Define Fourier transform. Explain the properties of Fourier transform.	CO3	7 Marks

UNIT-III

5	a)	State and prove any four properties of Auto correlation function.	CO2	7 Marks
	b)	Determine the autocorrelation function and energy spectral density function of $x(t) = e^{-at}u(t)$.	CO1	7 Marks
		(OR)		
6	a)	Explain briefly detection of periodic signals in the presence of noise by correlation.	CO2	7 Marks
	b)	Analyze the conditions required by the real time communication system in order to have distortion less transmission.	CO3	7 Marks

UNIT-IV

7	a)	Find the Laplace transform of the following signals. i) Impulse function. ii) unit step function. iii) A sin (w_0t) $u(t)$.	CO2	7 Marks
	b)	Explain how Laplace transform is useful to analyze the stability of system in S domain.	CO1	7 Marks
		(OR)		
8	a)	Prove the scaling and time shifting properties of Laplace transform.	CO4	7 Marks
	b)	Determine the Laplace transform of $x(t) = e^{-at}$ Cos(wt) $u(t)$.	CO1	7 Marks

UNIT-V

9	a)	State and prove the following properties of Z transform. i) Linearity. ii) Time shifting. iii) Differentiation.	CO1	7 Marks
	b)	What is aliasing? Explain its effect on sampling.	CO2	7 Marks
		(OR)		
10	a)	Derive the relation between Z transform and Fourier transform.	CO3	7 Marks
	b)	Using appropriate method find $y(n)$ of the Z transformed signal $Y(Z)=Z/(Z-1)^2$.	CO1	7 Marks

SWITCHING THEORY AND LOGIC DESIGN
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Determine the base of the numbers in each case for the following operations to be correct. i) 14/2 = 5. ii) 54/4 = 13. iii) 24 + 17 = 40. iv) 378 = 275.	CO1	8 Marks
	b)	Perform the subtraction on the given unsigned binary numbers using the 2' s complement method. i) 10011 – 10001. ii) 1001 – 101000.	CO1	6 Marks
		(OR)		
2	a)	Express the following function as a sum of min terms and as a product of max terms: $F(A,B,C,D) = B'D + A'D + BD$.	CO1	6 Marks
	b)	Detect and correct the errors of even parity hamming code word. (i) 1110111. (ii) 0111101.	CO4	8 Marks

UNIT-II

3	a)	Simplify the Boolean functions. using four-variable maps: $F(A, B, C, D) = \Sigma (0, 2, 4, 5, 6, 7, 8, 10, 13, 15)$.	CO1	8 Marks
	b)	Draw a NAND logic diagram that implements the complement of the function: $F(A , B, C, D) = \Sigma(0, 1, 2, 3, 4, 8, 9, 12)$	CO1	6 Marks
		(OR)		
4		Using tabulation method simplify the $F(A, B, C, D) = \Sigma m(1, 3, 8, 10, 15) + \Sigma d(0, 2, 9)$.	CO1	14 Marks

UNIT-III

5	a)	Design a combinational circuit with three inputs and one output. i) The output is 1 when the binary value of the inputs is less than 3. The output is 0 otherwise. ii) The output is 1 when the binary value of theinputs is an even number.	CO3	9 Marks
	b)	Implement a full adder with two 4 x 1 multiplexers.	CO3	5 Marks
		(OR)		
6	a)	Design a combinational circuit that convert the BCD to binary number.	CO3	8 Marks
	b)	Implement the following functions on decoder logic. $Y_1 = \Sigma(0, 1, 3, 6, 7)$, $Y_2 = \Sigma(0, 2, 4, 7)$, $Y_3 = \Sigma(1, 3, 6, 7)$.	CO3	6 Marks

UNIT-IV

7	a)	What is difference between latch and flip flop? Explain about clocked RS flip-flop using NAND gates.	CO1	6 Marks
	b)	Convert D flip-flop into T and JK flip-flops.	CO2	8 Marks
		(OR)		
8	a)	Draw the schematic circuit of JK master slave flip-flop. Give its truth table and justify the entries in the truth table.	CO1	8 Marks
	b)	What are the different types of registers? Explain the Serial Input Parallel Output shift register.	CO6	6 Marks

UNIT-V

9	a)	Explain operation of Johnson counter with a diagram.	CO2	4 Marks
	b)	Explain the operation of universal shift register with suitable examples.	CO1	10 Marks

(OR)

10		A sequential circuit with two D flip-flops A and B, two inputs, x and y ; and one output z is specified by the following next-state and output equations $A(t + 1) = XY' + XB$, $B(t + 1) = XA + XB'$ and $z = A$ i) Draw the logic diagram of the circuit. ii) List the state table for the sequential circuit. iii) Draw the corresponding state diagram.	CO5	14 Marks

CONCRETE TECHNOLOGY
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		What are the Bogue's compounds and explain in detail about their role and influences on the properties of Fresh and Hardened concretes and Durability of concretes?	CO1	14 Marks
		(OR)		
2		Write different classifications aggregates and explain the influences of size, shape, texture and grading on the properties of Fresh and Hardened concretes and Durability of concretes.	CO1	14 Marks

UNIT-II

3		Explain what is the workability of concrete and its influences on the properties of Fresh and Hardened concretes and Durability of concretes.	CO2	14 Marks
		(OR)		
4		Explain about the following properties of hardened concrete and the procedure to measure these properties: i) Compressive strength. ii) Tensile strength. iii) Flexural strength. iv) Maturity Concept of the concrete.	CO2	14 Marks

UNIT-III

5	a)	Explain in detail how the Creep and the Drying Shrinkage will affect the performance of the concrete.	CO1	10 Marks
	b)	Explain the difference between plastic shrinkage and drying shrinkage.	CO1	4 Marks
		(OR)		
6		Explain in detail the procedure to conduct NDT of a structure deteriorated due to the corrosion of reinforcing steel.	CO5	14 Marks

UNIT-IV

7		Explain in detail about ACI methodology of Concrete Mix Design.	CO3	14 Marks
		(OR)		

8	Design a concrete mix for M35 grade for fly ash concrete for the pumped concreting, using rounded aggregate and using IS method. The data for the mix design is as given below:	CO3	14 Marks

i) Type of Cement:	OPC 43 Grade
ii) Max. Size of Aggregate:	20mm
iii) Percentage of Fly Ash:	40 by wt. of total cementitious material,
iv) Exposure Condition:	Severe (RCC)
v) Workability:	100mm (Slump)
vi) Minimum Cement Content:	320 kg/m^3
vii) Maximum w/c Ratio:	0.45
viii) Method of Placing Concrete:	Pumping
ix) Type of Aggregate:	Rounded
x) Super plasticizer:	Sp. Gr. 1.1 and 1.2% by wt. of Total Cementitious Material
xi) Specific gravity of Cement:	3.15
xii) Specific Gravity of Fly Ash:	2.13
xiii) Specific gravity of FA:	2.70
xiv) Specific gravity of CA:	2.80
xv) Water Absorption of FA:	0.7 percent
xvi) Water Absorption of CA:	0.5 percent
xvii) Total Moisture Content FA:	6.0 percent
xviii) Total Moisture Content CA:	2.0 percent
xix) Grading of CA:	Table 2 of IS 383
xx) Grading of Fine Aggregate:	Zone 1
xxi) Characteristic Strength:	M35

UNIT-V

9	Write short notes on following items: i) Mass Concreting. ii) Ready Mixed Concreting. iii) Under Water Concreting.	CO1	14 Marks

(OR)

10	Write short notes on following items: i) Roller Compacted Concreting. ii) Pumped Concreting. iii) Sprayed Concreting (Shot-Creeting).	CO1	14 Marks

ENGINEERING GEOLOGY

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		Give a brief about scope of geology in civil engineering.	CO1	14 Marks
		(OR)		
2		List the types of weathering. Give a brief about Chemical weathering of rocks. What is the significance of weathering of rocks in civil engineering?	CO1	14 Marks

UNIT-II

3		Give a brief about identification of minerals using physical properties.	CO2	14 Marks
		(OR)		
4		Give a brief about how various types of rocks are formed. What are their characteristic features? How do you distinguish major rock types in the field?	CO2	14 Marks

UNIT-III

5	a)	Distinguish between strike and dip with neat sketch.	CO2	6 Marks
	b)	Highlight on civil engineering considerations of faults.	CO2	8 Marks
		(OR)		
6		Give a brief about sub surface investigation using electrical resistivity method. What are the applications of electrical resistivity method in civil engineering?	CO4	14 Marks

UNIT-IV

7		What do you understand about hydrological properties of rocks and highlight on measures to improve groundwater resources?	CO6	14 Marks
		(OR)		
8	a)	Explain the causes of occurrence of earthquakes.	CO5	8 Marks
	b)	Highlight on measures to prevent the occurrence of landslides.	CO5	6 Marks

UNIT-V

9		Give a brief about geological considerations in selection of a suitable site for construction of dam and reservoir.	CO3	14 Marks
		(OR)		
10	a)	Present any case study of a dam how ignorance of geological factors lead to failure of dams.	CO7	7 Marks
	b)	Give a brief about geological considerations in site selection for a bridge.	CO3	7 Marks

ENGINEERING HYDROLOGY
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1 The isohyets drawn for a storm which occurred over a drainage basin of area 950 sq.km yielded the following information. Determine the average depth of rainfall over the basin. CO2 14 Marks

Isohyetal interval in mm	85-75	75-65	65-55	55-45	45-35
Area between isohyetes in sq.km	125	236	264	175	150

(OR)

2 The average annual rainfalls in cm at 4 existing raingauge stations in a basin are 105, 79, 70 and 66. If the average depth of rainfall over the basin is to be estimated within 10% error, determine the additional number of gauges needed. CO2 14 Marks

UNIT-II

3 List infiltration indices and In a 140 min storm the following rates of rainfall were observed in successive 20 min intervals:
6, 6, 18, 13, 2, 2 and 12 mm/h. Assuming the ø index value as 3 mm/h and an initial loss of 0.8 mm, determine the total rainfall, net runoff and W- index for the storm. CO2 14 Marks

(OR)

4 a) Differentiate between evaporation and Evapotranspiration. What are the various factors affecting Evapotranspiration? CO1 7 Marks

b) Describe interception and draw typical interception loss curve with a neat sketch. CO1 7 Marks

UNIT-III

5 During a recuperation test conducted on an open well in a region, the water level in the well was depressed by 3m and it was observed to rise by 1.75m in 75 minutes. What is the specific yield of open wells in that region. What could be the yield from a well of 5m diameter under a depression head of 2.5m. What should be the diameter of the well to givbe a yield of 12 lit/s under a depression head of 2m. CO4 14 Marks

(OR)

6 Describe the estimation of yield of an open well using recuperation test. CO3 14 Marks

UNIT-IV

7 a) Differentiate channel routing and reservoir routing. CO3 7 Marks

b) Describe the most commonly used two techniques for routing of floods through reservoir. CO5 7 Marks

(OR)

8 Route the following flood hydrograph through a river reach for which K=12.0 hr, and x=0.20. At the start of the inflow flood, the outflow discharge is 10 cumec. CO4 14 Marks

Time(hr)	0	6	12	18	24	30	36	42	48	54
Inflow (cumec)	10	20	50	60	55	45	35	27	20	15

UNIT-V

9	Discuss erosion and reservoir sedimentation problems in India.	CO6	14 Marks
	(OR)		
10	Discuss about reservoir sedimentation control.	CO7	14 Marks

CODE No.:16BT40104 SVEC-16

(An Autonomous Institution, Affiliated to JNTUA, Ananthapuramu)

II B.Tech II Semester (SVEC-16) Supplementary Examinations March – 2021

STRUCTURAL ANALYSIS - I
[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		A point with in a loaded beam in under a bending stress of 35Mpa (tensile) and a shear stress of 35Mpa. Find out the principal planes passing through the point and principle stress by using Mohr's circle method.	CO1	14 Marks
		(OR)		
2		The stresses on two perpendicular planes through a point in a body are 30Mpa and 15Mpa both tensile along with a shear stress of 25Mpa. Find the magnitude and direction of principal stresses. Also find the magnitude of maximum shear stress	CO1	14 Marks

UNIT-II

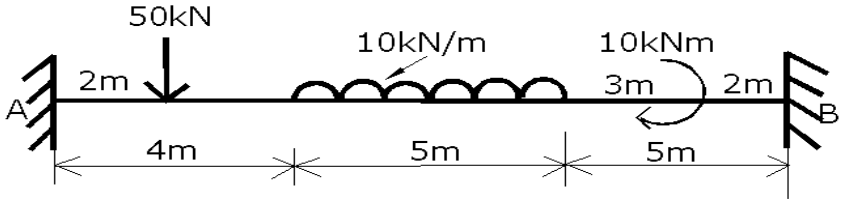
3		Derive expression to find out the equations for slope and deflection of a simply supported beam of length L and uniform EI with a central point load P. evaluate its maximum slope and deflection.	CO1	14 Marks
		(OR)		
4	a)	Using moment area theorem, find the maximum deflection in the simply supported beam carrying uniformly distributed load of intensity w per metre length	CO3	7 Marks
	b)	A cantilever AB of span 6m is fixe at the end A and propped at end B. It carries a point load of 50kN at mid span level of prop is same as that of fixed end. i) Draw S.F.D and B.M.D. ii) Determine reaction at prop.	CO2	7 Marks

UNIT-III

5	a)	Mention the assumptions and limitations of the Euler's formula.	CO1	8 Marks
	b)	A short column of a rectangular section of size 400 x 200mm is considered of a material with a maximum permissible compressive stress of 90N/mm^2 and tensile stress of 25N/mm^2, if the compressive load is 1500kN, at what eccentricity can be applied along two principal axes. If the load is increased to 3000kN, what is the permissible eccentricity along the principal axes?	CO5	6 Marks
		(OR)		
6		A hollow cost iron column with fixed ends supports an axial load of 1000kN. If the column is 6m long and has an external diameter of 250mm. find the thickness of metal required. Use the Rankine's formulae. Taking a constant = 1/6400 and assume working stress of 80N/mm^2.	CO3	14 Marks

UNIT-IV

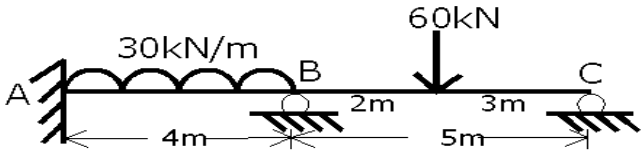
7 a) Calculate the fixed end moments for the given beam CO4 7 Marks



b) A beam AB of span 5m fixed at both ends carries a uniformly distributed load of 18kN/m over the whole span. The right end support B sinks by 15mm. determine the fixed end moments and sketch bending moment diagram. Take E = 200kN/mm^2 and I = 7.5 x 10^{7}mm^4. Find the Fixed end moments for the given beam, support A sinks by 2mm and support B sinks by 3mm. E = 2 x 10^{5}N/mm^2, I = 40000cm^4. CO4 7 Marks

(OR)

8 Analyze the given continuous beam by Clapreyon's theorem of three moments also draw shear force and bending moment diagrams. CO4 14 Marks



UNIT-V

9 A bolt is subjected to an axial pull of 12kN together with a transverse shear force of 6kN. Determine the required diameter of the bolt by using: CO2 14 Marks

i) Maximum principal stress theory.
ii) Maximum Strain theory.
iii) Maximum shear stress theory.

Use the following data:

elastic limit in tension= 300N/mm^2, factor of safety = 3 and poisons ratio = 0.3

(OR)

10 A cylindrical shaft made of steel of yield strength 350MPa is subjected to static load consisting of bending moment of 10kN.m and a torsional moment of 30kN.m. Determine the shaft using: CO1 14 Marks

i) Maximum principal stress theory.
ii) Maximum Strain theory.
iii) Maximum shear stress theory.

Take E = 210Gpa, Poisson's ratio = 0.25 and factor of safety = 2.

WATER SUPPLY ENGINEERING

[Civil Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Prepare a list of factors which are to be considered in the selection of source for a water supply scheme. How does the quality of ground water differ from surface water?	CO2	10 Marks
	b)	Find the alkalinity if the water sample is having CO_3^{-2} ions of 90 mg/L and HCO_3^{-1} of 61 mg/L.	CO1	4 Marks
		(OR)		
2	a)	Classify the different types of springs.	CO1	7 Marks
	b)	Explain how water is drawn from infiltration galleries with a neat sketch.	CO1	7 Marks

UNIT-II

3	a)	Draw a neat sketch of canal intake and explain the working principle. State its merit and demerits.	CO1	4 Marks
	b)	The population of a town as per past census records are furnished below. Predict the population in the year 2031 and 2041 using the Geometrical increase method.	CO2	10 Marks

Census Year	1941	1951	1961	1971	1981	1991	2001	2011
Population	44642	50487	56816	63859	71458	78543	88131	100290

(OR)

4	a)	Explain the working principle of a reservoir intake with a neat sketch.	CO1	7 Marks
	b)	Recommend desirable and permissible quality standards for drinking water as per IS 10500:2012.	CO7	7 Marks

UNIT-III

5	a)	Explain working of rapid sand filter with the help of neat sketch.	CO1	7 Marks
	b)	Estimate the settling velocity of a particle of 0.06mm diameter having specific gravity of 2.65 in temperature of 20^0C. The kinematic viscosity of $\gamma = 1.007 \times 10^{-6}$ m^2/ sec.	CO2	7 Marks
		(OR)		
6	a)	Explain the sedimentation by coagulation process using alum and state the merits and demerits of using alum.	CO5	7 Marks
	b)	Design a slow sand filer for a town of population 60000 persons, provided water supply rate 160Lpcd. Take filtration rate as 2.5 litres per minute, m^2, L/B ratio as 2, maximum demand as 1.8 times average demand.	CO3	7 Marks

UNIT-IV

7	a)	What are the effects of excess concentration of Fluoride in water? List the methods available for defluoridation and explain any one of them.	CO6	7 Marks
	b)	Write short notes on types of valves.	CO6	7 Marks
		(OR)		
8	a)	Discuss about the Ion exchange method of water softening with a sketch.	CO4	7 Marks
	b)	Describe the types of hardness present in water.	CO1	7 Marks

UNIT-V

9		Explain the methods of detection of leakage in the distribution pipes.	CO5	14 Marks
		(OR)		
10		Briefly discuss the design principles involved the design of water supply network to be laid in a multi storied buildings.	CO6	14 Marks

ELECTRICAL MEASUREMENTS
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Derive the Torque equation for Moving iron Instruments.	CO1	7 Marks
	b)	Discuss various errors that occur in measurements and how can they be compensated.	CO1	7 Marks
		(OR)		
2	a)	Describe systematic errors in measuring instruments.	CO1	7 Marks
	b)	A permanent magnet moving coil instrument has a coil of dimensions 15mm x 12mm. The flux density In the air gap is 1.'8 x 10^{-a} Wb/m^2 and the spring constant is 0.14 x 10^{-6} Nm/rad. Determine the number of turns required to produce an angular deflection of 90^0 when a current of 5 mA is flowing through the coil.	CO4	7 Marks

UNIT-II

3	a)	Explain the function of a current transformer. How does a current transformer differ from an ordinary power transformer?	CO2	7 Marks
	b)	List the various parameters that affect the characteristics of current transformer.	CO4	7 Marks
		(OR)		
4	a)	A current transformer has a single turn primary and a 200 turns secondary winding. The secondary supplies a current of 5 A to a non inductive burden of 1Ω resistance. The requisite flux is set up in the core by an mmf of 80 A. The frequency is 50 Hz and the net cross section of the core is 1000 mm^2.	CO4	7 Marks
	b)	Why secondary of current transformer should never be open when the Primary winding is energized?	CO4	7 Marks

UNIT-III

5	a)	Draw a neat sketch and explain the operation of a single phase induction type energy meter.	CO1	7 Marks
	b)	In a dynamometer wattmeter the moving coil bas 500 turns of mean diameter 30 mm. Estimate the torque if the axes of the field and moving coils are at (i) 60° (ii) 90º when the density in the field coils is 15 x 10^{-3} Wb/m^2, the current in moving coil is 0'05 A and the power factor is 0.866.	CO4	7 Marks
		(OR)		
6	a)	Explain the working of Low power factor Electrodynamometer type wattmeter with a neat diagram.	CO5	7 Marks
	b)	A 230V, single phase, watt hour meter has a constant lead of 4 A passing through it for 6 hours at unity power factor. If the meter disk makes 2208 revolutions during this period, what is the meter constant in revolutions per kWh? Calculate the power factor of the load if the number of revolutions made by the meter are 1472, when operating at 230V and 5A for 4 hours.	CO4	7 Marks

UNIT-IV

7	a)	What are the different difficulties encountered in the measurement of high resistances? Explain how these difficulties are overcome.	CO3	7 Marks
	b)	In the Wheatstone bridge, the values of resistances of various arms are P = 1000Ω, Q = 100Ω, R = 2,005Ω and S = 200Ω. The battery has an emf of 5V and negligible internal resistance. The galvanometer has a current sensitivity of 10mm/μA and an internal resistance of 100Ω. Calculate the deflection of galvanometer and the sensitivity of the bridge in terms of deflection per unit change in resistance.	CO5	7 Marks

(OR)

8	a)	List the advantages and disadvantages of Desauty's Bridge.	CO1	5 Marks
	b)	A bridge consists of the following : Arm ab - a choke coil having a resistance R_1 and inductance L_1. Arm bc - a non-inductive resistance R_3. Arm cd - a mica condenser C_4 in series with a non-inductive resistance R_4. Arm da - a non-inductive resistance R_2 when this bridge is fed from a source of 500 Hz, balance is obtained under following conditions: R_2 = 2410Ω; R_3 = 750Ω; C_4 = 0.35μF, R_4 = 64.5Ω. The series resistance of capacitor is = 0.4Ω. Calculate the resistance and inductance of the choke coil. The supply is connected between **a** and **c** and the detector is between **b** and **d**.	CO3	9 Marks

UNIT-V

9	a)	A simple slide wire is used for measurement of current in a circuit. The voltage drop across a standard resistor of 0.1Ω is balanced at 75cm. Find the magnitude of current if the standard cell **emf** of 1.45V is balanced at 50cm.	CO4	7 Marks
	b)	Explain the operation of DC crompton potentiometer with a neat diagram.	CO1	7 Marks

(OR)

10	a)	Explain how lissajous figures can be used in frequency measurement.	CO1	7 Marks
	b)	Explain about each block of digital voltmeter and mention its advantages.	CO1	7 Marks

GENERATION OF ELECTRIC POWER
[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the growth in Electrical power sector in India.	CO7	7 Marks
	b)	List out the site selection factor for hydroelectric power station and thermal power plant.	CO5	7 Marks
		(OR)		
2	a)	Draw the water circuit in a thermal power plant. Explain the state of water in each stage.	CO1	7 Marks
	b)	Compare impulse and reaction turbines	CO2	7 Marks

UNIT-II

3	a)	Classify the nuclear reactors based on fossil fuels, moderators and control rods used. Explain them briefly.	CO1	7 Marks
	b)	Explain Breeder reactor with neat diagram. Also list out its advantages and limitations.	CO1	7 Marks
		(OR)		
4	a)	Discuss the advantages and disadvantages of Diesel power plant. Also mention the reason for not using diesel power plants for generating bulk powers.	CO2	7 Marks
	b)	Draw the layout of gas turbine power plant and briefly explain the function of various components.	CO2	7 Marks

UNIT-III

5	a)	i) Explain the factors affecting the performance of PV Cell. ii) Mention advantages and disadvantages of PV Cell.	CO6	6 Marks
	b)	Explain the classification of wind turbines based on orientation with neat sketches.	CO8	8 Marks
		(OR)		
6	a)	Explain anaerobic digestion for biogas with neat sketch.	CO6	7 Marks
	b)	Briefly describe on microgrid. Mention its significance.	CO8	7 Marks

UNIT-IV

7	a)	A generating station has the following daily load cycle.	CO2	8 Marks

Time (Hours)	0–6	6–10	10–12	12–16	16–20	20–24
Load (MW)	20	25	30	25	35	20

Draw the load curve and load duration curve. Determine:
i) Maximum demand. ii) Units generated per day.
iii) Average load and. iv) Load factor.

	b)	Explain Diminishing Value method to determine the depreciation cost of the power plant.	CO4	6 Marks
		(OR)		

8 a) A generating station has the following daily loads: CO2 7 Marks

0–6 am	6–8 am	8–12 Noon	12–14 pm	14–18 pm	18–20 pm	20–24 pm
4000 kW	3000 kW	8000 kW	2000 kW	7500 kW	3000 kW	4500 kW

Sketch load duration curve with the given data and determine the load factor, demand factor if connected load is 12000 kW, and plant use factor and plant capacity factor assuming capacity of plant as 11000 kW.

b) Determine the cost of generation per kW-hr from the following data. CO4 7 Marks

Capacity of the plant - 120MW
Capital cost - Rs.1,200 per kW installed
Interest and depreciation - 10% on capital
Fuel consumption - 1.2 kg / kW-hr.
Fuel cost - Rs. 40 tone
Salaries, wages, repairs and maintenance - 6,00,000 / year.

The maximum demand is 80 MW and load factor is 40%.

UNIT-V

9 a) Explain the various operation modes of cogeneration systems with neat block diagrams. CO6 7 Marks

b) i) List out the disadvantages of Low power factor. CO3 7 Marks
ii) List out the causes for low power factor.

(OR)

10 a) Predict the risks involved in running cogeneration systems and also list the practical constraints to install cogeneration plant. CO8 6 Marks

b) Explain the series and shunt connection of capacitors with necessary equations and phasor diagrams. CO3 8 Marks

II B.Tech II Semester (SVEC-16) Supplementary Examinations, March 2021

TRANSFORMERS AND INDUCTION MACHINES

[Electrical and Electronics Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Compare between core type and shell type transformers.	CO1	6 Marks
	b)	Derive the EMF equation of a 1-phase transformer and calculate the emf / turn, if the flux is 0.015 Wb at a frequency of 50 Hz.	CO2	8 Marks
		(OR)		
2	a)	Develop the equivalent circuit of a single-phase transformer.	CO1	6 Marks
	b)	A 200 kVA, 1- phase, 3300 / 400 V transformer gave the following results in the short circuit test with 200 V applied to the primary and secondary short circuited, the primary current was full load value and the input power was 1650 W. Calculate the secondary potential difference and the % of regulation when the full load current was passing at a 0.707 p.f. lagging with normal primary voltage.	CO4	8 Marks

UNIT-II

3	a)	Explain the O.C. and S.C. tests on the transformer and hence explain the evolution of equivalent circuit from it.	CO1	9 Marks
	b)	Explain the autotransformer with neat diagram.	CO4	5 Marks
		(OR)		
4	a)	With neat phasor diagram, explain the voltage regulation of three-phase transformer.	CO1	8 Marks
	b)	The maximum efficiency of a 500kVA. 3,300 V/500 V, 50Hz single phase transformer is 97% and occurs at ¾ full load, unity power factor. If the impedance is 10%, calculate the regulation at full load, power factor 0.8 lagging.	CO4	6 Marks

UNIT-III

5	a)	Determine the following impedance parameters of a 3-phase transformer i) Z_p, ii) Z_s, iii) Z_t	CO1	6 Marks
	b)	A 5000 KVA, 3-Phase transformer 6.6/33 KV, Δ/Y, has no load loss of 15KW. The impedance drop at full load is 7%. Find out the primary voltage when a load of 3200 KW at 0.8 power factor is delivered at 33KV.	CO3	8 Marks
		(OR)		
6	a)	Explain about 3- Phase transformation.	CO1	5 Marks
	b)	A 3-Phase step-down transformer is connected to 7.8 KV mains and takes 12A. Calculate the secondary line voltage, line current and output for the following connections. i) Δ/Δ ii) Y/ Y iii) Y/Δ The ratio of turns per phase is 15. Neglect losses.	CO4	9 Marks

UNIT-IV

7	a)	Describe briefly the working principle of slip ring induction motor. Explain how its speed control is effected.	CO1	9 Marks
	b)	Explain about torque-slip characteristics.	CO2	5 Marks

(OR)

8	a)	Draw and explain the equivalent circuit of Induction Motor with the help of phasor diagram.	CO1	8 Marks
	b)	A 3-phase, 50Hz induction motor has a full-load speed of 960rpm. Calculate i) no. of poles; ii) slip frequency; iii) speed of rotor field w.r.t rotor structure, stator structure and stator field.	CO4	6 Marks

UNIT-V

9	a)	Explain about No-load and blocked rotor tests.	CO1	6 Marks
	b)	A 25KW, 415V, 8-pole, delta connected squirrel cage induction motor gave the following test results: No load test: 415V, 10A, 300W Block rotor test: 80V, 40A, 1400W The D.C resistance of the stator winding per phase measured immediately after block rotor test is 0.6Ω. Calculate the additional losses and equivalent circuit parameters.	CO4	8 Marks

(OR)

10	a)	Explain about the speed control of induction motor by cascade operation.	CO1	7 Marks
	b)	Explain the following: i) Crawling ii) Cogging.	CO2	7 Marks

SREE VIDYANIKETHAN ENGINEERING COLLEGE

DESIGN OF MACHINE ELEMENTS-I
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

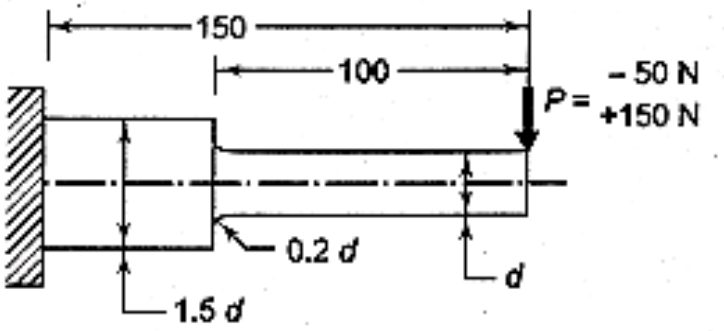
1	a)	Explain the design process with the help of a flow diagram.	CO1	8 Marks
	b)	What are the various manufacturing considerations in machine design? Explain.	CO1	6 Marks

(OR)

2	a)	What are the different theories of failure? Explain briefly.	CO1	8 Marks
	b)	An unknown weight falls through 10 mm on a collar rigidly attached to the lower end of a vertical bar 3m long and 600mm^2 in cross section. If the maximum instantaneous extension is known to be 2mm, determine the corresponding stress and the value of unknown weight. Take E = 200kN/mm^2.	CO2	6 Marks

UNIT-II

3		A cantilever beam made of cold drawn steel 40C8 (σ_{ut} = 600N/mm^2 and σ_{yt} = 380N/mm^2) is shown in figure. The force P acting at the free end varies from –50N to +150N. The expected reliability is 90% and the factor of safety is 2. The notch sensitivity factor at the fillet is 0.9. Determine the diameter 'd' of the beam at the fillet cross section by taking surface finish factor of 0.77, size factor of 0.85 and stress concentration factor of 1.44.	CO4	14 Marks



(OR)

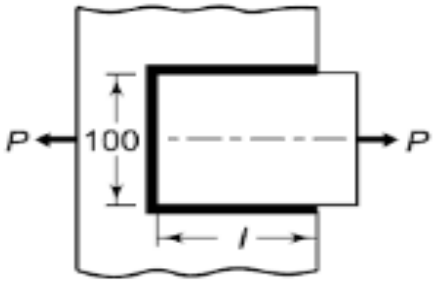
4	a)	What is stress concentration? How does it affect the fatigue strength?	CO1	6 Marks
	b)	A machine member is made of plain carbon steel of ultimate strength 650N/mm^2 and endurance limit of 300N/mm^2. If the member is subjected to a fluctuating torsional moment which varies from –200N-m to 400N-m. Design the member using (i) Goodman's line and (ii) Soderberg line.	CO2	8 Marks

UNIT-III

5	a)	What is bolt of uniform strength? Explain the two methods to make a bolt of uniform strength.	CO1	6 Marks
	b)	Explain the method of determining the size of the bolt when the bracket carries an eccentric load perpendicular to the axis of the bolts.	CO3	8 Marks

(OR)

6	a)	With neat sketches, explain different types of welded joints.	CO1	6 Marks
	b)	A steel plate 100mm wide and 10mm thick is joined with another steel plate by means of single transverse and double parallel fillet welds, as shown in figure. The strength of welded joint should be equal to the strength of the plates to be joined. The permissible tensile and shear stresses for the weld material and the plates are 70 and 50N/mm^2 respectively. Find the length of each parallel fillet weld. Assume tensile force acting on the plates as static.	CO4	8 Marks



UNIT-IV

7	a)	What type of stresses induced in shafts? Explain.	CO1	5 Marks
	b)	Compare the weight, strength and stiffness of a hollow shaft of the same external diameter as that of solid shaft. The inside diameter of the hollow shaft being half the external diameter. Both the shafts made of same material and have same length.	CO4	9 Marks

(OR)

8		Design a bushed pin type flexible coupling for connecting a motor shaft to a pump shaft for the following service conditions: Power to be transmitted = 40 kW, speed of the motor shaft = 1000 r.p.m. The material properties are: The allowable shear and crushing stress for shaft and key material is 40MPa and 80MPa respectively, allowable shear stress for cast iron is 15MPa, Allowable bearing pressure for rubber bush is 0.8N/mm^2 and the material of the pin is same as that of shaft and key. Draw neat sketch of the coupling.	CO3	14 Marks

UNIT-V

9		Design and draw a socket and spigot cotter joint to support a load varying from 30kN in compression to 30kN in tension. The material used is carbon steel for which the following allowable stresses may be used: Tensile stress = 50MPa; Shear stress = 35MPa and Crushing stress = 90MPa.	CO3	14 Marks

(OR)

10	a)	Distinguish between cotter joint and knuckle joint.	CO1	4 Marks
	b)	Describe in detail the design procedure of knuckle joint.	CO1	10 Marks

II B.Tech II Semester (SVEC-16) Supplementary Examinations, March 2021

DYNAMICS OF MACHINERY

[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Briefly explain the working of cone clutch with neat diagram.	CO1	4 Marks
	b)	A plate clutch has three discs on the driving shaft and two discs on the driven shaft, providing four pairs of contact surfaces. The outside diameter of the contact surfaces is 240 mm and inside diameter 120 mm. Assuming uniform pressure and $\mu = 0.3$; find the total spring load pressing the plates together to transmit 25 kW at 1575 r.p.m. If there are 6 springs each of stiffness 13 kN/m and each of the contact surfaces has worn away by 1.25 mm, find the maximum power that can be transmitted, assuming uniform wear.	CO2	10 Marks

(OR)

2	a)	Discuss the working of prony brake dynamometer with neat sketch and derive the expression for brake power.	CO1	4 Marks
	b)	A simple band brake operates on a drum of 600 mm in diameter that is running at 200 r.p.m. The coefficient of friction is 0.25. The brake band has a contact of 270°, one end is fastened to a fixed pin and the other end to the brake arm 125 mm from the fixed pin. The straight brake arm is 750 mm long and placed perpendicular to the diameter that bisects the angle of contact. i) What is the pull necessary on the end of the brake arm to stop the wheel if 35 kW is being absorbed ? What is the direction for this minimum pull ? ii) What width of steel band of 2.5 mm thick is required for this brake if the maximum tensile stress is not to exceed 50 N/mm^2?	CO2	10 Marks

UNIT-II

3	a)	Explain the effect of Gyroscopic couple on Naval ship, when it takes right and left turn, engine is rotating both clockwise and anti clockwise looking from bow side with neat sketches.	CO2	7 Marks
	b)	Find the angle of inclination with respect to the vertical of a two wheeler negotiating a turn. Given: combined mass of the vehicle with its rider 250 kg ; moment of inertia of the engine flywheel 0.3 kg-m^2 ; moment of inertia of each road wheel 1 kg-m^2; speed of engine flywheel 5 times that of road wheels and in the same direction; height of centre of gravity of rider with vehicle 0.6 m; two wheeler speed 90 km/h; wheel radius 300 mm; radius of turn 50 m.	CO3	7 Marks

(OR)

4	a)	Derive the expression for energy stored in Flywheel?	CO2	6 Marks
	b)	The turning moment diagram for a multi cylinder engine has been drawn to a scale 1 mm = 600 N-m vertically and 1 mm = 3° horizontally. The intercepted areas between the output torque curve and the mean resistance line, taken in order from one end, are as follows: + 52, – 124, + 92, – 140, + 85, – 72 and + 107 mm^2, when the engine is running at a speed of 600 r.p.m. If the total fluctuation of speed is not to exceed ± 1.5% of the mean, find the necessary mass of the flywheel of radius 0.5 m.	CO3	8 Marks

UNIT-III

5	a)	Briefly discuss about the sensitiveness and stability of governor?	CO1	4 Marks
	b)	In a spring loaded governor of the Hartnell type, the mass of each ball is 5 kg and the lift of the sleeve is 50 mm. The speed at which the governor begins to float is 240 r.p.m., and at this speed the radius of the ball path is 110 mm. The mean working speed of the governor is 20 times the range of speed when friction is neglected. If the lengths of ball and roller arm of the bell crank lever are 120 mm and 100 mm respectively and if the distance between the centre of pivot of bell crank lever and axis of governor spindle is 140 mm, determine the initial compression of the spring taking into account the obliquity of arms. If friction is equivalent to a force of 30 N at the sleeve, find the total alteration in speed before the sleeve begins to move from mid-position.	CO3	10 Marks

(OR)

6	a)	Derive the expression for mean speed of a porter governor.	CO2	6 Marks
	b)	All the arms of a Porter governor are 178 mm long and are hinged at a distance of 38 mm from the axis of rotation. The mass of each ball is 1.15 kg and mass of the sleeve is 20 kg. The governor sleeve begins to rise at 280 r.p.m. when the links are at an angle of 30° to the vertical. Assuming the friction force to be constant, determine the minimum and maximum speed of rotation when the inclination of the arms to the vertical is 45°.	CO3	8 Marks

UNIT-IV

7	a)	What is the need of balancing in rotary and reciprocating engine? Explain in detailed?	CO1	4 Marks
	b)	A, B, C and D are four masses carried by a rotating shaft at radii 100,125, 200 and 150 mm respectively. The planes in which the masses revolve are spaced 600 mm apart and the mass of B, C and D are 10 kg, 5 kg, and 4 kg respectively. Find the required mass A and the relative angular settings of the four masses so that the shaft shall be in complete balance.	CO4	10 Marks

(OR)

8	a)	Derive the expression for variation of tractive force induced due the partial balancing of two cylinder locomotives.	CO2	4 Marks
	b)	The following data apply to an outside cylinder uncoupled locomotive: Mass of rotating parts per cylinder = 360 kg; Mass of reciprocating parts per cylinder = 300 kg; Angle between cranks = 90°; Crank radius = 0.3 m; Cylinder centres = 1.75 m; Radius of balance masses = 0.75 m; Wheel centres = 1.45 m. If whole of the rotating and two-thirds of reciprocating parts are to be balanced in planes of the driving wheels, find: i) Magnitude and angular positions of balance masses, ii) Speed in kilometres per hour at which the wheel will lift off the rails when the load on each driving wheel is 30 kN and the diameter of tread of driving wheels is 1.8 m, and 3. Swaying couple at speed arrived at in (2) above.	CO4	10 Marks

UNIT-V

9	a)	Derive the expression for whirling speed of the shaft.	CO6	6 Marks
	b)	A machine of mass 75 kg is mounted on springs and is fitted with a dashpot to damp out vibrations. There are three springs each of stiffness 10 N/mm and it is found that the amplitude of vibration diminishes from 38.4 mm to 6.4 mm in two complete oscillations. Assuming that the damping force varies as the velocity, determine: i). the resistance of the dashpot at unit velocity; ii). the ratio of the frequency of the damped vibration to the frequency of the undamped vibration; and iii). the periodic time of the damped vibration.	CO5	8 Marks

(OR)

10	a)	Derive the natural frequency of transverse vibrations of shaft subjected to different loads by using Dunkerley's method.	CO2	6 Marks
	b)	The mass of a single degree damped vibrating system is 7.5 kg and makes 24 free oscillations in 14 seconds when disturbed from its equilibrium position. The amplitude of vibration reduces to 0.25 of its initial value after five oscillations. Determine: i) stiffness of the spring, ii) logarithmic decrement, and iii) damping factor, i.e. the ratio of the system damping to critical damping.	CO5	8 Marks

FLUID MECHANICS
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1		The dynamic viscosity of oil, used for lubrication between a shaft and sleeve is 6 poise. The shaft is of diameter 0.4m and rotates at 190 r.p.m. Calculate the power lost in the bearing for a sleeve length of 90mm. The thickness of the oil film is 1.5mm.	CO5	14 Marks
		(OR)		
2		Explain the following fluid properties. i) Surface tension. ii) Viscosity. iii) Weight density. iv) Specific gravity.	CO1	14 Marks

UNIT-II

3		State the force momentum equation. How will you apply momentum equation for determining the force exerted by a flowing liquid in a pipe bend?	CO4	14 Marks
		(OR)		
4		The water is flowing through a pipe having diameters 20cm and 10cm at sections 1 and 2 respectively. The rate of flow through the pipe is 35litres/sec. The section 1 is 6m above datum and section 2 is 4m above datum. If the pressure at section 1 is 39.24 N/cm^2, find the intensity of pressure at section 2.	CO2	14 Marks

UNIT-III

5	a)	Give explanation of equivalent pipe and flow through parallel pipes.	CO1	7 Marks
	b)	For a town water supply, a main pipe line of diameter 0.4m is required. As pipes more than 0.35m diameter are not readily available, two parallel pipes of same diameter are used for water supply. If the total discharge in the parallel pipe is same as in the single main pipe, find the diameter of parallel pipe. Coefficient of discharge to be the same for all the pipes.	CO6	7 Marks
		(OR)		
6		Derive an expression for the force exerted by a jet of water on a stationary curved vane in the direction of flow.	CO5	14 Marks

UNIT-IV

7	a)	Give the classification of turbines with detailed explanation.	CO1	6 Marks
	b)	Describe briefly the function of various main components of pelton turbine with neat sketches.	CO1	8 Marks
		(OR)		
8		A turbine develops 7460 kW under a head of 24.7m at 135 r.p.m. What is the specific speed? What would be its normal speed and output under a head of 20.5m?	CO3	14 Marks

UNIT-V

9	a)	Define centrifugal pump and explain the working procedure of a single-stage centrifugal pump with neat sketch.	CO1	7 Marks
	b)	A centrifugal pump is to discharge 0.118m^3/s at a speed of 1450 r.p.m against head of 25m. The impeller diameter is 250mm, its width at outlet is 50mm and manometer efficiency is 75%. Determine the vane angle at the outer periphery of the impeller.	CO3	7 Marks

(OR)

10		Explain construction and working principle of a single acting reciprocating pump with a neat diagram.	CO1	14 Marks

MACHINE TOOLS AND MODERN MACHINING PROCESSES
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Describe various types of chips formed in metal cutting.	CO1	7 Marks
	b)	Distinguish between orthogonal and oblique cutting.	CO2	7 Marks
		(OR)		
2	a)	Enumerate the factors affecting tool life.	CO1	7 Marks
	b)	Discuss the Merchant's circle diagram and its importance in machining.	CO1	7 Marks

UNIT-II

3	a)	Explain about different operations performed on Lathe.	CO1	7 Marks
	b)	List various specifications of Lathe in detail.	CO1	7 Marks
		(OR)		
4	a)	Explain the working of Capstan and Turret Lathe with neat sketch.	CO1	7 Marks
	b)	Explain the working of Single Spindle Automatic Lathe.	CO1	7 Marks

UNIT-III

5	a)	Explain the working principle and principal parts of Planer with a neat diagram.	CO1	7 Marks
	b)	Distinguish between operations performed on Shaping and Slotting machines.	CO2	7 Marks
		(OR)		
6	a)	Design a boring machine to enlarge a 10mm drilled hole.	CO3	7 Marks
	b)	List different operations performed on a drilling machine.	CO1	7 Marks

UNIT-IV

7	a)	Compare about Grinding, Lapping and Honing operations.	CO1	7 Marks
	b)	Analyze the need for dressing of grinding wheels.	CO2	7 Marks
		(OR)		
8	a)	Discuss about Up milling and Down milling.	CO1	7 Marks
	b)	Explain the working of Horizontal milling machine with a neat sketch.	CO1	7 Marks

UNIT-V

9	a)	Analyze the importance to shift for Modern machining processes.	CO4	7 Marks
	b)	State the advantages of Abrasive Jet Machining and its applications.	CO5	7 Marks
		(OR)		
10	a)	Explain the principle involved in Electro Chemical Machining with a neat sketch.	CO5	7 Marks
	b)	State the advantages and limitations of Laser Beam Machining.	CO5	7 Marks

THERMAL ENGINEERING-I
[Mechanical Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Discuss the relative merits and demerits of internal combustion and external combustion engines.	CO1	7 Marks
	b)	Draw the valve-timing diagram of four-stroke engine and explain the various processes.	CO1	7 Marks
		(OR)		
2	a)	Describe with working principle theoretical and actual valve timing diagrams of four stroke C.I Engine	CO1	7 Marks
	b)	Explain the effect of temperature on specific heats. What is the physical explanation for this variation on the performance of I.C Engine?	CO2	7 Marks

UNIT-II

3	a)	What are the basic parameters that influence the flame speed? Discuss the influence of Engine variables on the flame speed.	CO1	7 Marks
	b)	What is meant by abnormal combustion? Explain the phenomena of knock in S.I Engines.	CO1	7 Marks
		(OR)		
4	a)	What are the different required characteristics of a good combustion chamber for S.I. Engine? Explain.	CO1	7 Marks
	b)	Explain the different stages of combustion in C.I Engines.	CO1	7 Marks

UNIT-III

5	a)	Explain the measurement of brake power of I.C Engine by using rope brake dynamometer.	CO4	7 Marks
	b)	A four cylinder, four stroke diesel engines has brake mean effective pressure of 5.5 bar at full load speed of 600 r.p.m and specific fuel consumption of 0.25 kg/kWh. The cylinder has bore of 25cm and stroke length of 35cm. The air fuel ratio is measured as 26 from the exhaust gas analysis. The ambient conditions are 1 bar, 27^0C. Assuming the calorific value of fuel as 44 MJ/kg. Determine the brake thermal efficiency and the volumetric efficiency. Also find out brake power.	CO3	7 Marks
		(OR)		
6	a)	Define indicated power and how it can be determined experimentally for multi cylinder engine.	CO1	7 Marks
	b)	A six cylinder, gasoline engine operates on the four stroke cycle. The bore of each cylinder is 80mm and the stroke is 100mm. The clearance volume in each cylinder is 70cc. At a speed of 4000 r.p.m and the fuel consumption is 20 kg/h. The torque developed is 150 N-m. Calculate: i) the brake power. ii) the brake mean effective pressure. iii) brake thermal efficiency if the calorific value of the fuel is 43000 kJ/kg. iv) the relative efficiency if the ideal cycle for the engine is Otto cycle.	CO3	7 Marks

UNIT-IV

7	a)	How the exhaust and flue gas analysis carried out?	CO5	7 Marks
	b)	The percentage composition of sample of liquid fuel by weight is C = 84.8% and H_2 = 15.2%. Calculate: i) the weight of air needed for the combustion of 1Kg of fuel. ii) the volumetric composition of the products of composition, if 15% excess air id supplied.	CO4	7 Marks

(OR)

8	a)	What is the difference between Higher Heating Value (HHV) and Lower Heating Value (LHV) of the fuel?	CO1	7 Marks
	b)	One kg of octane (C_8H_{18}) is burned with 200% theoretical air. Assuming complete combustion determine. i) Air-fuel ratio. ii) Dew point of the products at a total pressure 100 kPa.	CO2	7 Marks

UNIT-V

9	a)	Define volumetric efficiency and explain the effect of clearance volume and pressure ratio on volumetric efficiency.	CO1	7 Marks
	b)	A single stage double acting air compressor running at 300 r.p.m, delivers 15m^3 of free air per minute at 700 kPa and 200^{0}C. If the clearance volume is 8% of swept volume and if the index of compression and expansion are same. Find the clearance swept volume of piston and volumetric efficiency. Initial air conditions are 10 kP and 15^{0}C.	CO2	7 Marks

(OR)

10	a)	Explain the working principle of single stage single acting reciprocating air compressor with the help of neat sketch.	CO1	7 Marks
	b)	A single-stage, double acting compressor has a free air delivery of 14 m^3/min, measured at 1.013 bar and 15^{0}C. The pressure and temperature in the cylinder during induction are 0.95 bar and 15^{0}C. The delivery pressure is 7 bar and index of compression and expansion is 1.3. The clearance volume is 5% of the swept volume. Calculate: (i) Indicated power required. (ii) Volumetric efficiency.	CO2	7 Marks

ANALOG COMMUNICATIONS
[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	The modulating signal in an AM system is a multiple-tone signal given by $m(t) = A_1 \text{ Cos } \omega_1 t + A_2 \text{ Cos } \omega_2 t + A_3 \text{ Cos } \omega_3 t$. The signal m(t) modulates carrier $A_c \text{ Cos } \omega_c t$. Plot the single-sided spectrum and find the bandwidth of the modulated signal. Assume that $\omega_3 > \omega_2 > \omega_1$ and $A_1 > A_2 > A_3$.	CO1	7 Marks
	b)	Draw and explain the circuit diagram of linear detector and derive the condition for choice of time constant.	CO1	7 Marks
		(OR)		
2	a)	Explain coherent detection of DSBSC modulated wave.	CO1	7 Marks
	b)	Considering the modulating and carrier waves as sinusoids, explain the single tone modulation of SSB wave with necessary expressions, wave-forms and spectrums. Find the percentage of power saved in SSB when compared with AM system.	CO5	7 Marks

UNIT-II

3	a)	Explain the principle of Angle Modulation. Derive and explain phase deviation, modulation index, frequency deviation and percent.	CO2	7 Marks
	b)	Design Armstrong FM generator for the generation of WBFM with frequency deviation 75 kHz and carrier frequency 100 MHz, with the narrow band carrier as 100 kHz and second carrier as 9.5 MHz, find the suitable multiplying factors. Assume the message signal is defined in the range 100-15 kHz.	CO4	7 Marks
		(OR)		
4	a)	With relevant expressions explain the demodulation of FM signals using phase locked loop.	CO1	8 Marks
	b)	Discuss the transmission bandwidth of FM waves.	CO2	6 Marks

UNIT-III

5	a)	Draw the AM receiver model and determine the SNR of the AM System.	CO2	7 Marks
	b)	Derive the figure of merit of DSB-SC.	CO2	7 Marks
		(OR)		
6	a)	What is pre-emphasis and de-emphasis and explain their operation.	CO2	9 Marks
	b)	Explain the threshold effect in frequency modulation.	CO2	5 Marks

UNIT-IV

7	a)	Classify radio transmitters based on the type of modulation and service.	CO1	7 Marks
	b)	In a broadcast super heterodyne receiver having an RF amplifier with quality factor of the antenna coupling circuit (at the input to the mixer) is 100. If the intermediate frequency is 455 kHz, calculate: i) The image frequency and its rejection ratio at 1000 kHz. ii) The image frequency and its rejection ratio at 25 MHz.	CO3	7 Marks
		(OR)		

8	a)	With the help of neat diagram, explain the working of the typical directly modulated FM transmitter.	CO2	7 Marks
	b)	Explain the following terms: i) Sensitivity. ii) Selectivity. iii) Image frequency and its rejection. iv) Fidelity of a super heterodyne receiver.	CO2	7 Marks

UNIT-V

9	a)	Explain the principle of PAM generation with a help of block diagram. Derive the mathematical expressions.	CO1	8 Marks
	b)	Write merits and demerits of PAM.	CO1	6 Marks

(OR)

10	a)	With a suitable circuit and waveforms, explain the generation and detection of PWM.	CO1	7 Marks
	b)	Compare PAM, PWM, PPM modulation schemes.	CO1	7 Marks

DIGITAL IC APPLICATIONS

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Explain the following terms with reference to CMOS logic. i) Logic '0' and Logic '1'. ii) Noise margin. iii) Power supply rails. iv) Propagation delay.	CO1	7 Marks
	b)	Assess the characteristics of CMOS Dynamic Electrical **b**ehavior.	CO5	7 Marks
		(OR)		
2	a)	Reproduce basic ECL inverter/Buffer with its truth table. Also recognize the importance of ECL.	CO6	7 Marks
	b)	Elaborate Steady State Electrical behavior of CMOS logic.	CO1	7 Marks

UNIT-II

3	a)	Develop a flow chart for Verilog HDL design flow. Explain each step in detail.	CO3	7 Marks
	b)	Differentiate the basic description styles supported by Verilog HDL.	CO2	7 Marks
		(OR)		
4	a)	Assess the structural design elements of Verilog HDL with a suitable example.	CO2	7 Marks
	b)	Summarize the data types in Verilog HDL.	CO1	7 Marks

UNIT-III

5	a)	Draw the IC diagram of 74 x 999 adder and explain its operation.	CO1	7 Marks
	b)	Explain clearly about 74 x 148 priority encoder with its logic symbol. Give its truth table and write Verilog HDL code in any one of the model.	CO4	7 Marks
		(OR)		
6	a)	Implement 4 bit adder using 1 bit full adder and write Verilog HDL code for this implementation.	CO4	7 Marks
	b)	Design a 4-to-16 decoder using 74 x 138 ICs. Write the corresponding source code using module instantiation.	CO4	7 Marks

UNIT-IV

7	a)	Design a mod-129 counter using only two 74 x 163s and no additional gates.	CO6	7 Marks
	b)	Develop the flow chart for designing sequential logic.	CO3	7 Marks
		(OR)		
8	a)	Use 74 x 74IC to obtain 4-bit binary synchronous counter and develop Verilog HDL program for this logic using data flow style.	CO6	7 Marks
	b)	Design an 8-bit serial-in and parallel-out shift register with flip-flops. Explain the operation with the help of timing waveforms.	CO3	7 Marks

UNIT-V

9	a)	Suggest alternative ways of representing the ROM.	CO5	7 Marks
	b)	Write short notes on 2-D decoding commercial types-ROM.	CO1	7 Marks
		(OR)		
10	a)	Highlight the differences of PROM, EPROM and EEPROM technologies.	CO5	7 Marks
	b)	Outline the details of internal structure of 64K x 1 DRAM with the help of timing waveforms.	CO1	7 Marks

ELECTROMAGNETIC THEORY AND TRANSMISSION LINES

[Electronics and Communication Engineering]

Time: 3 hours **Max. Marks: 70**

Answer One Question from each Unit
All questions carry equal marks

UNIT-I

1	a)	Define electric field strength. Derive an expression for electric field strength of an infinite line charge.	CO1	7 Marks
	b)	Two point charges -4μc and 5μc are located at (2,-1,3) and (0,4,-2) respectively. Find the potential at (1,0,1), 1f the zero potential is at infinity.	CO1	7 Marks
		(OR)		
2	a)	State Ampere's circuital law. Derive an expression for the magnetic field intensity of an infinite coaxial transmission line.	CO1	7 Marks
	b)	Given the magnetic vector potential $\mathbf{A}=-\rho^2/4\ \mathbf{a_z}$ Wb/m, calculate the total magnetic flux crossing the surface $\phi = \pi/2$, $1 \le \rho \le 2$m, $0 \le z \le 5$m.	CO1	7 Marks

UNIT-II

3	a)	Explain about transformer electromotive forces.	CO2	7 Marks
	b)	In free space, E=20 cos(wt-50x) a_y V/m. Calculate : i) Displacement current density. ii) Magnetic field intensity.	CO2	7 Marks
		(OR)		
4	a)	Discuss about the magnetic boundary conditions.	CO2	7 Marks
	b)	Given, $H_1=-2a_x+6a_y+4a_z$ A/m in region y-x-2≤0, where $\mu_1=5\mu_0$. Calculate b_2 in region y-x-2≥0, where $\mu=2\mu_0$.	CO2	7 Marks

UNIT-III

5	a)	State and explain Poynting's theorem.	CO6	7 Marks
	b)	A plane wave travelling in +y direction in a lossy medium ($\varepsilon_r=4,\mu_r=1,\sigma=10^{-2}$S/m) has E=30 cos($10^9\pi t+\pi/4$) a_z V/m at y=0. Find (i) E at y=1m, t=2ns (ii) H at y=2m, t=2ns.	CO4	7 Marks
		(OR)		
6	a)	Explain about Reflection of a plane wave at an oblique incidence.	CO5	7 Marks
	b)	In free space, **H**=0.2 cos (ωt-βx) $\mathbf{a_z}$A/m. Find the total power passing through a square plate of side 10cm on plane x+y=1.	CO4	7 Marks

UNIT-IV

7	a)	Derive the condition for a distortion less line.	CO6	7 Marks
	b)	A distortion less line has $Z_0=60\Omega,\alpha=20$mNP/m, phase velocity u=0.6C, where C is velocity of light in vacuum. Find R,L,G,C and λ at 100MHz.	CO1	7 Marks
		(OR)		
8	a)	Derive an expression for the input impedance of a transmission line.	CO6	7 Marks
	b)	A telephone line has R=30Ω/km, L=100mH/km, G=0 and C=20μF/km. At f=1KHz, calculate i) the characteristic impedance of the line ii) propagation constant and phase velocity.	CO1	7 Marks

UNIT-V

9	a)	Explain the significance of an infinite length line. Also explain about lossless lines.	CO1	7 Marks
	b)	A lossless 60Ω line with input impedance Z_{in}=120-j60Ω and load impedance Z_L=60+j60Ω. i) Find the reflection coefficient and VSWR at load. ii) Find the distance between load and generator.	CO6	7 Marks
		(OR)		
10	a)	Discuss about SC and OC lines and explain with their input impedances.	CO1	7 Marks
	b)	A 75Ω lossless line is to be matched to a load of 100-j80Ω with a shorted stub. Calculate the stub length, its distance from load and the necessary stub admittance.	CO6	7 Marks
